

# Automatically maintained citations with Wikidata and Cite Q

Mike Peel, Andy Mabbett  
16 August 2021

WIKIMANIA

# Use Wikidata to display references

# Simplify wikitext - and time writing out citations

<ref>{{Cite journal|author = J. E. Carlstrom|title = The 10 Meter South Pole Telescope |journal = Publications of the Astronomical Society of the Pacific |volume = 123 |issue = 903 |pages = 568–581 |arxiv = 0907.4445 |display-authors=etal|year = 2011 |doi = 10.1086/659879 |bibcode=2011PASP..123..568C}}</ref>

<ref>{{Cite Q|Q56603073}}</ref>

# Automatic updates

Add a new article's sitelink to the Wikidata item

All citations update to also link to that article

Correct a URL

All citations updated

# Intrinsically multilingual

Translate the article into another language

No translation of the citation needed

Edit the reference in your language

All uses of it across all language wikis auto-update

# Can track changes

Article is retracted by the authors

Add a statement to Wikidata, and find all uses of the  
citation

(through a shared tracking category)

# Local changes allowed

Best thing is to edit on Wikidata

All citations are then updated

But you can also override (or suppress) parameters locally

e.g., {{Cite Q|Q25766745 |**pages=48-52**}}

Can also set parameters locally

"**display-authors=4**" -> 4 authors displayed

# On multiple wikis

With thanks to Liam Wyatt for support

# Part of Wikicite

An initiative to develop open citations and linked bibliographic data through grants, conferences, technical workshops, outreach events

WikiCite community volunteers have added millions of journal articles to Wikidata in the last few years

Having citations in structured data makes it easier to run queries/update URLs/generate use statistics/etc. Also, fully multilingual

Meta: [[WikiCite]]. WikiData: [[WikiProject Source MetaData]]

# Wikidata has many citations

Many references are already on Wikidata

Bots (and humans!) are continuously importing more

You can also manually add them to Wikidata  
or...

# Tools to add citations

Zotero to export to QuickStatements format, then import to Wikidata (See <https://w.wiki/pi2>)

Import using SourceMD using PMID or DOI  
(use the old version; not ISBN or ORCID at the moment)

<https://www.wikidata.org/wiki/Wikidata:Zotero>

<https://www.wikidata.org/wiki/Wikidata:SourceMD>

# THANK YOU
