General Adele, blk b (Davis)	2	4	dr
Arrow, b g (Cox)	3	6	dr

Time—2:07¼, 2:07¼, 2:05¼.

Columbus, September 17.—After one heat each in the 2:09 trot, 2:16 trot and 2:09 pace rain caused the races to be postponed until Wednesday. In the 2:09 trot Sonoma Girl beat Highball the first heat

in 2:05¼, the fastest time made in a race this year, and the race went over until to-morrow.

Columbus, September 18.—Sonoma Girl, tired by the heavy footing this afternoon on the Columbus Grand Circuit track, finished a neck ahead of Highball in the second heat of the Hoster Columbus \$10,000 Stakes, and thereby clinched the victory for which she made a sensational start on Tuesday. The crack pair of trotters set a furious clip to the half, considering the conditions of the course. Sonoma Girl was a length ahead there in 1:01½. Highball rallied desperately fifty yards from the finish, but was nearer out than McHenry's mare. After the first half of the third and final mile had been done by Sonoma Girl in 1:02¾, she showed good finishing qualities and easily won the heat. Highball was so tired that Jack Leyburn beat him out of third place. Sonoma Girl's total winnings amounted to \$4,250.

Lillian R. had no trouble whatever in going through to victory in the 2:09 trot. Close finishes ruled in the 2:09 pace, five horses being right together when Schermerhorn won the third heat of the race. Before it started the judges put W. L. Snow behind Kingmore. Ward M. was the first choice in a lot of sixteen 2:17 trotters that made their first start as the last heat of the dreary afternoon. He won handily, Kenneth M. being two lengths behind.

Kentucky Todd and General Watts will start to-morrow in the trotting division of the Kentucky Stock Farm Futurity. Summaries:

Trotting, 2:09 class (one heat Tuesday), purse \$3,000—

Lillian R., b m by J. T. (McDevitt)	1	1	1

Time—2:05¼, 2:07¼, 2:09¼.

AT STOCKTON TRACK.

The San Joaquin Valley Driving Club's matinee at the Stockton race track Admission Day was all that the officers of the club or any of the spectators could have desired. The races were good, there were no long waits, there were no accidents and no disputes. It was nearly dark before the last event was decided. The summaries:

First race—

Fritz Wille's Gilt Edge Dick	2	1	1
J. Jones' Princess	3	3	2
Mrs. Pope's Dick	1	2	d

Time—2:27¼, 2:28, 2:29.

Second race—

W. R. Jacobs' Mack	2	3	1	1
E. Miller's Milton Maid	1	2	2	2
H. Prole's Mollie	3	1	3	3
Fred Johnson's Courthouse	4	d		

Time—1:29, 1:26, 1:23, 1:22.

Third race—

Mr. Sherwood's Prince	1	2	1
C. Barling's Bob Ingersoll	2	1	2

Time—1:08½, 1:09¼, 1:10.

Fourth race—

Lavin's Golbert	1	2	1
Friedberger's Bessie	2	1	4
W. Hersom's Stumbling Tom	3	4	2
Meyer's Linden	4	3	3

Time—1:24¼, 1:22, 1:24.

Fifth race—

Frank McMurray's McRay	1	2	1
Archambault's Babe	2	1	2

Time—1:41, 1:37¼, 1:32.

Sixth race—

Donovan's Chappo	2	1	1
Capurro's Bess	1	2	2

Time—1:15¾, 1:16, 1:17.

Special race—

Mrs. Shippe's Bell	1	1
Mrs. McIntosh's Blonde	2	2

Time—1:24¼, 1:24¼.

It is reported that an offer of \$20,000 was refused for Blue Hill (2) 2:15¼ recently. His Russian owner refuses to put a price on him.

Drink Jackson's Napa Soda.

THE FARM

OUTCROSSES AND INBREEDING.

This subject should be studied by every flock owner who desires to improve his sheep. An authority on such matters says:

I do not deem an outcross a violent one, even though not the most remote relationship exists, if only the outcrossing animal is identical in type rendered so by some generations of ancestors of similar conformation and character. Such outcrosses are most desirous, and if the breeder can always obtain them there would be no necessity for inbreeding. On the other hand, any animal of the line, however near he may be related, if the type is wrong, the cross, with him, is more or less violent in degree, dependent upon the remoteness of the type he represents in his make-up.

Type is type, with a ever watchful and zealous effort to improve health, constitution, feeding qualities and breed character, is the motto that I would adopt, and let relationship take care of itself in the main; but, when possible, introduce unrelated animals to compromise with the project we all entertain, regarding near relationship, but never sacrifice one single iota of the original purpose of individual stamp for an outcross that may do incalculable harm in the way of set-backs that will take years to correct.

I have been wholly unable to see how animals of perfect health, perfect digestion, perfect form, perfect disposition, perfect reproductive powers and prepotency, can deteriorate however much they may be in-bred, if only all these attributes are kept intact by proper care and attention, always discarding those that are not so endowed, if by accident they happen to be reproduced from the breeding herd.

The most successful flock of Lincoln sheep I ever bred were lambs out of ewes with a common sire. I hazarded the risk because the ram was great in all the essentials and very prepotent. Those lambs were subsequently bred to unrelated sires and the best results followed, in that the most desirable attributes of the old sire were manifest in the outcrossed offspring; and the flock has continued to this day to breed back his type, leaving out the individual make-up, in a great measure, the characteristics of the intervening sires, and I have recently made up my mind to cast about for a son of the old ram, in the hope that I may more securely fasten his good points onto the flock. It is needless to say that that son must possess unmistakable evidence of perfect health and vigor of constitution.

The wonderfully beautiful type of the Shropshire sheep of the previous day is due in a great measure to a system of inbreeding, and I defy anyone to successfully deny it.

It is a dangerous thing to select sires haphazard, and I think I would advise, if I advise at all, that the breeder with ambition to be a leader should not go outside of his own herd to get them, but I would have him deliberately set about to breed them for his own use out of the best he has at hand, from animals whose capabilities and breed qualities and prepotency are a part of his intimate and certain knowledge, based upon a close scrutiny for years together.

HOW MUCH TO FEED.

Edgar Warren, author of the book, "Two Hundred Eggs a Year Per Hen," gives his idea as to the proper amount to feed the hens as follows:

Even more important than the question, what to feed, is the question, how much to feed? In my judgement almost any ration that combines grain, green food and vegetables with animal food, will give results in egg production. But how much to feed is something that stumps the authorities. And yet the answer to the question is very simple. Nature has furnished an infallible indicator and if a man will study this indicator he will not

feed too much on the one hand or too little on the other.

The crop is nature's indicator. In her wild states, when food is abundant the hen starts out in the morning with her crop, empty, and returns at night with it filled. The amount of food she seeks is what her crop will hold, plus what passes from the crop into the gizzard during the day.

The ideal way to feed a hen in confinement would seem to be to give her a mixed ration, and as much as she cared to dig out of a deep litter during the day. But practically, this is not possible. The poultryman must compromise. There is a rule, however, which he may adopt with good results.

During the short days of winter feed but twice, once soon after the fowls get down from the roost in the morning. In the afternoon let them dig out a deep litter enough grain to fill their crops comfortably full, but not enough to fill them to bursting.

After your hens have gone to roost, go through their pens and feel of their crops. If the crop is distended (feels as if the fowls had swallowed a baseball), you are feeding too much; if the crop is nearly empty, too little. The grain in the crop ought to fill it comfortably full, yet the skin ought not to be as tight as a drum, but loose and yielding. By experimenting a little you will soon learn just how much to feed.

Give no more in winter than in summer, but give more heating food. Corn in winter, oats in summer, is my rule. I never have a pen abnormally fat or pathetically poor.

THE MIRACLE OF A SHEEP.

The following is an extract from an article written by the editor of the Stock and Station Journal, Sydney, Australia.

A man was teaching a class about cattle and he said, "Now, can any boy tell me what a cow is?" I don't know what reply he expected, but a small boy gave him the correct answer. He said, "Please sir, a cow is an animal with four legs, one on each corner." That was a good answer and the boy had my sympathy. If anyone was to ask me, "What is a sheep?" do you know what I would say? My answer would be, "A sheep is a miracle." So it is! There isn't a more marvelous animal in the world than a sheep, and at all of our pastoral and agricultural gatherings we ought to toast "The Sheep." But we don't, simply because nobody ever thinks of the source of all our wealth. We count our wool return in millions of pounds sterling, but who ever thinks of it? Hardly anybody except from the point of view of pounds, s., d. Did I ever tell you about the great Florentine Giotto, who made his mark on the sands of time? I don't think I ever did, for I know a heap of things that I haven't told you yet, although I've been telling you stories for a good many years. One day, when Giotto was standing in the streets of Florence, telling stories and laughing, a pig ran between his legs and upset him. He got up, very angry, but when he saw the pig running down the street, he laughed and cried. "Ah, you villain, you; and yet look at the lot of money I have made with your hristles, and I never gave you even a glass of wine." Good old Giotto. Look at the money some men have made out of wool; but they have never thought about the miracle of a sheep. That's our trouble. We hardly ever think about anything. If we did, we would find the kingdom of God on earth. As it is, we mostly find the other kingdom.

TESTING COWS.

The Vermont Experiment Station has been making experiments to find as simple a method as possible of learning about what returns a cow gives.

It has been found that for practical purposes the productive value of a cow may be ascertained as follows:

1 Weigh the milk of each cow for three days monthly. At the end of the year add these results and multiply by 10, making such corrections for time of calving and drying off, as circumstances indicate. This gives the animal yield of milk.

2. Test the milk of each cow twice or thrice yearly, using two composite samples taken as follows: (a) For cows calving normally in the months of September to February inclusive and due to calve again in a reasonable time; in the third and fifth, or in the second, fifth and seventh months after calving. (b) For cows calving normally in the months of March to August inclusive, and due to calve again in a reasonable time; in the third, fifth and seventh month after calving. (c) For cows calving normally and tending to go dry early; in the third and sixth months after calving. (d) For cows which have aborted; in the third and fifth or in the third and sixth months after calving.

In each case add the results and divide by the number of tests, two or three as the case may be, for calculated average test for the year. Multiply the average test thus secured by the yield of milk for the year and it will give approximately the year's yield of butter fat.

A good operator with three milking machines can milk from twenty-eight to thirty cows an hour. If he is obliged to weigh every cow's milk separately and sample the same, he cannot work this fast and must be satisfied with about twenty-four to twenty-six cows an hour. The operator must be a man above the ordinary intelligence and integrity. He must follow directions closely, must use his judgment and be steady and methodical in his habits. Haphazard work absolutely will not do. Dairymen will find it necessary to pay operators better wages for doing this work, but they will make money by so doing. The machines working on the pulsation plan must be carefully regulated as to the number of pulsations per minute. For example, certain cows requiring a more rapid pulsation than others. As a rule, the harder the milk the slower the pulsation should be. A man can find this requirement very accurately by timing himself in hand milking, as many test charges per minute can be emptied.—Rural World.

WHY ENGLISH SHEEP LEAD.

Howard A. Chandler, a successful American sheep breeder, who has spent some time in England, gives in the American Sheep breeder, some interesting reasons why English bred sheep are better than our own. He writes:

I do not want to say that England is better than America, because it isn't, and good old America has the best people that can be found in the world and just as good land; but our sheep, while they are being improved, need more improvement, and if we can learn how to do it, we surely want to. Some will ask the question, "Why are sheep imported?" and when that is thoroughly answered and put into reason we can see a good many ways that will help us up the ladder of successful sheep breeding. The sheep are imported from England because they are better than we have at home. Then comes up that old, old question, "Why does England raise better sheep than we do in America?"

The English breeders have been at it for years and years, and everlastingly at it, too. If they can see a ram they want and need, they will not let a dollar or two keep them from getting him. Using only the very best sires and culling the ewe flock and sending the poorest to the butcher, and years of this has brought on good results. The English have held to the fact that "steady pecking will kill the devil," and so no matter what has come up or what has gone down, they have been on the way to improvement year in and year out. Good judgment, determination and perseverance combined have won the game. The same can be done in America and is being done by some, but should be done by everybody, and in years to come we would have the best sheep country in the world. There are breeders here 50 and 60 years of age who have been breeding Shropshires all their lives and they took it up from their fathers and uncles. Such breeders have seen sheep in their ups and downs and they all say that sheep are the most profitable of all farm animals.

There is a very bright outlook for

sheep breeders in America to make a success of the business if they can go at it with the intention and determination to win. There are breeders here in Shropshire that pay \$17.50 annually per acre rent for their farms and surely the Shropshire can be called "the golden fleeced" when they pay off that rent and a family living beside.

AGRICULTURE A SCIENCE.

The teaching of agriculture in the public schools aided by practical demonstrations of the ground, is giving recognition to the dignity and importance of one of the world's chief industries, which has heretofore lacked such recognition in some sections of the country.

The science of agriculture should be studied not only by those who are or may be engaged in farming, but by all who may become interested in the force of nature and the progress and development of the foundation of all wealth and prosperity.

It has been found that school children nearly always manifest a deep interest in the planting and cultivation of the small experimental gardens maintained in connection with the schools and open-air exercise therein is beneficial as well as instructive. The lessons are useful to them whether or not they may afterwards engage in gardening or farming and they will profit by them in many ways, even the children of the urban schools.

But if the teaching of agriculture is useful and advantageous to the pupils of the city public schools, how much more so must it be to the pupils of the rural schools. Here the farmers' boys and girls may be taught much concerning the chemistry of the soils, the conditions and necessities of plant life and the science of production. Their elders with all their years of practical experience in farming in the old ruts without much effort in the direction of new and improved methods of much regard to the adaptability of the soil, to crops or the needs for diversification, know less than these pupils will learn.

Agriculture is a science that should be taught in the schools, and it is as honorable and dignified as any of the professions, or, at least, it is susceptible of being made so. The slipshod methods employed on the farm of the humdrum order is not attractive to the ambitious youth who thinks the town or city affords the only vent for his pent up energies. It should be the other way. The farm life should be made the most attractive, and so it might be, perhaps if farming were made more of a science for men of the highest intelligence and capabilities—San Antonio Express.

LIME AS A PURIFIER.

We are all pretty familiar with the purifying effect of a liberal use of lime on the interior of stables, of dairy buildings and such places. I found in Denmark that this sort of thing is practical to a much greater extent than we have ever thought of doing in this country. It may be news to many buttermakers to know that a great many of the cream vats used in some of the best Danish creameries today are simply large wooden tubs. You can understand that unless they took extra precautions, these tubs would not be in good condition. I was not able to see that any injury resulted to the cream from the use of these wooden vessels for ripening vats. The secret is that they are kept perfectly clean and sweet by a liberal use of lime. Every utensil is immersed in a strong solution of lime every few days, and some of them every day. All the wooden machinery, such as churns, butter workers, etc., are coated with a thick lime wash almost every day. This coating is left on for a short time and before it quite hardens it is washed off. It is surprising how that helps to sweeten the wood and causes it to dry much more rapidly. The same thing is applied to the floors. If they get a little greasy, a liberal use of whitewash cleans them very easily and very perfectly. There is nothing that would be of more use to the cheese and buttermakers who desire to have a clean, wholesome factory, than a liberal use of lime water. It

saves a great deal of labor, is cheap, and is a good disinfectant as well. I would recommend the use of lime in that way, not only to the farmers for the purifying of their stables, etc., but also the butter and cheesemakers who wish to keep their factories clean and their utensils in proper condition.—Dairy Commissioner J. A. Ruddick, Ottawa.

HOME-MADE LICE KILLER.

A physician contributes the following formula for a home-made poultry lice killer to "The Poultry Item," of Sellersville, Pa.:

Kindly allow me also to suggest a successful "treatment" for lice apropos your first question and answer. Pyrethrum is uncertain because of its usual adulteration with foreign material unless purchased from a reliable druggist. Strictly pure, as it now should be, it is best combined with slacked lime and finely powdered tobacco dust, and applied with a powder dusting or pepper-box. Reasonable care should always be had to obviate disinfectants getting into the eyes of animals. They never feel good and always do some harm. The best lice destroyer and disinfectant combined (as should be) consists of:

- Slacked lime, 2 pounds.
- Powdered tobacco dust, ½ pound.
- Insect powder (pyrethrum) ¼ pound.
- Sieved wood ashes, 2 pounds.
- Crude carboric acid, ½ pound.
- Lime slacked with warm water, just sufficient to precipitate a loose, flocculent powder without fusion.

This is best done on a board or tray by careful agitation with a stick. Mix the tobacco dust, wood ashes and insect powder thoroughly and on this gradually pour the carboric acid with continued stirring. Then gradually apply as above, or a powder puff. This formula can be "put up" by any one exercising care, and there is nothing superior. It should be boxed air-tight, thus kept, it keeps indefinitely.

THE IDEAL FAIR.

There are not nearly so many county fairs being held as there formerly were. A great many look upon the changed conditions with a great deal of satisfaction. They say that the old county fair was nothing less than a place of gambling, and as such it was an injury to the farmer and his boys. There is a great deal of truth in this view of the matter; however, as a place of education, the properly conducted fair has few equals. Because it was a place of gambling that does not say that it should not now be revived and made a place of education. The new fair is a place where the farmer and his sons can learn to judge live stock and farm products. With it should go one or two addresses from agricultural educators, which will teach the farmer to think right and adopt the right methods of farming.—J. J. Stevenson.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lamenesses from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diptheria. Removes all Bunches from Horses or Cattle.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc. it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address:

A RECORD BREAKING PERFORMANCE MADE BY FRED GILBERT AND THE

PARKER GUN

97.9 per cent

From June 25 to August 9, Mr. Gilbert shot at 2,400 targets and broke 2,351, or 97.9 per cent. Mr. Gilbert also made the following long runs without a miss: Iowa Falls, 177; Boston, Mass., 130; Worthington, Minn., 178; Audubon, Ia., 158 and 96.

An unfinished run at Audubon of 96 and the first 85 at Story City without a miss, making a run of 181.

This unquestionably demonstrates the splendid shooting qualities of the Old Reliable PARKER GUN.

Shoot one and win. Send for Catalogue.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Spavins, Curbs, Splints, Windpuffs and all the various lumps and hunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

WINCHESTER
HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1836 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

Auction Sale of Trotting Bred Horses

Monday Evening, October 14th, 1907.

P. J. Williams consigns YOSEMITE, a great prospect, been a mile in 2:16/4, MONTEREY 2:09/4, and a few good ones by him out of that grand race mare, LEAP YEAR 2:26/4.

Ed Parker consigns a select bunch by REY DIRECT 2:10, and STAM B. 2:11/4. He has been selling at Eastern sales for years and has the reputation of offering good looks and nice manners.

Sam Norris of Rosedale Stock Farm will sell sixteen head by WASHINGTON McKINNEY and SIDNEY DILLON. When Sam says they are ready for sale, "Nuff Sed."

W. A. Clark Jr. consigns two trotters out of SHE 2:12/2 and HAZEL WILKES 2:11/4.

J. C. Mowry sells three racing prospects by KINNEY LOU, McKINNEY and MENDOCINO.

L. J. Rose sells two by JAMES MADISON.

Other consignments include SCHLEY B. (trial 2:13/2), a number of trotters that have shown fast enough to train and are elegant road horses right now, by such well known sires as BOSWELL JR. 2:19, NUTWOOD WILKES 2:16/2, LECCO 2:09/4, CHARLES DERBY 2:20 and others. This is strictly a sale of high class carriage, business and pleasure horses. Write for Catalogues now out.

THE WEEKLY

BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO
P. O. DRAWER 447.

Entered as Second-Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

THE COMBINATION SALE of roadsters, track trotters and pacers and stallions to be held at Chase's big pavilion, 478 Valencia street, this city, on the evening of Monday, October 14th, is attracting much attention, from the high-class of horses that will be offered. Such stallions as Monterey 2:09½ and his son, Yosemite, would be features and head-liners in an Old Glory sale in New York, while the young horses consigned by Ed Parker of Pleasanton, Sam Norris of Santa Rosa, J. C. Mowry of Alameda county, W. A. Clark Jr. and Lee J. Rose would be considered drawing cards at any Eastern sale. The catalogues are just out, and are being mailed to horsemen all over the Coast. Mr. Chase has been compelled to turn away many horses offered for this sale, as he does not consider it fair to sellers to catalogue more than can be sold in one evening and get through the sale at a reasonable hour. We advise all who are in need of good trotting bred horses to secure a catalogue and watch our next week's issue for important announcements in regard to the horses in this consignment.

VOLUME 17 of the American Trotting Register has been received. It contains the pedigrees of stallions registered up to 44999, there being nearly 5,000 stallions registered in this volume. The mares and geldings registered in this volume fill about 500 pages. Those desiring this new volume of the Register can obtain it through the Breeder and Sportsman

A GREAT GREEN PACER.

One of the most perfect specimens of a highly formed stallion is pictured on our front page this week—Charley D., a son of McKinney. This stallion never started in a race until this year, and then had to meet in all his races such high class horses as Inferlotta 2:04¾ and Copa de Oro 2:07¼. He raced against both these sensational pacers at Pleasanton, Santa Rosa and Petaluma and won third money each time. At Woodland Copa de Oro did not start in the 2:20 pace, and Charley D. was second to Inferlotta every heat. He was getting so good about this time that he was scratched from all the balance of his engagements, as it was considered unwise to mark such a fast green horse that looks to have class enough to enter through the Grand Circuit next year. At the close of his campaign this year he looked good enough to beat 2:07 three times and a mile in 2:05 was doubtless within his reach.

Every horseman who saw him race this year predicted a great future for him. In addition to being one of the grandest individuals ever hitched to a sulky, he is also one of the best and purest gaited pacers living. He wears no hobbles, and, in fact, nothing but his harness, a light pair of quarter boots with eight-ounce shoes in front and five and a half behind, he is perfectly balanced, and did not make a break during the entire season. He could not have beaten Inferlotta in any of his starts in all probability, but had she made one mistake in any heat the horse that beat Charley D. would have paced well inside 2:10.

Charley D. was bred by the ex-pugilist, Joe McAuliffe, of San Francisco, and is by McKinney, out of the mare Flewey Flewey by Memo, son of Sidney; second dam said to be by John Nelson 187. He is a beautiful dark bay, with both hind ankles white, and stands about 15.3. Charley D. is owned by Col. J. C. Kirkpatrick, manager of the Fairmont Hotel, in this city, and has been given all his training and driven in all his races by James Thompson of Pleasanton. Wherever he has appeared horsemen have pronounced this son of McKinney the most perfect horse they have ever seen. He is certainly a model, and there is not a weak point about him. He should win a very low record on the Eastern tracks next year.

WILL SUGGEST IMPROVEMENTS.

It is stated that Mr. A. W. Foster of San Rafael, formerly president of the California Northwestern Railway, and who is a Regent of the State University of California, is making a thorough study of farming, having become greatly interested in the College of Agriculture of the University. Mr. Foster has recently returned from a tour of the universities of the East, where he made a close study of the colleges of agriculture. He became fully convinced that the Berkeley institution is seriously remiss in this branch and regards an improvement therein as the most urgent matter for the board of regents to take up.

"There is much for our farmers to learn in the way of scientific aids," he said recently. For example, there is virtually no attempt at advantageous breeding of stock in this State. Study of the values of soils is not made. Production would be largely increased and the prosperity of the farmer greatly enhanced if the scientific men would give the help that he is entitled to. It is the duty of the university to take up this work and I shall use my utmost endeavors to bring about an expansion of the agricultural work there.

"The work at the two State farms—in Yolo and Fresno—will be of great benefit. But in my opinion there must be a great enlargement of the agricultural course at Berkeley. I have learned much from my trip in the East and intend as a result to make an active campaign in behalf of the agricultural college."

THE PROPOSED TRACK FOR CHICO.

Chico, September 20.—The formation of a local stock company to purchase sixty acres of land south of this city for the establishment of a racetrack and athletic amusement grounds, is the project now being fostered by L. B. Daniels, W. J. O'Connor and L. H. McIntosh. An option is held on 100 acres of the Entler property, and negotiations are under way for securing sixty of the 100 acres at \$200 per acre, and an extension of the option for ten days.

The primary purpose of the move is to provide a place for the training and breeding of fast-blooded horses, but if the proper backing is secured, a grand stand, stables, a baseball diamond, football field and other places for athletic sports will follow.

Under present conditions many valuable and blooded horses are sent elsewhere for training and development, and it is hoped to make it possible to do this here.

The site under consideration lies next the Northern and Butte County Railroad, and thereby has connection with the Southern Pacific, providing quick and convenient transportation.

With the establishment of a race-course and grand stand, Chico will probably become the permanent meeting place for the annual field days of both the Northern California High School Athletic League and the Sacramento Valley Interscholastic Athletic League.

A GOOD GREEN ONE.

Mr. F. J. Yandell of Santa Rosa owns a green pacer that is causing lots of talk among the horsemen who have seen him at work. This pacer was bred by Thos. Murphy, who now trains for the Czar of Russia, and is six years old. He is by Gossiper 2:14¾, out of Sidney's son Memo that sired the dam of that fast pacer, Charley D. Yandell has named this pacer Tom Murphy for his breeder. With four months' work Tom Murphy has paced a mile in 2:09 and has shown better than two minute speed. He has paced the last half of a mile in one minute flat and the last quarter in 29 seconds. Tom Murphy wears no hobbles and no boots, is clean and sound and has never made a break in any of his trials. Mr. Yandell will enter him all through the California circuit next year, and hopes to regain the State record with him for Santa Rosa track. Several good offers have been made Mr. Yandell for this gelding, but so far he has declined them all. The horse is being trained by a young man named Compton, who was East with Salisbury one year and took care of Bolivar.

FINE HORSE SHOW PLANNED.

The Portland Hunt Club, of Portland, Oregon, announces its first annual horse show to be given at the Lewis and Clark Fair Grounds, Portland, November 7th, 8th and 9th, 1907. The official classification list shows 167 classes for which prizes are offered. There are Breeding classes for all breeds, harness classes, saddle classes, horses suitable for officers' mounts, horses suitable for cavalry service, hunters, ponies, etc. The arena where the horses will be shown is 75x200 feet with splendid seating and stabling accommodations. Competent judges will judge all the classes. We suggest to our California breeders and owners of show horses that they write to the Portland Hunt Club at 229 Lumber Exchange, Portland, and ask for a copy of the official classification list.

Alto Downs, the son of Iran Alto 2:12½, that Farmer Bunch took East, won a seven-heat race at Baltimore the other day and got a mark of 2:17¾. Alto Downs has raced every week since June and has been inside the money every time. A pretty good race horse, that.

RACING WITHOUT BETTING.

No writer on harness horse affairs is better known or more highly respected than Henry Ten Eyck White who writes for the Chicago Tribune. Here is an extract from a recent article by him:

At Minneapolis last week tens of thousands of people were at the races every day, and it is well known the success of the enterprise practically depends on the gate receipts, no betting being allowed. Purses of grand circuit sizes are given, the \$5,000 affair for 2:21 trotters having been a feature of the meeting for years, and the liberality with which the officials provide for the harness racing feature draws horses from all over the land, and their presence assures an attendance which makes the fair a great financial success.

At the Wisconsin State Fair, where betting is not allowed, the trotters and pacers practically are the whole show. The attendance is something enormous, hotel accommodations are at a premium. Many of the richest men in the northwest, beginning with James J. Hill, are breeders of trotting horses, and on a smaller scale hundreds of others, each generally a leading man in his own town, have a fancy in the same direction.

All the way from Chicago to Winnipeg are to be found stock farms, big and little, devoted to the raising of trotting bred stock, and practically the entire population of that section goes to some harness race meeting during the summer or fall.

With these facts in mind it is not difficult to see why trotting is in no way dependent on the sale of betting privileges for its popularity or its continuance in a profitable manner. Incidentally it may be said that the sale of liquor is not allowed at State or county fairs, and, for that matter, intoxicants always have been barred at the Grand Circuit meetings at Boston and Hartford, while at many of the minor New England tracks the same rule is followed.

The idea that gambling is a vital and necessary feature of harness racing has been carefully fostered by people financially interested in forms of horse racing which, as has been demonstrated in Chicago and elsewhere cannot profitably exist for one hour in the absence of revenue from the gambling end of the game. This false doctrine has been blindly accepted by many people interested in harness racing, but the events of the day are clearing their vision, and the man whose sight has been restored is not apt to overlook or forget the fact.

Dr. Boucher, who is back at Pleasanton after his unlucky Eastern trip, says he is not surprised that Sonoma Girl is beating Highball again. He states that a lame hock was the cause of her breaking and that when both horses are right she will beat Highball every time. She can set the pace so fast for him the first heat that she can beat him handily after that.

Three or four second-hand road carts, good as new, are at Kenney's, 531 Valencia street, and as they are priced right they will not remain very long. Better drop in to-day and look at them. Also one or two second-hand bike runabouts that are in fine shape.

With Ben Walker up behind him, the pacer Sherlock Holmes by Zolock won the Consolation division of the 2:09 race at Salem last Saturday, and lowered the track record of 2:07¼ made by Sir John S. 2:04½ in the main division of the stake on Thursday. Sherlock Holmes had a mark of 2:11¼ at the opening of this season, but has been beaten in slower time and in the big stake on Thursday was outside the money. In the consolation there were nine starters and Copa de Oro was the favorite, but Sherlock Holmes paced like a wild horse and stepped three heats in 2:06½, 2:07 and 2:07½. Fred Sheft of Spokane, owner of Sherlock Holmes, was satisfied his horse had not shown his true form in any of his starts and asked Ben Walker to drive him. The horse had been driven by Frank Chiles, a man of limited experience, and when Walker warmed Sherlock Holmes up, he made a few changes in his rigging and the sorrel son of Zolock was a different horse. Horsemen who saw the race say that Sherlock Holmes has class enough to race with Sir John S., Inferlotta and all the other free-for-all pacers, and his defeat of such a high-class pacer as Copa de Oro is proof of this. The track was lightning fast.

H. S. Hogoboom, who has just returned to Woodland from the Nevada State Fair at Reno, writes us that there were good crowds in attendance there and good betting by the auction and mutual systems, no books being allowed. Mr. Hogoboom has three fine road horses that he wanted to sell at Chase's combination sale, October 14th, but was too late in consigning them to get them in the catalogue. If the horses are not sold within a week he will bring them down to the sale and as he aptly expresses it, "take his chances and his medicine." In the account of the yearling colt which Mr. Hogoboom recently traded to Mr. F. P. Ogden of High Grove, San Bernardino county, it was stated that the colt was sired by Iran Alto. This is an error. The sire of the colt is Palo King, a son of the grandly bred McKinney stallion Marengo King. Palo King's dam was Palo Belle by the great Palo Alto 2:08¾. So the youngster not only has the Palo Alto cross but one of McKinney on top of it which makes the breeding about as rich as can be found anywhere.

FRESNO SUMMARIES, SEPTEMBER 17-21.

Table of race results for Fresno, Sept 17-21. Includes Trotting, Pacing, and various classes like 2:15 class, \$400- and 2:20 class, purse \$200-.

CENTRALIA, WASH., SUMMARIES.

Table of race results for Centralia, Wash., Sept 17-21. Includes Trotting, Pacing, and County horses without records.

The Rural Spirit of last week says: A. T. Van De Vanter of Seattle died Sunday night of heart failure, induced by an automobile accident which occurred Saturday.

EVERETT, WASH., RACES, SEPTEMBER 4-7.

Table of race results for Everett, Wash., Sept 4-7. Includes Pacing, Trotting, and various classes like 2:25 class, purse \$500- and 2:20 class, Manufacturers' Stake \$500-.

PERNDALE SUMMARIES—HALF MILE TRACK.

Table of race results for Perndale, Sept 10-11. Includes Tuesday, September 10 and Wednesday, September 11.

THURSDAY, SEPTEMBER 12.

Table of race results for Thursday, Sept 12. Includes Trot or pace, 2:40 class- and Three-year-old stake-.

FRIDAY, SEPTEMBER 13.

Table of race results for Friday, Sept 13. Includes Pacing, free-for-all, purse \$160- and Special, trot and pace-.

EXCITING RACES AT PARK OVAL.

Several hundred people saw members of the Park Amateur Driving Club drive some exciting finishes at the three-quarter-mile track in Golden Gate Park on Saturday last.

Table of race results for Class A pacers- and Class B trotters-.

Table of race results for Class E trotters- and Class A trotters, mile heats-.

Table of race results for Class C trotters- and Class D trotters-.

Table of race results for Class A trotters, mile heats-.

Table of race results for Class C trotters- and Class D trotters-.

Table of race results for Class D trotters-.

RACE RECORDS FOR 1907.

Trotting. Two-year-old filly—The Leading Lady, by Bingen 2:06 1/4, dam Miss Pratt 2:17 1/4 by Heirat-Law 2:05 1/4.

Three-year-old filly—Bell Bird, by Jay Time, dam Nancy Medium, by Bayonne Prince... 2:11 1/4.

Three-year-old colt—Kentucky Todd, by Todd 2:14 1/4, dam Paronella by Parkville... 2:08 3/4.

Aged stallion—Athasham, by Athadon 2:28, dam Cora Wickersham, by Junio 2:22... 2:09 1/4.

Four-year-old colt—Codero, by Bingen 2:06 1/4, dam Jolly Bird 2:15 1/4, by Jay Bird... 2:10 1/4.

Mare—Sonoma Girl, by Lynwood W. 2:20 1/4, dam Maud Fowler 2:21 1/4, by Anteo 2:16 1/4... 2:05 1/4.

Gelding—George G., by Homeward 2:13 1/4, dam Mabel, by Junio... 2:05 1/4.

Green stallion—Jaguar, by Highwood 2:21 1/4, dam Cashew, by Red Heart 2:19... 2:12 1/2.

Green mare—Sonoma Girl, by Lynwood W. 2:20 1/4, dam Maud Fowler 2:21 1/4, by Anteo 2:16 1/4... 2:06 1/4.

Green gelding—Highball, by Dr. Hooker 2:23 1/2, dam Lena S. 2:22, by Tom Covington 2:28 1/4... 2:06 1/4.

Pacing. Two-year-old colt—Ray o'Light, by Searchlight 2:03 1/4, dam Carrie B., by Alexander Button 2:26 1/2... 2:13 1/2.

Three-year-old colt—Hymettus, by Zomhro 2:11, dam Silver Bell, by Silver Bow 2:16... 2:08 1/2.

Three-year-old filly—Annona, by Ashbrook 2:13 1/2, dam by Merchant... 2:13 1/4.

Stallion—John A., by Eddie Hall 2:15, dam Mattie, by Newsboy... 2:03 3/4.

Gelding—Angus Pointer, by Sidney Pointer 2:07 1/4, dam Jane, by Grant's Hambletonian... 2:01 3/4.

Green stallion—Straight Advice, by Free Advice 2:10 1/4, dam Straight On 2:12 1/2, by Jerome Turner 2:15 1/2... 2:06 1/2.

ANOTHER GOOD SIDNEY DILLON.

Up at Ferndale, Humboldt county, during the county fair and race meeting held from September 10th to 14th, the five-year-old stallion Humboldt Dillon won the free for all, beating the seasoned pacer Uno in a great race. Humboldt Dillon is owned by Dr. J. A. Lane of Ferndale and was bred at Santa Rosa Stock Farm, being by Sidney Dillon out of Adioo by Guy Wilkes. Humboldt Dillon won two races at the Ferndale Fair and took a record of 2:18 in the fourth heat of the second race. The race was over a half-mile track and Humboldt Dillon was only a nose behind Uno in 2:15½ in the first heat after leading the first half in 1:06. The Ferndale Enterprise thus describes the race:

At 1:30 o'clock the free-for-all was called, the entries being Uno, owned by Henry Rohner and driven by E. L. Hunt; Cassiar, owned by W. J. East and driven by Robert Patrick, and Humboldt Dillon, owned by Dr. J. A. Lane and driven by Robert Nohle. It was generally supposed that Uno would have an easy time in winning first money in this race, the odds on him in the pool box being as high as 4 to 1. Uno's owner was backing him very heavily, purchasing all pools on him.

After several scores, in which a start was prevented by Uno being in the lead, his driver was censured by the judges and next time a perfect start was the result. Humboldt Dillon had the inside, Cassiar the middle and Uno the outside. At the first turn Cassiar dropped in behind, leaving Dillon and Uno neck and neck. Both horses were making very fast time, but no one believed that little Dillon, with only two months' work, would be able to keep the pace for more than a quarter mile at the most. But the animals came into the stretch neck and neck for the first half and the excitement in the grand stand was intense as Humboldt Dillon crossed the line in the lead in 1:06. Cassiar was a close follower.

The judges warned the spectators to refrain from shouting, which might tend to excite the animals and amid a moment of stillness the horses passed under the wire the first time around. Still Dillon stayed right by Uno's side and the enthusiasm of the crowd over the entirely unexpected showing of the little horse was immense. The position of the animals was maintained all the way around the track and into the stretch, Cassiar being close behind. From the grand stand as they came down the stretch it could not be seen which was ahead, and as they passed under the wire the question was heard on every hand, "Which won?" The decision of the judges settled the question, the heat being given to Uno, time 2:15½.

This was the fastest mile ever made on the Ferndale track, and the time has only been equaled once in the county, we believe, when Fredericksburg paced an exhibition mile in 2:15½ on the Eureka track. Uno has a record of 2:13½, but allowing for the difference in a half-mile track, which would make the time from three to five seconds slower, the first heat of the free-for-all Friday was probably the best mile he ever made. But the surprise was that Dillon, which animal, so far as could be learned, had never made a mile in better than 2:22, should go on the track and make the mile in 2:15½, which was practically his time also, as he was not more than a nose behind the winner. This somewhat aroused the enthusiasm of the immense crowd, as Dillon had not been conceded a chance to win the race.

While all admired the showing made by the little horse in the first heat, it was the general opinion that he would not be as close the next one, as he would not have the inside, and besides, with his short period of training, it seemed that the record-breaking time of the first heat must have proved too hard on him. The horses got away without trouble, and until the home stretch was reached, the second time Uno maintained a lead of perhaps a length. Here Nohle behind Dillon made a splendid drive, and a wonderful burst of speed on the part of the little horse carried Uno off his feet and gave Dillon the heat, the time being 2:20½. Although Dillon and Uno had each taken a heat, the latter horse at this time was still selling favorite over the other two in the race at odds of 5 to 2, showing that the wise ones could see nothing to it but Uno.

The third heat was made in faster time, and at no period did Uno have a chance. In making the first turn he went into the air, and from then he trailed the other two horses around the track, Dillon in the lead and Cassiar a close second. It was stated that the loss of a hoot accounted for Uno's poor showing in this heat. The time was 2:19 and Cassiar finished a good second. Still it seemed impossible for Uno's backers to realize that he could lose the race, and with Humboldt Dillon having two heats to his credit were still giving odds on the Eureka horse.

The fourth and final heat was a good one and in a close finish Dillon came under the wire first, Uno second and Cassiar third. The time was 2:18. This ended the free-for-all, which is conceded by those in attendance to have been the best race ever seen in Humboldt county. Though Cassiar did not finish first in any heat he was close behind. Considering the fact that Robert Patrick, who drove him, had never handled the animal up to a couple of weeks before the fair, it is worthy of mention that he made the splendid showing he did. Although Mr. Patrick made fine drives and got all out of the animal that could have been expected, it is prob-

able that had Will East, the owner, been able to be in Cassiar's sulky, he might have made better time. No one had ever driven Cassiar but Mr. East, and he of course understood the horse as no one else could. The gentleman, however, is well satisfied, and states that Mr. Patrick handled Cassiar well and that the horse did all he expected of him. Humboldt Dillon is a general favorite among the lovers of fine horses for his remarkable speed and staying qualities, while all speak well of Uno for the game showing he made. It is possible that had the contest been on a mile track, he might have won, but this does not detract any from the credit due to Dillon for his victory.

TWO SPLENDID STAKES.

When the American Association of Trotting Horse Breeders was organized last fall its prime object was the bringing together of all the breeders and horse lovers of the United States into a union for their protection and for the advancement of America's native animal—the light harness horse. That horse lovers answered the call is attested by the splendid membership which the association has received from every State of the Union.

The association announced at the start that in its first work it would offer Futurities upon a liberal basis of payments in order to increase the earning capacity of our young trotters, in other words, give to the breeders an opportunity to enter their horses in valuable stakes, hence encourage them in breeding and in improving the light harness horse. The history of the light harness horse through the last decade has proved that the good young colt or filly with \$50,000 worth of engagements is worth more than an equally good colt or filly with half the amount of engagements by ten fold. In opening two Futurities the American Association of Trotting Horse Breeders hopes to still further increase the value of young trotters through rich engagements.

Hence this week it makes official announcement of the two great racing events, which it offers as its racing features. The first race is known as the Championship Stallion Stake. Under the conditions the owner, who must be a member, nominates his stallion, paying for the same the amount of one service fee which the horse stood at in 1906; thereupon every foal of this year of that stallion is eligible to the race and is nominated by said stallion owner. The particular owner of the foal has no payments to make until a year from next December, when on December 1, 1908, the obligation of the stallion owner will end and the owner of the foal assumes the further burden. If his colt is good he can keep it in the stake upon the payment of \$5; the foal will at that time lack one month of being a two-year-old, and surely will then have shown the owner enough to warrant an investment of \$5 to keep good in the Futurity. A second payment of \$10 on trotters and \$5 on pacers will be due July 1, 1909; a third payment of \$25 and \$10 on trotters and pacers respectively will be due on May 1, 1910; the fourth payment of \$25 and \$10 on trotters and pacers respectively will be due July 1, 1910, and the final payment of \$100 on trotters and \$25 on pacers will be payable on starters the night before the respective races. This will make a total payment of \$155 on trotters and \$55 on pacers to start in the stake which, reasonably patronized, will be worth more than \$10,000—in other words, for 1½ per cent and perhaps 1 per cent will be the full amount of entrance. To the nominators of the winning sires the association will present a \$250 silver trophy or its equivalent in money. The race will be held two in three, and the contest will take place some time after August 1, 1910.

The second stake will be known as the Matron Stake, and nominations will be free to all members of the association. A member may name one or as many mares, with their foals of this year, as he wants and no payments will be due until December 1, 1908, when the owner will be required to pay \$5 on each foal which he desires to keep good. This will be the first and only payment to be made until July 1, 1909. The third payment will be due May 1, 1910; the fourth July 1, 1910, and the final payment the night before the race.

In both these Futurities all moneys received will go to the stake and then be divided three-fourths for the trotting race and one-fourth for the pacing race.

In both events entries will close on December 31, 1907. Although the stake is just now officially announced, the association has received, through the prospectuses sent out, a large number of entries to both events. This interest so early displayed indicates that each Futurity will have an overwhelming entry by the time the books close, on December 31st next. Those desiring entry blanks, application blanks for membership to the association or other printed matter should address H. K. Devereux, secretary American Association of Trotting Horse Breeders, 215 Hickox Building, Cleveland, Ohio, and the same will be cheerfully and promptly mailed.

The El Paso, Ill., track holds the half-mile track record of the season, up to the date the record was made, Don Elmo having made a heat there at the recent fair meeting in 2:07¾.

Don Elmo's two heats in 2:09¾, 2:07¾, over the El Paso, Ill., half-mile track marked a very brilliant performance.

SALE OF DEMONIO YEARLINGS.

The fifth annual sale of standard bred colts and fillies of the Suisun Stock Farm, owned by Rush & Haile, which took place in front of the Suisun City Stables Tuesday afternoon, September 17th, brought out a fairly good sized crowd, and although the bidding was not spirited, the eleven colts sold brought an average of \$128 each. The lowest prize realized was \$50 and the highest reached was \$215. Several of the colts brought about one-half of what they were actually worth, and taken altogether, notwithstanding the splendid efforts of Auctioneer James P. Martin, every purchaser secured a bargain.

Following is the full list of fillies, colts and geldings, all sired by Demonio, that were sold, together with the amounts paid and the names of the purchasers:

- Bay filly, foaled April 9, 1906, dam Elorita by Alban, to Joseph R. Charhounre of Suisun Valley \$ 72.50
- Bay colt, foaled April 5, 1906, dam Sable Dew by Sahle Wilkes, to L. E. Middlemarch of Marysville \$110.00
- Bay colt, foaled April 13, 1906, dam Jessie S., by Coligny, to Chas. Dadami of Collinsville. \$ 50.00
- Brown colt, foaled April 2, 1906, dam Oakwood by Boh Lee, son of Nutwood, to Joseph Graham of Cordelia \$ 82.50
- Bay gelding, foaled April 10, 1902, dam Laura H. by Nutwood Wilkes, to Henry Smith of Cordelia \$200.00
- Bay colt, foaled April 4, 1906, dam Laura H. by Nutwood Wilkes, to Joseph Danielson of Suisun Valley \$140.00
- Bay colt, foaled February 3, 1906, dam Hanoro by Oro Wilkes, to Joseph Danielson. \$215.00
- Bay filly, foaled April 13, 1906, dam Olita by Bradtmoor, to F. S. Gurnette of Suisun. . \$ 80.00
- Sorrel filly, foaled May 3, 1906, dam May Norris by Norris, to E. K. Brown of Suisun. . \$200.00
- Brown filly, foaled April 20, 1906, dam Yarrow by Como, to Jack Mayfield of Suisun. \$125.00
- Sorrel colt, foaled March 25, 1906, dam Sister by Nutwood Wilkes, to Henry Smith. \$125.00
- Bay filly, foaled April 10, 1906, dam Sis by Don Marvin (this filly was owned by J. B. Hoyt), to George Davis of Vacaville. \$105.00

The above account of the Suisun Stock Farm sale is from the Solano Republican, printed at Suisun. The prices received for the yearlings were very good, considering that the sale was not advertised at all outside of Solano county, and not one harness horse buyer in fifty knew such a sale was to be held.

RACING AT SANTA MARIA.

Some good racing was held under the auspices of the Santa Maria Matinee Club on Monday, September 9th. The card presented by the club was a most attractive one, the horses well matched and all of the races were good, some of the finishes being very close.

The management started the first race promptly on time and from that moment to the end the sport was kept moving right along.

The first race, 2:25 class, was won by Honus Bismark, driven by E. P. Hamilton, in two straight heats. Time, 2:28 and 2:27. Miss Gomet, driven by C. L. Rice was second, and Black Bart, driven by Wm. Mead, third.

Second race, 2:30 class—Flora B., driven by G. L. Blosser, won the first and third heats and the race. Time, 2:42½ and 2:25. The second heat was won by Anona, driven by E. P. Hamilton. Time, 2:26½.

The third event, a half mile against time, was run by Respirotor. Time, 0:53¾.

Fourth race, 2:40 class, was won by Tohasco, driven by Wm. Mead, in two straight heats. Harry N., driven by H. H. Bardin, second. Time, 2:36 and 2:24.

The fifth race was won by Fred Lewis' Prince, driven by Matt Jesse, Bohhie Hall, driven by Jas. Hall, second and Tequesquet Gertie, driven by G. L. Blosser, third. Time, 2:51.

WINNING PRIZES IN INDIANA.

The Sidney Dillons are winning in the show rings in Indiana. The following items are from a recent issue of the Western Horseman:

The Sidney Dillon yearling Tyro, owned by C. F. Johnson of Lafayette, Ind., had no trouble in carrying away the blue ribbon in the class for best standard-bred stallion one year old and under two at the Indiana State Fair. He was also winner of first at the Lafayette fair.

The grand three-year-old stallion General Dillon, by Sidney Dillon, owned by Dr. Walter E. Hendricks, of Martinsville, Ind., easily captured first money in the class for standard-bred stallions three years' old and under four, at the State Fair last week. Nine were shown in this class, and he was far superior in conformation, style, action and speed of any competing for the money.

All of the hoxes for the Lexington, Ky., meeting, which opens October 7th, have been sold, and Secretary Wilson states that one hundred more could easily have been disposed of. In a social way this meeting will set a record, while if the weather is good the racing will be nothing less than phenomenal.

Boise, IdahoOctober 21-26

Grand Circuit Dates.

ColumbusSeptember 16-27

The Kentucky Trotting Horse Breeders' Association opens its annual meeting at Lexington on Monday, October 7th.

Wild Bell 2:08½ has been Charley De Ryder's best money winner this season.

The fastest heats of the year by trotters were made by Sonoma Girl 2:05¼ and George G. 2:05¼, both California bred and raised.

Carlokin 2:13¼ did not lose a race until he cut his foot very badly at Petaluma. Since then he has lost a couple, but got some of the money nevertheless.

Get a good horse—one that can trot fast and is not only a fine looker but a grandly bred one. Buy Yosemite, son of Monterey 2:09¼, at the combination sale at Chase's pavilion, October 14th. He can beat 2:15.

The Columbus track is one of the fastest on the Grand Circuit.

Monterey 2:09¼, in the hands of a good rustling horseman, can earn \$2,500 in the stud every year clear of all expenses. He is to be sold at auction October 14th at Chase's pavilion, this city.

Queer Knight by Knight got on his good behavior at Fresno and won a race, in which he lowered his record a full second. It now stands at 2:13½.

Burnt 2:14 and Goldennut 2:14 are two new 2:15 trotters by Neernut 2:12½. Both are owned by Geo. W. Ford of Santa Ana.

R. Ambush has met North Star twice this year and taken the measure of the Nutwood Wilkes gelding each time.

Fresno Girl 2:10½ by Seymour Wilkes won a five-heat race at the Fresno meeting.

Those three heats each in 2:06¼ by Highball are the best on record for three consecutive heats by a gelding in the same afternoon. W. J. Lewis trotted three, each in 2:06¼ last fall, but the final one was on another day.

Chas. De Ryder writes that he will not race at Phoenix, Ariz., this year, but will ship direct home to Pleasanton from Lexington.

Marty McKay, who shoes horses in De Ryder's string and owns that fast pacing mare The Donna 2:07¾, sold her the other day to James O'Kelly of Pembroke, Ontario, who will leave her with De Ryder until the Lexington meeting is over and then ship her to Canada.

There were three thousand people present one day at the Ferndale Fair to see the racing on a half-mile track.

The Hollister races begin Tuesday, October 8th, and continue five days. Many good races are on the card and a big crowd is expected.

While at Petaluma, Mr. I. Mosher purchased a fair looking and highly bred thoroughbred three-year-old filly for \$30.

The gray trotter Henry Gray 2:18¼ by Zombro out of a mare by Rockwood, looks to be a good game horse that will trot much faster another year. He has won several long-drawn-out races this year.

In the second heat of the Lewis & Clark stake at Salem, in which R. Ambush took his new record of 2:11¼, North Star was right alongside him, and was only beaten a nose. It was so close that the crowd did not learn which had won until the judges rendered their decision.

Hanford is having a big crowd at its half-mile track this year.

The Oregon State Fair was a big success financially and otherwise.

Sona by McKinney reduced her record to 2:16 at Fresno in a winning race.

Although Delilah won a heat in 2:08½ in the big \$5,000 stake at Salem and thereby got second money, Miss Georgie paced a much better race, as she was second to Sir John S. in all the other heats, her positions in the summary being 4-2-2-2, while Delilah's were 1-6-4-5. Lord Lovelace 2:10 also performed well in this race and was 2-3-3-3.

Elmcliffe, the sire of the dam of that good trotter Lotta 2:09¼, was sired by Wickliffe, son of George Wilkes, dam Buzz Medium 2:20¼, by Happy Medium, and is therefore a brother in blood to Stormcliffe, the sire of The Broncho 2:00¾, he being by Wickliffe, out of Happy Princess 2:23¼, by Happy Medium. Wickliffe, the sire of Elmcliffe, died recently at Poughkeepsie as the result of a broken leg, when 25 years old.

This is said to be a good remedy for brittle feet in horses: Get two parts of oil of tar and one part of oil of balsam of fir; mix them and put on every other night where the hair connects with the hoof, and in six weeks the hoof will hold a shoe.

The trotter Battleton 2:09¾, by Rex Americus 2:11¼, was caught on a ringing tour by Secretary Knight of the American Trotting Association recently at Xenia, O. The gelding was being raced under the name of Nimble.

Will De Ryder has a Diablo mare at Pleasanton that was formerly a trotter and is said to have worked a mile at that gait for Walter Maben in 2:12, when she was owned in Los Angeles. Since De Ryder got her she has been shifted to the pace, and with very little work at that gait is showing a lot of speed at Pleasanton, and her owner thinks three heats in 2:10 will be within her reach in another month. She is the same dark chestnut as her sire.

Star Pointer's grandson, Angus Pointer 2:01¾, is now the fastest pacer of the year that has taken his record in a race.

Frank G. Smith writes in the Buffalo Horse World: The gray gelding U. R. Welcome, sired by Welcome and driven by Mr. Boggs, won another good race in Olean the past week, reducing his record to 2:17¼. He is owned by Mr. Henry Schreiber of Allegheny, Pa., and looks good enough for Grand Circuit society another year. This is the horse Henry Dunlap of Pleasanton sold while East last spring.

The winners of both the \$5,000 events on the Minnesota State Fair program carry the blood of Governor Sprague 2:20½. Sterling McKinney 2:09¼, winner of the trot, is by McKinney 2:11¼, who is out of a daughter of Sprague, while Dana Patch 2:06¼, winner of the pace, is out of a mare by Altemus, whose sire was a son of Sprague.

Forest King, the colt that was second to Kentucky Todd in the Western Horseman Futurity at Indianapolis, when Kentucky Todd trotted the second heat in 2:09, was separately timed in 2:10½. Forest King is by The King Red, a son of Red Wilkes now owned by Brooke Nooke Rancho, Montana.

A few days before Wilkes Heart 2:08¼ won \$7,000 at Hartford he was priced at \$7,500.

The three-year-old colt Douglas 2:12¼ cost D. N. C. Hyams \$750 a year ago last spring.

The Washington McKinneys that are being worked all show a high rate of speed. Sam Norris will have several by this horse at the combination sale, October 14th.

Palmer Clark says: "Every fair manager would do well to visit the Minnesota State Fair during race week, simply for an object lesson. I have attended almost every great race meeting in America for a period covering nearly a quarter of a century, but in all my travels I have never yet seen anything in the way of race track management that could surpass that of the Minnesota State Fair Association. A patrol box is located at each quarter of the mile, connected with the judges' stand by telephone; the distance flag is operated automatically, and the positions of the horses and time are posted after the manner of the running tracks, although two announcers are required on the far wings of the big crowd. The paddock is a dream. It contains twenty-four stalls, with every convenience, including hot and cold water, lavatories and bathrooms for the grooms, and has even canvas curtains on the entrances to prevent the chilling drafts if the temperature is low. This paddock is connected by telephone with the judges' stand, and alarm bells signal to get ready and to hitch. Every groom going on the track is provided with white coats and caps, making a showing that is both picturesque and pleasing to the spectators. The barns are substantial and comfortable.

Mr. H. Brace of Santa Clara, owner of the McKinney stallion Greco, will announce next week the sale of all his horses, some thirty-eight in number. The yearlings, two and three-year-olds by Greco are a fine lot of grand looking youngsters, all well bred. There are several fine broodmares, among them Belle King, the dam of Bolivar 2:00¾, with a strapping filly at foot by Star Pointer 1:59¼. Greco, it should be remembered, is by McKinney, dam Aileen, a producing mare by Anteeo 2:16½, son of Electioneer; second dam the great broodmare Lou Milton, dam of the champion trotter of the world, Lou Dillon 1:58½.

Aerolite 2:11¼, public trial 2:05¼, is back at Pleasanton in the stables of Sutherland & Chadbourne. The great colt is looking simply grand. He is one of the sort that does not lose flesh when training, but seems to thrive on it. He has perfectly clean legs and feet, and is as near a perfect horse physically as one could find in a week's travel. Work is play for him. The colt's admirers all feel that Aerolite's owner, Jas. W. Marshall of Dixon, made a mistake when he asked the judges at Woodland to announce the colt's great exhibition mile as 2:05½, the time shown by Mr. Marshall's watch, as this was the slowest time caught by any of those who held a watch on the colt. Mr. Sutherland, who drove Aerolite, got the mile in 2:04¾, and none of the regular timers had slower than 2:05¼. Mr. Sutherland is perfectly confident that twenty minutes after the performance he could have driven Aerolite a full mile in 2:03.

With Ben Walker as a driver the Zolock pacer, Sherlock Holmes, won a great race on the closing day of the Oregon State Fair and reduced his record to 2:06¼. This gives Zolock another new 2:10 performer, making a total of three, and all pacers. The other two are Bystander 2:07½ and Delilah 2:08½.

Fred Chadbourne, who has not been in good health for some time, left for the Siskiyou mountains after the State Fair, and will spend five or six weeks in the mountains. After winning the 2:17 trot with S. K. Trefry's good McKinney stallion Kenneth C. at the State Fair, during which he marked this trotter in 2:13¼, Fred stated that the race was just a jog for him, and he is certain he could have driven him the last heat in 2:10 had it been necessary. He thinks Kenneth C. is one of the best prospects for the 2:14 class next year there is on the Coast. In winning this race Mr. Trefry's stallion was the fourth McKinney trotter to enter the 2:15 list on this Coast this season.

Ed Parker is preparing a half-dozen horses at Pleasanton for the combination sale on the 14th of October at Chase's pavilion that should bring good money, as all are in fine shape and showing style and speed. Ed has a two-year-old filly by James Butler's stallion Directwell and out of Sidlette, by Sidney, that is good enough to spend a lot of money on. She trotted fast last year as a yearling, and is improving every time she is hitched up.

Little Rey, a black colt by Rey Direct 2:10, out of Missie Medium, is one of the nicest, round, good limbed youngsters ever seen on the Pleasanton track. He is in Ed Parker's consignment to Chase's combination sale, in this city, October 14th. Look him up in the catalogue.

Carlokin won first money in the consolation division of the Lewis & Clark Stake at Portland. First money in the consolation was \$500.

Peter J. Williams sent to this office this week from his home place at San Lorenzo a box of Burbank potatoes that are about the largest, smoothest and best spuds we have seen in years. If Mr. Williams' farm produces such garden truck as this regularly, and he says this is just a fair sample, it is no wonder he wants to sell his horses and devote the entire place to such money making crops.

William Brown is working several good prospects for Thos. Ronan at Pleasanton. Mr. Ronan has the Pleasanton track in good shape and is laying in a big supply of the best hay and oats to be found in the country for the trainers to feed their horses on this winter. The crowd will again head for Pleasanton as soon as the races are all over, and the famous track will remain the horse center for years to come.

Unimak, the full brother to Sterling McKinney 2:09¼, owned by Capt. C. H. Williams of Palo Alto, is at Pleasanton in Will De Ryder's care, and has been a mile in 2:26 this year.

Harry Brown is working a nice black pacer by Direct at Pleasanton that is moving nicely and showing considerable speed. This gelding is eight years old and green. He wears no hopples and is level headed. Three heats from 2:19 to 2:22 were easy for him last Saturday.

John Green is training at Pleasanton for Mr. W. Murray of Montana a two-year-old by Stam B. 2:11¼, out of Moscovita, the dam of Yolanda 2:14¼. This colt is a good looker and one of the best formed ones we have seen for some time. He is one of the sensible sort, quiet and not bothered by anything. He looks like a prospective fast trotter.

SALEM, OREGON, SUMMARIES.

Monday, September 16.

Trotting, 2:18 class, purse \$500—
 Van Norte, blk g by Del Norte (Phillips) 1 2 1 1

 (Lance) 2 3
 Time—2:19½, 2:20½.

THE HANFORD FAIR.

Big crowds are attending the races at the Hanford half-mile track this week and some good racing has been given.

Racing began on Tuesday with the 2:14 pace and the 2:20 trot. There were five starters in the pace, which was won by the little black stallion Advertiser by Advertiser. He took the first, third and fourth heats in 2:21, 2:22½ and 2:25. The second heat was won by Albert E. in 2:22¼. Third money went to Wanderer and fourth to Mabel C.

There were but two starters in the 2:20 trot, Era and Kinney Rose. It went to Era in straight heats in 2:27, 2:27½ and 2:25½.

On Wednesday, the first race was a 2:20 trot, mile heats, three-in-five. Sona, Prince Mack, Idolway and Emily W. scored for the word. Sona by McKinney took three straight heats and the race in 2:30, 2:26 and 2:20.

The next event on the card was a 2:12 pace, mile heats, three-in-five. David Sticker, Josephine, Radium and Explosion came up for the word. Radium by Stoueway took three straight heats and the race in 2:20½, 2:22¼ and 2:22.

The races Thursday were the best of the meeting, so far. In the 2:14 pace for \$1,000, mile heats, three-in-five, Jim Corbett, Queen Pomona, Mabel C. Lohengrin and King Athby scored for the word. Lohengrin took three straight heats and the race in 2:16, 2:17½ and 2:19¾.

Queer Knight, Burnout, Goldennut and Oveta started in the 2:10 trot, three-in-five. Goldennut took the first heat in 2:25, and Oveto took the next three and the race in 2:20¼, 2:20¾ and 2:20½.

The full summaries of the meeting will be given next week.

A FAST ONE AT AUCTION.

One of the best prospects for a fast pacer offered in California for some time is the pacer Schley B., by Lynwood W. (sire of Sonoma Girl 2:05¼ and Charley Belden 2:08½), that will be offered at the combination sale at Chase's pavilion on the evening of October 14th. Schley B. is five years old, and has no record. He paced a mile over the Pleasanton track as a four-year-old in 2:13½, making the last half in 1:04 and the last quarter in 30½ seconds. He has paced a half in 1:03 and quarters better than 30 seconds. He has not been worked fast this summer, but with very little work showed a mile early in the season in 2:17 and had plenty of reserve speed. This horse will do to take to the races, or start in matinees. He should pace in 2:10 or better next spring. Look him up in the catalogue and look him over at Chase's when the horses reach there, two days before the sale.

Jackson's Napa Soda is the best hot weather drink.

THE FRESNO FAIR.

Reports from Fresno are to the effect that the fair and race meeting held there last week was highly successful in every way. Very large crowds attended and in spite of many other attractions, including a circus that showed in Fresno one day, the harness races drew the people. The live stock and agricultural exhibits were extensive and of excellent quality. Horse and cattle exhibits were especially good. The races gave general satisfaction, as the contests were close, the time fast and the racing clean throughout. There was no betting permitted on the fair grounds, and no spirituous liquors of any kind sold. The management was excellent, and President Warlow and Secretary Powell came in for praise and commendation from all who attended. Ed F. Smith of Los Angeles did the starting, and got his fields away well and promptly.

One of the features of the racing was the exhibition mile made by Nogi, the three-year-old colt by Athablo. As our readers know, Nogi is unbeaten this year, having won the Pacific Breeders', the Occident and the Stanford Stakes, and a \$1,500 purse race at Petaluma. There was no class for him at Fresno, so his owner, President Geo. Warlow, had his trainer, Schuyler Walton, drive him an exhibition mile. The colt circled the track in 2:11¼, a splendid performance.

There were ten well contested harness races held during the week and but one heat was slower than 2:20, an excellent showing and pretty good proof that all were trying.

Inferlotta 2:04¾, the wonderful little pacing mare, won the \$1,000 stake for 2:20 class trotters, which closed early in the year. The Diablo mare Diabless, driven by J. W. Zibbell, got second money in this race, and while she had no chance of beating Inferlotta, made her step three heats in 2:11 or better, the last in 2:09½. Mr. Zibbell won a race with Miss Idaho and another with Fresno Girl during the meeting. Frank Williams also did well with William Morgan's horses. He won a race with Era, one with the McKinney mare Sona, reducing her record, and another with the gelding Queer Knight. The other winning race drivers during the meeting were Homer Rutherford, I. Mosher, Fred Ward, Schuyler Walton and C. T. Hewitt.

The meeting was a most successful one, and the association can be assured of a large entry list to its races next year, as its treatment of the horse-men was such that all who raced there will want to go again.

RULES FOR REGISTRATION.

In response to a request from several parties we again publish the rules for registration of trotters and pacers now in force by the American Trotting Register Association:

The Trotting Standard.

When an animal meets these requirements and is duly registered it shall be accepted as a standard-bred trotter:

1. The progeny of a registered standard trotting horse and a registered standard trotting mare.

2. A stallion sired by a registered standard trotting horse, provided his dam and grandam were sired by registered standard trotting horses, and he himself has a trotting record of 2:30 and is the sire of three trotters with records of 2:30, from different mares.

3. A mare whose sire is a registered standard trotting horse, and whose dam and grandam were sired by registered standard trotting horses, provided she herself has a trotting record of 2:30 or is the dam of one trotter with a record of 2:30.

4. A mare sired by a registered standard trotting horse, provided she is the dam of two trotters with records of 2:30.

5. A mare sired by a registered standard trotting horse, provided her first, second and third dams are each sired by a registered standard trotting horse.

The Pacing Standard.

When an animal meets these requirements and is duly registered, it shall be accepted as a standard-bred pacer:

1. The progeny of a registered standard pacing horse and a registered standard pacing mare.

2. A stallion sired by a registered standard pacing horse, provided his dam and grandam were sired by registered standard pacing horses, and he himself has a pacing record of 2:25, and is the sire of three pacers with records of 2:25, from different mares.

3. A mare whose sire is a registered standard pacing horse and whose dam and grandam were sired by registered standard pacing horses, provided she herself has a pacing record of 2:25, or is the dam of one pacer with a record of 2:25.

4. A mare sired by a registered standard pacing horse, provided she is the dam if two pacers with records of 2:25.

5. A mare sired by a registered standard pacing horse, provided her first, second and third dams are each sired by a registered standard pacing horse.

6. The progeny of a registered standard trotting horse out of a registered standard pacing mare, or of a registered standard pacing horse out of a registered standard trotting mare.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

GAME IN LOWER CALIFORNIA.

Up from Ensenada de Todos Santos, Lower California, comes a hunting tale of the kind that makes the sportsman tingle. It is merely a simple incident of the old line of march from the ocean back 200 miles to the mountains, marked years ago by the aborigines, who picked out the highest places for their voyaging.

It was a fish trail. That is to say, the Indians went from their mountain heights to the ocean to gather sea food. The little story comes in a letter, which tells just what a hunting country it is:

"While my outfit were riding along I sent the boy, with the man I had engaged, on the outskirts of a growth of live oaks (this in a deep canyon) and the two other men to go to the other side while I took the middle course through the oaks, where ran a lovely mountain stream. I had got in nearly midway when my horse pricked up his ears and commenced scenting, and I knew some wild animal was there.

"I had a Mauser pistol on a stock, and I made ready. My horse had stopped, but I urged him on, and a little turn showed me a sight I shall never forget.

"At a pool drinking was a doe and not four feet away was a very large fawn, and a little further were three bucks and two more still further on, which I could not determine at once. I had not time, because, when I glanced first at the doe I saw on a ledge above what I took to be a calf, or some light yellow animal.

"My second look took in the object, and I saw a mountain lion making ready to spring on the doe when the chance offered. He had seen the bucks and knew his finish should be the attack.

"Well, of course, it was one of those breathless moments to a huntsman. I wanted a buck and I wanted that lion, and I had to think quickly.

"In the meantime the doe had almost laid herself down in the water and the fawn was approaching the spring. I was favored by the wind, being to windward, and they did not scent me.

"One of the bucks turned and looked at me and I let him have it. Then I turned as quickly as possible to the lion, but my horse was then restless, and, of course, I shot wild.

"The buck fell only thirty-five or forty yards range, and it's a fact that if I had been off my horse probably I could have got another deer.

"However, they sailed out of that place and in a few moments on the hillside I heard them firing. It seems one of the bucks came straight on for Billy and the man, as Billy expressed it, he 'really thought it was tame.' He got him and then we all went for the lion as fast as we could track him.

"The other two men were standing ten or twelve feet apart on the other side of the oaks where I had sent them, and it seems the lion had made a detour and had come between them, going like blazes. They were either too frightened or too inexperienced to shoot quick enough (they were only men I had taken to do the heavy work), but my guide (not one by profession) was the best man on the trail I ever saw, and between his horse and himself he finally located that cat, and it is needless to say that I shall one day show you his pet.

"Billy is too proud for words. He has gone this morning for the day only with my man for anything he can find. Yesterday afternoon coming in he shot quail after quail on the wing, and many rabbits. The quail are by the hundreds of thousands, and cottontails and jacks, too. I have arranged a coyote hunt on horseback for to-morrow."

Wild Turkeys from Mexico to stock the San Bernardino reserve is the latest since Senator Willis' plan to bring the turkeys in from Arizona is threatened by the game laws of the territory.

William E. Van Slyke, a mining man whose home is in Los Angeles, returned last week from Mazatlan, Mexico, and in an interview with Senator Willis said wild turkeys were so thick in the Mexican locality "that people stumbled over them."

Mazatlan is on the west coast of Mexico, and Van Slyke has offered to go into the country and with the aid of a few cholos secure enough wild turkeys to stock the San Bernardino range completely.

Senator Willis immediately wrote to the State game and fish commission telling them of Van Slyke's offer, and if authorized to do so will close the deal for the importation of wild turkeys from the southern republic.

The Sisson hatchery received notice that the first shipment of salmon eggs from Baird station on the McCloud river would be sent to Sisson last Tuesday morning. Captain Lamhson, superintendent in charge at Baird, reports a take of 14,000,000 eggs from the summer run of salmon. This is an extra large take for the summer run and indicates that a very large take will be made during the fall. The salmon are increasing in numbers each year as a result of the good work of the federal and State hatcheries.

PHEASANT CULTURE.

Following close in the tracks of the great American hen, comes the English pheasant, a bird of promise and of great beauty—one that will multiply rapidly in captivity and return large profits to its owner. And it may be mentioned in passing that the great American hen has constituted herself a foster-mother for the young pheasant. In fact, she makes a better mother than the hen pheasant. So, "score one again" for the American common hen.

Pheasants rearing, as an occupation for profit and for pleasure, has no equal. Let it not be understood that pheasants may be raised as easily as common chickens, for such is not the case. They, in their youthful days, require much more attention than the barnyard chick. To conduct a pheasant farm successfully will require all of one's time and attention. Yet it has been shown that the business will yield great profits to those who earnestly employ themselves.

There are a score and more of varieties of pheasants. The bird that does well in the United States, however, is the common English pheasant. A full-grown specimen of this bird is worth at least ten times as much as a chicken, and there is always a market for him. There also is a good market for the eggs of the pheasant, and the English is a prolific layer. The history of the pheasant in the State of Oregon is short but interesting. Twenty years ago a Judge named Denny introduced eighteen Chinese ring-neck pheasants into Oregon and liberated them in the valley of the Willamette. The Legislature passed a law protecting them for a number of years. They multiplied at a great rate, and last year, during the short open hunting season, the hunters killed over 100,000 of them, all descendants of the original eighteen. In Oregon the ring-neck is known as the "Denny" pheasant, and the foresight of Judge Denny had made many a hunter happy.

In Illinois, Kansas and Colorado the State authorities are liberating pheasants, so that, in a few years, it is expected they will be sufficiently numerous to justify an open hunting season.

In addition to the English variety there are several others that do splendidly in the aviary, notably the Golden, Silver, Lady Amherst and Reeves. These are termed fancy pheasants, and they bring fancy prices. The largest aviaries in the West are located, it is claimed, in City Park, Denver. The owner is a wealthy mining man, for many years has shown the greatest interest in the preservation and protection of game birds and animals. Free of cost to the State, he is stocking Colorado with pheasants, having proven by the years of experiment that they will thrive there in the wild state. In the park he has placed 600 pheasants, the largest display to be seen in any park or zoo in the United States. Connected with the aviaries are 100 breeding pens. The eggs are taken daily out to a breeding farm, fifteen miles from the city, where they are placed under common hens. A pheasant expert is in charge of the farm. The young birds have good cover in a large alfalfa field, and this fall there will be a great number of this season's birds raised and ready for distribution.

Game Scarce in Trinity.—Game seems to be very scarce in Trinity county this year, according to reports from the upper districts, at least. The depredations of animals of prey is forwarded as the main reason for the increasing scarcity of Trinity's famed abundance of game. Coyotes have killed fawns at an alarming rate. Mountain lions are as destructive on the adult deer as coyotes on the fawn. The feathered game is also suffering great inroads from the depredations of egg destroyers, such as foxes, coyotes, hobbats and the ever-present cannibal, the bluejay. The gradual extermination of game as a result of the rapid multiplication in the past half dozen years of the above enumerated enemies of deer, grouse and quail is conceded on all sides to have reached a very serious stage in a territory otherwise most friendly to the existence of wild and desirable game. The time, in fact, has arrived for hunters to cease their own onslaughts on the desired game and enlist vigorously and united against their other enemies.

There are few sportsmen who realize to what extent the Sacramento Bass Club has gone in the saving of young fish this season. More than 100,000 of the young bass have been taken from the ponds at the time of the flood and the club has taken them out and placed them in the waters of the Sacramento river.

Had it not been for this work, fishing would have been very poor this year. The saving of these young, both perch and bass, has made the strings most fat and long this year. It will not be long before the Fish Commissioners will be gathering young bass for the annual shipment throughout the State. To the Bass Club is due great credit for the saving of the fish, and sportsmen in general are giving the club all credit for its good work.

GUN CASES.

Second to the selection of a gun invariably comes the choice of a cover in which to transport the new treasure, and common sense can direct the purchase of a gun case as surely as any other worthy transaction, for there are covers and covers. Styles have not changed tremendously in some years, with this adjunct of the sportsmen's outfit, for it has been a difficult matter to condense ever so slightly a non-condensable article. The average pair of gun barrels measure 30 inches and there is no telescoping, jointing or unjointing with modern arms that must stand test charges of smokeless powder.

The business man who cared little about advertising the fact that he was intent on recreation by the day or half day, aided and abetted by one shotgun, has all along had to disassemble somewhat. He either has to keep a firearm in each gun club locker or carry the stock in a grip and wrap the barrels by themselves in brown paper on each and every occasion. Only by such subterfuges, including the use of non-de-plume at the weekly trap shoot, was he safe from trying questions of the hazy neighbors who plainly considered he was neglecting his business to indulge in a no-account sport. His prejudice has practically disappeared, owing to the better understanding of the word trap shooting and it is no longer viewed with suspicion and criticism.

Leather cases where the barrels entered one end and the stock the other to preserve a symmetrical oblong shape had invariably to be made to order in the old days, but are procurable now when the "French" style is requested. They are handy and convenient enough when made right, but beware of those having only cotton flannel or green baize interlining to separate the barrels and stock. In an effort to save space the gun is endangered to the extent of marring its pristine freshness by other than legitimate wear and tear. The sharp edges of barrels, forearm and action soon tear through the green baize and a day's, even a couple of hours', banging together from gun store to house or from home to club grounds will mar the brown of barrels or otherwise scar the gun before you are aware of the damage.

In paying the price of a leather cover it is generally with the expectation of complete protection to gun from all knocks and bruises. The inside arrangement is quite as important as the durability and color of outside leather. The leg-o-mutton sole leather cover is a good sensible style, provided it is equipped with a lock buckle. This is a buckle that grips in the usual fashion which can be locked with a small key. The locking device, while in good point is not deemed its best point on those occasions when the owner locks it ere leaving town and forgets to have the key handy at the club or hotel. In such case they may be excused for blessing the inventor, while hunting up a locksmith or harness repairer, but be that as it may, the strap fastening of a lock buckle is more secure than the swivel thumb pieces that all too soon work loose. Plenty of fine gunstocks have come to grief in the two-foot fall from gun case to floor, occasioned by the swivel button turning of its own accord or the spring hook failing in its duty. Get a lock buckle attachment when selecting your gun cover, then throw the key away, for if a thief steals your gun he is likely to take it cover and all, whether locked or not.

The old Haven covers were wondrous to protect the gun from jars and bruises, but woe betide the gun placed inside one not perfectly dry. They are sheepskin covers, soft suede finish, regulation take-down Victoria style, with the 1/2-inch fleece used as lining. It was an elegant cushion, but hardly suitable for use at the sea shore or in wet weather. Once a wet gun was carried within it was a contract to thoroughly dry out the fleece, and a trifling leak meant a \$5 bill for the gunsmith engaged to re-brown the barrels. Notwithstanding this fault the case had a long and popular run with sportsmen years ago, but a belated cover of this make only serves as a curiosity nowadays.

Quite the swellest outfits accompany some of the imported guns and it is nothing unusual for the anglo-maniac to invest more money in the trunk case and fixings in which to carry his English weapon than a hammerless gun can be bought for in tariff protected America. Many a sole leather, trunk-shaped English guncase, with canvas outside cover, duly strapped and bound, inside partitions filled with swabs of all descriptions, oil receptacles with combination screw tops and pin pointers to drop merely the globule of lubricant on the lock mechanism or bolt joints, has cost anywhere from \$25 to \$50 in our money. The field cleaner in leather envelope, jointed cleaning rod as well, dummy cartridges, for the testing of ejector mechanism and trigger pulls, rust wicks to prevent the barrels spotting inside are all to be found in the outfit as sold in England for the care and protection of high priced guns, where money is no object.

In America a Powers brass rod with its screw-driver and oil can snugly ensconced within the handle, its tip equipped with a Lefever cleaner, beside the slotted bag for holding cloths, will do the business more quickly and effectively than all these time-killing contrivances.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

AT THE TRAPS.

The local trap season was brought to a close on the 22d inst. with the final monthly shoot for 1907 of the Golden Gate Gun Club.

The medal winners for the season were as follows: Champion class—C. C. Nauman, who won the class medal three times at monthly shoots. First class—Hip Justins, Tony Prior and M. J. Iverson each made two wins. Justins won on shooting off the tie. Second class—Terrill won three times for permanent possession. Third class—V. Holling and C. Holling, two promising young trap shots, each scored two wins, V. Holling winning in the shoot-off.

The scores in the regular club race at fifty targets, \$50 added, and in the medal race at twenty-five targets, were as follows:

Champion class—			
Reed	22	25-47	21--
E. Holling	23	21-44	21-19
Nauman	19	23-42	20-20
Wehb	20	21-41	20--
Forster	17	22-39	--
Schultz	18	15-33	18-16
*C. Gottlieb	25	22-47	24--
*W. A. Hillis	23	23-46	24--
*T. A. Marshall	21	21-42	18--
First class—			
Prior	22	24-46	24-18
Iverson	21	21-42	18-19
Justins	24	18-42	19-15
King	20	21-41	21--
Murdock	17	20-37	--
Jansen	16	16-32	17--
Second class—			
Dr. Swett	19	21-40	16-16
Fano	17	22-39	15-17
Terrill	19	18-37	21-22
Knick	19	17-36	20--
Lynch	16	20-36	16-15
Price	17	17-34	20-17
McElwain	15	18-33	--
Thomas	15	17-32	18-19
Hoelle	13	18-31	19-18
Lewis	12	17-29	--
Third class—			
C. Holling	17	18-35	11-10
V. Holling	17	14-31	14-10
Lemon	17	13-30	13-9
Sutro	11	12-23	--
*Guests.			

The Goldfield Gun Club's live-bird and blue-rock tournament, September 2d, 3d and 4th, was participated in by over forty contestants. General conditions were favorable throughout the shoot, with the exception that, at times, a high wind blowing from behind the shooter caused some inconvenience and played hoh with promising scores.

Harry Taylor of Mecklin, S. D., was high gun the first day, breaking 192 targets out of 200. Ed L. Schultz of San Francisco was second with 189, Chan M. Powers of Decatur, Ill., following with 187.

The scores for the first day, showing the following totals out of 200 were:

Knight	179	O'Daniel	138
Bungay	174	Jones	151
Varien	178	Wood	169
F. King	185	Willet	153
Marshall	173	Schultz	189
Justins	158	Holling	171
D. W. King Jr.	181	Webb	182
Powers	187	Newbert	178
Thompson	185	Merrill	175
Taylor	192	Vaughan	184
Clayton	176	Lane	175
Staunton	158	Mills	184
Rhodes	165	Diebert	160
Dyer	161	Trout	170
Irwin	166	Burgess	175
Sharp	156	Browning	167
Keefe	167	Skein	177
Douglas	169	Baker	174
Crow	177	Shaw	143
Bright	169	Gasler	167

Seventeen shooters participated in a pool shoot at ten pigeons, after the blue-rock program had been shot. Powers, Mills, Becker and Dyer each killed straight.

The main feature of the second day's shoot was the Great Western Handicap at blue-rocks, 100 targets, \$500 added and a silver cup to the winner, distance 16 to 23 yards. The race brought out thirty-three men before the traps. F. M. Newbert of Sacramento and R. Thompson of Kingsville, Mo., tied for first place, with 92 breaks each. On the shoot-off Newbert broke 17 out of 20 at 18 yards; Thompson, 21 yards, missed 4 out of 20. Newbert took the cup, the money being divided between them. The next high guns were: P. M. Crow of Carson, 91 breaks; Fred Mills of Long Beach, Cal., 90, and Ed Schultz of San Francisco, 87 breaks.

The scores of the Great Western Handicap are as follows:

Gus Knight	71	L. Dyer	85
B. H. Bungay	84	J. A. Irwin	89
W. H. Varien	88	J. E. Rhodes	85
T. King	86	A. B. Gasler	87
H. Justins	81	Ed Schultz	87
T. A. Marshall	86	A. J. Wehb	79
C. M. Powers	85	F. M. Newbert	92
D. W. King Jr.	90	Frank Merrill	86
R. Thompson	92	Sam Burgess	73

H. G. Taylor	89	S. Browning	76
H. Keefe	78	J. Skeen	88
W. G. Douglas	90	Geo. Becker	85
P. M. Crow	91	O. W. Fergenshau	85
R. T. Bright	72	L. E. King	85
C. I. Wood	90	J. E. Sharpe	71
J. E. Vaughan	90	W. M. Clayton	83
F. B. Mills	90		

The main race of the concluding day was a 25 live-bird event, 28 to 32 yards handicap. Twenty-seven entries ran the shoot along until darkness necessitated a postponement until next day. Newbert, Merrill and Becker divided first money. C. M. Powers shot high average, with 282 out of 300, Ed L. Schultz and F. King tied for second place, with 278 out of 300, and H. Taylor was third with 277 breaks.

The Arizona Territorial blue-rock annual tournament will take place at Douglas, Ariz., October 11th, 12th and 13th. Mr. H. N. Reno of Douglas will forward programs, etc., to all sportsmen who write for them.

The Afro-American Trap Shooters' League held a blue-rock tournament at Pleasant Hill, Mo., September 20th and 21st. Ten events (at 10, 15, 20 and 25 targets) were on the card for each day, this schedule embracing a number of merchandise prizes. T. H. Cochran who, it will be remembered, was once barred from a G. A. H. shoot, is the secretary-treasurer of the league.

At the second Western Handicap at Denver in August, a five-man-squad shooting, from the 20-yard peg, broke the world's record for that distance. The shooters were: J. M. Hughes, John Boa, H. J. Borden, F. Arnold and H. R. Bonser.

The Rising Sun Gun Club held a well attended live-bird shoot at the Rising Sun Driving Park on the 8th inst. The birds supplied were strong flyers, and weather conditions were very favorable. Following are the scores shot in several six-hird pools:

C. Groves	1	1	1	1	1-6
C. Rohwer	1	1	0	1	1-5
C. Meyer	0	1	1	1	1-5
J. Benson	1	1	1	1	0-5
Pierce	1	1	1	0	1-5
Peterson	1	1	1	1	1-6
Peters	1	1	1	1	1-6
Miller	0	1	1	1	1-5
Wilson	1	1	1	1	1-6
Chadbourne	0	1	1	1	0-4
Moulton	1	1	1	0	1-5
V. Rohhen	0	0	0	0	0-1
Foster	1	1	0	1	0-4
C. King	1	0	1	1	1-5
E. Feudner	1	1	1	1	1-6
"Wilson"	1	1	0	1	1-5
Pierce	1	1	1	1	0-5
Chadbourne	1	0	0	1	1-4
Groves	1	1	1	1	1-6
Peterson	1	1	1	1	1-6
Miles	1	1	0	0	1-4
Peters	1	1	1	1	1-6
Benson	0	0	1	1	1-4
Buckley	1	1	1	1	1-6
Meyer	1	0	1	1	0-4
Rohwer	1	0	1	1	0-4
King	1	1	1	1	1-6
Millar	1	0	1	1	1-4
Feudner	1	1	1	1	1-6
Foster	1	1	1	1	1-6
Robben	1	1	0	1	0-4
"Wilson"	1	1	1	1	1-6
Pierce	1	1	1	1	0-5
Chadbourne	1	1	0	1	0-4
C. King	1	1	1	1	1-6
Peterson	1	0	1	1	1-5
Feudner	1	1	1	1	1-6
Miles	1	1	0	1	1-5
Peters	1	1	1	1	1-6
Foster	1	1	1	1	0-5
King	1	1	1	1	1-6
Feudner	1	1	1	1	1-6
Miles	1	0	1	1	1-5
Peters	1	1	1	1	1-6
Peterson	1	1	1	1	1-6

The esteem in which the northern people regard the "shooting bunch" is happily echoed by a Medford paper, which has the following accounts of the advent last week of the "boys" who attended the Interstate Association shoot at Spokane and were passing through the beautiful Oregon city en route to San Francisco and Southern California:

"The world's champion marksmen arrived in Medford this morning, chaperoned by Jeff Heard. They are led by the old veteran, Tom Marshall of Keithsburg, Ia., captain of the All-American team, who represents the Union Metallic Cartridge Company. He is the only one of last year's team with the aggregation this year. Other members of the team are Chris Gottlieb of Kansas City, representing Winchester Repeating Arms Company; Frank C. Riele of Portland, representing Union Metallic Cartridge Company; Hip Justins of San Francisco, Coast sales manager of the Union Metallic Cartridge Company and Remington Company; William Hillis of Portland, representing Peters Cartridge Company; Richard Carlin of Portland, representing Union Metallic Cartridge Company, and D. W. King Jr., of San Francisco, a representative of a powder company.

"To-day was spent in auto rides about the valley and in renewing old acquaintances. To-morrow will

be spent angling on the Rogue River.

"We are always glad to get to Medford," exclaimed the genial Tom Marshall to-day. "When I ordered us booked for two days here the manager said that we must be looking for a vacation and I admitted we were. Why, we wouldn't go through here anytime without stopping and would go two days' journey to spend a day here.

"The city has grown since we were here and the country looks finer than ever. When I get rich and retire, I'm coming to live here. Yes, I'm shooting in my old form. Captured all the medals East, but had less luck at Goldfield and Spokane. Can't win all the time," laughed the world's champion.

"The world's champion marksmen are having the time of their lives in Medford. Since their arrival yesterday forenoon they have been kept on the jump. Auto rides through the valley and a practice shoot filled up the time yesterday afternoon. In the evening Edgar Hafer was host at an elaborate dinner served the visitors at his residence. At a late hour the guests, who had spent a most enjoyable evening, left to become guests at a midnight entertainment provided by F. W. Kelley, an old friend of Captain Marshall's, and years ago a member of one of his teams in the East.

"This morning the marksmen left in several autos, accompanied by many friends, for a few days' fishing on the Rogue. They leave for the south to-night. Those in the fishing party were: Thomas Marshall, C. Gottlieb, F. C. Reihl, J. D. Heard, W. Hillis, H. Justins, C. Carlin, F. W. Kelley, D. W. King, G. E. Neuber, J. E. Enyart, J. N. Teal, Mrs. Enyart, Captain Biddle and wife, H. E. Boyden and wife, Edgar Hafer, Captain A. M. Short and wife.

"At the practice shoot yesterday little feort to show their skill was made by the visitors, who emphasized the fact that they were on their vacation. The following scores were made:

	Birds.	T'l.
Marshall	100	21 20 23 22-86
Riehl	100	25 23 24 24-96
Hillis	100	21 24 25 23-93
Gottlieb	100	25 24 24 24-97
Heard	100	19 22 21 18-80
Justins	100	19 22 25 23-89
Carlin	100	19 22 25 22-88
King Jr.	100	25 19 19 22-85
Enyart	100	19 21 25 23-88
Kelley	75	.. 17 14 13-44

Hip Justins had the proud distinction of shooting high professional average in the third Pacific Coast Handicap at Spokane. He shot a Remington auto-loading gun and U. M. C. shells.

Frank Bartos, the winner of the Preliminary Handicap, used U. M. C. shells.

H. G. Taylor, who won general high and high amateur average, shoots a Remington gun and U. M. C. shells.

An all-day shoot was held by the Morris Gun Club at its grounds in Collinsville, near Morrystown, N. J., recently.

Although a goodly number witnessed the shooting in the morning, many more turned out in the afternoon, and it was declared that the attendance would have undoubtedly reached a thousand if the weather had been more favorable.

The great attraction was the exhibition shoot by Mrs. Butler, or "Miss Annie Oakley," as she is better known, the famous rifle shot.

She began her exhibition about 2:30 and shot until 3:30. During that entire time she astonished her audience by her marvelous work and kept them wondering what feat she would next perform, and they are still exclaiming over the ease with which she accomplished the seemingly impossible.

At the beginning of her exhibition a potato was held on a stick for a target. Piece by piece she chipped the potato off the stick in ten shots, and on her last shot knocked down the stick. She then shot through the ace of hearts.

Her next feat was what reliable authorities consider as her most difficult shot. Two ordinary playing cards were held so as to form a cross with the edge of one literally bisecting the edge of the other. In one shot she hit the center of the cross and split each of the cards into two pieces.

These feats were performed with a rifle.

She then used a revolver, shooting right and left handed, with a revolver in each hand. She bit two cans in the air ten feet apart, and shot at targets in the air, hitting five out of six.

Again using the rifle she shot at marbles, pennies and "22" cartridges thrown in the air.

With an automatic loading rifle, a high power firearm, she shot a hole through a piece of one-half inch steel armour. With a shotgun she bit four balls thrown in the air by herself, and broke twenty-nine out of thirty targets, both single and double.

She finished her exhibition by hitting five targets, thrown in the air at one time.

Great applause greeted Mrs. Butler at the completion of each feat, and she made a very favorable impression during her visit, which was one of pure friendliness to Mr. Trowbridge and the Morris Gun Club.

She has just returned from Maine, where she has given twenty-five exhibitions of her prowess with the rifle. She will give another exhibition at Montclair on Saturday.

The thirteenth annual tournament shoot of the Washington State Sportsmen's Association has been changed from Spokane, as scheduled, and will be pulled off at Bellingham some time in the latter part of October. It was intended to hold the tournament at the conclusion of the Interstate shoot, billed to take place at Spokane, September 10th to 12th, as Walla Walla had defaulted in arranging for the tournament after being awarded the honor.

Spokane had only allotted one day to the State shoot, and believing it would be better to hold the meet west of the mountains, E. E. Ellis, president of the association, arranged to have the tournament go to Bellingham, as that city had announced it would add \$500 to the trophies to be shot for. The following are the State trophies already provided:

Individual champion gold medal, value \$150, and Spokesman-Review \$100 gold medal. The Bellingham donation will be so divided that there will be a card of eight or nine evens.

The Southwestern Washington Sportsmen's Association has also decided to hold a tournament at Seattle in the latter part of November, under the auspices of the Seattle Gun Club.

STOCKTON SHOW.

Entries for the Stockton Show will positively close next Tuesday, October 1st. The premium list shows a very liberal classification, providing a winners class for nearly every breed.

The list of specials is, as was promised, far ahead of last year, and that collection of handsome specials was something talked of favorably long afterwards. The list gives eighty-five fine cups, as well as several valuable trophies and a number of other acceptable prizes. This list is being added to daily, the complete inventory of specials will appear in the catalogue.

As an indication of what the bench show committee and club members are trying to do to bring off a successful show and satisfactory treatment for every breed, the following favorable comment has been received from a Bull Terrier fancier, and the motives which prompted the same may be accepted as the club's bid for similar commendation from the admirers of other breeds:

"I have just received the premium list of the Stockton Kennel Club and it will be gratifying to all Pacific Coast Bull Terrier fanciers to note with what liberality their favorite breed has been provided for in the matter of the number and value of specials. No kennel club on the Coast has ever treated the Bull Terrier as generously. While reference to catalogues of Coast shows previously given finds the Bull Terrier classes were filled and the entries in point of number exceeding many other breeds, the premium lists have generally been always silent on the subject of specials. It is hoped that the owners of Bull Terriers will show their appreciation of the efforts of the Stockton bench show committee in their behalf by a liberal entry.

"The officers and members of the Western Bull Terrier Breeders' Association will be glad to take personal supervision of any dogs whose owners are unable to attend the show, and will see that they are carefully attended and intelligently shown. So, the fact that the owner of a good dog can not attend should be no bar to his sending his dog for competition."

DOINGS IN DOGDOM.

A one-day show to be held at the Del Monte Hotel, near Monterey, is now talked of.

Wonderland Kennels' trim Boston Terrier, Little Mother, last week whelped three fine pups (one dog) to Frisco Cinders. Vixen, Mrs. Edw. T. Morgan's grand young matron, whelped four puppies by Ch. Dick Dazzler last week also. One of the dog puppies is about as handsomely and evenly marked as the most ardent fancier could desire. All of the youngsters are in splendid shape and a grand lot all through.

Ascot Nancy, a sister to Ch. Dick Dazzler, whelped August 15th eight puppies to Ch. Bayside Chauncey. All were very evenly marked.

The nefarious work of the dog poisoner in Salinas has resulted in bringing together the owners of a number of valuable dogs who have offered a reward of \$250 for the arrest and conviction of any person or persons putting out poison within the corporate limits of Salinas city.

We have had requests at different times for Dalmatians. Those of our readers who desire a puppy of this breed are referred to the announcement of Mr. Algeo, which appears in the Kennel advertisements on page 13.

The Collie show at the State Fair, under the auspices of the California State Agricultural Society Collie Club, had ten dogs entered that made up in quality what was lacking in numbers. Mr. Norman J. Stewart of Monterey judged the class and made the following awards:

Novelty dogs (other than sable and white)—1 E.

C. Rand's Shadland Random Sir Jan, 2 Ann Lawrie's Gavin McNab, 3 Mrs. E. C. Rand's Random Shady. Novice bitches (tri-color)—2 E. C. Rand's Shadland Random Lassie.

Novice hitches (sable and white)—1 E. C. Rand's Bonnie.

Limit dogs (Sable and white)—1 Wm. Ellery's Southport Stepben.

Open dogs (sable and white)—1 Wm. Ellery's Ch. Southport Philosopher.

Open dogs (bred by exhibitor)—1 Wm. Ellery's Valverde Watch.

Open bitches (sable and white)—1 Wm. Ellery's Xantippe of Moreton.

Winners dogs—1 Southport Stephen, res Valverde Watch.

Winners bitches—Xantippe of Moreton, res Bonnie.

Cash prizes were given for first, silver medals to second and a diploma for third by the State Agricultural Society.

Why there should not have been a larger showing of Collies at Sacramento we can not say, possibly the "hot weather" bugbear had something to do with it. At that, there was a start and it is to be hoped that next year there will be a large entry, for here is a chance for Collie breeders and exhibitors that should not be overlooked.

Mr. Wm. Bay, owner of the Frisco Kennels, had an adventure one evening last week that was most peculiar, to say the least. Arriving at his residence, in the Richmond District, about 7:30, at which time it was quite dark, just as he stepped out of his buggy to the sidewalk, two suspicious looking characters emerged from the shadow of the high fence adjoining his house. Their actions were so threatening (in the light of recent holdups in that section) that Bay immediately jumped into the buggy seat again and whipped up his horse to avoid what he felt sure would be an attack upon his person. An effort to find an officer to overhaul the two suspects was unsuccessful. Bay, after driving about the neighborhood in a futile endeavor to identify the men, finally gave up the search and went into his house.

In the morning, greatly to his surprise and sorrow he found his two Irish Water Spaniels, Our Chance Jr. and Dublin, lying dead in the adjoining yard. This yard was used to keep his dogs in. The supposition is that the dogs had been deliberately poisoned, so that their barking would not have interfered with the holdup, for the two fellows had taken up their hiding place where the dogs would have noticed them and given the alarm.

Dublin, a very good bitch, by the way, whelped on the 9th inst. four puppies (three dogs) to The Gossoon. The litter is a fine one, and under the present circumstances getting on nicely. The four puppies were spoken for by different purchasers before they were born. If all's well, two will eventually be sent up to Dawson.

Our Chance Jr. was a grand type of the breed. He served Ch. Rowdy Girl on September 9th.

The exhibition of dogs at the Fresno County Fair, under the auspices of the newly organized Fresno Kennel Club, was a very successful feature of the fair. The number of dogs benched was, it is reported, about 200. Among these English Setters, Pointers, Collies, Bull Terriers, Cocker Spaniels, Fox Terriers, Bostons, Great Danes, Poodles and other small breeds showed quality and class to a degree. Mr. Phil M. Wand of San Francisco judged all breeds, and incidentally gave the Fresno sportsmen the right cue in running a bench show, this exhibition being practically an impromptu affair which, for various reasons, could not have been run under A. K. C. rules—or any particular rules, for that matter.

The show, under the circumstances, was enthusiastically received and bids fair to eventually promote the being of one of the most enthusiastic and well supported kennel clubs on the Coast.

A recent communication from Mrs. Thos. Murphy, proprietor of the Gabilan Kennels, Hollister, states:

"As you have had no news in your valuable paper from my kennels lately, I thought I would send you a few items. I have sold a great many Setters in the past two months—sold two promising three-months-old puppies by Ch. Buckwa-Trixie M., a bitch (Cato's Star by Cato Jr-Flora B.) to Coalinga parties. Then I just sold a litter of five dogs by Buckwa-Silver Speck. I have a nice litter of four, two dogs two bitches, by Tivenor-Danstone's Queen, my imported bitch. Mr. Wand and Mr. Butler have a pup from this litter. I have one dog pup by Tivenor-Fancon, that is a good one. I have bought the hitch Nell Montez by Rod Of Furness-Ola Montez, and her dog pup by Mallwyd Montez, he by Ch. Mallwyd Bob-Zola Montez, so I have something pretty fine. Nell Montez went reserve winners to Zola Montez at Victoria, 1906, she defeated Ch. Rockline Lady Bird. I would send you an ad, but have nothing to sell. I expect to make a good showing next spring. I have registered my kennels with the A. K. C. Nell Montez was purchased from Mr. Minor, through Mr. Palmer of Seattle."

Mr. John Brown, the well known Riverside Fox Terrier fancier, has charge of Hampshire Kennels at present.

A bench show at Santa Rosa, under the auspices of the Women's Improvement Club, is talked of, and

if the enthusiastic intentions of the ladies interested are carried out it will be a fixture some time in October.

The officers of the club are: Mrs. Chas. F. Rohrer, president; Mrs. Allison B. Ware, vice-president; Mrs. C. Louis Klopff, treasurer, and Miss Carrie Dunbar, secretary.

The Utah State Fair Association's second annual bench show will be held at Salt Lake City, October 1st to 4th, inclusive. Mr. James Cole of Kansas City will judge all breeds. Mr. F. L. Hansing is the show secretary and superintendent.

Mr. Irving C. Ackerman recently added to his Hummerstone Kennels the excellent Fox Terrier Sabine Rasper, which he acquired from the Hampshire Kennels of Los Angeles.

Ascot Kennels' Boston Terrier Endcliffe Dorothy recently died in whelping a litter of puppies.

Mr. W. F. Weiss of the Mission Drug Store, Sixteenth and Howard streets, has just purchased from the Nairod Kennels of Richmond, L. I., owned by Mr. John H. Dorian, well known in San Francisco as the former vice-president of the California Cocker Club, a remarkably fine English Bulldog puppy by the well known Nairod Kennels' winner, Young Mahomet. This youngster, like his sire and grandsire, is a cloddy little white fellow of the cart-horse type, with dark head markings, and is said to be a splendid specimen all over for so young a puppy, with the shortest of Bulldog faces, good skull, perfect rose ears, splendid front, short cobby body, great bone and quite low to the ground. He is more than usually massive in bone and general makeup, and should certainly be heard from if he continues to develop on the lines he started with. His dam is more than usually well bred, being the familiarly known Miss Hurdle, dam of Nairod's Pluto and grand-daughter of that pillar of the stud hook, Don Cervantes, full brother to Ch. Galtee More and Primula. Other names in her pedigree are Ch. Don Salano, Don Pedro, King Lud and Pathfinder. In fact, this puppy is one of the best bred youngsters ever produced in America, as he inherits also, through his noted sire, the blood of Ch. Mahomet, His Lordship, Ruling Passion, Rodney Stone, Nuthurst Doctor, Ivel Doctor, Primula, Prince Albert, Boomerang, Harper, British Monarch and King Orrey. It will be seen here that this is a most unprecedented combination of grand blood lines, and this newcomer to this Coast is claimed to be a most worthy and promising scion of his breeding.

The unusual number of bears in the vicinity of Downieville has so excited the hunters of this section that parties are daily scouring the woods on the lookout for big game. Within the past week three large bears have been killed there. George King caught a large cinnamon bear in a trap not far from Goodyear's bar, and is keeping it in captivity hoping that he may dispose of it to some menagerie. E. Deal killed two in Secret canyon, and thus made good his reputation as a bear hunter. Some of the hunters and sports in Downieville are talking of holding a great bear campstew, and inviting everyone that can attend.

Trinity county board of supervisors passed an ordinance recently offering a bounty of \$2 for coyotes and \$5 for cougar. The requirements are that the claimant for bounty furnish the entire hide of the animal and that the bone in one leg up to the first joint be left in place. After the officials have passed on the hide, the bone will be removed and returned to the owner. The scalp bounty ordinance was passed owing to the demand of hunters and sportsmen who claim that the wild game, especially deer, are being killed in great numbers by coyotes and panthers.

The Sutter County Gun Club at a recent meeting held in Yuha City, elected for the ensuing year the following board of directors: A. H. Hewitt, J. W. Ashley, E. B. Starr, and C. R. Boyd.

Extensive improvements will be made at the club preserve, located near West Butte. This shooting ground is considered one of the best in the Sutter basin.

Tuolumne now has a gun club composed of the following membership: John Bates, president and general manager; J. J. Gibbs, secretary and treasurer; J. O. Bigelow, Robert Holland, Richard Miller, Dr. J. T. Christian, James Daly, Frank Smith, H. V. Petty, Al Sperry, Harold Boquist, Frank Summers, L. M. Cody, G. J. Abbott, J. R. Prince, George Paradis, R. J. White, B. J. Deming and Frèd Stokes.

Doves will be extinct in a few years in the San Gabriel valley unless the birds are given better protection from hunters, according to W. Scott Way, a well known official of the State Audubon Society. Mr. Way says that the open season, which began July 15, gives sportsmen too easy a chance at young birds, which are just off the nest, and in consequence he regards their killing at that season as nothing more than mere slaughter. He suggests that the open season should not begin until September 15, and says that it would make no difference how long it was permitted to run, so long as it was closed again before breeding season.

DEVELOPING A TYPE OF HORSE.

(Arthur Chapman in the American Review of Reviews.)

One of the most interesting and far-reaching experiments being conducted by the United States Government is the development of a national horse—an equine type that will be recognized as distinctively American.

Horse breeders of the United States are spending millions of dollars annually on imported breeds, yet this expense must increase, rather than diminish, under present conditions, for the reason that no foreign breed of horse has been found that will not deteriorate when taken from its home environment. It has become recognized that the only solution of the problem is the development of a national type of horse—a type that will thrive and improve under American environment, just as the English hackney, the Percheron and the Arabian horse all improve in their natural surroundings.

The trotting horse is the only equine type that can be called national to-day. The farmer, the merchant, the professional man and the man of leisure constitute the market. The price for carriage horses ranges from \$200 for the common types up to fabulous sums that men of means are glad to pay for the most highly developed, finished and trained individuals. But while the demand is so general, the supply is practically exhausted. Constant importation does not solve the problem, because of the rapid deterioration of the descendants of imported horses. The only remedy is the development of a national carriage horse, and it is with this purpose in view that the Government has established a horse-breeding station at Fort Collins, Colo., where the first steps in this experiment in evolution have been taken.

Colorado Climate.

In locating the national horse breeding station in Colorado, the experts in charge of this experimental work took cognizance of the advantages offered in the altitude and climate of the Rocky Mountain region. Fort Collins is located about fifty miles north of Denver, a few miles east of the Rocky Mountain foothills. On these high plains the tiny three-toed horse, whose remains were found by the Whitney scientific expedition roamed in prehistoric ages. On these wonderful uplands, approximately a mile above sea level, everything tends to the production of a perfect horse. Sound bones and hoofs, great lung power and good size are most desired in a horse. The bone of the native Colorado horse is as dense as a piece of ivory. The dry atmosphere develops a hoof so solid that a native horse can travel miles over the rockiest country and suffer no inconvenience from lack of shoes. The high altitude develops heart and lung power that gives the Colorado horse wind and courage to make a hundred miles a day and repeat the performance the next day without injury. The climatic conditions and pure air and water are apparently conducive to speedy growth, while the native grasses, sun-cured on the plain, have always been considered the finest feed for any kind of live stock.

Wyoming, Montana, Utah and the Dakotas are also admirable breeding grounds for sturdy horses. The wonderful feats of endurance performed by pony-express riders and Government scouts and soldiers in the West would not have been possible had not the tireless Western horses been available. The Western cow pony to-day is the most active, hardy and courageous animal in the world, and can stand more hard work on less feed and less care than any other type of equine, all due no doubt to the ideal conditions of climate and atmosphere offered by the Western States.

Origin of Plan.

The man who conceived the idea of developing the typical American horse under such ideal natural conditions is Eugene H. Grubb, a veteran stock grower of Carbondale, Col. Mr. Grubb had observed how inferior native stock thrived in Colorado—how the "scrubbiest cow pony became a veritable equine dynamo amid such ideal surroundings—and he conceived the idea of developing a pure blooded native horse of a higher type than the Rocky Mountain States had ever known, and from this foundation stock developing a carriage horse that would be recognized as a national type. Mr. Grubb laid his idea before W. L. Carlyle, State Agricultural College, formerly of the University of Wisconsin. Professor Carlyle is one of the most noted live stock educational experimenters in the United States. He recognized the feasibility of Mr. Grubb's plan, and shortly after the assembling of Congress in 1903 those enthusiasts went to Washington and laid their plan before Secretary of Agriculture Wilson, who was immediately enlisted in its behalf. When the matter was laid before Congress hardly a dissenting voice was heard and a substantial appropriation was readily secured. This appropriation will no doubt be increased annually as the horse-breeding experiment grows in scope.

After securing the Government appropriation for carrying on the work, and locating the experiment station at Fort Collins, where the State of Colorado tendered the use of its buildings and equipment, a commission was appointed to select the foundation stock of the American carriage horse for the future. This commission consisted of Prof. Carlyle, Prof. C. F. Curtiss, of Iowa State College, and Dr. Salmon,

chief of the Bureau of Animal Industry at Washington. This commission was assisted by G. M. Rommel, of the Bureau of Animal Industry; M. H. Tichenor, of Chicago, and Mr. Grubb, of Colorado. In the Government stud it was decided to make use of those families of American-bred trotters specially noted for quality, size, style, action and substance, rather than speed. The progeny of such famous sires as Red Wilkes, Morgan, Messenger, Onward, Harrison Chief and Almont, bred to mares with a large proportion of old Morgan blood, should become the basis of the new strain. The work of selection required the greatest skill, since the Morgan stock in America at present has degenerated, through lack of care in breeding, into small, pony-like horses, lacking in action, ill-formed as to limbs and feet, and possessed of hereditary unsoundness. In fact the original Morgan type, from which so many of our families of trotters received their endurance, strength and well-rounded proportions, is practically extinct. It is believed, however, that a sufficient number of great individuals remain to serve as a connecting link between the old and new type, and it was the collecting of the best of these individuals that occupied the attention of the purchasing commission.

Foundation Stock.

After several months thirty-five mares were collected from seven States and were passed upon by the purchasing commission. There were representative animals from the farms of the most famous breeders in Wyoming, Kentucky, Wisconsin, Iowa, Illinois, Michigan and other States, and from this most remarkable assembly fourteen mares were finally selected by the commission and purchased at greatly reduced prices. In addition three notable donations were made by W. C. Brown and Col. Fred Pabst of Chicago, and Judge William Moore of New York City.

Even greater care was evidenced when it came to selecting the stallion to be placed at the head of the Government stud. After the commission had examined worthy animals from all parts of the country, unanimous choice finally settled on Carmon, bred by Norman J. Coleman of St. Louis, and owned by Thomas W. Lawson of Boston. It is not inappropriate that the first Government stallion should have been bred by the first Secretary of Agriculture.

Carmon was purchased early in life by Thomas W. Lawson for his famous coach four. He stands sixteen hands high, weighs 1,340 pounds, and is a glossy bronze bay in color, with black points. He is ten years old, and his grace and beauty and good qualities of disposition are the admiration of all visitors from every part of the world who inspect the foundation stock at the Government stud.

Carmon, when owned by Mr. Lawson, was known as Glorious Thunder Cloud. His stallion mate, Glorious Red Cloud, Mr. Lawson has refused to sell at any price, keeping him for the head of his stock farm, Dreamworld. It was only his deep interest in the Government breeding scheme that induced Mr. Lawson to part with Carmon. The four-horse stallion team, in which Carmon figured, cost Mr. Lawson \$30,000. This was the record price for a coach four until Mr. Alfred Vanderbilt paid a larger sum for his celebrated coach four, Rustling Silk, Full Dress, Sweet Marie and Polly Prim.

Owing to the fact that Carmon was used so long for driving purposes he has left few offspring, and these from mediocre mares. Consequently he has not been thoroughly proven as a sire of carriage horses of high type, but the progeny at the Fort Collins Station seem to have all the qualities that the most exacting can demand, and have so far borne out the judgment of the purchasing commission. Carmon's show ring career is unsurpassed by any other American horse, as he has been successfully exhibited as a stallion in breeding classes, in a coach four, and in a pair.

The Type.

In developing the ideal carriage horse there is no thought of demanding absolute uniformity in the foundation stock. There is a variety of road vehicles and a consequent variety of individual taste, so there must be variation in color, size and temperament where the horse is concerned. But there should be uniformity in conformation, style, quality and finish, thus establishing a marked type, at the same time keeping in mind the varying demands of the gig, runabout, hrougham, landau and country carriage.

In order to ascertain what the commission had in view when it purchased the foundation stock at Fort Collins, it is not amiss to take a look at five or six of the mares that seem to conform most closely to the type desired. Martha Washington is probably the finest type of heavy carriage horse. She is burnt chestnut in color, with fine, long, clean-cut head and neck, short, strong back, long, full and well rounded quarters, sloping shoulders, with high, frictionless and graceful action.

Virginia is considered the finest type of carriage mare in America to-day. She is from the stables of Judge Moore, and has faultless style, finish and substance. She is capable of taking a carriage twelve miles an hour with an endurance that will cover sixty miles a day without lagging or showing signs of weariness. In this mare is found in perfection one of the points so noticeably lacking in American trotter families, and so essential in a carriage horse—the perfect stifle and hock action characteristic of the English hackney.

Kentucky Belle is seal brown, resembling Martha Washington in graceful neck and carriage, being similar also in action, with slightly more finish.

Wisconsin Queen is a beautiful bay, with short limbs, exceptionally fine head, neck and shoulders, combining massiveness with quality and speed. She has been shown successfully as a single, as one of a pair, and as one of four in a coach.

Illinois Beauty, donated by W. F. Brown of the Vanderbilt system, is a striking black, with great finish, and is of the road and runabout type, possessing grace and beauty of action.

Colorado Countess was successfully shown at Madison Square Garden in New York. She is from the ranch of George D. Rainsford of Wyoming, and her lung and heart power, and quality of bone and hoof, taken with her wonderful endurance, bear out all that has been claimed for the Rocky Mountain country as the natural breeding place for perfect horse flesh. Four of Mr. Rainsford's remarkable mares were purchased at half their market value, and those interested in the Government experiment feel that no better foundation stock could have been secured in any quarter of the country. Mr. Rainsford has been for many years a student of conditions, feeds and breeds throughout Europe and America, and has devoted his life to the breeding of an ideal type of American horse, his personal work in this regard having done much to point the way for the Government's larger experiment.

Wide Commendation.

President Roosevelt, William Jennings Bryan and other noted Americans have expressed the keenest personal interest in the experiment at Fort Collins. Words of commendation have come from noted European horse breeders. John F. Riggs, one of England's most noted breeders, after visiting the Government stud at Fort Collins, said:

"You Yankees have made a splendid start, and I have no criticism to offer. Your mares are of our hackney type, but I must confess that they are superior in that they have speed. The product of these animals should be far superior to the American trotter and the English hackney, in that they will combine speed and form."

There are about twenty colts at the experiment station, and while all of them do not exhibit the qualities that will lead to their retention in the Government stud, there are enough admirable types to enable the experts in charge of the work to begin the process of selection. Through this constant selection of the best specimens will come the evolution of a National type of horse, maintaining all the best of the old Morgan characteristics, with other good qualities that even the Morgan horses did not possess. Under the Colorado contract a Government stud book is to be established and Government records kept. In a few years, when the experiment has made progress that will allow of distribution, the product of the Government stud will be distributed among the various States—probably being stationed at the agricultural colleges—where scientific breeding will be carried on. In this way the American carriage horse will be distributed throughout the country, and in one of two generations it will have a marked effect on American live stock. Under such careful and scientific direction the type will grow better and more distinctive as the experiment advances. Eventually, also, the business tide will turn, and, instead of being a horse importing nation, America will become a nation of horse exporters.

Proper Government Work.

It is fitting that the Government should carry on this important work, for the reason that it cannot be trusted to individuals to complete. There are few families of horse breeders in this country. In England, under the constant encouragement of the aristocracy, through cups, medals and money prizes, there has sprung up a type of men unique in the live stock industry. The Bakewells, the Booths, the Torrs and the Bates' and Cruikshanks have been stock breeders for generations. From father to son the sole idea is to carry on this one business and to perfect the breeds with which the family name has become associated. But in America the son seldom follows the business in which the father has won success. He must strike out into new fields. Consequently there is little hope of developing the highest type of live stock in this country through continued personal application. It is a matter of necessity for the Government to enter the field, if America is to gain supremacy in the breeding world.

Nor is Government encouragement of breeding anything new. In 1897 the Austrian Ministry expended \$850,000 for the encouragement of horse breeding. This sum was granted for State studs, stallion depots and the purchasing of new stock from private owners. The Government at Hanover recently appropriated \$750,000 for a horse breeding plant, with an annual maintenance fund of \$150,000. Japan has awakened to the importance of the subject and appropriated \$500,000 for live stock breeding experiments. The Governments that have encouraged live stock breeding, until distinctive national types have been developed, have received many times their direct expenditures in the exporting business that has resulted. But the chief satisfaction comes in having aided a people in developing the highest and most satisfactory types of domestic animals, like the perfect carriage horse which the scientifically planned experiments at Fort Collins seem certain to give us.

THE FARM

MR. BURBANK SPEAKS ON SMOOTH CACTI.

Mr. Luther Burbank of Santa Rosa attended the National Irrigation Congress by special invitation and received an ovation of honor and interest from the immense concourse. After urging he spoke informally as indicated by the following outline of his talk:

In my work I have something over five thousand species and varieties of plants in training for improvement, but I can only speak of one of them now. I will take cactus.

You probably know that one-third of the land surface of this whole earth is perfectly desert. Nearly the whole of Australia, except a narrow rim around the coast, has been found to be almost useless for any purpose, except sheep raising, and even that is not profitable because there is once in a while a year when one-half of the sheep die, and it is something the same wherever stock has been grown in semi-arid districts.

The cactus which was introduced into Australia and South Africa was the worst they could possibly introduce. It was introduced probably for an ornament on account of the thorns. It has taken possession of Australia and South Africa. It is very destructive to sheep districts. Very often the spicules get into the eyes of the sheep and destroy their sight, and it costs more than the land is worth to get rid of it, where that cactus once got hold of the land.

Fifteen years ago I was examining and studying forage plants for dry regions, to see what improvement could be made upon them, and it struck me that the cactus, if the thorns could be taken off, would be one of the best, of all the plants for desert culture. I have gathered all the cactus of all kinds—those which would even grow in Alaska, because I wanted some of the hardy blood. I have gathered them from the best that I could find by collectors in South Africa and Mexico, and I gathered them from North Africa, where the cactus has been somewhat cultivated for the use of camels. This is a partially thornless variety. There are two or three others. I found by raising them by seed that ninety-nine out of a hundred would be thorny. A few more were only partially thorny, they had not yet acquired the habit of leaving off the thorns, but once in a while one would be found among thousands that would have less thorns than even the parents. Taking that one and raising thousands and thousands of seedlings I have produced some that are absolutely thornless.

The Common or opuntia cactus is harder than the blue gum; just a little harder than the blue gum—but there are other species of cactus grown in North Dakota and Idaho, and that is able to stand the climate of Alaska.

I wished to get a cactus that would produce a great amount of nourishment; of course my first object was to get a thornless kind. Then, next was to get an individual which would produce a great weight of forage to the acre. That has been very well accomplished. I have a cactus which when set out three feet apart one way, by six the other, will produce 200 tons of food per acre. Now, for beets, carrots, turnips, and cabbage, and almost anything cultivated in the soil, 20 tons is a good crop. Some of the older cactus will produce about 100 tons.

Cactus is not as nutritious as beets, there is more water in it. By analysis some cacti produce 2 5-10 per cent starch, while others produce five-tenths of one per cent, so you can see there is a great individuality in the nutritious quality of cactus as well as productiveness.

My object is to combine great productiveness with great nutrition, and then my opinion is that the cactus will be the most important plant that there is on earth to-day for arid regions, and I have not the least doubt of that. I have taken the wild Colo-

rado cactus, planted them thickly in a small bed and given them no water; and planted four or five of my improved cactus in the same bed, and the improved cactus starved the others almost to death. With the same treatment they will grow three or four feet in height and be in perfect vigor and often weigh two to seven pounds each, while the Colorado wild cactus, which you would think was as hardy as anything possible, would be drying up for want of moisture. That can be seen on my place to-day.

The ability of the improved cacti to root deeper, for their greater individual growth, gives them the opportunity to strike deeper and take the moisture up, while the common wild cactus cannot reach it, so it starves to death.

Every animal that eats vegetation of any kind is very fond of the cactus, and probably for that very reason it has thorns. Otherwise it would have been either out of existence or it would have taken some other means to protect itself. All the cacti, as far as I know, which do not have thorns, have a very bitter juice, and are not suitable for food for any animal, and those which have the worst thorns are the most nutritious and the most useful. But I have secured thornless cacti which are sweet and acceptable to stock.

Cows and other animals relish cactus and when accustomed to it prefer it to other forage plant.

The cactus produces very good milk, and is used in the Hawaiian islands and North Africa for that purpose extensively.

If people only knew what cactus was, and knew what the varieties are capable of, I am perfectly sure they would say it is the greatest thing that has ever been produced from the soil naturally. It has always been the reclamer of the desert.

A Delegate—I want to ask Mr. Burbank one question: Is there a secret connected with his production of forms of plant life; if so, shall the secret die with Mr. Burbank?

Mr. Burbank—I never had a secret in my business in my life. It is free and open to anybody at any time. I will state this—I have so many visitors, over 6,000 every year—that I cannot spend more than one minute—some times not that—with each of them.—Rural Press.

THE DEMAND FOR GOOD STOCK.

The demand for good stock is increasing, is the casual remark from the breeder, the dealer and the fancier. This, in a measure, can be substantiated by the increased number of breeders of pure-bred stock, says Twentieth Century Farmer. But there is a disposition by many stock raisers to cross-breed their pure-breds, thus there is constantly going on a disposition to tear down what the pure-bred breeders are striving to build up.

There are farmers and stock raisers in all communities ready to tell what they did in cross-breeding Poland Chinas and Berkshire, or Shorthorns and Galloways; that the cross-bred animal of these crosses is far ahead of the pure-breds of either breed used in making the cross. They recommend the cross and advocate it. Some of the agricultural colleges are doing the same thing; trying their best to encourage a disbelief in the pure-bred animals. They call it an experiment and only designed to show what the results of such crosses will do. But did you ever notice that in each case the animal is pushed to the limit to prove the advantage of such a cross? There is no effort made to discredit such a cross by letting it be surpassed by the pure-bred.

There is merit in pure breeding, in pure-bred animals, and in the effort to build up the advance quality in these animals. It is being done each year, the standard is getting higher with the really meritorious breeders. How is it with the cross-bred breeder? What has he to show? Where are his results? Has he got a fixed type of animal produced from his crosses that is creditable or that he is proud to own, or has he been spending his time and efforts in producing scrubs?

When a breeder or fancier becomes

an experimenter, gets a beef idea and a dairy idea into his head at the same time, and to such an extent that he is persuaded to cross a beef breed and a dairy breed or cattle in order to secure a better individual or a better combination, he is only lending himself and his efforts to the creation of scrubs.

It is not necessary that one have a scrub to produce a scrub. This can be done readily by using pure-breds of different breeds, and the greater the divergence in the type and character of the breeds used, the better and quicker the foundation is laid for scrub breeding. It is the cross-breeding experimentation that is responsible for the present day scrub and the holding back of a more rapid improvement in the general stock of the country.

The agricultural college, of course, has some scientific problem of heredity that it is trying to solve and this is sometimes given as an apology for its experiments in cross-breeding of the pure-breds. The general tendency however points to the discovery of a possible exception of superior merit in beef production, such as the blue-ran steer Challenger and his full brother, Challenger 2d. There have been many great steers of full bloods and distinct high grades created since the days of the Challengers. But there has been no uniform success in the creation of Challengers. The effort, however, has resulted in adding to the tendency in creation of the great army of scrubs that is sure to follow cross-breeding experiments.—The Horseman and Stockman.

LITTLE TALK ABOUT EGGS.

There is no article of diet of animal origin more commonly eaten in all countries, or served in a greater variety of ways, than eggs, says Farmer Orff, in his Farm and Poultry Review. On an average, a hen's egg is 2.27 inches in length, 1.27 inches in diameter and weighs about eight eggs to the pound. The shells of hens' eggs constitute about 11 per cent., the yolk 32 per cent., and the white 57 per cent. of the total weight. Hens' eggs with dark shells are richer than those with white shells. Cabbage is better than clover for laying hens. Onions fed to hens will be noticed in the eggs. In Boston, Mass., brown shelled eggs bring the highest price; in New York white shelled eggs.

The Partridge Cochins, Dark Brahmas, Black Langshans, Wyandottes and Barded Plymouth Rocks lay brown-shelled eggs. The white-shelled eggs are laid by Brown Leghorns, Buff Leghorns, White and Black Minorcas—but all are alike as regards composition.

If your eggs show a pale-colored yolk, your grain food ration is deficient. Eggs contain a small amount of hydrogen sulphide. This accounts for the blackening of silver forks and spoons. A raw egg is the most digestible. Hard boiled and fried eggs require eight hours for digestion—soft boiled, six and a half. Eggs furnish 3 per cent. of the total food used per man per day. Eggs at 25 cents a dozen are cheaper than meat. The average person does not eat more than two eggs at a meal. The reason for the popularity of the egg in the household is that it requires less time for cooking than most common foods.

If fresh laid eggs are put in cold storage at a temperature of 34 degrees, Fahrenheit, very little change will take place in them. Eggs varnished with vaseline, preserved in lime water or a solution of water glass, will keep well. Before 1917 eggs will be marketed and sold by weight.

An egg substitute is being manufactured from skim-milk.

There is no possible danger from eating eggs—over indulgence, however, will produce bad effects.

The United States produces about eight hundred and twenty million dozen of eggs annually, or about thirteen dozen for each inhabitant—the total value being one hundred and forty-four million dollars.

A farmer near Elgin, Ill., writes that he fattens six-months-old pigs at an average cost of \$1.50. He gets slops from Elgin hotels and boarding houses free for the hauling.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lamenesses from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

**'SAVE THE HORSE'
SPAVIN CURE**

Don't think you are experimenting, write, read what it has accomplished for others; it will positively do the same for you.

THE D. W. PINGREE LUMBER CO.,
Lawrence, Mass.

Troy Chemical Co., Binghamton, N. Y.
Gentlemen: I had a fast pacer lame in nigh hind leg. I had two Veterinarians and tried various remedies. Used Save-the-Horse Spavin Cure and the horse never again took a lame step, and it caused the enlargements to disappear.

The firm of which I am Treasurer had a valuable horse that developed a ringbone and he became very lame. We applied Save-the-Horse Spavin Cure and we have worked the horse every day since without his being lame. Save-the-Horse is a great discovery.
F. B. DAVIS, Treas. The D. W. P. Co.
Coffeyville, Kan., July 10, 1907.

Troy Chemical Co., Binghamton, N. Y.
Gentlemen: We are selling considerable "Save-the-Horse," which is giving good satisfaction. I write to find out if we can do any better on price by buying in quantity.
NICHOLS DRUG CO.

Our guarantee is not mere words, mind you, but a signed contract; made absolutely legally binding to protect purchaser to treat any case named in the document.

"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet, and letters from bankers, business men and breeders the world over.

At Druggists and Dealers or Express Paid.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior. The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal. Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Goll Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY. It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses. Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

Price 25 Cents

All Trainers Should Keep it in Their Stables.
PRICE—25c, 50c and \$1.00

Isn't He Worth Saving?

ABSOLUTELY CURES
QUINN'S OINTMENT
REMOVES BUBBLES
CURES
SPLINTS
SPAVINS
WIND PUFFS

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Buncbes which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists of west by mail. Write for circular, testimonials etc. W. B. Eddy & Co., Whitehall, N. Y.

WINCHESTER

HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1886 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

THE WEEKLY

BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

A NEW FEATURE has been added to that popular stake, the Pacific Breeders' Futurity, this year. Stake No. 8, which closes on the first of December next, and is for the foals of mares bred this year, has had \$250 added to its total value, this amount being divided into six cash prizes for stallion owners, to be paid on December 24th to the owners whose stallions are represented by the largest number of mares bred to them that are nominated in the stake. First prize is \$100, second prize \$50, third \$35, fourth \$25, and fifth and sixth are \$20 each. This new feature should cause each stallion owner on the Coast to do a little rustling among those who bred mares to his horse this year, and even though he receives but fifth or six prize, it will be worth getting. The stake for the foals of mares bred in 1907 should beat all previous records of the stake for number of entries. There should be at least 500 mares nominated, and if such should prove to be the case, the value of the stake will be considerable over the guaranteed value. There is nothing that advertises a stallion like the winning of stakes or the taking of fast records by his get. It brings him into prominence with the people who are breeding trotters and pacers and naturally results in increased patronage. Athablo, Zombro, Tom Smith and Searchlight, sires of the winners of the four divisions of the Breeders' Futurity this year, have all had a boom as successful sires of stake winners, and their owners will profit therefrom next season. Todd, as the sire of Kentucky Todd 2:08½, and Axworthy, as the sire of Gen. Watts 2:09, are the talk of the whole county by reason of the performances of these two colts, and mares are already being booked to them for 1908 that would have been sent to other horses but for the wonderful records made by these colts. No one will for a moment dispute the assertion that it pays the owner of the colt, the owner of its sire and the owner of its dam for the colt to win a stake. This being the case, the only way by which such a profit can be made is to nominate in stake races. The Pacific Breeders' Futurity, which is now the leading stake on this Coast, will close for the nomination of mares on December 1st. See that your mare is named in it, and if you are the owner of a stallion, see that as many of the mares bred to him this year are nominated as it is possible for you to secure by an appeal to their owners.

WILD BELL, whose picture appears on our title page this week, is not a horse that would be termed handsome, but if "handsome is as handsome does," he is entitled to be classed among the good lookers, as he has trotted a good campaign this year under the management of Chas. De Ryder. He has had to meet some of the best trotters on the Grand Circuit, and after getting some of the money in several races and getting a mark of 2:09¼, took a good field of trotters into camp at Columbus and reduced his record to 2:08¼. Wild Bell is owned by Mr. Frank Ruhstaller Jr. of Sacramento. He was bred at Palo Alto Farm and is by Wildnut, son of By Holly's old horse Woodnut, and is out of Bell Bird 2:26¼, ex-champion yearling, who was by Electioneer, out of Beautiful Bells. Mr. De Ryder believes Wild Bell has not reached the limit of his speed by considerable, and that he will still farther lower his record next season if he does not do so at the Lexington meeting, which opens next Monday.

THE FAIR AT HANFORD last week was a success from every point of view, there being fine exhibits in nearly every department and good racing on the half-mile track, while the attendance was the best in the history of the fair. There are few places in the State where the people turn out as they do at Hanford, and this is pretty good evidence of the popularity of the management. During the races Mandolin tied the track pacing record by a mile in 2:12, and Oveta broke the track trotting record by a third heat in 2:20¼. Secretary F. L. Howard gained new laurels as a competent and obliging official, and all the horsemen who were at the meeting express themselves as highly pleased with their treatment by all the officers of the Fair Association.

THE FRESNO FAIR ASSOCIATION extended an invitation to all the clergymen in that county to attend the fair and race meeting recently given at Fresno, and a very large number of them accepted and enjoyed both the show and the races. Several of them told their congregations that they enjoyed the speed contests and saw nothing wrong in them, as there were no pools sold on results and no intoxicating liquors allowed on the grounds. The next thing we hear of will be a special race at the Fresno fair, preachers to drive, and if they will allow clergymen from outside the county to compete, we will nominate one from one of the Coast counties that will come very near finishing in front every heat.

BRIGHTON BEACH advertises some rich stakes to close Monday, October 14th. They are to be run in 1908 and 1909, and are for two and three-year-olds. Those for two-year-olds are The Brighton Junior of \$15,000, The Neptune of \$7,500, and The Venus of \$7,500. The three-year-old stakes are The Brighton Derby of \$15,000, The Iroquois of \$7,500 and The Queen of \$7,500. Full particulars will be found in the advertisement in this issue.

ANSWERS TO CORRESPONDENTS.

H. B. Oakland.—Spokane by Hyder Ali won the American Derby in 1889. Sorrento was second and Retrieve third. When he won the Kentucky Derby at Louisville, Proctor Knott was second and Once Again third.

Wm. McDonald, Livermore.—Junio 14947, record 2:22 trotting, sired by Electioneer 125, dam Nelly by Granger, son of imported Hercules, thoroughbred.

Jas. C. Hodges, Hollister.—Kenneth C. 2:13¼ not registered, but his sire and dam both are. He can be registered. Salinas Maid is registered in Volume 12. Under the present rules a mare sired by a registered horse and whose dam and grandam were sired by registered horses, can be registered if she is the dam of one with a standard record, or a mare sired by a registered horse can be registered if she has produced two with standard records. A mare that is not sired by a registered horse can not be registered, even though she should produce a dozen with standard records.

MR. NEWMAN'S GOOD SHOWING.

The Visalia Times says R. O. Newman of this city has a right to feel proud of the showing made by the horses entered by him at the Kings County Fair. He left here last week with three thoroughbred animals, and at that time the Times predicted that they would show up at the end of the week with blue ribbons. This prediction was realized, as all three of the animals entered were judged first in their class by Prof. E. J. Major of the University of California, stock judge at the fair. The prizes taken by Mr. Newman were as follows:

For best standard stallion, four years old or over—Robert Direct, six years old.

For best standard stallion, two years old—Best Policy.

For best standard trotter, one year old filly—Visalia Girl.

Ed Smith, official starter and judge, announced publicly when Best Policy was led out to be shown that he was the best bred colt in the State of California. He is by Allerton 2:09¼, out of Exline by Expedition.

ALWAYS SATISFACTORY.

Mr. Warren F. Daniell, prominent breeder at Frankling, N. H., writes: "I am pleased to say, unsolicited, that I have kept Quinn's Ointment in my stable for a long time and have always found it all that is claimed and more in some cases than I had a right to expect." For curbs, splints, spavin and all lumps, use Quinn's Ointment. If cannot obtain from druggist or dealer, address W. B. Eddy & Co., Whitehall, N. Y. Price \$1 delivered.

NOGI'S MILE IN 2:11½.

The following letter in regard to the exhibition mile made by the three-year-old trotter, Nogi by Athablo, at the Fresno Fair last month, is self explanatory.

Fresno, September 30, 1907.

Breeder and Sportsman: Seeing in your paper that Nogi's exhibition mile at Fresno is given as 2:11¼, I write to correct this. The time was 2:11½, negotiated as follows: First quarter in 34 seconds, second quarter 32 seconds, third quarter 32 seconds, and last quarter in 33½ seconds. Mr. S. C. Walton's intention was to drive the mile just so as to beat 2:12, and I think this was as well regulated a mile as could well be driven as planned before hand. I drove the pacemaker, a runner, and Mr. Walton said before starting, "Don't come too close to Nogi the first quarter, as I don't want to go that quarter faster than 34 seconds, then the half in 1:06 and the last half in 1:05, or 1:05½." Mr. Walton's watch and mine registered the mile in 2:11¼, but the timers were instructed not to shade the time any in Nogi's favor, but give it so shading would be the other way, so no outside watch would register a mile that would question the time as announced. A hundred watches were probably held, and none registered slower than 2:11½, so there was universal satisfaction and no one questioned the time. The track was not as good as it usually is when meetings are held here, and Ward, Rutherford and Mosher all thought it two seconds slower than when the Breeders' meeting was held here. Nogi has not been kept up to the edge he was at Santa Rosa, as it was not necessary, his races being easy after the Breeders' Futurity and he was given but one slow workout here after coming from Sacramento on Monday before starting on Friday. If prepared and on a fast track like Woodland, Mr. Walton thinks Nogi could heat 2:09 a fraction. I had no desire to send him a bruising mile, but only so well within his speed that it could be regulated easily and show that he is really a great three-year-old. He is now turned out in a paddock, and frolicking like a boy just out of school.

Our fair was a great success, and from the enthusiasm of all citizens of the county, I am confident we will give one annually. Preparations for next year's fair are already being made. Yours respectively,

GEO. L. WARLOW.

Last week we referred to the good performance of the Sidney Dillon stallion, Humboldt Dillon, in winning two races and defeating Uno 2:13¼ at the Ferndale Fair. Another good one that showed up there was Dr. H. J. Ring's three-year-old filly Maid of California by Bonnie Direct, dam by Waldstein, second dam Gertrude by The Moor, third dam by Mamhrino Messenger. This filly was turned out in June with the distemper, taken up again July 21st coughing and running at the nose, but was worked slowly and carefully. She had no competitor in the three-year-old-stake, but came out and went a mile in 2:33, and on the same afternoon won a special pace in straight heats in 2:28½, 2:29½ and 2:32 and reduced this record the following week at Eureka to 2:26½, with ability to have taken a much lower record. She has the speed, endurance, head, manners and action of a great race mare. Still another good one was the two-year-old filly Maud McAtee by Cassiar, who won the two-year-old stake race and a record of 2:34, which she reduced to 2:30 at Eureka and could have gone much faster. Vada Dillon, by Humboldt Dillon, dam by Diablo, second dam Iora 2:11 by Ira 2:24, was second to Maud McAtee in this stake and is a great prospect.

The report telegraphed to the daily papers from Hanford last week gave Oveta as the winner of the 2:10 trot on Thursday. This was an error, as Geo. W. Ford's trotter Goldennut by Neerut won the race. The correct summary of this race will be found in our columns this week. Mr. Ford writes us that in the heat at Fresno, where Goldennut took his record of 2:14, he broke on the first turn and was ten lengths back at the quarter, which he reached in 38 seconds. He then trotted the next quarter in 31 seconds and broke again on the upper turn and fell back five lengths, and then trotted the last quarter in 31 seconds, winning by a neck from Queer Knight in 2:14. This was his second start of the year, and the fourth time he ever started in a race. He never had but little training and that by amateurs.

Patsy Davey, trainer and driver of Mr. Frank H. Burke's La Siesta Farm horses, left on Tuesday for Lexington, where the meeting of the Kentucky Trotting Horse Breeders' Association begins next Monday. Davey will have the pleasure of seeing all the good trotters and pacers race, and may bring a colt or two home with him from the blue grass.

The Hollister races will begin next Tuesday afternoon and continue through the week. One harness race and three or four running events will be on the card each day.

Ruth Dillon, the three-year-old filly by Sidney Dillon trotted a last half over the Indianapolis track the other day in 1:03. Millard Sanders thinks she is the coming sensational trotter of the world.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Tulare September 30-October 5
Bakersfield October 7-12
Hollister October 8-12
Santa Maria October 22-26

North Pacific Circuit.

Spokane, Wash. (Inter-State Fair).... Sept. 23-Oct. 5
Lewiston, Idaho October 7-12
Walla Walla, Wash. October 14-19
Boise, Idaho October 21-26

George G. 2:05¼, unbeaten this year.

Sonoma Girl 2:05¼ has won \$25,000 and sold for \$26,000.

Wild Bell 2:08¼, a good winner on Grand Circuit.

Sterling McKinney 2:09¼, winner \$5000 trot at Hamline.

Perfection (trial 2:06¾) sold for \$10,000.

Sweet Marie 2:07 to sulky and 2:08½ to wagon, on half-mile track, both world records.

The above are California bred trotters that have advertised the State this year on Eastern tracks.

If you want a good horse at your own price, go to Fred H. Chase & Co.'s combination sale at the big pavilion, 478 Valencia street, on Monday evening, October 14th. There will be some extra good roadsters in this sale.

No pacer has been a mile in two minutes this year, and the fastest mile by a trotter is the one in 2:04¼ made by Major Delmar in an unsuccessful attempt to lower Sweet Marie's record of 2:02 at Columbus.

Sweet Marie now holds the world's half-mile track records of 2:07 to sulky and 2:08¼ to wagon, both made the same day at Allentown, Penn.

Berta Mac, the Salinas mare, has won close to \$2,000 this year, clear of all expenses, and has a few more races to go before he returns from the North.

The California Circuit, while not an extensive one this year, set some pacing records that should hold for a while.

All stallion owners should note the new features of the Pacific Breeders' Futurity for foals of mares bred this year. There are six cash prizes to be awarded on December 24th, this year, which should interest them.

The Pacific Breeders' Futurity No. 8 will close December 1st for the nomination of mares bred this year. It should have a record breaking list of nominators.

The California Breeders' Futurity, which has a guaranteed value of \$7,000 and is for trotting and pacing foals of 1908, will close November 1st for the nomination of mares, with Secretary Snowden of Los Angeles. See the advertisement in this issue.

A stallion that is related within two generations to such trotters as Sweet Marie 2:02, Lou Dillou 1:58½ and Sonoma Girl 2:05¼ is unique. The only stallion so related is Greco B., owned by Mr. H. Brace of Santa Clara, and to be sold at his dispersal sale next month.

Lon McDonald has pretty nearly established a new world's record for drivers this season. He has marked three pacers below 2:05, as follows: Kruger 2:04, Hidalgo 2:04¼ and Laura Bellini 2:04¾. Then his success with the three-year-old trotters Bell Bird 2:11¼ and Douglas 2:12¼, add still further to his prestige as a speed developer.

Get a catalogue of Fred H. Chase & Co.'s combination sale, to be held at 478 Valencia street, October 14th, and look over the summaries of Monterey's races during his campaign in California and Eastern tracks. They show that he was a race horse. Buy him and make money with him in the stud.

Kentucky Todd 2:08¾, the champion three-year-old trotter, has a lot of California blood in his veins. His paternal great grandsire, May King 2:20, was bred at Palo Alto Farm. Fanella 2:13, dam of his sire, is by the Palo Alto bred Arion 2:07¾, out of the California bred mare, Directress 2:19. Kentucky Todd's dam, Paronella, is by Parkville, a Palo Alto bred stallion, that was by Electioneer, out of Aurora 2:27, a mare famous in Sacramento thirty-five years ago.

Bolivar 2:00¾ by Wayland W. was driven to beat the track record of 2:09¾ at White Plains last week, and paced twice round the half-mile ring in 2:08. Horsemen who know the track say this is an excellent performance.

Besides winning two races at the Ferndale Fair, Humboldt Dillon, owned by Dr. Lane of that place, won first prize for the best stallion and four of his get.

Tobasco, the pacer by Wayland W.'s brother, Timothy B., that E. L. Hunt brought to the Santa Rosa track this summer and started in a race or two on the California Circuit, getting Ben Walker to drive him, has quite a history. Ben Walker marked him in 2:12½, and says he is as fast as Bolivar 2:00¾, the fastest pacer ever bred in California, and which Ben also marked. Tobasco was purchased two years ago by the Board of Supervisors of Humboldt county for \$60, and turned over to the superintendent of the County Hospital there to use as a buggy horse. He had too much life for the place, and after trying in vain to get some one to buy him from the county, the superintendent paid \$75 for him, and concluded to have him trained. Training bills were too expensive, so he sold the horse for \$150 and Hunt got him to train for his new owner. Ben Walker thinks Tobasco is a two-minute horse with proper handling.

A beautifully illustrated book of 140 pages has just been issued by Mr. M. W. Savage, proprietor of the International Stock Farm, and owner of the great champion stallions Dan Patch 1:55¼, Cresceus 2:02¼, Directum 2:05¼, Arion 2:07¾, and Ray Wilkes 2:06½. The book is printed on the heaviest coated paper and illustrated with engravings made from photographs taken on the farm. The statistical matter contained in this volume is very valuable, and alone makes the book a valuable one for the horseman's library.

The quarantine, which State Veterinarian Charles Blemer recently established on all horses quartered at the new reservoir site on the Napa State Hospital grounds, remains in force, and it will be at least thirty days before it can be raised. A number of animals have been killed and more than a score are seriously affected with glanders. There are several hundred mules and horses under restraint. The disease is of the most malignant form known to veterinary science.

Mike Duff by Zombro reduced his record to 2:19¼ at Salem. This gives Zombro his sixth 2:20 performer this year out of seven new ones in standard time.

Sonoma Girl is making good so far as her gameness and speed are concerned. She trotted in 2:05¼ two weeks ago and on Wednesday of last week won a five-beat race at Columbus.

Sweet Marie now holds the world's record of 2:07 for a trotter on a half-mile track, having lowered the record held by Cresceus a full second. She made this record at the Allentown, Pa., fair on September 20th in the presence of over 50,000 people.

Many horses that received their training over half-mile tracks were winners at the great Columbus meeting.

Wild Bell 2:08¼, Capt. Rubstaller's trotter, has proven in De Ryder's hands that he can win races, and is a "Gilt-Edge" trotter.

The pacer R. F. D. (Rural Free Delivery), that won at Columbus in 2:07¾, 2:07¾ and 2:05¼, was used on a rural mail route in Illinois for several years before he was found to have racing speed. He developed racing form remarkably fast, starting in his first race just a year ago in August, and won four races right off the reel. This season he has been a regular winner, including five stake races over the Western tracks, being first or second every heat in a \$5,000 stake at Sioux City, Ia., the week preceding Columbus, the slowest heat being paced in 2:06¾.

The California bred trotter Hopper 2:14¼ by McKinney 2:11¼, out of Cricket 2:10, is winning prizes in England as a heavy harness horse.

The champion three-year-old trotter, Kentucky Todd 2:08¾, has three crosses of Electioneer, two of George Wilkes, one of Nutwood and one of Director. These four sires represent what Mr. Martin Carter, the breeder of John A. McKerron 2:04½, calls the Big Four of the breeding business.

James W. Marshall has received an offer from the officials of the Arizona Territorial Fair for an exhibition mile at Phoenix next month by his great three-year-old Aerolite by Searchlight. Aerolite's mile in 2:05½ at Woodland has received extended notices from the Eastern turf writers, and the colt is the talk of the country.

Enter the stakes if you want to sell. A gentleman who saw a promising two-year-old this summer came to the office of this paper to see if the colt was entered in the principal three-year-old stakes for next year. Finding he was not, the gentleman "scratched" him from his list of probable purchases.

Highwood 2:21½, the great son of Nutwood 2:18¾, has four very fast trotters out this season in Just the Thing 2:12½, Jaguar 2:12¼, Montell 2:14¼ (half-mile track), and Jewell Rex 2:19¼, who was second in 2:10¼ at Sioux City.

It is reported that Hedgewood Boy 2:04½ is the highest class pacer seen in the Grand Circuit this season. He is a five-year-old chestnut stallion by Chitwood 2:22¼, dam Noretta (dam of Lady Maud C. 2:14¾), by Norris, grandam Maggie Yeazer (dam of Walnut Hal 2:08¾, etc.), by Red Wilkes.

The handsome stallion Ruben S. by Guy Wilkes 2:15¼ reduced his record from 2:18¼ to 2:13¼ at Columbus. The dam of Ruben S. is Bifty Duck (3) 2:25 by Bezzant. Ruben S. is owned at Murray Stock Farm, Mentor, Ohio, of which W. P. Murray is proprietor.

Charlie De Ryder last week shipped a carload of horses to Denver, where they will be wintered. In the lot were the two great green trotters Perfection and Faustlear. Perfection is the mare that De Ryder sold to G. H. Estabrook of Denver for \$10,000 after working her a mile in 2:06½ at Cleveland. Faustlear is the stallion owned by J. H. Brown of Detroit, that worked a mile better than 2:09 this summer. Both will be staked down the Grand Circuit next year. Others sent home were Tommy Grattan 2:12¼, who has been turned out at Libertyville for some time; Silver Band 2:10¼, and a youngster by Faustlear. De Ryder will race at Lexington.—American Sportsman.

We are not moving as fast in the reduction of trotting records as some imagine. It is fourteen years since Fantasy took her record of 2:08¾ as a three-year-old trotter, and Kentucky Todd is the first three-year-old trotter to equal it.

Sterling McKinney 2:09¼ is reported to have worked a mile in 2:07 at Columbus, and his trainer thinks 2:05 will not stop him next year.

There are seventeen pacers that have a record of 2:02 or better.

James Thompson, who has trained Col. J. C. Kirkpatrick's horses for several years past and driven with marked success on the California and Grand Circuits, has virtually retired from the business of training and racing horses, and will manage a large drayage and teaming company in San Francisco, in which Col. Kirkpatrick is interested. There is no trainer in America who is a better conditioner of race horses than Mr. Thompson, and he has marked several below 2:10, notably Little Thorne 2:07¼ and John Caldwell 2:08½. The McKinney pacer Charley D., that he raced for the Colonel in California this year, Thompson believes to be the best and fastest horse he ever trained, and is certain he could win a goodly share of the big stakes with him next season on the Grand Circuit, but some other driver will probably handle the horse. Mr. Thompson says that while he likes the game, he realizes that he is getting out of the youthful class and is over-weight by considerable, and the opportunities in the drayage business in Greater San Francisco are worth grasping. Meanwhile Charley D. and the other horses in the Kirkpatrick string at Pleasanton will be cared for this winter under Mr. Thompson's directions, and he will visit that track at least once a week to look after them. A host of friends will wish Mr. Thompson every success in his new venture. By the way, a girl baby arrived at the Thompson home at Pleasanton last week, and Mr. T. has been going with his head high and showing lots of knee action ever since.

That was a queer spectacle in the fourth heat of the 2:09 pace at Columbus. The first quarter was in 31¼ seconds, a 2:05 gait; the second in 0:31½, a 2:02 gait, and the third in 0:31¾, a 2:07 gait, making the three-quarters in 1:32½, at the rate of 2:04¾. The heat was then won in 2:12½, the last quarter being paced in 39 seconds—a 2:36 gait. As has often been said, when it comes to stopping, and stopping hard, nothing can equal a field of tired pacers.—Horse Review.

We understand that a buyer representing John Splan looked over the McKinney stallion Kenneth C. 2:13¼ and got a price on him this week. If Splan should buy him the horse will doubtless go to Europe, where so many of our best trotting stallions have gone. At the price Mr. Trefry is asking for this son of McKinney, he is the greatest bargain in California, as he will be a money winner in any country.

Some of the directors of the Pacific Coast Trotting Horse Breeders' Association are advocating the giving of two \$5,000 stakes next year, with \$1,000 set apart from each for a consolation purse.

The last of the series of cup races will be held at the Stadium track in Golden Gate Park this afternoon by the Park Amateur Driving Club.

Don't overlook the fact that Schley B., a very fast pacer by Lywood W., is to be sold at Chase's combination sale, 478 Valencia street, Monday evening, October 14th. Here is an opportunity to get a pacer that can win on the circuit next year.

Hon. Sterling Holt, proprietor of Maywood Farm, Indiana, whose premier stallion is Sidney Dillon, owns three fillies by that stallion out of Carlotta Wilkes, dam of Inferlotta 2:04¾ and Carlokin 2:13¼.

The developed ancestors are nearly all on one side of Kentucky Todd's pedigree. He is by Todd 2:14¼, be by Bingen 2:06¼ out of Fanella 2:13. Bingen is by May King 2:20, out of Young Miss, no record, and Fanella is by Arion 2:07¾, out of Directress 2:19, she by Director 2:17. Paronella, the dam of Kentucky Todd, has no standard record, neither has his grandam, great-grandam nor great-great-grandam.

It was tough on owners who named their horses all through the California Circuit this year in the 2:20 pacing events where the purses ranged from \$1,000 to \$2,000 (and entrance money was consequently no small amount), to find after the circuit started that horses like Inferlotta, Copa de Oro, Charley D. and Pilot were entered, and that all of them could beat 2:10, while their own could only pace around 2:15. Many of these owners shipped their horse home, having no other races for them, and many are now hung up with a big lot of entrance money and penalties charged against them. In the Eastern and Middle West States there are numerous half-mile track circuits where horses outclassed on the larger mile tracks can start for small purses and stand a chance to win their winter oats, but here in California this opportunity is not offered. There should be some way of changing these conditions, however.

THE COMBINATION SALE.

The catalogue issued by Fred H. Chase & Co. for the combination sale, to be held at their big pavilion on Monday evening, October 14th, shows that many high class ones will be led into the ring that evening.

The veteran horseman, P. J. Williams of San Lorenzo, has seven head catalogued. Lorenzo Girl is a three-year-old chestnut filly by Monterey 2:09¼, out of Leap Year 2:26¼, by Tempest 1881. This filly is a fast trotter. A seven-year-old black mare, own sister to the filly, is one of the best road mares in the country, does not pull on the bit, needs no boots and can speed a 2:20 clip.

A four-year-old bay trotting filly by Zombro's son, Barney Bernatto, out of a mare by Antrim, is good gaited to balter, but is unbroken. Two thoroughbreds good enough to train for the races, will also be offered by Mr. Williams. He will also offer that grand young stallion Yosemite by Monterey, out of Leap Year. This horse has never had any opportunity, but has trotted a mile in 2:16¼, and is a fine looker and grandly developed. His trotting action is about perfect, and he should trot in 2:10 with proper training. Mr. Williams' consignment ends with his great horse Monterey 2:09¼. This horse, in the hands of a person who can advertise and push him before the public, can easily earn \$2,500 a year over and above all expenses, and he is a good investment at a larger price than Mr. Williams expects to get for him.

Ed S. Parker of Pleasanton has purchased a number of young horses and fitted them for this sale and no one can go wrong in buying them. They are by Stam B. 2:11¼, Lecco 2:09¾, Directwell, Bert Logan 2:16¼ and Rey Direct 2:10, and are all in fine shape.

Mr. W. A. Clark Jr. consigns two, one by Lightfoot, out of Hazel Wilkes 2:11¼, the other by Nutwood Wilkes, out of Sbe 2:12¼. Both are three years old and good prospects.

Mr. H. Scott of San Jose sends three to the sale. They are a mare by Nutwood Wilkes out of Primrose by Sidney, one by Boswell Jr. out of Flora W. by Guy Wilkes and a colt by Scott McKinney out of Maggie by Royal Sid.

Mr. J. C. Mowry of Newark, Cal., sends three, all out of Electress Wilkes 2:28½, the dam of Lady Mowry 2:09¼. One is a two-year-old filly by Mendocino, another a yearling by Kinney Lou 2:07¾ and the third is Ollie Mack, a five-year-old sister to Lady Mowry, being by McKinney. This mare is one of the best bred daughters of McKinney and should be worth a good price in any country, as McKinney mares are valuable.

L. J. Rose, Los Angeles, sends two trotters by James Madison. One is a bay gelding out of Bertha Horn by Knight, the other a gray mare out of Bessie Belle by St. Bel.

Sam Norris has a consignment of twenty by Washington McKinney, Sidney Dillon, Lynwood W., Nutwood Wilkes and Don Sonoma. These are owned by different parties in the neighborhood of Santa Rosa, but the majority are owned by Mr. Norris. There are some splendid prospects among them. The Washington McKinneys are attracting considerable attention for their speed and good looks and now is the time to buy them, as their prices will go higher.

Several other parties have consigned horses to this sale, among them being Robert Duncan of Ukiah, who sends Schley B., a pacer by Lynwood W., sire of Sonoma Girl 2:05¼. This is a five-year-old gelding, a pacer, that has shown a mile in 2:13½ and should make a great roadster or park horse, as he is well broken, both single and double.

We advise you to send to Fred H. Chase & Co. for a catalogue of this sale, look it over and attend the sale.

Jackson's Napa Soda is the best hot weather drink.

PARK AMATEUR DRIVING CLUB.

That good, clean trotting and pacing contests are greatly enjoyed by a large number of San Franciscans is proven every time the Park Amateur Driving Club holds a matinee at the new track in Golden Gate Park. Last Saturday the fifth of the series of six matinees that are to decide the ownership of three beautiful cups brought out a very large attendance, and when one considers that as yet there is no stand where spectators may be seated to witness the sport, but that those who reach the track by the car lines must stand during the afternoon, it is surprising to see the large attendance. More than a hundred huggies, traps, surries and carriages occupied by ladies and gentlemen occupied points last Saturday from which views of the races could be had, and several hundred spectators came on the cars and filled the space around the judge's stand and overflowed onto the track, keeping the marshal busy clearing the way for the horses. When the proposed grandstand is finished the track will be more popular than ever.

The racing on Saturday was excellent, and the new club is not only bringing out some speedy horses but is developing some excellent reinsmen among its members.

In the race for class A trotters Mr. Alhert Joseph drove his horse Vic Schiller 2:11¼ to his fifth consecutive victory in this class, beating Telephone, Major Cook and Lady McKinney. The last named is a four-year-old filly by Washington McKinney, and is owned by Mr. Frank J. Kilpatrick. She has a great deal of speed, but is a little unsteady at times, but improving. Mr. Kilpatrick made a great bid for the second heat, and half way down the home stretch looked to have Vic Schiller beaten, as she was gaining on the old veteran very fast. He was steady as a clock, however, while the filly went to a break, and the race was over, Vic Schiller winning handily.

Mr. Kilpatrick had a great afternoon. He won the race for class D trotters with his horse Dennis, was second with Lady McKinney in the race for class A trotters, drove a splendid race for his fellow clubman, T. F. Bannon in the class A pace, winning it in straight heats with Jim Chase, and had a hot contest with S. Christenson for the blue ribbon in the class C trot, getting one heat, but finally being defeated.

This last event was the most exciting race of the day, and the crowd remained until the last heat was over and then clamored for more, asking the judges to call the last heat a dead one.

There were three starters in this race, Mr. Christenson's Reina Directum, Mr. Kirkpatrick's Clipper W. and Mr. Clayburgh's Charles II. Reina Directum, one of the handsomest mares that is seen in the Park, won the first heat, after a brush through the stretch with Clipper W., but when the horses were given the word in the second heat, broke just after leaving the wire and the beat went to Clipper W. In the third heat Mr. Christenson drove an excellent race. Believing that his mare had more speed than Clipper W., he took back a little on the far turn, and trotted his mare close to the pole, instead of trying to trot around on the outside. When fairly into the home stretch, however, he called on her, and although she had several lengths to make up, she gradually ate up the distance and beat Clipper W. by a long nose at the finish. The time, 1:46¾, equaled a 2:22 gait, fast for class C trotters in this club.

The class B trotters also made a nice race, which it took three heats to decide. Secretary Fred Thompson's Lady Washington got one heat and Emma Smalley, driven by Mr. G. E. Erlin, got two.

The track is now well packed and smooth and can be considered a fast track, although it is a little too hard. The summaries:

Trotting, class D, three-quarters of a mile—

Dennis (F. J. Kilpatrick)	1	1
Director B. (E. Stock)	2	2
Time—2:04½, 2:00.		

Trotting, class A, one mile—

Vic Schiller (A. Joseph)	1	1
Lady McKinney (F. J. Kilpatrick)	3	2
Major Cook (D. E. Hoffman)	2	4
Telephone (H. C. Ahlers)	4	3
Time—2:17, 2:18½.		

Pacing, class A, three-quarters of a mile—

Jim Chase (T. F. Bannon)	1	1
Colonel C. (W. C. Hamilton)	2	3
Satinwood (F. E. Booth)	4	2
Ringrose (H. M. Ladd)	3	4
Time—1:41, 1:41½.		

Trotting, class B, three-quarters of a mile—

Emma Smalley (G. E. Erlin)	1	2	1
Lady Washington (F. W. Thompson)	2	1	2
Lady Nell (M. W. Herzog)	3	4	
Allan Pollak (F. J. Kilpatrick)	4	3	
Time—1:30, 1:46¼, 1:49.			

Trotting, class C, three-quarters of a mile—

Reina Directum (S. Christenson)	1	3	1
Clipper W. (F. J. Kilpatrick)	2	1	2
Charles II. (A. P. Clayburgh)	3	2	
Time—1:47, 1:48½, 1:46¾.			

The matinee races of the Park Amateur Driving Club are drawing larger crowds every week. The final contests of the cup series will be held to-day, and the cups awarded.

PLACER COUNTY FAIR.

An excellent county fair was held at Rocklin, Placer county, in September, and there was some good racing between local horses on the half-mile track, a three days' program being carried out in good shape. William Ivy of Sacramento acted as starter and W. O. Bowers of Sacramento, L. B. Dangerfield of Loomis and R. E. Leavell of Roseville as the judges. The first day's races resulted as follows:

Loomis race, half-mile heats, for named horses, owners to drive in buggy, purse \$25—

G. Blanchard's Sir John	2	1	1
Sam Day's Maud B.	3	2	2
Dr. Borton's Dan D.	1	3	dr
Time—1:29, 1:33½, 1:35.			

Free-for-all trot, Placer county horses, three-in-five, purse \$200—

Chester's Brierwood	1	1	2	1
Nagle's Monte Bell	2	2	1	2
Pitch's Advance	3	3	3	dr
Time—2:25¼, 2:28¼, 2:23¼, 2:24.				

Second Day.

Roseville race, half-mile heats for named horses, owners to drive in buggy, purse \$25—

Harmer's Jessie M.	1	2	1
Clark's Billy	2	1	2
William Clark's Tom	3	3	3
Time—1:36, 1:34, 1:27½.			

Free-for-all trot, mile heats, three-in-five, purse \$200—

Mazell's Ben M.	3	3	1	1
Coe's Aristocrat	2	1	2	3
Tuttle's Lulu M.	1	2	3	2
Time—2:30, 2:30, 2:25, 2:26, 2:26.				

Newcastle race, half-mile heats, two-in-three, purse \$25—

Johnson's Dexter	1	1
Hurg's Duke	2	2
Bullo's Dick	3	3
Marwing's Daisy	4	4
Time—1:25, 1:30.		

Third Day.

Free-for-all trot, mile heats, three-in-five, purse \$250—

Brierwood	1	1	1
Aristocrat	2	3	2
Instructor	3	2	3
Time—2:29, 2:26½, 2:27.			

Lincoln huggy race, half mile, two-in-three, purse \$25—

Tab	1	2	1
Anson	2	1	2
Time—1:28, 1:28, 1:28½.			

Several running races were also given each day.

A COMPLETE DISPERSAL SALE.

A great dispersal sale is announced this week by Fred H. Chase & Co., who will sell at Home Park Breeding Farm, Santa Clara, all the stallions, mares, colts and fillies owned by Mr. H. Brace, proprietor of the farm, who intends offering the beautiful place for sale as town lots, the thirty-five acres being in the city limits of Santa Clara, one of the most beautiful residence towns on the Coast.

The consignment is headed by the McKinney stallion Greco B. 44845, the only stallion in the world that has for his sire the champion producing stallion of the world, and whose grandam produced the world's champion trotter. Greco B. is out of the great broodmare Alien 2:26¼ by Anteo, son of Electioneer, and sire of the dam of Sonoma Girl 2:05¼, and his grandam is Lou Milton, dam of Lou Dillon 1:58½ and three others in the list. A McKinney stallion bred like that should sire speed, and those who attend the sale and see the seventeen or eighteen head of colts and fillies by him shown to harness and led, will be convinced that Greco is to be a great sire of trotters. All his get that are broke are trotters, and they trot fast. The oldest are three years old. Greco himself has shown a mile in 2:12¼ at the trot, and was taken East by Chas. De Ryder last year to race, but was taken sick and started but a few times.

Mr. Brace owns some excellent broodmares, and a finer looking lot of youngsters would be hard to find on any farm than those by Greco out of these mares.

Among the broodmares to be sold is Belle W., dam of that great pacer, the fastest ever bred in California, Bolivar 2:00¾. Belle W. has a lusty filly at foot now by Star Pointer, and she should attract some lively bidding, as she looks like a two-minute prospect. A yearling from Belle W. is by a son of Wayland W., that sired Bolivar. On the farm are mares by Guy Wilkes, McKinney, Stamboul and other good sires, and all are to go under the hammer, as Mr. Brace has decided to close out all his stock and cut his place up into lots.

This is to be a great sale, and those who attend will have the opportunity of securing some of the choicest bred trotting stock in California.

The catalogues will soon be out, when we shall notice these horses more particularly.

COLONEL KIRKPATRICK BRED CHARLEY D.

When the representative of the Breeder and Sportsman made a picture of Col. J. C. Kirkpatrick's Charley D. at Pleasanton two weeks ago, James Thompson, the horse's trainer, informed him that the ex-pugilist, Joe McAuliffe, bred the horse. This statement was published and has called forth the following from Col. Kirkpatrick.

Fairmont Hotel, San Francisco, Oct. 1, 1907.

Breeder and Sportsman: In your very kind notice of the pacing stallion Charley D. in your publication of September 28th, I notice one error. That is a statement that he was bred by Joe McAuliffe, the celebrated fighter. As a matter of fact, I owned his dam long previous to his being foaled. The dam's history, so far as I know it, is about this: In 1893 she was sold at a public sale in San Francisco, being among a number of horses consigned from what was called the Board Ranch, which was, I think, in Sonoma county, although that can be verified. This statement in the sale catalogue said that she was foaled in 1890; that as a two-year-old she had been sent to Stockton with a view of securing a record of 2:30 on the kite track there, and had trotted in 2:32, thereby failing to get in the list. After that she was sold at the public sale, as stated above, and was bought by Timothy Judge, and by him turned over to John Cassidy. Samuel Solomon, who had the Central Meat Market here in San Francisco, bought the mare from Judge for me in 1894, and she was turned over to me by Cassidy. I then made some inquiry as to her previous performance and breeding, and, so far as I could learn, the breeding given in the sale catalogue was correct, it being that she was sired by Memo and that her dam was a mare known as the McAuliffe mare, who had been sired by John Nelson. I also followed up the statement that she had been sent to the kite track in Stockton and found that was true. At that time she gave promise of being very speedy, and at the last large meeting at the Bay District Track I took her out there from McCord's Stable, where I kept her, and asked Jim Dustin to drive her a half mile. He hooked her in a bike and drove her a half mile on the trot in 1:09, which was considered very good under the circumstances. Afterward, in driving her on the road, she injured one hind leg slightly, so that we were never able to train her, and I drove her here on the road for many years, both single and using her as a mate for Harvey Mack in a pole team, and also showed her in several horse shows, both here and in Burlingame. She has been bred to McKinney three times, the first two foals being fillies, both of which have been sold East, Charley D. being the third foal. He was foaled on the Reed Place, near Decoto, where the mare was in pasture, and as soon as he was able to travel the mare and foal were moved over to Pleasanton and placed in care of Mr. Chas. Griffith, with a view of breeding the mare to Bonnie Direct, and since that time Charley D. has never been out of my possession.

This is rather a long statement, but you, of course, may use as much of it as you wish. Thanking you again for your kind notice of the horse, I am, very truly yours,

JOHN C. KIRKPATRICK.

The receipt of the above letter from Col. Kirkpatrick gave the editor of this paper a clue to follow, and as one of the identical catalogues of the Board Ranch sale happened to have been sent to this office by one of our subscribers since the fire of 1906, we looked it up and find that the Board Ranch was at Orland, Glenn county, California. The sale of 1893 was held by the old firm of Killip & Co., at Van Ness avenue and Market street, on August 3d of that year. The mare Flewey Flewey (now dam of Charley D.), was No. 8 in the catalogue, and her pedigree was given as follows, which we have no doubt was correct:

Flewey Flewey, black mare, foaled 1890, bred at Board Ranch, Glenn county, Cal. Sire, Memo 15907; first dam, McAuliffe mare by son of Jack Nelson, he by John Nelson 187; second dam by Gen. Taylor, son of Morse Horse 6; third dam by a son of Argyle, thoroughbred.

This being the breeding of Charley D's dam, it is no wonder he is the game race horse he has shown himself to be. His dam by a producing son of the great Sidney, his second dam carrying the blood of John Nelson, a grandson of Imp. Trustee, that was out of a mare by Ahdallah, sire of Hambletonian 10; his third dam by the great thirty-mile champion Gen. Taylor, and his fourth dam by a son of the thoroughbred Argyle, Charley D. has the right of inheritance to be as game a pacer as lives.

The Australian and New Zealand Trotting Associations have had a rule for years that all horses starting in races on Association tracks must be registered before their entry is accepted, but this rule has recently been amended so that all horses must be registered before they are nominated in any event. When applying for registration the nominator must give "the brands, age, pedigree, and general description of such horse, and the name of the breeder of such horse, and the name of the owner, and all persons having any interest whatever therein, and such further particulars as the Association may from time to time require." This rule is one that should be adopted by the National and American Trotting Associations.

HANFORD SUMMARIES—HALF-MILE TRACK.

Tuesday, September 24.

Pacing, 2:14 class, \$200—
Advertisor, by Advertiser (Gillett)..... 1 2 1 1
Albert E. (Allen) 2 1 4 2
Wanderer, by Athby (Snyder) 3 4 2 3
Mahel C., by Strathway (Walton)..... 4 5 3 4
Milton Gear, by Harry Gear (Leggett)... 5 3 5 5
Time—2:21, 2:22, 2:22½, 2:25½.

Trotting, 2:20 class, \$220—

Era, by Zombro (Williams) 1 1 1
Kinney Rose, by McKinney (Walton)..... 2 2 2
Time—2:27, 2:27½, 2:25.

Wednesday, September 25.

Trotting, 2:19 class, \$200—

Sona by McKinney (Williams) 1 1 1
Emily W., by Jas. Madison (Ward) 2 2 2
Idolway, by Stoneway (Moshier) 3 3 3
Prince Mac, by McKinney (Leiginger).... 4 4 4
Time—2:30, 2:26, 2:28.

Pacing, 2:12 class, \$200—

Burnut by Neernut (Rutherford)..... 2 2 2
Emily W. by Jas. Madison (Ward)..... 3 3 3
Time—2:24, 2:20¼, 2:19¾.

MENDOCINO MOURNED IN AUSTRALIA.

Mr. W. B. Veirs of Melbourne, Australia, who owns the Palo Alto bred stallion Dixie Alto 36253, by Mendocino 2:19½, on hearing of the death of Mendocino, wrote us the following:

Breeder and Sportsman—I noted with a feeling of regret in your issue of June 29th that Mendocino, sire of Dixie Alto, and other good ones, died on June 13th, and on my first visit thereafter to Dixie's stable I not only conveyed the sad news to him, but took the opportunity of showing his respect by placing a piece of black crepe on his stall, to remain there for two weeks.

You don't hear much of Dixie Alto in California, but he is coming on here, and I think if he was in America to-day he would trot a mile easy in better than 2:10, as on the day we received the news of Mendocino's death Dixie Alto equaled in private the record made by his sire, and did it on a small track, and alone.

While the horse Cyclone was being warmed up for a race at the Sidney, New South Wales, Royal Agricultural Show last month, a wheel came off his sulky and the driver, W. Brown, was thrown out. The frightened horse galloped round the track, and eventually he went straight at the high wing of one of the jumps set for a hurdle, which he not only cleared, but also took the sulky over without touching the fence himself or allowing the vehicle to do so. It was a wonderful feat, and one that exacted great cheering. Cyclone escaped without a scratch, nor was his driver injured.

END OF SYRACUSE MEETING.

Syracuse, September 12 and 13.—Pacing, 2:12 class, purse \$1,200—

Ethan Roberts, h g by Ethan Wilkes (Snow) 1 1 1
Pacemaker, hr s by Kingmaker (Murphy).. 2 2 2

Time—2:09¾, 2:09½, 2:09¾, 2:21¼, 2:11¼.

THE ARAB SADDLE.

Mr. Graham says: The Arab saddle of Morocco is perhaps the worst that man has yet designed, though from it was made the Mexican saddle, probably the most useful that exists for all kinds of horses. The Moors girth loosely, and keep their saddles in place by a broad breastplate, so that it is exceedingly difficult to mount. To do so gracefully you must seize the cantle and the pommel at the same time, and get into your seat as gingerly as possible. It is a superstition among the Moors to mount and dismount as seldom as they can, as they hold that the getting on and off fatigues the horse more than the mere carrying of the burden. The Gauchos, on the contrary, say it helps a horse to get off and on, and to leave the saddle for a moment, loosening the girths to allow the air to get between the saddle and the back. This the Moors hold to be anathema, and Spaniards, Mexicans, and most horsemen of the South agree that the saddle should not be shifted till the horse is cool, for fear of a sore back. Gauchos all girth very tightly; Arabs scarcely draw the girths at all, and their saddles repose on nine (the number is canonical) thick saddle cloths. It is probable that, given the loose girth, short stirrup leathers, and their own flowing garments, their personal convenience has more to do with not getting off and on than regard for the welfare of their beast.—London Live Stock Journal.

The International Horse Show held in London last June realized a net profit of \$45,000.

COLUMBUS SUMMARIES.

September 19.—Pacing, 2:09 class, purse \$1,200—

Table listing race results for September 19, including names like Hal R., Omer (Hedrick), Elestis, and Kingmore, with their respective positions and times.

Time—2:10¼, 2:08¾, 2:09¼, 2:12¼, 2:07¼.

Trotting, 2:17 class, purse \$1,200. (One heat September 17th; two heats September 18th)—

Table listing race results for September 19, including names like Kenneth Mac, Ward M., and Idora, with their respective positions and times.

Time—2:11¼, 2:09¾, 2:09¾, 2:13¼, 2:12¼.

Trotting, three-year-old class, The Kentucky Stock Farm Futurity, purse \$5,000. (One heat September 18th)—

Table listing race results for September 19, including names like Kentucky Todd, Blue Hill, and General Watts, with their respective positions and times.

Time—2:08¾, 2:11.

Pacing, three-year-old class, The Kentucky Stock Farm Futurity, purse \$2,500—

Table listing race results for September 19, including names like Bettie Brent, Patrick Henry, and Lydia Curzon, with their respective positions and times.

Time—2:10¼, 2:10¼.

September 20.—Trotting, 2:05 class, purse \$1,200—

Table listing race results for September 20, including names like George G., Oro, and Mainsheet, with their respective positions and times.

Time—2:06¼, 2:08¼, 2:05¼.

Pacing, free-for-all class, purse \$1,200. (Two heats September 19th)—

Table listing race results for September 20, including names like Angus Pointer, Gallagher, and Baron Grattan, with their respective positions and times.

Time—2:05, 2:03½, 2:03¼.

Pacing, 2:14 class, purse \$1,000. (One heat September 19th)—

Table listing race results for September 20, including names like Major Mallow, William O., and Reproachless, with their respective positions and times.

Time—2:05¼, 2:06¼, 2:06¼.

Trotting, 2:12 class, purse \$1,200—

Table listing race results for September 20, including names like Wild Bell, Gold Burr, and Bellemont, with their respective positions and times.

Time—2:08¼, 2:09¼, 2:10¼, 2:13.

Pacing, 2:07 class, purse \$1,200—

Table listing race results for September 20, including names like Hedgewood Boy, Daryl Hal, and Leland Onward, with their respective positions and times.

Time—2:05¼, 2:05¼, 2:04¼.

After one heat of the 2:05 class pace had been won by Ardelle, the race was postponed until Saturday, when a rain storm caused further postponement until Monday.

September 23.—Pacing, 2:05 class, purse \$1,200. (One heat Friday)—

Table listing race results for September 23, including names like Citation, Ardelle, and Rudy Kip, with their respective positions and times.

Time—2:04, 2:03¼, 2:04¼.

Trotting, 2:16 class, three-heats, purse \$2,000—

Table listing race results for September 23, including names like Claty Latus, Jack Leyburn, and Kassona, with their respective positions and times.

Time—2:09, 2:09, 2:09.

Genteel H., May Earl and Axtellay also started. Time—2:08¼, 2:09¼, 2:09¼.

Trotting, 2:07 class, three heats, purse \$1,200—

Table listing race results for September 23, including names like Lillian R., Lotta, and Kid Shea, with their respective positions and times.

Time—2:09¼, 2:08¾, 2:08¾.

Trotting, 2:15 class, purse \$1,200—

Table listing race results for September 23, including names like Daniel, Othello, and The Pacolet, with their respective positions and times.

Time—2:09¼, 2:10¼, 2:08¾.

September 24.—Pacing, 2:13 class, purse \$1,200. (Three heats Monday)—

Table listing race results for September 24, including names like Flying Jim, Pacemaker, and Red Ash, with their respective positions and times.

Time—2:09¼, 2:08¾, 2:10¼, 2:12¼.

Pacing, 2:06 class, three-in-five, purse \$3,000—

Table listing race results for September 24, including names like Aileen Wilson, Dana Patch, and Darkey Hal, with their respective positions and times.

Time—2:05¼, 2:05¼, 2:04¼, 2:06¼, 2:09.

Trotting, 2:13 class, purse \$1,200—

Table listing race results for September 24, including names like Chime Bells, Judge Parker, and Goldburr, with their respective positions and times.

Time—2:11¼, 2:10¼, 2:10¼, 2:10¼, 2:11.

Pacing, 2:18 class, first division, three-in-five, purse \$800—

Table listing race results for September 24, including names like Leone, Jerry Dillard, and Doctor Munson, with their respective positions and times.

Time—2:08¾, 2:09¾, 2:11¼, 2:13¼, 2:12.

September 25.—Trotting, 2:19 class, first division, purse \$800. (One heat Tuesday)—

Table listing race results for September 25, including names like Fanny B., Icora, and Tregantle, with their respective positions and times.

Time—2:12¼, 2:11¼, 2:11¼.

Pacing, 2:18 class, second division, purse \$800. (Two heats Tuesday)—

Table listing race results for September 25, including names like Arrow, Point Burglar, and Sunday Bell, with their respective positions and times.

Time—2:10¼, 2:09½, 2:09½, 2:12¼, 2:10¼.

Trotting, 2:19 class, second division, purse \$1,200—

Table listing race results for September 25, including names like Marjorie, Octavie, and Ruben S., with their respective positions and times.

Time—2:13¼, 2:13¼, 2:15¼, 2:15¼, 2:16.

Trotting, 2:24 class, Merchant Stake \$5,000—

Table listing race results for September 25, including names like Sonoma Girl, Margaret O., and Claty Latus, with their respective positions and times.

Time—2:09, 2:08½, 2:07, 2:08, 2:08¼.

Pacing, 2:13 class, purse \$1,200—

Table listing race results for September 25, including names like Major Mallow, Eps Cinders, and Fred Miller, with their respective positions and times.

Time—2:08, 2:07¼, 2:07¼, 2:08¾.

Trotting, 2:09 class, purse \$1,200—

Table listing race results for September 25, including names like Axeyell, Embo, and Mae Heart, with their respective positions and times.

Time—2:09½, 2:09½, 2:09¼.

Columbus, September 26.—Pacing, purse \$1,200. (Two heats Wednesday)—

Table listing race results for September 26, including names like Lady Maud C., with their respective positions and times.

Table listing race results for September 26, including names like Frank Be Sure, Elestis, and Caffene, with their respective positions and times.

Time—2:07¼, 2:07¼, 2:06¼.

Trotting, three-year-olds, Horse Review Futurity, purse \$7,000. (Two heats Wednesday)—

Table listing race results for September 26, including names like Gen. Watts, Miss Densmore, and Bonnie Way, with their respective positions and times.

Time—2:11, 2:09¼, 2:12¼, 2:09¼.

Trotting, two-year-olds, Horse Review Futurity, purse \$3,000—

Table listing race results for September 26, including names like The Leading Lady, Justo, and Oro Lambert, with their respective positions and times.

Time—2:16¼, 2:16¼.

Trotting, 2:05 class, purse \$1,200—

Table listing race results for September 26, including names like George G., Mainsheet, and Oro, with their respective positions and times.

Time—2:06¼, 2:08, 2:07.

Pacing, free-for-all, purse \$1,200—

Table listing race results for September 26, including names like Angus Pointer, Baron Grattan, and Argot Boy, with their respective positions and times.

Time—2:03¼, 2:03, 2:05.

Trotting, to beat track record of 2:02—

Table listing race results for September 26, including names like Major Delmar, Wilkes Heart, and Jack Leyburn, with their respective positions and times.

Time—2:08¼, 2:07¼, 2:08½, 2:08.

Pacing, 2:15 class, first division \$800—

Table listing race results for September 26, including names like Major Mallow, McKaig Simmons, and Davie K., with their respective positions and times.

Time—2:08¼, 2:08¼, 2:09.

Pacing, 2:15 class, second division, purse \$800—

Table listing race results for September 26, including names like Edna V., Mosie L., and Jerry Dillard, with their respective positions and times.

Time—2:10¼, 2:10¼, 2:10¼.

September 28.—Trotting, 2:07 class, purse \$1,200. (One heat Friday)—

Table listing race results for September 28, including names like Lillian R., Embo, and Turley, with their respective positions and times.

Time—2:08¼, 2:07¼, 2:08¾.

Pacing, 2:07 class, purse \$1,200. (One heat Friday)—

Table listing race results for September 28, including names like Leland Onward, Tommy H., and Bystander, with their respective positions and times.

Time—2:08¼, 2:05¼, 2:05¼.

Trotting, 2:24 class, purse \$1,200—

Table listing race results for September 28, including names like Tregantle, St. Valiant Vincent, and Octavie, with their respective positions and times.

Time—2:11¼, 2:12¼, 2:14¼.

Pacing, 2:05 class, purse \$1,200—

Table listing race results for September 28, including names like Citation, Rudy Kip, and Hidalgo, with their respective positions and times.

Time—2:09¼, 2:09¼.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

ROD MAKING ALMOST A LOST ART.

With but comparatively few exceptions the fishing rod of to-day is a machine-made affair—the tips and guides only are put on by men, very often by youths or girls, on some cheap makes. As a rule, the majority of rods are gotten up to look well only when they are sold. In this case, however, the buyers are generally to blame, for there is too large a demand for a good serviceable article at a fourth-class price. Some men early realize their mistake, one founded on ignorance, and eventually become sticklers for high grade and efficient rods, others again are beyond redemption and never become anglers.

When the infringing influences of complex and highly organized machinery entered the old "bench" workshops of the veteran maker of split bamboo fishing rods and reconciled him to its coming, machinery could seek no higher recognition.

To-day when the fastidious fly caster or bait caster musters out his new rod, which is to prove itself or fail him, he must divide the honors or the opprobrium between the machine and the man. Before the man may begin to put the mark of his handicraft upon the rod of split bamboo, the machine will have been the basic worker.

The machine will have cut the six triangular strips of bamboo entering into each of the two or three hexagonal sections of the rod. The machine will have planed the under two sides of each strip to glass smoothness and fitted them into the hexagonal tapering bundle. The machine will have pressed each bundle home into the binding glue. And nature will have furnished the inimitable gloss of the surfaces.

In the fitting of the agate tip, the placing of the agate guide, and its fellows, the adjustment of the ferrule joints, reel seat, and handle, and finally in the careful wrapping and varnishing of the completed rod the old fashioned rodmaker finds opportunity for his handicraft.

"No rodmaker to-day can compete with the machine in the assembling of split bamboo," states a veteran and popular local tackle dealer, for a quarter of a century a rodmaker who has loved his rods sometimes to the point of unwillingness to part with them for money. He sighs as he says it, too.

For in this quarter of a century there have been other things than the machine to work change in the business of the rodmaker who learned his trade under some of the old masters of the art.

Nature herself has failed him. Where is the stock of famous bethebara wood, of which, it was claimed, the finest rods in the world were made? The old rodmaker is making his "bethebara" rods, but despising the material of which he must fashion them. A genuine bethebara rod of a generation ago would bring its weight in gold—if the wood were to be had for the making. Long ago the South American who sought bethebara stock for the world's rod markets went out of business for lack of it.

Even the greenheart woods are cut into heavily. Some of those Castle Connell greenheart salmon rods also bring a good price, so that the enthusiast can get desirable stock to work over. A larva of an Indian fly has been boring into the bamboo stock shipped from the port of Calcutta. The Japanese supply of bamboo is hopelessly second class. Only the bamboo stock from the Bombay district is safe.

This condition has given place and market to the steel rod of this age of steel—a rod despised by the rodmaker as a Buddhist despises a Christian!

No man not a fisherman ever made a rod. He must have fished to appreciate the rod. He must have loved a rod in order to appreciate its beauties, and appreciating these and apprenticeship makes the rodmaker. One man in America made a rod which won him fame before he died. Another man made a reel that brought him fame, and the grandsons of the man who may be using the first of these reels to-day may be using them a hundred years from now.

These facts make the skilled rodmaker of the present snort under his breath when some one with a steel rod comes into his little shop asking that his "pole" be fixed up ship-shape before he starts out for a two weeks' vacation into the woods and waters. "A pole!" What is the world coming to?

To-day, when the fisherman seeks his "hand-made" rod in the strictest sense, he must reconcile himself to the solid rod of greenheart or lancewood. Greenheart also has its drawback. It is in the form of the "pin knot." This pin knot, in the beginning, was a small, hard tendril of the tree. As the tree grew its outer bark inclosed the speck of tendril. When the wood is cut into squares from one-fourth to three-fourths of an inch and a pin knot shows itself the strip is thrown away. If the rodmaker, after hours of planing and polishing, feels the tip of the hidden thing he throws material and work away. Or, if the knot fails to show after all the labor of the rodmaker, the first rush of a stung bass or steelhead in the clear, cold waters of the fishing country may leave the owner of the new rod in a dilemma which only the fish is likely to escape. For the hidden pin knot in the finished section of a rod means a

snapping of the rod if the knot shall be in the slender reaches of the tip.

The rod of split bamboo is the favorite of the present-day fisherman. In the makeup of the bundle of strips composing it ends are reversed and arranged so that the inevitable sectional rings of the wood shall not lie together. Nature's finish of the bamboo cane must be removed carefully even at the knot rings. The enamel of it must not be touched in the plane surfaces.

Occasionally one may see in this nature's finish of the golden bamboo rod a chocolate discoloration in spots. Nature did not do this. In the Indian ports of lading the bamboo canes in bundles were passed through flaming heat in order to destroy the horing larvae, which in the long sea voyage would honeycomb them. Yet men have admired these blemishes until often a rod is colored artificially with acids in order to stimulate the marks of a necessity.

"Balancing" the fishing rod is one of the chief arts of the rodmaker. In the fitting of the ferrules at the point where German silver male and female joints must form about three inches each of pliancy, it becomes an art to hold the perfect bow of a rod when the strain of the line runs over the rod from reel seat to tip. The "feel" of the rod must be sympathetic to the hand of the fisherman. Its taper from reel seat to tip must be in perfect proportion through two, three, or four sections, each involving the ferrule joint.

When you have found the man who has mastered these things, be careful how you go to him for rod repairs—adjusting of an agate guide, the re-wrapping of the rod, the tightening of a loosened ferrule.

Don't ask him to straighten a steel rod which you have stepped on in the boat. He hates the steel rod anyhow, and the straightening of such a rod is so full of the risk of breaking that you will have to assume all the risk of the attempt.

Don't, for heaven's sake, call a fishing rod a "pole." A fishing pole is a stalk of bamboo in its natural state, generally imported from Japan and designed for holding out into the water a line provided with a float or bobber.

Don't—in the expression of your affection for your rod—tell him that it is "hand-made." He'll tell you that if it is, and if it isn't hand made he'll swear that you don't know a shiner from a hard-mouth.

And if you expect him to recognize the rod as hand-made, remember that it should have cost you all the way from \$18 to \$30 for a bait casting service, and \$15 to \$35 if for fly casting, the variations in prices depending upon whether the trimmings be of nicked brass or of German silver.

STOCKING THE PAPER MILL CREEK.

Last Saturday a dozen members of the California Anglers' Association planted 50,000 trout fry, obtained from the California Fish Commission, in the waters of Paper Mill Creek, Marin county. The fish were in tin cans and were transported on a freight train, the crew of which had orders to stop along the route whenever it was desirable to place the fish. The fry, ranging from an inch and a-half to three inches in length, were placed in selected spots, shallow, gravelly places, protected by overhanging brush, where the big fellows, if any there be in the stream now, could not lunch on them. This shipment was in fine condition, not more than 200 of the young trout were lost. Next year there should be some grand fishing resulting from this planting of young fish, which the club members will endeavor to carry out annually, now that a start has been made.

That Alaska is the land of big things is shown once again by a bearskin that L. L. Bales brought to Seattle from Seward on the steamer Santa Ana. The skin is that of a grizzly bear that weighed at least 1,400 pounds. The skin is fully ten feet long and about six feet wide. Mr. Bales and Jim Howell tracked the huge animal near Sand Point. It did not put up a fight, the first two shots touching vital parts, and it fell dead in the snow near its lair. If any hunter has bagged a bear larger than this one, he has not brought the skin to Seattle. Mr. Bales is well known in Seattle and Alaska.

Between Sacramento and Colfax the railroad men report that the quail are most plentiful and are growing for the time of slaughter. Dr. C. H. Blemmer says Loomis is ready for all hunters, and that the surrounding country is filled with the feathering birds which will soon be ready to stand up and say "full grown."

Around Clements, Amador county, this State, there is an abundance of valley quail. The season for valley quail does not open until the fifteenth of this month, but this report is hut one of the many to the effect that shooting this season will be par excellence.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

NEW GAME BIRD FOR CALIFORNIA.

The sportsmen of this State are soon to have another game bird added to their list. The State Board of Fish Commissioners will at once proceed to stock the hunting regions of the State with Hungarian grouse, so it is reported.

An order for 500 pairs has already been placed with the importer at Philadelphia, and it is expected that the birds will be shipped at the earliest possible moment. The birds are imported from Hungary, where they are a principal game bird of that country.

Data collected by the Commission shows that the bird has been successfully introduced in some of the Eastern States, and is as flourishing as in its native land. The birds cost \$5 a pair, therefore the task of stocking the State will prove an expensive one, but not more so than the work justifies.

The birds will propagate rapidly, being as prolific as the quail family, and it is expected that if protected a few years they will become so numerous that a regular open season can be established.

The State has a game law protecting grouse, which, with the sage hen, cannot be legally hunted until May 1, 1909. It is expected that at the next meeting of the Legislature this will be so amended as to extend the closed season for several years more to give the new game bird ample time to multiply.

The hunters' license law has so far placed with the Commissioners a fund amounting to \$85,000, and it is estimated that fully \$100,000 will be at the disposal of the Commission before the rush is ended.

This reminds us concerning an attempt made to introduce bob whites near Los Angeles. From the following report the experiment was successful:

The eastern tourist or the new arrival is a long way from the old home, but a trip to one of the canyons back of Hollywood will make him think he is near there, for within the brush in sight of Los Angeles can be heard the real eastern bob white quail, and the peculiar call from which they get their name.

About six years ago an eastern man, who took a trip into the hills north of Hollywood, thought he saw a place where the bob white quail would thrive and when he returned home sent out a dozen birds and they were turned loose. Now the dozen amounts to about 100, and while there is no open season for them, it is likely they will thrive if there is a close season made by law, for they have not the gameness of the California quail and fly but a short distance after being flushed. They are larger than the valley quail and the two are forever fighting, with the odds always in favor of the native sons and daughters, on account of their "spunk."

A number of bob whites were put out about eight years ago in the vicinity of Concord, Contra Costa county. The birds thrived and multiplied, but were eventually all killed off by market hunters and pot hunters. This was before the law prohibiting the sale of quail. We once saw nearly 100 bob whites, much to our regret hauging in bunches and for sale in one of the local markets.

FISH LINES.

That excellent trout fishing is not confined entirely to the mid sections and more northerly fishing resorts of this State, is evident from an account which pleasantly relates the chances for angling enjoyment to be found along the banks of the Sespe, in Southern California:

If there be another enthusiastic trout angler who has not wet his line yet this season, there still is a place within easy distance of Los Angeles where a week's trip might still be taken with profit.

Some of the best fishing of the season is to be had in the late summer in such streams as are not fished out earlier, to which category belong the San Gabriel, and other waters convenient to the one-day angler.

J. A. Coxe and a party of friends went out to Matilija in Ventura county. It was decided to try the fishing far from the usual haunts of the angler, and to that end provision for a several day's trip was made. In the quintet was Sim Meyers and one of the Lamb boys, who is familiar with the location of every big hole in any of the creeks that connect with the Ventura River or other similar streams in that county.

After packing up the canyon and over the range for many hours, good looking water was located, a small stream taking its rise on the Pine Mountain from a single large spring, and at the first cast trout were found to be not only plentiful but of very large size.

The first afternoon, being keen with the lust of angling, the party kept three or four of the under-sized fish, as viewed by the standard of size in that particular stream, but considered large on the San Gabriel. During the rest of the trip nothing less than ten inch fish were saved, and when there was a plenty for the larder they had to be over a foot in length to get a berth in the well-filled creels of the anglers.

An average of three dozen of these fish were taken each day, there being a number that would touch sixteen inches. Small Emeric spoon baits and the artificial fly seemed equally alluring; in fact there was nothing the anglers had to throw to the trout that the fish did not attack with enthusiasm.

Meyers has angled for trout during many years of his residence in Ventura county and never saw the

sport better. The only drawback to "Big Trout Creek" is its inaccessibility, and in the eyes of the determined angler that is its chief virtue, as it assures some protection to the fish supply therein.

Coxe found no great difference in the matter of files. Anything the party had in their hooks seemed to tickle the usually fickle fancy of the fish. Coachmen and brown hackles are usually the extent of the local trout angler's assortment, and they did as well as any other patterns that were used.

The state of the water in the upper Ventura county streams is excellent at present, the brooks being fairly high and very clear. There is considerable food for the fish in them also, and, all told, the conditions hardly could be better for next season's fishing.

There has recently been good tuna fishing in Monterey bay; in fact, there is better tuna fishing there than at Catalina, and there is no doubt that if it was properly advertised many sportsmen would be attracted to Monterey by the tuna fishing.

On Sunday, September 8th, about forty tuna were caught by fishing parties. Hardly a day passes but two or three are taken. The tuna are mostly small ones, weighing from forty to seventy-five pounds.

Twenty thousand Loch Leven trout were planted in the south fork of the Tuve river on Saturday, September 14th. The fish arrived from the State hatchery at Sissons the night before. An order had previously been sent in for 10,000, but the Fish Commission proved its liberality by doubling the number. Saturday morning a party consisting of T. M. Dungan of Exeter, J. C. McCabe, Fred Eckles, Walter Vinson, George Lang and Dan Sattler, equipped for both fishing and hunting, left with the minnows in custody, and the big cans containing the fish were emptied into the river at the Indian reservation later in the day.

No consignment of fish ever received at Porterville was in better condition than this. Of the entire lot 20,000, only fifteen were lost. The balance scattered in lively fashion in every direction immediately upon being turned into the stream, exhibiting strength that augurs well for their condition when the next trout season comes around.

After attending to this duty, the members of the party yanked a few full-grown members of the finny tribe out of the stream and chased over the hills in pursuit of game. According to a tale sworn to by all of them, they came upon a big black bear—the blackest bear that ever drew a hunter's aim in the Sierras. Walter Vinson, whose tendency to baldness has of late led him in search of hair-raising experiences, sneaked up within range of the black monster and popped a charge from a 30-30 rifle at him. The bear fell over, and Walter yelled to the rest of the crowd, "I've got him." He started after Bruin without reloading, but before he got near, the bear, probably frightened into new life by the apparition, suddenly rose and galloped off into the brush and was seen no more.

Irresponsible and law violating foreigners are gradually finding out that our fish and game laws are to be respected and observed. A case in point is that of the four Greeks who were arrested last week on a charge of dynamiting fish in the north fork of the Feather River, pleaded guilty to the charge when arraigned in the Superior Court at Quincy, and were each fined \$250, with the alternative of spending a like number of days in the county jail. Two of the men paid their fines at once and were released, but the other two had no funds and were compelled to remain in jail for some days. At last their countrymen came to the rescue and they were permitted to breathe freedom's air once more. The total amount of fines recovered amounts to \$988, which goes to the State fish and game fund.

A Watsonville party, consisting of three ardent disciples of old Ike Walton—Jim Smootz, C. A. Faul and Herman Woolf—fished near that city, among the tules near the chain of lakes, and succeeded in landing thirty-six fine black bass to show for their day's sport.

District Attorney Charles J. Luttrell of Yreka was called to Hills the other day upon a complaint sworn out by the residents of that section of the country against the sawmill of the Northern California Lumber Company, which has been turning the sawdust from the mill into the northwest fork of Cottonwood Creek. This used to be a common practice by the mill owners, but for the last month no sawdust has been turned into the creek.

The Sacramento Black Bass Club has been doing such good work in prosecuting the violators of the fish and game laws that now there are hardly any who dare to step over the "dead line." The prosecution of the American Fish Company, which has been one of the main offenders, has put a stop to some of the illegal practices.

Game Warden Neal started out on an expedition to suppress the seining of fish, and this illegal method was not only a thorn in his side but as well in the sides of all true sportsmen. Month after month had the bass been taken from the river and hundreds of pounds shipped away. Warden Neale finally secured the conviction of several of these offenders and then the American Fish Company was taken to task. The result has been that this prosecution has been the means of accomplishing more for the sportsmen than any other thing which has

been done in this line this season. The Black Bass Club has been supporting the Warden and has done no end of good.

This has been a lively bass season, and from all up and down the Sacramento River have come reports of good fishing, and the black and striped finny tribe have been landed in baskets galore. It is true that there have been many violations of the fish and game laws, and especially has this been reported along the Sacramento River and sloughs adjoining, but Game Warden George Neale put a sudden stop to the violations recently, when he made a raid on the fish markets and seized many pounds which had been illegitimately caught by fishers who had been using the seine.

One of the favorite fishing grounds this season has been in the Mokelumne River. Both black and striped bass have been caught and there are plenty yet in the waters.

Supervisor Thisby, in whose district the fish have been caught, says:

"I want to tell you that the bass have been most plentiful this year. Both the black and striped bass have been enriching the fishers' baskets and adding no end of sport to the pastime. Very few have violated the law around here. There is no end of pleasure among those fishermen who knew the right spots in which to drop their hooks."

No remarkable catches have been recorded, but it is stated that the bass are running large in that fishing ground.

AT THE TRAPS.

The Channel City Gun Club opened the Southern circuit of blue-rock tournaments with a two days' shoot September 23d and 24th. Fred Mills of Long Beach was first high amateur gun, with a total of 362 breaks out of 400; Billy Varlen of Pacific Grove was second, with 358; Roy Witman, 345; C. D. Hagerman, 334; Gus Knight, 331; F. A. Weatherhead, 318; "Barracuda" Gibson, 318; J. P. Maese, 306; E. C. Redman, 294; "Pop" Carr, 286.

Among the "pros" the order was: Chris Gottlieb, 383; D. W. King Jr., 366; E. Holling, 350; "Dick" Reed, 347; Hip Justins, 325; T. A. Marshall, 321. Gottlieb and King shot Selby factory loads.

The Western Gun Club's three-day blue-rock tournament at the Sherman grounds, near Los Angeles, brought out an attendance of nearly fifty shooters. Windy conditions during two days played old nick with a number of crack scores, another matter that

helped the boys to keep up low averages was the fact that many of the targets furnished stood the impact of shot pellets without breaking. Targets were picked up after the shoot that were perforated, some by several pellets of shot, but were unbroken.

The following account of the shoot is by Ed Hedderly, a popular sportsman and leading sporting writer of the Angel City:

Fred B. Mills pegged a second spike into his hold on the high average championship of the Western Gun Club's initial tournament Saturday at Sherman, by repeating his excellent performance of the first round, and breaking 135 out of the 200 birds programmed, for the excellent figure of 92½ per cent.

In the morning scores were good, and it was thought the work would read better on paper than that of the first day, but about lunch time the fun began. The trade-wind had been flirting a little with the birds all along, but after shooting was resumed it came on to blow a moderate gale. Targets commenced to bounce like rubber balls, and one after another even the crack "pros" went down the line. Scores hovered around 14 and 15, and several quit in disgust. Then came the really good shot's time, and he proceeded to make use of it. At his usual steady gait, making but one straight, Mills traveled down the score sheet, and at the evening compilation figured quite a distance ahead of his nearest competitor for amateur honors, Chris Gottlieb, the Omaha professional, another crack duck shot, stayed in the hunt to the last and led the "birds only" class by a wide margin, breaking but one bird less than Mills for 92 per cent.

Aside from the wind, everything passed off smoothly, and about the same number of shooters was on hand as faced the traps the first day. Sunday morning the crowd is expected, the \$50 purse added to the last event for average chasers being the drawing card.

Most of the "pros" had hard sledding of it, and bad half hours were too common for comfort. Thomas A. Marshall in particular was unlucky, losing 53 out of 200.

D. W. King Jr. was a good second to Gottlieb, with 189 breaks, for 90 per cent. He is an expert with the rifle as well as the scattergun. Dick Reed of San Francisco was in good form, and, in spite of the wind, let but 25 get away, his running mate, Hip Justins, being six behind.

Bill Hillis took something of a tumble from his exalted position on the first day by looking the wrong way at 40, the changing traps and varying wind being his undoing.

Emil Hollin with 169, Clarence Haight with 154, Harry Hoyt with 145, are another trio which had its troubles. All are cracks, good for much better scores under ordinary circumstances, but yesterday had the best of 'em treed.

The amateurs, as a whole, acquitted themselves well. Varlen lost but twenty-one during the day; Mark Lane missed but two more, as did Knight. The big San Bernardino artilleryman, with his long-eared gun and "loaded-while-you-wait" shells, was working hard for second high amateur average, and bid fair to win it.

"Pop" Carr, the veteran from Monterey, who never misses a shoot, or admits that he is coming to the next one, came through with a straight in one event.

R. M. Arnold of Hueame dropped 25, and drew down \$32.90. "Barracuda" Jim Gibson of Nordhoff treated his erstwhile good reputation shamefully during the day by sloughing off 43. "Barracuda" has a specialty, it is shooting for medals. If there were any around he would be wearing 'em at the finish. At one of the L. A. G. C. tournaments Jim once won all of the three medals hung up, breaking better than 47 out of 50 each time.

Ed Vaughan was away below his form, and on the sick list, looking more like a candidate for the hospital than a crack trapshot competing for high average honors. In all, 27 got away from him.

E. Weatherhead, the Iowa amateur, missed 37. C. D. Hagerman, with 162, and Charles Van Valkenburg with one less, were around the \$1 per cent mark. Rhodes quit after the seventh event and gave it up for a bad job. Bungay got together better than on the first day and broke 175. He is still somewhat out of practice, but Sunday probably will do better work, and run up his form of two or three years ago.

"Pop" Carr broke 162, Charlie Julian scored 159, Deibert only shot in five events, E. C. Redman, J. H. Baker, Homer Kennedy and M. D. Towne took part in the last few events.

There were thirty-eight shooters. Treasurer and Manager Joe Wood was so busy that he had no time to do anything but pay out money and keep the books straight. Mills won \$66.15 and Lane \$58.75 on the day, which is not bad for any shoot.

On the whole, the shooters like the Chick system. Some say the three-money-cut gives two or three fellows all the coin, but if the purses were cut four ways, the same fellows would complain, because there was nothing to go after and no money when one did make a good score.

In a gale that converted quartering birds into an assortment of angles that kept down scores until everybody was disgusted, the Western Gun Club's first blue-rock tournament passed into history last Sunday. Considering that it was the initial attempt of the organization, the shoot was a most enjoyable event for all concerned.

Throughout the entire program there was but one thing to mar it. The weather Saturday was too windy for good scores, and Sunday was about the

nastiest day that local gunners have had since the Pacific Coast championships were shot off in a driving sandstorm at Ocean Park several years ago.

One by one the experts went down the line, but the crack Nebraskan, Chris Gottlieb, managed to pull general and professional high average out of the fire.

Fred Mills, who was thought certain to win high average with two days gone and an average of 92 1/2 per cent, went to pieces on the last day.

Fred Bills of St. Louis, who has been shooting consistently throughout, was second to Mills among the amateurs, with 531 breaks and 88 1/2 per cent.

Vaughan shot second high professional average. Third high professional average went to Emil Holling of San Francisco, with 87 1/2 per cent.

These are not very flattering reports for the "pros" to send back to the factories, yet, considering the conditions, the shooting was excellent.

Vaughan, in one of his events, fired at a quartering target and lost it. Harry Hoyt said the bird was knocked completely out of the line of flight.

Fred B. Mills has invented a new target which he believes will prove better than any in use.

There was plenty of money in sight Sunday and straights were worth good gold. T. G. were not so plentiful as previously, and paid better than \$10 as a rule.

One of the amusing features of the day was the "dog race," in which Treasurer Wood produced a Pointer, which some one decided to raffle off in the form of a shoot at twenty-five birds.

Bob Bungay of Ocean Park took a liking to the animal, which was a big Pointer dog with a glaring yellow eye. The Ocean Parker got away badly by missing his first bird and was thought out of the hunt.

In all, the club trapped about 27,000 targets, and the shoot was in this regard somewhat better than had been expected.

The totals of the shooters who competed throughout in all the average events follow:

Table listing names and scores for various events, including T. A. Marshall, R. C. Reed, D. W. King Jr., etc.

Table listing names and scores for Western Gun Club, Los Angeles, September 27, 1907; ten events, twenty targets each.

Table listing names and scores for Western Gun Club, Los Angeles, September 28, 1907; ten events, twenty targets.

Western Gun Club, Los Angeles, September 28, 1907; ten events, twenty targets.

Table listing names and scores for Western Gun Club, Los Angeles, September 30, 1907; ten events, twenty targets.

Western Gun Club, Los Angeles, September 30, 1907; ten events, twenty targets.

Table listing names and scores for Western Gun Club, Los Angeles, September 30, 1907; ten events, twenty targets.

Table listing names and scores for various events, including W. H. Wilshire, Redman, C. E. Englehart, etc.

OPENING OF THE DUCK SEASON.

On Tuesday last the open season for wild ducks commenced, needless to say that throughout this State every sportsman who could get away to the duck hunting grounds was out.

The first day of the season was, generally speaking, a most auspicious one. Reports from interior points, particularly shooting resorts of the Sacramento and San Joaquin valleys, show that limit bags were most acceptably numerous.

The Suisun marshes, for once, did not materialize as many birds for the gunners as has been the rule for past opening days.

In many of the hay marsh districts, where heretofore opening-day shoots have been somewhat barren, good sport was the rule.

Most of the limit bags came from the east side bay marshes, between San Leandro and Alviso. San Jose sportsmen had rather a favorable recognition from the birds round about the Alviso shooting ponds.

The birds shot this week were practically all home-bred ducks, Northern birds, in this vicinity, at least, are not yet in any appreciable evidence.

The thirty-five bag limit, we are pleased to note, has, so it looks at present, put the market hunter out of business. Furthermore, most of the commission houses refuse to handle consignments from the market hunters.

For the present, barring the coming of early rains, the sport is of most agreeable promise.

STOCKTON SHOW NOTES.

San Francisco fanciers will have a total of about seventy-five entries for the Stockton show which, by the way, will probably be a four-point show.

A large number of local fanciers will attend the show, many of these will go by boat to Stockton on Saturday evening preceding the show.

The officers of the Stockton Kennel Club are: President, F. N. Vail; first vice-president, W. H. MacKay; second vice-president, C. E. Owen; treasurer, R. H. Groves; secretary, A. M. Barnett.

FRESNO KENNEL CLUB.

The Fresno Kennel Club wound up its affairs in connection with the recent bench show and concluded its work for the fall season at a meeting September 23d.

Directors for the ensuing year were elected as follows: Lee L. Gray, C. B. Shaver, Arthur Long, Calvin Hill, Jeff Graves, A. Lusk Paddock, A. L. Nelson, C. Saxe, H. A. Smith, E. J. Boust and W. N. Thorne.

The cups for the winners at the show held in conjunction with the county fair have been ordered and will be delivered to the respective winners in the near future.

SAVE THE HORSE SPAVIN CURE

Registered U. S. Patent Office

This Tells the Story

Need One Wonder Why we Give a Written Guarantee?

Lucerne, Mo.

Troy Chemical Co., Binghamton, N. Y.
Dear Sirs: We had a race mare, Julia Penzance, that broke down racing last season with a bad knee, also gave way in one pasture, so we had to let her run out all winter; she was lame all the time; could not be used. This spring we were induced to buy your "Save-the-Horse," and was surprised at the results, as improvement could be noticed from the commencement. We started training the filly and kept using the medicine. I have just returned from Sioux City and Onaw, Ia., where we raced, and she won every race, started in on a hard track and she has never shown any signs of lameness, and I surely regard your "Save-the-Horse" as the greatest remedy I have ever used or heard of, and I have been in the horse business forty years. I would just say to the horse racing fraternity in general not to give up a lame horse until they have tried "Save-the-Horse," as I have the utmost faith in it since giving it a trial. Yours truly,
TOM H. JONES,
Owner of Oak Hill Farm,
Port Kent, Me.

Troy Chemical Co., Binghamton, N. Y.
Dear Sirs: Please send at once by express one bottle of "Save-the-Horse" Spavin Cure, for which you will find enclosed \$5 in registered letter. You will see I did not send any description of the horse or ask for a guarantee, as I have already used your remedy, and I know what it is. Please send at once.
T. A. ST. JOHN.

COSTS LESS

for results than all other known treatments and remedies.

"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Boli, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

NOTHING BUT GOOD RESULTS.

Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. HAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing carbuncles, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. CRAMER, Training Stables, 390 Jennings Street, New York City.

Sole Agents for the United States and Canada.

California Breeders Futurity Stakes No. 1

BY THE

California Breeders Association

For Foals of Mares Covered in 1907 to Trot and Pace at Two and Three Years Old

Entries to close Friday, November 1st 1907

ONLY \$2 TO NOMINATE MARE

\$4250 for Trotting Foals.

\$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners and \$200 to Owners of Stallions

MONEY DIVIDED AS FOLLOWS:

\$2500 for Three-Year-Old Trotters.

\$200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Trot.

\$1250 for Two-Year-Old Trotters.

\$200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was Bred.

\$1500 for Three-Year-Old Pacers.

\$200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Pace.

\$750 for Two-Year-Old Pacers.

\$200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Pace.

\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was Bred.

Entrance and Payments—\$2 to nominate mare on November 1, 1907, when name, color, description of mare and stallion bred to must be given; \$5 April 1, 1908; \$5 November 1, 1908; \$10 on Yearlings, April 1, 1909; \$10 on Two-Year-Olds, April 1, 1910; \$10 on Three-Year-Olds, April 1, 1911.

Starting Payments—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer. Colts that start at two years old are not barred from starting again in the three-year-old divisions.

CONDITIONS.

The races for two-year-olds will be mile heats, 2-in-3, and for three-year-olds 3-in-5. Distance for two-year-olds, 150 yards; for three-year-olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before April 1, 1909, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907

Entries must be accompanied by entrance fee. Nominators liable only for amount paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7,000, the amount of the guarantee, only. Hopples will not be barred on pacing horses.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvellous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

WINCHESTER
HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1886 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

THE WEEKLY

BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO
P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

TWO IMPORTANT FEATURES of the California Circuit this year were the 2:08 and 2:20 class pacing events, which were the drawing cards at all the principal meetings. In the former Sir John S. 2:04½, the great pacer by Diablo 2:09¼, was the unbeaten winner, and in the latter the mare Inferlotta 2:04¾ was the champion. Both these pacers were star attractions, and on the days they were hilled to start the crowds were always large ones. While Sir John S. was considered almost unbeatable, it was known that Miss Georgie, Delilah and others were able to make him lower his mark nearly every time they met him, while the mare Inferlotta had such pacers as Copa de Oro 2:07¼, Charley D. and others that would not permit her to loaf any part of a race. In addition to those above mentioned such pacers as Jonesa Basler 2:05¾, Mona Wilkes 2:06½ and the great three-year-olds Hymettus 2:08¼ and Aerolite (exhibition 2:05½), aroused an enthusiasm for harness racing that exceeded anything seen on the circuit in years. When Oregon was reached the pacer Sherlock Holmes joined the temple of fame by pacing three heats of a race below 2:08, the fastest in 2:06¼, thus earning the record for the Northwest. Now that the Coast has developed such a field of fast ones, what is to be done to induce their owners to keep them here in 1908, that the public may again be treated to some high class sport, and that the interest now so general may not wane? There should be a series of races on the Pacific Coast Circuit in 1908 for the horses whose speed made it such a success in 1907. Unless good purses and several of them are offered here such horses as Sir John S. 2:04½, Inferlotta 2:04¾, Jonesa Basler 2:05¾, Mona Wilkes 2:06½, Sherlock Holmes 2:06¼, Copa de Oro 2:07¼, Delilah 2:08½, Miss Georgie 2:08½, Tidal Wave 2:09 and a lot more we might mention will leave to go elsewhere to race. If the associations which will comprise the Coast Circuit of 1908 will get together early and discuss a program for next season we believe all these horses can be kept here and raced profitably. It is a long and expensive trip East, and to win more than expenses on the Grand Circuit a pacer must be equal to a mile in 2:02 under favorable circumstances, but owners will take the chances and ship East unless there is an opportunity to win at home. We believe that an owner who has the opportunity to enter his horse on this Coast in eight or ten \$1,000 purses, with one or two of \$3,000 or \$5,000, will not think of going East, and such a program should not be difficult to arrange for the fast classes. If the public is assured of high class racing it will attend the meetings and harness racing will soon assume and maintain the position it formerly occupied in this State. Let us make an effort to keep the majority of our fastest pacers and trotters at home next year. It will pay.

THE ANNUAL REPORT of the Office of Experiment Stations for the year ending June 30, 1906, has been received at this office from the United States Department of Agriculture. It contains reports and statistical tables from all the agricultural Colleges and experiment stations in the United States, and a history of the progress of agricultural education in this and other countries.

A NEW STAKE, and one that deserves the support of every breeder and owner on the Coast, is the Futurity Stake just inaugurated by the California Breeders' Association of Los Angeles and called the California Breeders' Futurity. It is arranged on lines almost identical with the very popular Pacific Breeders' Futurity, which was started several years ago by the Pacific Coast Trotting Horse Breeders' Association. The Los Angeles stake has a guaranteed value of \$7,000, and is for the foals of mares bred this year, the mare to be nominated on November 1st. We ask our readers to read the advertisement of this stake, which appears in our columns this week, and to make as many entries in it as possible. For the foals of this year the Los Angeles association has inaugurated the Canfield Stakes, to which President Canfield of the association has added \$400. Entrance to this stake is \$50, divided into several small payments. Remember, the Los Angeles association offers two separate stakes—the Canfield, for foals of this year, and the California Breeders' Futurity, for the produce of mares bred this year. Both stakes should be patronized by every horseman on the Coast.

THE TERRITORIAL FAIR and race meeting, held last year at the Phoenix, Ariz., mile track, was one of the most successful held in the entire country, and the horsemen who raced there were so kindly treated that all determined to go again, and the meeting in November next promises to eclipse the one of last year. Fifteen thousand dollars in purses and stakes have been advertised, for which entries will close November 1st. The 2:14 class trot and the 2:05 pace are for \$1,500 each, while all the other races have a uniform value of \$1,000 each. These are the 2:29, 2:24, 2:19, 2:11, 2:08 and free-for-all trotting, and the 2:25, 2:20, 2:16, 2:12, 2:08 and free-for-all pacing events. The track at Phoenix is one of the best in the United States, the weather in November is delightful and the officers of the association are ready to do everything possible to make the sojourn of the horsemen there both pleasant and profitable to those who attend the meeting. Mr. Shirley Christy is the superintendent of speed and will be pleased to answer all questions as to transportation, stall room, hotel accommodations, etc., that may be addressed to him. Several California horse owners say they would not miss this meeting for anything, and we hope the delegation from this State to the Arizona races will be larger than ever.

PRESIDENT WHEELER of the University of California in a recent speech at Fresno said relative to work and education: "A new day is dawning for education, in which men will not be trained to become a little better than their fellows, or to win more honors, or for the sake of learning some obsolete or decorative knowledge. Men will study in order that they may be of greater service to their fellows. They will study that their fellows may have knowledge. These farm schools will be suited to the boy from the farm who can form an intelligent appreciation of the things that he is working at in life. This is a new view of education, training a man for the actual life in which he will engage instead of hanging something on him like a cloak or an emblem and calling it education, and there will be more of it in the future. The hope of the Nation lies rather in the cultivator of the 'family farm,' as I call it, the small farm of forty or sixty acres, where a man can support his family and himself, than in the great owners of 3,000 or 4,000 acres each."

WE REGRET TO LEARN that Editor M. J. Smeltzer of the Salinas Journal suffered a stroke of paralysis a few days ago and is now confined to a bed in the Bardin Hospital in Salinas. Mr. Smeltzer is well known to many of our readers as a great lover of the light harness horse, of which he has been a breeder for several years. His pen has done much service in the interests of the horse breeders of Monterey county, and we hope he may entirely and speedily recover from his illness, as he is the sort of man a community can ill afford to lose.

A FIVE DOLLAR PAYMENT will be due November 1st on all weanlings whose dams were nominated in Breeders' Futurity No. 7. Remember, this stake has a value of \$7,000, of which \$4,250 is for trotters and \$175 for pacers. Don't let your yearling drop out of this stake. The only way to win is to stay in.

THE TWO BIG STAKES of \$5,000 each offered by the Oregon State Board of Agriculture this year were completely successful both from racing and financial standpoints, and the progressive men who originally suggested them and worked energetically to have the Board place them on its program are to be commended for their good judgment and foresight. The list of starters was large in both stakes and the association was out hut very little money, if any, on the project, as vast crowds came out to witness the contests, four excellent races resulted, and the fastest time ever trotted and paced in the Northwest was made. The stakes did much for the harness horse breeding industry of the entire Coast, and we do not doubt but they will be renewed next season and secure still larger lists of entry. California should have two stakes of the same kind, and we hope the P. C. T. H. B. A. or the California State Agricultural Society will take the matter up and advertise similar stakes for 1908. This journal has contended for years that there should be a definitely arranged Pacific Coast Circuit, composed of associations that will announce programs of good purses for trotters and pacers, and announce them early. We Californians wish we had a man or two here like M. W. Wisdom of Portland to take hold of this matter and carry it to a successful issue, as he and two or three of his confreres have done with the North Pacific Circuit. Harness racing should start in California in June and after the tour of this State is made the horses should go North, and these harness races should be held so far as possible in conjunction with State and county fairs. An agreement as regards dates should be made between the California and the Oregon State Boards, so that it will be possible for the breeders of live stock and all others to show at both these State Fairs. We do not believe the Boards of Trade or Promotion Committees of either State realize the importance nor the benefits that will accrue to the Coast from a successful circuit of fairs, and we are certain the associations which give harness racing in this State have but a slight conception of the tremendous possibilities there are in a well organized, well advertised and well managed Coast Circuit. California, Oregon and Washington will be the greatest horse, cattle, sheep and hog producing section of the world within a few generations—not because better stock can be produced here, but because we can produce as good as any at a much lower cost. A good circuit of fairs in which the best judges in the world are employed to award good high cash prizes for all kinds of live stock, aided by a low tourist rate to the Coast during the fair season, would attract a tremendous amount of visitors from all points east of the Rocky Mountains, and if we had high-class harness racing at these fairs to amuse the people, the horse breeding business would have a greater boom than it has ever had. When we read of over 80,000 people crowding onto an Eastern track to see a California bred trotter try for a world's record, and then think of the puny efforts being put forth by the people of this State to encourage the breeding and training of such horses, we feel as if the Eastern people are doing much more for the horse breeding interests of California than we are doing ourselves. Therefore, we hope the suggestion recently made by a Director of the P. C. T. H. B. A., that this association offer two \$5,000 stakes for 1908, will meet with favor and be carried to a successful issue. A few big stakes and a good circuit will benefit every man interested in the breeding of light harness horses.

THE CENTRAL CALIFORNIA CIRCUIT of fairs and race meetings was made up of three associations this year, those at Fresno, Hanford and Tulare, and they made a great success of their meetings. The big valley of the San Joaquin River, in which these cities are located, is one of the richest spots on the earth, and is destined to be populated with millions of people within the next twenty years. The fairs held at the three places mentioned were all largely attended this year and have accomplished a great deal of good besides being the best advertisement for the resources of the valley that could have been arranged. Next year these fairs will be greater than ever and two or three additional counties will be members of the circuit. In time we shall expect to see this circuit attracting entries from all the leading stables on the Pacific Coast.

AMATEURS WIN CUPS.

The last of a series of six matinees, given by the Park Amateur Driving Club, was held at the three-quarter-mile track in Golden Gate Park last Saturday afternoon in the presence of a large crowd of spectators.

The greatest interest centered in the race for Class B trotters, as by its result was to be decided the ownership of the Thos. H. Williams cup for the horse making the most points during the series. As was expected, Mr. S. Christenson won the beautiful trophy with his handsome black mare Reina Directum. This mare had twenty-one points to her credit at the end of the fifth meeting, which was one more point than her nearest competitor, and on Saturday she won her race in three straight heats, giving her a total of twenty-six points and her owner the cup. The race was an exciting one throughout, and in the first heat Mr. Erlin's Emma Smalley finished in front, but was set back for running, and the heat given to Reina Directum. The black mare took the next two heats, but had to trot her best to keep in front at the finish.

By winning five straight races, Mr. Albert Joseph's trotter Vic Schiller won the W. A. Clark Jr. cup for his owner, his title to it being clinched at the close of the race the week before, but while he won the cup he was beaten in the sixth race by Mr. D. E. Hoffman's Major Cook. Mr. Hoffman was greatly pleased over his victory and well he might be, while Mr. Joseph took his defeat in excellent grace, not considering one defeat out of six races anything disgraceful. The ownership of the I. B. Dalziel cup is not yet determined. It was offered for the horse winning the greatest number of heats during the series, and as Emma Smalley, a trotter, and Satinwood, a pacer, are tied with eight heats to the credit of each, the judges are in a quandary as to the award. The two horses being in different classes, cannot compete, but some plan will have to be devised to decide the ownership of the cup.

The races, with the exception of the one for class A pacers, were all decided in straight heats. The class B trot, in which was the contest for the Williams cup, was made a three-in-five race, but all the others were best two-in-three. The starting was done by Mr. T. J. Crowley, and he got the horses off well each time, although he was compelled to mildly lecture some of the amateurs to induce them to score up with the others. The summaries follow:

Class A trotters—

Major Cook (D. E. Hoffman)	1	1
Vic Schiller (A. Johnson)	2	2
Telephone (H. C. Ahlers)	3	3
Time—2:18, 2:18.		

Class B trotters—

Reina Directum (S. Christenson)	1	1	1
Clipper W. (F. J. Kilpatrick)	2	2	4
Emma Smalley (G. E. Erlin)	4	4	2
Lady Washington (F. W. Thompson)	3	3	3
Time—1:46½, 1:47, 1:46.			

Class A pacers—

Ringrose (H. M. Ladd)	2	1	1
Satinwood (F. J. Kilpatrick)	1	2	2
Jim Chase (T. F. Bannon)	3	3	
Colonel C. (W. C. Hamerton)	4	4	
Time—1:42½, 1:41¼, 1:41.			

Class D trotters—

Charles II. (A. P. Clayburgh)	1	1
Dennis (F. J. Kilpatrick)	2	2
Director B. (E. Stock)	3	3
Time—1:53, 1:49½.		

Class C trotters—

Allan Pollak (F. J. Kilpatrick)	1	1
Topsy (G. E. Erlin)	2	2
Time—1:55¾, 1:49¾.		

BETTING NOT NECESSARY.

A writer in the Portland Oregonian says: One of the grandest weeks of light harness races ever held in the entire Northwest closed Saturday, September 21st, at Salem, and if any skeptic was of the opinion that the races at the State Fair would be a failure, because there was no betting, he is now due for a change of mind and heart. The big purses hung up for the light harness brigade attracted to Salem pacers and trotters that would have earned names for themselves on the Grand Circuit, and the week of races that has now gone into history was, without question, the cleanest and best ever held on any track. And there was a reason for this—the absence of betting.

Like thousands of others who had been taught to believe that racing could not exist without pool-selling and book-makers, there were many lonesome men at Salem. It was a new problem, and Mr. Skeptic glanced with longing eyes at the vacant betting ring, where once poor old Billy Ayers, recently killed in Seattle, was wont to hold sway. But once the racing was on the problem was soon solved. It was quickly demonstrated that after all, of the thousands who thronged the grandstand and stood in rows ten deep far down the home-stretch fence, those who went to the races merely for the purpose of wagering on the results were in the sad minority.

Like the officials of the Ohio, California, Iowa, Minnesota and several other state fairs, the managers of the Oregon State Fair had solved the problem and demonstrated beyond a doubt that betting is unnecessary to horse-racing. They have proved

that the vast majority of horse lovers want to see the handsome trotters and pacers in action; they want to see them race and win on their merits and class, and not as the mere racing tools of gamblers and tricksters.

It has taken time to convince people that harness races can be conducted without betting, and it will take just as long to convince the breeders and owners of thoroughbreds—and the public too, for that matter—that the same can be done in running races. The fight made against racing all over the country is not made because the public at large does not like the thoroughbreds. It is made on the gamblers who have monopolized the game. There will come a time—and it is fast approaching—that on the American turf races will be run without betting, just as harness races are being run. When this time does come, the game will be once again the "sport of kings."

The game will attract men high up in the business world. Gentlemen, and not the cheap touts, the riffraff and scum of the gambling world, will be in control. The Keenes and the Whitneys have been striving for this end. All that will be necessary will be to adopt the harness meet method of making each owner contribute to the purses, and make each purse worth while. If this be done, men who have kept their hands off the sport will take a keen delight in breeding and racing horses.

THE TULARE COUNTY FAIR.

Woodville, Cal., October 7, 1907.

Breeder and Sportsman: The fair of the Tulare Agricultural Association just closed was, beyond doubt, the most successful fair ever held in the San Joaquin Valley. It has been my good fortune to attend most of the fairs held in California the past thirty years, and I can say candidly that I never attended a fair where everything worked as smoothly and satisfactorily to all concerned as at this fair. The pavilion, which is the best in the State outside of Sacramento, was only completed a very short time before the opening of the fair, so that the exhibit was necessarily assembled and installed very hurriedly, yet it possessed so much of merit that people both at home and abroad were unstinted in praise and admiration of it. The stock parade was over three-quarters of a mile in length, marching in close order.

Practically all the breeds of cattle and horses were represented. The exhibit of dairy stock was particularly fine. A gentleman from Berkeley of good judgment in such matters made the statement that it excelled that at the State Fair.

The machinery exhibit was very complete. The exhausting of gas-engines was like the rattle of musketry in an engagement. Everything used on a farm from a hoe to a steam plow was there. What contributed most to the success was the afternoon entertainments. From the time the bell rang for the first heat in the first race till the finish of the last race every moment was rich with exciting sport. Candidly, there was not a minute during the afternoon that dragged wearily. The racing was good, clean and free from any suspicion of fraud or trickery. Contests between some of the best and fastest horses in the State were immensely enjoyed by all. Between the heats, Happy Jack and his company of cowboys, assisted by local riders, kept up the excitement riding wild horses and bulls and performing other feats of horsemanship. The grandstand had been doubled in capacity, but was not half sufficient to accommodate the crowd. The gate-keepers estimated the attendance on Thursday at 7,000. There were no intoxicating drinks sold upon the grounds, consequently there were no drunks to offend any one. There were no skin-games and no one skinned by exorbitant charges, as is so often the case at fairs. No one had a kick of even the mildest type, and upon the whole no one ever attended a fair where everybody at all times seemed to be enjoying themselves as at this one. The Southern San Joaquin Valley Circuit has been opened and established auspiciously, and is, in the opinion of many, destined to become the greatest circuit of fairs in the West. The Fresno and Hanford fairs were successful, and Bakersfield is already beginning to get ready for next year, so why should we not achieve a great success in the future. We have the richest and best country in the world, we are getting a population of the most energetic and enterprising people from every civilized land under the sun; therefore, we will surely take the lead. Great credit is due to the directors of the Tulare fair, and especially to Billie Ingwerson for his untiring energy and ability as an organizer.

OBSERVER.

Georgie B. 2:12½ was a fast pacing mare and a race winner. She produced the really great pacing mare Miss Georgie 2:08½, that made Sir John S. take his record of 2:04½ this year. A full sister to Georgie B. will be sold at Chase's combination sale, Monday evening next. This mare is but five years old and can trot very fast.

Mr. W. T. McBride of Aberdeen, Wash., was a visitor at the Oregon State Fair this year and took home with him a splendid two-year-old colt by Diahlo 2:09¼, dam by McKinney. This colt is said to be a very high class one, and Mr. McBride willingly paid \$1,000 in cash for him.

DEATH OF GEO. A. DAVIS.

Our readers will regret to learn of the death of George A. Davis of Pleasanton, who formerly owned the stallion Rey Direct 2:10 and was engaged quite extensively a few years ago in the breeding of trotters. The Pleasanton Times of last week contained the following:

George Armstead Davis, for many years one of Pleasanton's foremost citizens, and until recently the superintendent of the Lillenthal farms in this vicinity, died Monday morning, September 30th. Mr. Davis has not been in good health for some time. About four months ago his connection with the Lillenthal interests was severed and he left Pleasanton on an extended trip for his health, returning a few weeks ago to take up his residence on the Lilydale Farm, which he owned. After his return to Pleasanton his condition grew worse, and last Monday morning he succumbed to heart disease. He died in the very prime of life, being only forty-five years of age.

Deceased came to Pleasanton fourteen years ago, and since then managed the extensive interests of Mr. Lillenthal in this neighborhood. He was a native of Westport, Me., and had been a resident of Healdsburg prior to his coming to Pleasanton. His remains were taken to that town Wednesday and the funeral held Wednesday.

He is survived by his wife and five children—Mrs. Ella Walker, Miss Barbara, Miss Nettie and Harry and George Davis. The sympathy of the entire community goes out to the stricken family in their sad bereavement.

NEW TRACK DEDICATED.

The new race track at Santa Barbara was opened September 27th with some good racing between local horses, and there was a large crowd out to see the sport. The enthusiasm over the contests has led to the organization of a driving club, and it is proposed to hold matinees once a month or oftener during the year. The track is a half-mile one, but the turns are well thrown up and wide enough for seven or eight horses to race on.

The first race on the card on opening day was a trot or pace for colts, and was won by the Almonada colt Dan Burns in straight heats in 1:31 and 1:34, winning each heat in a jog, as his driver did not wish to distance the other colts. He is owned by C. T. Thayer.

The free-for-all trot or pace had two starters, both by Almonada. They were C. T. Thayer's pacer Alamo and Mr. Menchaca's trotter Almo. The trotter took the first heat easily in 1:05½, a 2:11 gait, but was not in condition to race heats, and Thayer's pacer took the next two heats in 1:15 and 1:14. Mr. Menchaca's trotter is said by all the Santa Barbara horse men to be a most promising young horse and it is believed he will trot in 2:10 next year. Alamo, the pacer, is also a good prospect, as he paced a trial mile last year in 2:13¼, with the last half in 1:04.

Several running races completed the card for opening day.

The seating capacity was inadequate, and it is proposed to enlarge the grandstand.

PERFECTION IS DEAD.

Every horseman in California will sympathize with Mr. Geo. Estabrook of Denver, Colo., in the loss of his trotting mare, Perfection, for which he paid Chas. De Ryder, agent for Capt. N. P. Batchelder of San Francisco, \$10,000 in cash after the mare had trotted a trial mile in 2:06¾. Perfection was bred by Captain Batchelder and trained by De Ryder, who took her East last May with his racing stable, with the idea of selling her. She was a great green trotter when she left Pleasanton, and kept improving until the fast mile was shown at Cleveland, when Mr. Estabrook paid over the amount asked and took possession of her. A few weeks ago Mr. Estabrook arranged with Mr. De Ryder to train his horses next year, and Perfection, with a number of others, were loaded into the care at Columbus and started for Denver. At Joliet, Ill. Perfection was so sick that she had to be taken from the car, and died from pneumonia. Perfection was five years old, sired by Meridian 2:12½, and out of the mare Corinne Neilson by Clarence Wilkes. She was such a perfect gaited trotter and such a good headed one that with her great speed she was considered one of the highest class green trotters in the world, and was to have been entered in the M. and M. and all the other big trotting stakes for 1908. Her death is a great loss to Mr. Estabrook and the entire harness horse world and will be regretted by every horseman.

Leap Year 2:26¼ by Tempest, was selected by Mr. P. J. Williams as a broodmare, and he made a good selection. She is a full sister to Iago 2:11. She produced the very handsome stallion Commodore, that trotted a trial mile as a four-year-old in 2:16, and was sold for \$2,250. She is the dam of Yosemite, that has trotted a mile in 2:16¼, and of two full sisters to this horse that are very fast natural trotters. Yosemite and the two mares will be sold by Mr. Williams at the combination sale at Chase's pavilion next Monday evening. All three can take standard records, and are good individuals.

Nearly twenty mares have already been hooked to Todd for next season.

TULARE RESULTS—HALF-MILE TRACK.

Tuesday, October 1.

Trotting, 2:12 class, \$150—
 Sona by McKinney (Williams) 1 1 1
 Emily W. by James Madison (Ward) 2 2 2
 Goldennut by Neernut (Ford) 3 3 3
 Time—2:19, 2:20½, 2:20.
 Pacing, 2:20 class, \$200—
 Mahel C. by Strathway (Walton) 1 1 1
 *Advertiser by Advertiser (Gillett) 4 2 2
 Wanderer by Athby (Lieginger) 3 4 3
 Albert E. by Altamont (Allen) 2 3 4
 Time—2:21, 2:17½, 2:22.
 *Advertiser finished first in first heat, but was set back for fouling Mabel C.

Wednesday, October 2.

Pacing, 2:15 class, \$200—
 Lohengrin by Charleston (Ward) 3 1 1 1
 Radium by Stoneway (Mosher) 1 4 3 4
 Josephine by Zolock (Rutherford) 2 3 2 2
 David St. Clair by Howard St. Clair (Walton) 4 2 4 3
 Time—2:15½, 2:15½, 2:14½, 2:17¾.
 Special, mixed, \$150—
 Milton Gear by Harry Gear (Depoister) .. 1 2 1 1
 Idolway by Stoneway (Mosher) 2 1 2 2
 Prince Mack by McKinney (Lieginger) .. 3 3 3 3
 Time—2:29¾, 2:27½, 2:23¾, 2:21.

Thursday, October 3.

Pacing, 2:14 class, \$400—
 Mandolin by Alcone (Mosher) 1 1 1
 King Athby by Athby (Leggett) 2 2 2
 Mabel C. by Strathway (Walton) 3 3 3
 Time—2:13¾, 2:18, 2:21.

Pacing, free-for-all, \$400—
 Jonesa Basler by Robt. Basler (Walton) 3 3 1 1 1
 Magladi by Del Norte (Ward) 1 2 4 4 3
 Miss Idaho by Nutwood Wilkes (Zibbell) 4 1 2 3 4
 Explosion by Steinway (Ward) 2 4 3 2 2
 Time—2:11¾, 2:11¾, 2:14¾, 2:16, 2:18.

Friday, October 4.

Era by Zombro (Williams) 1 1 1
 Kinney Rose by McKinney (Walton) 2 2 2
 Time—2:22½, 2:18, 2:17¾.
 Special, trot or pace, \$150—
 Queer Knight (t), by Knight (Williams) .. 1 1 1
 Diahless (p), by Diabolo (Zibbell) 2 2 2
 Emily W., by Jas. Madison (Ward) 3 3 3
 Time—2:14¾, 2:13½, 2:15.

Pacing, 2:20 class, best two-in-three, \$150—
 Milton Gear, by Harry Gear (Depoister) 1 1
 Conqueror, by Direct Heir (Rutherford) 2 3
 Tom W. 3 2
 Time—2:16½, 2:21.

Saturday, October 6.

Pacing, free-for-all, \$300—
 Jonesa Basler, by Robt. Basler (Walton) .. 1 1 1
 Lohengrin, by Charleston (Ward) 2 2 2
 Josephine by Zolock (Rutherford) 3 3 4
 Miss Idaho, by Nutwood Wilkes (Zibbell) .. 4 4 3
 Explosion, by Steinway 5 5 5
 Time—2:12¾, 2:13½, 2:15.

Special, trot or pace, \$150—
 Milton Gear by Harry Gear (Depoister) 3 1 1
 Miss Geer, by Harry Gear 1 2 4
 Dutch by Athby (Byrne) 2 4 2
 Prince Mac by McKinney (Lieginger) 4 3 3
 Time—2:29¾, 2:25½, 2:26.

ROSEBURG RACES.

Trot or pace, 2:35 class, purse \$200—
 Oregon Bahy, h m by son of Caution (Barrows) 1 2
 Minwal, b m by Pricemont (Booker) 3 *
 Filmore Chief, b h by Wilkes-Russell (Hawley) 2 1
 Time—2:24¾, 2:22¾.

*Minwal caught her boot and fell at the quarter pole.

Trot or pace, 2:25 class, purse \$200—
 Julia D., b m by Daly (McMullen) 1 1
 Zomvert, b h by Zombro (Booker) 2 2
 Tintorette, b h by Onebold (Lawton) 3 3
 Hops, ch c (Barrows) 4 4
 Time—2:29½, 2:26.

Trotting, three-year-old class—
 Diadem, h f by Diawood (McMullen) 1 1
 Moonlight Bell, ch f by Nocturno (O'Neal) ... 2 3
 Credo, b c by Tybalt (Mahan) 3 2
 Time—2:36, 2:34½.

Mr. G. H. King of Red Bluff drives a pair of mares on the road which are said to be one of the finest pairs in California. They are bays, almost perfectly matched, very stylish and speedy. Mr. King has refused several offers for them.

NORTH YAKIMA, WASH., RESULTS.

Tuesday, September 24.

Pacing, 2:12 class, purse \$500—
 Sherlock Holmes, ch c by Zolock (Childs) .. 1 1 1
 Gen. Heuertus, b h by Alexis (Hogoboom) .. 3 4 2
 Lord Lovelace, b h by Lovelace (Lindsey) .. 2 3 4
 Bonnie M., b m by Hohegan (Prior) 5 2 3
 Birdal, rn m by Birdlex (Kelley) 4 d
 Time—2:06¼, 2:10, 2:11.

Trotting, 2:18 class, purse \$500—
 Crylia Jones, br g by Capt. McKinney (S. Lindsey) 2 1 1 2 1

A WELL BRED MARE.

Mr. Geo. J. Hollenbeck of Courtland asks our opinion of the breeding of a three-year-old mare called Music, recently brought to this State, and wants to know if she can be registered. If the tabulation of the breeding is correct she can be registered under rule 5 if the necessary certificates can be obtained, as her first, second and third dams are by registered horses, and she is by a registered horse. We would call her a well bred mare, although her immediate ancestors are not producers of extreme speed. Her sire is a grandson of Pilot Medium, a great producing sire, and her dam is given as by St. Ree 21187, a well bred son of Guy Wilkes, and second dam a producing mare by Woodlark 3354.

Drink Jackson's Napar Soda.

FALROSE COLT STAKE.

Sacramento, October 5, 1907.

Breeder and Sportsman: Early this spring Mr. Walter Mastin, the veteran trainer, thought of a novel way of encouraging the light harness horse industry, and at the same time advertising his blue-blooded pacing stallion, Falrose 2:19. The thought was father to the deed, for he has formed a Futurity stake to be known as the Falrose Colt Stake, and all foals of this year are eligible, whether trotter or pacer, provided they have made and make the following payments and nominations, which close:

June 1, 1907, \$2.50; December 1, 1907, \$5; June 1, 1908, \$5; December 1, 1908, \$5; August 1, 1909, \$12.50. And to this he adds \$30, price of one full entry; all moneys to be paid to W. Mastin, Sacramento. Race to take place at the State Fair, Sacramento, in 1909; mile heats, best two-in-three, to harness; money divided 50, 25, 15 and 10 per cent.

Any one not keeping the payments up as they become due will be declared out and forfeit all rights to the stake, hut will not be held for more than what he paid in.

This seems a very good way of directing attention to an excellent type of a light harness horse, for it is known that Falrose sires not only large, handsome roadsters, but race horses as well, which have the stamina to go the route.

This will enhance the value of a foal should the owner wish to sell, and also encourages the small breeder who is unable financially to keep up payments in the more expensive stakes, and also pay for training from the time the youngster is able to pull a cart till the day of the race.

All hail to the enterprise of our genial friend, W. Mastin.

Falrose, by breaking through a board in the floor of his stall last spring, so injured his hind leg that he was unable to make a season in the stud. As a four-year-old he paced a half-mile in one minute, and but for an accident in a collision would have proved a great race horse and taken a low record. His present record of 2:19 is no measure of his speed.

The following gentlemen, all living near Sacramento, are among those who think they have a chance of winning a portion of this stake:

E. P. Webb names Falrose Jr., breeding of dam unknown.

John Hack names Skyrose, dam Daisy S. by a son of Sterling.

F. L. Davies names Florose, dam's breeding unknown.

M. E. Farnham names Silver Rose, out of a mare by Creole.

Howard D. Kerr names Zomrose, dam Zwilka, by Zombro 2:11.

James McGillivray names Donna Rose, dam by Don Marvin 2:22.

Eugene Daly names Rose Daly, dam untraced.

What a nice bunch of roses for the State Fair of 1909! I am sure if the old sire could see them all it would renew his youth and the boards in his stall would need nailing up.

Now if some enterprising McKinney man, Zombro man, Diabolo man, Nutwood Wilkes man, or any other good breed of a horseman would institute something of this sort each year and have the race take place at the State Fair, I have no doubt but that the State Agricultural Society would add materially to the stake and be glad of the opportunity to do so. Thanking you for the space, I am yours very truly,

A. K. KERR.

AN OUTSIDE OPINION.

The other day a friend told the editor of this journal that he intended to visit New Park Stock Farm, at Santa Clara, and look over the youngsters by Greco to be sold there on November 2d. We asked him to write us his opinion of the colts, and the following is his letter:

Santa Clara, September 28, 1907.

Dear Mr. Editor: I came down this morning to look over the Greco colts to be sold on November 2d. I had not seen these colts for a number of months until to-day, and must confess I was surprised at their growth. I believe the horse is the most uniform producer I have known. There is the same strong, flat bone and heavy tendon, rolling knee action and immense McKinney driving power noticeable in each one, and everything brown or black.

Greco's green two-year-olds that were haltered the fifth of August trotted to-day while I held the watch in 2:53, full mile. In talking with the men who are familiar with these horses, one of them made the statement that 60 per cent of Greco's colts will show a 3:10 gait thirty days from the time they are first harnessed.

Notwithstanding the fact that practically all of the colts have distemper, they are looking well, and I doubt if a smoother, finer lot of youngsters will be offered to the California horsemen this season. Two or three developed horses lifted Sidney Dillon to great popularity in one season—Charley Belden and Sonoma Girl have given proof of the value of Lynwood W. within a year, and I firmly believe that out of the colts to be sold by Mr. Chase in November by Greco a number will create a demand for their sire. One three-year-old has shown a 2:15 gait and a two-year-old has finished a mile in 2:31½, just before coming down with distemper.

W. J. SPEARS.

NOTES AND NEWS

General Watts won the Kentucky Futurity.

Kentucky Todd was fifth, and third and then distanced.

The time was 2:12 $\frac{1}{4}$, 2:11 $\frac{1}{4}$ and 2:11. but the track was wet and slow.

The Axworthy colt is undoubtedly the best three-year-old of the year, although he is not the fastest.

And the owners of all the other fast three-year-old trotters now know "Watts what."

This has been a great year for three-year-olds—both trotters and pacers.

Trampfast, a roan colt by Tramp, won the two year-old trotting Kentucky Futurity and took the world's race record. His heats were 2:12 $\frac{1}{4}$, 2:16 $\frac{1}{4}$. Dorothy Axworthy was only beaten a nose in the first heat.

Zombro 2:11 and Zolock 2:05 $\frac{1}{4}$ have both added to their reputations as sires this year and should be among the best patronized stallions on the Coast next season.

It is stated that Major Delmar 1:59 $\frac{3}{4}$ and Sweet Marie 2:02 have been matched to trot for \$5,000 over the Allentown, Pa., half-mile track on Wednesday next, October 16th, and will meet at a later date on the Empire City track, New York.

A suit of much interest to horsemen has been instituted against the Southern Pacific Railroad Company by a resident of Yolo county. The complaint alleges that on October 23d, this year, a mare and suckling colt, valued at \$500, were shipped to Redwood City and that the company was negligent in caring for them, the animals being in the car forty-six hours, and died soon after they arrived at their destination.

J. O. Gerrety is over at Lexington seeing the racing. On his return he will move all Mr. Clark's horses, some forty head, including the stallions Bon Voyage 2:12 $\frac{1}{2}$ and Highland 2:19 $\frac{3}{4}$, to Los Angeles, where Mr. Clark will make his home in the future.

Washington McKinney will be a great sire of speed to a certainty. The time to buy his produce at low prices is before he achieves this record. Several of them will be sold at Chase's pavilion on Monday evening next.

Mares by Hambletonian Wilkes are making quite a record as broodmares this year. The three trotters, Wilkes Heart 2:07 $\frac{1}{4}$, Thelma 2:09 $\frac{1}{4}$ and Mae Heart 2:10 $\frac{1}{4}$, all of which made records this year, are out of mares by Hambletonian Wilkes. This horse, now dead, was never fully appreciated in this State.

W. C. Nolan of Sonoma has sold his trotter Silver Wilkes to Mr. McCreddie of the same place.

An own sister to Lady Mowry 2:09 $\frac{1}{4}$ will be in the combination sale at 473 Valencia street next Monday evening. This announcement would attract all the big Eastern breeders were it made in New York. The breeding is by McKinney, out of a great mare by Nutwood Wilkes. There is no better breeding anywhere. This mare is a fast trotter besides. Look her over.

Mr. A. B. Evans, superintendent of the San Joaquin Ice Company at Fresno, recently purchased from H. M. Bernstein of Hanford the three-year-old gelding Rex Noir, that has taken the blue ribbon as a yearling two-year-old and three-year-old at the Hanford Fair. Rex Noir is a fine roadster.

A very promising yearling pacer by Robin, owned by Mr. A. F. Tynan of Salinas, is now at the Salinas track in the hands of James Stewart, who will point him for Breeders' Futurity No. 6, in which he is entered.

Don't overlook a Lecco whenever you find one for sale. They are good goods. You will find one or two of them in the catalogue of Chase's combination sale, set for next Monday evening.

Berta Mac 2:13 $\frac{1}{4}$ won again at Spokane last week in straight heats. This McKinney mare is making a splendid campaign this year.

A new race track is to be built at Newman, Cal. Over \$7,500 has already been raised and the total subscription will probably reach \$10,000.

Owyho 2:07 $\frac{1}{4}$, one of the great family of Bertha, is beginning to sire speed. A two-year-old by him pulled a wagon a quarter in 34 $\frac{1}{4}$ seconds at Trenton, N. J., October 2d, on the half-mile track there. The same day Major Delmar started to lower the half-mile track record of 2:07, but 2:09 $\frac{1}{4}$ was the best he could do.

James Berryman of 2220 Santa Clara avenue, Alameda, is breeding quite a number of mares to his elegantly bred three-year-old stallion Monte McKinney, that is by Monterey 2:09 $\frac{1}{4}$ out of Dot McKinney by McKinney 2:11 $\frac{1}{4}$. Monte McKinney is a colt of much class and has fine trotting action, although never trained. He should sire speed.

Bettie Brent, the three-year-old pacing filly in Vance Nuckols stable, worked a mile in 2:07 $\frac{1}{4}$ at Columbus, 'tis said. This is faster than Brenda Yorke's 2:08 $\frac{3}{4}$ for three-year-old pacing fillies in the race.

A strong sentiment prevailed at Columbus against starting more than ten horses in a race. The 2:16 trot, and its numerous accidents, probably started the ball to rolling. Ed Geers favors bringing the matter before the trotting boards this winter and attempting to secure a turf law limiting a field of horses to ten starters.

Few stallions that have had as few opportunities as Monterey 2:09 $\frac{1}{4}$ have produced a 2:10 performer. He has done this trick and will produce others in the same class. He will be sold at auction at the combination sale, 473 Valencia street, next Monday night. It is \$100 to a dime that the person who gets him will get a great bargain in horse flesh.

Citation 2:03 $\frac{1}{4}$ is the fastest female descendant of Electioneer in the direct line. Her sire, Norvalson 2:21 $\frac{1}{4}$, is a grandson of the famous Palo Alto sire.

Me Too, the daughter of C. F. Clay 2:18, is ranking among the very greatest of extreme speed producers, now having three inside the select 2:10 circle, these being The President 2:07 $\frac{1}{2}$, Dr. Munson (4) 2:08 $\frac{3}{4}$ and Dr. Monical 2:09 $\frac{1}{4}$, all three being by the same sire, Gambetta Wilkes 2:19 $\frac{1}{4}$.

Schley B. by Lynwood W., the sire of Sonoma Girl, is well broken single and double, and should be just the horse for pleasure driving. He is a pacer and can win races on the circuit, or in the Park. He has worked a mile in 2:13 $\frac{1}{4}$, but has no record. Don't overlook him at the sale at Chase's pavilion next Monday evening.

Rey Monte by Monterey, won a heat in 2:25 over the half-mile track at Blue Lake, Humboldt county, last week. He is quite a pacer.

How about that filly by Star Pointer, out of Belle W., the dam of Bolivar. She ought to be a two-minute pacer as soon as she is three years old. She is now following her dam at Mr. Brace's New Park Farm at Santa Clara. What will she bring at auction on November 2d?

A three-year-old filly by Stam B. 2:11 $\frac{1}{4}$, out of a mare by Chas. Derby, second dam by Nephew and third dam by Williamson's Belmont, is worth looking over and making a bid on, as she is worth money on her breeding alone. See her at Chase's. She will be sold on Monday evening next.

Mr. P. J. Howard of 2065 San Antonio avenue, Alameda, is the breeder and owner of a young stallion by Monterey 2:09 $\frac{1}{4}$, that attracts much attention when driven on the Alameda track by his owner. He has named this young horse Teddy Rey. He is out of Aunty by Diablo 2:09 $\frac{1}{4}$, second dam a mare by Anteros, own brother to Anteeo and Antevolo by Electioneer. Teddy Rey is a very fast pacer, and has shown a mile in 2:15, with little work. Mr. Howard is breeding him to outside mares at the low price of \$25 for the season.

Mr. H. A. Carlton, owner of Lynwood W., the stallion that sired Sonoma Girl 2:05 $\frac{1}{4}$, Charley Belden 2:08 $\frac{1}{2}$ and others, has not decided yet whether he will keep this great speed sire at Santa Rosa next season or take him to some other point. He may take him to Stockton, as the railways and steamers make that city very accessible from all points.

J. B. Stetson and his son are now located at the McMinnville track, Oregon, and have opened a public training stable. Mr. Stetson is a reliable and successful trainer.

The record holders for the North Pacific tracks are both California bred and both by Zolock 2:05 $\frac{1}{4}$. Sherlock Holmes 2:06 $\frac{1}{4}$ pacing, and R. Ambush 2:11 $\frac{1}{4}$ trotting, are the horses referred to, and both made their records at the Oregon State Fair meeting this year.

"No intoxicating liquors sold on the grounds" is getting to be a very common thing to see in the advertisements of county fairs and race meetings, and managers of fairs that have adopted this rule say that it pays.

Among the new standard trotters this year is the California stallion McPherson by McKinney, dam Eveline by Nutwood, bred by Mr. W. H. Lumsden of Santa Rosa, and sold by him a couple of years ago to an Eastern party. McPherson took a race record of 2:22 this season, and gives the old mare Eveline her fifth standard performer. Mr. S. B. Wright of Santa Rosa; who now owns Eveline, believes the granddam of Sonoma Girl 2:05 $\frac{1}{4}$ is in foal to Lynwood W. The old mare is now twenty-four years old.

Baron McKinney, one of the first crop sired by McKinney after he left California, was a starter in the Kentucky Futurity at Lexington last Wednesday and got third money.

The first race of the Lexington meeting this week was a seven-heat affair and was won by the pacer Hedgewood Boy. The fastest heat of the race was 2:05 $\frac{1}{4}$, and the slowest 2:13 $\frac{1}{4}$.

Sam Casto, who had his leg broken in an accident at the Oregon State Fair, has received a nice purse of \$250 contributed by his fellow horsemen.

Columbus furnished eighteen new 2:10 performers, of which six are trotters. Five others were left with records just outside the charmed circle.

A race meeting is being arranged for the Concord track this month. The track is in fine shape for fast time.

The Alameda mile track is in fine shape for training horses on at the present time.

Don't forget that the great Arizona Territorial Fair will be held next month, with a splendid racing program. Entries for five big harness races close November 1st.

Paronella now has the honor of having produced three faster trotters than any other broodmare in Kentucky—Todd (3) 2:08 $\frac{3}{4}$, Judge Parker 2:10 $\frac{1}{4}$ and Country Jay 2:10 $\frac{1}{4}$.

J. H. Kelly, the well known San Bernardino horseman, has recently fitted up a new sales stable in that city that is not only a model in sanitation, but the finest for the purpose in Southern California. Public sales will be held there frequently.

Over at the Alameda track, which is in fine shape at the present time, the veteran trainer, Hines, of Oakland, drove a green trotting mare a mile in 2:25 $\frac{1}{4}$ last Sunday. This mare was raised by T. S. Montgomery of San Jose and is by Alton B. dam by Boodle Jr. She has had but a few weeks' work and looks like an excellent prospect.

Charles David, who is well known to all the "old timers" as a successful trainer and driver of trotting and pacing horses in California, and who for the past dozen years or so has been a resident of Honolulu, where he has been identified with harness horses, is on a visit to San Francisco, and while the city does not look as it did when he left, he is surprised at the immense amount of work done since the earthquake and fire of April, 1906. Since coming here he has purchased from Mr. C. A. Walker of Concord, Contra Costa county, the standard and registered stallion Potrero 19963, and will ship him to the islands for breeding purposes. Mr. David was always a good judge of a horse, and he has shown by this purchase that he still possesses the faculty of picking out a good one. Potrero is a grand individual, standing 16 $\frac{1}{2}$ hands high and weighing 1,300 pounds. He has fine trotting action, is bay in color and one of the most impressive stallions ever led into a show ring in California. His breeding is gilt edge, as he is by the producing sire Redondo, a son of the great Stamboul, while his dam is by the Electioneer stallion Junio, that sired the dams of George G. 2:05 $\frac{1}{4}$, Athasham 2:09 $\frac{1}{4}$ and many other good ones. Potrero was a very fast trotter, and his record of 2:21 is no mark of his speed whatever, as he could show two-minute speed. Mr. David could not have made a better selection, as Potrero is a remarkably sure foal getter and his produce all have size, good looks and speed. Hawaiian Island breeders are lucky to have such a horse to breed their mares to.

RESULT OF THE KENTUCKY FUTURITY.

Lexington, Ky., October 9.—After the heavy rain of yesterday, which prevented racing and left the track wet and very heavy and slow, the meeting of the Kentucky Trotting Horse Breeders' Association opened to-day. In the Futurity, Kentucky Todd sold as favorite prior to the race, but the Axworthy colt, Gen. Watts, won the race easily in three straight heats. Kentucky Todd stopped badly when it came to a driving finish, and he was behind the flag in the third heat. Gen. Watts seemed to far outclass his field. The only struggle was among Bisa, Baron McKinney and Bonnie Way for second money. After driving Gen. Watts to victory, Bowerman was carried around the track in a floral horseshoe. The heavy rains of Monday made the track three or four seconds slow and record breaking was out of the question. The summary of the race is as follows:

Trotting, three-year-olds, Kentucky Futurity, purse \$14,000—

General Watts, b c by Axworthy, dam Carpet (Bowerman)	1	1	1
Bisa, b f (Young)	2	2	2
Baron McKinney, hr c by McKinney (Dickerson)	6	5	3
Bonnie Way, h f (Laselle)	7	4	4
Kentucky Todd, blk c (Stenson)	5	3	dis
Blue Hill, b c (Titer)	3	6	dis
Acquin, b c (King)	4		dis
Miss Densmore, b f (Benyon)			dis
Time—2:12 $\frac{1}{4}$, 2:11 $\frac{1}{4}$, 2:11.			

OLD TIME RACES RECALLED.

[By George H. Tinkham.]

On September 9, 1907, the old Stockton race track, silent since 1894, resounded to the clatter of the speeding trotter, it being the first paid admission meeting of the recently organized Stockton Driving Club.

It was a kind of family reunion, as all the horses were owned in that city, and a celebration over the recent Supreme Court decision that the track belongs to the public, it having been sold some time ago at Sheriff's sale under a foreclosure of mortgage to private parties.

The races were all half-mile heats save one, and in one of these contests the old trotter Bob Ingersoll, recently sold to Charles Barling, trotted two heats in 1:08 and 1:09. The principal race was a two-in-three, mile heats, and Stockton again takes the record in introducing the first lady driver in the State, Mrs. Pope driving her horse to sulky in 2:27½ and 2:28. Mrs. McIntosh and Mrs. Shippee, a sister-in-law to the late L. U. Shippee, also drove in a race.

Stockton for several years has been very quiet along turf lines, and yet in early days it was a sporting center, and here it was that the first \$1,000 purse for runners was hung up. Then the runner was about the only speed horse in California, and as early as January, 1851, the Stockton track was built and the owner announced that it was the equal of either the Brighton or Sacramento tracks or the one at Mission Dolores.

A spring meeting was called and a motley crowd of 300 Americans, Germans, Italians, Irishmen, Chinese and Mexicans assembled to witness a mile dash for a purse of \$200. The starters were the gray gelding Lem Gustine, carrying 102 pounds and the black gelding Capt. Reynolds, packing 125 pounds. Lem was the favorite because at the Jockey Club meeting at Sacramento he had easily outrun Blue Crane and Fanny Smith. Lem took the heat in 1:52, and the crowd were much disappointed, for some reason expecting to see him run about eight seconds faster. This was a feat not accomplished, in Stockton, at least, until 1881. Then Clara D. made the mile in 1:43½. The next day Judy Coon, Fanny Smith and Dave Sidwell were started mile heats for a \$300 purse, and 1:51½ was the best time made. The third day the famous four-year-old mare Black Swan ran against Lem Gustine in two mile heats for a purse of \$500. Gustine was easy for her, the mare winning in 4:04 and 4:07.

In those days they didn't run their horses once a week only, but made them earn their salt, and as a wind-up of the meeting on Sunday, Gustine and Blue Crane ran a match race, the mare beating the horse nearly forty yards. It was a splendid dash, and down the stretch they came, each boy riding with whip and spur. Blue Crane poked her nose ahead, winning in 1:50, the fastest heat run in California up to that time.

The races of that day were not all confined to the race track, and out on the plains there was a race in which the amount of money at stake far exceeded any previous purse. The race was run July 26, 1851, Bonsell matching his bay mare against Harmer's gray mare. The distance was 600 yards, and the gray, jumping to the lead, held her position for 400 yards, she then stumbled, but quickly recovering, lost the race by only five feet. That stumble broke Harmer and his friends, and they lost 210 head of cattle, worth \$30 each, seven horses and \$3,000 cash.

Bonsell now naming his mare Cynthia Sue, matched her against Blue Crane a mile dash for \$5,000 a side. Sue took the heat in 1:49, but the judges gave the race to Blue Crane because Cynthia "flew the track at least ten feet at the start."

As early as 1854 the lovers of the turf ran their long distance heats, and one of the first of these was the two-mile heat, run on the Pioneer course, San Francisco, in December. It was a match race between James McCullough's Boston colt Attilla and Dr. Blondon's Wake up Jake, the stakes \$3,000 a side. The horses were well known and it drew a crowd of 2,000 people, among them a few ladies. Jake carried 121 pounds and Attilla 115 pounds, Jake winning the money in 3:25 and 3:35½.

The race was a put-up job evidently, for the same race was run at Sacramento in April of the following year for \$5,000 a side. Wake up Jake took the first heat in 3:50 and galloped in in the second heat in 4:01, Attilla's rider far behind pulling him up after completing the third mile.

At that time the Legislature was in session and the legislative sports bet heavily on the Boston colt, he being the favorite because of his former victory. "None of them," said the Union, "bet on the winner." Four honorable Senators we know lost \$1,000, \$450, \$300 and \$200. The representatives fresh from the dear people were equally unfortunate.

Mr. Nathan Coombs of Napa believed he had the two best horses on earth—Billy Cheatham and Ashland—and in January, 1859, he offered to match Cheatham against any horse in the State for any sum from \$3,000 to \$10,000. Ashland, then five years old, was a good one also and in May, 1859, at Sacramento, he started four mile heats with Nebraska Bill and Williamson's Bonnie Bell, and took the \$3,000 stake in 7:56 and 7:49½. Ashland was fleet footed as well as a stayer, and over the Yolo track he ran a mile in 1:47, twenty-four pounds under weight, however.

Has California ever produced any better thoroughbred than Langford? I will never forget the time when I as a boy first saw this wonderful record breaker. He was then ten years old, fat as a butterball and for several years had neither saddle or

rider upon his hack, his owner declaring that he had done enough work.

His last race, October 31, 1861, at Sacramento, was one of the few great races of California. It was two mile heats, \$1,000 entrance, \$500 forfeit, with \$2,000 added money. There were eight entries—John P. Welch's Rifleman, W. W. Gift's chestnut colt Ruby, A. F. Grigsby's hay colt Volschan and chestnut horse Dashaway, J. M. Reese's bay horse Russora, W. H. Williamson's Miami and Colonel E. S. Lathrop's Langford. All paid forfeit except Dashaway, Miami and Langford.

The Belmont colt Dashaway, ridden by John Williams, carrying 100 pounds, was the favorite, as his half-brother Langford had a bad nigh fore leg and was obliged to carry 118 pounds (Wilber Pierce). The three-year-old Miami was not considered in the contest.

At the drum tap Dashaway jumped to the lead, followed by Langford, but Miami forged ahead and took the rail, thus they ran to the half mile. Dashaway now attempted to lead the mare, but she contested the ground, and nose and nose they finished the first mile, Langford a few lengths behind. The old horse now moved up and in a bunch they ran to the quarter. On the back stretch Langford and Dashaway took up the running, easily moving away from Miami, and pulling around the turn neck and neck they came down the home run, both under whip and spur. "A dead heat, dead heat," shouted the crowd, but Langford pushed his nose under the string, winning the heat. Miami was well inside the distance flag.

All three horses cooled out well and came upon the track full of life and fire. Langford's eyes glistened with excitement, but sadly O'Hanlon, his trainer, noted his trembling leg. As they started, Miami was again sent to the front and kept it throughout the mile. At the next quarter Dashaway and Langford moved ahead and ran together to the half. Pierce then called upon Langford and quickly he ran past Dashaway, but immediately fell back. Again he rapidly came up under the whip and spur, but too late to recover his lost ground, and Dashaway took the heat by about four lengths. It was a wonderful heat for Langford, with his "game leg," but he had run his last race and he was now withdrawn.

In the third heat Miami galloped over the course for a mile and a half, followed by Dashaway, who then took the lead and won the race in 4:03½. The time was as follows: First heat, 1:56, 1:54¾, 3:50¾; second heat, 1:55, 1:57, 2:52; third heat, 2:01, 2:00½, 4:03½.

After the race Grigsby said to Colonel Lathrop: "Colonel, I'll give you \$5,000 for Langford, dead or alive, his carcass is worth that every dollar." "No," said Lathrop, "I'll bury that horse." Grigsby then offered \$5,000 for Miami and the offer was again refused. He then exclaimed: "Let's take a drink!" No one refused.

Langford, who was the acknowledged champion of the Coast, had started in eleven races and winning nine. He had also won in stakes and purses \$14,380, a goodly amount when we consider the smallness of the purses.

Dashaway was also a good one. Grigsby paid \$2,600 for him as a two-year-old, and in the following two years he had won eleven out of fourteen races and \$14,000.

RESULT OF OVERWORK.

The fallacy of starting horses twice in one week has never been more fully demonstrated than this year. Several very fast trotters and pacers have been repeated week after week without a let up. This practice is not only a losing game in the end financially, but is detrimental to the horse and will surely cause his retirement at an early date. Invariably it is the good-mannered, game and consistent race horse that gets this treatment. Two well known horses by the best of sires have this year been raced twice a week for consecutive weeks. Their case is only an illustration of what may be expected. Early in the season they were raced on the half-mile tracks in company with horses that compelled them to step almost to their speed limit in every race. When they reached the mile tracks they met new and faster company, and when called on for the extra exertion were not equal to the occasion, in fact were all in and will have to be retired for the season, and it is very doubtful if they ever regain their old form. Both raced sound, and had the clip, and many were the flattering offers made for them, but to-day their value is an unknown quantity, if anything at all. The owners of both horses are now heavy losers, as they have carried them to the different meetings where engaged, with the expectation that they would round into form, only to be disappointed when they scored for the word.

Outside of pecuniary loss to owners, the greatest loss falls on the owner of the sire of each, as his horse is credited with a failure, when in reality his stallion has produced a great trotter or pacer.

Good judgment in racing, as well as in other things, must be used to get the best there is in any horse out of him.

Whether racing a horse twice a week is the judgment of trainer and driver or owner, it makes little difference; horses, like people, have a nervous system. In some it is more acute than in others, and the man that does not stop to study the point will not be successful. If we have been successful in breeding speed and developing it, let us be intelligent in its use and further advance breeding interests.—Western Horseman.

LARGEST WINNERS ON GRAND CIRCUIT.

The last issue of the Kentucky Stock Farm contained the following list of horses that had won over \$5,000 on the Grand Circuit this year:

Trotters.

Sonoma Girl 2:05¼, br m by Lynwood W....	\$20,825
Highball 2:06¼, b g by Dr. Hooker	19,050
Wilkes Heart 2:07¼, b g by Great Heart....	12,990
General Watts 2:09¼, b c (3) by Axworthy..	8,075
Douglass 2:12¼, gr c by Todd	8,000
Margaret O. 2:08½, b m by Onward.....	7,830
Lillian R. 2:06¾, b m by J. T.	5,650
Watson 2:08½, ch g by Hinder Wilkes.....	5,572
Tempus Fugit 2:07¼, b g by Mark Time....	5,475
Athasham 2:09¼, b h by Athadon	5,250
Jack Leyburn 2:09, ch g by Alto Leyburn...	5,005
Kentucky Todd, h c by Todd	5,000

Pacers.

Angus Pointer 2:01¼, b g by Sidney Pointer..	6,810
Alice Pointer 2:05½, b m by Star Pointer..	6,625
Leland Onward 2:04½, h h by Game Onward..	6,330
Kruger 2:04, ch g by Mercury	6,267
Hidalgo 2:04¼, b g by Warren C.....	5,305
Major Mallow 2:06¼, b g by Box Elder.....	5,200

ON THE TODHUNTER FARM.

Silver Hunter, winner of second money in the Occident and Stanford Stakes last year, has been turned out all year and is looking strong and rugged. His owner, Mr. Todhunter of Sacramento, will take him up soon and have him trained for the races next year.

Gerald G., a four-year-old stallion by Zombro, out of a mare by Sidney, and which is also owned by Mr. Todhunter, made a good season in the stud. He will now be trained for a record. He certainly would have gotten a share of the colt stakes last year had he not bowed a tendon a short time before the races. In his work, miles in 2:18 were easy for him. The blood of Sidney and Zombro should be fast enough to win any stakes.

The champion three-year-old pacer Hymettus 2:08½ is now taking matters easy at his home on the farm.

One of the daintiest, raciest looking pieces of horse flesh to be seen anywhere is a yearling by Zombro, out of a mare by Stam B. This filly is entered in all the colt stakes in California, and is considered good enough to be entered in the Kentucky Futurity. Barring accidents, she will surely bring home the money, and first money, too.

Since the advent of the bicycle sulky the trotting record for three-year-olds has been held exclusively by the descendants of Electioneer in the male line. Arion's 2:10¼ in 1892 stood for a year, when Fantasy reduced it to 2:08¾. Kentucky Todd recently tied Fantasy's record. Arion was sired by Electioneer; Fantasy by Chimes, a son of Electioneer, and Kentucky Todd by Todd, a great-grandson of Electioneer. Prior to the performance of Kentucky Todd another Electioneer (The Abbe, by Chimes) tied Arion for the world's record for three-year-old stallions. Meanwhile colts of the Wilkes tribe have not been idle, as Peter Stirling, by Baronmore 2:14¼, reduced the world's record for three-year-old trotting geldings to 2:11¼ in 1901. In 1904 Grace Bond, by The Bondsman, trotted in 2:09¼ and in winning the Kentucky Futurity trotted the fastest five-heat race to the credit of a three-year-old. This year General Watts, by Axworthy 2:15½, took the colt championship by his winning race, miles of 2:09¼, 2:09¼, surrendering it to Kentucky Todd 2:08¾. So that the tribes of Electioneer and George Wilkes are about even up on the score.—Horse News.

Dan Patch went an exhibition mile at Kalamazoo, Mich., September 19th. His time was 2:01¾. It was then announced that the pacing king would go again on the following Saturday. The track was in poor condition. In this exhibition, it was found the pacer had cut himself and on Saturday instead of going a fast mile he was led before the stand and announcement made that he would not start. Immediately then the secretary stated that anyone who was not satisfied with the entertainment outside of the Dan Patch exhibition mile could have his money back by applying for it at the gate. This offer was taken advantage of by less than 100 people.

Major Delmar has just as much speed as ever, but can no longer carry it over a full mile. He was at the three-quarters at Columbus in 1:31¼, trotting the middle half in 1:00 flat and the third quarter in 0:29¾, but could only trot the last one in 0:33, getting home in 2:04¼.

A curious thing happened at Columbus. In the 2:06 pace the Sidney Dillon gelding Custer 2:05¼, trotted the entire mile the first heat and was separately timed in 2:09¼. He was ruled out of the race, and has now been put to trotting in his work and will be entered in the green trots next year.

Onward Silver 2:05¼ won the Kirkwood prize at Trieste, Austria, week before last, in 2:15 and 2:13, defeating among others Kirkwood Jr., who, however, turned the tables the following day in slower time in the Wainscott Prize.

John Green, the well known trotting horse driver, will train a string of runners at Oakland during the winter racing season.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

GUN CLUB NOTES.

The Greenhead Gun Club of Sacramento, one of the older organizations of its kind, has reorganized for the present duck season and has secured headquarters on the Erhardt Place, six miles southwest of Franklin. The spot is a favorite feeding ground of the mallard. With a limited membership a two-story club-house has been erected. N. H. Mohns is president and S. Korn secretary of the club.

The Yreka Gun Club met last week and elected Charles J. Luttrell president and Claude E. Gillis secretary. Arrangements were made for the present hunting season. The membership was increased to forty. The club's lease on the Big Spring property has not yet expired, and that will be its headquarters for this season.

The Santa Cruz Rod and Gun Club held a well attended meeting at Heins & Williams' office recently at which time the directors and officers were elected as follows: G. A. Deiter, president; H. D. Fagen, vice-president; H. R. Robin, treasurer; U. M. Thompson, secretary, and R. H. Kelly, captain.

The committee on quail and deer preserve at San Vicente was appointed as follows: W. E. Miller, chairman; Clyde Stone, Fred Koher, Al Cox, R. S. Miller, O. S. Bedell and Lewis Gates.

The duck preserve committee is as follows: Stanley Sleiter of Watsonville, chairman; Wm. Pelisseur and H. D. Fagen.

Among other important matters, the deal was closed between the club and Stanley Sleiter and W. Pellissieur of Watsonville, whereby the Santa Cruz Rod and Gun Club secures control of duck preserves embracing a frontage of two and a half miles on Elkhorn slough.

As this deal virtually means the coalition of the Pajaro Valley sportsmen and those of Santa Cruz, the former will enjoy not only the duck hunting concessions close at home, but across to the deer and quail grounds, embracing an acreage of about 8,000 acres, over which the local club has absolute control. During the evening a resolution of thanks was passed Game Warden Welch and L. Gates for the beautiful deer head taven from the deer electrocuted near Sunnyside.

The annual meeting of the club will be held October 23d, when directors for the ensuing year will be elected.

The Santa Cruz County Rod and Gun Club's new house is a commodious and comfortable building, well designed for the purpose for which it was built, and the culinary department, which is conducted by a chef who is a perfect magician when it comes to cooking ducks, and is pretty handy also at fixing up almost any kind of provisions.

The Cross Island Gun Club of Vallejo has reorganized for the season by electing R. O. Pierce president, George Griswold secretary and Cal Reese keeper. The club's ark and grounds have been put in good condition.

Henry Siebe has accepted the position of game-keeper of the late Joe Harvey preserves, now leased by Capt. Seymour of San Francisco.

The annual meeting of the Newman Sportsmen's Club took place last week. There was a good attendance and officers were elected for the year as follows: President, H. V. Armistead; secretary, E. R. Dixon; treasurer, T. E. Walden; manager, A. M. Williams; assistant manager, J. L. Kinnear.

The arrangements for the season were much the same as heretofore. There will be three "open days" each week, Saturday, Sunday and Monday. On these days visitors will be permitted to hunt on the club preserves, on securing permits from the officers, for which the fee will be \$2 per day, or \$5 for three days. The membership of the club is limited to 100, as heretofore. Gamekeeper Bauer, who looked after the grounds last year, has been engaged for the coming season also.

The sportsmen of the Gustine section have also organized a club, to be known as the Gustine Gun Club, and have secured a lease for hunting purposes on the tract, beginning at the south line of the Newman Club's preserves and extending to Ingomar. A large tract on the east side of the San Joaquin is also included in their territory. The Gustine Club has modeled its by-laws and rules largely on those of the Newman Club, and the two organizations will work in harmony. A number of sportsmen who like to have plenty of territory to shoot over have joined both clubs and are therefore free to shoot on the grounds of either. Foot bridges will be erected on the grounds of both clubs, making all parts of the grounds accessible, and good blinds will also be provided.

The officers of the Gustine club are: President, E. E. Sales; vice-president, G. S. Bambauer; secretary, W. M. Wiley; treasurer, R. H. Bamhauer; overseer, J. P. De Mont.

The new club expects to erect a handsome club-house at point not definitely selected yet, but probably on the old Santa Fe grade, near the intersection of what is known as the Kerr grade.

The organization of this club and the preserving of the territory as far as Ingomar shuts out the market hunters from their best territory, and it is going to be difficult for anyone to get much game for the market in this part of the country the coming season.

Colonel John Reese, war veteran and well known resident of Vallejo, is missing from his hunting ark on Cross Island, and it is feared has been killed and eaten by the wild boars that infest that marsh section.

Reese has not been seen for a week, and although several searching parties have been out not a trace of him has been found. He was believed to have met death by drowning, but the tide has not cast his body ashore. It is now believed that he was attacked by wild boars, which are very savage on the island.

Several of the boars were killed recently after they had given hunters an exciting chase.

The judgment of the Superior Court of Solano county in the case of Chris Dunker vs. the Field and Tule Club, which was appealed to the Court of Appeals, was upheld recently in that Court.

The original action was to restrain the defendant from trespassing upon certain land, and damages in the sum of \$150 was awarded the plaintiff. The evidence showed that one McMasters leased the land in question for hunting purposes only on February 2, 1903, the lease to take effect on the 1st of November, 1904. He then sold the land to one Goosen on April 4, 1903. When his lease became effective the plaintiff had his agent post signs on the premises warning against trespassing, but in no way took actual possession. The defendants went upon the property, tore down the signs and proceeded to hunt and shoot on the premises. They claimed under a lease of June 10, 1901, terminating five years later, made by Goosen and embracing several tracts in question. As to this tract the lease read: "It is understood and agreed, however, that this lease shall be operative as to tract No. 4 only for such length of time as parties of the first part or either of them shall control said tract."

The lower court decided that this clause, in view of the lease of the plaintiff, vitiated the lease of the defendants and granted an injunction against further trespass.

The defendants in their appeal urged that an injunction could not be issued against a defendant in actual possession where plaintiff has never taken actual possession, and that a writ of ejectment would be the proper proceeding.

The Appellate Court decides that such is not the case, and judgment of the lower court is affirmed.

A deal was made recently whereby certain business men of Eugene, Ore., have become the owners of a fine tract of land, measuring up 165 acres, on the borders of Tsilticoos Lake, between Glen Ada and Gardiner, which is said to be one of the most beautiful lakes on the Pacific Coast. It is filled with fish and its waters are the greatest resort for ducks, geese and swan in the country.

The land in question lies in four forty-acre tracts stretched along the shore of the lake, and with the ins and outs of the shore line they have a mile and a quarter of the lake front. The land is covered with a good growth of alder and other soft wood trees. It affords a magnificent view of the entire lake and its juts two and a half miles from the beach. The property cost \$7,100, and those who are taking stock in the enterprise are Dr. Paine, Dr. O. E. Smith, W. O. Heckert, E. O. Potter, W. Polders, R. M. Day, John Hunzicker, A. L. Tirrell, Paul Willoughby, S. Sherman and others. A party will go down there some time this month to establish headquarters and do a little shooting, and it may be that they will arrange for making a resort of it.

The Yreka Gun Club was reorganized September 28th, and has again leased the Big Spring property for the coming duck season. The Big Spring reserve is near the base of Mt. Shasta, and supposedly fed by an underground current, for the middle of winter, when all lakes and streams are frozen over, the spring has its usual mild temperature, and the ducks come there by the thousands. The property is leased from the Stalcup Brothers. The adjoining property of Mr. Simmons is very similar in nature, but not so extensive, and is leased by the Sbatina Gun Club, composed of sportsmen from Weed and Edgewood. Hunters returning from the springs report plenty of ducks, but too much water to get near them. Better hunting will result after the first storms.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

WASHINGTON HUNTING SEASON NOW ON.

Hunters in Western Washington have been looking forward with eager anticipation to October 1st, because on that date they are permitted to enjoy two kinds of shooting that did not come in when the grouse season opened September 1st, and the regular deer season, September 15th. Commencing October 1st it is lawful in the western part of the State to shoot quail. Those who do not follow that kind of sport are at liberty to turn their hounds loose on the deer.

The quail season extends to January 1st, with the exception of the counties lying east of the western boundaries of Okanogan, Chelan, Kittitas, Yakima and Klickitat. In the prescribed district the law stipulates that it shall be unlawful to kill quail before September 15, 1908.

The use of dogs in deer hunting is confined to certain counties. The law makes it a misdemeanor to use dogs in hunting moose, elk, deer, antelope, caribou, mountain sheep or goats, or deer, but contains the proviso that this shall not apply to the counties lying westward of the eastern boundary of Whatcom, Skagit, Snohomish, King, Pierce, Lewis and Skamania from October 1st to November 1st.

There has not been as much deer hunting in Western Washington this year as usual, the reason being that people are too busy to take time for the chase. Then, again, still hunting is not a sport that appeals to nimrods, the way duck shooting does. To enter the timber lands of Western Washington with only a gun and pit woodcraft against the ever alert and cautious deer is interesting to those well initiated but it is pretty slow to the average hunter.

It is different, however, when the baying of the hound is heard, and there is a chance that the deer may come your way. Even then the deer has a good chance to avoid the ambush, for his sense of smell and hearing is very acute, and the slightest breath of air wafted toward him from the hunter, or a slight noise is enough to change his course.

Senator Palmer is a great deer hunter. Pat Sullivan is also one of the most enthusiastic of Seattle nimrods, but he has not had a chance to drop business affairs and take to the woods. Now that the hounds may be used, he will take the first opportunity to enjoy a few days of his favorite sport.

Quail shooting should afford unusually good sport this fall. Grouse hunters, who have had poor luck, report that quail are plentiful. That this is true may be proved by going into the suburbs in almost any direction.

The quail situation in Washington State is described by a Northern sportsman as follows:

"It is the California valley quail that is multiplying so rapidly in Washington. They are not as good a game bird as bob white, but that very fact makes them better able to hold their own against the gun and dog. Bob white flies perfectly to a dog, but the valley quail is foxy enough to think of getting out of danger. In this section he appears to be a brush bird, and when he takes to cover it is little use to follow him unless you are anxious to wear your eyes out looking for a little bird to pot.

"It was not long ago that an Eastern magazine contained an article on quail in the Pacific Northwest. It was pointed out that bob white thrived on account of his ability to take care of himself, while the poor little California valley quail, being given to life in the open, was rapidly exterminated. The truth of the matter is that the writer got things turned around."

SALT WATER ANGLERS' TOURNAMENT.

Members of the Southern California Rod and Reel Club set good marks at the casting tournament held at Redondo, recently. The results were:

Single-handed, 2½ ounces, light tackle as defined by tournament rules of Southern California Rod and Reel Club:

William F. Weber, 74, 80, 95; Simon Spier, 82, 83, 70, 82; Eugene Elliott, 122, 109, 101; Ellsworth Salyer, 116, 125, 149, 144; Smith Warren, 146½, 170, 187, 167¾, 176 5-6, average 168 4-5; Sherman Baker, 197 7-12, 199¼, 208, 210, average 162 3-5; Emile Parker, 134, 114, 60; Warde Heller, 114, 103; William G. Stearns, 157, 105, 117; C. K. B. Aumock, 94.

Unlimited, two-handed—Paul Loewenthal, 118, 125, 129, ½; E. V. Parmer, 100, 135; C. A. Blackmar, 75, 144, 173, 146; W. E. Rupley, 135, 82, 137, 135; J. B. Winston, 169, 183, 172; A. B. Conrad, 128, 135; George Reynolds, 132, 139, 156, 166, 152, average 150; Warde Heller, 106, 129, 125, 121, 128, average 121.

Among those of the members present were: J. H. Parker, P. T. Moses, Emile V. Parker, E. Ellsworth Salyer, Smith Warren, Tommy Pritzgint, Oscar Wilmsen, Jack Winston, Wards L. Heller, George T. Clark, E. C. Yourell, Benjamin Elson, W. G. Stearns, W. E. Rupley, Simon Smier, George A. Reynolds, Max Loewenthal, Paul Loewenthal, C. A. Blackmar, J. F. Jones, W. F. Weber, Henry Loewenthal, Frank E. Knapp, Ed. R. Abbott, B. C. Hinman, A. B. Conrad, P. F. Crowder, C. K. B. Aumock, J. B. Winston, W. S. Skeel, Roy F. B. Shaver, A. M. Morse, Sherman Baker, Ed. Winfield, Z. C. Springer, Frederic Pabst, Dr. Edwin P. Watkins, Ed. Thomas, Eugene Elliott, Louis Breer, Jr., Capt. C. A. Jenkins, J. Whomes, George Pomeroy and Jerry Mullen.

ANGLERS' MEETING IN NEW YORK.

The three Southern California saltwater angling organizations—The Tuna, Light Tackle, and Rod and Reel Clubs—will be represented by delegates at the conference of anglers to be held in New York City at the National History Museum on November 11th. Subjects of discussion will be the pollution of angling waters, the vicious use of nets and spears, inadequate laws, unsportsmanlike tackle, etc.

Dr. Henry Van Dyke will preside and will read a paper, as will Prof. David Starr Jordan, Prof. Barton W. Evermann of the United States Fisheries Bureau; Prof. Charles Frederick Holder, president of the Tuna Club, Charles Hallock, Arthur Jerome Eddy, president of the California Light Tackle Club, and others.

The formation of a strong central association is contemplated, with a view of bringing anglers everywhere closer together so national legislation may be secured on needed points by concerted action. Various peculiarities of each section will be set forth and explained. Anglers in general are invited to attend. F. L. Harding, corresponding secretary of the Tuna Club, Arcade building, Philadelphia, is in charge of preliminary arrangements.

Prof. Holder will represent the Tuna Club, President Eddy the Light Tackle Club, and F. C. Gay of Brooklyn the Southern California Rod and Reel Club. Gay is familiar with Catalina conditions from his last winter's experience there.

Among the prominent sea angling clubs supporting the movement are, besides the California organizations mentioned, the Aransas Pass Tarpon Club, which will be represented probably by its president, L. P. Streeter, or by A. W. Hooper of Boston; the Asbury Fishing Club of New Jersey; several State game and fish protective associations, and the National Association of Scientific Angling Clubs. In fact, the project may merge into the latter eventually.

Fishermen believe matters are coming to such a pass that unless the anglers get together upon some questions of national importance at once and compel the attention of the Federal authorities to the remedying of some glaring abuses, there will be no fish in a few more years. The wholesale pollution of streams by factories of various sorts is illegal, but few States seem able to cope with it, and a national law to the same effect is needed.

Sea anglers are not less affected than those who take their sport in fresh water. In many sections indiscriminate seining has ruined the fishing and almost exterminated fine varieties of food fish that were plentiful only a few years ago. The need of such legislation has been pointed out by the late Fred Mather and others, but only a strong centralized association can hope to compel action, it is believed.

TUNA CLUB PRIZES.

Prizes for deep sea angling at Catalina have been awarded by the Tuna Club of Avalon, for the season of 1907. The club has had a very prosperous year, in spite of the fact that the big tuna, of the 100-pound and over size, failed to put in an appearance. To meet the new situation, a red tuna button for a fifty-pound fish taken under the light tackle rules was inaugurated. E. K. Polkinhorn was the only angler to receive the new emblem for a catch this year, but four buttons were awarded for catches made in 1906 by Eddy, Potter, Sharp and Streeter. Gold and silver medals have been given Messrs. Harding and Streeter for white sea bass and albacore, respectively.

Thirteen boatmen who gaffed a fifty or hundred-pound tuna under the new rules have been presented with silver medals inscribed "Tuna Club Gaffer."

Prize winners were as follows:

Potter Tuna cup, largest red button fish of the season; weight 50½ pounds; won by E. J. Polkinhorn of Torreon, Mexico.

Rider Macomber medal for largest black sea bass of the season; weight 427 pounds; won by C. J. Tripp

John F. Francis medal for largest yellow-tail of the season; weight 41½ pounds; won by Edward C. Sacks of Butte, Mont.

Eddy Light Tackle cup, largest yellow-tail of the season; weight 41½ pounds; won by Edward C. Sacks.

Nordlinger Ladies cup for largest yellow-tail of the season taken by lady; weight 36½ pounds; won by Mrs. L. A. Breen of Los Angeles.

Streeter albacore medal for largest albacore of the season over forty pounds; weight 41½ pounds; won by A. B. Cass of Los Angeles.

F. L. Harding cup, for largest bonito of the season; weight 20 pounds; won by Edith Holder of Los Angeles.

The Holder sword-fish cup and also the C. H. Harding white sea bass medal and some seven other trophies in the one hundred-pound tuna class remain unearned.

Jackson's Napa Soda is the best hot weather drink.

AT THE TRAPS.

The following scores were made by Sunset Gun Club members, September 29th:

First event, ten targets—Burfiend 6, O'Connor 9, Lewis 1, Holm 7.

Second event, Lewis handicap trophy, ten targets—O'Connor, 20 yards, broke 6; Lewis, 20-5; Burfiend, 20-7; Holm, 16-5. Burfiend was the final winner of the trophy.

Third event, Du Pont trophy, twenty targets—Lewis 10, O'Connor 16, Burfiend 16, Holm 3. J. O'Connor won the trophy.

"One Barrel Pete" is still in the ring, it seems. For several years past he has been located at Petaluma, but has not cut any particular figure at the traps. He, however, will take part in a match shoot to-morrow at the ball grounds of the chicken metropolis. The events will be shot off in a challenge match with Victor de Martini. The first is to be at blue-rocks, one trap, unknown angles, 25 birds each; the second with 25 live birds per man, Murphy to shoot while standing on his head and De Martini to shoot in the usual standing position.

The boys evidently have been royally received down south. The Ocean Park Journal has the following notice of three shooters who were last week enjoying Bob Bungay's hospitality at that favorite and salubrious beach resort:

"H. Justins, Coast sales manager for the Union Metallic Company and Remington Arms Company, is down from his headquarters at San Francisco, and will spend a week at this beach in company with Tom Marshall and Chris Gottleib. Mr. Marshall is one of the All-America Shotgun Team that won all honors several years ago in England. Mr. Gottleib made the high average at the Western Gun Club meet at Sherman a few days ago. All three gentlemen will attend the Douglas Gun Club meet at Douglas, Ariz., on October 8th. They are guests of the Metropole."

The Seattle Gun Club tendered on September 15th a complimentary shoot to the Eastern cracks and other visiting shooters who had been at the Spokane Interstate Association tournament.

E. E. Ellis, a leading trap shot of the Northwest and veteran member of the club, established a new record for the Cardmore trap grounds—97 out of 100. He also made a straight run of 68. Of the Eastern experts there were only present Tom Marshall who, however, did not shoot, and Chris Gottleib. The latter broke 91 out of 100. Hip Justins, D. W. King Jr. and Frank Riehl also took part in the shoot. Weather conditions were somewhat disagreeable, but at that quite a crowd of shooters and visitors turned out. The scores shot were:

Targets—	20	20	20	20	20	Shot at.	Broke.
Ellis	18	19	20	20	20	100	97
Gottleib	17	19	18	17	20	100	91

Arrangements for what is intended to be one of the biggest blue-rock tourneys ever held anywhere on the entire Pacific Coast have already been started by Secretary Paul Schmidt of the Coronado Country Club.

Monday afternoon, October 1st, eight of the best known shooters in the country were entertained at the traps on the Coronado Country Club's grounds, and as a result there are now eight boosters who promise that they will do everything in their power to contribute to the success of the proposed tournament and will advertise it extensively wherever they may happen to be.

No definite date for the proposed tournament has as yet been named, but in all probability it will be fixed for next April. This will be known as the spring tournament of the Coronado Country Club, and will be followed by another big one, to be held some time next fall.

D. W. King Jr., Tom Marshall, Dick Reed, E. Gottleib, Harry Hoyt, H. Justins, Clarence A. Haight and Emil Holling were the guests of the Coronado

Country Club. These experts are among the best known in the country, and no Coast tournament is considered complete without their entries. In order to afford the visitors a good time and to give them a chance to try the traps-at Coronado, the Country Club arranged a small shoot, in which all entered. The first event was at 25 birds and for the Coronado Country Club bronze medal. This event was won by Dick Reed, with a score of 24 out of a possible 25. The scores were as follows: Marshall 20, Haight 22, Gottleib 23, Reed 24, Justins 21, King 23, Holling 23.

The most interesting feature of the afternoon was that for the Coronado Country Club's silver medal. This shoot was at 50 birds and brought out some expert work. E. Holling, with a score of 46 out of a possible 50, walked off with the medal. Haight, Reed and Gottleib were close competitors, each having a score of 44 out of 50. The scores were: Marshall 42, Reed 44, King 42, Gottleib 44, Justins 40, Hoyt 37, Haight 44, Julian 35, Holling 46.

At the close of the shoot the visitors expressed themselves as being delighted with the conditions prevailing at the Coronado traps. They stated that arrangements were perfect for high-class shooting and that in no place where they had visited were the light conditions the equal of those to be found at Coronado. Each of the experts expressed his intention of coming to Coronado when the big tournaments are held.

The following day, Tuesday, the boys were entertained by Mr. E. S. Babcock at his beautiful home on Otay Lake. During the morning they took part in a mudhen drive, an annual affair at the Otay summer place, where the mudhens congregate in thousands, eating the food intended for the ducks.

The afternoon of the same day Mr. Babcock treated the members to a fishing trip on the lake. Several of the shooters proved themselves good fishermen as well as good marksmen. Chris Gottleib secured twelve black bass, and Tom Marshall came second, catching eight fine ones.

Since their return to Los Angeles, Mr. Marshall and Mr. Gottleib went over to Catalina to fish for yellowtail. They were to be joined by the remainder of the representatives last Sunday.

The trade representatives do not shoot for prizes given in any shoot where amateurs are admitted. They shoot for records only. The object of their trip is to advertise their firms and spread the field of their industry by introducing the use of their goods throughout the country.

So successful has the present trip been and so agreeable to the representatives of the various powder companies participating that the Winchester Arms Company, the U. M. C. Co., the Du Pont Powder Company and a number of other Eastern powder and arms companies expect to organize a shooting team to tour the Coast next year. In all probability these tours of teams will be made annual affairs.

Heretofore the tours have been irregular and depended on arrangements made by local Coast shooting clubs. But if the present intentions of the various powder and arms companies are carried out a regular organization will be formed and a schedule of exhibition shoots arranged.

The plans have gone so far that a tentative list of places where exhibitions will be given next year has practically been decided upon. If the present schedule holds, the 1908 team will give its first shoot at Coronado, then it will go to Los Angeles. From there it will move north to Santa Barbara and will continue up the Coast, visiting San Francisco, Sacramento, Medford, Ore., Portland, Ore., Tacoma, Wash., and Seattle, Wash.

The representatives will probably effect a permanent organization before they disperse after the shoot at Douglas, and some Coast representative will most likely be appointed secretary, to make arrangements with shooting clubs along the Coast for exhibitions for following years, as it is desired to have all exhibitions under the auspices of established clubs in the various cities to be visited.

In the 1908 team some of the best shooters in the world are to be included. They will come to the Coast in the spring or early fall of 1908.

The Wheatland Gun Club was out for a practice shoot Sunday afternoon, two weeks ago, and considering that this was the club's first blue-rock shoot and many of those shooting had never shot at the traps before, some good scores were made. The shoot was for practice solely and shows conclusively that it will require considerable practice to put the club in the prize winning class. About fifteen members participated.

The Wheatland Gun Club has been in existence but a short time, yet it has become a permanent feature in the Wheatland world of sport. The dove stew given last July is still remembered as a royal treat, and it is more than probable that a quail or duck stew will be given this fall. And if the club so decides, invitations will be in demand.

It has been decided to hold frequent practice shoots at the traps, and for the purpose of a good supply of blue-rocks has been secured. The club is calculated to become self-supporting, and its annual stews will become the milestones of its history of pleasureable events.

The California Wing Club scores for this season—the regular seven forenoon twelve live-bird shoots, show that but four members shot in all of the seven club races.

Clarence C. Nauman won the high average medal, losing two birds out of 84. Murdock and Walsh tied, with 79 each, and Frank Turner grassed 74. The total scores were the following:

J. K. Prior Jr., 10 10 9 5	30
A. T. Derby, 10	10
W. W. Terrill, 12 11 11 12 11 10	67
W. J. Golcher, 12 11	23
W. E. Murdock, 11 10 12 12 10 12	79
M. O. Feudner, 11	11
Tony Prior, 9 12 12 11 10	54
M. J. Iverson, 10 10 9 10 12	51
C. C. Nauman, 12 12 11 12 11 12	82
P. J. Walsh, 10 10 12 11 12 12	79
Frank Turner, 11 7 10 12 11 11 12	74
C. A. Haight, 10 7 11 12 11	51
A. J. Webb, 11 10 11 11 10 12	65
W. C. Green, 9 11	20
Ed Schultz, 12 10 11 12 12 12	69
E. Klevesahl, 12 11 10 12 10	55
W. L. Neilsen Jr., 10 10 10 8 11	49
A. M. Shields, 10	10
A. M. Barker, 10	10
W. E. Duzan, 12 9	21
E. Donohoe, 10	10
P. A. McRae, 12 10 11	33
H. P. Jacobsen, 10 10	20
A. Roos, 11	11
P. B. Bekeart, 9 10	19
E. G. McConnell, 12 12 10 12 11	57

Nearly all of the trade representatives who were in attendance at the Western Gun Club's tournament at Los Angeles are at Douglas, Ariz., this week participating in the Arizona Sportsmen's Association tournament, October 11th, 12th and 13th. Among those listed were:

Harry Hoyt, Emil Holling, J. Ed Vaughan, Billie Hillis, Chris Gottlieb, D. W. King Jr., Dick Reed, Clarence A. Haight, Hip Justins and Thomas A. Marshall. The Douglas Gun Club will pull off the shoot, and has arranged for a percentage form of money division that has been popular in Arizona. Four classes are made, and the purse it cut into four equal parts, each class dividing its pro-rata. Big money is added, however, figuring \$20 to each event.

Medal shoots are open to the Territorial sportsmen only. There are about 200 birds programmed each day on general average. In addition to the professional squad will be the celebrated amateurs, W. H. Varien, "Pop" Carr of Monterey and Marcus G. Lane and Fred B. Mills of Southern California.

Marshall made up a party to go to San Diego last week, proposing to show the Pastime Gun Club people a little sport by arranging an impromptu shoot. The Pastimers have not been heard from for some time.

From San Diego the scene of action will shift to the Arizona shoot. The fall is the great season for trap shooting in the Territory, and a chain of tournaments probably will be arranged by the time the Douglas shoot opens.

The gold, silver and bronze medals of the Los Angeles Revolver Club were won by Messrs. I. C. Douglass, A. B. Douglas and W. E. Smith at the regular September monthly medal shoot, held at the Bishop-Street Police Range.

The shoot marked the first official appearance of the newly admitted women members competing for the medals. Mrs. G. F. Stephenson carried off the high score honors for the fair shooters. She tied the score of 70 made by her husband, who is considered one of the best marksmen in the club.

A regular practice shoot will be held next Sunday. A high wind coming up about noon kept the scores down at the regular monthly shoot, the official figures being as follows: I. C. Douglas 86, A. B. Douglas 82, W. E. Smith 81, E. C. Crossman 80, G. F. Stephenson 79, Mrs. G. F. Stephenson 79, J. E. Holcombe 78, F. K. Haines 75, C. W. Linder 71, H. D. Thaxter 64, W. R. Cutte 64.

DOINGS IN DOGDOM.

Stockton show will open on Monday with 209 dogs on the benches and a total of over 400 entries. It was expected that the entries of dogs would be nearly double this number. While fanciers from San Francisco and adjacent towns gave a very good support to the show, the local entry is not up to what it should be. The merchants of Stockton and friends of the club out of town were very generous with donations of trophies and prizes, a recognition which the club officials greatly appreciate, but the fanciers of Stockton could have been more generous with their entries, for there are a great many very good dogs in Stockton, the owners of which should have taken more interest in the matter.

The total entries by breeds are the following: Bloodhounds 1, St. Bernards 3, Great Danes 5, Greyhounds 3, Foxhounds 4, Pointers 8, English Setters 12, Gordon Setters 10, Irish Setters 8, Irish Water Spaniels 7, Field Spaniels 5, Cocker Spaniels 37, Collies 18, Bulldogs 4, French Bulldogs 3, Bull Terriers 20, Irish Terriers 1, Fox Terriers (smooth) 14, Fox Terriers (wires) 10, Skye Terriers 1, Boston Terriers 11, Airedale Terriers 3, Toy Terriers 1, Dachshunds 3, Japanese Spaniels 3, Pomeranians 3, Italian Greyhounds 6, Curly Poodles 1, Toy Poodles 2, Water Spaniels 1.

Cockers and Collies have the largest representation. A. L. Stuart and Sid Cummings will each handle a string of San Francisco dogs. While the number of dogs is hardly up to the mark, the qual-

ity is exceedingly good.

A large delegation of fanciers from San Francisco and other points will attend the show.

The California Cocker Club will affiliate with the A. K. C. This means the probability of a good specialty show later on. The more of these shows we have the better for Coast dogdom.

Kingsley Stevens recently sent his red Cocker Spauel hitch Brownland Babbie to be served by A. Wolfen's Ch. Redlight.

The report is current that an English Setter Club will be organized, probably next week, at Stockton. There has been a great need here for such a specialty club, the field is a wide one and such an organization can do a world of good for the breed. Rumor has it that Dr. L. W. Spriggs, an enthusiastic fancier, the owner and breeder of some good Setters, is interested in the success of the club.

A pleasing feature of the Stockton show will be the refreshment annex. The Young Ladies' Aid Society will run a large booth in the pavilion in which the dog show will be held. The young ladies will serve soft drinks, sandwiches and candy during the show and the full receipts will go to the fund which the society uses for charitable work.

The Los Angeles winning Pointer Ch. Dictator, Ed Maier owner, may go East next season to compete in the big bench shows which hold sway in the large cities across the hills, and if he keeps up to the mark set at Venice and other exhibits held in that neck of the woods the southern canine is sure to gather his share of the ribbons.

Dictator is about three years old now and was bred by Wm. J. Morris, he is by Teddy Kent out of Jack's Fashion, a nick that has been represented by winning dogs at field trials and on the bench.

Wm. Ballantyne, now of Goldfield and former owner of the Belfast Irish Terrier Kennels, has a litter of puppies that should soon be snapped up by any fanciers searching for the right thing in "Micks."

Three eight weeks' old Bulldog puppies by King Thud, out of Belfast Cricket, are worth looking after. Mr. Ballantyne has too many young dogs now at his home in Goldfield and will dispose of the puppies at tempting figures.

A California dog won the Derby of the British Columbia Field Trials at Ladnor, near Vancouver, last week. S. Christenson's English Setter dog puppy St. Ives (Uncle Jimmie Whitestone-Belle Fontaine) was placed first. E. Courtney Ford's bitch Tiburon (Uncle Jimmie Whitestone-Belle Fontaine) and Joe E. Terry's Kilgarif's Linda (Kilgarif-Iona) were placed equal second. J. W. Considine's English Setter dog Policy Boy, a son of Policy Girl, was placed third.

Kilgarif's Linda won second in the Manitoba Derby in September. It was conceded by many present that had she found birds to work on she would have won first place.

St. Ives did not get in the second series in the Manitoba trials. Tiburon was the winner of the Pacific Coast Derby this year.

The Pacific Northwest trials started at La Conner Flats on Wednesday. All of the California strings with W. B. Coutts, Chas. Coutts and John Lucas were taken over to the Seattle grounds after the British Columbia trials.

E. Courtney Ford, S. Christenson of San Francisco, Jos. E. Terry of Sacramento, Elmer Cox of Madera and John Erikson of Seattle, all members of the Pacific Coast Field Trials Club, were present at the Pacific Northwest trials run at La Conner Flats, Wash. Henry L. Betten was in the saddle.

Tiburon again annexed initial Derby honors at the Washington trials, St. Ives was placed third.

The Northwest All Age and Champion Stakes was won by the Pointer Abbott's Jack. Tony Spot ran second in the All-age, Denny and Spot's Bad Boy were equal third.

Portland entries made a great clean-up last week at the Spokane hench show, held in conjunction with the Interstate Fair. Thirteen Portland dogs won fourteen firsts, ten first winners and eight cups. Frank E. Watkins' Bull Terrier bitch Iris won out over everything in her classes. E. T. Chase's two Boston Terriers, Sportsman being one of them, and J. C. Moore's Bull Terrier Willamette Demon were among the winning web-foot entries.

The Amateur Bulldog Club of New Jersey held its Fall show at Newark, New Jersey, on September 26th, in conjunction with Essex County Fair, and notwithstanding the rather unsettled weather, the interest in the educational work that this good local club is doing in the development of the British national breed in and about Newark, drew out a large attendance. All classes filled well, and the judge, Mr. John H. Dorian, had his work cut out for him, as there was considerable quality in the exhibit. The contest in winner dogs between Dr. Bachman's recently imported "Lord Benson" and Doll and Hammett's good American bred winner "Yankee Grit" was particularly close, and the task of placing them was evidently not an easy one. The winner "Lord Benson" scores in lowness to ground, shoulder,

depth of brisket, and spread; but in other respects will have to travel some to beat "Yankee Grit," who took reserve winners for best in show over the good imported bitch winner Queenie Penfold, shown too fat, but a very taking specimen. Yankee Grit was again to the fore with first American bred, heating a very strong class of seven. Doll and Hammett also took first novice bitches with a promising American-bred in Cleo. Dolly, and were "in the money" with another good young dog in "Cleo Toddy." A special feature of the show was a match between a splendid litter of two months' old Champion Mahomet puppies, owned by Mr. W. E. Parker, and one by Gotham Odin owned by Mr. Marx, in which Mr. Parker carried off the honors. Both litters showed more than usual quality, however, and the contest was very close.

The last regular monthly meeting of the Long Island Kennel Club was held on October 1st, with Mr. John F. Collins in the chair in the absence of Dr. De Mund. The attendance and membership roll shows a very healthy condition, and the meeting was a most enthusiastic one. The club has nearly doubled its membership in the past year, and as the lady members are increasing in number, and have contributed in no small degree to the year's growth, the question of giving them an opportunity to participate more directly in the work of the club was one of the questions seriously discussed. As a result, it was decided to make the next monthly meeting on November 5th a special Open Ladies' Night; and to invite the lady members of the club to come out in force and bring all friends interested in the formation of a Ladies' Auxiliary. The club is now one of the largest show giving organizations in the United States, and it is felt that the time is ripe for some recognition of the part the gentler sex has contributed to its development. A special committee has been appointed to cover the subject, with instructions to report ways and means at the next meeting, and a substantial attendance of lady members and friends of the club is promised for the occasion. Those desiring further information in regard to the meeting can secure it from Secretary John H. Dorian, 35 West 23rd street, New York City.

THE AIREDALE TERRIER.

"A dog of all trades" is the Airedale Terrier. They will do the work of almost every other breed.

They will hunt rats, mice and other vermin; run down foxes or rabbits; beat for birds, bait badger, draw coon, retrieve for game under any conditions, each with equal gusto and success.

They flourish as well in the far-off frozen North as in the damp, fever-stricken tropics; as well in the sunburned, scorched plains of Arizona and New Mexico as in the cool pine forests of Canada or Maine. Equally at home on land or in water, in any climate or hunting any game, the Airedale is indeed a wonderful dog. The German police have come to the conclusion that this breed makes the ideal police dog. In Paris the river police use these dogs with great success as preventers of suicides. Several European armies have adopted the Airedale as their dogs of war, in which capacity they excel.

In the Klondike they are used as sled dogs, though it has been found that they are most useful as a cross for the native huskies. This mating produces dogs that are said to be exceptionally valuable for this branch of work.

An Airedale will quickly learn to herd and drive sheep or cattle as well as any Collie, and is particularly useful as a guard or house dog.

In disposition the Airedale is faithful, loving and obedient; a culmination of all that has always been admired in the dog. The story of the dog of this breed that dragged through four miles of howling blizzard the dead body of his master will always raise a lump in the throats of dog lovers.

The origin of this many-sided dog is of comparatively recent date. He appeared in Yorkshire, particularly in the valley of the Aire, from which he gets his name, about fifty years ago.

Although the dog's official name is Airedale Terrier, still common usage, especially in England, has led to a dropping of the latter word, and he is now universally known and loved as the Airedale. He was created, if the term be permissible, by those who had no knowledge of scientific dog breeding, but who desired a good all-around dog—big enough to take care of himself and useful in hunting vermin, especially along the little streams.

To do this they mated Otter Hounds with all possible combinations of Terriers and by a series of haphazard crossings and re-crossings produced the Waterside Terrier, as he was then called.

From this mixed and doubtfully bred dog the early breeders, by careful breeding and some modifications, produced the grand dog that is now so rapidly becoming a general favorite, but well as they did their work the mysterious foundations of the past are often cropping out in long, Hound like ears or white markings that should not be.

The Airedale has a hard, close coat; long, well shaped, expressive head, strong muzzle, neat V-shaped ears, bright, dark eyes, well defined and strong neck, good shoulders, chest deep and narrow, forelegs straight as gun barrels, with plenty of bone; ribs well sprung; loins strong, hams and second thighs full, powerful and muscular, tail docked and carried nearly erect; action free and showy, as if always on the alert and never tired; color black or dark badger grizzle on back and neck; head, ears, chest, legs and thighs a deep tan.

A COMPARISON OF ANILINE AND ANATTO BUTTER COLOR IN BUTTER MAKING.

There has been more or less discussion during the past two years upon the relative strength and efficiency of aniline and anatto butter colors. Since the passage of the pure-food bill there has been a strong leaning on the part of many manufacturers of butter to use vegetable instead of aniline color. There has been considerable speculation as to whether it was safe to use vegetable color.

Prof. E. A. Farrington and Mr. Martin Meyer, in Bulletin No. 152 of the Wisconsin Experiment Station, have published the results of their investigation, which seems to indicate that vegetable color gives good satisfaction, and if a good brand is selected there will be no offensive odors developed in the butter or fading of color.

The observations recorded in the bulletin indicate:

First, some of the brands of vegetable butter color now on the market are weaker than the aniline butter colors. Nearly twice as much vegetable color was needed in some cases to produce the same shade of color in butter as was given by the aniline color.

Second, when the change was made from vegetable to aniline butter color, some fifteen years ago, butter-makers were so accustomed to the weaker anatto color that they added too much of the stronger aniline color. This had a tendency to gradually accustom the consumer to a more highly colored butter than formerly had been made.

The natural color of June butter is a sufficiently high color, and when only enough vegetable color is added to produce this shade there will be no danger of using so much as to impart a butter color flavor to the butter.

Third, the vegetable colors now on the market impart a rather greenish-yellow shade to the butter. This is quite different from the bright or reddish-yellow given to the butter by the aniline colors.

Fourth, some brands of vegetable color contain a decided flavor imparted to them by the oil used in making the color. This flavor may be distinctly noticed in the butter when large quantities of such brands of color are used.

Fifth, a great improvement in the strength and flavor of certain brands of vegetable butter color was noticed during the year these experiments were conducted, which suggests that the vegetable butter colors may eventually be improved so as to compare favorably with the aniline butter colors.

Sixth, when butter was held in cold storage at 5 degrees below zero, no difference was noticed in the uniformity or the depth of color in the lots of butter to which aniline and vegetable coloring was added. Over fifty tubs of butter were held in storage for different lengths of time, some of them being taken out when the butter was nearly a year old. Neither the vegetable nor the aniline colored butter showed any indication of fading or changing color while in storage.

Seventh, butter can be satisfactorily colored with a vegetable color.—Hoard's Dairyman.

WHAT IS IT?

Two cows stand side by side in the stable. To both cows the same ration is fed, yet one will extract from that food as much again butter fat as the other. The butter product of the food is 100 per cent greater with one cow than the other. This fact is seen in too great frequency in all herds of cows. What is that inner quality whereby one cow can produce so much more than the other from the same food? It is hard to find the right name for it, but it may be called "dairy quality." Now, certain breeds of cattle are distinguished for this quality. They have the power to accomplish this work in greater proportion and perfection by reason of having been bred to that purpose from long lines of ancestors of like quality. One would think that there would not be a dairy farmer in the land who would not be keenly alive to the necessity and economy of using such cattle

for dairy purposes. As soon would we think he would cut hay with a reaper and call it the best way.

But the so-called general purpose notion has destroyed in not a few men the power to look into this question in an economical way. They seem to be unable to take the same advantage in their choice of cow machinery that they do in choosing their mechanical machinery. They cannot be fooled into taking a plow for a cultivator, yet thousands of farmers will spend their lives in trying to make cows of beef breeding do dairy work. If they were close students of "cause and effect" they would not be beguiled this way.

Why should not the famer be a close student of cause and effect?—Hoard's Dairyman.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Carb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

Ask your grocers or dealers for it. Positively cures Colic, Scouring and Indigestion. Manhattan Food Co., C. P. Kertel, Pres., 1001-1003 E. 14th St., Oakland, Cal.

"SAVE THE HORSE" SPAVIN CURE

This Tells the Story

Need One Wonder Why we Give a
Written Guarantee?

Lucerne, Mo.

Troy Chemical Co., Binghamton, N. Y.
Dear Sirs: We had a race mare, Julia Penzance, that broke down racing last season with a bad knee, also gave way in one pasture, so we had to let her run out all winter; she was lame all the time; could not be used. This spring we were induced to buy your "Save-the-Horse" and was surprised at the results, as improvement could be noticed from the commencement. We started training the filly and kept using the medicine. I have just returned from Sioux City and Onaw, Ia., where we raced, and she won every race, started in on a hard track and she has never shown any signs of lameness, and I surely regard your "Save-the-Horse" as the greatest remedy I have ever used or heard of, and I have been in the horse business forty years. I would just say to the horse racing fraternity in general not to give up a lame horse until they have tried "Save-the-Horse," as I have the utmost faith in it, since giving it a trial. Yours truly,
TOM H. JONES,
Owner of Oak Hill Farm,
Fort Kent, Me.

Troy Chemical Co., Binghamton, N. Y.
Dear Sirs: Please send at once by express one bottle of "Save-the-Horse" Spavin Cure, for which you will find enclosed \$5 in registered letter. You will see I did not send any description of the horse or ask for a guarantee, as I have already used your remedy, and I know what it is. Please send at once.
T. A. ST. JOHN.

COSTS LESS

for results than all other known treatments and remedies.

"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

Troy Chemical Co. Binghamton, N. Y.

\$250 IN SPECIAL PRIZES FOR STALLION OWNERS

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize	\$100	4th Prize	\$25
2d Prize	50	5th Prize	20
3d Prize	35	6th Prize	20

The Above Prizes will be Paid on December 24th, 1907.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings, February 2, 1909; \$10 on Two-Year-Olds, February 1, 1910; \$10 on Three-Year-Olds, February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For Entry Blanks and further particulars address the Secretary.

CONDITIONS.

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or elipe or has a dead foal or twine, or if either the mare or foal die before February 2, 1909, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will not be barred on pacing horses.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors. Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters. Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.
The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.
Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.
It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.
Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

Price 25 Cents

All Trainers Should Keep it in Their Stables.
PRICE—25c, 50c and \$1.00

WINCHESTER
HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1886 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

California Breeders Futurity Stakes No. 1

BY THE

California Breeders Association

For Foals of Mares Covered in 1907 to Trot and Pace at Two and Three Years Old

Entries to close Friday, November 1st 1907

ONLY \$2 TO NOMINATE MARE

\$4250 for Trotting Foals.

\$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners and \$200 to Owners of Stallions

MONEY DIVIDED AS FOLLOWS:

\$2500 for Three-Year-Old Trotters.

\$200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Trot.

\$1250 for Two-Year-Old Trotters.

\$200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was Bred.

\$1500 for Three-Year-Old Pacers.

\$200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Pace.

\$750 for Two-Year-Old Pacers.

\$200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Pace.

\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was Bred.

Entrance and Payments—\$2 to nominate mare on November 1, 1907, when name, color, description of mare and stallion bred to must be given; \$5 April 1, 1908; \$5 November 1, 1908; \$10 on Yearlings, April 1, 1909; \$10 on Two-Year-Olds, April 1, 1910; \$10 on Three-Year-Olds, April 1, 1911.

Starting Payments—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

CONDITIONS.

The races for two-year-olds will be mile heats, 2-in-3, and for three-year-olds 3-in-5. Distance for two-year-olds, 150 yards; for three-year-olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before April 1, 1909, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907

Entries must be accompanied by entrance fee. Nominators liable only for amount paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7,000, the amount of the guarantee, only. Hopples will not be barred on pacing horses.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

C. A. CANFIELD,
President.

JOHN W. SNOWDEN, Secretary,

THE WEEKLY

BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco
Postoffice.Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCEMoney should be sent by Postal Order, draft or letter
addressed to F. W. Kelley, P. O. Drawer 447, San Francisco,
California.Communications must be accompanied by the writer's
name and address, not necessarily for publication, but as
a private guarantee of good faith.

THE CANFIELD STAKES is for foals of this year, and is for trotters and pacers to race in 1910, when they are three years old. The races are to be held at Los Angeles, the trotters to race for 60 per cent and the pacers for 40 per cent of the entire stake. President Canfield of the California Breeders' Association will add \$400 to the stake, which should be very valuable, as here should be a very large entry list. The total amount of the entrance fee is \$50, which is divided into several payments. It only costs \$5 to nominate the foal on November 1st of this year. There are two payments of \$10 each to be made thereafter, a year apart, then another of \$25 in April, when the foal is a three-year-old. After this the starting payment is the only one. The Canfield Stake should be a more valuable stake than the Stanford Stake, which it resembles very much in conditions, except that it has a division for pacers. We ask our readers to carefully study the conditions of this stake as set forth in the advertisement and to enter in it liberally.

IT DOES NOT SOUND WELL for horsemen or horse journals to berate and belittle guaranteed stakes because more money is taken in by the promoters of them than they pay out. When such stakes are announced they are guaranteed to be worth a certain amount and no more. When they are declared closed the promoters are liable for this amount, and no matter whether the payments are sufficient to equal that sum, the money guaranteed is paid. If the payments amount to more than the guaranteed amount and the promoters of the stake keep the surplus, they have a right to it. They are compelled to stand the loss if any, and why should they not have the profits if any? No person is compelled to enter in any of these stakes, and he knows the conditions before he signs his name to his entry, or if he does not it is no fault of anyone but himself. There are stakes in which all the money paid in is divided among the winners. The promoters of such stakes are to be commended for their liberality in giving them, but they have no right to condemn others for things of which they are not guilty.

TWO COLT STAKES have been inaugurated by the Sonoma County Driving Club and will soon be advertised. This club, which is composed of substantial and reliable citizens of Sonoma county, the majority of whom reside at Santa Rosa, guarantees the value of the entire stakes to be \$1,000, which is to be divided \$500 for two-year-old trotters and \$500 for three-year-old trotters. Both races to be trotted in 1908, so they will be for foals of 1905 and 1906. The money will be divided \$250 to the winner, \$125 to second, \$75 to third and \$50 to fourth in each race. Entries are to close December 20th, this year, and the payments are as follows: \$2.50 to nominate on December 20, 1907; \$2.50, April 1, 1908; \$5 July 1, 1908, and \$10 starting payment ten days before the race. This is a very liberal stake, as the entire entrance fee on each starter will be but \$20 to start in a \$500 stake, less than 5 per cent, and nothing to be deducted from money winners. Entries will be open to colts owned in Sonoma, Napa, Lake, Mendocino and Marin counties. Official announcement of this stake will be made soon through the columns of the Breeder and Sportsman, and we hope it will receive a very large entry list.

SEVEN THOUSAND DOLLARS has been guaranteed by the California Breeders' Association of Los Angeles for the California Breeders' Futurity Stakes No. 1, for foals of mares covered this year. Entries to this stake will close Friday, November 1st. This stake helps the situation in California greatly, and makes the earning capacity of two and three-year-old trotters and pacers still greater, consequently increases their value. In this stake \$4,250 has been set aside for the trotters and \$1,750 for the pacers. In addition to these amounts the persons who nominate the dams of winners will get \$800, and the owners of the stallions that sire winners of the three-year-old races will get \$200. Colt stakes, as every horseman knows, are the very life of the business. They induce breeding, training and racing, and make the selling prices greater than they would otherwise be. Every breeder should patronize these stakes.

MATINEE TO-DAY.

The Park Amateur Driving Club will hold a matinee to-day on the three-quarter-mile track at the Golden Gate Park Stadium, and there will be five good races, all at heats of three-quarters of a mile, except the class A trotters, who will go half-mile heats. The officers of the day will be: Starter, T. J. Crowley; judges, A. Joseph, William Matson, A. Mellett; timers, J. A. McKerron, N. Franklin, G. Wempe; marshal, T. F. Bannon; secretary, F. W. Thompson. The entries are as follows:

Class B pacers, three-quarter-mile heats—W. C. Hamerton's b g Colonel C., I. B. Dalziel's r g John T., W. A. Lang's blk g Doc, I. L. Borden's blk m Roberta.

Class C trotters, three-quarter-mile heats—J. W. Smedler's b m Red Velvet, E. Stock's b g Director B., I. L. Borden's b s Barney Bernatto, I. B. Dalziel's ch g Islamite, F. J. Kilpatrick's b m Washington Belle.

Class A trotters, half-mile heats—H. C. Ahler's b g Telephone, George E. Erlin's b m Emma Smalley, F. J. Kilpatrick's blk m Princess W.

Class A pacers, three-quarter-mile heats—H. M. Ladd's b g Ring Rose, T. F. Bannon's br g Jim Chase, F. J. Kilpatrick's ch g Don Diablo, F. E. Booth's b g Satinwood.

Class B trotters, three-quarter-mile heats—George Gay's br g Laddie G., A. P. Clayburgh's ch g Chas. II., F. J. Kilpatrick's b g Allan Pollak, G. E. Erlin's ch g Topsy, M. W. Herzog's blk m Lady Nell.

Appended to the summary of the 2:20 class pace at the Tulare meeting, printed in this paper last week, it was stated that Advertisor finished first in the first heat but was set back for fouling Mabel C. In a letter received from Mr. A. J. Gillett, the driver of Advertisor, it is stated that when he took the pole with his horse, Albert E. was second and if Advertisor fouled any one it must have been Albert E. All the reports of the race we have seen stated that Advertisor finished in front and was set back to fourth position. We are very glad to learn from Mr. Gillett that no foul was committed, and as he does not dispute the assertion that his horse was set back, we suppose it was for a violation of rule 29, section 9 of the National Trotting Rules.

Ruth Dillon (3) 2:15 $\frac{3}{4}$, the world's champion half-mile track trotter, worked two splendid miles at the Indiana State Fair grounds recently. After getting her warmed up, Millard Sanders drove her a mile, accompanied by a runner as prompter, in 2:10 $\frac{3}{4}$. A half hour later Sanders again drove the filly a mile, this time without a prompter, in 2:11. There was a strong wind blowing at the time, so that horsemen considered that both miles were better than 2:10. The second mile was surprisingly fast, for the filly had much rather race than go a mile alone.

Berendos Park race track at Red Bluff is in first-class condition at the present time and will be kept so all winter. The stalls and sheds are to be put in fine shape, and there is no better winter training track in the country. Stalls rent for \$1 a month with track and water free. F. N. Frary is manager.

Mr. F. J. Kilpatrick of this city now owns a yearling by Kinney Lou 2:07 $\frac{3}{4}$, out of the dam of Lady Mowry 2:09 $\frac{3}{4}$. This yearling was bred by Mr. J. C. Mowry of Newark, and is a fine looker, although well marked with white, having a stripe in face, "three white stockings and a white sock."

James Butler has consigned all the East View Farm horses to the Old Glory sale. It will be a complete dispersal.

A youngster that is attracting a great deal of attention at Los Angeles at the present time, is the weanling full sister to Sonoma Girl 2:05 $\frac{3}{4}$, which Mr. G. A. Pounder of Los Angeles purchased from Sampson Wright of Santa Rosa last spring. Mr. Pounder has given this filly the name of Lotta Lynwood, and she will be educated to trot miles as fast as her famous sister if possible. She is a sorrel with both hind feet white.

A CHAPTER OF ACCIDENTS.

A sad accident occurred in the 2:12 trot won by the California trotter, Wild Bell, at Columbus. The account of the race in the American Sportsman is as follows:

A lightning fast track and record breaking attendance marked the racing September 20th. At least 20,000 people packed the grandstand and lawn. The racing was marred by a bad looking wreck in the 2:12 trot, second heat, and in the third, one of the most distressing accidents seen in years occurred to the trotting mare Thelma, by Great Heart, resulting in her death.

Sixteen trotters scored for the word in this event and never has a field of horses turned around that were so equally matched in speed. All seemed to be able to trot better than 2:10, and as a result the big field was bunched from wire to wire in each heat. In the betting Quintell was liked best, bringing \$50, Wild Bell \$25, Mae Hart \$22, Thelma \$20, Katherine L. \$15, Peter Balta \$10 and the field \$25. Quintell was never a serious contender and Wild Bell trotted a good race, justifying the predictions made for him last spring. The second round brought the "wreck," which all drivers afterward said was one of the worst they ever saw, for so little injury. The whole field bunched close to the three-quarters and rounding into the stretch the spill occurred. The track was covered with dust, for some reason the management failed to sprinkle the track, and the great cloud of dust raised by the front tier of horses made it impossible for the other drivers to see. Chime Bells evidently ran her leg into Quintell's wheel and in an instant four horses and drivers were down. Chime Bells kicked herself free from the wreck and ran away, dashing between Thelma and Wild Bell at the wire. She was caught, however, without damage.

Quintell, Chime Bells, Mae Heart and Zaza were the trotters that went down. McHenry was probably the worst hurt and was picked up unconscious and rushed to a hospital, where it was found that aside from painful bruises, his hands were the worst injured. Mr. Payne also received a very severe shaking up, as did Henry Titer. Thelma won the heat and stepped into the 2:10 list, only to meet with a fatal injury the very next heat.

Wild Bell, Thelma, Bellemont and Mae Heart were the contenders the next heat, and it was right at the finish where the accident occurred. About sixty yards from the wire Warner, who was trailing Wild Bell, attempted to go between Wild Bell, who was at the pole and in the lead, and the fence. There was no room, however, and when Thelma made the attempt the crowd was horrified to see that the mare had broken her left hind leg, square off just below the hock. Evidently in the very narrow space she had thrown out her leg, caught in it the fence and going at a high rate of speed, in withdrawing it instantly, had broken it. She was removed to the rear of the timers' stand and shot. The distressing sight cast a gloom over the big crowd.

With Thelma out of the race, Will Bell easily won the deciding heat in slow time.

The Arabs in Morocco, though fond of horses, treat them foolishly and roughly, according to the English traveler Mr. Cunningham Graham. At times they cram them with unnecessary food and at times neglect them. They almost always let their feet grow too long, and they spoil their legs by too tight hobbling. If their horse tires upon a journey they ride him until he drops. This is not so among the wilder desert tribes; the wild Arab loves his horse, but he has need of him to live. Inside Morocco horses are used for either war or luxury, or because the man who rides them can not afford a mule. The pacing mule throughout North Africa is as much valued as he was in Europe in the Middle Ages. In districts like the Atlas, mules are more serviceable than any horse, and on mountain roads will do almost a third longer journey in a day, though the horse beats them on the plain. Mr. Graham says: "None of the horses I saw would be of any value in the European market, except to an artist, but for the country where they were bred they were most serviceable, hardy, and indefatigable, sober beyond belief, eating their corn but once a day, drinking but once, and up to any weight. And if not quite so fast as might be wished, still a glory to the eye."

Highland C. 2:29 $\frac{3}{4}$ will not go to Los Angeles with the other horses owned by Mr. W. A. Clark, Jr. Last week Mr. Henry Struve went to Pleasanton and secured a lease on Highland C. and has taken him to Watsonville for the season of 1908. Highland C. is one of the best bred and most promising young sires in California, and the breeders of the Pajaro valley and surrounding country are fortunate to have such a horse in their reach. He is a strong going trotter and showed miles in 2:12 $\frac{1}{2}$. He is of the favorite Electioneer-Wilkes strain of blood, his sire being a half-brother to the great Expressive 2:12 $\frac{1}{2}$, and his dam a producing mare by the great Alcantara, while his second dam is the famous brood mare Jessie Pepper by Mambrino Chief.

CHASE'S COMBINATION SALE.

While no large prices were paid for any of the horses sold by Fred. H. Chase & Co., at the big pavilion on Valencia street, last Monday evening, the average was very fair. Outside of Monterey 2:09 1/4 and his son Yosemite owned by P. J. Williams of San Lorenzo, no really high-class horses were offered, and while the bidding on these two did not come up to the owners' expectations and the horses were not sold, the others with two or three exceptions brought a fair figure. Ed. Parker should have received more for the three-year-old colt, Teddy Rey, and there were a few others that seemed to be sacrificed. Sellers should realize, however, that buyers these days are of the Missouri type demanding to be shown, and no talk about what horses might, could, would or should do on their breeding will coax big money from their pockets. Matured horses attracted lively bidding at this sale, but there was not a big demand for two-year-olds, although several sold at good prices. The sales were as follows:

- Lorenzo Girl, ch f (1904), by Monterey 2:09 1/4, dam Leap Year 2:26 1/4, to Al Schwartz, San Francisco \$260
Monterey Belle, blk m (1900), by Monterey 2:09 1/4, dam Leap Year 2:26 1/4, to G. Lilien-crantz, Oakland 210
Victoria, b f (1903), by Barney Bernatto, dam by Antrim, to J. Ryan, Sonoma 60
Thoroughbred mare (1904), by Insulator, dam Gussie by Hyder Ali, to W. B. Snyder, Fresno 65
Thoroughbred gelding (1905), by Insulator, dam Gussie by Hyder Ali, to H. Dantz, City 60
Yosemite, ch s (1902), by Monterey 2:09 1/4, dam Leap Year 2:26 1/4, \$860 bid, but not sold....
Monterey 2:09 1/4, ch s (1892), by Sidney, dam Hattie, \$700 bid, but not sold.....
Dexter B., b g (1903), by Chas. Derby, dam May by Anteo, to W. T. Jeffrey, City..... 195
Schley B., br g (1902), by Lynnwood W., dam by St. Patrick, to Stone Bros., City..... 220
Black gelding (1905), by Lecco 2:09 3/4, dam by Sidney, to Joe Guinasso, City..... 115
Black filly (1905), by Directwell, dam by Dexter Prince, to F. L. Huff, Mountain View..... 185
Bay filly (1905), by Bert Logan 2:26 1/4, dam by Silver Bow, to W. D. Ross, Sonoma..... 80
Chestnut filly (1905), by Lecco 2:09 3/4, dam by James Madison, to W. B. Snyder, Fresno..... 180
Bay filly (1905), by Stam B. 2:11 1/4, dam Eva T. 2:18 3/4, to E. A. Bridgeford, City..... 95
Gray filly (1905), by Directwell, dam Sidlette 2:22 1/2, to Joe Guinasso, City..... 235
Little Rey, blk s (1904), by Rey Direct, dam Missie Medium by Rampart, to Joe Cuicello, Pleasanton 350
Hazel T., b m (1904), by Lightfoot, dam Hazel Wilkes 2:12 1/4, to I. Tucho, City 135
Hester Pryne, b m (1904), by Nutwood Wilkes, dam She 2:12 1/2, to C. M. Turner, Suisun..... 140
Pair docked horses, 16 hands, to W. Michelson, City 300
Fannie, b m by Boswell Jr., dam by Guy Wilkes, to S. B. Wright, Santa Rosa 135
Brown colt (1905), by Scott McKinney, dam by Royal Sid, to I. V. Button, City..... 210
Bay filly (1905), by Mendocino, dam Electress Wilkes 2:28 1/2, to F. J. Oliver, Everett, Wash... 180
Ollie Mac, b m (1902), by McKinney, dam Electress Wilkes 2:28 1/2, to H. S. Hogoboom, Wood-land 465
Chestnut gelding (1906), by Kinney Lou 2:07 3/4, dam Electress Wilkes 2:28 1/2, to F. J. Kilpatrick, City 190
Bay filly (1905), by Washington McKinney, dam by Gus Payne, to F. Blenss, City 70
Brown gelding (1905), by Washington McKinney, dam by Engineer, to Mr. Ladd..... 80
Bay gelding (1904), by Sidney Dillon, dam by Silas Skinner, to E. B. Ward, City..... 155
Sorrel mare (1903), by Lynnwood W., dam's pedi-gree not given, to Geo. Lorrimer, City..... 160
Sorrel mare (1903), by Washington McKinney, to W. E. Morris, City 205
Mark, h g, breeding unknown, to J. L. Blaney, City 190
May Day, blk m (1904), by Washington Mc-Kinney, dam by Secretary, to J. L. Smith.... 420
Alice, blk m (1903), by Washington McKinney, dam by Dana 300
May, blk m by Washington McKinney, dam by Dana 300
Black gelding (1905), by Washington McKinney, dam by Dana, to M. Dorr..... 100
Alta M., s f (1905), by Washington McKinney, dam by Ansel, to L. M. Ladd 85
Lena D., h f (1905), by Washington McKinney, dam by Daly, to J. Ryan, Sonoma..... 85
Billy Barlow, s g by Washington McKinney, dam by Daly, to Mrs. G. E. Smita, Sepastopol.... 80
Billy Haberly, br g (1905), by St. Whips, dam by Daly, to Sam Norris 75
Buster Brown, b g (1905), by Washington McKinney, dam by St. Whips, to W. B. Snyder.... 100
Jack Smith, br g (1905), by Washington McKinney, dam by St. Whips, to E. B. Ward..... 100
Button Boy, b s (1906), by Washington McKinney, dam by Daly, to A. Schofield 195
Chestnut mare (1902), by Nutwood Wilkes, dam by California Nutwood, to Stone Bros..... 310
Bess, b f (1904), by Don Sonoma, dam by Albert Medium, to W. L. Randall..... 110
Billy Dillon, b g (1902), by Sidney Dillon, dam by Belmont Medium, to Mr. Elsworth..... 205

- Bay gelding (1904), by Nutwood, dam by Lyn-wood, to S. Magner 100
Bay gelding (1899), by James Madison, dam by Steinway, to A. W. Keck 250

THE BRACE SALE.

The next big sale of trotting bred horses will be the dispersal of the Brace Farm at New Park, Santa Clara, on November 2d. Horsemen who want something real good, either to race or drive on the road or to use for breeding, should make it a point to attend this sale. It is to be held at Mr. Brace's beautiful country seat at Sauta Clara, and the horses will all be shown at speed to harness or halter during the forenoon. Then a fine lunch will be served to all who are present, and the sale will begin promptly at 1 o'clock.

The horses to be sold comprise everything on the place, including the fast young trotting stallion Greco B. 44845, who was sired by McKinney, out of a half-sister to Lou Dillon. There are twenty-two of the get of Greco B. to be sold, the oldest of which are three-year-olds. They are all out of mares that were carefully selected by Mr. Brace to breed to this young horse, and the youngsters will show for themselves that they have size, good looks and speed. All the young Greco's are trotters, but if pacing blood is wanted buyers will find several youngsters bred in lines that should suit. There is a weanling filly by the old champion, Star Pointer 1:59 1/4, out of Belle W., the dam of Bolivar 2:00 3/4. Then there is a two-year-old colt out of Belle W. and sired by Mission, a son of Wayland W. 2:12 1/2, sire of Bolivar. A weanling by Star Pointer, out of the fast mare Banker's Daughter 2:13 3/4, by Arthur Wilkes, should be good enough to train to beat her sire's record, while there is still another weanling by Star Pointer, out of a McKinney mare. Several of these youngsters are already entered in big stakes.

There are several well bred broodmares to be sold. There is one, Sadie Moor by Grand Moor, that we confidently believe will show more trotting speed on the day of the sale than any broodmare of her age in America can show, and she is pretty heavily in foal to Greco B.

There is a black three-year-old colt out of this mare that is by Guy McKinney 37625, and has been registered as Sadi Moor 39989. Here is a photograph of this fellow, and look at his breeding. His sire is

SADI MOOR.

by McKinney 2:11 1/4, the greatest sire that ever lived, out of Flossie D. by Guy Wilkes, second dam Blanchard, the dam of China Maid 2:05 1/4, by Onward 2:25 1/2, third dam by Mambrino Patchen, fourth by Privateer 258, fifth by Abdallah 15, etc. The dam of Sadi Moor 39989, is Sadie Moor 2:22 1/2, record made this year when she was seventeen years old. The next dam is Carmine, dam of three in the list, by Poscora Hayward 2898, the next Jennie by Algerine, a son of Whipple's Hambletonian, the next by Alhrack, thoroughbred, and the next by Velox, thoroughbred. This three-year-old is admired by everybody that sees him, and as he is a nice gaited trotter, buyers can judge for themselves as to the speed he should show. He stands 15.2 1/2 now and will make a magnificent horse.

We have not the space this week to enumerate all the many good ones to be offered at this sale, but will refer to others in future issues. We suggest that you write to Fred H. Chase & Co., 478 Valencia street, for a catalogue if you have not received one already and carefully read it to see the splendidly bred young horses that are to be offered at this sale. When you go to the sale buy your ticket to Santa Clara; walk two blocks west from the station to Franklin street, then take street car to end of line, which is only a short distance. People at San Jose can take a street car that will deliver them at the same point, which is only a block from the entrance to Mr. Brace's place.

Four new standard performers went into the list at the Rocklin fair last month. Briarwood, winner of the race for Placer county horses, took a pacing record of 2:24 1/4. He is by Diawood 2:11. In the same race Monte Bell by Falrose won a heat in 2:23 1/4. He is a pacer also. In the free-for-all trot Aristocrat by Stam B. 2:11 1/4 won two heats, each in 2:30, and then Ben M., by Knight, dam by Albert W., took three heats, the fastest of which was 2:25 3/4.

GREAT TROTTING AT LEXINGTON.

Lexington, Ky., October 9.—Kentucky Todd, holder of the race record for three-year-old trotters, winner of stakes at Indianapolis and Columbus, where he showed more speed than any other trotter of his age, was beaten to a standstill in the Futurity to-day and in the final heat had the distance flag dropped in his face.

He was an even money favorite over the other six starters and his defeat was all the more tragic from the fact that it was witnessed with dismay by his owner, Miss K. L. Wilkes, the rich Canadian spinster whose stable of trotters has cut such an important figure for the last two seasons. She had come on to see her favorite race for the first time this year, and to have him distanced and not make the slightest showing in the race was more than she could stand with equanimity.

The winner was General Watts, that has raced with consistency all the campaign, this making his third victory in five starts, and Kentucky Todd is the only colt that has beaten him. Today, however, the Todd colt seemed to lack his usual speed, even for a brush, while Watts went with a resolution and snap that gave the other starters no chance at all.

He drew the pole and practically had first position safe all the time, never being brought to a hard drive in any of the miles. He went off with the track when the word was given, the others clustered around him, with Todd in third place. The latter had clear going all the way, but never was able to reach Watts, which stepped the first quarter in :32½ and the half in 1:05½, closely attended by Bisa.

On the upper turn Stinson made his drive and for a few rods Todd responded, then he made a tired sort of break and never again was prominent. Bisa chased Watts home in 2:12¼, over a track at least two seconds slow from rain, and that in addition was trying on the horses. Blue Bill was an indifferent third, the rest strung out.

In the second heat Watts broke soon after the start and Blue Hill sprinted off at a terrific pace, leading by lengths to the quarter in :31½ and to the half in 1:04½. By this time Watts again was on the trot and the way he closed the gaps was a caution. Todd was second for five-eighths, with Bisa third, but on the upper turn Watts came up and in the home stretch trotted right past the others and won easily in 2:11½. Bisa beat Blue Hill and Todd handily.

In the third heat Bowerman, driver of Watts, took no chances. His colt was stepping good all the way and never was headed. He was at the quarter in :33 and the half in 1:06¼. Then he put on more steam and stepped the third quarter in :32¼.

Turning into the homestretch he had the others beaten three lengths and inside the distance Bowerman eased him and looked back at the others. But the brakes were put on too late to save Blue Hill and Kentucky Todd, which finished just back of the flag in 2:11. Then the usual ceremony of photographing the winner's driver seated amid the floral emblems, was carried out and the crowd cheered the performance.

Bisa was second in all the heats and beat all but Watts with ease, showing herself a better trotter than she had been given credit for. She is by Bingara, a son of Bingen, and out of a mare by Kremlin, which was champion trotting stallion during his day. Kentucky Todd, Blue Hill, and Acquin all carry the Bingen blood, one by the old horse and the others by his sons.

The futurity, so far as the crowd was concerned, was completely overshadowed in interest by the Tennessee stake for 2:06 pacers, which was finally pulled off by the Chicago driver, Dick McMahon, after a seven heat tattle of the fiercest sort. His horse, Hedgewood Boy, was an even money favorite, but in the first two heats was unable to find himself, another Chicago pacer, R. F. D., winning them in 2:06¼, 2:07, after a race all the way with Kruger.

In the third heat Benyon was put up by the judges, who thought he could outdrive McMahon, but the pacer finished third and Benyon resigned. Then McMahon landed Hedgewood Boy second to Leland Onward in :07, that horse having won the third heat in 2:06½ from Kruger, which wore down R. F. D. only to have the hobble get the benefit. In the fifth heat Hedgewood Boy beat Leland Onward in the last stride in 2:09, and the sixth and seventh heats were all between those two, R. F. D. being done for.

By the best of reinmanship McMahon won and the Chicago delegation cheered him heartily. Then he attempted to win another pacing race with Lady Maud C., full sister to Hedgewood Boy. He landed the first two heats in 2:08¼ and 2:10¼ with ease, but in the third mile the mare broke when half way down the homestretch and indirectly caused a collision between Bystander and Tommy H. Both fell, but neither horses nor men were hurt. Thomas brought up Bonanza when Lady Maud C. broke and was first home in 2:10.

It was then so dark the finish was postponed until tomorrow. As the accident to Tommy H. and Bystander was unavoidable they were placed.

Time—2:12½, 2:11¼, 2:11.

Lexington, Ky., October 10.—Trampfast, a two-year-old roan colt by The Tramp, is the new champion two-year-old trotter. He won the two-year-old Kentucky futurity here to-day, the first heat in 2:12½, the fastest mile ever trotted in a race by a two-year-old, but it required a great struggle to win. An eyelash in the first heat and a short head in the second heat gained the victory. Dorothy Axworthy, so lame she could hardly hobble, was the heroine of the race, for she forced Trampfast to break the world's record to beat her. Thistle-doune forced the winner to a nose finish in the second heat.

The Leading Lady, favorite, broke badly in both heats. The previous record for the two-year-old futurity was 2:14, made by Katherine A. in 1902.

Dorothy Axworthy led from the start until within a yard of the wire in the first heat, but at all times Trampfast. The Laird and Henry Setzer hung at her sulky wheel, and it was any horse's race until Trampfast was announced as winner. In the second heat, Dorothy Axworthy was saved, as it was not was contender, but the colt skillfully driven by Tommy Murphy, outstayed the son of May McGregor and won in a nerve racking finish by a nose.

Lexington, Ky., October 11.—Sonoma Girl not only won the Transylvania stake to-day, thereby advanc-

ing her claim to trotting championship honors for the year, but she also equaled her own season's record in the third heat. She went the mile in 2:05¼.

At no time was the Crabtree mare in danger. At the start her quickness in breaking enabled her to get to the front from the outset, and she held the lead throughout. When an opponent challenged her her driver simply let out a link and she shook the antagonist off with ease.

At one stage only did it seem that another contender had a chance. This was in the final heat, just as the field whirled into the home stretch with Sonoma Girl well in front, and a tight bunch behind her. Out of the midst of swaying sulkies and through the dust cloud which shrouded the contenders the colors of the veteran, Ed Geers, driving Jack Leyburn, could be seen forging to the front. In a few strides he worked his way almost up to the leader, and then had to drop back through the field bearing in upon him. He dropped into a pocket and could never get out.

Margaret O., second choice in the betting, was distanced in the second heat, so there was little conjecture, after that time, as to the winner. Sonoma Girl behaved well at the start and showed no signs of her usual unruliness when scoring. Wilkes Heart finished second and Jack Leyburn third.

Next to the big stake in interest was the pacing division of the Kentucky Futurity. This race resulted alike in every heat, Shakespeare winning, with Kavallo trailing him home and Baron Operator finishing third. Patrick Henry, the remaining contender, never had a chance and was distanced in the opening heat.

The best time in this division was 2:13, not as good as that made in the trotting section by Tramp Fast the previous day, in the two-year-old section of the race.

The Transylvania Stake was worth \$5,000, and interest attached to the performances of the eight horses which figured drew an immense crowd to the old course. The summaries:

Pacing, three-year-olds, Kentucky Futurity, \$3,000.
Shakespeare, br g by Jay McGregor (Bowerman) 1 1 1
Kavallo, hr c (Young) 2 2 2
Baron Operator, ch c (Benyon) 3 3 3
Patrick Henry, b c (Kenney) dis
Time—2:13¼, 2:13, 2:13¼.

Margaret O., b m (Davis) 3 7 dis
Time—2:07¼, 2:07¼, 2:05¼.

Lexington, Ky., October 12.—The Johnson Stake for trotters of the 2:24 class, the feature of the fourth day of the Kentucky Trotting Horse Breeders' meeting, was won in three straight heats by the chestnut gelding Tempus Fugit, owned by Frank G. Jones of Memphis and driven by the veteran, Geers. Tempus Fugit was at all times an odds-on favorite and was never headed in any heat, winning each with consummate ease. The battle was between Alice Edgar and Tokio for second money. The weather was cold and clear, with the clouds hanging heavy and low. About 2:30 o'clock they broke and for five minutes bail and rain fell heavily, but the track was not injured to any apparent extent. The remainder of the afternoon the sky was clear.

The racing on the whole was tame. The only really exciting heat was the 2:12 trot, in which Chime Bells, Zaza and Rich Baron finished heads apart. Belmont was the original choice for this race at \$60 to \$100 for the field, but after the second heat it was clear that Chime Bells was best and there was a rush to hedge on the daughter of Cbimes by the bookies on Belmont.

In the last heat Rich Baron made a strong bid, but was not good enough. The 2:20 trot, in which four heats were decided yesterday, was taken after two easy heats this afternoon by the Michigan mare, Icon. There is little question but what this mare could have won in straight heats yesterday, but the public beat her party to the price and the stable money was not placed until after the second heat. The judges took no action in the matter. For the 2:20 pace Leone was much the best, but had Cassie Richmond been handled by a driver who knew her better than Brown she might have made it more interesting. It was Brown's first time up behind the gray mare from Tennessee, and he permitted her to make a bad break in the second heat, after which she paced the third quarter in 0:31 and finished third. The summaries:

Trotting, 2:24 class, The Johnson Stake, \$2,000—
Tempus Fugit, cb g by Mark Time (Geers) .. 1 1 1
Alice Edgar, b m (Beuyn) 2 2 2

Helen Gould, br m (Rise) 7 7 7
Time—2:09¼, 2:10½, 2:10.

NOTES AND NEWS

Enter in the colt stakes.

Make your colt valuable by giving him an earning capacity.

Don't miss attending the Brace Farm dispersal sale at Santa Clara November 2d. Many high-class colts and fillies entered in rich stakes will go under the hammer.

The Old Glory sale this year will be one of the greatest ever held, and will be the big event of the year. The consignments are sensational.

Highball 2:06 $\frac{1}{4}$ goes to the auction block with all the rest of the Jones horses.

Mr. S. B. Wright of Santa Rosa advertises a good jack for sale. Write him about price and further particulars.

The racing is about all over and the horses will soon be given a much needed rest. The last big meeting of the year, that of the Kentucky Trotting Horse Breeders' Association, closes to-day.

C. L. Rice of Santa Maria, Cal., sent to W. J. Kenney, 531 Valencia street, this week for one of those McMurray sulkies, No. 30. Kenney is selling a great many carts and sulkies this year and says the McMurray is growing in popularity all the time.

Fred H. Chase & Co. will hold a combination sale of trotting and pacing horses on Monday evening, December 23d.

Los Angeles track will have a large number of horses stabled there for training next spring. It is one of the finest winter training tracks in America.

The little black pacer owned by L. Maybury of Los Angeles and trained by Walter Mahen is reported to have worked a mile in 2:02 a week or so ago.

The San Francisco Driving Club has obtained permission to use the track in Golden Gate Park for races on Sunday afternoon. The Park Amateur Driving Club will use the track to-day.

Every stallion owner who knows of any new standard performers this year by his horse is requested to send a complete list to this office. The breeding of the dam should be given if known.

Sherlock Holmes 2:06 $\frac{1}{4}$, Bystander 2:07 $\frac{3}{4}$ and Delilah 2:08 $\frac{1}{2}$ are a good trio to appear in the reduced record list or Zolock 2:05 $\frac{1}{4}$ this year.

The California Breeders' Association deserves a big entry list for its Futurity to close November 1st. The association is reliable and responsible in every way.

The Pacific District Board of Appeals will have several cases to decide at its next meeting.

Citation 2:03 $\frac{1}{4}$ is the best pacer of 1907. She has won eleven races without meeting a single defeat.

Every stallion owner should take notice of the new feature of the Breeders' Futurity, which provides prizes for the stallions getting the greatest representation in the list of entries.

It is stated that this will be Sweet Marie's last year on the turf. She is sound and all right and capable of many more fast miles.

E. A. Swabey, of Dixon, Cal., advertises two horses for sale. One is a dark bay gelding, six years old, sired by Falrose, dam by Nevada. This horse is sound, gentle and a good roadster. The other is a yearling by Nushagak out of a mare by Antevolo. See advertisement.

At the Lewiston, Idaho, meeting last week Copa de Oro won the third and final heat of the 2:13 pace in 2:09 $\frac{1}{2}$, breaking the track record. The track is not a good one by any means and Copa de Oro's mile was considered as good as 2:05 over a good track.

Sherlock Holmes 2:06 $\frac{1}{4}$ paced a mile against time over the Lewiston, Idaho, track last week and made it in 2:07 $\frac{1}{4}$ which is considered a great performance as the track is notoriously slow.

Two days' racing will be given at Porterville, Tulare county, Friday and Saturday, November 8th and 9th. A purse of \$200 for trotters and pacers of the 2:20 class will be given on the first day, and a free-for-all trot and pace for a purse of \$200 on the second day.

Sweet Marie defeated Major Delmar in the match race over the Allentown, Pa., half-mile track last Wednesday. The California mare won easily in straight heats in 2:10 and 2:08, the fastest race ever trotted on a half-mile track.

The new 2:10 pacer Point Burglar 2:09 $\frac{1}{2}$ is a grandson of Star Pointer 1:59 $\frac{1}{4}$.

Sterling McKinney 2:09 $\frac{1}{4}$ has won over \$6000 this season. He sold for \$800 a year or so ago.

The Sonoma Driving Club contemplates giving two days' racing at the Santa Rosa track November 8th and 9th.

Dr. Frasse won a race at the matinee of the Denver Driving Club, September 28th. His best mile was in 2:19 $\frac{1}{2}$. The track is a half-mile oval.

George G. 2:05 $\frac{1}{4}$ now holds the world's trotting record for a half-mile track. He trotted the Allentown, Pa., track in 2:06 $\frac{3}{4}$ on Wednesday last. The Fresno bred gelding is undoubtedly the fastest trotter out this year, and there is little doubt but he can turn a mile track in 2:03 or better.

Budd Doble returned from his trip to Indiana last week. C. C. Crippen will bring Kinney Lou 2:07 $\frac{3}{4}$ and the rest of the string home by way of Phoenix, Arizona, stopping off at the Territorial Fair and race meeting.

H. K. Devereux rode the pacing stallion Kruger to a world's record at Lexington last Wednesday, making the mile in 2:12. The pacing record under saddle was formerly held by Johnston, whose record of 2:13 $\frac{1}{4}$ was made in 1888. The trotting record under saddle is 2:14 $\frac{1}{4}$ and is held by Charley Mac, son of McKinney.

Kentucky Todd was certainly not himself in the Kentucky futurity. He has trotted many better races than the one in which he was defeated. While the track was heavy and slow, the time should not have stopped him, and he was undoubtedly off and decidedly so on the day of the race.

Twenty-two new 2:10 trotters have appeared this season, four of them bred in California—Sonoma Girl 2:05 $\frac{1}{4}$, Wild Bell 2:08 $\frac{1}{4}$, Sterling McKinney 2:09 $\frac{1}{4}$, and Athasham 2:09 $\frac{1}{4}$. Sonoma Girl is the heaviest money winner of the year and the other three stand up pretty well to the front among those that earned more than their board and clothes on the Grand Circuit.

BELLE W. AND BELLE POINTER.

The above picture is of the mare Belle W., dam of Bolivar 2:00 $\frac{1}{4}$, the fastest pacer ever bred in California, and her weanling filly, Belle Pointer by Star Pointer 1:59 $\frac{1}{4}$. This mare and foal are to be sold on November 2d, at the dispersal sale of the Brace Farm at Santa Clara. Belle Pointer was foaled last spring and is one of the lustiest, healthiest specimens in any country. She should pace a mile in 2:10 as a three-year-old and get a mark close to two minutes as soon as matured. To breed world's record pacers from, where could one find a better mare?

One of the best advertised stallions in Illinois last year was John G. Carlisle 2:20. He didn't have a 2:10 performer to his credit, but his owner put money into printers' ink and the horse had over a hundred mares hooked.

There is plenty of material for the free-for-all class on the California Circuit next year, and if the purses are numerous enough the 2:09 or free-for-all trotting classes should fill. There are Athasham 2:09 $\frac{1}{4}$, Coronado 2:09 $\frac{3}{4}$, Adam G. 2:11 $\frac{1}{4}$, North Star 2:11 $\frac{1}{4}$, Fresno Girl 2:11 $\frac{1}{2}$, Berta Mac 2:13 $\frac{1}{4}$, R. Ambush 2:11 $\frac{1}{4}$, Kenneth C. 2:13 $\frac{1}{4}$, Era 2:11 $\frac{1}{4}$, Carlok in 2:13 $\frac{1}{4}$, Marvin Wilkes 2:12 $\frac{1}{2}$, and several others.

The very promising pacer Morrie N., by a son of Brigadier, owned by Wm. Duncan of Colusa, dropped dead in a race, at the Spokane Fair, October 4th. This horse started in several races on the California Circuit, and showed a high rate of speed. He won fourth money in the race won by Inferlotta 2:04 $\frac{3}{4}$ at Woodland, and was second to Copa de Oro 2:07 $\frac{1}{4}$ in the \$1000 purse for 2:16 class pacers at Sacramento. He is said to have worked several miles below 2:10 and was looked upon as a good prospect for next year. He collapsed after the last heat of the race won by Copa de Oro at Spokane, and fell to the ground dead.

Sonoma Girl 2:05 $\frac{1}{4}$ is the largest money winner of the year, with about \$26,000 to her credit—the amount she was sold for by Mr. Springer.

The Kentucky Trotting Horse Breeders' Association is nearing the half-century mark, the organization having been brought into life in 1859.

Frank Jones will send all his horses to the Old Glory sale. He does not expect to race any horses next year, either on the Grand Circuit or at matinees.

At the closing fall matinee of the New York Club, the California bred gelding Don Derby 2:04 $\frac{1}{2}$, own brother to Diablo, won the title of King of the Speedway for 1907 by defeating Coast Marie.

Morris J. Jones, former owner of Alix 2:03 $\frac{3}{4}$, Pacolus 2:12 $\frac{3}{4}$, and many others, one of the best known men identified with the trotters years ago, died at Denver recently.

H. S. Hogoboom purchased the mare Ollie Mac, own sister to Lady Mowry 2:09 $\frac{1}{4}$, at the Chase combination sale this week, and may campaign her next year.

Sonoma Girl was given a workout mile in 2:04 $\frac{1}{2}$ before leaving Columbus for Lexington.

It is reported that Mr. E. H. Train of Soquel has been offered \$5,000 dollars for his champion two-year-old pacing stallion Ray o'Light 2:13 $\frac{1}{2}$ by Searchlight 2:03 $\frac{1}{4}$, and has declined the offer.

It looks as though the Salinas mare Berta Mac 2:13 $\frac{1}{4}$ will win more than \$5,000 this year. She is already over the \$4,000 mark, and has a few races to start in before returning home.

Delmarch 2:11 $\frac{1}{2}$, whose list of standard performers numbered sixty-three up to the close of last season, has three new 2:10 performers to his credit this year, giving him five in that list.

All the matinee drivers were at Chase's combination sale last Monday night, and many were bidders on the trotters and pacers that were old enough to race.

E. A. Bridgeford of this city bought a two-year-old filly by Stam B. 2:11 $\frac{1}{4}$ at Chase's sale the other evening. He will make a high-class saddle mare of her, as he knows how, and she is a nice one.

The Chicago Horseman says: Just how good George G. is will be a matter of doubt until he is forced to do his best in good company. Those in a position to know his quality regard him as second only to Sweet Marie.

A new five-mile pacing record has been made. The bay gelding Professor, formerly known as Roy B. 2:09 $\frac{1}{4}$, paced the distance in England, September 23d, in 12:25 $\frac{3}{5}$, beating the famous long distance trotting mare Grace Greenlander, who was separately timed in 12:30. Both horses were bred in America.

There will be two days' racing at Berendos Park track, Red Bluff, on November 27th and 28th. The feature of this meeting will be a sweepstake stallion race for stallions owned in Tehama county. The entrance is \$100 for each stallion, winner to take all.

Joe Cuicello, the well known instructor at the Pleasanton speed school, is getting a half-dozen prospects ready for Chase's next combination sale, to be held December 23d. Joe will have some that can win races in the Park or on the circuit.

The next combination sale of trotting and pacing horses will be held at Chase's pavilion on Monday evening, December 23d. Here is a chance to buy a Christmas present for your wife, son or daughter or yourself. The sale will be limited to fifty horses, and more than half that number have already been consigned.

P. J. Williams did not sell Monterey 2:09 $\frac{1}{4}$ and that horse's five-year-old son, Yosemite at the sale Monday night because he considered them worth more money than the highest bids on them. He will probably geld Yosemite and train him some this winter, and believes he can step in 2:10 by June next.

ABSORBINE AND ABSORBINE JR.

J. J. Vanderree, Grand Rapids, Mich., under date of March 23, 1907, writes: "I have used your medicine, Absorbine and Absorbine Jr., on man and beast, i.e. Bog Spavin and Thoroughpin on a two-year-old colt. It worked all right. Used it on myself on a large vein nearly on the top of my head, which had been growing there for nearly thirty years and which was getting to be quite a sight. Had I used a little more I think it would have reduced the same entirely. As it was I stopped applying it, with the result that it is yet slowly growing less. My wife also found great benefit from its use in varicose veins in one of her limbs. I am well pleased with its use as far as I have used it." Absorbine Jr. for mankind is an antiseptic, germicide and discutient, mild and pleasant to use. Cures varicose veins, varicocele, hydrocele, hemorrhoids, wens, goitre and all soft lumps from mankind. One dollar a bottle at your local druggists, or postpaid upon receipt of price. W. F. Young, P. O. Box 54, Monmouth St., Springfield, Mass.

CLEAN RACING.

Frank G. Trott in Boston Globe: The passing of the Grand Circuit for 1907 leaves a memory of a brilliant campaign that has done much for the sport. The racing has been exceptionally clean, and from Detroit down there has not been a single race touched with scandal. Two or three times it has looked from the ground as though certain horses were being raced at least carefully to avoid a record, but in the light of after events it seems that the persons fooled were the trainers. Not once has a horse well thought of by the public been deliberately pulled.

For a while it looked as though Mallow had not played fair with his pacer Major Mallow, but now everyone believes that the judges in removing him and substituting Thomas did the owner a good turn by showing him that he can not drive at all well. The far famed stewards of the Grand Circuit, the men who from house tops shouted of the great good they were to do the sport, have been conspicuous by their absence. If they had been around they would have learned that their pet scheme of having one starter for the entire circuit is a hurt to the turf. The starting this season has been very poor, and has left no doubt that each track should be left free to select its own choice for this important position. The experiment of Columbus of trying a two weeks' meeting was not a fair test because of the weather, but will hardly be repeated unless through necessity to hold the horses as was the case this year.

Every lover of the sport will be pleased to learn that the word of the association has been given that the objectionable features here are to be cut out next year. Columbus is a first water racing city and it is too bad that the sport has had to be fostered under the protection of a wheel of fortune. Such strong armed games of chance have no place on race tracks and the National and American trotting associations fall far short of their duty in permitting them on the grounds of members.

KNIGHT A BREEDER.

Secretary W. H. Knight of the American Trotting Association has a trotter of his own breeding in the 2:20 list. His nag is the chestnut mare Rotella by Axtell 2:12, dam Rowena Sprague 2:27½; second dam by Goldsmith's Abdallah; third dam by Richards' Bellfounder. The dam of Rotella also is the dam of Antella 2:20½ by Axtell, and Isabel 2:23¾ by Pilot Medium, so that when the combination of blood lines is taken into account as well as the speed produced, the pedigree of the new 2:20 performer is a super excellent one.

Were it possible to have given Rotella an adequate preparation she would be a 2:10 trotter, her brush speed being of the dazzling variety, but with limited training she has shown the ability to step in 2:15. In addition to being a trotter of merit Rotella has shown class as a producer, her two-year-old by Moko, owned by W. P. Ijams of Terre Haute, having a lot of speed.

Mr. Knight has the making of another fast trotter in the young mare Fricka by Bingen 2:06¼. Being a big filly she has not been trained seriously, but could show better than a 2:20 gait as a three-year-old. Her dam is Antella 2:20½, sister to Rotella, and last year Fricka was mated with the Chicago stallion Grattan 2:13, and her weanling at the Grattan Farm is one of the best looking youngsters on the place.

In fact, all the colts there by "the old horse" are good lookers, their sire being one of the handsomest and best preserved stallions at twenty years I ever saw. Until this year Grattan Farm has never handled yearlings for speed, but Trainer Harry Putnam has a couple of that age at the Libertyville track. One of them, a sister to Nickel Grattan 2:12½, is a wonder for size and general make-up. Her breeding is superfine in the female line, as well as the male, as she is from Jessie Dhu 2:17½ by Roderick Dhu; second dam Iona 2:17½ by Alcyone 2:27, the best son of George Wilkes.—Stock Farm.

A CORRECTION.

The summaries of the races at the Tulare meeting, which appeared in this paper last week, were taken from the local papers, the Breeder and Sportsman having no representative at the meeting and no report being received from the Secretary. As often occurs in similar cases, there were some discrepancies in the summaries. In the free-for-all pace, for instance, Lohengrin was given second position in each heat, when the three-year-old mare Josephine by Zoelock, driven by Homer Rutherford, was entitled to that position.

The correct summary of the race as sent us by Mr. Rutherford this week is as follows:

Pacing, free-for-all, \$300—

Jonesa Basler by Robt. Basler (Walker) ..	1	1	1
Josephine by Zoelock (Rutherford)	2	2	2
Explosion by Steinway (Williams)	3	3	4
Lohengrin by Charleston (Ward)	5	4	3
Miss Idaho by Nutwood Wilkes (Leggett) ..	4	5	5

Time—2:12½, 2:13½, 2:15.

Are you thinking of racing on the Grand Circuit next year? If so, get a good one that can beat 2:10 every time you turn him around, and remember that at the two weeks' meeting at Columbus this year the average rate of speed in trotting and pacing races was 2:07¾.

ELMORE COUNTY (IDAHO) FAIR RACES.

At the fair held at Mountain Home, Elmore county, Idaho, four days' racing was given, beginning September 24th, with the following results:

Trotting or Pacing, 3:00 class, purse \$100—

Teddy H. by Little Mote	1	1
Dunckon H. by Billy Red	2	2
Job Lots by Vassar	3	3
Teaton Peak by Washakee	4	4
Helen B. by Allie B.	5	5

Time—2:25, 2:25½.

Trotting or pacing, 3:00 class, purse \$200—

Job Lots, r s by Vassar	2	4	1	1
Teddy H., s g by Little Mote	1	3	3	2
Teaton Peak, b g by Washakee	3	1	2	3
Borado, by Butler's Bashaw	4	2	4	d

Time—2:24, 2:28, 2:27¼, 2:28.

Trotting or pacing, 2:29 class, purse \$200—

Malcaton, s m by Senator W.	1	1
Bert, b g by Dunraven	2	2
Bird, b g by Dunraven	3	3

Time—2:28½, 2:31½.

Trotting or pacing, 2:25 class, purse \$200—

Dunckon H., br g by Billy Red	1	1
Malcaton, s m by Senator W.	2	3
Teddy H., s g by Little Mote	4	2
Burlena, b m by Kentucky Wilkes	3	5
Borado, br s by Butler's Bashaw	5	4

Time—2:30, 2:27.

Trotting or pacing, free-for-all—

Nim Shy, b g by Dunraven	1	1
Malcaton, s m by Senator W.	3	2
Teddy H., s g by Little Mote	2	4
Teaton Peak, b g by Washakee	5	3
Bert, b g by Dunraven	4	5

Time—1:22, 2:21¾.

Trotting or pacing, 2:28 class, purse \$200—

Teddy H., s g by Little Mote	1	1
Bert, b g by Dunraven	3	2
Dunckon H., b g by Billy Red	2	4
Teaton Peak, b g by Washakee	4	3

Time—2:25½, 2:25¾.

THE KENTUCKY FUTURITY WINNER.

Gen. Watts 2:09¼, whose picture appears on the title page of this issue of the Breeder and Sportsman, has proven himself the leading three-year-old trotter of the year by winning the American Horse Breeders' Futurity, the Horse Review Futurity and the greatest stake of all, the Kentucky Futurity, in which last race he defeated all the best three-year-old trotters of the year. Gen. Watts is by Axworthy, and his dam is Carpet by Prodigal.

General Watts was bred by John H. Shults of New York City, but his dam was sold to Senator J. W. Bailey of Texas, while carrying him. He was foaled in Kentucky upon Senator Bailey's farm and was by him sold to his present owner, Attorney-General C. C. Watts, Charleston, W. Va., for whom the colt was named. He was given a time record of 2:27¼ last year.

General Watts is a bay colt, almost a chestnut. He stands fifteen hands high and is very well made. He is a strong going colt with plenty of action. His front shoes weigh six ounces, while his hind ones are three and one-half. He wears bell quarter and knee boots in front and hind shin and scalpers, with no fancy rigging.

General Watts has been trained and driven in all his races by Mike Bowerman of Lexington, Ky. Mr. Bowerman is known wherever the trotting horse has been heard of. He has been actively identified with the game since its infancy and making champions is no new experience to him.

SALE OF SHORTHORNS.

A big sale of registered shorthorn cattle will be held at the Gibson Farm, Woodland, November 14th, by T. B. Gibson and H. P. Eakle. The catalogue, soon to be issued, will contain the pedigrees of seventy-six head, all of which are to be sold. The famous bull Saturn, one of the best ever brought to the State, is one of the animals to be sold. There will be bulls, cows and heifers, all of the very richest breeding. It is time the farmers and cattle breeders of this Coast should use only registered stock, especially when they can secure them at their own prices. It pays to raise the best and to get the best use the animals that have been declared to be the best. Col. Geo. P. Bellows of Missouri, one of the best posted men in the United States on full-blooded cattle, will be the auctioneer at this sale. Look for the advertisement of the sale in the next issue of this paper.

The first four dams of General Watts (3) 2:09¼ are all producers, and have a total of thirteen standard performers to their credit. All but Carpet 2:28, his dam, are in the "great" list, and he is her first foal.

A horse making a mile in 2:15 is moving at the rate of 39.11 feet per second.

Baron Bowles, the two-year-old by Baron Wilkes Jr., that Henry Helman brought out here from the East, took a trotting record of 2:25 at the North Yakima Fair, September 28th.

FEEDING HORSES FOR MARKET.

Owners who consign horses to the auction ring seldom have them fat enough. With trotting and pacing horses this is especially true, and the desire to send horses to the sales looking ready to race often leads to poor prices. To sell well any breed of horses should be in good flesh. Prof. Kennedy of the Iowa Experiment Station recently described the methods employed by a large horse feeding establishment as follows:

The horses are purchased, their teeth are floated, and they are all put in the barn and fed gradually, as great care must be taken for a few days to avoid colic. It seems most profitable to feed them grain about five times per day, due to the fact that the stomach of a horse being proportionately smaller than the stomach of a cow, he needs his feed in smaller quantities and oftener. The hay is placed in racks so that they may have access to it at all times. They are given all the water they will drink twice a day. The following method is used in feeding the grain: Corn is given at 5 o'clock in the morning; water at 7; the hay racks filled at 9 o'clock, when they are also given oats and bran, the proportion being two-thirds bran and one-third oats. Then at 12 o'clock they are fed corn again; at 3 in the afternoon oats and bran, and the hay racks are refilled; at 4 o'clock they are given a second watering; and at 6 the last feed of corn is given. The proportion for each horse when upon full feed is as follows: Corn, from ten to fourteen ears at each feed; oats and bran, about three quarts per feed, making in all from thirty to forty ears of corn and six quarts of oats and bran per horse per day.

The horses are not given any exercise. It seems impossible to give them all sufficient exercise, thus they are not given any from the time they are put in the barn until a few days before they are to be shipped. As a substitute for exercise, in order to keep the blood in good order, thus preventing stock legs, Glauber salts is used. This is found to be quite satisfactory and will in most cases prevent this trouble. It is mixed with the oats and bran, as in this way the horses eat it quite readily. These salts are fed about twice per week. They can be purchased very cheaply from the druggist when bought in considerable quantities. They are not so strong as the Epsom salts and they have a desirable and cooling effect upon the blood. The same firm also feeds oil meal. They claim that it aids greatly in putting on flesh; also that it gives the skin a soft, mellow touch.

The mangers and feed boxes should be cleaned out twice a day, and the cobs and all other refuse thrown out behind the horses and taken out with the manure. The horses should be given sufficient time to rest their stomachs, and this can be done by giving the first feed at 5 o'clock in the morning and the last between 6 and 7 at night. Horses fed as described above usually make good gains. In some instances horses fed in this manner have made a gain of five and one-half pounds per day for a period of fifty to one hundred days. One horse gained 550 pounds in 100 days. In many instances from one dozen to twenty horses have made an average daily gain of three and one-third pounds per day for a period of ninety days.

A COLT OWNER DINED.

An Eastern turf writer says: There is something about the personality of a trotter that appeals to people in a way characteristic of no other animal. One never hears of the owner and rider of a famous thoroughbred being feted and otherwise made much of by the community in which the owner resides, for the reason that the thoroughbred at best is only a high class gambling tool, having no usefulness whatever, whereas the trotter, his race days over, becomes one of the family of his owner, and may be used for pleasure by all the members of that family.

When the three-year-old colt Gen. Watts made a world's record by trotting in 2:09¼ at Boston there was much elation and tremendous excitement at Charleston, W. Va., where the colt is owned by Gen. C. C. Watts. The people of the town admired the young trotter, and his owner stood well with them. A banquet was arranged for and carried out, Gen. Watts and Mike Bowerman, who trained and drove the colt, being the guests of honor. There was speechmaking, and after Gen. Watts and other local celebrities had perorated there were calls for Bowerman, and the driver responded in a style that put him among the placed ones right off. Then a telegram from President Roosevelt, congratulating the owner of the colt, was read and the Charleston people felt that the three-year-old that beat the record had not put their town on the map in vain.

HOWARD CATTLE COMPANY SALE.

The Howard Cattle Company will hold its second annual sale on the 13th of November, when fifty head of cows and heifers and twenty-five yearling bulls will be offered. Col. Geo. P. Bellows of Missouri will be the auctioneer. The Howard Cattle Company has the reputation of breeding only from the best, and the cattle offered at this sale will be some of the choicest ever offered at a sale in California. See the ad in this issue.

Gambetta Wilkes has sixteen 2:10 performers to his credit, but only two of them are trotters.

CONDUCTED BY J. X. DeWITT

OREGON PHEASANT SHOOTING.

The open season for Mongolian, or as they are more familiarly known, the "Denny" pheasant, is now in full swing in Oregon. Notwithstanding this fact, that these grand game birds have thriven prolifically since they were turned loose on favorable territory in the Willamette Valley, scarcely two decades ago, the warning note of threatened extinction has been sounded by sportsmen observers wise enough to read the signs of the times. The fact that there is a limit, which by the way, has been reduced more than once, the supply, according to reliable northern authority, is in danger of giving out.

Throughout the State the Denny pheasants are falling before the guns of the hunters, not by hundreds, but by thousands and tens of thousands. This annual slaughter, even though it is limited to two months, cannot fail to make serious inroads on the flocks, and in a very short time, it is claimed, the Oregon Legislature shall again be obliged to restrict the killing of these birds entirely. A northern correspondent has presented some very interesting views on the game question. He expressed the belief that their pheasants and grouse are too tame, and recommended importation of some hardier and more cunning members of the grouse family from Norway and Sweden. He mentioned three birds of the pheasant family, weighing respectively seven to ten pounds and three to four pounds, and the third somewhat smaller, and mentions as their merits that they are quite wild, hardy, and increase quite rapidly.

The mere thought of a pheasant weighing ten pounds and wilder than any of the family now known in that country, is sufficient to stir the blood of all true sportsmen, and, with the experience with the Denny pheasants as a criterion, there should not be much difficulty in securing a supply of these wonderful birds from across the Atlantic. But it should not be forgotten that, no matter how hardy or how wild game may be, if it is hunted as relentlessly as practically all American game has been hunted, it is only a question of time when it will be exterminated. What is needed is more stringent laws and stricter enforcement of those already on the statute books. From nearly all parts of the Willamette Valley have come reports of early slaughter of the Denny pheasants by farmer's boys who did not care to wait until the close season ended, and there are also reports of some bags well in excess of the limit allowed by law.

In the fate of our big game we have an excellent illustration of what is awaiting those birds. Most of the present generation can remember when elk and deer were quite plentiful in all parts of the State, while out in Central Oregon antelope were frequently encountered. To-day the elk in that State are practically extinct, so far as known there being but two or three small bands remaining, and these, even in the brief season, which is again permitted for killing, are being hunted so persistently that the date of their final extinction is near at hand. Cows and bulls alike fall before the bullets of the hunters, although the killing of the former is infinitely worse for the perpetuation of the species than the killing of the males, and should be prohibited at all times.

The practice of killing deer for the hides seems to have been discontinued, but there is still a fearful slaughter of these animals. The deer and also the elk suffer not only from the hunters, but also from the cougars, and an increase in the bounty on these game destroyers would undoubtedly have some effect in maintaining the supply of big game. Oregon has become famous all over the world as a sportsman's paradise, but it can hardly retain this reputation unless hunters are less prodigal in their needless waste of wild animal life.

The opening of the season on October 1st is anticipated as follows by a writer in the Portland Oregonian:

Once again the opening of the Chinese pheasant season is at hand. On Tuesday morning at day-break, the stubble fields and swales will be tramped over by hundreds of hunters and dogs, in eager search for the bird of beautiful plumage and a bird that is good to eat as well.

The opening of the Chinese pheasant season this year will fall on an off day for many of the hunters, yet in spite of this hundreds of sportsmen will leave Portland for the various points in the Willamette valley and down along the Columbia River, where reports have it that the birds are plentiful. The exodus of sportsmen will begin as early as Sunday. Those who go far afield for their Chinamen will place their dogs on board a Southern Pacific train in order to reach the shooting place on Monday night. Others who shoot closer home will leave Monday morning, but the majority will not leave until Monday night. For weeks past, sportsmen, not hunters, have been making preparation for their annual sojourn among the upland birds. Dogs have been groomed and drilled for the opening of the season and before the sun of October 1st is done with its day's work hundreds of feathered beauties will be reposing in the sportsmen's gamebag, dogs will be tired and hundreds of dollars will have been burned up in shot and shell.

Portland will send a small sized army into the fields and hills, and every city and hamlet along the Southern Pacific will send its quota. Some have regular places to hunt, while the majority of hunters will hunt where they can, taking chances of being chased off by the farmer whose field is invaded.

It is this kind of a hunter, the kind that will roam over a stubble field, shoot carelessly among the stock, break fences and not infrequently shoot a chicken or turkey, that has brought down upon the city sportsmen the ire of the farmer. This fellow never thinks of first asking permission of a farmer to hunt over his field, nor does he ever take the pains to fix a break in the fence that he has torn down. Once in the field he is little better than a crazy man with a gun, and is just as dangerous.

It is because of this kind of a hunting "hog" that farmers have plastered their pastures and stubble fields with warning notices. All this means but one thing, and this is it will not be more than a year or two before the upland bird shooting will be like duck shooting. One will have to lease from the farmer the right to shoot on his place. In fact, this is the case now. Many of Portland's best sportsmen are doing this now. Every year they shoot on the same place and many of them have it so arranged that they send their dogs to the farmers, so that they will be set when the season opens.

One of the Portland sportsmen who has planned for the opening of the Chinese pheasant season is Billy Lipman. Mr. Lipman will do his upland shooting near Eugene. If the weather is fine, he will load his two dogs on his automobile and make the trip in his machine. Mr. Lipman learned this trick of hunting in an automobile while shooting quail in Southern California and Nevada. He has a couple of new dogs and is anxious to try them out.

Dr. De Witt Connell, Kirk Southerland, T. D. Honeyman will shoot again this year at Harrisburg. They have always enjoyed splendid shooting on the farm they go to.

W. W. Banks, J. H. McKenzie and Percy Knight will make up the party that will shoot on a farm near Brownsville.

Dr. W. A. Wise and Dr. H. A. Sturdevant will shoot with Amos Nelson at the latter's place, near Newberg.

Herman Metzger and Billy Cole are planning for a big shoot. They will take the dogs and shoot on the Metzger farm of 800 acres, near Pleasant Home. Dr. Allan Welsh Smith (who, by the way, owns some grand English Setters.—Ed.) will do his hunting at Independence and with him will be W. H. Younger and Thomas B. Foster.

Tuesday morning daylight will find C. A. McCarger, L. E. Trent, E. R. Wheeler, E. Briggs, shooting once more on the Briggs farm, near Albany. They have been shooting on this farm for several years and it is a decidedly off year for Chinamen when they do not get the limit. Messrs. McCarger, Trent, Wheeler and Briggs have an arrangement with the owners of the farm whereby they have the shooting privilege and not a shot is fired on the vast acres until they arrive for the opening of the season.

What the opening day's results were for Portland sportsmen may be taken as a fair average for other sections, for it is stated that China pheasant hunting is the best this season for many years, and Portland sportsmen are fairly reveling in the delights of the sport. The rain of Monday did not deter the regular "first nighters," and scores of them were on their favorite hunting grounds when October 1st dawned. They were straggling back to town during the week, and many of them had the limit bag for the days they were out.

East of Dixon, in the Yolo tules, a section from which the water has receded lately, many thousands of fish have been left stranded in the small ponds and puddles. Striped bass as large as salmon—fifty pounds in weight—can be seen with their backs standing out of the shallow water. Other fish, carp, perch, black bass, hardmouth and numerous small fry have also been stranded. The stench from the decaying fish is nauseously effective for miles around.

The mountain streams about Redlands are now at their lowest stages, and in some places it is said that campers and fishermen are catching trout with their hands or small nets. The local game officers have begun an investigation and say the men will be arrested, as under the game law passed last year it is unlawful to take fish from streams in any manner save with hook and line.

Another attempt is to be made to stock Sonoma Creek with young trout. The Fish Commission will place 50,000 trout in the stream the latter part of the month. Past efforts have failed, it is declared that it was owing to the fact that the fish were so small and feeble that the carp from the tide water devoured them. It has been suggested that this next attempt be made by placing the young trout fry at the head waters of the creek, and its numerous tributaries, where the carp will not be so likely to reach them.

WILL THE SALMON SURVIVE.

A significant fact about Sacramento River salmon, and the chance for the future existence and thriving of the fish is shown in the statement of W. J. McDowell as given in the Sacramento Bee. The salmon which runs up the Sacramento River is the finny migrant that sportsmen fish for in Monterey Bay, and later off the Bolinas beach and outside the Golden Gate. Monterey Bay salmon trolling has been a royal sport for years, indulged in by hundreds of anglers. Fishing for the quinnat outside the Heads is but a recently developed phase of the sport, a grand recreation that the writer has advocated for a decade past. After the fish have surfeited on small bait outside, the run in the bay also affords much sport in trolling for the salmon with spoon or sardine spinning bait. For a number of years past salmon grilse have been caught by San Francisco wharf fishermen. These fish rarely run over three or four pounds and have generally been lifted out of the water with heavy tackle. It is only within a very recent period that anglers have used tackle such as will apply to the sport, and to which this sport is legitimately entitled. The statement above referred to, while pertaining more to commercial lines, is, nevertheless, of keen interest to the angler:

"According to one of the oldest salmon canners on the river, as much money was made in that business in the early 70's as is made at the present time. W. J. McDowell, of the firm of Taylor & McDowell, which established its cannery on the Sacramento River in 1873, but which has now gone out of business, in speaking of the salmon industry states: Although our process was not as improved in the early 70's as at present, and although our hand-made cans most as much more than the present machine-made tins cost the canner, we made as much profit in those early days as they do in the present day. The reason for this is that the salmon of this river are of such an excellent quality that they are in great demand, and the result is that it pays to handle them as fresh fish. I would venture to give my opinion as an expert that the salmon on this river are the finest in the world.

"McDowell stated further that the fishermen along the river were very hard men to deal with. At one time, he said, a man by the name of John Carroll contracted with all the fishermen between Sacramento and Rio Vista to take all the fish they caught at 25 cents apiece. I came along a little later and offered them 33-1/3 cents—the market price at that time—and they sold the majority of their fish to me and the rest to Carroll, telling him he was getting all they caught. At another time, a man offered a certain fisherman a quarter of a cent more than my contract with the man called for, and when I arrived at 12 P. M. with my steamer to get the fish, he told me he had not been fishing that day. Later I happened to see an immense quantity of fish near his place, and knew they were his. This goes to show one of the difficulties in the way of the canning of salmon.

"McDowell said that Hapgood, Hume & Co., a firm no longer in business, canned the first salmon on this Coast at their cannery across the river. He declared that if the business is pursued on a large scale it is very profitable.

"One cannery on the Columbia River—a small establishment—cleared \$75,000 in one year, he said. The fishermen also make good money. The record catch for twenty-four hours in this district is 400 salmon, at 25 cents apiece, or \$100 worth.

"McDowell said that the fact that all the local canned salmon was shipped to the East and to Europe proved its high quality, but he also stated that, on account of the increased value of fresh Sacramento River salmon, the canning business in that region was on the decline, and expressed it as his opinion that this business would never again reach the standard which it had once maintained."

Fishing is good in Oak Park, Sacramento county, at all seasons of the year. One family in that town has been feeding on trout for the past five years. This particular household pays no attention to the fish laws and never knows when the closed season begins. They use neither hook, line nor net, yet have all the fresh fish they can use all the time. Their well is only forty feet deep and they raise the water with a wooden bucket and windlass.

In sinking they struck a subterranean stream of water that is well stocked with an eyeless fish. They are about a foot long and resemble the rainbow trout. Every bucket that is drawn to the surface contains from three to five and sometimes ten fish. The housewife picks out what she wants for the kitchen and lowers the balance into the well. The fish have become so numerous that the family found difficulty in getting water sufficient for domestic purposes by using the bucket; it always contained more fish than water. In order to obviate this nuisance a pump has been put in with a screen over the suction pipe. The bucket now is used for taking fish only.

Before Senator Willis introduced his Hunters' License law in the last Legislature, the Game and Fish Commission was habitually bankrupt. Now it is one of the wealthiest departments, and lavish plans for game propagation and protection are being made. The revenue from the sale of hunters' license thus far, in the whole State, totals \$88,000, and the hunting season is still on.

Jackson's Napa Soda is the best hot weather drink.

SAN FRANCISCO FLY-CASTING CLUB.

Members of the San Francisco Fly-Casting Club and invited guests were present on Thursday evening, October 10th, at one of the club's regular meetings, which function usually includes a good dinner and a most enjoyable time among a gathering of thorough sportsmen and congenial spirits. This particular evening was no exception to the rule.

After an excellent menu, such as Tait's is famous for, had been disposed of, President Tom C. Kierulff called the attention of the members present to several business matters that were to be disposed of and which were presented seriatim.

Among other things, it was decided to incorporate the club, and the following directors were elected to take proper action to that effect: T. C. Kierulff, Fayette H. Reed, Carlos G. Young, Horace B. Sperry, Walter D. Mansfield, Col. George C. Edwards, James S. Turner, Edward Everett and Dr. W. E. Brooks.

An increase in the initiation fee from \$50 to \$100 and an increase in the annual dues from \$12 to \$24 was advocated, discussed and agreed upon. The raise in dues will take place January 1, 1908.

The club-house on the Truckee River preserve has in one short season, this year, been found inadequate to afford accommodation for the club members who have taken advantage of the grand outing and angling enjoyments to be found on the Truckee preserve.

Although it was deemed that the structure was amply large enough for the purpose it is now found that substantial additions will have to be built for the accommodation of next season's anglers.

The club goes on record, by unanimous vote of the members present, of advocating an annual tax of \$1 per rod, payable by all fishermen who angle for game, or rather statutory protected fish in this State.

Further, it was the sense of the meeting that an increase of license, in the interest of fish protection, from \$2.50 to \$25 per individual he imposed on the net fishermen.

The two foregoing subjects were gone over in extenso in a very interesting manner by Gen. Stone, president of the Board of Fish Commissioners, and Harry T. Payne, president of the California Fish and Game Protective Association.

General Stone in a few remarks told the assembly of sportsmen what the Fish Commission had done this year and what was contemplated for the coming year.

Harry T. Payne made a few remarks concerning the successful working of the game license law and exploited the great benefits to fish and game protection that was in order now that the Fish Commission had at their disposal a fund of at least \$80,000.

Among the other speakers during the evening were: Geo. H. Wentworth, J. O. Harron, John Marsden, Walter D. Mansfield, F. V. Bell, T. C. Kierulff, H. B. Sperry, Jas. S. Turner and others.

The president announced the names of the medal winning anglers at the Stow Lake contests to be the following:

C. R. Kenniff, champion class medal in long distance.

Austin Sperry, first class medal in long distance.
Chas. A. Kierulff, second class medal in long distance.

C. R. Kenniff, champion class medal in accuracy.
Carlos G. Young, first class medal in accuracy.
E. A. Mocker, second class medal in accuracy.
C. R. Kenniff, champion class medal in delicacy.
F. A. Webster, first class medal in delicacy.
Second class medal, no contest.

T. C. Kierulff, champion medal in lure casting.
T. C. Kierulff, medal for general improvement during the season. This is the second season that Mr. Kierulff's scores have shown greatest individual improvement.

The Executive Committee will appoint delegates to represent the club at the meeting of the California Fish and Game Protective Association at Los Angeles in November.

Among those present were: E. T. Allen, Dr. W. E. Brooks, F. V. Bell, A. B. Carman, H. G. W. Dinkelspiel, F. M. Haight, J. O. Harron, J. H. Hopps, R. Isenbruck, T. C. Kierulff, Chas. A. Kierulff, C. R. Kenniff, Geo. T. Klink, C. T. Lagercrantz, E. A. Mocker, John Marsden, H. H. McNaughten, Chas. E. Miller, Jos. Peltier, Dr. F. L. Platt, F. H. Reed, W. W. Richards, Dr. C. F. Gross, Austin Sperry, H. B. Sperry, Jas. S. Turner, Jno. Van Alen, Jas. Watt, Geo. W. Wentworth, Geo. F. Roberts, F. A. Webster, Carlos G. Young, W. D. Mansfield, F. J. Kilpatrick, Harry T. Payne, General George Stone, Wm. Thompson of Honolulu, R. A. Smyth, J. X. De Witt, E. E. Wade, S. W. Redington, Jno. Birmingham Jr., F. W. Van Sicken, and others.

The Truckee River and other streams frequented by sportsmen in Nevada will next season afford the fishermen crawfish along with the trout now in these waters. George T. Mills, secretary of the Nevada Fish Commission, has just received thirty dozen of the astocoid crustacean or retrogressive proclivities, commonly called the "crawfish," from Astoria, Ore., of which fifteen dozen will be placed in the Truckee, ten dozen in the Carson River and five dozen in Washoe Lake. The crustaceans increase and multiply fast, and by next season it is expected the Nevada streams will have a plentiful supply for the market.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

STRIPED BASS FISHING.

San Antone Slough last week gave a spasmodic indication of past days of splendid sport with the striped bass. On Wednesday a number of local anglers fished the slough, but with indifferent success. One of the anglers, Mr. Draper, determined to try his luck on the following day, and accordingly stayed over, with the result that he made one of the best catches of bass yet recorded for San Antone Slough. He fished with a clam bait, out in the main slough at the junction of the north and south forks, and during a period of not over two hours, on the last of the ebb and first of the flood tides, landed eight fine striped bass in grand condition. They weighed respectively 29½ pounds, 23 pounds, 14 pounds, the balance from 4 to 6 pounds. And, just to show the exasperating phases of fishermen's luck, Frank Marcus and Ralsch Terry fished within 100 yards of Draper and never got a nibble.

On another day last week Al M. Cumming landed seven fish, totaling sixty-nine pounds in weight, the largest scaling twenty-three pounds. In contra-distinction to this, W. S. Kittle and Prospector McFarland fished on still another day and drew blank. Both of these sportsmen are second to none in the art of landing bass.

Another day, Chas. Breidenstein and Joe Meyers only could land two small fish, each angler had a number of strikes, but could not make good, the fish seemed to be extraordinarily finicky. Draper also had three strikes that he failed to hold on to the same day.

As one reason for the almost total disappearance of the fish from San Antone Slough, it is alleged by a number of observing anglers and others, who frequent that section, that the direct cause of the scarcity of the striped bass is the rapacity and illegal fishing of net fishermen.

These fellows—they and their boats are known, for they are a small and close corporation—stretch their small meshed nets, or nets that are illegally small in the mesh, across the mouth of the main slough, or any other desirable point on the main slough or its forks, the nets reach across from bank to bank. It is a well known fact that the striped bass follow the tides in the sloughs, consequently when the tide begins to ebb and the little feeding creeks in the marsh run dry, the fish follow on down with the current, naturally making for deeper and safer water. The net across the creek or slough stops any further progress of the fish, and when the tide goes out entirely the fishermen wade over the mud and pick out their victims, or sometimes in other cases draw the nets when the tide is at its lowest. Whichever time or method is used the result is the same. This violation of the law and wholesale fish depredation has been going on for several years past on the San Antone and in adjacent waters. This statement can be verified by reputable witnesses. It was at one time suggested that parties interested would make a raid and capture the nets and law violators, this plan was sidetracked through positive belief in reprisal by the fish pirates either in personal injury or by destruction of club or anglers' individual property in that section. Intimidation and bravado has been effective in persuading a disgusted but watchful neutrality.

In the light of the foregoing we will call the attention of the Fish Commissioners to what is regarded as a flagrant violation of the law, and open defiance of the authorities. It is not necessary for us to show the proper law officers what to do in the matter, they know how and what to do in the matter and furthermore they can, if they will, apprehend the parties who seem to think they can defy the law with impunity.

It is up to the Fish Commissioners to look into the matter.

The Fish Commission deputies have been doing excellent work at other points on the bay and can reasonably be expected to be as effective in this locality.

FISH COMMISSION NOTES.

One good effect of the fund created by the hunters' license law is seen in the recent action of the Fish Commissioners in offering a bounty for the killing of California lions. Aside from the incalculable amount of damage these cunning and rapacious marauders cause in the destruction of all kinds of live stock, and the depletion of the ranchers' poultry yards as well, these big cats kill more deer (bucks, does and fawns) every year, in and out of season, than ten times the number bagged legitimately by hunters. On second thought our estimate is way and beyond, below the actual number of deer that are killed and eaten by cougars each year.

A press circular from the office of the Board announces:

The California Fish Commissioners offer a reward of \$20 for each scalp and pelt of a California lion or panther, delivered at the offices of the Commission in this city, accompanied by an affidavit taken before a magistrate specifying that the animal has been killed since October 1, 1907, and stating the date and place of the killing of the animal.

This measure was decided upon in the interest of sportsmen and those engaged in stock raising in California. The California lion and panther destroy all kinds of game, sheep, calves and colts and are a menace to ranchers in many sections of the State.

While it was difficult to induce a Legislature to make appropriations for bounties, the Commissioners deem it proper to apply a portion of the money re-

ceived for hunters' licenses for that purpose. It requires patience and skill to capture the California lion or panther, and a reward of \$20 will undoubtedly stimulate hunters and farmers to greater effort.

The Commissioners will be glad to receive information and suggestions from those living in regions most infested by those animals as to the best methods of capturing them.

M. O. Bartholomew of Howell mountain paid a \$75 fine imposed upon him by Judge Ogden of Upper Lake for unlawfully killing deer in Lake county. Bartholomew had been long suspected of committing violations of the game laws, but it was difficult to catch him in the act or find the proof. Last Sunday, however, Deputy A. F. Lee found ample proof secreted in the brush near Bartholomew's camp, and the offender was promptly arrested. The same deputy arrested V. A. Jerome near Cloverdale for killing quail during the closed season and took him before Judge Lewis at Cloverdale, who fined Jerome \$25 for the offense.

George Ingraham paid \$50 fine at Ukiab for having killed more deer than the law allows, but pleaded that it was done through error.

Two Italian fishermen paid \$200 fine at Benicia for fishing in Suisun bay with a small-mesh net. P. Giacomo paid \$25 at Martinez for having in his possession striped bass of less than three pounds weight. G. Vellecci paid \$50 fine at Pinole for a like offense. Joseph Campagno of this city paid \$40 fine for having in his possession a larger number of ducks than the law permits. Three fishermen arrested at Vallejo last Thursday paid jointly \$125 in fines for having undersized striped bass in their possession.

In addition, about a dozen more convictions were had during the week of violators of the game laws and fines exacted in various amounts.

TWO PICTURES.

The Suisun marshes have been for years famous for the splendid duck shooting found there. In fact, two and three decades ago about all that section, or for that matter, any of our salt-marsh lands around the bay counties, was only considered fit for duck shooting and a little pasturage here and there. In the course of time many locations in these marshes were bought up or leased for hunting preserves. Of late years, however, the value of the lands for agricultural purposes has been found to be surprisingly high. Reclamation has shown that, although costly, the ultimate fate of many a famous marsh shooting resort is given by the following article, published in the Solano Republican:

During the past three or four years attention has been directed toward the salt marsh lands south of Suisun, along the Suisun bay shore and in the neighborhood of Vallejo, with the result that wherever reclamation has been resorted to and cultivation done, the most gratifying results have been realized. Large crops of hay and grain and asparagus and other vegetables have been grown on lands which but a few years ago were considered of use for summer pasturing only. Of the lands lying in the immediate vicinity of Suisun this opinion still exists among some of the owners, but within a few months they will undoubtedly be convinced that large incomes await them if they will only make the effort to improve their lands, so that they might be used for other purposes than pasturing stock.

About three years ago, Frank Knight, an enterprising young man of Humboldt county, purchased a large tract of marsh land north of Vallejo which is already yielding more per acre than the entire cost of the land, the original purchase price with reclamation added. In addition to getting large crops of hay, Mr. Knight has sold portions of the land to a number of Humboldt county dairymen who are located in that district. Of late Mr. Knight has been devoting much attention to securing fresh water. Henry Goosen of Fairfield has just completed a well on Mr. Knight's marsh land 247 feet deep, which is flowing at the rate of 35,000 gallons of pure fresh water every 24 hours.

Adjoining the land of Mr. Knight is a tract of marsh land owned by David Hanbury, who will make handsomely off of his place this year. From a field of 300 acres he secured 1100 tons of good oat hay. Estimating at prevailing prices for hay Mr. Hanbury should realize above all expenses at least \$30 an acre.

The profits realized by Mr. Hanbury, large as they might seem, do not compare with what has been cleared from some of the salt marsh land on Grisly Island. While the lessors of the Dutton tract have carefully guarded all information concerning their asparagus crop it is reported that more than one hundred dollars an acre has been cleared from asparagus planted two years ago. There are fortunes in sight for the lucky purchasers of Grisly Island lands in the neighborhood of the Meek asparagus heds and it is possible that some of those who have put their money into the first development have designs on some of the adjoining lands.

But little has been done toward developing the Grisly Island lands sold last year to the Ventura county farmers. All the land sold to them has been reclaimed and is now ready to be broken up. H. L. Vennink, one of the purchasers, has made experiments this year in a small way. A sample of sugar beets grown on his place, now on exhibition in the office, is a splendid demonstration of what can be produced. Mr. Vennink has also shown us samples of lima beans, which he says are as good as those grown in Ventura county. He will undoubtedly place under cultivation next year quite an acreage.

Step by step the Suisun district is falling into line, and as has heretofore been stated, the marsh lands of this district will add greatly to our already vast resources.

The forgoing picture is flat-toned and out of harmony compared to the coloring and life the sportsman finds in the picture given below, which is the Solano Republican's account of the opening day's shoot on some of the lands above referred to:

Ducks were evidently forewarned as they flew high on the opening day—last Tuesday—and the expectant hunter had to content himself with almost any kind of a string. In some localities on the Suisun marshes large numbers of ducks were to be seen but soon after the first shots were fired they sought safety near the clouds. This is not to infer that no ducks were killed as many hags of from fifteen to twenty were secured and some even more, but a hag limit was not secured by any one hunter. This too with thirty-five as the limit instead of fifty as in former years.

Taken as a whole the Suisun marshes and the marsh lands lying to the south-east of Suisun along Suisun bay afforded the best shooting of all the duck shooting districts reported. The Suisun district is unquestionably in the lead, as it always has been and will continue to be the favorite locality for sportsmen in general.

Up to within four or five days of the opening day ducks were numerous everywhere in this section but a scattering took place the middle of last week. The return of the flight will probably be as sudden as was the departure. Experienced hunters know this and a keen lookout will be kept for the reappearance of the webfooted birds.

For several weeks previous to the opening of the season owners of preserves spent much time and money in getting their ponds in readiness, some of them only to have their work undone by poachers and violators of the law. It is had enough to violate the law, but it is even worse to infringe on the rights of a neighbor, and this is what was done by some of the local residents. One of the grossest indignities being that perpetrated upon Lewis Pierce, whose Boynton ponds preserves were shot out during the close season, and this done by an officer of the law. No arrests followed. Fortunately this condition of affairs did not exist on many preserves, and it is quite probable that there will be less of it in the future.

In consequence of the damage done to the Boynton ponds as above intimated, Lewis Pierce spent the opening day on the Lang ponds, four miles east of Suisun. Grant Chadbourne shot with him, the two getting twenty-six ducks. Young Warner Chadbourne and Willie Crowley killed a dozen on an adjoining pond.

Jacob Anderson, George Neary, Wm. Hughes and Wm. Losh, combined, killed seventeen ducks on the Carpenter ponds.

Mr. and Mrs. William Pierce occupied positions on a pond on the Humboldt Herd farm and secured twenty-four ducks, the honors being evenly divided. They killed more than thirty, but lost several in the high tules.

In the Denverton district Tom and Alfred Gregory and Jim Murphy, accompanied by F. B. Surryhne of San Francisco, made a clean-up of thirty-one ducks on the Will Morrill ponds.

Mr. and Mrs. Geo. K. Harding came home early with six ducks from one of the Stewart ponds.

To the south from Suisun some of the lands not far from town afforded fair shooting to Constable Downing, who killed 18, W. H. Bryan 10, L. H. Pimentel 12, Ed Whitby and Gus Tillman half a dozen each, Gene Thurber 12, Dime Chrisler 12.

Under Sheriff Tom Lenahan and Joe Terry scored fifteen on the Tomasini ponds.

Fred Chadbourne and his son Fred, who have leased the Okell tract for a term of years, killed an even seventeen, all large ducks. Frank Rumble got twelve.

Quite a number of local hunters did their shooting on Grisly Island. Al Wolf was high gun. He killed twenty-two at Vincents. Charlie Mayfield and Frank Butterfield scored a dozen at Venninks. L. E. Buzzini 10, Leonard Prior 4, Phil Winkelman 12. On the open marsh Will Wilson was high gun, with 29 to his credit.

At the Cotati Club, south of Cordelia, with preserves covering portions of the Peter Smith and Chamberlain tracts, fair shooting was had. Those who shot there, together with their scores, are herewith given: Dr. Everts Downing and Fred Rush, combined, 25; Jim Emigh, 13; Frank Scarlett, 7; John Dunker, 13; Elven Bauman, 7. Henry Studer and a Mr. Young killed thirty on a pond adjoining the Cotati. Jack Wilson and Jack Harper shot on one of Louis Titus' ponds, near Cordelia Slough, and got seventeen.

The Suisun Gun Club, which recently purchased the Oakland Gun Club's preserves on the Tomasini tract, had a shoot above the average. The members of this club are Allen L. Chickering, Dr. E. E. Brownell, Frank V. King, Walter Starr, W. A. Stevens, Henry F. Dutton, A. A. Moore Jr. and Thomas P. Bishop. But five members were present. Their scores were as follows: Chickering 17, King 18, Starr 16, Stevens 25, Moore 17.

Frank Maskey, one of the purchasers of the Chamberlain tract two years ago, and who reserved that portion taking in the Haywards and Sunrise ponds, had a fine shoot, getting near the limit. Mrs. Maskey spent the opening day at her husband's marsh home.

The Jack Snipe Club, with William P. Murdoch, James Rolph Jr. and James K. Prior Jr., as members, had a fairly good shoot considering that the artificial ponds on the place are newly made.

The Oelrichs place, which was sold to E. H. Hariman recently, was occupied by Captain J. H. Seymour, who had a fairly good shoot.

W. W. Richards, owner of the Green Lodge, one of the Chamberlain tract sub-divisions, fared as well as any of his neighbors. Mrs. Richards, who is an expert shot, occupied a place on the favorite pond of the Green Lodge, but we did not learn the result of her morning's shoot. Edwin Smith and David Hearfield of San Francisco, who were there the opening day, will shoot on Mr. Richards' place during the season.

Judge Henshaw of Oakland and a party of friends who have leased the Ibis grounds, got their share of ducks, as did also Howard Martin and L. C. Pistolesi, at the Harvey Club, which was the shooting place of the late Joseph Harvey. The Harvey estate owns both of these fine shooting preserves.

Good shooting was experienced by the Family, Marsh and Teal Clubs, the reports from which were not received. This was also the case of the Joice Island Club, whose preserves extend over 1,500 acres at the south end of Joice Island and the Volante Club, occupying the north 800 acres of the island.

Guy T. and Willard Wayman, L. M. Gray and R. W. Davis of the Stewart Club carried away eighty ducks as a result of their day's shoot on the Ed Stewart ponds, near Denverton.

A. M. Shields, Lee W. Harpham, Jos. A. Chancellor, George Uhl, A. M. Cummings, Bert Gable and William Bay of the Field and Tule Club, near Cordelia, fared as well as their neighbors of the Cotati Club.

Achille Roos entertained a party of friends at his fine club-house, near Teal Station, all having a good shoot at the Whittier pond on the Roos preserves.

The opening day was a bad one for C. W. Kellogg, Captain H. F. Fortman, W. B. Tubbs, W. B. Bradford and Dr. George E. Davis, who formerly comprised the Cordelia Club. After the expiration of this club's lease of the Chamberlain tract a few months ago the members leased the John Cook tract, west of Cordelia Slough. Vic Harrier and some Vallejo friends of the Cook Club, the former lessors, claimed the grounds until October 15th. Cook was in a quandry, and the San Francisco millionaires wanted the first day's shoot, but the Harrier crowd got to the ponds first and held them. The Vallejo hunters intend to have two weeks more of shooting there and will probably have it undisturbed.

The clubs and individuals who purchased tracts of shooting ground on the Suisun, although they will lose the duck shooting, eventually will be amply compensated for that loss, in the enhancement of land values. They got in on the "ground floor," as it were.

STOCKTON SHOW.

The third annual show of the Stockton Kennel Club, three days, ended Wednesday evening and was a most successful show so far as good fellowship is concerned, and the efforts of the club officials and members to accommodate and serve exhibitors and visitors could make it so. The list of entries was not quite what had been anticipated, but, at that there was a splendid showing of class and quality.

The awards in several instances were decidedly not to the liking of many fanciers and exhibitors.

This show was the first one in our experience of over twelve years where accommodations for the press were so inadequate. The judge, on the first day, peremptorily ordered the press table out of the ring, nor did he follow the usual custom of filling out the press and marked catalogue slips. Possibly he was not accustomed to light weight literature, his specialty in this line is suavely presenting dog medicine booklets to people as they enter or leave the show halls. The oversight in making out the marked catalogue slips (the records are usually made in the judging book in triplicate on perforated slips) was the cause for issuing a marked catalogue on the day after the show closed. The judge ruled the ring and everybody in it, and was the limelight objective at all times. It would not have been surprising had the handlers been given orders to show their dogs in the lock step style of pedestrianism.

There was a large attendance of visiting fanciers from San Francisco and nearby points, all of whom are enthusiastic in praise of the Stockton club officers and members. The visiting delegation, and it was a large one too, with their dogs, left Stockton by boat shortly after the show closed. The boat was held back several hours by the California Navigation and Improvement Company, an act of courtesy and accommodation for which we are requested by the pleased homebound fanciers to thank the steamboat officials and the Stockton Kennel Club for a very much appreciated favor. There was about fifty tired exhibitors and more than that number of dogs, this meant a night of rest and comfort for both owners and dogs. The late river trip was therefore a very much appreciated favor.

A report of the breeds and a list of awards will appear next week.

The Southwestern Kennel Club will show at Los Angeles in February or March next year.

This show will be under the management of Mr. Fred Herr, the well-known Boston Terrier fancier.

Pasadena is making arrangements for the next show.

The Glen Tana Collie Kennels, at the Spokane show, under James Cole, won special prize cups for best Collie hitch, best novice Collies, and also first prizes in all classes entered. G. T. Bloodhounds made a clean sweep.

Fred P. Butler's good English Setter Tiverton won his championship at Stockton this week. Mrs. J. P. Norman's Bull hitch is now Ch. Toreador Venus. Champion Cressella Nancy sounds good to A. L. Cresswell. (Hoot mon, hoot!). Champion Xantippe of Moreton is very nice too. Sid Cummings' Italian Greyhound Dude joined Gideon's band and now plays in the champion class.

Stockton show cups and trophies were valued at over \$1,800, pretty good for the Flour City hoys.

Tommy Banks turned up Wednesday evening and was warmly greeted by a host of friends.

There was a little dog in Ipswitches, They called him Feather Breeches.

He was sold at the show, For a price that was low.

When he turned the trick for first winners, Quoth the ring-side bunch of sinners:

My! what a shocker,

If that's a Cocker,

We'll all have to raise—sons of Feather Breeches.

TRADE NOTES

U. M. C. Wins Reported.

Mr. M-W. Laureuce broke the ground record at the Richmond, Va., Gun Club September 21st, 97 out of 100, with Mr. W. S. McLelland a close second, 95, both shooting U. M. C. shells.

Mr. George Robinson, president Virginia Trap Shooting Association, broke 114 out of 125 at the Deep Run Club, scoring his last 25 straight. He shot U. M. C. steel-lined shells.

Mr. C. E. Robbins was high gun at Wahpeton, N. D., September 24-25. He made a run of 88 straight on his last 215 targets. He shot U. M. C. steel-lined shells.

Frank Riehl showed his old friends from the East that the Western air did not interfere with his good aim by beating them all out at Portland, Ore., with a score of 174 ex 180. U. M. C. steel-lined shells and a Remington gun were used.

At the Wislayne Gun Club, Orange, N. J., September 23d, Mr. W. E. Jobs made the top score, breaking 39 out of 40 with 25 straight, shooting U. M. C. shells.

The Norwich Gun Club gave a very fine shoot September 21st. F. E. Butler was high professional and Mr. E. H. Edgerton high amateur, both shooting U. M. C. shells.

Pop Heikes was in good form at New London September 20th, breaking 142 out of 150, winning high gun. This shooting was done in a high gale. "Pop" used his Remington gun and U. M. C. shells.

Mr. Harry Taylor was high gun at Lincoln, Neb., September 24th, breaking 191 out of 200 with his Remington gun-U. M. C. shell combination.

Mr. R. J. Jackson broke 94 out of 100 at Coleman, Tex., September 20th with his Remington auto-loading gun and U. M. C. shells.

Toepperwein Tops Topmost Top.

In San Antonio, Texas, during the week beginning September 16th, Mr. Adolph Toepperwein, the undisputed champion rifle wing shot of the world, made a most marvelous record, which will probably stand for many years to come, unless he decides to break it himself. The account of this shooting is best given in his own words:

"I shot at a total of 20,000 with but 10 misses, and made one run of 8840 and another of 4991. I began shooting Tuesday morning, shooting through the entire day without a miss, and continued until Friday afternoon when I finished my 20,000."

"I missed my 8841st target Wednesday afternoon and another late that same day, finishing 10,000 with but two misses. This shooting was done in public and duly advertised in the papers and shot off at Scheuermeyer's Park, which is easily reached by the street cars and was witnessed by scores of people all the time I was shooting. The targets used were made of wood (2 1/4 inches) which I used until I reached 7000, when I used the largest pieces of the broken ones, being short on targets. When I had shot 9000 I began using clay discs (2 1/4 inches) which I used until I reached the 19,000 mark, when we again ran out of targets, and I was then obliged to use again the fragments of the wooden ones, some of which were very small and not half their original size. I finished the last 1,000 shots with these."

"I used two Winchester Model 1903 22 caliber automatic rifles and Winchester make of ammunition exclusively."

"The conditions for such a shooting and for such a long score were very unfavorable, the weather being unusually hot, and I was obliged to shoot directly east and in the sun; however, I finished in good shape and with hardly any ill effects. This score is by far the best I have ever made and passes the mark I made at the St. Louis Exposition."

CERTAIN BREEDS OF SHEEP.

Bulletin 140 of the Pennsylvania Experiment Station, by J. E. Wing, says of certain leading breeds of sheep:

Of the long-wooled breeds, the Leicester, Cotswold, Lincoln, and Kentish or Romney Marsh sheep are especially worthy of study. The Leicester is indeed one of the first of English breeds to have felt the impression of great improvers of live stock, seeing that it is a matter of history how Robert Bakewell began the improvement of this breed more than 150 years ago. The story of Bakewell's achievements reads like a romance. Taking an old, long-legged, lank, slow feeding type he was able, in a comparatively few years to produce from it by deft selection of sires and skillful matings, and aided no doubt, by judicious inbreeding, to produce an "improved" sheep, somewhat less than the original type, but more symmetrical, thicker, deeper and possessed of greater fattening properties as well as early maturity. His success as a sheep breeder is best indicated by the appreciation in which his animals were held. From a few shillings per head (it is stated that his first rams offered for letting only made seventeen shillings, six pence each), the price rose to 100 guineas, and in 1786 he made 1,000 guineas by the letting of his stock. In 1789 he made 1,200 guineas by the letting of three rams. The Leicester sheep, as bequeathed to us by Bakewell, may be described as a white-faced, hornless race, covered with a fleece shearing about seven or eight inches in length, of somewhat lashy wool and terminated with a short twisted curl. The lips and nostrils are black, nose slightly narrow and Roman, but the general form of the face wedge-shaped and covered with short, white hairs. The forehead may have a top-knot of wool, ears are thin and long, the neck is short and level with the back, thick and tapering from skull to shoulders. There is great thickness "through the heart." They are well filled up behind the shoulders, giving a great girth and well sprung ribs, wide loins, level hips, straight and long quarters with great depth of carcass with fine bone. The general form of the carcass is square or rectangular, with legs well set on. Leicesters fatten most readily at from twelve to fifteen months old, when they weigh from 160 to 200 pounds. The principal fault of the Leicester is its laying on masses of inward fat, which is a characteristic not esteemed by present-day butchers. The great use of the Leicester is in cross breeding for benefiting other races, or producing cross-bred lambs. It crosses especially well upon the Merino, and has been the means of building up quite a number of other breeds, seeing the Cheviot, Cotswold, Lincoln and Oxford Downs all possess more or less of the Leicester blood, so that Bakewell builded better than he knew when he created the Leicester sheep. There are a few Leicesters in the United States. There are some good ones in the West, Robert Taylor of Nebraska being their chief exponent, and there are a good many in Canada, where conditions seem to suit them right well. The writer would hardly venture to recommend to Pennsylvania farmers the breeding of Leicester sheep, except as before noted, they might use the rams for crossing upon the Merinos. Leicesters would undoubtedly thrive in Pennsylvania if given good care and kept free from internal parasites, which, frankly be it stated, are the curses of all long-wooled breeds in warm latitudes.

Quite similar from a point of view of one not very familiar with either race are these two breeds. Formed somewhat after the pattern of the Leicester, they are a breed of very large, white-faced and long-wooled sheep. The Cotswold has rather a longer fleece than the Lincoln, and the Lincoln perhaps a denser coat. Either breed presents a magnificent appearance when under good management, with their massive fronts, their long, white, curling wool, and when closely examined, their delicious pink skin. Lincolns and Cotswolds are probably the largest representatives of the sheep kingdom and bred pure, attain rather too heavy weights for our present market conditions, their prin-

cipal use in America being for cross breeding. On the Western ranches an infusion of either Lincoln or Cotswold blood in the Merino flocks has proved of great advantage, opinions differing as to which makes the better cross. These cross-bred ewes are often retained in the flocks, making magnificent mothers, shearing enormous fleeces and nourishing their lambs well. The quality of the cross-bred fleece is especially good, outselling by far either the pure long wool or pure Merino. There is probably a good field for Eastern breeders who can supply Western long-wooled rams for this Western trade, and here it must be confessed lies the most hopeful expectation of profit from breeding long wools in Pennsylvania. These long-wooled breeds are not quite so prolific as the Downs or Dorsets. They do not drop their lambs early, as a rule, nor are their lambs so easily grown, and unless care is exercised to keep them free from parasites ruin, dire and dreadful, follows fast in the wake of the flock. The writer has no antipathy against the long wools, in fact, feels always a kindly admiration for the well kept flock of Cotswold or of the Lincolns, and feels certain that some day breeders with sufficient skill will take up the work in America and perhaps duplicate the wonderful results that have been achieved in England, where, within recent years, Lincoln rams have been sold to Argentina for as much as \$5,000 each. But the breeding of long wools is not to be lightly undertaken by men without experience and unwilling to give careful attention to details.

The Romney Marsh or Kentish sheep are similar to the Lincolns, having, however, a short fleece and being of somewhat smaller size. These sheep fatten readily upon grass alone, and are very profitable for grazing upon the fat pastures of the sea coast in Southern Kent. It must not be thought, however, that these marshes are swamp lands. They are simply reclaimed pastures that were at one time below the level of the tide. There is no sheep that will thrive on wet or swampy lands.

BAD ACTORS IN THE HEN TRADE.

[M. M. Johnson.]

Any poultry raiser who has one or more cases of eggs in a week can get from 20 to 40 per cent more for them by looking up a private market, some hotel, groceryman, eating house or the diners on trains. Put the eggs up in cartons holding one dozen each. Put them up fresh and clean and stamp them with a rubber stamp. A trade can be worked up with any city groceryman who caters to high class trade, or it can be done direct with the concerns mentioned. I know whereof I speak about these things. I know of a number who are doing it. I know of a single creamery company that handles fifteen cars of eggs a month in pretty much the same way. I know of men who are making a nice thing out of it, and there is plenty of room left.

There is nothing that we eat that goes on the market in such a haphazard, filthy condition as the poultry and egg product. Not by any means am I overdrawing the case. Consider it for yourself. Watch the groceryman or average egg buyer fill a case of eggs for market. No matter how old or besmeared the case, just so long as it will hold the eggs and nail together, it will do. No attention is paid to the smell of the egg fillers, no sorting for color, no attention is paid to dirt or feathers sticking to the shells. Most assuredly it would take a hungry person to fill up on the stuff if they saw it first.

The same careless method is followed in marketing fowls. Take a walk in the market place in any city and we get a lesson. Right there we find fowls of all ages, sizes and colors in the same coop. I might say, without overdrawing, that the coops are a mixture of fowls, feathers and corruption. At the average market place it is a relief to find a coop evenly balanced up in size and color. A really decent coop makes us draw a more satisfied breath.

In these days of co-operative creameries, grain elevators and other things helpful to the producer, it is queer

that the most important and biggest industry of all is neglected. Every town or poultry raising community could advance the popularity of poultry and eggs as food and make money while doing it. It can be operated as individuals or as a company. Let me say here, that after a groceryman has handled a few cases of eggs put up as I have suggested, the matter of price becomes secondary to keeping that kind in stock. The cleaner and more attractive appearance gives his store a prestige instead of making an eyesore to tasty customers. There is nothing more handsome than a stock of clean eggs in attractive cartons, there is a repulsiveness in a filthy stock of eggs.—Denver Field and Farm.

WOOD ASHES ON ALFALFA.

Wood ashes which have not been subject to leaching, contain about 7 per cent of potash and 2 per cent of phosphoric acid. The use of these ashes on legume crops, especially clover and alfalfa, has given excellent results where the soil is at all deficient in potash. As the top dressing they are of value, but the application should be made as early as possible.

Wood ashes may be applied at the rate of twenty five to fifty bushels per acre. This means an amount by weight equivalent to from 1,000 to 2,000 pounds. The application of actual plant food would thus range from 70 to 140 pounds of potash and 20 to 40 pounds of phosphoric acid, which is more of each of these elements than an ordinary crop takes from the soil in a single season.

The amount of milk the cow should give before she will yield a profit to her owner depends on the price the owner has to pay for the cow, the cost of feed, the amount of butter fat the milk will contain, and the price of milk or butter fat can be sold for on the market. If the cow costs her owner \$75 she should give a larger yield of milk than the cow that costs \$35. A cow that consumes a great deal of food should give more milk than the cow that does not need much to keep fat, the bulk is not so important as the per cent of butter fat. The cow giving twenty pounds of milk that tests only two and one-half per cent is not yielding as large a profit as the cow that gives only fifteen pounds of four per cent milk. Fifteen to twenty pounds per day that tests four per cent is a paying yield in the section of country where butter sells for no less than 20 cents per pound.

Fifty-eight gallons of milk found to be below the standard of 3.6 per cent butter fat was recently "dumped" by an inspector into the sewer in Indianapolis, Ind., not long ago. So far as we can learn from the newspaper reports the milk was pure, clean and wholesome, just as it was drawn from the cow's udder. A law which permits such acts as this is legal foolishness. It demonstrates the absurdity of our milk legislation, which prohibits the sale of pure milk falling below a certain per cent of butter fat. It is a fact acknowledged by nearly all authorities that milk low in butter fat is a more nearly balanced food than milk rich in butter fat. That being true, it is reasonable to say that the consumer who desires the low per cent fat milk should have the privilege of buying it. No legislation or health department rules should prevent the sale of pure, clean milk as drawn from the cow.

ALFALFA POINTS.

Alfalfa should always be seeded without a nurse crop. The ground should be well prepared before seeding. Newly plowed ground should not be used. Use only the best seed and sow from fifteen to twenty pounds per acre. Seed it in the spring about grain seeding time. During the first year cut often to keep the weeds down and prevent the leaves from rusting too badly. Cut it if the leaves turn yellow.

After the first year cut when about five per cent of the plants are in blossom. Only remove two crops in one year.

If your pigs are running on clover pasture and you are feeding grain, give it to them at night.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for
Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc. it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address
The Lawrence-Williams Co., Cleveland, O.

"SAVE-THE-HORSE"
Registered Trade Mark
SPAVIN CURE

Is This a Miracle or Science???

It is marvelous simply because it surpasses results ever before achieved. It
supersedes all known methods—it is humane, positive and permanent.
Glens Falls, N. Y., January, 1907.

Troy Chemical Co., Binghamton, N. Y.:
Dear Sirs—In regard to your Save-the-Horse remedy, I have used it with
good success the last three years on four different horses that could not be cured,
and I cured them sound. Now, last January I bought the horse My Star of a man;
he sold him to me as not being sound and would not stand training. He told me
how fast he was for half a mile, so I examined him and found a small bony
growth or splint on his hind leg, under the back tendon, so I bought him for
\$300. Brought him home and bought one bottle of Save-the-Horse of Griffin Le-
land Co. in Glens Falls, and applied as directed and cured that leg. I started
My Star in the Albany races and gave him a mark of 2:09 1/4, and sold him to
Lotta Crabtree, the owner of Nut Boy 2:07 1/4, and they have raced and given
him a mark of 2:03 1/4. They paid me \$2,500 for him. He has never taken a lame
step. I am writing this at my own will, but that is just what Save-the-Horse did
for me, and I will swear to it. Yours,
C. J. REARDON.

Our guarantee is not mere words, mind you, but a signed contract; made abso-
lutely legally binding to protect purchasers to treat any case named in the document.
Write for proofs. Read what it has accomplished for others; it will unfailingly
do so for you.

"SAVE-THE-HORSE" permanently cures Bone and Bog Spavin, Ringbone (ex-
cept Low Ringbone), Curb, Thoroughpin, Splint, Shoe Boli, Wind Pnf, Injured
Tendons and all lameness without ocar or loss of hair. Horee may work as usual.

\$5.00 per bottle. Written guarantee as binding to protect you as the best legal
talent could make it. Send for copy and booklet.

At Druggists and Dealers or express paid.

\$7,250 Guaranteed Only \$2 to Nominate Mare \$7,250 Guaranteed

Pacific Breeders Futurity Stakes No. 8

TO BE GIVEN BY THE

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1907 to Trot and Pace at Two and Three Years Old

Entries to Close Monday, December 2d, 1907

\$4250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners, and \$450 to Owners of Stallions

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.
\$200 for Nominator on whose entry is Named the Dam of Winner of Three-Year-Old Trot.
\$1250 for Two-Year-Old Trotters.
\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.
\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.
\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.
\$750 for Two-Year-Old Pacers.
\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.
\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

\$250 IN SPECIAL PRIZES FOR STALLION OWNERS

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize\$100
2d Prize 50
3d Prize 35

4th Prize\$25
5th Prize 20
6th Prize 20

The Above Prizes will be Paid on December 24th, 1907.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings, February 2, 1909; \$10 on Two-Year-Olds, February 1, 1910; \$10 on Three-Year-Olds, February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not harred from starting again in the three-year-old divisions.

For Entry Blanks and further particulars address the Secretary.

CONDITIONS.

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before February 2, 1909, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will not be barred on pacing horses.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

WINCHESTER
HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1886 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

\$6,500 For Three-Year-Old Trotters---ABSOLUTELY GUARANTEED---\$3,500 For Three-Year-Old Pacers

Nomination Fee from \$1.00 Down to Nothing

Payments and Starting Fees Lowest on Record

No "Take Off" for the "Promoters." No Hopples. No Substitutions. Get in on the "Ground Floor" or else you are out "For Keeps."

Conditions.—Now open for nominations of mares bred in 1907—foals of 1908—to close November 1, 1907. This is a subscription (to The Western Horseman) stake, each old, new or renewal subscriber to the Western Horseman being allowed a FREE nomination on each annual subscription at the regular price of \$2.00 per annum, the cash and the name, description, breeding, and name of owner of mare, and the name of the stallion to which bred in 1907 to accompany the order. Providing, that breeders who wish to name more than five mares of their own, may name FIVE FREE on subscriptions, and may, if they prefer, name as many additional mares as they please—OF THEIR OWN—at \$1.00 each, without subscription to the paper. However, as our object in offering this stake is to increase our subscription list, and at the same time do something substantially beneficial for the speed breeding interests, we prefer the subscriptions and the free nominations. Present paid in advance subscribers will have their paid-up period extended one year on receipt of \$2.00 and their nominations. Bear in mind that nominations close November 1st, 1907, and should be addressed to

ON FRIDAY NEXT, the first day of November, the two rich stakes offered by the California Breeders' Association of Los Angeles will close. This association, we will say at the outset, is thoroughly reliable, and breeders can place utmost confidence in it. The stakes announced by it are the California Breeders' Futurity, which is for the foals of mares bred this year, and the Canfield Stakes, for foals of this year. The Futurity has a guaranteed value of \$7,000, of which \$4,250 goes to trotting foals and \$1,750 to pacing foals, and races are arranged for two and three-year-olds. There is nothing like stakes to make the breeding of harness horses interesting and the colts valuable. Every successful stake helps the breeder by arousing interest in trotting and pacing horses and by causing a demand at big prices for the fastest, raises prices all along the line. Every person that owns a broodmare should patronize the colt stakes. The greater the number of entries and the more stakes trotted and paced the better colt values will be. Thirty thousand dollars has been offered this year for a three-year-old that would not have commanded a price in excess of \$5,000 had there been no colt stakes. To make these stakes successful, start them off with a big original entry. It only costs \$2 to nominate your mare in the California Futurity, a \$7,000 stake. If your colt can trot in 2:10 as a three-year-old he can't win this stake unless he is eligible to start, and the best way to make him eligible is to nominate his dam on or before November 1st. For your foals of this year, the Canfield Stake has been arranged. This stake is founded on the plan of the Stanford Stake. The entrance fee is \$50, which is divided into several small payments. It costs but \$5 to nominate on November 1st. To all the stake money paid in Mr. C. A. Canfield, president of the California Breeders' Association, will add \$400, and it is thought the stake will be worth over a thousand dollars to the winner, there being four moneys. We ask all the readers of the Breeder and Sportsman to carefully peruse the advertisements of these two stakes in this issue of the paper, and make their entries by Friday next, the date of closing.

A FULL PAGE ADVERTISEMENT announces in this issue the stakes offered by the California Jockey Club for its racing season, which opens at Emeryville, November 9th. There are twenty-one of these stakes, with from \$1,500 to \$5,000 added money in each. The Burns Handicap is, as usual, worth \$10,000, and is a guaranteed stake for a race at a mile and a quarter. The California Derby, at a mile and a quarter, has \$5,000 added, which will make it a very rich stake for three-year-olds to compete for. The full list of stakes appears in our advertising pages and should be read by every owner of thoroughbreds.

VERY SUCCESSFUL MEETINGS have been held in some of the smaller towns on the Coast this year where the purses for trotters and pacers have not exceeded \$200 each. There should be more of such meetings. They provide racing and an opportunity to earn a little money for classes of horses that have no chance at the larger meetings, and they also lead to the development of colts and green horses that may show speed enough to attract buyers who are looking for prospects.

THE AUCTION RING is the best place for a careful, conservative person to buy horses, as there he can get them at his own price, and whenever he bids get beyond what he thinks the animals are actually worth to him he can refuse to bid any further. At sales like the one Mr. H. Brace will hold at his Santa Clara home on Saturday next, and where the horses will all be shown to harness or halter and are now on inspection, the opportunities to get good ones at less than their worth is always offered. Prices will not be high there—they have not been high in California for years. We hope they will be good, however, and we believe they will be fair, as Mr. Brace has a nice lot of stallions, mares, colts and fillies, bred in the very best lines and with a number of great speed prospects among them. Greco B., the seven-year-old stallion that has been the premier of this farm since his purchase by Mr. Brace, would attract attention at the famous Old Glory sale, and also attract many bidders. We believe a good profit can be made by anyone who will buy him at Santa Clara next Saturday and immediately consign him to the Fasig-Tipton sale, as his breeding is so out of the ordinary. He is by McKinney, greatest of all sires, and his dam is a half-sister to Lou Dillon, greatest of all mares, being by Anteeo 2:16½, son of Electioneer, out of Lou Milton, the dam of Lou Dillon and three others in the list. There are twenty-two of Greco B.'s get to be sold, comprising weanlings, yearlings, two and three-year-olds. Those old enough to be broken will be shown in harness, the others to halter, and they can all step. In fact, every Greco colt or filly is a trotter and has speed. The broodmares to be sold are choicely bred, and many of them producers. The dam of Bolivar 2:00¾ is one of them, and she has a weanling filly by the great champion, Star Pointer 1:59¼, at foot. There are others too numerous to mention. Get a catalogue and be at the sale next Saturday. It will be held at the farm, Santa Clara, and under the management of Fred H. Chase & Co.

TRAMPFAST, the aptly named colt that won the two-year-old trotting division of the Kentucky Futurity, and secured the world's race record of 2:12¼ for trotters of his age, comes from a wonderful family. His sire, The Tramp, son of Jay Bird, was a sluggish colt, but could trot fast enough to be a close second to the mare Feren when she won the two-year-old Futurity in 2:17. Trampfast's dam is Medium's Last, a daughter of Happy Medium, that is a wonderful broodmare. She has had twelve foals, of which four are dead and the other eight either have records or have produced standard performers. Her two fastest are Trampfast, two-year-old record 2:12¼, and Mediumwood 2:13¼. Her daughter, Miss Spears, that took a three-year-old record of 2:21¾ at three years, is now the dam of the fast pacer Shakespeare 2:09¾, one of this year's fastest three-year-olds. The grandam of Trampfast is Suzanne by Countersign. She produced Silver Lake, that took a record of 2:21¾ as a two-year-old in the third heat of a race, and she also produced the great broodmare Millionaire, dam of Susie J. 2:06½ and two or three others with standard records. There is producing blood on both sides of Trampfast's pedigree and he should be one of the greatest sires of early and extreme speed if he is not raced too hard before being retired to the stud.

GENERAL WATTS, the winner of the Futurities this year, including the great Kentucky Futurity, proved his undisputed title to the three-year-old trotting championship on Friday of last week, when he won a heat in 2:06¾ and came back in 2:09¾, the fastest two heats ever trotted by a three-year-old, the first heat lowering the world's record by two full seconds. It was a wonderful performance, and all accounts of the race in the Eastern press agree that the colt could have trotted faster. He is beyond all question the greatest three-year-old ever bred and when the fact is recalled that hut four or five trotting stallions of any age have ever trotted a faster mile, the wonderful speed of this son of Axworthy is made still more apparent. The history and breeding of General Watts has been given in full in previous issues of this paper, and it is not necessary to repeat it here. He ends the season with a record that hut comparatively few trotting stallions of any age will attain and it will be many years in all probability before the title of champion three-year-old trotter will pass to another.

A MOST LIBERAL STAKE is the ten thousand dollar Futurity announced by the Western Horseman of Indianapolis, and advertised in this issue of the Breeder and Sportsman. It is a stake for foals of 1908, with \$6,500 for three-year-old trotters and \$3,500 for three-year-old pacers. It is now open for the nomination of mares, and nominations will close November 1st, so the time to nominate is now. It is a subscription stake, and on every yearly subscription to the Western Horseman the subscriber is entitled to nominate a mare that is expected to produce a foal in 1908. The paper is hut \$2 per year, and we can truthfully say, as we read the Western Horseman every week, that the subscriber will get his money's worth in the paper alone. If an owner wishes to nominate several mares he can have a free nomination with every subscription up to five, and if he wishes to nominate more than five he can do so on the payment of \$1 each for each additional mare without making the extra \$2 subscriptions. The payments in this stake are few and small. The first payment after nominating the mare will be one year later, November 1, 1908, when \$8 will be due and payable on each foal. There are no more payments until May 1, 1911, which is the year of the race. On that date a payment of \$30 on trotters and \$20 on pacers must be made, and starting payments of the same amounts will be due the day before the race. There will be no substitutions in this stake, and no hopples will be allowed in either the trot or the pace. If you want to get in you must get in on the ground floor. It only costs \$10 to keep a colt in until May 1st of his three-year-old form, and as all that are fast enough to race will be in training then, every owner will know whether the colt is worth making any further payments on. Read the announcement of this stake in our advertising columns. A more liberal stake was never devised.

WHILE SEVERAL EASTERN SIRES have made great reputations this year by the remarkable performances of their get, California owned sires are entitled to recognition also. From the data at hand up to the present time it looks as if Zomhro 2:11 will lead all other stallions as a sire of new 2:20 performers. His list of new performers contains the names of eight horses—five trotters and three pacers and seven have records below 2:20. Of the pacers Hymettus 2:08½ holds the record as the champion three-year-old pacing gelding. Zomhro's list of new performers is as follows: Trotters—Era 2:11½, Briquette 2:16¼, Henry Gray 2:18¼, Mike Duff 2:19½, The Zoo 2:25. Pacers—Hymettus 2:08½, Bessie Barnes 2:17¼ and Lord Lester 2:16.

DON'T FORGET that there is the small sum of \$5 due Friday next on all weanlings entered in Pacific Breeders' Futurity Stakes No. 7, which is for foals of this year. If you do not make this payment you forfeit the right to transfer your entry if the foal dies. Transfers can be made in this stake up to April 1, 1908, hut this payment of \$5 must be made now or you will be out of the stake entirely. See the advertisement.

A GRANDSTAND for the accommodation of the people who go to Golden Gate Park to see the harness races has been hadly needed ever since the Stadium was constructed, and is now likely to be built in the near future. The big crowd at the track last Sunday, having no place to sit, tramped all over the new grass and small trees recently planted, and Superintendent McLaren thinks he will now be compelled to build a grandstand to save the lawn.

AT A SALE of thoroughbred horses in New York last week fourteen horses owned by James R. Keene were offered. Thirteen of them brought from \$1,100 to \$6,000, and the other sold for \$700. Several thoroughbreds consigned by "various owners" were then sold and a number were knocked down at \$50 and \$60 per head.

DON DIABLO, a pacing gelding which Jack Martin of the Hulda Stables, sold to Mr. F. J. Kilpatrick a few weeks ago, now holds the record for the three-quarter-mile track in Golden Gate Park, having been driven a heat in a winning race by his new owner last Saturday in 1:37¼.

GOOD AND FAST RACING.

A splendid afternoon of sport was enjoyed by those who attended the Park Amateur Driving Club's matinee at the Stadium last Saturday. The racing was extra good, and in addition to several close contests the time was fast.

In the first race for class B pacers Mr. William Hamerton's Colonel C. won in straight heats, Mr. William Lange's Doc being second the first heat, and Mr. I. L. Borden's Roberta drove the winner out in the second heat.

Mr. Borden's handsome stallion Barney Barnatto by Zombro was the winner of the race for class C trotters, although E. Stock's Director B. took the second and the fastest heat in the race.

In the class A trot Mr. H. C. Ahler's Telephone won after the hottest kind of a contest with Mr. F. J. Kilpatrick's new purchase, Princess W. This mare has a great flight of speed, but is unsteady at times, a very sore mouth being the cause. Mr. Kilpatrick had only owned her a few days before this race, having purchased her from Atkinson, the Market street horse dealer, after seeing him drive her on the speedway. Princess W. was bred by Tom Smith of Vallejo, who sold her at Chase's last February for \$185. Atkinson got her in a trade and sold her to Mr. Kilpatrick for \$250. When the latter took possession of her she wore eighteen-ounce shoes all around, and had a very sore mouth. A new set of lighter shoes were put on her, a soft bit placed in her mouth and her check removed. The way she raced with Telephone made her look like a very classy trotter. Telephone only beat her a neck the first heat in 1:06 3/4, and she beat him back the next heat in 1:05 1/4, trotting the first quarter in 30 3/4 seconds. The final heat Telephone just beat her in 1:05. She looks like a great find. Her breeding is excellent. She is a black mare, seven years old, sired by Geo. Washington 2:16 3/4, her dam, Urania, dam of two in the list, by Kentucky Prince, second dam Lady Belmont by Hambletonian 10, and third dam old Kate, dam of three in the list, by Belaire. When her mouth is cured up and she is balanced just right she should trot a mile close to 2:10.

Mr. Kilpatrick won the class A pace with another recent purchase, the pacer Don Diablo by Diabolo 2:09 1/4, dam by Cropsy's Nutwood. Don Diablo defeated Ringrose in straight heats, the last one in 1:37 1/4, close to a 2:10 gait, and the fastest heat ever paced on this track.

Mr. Geo. Gay won the last race, which was for class B. trotters, and at mile beats. The third heat was in 2:22, a good rate of speed for this class.

The officers of the day were: Starter, T. J. Crowley; Judges, A. Joseph, Captain W. Matson and A. Mellett; timers, J. A. McKerron, N. Franklin and G. Wempe; marshal, T. F. Bannan; secretary, F. W. Thompson. The summaries:

Class B pacers, three-quarter-mile heats—
Colonel C. (W. C. Hamerton) 1 1
Dock (W. A. Lange) 2 3
Roberta (I. L. Borden) 4 2
John T. (I. B. Dalziel) 3 4
Time—1:45, 1:47 1/4.

Class C trotters, three-quarter-mile heats—
Barney Barnatto (I. L. Borden) 1 2 1
Director B. (E. Stock) 2 1 2
Red Velvet (J. W. Smedley) 3 3
Belle of Washington (F. J. Kilpatrick) 4 5
Islamite (I. B. Dalziel) 5 4 6
Time—2:05 3/4, 1:56 1/4, 2:03 3/4.

Class A pacers, three-quarter-mile heats—
Don Diablo (F. J. Kilpatrick) 1 1
Ringrose (H. M. Ladd) 2 2
Time—1:41, 1:37 1/4.

Class A trotters, half-mile heats—
Telephone (H. C. Ahlers) 1 2 1
Princess W. (F. J. Kilpatrick) 2 1 2
Emma Smalley (G. E. Erlin) 3 3
Time—1:06 1/2, 1:05 1/4, 1:05.

Class B trotters, mile heats—
Laddie G. (George Gay) 2 1 1
Allan Pollak (F. J. Kilpatrick) 1 2 2
Charles H. (A. P. Clayburgh) 3 4
Lady Nell (M. W. Herzog) 4 3
Topsy (G. E. Erlin) 5 5
Time—2:24 1/2, 2:23, 2:22.

NOTICE!

Hartford, Conn., October 15, 1907.—A regular meeting of the Board of Review will be held at the Murray Hill Hotel, New York City, at 11 o'clock A. M., on Tuesday, December 3, 1907, in accordance with the by-laws.

W. H. GOCHER, Secretary.

N. B.—The President authorizes the announcement, according to precedent, ...at either an adjourned or a special meeting of the Board will be held in the early spring of 1908, to accommodate those whose convenience or necessities will be served thereby.

All communications intended for the consideration of the Board at the December meeting must be forwarded to the Secretary not later than November 19th, and all parties who desire that their cases should be acted on at the spring meeting should immediately notify the Secretary to that effect.

The Board of Review is empowered to act in place of the full Board with the same authority and jurisdiction, and at the above meeting will consider business arising in each and all of the districts.

SUNDAY RACING AT PARK TRACK.

Several thousand people turned out last Sunday afternoon to see the races of the San Francisco Driving Club at the three-quarter-mile track in Golden Gate Park. The races were at three-quarter-mile heats, best two-in-three, and several very close contests and exciting finishes were had during the afternoon. A new horse in the game was the gelding Neko by Nutwood Wilkes, owned by Capt. Ford Thomas of this city, and driven in the race by Frank Burton. He won in straight heats handily, the fastest heat in 1:47. The other winners during the afternoon were Charles Beckers' Charley B., George Giannini's Geo. Perry, Joe Giannini's Golden Buck, and Thos Corcoran's Lady Falrose. The fastest heat of the day was 1:39, made by the pacer George Perry. W. J. Kenney did the starting. The summaries:

First race, 2:20 trot—
Charley B. (Charles Becker) 1 1
Babe (William O'Kane) 4 2
Prince H. (Henry Helbush) 2 3
Time—1:44, 1:44 1/2

Second race, free-for-all—
George Perry (George Giannini) 3 1 1
Kitty D. (Al Hoffman) 2 2 2
Little Dick (Luke Marisch) 1 3 3
Time—1:39, 1:40, 1:39.

Third race, 2:30 pace—
Golden Buck (Joe Giannini) 1 4 3 1
Lizzie D. (Frank Sillineri) 5 1 2 2
Maggie Murphy (Chas. Faulkerson) 2 2 1 3
Time—1:46, 1:48 1/2, 1:48 1/2, 1:47.

Fourth race, 2:30 trot—
Neko (Frank Burton) 1 1
Lileth (F. Lauterwasser) 4 2
Monk (Fred Clotere) 3 3
Time—1:48 1/2, 1:47.

Fifth race, 2:20 pace—
Lady Falrose (Thos. Corcoran) 1 3 1
Harry Hurst (A. Scofield) 2 1 2
Sidney B. (Frank Burton) 3 2 3
Time—1:41, 1:43 1/2, 1:41 1/2.

THE MCKINNEY STALLION GRECO B.

The very promising young stallion, whose picture is shown on the front page of the Breeder and Sportsman this week, is the premier stallion of the Brace Farm, at Santa Clara, and will be sold with all the other horses on the farm at the dispersal sale, to be held on Saturday, November 2d, at the farm.

Greco B. was trained by Chas. De Ryder during the spring of 1906, and worked a mile in 2:12 1/2. He was taken East to race, but took sick and did not get a record, being started but a very few times. He is a coal black stallion, stands 15.3 and was foaled in 1900. He was sired by the great McKinney 2:11 1/4, whose fame is known to every horseman in the United States as the greatest sire of trotters that ever lived. He having sired more trotters in the select 2:10 list than any other sire living or dead.

Greco's first dam is Alein 2:26 1/2 (registered, page 311, Vol. 11, A. T. R.), by Anteeo 2:16 1/2, he by the great Electioneer, out of Columbine by A. W. Richmond. Alein is the dam of Mowitza 2:20, Sister 2:20 1/2, and Greco (trial) 2:12 1/2.

Greco's second dam is Lou Milton, by Milton Medium, he by Happy Medium, who is the sire of the one-time champion, Nancy Hanks 2:04.

Lou Milton is the dam of Lou Dillon 1:58 1/2 (champion trotter of the world), Redwood 2:21, Alein 2:26 1/2, and Ethel Mack 2:25.

Sister 2:20 1/2, is the dam of Sally Pointer 2:06 1/4. By scanning Greco's pedigree one can readily see that he carries the blood close up of such trotting champions as Lou Dillon 1:58 1/2, Major Delmar 1:59 1/4, Sweet Marie 2:02, Nancy Hanks 2:04, and last but not least, of Sonoma Girl 2:05 1/4, as both Sonoma Girl and Greco are out of dams sired by Anteeo 2:16 1/2.

Greco's oldest colts are but three years old, and but two of them have had any regular training, and each have shown a 2:20 gait at the trot. A two-year-old by Greco has been a mile in 2:31 1/2, last quarter in 35 1/2 seconds, this summer.

Among others there will be twenty-two of Greco's sold at this sale. These colts are from weanlings to three-year-olds. Write Fred H. Chase & Co., 478 Valencia street, San Francisco, for a catalogue, if you have not already received one, and be at the Brace home place, New Park, Santa Clara, the morning of the sale and see the horses and colts driven or led. The sale takes place November 2d.

It has been decided by the Cleveland Driving Club to abandon its track at Glenville, made historic from the fact that Maud S. trotted to her record over it, and an option has been secured on the Forest City Farm, Randall, Ohio, owned by Bert Shank. The farm contains 236 acres, large enough for not only the grandstand and a mile track (it already has a half-mile track), but for exposition buildings as well. Under the new order of things confronting the trotting horse world, plans will be made for holding a big fair. Of course, the matinees will be conducted there.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

SWEET MARIE AND MAJOR DELMAR.

Allentown, Pa., October 16.—Two world's trotting records were broken this afternoon on the Allentown Fair Track before 10,000 people.

In the match race for \$5,000 between Sweet Marie and Major Delmar, best two-in-three heats, the fleet mare won in straight heats, and incidentally broke the half-mile track world's record for a regular one-mile race. Her best time was 2:08, made in the second heat, beating the former record of 2:03 3/4, held by Dandy Jim. Sweet Marie's time in the first heat was 2:10.

The other record was made by George G., this season's unbeaten trotter, which, paced by a runner, broke the world's half-mile track record for an exhibition mile. His time was 2:06 3/4. The former record was 2:07, made by Sweet Marie on the Allentown track September 20th, this year.

In the match race Sweet Marie was very steady, while Major Delmar had trouble in making the turns. The latter went off his feet in making the first turn in the first heat, losing three lengths, which he nearly made up at the wire, being a neck behind the winner. In the second heat Alta McDonald had pushed the gelding ahead in the first eighth and gained two lengths to the quarter. Nearing the three-quarter pole Major Delmar broke, and Sweet Marie won with ease in 2:08. The summary:

Special match for \$5,000—
Sweet Marie, b m by McKinney (Andrews) 1 1
Major Delmar, b g (McDonald) 2 2
Time by quarters—First heat—0:33, 1:06, 1:38, 2:10. Second heat—0:33, 1:04 3/4, 1:35 3/4, 2:08.

Special race against time—
George G., b g by Homeward (McDonald) Won
Time—2:07. Time by quarters—0:31 1/2, 1:02 1/2, 1:34 1/2, 2:06 3/4.

Poughkeepsie, October 22.—Major Delmar defeated Sweet Marie in a match race for a purse of \$2,500 at the Hudson River Driving Park this afternoon, winning two out of three heats. The race produced the fastest three heats ever trotted on this track in a race. Major Delmar drew the pole and led all the way in the first heat. It was a great race in the home stretch, both drivers urging their horses, and Delmar won at the wire by a neck. In the second heat Major Delmar broke on the word and lost ten lengths.

He was fast, however, and was not more than a length behind at the half-mile. Sweet Marie led by two lengths at the upper turn and maintained the distance to the finish. McDonald stole the pole for the third heat on the turn, and was two lengths in the lead at the quarter. At the three-quarter pole the horses were on even terms, but entering the stretch the mare broke, and Major Delmar won easily by two lengths.

In the three-year-old match race between Rhythmic Bell and the Native for a purse of \$5,000, McHenry drove Rhythmic Bell to victory after being beaten in the first heat in 2:17 1/2. The black colt came back and won the second heat in 2:15 3/4, and took the third in easier fashion. Summaries:

Match race, purse \$2,500—
Major Delmar, by Delmar (McDonald) 1 2 1
Sweet Marie, b m by McKinney (Andrews) 2 1 2
Time—2:07 3/4, 2:06 1/2, 2:06 1/2.

Match race, purse \$5,000—
Rhythmic Bell, blk c by Rhythmic (McHenry) 2 1 1
The Native, b c by Moko (E. T. Murphy) .. 1 2 2
Time—2:17 1/2, 2:15 3/4, 2:16 1/4.

TRACK AND FAIR GROUNDS AT CHICO.

The Chico Driving Association has been incorporated with a capital stock of \$50,000, and a tract of sixty acres of fine land has already been purchased for \$12,000, on which a mile-track and fair and athletic grounds are to be laid out. The track is to be on the Entler Place, about a mile and a half south of Chico, on the Oroville road.

The site has been selected after looking over a number of available pieces of land and is believed to be suitable to be worked up into a fine course.

Among the other advantages on the land is a water right, and it is the intention of the members of the proposed company to put out all the land possible in alfalfa.

The Entler property is accessible to two railroads, the Northern Electric and the Butte County, so that shippers will be able to unload right at the track.

Many trainers and owners since it has become known that Chico was to have a track have announced their intention of locating at Chico.

The following are the directors elected: Wendell Miller, L. H. McIntosh, W. J. O'Connor, Frank Colm, J. R. Adler, Park Henshaw, L. B. Daniels, Fred Parks, Archie Bennett, H. B. Reed and J. W. Roper.

Invariably there is a good story that goes with a good horse, and Hedgewood Boy 2:04 1/2 is not an exception. He was bred down in Southern Illinois and became the property of his present owner, J. C. Crabtree, of Hillsboro, Ill., when he was a two-year-old, Mr. Crabtree purchasing him along with a full sister for \$270. Aside from his racing campaigns and stud services he has made one-half of a team this season to plow and put in forty acres of corn.

THE LEXINGTON MEETING.

Three and Two-Year-Old Trotting Records Lowered During Second Week.

October 12.

Trotting, 2:20 class. (Four heats October 11th). Purse \$1,000—

Icon, b m by Peter the Great (Johnson)	5	5	2	1	1	1
Idora, b m by Elyria (Shanks)	3	8	1	2	2	2
Princess Yetive, b m by Parole (Greer)	1	2	5	5	3	3
Busy, b m by Rocco (Carlos)	2	1	3	4	4	4
Marjorie, 6-4-3-ro; St. Valiant Vincent, 4-3-6-7-ro; Dan K., 7-6-7-10-ro; Gladys, 9-7-8-6-ro; Alfio, 12-9-10-8-ro; Lucy Montrose, 11-11-9-9-ro; St. Peter, 10-10-dis; Albert Jay, 8-dis.						

Time—2:11¼, 2:12¼, 2:12¼, 2:12½, 2:12½, 2:11¾.

Trotting, 2:24 class, Johnston Stake, \$2,000—

Tempus Fugit, ch g by Mark Time (Geers)	1	1	1	1
Alice Edgar (Benyon)	2	2	2	2
Tokio (Dickerson)	3	3	5	5

Lottie M., b m (Long)	4	3	2	3
Vanya, 7-5-4-6; Dr. Munson, 6-7-3-4; King Cole, 5-6-5-dis; Anda H., 8-8-dr.				

Time—2:11½, 2:12¼, 2:13¼, 2:12¼.

October 14.

By winning the Wilson Stakes to-day William O. proved himself to be one of the gamest campaign pacers raced in many years. It required seven heats to decide the event. Notwithstanding the chilly weather, the card was the best of the meeting. It required little effort on the part of Wilkes Heart to defeat the splendid field of trotters in the 2:08 trot, as he won both heats handily, reducing his record from 2:07¼ to 2:06½. Emboy, the winner of second place, trotted the first half of each heat in 1:01½, but he was not able to keep up the pace and win at the end.

The two-minute pace was an easy victory for Angus Pointer. Pacemaker won two heats, C. W. M. one heat and Harry D. one heat of the 2:14 pace, which had to be postponed on account of darkness. Siliko attempted to beat the world's stallion record, but failed. The summaries:

Pacing, 2:12 class, best three-in-five, the Wilson Stake, \$2,000—

William O., blk g by The Director General (Geers)	1	8	7	1	8	2	1
Hal R., br h (Hedrick)	5	5	8	2	1	1	2

Chestnut Bell, ch m (Bailey)	8	8	dr	dr

Time—2:09¾, 2:10½, 2:09¾, 2:10½.

October 15.

An accident prevented the world's stallion record from being beaten to-day, when Mainsheet, having trotted three-quarters of a mile in 1:33½, caught his hoof in his quarter boot and went to his knees as he was trotting the last quarter of the mile. The accident occurred near the last eighth pole. Mainsheet had trotted the first eighth of the last quarter in fourteen sections and was going strong when the accident occurred.

Jack Leyburn, the chestnut gelding owned by Edward and Joseph Madden, sons of J. E. Madden, won the Walnut Hall Farm cup, valued at \$500, and a \$3,000 stake. Ed Geers, who had won the stake three times before, drove the winner. The race proved easy for the winner, as he jogged home three lengths to the good in the second, third and fourth heats. T. W. Murphy, driver of Pacemaker, winner of the 2:15 pace, was fined \$100 for laying up the first heat. Summaries:

Pacing, 2:14 class, three-in-five, purse \$1,000—

Time—2:11½, 2:11½, 2:10¾.

October 16.

Highball annexed to his list of winnings for this year the famous McDowell Stakes for 2:09 trotters in easy fashion to-day. Much disappointment was experienced because Lillian R. did not start against Highball, as it was generally conceded that she is the only horse here in Highball's class except Sonoma Girl and Wilkes Heart, which were not eligible to the race.

Highball was driven by Ed Geers. The winning of the McDowell made the fourth stake that Geers has won during the meeting. Tuna was distanced in the first heat, leaving Baraja, Emboy and Athasham to compete with Highball. Highball, however, had no trouble in winning in straight heats, and within one-quarter of a second of the track record.

The Lexington Stake for two-year-olds was won by Benvolo, after Helen Hale had trotted the first heat in 2:13¼, the fastest mile ever trotted in a race by a filly of that age.

Lady Maud C. and Hedgewood Boy, sister and brother, had the unique distinction of winning the 2:10 pace and the 2:07 pace in the most exciting finishes of the meeting. Summaries:

Trotting, 2:09 class, McDowell Stakes, \$3,000—

Highball, b g by Dr. Hooker (Geers)	1	1	1	1
Baraja, b g (Hussey)	2	3	3	3

October 17.

Through the defeat of Tempus Fugit in the first race here to-day the talent was given the hardest blow of the meeting. After scoring several times for the first heat the starter let the field go with Tempus Fugit in the rear, and in a break as he passed under the wire. Before Geers could get him on his feet the other horses were a quarter of a mile in the lead, and he was hopelessly shut out.

Florence and St. Peter also caught the flag in the first heat, which was full of mishaps. Codero, getting a flying start, trotted away from the field as if he was much the best and won easily. Margaret O. easily took the next three heats. After the second heat the best Codero could do was to trail the field and take second money in the final summary.

Out of ten starters in the second race, for 2:17 pacers, five caught the flag in the first and second heats. Major Mallow had no trouble in winning in consecutive heats.

Considerable surprise followed Lottie M.'s taking the first heat in the 2:18 trot, but Icon took the next three heats handily, winning the race. Summaries:

October 18.

General Watts, the three

NOTES AND NEWS

Enter in the Stakes.

Unstaked colts do not sell for the most money.

The Brace sale next Saturday at Santa Clara.

Many good ones are in this dispersal sale.

The California and North Pacific Circuits will be better and bigger than ever next year.

The California Breeders' Futurity, the Canfield Stakes and the Western Horseman's Futurity all close November 1st.

Sherlock Holmes defeated Copa de Oro in the match race at Lewiston, Idaho.

William Jones of Butte, Mont., was a heavy buyer at the Lexington sale.

T. J. Wilkins of Wilgins, Cal., purchased the seven-year-old brown mare Highland Maid by Cicero at the Lexington sale for \$125.

Highball and Sonoma Girl have met six times this year and each has beaten the other three times.

The story going the rounds that the black pacer by Titus worked a mile at Los Angeles recently in 2:02 is said to be untrue. He has been out of training for two months and has just been started up again.

Wilkes Heart 2:06 $\frac{1}{4}$ was lapped on Sonoma Girl's sulky when she trotted the third heat of the Transylvania in 2:05 $\frac{1}{4}$.

Baron McKinney, the three-year-old son of McKinney 2:11 $\frac{1}{4}$, owned by Hillandale Farm, trotted a mile for John Dickerson in 2:10 $\frac{1}{2}$ at Lexington, Ky.

Five stakes of \$1,000 each to be trotted and paced for at the Arizona Territorial Fair from November 11th to 16th will close for entry on Friday next, November 1st.

Lon McDonald drove Audubon Boy for Jimmy Gattcomb in the 2:00 pace at Lexington and got second money out of it.

"Knap" McCartby ran a splinter into his hand and after it was extracted blood poison set in, due to the coloring matter in a pair of gloves. Because of this, Geers drove Jack Leyburn in the Transylvania.

Joe Brown 2:08 $\frac{3}{4}$, a recent comer to the list of 2:10 pacers, is an own brother to Blacklock 2:04 $\frac{1}{2}$.

Turley 2:07 $\frac{3}{4}$ was put up at auction at Lexington, but as \$900 was the highest bid on him he was not sold.

It is said that General Watts (3) 2:06 $\frac{3}{4}$ cost his owner, General C. C. Watts, \$1,600. He first bought a half interest in him for \$1,000 and then paid \$600 for the other half.

Mike Bowerman won five Futurities this year.

Coral 2:18 $\frac{1}{2}$, sister to Anteo 2:16 $\frac{1}{2}$, Antevolo 2:19 $\frac{1}{2}$, Anteros and others, died October 2d at the farm of her owner, M. D. Murray, Johnstown, New York. She was the dam of Norcal 2:20 $\frac{1}{4}$.

Seven of the new 2:10 trotters of 1907 trace to Miss Russell, dam of Maud S. 2:08 $\frac{1}{4}$.

Bell Bird (11) 2:20, dam of Wild Bell 2:08 $\frac{1}{2}$, is the first 2:10 producing daughter of the famous Beautiful Bells 2:29 $\frac{1}{4}$.

Athasham 2:09 $\frac{1}{4}$ was timed in 2:07 $\frac{3}{4}$ in the third heat of the Transylvania, in which he finished fifth. Sonoma Girl was first and her time was 2:05 $\frac{1}{4}$.

The Axworthy family was in the limelight at Lexington last week. General Watts, a son of Axworthy, won the three-year-old division of the Futurity, and Dorothy Axworthy, a daughter of that horse, won second money in the two-year-old division of that stake, being beaten by only a nose in 2:12 $\frac{1}{4}$.

A yearling pacer by Jay McGregor, W. L. Spears' great sire, and out of a daughter of Baron Wilkes, created a sensation at the Lexington track last week, when Will Evans drove the precocious youngster a quarter in 30 $\frac{1}{4}$ seconds. This baby never made a skip or mistake of any kind.

The three greatest money winning mares in recent years on the Grand Circuit have been from the Pacific Coast. Sonoma Girl 2:05 $\frac{1}{4}$, from Santa Rosa, heads the list with \$26,250 to her credit, won this year; Sweet Marie 2:02, from Los Angeles, is next with winnings in 1904 amounting to \$23,825, while Arrella 2:06 $\frac{3}{4}$, bred in Washington, but campaigned on the Grand Circuit by Millard Sanders for the Santa Rosa Stock Farm, won \$21,600 in 1902.

The black filly Zelma by Beasant, out of Zephyr 2:07 $\frac{3}{4}$, by Zombro 2:11, took a trotting record of 2:28 $\frac{1}{4}$ at Lexington this year. She is a four-year-old.

Mr. J. B. Stetson, who trained a few of his horses at Pleasanton last winter, has purchased a farm near McMinnville, Oregon, and will make that place his home. He has opened a public training stable at the McMinnville track.

The two \$5,000 purses at the Oregon State Fair this year cost the association \$2,250 net, and for this they got four excellent races, in which the records for both trotting and pacing on the North Pacific Circuit were lowered.

Cascara G., a brown filly by Greco B., out of Sister Susie, by Directum 2:05 $\frac{1}{4}$, second dam by Bell Alta, son of Williamson's Belmont, is a trotter. She was bred by the late Monroe Salisbury, and was foaled in 1906. She'll do to buy at the Brace dispersal sale on her breeding alone.

Mr. F. J. Kilpatrick intends leaving for New York in about a month and will remain there during a portion of the winter. He will be at the Old Glory sale and it would not surprise us if he were a bidder on some of the young Axworthy stallions that will be offered. Mr. Kilpatrick believes that young stallions by Axworthy, Bingen, Moko and Todd should be brought to California to cross on the many grandly bred mares now owned here.

Will Durfee is back at Los Angeles with his horses after a campaign through the California and North Pacific Circuits. His great stallion Coronado 2:09 $\frac{1}{4}$ (public trial 2:07 $\frac{1}{4}$) was taken along on the trip, although but one race on the entire circuit in which he was entered filled. The stallion attracted great attention whenever he was taken on the track, and horsemen everywhere pronounced him one of the grandest trotters they had ever seen. Coronado will doubtless be raced on Eastern tracks next year and should return a big money winner.

CARRIE G., A YEARLING BY GRECO B.

A good prospect and one that has been entered in several rich stakes is the yearling filly Carrie G. by Greco B. 44845, dam that grand little mare Sadie Moor 2:22 $\frac{1}{2}$, by Grand Moor, second dam the dam of three in the list by Pascora Hayward. This filly is to be sold at the Brace sale at Santa Clara, November 2d. She is entered in the Horse Review Futurity, the Pacific Breeders' Futurity and the Occident Stakes. Her sire is by McKinney, out of a half-sister to Lou Dillon 1:58 $\frac{1}{2}$. She can show a three-minute gait now. Don't let her sell for a song. She'll win you some money.

Eli McKinney, brown horse by McKinney, dam El Mac by Electricity, took a time record of 2:18 at Lexington this month. It is not often that one hears of a McKinney starting against time, as they are race horses.

Parole 2:16 died early the present month at the home of his owner, L. E. Brown, Delavan, Ill. Parole made his record as a four-year-old back in 1893, and has been fairly successful as a sire, having now some forty-two performers to his credit, four of them having entered the list this season.

While the Zombro mare, Bellemont 2:13 $\frac{1}{4}$, was at Lexington during the big meeting there she was worked three heats in 2:08, 2:08 $\frac{1}{2}$ and 2:09 $\frac{3}{4}$. This mare had a lot of bad luck early in the season and was unable to start in most of the races in which she was entered. She should be a good winner for her owner, Robert Smith, next year.

William Higginbottom, the horse auctioneer of San Francisco, excels as a seller of light harness horses because of his knowledge of racing affairs and his ability to quickly appreciate a good looking and gaited horse. He is alert, strong voiced, and having a lot of personal magnetism is a star man on the block. He will fill engagements anywhere. Write him for terms and dates.

Very many fast pacers and trotters toe out and consequently brush their knees. The Kentucky Stock Farm says that Gen. Watts 2:06 $\frac{3}{4}$, the champion of all three-year-old trotters, has this fault a little.

Secretary W. H. Gocher of the National Trotting Association has purchased of E. L. Percy Smith, now of Boston, the well known bay trotting gelding Senator L., 2:12, formerly owned by John Shepard of Boston.

Perhaps there's something in a name, after all. Trampfast 2:12 $\frac{1}{4}$, holder of the world's record for two-year-old trotters in a race, might not have been a champion had he been called King Crab or Prince Slowboy.

Says the Kentucky Stock Farm: "W. A. Clark Jr., Mrs. W. A. Clark Jr., Mrs. Cornachan and Mrs. Cheely, all of the 'Golden West,' have been interested spectators at the races during the past week, and incidentally enjoying the superb climate and landscape of the Blue Grass country. On Futurity day, after General Watts' victory, Mr. Bowerman very graciously presented his driving gloves to Mrs. Cornachan and Mrs. Clark, and his whip to Mrs. Cheely."—Kentucky Stock Farm.

A meeting of the directors of the American Association of Trotting Horse Breeders was held at Lexington during the trots last week, at which nineteen of the forty-six members were present. The purpose of the meeting, which was presided over by Hon. J. W. Bailey of Texas, was to discuss the expediency of trying to harmonize the conditions of the various Futurity stakes which are now annually offered by the trotting associations at Lexington and Hartford, and by several turf papers, and bring them all under one plan of racing. Some of these Futurities are now decided on the two-in-three plan and others on the three-in-five, and it is desired to have them all uniform. A committee consisting of Sterling R. Holt of Indianapolis, chairman; F. E. Marsh of Chicago, J. M. Johnson of Boston, H. K. Devereux of Cleveland, and R. C. Estill of Lexington, was appointed for this purpose, and they will appoint a conference at an early date with the sponsors for the various Futurity stakes now in existence—Trotter and Pacer.

Walter Mastin of Sacramento has been very badly crippled with rheumatism, and since the State Fair this year has been laid up twice so that he could not walk. For this reason he wants to sell his magnificent trotting stallion Marvin Wilkes 2:12 $\frac{1}{2}$, one of the fastest and at the same time one of the hand-somest young horses in California. Marvin Wilkes is a result of the famous Electioneer-Wilkes cross, and is only six years old, absolutely sound and a game trotter. He took his record this year. At Woodland his race failed to fill and on the same day that Sir John S. lowered the track's pacing record to 2:04 $\frac{1}{2}$, Mr. Mastin worked his grand trotter five heats. He trotted the fourth heat in 2:11 and the fifth in 2:09 $\frac{1}{2}$, the last half in 1:04 and the last quarter in 31 seconds. Mr. Mastin is confident that with company he could have driven Marvin Wilkes a mile in 2:08 that day. Marvin Wilkes was sired by Don Marvin 2:22 $\frac{1}{2}$, a son of the Electioneer stallion Fallis 2:23. The dam of Don Marvin was Cora by Don Victor, the latter a brother to Venture by Williamson's Belmont. The dam of Marvin Wilkes is Nora B. by Sable Wilkes 2:18, grandam Gracie by Nutwood, great grandam by Jack Hayes, thoroughbred, and great-great grandam Princess by Williamson's Belmont. Marvin Wilkes is not only a very fast trotter, but he will be a side of seped to a certainty. Mr. Mastin says he will sell him so that any live buyer can clear him in the stud next spring. If you want a good horse, one that can win in his class and earn money in the stud, correspond with Mr. Mastin at 1016 Nineteenth street, Sacramento.

THE TRANSYLVANIA.

By winning the Transylvania with Sonoma Girl, October 10th, Myron McHenry enters the select list of drivers who have won the famous classic in succession. Budd Doble won the first two Transylvanias in 1889 and 1890 with Jack and McDoel; W. O. Foote won the race in 1897 with Rilma, and repeated in 1898 with John Nolan, and Mr. McHenry won the stake in 1906 with Nutboy, and this year with Sonoma Girl.

W. J. Andrews has won two Transylvanias, but not in succession. He won with Bouncer in 1895 and with Ethel's Pride in 1905. The fastest time in the Transylvania was made by Tiverton in 1904, in his memorable race with Sweet Marie, which finally conquered him in an endurance as well as a speed contest.

Miss Lotta Crabtree, the owner of Sonoma Girl, is the only woman to win the race two years in succession. Miss Crabtree was also the owner of Nutboy. She was confident the girl from the Coast would capture the aged championship event. Last year Nutboy won the stake on a cold, raw day, and Miss Crabtree did not venture to take a ride in the floral horseshoe. Miss Crabtree is the gamest horsewoman in America. Shortly after she had paid \$26,000 for Sonoma Girl the mare was taken ill and was badly defeated. She was asked about her purchase and she replied:

"It won't be this way always," and her prediction came true. Sonoma Girl is to-day the best trotter in America.

(Continued From Page 5.)

to-morrow on account of darkness. The meeting will close to-morrow. Summaries:

BERTA MAC'S OWNER HOME AGAIN.

Mr. Worthington Parsons of Salinas was in San Francisco last Monday on his way home from a trip through the North Pacific Circuit, where his handsome mare Berta Mac 2:13¼, by McKinney, has been racing in the stable of Henry Helman of Pleasanton. Mr. Parsons enjoyed his trip thoroughly, and says that Helman will leave Portland for Pleasanton the last of this week. Berta Mac is in fine shape and looks ready to make the trip right over again were it necessary. She is the fastest of McKinney's new standard trotters this year and has to her credit very close to \$5,000 won in races during this, her first campaign. She has started eleven times, winning five races, being second twice, third twice and was outside the money twice.

Mr. Parsons says they have had fine fairs and race meetings all through the Northwest this year. The pacing horse Sherlock Holmes 2:06¼ by Zolock, he says, is a very high class horse and will be in Henry Helman's string next spring at Pleasanton. He looks like a 2:03 pacer and shows every sign of being a race horse of class.

Helman will bring several horses down from Oregon to train at Pleasanton this winter. The tracks in the North are not as good as the California tracks, being sandy in most instances, but the people turn out and enjoy the races. The country is

prosperous and the people seem to have money.

Mr. Parsons says he will not train Berta Mac's full brother, Albert Mac, next year, except to give him a slight amount of track work after the breeding season ends. This young stud is now four years old and will be five in July next. He is sound as a new dollar and has a great deal of natural speed, but Mr. Parsons believes a stallion should be matured before being campaigned, and will not race him until his six-year-old form, when he expects him to trot to a low record. He is a very handsome young horse and very popular with the breeders of Monterey county.

Mr. Parsons states that when one can take such a trip as he has just finished and have all one's expenses and a good profit besides paid by a trotter like Berta Mac, there is considerable fun in it, and he feels like going again.

CAUSE OF RUNAWAYS.

On this subject the following from a circular of a prominent life insurance company will be read with interest: "Trying to make the old harness last a little longer leads to one out of every four runaways. In other words, two hundred and fifty mishaps out of one thousand are caused by breaking or coming apart of the rigging. It has been often said that few persons who drive know when a horse is properly harnessed, and fewer still give due attention to the soundness and correct adjustment of the tackle. This statement is borne out by the records, which show that sixty-two runaways out of 1,000 are caused by traces becoming detached, ninety-seven by broken reins, sixty-five by broken or bad breeching, twenty-six by broken bits or bridles and ten by broken girths. In rare instances there are hidden defects in harness which cannot be detected, but it is safe to say that careful examination of the parts and their adjustment on the horse would prevent ninety per cent of the accidents caused by broken harness and improper harnessing.

"Worn out and defective vehicles cause almost as many accidents as imperfect harness, showing incidentally the wisdom of buying a carriage of reliable make in the first instance, and then keeping it in good repair. To wheels running off the axles, eighty-two runaways out of 1,000 are due. Such mishaps will seldom happen if due care

is given to seeing that the nuts are tight, since the turning of the wheels tends to keep the nuts on and not to screw them off. Broken axles caused six accidents; broken kingbolts, twelve; broken shafts, ten; all the breaks together thus falling short of the number of carelessly attached wheels.

"Of the objects which frighten horses, automobiles easily hold first place. These and the motorcycles are indirectly responsible for about as many runaways as all other objects together, and it may be added that it is the reckless operation of the motor vehicles rather than the vehicles themselves which frightens most of the horses. Automobiles caused one hundred and thirty runaways out of 1,000 and motorcycles caused forty-eight more."

ANSWERS TO CORRESPONDENTS.

A. E. Poole, Marysville.—We have no record of the breeding of Corset Boy. If you can give particulars as to where he was bred, his age and former owners, perhaps we can aid you in tracing his breeding.

R. M. Cook, Coalinga.—Clay 2:25 was by Electioneer 125, dam Maid of Clay by Henry Clay 8. He was bred at Palo Alto Stock Farm. He has sired thirty-one standard performers, including Edwin C. 2:07 and Exploit 2:08½, both pacers. There were several mares called Lady Graves, but we presume you refer to the one bred in this State by Robert Graves of this city. She was by Nutwood 600, out of Lady Babcock by Hambletonian 725. She produced Sulwood 2:20, Nadjy 2:26 and Aeriton 2:27½, and has two producing sons and one producing daughter. Imported Kyrle Daly was an imported thoroughbred by Artillery, out of Colleen Rhue. Vandal was a thoroughbred horse by imported Glencoe, out of the dam of Levity by imported Tranby. There are so many Lady Moores that we cannot give the breeding without more definite information.

Henry Delaney, Los Angeles.—Maxie Cobb was a bay stallion, foaled 1875 by Happy Medium 400, dam Lady Jenkins by Black Jack, son of Black Hawk 24. Maxie Cobb was a standard and registered horse, his number being 1326. He took the world's stallion record of 2:13¼, trotting, at Providence, Rhode Island, September 30, 1884, and held it until Axtell lowered it to 2:12 as a three-year-old in 1889.

\$7,000 Guaranteed

\$7,000 Guaranteed

California Breeders Futurity Stakes No. 1

BY THE

California Breeders Association

For Foals of Mares Covered in 1907 to Trot and Pace at Two and Three Years Old

Entries to close Friday, November 1st 1907

ONLY \$2 TO NOMINATE MARE

\$4250 for Trotting Foals.

\$1750 for Pacing Foals.

\$800 to Nominators of Dams of Winners and \$200 to Owners of Stallions

MONEY DIVIDED AS FOLLOWS:

\$2500 for Three-Year-Old Trotters.

\$1500 for Three-Year-Old Pacers.

\$200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Trot.

\$200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Pace.

\$1250 for Two-Year-Old Trotters.

\$750 for Two-Year-Old Pacers.

\$200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Trot.

\$200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was Bred.

\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was Bred.

Entrance and Payments—\$2 to nominate mare on November 1, 1907, when name, color, description of mare and stallion bred to must be given; \$5 April 1, 1908; \$5 November 1, 1908; \$10 on Yearlings, April 1, 1909; \$10 on Two-Year-Olds, April 1, 1910; \$10 on Three-Year-Olds, April 1, 1911.
Starting Payments—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.
 Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.
 Colts that start at two years old are not barred from starting again in the three-year-old divisions.

CONDITIONS.

The races for two-year-olds will be mile heats, 2-in-3, and for three-year-olds 3-in-5. Distance for two-year-olds, 150 yards; for three-year-olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before April 1, 1909, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907

Entries must be accompanied by entrance fee. Nominators liable only for amount paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7,000, the amount of the guarantee, only. Hoppies will not be barred on pacing horses.

Eight reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

C. A. CANFIELD,
President.

JOHN W. SNOWDEN, Secretary,
526 San Pedro St., Los Angeles, Cal

BROODMARES WANTED.
Three well bred broodmares in foal to good stallions. State price, breeding and all particulars. Address **ANDREWS, Care Breeder and Sportsman, 616 Golden Gate Ave., San Francisco.**

JERSEYS, HOLSTEINS AND DURHAM'S—Dairy Stock a specialty. Hogs, Poultry. Established 1876. Wm. Niles & Co., Los Angeles, Cal.

CONDUCTED BY J. X. DeWITT

STOCKTON SHOW.

The Stockton Kennel Club show last week while very good in class and quality was not, as we have already stated, up to the numbers of previous shows. The show hall was well ventilated and lighted, the benching and feeding was done by Spratts, and was well done, as is usually the case. The officers of the club are: F. N. Vail, president; W. H. McKay, first vice-president; C. E. Owen, second vice-president; R. H. Groves, treasurer; A. M. Barnett, secretary. Bench show committee: R. H. Groves, Chas. Heffernan, C. E. Owen, Francis Hodgkins, Harry Masters and W. H. McKay. Dr. J. H. Eddy, veterinary surgeon.

Thos. J. Blight of San Francisco acted as superintendent. The smooth running of the show and attention to many details is due to Mr. Blight's painstaking efforts. Chas. G. Gilbert, as ring steward, was courteous, efficient and painstaking.

The judging of regular classes began Monday afternoon and was concluded Tuesday evening. A number of specials were awarded on Wednesday. On Wednesday evening President F. N. Vail presented the cups to the winners. The cup and trophy specials were the best and most numerous the club has ever offered, the cash value of the specials was close to \$2,000. The attendance on the closing night was large and enthusiastic.

The judge, G. W. Clayton, had comparatively easy classes until the Cocker were taken into the ring. In this breed, if the dissatisfaction expressed by many Cocker fanciers is sincere, he will not draw a large Cocker entry at future shows. The same may be stated in regard to other breeds. The work of passing on the various classes was done, as a rule, in a leisurely manner. Announcement was made Tuesday afternoon that judging would be continued at 8 P. M. It is decidedly disappointing, not inconsiderate, for exhibitors and spectators to wait a full hour for the judge to enter the ring.

It will be for the good of dogdom generally when the well meaning but often disappointing custom of offering certain specials at bench shows has become obsolete. The specials for best in the show, for best owned and shown by a lady, etc., while pleasing in a way are, at times, conducive to conditions that are not in harmony with the ethics of a bench show.

We refer here to the special prize competition at Stockton "for the best in the show of any breed." This brought together a number of ladies and gentlemen whose dogs had won firsts and were eligible. It is needless to say that much disappointment is felt by the majority of those who "get the gate." Finally, the inspection narrows down to two or three dogs, usually the prize is awarded to the owner of one dog. But in a case where the Solomon-like substitute of dividing the award, and where but one cup was offered, giving an equal first to each exhibitor, the owner of Ch. Endcliffe Tortora and Brooklyn Patsy, as occurred at Stockton last week, such a conclusion is vacillating. One dog was enough better than the other without doubt, it was up to the judge to decide. For that matter, this particular competition had been settled by no less an authority than Mr. George Raper at the last San Francisco show (and it cannot be denied that he is a judge of Terriers). Ch. Endcliffe Tortora was the winner of the California Jockey Club plate for "best in show owned and exhibited by a lady."

This division of a special was made twice more, once for the special for "the best owned and exhibited in the ring by a lady," and again "for the best Terrier (either sex) in the show."

The judge gallantly offered to donate three extra cups—the cups could not be split in twain, though the record can be, thus giving each winner three cups. If we are not mistaken, most exhibitors want wins out and out, the intrinsic value of a cup being entirely a secondary consideration for a sportsman.

Out of town visitors were many at the show, all of whom were full of praise for the club members and officials of the show. A review of breeds is given below:

In the large breeds, St. Bernards had three benched, Oakdene Rex easily winning first honors, he could be stronger in muzzle and is not too good behind. Nig, an old bencher, won out in Great Danes over his son, Dick, a fairly good sort; three others shown were only ordinary.

Two excellent Greyhounds, The Widow and Mr. Longers, were benched, both have won on the coursing turf and on the show bench.

American Foxbounds brought out two workmanlike dogs in the black-and-tan Ned and Queenie, a black tan and white bitch. This brace were shown in fine condition, and in substance and finish are a bit better than usually shown at Coast shows.

Pointers were eight in number, and not a bad one in the lot, excepting one. Victor Joaquin, first winners, should have given way to his litter brother, Royal Dan. The latter has properly hung ears, better feet and pasterns. Both are sons of Doc Daniels ex Stockton Belle and the kind sportsmen like. Mike Gary is too light in eye and wide in skull, but for

all that, is a working Pointer from the ground up. Two good hitches were shown, Stockton Belle went over Beauty Bell. The Pointer Mason's King was brought to the ring, but not judged, the bench show committee deciding that an irregularity in entry barred the Portland dog. Both Victor Joaquin and Royal Dan can pass King. The matter will eventually be decided by the Pacific Advisory Board.

English Setters developed two excellent puppies, Mallwyd Beau and Lady Dorrie M., by Mallwyd Bob Jr., out of Lady Kate. Tiverton, first winners, seemed to be a trifle too thin in body. Fleets Sergeant was used out for reserve winners by Mallwyd Beau, the nine-months-old puppy, who has not the body, bone, general finish or coat and feather that is in Sergeant's makeup. Lady Dorrie M., in the absence of Ch. Sue Gladstone, had no competition in her classes. Lady Kate, in fine fettle, was in for exhibition only. Mallwyd Bob Jr. was also entered for exhibition. Tiverton's win gave him championship honors.

Gordons had five hench, six other entries being absent. Doc, first winners, is now a champion. Mike S. has a fair head, good color and coat, but is too light boned. Pit should have gone over Nellie C. in winners, the latter for one thing has an extreme under-shot jaw and Bulldog set of teeth. Pit is rather light, but a cleaner built one. None of them are first raters.

Phil Law, first in Irish Setter puppies and reserve winners, is a promising youngster, with well finished head, good bone, coat of the right texture and color. Spudds, first winners, is the type, but too light by several pounds, nevertheless a neat, clean headed, well finished dog, a bit light in color, but with splendid feather and flag. One of the few exceptions where an old dog was not passed by a young one in most of the breeds. St. Lambert Phyllis was alone; she is stylish and will improve, an excellent young one. Halvern Jerry, in for exhibition only.

MRS. GEO. FLEXNER'S LADY HAZEL.

Irish Water Spaniels were a good all-round lot, with the exception of a bit of clipping of coats, in this case a mercy to the heavy coated dogs during the warm days of the show. Pat, alone in his class, is a well developed puppy, with pleasing head, top-knot, color, body and bone substance. Ch. Rowdy Girl, a well known bencher, is a well favored working type. Frisco Babe is good now and will improve. Rosie O'Grady and Elsie L., two, three in open, are both the kind that the breeder looks for and duck hunters want.

Inck Keith Billie and Chesterton Bess are two of the best Field Spaniels yet seen at a Coast show. They are the right thing in the breed, judging from the field performances of the pair since the quail season opened. We are inclined to believe there will be a demand among our upland shooters for Field Spaniels.

Cocker Spaniels had the hanner entry. In black dogs, Feather Breeches, with a long muzzle and Setter head, light in body and loins, with hindquarters contoured like a horse shoe, won out in puppies over Lagunitas Judge, who passes him in every desirable quality. Feather Breeches, first winners over Jimmie, made the Cocker fanciers wonder what they were breeding for if F. B. was the right thing. Jimmie is not a flyer by any means, but there is no comparison between the two. In novice the order could have been Rocco, Burky and Great Scott, which would have met with the approval of a majority of the Cocker fanciers. Ch. Mepals Saxon, in for exhibition, was absent, and Searchlight, for specials only, made good without much effort. In black bitch puppies Cressella Nell was better than Lassie Kathleen in head and body. Kathleen is too light in muzzle. In novice Nell was placed over Juanita III, a better one than either Nell or Kathleen. Juanita has a pleasing head, ears hung well, good eye expression, neat finish and coat, a good shade better one than both. Cricket and Cressella Nancy came together for the fourth time, the latter winning out,

thus making it honors even between the two to date. It was close and either hitches' race. Little John and Tow, two reds, had a walkover in their classes. Ch. Redlight, in for specials, also made good. Delverton Dolores, the well known parti-color first winners, was put down in fine condition. Delverton Tinker Bell, first puppies, other than black, was a pleasing youngster shown, a bit too heavy in flesh, however.

Dachshundes were represented by two, which were lucky winners in the absence of Nordica. One Curly Poodle, Black, a familiar and excellent type.

Airedales had two good ones, about the right size. Motor Dace is the cleaner furnished and better type. Pepper was too fleshy in body.

French Bulldogs brought out nothing new. Those shown are well known benchers and good ones.

Valverde Kennels could not be denied for principal honors in the regular classes and for specials. Valverde Watch, first puppies, first California bred puppies, first novice, a fine young sable, who missed reserve winners by lack of coat more than anything else. Valverde Veto, first winners, put down in proper condition, went past Farallone Roderick without great effort. In bitches, Xantippe of Moreton, first winners, won her championship. Valverde Venus, absent, gave Lodi Bell easy access to reserve winners.

Bulldogs were a light entry. Toreador Venus, first winners, now a champion, and matured into a well set, cloddy brindle bitch, with the head, face and jaws to give her the breed, style and quality. Leeds Caesar (Richard Carle II.) was in better shape than at San Mateo. Margo's Mowgli, first limit, is a fair sort, a bit too straight in the legs.

Brooklyn Patsy, first winners in Bull Terriers, is a steady poser in the ring, second to none, but when given a turn around the ring he carries his stern too gaily.

Silkwood Ben Ali, reserve winners, has improved since the San Francisco show, and was considered to be better than Patsy in head, eyes, punishing shape of jaw and lips. In loins and hindquarters Patsy is a shade better. Ali has a straight front, sound legs and feet. Stiletto Cold Steel is a young dog with the make-up of head and jaws that is desirable in this breed, and altogether a well made-up puppy. Stiletto Tarquin (a litter brother) also has the general make-up that is sought for in the breed. Silkwood Surprise came in for letters alone, whilst Edgocote Al was apparently overlooked entirely. Terry, a dog with a large patch over the left eye, was given third in puppies, a second in novice, and the gate in limit. Whilst the awards in the dog classes were a source of aggravation to many, several decisions in the bitch classes were of a source of equal dissatisfaction. Hartford Ted, a light finished puppy, romped through her classes to reserve winners—in this over Ch. Edgewood Jean II. Ted is neat looking and fairly well finished, but is entirely too light all round, and lacks the substance of Stiletto Vendetta and Queen Bess. Ted is not the lasting kind, her win was in the nature of a surprise. Lady Hazel, first winners, shown in good condition, has improved since the last Stockton show.

Ch. Dick Dazzler, first winners and open, was in excellent show trim. Ascot Roseben, reserve winners, first puppies and limit, is a symmetrical, clean built, dark brindle, evenly marked. Rainier Dick, second limit, is out at the shoulder, wrinkled in muzzle, has bad hindquarters and was in poor condition. Placing Dick over Frisco Cinders was a mistake. In bitches, Ch. Endcliffe Tortora, first winners, and Clancy III. could have been different. Clancy has improved since coming to the Coast. Baby Rose, first novice bitches, over Wonderland Venus and McCusker's Butternut, is open to criticism also. Rose is too low in shoulders and light in muzzle.

Tallac Smasher is a smooth Fox Terrier puppy with head and jaws, ear carriage, body, bone, legs, feet and jacket better than Tallac Tallyho. Mistakes must be palpable when regrets are afterwards expressed. Teddy and Do Do, one, two in limit dogs, should have been withheld, if the efforts of fanciers who are endeavoring to breed to the type of the present is anything worth considering. Multnomah Blue Boy was placed over Sabine Rasper and Wandee Resist, in two classes. Blue Boy's entry was not accepted by the bench show committee, it being claimed that the entry was not received in proper time. At that, Resist is a better dog in head qualities than Blue Boy. In bitches, Tallac Seabreeze, alone in her class, was first winners. Trixie, reserve, first limit and novice, also should have been withheld.

In wires, Humberstone Record, fit as a fiddle, had a walkover for first winners and open. Humberstone Mearns and Humberstone Brittle were on exhibition only. Jack, a taking little dog and stylish shower in the ring, was reserve winners. He is a bit too light, however, to go far in general company. Humberstone Hope, first winners in bitches, was also in good fettle, but had no competition.

Three Pomeranians were pleasing specimens. Miss Breidenhach, the owner of Snowball B., first winners, was awarded second prize for best decorated kennel. One Toy Poodle and one good Toy Terrier filled out the small varieties.

Italian Greyhounds were possibly the record entry for the breed on the Coast, if not in the East. The lot were good ones and made quite an interesting showing in the ring. Dude and Zeldia III. were allowed to run loose about the ring, and proved to be under complete control, coming in to heel and drop-

ping at command like Setters or Pointers. Two of the dogs shown are frequently taken on cottou-tail rabbit bunts in Golden Gate Park, at San Francisco, and are effective locating and running down bunnies.

Awards.

Bloodhounds. Open dogs and bitches—Absent, F. G. Silva's Queen.

St. Bernards. (Rough coated)—Novice dogs—1 Frank E. Warner's Oakdene Rex, 2 Miss Alice Knudsen's Master, 3 Mrs. J. F. Dentoni's King D. Limit dogs—1 Oakdeue Rex, 2 King D. Winners dogs—1 King D., res Master.

Great Danes. Novice dogs—1 Frank E. Schmitz' Dick, 2 F. Noeregard's King George. Limit dogs—1 Nig, 2 Mrs. Harry Masters' King Edward. Open dogs—1 King Edward. Winners dogs—1 Nig, res Dick. Open bitches—1 Blue. Winners, withheld.

Greyhounds. Limit dogs and bitches—1 Dr. Fred P. Clark's The Widow. Open dogs—1 Dr. Fred P. Clark's Mr. Longers, absent Dr. Clark's Mr. Zignegc. Winners dogs and bitches—1 The Widow, res Mr. Longers. Braces—1 The Widow and Mr. Longers.

American Foxhounds. Novice dogs and bitches—1 J. F. Peters' Don, 2 J. F. Peters' Belle. Limit dogs and bitches—1 Don, 2 Belle. Open dogs—1 Carroll Cook's Ned, 2 Don. Open bitches—1 Carroll Cook's Queenie, 2 Belle. Winners dogs and bitches—1 Ned, res Queenie.

Pointers. Novice dogs—1 Wm. Matteson's Royal Dan, 2 J. W. Gibbs' Mike Geary, 3 H. Felt's Rex. Limit dogs—1 Ed Ellis' Uncle Det, 2 Mike Geary. Open dogs (under 55 pounds)—1 F. L. Saibach's Victor Joaquin, 2 Mike Geary. Open dogs (over 55 pounds)—1 F. Rossi's Doc R. Winners dogs—1 Victor Joaquin, res Royal Dan. Limit bitches—1 J. McGlynn's Beauty Belle. Open bitches (under 55 pounds)—1 W. T. Keyes' Stockton Belle. Winners bitches—1 Stockton Belle, res Beauty Belle.

English Setters. Puppy dogs—1 V. Kuehn's Mallwyd Beau, 2 F. Hodgkins' Lingfield Bragg Stock. Novice dogs—1 Ed Weisbaum's Rex Rodfield, 2 Lingfield Bragg Stock, 3 Mrs. R. F. Taylor's Roy. Limit dogs—1 Mallwyd Beau, 2 O. McMahon's Percy, 3 G. Schuster's Lingfield Bragg Flight. Open dogs—1 F. P. Butler's Tiverton, 2 Mrs. B. Allen's Fleets Sergeant, 3 Percy, res Roy. Mallwyd Bob Jr. for exhibition only. Winners dogs—1 Tiverton, res Mallwyd Beau. Puppy bitches—1 M. Manning's Lady Dorrie M. Limit bitches—1 Lady Dorrie M. Open bitches—Absent H. Rock's Ch. Sue Gladstone, Mrs. F. J. Blight's Lady Kate for exhibition only. Winners bitches—1 Lady Dorrie M.

Gordon Setters. Novice dogs—1 R. F. Six's Mike S. Limit dogs—1 A. L. Stuart's Doc, 2 Mike S, absent A. L. Stuart's Rastus. Open dogs—1 Doc, 2 Mike S. Veteran dogs—1 Doc. Winners dogs—1 Doc, res Mike S. Novice bitches—1 Gilbert and Brown's Pit, absent O. Schwaner's Flossie. Limit bitches—1 G. Creyk's Nellie C., absent Flossie, V. Kuehn's Lawn View Belle, A. L. Stuart's Lady of the Hill. Open bitches—1 Nellie C., absent A. L. Holling's Flora B., H. B. Knox's Sis. Winners bitches—1 Nellie C., res Pit.

Irish Setters. Puppy dogs—1 R. H. Groves' Phil Law, 2 B. R. Gianelli's Red. Novice dogs—1 Mrs. S. N. Hodgkins' Spudds, 2 Phil Law, 3 Red. Limit dogs—1 Spudds, 2 Red, absent G. L. Lillies' Reddy Open dogs—1 Spudds, 2 J. Schurer's Sport, absent R. A. Miller's Prince Bruno. R. H. Groves' Halvern Jerry for exhibition only. Winners dogs—1 Spudds, res Phil Law. Puppy bitches—1 R. H. Groves' St. Lamberts Phyllis. Novice bitches—1 St. Lamberts Phyllis. Winners bitches—1 St. Lamberts Phyllis. Braces—1 R. H. Groves' Phil Law and St. Lamberts Phyllis.

Irish Water Spaniels. Puppy dogs—1 Miss Nellie Tubbs' Pat. Open dogs—Absent A. Christensen's Ch. The Gossoon. Winners dogs—1 Pat. Novice bitches—1 Frisco Kennels' Frisco Babe, 2 P. Denton's Irish Lassie. Open bitches—1 Frisco Kennels' Ch. Rowdy Girl, 2 E. B. Knowles' Elsie L., 3 E. B. Knowles' Rosie O'Grady. Winners bitches—1 Ch. Rowdy Girl, res Frisco Bahe.

Field Spaniels. Limit dogs and bitches—1 A. Balfour's Chesterton Bess, 2 E. Hoegeman's Dick H., 3 J. R. Stuart's Judge Casey. Open dogs and bitches—1 A. Balfour's Inchkeith Billie, 2 McKay and Leonard's Teddy Silk. Winners dogs and bitches—1 Inchkeith Billie, res Chesterton Bess.

Cocker Spaniels. Puppy dogs, black—1 G. A. Nieborger's Feather Breeches, 2 W. S. Burnett's Lagunitas Judge, 3 McKay and Leonard's King Lucifer. Novice dogs, black—1 A. Forgessai's Burkey, 2 Mrs. S. Cohn's Great Scott, 3 W. Huskins' Rocco. Limit dogs, black—1 G. A. Nieborger's Jimmie, 2 Mrs. A. M. Knapp's Togo Silk. Open dogs, black—1 Togo Silk, 2 McKay and Leonard's Buzz Silk, absent D. P. Cresswell's Ch. Mepals Saxon, for exhibition only. Miss A. Wolfen's Ch. Searchlight for specials only. Winners dogs, black—1 Feather Breeches, res Jimmie. Puppy bitches, black—1 McKay and Leonard's Lassie Kathleen, 2 Mrs. F. E. Adams' Cressella Nell, 3 McKay and Leonard's Laurel Kitt, res McKay and Leonard's Lauretta, v h c McKay and Leonard's La Fiesta Keepsake. Novice bitches, black—1 Cressella Nell, 2 McKay and Leonard's Juanita III., 3 McKay and Leonard's June, res Mrs. M. E. Maxey's Flossie. Limit bitches, black—1 A. L. Cresswell's Cressella Nancy, 2 G. A. Nieborger's Cricket, absent Mrs. L. Mack's Kentucky Bess. Open bitches, black—1 Cressella Nancy, 2 Cricket. G. A. Nieborger's Winona for specials only. Winners bitches, black—1 Cressella Nancy, res Cricket.

Puppy dogs, other than black—1 C. G. Gilbert's Little John. Novice dogs, other than black—1 Little John. Limit dogs, other than black—1 E. C. Owen's Tod, absent Miss M. Montgomery's Kuchen. Any solid color other than black, open dogs—A. Wolfen's Ch. Redlight for specials only. Parti-color, open dogs—A. Wolfen's Ch. Gypsy Chief for specials only. Winners dogs, other than black—1 Little John, res Tod. Puppy bitches, other than black—1 Mrs. W. C. Ralston's Delverton's Tinker Bell. Novice bitches, other than black—1 Delverton Tinker Bell, 2 McKay and Leonard's Gold Bug II. Limit bitches, other than black—1 Mrs. W. C. Ralston's Delverton Dolores, 2 Mrs. T. J. Blight's Fantana, absent Maud Perry's Polka Dot. Open bitches, any solid color other than black—1 K. N. Stevens' Brownland Babbie, 2 G. A. Nieborger's Patience. Parti-color, open bitches—1 Delverton Dolores, 2 McKay and Leonard's Meggles. Winners bitches, other than black—1 Delverton Dolores, res Brownland Babbie. Braces—1 McKay and Leonard's brace.

Dachshunde. Puppy bitches—1 A. Kaiser's Gretchen. Novice bitches—1 Gretchen. Limit bitches—1 Gretchen. Open bitches—1 A. Kaiser's Glenwood Fraulein, absent Mrs. Phil Wand's Nordica. Winners bitches—1 Gretchen, res Glenwood Fraulein.

Collies. Puppy dogs—1 W. Ellery's Valverde Watch, 2 Constance Nunan's Prince Charley, absent Mrs. B. Freshman's Champion. Puppy dogs, California bred—1 Valverde Watch. Junior dogs, under 18 months—1 W. Ellery's Valverde Veto, 2 C. W. Riffes's Farallone Prince. Novice dogs—1 Valverde Watch, 2 Farallone Prince, 3 Mrs. G. H. Campbell's Bob C., res M. A. Williams' San Joaquin, v h c Hazel Colnon's Laddie, absent Prince Charley. Limit dogs—1 C. F. Riffes's Farallone Roderick, 2 W. Ellery's Southport Stephen, 3 Bob C, void Mrs. E. Kennedy's Prince O'Hazeldean. Open dogs, bred by exhibitors—1 W. Ellery's Valverde Veto, 2 Farallone Roderick. California bred dogs—1 Valverde Veto, void Prince O'Hazeldean. Open dogs, bred in the United States or Canada—1 Valverde Veto. Open dogs, any color—1 Valverde Veto, 2 Bob C. Winners dogs—1 Valverde Veto, res Farallone Roderick. Junior bitches—Absent W. Ellery's Valverde Venus. Novice bitches—1 W. P. Eddy's Lodi Bell, 2 C. W. Riffes's Farallone Nellie, absent S. Ducas' Ormskirik Queen, R. H. Groves' Creighton's Lassie. Limit bitches—1 Wm. Ellery's Xantippe of Moreton, 2 Lodi Bell. Open bitches, California bred—1 Wm. Ellery's Valverde Viola. Open bitches, bred by exhibitors—1 Valverde Viola. Open bitches, bred in the United States or Canada—1 Valverde Viola. Open bitches, tri-color—1 Valverde Viola. Open bitches, any color—1 Xantippe of Moreton, absent Valverde Venus. Winners bitches—1 Xantippe of Moreton, res Lodi Bell.

Poodles (Curly). Open dogs and bitches—1 E. Tripod's Black.

Bulldogs. Novice dogs—1 Mrs. A. Cellier's Margo's Mowgli. Limit dogs—Absent Dr. T. M. Smith's Walsingham Roy. Open dogs, bred in the United States—1 A. H. Hayes Jr.'s Leeds Caesar. Open dogs—Absent Walsingham Roy. Winners dogs—1 Leeds Caesar, res Margo's Mowgli. Limit bitches—1 Mrs. J. P. Norman's Toreador Venus. Open bitches—1 Toreador Venus. Winners bitches—1 Toreador Venus.

Airedale Terriers. Puppy dogs—Absent J. Oliver's Roger. Novice dogs—1 N. T. Messer's Motor Dace, 2 T. R. Thompson's Pepper. Limit dogs—1 Motor Dace, 2 Pepper. Open dogs—1 Motor Dace, 2 Pepper. Winners dogs—1 Motor Dace, res Pepper.

Bull Terriers. Puppy dogs—1 Mrs. C. R. Thorburn's Stiletto Cold Steel, 2 Robert Richard's Stiletto Tarquin, 3 Ed Lyon's Terry, res R. A. Roos' Hartford Tom. Novice dogs—1 Stiletto Tarquin, 2 Terry, 3 Hartford Tom. Limit dogs, over 30 pounds—1 Mrs. H. F. Phipps' Brooklyn Patsy, 2 E. P. Shortall's Silkwood Ben Ali, 3 Stiletto Cold Steel, res Stiletto Tarquin, v h c J. Cawkwell's Silkwood Surprise, absent G. C. Ward's Gem. Open dogs, over 30 pounds—1 Brooklyn Patsy, 2 Silkwood Ben Ali, 3 Stiletto Cold Steel, res Stiletto Tarquin, v h c Miss Jennie A. Crocker's Silkwood. Winners dogs—1 Brooklyn Patsy, res Silkwood Ben Ali. Puppy bitches—1 R. A. Roos' Hartford Ted, 2 Mrs. C. R. Thorburn's Stiletto Vendetta, 3 H. T. McCullough's Peerless Spectator. Novice bitches—1 Hartford Ted, 2 Mrs. G. Flexner's Queen Bess, 3 Peerless Spectator. Limit bitches, under 30 pounds—1 Hartford Ted, 2 Stiletto Vendetta. Limit bitches, over 30 pounds—1 Mrs. G. Flexner's Lady Hazel, 2 Mrs. A. Cellier's Edgecote Roxy. Open bitches, over 30 pounds—1 Lady Hazel, 2 J. I. Sparrow's Ch. Edgewood Jean II. Winners bitches—1 Lady Hazel, res Hartford Ted. Braces—1 Mrs. G. Flexner's brace, Lady Hazel and Queen Bess.

French Bulldogs. Limit dogs—1 Cook and Postley's Loulou. Open dogs—1 Cook and Postley's General de la Mare. Winners dogs—1 General de la Mare, res Loulou. Open and winners bitches—1 Cook and Postley's Ch. Margot de Pantin.

Boston Terriers. Puppy dogs—1 Ascot Kennels' Ascot Roseben. Novice dogs—Absent Mrs. M. McCord's Wapptooe Dexter. Limit dogs—1 Ascot Roseben, 2 A. H. Hayes Jr.'s Rainier Dick, 3 Miss Jennie Crocker's Frisco Cinders, absent Mrs. W. H. Deming's Sassy. Open dogs—1 Miss Jennie Crocker's Ch. Dick Dazzler, 2 Ascot Roseben, 3 Frisco Cinders, absent Sassy. Winners dogs—1 Ch. Dick Dazzler, res Ascot Roseben. Puppy bitches—1 F. Ford's Arroyo Affiliate. Novice bitches—1 Dr. T. M. Smith's Baby Rose, 2 Miss Jennie Crocker's Wonderland Venus, 3 F. Ford's McCusker's Butternut. Limit bitches—

1 Miss Jennie Crocker's Clancy III., 2 Wonderland Venus, 3 McCusker's Butternut. Open bitches—1 Miss Jennie Crocker's Ch. Endcliffe Tortora, 2 Clancy III., 3 Wonderland Venus. Winners bitches—1 Ch. Endcliffe Tortora, res Clancy III. Braces—1 Miss Jennie Crocker's Ch. Dick Dazzler and Ch. Endcliffe Tortora.

Fox Terriers. (Smooth coated.) Puppy dogs—1 W. W. Stettheimer's Tallac Smasher. Novice dogs—1 H. L. Yost's Tallac Tallyho, 2 Tallac Smasher, absent W. W. Stettheimer's Tallac Brush, Tallac Casino. Limit dogs—1 J. M. Howell's Teddy, 2 H. C. Hansel's Do Do, absent W. W. Stettheimer's Tallac Oxford, Tallac Oxygen, Tallac Marlin. Open dogs, bred in the United States—1 F. Fechheimer's Multnomah Blue Boy, 2 F. C. Ackerman's Sabine Rasper. Open dogs—1 Multnomah Blue Boy, 2 W. W. Stettheimer's Wandee Resist. Winners dogs—1 Multnomah Blue Boy, res Wandee Resist. Puppy bitches, absent W. W. Stettheimer's Tallac Echo. Novice bitches—1 Mrs. J. J. Malloy's Trixie, absent W. W. Stettheimer's Tallac Lakebreeze. Limit bitches—1 Trixie, absent W. W. Stettheimer's Tallac Dusky Lassie. Open bitches—1 W. W. Stettheimer's Tallac Seabreeze, 2 Trixie. Winners bitches—1 Tallac Seabreeze, res Trixie.

Fox Terriers. (Wire-haired.) Puppy dogs—1 I. C. Ackerman's Humberstone Victor. Limit dogs—1 E. S. Purnett's Jack, 2 Miss Virginia Joliffe's Humberstone. Open dogs—1 I. C. Toy Poodles. J. Bauman cup for best bitch—M. Friedberger's Toodles. Miss Irene Breidenbach prize for best bitch—Toodles.

DOINGS IN DOGDOM.

The question was raised at Stockton last week as to whether or no Brooklyn Patsy and Ch. Endcliffe Tortora had come together for specials at the last Oakland show. The records show they did not. Brooklyn Patsy won the special for best in the smooth Terrier variety class. There were eight entries in the class; Tortora was not entered in the class.

Ch. Edgecote Peer won the special for best Bull Terrier. Iris won special for best of opposite sex.

Ch. Endcliffe won the cup for best Boston Terrier.

The special for best in the show was won by Hampshire Kennels' Ch. Wandee Knight. O. J. Albee's Ch. Greystone Breadalbane, reserve.

Tortora was beaten by Edgecote Peer and Greystone Breadalbane for the champion class specials, but these three dogs were entered in the class.

At a recent meeting of the San Mateo Kenel Club the following officers were elected for 1907-08: W. W. Stetheimer, president; Chas. K. Harley, first vice-president; Francis Carolan, second vice-president; Irving C. Ackerman, secretary-treasurer; Al Hamilton Hayes Jr. and Miss Jennie A. Crocker, directors.

The personnel of the board is a guarantee for the continuous successful career of the club.

Sid Cummings and A. L. Stuart each handled a large string of dogs at Stockton. Stuart had 12 winners, 6 reserve winners, 28 firsts, 7 seconds and 2 thirds. The cups he received for special wins filled a suit case. Cummings had 3 winners, 3 reserve winners, 9 firsts and 7 seconds. Two of his dogs made their championship points.

Clyde Nestor, owner by R. L. Brown of Chicago, recently joined the Bulldog majority.

Charley Harker is much pleased with a recent litter of seven pups out of Ivel Chaddie by Kentish Monarch. His other bitch, Ivel Betty, is heavy in whelp to Geo. McLean's Ch. Moston Monarch.

Mr. John Dorian of Brooklyn, N. Y., proposes to, in the near future, increase Young Mahomet's stud fee to \$35. He desires to reserve him more for his own breeding purposes, for which purpose he originally purchased him. He believes that constant use and vigorous high quality progeny are incompatible.

Tom Blight as superintendent, and Charley Gilbert as ring steward, deservedly won the praises of everybody at the Stockton show. They kept things moving in jig time. Much credit is due Tom for his energetic work in getting the hall ready for the opening morning. Sunday any other superintendent would have had a fit. Tom got at the dilemma in his usual vigorous and effective style, with the result that everything was ready in ship shape for the exhibitors on Monday morning.

The attention of our readers is called to the advertisement on page 11 of Irish Terriers and Bulldog puppies for sale.

Mr. Ballantyne has been a successful breeder and exhibitor (Belfast Kennels) and knows a "Mick" from start to finish.

The puppy bitches offered are bred on the right blood lines for type, character and jacket—bred in to Ch. Colin and close to Ch. Breda Mixer and Roche Tartar, brother to Ch. Brickbat, and that means there is an excellent chance offered for a desirable outcross for the Bolton Woods Mixer blood on the Coast.

The young brood bitch offered is doubly worth getting. She is bred right and has proven herself an excellent brood bitch.

The Bulldog puppies are by that good young dog King Thud, which George McLean of Los Angeles brought to the Coast. Belfast Cricket is a well set, cloddy bitch of unexceptional breeding.

Mr. Ballantyne can not get away from his doggy affinities, but is handicapped by too many dogs. His Goldfield business interests do not apparently offer inducements to have too many young ones on hand, hence the liberal offer made.

There is a project on foot to organize a kennel club in Goldfield and hold a bench show early next year. If the project matures it is promised the show will be carried out "Goldfield way." Larger money prizes than have ever been hung up in the United States—or any other country.

That will be cutting out a pace, indeed. "While we will not have as large classes as the no money shows, all of the proper breeds will be taken care of." Good for Goldfield.

The owner of a well bred English Setter dog puppy, from three to four months' old can find a purchaser by sending his address and particulars to the Kennel Editor.

Mr. E. J. McCutcheon recently received a fine Cocker Spaniel bitch, Peggie, from O. B. Hark, Bethlehem, Pa., and is well pleased with his purchase.

Peggie was served October 8th by D. P. Cresswell's Ch. Mepals Saxon.

Mr. Jas. Rolfe Jr. is watching the progress of a litter of six nice parti-color puppies, the result of a mating between two parti-color Cocker's he recently imported from England.

Valverde Kennels can now count seven champions on the roster of Collies at the Yountville Kennels.

Searchlight made his championship in less than a year.

The first annual bench show of the Chesapeake Bay Kennel Club will take place in Convention Hall, Jamestown Exposition, Norfolk, Va., November 19th to 22d inclusive, 1907. Entries will close November 4th next.

There will be upwards of \$3,000 cash prizes in regular classes, of which there will be a liberal classification. The list of specials is a large and valuable one, contributed by various specialty clubs and others.

The officers of the club for 1907 are: Allan R. Hanel, president; Richard H. Baker Jr., first vice-president; Miss Edith Turis, second vice-president; Cary P. Weston, secretary-treasurer. Bench show committee: Dr. Jno. E. De Mund, chairman; Robt. H. Sexton, treasurer; Ernest Lester Jones, R. H. Baker Jr., W. H. M. Reed.

The judges and breeds assigned to each are: Brig. Gen. Roger D. Williams, Lexington, Ky.—Bloodhounds, Deerhounds, Whippets. Greyhounds and Foxhound packs.

E. M. Oldham, New York, N. Y.—St. Bernards, Sporting Spaniels, Poodles, Chow Chows, Basset-hounds, Dachshunde, all Toy breeds and Miscellaneous classes.

Mayor J. M. Taylor, Rutherford, N. J.—Great Danes, Pointers, Setters, Retrievers and Chesapeake Bay Dogs.

Dr. Jno. E. De Mund, Brooklyn, N. Y.—Russian Wolfhounds.

Ernest Lester Jones, Culpepper Court House, Va.—Foxhounds and Beagles.

J. I. Behling, Milwaukee, Wis.—Collies. H. T. Peters, Islip, L. I.—Old English Sheepdogs. Jno. Sergeant Price Jr., Chestnut Hill, Pa.—Dalmatians.

Jno. F. Collins, Brooklyn, N. Y.—Bulldogs. Theodore Offerman, New York, N. Y.—Airedales and French Bulldogs.

W. N. Kimball, Lawrence, Mass.—Boston Terriers.

Jas. J. Lynn, Port Huron, Mich.—Bull Terriers, Fox Terriers, Irish Terriers, Scotch Terriers, Welsh Terriers, Skye Terriers, Bedlington Terriers, Black-and-Tan (Manchester) Terriers.

Ernest Lester Jones—Veterinarian.

James Mortimer—Superintendent and secretary of the show. Address up to November 2d, Hempstead, Long Island, N. Y. After November 2d, Jamestown Exposition, Norfolk, Va.

The winners classes at the Jamestown Exposition show for Airedales and Greyhounds have been cancelled by the A. K. C. There were no open classes given in the classification list. That makes it bad for Philadelphia in Airedale entries.

Many disappointments of the amateur trainer may be traced by selecting his pupil from the field trial ranks. For months the dog would rather get out and search for game than point game, and then he is inclined to pronounce his charge worthless.

It is advisable for the beginner to be patient. His friend may have a scrub of the same age pointing staunchly, and putting them together, the sting of criticism from the friend's tongue may cause him to fail to notice the different types of the two dogs. Because the one is already a thing of use, he is inclined to feel ashamed of the thoroughbred for lacking of pointing. Patience is surely a virtue at this stage. When the pup's time does come to exhibit his divine instinct it will be his owners turn to laugh, and "he who laughs last laughs best."

Warranted to give satisfaction.

"SAVE THE HORSE" SPAVIN CURE

Registered U. S. Patent Office

LERNA, Ill.

Troy Chemical Co.: I got one of your bottles of Save-the-Horse. It cured my horse of two bad curbs. Yours, H. E. McPHERON.

READING, Pa.

Dear Sirs: I used "Save-the-Horse" on a very bad curb. It cured the lameness and removed a growth as large as a goose egg. The curb was sprung while training. I raced the horse all this fall, and it has never taken a lame step since I stopped the treatment with your remedy. J. C. MILLER.

TORRINGTON, Conn.

Gentlemen: My horse was lame with hone spavin for four years, had been treated with several different remedies without success. I saw Save-the-Horse advertised in Saturday Post. I ordered a bottle through a druggist, and I thoroughly cured her with two-thirds of the bottle. Through my recommendation I have been the means of your selling three bottles of Save-the-Horse. Yours truly, CHAS. A. THOMPSON.

"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Bole, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior. The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal. Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY of the 20th CENTURY. It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses. Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1215.

Price 25 Cents

All Trainers Should Keep it in Their Stables.
 PRICE—25c, 50c and \$1.00

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Buncbes which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sent by all druggists or sent by mail. Write us for circulars, testimonials etc.

Remington

AUTOLOADING SHOT GUN

The Gun for Ducks

as well as all other wild fowl is the Remington Autoloading Shotgun. No "kick" means increased pleasure, the solid breech means absolute safety, the single barrel means ease in handling. You can afford this modern gun, which secures comfort for the shooter because it lists at the moderate price of \$40, subject to dealers' discount

REMINGTON ARMS COMPANY, Ilion, N. Y.
Agency: 315 Broadway, New York City.

WINCHESTER
HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1886 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

\$7,250 Guaranteed

Only \$2 to Nominate Mare

\$7,250 Guaranteed

Pacific Breeders Futurity Stakes No. 8

TO BE GIVEN BY THE

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1907 to Trot and Pace at Two and Three Years Old

Entries to Close Monday, December 2d, 1907

\$4250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners, and \$450 to Owners of Stallions

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

\$200 for Nominator on whose entry is Named the Dam of Winner of Three-Year-Old Trot.

\$1250 for Two-Year-Old Trotters.

\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

\$750 for Two-Year-Old Pacers.

\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

\$250 IN SPECIAL PRIZES FOR STALLION OWNERS

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize\$100
2d Prize 50
3d Prize 35

4th Prize\$25
5th Prize 20
6th Prize 20

The Above Prizes will be Paid on December 24th, 1907.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings, February 2, 1909; \$10 on Two-Year-Olds, February 1, 1910; \$10 on Three-Year-Olds, February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For Entry Blanks and further particulars address the Secretary.

CONDITIONS.

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twine, or if either the mare or foal dies before February 2, 1909, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contract for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will not be barred on pacing horses.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

THE WEEKLY

BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

THE BIG PRICES, those that attract wide attention when horses are sold, are always paid for those that have earning capacity. Since Robert Bonner died there have been very few men who were ready to pay long prices for trotters or pacers unless they saw an opportunity to get some of the money back, either by winning races or using the animal in the stud. Of course, now and then a millionaire wants a horse that can defeat all others in matinee races and is ready to pay a big price for him; but where one very rich man wants a horse, there are thousands in ordinary circumstances who are always in the market for fast trotters and pacers, but they insist on horses that have a prospective earning capacity. For this reason breeders should see that their colts are well entered in stakes. It matters not how much speed one can show at two or three years old the highest price is not to be had unless the colt has engagements. If the colt is raced by the owner and gets a low record, then he is worth still more money, but the three-year-old that can trot a mile below 2:20 in the spring of the year and that has no stake engagements is not in demand. He will sell, of course, but at a figure that is not large enough to attract much attention. The lesson to be learned from this is to have your colt eligible to as many good stakes as you can afford to. Entrance money is very much like the money you pay to insure your house against fire. In most instances you never see it again as your house does not burn down, but when the house does burn, you find that the investment was a mighty good one and you get it back manyfold. The entrance money in stakes is not a large sum. If your colt does not show speed enough to race you have lost very little; but if he does and wins then you have earned a small fortune. On the whole it is safest and best to insure your house and to stake your colt.

A RICH STAKE for two-year-olds has been opened by the California Jockey Club, to close December 31st. It is for thoroughbred foals of this year and will be run over the California Jockey Club's track during the late fall of 1909. With commendable enterprise and liberality the California Jockey Club will add five thousand dollars to the stakes. The entrance to this futurity is \$10 at time of entry; \$25 unless struck out by December 1st, 1908; \$50 unless struck out by August 15th, 1909; \$150 to start. \$4000 of the added money and all the stake money will go to the winner, \$1000 to second horse and \$500 to third. The distance will be six furlongs. Every thoroughbred foal of 1907 on this coast should be named in this stake. It will be the richest stake ever run for by two-year-olds in California.

HORSEMEN who are returning from the north all speak in glowing terms of the Zolock pacer Sherlock Holmes 2:06 3/4, and some think the detective horse can defeat Sir John S. 2:04 1/2 in a race. Others say the Diablo stallion is the fastest, while there are some that think the little mare Inferlotta 2:04 3/4 can show them both the way round the track. It is the difference of opinion that makes horse racing and if the associations on the coast show enterprise enough next spring to open good purses for the 2:05 class we shall be treated to some of the hottest contests ever seen this side of the Rocky Mountains, as all three horses will doubtless be entered.

EVERY YEAR a number of breeders retire from the business of breeding trotters, but there are new recruits enough to keep the ranks full. Mark W. Potter, the Wall-street lawyer, who owns Rhythmic Bell 2:15 3/4, winner of the \$3,000 match race at Poughkeepsie last week, is likely, through the success of his good colt, to become a breeder of trotting horses. He now owns a farm near North Adams, Mass., where he has a herd of prize winning Jerseys perhaps second to none in the United States, and he may add a select trotting stud to the establishment, with Rhythmic Bell at its head. The big black colt is one of the best bred young stallions in the country, being by Rhythmic 2:06 3/4, out of Cornelia Bell 2:10, by Onward 2:25 1/4, and mated with mares of the right stamp he should be a successful sire. No one in all the history of harness racing has done anything more generous and commendable than Mr. Potter did when he presented to his trainer, C. A. Thompson, his entire winnings in the \$5,000 match race, and his embarkation in breeding trotters would be a distinct accession to the ranks.

JAMES FARLEY, whose home is at Monticello, Virginia, and who is known this country over as the strike-breaker, is in San Francisco, and will stay in the State about two weeks. He is not breaking strikes this time, but is probably looking for trotting and pacing prospects, as he has his trainer and another horse expert with him. Farley owns quite a number of fast horses, and is said to have made an offer of \$30,000 for Sonoma Girl. He owns Judex, Florence Patch, who is said to have paced a trial mile in 2:05 1/2, and Della Patch, who has trotted a trial mile in 2:08. He also owns Prince E. and Cyclone, both of whom hold records on the ice, made at Lake Saranac. His driver attributes Farley's success on ice to a new discovery about the calks used on racing shoes. Most racers use inch and a half calks to keep the trotters or pacers from slipping, but Farley secured the world's record using five calks on each shoe and making them only half an inch long.

TWO RICH STAKES, one for \$30,000 and the other for \$10,000, will close on Monday, November 11th, with Secretary Andrew Miller of the Saratoga Racing Association. These stakes are The Hopeful for foals of mares covered in 1907 to run in 1910, and The Spinaway for filly foals of 1907 to run in 1909. These stakes should receive the patronage of all California breeders of thoroughbreds. It costs but very little to enter in them, and when colts or fillies are to be sold as two-year-olds, stake engagements do more to bring good prices than any other qualification the youngster may have. We ask every owner of thoroughbreds who reads this paragraph to turn to the advertising pages and carefully look over the conditions of these two stakes.

A BAY COLT was foaled October 16th at International Stock Food Farm, Minneapolis, that should be a world-beater according to the development theorists. It is by Dan. Patch, the most highly developed pacing sire in the world, and its dam is Effie Powers 2:08 3/4, a mare that has paced more heats in standard time than any pacer that ever lived. If this colt grows to maturity and is sound, well formed and all right physically, he should be a fast one or else the development theory is not as reliable as its advocates would have us believe.

THE QUICK SELLER in the horse line in San Francisco at the present time is the light express or business huggy horse, that can do this sort of work, is serviceably sound and is offered at \$150 to \$200. The majority of these horses are trotting bred, but little attention is paid to pedigree by either buyer or seller.

IF YOU WANT SHORTHORNS, attend the two sales to be given this month, one at the Howard Ranch, Merced, on the 13th, and the other at Gibson Farm, Woodland, on the 14th. Some fine cattle will be offered at both these sales. See advertisements in this issue.

Get your driving carts for winter work now. Kenney, at 531. Valencia street, has a fine assortment, made especially to stand the strain of road driving. He has plenty of track sulkies and everything in the repair line is attended to promptly.

Rio McKinney, a full brother to Sweet Marie 2:02, is among the yearling trotters that William Simpson will sell at the Fasig-Tipton Company horse auction in Madison Square Garden in November. Mr. Simpson paid one of his rare visits to a racetrack last week on the day of the match between Sweet Marie and Major Del Mar at Poughkeepsie. Though he owns McKinney 2:11 1/4, Axworthy 2:15 1/4, and a great many other noted trotters, his interest in horses seems to be purely that of a student of the laws of heredity. He never drives on the road, employs no trainer, seldom even goes to see a race, and maintains his large and select stud simply to gratify his taste for experimenting in the scientific breeding of trotters.

Sonoma Girl 2:05 1/4 goes into winter quarters the champion trotter of 1907. The challenge issued on her behalf to meet Major Del Mar 1:59 3/4, Sweet Marie 2:02, George G. 2:05 3/4, or any other trotter in training has been declined by those in control of the cracks above named. George M. Wehh, the manager of Sweet Marie, says it is too late in the season to make a race. Alta McDonald also thinks it is too late for Major Del Mar, and as for George G., he says he cannot afford to take the chance of getting him out of the 2:06 class.

THE FIRST RESPONSE.

Rohnerville, Oct. 26, 1907.

Breeder and Sportsman: In the last issue of the Breeder and Sportsman you ask for all stallion owners to give you notice of any new performers by their stallions. I submit the following by Cassiar: Evelyn E. (pacer), foaled 1903, dam Phyllis by Dexter Prince 2:25 Maud McCatee (pacer), foaled 1905, dam Mounty by Green Mountain Boy 2:30

A peculiar incident is that the last named filly is a twin, her twin sister having died at time of foaling. Respectfully,

W. J. EAST.

CORSET BOY.

We will be under obligation to any reader of the Breeder and Sportsman who will inform us how the pacer Corset Boy is bred. He was owned last year in Los Angeles, and we believe was matined there. He is a light bay horse, very tall, with left hind foot white about the fetlock. He also has a very light mane. If any reader of this journal can furnish us the breeding of this horse and the name of the breeder we will greatly appreciate the favor.

BOARD OF APPEALS.

The next regular meeting of the Board of Appeals of the American Trotting Association will be held at the Auditorium Hotel, Chicago, Tuesday, December 3d, for the transaction of such business as may properly be presented to the Board for its consideration. All new applications and written evidence must be received at the office of the secretary not later than November 16th. W. H. Knight, Secretary.

With environments considered, such as the lack of professional talent in developing and the very few well bred mares to which he ever had access, the California bred stallion Sidney Prince 2:21 1/4, son of Sidney 2:19 3/4, is making quite a showing as a sire of speed. Bred at Valensin Farm, Pleasanton, Cal., the big stallion passed as a yearling to Floyd Brothers, Bridgetown, Va., who have owned him since. "Broadrock," in the Richmond Times-Dispatch, gave an interesting account of this horse last week, from which we learn that Sidney Prince has six new standard performers this year and five that have reduced their records. The dam of Sidney Prince is Crown Point Maid by Crown Point 1990, grandam Mollie Askins by Overland.

Miss Katherine L. Wilks, of Galt, Ont., who shares with Miss Lotta Crahtree the distinction of being the most prominent woman of the trotting turf, had not seen a race in which one of her horses was a starter from the time of Sadie Mac's tragic death at Hartford two seasons ago, until the recent Kentucky Futurity at Lexington, in which the great three-year-old Kentucky Todd was the favorite. So confident was Trainer Stinson of Kentucky Todd's success that Miss Wilks decided to see the race, the result of which is well known, the Todd colt being distanced. The next morning Miss Wilks departed for Canada, although her colt had another race later in the week.

A brown gelding by Chas. Derby is offered for sale by an advertiser. This gelding is a four-year-old, a pacer, and is a great prospect. Read the advertisement "Charles Derby Pacer for Sale" in this issue.

The buyer of Greco B. at the Brace sale to-day will get a bargain and secure a stallion that will be a money earner in the stud with any reasonable business management.

NOTES AND NEWS

December 2d is the date of closing

Of Pacific Breeders' Futurity No. 8.

For foals of mares bred this year.

This stake is worth \$7,000. Make your entries with Secretary Kelley.

Fred Chadbourne, the Pleasanton trainer, returned this week from a month's sojourn in the mountains. He is greatly improved in health.

Red Bluff, Chico, Woodland, Santa Rosa, Pleasanton, Salinas, Fresno, Hanford, Tulare, Bakersfield and Los Angeles can be depended upon to give harness races next year. It would be an excellent idea for the representatives from those towns to get together and arrange a circuit. The sooner the better.

Capt. Tom Merry of Los Angeles passed through San Francisco this week on his way home from a four weeks' trip to the scenes of long ago in Oregon. "Hidalgo" looks like a two-year-old, even though his mane is gray and getting thinner.

M. C. Keefer, the popular host of the Hotel Julian at Woodland, and an admirer of the trotting horse, visited Pleasanton and San Francisco this week on business matters.

Det Bigelow of Woodland has a four-year-old Diablo that the Yoloites think is a second Sir John S. This four-year-old is a counterpart of his sire in color and conformation, except that his head has a different appearance, and although he has never had any track work, stepped a quarter on the pace the other day for Bigelow in 35 seconds. Like Sir John S., he is out of a mare by Alcantara Jr. He wears no hobbles and is clean gaited and good headed. He will be trained for the races next year.

Henry Helman reached home from his trip through the North Pacific Circuit on Tuesday last. He brought all his horses through in good shape, the mare Berta Mac 2:13½ by McKinney looking especially good. The two-year-old Baron Bowles, by Baron Wilkes Jr., is also in good shape and should get a low record next year. After Sherlock Holmes 2:06¼, the Zolock pacer, makes a short season in the stud next year he will be sent to Helman at Pleasanton to be put in shape for the racing season of 1908.

Among the California horsemen who will attend the Phoenix, Arizona, meeting are Mr. I. C. Mosher, who will take Mandolin 2:10; Henry Delaney, who has entered Zolock 2:05¼, Dadaelon 2:08½ and Queen Pomona 2:08¾. Geo. Beckers may take Helen Dare 2:14, Zombowette 2:16¼ and the green mare Ramona S. These horses will be shipped from Los Angeles about Monday next.

Charley De Ryder is on his way to Pleasanton, and in addition to the horses he took East is bringing out the pacers Argot Boy 2:03¼ and Nervolo 2:04¼. The latter is a stallion and is by the stallion Colvert 2:07½, by Onward.

E. Swift Train of Soquel has our thanks for a very fine photograph of his great two-year-old pacer Ray o'Light 2:13½, the fastest two-year-old pacer of 1907. The picture was taken by Hall of Santa Rosa just after the colt's victory in the Futurity Stake last August. Mr. Train feels as does Mr. Whitehead, that had the colt been sent a mile over the Woodland track he could have paced in 2:10. Ray o'Light was turned out after the race and will not be taken up until early in January, when Mr. Train will send him and his stallion Steam Beer to Salinas, where Whitehead will prepare them both for the circuit of 1908. Ray o'Light, if nothing happens, will be a sensational three-year-old.

Just where Sonoma Girl will winter has not yet been decided.

Mainsheet 2:05 is the champion trotting stallion of 1905. Crescus 2:02¼, John A. McKerron 2:04¼ and Admiral Dewey 2:04¾ are the only stallions that have trotted a faster mile.

The breeding of the sensational yearling pacer, that Will Evans drove two exhibition quarters in 30¾ seconds during the Lexington meeting, is very interesting, says the Horse Review. He is a brown colt by Jay McGregor 2:07¼; dam Helen Gould, p. 2:24, by Constantine 2:12½; grandam by Viking 2:19¼, the son of Belmont and Waterwitch; third dam, that once noted trotting race mare Butterfly 2:19¾, by Young Jim; fourth dam Tansey. (dam of Eagle Bird 2:21, etc.), by George Wilkes 2:22; fifth dam Dame Tansey (dam of Prima Donna, p. 2:11¾, etc.), by Daniel Lambert.

Audubon Boy 1:59¼ will winter at Concord, N. H., while the balance of the Gatcomb string headed by Walla 2:04½ and Grace Bond (3) 2:09¼ go to the auction block.

Hedgewood Boy 2:04½ won three races at Lexington and was the only horse that did.

A yearling colt by Sidney Dillon, out of the dam of Boralma 2:07, is said to be a great prospect.

Kentucky Todd 2:08¾, as a three year-old, will not be raced next season as a four-year-old, but will be allowed to serve a few mares.

Arion 2:07¾ has ten new standard performers this year, and a large proportion of them are colt trotters, as their sire was.

Portland is talking of two \$10,000 stakes next year, one for trotters, the other for pacers, and if they are advertised in the Eastern turf papers we do not doubt but several entries can be secured from across the mountains.

If you want to sell at auction, consign your horses immediately to Fred H. Chase & Co.'s combination sale, set for December 23d. They can take care of a few more good horses, but entry must be made right away.

Mr. Martin Joost of Martinez has had his yearling by Bonnie Direct 2:05¼ worked a little this fall, and last week he stepped an eighth over the Concord track, which was heavy after the rain, in 21 seconds, and a quarter in 43 seconds. This colt is well entered in the stakes and is a splendid prospect, and the training he has had is very limited, no effort being made to have him show speed.

The Tramp, sire of Trampfast (2) 2:12¼, winner of the Kentucky Futurity for two-year-olds, was bred by W. T. Clasby, Lexington, and was foaled 1897 by Jay Bird, dam Sorrento (dam of Jay Hawker 2:14¾), by Grand Sentinel 865. The Tramp was formerly owned by R. H. Plant, Macon, Ga., and is now the property of L. H. McCurdy, Lowndsboro, Alabama.

Mike Bowerman, one of the veterans of the trotting turf, leads all drivers as a winner of stakes this year. He won the American Horse Breeder Futurity at Readville with General Watts 2:06¾; the pacing division of the same stakes with Shakespeare 2:09¾; he won the Horse Review Futurity at Columbus with General Watts; won second money in the Stock Farm Futurity at the same track with General Watts; won the Kentucky Futurity with General Watts, and the pacing division of the Kentucky Futurity with Shakespeare, and the Kentucky Stake with General Watts and the world's record for three-year-old trotters.

Mamie R. 2:15½, the bay mare bred by Rush & Haile of Suisun and sold by that farm to Mannie Reams of Suisun at the death of her dam, who in turn sold her to James Butler of New York for \$6,000, has been consigned to the Old Glory sale at New York with the rest of the East View Farm horses. Mamie R. got off after going East in the spring of 1905, and failed to win any races or reduce her record. She was not raced in 1906, but was bred to Directum Kelly 2:08¾, and this year produced a colt that is a very handsome youngster. She was not bred back, as Mr. Butler thought he would race her in 1908, as she is sound and perfect in every way, and he thinks she should be a great mare in her class. Mamie R. is a well bred mare, her sire being Ante Oro, a son of Oro Wilkes, out of Annie by Dawn 2:18¾, that was gelded as a two-year-old, after being permitted to serve two mares. The dam of Mamie R. is Moscova 2:28¾, the dam of La Moscovita, dam of Yolanda 2:14¼.

Alex. Brown, proprietor of the Woodland Stock Farm, has inaugurated a colt stake for the foals of 1908 sired by Prince Ansel. Entries closed yesterday. The entrance fee was \$50, divided into six payments, and to these stakes Mr. Brown will add \$200. The races will take place in 1911, when the foals are three years old. Seventy per cent of the money will go to trotters and 30 per cent to pacers. We hope every person who bred a mare to Prince Ansel this year has made a nomination in this stake. Mr. Brown, with great generosity, refused to name any of his own colts in the stake.

Will Hogboom of Walla Walla owns a two-year-old filly by his Diablo stallion Teddy A., that is a great trotter. He drove her an exhibition quarter in 33 seconds at the Walla Walla Fair. While Teddy A., like the majority of the Diablos, is a pacer, this filly is a square and perfectly gaited trotter.

Mack Mack 2:08 and Chase 2:07¼ met in a matinee race on the Charles River Speedway, Boston, October 16th. The race was half-mile heats and after Chase took the first heat in 1:00¼, Mack Mack won the next two in 1:00¼ and 1:00½. This is the fastest on record.

A splendid new race track is being built at Portland, Oregon, and a big harness meeting is to be given next year. It is proposed to give two \$10,000 stakes, one for trotters, the other for pacers. It has not been decided what classes these two big stakes will be given for, but they will be arranged soon, and it is proposed to hold the greatest meeting ever held on the Coast. They also contemplate giving a good big stake for 2:05 class pacers.

Mr. J. B. Stetson, now of McMinnville, Oregon, has sold his mare Lenmetta 2:25½ by Norcatur, to Mr. J. D. Chappell of Hillsboro, Oregon. Lenmetta has a filly foal at foot by Lynwood W., sire of Sonoma Girl 2:05¼.

M. L. Lusk of Sacramento sends us a photograph of a very fine looking three-year-old colt by Zombro 2:11, out of a mare by Doc Button 2:22½. The colt is brown in color and stands 16 hands. Mr. Lusk has named him Zeloso.

W. A. Clark Jr., who has moved all his horses from Pleasanton to Los Angeles, has leased the J. H. Bohon ranch, at Wiseman, near Redondo, and placed his great young stallion Bon Voyage 2:12¾ and about thirty head of broodmares and colts thereon. Mr. Clark has been an active member of the Los Angeles Driving Club for the past two years, and was recently elected its president.

Mr. S. F. Swauger of Fortuna, Humboldt county, is the owner of a fine colt foaled last May, that took first prize at the Humboldt County Fair this fall, and is entered in the Pacific Breeders' Futurity. The colt is by Humboldt Dillon, dam Lady K., by Altivo 2:18¾, own brother to Palo Alto 2:08¾, and the local horsemen say he is one of the best individuals they have ever seen.

Ed. Geers, Thos. Murphy and Alonzo McDonald were each fined for laying up heats at Lexington.

W. E. Walden of Thermal, California, has recently purchased a seven-year-old stallion called Dick Ashwood, that is a very handsome horse and fast.

The 32-year-old trotter Harry Wilkes 2:13½, by Geo. Wilkes 2:22, was a feature of the recent firemen's parade at Somerville, N. J. He was hitched to a high-wheel sulky and went the route.

J. Fred Roberts of Denver, Colo., is now the owner of Casta Nada 2:09¾, a pacing gelding, by Don Derby 2:04½, dam Cyrene 2:17½ by Guide 2:16. Casta Nada was bred at Pleasanton, and his dam is now owned by Mr. E. A. Howard of Oakland.

Mr. W. A. Clark Jr. will probably campaign a stable on the Grand Circuit next year.

During the Lexington meeting Millard Saunders stepped two Maywood Stock Farm youngsters good miles. Harry Dillon (2) worked an easy mile in 2:21, and Ruth Dillon, world's champion three-year-old half-mile track trotter, negotiated a mile in 2:10½.

During the present season 84 pacers and 32 trotters were added to the 2:10 list, as against 74 pacers and 31 trotters in 1906. The number of pacers that got in this season is nine more than the best previous highest number, while the trotting number one less than the high-water mark made in 1903. The reduced list, however, is much lower than for many seasons. The entire 2:10 list now numbers over 1,100. With several southern meetings yet to come there is a chance to get in several more before snow falls.

It is given out that Sweet Marie 2:02 is to be bred to Moko.

When Citation paced the first mile of the free-for-all pace, at Sedalia, Mo., last month in 2:06¼, Spill, by Wawan, finished second and was timed in 2:06½. Spill was owned and campaigned in 1906 by W. A. Clark Jr.

Mainsheet lowered his record to 2:05 the last day of the Lexington meeting.

There has not been such a sensational offering in years as the list of horses consigned to the Old Glory sale which opens in New York November 25th.

Todd 2:14¾, the great young sire, will be sold for the high dollar at the Old Glory sale.

After General Watts made his record of 2:06¾ his owner announced publicly that he was sorry Miss Densmore had been distanced, but that it was unavoidable in getting the world's record. Of course, General Watts was paid the fourth money by the Kentucky Association, and it was promptly turned over to the owner of Miss Densmore. It was glory, not money, that General Watts was after.

It is said that William Simpson, owner of McKinney and Axworthy, has offered \$40,000 for the three-year-old champion trotter General Watts 2:06¾. Mr. Simpson has one of the best collections of broodmares owned by any stock farm in the country and General Watts would have a grand opportunity there.

INFORMATION WANTED.

Every stallion owner who knows of any new standard performers this year by his horse is requested to send a complete list to this office. The breeding of the dam should be given if known.

BREEDER AND SPORTSMAN.

LAST DAY AT LEXINGTON.

The get-away day program had a 2:05 class pace, with a crack field of pacers, and a special, in which Mainsheet went again his record of 2:05¼, says the Chicago Horseman. The black horse clipped off the fractional time, leaving his mark 2:05 flat. He went to the three-quarters in 1:33, but tired quite perceptibly the last eighth, not apparently being in as good form as on his last attempt, when he reached the seven-eighths pole in 1:48½ and seemed to be trotting faster than at any time in the mile, but unfortunately caught his foot on the cross strap on his elbow boots, causing him to almost go to his knees.

The Stoll Stake was first called, with Highball scratched, the pooling being Wild Bell \$25, Fanny P. \$15, field \$5. Laurietta was next the rail and after a good send-off Wild Bell soon took a good lead and won the heat without much effort.

Wild Bell and Tokio trotted like a team down the back stretch, Wild Bell drawing away a little in the stretch, winning easily, and the next three finishing heads apart.

Wild Bell and Fanny P. raced the first half of the third mile heads apart and from there home Wild Bell was leading by two lengths, Fanny P. dropping back and Alice Edgar heating the rest of the field for a place.

The 2:05 pace was one of the heaviest betting races of the meeting, with Ardelle selling at \$25, Hedgewood Boy \$12, Morning Star \$10, Hidalgo \$5, field \$10. Hedgewood Boy was at the pole, Ardelle second, and Morning Star third. It took quite a little scoring and when the field was sent away Hedgewood Boy stepped away good, but was soon passed by Jenny W., as Ardelle went to a break, Jenny W. leading to the seven-eighths pole, where Hedgewood Boy came to even terms with her; he seemed to be rolling some, hut won the heat by a length in 2:04½, the quarters being 0:31¼, 1:02¼, 1:33¼, 2:04½.

They were away without much scoring the second mile, Jenny W. again taking the lead, with Hedgewood Boy second down the back stretch, Morning Star moving for a front position on the outside. From the half past the three-quarters the field was quite well bunched, with Hedgewood apparently safely pocketed behind Jenny W., the leader, and Morning Star at his side in third place. Just at the turn into the straight track Morning Star dropped back beaten, leaving room enough for Hedgewood Boy to get through. He came with great determination, passing Jenny W. and taking a length lead to the wire, winning without being all out a quarter of a second faster than his first heat, with Hidalgo and Reproachless in a great fighting finish for the place, Hidalgo getting it by a nose. Time, 0:31½, 1:02¼, 1:33, 2:04¼.

Many of the persons familiar with Hedgewood Boy's races considered this race a final test of his class, and after the race were of the opinion that in a three-in-five race he could beat Angus Pointer 2:01¼, as he was separately timed his first mile in 2:03¼.

Tregantle was a \$25 to \$6 favorite over the 2:25 class trotters and won the necessary heats without ever being extended.

The final heat of the 2:25 trot closed the fall trots after one of the most successful meetings ever held by the Kentucky Trotting Horse Breeders' Association.

October 19.

Trotting, 2:19 class, the Stoll, \$2,000—
 Wild Bell, br g by Wildnut-Belle Bird, by Electioneer (De Ryder) 1 1 1

 Time—0:31, 1:01½, 1:33, 2:05.

Your Stomach is O. K. if you drink J. Jackson's Napa Soda.

A GRAND YEARLING.

On our title page this week is a half-tone from a recent photograph of the colt Zomvela, foaled April 14, 1906, owned by Mr. Chas. L. Moon of Los Angeles. It would be hard to find a finer looking or better developed yearling in all America, and we do not doubt but every one who sees this picture will be struck with the grand individuality of the subject. Zomvela, as his name indicates, was sired by Zombro 2:11, and his dam by Alta Vela 2:11¼, son of Electioneer. Black Swan is the name of this Alta Vela mare, and she is a great producer. She is out of a mare by Reavis' Blackbird 402, next dam by Geo. M. Patchen Jr. Six years ago last spring Black Swan foaled a filly by McKinney that took a trotting record of 2:23¾ last fall. Her next foal was Cedric Mac, by Nearest. This is now a beautiful sorrel five-year-old and has stepped miles in 2:18 and better trotting. Three years ago she had a colt by Petigru 2:10½, that is now a fine gaited gelding, that will trot fast. Her first Zombro foal was this colt Zomvela, and the next was a filly, now at her side and pronounced by all who have seen her to be the best looking suckling in the State. Black Swan herself is a fast natural trotter, beautifully gaited and has shown quarters at a 2:10 gait. The Wilkes-Electioneer cross is represented in Zomvela. Zombro, his sire, is a son of the greatest grandson of Geo. Wilkes, while Black Swan's sire, Alta Vela 2:11¼, is the fourth fastest trotter sired by the great Electioneer, only three of that great stallion's get, Arion 2:07¾, Sunol 2:08¾ and Palo Alto 2:08¾, having records faster than Alta Vela. We congratulate Mr. Moon on owning such a handsome and well bred yearling as Zomvela.

RACING AT BAKERSFIELD.

A day's racing was held at Hudnut Park, Bakersfield, October 20th, by the Kern County Driving Club, and several hundred people attended.

The chief event was a match race between W. Willis' Richwood and E. M. Roberts' Tommy R., the former winning in straight heats. The race for trotters and pacers in class B took four heats before it could be decided. The summaries were as follows:

Class B, trot or pace—
 Queen, ch m (Roberts) 1 2 2 1
 Lady Monroe, blk m (Fogarty) 2 3 1 3
 Blue Dick, rn g (Yancey) 3 1 3 2
 Time—2:56¼, 2:54, 2:50, 2:55.

Class A, trot or pace—
 Richwood, gr g (Willis) 1 1
 Tommy R. (Roberts) 2 2
 Time—2:52, 2:56.

Class C, trotting—
 Mickey, blk s (Lutz) 1 1
 Gypsy, b m (Farris) 2 2
 Flora D., blk m (Barnard) 3 3
 Time—3:01, 3:02.

DAISY NUTWOOD DEAD.

F. Haney, the Modesto horseman, sends us word that Daisy Nutwood, daughter of the great Nutwood 600, died on the 23d of October at the farm of her owner, T. F. Kiernan. She was the dam of Consuella S. 2:07¾, winner of the Massachusetts Stake, \$15,000, for 2:10 trotters, the largest stake of the Grand Circuit of 1904. Daisy Nutwood was bred by the late Lot D. Slocum of San Francisco. Her dam was Ruth Ann by Bell Alta, son of Williamson's Belmont, second dam by Boston Boy and third dam by General Taylor, the old thirty-mile champion. She was a full sister to Luella, dam of Myrtle 2:13½, and Prince Nutwood 2:12¼. Mr. Kiernan owns four of her last foals, that will some day give a good account of themselves if given an opportunity. One of these is a bay stallion, four years old, by Vasto 2:16¼, another is a three-year-old stallion by Pacheco W., and two are fillies by the same horse. They are all very promising youngsters. There were three or four of Daisy Nutwood's foals that showed their ability to trot very fast, but were not raced and did not get records. Had her produce been given reasonable opportunities she would undoubtedly have been one of Nutwood's greatest speed producing daughters.

MONEY IN HORSES.

That excellent farm journal, Colman's Rural World, says:

There is money, good substantial money, not that in small quantity, in breeding horses well, with a fixed end in view.

Breed good mares to good horses and you need have no fear of the result. It is blood that tells in horse breeding.

The very nature of the conditions and surroundings requisite to the production of first-class carriage horses will long stand in the way of an over supply. Is there any way in which you can grow \$200 worth of farm products with less labor, less capital and better profit than by raising a good horse?

From the age of two and one-half years a well-bred colt, properly fed and handled, should be able to do enough work about the farm to pay for his keep.

STOCKTON DRIVING CLUB.

One of the largest crowds that has been seen at the Stockton track this season turned out to the matinee of the driving club, held October 13th. Six events were on the card and the crowd remained until the last heat was trotted.

The program opened with a race for both trotters and pacers, and it was won by Mr. C. Barling with his recent purchase, Bob Ingersoll, a trotter by Nutwood Wilkes. Boh took the race in straight heats and did not have to trot anywhere near his record of 2:14¼ to win.

In the half-mile pace Mr. B. Acker won with Wiggler in straight heats.

A mile pace, best two heats in three, went to Princess, a sorrel mare owned by J. Jones.

The event of the day was the match race, best two-in-three, between Mr. C. Helms' pacer Cranky Thorne 2:22½ by Hawthorne, and Mr. G. Peirano's stallion Alta Genoa 2:14¼, by Dexter Prince. There has been a great deal of talk about this race for several weeks, and between five hundred and a thousand dollars was wagered on the result during the afternoon. The time made by Cranky Thorne, the winner, was excellent for a horse that has not been kept in regular training.

A novelty race, dash of one mile, for lady drivers, the one driving a mile nearest to four minutes to be the winner, was won by Mrs. Amos Shippee, with Mrs. Truesdale second. There were six starters in this race, and the ladies all drove well.

In the 2:40 trot there was no contest, but Mr. P. Marengro drove his trotter Surprise a mile in 2:28. One of the best races of the day was the 2:27 pace, Mr. J. Jones' mare Princess winning the first heat in 2:23¾, and the second in 2:26¾. The summaries of the day's races are as follows:

Pacing, half-mile, 2:35 class—
 Wiggler, br g (B. Acker) 1 1
 Oroville Wilkes, b g (Mrs. Truesdale) 2 2
 Time—1:20, 1:16½

Mixed, trotting and pacing, two-in-three, one mile, 2:26 class—
 Bob Ingersoll, b g (C. Barling) 1 1
 Gilt Edge Dick, b g (G. F. Wille) 2 2
 Alto Genoa Jr., blk s (G. Peirano) 3 3
 Time—2:27½, 2:29½.

Pacing, one mile, 2:27 class—
 Princess, s m (J. Jones) 1 1
 Belle W., blk m (A. W. Cowell) 2 2
 Time—2:23¾, 2:26¾.

Pacing, one mile, match race—
 Cranky Thorne, br g (C. Helms) 1 1
 Alta Genoa, s s (G. Peirano) 2 2
 Time—2:15½, 2:17½.

Novelty four-minute race for lady drivers—
 Mrs. Truesdale 3:58
 Mrs. Amos Shippee 4:01
 Mrs. Rhodes 3:57
 Mrs. Will Peterson 4:06
 Mrs. Knapp 3:55
 Mrs. B. J. Pope 4:33

A GREAT BALANCER.

A Boston man who writes much for the press on balancing, says that "pacing is an acquired gait," due to the feet of the horse not being properly balanced, and relates the case of a filly owned by himself. When he first saw this filly she was ten days old and could do nothing but pace. His own description of what he then did is as follows:

"I immediately got the smith at her. He laid her down in the straw and with his knife whittled her feet, as I directed, and she has never paced a step since, but she is, on the contrary, one of the purest gaited and fastest lot trotters than can be shown any one. She commenced to trot immediately, just as soon as I had finished 'balancing' her feet. Therefore, I say to you breeders, if you do not desire to have your foals pace, 'balance' them and they won't 'pace a lick.'"

Now, all you breeders who are breeding for two-minute pacers should send for this expert, as it follows that if he is able to balance an unbalanced colt and make it trot, it should be much easier for him to unbalance a balanced foal and make it pace. The probability is that you would find, on investigation, however, that the expert's head is the thing that is unbalanced.

SONOMA GIRL'S WINNINGS.

Libertyville \$ 100
 Libertyville 2,500
 Detroit 3,800
 Cleveland 2,500
 Buffalo 5,000
 Poughkeepsie 1,000
 Readville 600
 Syracuse 1,500
 Columbus 2,250
 Columbus 2,500
 Lexington 2,500
 Total \$29,900

GENERAL WATTS' PERFORMANCES.

[J. L. Hervey, in Chicago Record-Herald.]

It will be a long time before the furore that General Watts has created in the trotting world dies down. All the season since in August he won at Readville, Mass., trotting two consecutive beats, each in 2:09 $\frac{1}{4}$, it has been recognized that he was one of the greatest 3-year-olds that had ever been seen. But no one for a moment imagined that he had in him a mile in 2:06 $\frac{3}{4}$ —that he could and would not merely beat the 3-year-old record of 2:08 $\frac{3}{4}$, which had stood for fourteen years (it was in 1893 that Fantasy chalked it up), but would beat it two whole seconds. But that was what he did, as the climax to his campaign, which had previously included an unheard of racing feat, the winning of the three chief Futurities of the year.

Not since Lou Dillon trotted in 2:00 has such excitement been aroused among trotting enthusiasts as this little yellow-bay colt has created. Highball and Sonoma Girl had been in the spotlight all the season, but now both of them have been relegated to minor positions by the phenomenal youngster.

Time, merely as such, means much more, goes for much more, on the harness turf than it does among the runners. But it is not alone from a time standpoint that the Watts colt looks to be so great. He is the most wonderful racing machine of his age, that has ever been seen, at the trot. His gameness has elicited the admiration of all who have witnessed his display of it, and never was it more severely tested than in the race in which he made his record—for his 2:06 $\frac{3}{4}$, is no tin-cup affair, but a trophy won as a race horse should win his, in actual contest.

It was the first week of the Lexington meeting that he won the Kentucky Futurity from the most highly tried field that had ever started for that classic event. A record-breaking race had been anticipated, but the track was heavy and slow, and no heat was faster than 2:11. On the second week's program at Lexington, however, in the Kentucky, a fixed event for 3-year-olds, that antedates the Futurity in establishment, but has come to be considered in the light of a second edition of the first-named event, as practically the same colts are generally named in both. If the Futurity winner starts in the Kentucky stake and wins it he seals his position as the crack of the year, but if, as sometimes happens, he is beaten in it, his reputation receives a jolt that it sometimes never recovers from.

On this account many owners who have won the Futurity have refused to start their colts back in the Kentucky, deeming discretion the better part of valor. Not so with the owner of General Watts, his name-sake, General C. C. Watts of Charleston, W. Va., nor with his trainer, "Uncle Mike" Bowerman of Lexington. They were not only willing but anxious for another chance to race the son of Axworthy and Carpet, and they announced that, if the day on which the Kentucky stake was to be trotted was a favorable one, he would be driven out to beat the record.

The day was not entirely favorable. There was a strong, cool wind to face all the way up the back stretch—so strong and cool that several horses that were record hunting and down to start did not try, considering the conditions not to their advantage. But Watts had never been a "mollycoddle." He was on hand and ready, and was driven out the first heat in 2:06 $\frac{3}{4}$, breasting the wind almost all through the middle half, which he covered in the wonderful time of 1:02. Naturally he was "all in" at the finish. Then the sharps began to wonder if something might not happen the next heat. In against him, among others, was the fast and stout filly Bisa, which had trotted a good second to him in the Futurity, and also was second, but not near him, in this record-breaking mile. After such a scorching heat being taken out of him, was it not possible that she might come on and beat him?

Had he been anything but dead game she would have. She dogged him all the way in that second heat, and when they got into the homestretch closed on him resolutely and brought him to the whip. Tired, he evidently was—and very tired, and, when he felt the sting of the lash, had his courage been anything but the purest, he would have faltered or curled up—and lost. Instead, he pinned his ears back on his neck and tried—oh, how he did try! And try as Bisa might, she could never quite get to him and was beaten a length in 2:09 $\frac{3}{4}$.

Only a race horse hero can do such things, but it was only of a piece with several other similar races that Watts had previously trotted. Of all previous trotting colts, only Directum and Cresceus ever showed themselves to combine such unflinching gameness with record-breaking speed—and their speed, while record-breaking for their day, was not within seconds of that of Watts. No axiom of the turf is more universally true than the old one, which says, "It is the pace which kills," and it is not more the pace that Watts had gone, than the way in which he has withstood it, that has caused horsemen to enthuse over him.

And, when a horseman looks him over, he wonders, just a little—or, perhaps, more than a little—where the power lies that propels this extraordinary equine flying machine! General Watts is the smallest of all the crack three-year-olds of the season. Under the standard, he does not measure up to the 15-hand mark. Nor is he a little giant, like Silko, the mid-gest hero of last year's Kentucky Futurity. He is a light rather than a robustly-made colt, with no unusual muscular developments either fore or aft. He began the campaign, so Bowerman informed me,

lighter in flesh than he would have liked to have had him, not having put on what he should have during the winter. And, naturally, his campaign has taken considerable more meat off him. Not that he finished it badly "lucked-up," but he did look light and drawn and not quite as one would expect a world's champion to look.

Many horsemen have been heard to pronounce Watts a very common-looking colt out of harness—when he is in harness he goes with an electric dash that would make the severest critic admire him. In fact, there is nothing of the Apollo or Beau Brummel about him. But at the same time he has a splendid head, a fine neck, and shows breeding, and plenty of it.

A couple of years from now, in high flesh, the chances are that Watts will be called a handsome stallion. For horses are very much like humans in their development of good looks. Some youngsters that have been strikingly fine individuals have grown into disappointing ones at maturity, while on the other hand, some very ordinary looking colts have matured into superb aged horses.

SOMETHING ABOUT TRAMPFAST.

Lexington, Ky., Oct. 19, 1907.

There was probably never before bunched in a race such classy two-year-olds as those that raced in the kindergarten division of the Kentucky Futurity and the Lexington Stake at the meeting which has just been concluded here. Seven colts and three fillies able to show a mile in a race in 2:17 or better would have been regarded even five years back as impossible, yet every starter in the two-year-old division of the Kentucky Futurity went that fast in the first heat, in which Trampfast, to beat out Dorothy Axworthy, was forced to lower the world's record, setting the new mark at 2:12 $\frac{3}{4}$, which was caught a quarter to half-second faster by a score of expert owners and trainers about the judges' stand. One of the official timers caught the mile in 2:12.

Trampfast was bred by W. L. Spears at Hickorywood Farm, just beyond the famous Elmendorf thoroughbred stud of James B. Haggin, on the Mayville pike, seven miles from the city. When he was bred his sire, The Tramp, then owned by the estate of the late Georgia horseman and banker, R. H. Plant, was making a season at Hickorywood Farm. Asked about the early days of the colt, Mr. Spears said: "When Trampfast was a yearling I thought him the best prospect for a race horse that I ever broke."

Spears broke and trained Nella Jay, winner of the three-year-old Futurity in 1902, in best time 2:14 $\frac{1}{2}$; Susie J., 2:06 $\frac{1}{2}$, which was second to Fereno in another Futurity in 2:10 $\frac{1}{2}$, and Jay McGregor 2:07 $\frac{1}{4}$, that was third in another Futurity. "None of the good horses that I have trained showed me a quarter better than thirty-six seconds as yearling. Trampfast trotted a quarter in thirty-five seconds with less work than any colt I ever trained. I broke him to harness on my farm track during the month of May, and then allowed him to run in a paddock through June and July. On August 6, I brought him to the trotting track here and commenced to train him, and on August 27, just twenty-one days later, I drove him a quarter in thirty-five seconds. This was the only fast quarter he was driven as a yearling. The following day he went back to the farm and he never had a harness on again until he passed out of my hands as a two-year-old last winter."

Trampfast was entered by Spears in the last winter sale of the Kentucky Sales Company in February of this year. At the time of the sale he was sick and not offered. Harry Stinson had looked him over for Miss Wilks, but while waiting to see how he would come out of his illness W. G. Simpson bought him for Durbin Horne, the Pittsburg merchant prince. Ten days later the colt rounded to and has not missed his feed since. Simpson, who had control of the colt, turned him over early in the season to Ed. Benyon, who at that time had no two-year-old Futurity candidate. Benyon had Trampfast in his stables until the Columbus meeting, when he turned the colt over to Thomas W. Murphy, as The Leading Lady had become a member of Benyon's stable, and the starting of Trampfast in the Futurity was doubtful, since his owner was loth to racing him in the famous event. The fastest mile Benyon ever drove Trampfast was 2:17 $\frac{3}{4}$. Murphy got him up to 2:15 $\frac{1}{2}$, which was his fastest time previous to the Futurity. The colt had been only five times better than 2:20. Murphy had timed the colt a quarter in thirty and one-quarter seconds. Murphy thinks he could drive Trampfast with a runner faster than any record made by a two-year-old against the watch.

The Tramp, sire of Trampfast, was one of the horses sold in the closing-out sale of the Idle Hour Stock Farm in October, 1904. He was bought by L. H. McCurdy, Loundsboro, Ala., and is now located in that State. His owner paid \$1,300 for him and will send him back to Kentucky the coming season. He is a full brother to Jayhawk, 2:14 $\frac{1}{4}$, and a half-brother to The Bondsman, sire of Grace Bond, a Futurity winner. He is the third of the sons of the broodmare Sorento to sire Futurity winners. Spears owns a three-year-old full brother to Trampfast, called Tramp Medium, which has a two-year-old record of 2:28 $\frac{3}{4}$, and a bay colt just weaned, out of the dam of Trampfast, which is by Jay McGregor 2:07 $\frac{1}{4}$. The dam of Medium's Last is now with foal to Jay McGregor. She was barren in 1906, and, therefore, has no yearling. She gets her name from the fact

that she was the last filly foal by the famous Happy Medium, sire of Nancy Hanks 2:04.

Trampfast will winter in Simpson's stable here, and it is likely that Murphy will race him in 1908. He is engaged in all the big three-year-old trotting events of next season.

A. L. Lehman, owner of Dorothy Axworthy, thinks his filly can beat Trampfast, and General W. B. Chishold thinks Thistle Doune is his equal, while Helen Hale, the filly owned by United States Senator J. W. Bailey, which took the world's filly record of 2:15 $\frac{1}{4}$, and the owners of Binvola, the Massachusetts colt, that finally defeated Senators Bailey's filly and captured the Lexington Stake, are content with the showing their horses have made. Oro Lambert, owned by Miss Wilks and driven in the Lexington and Futurity by Harry Stinson, is a promising colt. The Laird, that went as good as 2:13 in the Futurity, and Henry Setzer, W. W. Evan's colt, which was timed in 2:13 $\frac{1}{2}$, are all good youngsters.

Trampfast is the general favorite among those who watch the work of the youngsters daily. They say he has the size, bone and quality over his worthy competitors, and, unless something approaching the phenomenal comes along as a three-year-old, this colt, having to his credit the new world's record as a two-year-old race performer, may sweep all the big three-year-old events of 1908 and perhaps lower the world's stallion record for that age, if he does not set a mark as much over the three-year-olds as is his two-year-old mark this season. Trampfast takes after the Jaybird family as to color, being a roan. Robert Bonner is credited with having declared that he would buy a green-colored horse if he could win great races, and so the color of the Jaybirds has never depreciated their value on the market.—Trotter and Pacer.

A GREAT CATTLE SALE.

It will be of interest to the stockmen to know that the Howard Cattle Company have set for the date of their second annual sale November 13, 1907, when Geo. P. Bellows of Maryville, Mo., will again offer to the highest bidder a draft of some sixty head of Short-Horn cattle. There are twenty head of yearling bulls listed for the sale, among them the prize winning yearlings which have been exhibited successfully at the State and County Fairs, as well as a fine lot of thrifty youngsters which have been raised right to give a good account of themselves.

The offering of females, about forty head, should be especially attractive to those who wish to get good foundation stock, bred to such bulls as imported Straight Archer, who has already to his record international winners.

The stockman who can read the signs of the times does not have to be told the value of the pure bred Short-Horn bull to the cattle business, especially of the well bred, early maturing kind, and why then should they hesitate to go into the business of breeding bulls by purchasing a few cows of the right kind bred to the right kind of bulls. To those who are considering the proposition of breeding pure bred cattle, this lot of females should be especially attractive, as they are to be offered in good breeding condition only and are accustomed to the California environment.

If the success of the sale of the Howard Cattle Company held last year is any indication of the future, these sales are destined to become one of the most important annual events in the stock growing industry of the State. At last year's sale there was hardly a county in the State that was not represented by several of its leading stockmen, and what better meeting place than among the red, white and roans, the breed of cattle which the world over-stands as man's best friend among the bovine species.

JONES HAS STAR LOT.

The Jones horses, says Henry White, headed by Highball, will be the star consignment of the Old Glory sale, and in the lot are Ardelle, Tempus, Fugit, Saint Valiant Vincent, Goldust Maid, and half a dozen others of less note. The old war horse, Baron Grattan, will not be offered. He was the first really high class grand circuit campaigner Mr. Jones got hold of. He won the Chamber of Commerce, the star event for slow class pacers, and since then has battled every season, gradually reducing his record until it now stands at 2:03 $\frac{1}{4}$.

He has never gone a bad race, never been sick or sorry, and the way he has kept bringing home the money year after year in company that included the best in the laud has been a source of wonderment to horsemen, and stamped him as the greatest wear and tear pacer ever seen. Incidentally his races have called attention to the Grattan blood as having something to it besides pure speed.

All the Jones horses will go. The man from Memphis will not be protecting them through by-bidding or any other hole in the wall method, and people who would like to own any of the stars of the Geers stable this year may bid on the Jones horses and be sure they are not being "boosted," which cannot be said of some sales in the past.

The half-mile track at Allentown, Penn., holds the record for that sort of track for both trotters and pacers. George G. Lowered the trotting record to 2:06 $\frac{3}{4}$ at Allentown last month and Dan Patch paced a mile there in 2:01 in 1905 to sulky and afterwards paced a mile there to wagon in 2:05.

HAMBLETONIAN AND HARRIMAN.

Some interesting gossip about Hambletonian 10, the great progenitor of trotters, and the great railroad king, E. H. Harriman, appeared in the last issue of the Chicago Breeders Gazette. It was from the pen of a New York correspondent, and is as follows:

One of the most interesting of all the old-time horsemen around New York is David Bonner. His mind is a perfect storehouse of reminiscences of the early days of trotters, and trotting races in this vicinity. In a recent conversation he told me that he first saw Hambletonian 10 in 1861, the horse then being twelve years old. He said he had a mare he wished to breed, and having heard of this sire he concluded to go up to Chester at some convenient time and look him over, and happening to be in Newburg in the spring of 1861 he concluded to hire a horse and buggy and drive the twenty miles to Chester and inspect the afterwards premier sire of American trotting families. The impression he formed of the horse far exceeded the reports he had heard, and he booked his mare. The service fee of the horse at that time was \$25. Later in the summer a friend of his concluded to breed a mare to Hambletonian 10 and requested Mr. Bonner to make arrangements for doing so. When he went to Chester the second time the service fee had been raised to \$50. But that price did not prevent his friend from breeding. Mr. Bonner says the more he saw of the horse the more favorably he became impressed with his greatness, and the next spring advised Mr. Rysdyk to raise the service fee to \$100, which he did, and it was at Mr. Bonner's suggestion that the fee was subsequently raised until it finally reached \$500.

He said that he drove the horse fully twenty times and that it is a mistaken idea among horsemen generally to suppose that he did not have much natural speed. He drove him at top speed but once, and then the horse was in the stud and without training, but notwithstanding this, he says as near as he could judge the horse stepped a 2:40 clip, and was one of the best gaited and most resolute trotters he ever sat behind. In view of which and considering that neither the sire or dam of Hambletonian 10 ever displayed any speed to speak of at the trotting gait, the question naturally suggested is, whence came the trotting inheritance which Hambletonian 10 transmitted to his progeny in a greater and more uniform degree than any other horse that ever lived?

Goshen and Orange county were the birthplaces of trotters and of interest in trotting races to as great an extent at least as any other section of the State, and the old half-mile track at Goshen has felt the hoof beats of Hambletonian 10, Volunteer, Electioneer, George Wilkes, Dexter, Highland Maid, Flora Temple, Goldsmith Maid and many others of the celebrities of past generations. The people of Orange county from an early period have been more deeply interested in light harness racing than in any other kind of sport, and it therefore seems remarkable that there should be found in that community an element in society so malicious as to stab this wholesome sport almost to death, and at the same time aim at the breeding interests a blow so vicious as to injure it beyond repair.

E. H. Harriman owns a beautiful country estate about twenty miles from Goshen, but not in Orange county, nor has he ever had any real estate interests in that county except as here stated. In the 90's he became interested to some extent in trotting horse affairs, and purchased the great stallion Stamboul, for which he paid \$42,000. He visited Goshen, and being attracted by the natural beauties of the old driving park, leased it for a term of years. At that time the old stables had become decayed and were about ready to tumble down; the fences were in a state of dilapidation and everything about the famous old track looked as though its tenants had been but little interested in its welfare. Mr. Harriman constructed new and elaborate stables of the most modern design, put up new fences around the track and in a few months thereafter the rickety old establishment was transformed into one of the best and most attractive driving parks in the country.

At this time he purchased the champion pacing stallion John R. Gentry and placed him in the stud as a stable companion to Stamboul, and once more Goshen resumed its place in the front ranks among the breeding and trotting racing centers of the State. Mr. Harriman conceived the notion of holding horse shows in addition to race meetings on the resurrected plant, and for several years instructed its managers to offer such liberal prizes as would induce the owners of the best show horses in the vicinity to make entries, and the result was that some of the most successful horse shows in the State were held at Goshen. If the receipts were not sufficient to cover the expenses Mr. Harriman's check liquidated the deficiency. In addition to this he purchased a large pack of fox hounds, rented a dwelling for the hunt headquarters and made Goshen one of the most prominent hunting centers in the East.

These enterprises seemed to enlist the good-fellowship of the famous financier in everything pertaining to Orange county, and he took a deep interest in its general welfare. In traveling over the country roads he found many of them in wretched condition and in need of improvement. He consulted with the officials of Orange county and found that the cost of making such improvements as he desired would be about \$100,000 and that under the State laws only about \$50,000 could be raised in a single year. He wished to have the improvements completed that year and

told the officials that if they would put the taxing machinery in motion and raise the \$50,000 he would donate the other \$50,000 and thereby establish a modern system of highways throughout the county. This arrangement was made and work commenced.

After it had been in progress for some time the engineer in charge of the work informed Mr. Harriman that in order to complete the improvements within the time specified it would be necessary to have the men work over-time, which they were willing and anxious to do if paid a pro-rata amount for such over-time. Mr. Harriman said that such an arrangement was perfectly agreeable to him, and that the men should be paid for every extra hour they worked. Under this arrangement work was progressing rapidly and when its finish was nearly in sight some labor agitators who resided in or near Goshen and who assumed to regulate the different affairs of mankind went before the Grand Jury of Orange county and procured the indictment of Mr. Harriman for a violation of the labor laws because he was a party to the contract of having the men work over-time. Of course, this suspended work on this much needed improvement, and it was not until the Court of Appeals declared such labor law unconstitutional that Mr. Harriman was relieved from the embarrassment of being declared a law breaker by reason of trying to donate a large sum of money for the benefit of the people who caused this unfortunate prosecution to be instituted. The lease of the driving park expired the next spring and it is needless to say that it was not renewed.

Stamboul had died before the occurrence of this incident and the next spring John R. Gentry was sent to Tennessee, where he still remains. The next horse show (1904) was abandoned. None has been held at Goshen since, and Mr. Harriman has wholly withdrawn his powerful influence from the support of the trotting and racing interests of Goshen and Orange county.

THE BIGGEST WIN IN MUTUALS.

Rosemount's three-mile runaway at Sheephead recently, while going to the post with his gentleman rider, young Richard Carman, and the horse's subsequent withdrawal from the race caused the old guard of the turf to grow reminiscent. On similar incidents in the old days the runaway would not be withdrawn, but go to the post and sometimes win.

In the early days of Jerome Park, when that famous course was thrown open to the public in 1866, James Thompson had a small road house near the old race course, where he provided the best of cheer for man and beast. His patrons included a majority of the track training delegation, and prominent turfmen from all over the country as well.

As the Thompson road house prospered, "Jim" bought himself a race horse or two. He secured the Bonnie Scotland mare Lobelia, and won a good many hurdle races and steeplechases with her. Then Thompson bought a couple of two-year-olds, one of which by Alverston, he called Nickajack.

Nickajack was not of much promise as a two-year-old. His owner did not start the youngster that season, wintering the colt among the snow banks at Fordham, and breaking him to harness before a road cart. Thompson and his colt covered many a mile that spring in the vicinity of Jerome Park, up hill and down dale through snow and icy rivulets, until his legs became as hard as iron, and his entire underpinning toughened and strengthened to a degree.

By the time that the spring meeting opened at Jerome Park that year (1872) Nickajack was hard as nails, and as his track work had been good, owner Thompson set about picking a race for the colt that would offer an opportunity for a "killing."

Matters run along until the next to the last day of the meeting. A mile-and-a-quarter race, with liberal allowances to maidens, let in Nickajack at seventy-seven pounds, and "Jim" Thompson made up his mind that he could find no more suitable spot for his colt with the Indian name.

Meanwhile Nickajack had developed a propensity to run away in his work, on one occasion covering two miles and a half before his boy could pull him up; and on another going two miles at his own sweet will regardless of all his jockey's efforts to control him.

In the auction pools sold on the race, John O'Donnell's four-year-old mare Fanchon by Australian Idlewild was the favorite. Fanchon had won the Manhattan handicap, a mile and a quarter, from a field of cracks, and other races as well. The two western horses, Ortolan and Frogtown, were next in favor.

Pools sold Fanchon, \$500; Ortolan, \$250; Frogtown, \$200; Woodhine, \$150; Survivor, \$125; Tubman, \$100, and the field, \$150. Nickajack was never sold as a choice, always being lumped in the field. His owner bought a number of "field" pools, calling for close to \$10,000 if they won.

When the post bell rang the auction pools were always closed, so as to give time for final investments in the \$5 mutuals, or "French" pools, as they were called when introduced in this country from Paris.

Here only five tickets had been sold on Nickajack as the horses gathered at the starting point. Two of these belonged to owner "Jim" Thompson, one to his trainer, one to the midget jockey who rode the colt and the other to the Thompson stable hands, bought by them on equal shares.

There was nearly \$5,000 in the mutuals as the horses lined up for the start, and as no one wanted Nickajack outside of the family, tickets on the colt were certain to make a record in mutual pool values should he win, as up to that time \$650 for \$5 had been the record value for them in this country.

As the horses began to break for the start, the mutual selling went on in lively fashion, mostly on the favorites, and the totals grew, passing the \$5,000 mark and mounting rapidly higher. But still no one else wanted to invest even a modest \$5 on Nickajack.

Suddenly in a breakaway Nickajack did not pull up with the others, and in another second he had the bit between his teeth and was coming down the homestretch at a racing pace, his boy powerless to restrain him. Past the stand the colt rushed, and round the course for another full mile, hundreds lining the track fence encouraging the jockey to pull him up.

But Nickajack had his running shoes on that day, and his courage was not of the "Dutch" variety either, for "dope" was at that time an undiscovered art, and the "drench" was resorted to but seldom. The colt, as ambitious as when he began his and burst, kept on for another mile and then another, making three miles in all.

Nearing his field, ending the third mile, Nickajack was finally got under control, and one of the assistant starters led him back to the starting point, where the other horses were waiting to be sent away on their journey.

All this time the mutual pools had been selling steadily, and as Nickajack's runaway ended the \$6,000 mark had nearly been reached, a total that represented 1,200 mutual tickets, only five of which were sold on Nickajack.

As the horses straightened out after the drum had tapped, Nickajack went to the front and led by three lengths, passing the stand amid some applause, most of which was ironical, however, as none outside of his owner thought he had a ghost of a show after his runaway and no rest to speak of.

At the half-mile the hope of the Thompson stable led by six lengths, with the favorite, Fanchon, second, and her jockey hand-riding her to close on the flying leader. But although Fanchon shut up half the gap in the run around the south field, she was still three lengths behind Nickajack as the "runaway" reached the three-quarter pole.

The rest of the race was run amid little excitement, as when it was seen that Nickajack was going to last out the big crowd was too "dazed" to do much shouting. Thompson's colt, despite all the efforts of Fanchon, his closest follower, was never reached in the run home, and won by two lengths as cleverly as if he had not also that crucial three-mile "warm-up" under his belt.

Besides the \$10,000 taken out of the auction pools by Thompson, there was over \$6,000 in the mutuals, all of which went to the Nickajack "family," less the per cent commission always deducted by the management. There were only five tickets sold on Nickajack.

After deducting the commission from the mutuals there was \$5,800 to be divided among the Nickajack tickets, each one of which paid \$1,160, the largest amount ever paid by a French mutual in this country.—Washington Star.

ADMIRE THE BLUE BULLS.

Mr. L. E. Clement, whose gossip each week in Colman's Rural World is most interesting, is a great admirer of the Blue Bull family. In an article from his pen in last week's issue of that journal Mr. Clement says:

I was told by Mr. Rich Wilson; by his uncle, Green Wilson, who bought Blue Bull at Rising Sun, Ind., as a three-year-old, and by Mr. McMahan, years ago, then editor and proprietor of the Western Horesman, that Blue Bull 75 was a very handsome sorrel with star and one foot behind white.

They told me of all his sons, Brussels 2:30, was most like him. I found Brussels a close built sorrel, too much of the burnt amber tinge to be a bright sorrel, but one of the Morgan type, and as many of the Morgan characteristics as any horse I have ever seen. The records show one thing very clearly, that is, that no horse foaled prior to 1860 had the same power to sire and transmit speed that Blue Bull had, and few that were foaled since 1860.

As a sire of trotting race horses he was clearly superior to Hambletonian 10, as he was mated with the different pacing bred farm mares of Indiana, and at the most could not have sired over 400 foals, while Hambletonian sired upwards of 1,300. Blue Bull sired 56 trotters, as against Hambletonian's 40, Blue Bull's trotters average faster, and have more winning heats to their credit than have the get of Hambletonian.

Blue Bull's daughters have produced nearly two performers for one of the daughters of Hambletonian, and there must have been more than three times as many of the latter. Blue Bull blood, Flaxtail blood and Sea Foam blood will be given the credit they deserve. That there is yet any better blood than any one of the three to produce extreme harness speed I very much doubt.

Drink Jackson's Napa Soda.

CONDUCTED BY J. X. DeWITT

THE SAN FRANCISCO FLY-CASTING CLUB.

It has long been proverbial that whatever California does is done well. It is also well known that California holds many records in the racing, athletic and other fields of sport, but it is not generally known that one California club has beaten, or holds every world's record, in the sport of scientific fly-casting. And what is still more surprising, each of these world's records have been beaten not by one member of the club, but by several, and most of them in tournaments East and West, which were open to the experts of the whole world.

The San Francisco Fly-Casting Club was organized in 1893 by the following nine members: Col. G. C. Edwards, F. H. Reed, C. G. Young, W. D. Mansfield, E. A. Mocker, H. C. Golcher, C. W. Hibbard, Alex. T. Vogelsang and F. A. Daverkorsen. Col. Edwards was elected president and Alex. Vogelsang secretary. The little club at once arranged with the Park Commissioners for the use of Stow Lake, Golden Gate Park, and began semi-monthly club contests. Interest in scientific fly-casting was at once established, and the roll of membership began to grow with such an astonishing rapidity that it was found necessary in a few years to place a limit of one hundred on the membership. At present there are some thirty expert anglers who have applied for membership now waiting for a vacancy in the constitutional limitation.

The year following the club's organization it held a tournament open to the world at Stow Lake during the San Francisco Mid-Winter Fair. This tournament of the young club did not draw many anglers from outside the State, and no remarkable achievements were recorded, R. R. Flint winning the long-distance medal with a cast of 81 feet, and Leonard's record of 102½ feet still stood unbroken. Soon after this H. C. Golcher and W. D. Mansfield began to develop excellent form in long-distance casting, and at each club meet added to the length of line they were extending so constantly that it became apparent that the world's record of R. C. Leonard, the famous rod manufacturer, was in danger of falling, and the writer, in a published article on fly-casting, predicted that in less than a year this record would be surpassed. This prediction was soon verified by Harry Golcher, who, on the 26th of September, 1895, placed his fly at the 103-foot mark. Mansfield also was making rapid improvement, and at the club's third semi-monthly contest set a new mark for the world to wonder at, putting out 108½ feet of line. Nor was this a chance cast, for his last five casts were 108½, 102, 104, 105 and 108½. Mansfield continued to develop splendid action at the score, and on May 8, 1897, he raised his own record to 113 feet.

At the National tournament held in Chicago on August 13th and 14th, same year, under the auspices of the Chicago Fly-Casting Club, while not quite reaching his home record, he established a new world's record for open contests, with a cast of 111¼ feet. At this meet he also won the accuracy and delicacy event with a percentage of 851.6.

In August, 1902, the San Francisco club held a second tournament, open to the world. At this tournament the East was well represented. Among those present were such well known experts with the rod as F. N. Peet, Uncle John Waddell, R. C. Leonard, H. G. Haskell, W. F. Church, and P. J. Tormey. The San Francisco club had hung up a collection of trophies, valued at \$1,500, and the contests were keen. Mansfield's world's record of 111¼ with the 10-ounce rod was sure to be broken, for several of the Eastern anglers had surpassed it, and unless he showed much improved form they expected to carry the record back across the mountains. But the Pacific champion was there with the goods, and again astonished the world by raising the record to 134 feet. But this was not the only surprise that was in store for the visitors, for Harry Golcher made 133 feet and only two members of the club fell below Leonard's previous record of 102½ feet. In the long-distance event for five-ounce rods Mansfield made a new world's record, that is yet to be beaten, placing his fly with the light rod 129½ feet from the score. In this contest H. G. Haskell of Chicago proved a good second, with 127 feet.

Since this tournament J. B. Kenniff has made 134 feet, F. W. Brotherton 137 feet in the heavy rod club events, and H. C. Golcher the astonishing distance of 140 feet.

In the five-ounce rod contests Golcher also has a record of 129 feet, but six inches less than Mansfield's world's record.

In accuracy casting three members of the San Francisco club—W. E. Brooks, C. R. Kenniff and T. C. Kierulff—have made 99.8-15 per cent, which is three-fifths of one per cent better than the world's record. Also in delicacy casting T. C. Kierulff has scored one-tenth of one per cent better than the world's record.

At the late National tournament, held at Racine, Wis., the best score made with the ten-ounce rod was 100 feet. In accuracy the best percentage was 91-15, and in delicacy 99.14. In long-distance bait casting the best score was 179 feet. J. B. Kenniff

of the San Francisco club has a home record of 200 feet.

The rapid growth of the club, its success in breaking the best records of the world and the good fellowship engendered among anglers through its organization, naturally led to a desire to have a home and set up house-keeping for itself. In pursuit of this laudable desire the club purchased, in 1905, one hundred and sixty acres on the Truckee River which, with the windings of the stream, gives it about a mile and a half of the best fishing grounds on that famous river.

On a beautiful flat, near the center of its possessions, a commodious club-house was erected during the last summer, and opened for the accommodation of members in the middle of August. The location, the plans of the house and out-buildings, as well as its splendid equipments, speak volumes for the good judgment and artistic taste of the club's present executive head, Mr. T. C. Kierulff.

Sitting on the wide veranda in the front one is soothed by the music of the foam-crested waters of the rushing Truckee that flow almost at one's feet, broken by the staccato notes of the passenger engines and the deep base rumblings of the long trains of freight cars that pass on the farther bank. Nor is the sense of hearing the only one that is appealed to. To the west the closer pine-clad hills sweep in

SAN FRANCISCO FLY-CASTING CLUB'S BUNGALOW.

H. B. Sperry.

E. A. Mocker.

a graceful curve as the river bends to the south: To the east stretches a little lawn-like plot along the river bank until the river's eastward course is checked by a great volcanic wall of rich brown lava, upon whose crest the erosions of time have furnished soil for the support of a crown of evergreen pines. Where this eastward course is checked the river turns at a right angle to the north and opens up a long vista of canyon and mountain, with each projecting point changing in color from green to blue, from blue to purple and from purple to that indescribable hazy, golden-pick with which the setting sun bathes the summits of distant mountains. Then if the beholder wishes to view nature in its grandeur and more majestic aspect, he has but to change his position to right or left and behold in one gigantic wall to the south the snow-capped summits of the grand Sierras.

But it is not of the beauties of nature that I am writing, though I cannot pass this exquisite scene by without a mention, brief as it has been. It is the sport, or rather the means of sport biding behind the foam-swept rocks, lazily resting in the deep edying pools, or playfully gamboling in the rushing, dancing waters of the riffles. Of the rainbow trout, the one, two-five-pounders that strike with a rush and fight like a Terrier, sending the blood coursing through the angler's veins as no other denizen of the waters can. It is because of these found in abundance, and the open character of the stream for the casting of the fly, that this location was selected. And it was a happy location, too, for the fish are indeed plentiful. A limit catch ranging from half a pound up is no hard task for the expert. In fact, during the visit of the writer,

Mr. Mocker and Mr. H. B. Sperry often crowded it closely in a morning's sport.

The ambition of the club to have a home of its own is now realized. For it is indeed a home to be proud of; one where its members, worn and tired and weary of the grind of the counter or the office, can repair for rest from business bustle and toil to rebuild the wasted tissues of the body and the mind in healthful recreation and exhilarating sport.

HUNTERS' LICENSE RECEIPTS.

The hunters' license law can now be said to have received the unanimous approval and support of the sportsmen of this State. Up to the opening of the duck season there was a steady demand for the license tags, then there was a temporary lull, followed by a final rush of the holdovers to get in on the quail season, which opened on October 15th. The record for one day was made in Los Angeles, when 295 tags were issued on October 14th.

The issuance of license tags began July 1st. County Clerks report to State Controller Nye every three months. Since the first of the month reports have been coming in from various counties. Up to a week ago forty-seven of the fifty-eight counties have been heard from. These reports show a total, less certain costs, of \$55,048.60. The Fish Commission has collected \$6,000, making a total of \$61,048.60.

The tags ordered probably run up to 100,000. Many hunters have tags that are numbered over 90,000. Tags in different lots have been sent out by the Fish Commission to the various County Clerks. It is, of course, impossible to issue the tags to every applicant number for number. The surpluse on hand in different counties will be noted in the next quarterly reports. It is safe to assume that the fund thus acquired for fish and game protection, with the ad-

ditional amounts from eleven counties, will run close to \$75,000 contributed by the sportsmen of this State principally. A number of Japanese, particularly the professional and leading business men, among which are many devotees of gun and rod, have secured licenses. Other alien licenses, at \$25 each, have been taken out to a fair extent, the number of non-resident tags at \$10 each is comparatively small.

Alameda county heads the list of counties in the amount of collections with \$3,880, while Mariposa is at the foot with \$233, although Alpine has not yet been heard from. Los Angeles is number two with \$3,494, and other counties having over 2,000 nirods are Fresno, Humboldt, Sacramento, Santa Clara, Siskiyou and Sonoma. San Francisco county has collected only \$1,414. The collections to date are as follows:

Alameda \$3,880, Amador \$103.24, Butte \$1,612, Calaveras \$740, Colusa \$1,089.35, Contra Costa \$1,054.80, Del Norte \$239.30, El Dorado \$699.30, Fresno \$2,551.70, Glenn \$532, Humboldt \$2,068.08, Kern \$1,398.25, Kings \$663.95, Lake \$1,121.50, Lassen \$402, Los Anglers \$3,494.25, Madera \$313.05, Mariposa \$233.25, Merced \$973, Modoc \$350, Monterey \$1,533, Napa \$1,094.25, Nevada \$1,020, Orange \$1,064, Plumas \$1,067.75, Sacramento \$2,746, San Benito \$360, San Diego \$1,572.25, San Francisco \$1,414, San Joaquin \$1,951, San Luis Obispo \$734.15, San Mateo \$937, Santa Barbara \$1,492, Santa Clara \$2,783, Shasta \$1,607.60, Sierra \$292, Siskiyou \$2,553.45, Solano \$1,500, Sonoma \$2,768, Stanislaus \$832.25, Sutter \$399, Tehama \$917.35, Trinity \$481, Tulare \$1,893, Tuolumne \$776, Yolo \$1,216.35, Yuba \$618.

QUAIL HUNTING NOTES.

Upland shooting since Tuesday, October 15th, has been the principal field attraction for sportsmen, for on that day the open season commenced for California valley quail, one of the game birds on the Coast. Quail in many localities have bred numerously this year and most of the young birds are now of desirable size. As usual, Marin and Sonoma counties were the objective points for most of the local contingent. Considering that the weather conditions were not particularly favorable on the first day nor since, save in a very few shooting districts, the general results were excellent. Warm water and dry ground creates hard work for the hunter and much discomfort for the dog. Scent conditions are not what is required for the best enjoyment of the sport, nor can the dogs work to full advantage for both sport and results.

The rains last week, it was supposed, would create very favorable conditions for quail shooting. It did, so far as conditions go, in many places of easy access for local sportsmen, but that was all, for probably three out of every four hunters out returned almost empty handed. An illustration of what hunters had to contend with last Sunday is given by Harry C. Golcher, who hunted in company with Ned Bosqui in the north end of the Point Reyes Sportsmen's Club preserve in Marin county. Making an early start Sunday morning the two worked cover after cover, all likely looking places and where birds had previously been located. This work was without avail, for not until later in the day, when the warm sunshine had dried and warmed the open places, did the birds come out from the heavy cover and trees, where they had been in hiding. By this time the hunt was over, for it was necessary to start for the down train from Point Reyes. Otto Feudner, Dr. Wilburn and Chas. Breidenstein hunted on the Lagunitas Gun Club preserve, in the vicinity of the White's ridge country, with equally bad luck. They did not have a shot at more than half a dozen birds, several of which were lost in the trees.

North of San Rafael, in the Lucas valley, Armand De Courtieux, Dr. Barr and Ed Van Bergen got limit bags earlier in the week. Quail have been plentiful on this preserve since the season opened.

In the vicinity of San Rafael the fields and woods have been persistently hunted over for nearly three weeks, and what birds were not killed or wounded have had a daily chasing that has apparently made them wise beyond what would be expected of quail, notwithstanding that they are as clever and cunning a game bird as flies. Many birds have taken refuge in the orchards, lawns and yards of the residence districts where, we are pleased to note, they are safe and protected by the people, among whom they have chosen to secure temporary safety. Cats, dogs and children at times molest the birds, then they can be seen resting out of harm's way on the roofs of houses. Not only in San Rafael, but in several other interior cities have the quail this year sought immunity from the gun and can be seen feeding among the domestic poultry. How tame these handsome partridges can become is illustrated in Golden Gate Park, where they are very numerous and rarely molested. It is not an unusual occurrence for a bevy of birds to cross the paths or roads within ten or fifteen feet of pedestrians.

One of the best quail shoots for the opening week was enjoyed by Empire Gun Club members on the Elkhorn Slough preserves. This district is a grand quail country, and birds have thriven splendidly there this year. A light rain on Tuesday and during a few hours Wednesday morning made conditions for the hunters just about ideal, and limit bags resulted. A. Balfour, who used his brace of Field Spaniels, Inchkeith Billie and Chesterton Bess. Both dogs were prize winners at Stockton last week. These two Field Spaniels are the best specimens of the breed ever seen here. H. F. Elliott, Dr. A. J. Sylvester, Dr. George G. Gere, Dr. J. H. Graves, Dr. B. F. Alden and Mrs. Alden, Dr. P. T. Bodkin, J. Peltier and guest, George A. Bachelder and T. J. Atkinson all got their quota of quail.

Point Reyes Sportsmen's Club members have also enjoyed splendid quail hunting on the Marin county preserve, west of Tomales Bay. Last week Phil B. Bekeart, Will J. Golcher, Ned Bosqui and George Uhl made limit bags on the club grounds. Cal McMahon will try his hand at the game to-morrow.

Another and later report from Lincoln states: The foothills adjacent to Lincoln fairly swarmed on the 15th, and although quail are said to be quite plentiful, many of the hunters returned home with but a limited number of birds, as compared with past seasons. The fact is, quail are growing scarcer each year in the famous old hunting grounds around Lincoln. The opinion is expressed by many that within a few weeks these fast-flying denizens of the chaparral will be scarcer.

A report from Woodland, Yolo county, states: Poor sport marked the beginning of the open season for quail. A number of hunters were out Tuesday and Wednesday of last week. None of them got the limit, and many returned empty handed. The high water of last spring probably drove the birds from the river ranges to other feeding grounds. Duck shooting is still very indifferent and is not likely to be any better until there has been a rain and the weather turns colder.

Southern California quail hunters who have been fortunate in choosing the Mexican border for their sporting grounds report the birds gathered in great numbers near Tia Juana. Several Los Angeles men

have been able to get a string within an hour after getting into the territory.

Grass Valley sportsmen had rather indifferent luck for the first day. While the quail season opened on the 15th inst., it seems as though the quail became aware of the fact just ahead of the hunters, for all the parties that have gone out in the past two days report seeing few birds. While the quail were plentiful in the brush and woods a few weeks ago, the hunters report that now there are very few of the birds to be found.

Several days after the opening bombardment a number of the birds seemed to have taken refuge in Grass Valley. One day there were three of the birds flying about on Church street; they perched on some of the roofs of residences at different times during the afternoon, being watched by many people. This incident is not unusual, as during the season many quail are seen in the residence districts of the town, having been hunted from their haunts in the hills.

Good quail shooting is being found in the foothills, near Shingle Springs. A few days ago, out of forty-eight shots, Deputy Fish Commissioner George Williamson Jr. killed twenty-five quail in about four hours. Hector Williamson, the McKinney stage driver, killed the same number, using fifty-eight shells. The shooting is better in places this season than ever found before.

Opening day gave Sacramento sportsmen a good time. There are plenty of quail and many got the limit. The quail brought in thus far have been found to be chunky and the flesh of fine flavor.

A party consisting of Fred Brown, Joe Brock, Fred Cox and R. Reining went up to Lincoln Monday to

go some. Among the limits were those shot by N. W. Cook, W. Williams, J. J. Spitzer Clay Daulton, A. Preciado, J. Augustine, T. P. Cosgrave and Joe Vincent.

The quail hunting situation about Los Angeles is thus described by The Evening News:

The San Fernando Valley, celebrated among quail hunters, upheld its reputation Sunday. Hunters were so close that getting a limit became a matter of dodging shot. Never before was anything seen like it. Extra coaches on the morning "hunters' train" proved inadequate, and going and coming the train was loaded aisle-full and platforms packed.

Automobiles and motorcycles aided the trains in delivering their parties of prospective quail slayers, and many persons used horses and buggies.

Other sections reported nearly as congested a state of affairs. On the first San Gabriel car were thirty-odd hunters. Glendale cars dropped many at the Los Felis hills, and a number were run off Griffith Park, where the city allows no shooting.

At Newhall, Ed Pardee reported having seventeen teams out, and another man had more, all engaged by hunters, of whom more than 100, Pardee says, boarded the train homeward bound at nightfall. Every 300 yards along the road was an automobile, its occupants scouring the brush alongside the highway.

Not one in 100 came back with the legal limit of twenty-five. The average killing was about three quail. The man who got ten was congratulated. Widely scattered, the quail stuck to the bushes like burrs and refused to flush. They rose wild when in bunches, and made long flights, refusing to "lay." But once scattered they laid so close that a man without a good dog was almost helpless.

Those who had good sport found their birds in small bands, and scattered them on the level ground in rather light cover, away from the cactus. Many who knocked down goodly numbers lost nearly all in the cactus, which is unusually bad this fall. Sometimes a dead bird could be seen, literally spitted on a big bed of prickly pear perhaps a hundred feet across, and absolutely impossible to get through, lying where he had impaled himself in his fall.

Dealers report the gun business has broken all their records, and ammunition sales are absolutely without precedent. Never before was so general an interest shown.

DUCK SHOOTING NOTES.

During the past week the daily weather bulletins have attracted the keen attention and interested perusal of the local shotgun brigade. Rain cuts quite a figure in the affairs of both marsh and upland shooters. For the duck hunters the rains last week practically put a quietus on their sport. The birds have by this time scattered in a thousand and one directions, from marsh to the puddles and overflows in the fields and open country. Fresh feed, seeds, sprouting vegetables, smart weed, to say nothing of the myriads of insects drowned out are what the birds will be on a hungry hunt for now. Last year, after the first rains, thousands of sprig and mallard were observed in the overflowed pasture lands near Los Banos, fattening on myriads of crickets and grasshoppers that were marooned upon the clods of adobe dotting the sheets of shallow water.

For several weeks past the local gunmen have had but indifferent luck duck hunting. The birds here on the opening of the season were nearly all home-bred ducks. The opening day bombardment and shooting since has accounted for bags estimated to be about one-half the visible supply, of the other half most were scared away and the remainder will make a get-away rapidly.

Northern birds, canvasback, bluebills and their cousins have been coming in daily in fair sized flocks, but they do not tarry around the marsh or bay-shore territory, they strike out for the overflowed districts of the Sacramento, Yolo and San Joaquin. The country, up the river, taking for instance Isleton as a center, is full of vast flocks of mallards. As a matter of fact here is found a vast mallard-breeding ground. Where the sportsman is familiar with the location of the ponds and feeding places in the tules a limit bag is a certainty here early in the morning. A few weeks hence, when the smart weed has begun to grow, the ducks will be on hand in thousands. The very high water this year has given the birds a chance for plenty of fresh feed and that is why ducks are so scarce on the Suisun marsh and other ducking resorts. The nut grass which the birds feed upon was dried before the season opened. Wheat, broom-corn seed and other bait kept the birds but a short time before they were tired of a rather dry diet.

The main northern migration will not be on hand until the northern lakes and ponds are frozen over. Recent reports from the Klamath lake region state that there are immense numbers of all kinds of wild ducks at present in that section.

Birds that fly a long distance are very poor in flesh on their arrival here, but after a few weeks of rest they pick up very fast and are greatly in demand. The Klamath region birds are always in splendid condition and these are the quackers that will supply the best winter's shooting. Millions of wild ducks and other aquatic birds breed near the Klamath lake, and they are often seen to rise from the swamps in that vicinity in such numbers as to darken the sky and sun.

The duck-shooting near Firebaughs still holds good, and with the added inducement of sport

T. C. KIERULFF,
President San Francisco Fly-Casting Club.

be on deck on the opening day of the season. They came back with bags filled, every one getting the limit. They report that shooting in that section is fine, but that the birds are very timid.

Near Paso Robles quail were plentiful in the early days of the season. Near Boulder Creek quail and rabbits were plentiful. Among the shooters out were: Fred Howe, Frank Roberts, Charlie Towne and Carl Kratzenstein in the Big Basin and making side trips around the hills. The Smith party of Oakland were at Diesthorst's on Sunnyside, while John A. Koster was bent down from San Francisco on his place near Sequoia.

Among the Boulder Creek shooters, Elwin Rodgers, Joe Mello and sons, Clarence and Joe Sarmiento; brought in thirty-four quail from the Adney-Rodgers camp on the State Park road. Loraine Goslay, Charlie Boyce, Arthur Van Dusen, Harry Swarthout, James Maddocks, Angus Sutherland and many others brought in fine bags of game.

At Arroyo Grande the season opened a cloudy, rainy day, with the birds all hid away in the thick brush, and not to be driven nor coaxed out. The full spatter-gun militia answered roll call, many going out the night before, and after a day's tramp through wet brush, met with but indifferent success. Lige Standorfer is credited with the legal limit, but most of the hunters came home with less. Wednesday the sun came out and the hunters fared better, Fred Phoenix and Bob English getting all the law allows. Sportsmen report birds very numerous this year, and the first warm Sundays will probably be marked with a number of limit bags.

In the vicinity of Modesto the birds are reported to be scarce and in small flocks. Near Madera the birds were wild, and those who got the limit had to

black bass fishing in the San Joaquin. James Maynard Jr., Ed. Schultz, Don McRae and P. McRae, in addition to limit bags of sprig and mallard, also caught large strings of black bass in the best of condition and weighing from 2½ to 5 pounds each.

In the Petaluma marsh district results have been almost nil recently. William Ashcroft, J. Henriulle and Hy Grandjean will prospect to-morrow on their preserve hack of the Taylor levee, near Burdell's.

This week the various resorts have panned out very poorly, some of the Suisun ponds were entirely deserted by the birds. Last week the shooting was a little better. Wednesday W. W. Richards and Frank Mayer accounted for nearly 40 fine, fat birds. On the Teal Cluh preserve nearby the ducks have been very plentiful. Other good ponds in that vicinity have been deserted by the webfeet.

Guy T. Wayman, George Field and Willard Wayman left this city Tuesday afternoon for a shoot on the famous Stewart ponds, on the north end of the Suisun marsh. The early morning shoot was fairly good, Wayman getting twenty sprig and wid-geon, having the best string. The party was back in the city on Wednesday morning by 11 o'clock. A trip like this can be considered as pretty near ideal duck shooting.

The Joycee Island and Volante Gun Club members have enjoyed a good average of duck and snipe shooting since the season opened. The members of the Ryer Island Gun Club also have had excellent sport until last week. George Gauld and Charles Breidenstein each bagged good strings of English snipe on the Ryer island preserve recently.

On the Alameda marshes, save in a few favored spots, the fresh water ponds particularly, ducks have been scarce, and the hunters have devoted their attention to rail, these birds being plentiful in the Alviso marshes.

The Redwood marshes have been crowded with hunters since the 15th, and fair hags have been secured. The rail season opened in San Mateo county on October 15th and will close November 15th. The birds are rather numerous this year, and afford good sport during low tide, but a dog is necessary, however, for the birds are running when they have a chance to hide. A number of salt works Japs in that section have taken out \$25 licences.

Speaking of rail reminds us that last Sunday two hunters, E. M. Kennison and L. C. Schachtebeck, shot a string of fifteen rail in the Mill Valley marsh, this being the first instance in many seasons where rail were found in that marsh.

The duck hunting situation in Southern California up to two weeks ago, is given by E. L. Hedderley as follows:

Slight improvement in the shooting was experienced by the Orange-county duck clubs Saturday morning, two weeks ago, a small flight of new birds having come in on the storm, presumably from the Imperial country.

Decoying in headlong dives, different from the high aerial circling that has been characteristic of the big birds for the last two weeks, the sprigs of yesterday afforded some pretty sport. The small squads afield, however, had plenty of gun-straining work to do. The new birds did not put in their appearance until about 9 o'clock.

These birds all came from the east and they began bettering the sport at once. There was but little wind, and the sky remained overcast all morning, a few birds being in sight nearly all the time and serving to relieve the monotony. The newcomers obeyed the dulcet strains of the duck call splendidly, and alighted freely in the cluh ponds whenever given an opportunity by the anxious gunners below.

Rather small turnouts were the rule on all the clubs, and not many got the limit, the best shots in many cases remaining away, thinking a trip a waste of time, but they missed a chance to hag fair strings.

One of the most interesting features of the shoot was the flight of redheads. These big, blocky birds were in far greater force than usual, all the clubs killing some of them, and nearly every gunner getting a chance for a double. About thirty were reported in the various bags. Their running mates, the canvbacks and bluebills, did not put in an appearance, and are not due until cold weather, if they come at all. The latest arrivals are nearly all widgeon, and it seems as if the vanguard of the November fowl are here, weeks before their time, and just when the club hunters are beginning to need them for sporting material.

Generally, the widgeon do not come down before the middle of November, only severe storms sending them here ahead of that time, and the main flight does not appear to have arrived as yet, but the Ballona clubmen had a good shoot on them, and probably they will help out the present bags materially.

As a rule, the migrating wildfowl come Saturday and into the country at night, but those Sunday arrived about noon and could be recognized instantly as travelers, coming down to the ponds from a great altitude, and leaving their wedge formation. Very few sprig were noticed in the flocks. No spoonhills were seen, but they will not be far behind, the duck hunters believe. Big droves of green-winged teal, mostly rather wild, also made their appearance.

Not many mallards were seen. The duck representation in numbers is about the same as it has been, but the hunters believe some of the birds which were here from the first, left and were replaced by others which came in on the rain.

The Bolsa Chica Gun Club had a very poor shoot, nobody getting the limit, although seven guns tried their best. J. V. G. Posey, William Bayly, Isaac

Milbank, T. E. Gibbon, F. J. Fay, Gen. M. H. Sherman and E. R. Hull bagged twenty or less, Bayly having the best luck of any. The birds were teal and sprig.

John M. Larronde was high gun on the Lomita with nineteen, including one redhead. Michael F. Amestoy had ten, but did not enter his blind until 10 o'clock, coming out in the morning. Fred A. Hines killed a dozen, including two redheads. Ross T. Hickcox got eighteen, with two redheads and a goose on his string. Joseph P. Amestoy got fifteen. Earl Mueller accounted for fourteen, with a pair of redheads. Dr. G. W. Lasher, Austin Martin, Harry L. Martiu and Tony Neubel, a guest, were contented with small messes.

On the Cbico Land and Water Company's grounds seven guns shot. Harry Graham, shooting his new sixteen for the first time, tied with Ed R. Maier for high honors, with 19. Joe Giola bagged 14. His brother, Ed Graham, got 7. H. B. Woodill, a guest, got 17. James Smith got the same number. Eugene Kock had ten less. The shooting was not up to the average of the marsh, but the birds were of the usual high class, mostly sprigs.

Joe Giola and Harry Graham will be members of a quail hunting party, which will shoot up the country about Newhall.

Duck bags on the Christopher ran from eleven to nineteen. Five redheads were killed by the club. Godfrey Fritz, Frank Pellissier, A. Foix, William Frick, J. A. Crook, A. W. Eager and H. C. Dillou were present.

The usual Saturday squad, Dr. Schiffman, Dr. Steen, and the rest of the medical fraternity held forth upon the Blue Wing with their usual splendid results, bagging some limits.

F. E. Robinson got the limit on the Westminster, including one mallard. C. C. Carpenter killed 16, Stoddard Jess 20, and George Jess 16. Marshall Stimson picked up 29. Karl Klokke bagged 18. J. A. Graves 19, and Walter Leeds, with a bad blind, got a dozen.

On the Golden West, A. J. Hoffman, with 25, was high; his brother got 20, and Myers a dozen. One redhead was killed.

Messrs. Anderson and Wright had a good shoot on the Los Patos grounds, getting about 20 each.

Owing to the absence of Gen. Last and other members quail hunting, there was no shooting on the Green Wing Land and Water Company. The ducks had one haven of refuge left them in the general cannonade.

Since the law opened upon them the marlins and other large snipe have been conspicuous by their absence. The keepers say ponds were thickly populated with them the day before the opening. Last Wednesday they were scarce, and the few seen were wilder than the sprigs.

A few jacksnipe are here, and clubmen are anticipating a little sport with them later on. Many big yellow-leg snipe occasionally fly by the blinds.

The usual Saturday brigade was busy on the Olympic marsh. The Green Wing's not shooting interfered somewhat with the Olympic sport, as many birds settled on the unoccupied ponds, only a few hundred yards away, across the road.

At the Canvasback, E. L. Hedderley got 25, including one redhead; D. L. Burke Shot 18, mostly sprigs, and George S. Hupp also bagged a pair of redheads and a dozen sprigs.

Five members shot at the Sunset and three of them, George H. Recter, Dr. Stivercy and A. T. Jergins, got the limit. Rudolf Mausard and B. V. Collins each killed twenty birds.

A report from Willows states that sportsmen are busily engaged in arranging for the winter's sport of killing geese over live decoys. Geese have been flocking into Glenn county by the thousands recently and it will be but a short time until the fun will begin. Sportsmen from all over the United States visit Willows each season and participate in this fun. Glenn is known as the "Goose County."

H. H. Dunning, W. F. Kelly, Geo. D. Lashmuth and Oscar Davis, hunters of Marysville, made a record at the Graves preserve on Butte Slough last Saturday, when they brought down with their shot-guns 160 geese, besides the limit on wild ducks. Their Marysville and Yuha City friends had wild game gratis for their dinners for several days.

Four members of the California Anglers' Association placed last Monday 35,000 trout fry in Sonoma Creek, between Glen Ellen and Los Guillecos. The work of planting the young trout, from 1½ to 3 inches in length, was done by Geo. H. Wentworth, San Wells, J. Pincus and Joe Myers.

A number of striped bass have been taken recently in San Antone Slough. On the 20th inst. Harry Merriweather of Oakland landed a 30-pound fish. Last Sunday Jas. S. Turner caught a 10-pound fish. On the same day a number of bass were caught at Wingo, a station on the Glen Ellen branch of the railroad. The largest was a 20-pounder landed by Chas. Cutter.

Jackson's Napa Soda is the best hot weather drink,

AT THE TRAPS.

The Arizona Sportsmen's Association fifteenth annual blue-rock tournament came off at Douglas, Ariz., October 11th, 12th and 13th. This shoot is the annual attraction for the sportsmen of that section and is always attended by a representation of shooters from Southern California, New Mexico and Texas. An average of thirty-nine shooters lined up before the bulkheads and kept things going in lively fashion. The home boys did everything possible to make the visiting shooters enjoy themselves, and are to be commended for their hospitably successful efforts.

High mateur average was won by J. G. Naquin, 377 out of 395. Fred B. Mills was second with 372. The "pro" high average was shot by E. Holling of San Francisco, who broke 381 out of 395. D. W. King Jr. was second. Holling broke the Coast record with a run of 166 straight. On the third day Gottleib got in a run of 107 straight. The score sheets show some pretty good shooting throughout.

The Copper Queen trophy, event No. 3, first day, was finally won by W. J. Rand of El Paso, who was tied by Bulwer, Hitt and Joe Brown, with 25 each. Reed and King also scored straight.

The Individual Championship, event No. 3, second day, 50 targets, was won by W. H. Reno of Douglas, who broke 49. This was tied by E. Holling.

The McVeigh Handicap medal, event No. 7, third day, 25 targets, was won by Chris Raithel of Deming, who broke 20 straight. Mills, Rand and W. H. Reno also broke straight, but lost on the shoot-off. Dick Reed also broke straight.

The two high amateur averages the first day were: F. B. Mills, 149 out of 155; J. G. Naquin and H. Meyer, 147. For the second day: Naquin, 97 out of 100; Chris Raithel, 93. For the third day: Fred B. Mills and Naquin, 133 out of 140; Chris Bulwer, 132.

The professional two high averages each day were: First day, 155 targets—D. W. King Jr., 149; Harry Hoyt, 147. Second day, 100 targets—E. Holling, 99; King, 97. Third day, 140 targets—Chris Gottleib 137; Holling, 131.

The team events did not count in general average. On the first day, the Gwynn three-man trophy race, event No. 8, 30 targets per man, had seven teams in the race. Douglas team No. 1 won the trophy with 86 out of 90—Kirkland 27, W. H. Reno 30, Geo. Brown 29. The other scores were: Tucson team No. 1, 81—J. Steigler 29, Geo. Julian 26, H. Smith 26. Douglas team No. 2, 79—F. S. Douglas 28, Geo. Lanhan 25, H. N. Reno 26. Deming team, 79—Chris. Raithel 29, W. F. Cobb 29, H. Meyer 21. Tucson team No. 2, 74—Chas. Weber 27, W. D. Purcell 25, J. Ronstadt 22. Profession team No. 1, 86—Tom Marshall 30, Dick Reed 28, D. W. King 28. Professional team No. 2, 82—E. Holling 30, H. Hoyt 23, Gottleib 29.

The team shoots on the second day was the Association Diamond medal, four-man team, event No. 6, 50 targets per man. The Deming and Douglas teams tied with 173 each out of 200. Douglas won on the shoot-off, 25 targets per man, 82 out of 100. The scores were: Deming, 173—Raithel 48, Cobb 44, Young 39, Meyer 42. Douglas, 173—H. N. Reno 41, Brown 45, W. H. Reno 42, Lanhan 45. El Paso, 151—Rand 46, Bulwer 38, Hitt 38, Penabaker 29. Tucson, 150—Purcell 38, Smith 38, Steigler 38, Julian 36.

The team shoot on the third day, event No. 8, two-man team, for shooters under 85 per cent, 25 targets per man, was won by the Douglas team, after shooting off a tie with Tucson No. 1, 38 to 35. The scores were: Douglas—H. N. Reno 20, Kirkland 29—40. Tucson No. 1—Ronstadt 19, Weber 21. Tucson No. 2—Purcell 21, Julian 17.

The averages of the shooters who shot through the tournament, a total of 395 targets, are given below. For the first day 155 targets counted on average—events No. 5, 25 targets (Copper Queen trophy), and No. 8, 30 targets (Gwynn team trophy) did not count. On the second day, event No. 3, 50 targets (Individual Championship), and event No. 6, 50 targets (Team Championship), did not count, 100 targets counted on average. The third day, 140 targets, event No. 7, 25 targets (McVeigh medal), and event No. 8, 25 targets (Two-man team), do not count.

Amateur averages—J. G. Naquin 377, F. B. Mills 372, Chris Raithel 369, W. J. Rand 369, W. F. Cobb 365, Chris Bulwer 364, W. H. Reno 361, H. Meyer 358, L. C. Young 348, J. Steigler 345, Geo. Lanhan 342, Joe Brown 340, F. S. Douglas 338, G. L. Hitt 337, Chas. Van Valkenburg 336, C. Weber 335, W. B. Purcell 332, H. N. Reno 330, Geo. Julian 328, W. H. Kirkland 326, J. Ronstadt 292.

Professional averages—E. Holling 381, D. W. King Jr. 372, Chris Gottleib 370, T. A. Marshall 350, Dick Reed 348, H. I. Hoyt 347, H. Justins 344.

DOINGS IN DOGDOM.

Los Angeles dates for the Southwestern Kennel Club's show are February 19-22, four days. Mr. Arthur Lettis is president of the club.

On the bench show committee, who will manage this show, are: Jaro Von Schmidt, Kingsley Stevess, Kenneth Preuss, Dr. L. W. Young, C. T. Torrey, Richard Halsted, W. K. Peasley, Ernest Kennedy, R. T. Cochran, Huron Rock, Paul Piepers, P. N. Nissen, with G. F. Herr as chairman. Mr. J. H. Pearman has been selected as superintendent and secretary of the show. All communications should be addressed to him to 2423 Budlong avenue.

An unusual number of handsome trophies will be offered by the club, besides those contributed by admirers of "man's best friend."

This show, being held in the height of the tourist season, is expected to attract a number of Eastern dogs that will be brought West by their owners to winter in Southern California.

The question of judges has not yet been settled by the committee, but it is expected that Eastern men will officiate.

Pasadena will start the spring show circuit with a two days' show, February 14th and 15th, a week before Los Angeles.

age, with 372 out of 400, using Du Pont smokeless.

At Columbus, Ohio, on October 2nd and 3rd, Mr. R. O. Heikes and Mr. J. R. Taylor won first and second general averages with 387 and 383 respectively out of 400, using Du Pont smokeless.

Lon Fisher and W. A. Fishington tied for first amateur average with 386 out of 400. F. M. Edwards and F. E. Foltz tied for second amateur average with 366 out of 400. Mr. L. M. Bottenfield won third amateur average with 364 out of 400.

At Dover, Del., on October 3rd, Mr. L. S. German and J. M. Hawkins won first and second general averages with 163 and 167 respectively out of 180. Mr. A. B. Richardson won first amateur average with 186, Mr. W. M. Foord second amateur average with 174 and Mr. J. A. McKelvey third amateur average with 165. All of these gentlemen used Du Pont smokeless.

An interesting feature of the Western Handicap tournament at Denver, Colo., August 20th to 23rd, and of the Pacific Coast Handicap tournament at Spokane, Wash., September 10th to 12th, was the excellent and consistent shooting of Mr. Fred Gilbert, who was in the Preliminary and the Western Handicap at Denver and in the Preliminary and Pacific Coast Handicap at Spokane placed on the 21-yard mark.

In the Preliminary at Denver he broke 93 out of 100, and at the Pacific Coast Handicap 94 out of 100. In

Second day, Saturday, October 12, 1907—

GLEN TANA COLLIE KENNELS' PARBOLD PREMIER.

Mr. Huron Rock of Santa Barbara offers this week three choice English setter puppies, two dogs and a bitch. They are by a litter sister of Ch. Sue Gladstone by Ch. Stylish Sergeant.

Mr. Rock has been shooting over Santa Barbara, Sue and Del Rey every day this season. Del Rey will run in the Bakersfield trials next January.

Mr. Henry Jarnett's Cocker bitch Mollie was served by D. P. Cresswell's Ch. Mepals Saxon, last week. Saxon also served W. H. Dennis' Twinkle on October 30th.

Foxhound pups, well bred and promising, are offered for sale in an ad. on page 12.

Mr. E. M. Oldham has been engaged to judge all breeds at the Frisco show next spring.

A one-day show at Del Monte, for Sunday, December 1st, is being arranged for and will probably be a fixture.

There has been some comment in the kennel press, from time to time, on "type" and the importance of sticking to type in the judging ring. This was exemplified at the recent Stockton show. Type was followed closely in many breeds, but the inconsistency of the matter was that the "type" followed was suspiciously, in several instances, sickly looking and weedy. Of course, the proper medical (?) advice was on tap and the dog remedies, that is the only ones that were effective, could be found in any drug store.

TRADE NOTES.

With Dupont Smokeless. At Waynesburg, Ohio, on September 19th, first average was won by Mr. J. R. Taylor, who broke the entire program straight, a total of 180 targets, using Du Pont smokeless. Second average was won by Mr. L. J. Squier, who broke 173 out of 180, using Du Pont smokeless.

At Rising Sun, Md., on October 1st, Mr. W. W. Foord of Wilmington, Del., won first amateur aver-

both the Handicap events at Spokane he broke 91 out of 100.

This not only speaks volumes for Mr. Gilbert's skill, but also speaks volumes for the excellence and regularity of the powder which he used, namely Du Pont smokeless.

Remington Autoloading Rifles.

The Remington Arms Company is in receipt of an interesting letter from Steve Elkins, one of the famous Colorado bear and mountain lion hunters, who has made a great name for himself in that section. Mr. Elkins writes: "Would say regarding the autoloading rifle, I like it very much and am sure it will lead all other rifles for big game. It is very accurate, has wonderful killing power and the action is perfect."

Convincing Testimonials.

Going to buy a new shotgun this season? If so, write the Ithaca Gun Co. If you want a cheap gun or if you want a costly one this concern can supply your wants, for it makes fine guns for everybody at every price, ranging from a small minimum to three hundred dollars, and all are guaranteed right down to the smallest screw.—From Recreation.

An old sportsman one day while out for birds found many signs of deer, and put a buck-shot shell in his 7-pound, 28-inch 12-gauge Ithaca and soon dropped a large deer at 80 yards. His astonishment did not cease when he found he could duplicate the shot, and now he considers his little Ithaca among the great deer getters.—H. W. Harmon, Effingham, N. H., in National Sportsman.

Though a gun crank, unfortunately I am not able to buy an expensive gun, so ordered an Ithaca 1 special hammerless, with nitro-proved barrels, for target use. The finish, balance and shooting qualities of the gun surprised me. The new concealed cross bolt, added to the old under fastening, makes a doubly secure fastening.—E. B. M., from Recreation. "Recapper" is a "crank," hard to please in his ideas of how a gun should look, but you have fully met his ideas with the little 20-bore.—Yardville, Pa., Thos. C. Abbott (Recapper).

For game or ornamental purposes now ready for Fall delivery in any quantity. Also Golden and English Pheasants, Quail, etc. Write at once for prices.

SIMPSON'S PHEASANT FARM, Box K, Corvallis, Oregon.

RUBBEROID ROOFING

Weather Proof, Acid Proof, Fire Resisting.

BONESTELL, RICHARDSON & CO., 473-485 Sixth St., San Francisco, Cal.

MARVIN WILKES 2:12½ FOR SALE.

Six years old, absolutely sound, large, handsome, fine disposition, game trotter and one of the best bred stallions on this Coast. Has already shown he will make a great sire. This year he trotted the fourth heat over the Woodland track in 2:11 during the races, the fifth heat in 2:09½, last half in 1:04, last quarter in 31 seconds. He could have trotted in company that day in 2:08. In good hands he will trot in 2:06 or 2:07.
Marvin Wilkes was sired by Don Marvin 7927 (2:22½).

First dam Nora S. (public trial 2:17), by Sable Wilkes 2:18.

Second dam Gracie by Nutwood 600.

Third dam Gracie 2:37¼ by Jack Hayes (thoroughbred).

Fourth dam Princess by Williamson's Belmont.

I am compelled to sell this good horse on account of ill health. For particulars address

By filing with the Saratoga Association before November 1st, 1908, an accepted transfer of the engagement in this Stake, the Nominator will be released from further liability.
Five and a Half Furlongs.

Breeders Should Note This Stake

THE HOPEFUL for 1910 Estimated Value \$30,000

By subscription of \$10 each, for the produce of mares covered in 1907, the only forfeit if struck out by November 1st, 1909. If left in after November 1st, 1909, a further subscription of \$50 each; and if left in after May 2nd, 1910, a further subscription of \$100 each. Starters to pay \$250 additional. The Saratoga Association to add \$5000. The second horse to receive \$2000, the third horse \$1000, and the owner at time of entry of the mare producing the winner \$1000 out of the Stakes. Colts, 122 pounds; fillies and geldings, 119 pounds. Winners of two races of \$3000, or one of \$5000, to carry 3 pounds extra; of two of \$5,000 or one of \$9000, 8 pounds extra. Horses not having won \$2500 allowed 4 pounds; of \$1000, 7 pounds. If a mare in this Stake drops her foal before the 1st of January, 1908, or if she have a dead or more than one foal, or is barren, the entry of such mare is void. By filing with the Saratoga Association prior to November 1st, 1909, an accepted transfer of the produce, with its engagement in this Stake, the original Nominator will be released from further liability as to the engagement of the produce.
Six Furlongs.

THE RULES OF RACING, adopted by The Jockey Club, govern all races run under the auspices of the Saratoga Association.

Entries to either or all of the races advertised in this Blank will be received only with the understanding, and on the agreement of the subscriber, that the provisions of Racing Rules 42 and 43 (hereto appended) form a part of and govern the contract:

"RULE 42. Every person subscribing to a sweepstakes, or entering a horse in a race to be run under these rules, accepts the decision of the Stewards on any question relating to a race, or to racing.

"RULE 43. At the discretion of the Stewards of The Jockey Club, or the Stewards, and without notice, the entries of any person, or the transfer of any entry, may be refused."

ANDREW MILLER, Secretary and Treasurer, Windsor Arcade, 571 Fifth Ave., New York.

CHARLES DERBY PACER FOR SALE.

Brown gelding, foaled April 20, 1903; 15.2 hands, perfectly sound and in the best of condition. He is now in training in Jack Phippen's string at Pleasanton. Has had six months' work. Stepped a mile in 2:18, half-mile in 1:06, quarter-mile in 32½ seconds. Is a matinee horse right now and a wonderful racing prospect. Mr. Phippen thinks he can drive him in 2:14 or 2:15 at any time if called upon. Horse can be seen at any time. His regular work-out days are Wednesdays and Saturdays at the Pleasanton track. This horse was bred at the Oakwood Park Stock Farm.
Sire, Charles Derby 4907.
First dam Algerdella (dam of Thornway 2:05½, Allandora 2:17¼ and Sable Steinway 2:23½), by Allandorf 7462.
Second dam King Girl by Mambrino King 1279.
Third dam Leah by Wilson's Blue Bull 75.
Fourth dam by Tom Hal.
S. M. VANDEVOORT, Owner, Box 893, Palo Alto, Cal.

NOTHING BUT GOOD RESULTS.

Have used GOMBHAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. HAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBHAULT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—T. C. CRAMER, Training Stables, 390 Seaville Street, New York City.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc.

WINCHESTER
HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1886 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

\$200 for Nominator on whose entry is Named the Dam of Winner of Three-Year-Old Trot.

\$1250 for Two-Year-Old Trotters.

\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

\$750 for Two-Year-Old Pacers.

\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

\$250 IN SPECIAL PRIZES FOR STALLION OWNERS

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize	\$100
2d Prize	50
3d Prize	35

4th Prize	\$25
5th Prize	20
6th Prize	20

The Above Prizes will be Paid on December 24th, 1907.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings, February 2, 1909; \$10 on Two-Year-Olds, February 1, 1910; \$10 on Three-Year-Olds, February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For Entry Blanks and further particulars address the Secretary.

CONDITIONS.

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare prove barren or elpe or has a dead foal or twine, or if either the mare or foal die before February 2, 1908, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contract for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will not be barred on pacing horses.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

Brown gelding, foaled April 20, 1903;
15 1/2 hands, perfectly sound and in the
best of condition. He is now in train-
ing in Jack Phippen's string at Pleas-
anton. Has had six months' work.
Stepped a mile in 2:18, half-mile in
1:06, quarter-mile in 32 1/2 seconds. Is
a matinee horse right now and a won-
derful racing prospect. Mr. Phippen
thinks he can drive him in 2:14 or 2:15
at any time if called upon. Horse can
be seen at any time. His regular work-
out days are Wednesdays and Saturdays
at the Pleasanton track. This horse
was bred at the Oakwood Park Stock
Farm.

Sire, Charles Derby 4907.
First dam Algerdetta (dam of Thorn-
way 2:05 1/2, Allandora 2:17 1/4 and Sable
Steinway 2:23 1/2), by Allandorf 7462.
Second dam King Girl by Mambrino
King 1279.
Third dam Leah by Wilson's Blue
Bull 75.
Fourth dam by Tom Hal.
S. M. VANDERVOORT, Owner,
Box 893, Palo Alto, Cal.

THE WEEKLY

BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO
P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

AN ESTEEMED CONTEMPORARY takes more than a column of its valuable space in an attempt to prove that we have taken a wrong view of the matter in asserting that "it does not sound well for horsemen and horse journals to berate and belittle guaranteed stakes because more money is taken in by the promoters of them than they pay out." The greater portion of the article is devoted to comparing the guaranteed stake in which the promoters pay no more than the amount guaranteed, to a game of poker in which there is a "kitty." The knowledge of poker displayed by our esteemed contemporary is marvelous, but just what relationship it has to a guaranteed stake we cannot discover. If all guaranteed stakes paid a profit to the journals promoting them, our contemporary might have some excuse for its rallery, but there have been many stakes trotted which cost their sponsors a goodly sum over and above the amount paid in. There are some people in this world so constituted that they become sour and angry whenever they know other people are prosperous. We hope our contemporary is not in this class, but from its attack on all guaranteed stakes but its own, there is certainly cause for suspicion that the greater entry lists secured by some of its rivals' stakes over that received for its own, has aroused in it a spirit of jealousy which is not becoming to a journal devoted to the interests of the horse, his owner and his friends. We would therefore impress upon our esteemed contemporary that in the ethics of turf journalism it is as bad form to stare at a rival's big stake entry through green goggles as it is to peer through the same glasses at its more numerous and better paying advertising pages. Live and let live is a good motto, and not one owner in a thousand cares a tinker's imprecation whether there is any surplus money in a stake so long as he gets the portion guaranteed when his colt wins.

STAKE No. 8, Pacific Breeders' Futurity, will close on Monday, the 2d day of December. It is for the foals of mares bred this year, to trot and pace as two and three-year-olds, and has a guaranteed value of \$7,250, which makes it more valuable than any of its predecessors. A new feature has been added this year which should make the stake very popular with stallion owners and that is a series of prizes which go to the owners of the stallions having the largest representation of mares bred to them that are nominated in the stake. There are six of these prizes—\$100, \$50, \$35, \$25 and two of \$20 each. Every stallion owner can afford to do a little rustling for nominations to this stake, and if mares bred to his horse lead in number entered, a neat prize of \$100 in cash is due him. The particular attention of stallion owners is called to this new feature which will be found in the advertisement of the stake.

THE NEW CALIFORNIA JOCKEY CLUB advertises The California Futurity Stakes for 1909 and 1910, to each of which it adds \$5000. The stake to be run in 1909 is for foals of this year and closes December 31st. The stake to be run in 1910 is for the produce of mares bred this year and also closes December 31st. The full conditions of these stakes can be found in our advertising columns.

THE HANDICAP SYSTEM of harness racing as practiced in Australia and New Zealand, is worth trying here. It is very simple, and while it requires standing starts, is very popular there with horse owners, drivers and the public. Here in California, where the number of horses that are raced each year on the trotting track is limited, some system of handicapping that will bring them together would be very advantageous in securing larger entry lists late in the season. The Australian system requires a handicapper who is familiar with the horses and their abilities as shown in actual races. If he sees three horses race, one finishing his mile driven out in 2:26, another in 2:23, and another in 2:20 and the handicapper believes these figures about represent the limit of their speed, they are handicapped when entered for the same race by having the 2:26 horse start just at the sound of a bell, the 2:23 horse starting three seconds later by the same signal, and the 2:20 horse three seconds after the 2:23 horse. All Australian horsemen we have talked with say this plan works well in that country and many very close finishes result. Some enterprising California association should arrange a few races of this sort at its meetings, and if a moderate purse were given with free entrance we believe there would be no dearth of starters. The Park Amateur Driving Club might give it a trial, as with the number of horses now owned in the club, the present plan of classifying them is getting to be quite a difficult thing to do.

REGISTRATION OF HORSES that race in Australia is compulsory, and the rules are very strict in regard to it. No horse can be entered in a race until he is duly registered, his name, breeding, color, height and markings being accurately given. If a horse is sold, the seller must notify the registrar of the fact and the buyer must also notify that official that he has purchased the animal, and a record of these facts are made in the books. The ownership of any horse starting in a harness race in Australia can thus be known at once by an inspection of the books. If anyone attempts to start a horse whose change of ownership has not thus been recorded he is disqualified, and man and horse ruled off the turf.

FROM ALL REPORTS laying up heats was quite common at the Lexington meeting and was attributed to the three-in-five plan of racing by many of the turf writers. The California State Agricultural Society has a condition which pretty effectually prevents the laying up of heats, and since its adoption a dozen or more years ago it has been found to work well and is popular with horsemen. By this plan all horses not winning a heat in three are sent to the stable after the third heat, leaving not more than three horses to finish the race in any instance. With due diligence on the part of judges very little laying up will be attempted where this plan of racing prevails.

FIVE STAKES FOR RUNNERS will close for entry with Secretary Thos. H. Smith of the Coney Island Jockey Club, New York, on the 15th of November, which is on Friday next. The stakes are The Foam and The Surf, for 1908. The Tidal, The Mermaid and The Lawrence Realization for the June meeting of 1909, The Great Filly for the autumn meeting of 1909, The Lawrence Realization for the June meeting of 1910, and The Annual Champion for 1908 and after. Read the conditions in the advertisement which appears in this issue.

William Cecil returned from the East this week and is back at San Jose for the winter. He is looking for a good unmarked stallion, or one with a slow record that can reduce it, for Mr. C. F. Brotherton of Astahula, Ohio, who wants a stallion to head a stock farm and to race. Mr. Cecil can be addressed at 391 West Julian street, San Jose.

The Fresno District Fair Association is trying to get a lease of the fair grounds from the Board of Supervisors of that county, and if it is granted the association will make many improvements before the next fair.

To-day is the opening day of the New California Jockey Club's season of fall and winter racing at Oakland race track. Races begin at 1:40 P. M. sharp.

Charley De Ryder has the pacer Argot Boy 2:03½ in his string at Phoenix.

Feed your colts well while they are being weaned, and their growth will not be stunted.

C. C. Crippen, who is at Phoenix with Budd Doble's horses, says the track there is as good as the one in Memphis.

Third payments on the foals of 1907 in Pacific Breeders' Futurity No. 7 were numerous. The list will appear next week.

Both Crescents 2:02¼ and Dan Patch 1:55¼, the fastest trotting and pacing stallions in the world, will be at Phoenix next week.

The Riverside Driving Club is one of the best on the coast. Its members are very enthusiastic, and large crowds attend all its matinees.

Word comes from Puyallup, Washington, that the forty-year-old pacer Sleepy Tom, known to all residents of the northern country, died recently. He was a strawberry roan and twenty years ago was unbeatable in that country.

Harry Nelson of Hanford, who owns the McKinney stallion Expressive Mac, put two of that stallion's colts on the scales the other day. One seven months old weighed 625 pounds and the other five months old weighed 565. Pretty fair youngsters.

Don't turn your colt out now to rustle for himself all winter and expect him to be ready to trot fast enough to win stakes as soon as taken up in the spring. If your colts run out see that they have plenty of feed and a place for shelter during the storms.

There is an excellent Central California Circuit, comprising the associations at Fresno, Hanford, Tulare and Bakersfield. A Northern California Circuit could be organized by Red Bluff, Chico, Marysville and Woodland, where there are good mile tracks and fair grounds.

The newly organized association at Newman, Cal., will hold its first meeting on its new track on Thanksgiving day. The association has elected the following officers: President, E. S. Wangenheim; Vice-President, C. W. Schank; Secretary, W. J. Burris; Treasurer, Bank of Newman.

The Keru County Driving Club is planning to give races at the Hudnut Park track, Bakersfield, on Thanksgiving day. The old blue roan stallion Richmond Chief 2:11¼, now twenty years old but still trotting in races, will be one of the attractions. He is as proud as a peacock when brought on the track, and can trot a mile close to 2:15. He is owned by Mr. T. H. Fogarty of Bakersfield.

Angus Pointer 2:01¼, the champion pacer of 1907, has been consigned to the Old Glory sale. He is owned by State Senator George Whitney of New Hampshire, who purchased him from C. K. G. Billings at the Old Glory sale of 1905. Since then he has started in about twenty races and won nearly all of them. He did not lose a race this year.

THOROUGHBREDS FOR UNITED STATES ARMY.

Lieutenant Johnson, U. S. A., has returned from Germany, where he has been five years as representative of the United States Army to study German methods of recruiting cavalry mounts for the Army.

He tells an interesting story of the manner in which mounts for the cavalry are kept up to the highest state of efficiency. Thoroughbred stallions owned by the Government are bred to cold-blooded mares of good size and individuality and the result is cavalry chargers of the best class. Lieutenant Johnson is a strong believer in thoroughbred blood, and maintains that horses, bred as the German cavalry horses are, are more intelligent, mature earlier and have more stamina and endurance than any other horse in the world.

The young horses are taken up first as two-year-olds, when they receive light training and are made accustomed to the use of arms. At three years of age they are trained for the maneuvers, and at four are ready for actual service.

Lieutenant Johnson, in his report of his observations in Germany, will strongly recommend the acquirement of a large number of thoroughbred stallions by the Government, to be used exclusively for breeding remounts for the Army.

GOOD PRICES PREVAIL.

Dispersal Sale at Brace Farm, Santa Clara, Saturday Last, Highly Successful.

Fred H. Chase & Co. never had a more successful sale than the one at Santa Clara last Saturday, at which this well known auction firm disposed of all the horses on Mr. Brace's breeding farm.

The people began arriving at the Brace home place, which, by the way, is one of the most beautiful country seats in the Santa Clara Valley, on the morning trains, and from 10 o'clock until noon the horses were driven to harness by Mr. Johnson and Mr. Hodges.

From the first it was seen that there were many bidders in the crowd, and as there was no dwelling on any horse offered, the sale proceeded in a very lively manner until every horse catalogued, with the exception of three or four that were down with distemper, had been offered and sold.

The remarks made by Rev. Mr. Speers were a decided feature of the sale. Mr. S., as many of our readers know, is a lover of a good horse, and has been an owner and breeder for years.

The heaviest buyers at the sale were John Quinn of Sacramento, who purchased the stallion Greco B., and four others, and Mr. F. E. Alley of Roseburg, Oregon, who bought five head.

The highest priced animal in the sale was Sadi Moor, three-year-old son of Guy McKinney and Sadie Moor 2:22 1/2. He brought \$1,075 and went to the bid of William Johnson of Santa Clara.

The first of the get of Star Pointer 1:59 1/4 ever offered for sale in this State were among the foals of 1907 offered. There were three of them, all fillies, and none of them weaned.

Belle W., the dam of Bolivar, was purchased by Rev. Speers. This gentleman has recently purchased an eighty-acre ranch in the mountains six miles from Santa Clara, and he will use Belle W. to plow his orchard and vineyard and to pull his buggy to town.

The thirty stallions, broodmares, three-year-olds, two-year-olds, yearlings and weanlings brought an average or within a few dollars of \$300 each, which makes the sale the best held in California for some time. The sales were as follows:

Three-Year-Olds.

- Ada G., b f by Greco B., dam Topsy by Electric; F. D. Miller, Oakland\$300
Miss All Right, b f by Greco B.-Maud C., by Nearest; F. E. Alley, Roseburg, Oregon.... 300
Aaron G., b g by Greco B., dam Queen by Ira; C. A. Mead, Everett, Washington..... 205
Abel G., br g by Greco B., dam by Ironwood; J. Quinn, Sacramento 210
Albert G., gr g by Greco B., dam Snowball by Poscora Hayward; J. D. Maynard, Santa Clara 110

Two-Year-Olds.

- Boaz G., br g by Greco B., dam Maud by Stamboul; C. A. Mead, Everett, Washington..... 300
Banker G., blk g by Greco B., dam Banker's Daughter 2:13 3/4; John Quinn, Sacramento... 200
Belcher G., blk g by Greco B., dam Blossom by Mustapha 2:23; Dr. Paul, Santa Clara..... 215
Bert G., br g by Greco B., dam Topsy by Electric; J. Quinn, Sacramento 425
Bettie G., b f by Greco B., dam Kisses by Saturn; F. E. Alley, Roseburg, Oregon..... 275
Bertha G., b f by Greco B., dam by Poscora Hayward; H. Olsen, Haywards 105

Yearlings.

- Little King, b c by Mission, son of Wayland W., dam Belle W. by Harry Wilkes; Frank Murphy, Davis 220

Numbers 13 and 14 in catalogue, Little Bow and Cascara G., were both very ill with distemper and were not offered.

- Cashier G., b f by Greco B., dam Banker's Daughter 2:13 3/4; J. Quinn, Sacramento..... 80
Carrie G., b f by Greco B., dam Sadie Moor 2:22 1/2; A. Beiner, Palo Alto..... 240
Coady G., blk c by Greco B., dam Oniska by Nutwood Wilkes; W. Humphreyville, Santa Clara 200
Cassie G., br c by Greco B., dam Lizzie S. by Antevolo; A. G. Pryor, Santa Cruz 400

Weanlings.

- Bay colt by Greco B., dam Lily by Bismark; Wm. Keefer, Half Moon Bay 55
Pointer's Daughter, h f by Star Pointer 1:59 1/4, dam Banker's Daughter 2:13 3/4; C. L. Rice, Santa Maria 360
Myrtle Pointer, b f by Star Pointer 1:59 1/4, dam Myrtle Kinney by McKinney; J. F. Chiles, Davis 360
Belle Pointer, b f by Star Pointer 1:59 1/4, dam Belle W. by Harry Wilkes; A. M. Elston, Woodland 400

Stallions and Mares.

- Greco B. 44845, blk s foaled 1900, by McKinney 2:11 1/4, dam Alein 2:26 1/2; John Quinn, Sacramento 800
Sadi Moor 39489, blk c foaled 1904, by Guy McKinney 37625, dam Sadie Moor 2:22 1/2; William Johnson, Santa Clara 1075
Belle W., ch m foaled 1892, by Harry Wilkes 1895, dam Belle 2:11 by Melbourne King; W. J. Speers, Santa Cruz 295
Sadie Moor 2:22 1/2, br m foaled 1890, by Grand Moor 2374, dam Carmine by Poscora Hayward; Dr. A. F. De Foe, San Jose 405
Fortuna, br m foaled 1877, by Guy Wilkes 2:15 1/4, dam The Baroness by Secretary; F. E. Alley, Roseburg, Oregon 120
Myrtle Kinney, br m foaled 1903, by McKinney 2:11 1/4, dam Babe by Ferdinand 1845; A. E. Perley, San Francisco 360
Banker's Daughter 2:13 3/4, b m by Arthur Wilkes, dam Sunflower by Elmo; S. Roper, Santa Clara 275
Maud, b m foaled 1892, by Stamboul, dam by Direct 2:05 1/2; F. E. Alley, Roseburg, Ore..... 130
Grace A. Speers, b m foaled 1903, by Waldstein 2:22 1/2, dam Sadie Moor 2:22 1/2; F. E. Alley, Roseburg, Oregon 240

A WELL FILLED NUMBER.

"For California," the magazine published by the California Promotion Committee, devotes its entire November issue to the subject of intensive farming in the State. Great changes have come over the agricultural conditions of California during recent years. The vast undivided holdings that of old were given over to grain raising and pasturage have, in a great measure, been divided up into small tracts of ten, twenty or forty acres each.

Thousands of colonists have arrived each spring and fall during recent years, and this inflow of population has been principally absorbed by the newly created small farms. Much has been done for this movement by the scientific advance of irrigation, which has opened up immense areas of farming land in every part of the State.

J. M. Eddy contributes an article on Intensifying San Joaquin County, Clarence E. Edwards writes on Success on Small Tracts, Intensive Farming in Napa Valley in described by S. H. Wyckoff, J. W. Webb writes in a similar vein of Intensive Farming in Stanislaus County, John S. Mills tells of Varied Farming in San Diego County, Intensive Farming in Kings County is described by H. D. Lindley. Staff writers contribute articles on condition for intensive farming and the profits on the small farm.

THE STATE FAIR OF 1908.

There has been no time in the history of California when the prospects and conditions so far in advance were as favorable for a big State Fair the following year as they are now for the Fair of 1908. Already six counties and fourteen firms or individuals have made formal application for exhibit space or stall room for next year, and quite a number of representative bodies have notified the Secretary of the appointment of committees to consider the matter of preparing a good exhibit from their respective communities for the State Fair of 1908, with the view of utilizing it, or part of it, at the Alaskan-Yukon-Pacific Exposition, to be held at Seattle in 1909.

GOOD MARES FOR OREGON.

Mr. F. E. Alley of Roseburg, Oregon, has been a buyer of broodmares at California sales during the past year, and visited the Brace Farm last Saturday, in company with his farm manager, Mr. McMullen, and purchased five head at auction. He afterwards purchased five head from P. W. Hodges, and a couple from Joe Cuicello, making a dozen in all which were shipped to his Oregon farm this week.

Alein 2:26 1/2 (dam of Sister 2:20, Mowitza 2:20 1/2 and Greco B. 2:12 1/2), br m, 15.2 1/2, foaled 1889, sire Anteeo 2:16 1/2 by Electioneer; first dam Lou Milton by Milton Medium, second dam Fly. Stinted to The Angelus (by Zombro-Hazel Kinney 2:09 1/4) on June 9, 1907.

Oniska (dam of Umatilla Chief) b m 15.2, foaled 1898, sire Nutwood Wilkes 2:16 1/2; first dam by Direct Line by Direct, second dam by California Nutwood, third dam Kitty Taylor; fast pacing mare. Stinted to Greco B. in May, 1907.

Fuschia, br m 15.1, foaled 1897, sire McKinney 2:11 1/4; first dam by Gossip 2:14 1/4, second dam by Echo, third dam by Dan Victor. Trotted full mile as three-year-old in 2:27, last quarter in 35 seconds. Stinted to Nearest 2:22 1/2 on May 21, 1907.

Stalene, b m 15.2 1/2, foaled 1901 (trial 2:23 3/4, last half in 1:08), sire Stam B. 2:11 1/4; first dam Atheline 2:16 1/2 by Patron, second dam Athene by Harold, third dam Minerva by Pilot Jr. Stinted to Umatilla Chief in 1907.

Gussie, b m foaled 1900, sire Jud Wilkes 2:26 1/2; first dam Gussie Gail by Redondo, second dam Gail 2:27 by Commodore Belmont, third dam Irene by Dictator, fourth dam Jennie Helm by Alexander's Abdallah. Stinted to Umatilla Chief May 13, 1907.

Miss Purple, b m foaled 1900, sire McKinney; first dam Viola J. by Direct 2:05 1/4, second dam by Steinway.

Bay filly, foaled 1902, sire Cupid 2:18, son of Sidney, dam Dione 2:07 1/4 by Eros, second dam Gracie S. 2:22 by Speculation, third dam Jennie (dam of Hulda 2:08 3/4) by Bull Pup, fourth dam by William-son's Belmont.

Miss All Right, b f foaled 1904, sire Greco B. by McKinney; first dam Maud C. (dam of Nearest McKinney) by Nearest 2:22, by Nutwood Wilkes, second dam Fanny Menlo (dam of Claudius 2:13) by Menlo, son of Nutwood 600, third dam Nellie Anteeo by Anteeo 2:16 1/2, fourth dam Fanny Patchen (dam of California Nutwood), by George M. Patchen.

Bettie G., b f foaled 1905, sire Greco B.; first dam Kisses by Saturn 2605, second dam Gray Nellie by Bayard 53, by Pilot Jr. 12., third dam by Hallstone 813, fourth dam Volunteer 55, fifth dam by American Star 14.

Grace A. Speers, b m 15.3, foaled 1903, sire Waldstein 2:22 1/2 (champion five-mile stallion), by Director 2:17; first dam Sadie Moor 2:22 1/2 by Grand Moor 2374 by The Moor 870 (sire of Beautiful Bells 2:29 1/2), second dam Carmine (dam of three) by Poscora Hayward 2898, third dam Jennie by Algerine, fourth dam Old Bay by Albrack, fifth dam Finch mare by Veloz. Stinted to Greco B. in 1907.

Maud, h m, 16 hands, foaled 1892, sire Stamboul 2:07 1/2; first dam by Direct 2:05 1/2, second dam by Joe Daniels, thoroughbred. Stinted to Greco B. in 1907.

Fortuna, br m 15.3, foaled 1897, sire Guy Wilkes 2:15 1/4; first dam The Baroness by Secretary, by Director 2:17, second dam Young Countess by Sam Patchen by George M. Patchen Jr., third dam Countess by Hambletonian 725. Stinted to Greco B. in 1907.

WILL TRAIN AT PLEASANTON.

Charles De Ryder, one of America's foremost trainers and reinsmen, who campaigned a string of California horses all through the Grand Circuit this year, is now at Phoenix, Arizona, where he will start several horses in the races, which begin Monday next, November 11th. Under date of October 30th, Mr. De Ryder wrote us as follows:

Phoenix, Ariz., October 30, 1907.

Breeder and Sportsman: I wish you would state in your next issue that I will train at Pleasanton as before. I will be there about November 17th. Truly yours,

C. L. De RYDER.

We congratulate Mr. De Ryder and the horse owners of California on his determination to remain at the "horse center" another year. Had it not been for the death of the mare Perfection, which he sold to Mr. Estabrook of Denver, De Ryder would, in all probability, have taken up his residence at Denver, where he would have trained her and other horses for Mr. Estabrook. The death of the mare changed the latter's plans, however, and Mr. De Ryder concluded that in training a public stable Pleasanton was the place for him to remain, and as soon as the Phoenix, Ariz., meeting is over he will start for Pleasanton with his horses.

IN GOLDEN GATE PARK.

The Park Amateur Driving Club held its races on Saturday last at the Park Stadium track, which had been postponed from the Saturday previous owing to the weather.

Five races were carded, but in the first event all were scratched, except Mr. I. L. Borden's handsome pacing mare, Roberta, and she walked over for the blue ribbon, making the three-quarters in 1:52½.

In the next event there were four starters, and Mr. Borden won this with his Zomhro stallion Barney Bernatto, after Mr. Smedley had taken the first heat with Red Velvet.

Mr. Ahlers' Telephone and Mr. Kilpatrick's Princess W. met again in the race for class A trotters and again the mare showed her great speed by winning the first heat in 1:43¾, but Telephone took the next two heats in 1:48 and 1:44.

Mr. Kilpatrick won the race for class A pacers with Don Diablo, heating Ringrose, Mr. H. M. Ladd's horse.

In the final race, which was for class B trotters, Mr. Herzog, who has heretofore been unfortunate with his mare Lady Nell in her races, owing to her unsteadiness, won a good race at mile heats, the mare acting well and beating her two competitors very handily. The races were greatly enjoyed by a fair crowd. The summaries:

Trotters, class B, three-quarters of a mile—
Roberta (I. L. Borden) Walkover
Time—1:52½.

Trotters, class C, three-quarters of a mile—
Barney Bernatto (I. L. Borden) 4 1 1
Red Velvet (J. W. Smedley) 1 2 2
Belle of Washington (F. J. Kilpatrick).... 3 4
Director B. (E. Stock) 2 3
Time—1:59, 2:01½, 1:57.

Trotters, class A, three-quarters of a mile—
Telephone (H. C. Ahlers) 2 1 1
Princess W. (F. J. Kilpatrick) 1 2 2
Time—1:43¾, 1:48, 1:44.

Pacers, class A, three-quarters of a mile—
Don Diablo (F. J. Kilpatrick) 1 1
Ringrose (H. M. Ladd) 2 2
Time—1:39¼, 1:41¼.

Trotters, class B, one imle—
Lady Nell (M. W. Herzog) 1 1
Allan Pollak (F. J. Kilpatrick) 2 3
Charles II (A. P. Clayburgh) 3 2
Time—2:27, 2:26.

On Sunday quite a large crowd gathered at the Stadium to see a match race between A. H. Scofield's Harry Hurst 2:14¼ and Thos. Corcoran's Lady Falrose 2:23½, both pacers. C. L. Becker drove Harry Hurst and Al Benson held the reins behind the mare. Harry Hurst won in straight heats in 1:43 and 1:40½, and his owner was awarded a handsome silver cup by the San Francisco Driving Club.

During the afternoon Geo. Gianinni sent his black pacer, George Perry by Waldstein, against the track record of 1:37¼ for three-quarters, held by Mr. F. J. Kilpatrick's Don Diablo, by Diablo. George Perry was driven by Geo. P. Machado, and succeeded in making the circuit in 1:36, a 2:08 gait. George Perry wears the straps.

BUDD DOBLE'S STABLE.

Budd Doble's horses were shipped to California by the way of Phoenix, Ariz., says the Western Horseman of Indianapolis. C. C. Crippen, who had charge of the stable all summer, looked after them on the return trip. Trainer Crippen was disappointed in not getting the horses to a race, especially Kinney Lou 2:07¾. Owing to the sickness the stallion contracted on his way across the mountains, coupled with a backward spring, the training of the stallion was not commenced until late, and when Mr. Doble arrived from California in the fall he had not seen the horse work, and failed to enter him at the Columbus meeting. The classes at the Indiana State Fair failed to fill, so that there was no chance to race him as had been planned. Kinney Lou is in grand shape, as was shown when Mr. Crippen worked him in 2:09¼, 2:10¾ and 2:06¼. He will be kept up this winter in California, and next year he will be staked down the Grand Circuit. A five-year-old stallion by McKinney, dam by Altamont, called Kinney Al, was worked a mile in 2:14½, half in 1:04½, last quarter in 31 seconds. Diamond Mc, a four-year-old by Kinney Lou, trotted a mile for Mr. Crippen in 2:16, first eighth in 16 seconds, last eighth in 15½ seconds. Mr. Doble thinks that Diamond Al is faster than his sire. All three will be campaigned next year. Mr. Crippen departs with an excellent impression of Indiana and Indiana people and hopes to make another visit here in the near future. The horses will be taken off the cars at Phoenix, and if the reopened 2:08 trot or the free-for-all trot fill, Kinney Lou and the two young stallions will be raced there, and after that they will take part in the fall meetings in California.

Ed Geers will winter at Memphis, and thinks he can get together as good a string of money winners as he had this year, when he led all other drivers in the amount of money won.

Jackson's Napa Soda is the best hot weather drink.

SUCCESSFUL RACING AT RIVERSIDE.

The Riverside Driving Club held a well attended and very successful meeting on Thursday afternoon of last week. The time made by the horses showed that Riverside has one of the best half-mile tracks in California. The Riverside Enterprise gives the following account of the races:

There were four events on the program, opening with a 2:25 trot. The entries were G. B. McNeil's Tom McKinney, driven by the owner; E. F. Binder's Mein Kleiner, driven by G. H. Judd, and R. F. Garner's Marigold, driven by Parker. There were three heats, all rather closely contested, Marigold winning first heat in 2:33, and Mein Kleiner capturing the other two in 2:32; Tom McKinney securing second prize. Mr. Binder's horse was not forced at any time during the race.

In the 2:40 pace, one-half-mile heats, that followed, were entered J. F. Backstrand's Buena B., driven by the owner; Peter Beatty's Fiesta Maid, driven by the owner, and J. A. Garner's Coupon, driven by G. H. Judd. It was on the half-mile course that Buena B. captured both heats in 1:21, with Fiesta Maid a close second.

The next race was the 2:25 pace, and the contestants were John Lozenby's Dewey, driven by Dr. Ramsey; L. F. Clapp's Proctor, driven by Peter Beatty, and Frank Thomas' Flash, driven by Alex. Wilson. This race caused good sport and Dewey won the final heat in 2:30 by about one-half length. Proctor came in second.

In the 2:50 trot were entered F. A. Ramsey's Lola Belle, the owner driving her; F. S. Pond's Miss Lott, driven by Mr. Pond, and F. A. Ramsey's Don Reginaldo, G. H. Judd driving, winning both heats in the fast time of 2:47. The second prize went to Miss Lott. This race was close, the great crowd cheering the winner on with a veritable avalanche of shouts. The prizes were stable blankets and whips for first and second places.

The officers were: Judges—R. L. Bettner, Alex. Nelson and T. E. Noland. Starter—H. G. Stanley. Timers—W. A. Hayt, S. J. Elliott and Lezier Potter. W. L. Scott was clerk of the course.

The club is especially pleased over the fine condition of the track, which the time made shows, and when it is realized that this track was the only one in Southern California which in any way could be raced on after the continued rain, great results are hoped for on Thanksgiving Day.

TWO DAYS' SPORT AT RED BLUFF.

Races enough to make up a two days' program are announced to take place on November 27th and 28th at Berendos Park race track, Red Bluff.

The first day, November 27th, there will be a 2:30 class race for a purse of \$50, 5 per cent entrance fee and 5 per cent from money winners; also a yearling colt race sweepstake, \$25 entry for each colt, winner to take all; one half-mile running race, purse \$30, \$7.50 to second horse, entrance \$3, 5 per cent to enter, 3 per cent to start; novelty mule race, one mile purse \$15, mule must walk to the first quarter, \$5 to first, trot to the half, \$5 to the first and \$5 to the one that gets to the wire first; \$1 entrance, 5 to enter, 3 to start.

On Thanksgiving Day there will be a sweepstake stallion race for all trotting stallions in Tehama and Shasta counties, each entry to put up \$100, winner to take all, mile heats, best three-in-five.

There will be a roadster race for Tehama and Shasta county horses that have never won money in a race for a purse of \$25, \$2.50 entrance 5 to enter, 3 to start.

One mile running race for a purse of \$50, \$12.50 to second horse, \$5 entrance, 5 to enter and 3 to start.

Slow race, mixed mule or horse, one half-mile, owner to ride another man's entry. No animal will be allowed to start that is poor and weak; \$10 to the last one to the wire and \$5 to the next to the last; \$1.50 entrance, 5 to enter and 3 to start.

All of these running races are open to Trinity county horses.

Come one and all and see the fun. All of those wishing to make entries in any of these races must do so on or before November 1st. Entries may be made with F. N. Frary at Berendos Park race track, or with M. R. Hook at his office on Walnut street, Red Bluff.

PASADENA MAY HAVE TRACK.

Through the efforts of James A. Gaut, one of the well known horsemen of Pasadena, a driving club may soon be formed, and matinee races given at Tournament Park this winter. If this organization is perfected funds will be raised at once for the extension of Tournament Park into a full half-mile track and modern grandstand.

In speaking of it, Mr. Gaut said: "I have been working on this proposition for some time and believe that there are seventy-five men in the city who will join such a club. The Tournament of Roses Association has offered to co-operate with us and help build a first-class track and grandstand. If seventy-five men can be secured on the list of the driving club we can put up a fine track and have good sport here once a month during the winter. Of course, the gambling idea is barred from the Pasadena Driving Club, as it is in Los Angeles."—Pasadena Star.

THE MONEY WINNERS.

There is always more or less interest taken in the horses who are returned at the close of the season as the largest money winners. The very fact that a horse is able to win a considerable sum, and ranks among the first money winners of the season, indicates that whether or not he is the fastest trotter, he has achieved success as a money earner. As long as money plays such an important factor in the life of the world, this achievement alone will create more or less of interest. The largest money winner of the season who raced on the grand circuit and at Lexington is Sonoma Girl 2:05¼ who is credited with \$23,650, this does not include the money she won at Libertyville. Nut Boy was the largest money winning trotter of last season, having won a few hundred less than \$20,000. Sonoma Girl leads the winner of last season by several thousand dollars. Highball is the second largest winner, and his winnings amount to more than the largest winner of last season. Leaving out Libertyville, Highball won \$20,300 this season. The second largest winner of last year was Brilliant Girl 2:08¼, who won nearly \$13,000 in stakes and purses. Highball leads her by nearly \$10,000 this year. In fact the third largest money winner, General Watts, who is credited with \$20,137, and the fourth largest winner, Wilkes Heart 2:06¼ who is credited with \$15,020, lead by considerable sums the second largest winner of 1906. The fourth largest winner in 1906 did not win \$10,000. Taking the four largest money winners of the season, as compared with the same number in 1906, it will be readily seen that the past season has been a much better season than last year. Sonoma Girl and Highball, the two largest money winners have attracted unusual interest from the fact that they were both heralded from the beginning of the season as sensational trotters, and have shown that they were in fact much faster than the average big money winners. Nut Boy's record at the close of last season was 2:07¼. This year Sonoma Girl, starting without a record, achieved a record of 2:05¼, while Highball's is 2:06¼, and that of General Watts is 2:06¼, a world's record. Brilliant Girl's record last year was 2:08¼, and that of Siliko 2:11¼. Siliko was the third largest money winning trotter of 1906. So it will be seen that in point of records the season just closed leads in point of brilliancy and fast records. In fact, the season of 1907 has been by far the most successful racing season in recent years. There were other world's records established this season which adds to a very satisfactory and successful season. In examining further the trotters that won money this season, three won \$20,000 and more, one won more than \$15,000, eight won more than \$5,000, while twenty-one won upwards of \$2,000.—American Sportsman.

THREE-YEAR-OLD RACES FOR FAIRS.

(The American Sportsman.)

Every fair and agricultural society where races are given should arrange early closing purses for two and three year old trotters and pacers. Breeders who are interested in breeding trotters and pacers and who are in any way connected with the management of county fairs should take the initiative in pushing to the front such a plan. There are many good reasons for providing these stakes and the good results obtained are apparent to all who have had the opportunity to observe the outcome of these early closing events. There can be no question but what it increases the interest of the general public in harness races. The days on which the colts are to perform always have the largest attendance. This should interest the fair officials, for they should be anxious to provide such entertainment as will draw the largest crowds. At the fairs in northern Ohio this season, where colts have had a part in the program, the greatest interest has centered around their performance. These races have created more interest and enthusiasm than full programs of other races.

Offering colt stakes also produces more general interest in breeding, training and the development of the colts, which is the end desired by all those who are interested in the light harness horse. This should be the reason why horsemen everywhere should take an interest in colt futurities, helping them along by every possible means. It is one sure way that interest in the light harness horse can be promoted. There are no chances to be taken in working to this end, as the results are sure to be satisfactory.

Among the record breaking performances at the Lexington meeting was that of the two-year-old filly, Helen Hale, who in the first heat of the Lexington Stake trotted to a world's record for fillies of her age. The record was held jointly by Janie T. and Katherine A., their record being 2:14, which was reduced by Helen Hale to 2:13¼. It is a very creditable performance, though she was beaten for the race by the Allen Farm colt, Binvolva 2:15¼. Helen Hale was bred by United States Senator J. W. Bailey and is by Mr. Bailey's stallion Prodigal 2:16. The dam of Helen Hale is the noted pacing mare Red Silk 2:10, by Baron Wilkes 2:18. The latter is out of the great broodmare Nannie Etticoat, who also produced the fast pacing mare Split Silk 2:08¼, and other fast ones.

NOTES AND NEWS

How much will Todd sell for at the Old Glory sale?

The Roman 2:09½ is to be sold at the Old Glory sale.

A weanling by McKinney brought \$1,200 at the Lexington sale.

Red Bluff and Chico should be on the trotting map next season.

Dione 2:07¼, now owned by Mr. Cowell of Santa Cruz, was bred to the stallion Henry Nutwood this year.

The financial flurry did not hurt the horse market any, judging from the Brace sale at Santa Clara last week.

Give Breeders' Futurity No. 8 a big list of nominations. It will help everybody. Entries close December 2d.

Myron McHenry will spend the winter at New Orleans with the runners, having a few of his own that he will race.

The challenge issued by Sonoma Girl's owner to race any trotter in America will not be accepted this year, at least.

Santa Cruz will probably have a race track and fair grounds in the near future. There are quite a number of enthusiastic owners and breeders of trotting horses in that section.

One reason for the success of the Brace sale was the entire confidence the public had in Mr. Brace. He called attention to every defect in the horses he sold and held back nothing.

Dan Patch 1:55¼, champion pacer of the world, is at Phoenix, and will pace against time at the Territorial Fair next week. The directors of the Arizona Fair are enterprising in securing attractions.

The Sacramento track will be the scene of considerable winter training this season, several trainers besides those who stabled there last winter having decided to work their horses at this excellent track.

H. Busing, who is working several horses at Alameda track, has a Searchlight two-year-old that is a trotter, and that can show a 2:30 gait quite handily. He was priced to a prospective buyer the other day at \$1,200.

The Happy Medium blood is again to the front in Sherlock Holmes 2:06¼ by Zolock 2:05¼, as his dam is by Happy Prince 19546, a son of Bayonne Prince, that is out of Belle Medium 2:37 by Happy Medium.

Lou Mativia of Dixon states that he has done a good business with his pacing stallion Alton this year, and will give him a record next year. He worked him a half in 1:02½ over the Dixon half-mile track recently.

Word had not been received up to the time of the closing of our forms as to the number of entries received for the colt stakes of the Los Angeles Association, which closed last Friday. It is to be hoped they filled well.

Del Dudley of Dixon, who owns that splendidly bred pacing stallion McFadyen 2:12½, as a three-year-old, recently offered the owner of Belle W., dam of Bolivar 2:00¼, a complimentary service. The cross should be a great one.

Rev. W. J. Speers of Santa Cruz, who purchased Bolivar's dam at the Brace sale last Saturday, also owns the Antevolo mare Lizzie S. 2:28, and uses her on his farm. He now has a pair of standard mares, both of which are producers.

Dan Patch paced an exhibition mile at City Park track, New Orleans, October 26th, in 2:01. He will make his last appearance of the year at Phoenix, Arizona, next week, and will, no doubt, set a new mark for this side of the continent.

From the appearance of the young Grecos at the sale last Saturday, this son of McKinney should prove a great sire. John Quinn will do a good business with him at Sacramento, where it is said the breeders have been wanting a McKinney stallion.

Mr. Alfred G. Vanderhilt is contemplating taking his coach, Venture, to England, and putting it on the run from London to Brighton, a distance of about fifty-six miles. It is said that he will buy forty or fifty good trotters to use on this coach, and expects to reduce the time usually made by the English coaches.

Budd Dohle, the great reinsman, is at Phoenix, Ariz., and will remain there during the meeting, which opens there on Monday next. Mr. C. C. Crippen is also there with Mr. Dohle's great stallion Kinney Lou 2:07¼, and the balance of his string.

A gentleman remarked in our presence the other day that he would pay a reasonable price for a two-year-old colt or filly that was a fair trotting prospect and was eligible to the Occident, Stanford and Breeders' Futurity Stakes for three-year-olds in 1908.

A saddle horse bred in Missouri, sired by the thoroughbred horse Col. Stevens, winner of the Kansas City Derby some years ago, and out of a trotting bred mare, was recently sold in New York for \$3,000. He is expected to be a winner at the coming National Horse Show.

Mr. Frank H. Burke of the Park Amateur Driving Club recently showed us the architect's drawings of a judges' stand, which it is proposed to erect at the three-quarter-mile track in Golden Gate Park. The design is a very handsome one and when erected will be an ornament to the speedway.

The new Portland, Oregon, Fair Association proposes to give two stakes of \$10,000 each next year, one for trotters, the other for pacers. The main portion of the stake in each instance will be \$8,000 for the event, with \$2,000 set aside as a consolation purse for non-money winners in the main event.

The Limit, Mr. C. L. Crellins' colt by Searchlight, out of Bertha, the dam of four pacers in the 2:10 list, has grown into one of the grandest looking stallions in California. When Mr. Crellin gets ready to have him trained for speed it is thought that old Bertha's fastest performer will be seen in this fine individual.

A. M. Elston of Woodland purchased the weanling filly Belle Pointer by Star Pointer 1:59¼, out of Belle W., dam of Bolivar 2:00¼, at the Brace sale last Saturday, and if there is anything in breeding, should have one good enough to win Futurity stakes with. The filly is entered in several of these stakes.

After Siliko's electric rush through the stretch at Columbus, when he forced Axcyell to a record of 2:06¼, and trotted the mile from wire to wire, himself, in 2:05¼, John Madden wired not to start him again this year, and it is since reported that he has refused an offer of \$30,000 for the 1906 Futurity winner.

Dr. J. T. Royles of Woodland lost a very promising colt by Diablo a few days ago. The colt was being worked on the track and fell, rupturing a blood vessel, and died instantly. The colt was coming two years old, and the Doctor had been offered a large price for it, as it was entered in the Breeders' Futurity.

There is a great revival of the interest taken in colt racing in the East and more two and three-year-olds will be in training in the spring than ever. This increased interest is caused by the large number of rich stakes now offered for colt trotters and pacers, it now being possible for a good three-year-old to win over \$30,000 in one season.

Aerolite, the three-year-old son of Searchlight 2:03¼, is at Pleasanton in Fred Chadbourne's care, and nothing much will be done with him until after the 1st of the year. His exhibition mile at Woodland this year in 2:05½ is still the talk of horsemen, and there is not one who saw him do it but believes he will be a two-minute horse next season.

Mr. A. G. Pryor of Santa Cruz purchased the yearling colt Cassie G. by Greco B., dam Lizzie S. 2:28, by Antevolo, at the Brace sale. This is a nicely turned, brown colt, with a way of going that makes him look like a great trotting prospect. Mr. Pryor is a newcomer in the business and has certainly picked out a good one for a starter.

Capt. N. P. Batchelder of this city, who bred and raised the \$10,000 mare Perfection, owns two full sisters to her, one a four, the other a three-year-old. Both are trotters and very promising. They are at present turned out at the Whalen Santa Rita Farm, near Pleasanton, and will probably be taken up and worked during the winter by Chas. De Ryder.

The horsemen residing in the section of country lying between Dixon and Woodland are great admirers of the pacer, and many good ones are owned there. Two weanlings, out of the dam of Bolivar 2:00¼, were recently purchased for that section, one by Star Pointer and another by Mission, a son of Wayland W., sire of Bolivar. Another Star Pointer weanling also went to that section last week. A big stake for two and three-year-old pacers should be popular there.

Mr. C. A. Durfee, who is entirely out of the trotting horse business for the first time in many years, was at the Brace sale last Saturday and could not help bidding whenever he saw a slow start on a good one. He stopped bidding as soon as the offers got up to the worth of the horses, and said that while he was out of the business, he was ready to get in again when good ones were going at less than they were worth.

Our front page picture this week is of Ray o'Light 2:13½, the fastest two-year-old pacer of the year, and winner of the Pacific Breeders' Futurity. He is by Searchlight 2:03¼, dam Carrie B. by Alexander Button, and was bred by Ray Mead of Hollister, but owned by E. Swift Train of Soquel. He was trained by Chas. Whitehead of Salinas, who holds the lines in the picture.

Capt. W. Ford Thomas of this city owns a filly that cannot be registered, but she is better bred than hundreds that can. She is by Searchlight 2:03¼, dam by McKinney 2:11¼, second dam by Secretary 28378, third dam the thoroughbred mare Pacheco, dam of Annabelle 2:27½, by Hubbard. Annabelle is the dam of Robert I. 2:08¼, Murray M. 2:14 and La Belle 2:16, as a two-year-old.

The directors of the newly organized Chico Driving Association have elected Wendell Miller president, H. B. Reed vice-president and W. J. O'Connor secretary. A committee was named to close the deal for sixty acres of the Entler Tract at \$200 per acre. Work of building the track will commence as soon as the surveys, which are now under way, can be completed. A grandstand, stalls and athletic grounds will also be constructed.

Henry Helman says the California county fair and harness race managers should visit Oregon and Washington to see how they conduct fairs and race meetings up there. At the Oregon State Fair this year over twenty thousand people attended and the trains from Portland to Salem on Portland day were so crowded that hundreds had to remain at home because there were not facilities for transporting all who wanted to go.

Mr. Milo M. Potter, manager of the famous Potter Hotel at Santa Barbara, and one time owner of Sweet Marie 2:02, attended the Brace dispersal sale at Santa Clara last Saturday. Mr. Potter, during the time he was an owner and breeder of trotting horses, held four very successful sales at Los Angeles, and being in this section of the State last week, he took in the Brace sale just to see how they manage such things in this part of the country.

A subscriber asks for the full breeding of Lady Mowry 2:09¼. She is by McKinney 2:11¼, dam Electress Wilkes 2:28¼, by Nutwood Wilkes 2:16½, second dam Electress 2:27¼ by Richard's Elector, son of Electioneer, third dam thoroughbred mare Sugar Plum by Lodi, fourth dam by Volcan, etc. Sugar Plum is registered in the American Stud Book, and her pedigree can be traced back many removes. Lady Mowry is not registered, but she is eligible under rule 3.

T. W. Barstow of San Jose drove his grand young McKinney stallion, Nearest McKinney, up to the Brace sale at Santa Clara on Saturday last, and the horse came in for lots of admiration and complimentary remarks from the horsemen who looked him over. It would be hard to improve on this horse anywhere from his head to his heels, and that he has plenty of trotting speed is shown from the fact that last summer Mr. Barstow drove him a mile over the Brace half-mile track in 2:15, with the last half in 1:04. Nearest McKinney had a full hook this year and was bred to some of the best mares in Santa Clara county, among them being Much Better 2:07¼ and Hazel H. 2:12½. Mr. Barstow has been offered all kinds of money for this son of McKinney, but has declined all offers, as he knows he has a great trotter in him.

Mr. Andrew Robertson of Allendale Farm, Melbourne, Australia, arrived in this city last Saturday and will visit several trotting horse breeding farms during the next few days, and will then probably go East to attend the Old Glory sale at New York. He left Thursday to look over the young stock at Martin Carter's Nutwood Stock Farm at Irvington, and will go from there to Pleasanton, Stockton, Sacramento, Woodland, Dixon and other points. At Allendale Farm the American bred stallion Ahhey Bells, by the Electioneer-Beautiful Bells horse, Bow Bells, is the premier. The oldest of his get in Australia are coming two years old and are a very handsome and promising lot. Mr. Robertson says that harness racing is growing more popular in Australia, the rules governing the same being very strictly enforced, and all the governing organizations and clubs are using every endeavor to keep the game clean and make it high-class in every way.

OF VALUE TO HORSEMEN.

Do you turn your horses out for the winter? If so, we want to call your attention to a very important matter. Horses which have been used steadily at work, either on the farm or road, have quite likely had some strains whereby lameness or enlargements have been caused. Or perhaps new life is needed to be infused into their legs. Gombault's Caustic Balsam, applied as per directions, just as you are turning the horse out, will be of great benefit; and this is the time when it can be used very successfully. One great advantage in using this remedy is that after it is applied it needs no care or attention, but does its work well and at a time when the horse is having a rest. Of course, it can be used with equal success while horses are in the stable, but many people in turning their horses out would use Caustic Balsam if they were reminded of it, and this article is given as a reminder.

A REVIEW.

The racing season of 1907 has gone down into history as being a great one in every respect, but it is a fact that horsemen have witnessed a campaign that has surely been remarkable and still they have not looked upon it with as much enthusiasm and excitement as they have other campaigns far less eventful. At the present time people are looking for such great things that they have become accustomed to taking great events with as much unconcern and with a matter of habit manner that they do not really realize the immensity of the happenings that are now accomplished. The racing season just finished has been a corker for new record performances, but still horsemen refuse to think what a wonderful lot of horses have just been sent to winter quarters.

All told ten world's records were broken and some of the other season's records were of such sensational nature that it is doubtful if ever again such a season will be experienced. With the marks at the present low ebb it would be considered a great performance if one world's record could be reduced each year, but to think that ten of them were established this year seems almost incredulous.

The secret for all this speed lies in the breeding, and the honor that is deserved for these great feats among the trotters and pacers should go to the right persons—the breeders. The attention that is now being paid to the breeding of equines should be kept up and the breeders given all encouragement possible, as this one thing will keep the keen interest in the sport.

The real great work during the past season has been accomplished by the youngsters of the two and three-year-old trotting and pacing divisions. In the two-year-old class there was Trampfast, who placed the race record for trotters at 2:12½, while Helen Hale set the race record for two-year-old fillies at 2:13¼, both are world's records. In the pacing division the two-year-old colt Ray O'Light did not break a world's record but made good time, his record being 2:13½.

In the three-year-old trotting class, General Watts, of course, stands out head and shoulders above all others. General Watts is made of that stout stuff that makes great horses and which made it possible for him to accomplish such a remarkable feat as to be considered among the three greatest performers in the history of the sport. When General Watts trotted his mile in the first of the race at Lexington in 2:06¾, thereby establishing a new world's record for three-year-old trotting stallions, this feat was associated with the wonderful performance of Lou Dillon when she trotted her first mile in two minutes at Readville, and also the event when Arion, as a two-year-old back in 1891 at Stockton, Cal., trotted a mile in 2:10¾, the two performances that have stood above all other turf performances for years. Like some other cracka-jacks General Watts did not show much at the start, but his finish was so remarkable that he is bound to remain in the minds of horsemen as long as they live.

General Watts won over \$20,000 in purses this year, capturing the Horse Breeder, Horse Review, and Kentucky futurities besides winning a class race, and in doing so twice reduced the world's record for three-year-old trotting stallions.

Among the other world's marks to be lowered was the half-mile track record. In an exhibition mile George G. 2:05¼, trotted the Allentown, Pa., track in 2:06¾, thereby lowering the record held by Sweet Marie of 2:07. This mark still stands to her credit, though, as it is the world's record for trotting mares over a half mile track. Sweet Marie also holds the world's half mile track record to wagon, having trotted the Allentown track to wagon in 2:08½. Then at Lima, Ohio, another half-mile track, Sweet Marie added her third world's record by trotting to wagon, driven by George Webb, an amateur, in 2:09¾. This is certainly a remarkable feat for any trotter.

Ruth Dillon broke the world's record for three-year-old trotters over a half-mile track by trotting the distance in 2:15½, while the pacer Kruger, ridden by H. K. Devereux, paced in 2:12 at Lexington, thereby establishing a new world's record for such a performance.

All through the various classes the work of the trotters and pacers has been sensational and performances which were never thought possible were accomplished. Following is a list of new records made this season:

World's record for three-year old trotters in a race—General Watts 2:06¾ by Axworthy, dam Carpet by Prodigal 2:16.

World's record for two-year-old trotters in a race—Trampfast 2:12¼ by The Tramp, dam Medium's Last.

World's trotting record over half mile track for mares—Sweet Marie 2:02 by McKinney, dam Lady Rivers 2:07.

World's record trotting over half mile track to wagon—Sweet Marie 2:08½.

World's record trotting over half mile track to wagon, driven by amateur—Sweet Marie 2:09¾.

World's record for two-year-old trotting filly in a race—Helen Hale 2:13¼.

World's record for three-year-old stallion trotter two heats—General Watts 2:06¾, 2:09¾.

World's record for three-year-old trotters over half-mile track—Ruth Dillon 2:15½.

World's record for trotters over half-mile track—

George G. 2:05¼ by Homeward, dam by Junio—2:06¾.

World's record pacing under saddle—Kruger by Mercury, dam Mary C.—2:12¼, ridden by H. K. Devereux.

Best mile by trotter in a race—Sonoma Girl 2:05¼.

Best mile by trotting stallion in a race—General Watts 2:06¾.

Best mile by three-year-old pacing filly—Bettie Brent 2:10¼ by Wiggins, dam Lucy by Patchen Wilkes.

Best record for pacing mare in a race first season out—Laura Bellini 2:04¼ by Moquette.

Best time by unmarked pacing gelding in a race—Hidalgo 2:04¼, by Warren C., dam by Moral.

Best mile by trotting mare in a race, first season out—Sonoma Girl 2:05¼.

Best mile by trotting gelding in a race, first season out—Highball 2:06¼ by Doctor Hooker, dam Lena S. by Tom Covington.

Best mile by pacing mare in a race—Citation 2:03¼.

Best mile by pacer in a race—Angus Pointer 2:01¼ by Sidney Pointer, dam by Grant's Hambletonian.

Best mile by green pacing mare—Reproachless 2:04¼, by Direct Hal.

Best time for three-year-old trotting filly in a race—Bell Bird 2:11¼ by Jay Tine, dam Nancy Medium.

Best time four-year-old filly in a race—Icon by Peter the Great, dam Alherta W. by Albert W.—2:10.

Best time four-year-old gelding—Codero by Bingen, dam Jolly Bird by Jay Bird—2:09¾.

Best time for gelding in a race—Highball by Doctor Hooker, dam Lena by Tom Covington—2:06¼.

Wilkes Heart by Great Heart, dam Baldy by Hambletonian Wilkes 2:06¼, Axcyall by Axcyone, dam Lorene by Lonxia 2:06¼.

Best time for two-year-old colt, pacing—Ray o'Light by Searchlight, dam Carrie B., by Alexander Button—2:13½.

Best time for three-year-old colt, pacing—Shakespeare by Jay McGregor, dam Miss Spears—2:09¾.

Best time for three-year-old gelding, pacing—Hymettus by Zombro, dam Silver Bell—2:08½.

Best mile by pacing stallion—John A. by Eddie Hal, dam Mattie by Newshoy—2:03¾.

Best mile by green pacing stallion—Straight Advice by Free Advice, dam Straight On—2:05¼.

Best mile for trotters against time—Major Delmar 1:59¾ by Delmar, dam Expedition—2:04¼.

Best mile against time by pacers—Dan Patch 1:55¼ by Joe Patchen, dam Zelica—1:56¾.

Best time in three-heat race by two-year-old trotters—Binvolo by Bingen, dam Komura by Kremlin—2:13¼, 2:15¼, 2:16¼.

G. T. ROCKWELL.

WHAT THE OWNER OF GRATTAN THOUGHT OF PERFECTION.

Mr. F. E. Marsh, owner of Grattan Stock Farm, home of the famous sire, Grattan, thought the trotting mare Perfection, that died recently, was the fastest trotter in the world. Mr. Marsh is a competent judge, and what he thought of the green mare for which Mr. Geo. H. Estabrook paid \$10,000, is shown by the following copy of a letter which he wrote to that gentleman after Perfection's death:

Prairie View, Ill., Oct. 17, 1907.

Mr. George Estabrook, Denver, Colo.—

Dear Friend: I have been trying to get courage to write you ever since I learned of the loss of your great mare. Aside from my warm friendship for you I had a very keen interest in that mare. From the first day I saw her work at Libertyville to the day of her death I considered her the greatest trotter that I had ever seen. She is one of the few trotters that have come under my observation that I never saw do anything that you would not want her to do. She was always in her place, always obedient and could always go just as fast as her trainer wanted her to go. From the time she came to Libertyville until she left there, I saw her step away and step home with the great Sonoma Girl and the great Highball on many occasions and never once did I see her with either of those great trotters when she was not able to step away from them at either end of the route. In saying this, I do not belittle the other horses, but to simply show what a wonderful five-year-old trotter your mare was. Her greatness is especially impressive when you realize that she had had but one year's training and I am inclined to believe that I was the first to call your attention to the mare and you will remember that we timed her together one morning when you were with me at the track, at which time she impressed you most favorably and from that day on you never lost sight of her, and after you purchased her I felt that you would next year have the pleasure of going down the line with a trotter that could win every start. Being sound, rugged and right in every way there was not a chance in the world of defeating her in a race next year.

The money loss I consider a very small part of your loss. You can make the money over again, but you can't get another Perfection. Were you to send me ten times what you paid for her and advised me to buy you another Perfection, I would have to return the money. There are no more in the country. I sincerely hope that her loss will not keep you from coming East again next year, for although we did not see as much of you as we wanted to see,

I certainly enjoyed you thoroughly on the few occasions that I had the pleasure of meeting you.

Trusting from this on you will have no more misfortune befall you in your horse ventures, I am, as ever, your sincere friend,

F. E. MARSH.

THE NEW 2:10 TROTTERS OF 1907.

Measured by the circumstances that surround it, the performance of Wilkes Heart 2:06¼, in trotting a mile over the old Waverly Park track at Newark, N. J., to wagon in 2:09¼, must be considered as one of the most brilliant speed achievements of the year, possibly not surpassed by any feat accomplished by a trotter since the Grand Circuit opened at Detroit, says the Boston Courier. Until Sweet Marie recently reduced it to 2:08½ the trotting record to wagon on a half-mile track was held by Cresceus 2:02¼, at 2:12. Sweet Marie's performance was made over the Allentown track, concededly one of the fastest half-mile rings in the country. The old track at Waverly Park is now a part of the county park system, and is maintained and worked by the Park Commissioners. Its highest condition never attained to a degree of excellence possessed by the Allentown track, and it is a conservative statement to say that to-day it is two seconds slower than the fast Allentown track. Further than this, as showing the unfavorable conditions attending Wilkes Heart's performance, it is said that he was unloaded from the cars on Friday, after a thirty-six-hour trip from Lexington, the trial taking place the next day. He had a running pace-maker to the first quarter, which he trotted in 31¾ seconds. He made the middle half alone on his courage, and was picked up by a runner at the third quarter. The first half was in 1:04½ and the second in 1:04¼. He trotted in faultless style, without any urging, and never wavered at any stage of the route. There have never been any gamer or truer race horses than is the son of Great Heart and few that were faster.

A dispatch from Lexington states that Thos. Grady wired Edward and Joseph Madden an offer of \$25,000 for Siliko 2:11¼, but the offer was refused. Their price is \$35,000 for the horse. Siliko, though he showed a mile at Lexington in 2:07¼, and again in 2:06¾, still is eligible to entry under his three-year-old record of 2:11¼, and will be, therefore, in 1908 eligible to 2:12 class races, which includes the great Transylvania Stake. He is sound and all right.

Twenty-five head of richly bred trotting stallions and mares were shipped to Denmark from New York recently.

CONDUCTED BY J. X. DeWITT

BRITISH COLUMBIA A BIG GAME COUNTRY.

The great Northwest offers the finest field for the sportsman today of any country now reached by modern means of transportation. Its hills and valleys shelter the deer, bear, elk, cougar, wolf, porcupine and marmot, while in the mountain fastnesses, far up near the snow-line, may be found the mountain goat, and according to some authorities, an occasional big horn or mountain sheep. Mr. O. E. Garland, a reliable sportsman and big game hunter, and Mr. H. H. Hollingsworth, of Hotham sound, both claim to have seen sheep in the vicinity of Powell lake mountains, and from their description of the animal, it seems that their statements are correct.

Mr. Garland further states that while photographing in the vicinity of Goat mountain, about 4000 feet up, he came across a large ram, which stood and looked at him several minutes at a distance of fifty feet, before moving away. Mr. Hollingsworth also had a like experience.

As for mountain goats, they may be found upon almost any mountain of the Parker range, whose elevation is more than 2,500 feet. They are not shy, and it requires the near proximity of man for days before they seek pastures new.

Up around the snow-line, where the thistle and succulent grasses grow, and where the bald peaks give ample space for basking in the warm rays of the summer sun, is where the male members of the genus *Capra*—the "Toms" or old patriarchs of the flock may be found.

A good pair of field glasses is almost indispensable in goat hunting. By searching out the game before ascending the mountain, and by studying carefully the most advantageous way to scale the cliffs, much time may be saved. After once seeing game it is almost certain to be successfully stalked. A goat will remain on the same peak for days if not disturbed. They are easily approached and will stand and stare stupidly at the hunter, oftentimes after being shot at four or five times.

An adult male, or "Tom" as they are called, is much larger than a tame goat, often attaining a weight of 300 to 400 pounds and a height of three and one-half to four feet at the shoulders. Their flesh is rank and coarse, and oftentimes very strong. The neck is short and powerfully muscled—much more so proportionately than that of any other ruminant. Its horns are short and curve backwards.

In the female the horns are diminutive and the wool or fur shorter and finer. The fleece is of a silky white in both sexes and is slightly tinged with yellow on the back.

The goat breeds but once a year, though there are exceptions to the rule, and have from one to three kids at a birth. The flesh of the female is much sweeter than that of the male, not possessing the strong hircine scent of the latter, and in many cases is preferable to venison.

Probably the best goat-hunting in the Northwest, close to or adjacent to salt water, is along the Prince of Wales Reach, Princess Royal Reach and Queen's Reach, in British Columbia. Mount Diadem, 6,056 feet in height; Mt. Cambridge, 5,043; Mt. Frederick Wilhelm, 6,144; Mt. Arthur, 5,591; and the Parker range at the head of Hotham sound, from 5,043 to 6,831 feet in height, are favorite feeding grounds for these animals. These mountains are easily accessible to the sportsman with a stout heart and a stouter pair of legs. Water can usually be found near the tops of all of them, and grouse and deer are also to be found in great numbers.

As to the outfit: First and foremost is necessary a good, substantial pair of well-calced shoes. This is a part of the outfit that should be given particular attention. Hungarian or hobnails are worse than useless, as they only slip on the heather and afford no foothold upon the rocks. To know that you can depend upon your foot-gear when negotiating a dangerous place on the rocks is a great source of confidence. Good climbers have frequently had the nerve taken out of them in a critical place by a badly fitting, poorly calced pair of shoes. A sweater is of much more service than a coat. A coat is a useless incumbrance on a camping trip anyway. Count up the times you wear it, and see how easily one can dispense with it.

Therefore, to sum up, the principal requisites in goat-hunting are: good foot-gear, good warm clothing and a good comrade. The rest comes naturally to the sportsman.

Deer also abound in great numbers in the Northwest, and can be found a few hours' drive from Bellingham, Wash., in sufficient numbers to make a good bag an easy matter. The best hunting in the immediate vicinity of that city is to be found on Orcas, Cypress and Guemes islands, but to the sportsman who has the time and the boat, the better way is to cruise up the coast and get the cream of the hunting far from the madding crowd.

Nelson island, Texada, Jervis inlet and Princess Royal Reach are easily reached by sailboat or launch and offer a nearly virgin field for the sportsman. The deer on the islands are small, weighing about 50 to 80 pounds, and are very plentiful. They

feed on the salal berries and bushes through the month of September and are generally in good condition. Toward the latter part of the month they shed off their summer coat of reddish-brown and take on a sleek mouse color. They may be found high up on the mountain side during the day, where they generally lie on some overhanging point, or bed beneath a windfall.

The deer on the mainland may be said to be divided into two classes, viz: the lowland deer, which attain a weight of from 75 to 100 pounds, and are a reddish-brown color; and the mountain deer, which attain a weight of from 150 to 250 pounds. The latter are of a mouse-color, and have much shorter legs and heavier barrel than the lowland deer. Their antlers are much larger and during the time when their horns are in the "velvet" they are much easier found, as they seek the open points and avoid brushy places on account of their horns being so tender.

These horns or antlers are fastened to the frontal bone and, according to some authorities, begin to appear toward the end of March. At that season it is said there is a marked determination of blood to the head, the large veins surrounding the frontal bone becomes temporarily enlarged, and the budding antlers grow with great rapidity, the antlers or horns of an adult stag being produced in about eight to twelve weeks.

At first the horns are soft, and are highly sensitive. A buck will lie for days at this season with his head in the open, dreading even the touch of a bush or twig. The horns at this stage are covered with a fine hairy substance called "velvet," and are full of blood. On attaining their full growth a bony ring is formed at the base of the horn which cuts off the blood supply and the horn hardens, when the velvety covering then begins to disappear. The deer at this period will hasten matters by rubbing its horns against trees and rocks. When the rutting season is over the deer again sheds its horns; a new pair, larger and stronger, growing each spring. It is thought that nature provides these animals with antlers as a means of defense and offense during the love season, when they are used in many a hard-fought battle between rival bucks for the possession of does. They make a terrible weapon, and a full-grown huck can strike an awful blow with them.

How many hunters know what the deep cavities are beneath a deer's eye and their uses? It is called the lachrymal sinus or "tearpit," and has a bad-smelling waxy substance secreted therein, but naturalists have never clearly discovered for what purpose nature intended them.

At Pender Haroor a mountain deer was, this season, brought in that weighed 252 pounds. It was killed by a storekeeper of that place, who states that it was the largest of hundreds he had shipped from that place. Mr. Walter Squier, a member of a recent hunting party at Hotham sound also killed a mountain deer which weighed approximately 225 pounds. It required three men to pack him out of the timber.

The wapiti is also found farther back on the mainland of Canada, but it has been driven back so far that it is practically impossible for a cruising party to reach its haunts.

The elk is practically extinct upon the mainland of Canada, but on Vancouver Island, at the north end near Seymour Narrows, are several bands, which are closely guarded by the Canadian authorities. The Provincial Government has also passed a law making it a misdemeanor to kill deer upon Vancouver Island for a certain number of years. So many hunters from this side have made a habit of indiscriminately slaughtering everything they saw on the island that the authorities have passed very stringent laws against non-residents.

A prominent official, connected with the Customs service at Vancouver, in talking over the game situation with visiting sportsmen, remarked: "Come right along boys, we are glad to have you visit us, but don't slaughter the game. Kill what you need; kill what you want; but don't try to exterminate it. There are a few, a very few, I am pleased to say, of the fellows on your side of the line who come up here, shoot at everything they see, and run the balance back so far it keeps anybody else from getting it. Or, if they are fortunate they will kill enough for ten men and take it back home by the boat load. They are the fellows we like to catch. But the average sport who kills only what he can eat and comes for the trip, we like to have 'em."

There is the whole question in a nutshell. Don't make a hog of yourself.

The open season for killing deer on the Canadian side begins September 1st. The license fee for non-residents is \$50. The coast is patrolled by game wardens, who closely examine every boat and sportsman they run across. It is against the law to kill a doe at any time on either the island or the mainland, and the bag is limited. It is also illegal to kill the female of a wild goat or to kill a porcupine.

Porcupines are very plentiful and the reason they are protected by law is that they are the only animal whose flesh is good to eat that a man lost in the mountains can kill without a gun. Their flesh tastes somewhat like veal or pork. They live in trees and

stumps and are nocturnal in their habits, though they may be found at any hour of the day feeding along old skidroads. They belong to the rodent family and have long hair mixed with their quills, four toes on the front foot and five behind, short flat tail, and when disturbed strike a vicious, sideways blow with the tail, the quills coming off in whatever they strike. They attain a weight of 30 to 40 pounds.

A bear hunt recently in that section is referred to by a writer in the Bellingham Reveille, who says:

"Black bears are also very numerous in most places in the Northwest. To successfully hunt them one needs a good dog, and as they have to be specially trained, it is not often that a bear is killed. They are wary and have a keen scent, making it almost impossible to stalk them. On a recent trip, right in the heart of a bear country, where the hills were crossed and recrossed by bear trails, we failed to see a single bear. One of the party refused to believe the tracks he saw were bear tracks, and said he didn't believe that there was such an animal in the woods. It is hard for a man to believe his eyes, sometimes.

"A Mississippi farmer, who was seeing his first circus, halted in front of the dromedary's cage and surveyed the beast with mouth agape and eyes popping from his head. The band struck up, the main show started, the people flocked into the main tent, and still he stood entranced, watching the immense hump, the crooked, uncouth limbs, the pendulous lip and immense cloven hoofs. Finally, as he turned away, unsatisfied, he muttered: 'Hell, they ain't no such a animalie.'

"And so it was with our bear. For days and days we trod the primrose paths of idle dalliance, waiting and longing for the arrival of the dog-salmon, the harbinger of bruin and his numerous family. But no fish—no bear. We saw much sign, though none was fresh; but still it was bear sign, and with that we had to be satisfied.

"The black bear has forty-two teeth and while its incisors and canines are shaped for a carnivorous diet, its molars are roughened or grooved for the purpose of crushing and grinding vegetable or herbivorous food. It is by choice a vegetarian, and will eat enormous quantities of roots, grass, berries and the succulent stems of the skunk cabbage. They have five toes on each foot and their claws, unlike those of the felines or cat family, are not retractile.

"When the black bear is born it is naked and sightless, and its eyes do not open to the light of day until after a period of four to six weeks has elapsed. They are easily tamed and quite playful.

"In their predatory ramblings bears are not over-choice as to their manner of going, and the luckless hunter who follows a bear trail for an hour or so through devil's club, hemlock thickets and up and down and over and under fallen timber must have the patience of Sisyphus and the muscles of Ajax to come up to his quarry. Although an unwieldy, awkward appearing brute, there is no four-footed animal that can make the time through a Washington jungle that a good healthy black bear can. What he fails to climb over he rides down; and what he can't ride down he squirms over.

"Both the black bear and grizzly bear may be found in considerable numbers in the Parker range, and at certain seasons of the year, it is said, they come quite low down on the mountains. The black bear is to be found along the creeks during the spawning time of salmon, and on the points and peaks of some low mountain during berry-time.

"The grizzly or silvertip bear is occasionally met with by the hunter after big game, but their scent is so keen and their hearing so good that they generally detect the presence of the hunter and are gone before he sights them. They grow very large, weighing from 600 to 900 pounds.

"It is stated that when young the grizzly bear is able to climb a tree, and many hunters have told of killing them in small trees, but it has never been verified.

"I realize that in making this statement I am liable to run counter to the pen of the highest authority on bears in the land, but I make this statement offhand, as it were, and without a single fact to bear me out. However, I have been told by old trappers and hunters that grizzly cubs climb trees. It may be that, like Mark Twain's huffalo, they just had to climb a tree. At any rate, I stand open for correction. I am not looking for grizzly bears, anyway."

Grouse in several varieties abound in the mountains. The willow or common grouse may be found everywhere on the lowlands, and higher up the blue grouse are in numbers. They are quite large, weighing from five to seven pounds. Up above the snow line the white grouse or ptarmigan may also occasionally be seen, but they are much scarcer than the two previous species.

By throwing his holdings along the Coast into the State preserve for two years, James Irvine of the San Joaquin Ranch, near Los Angeles, has closed practically the only duck-hunting grounds left to the public in this vicinity. Two preserves have been established. No. 1 extends from Laguna Beach to the gun club house, and comprises about 1,300 acres. No. 2 is composed of the entire upper portion of Newport Bay, including all tide lands above Island No. 1, and including the island. This practically puts a quietus on hunting ducks on Newport Bay, a field which has heretofore been open to the public.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

RIDDING WESTERN RANGES OF PREDATORY ANIMALS.

Substantial evidence that the Government is determined to put forth every effort to bring the National Forest lands to the highest point of development is given in the activities of Uncle Sam in planning the eradication of predatory animals which destroy annually thousands of dollars worth of stock running on the ranges in the forests.

Eleven experienced trappers and hunters, whose knowledge of conditions and training in the great West qualifies them to hunt wolves, cougars, mountain lions, coyotes and wildcats successfully, have been assigned to the work of exterminating these destructive range animals in National Forests in eight Western States. These men, supplied with traps, poisons, guns and ammunition, are going at their work in a way which is beginning to show its useful effect and the forest officers believe that the losses caused by the animals which make stock their prey have been cut down very materially.

The most effective way to destroy wolves and coyotes is to locate their dens, where, in addition to the old animals, the pups may also be killed. In the Wind River division of the Yellowstone National Forest two forest guards, acting as hunters, killed twenty-one pups and two old wolves in two months' work this summer. In another case, where two hunters were working separately, one found a den and killed seven pups and their mother, and the other ranger killed five pups in another den.

The importance of killing these thirty-six wolves in one National Forest is realized only when the extent of damage which is done by these animals in a year is known. Vernon Bailey, who made an investigation of the ravages of wolves last year for the Forest Service, reported that in a certain part of New Mexico a moderate estimate of the stock killed by four wolves was a yearling cow or calf every three days, or approximately 100 head of cattle a year, to each wolf. Counting all as calves at the low rate of \$10 a head, each wolf would cost the ranchman \$1,000 a year. This would make a saving of \$36,000 a year to the ranchmen in the Yellowstone National Forest, where the several hunters mentioned accomplished such effective work.

The work of killing off wolves and other predatory animals on the other National Forests is going on equally well, and the stockmen grazing under permit in the strips of ranges within the boundaries of the forests will be saved many thousands of dollars annually. An indirect good coming from the Government's activities will be to spur ranchers grazing outside of the National Forests to join in the work of ridding the Western ranges of destructive animals. Besides the great saving through preventing the loss of stock, further encouragement is given the work in many States where bounties as high in some cases as \$50 a head are given for killing wolves, and \$20 to \$30 a head for mountain lions.

The eleven Forest Service hunters are distributed as follows: Sawtooth Forest, Idaho, two men; Yellowstone Forest, Wind River Division, Wyoming, two men; Highwood Mountains Forest, Montana, one man; Grand Canon Forest, Northern Division, Arizona, one man; Park Range Forest, Colorado, one man; Dixie Forest, Utah, one man; Trinity Forest, California, one man; Imnaha Forest, Oregon, one man; Montezuma Forest, Colorado, one man. These hunters submit reports of the results of their work through the supervisors of the forests upon which they are employed. A large number of applications for similar co-operation have been made by the local stock associations, indicating their appreciation of the value of this part of the Forest Service work. These applications are being acted upon as suitable men are found to fill the positions and the funds set aside for this work will permit their employment.

The Forest Service hunters have many exciting experiences in their work, and sometimes even the oldest and most tried Westerners have a very close call for their lives.

A short time ago a huge bear was giving much trouble to the settlers and stockmen in the Dixie National Forest in Utah. Two men and three dogs were sent out to hunt the bear, but they failed in locating it. In the latter part of September a ranger came across bruin on his patrol, shot and wounded him, and followed his trail. On the third day he found and killed the big animal, shooting him fourteen times. The bear fell within six feet of the ranger. He weighed 800 pounds.

LOS ANGELES FISH AND GAME CONVENTION.

The annual meeting of the California Fish and Game Protective Association convened in Los Angeles yesterday and will close to-day. There will be present a large body of delegates representing fish and game protective organizations in every part of this State.

The association has accomplished much for the protection of both game and fish, in the formulating of laws that have been adopted and are now in force.

Yesterday was devoted principally to speeches and the reading of papers by various sportsmen authorities. Today the executive portion of the work is the program.

After the meeting adjourns today, and all day tomorrow, the visiting delegates and attending sportsmen will be entertained by the Los Angeles County Fish and Game Protective Association.

HUNTERS MAY SHOOT ON UNCULTIVATED AND UNINCLOSED LANDS.

Under a misapprehension of the law many hunters have been deprived of hunting on uncultivated lands of the State, says the San Bernardino Index.

Locally, there was a great roar from the San Bernardino nimrods when it was given out, and freely believed, that a law was passed by the last Legislature providing that when a rancher posted warnings to hunters every three miles around his place it was unlawful to hunt thereon, no matter whether the land was cultivated or enclosed, or not. The old law provided that a rancher could keep the hunters off his land when said land was cultivated or enclosed.

The new law did not pass and the old law stands. Many local hunters thought at the time of the agitation of the question, that everybody could post land whether it was their own or not, and fool the hunters for their own benefit. And this is just what has happened in the west end of the county, and which posting led to the discovery that the law had not been passed by the last Legislature by no less a person than Senator Henry M. Willis, the author of the Hunters' license law.

The Etiwanda Gun Club of Etiwanda, which is said to have four active members in good standing, has, it is alleged, posted miles upon miles of uncultivated country near Etiwanda and created a virtual game preserve for their own use.

Senator Willis, with Judge Frederickson, W. C. Vaughn and Harry Logan, left Los Angeles recently for a hunting trip, in an automobile. At Etiwanda they found every likely patch of brush posted with notices and they overlooked many fine hunting spots on account of the signs. Senator Willis had a book of new laws in his pocket and while on the way towards Cajon he found there was no such law as he, with many others, thought had passed the last Legislature. When he returned to San Bernardino he investigated further and found that the amendment introduced by Senator Price of Santa Rosa had not passed, and the old law, providing for immunity from hunters for cultivated and enclosed land only, stands.

Senator Willis, with his companions, journeyed as far as the upper Mohave River, where they found many quail. Coming back they took a daring ride from the ranch down to the summit, on the railroad track in the automobile. They accomplished the trip in nine minutes, which, if made by the muddy roads, would have taken them four hours.

LIGHT TACKLE CLUB RULES.

The new light tackle committee of the Southern California Rod and Reel Club met at the Los Angeles Athletic Club Thursday evening, October 24th, and partially arranged for the tournament season of 1908. Messrs. Hedderly, Stearns, Spier and Geft were present.

It was decided to organize a separate light tackle division of the Rod and Reel Club, membership to be open to members of the club only, and an entrance fee of \$1 to pay for the buttons.

Three types of buttons were decided upon, all to be of gold; one for outside fishing, one for inside fishing and a gold star special for limit fish in each class, as follows:

Inside Fish—	Gold Star. Maximum lbs.	Gold Button. Minimum lbs.
Corbina	60	40
Croaker	12	9
Yellowfin	7	4
Rock bass	12	7

Outside Fish—	Gold Star. Class, lbs.	Gold Button. Class, lbs.
Tuna	60	40
White sea bass	60	40
Black sea bass	400	100
Albicore	50	35
Yellowtail	40	30
Striped bass	25	10

Sample buttons, showing the designs as selected by the committee, will be submitted to the Rod and Reel Club at the next meeting.

The following restrictions were established: Rod must be not less than six feet long and weigh not more than ten ounces.

Line must be a standard nine-thread line. Contestant must submit tackle used at the next meeting of the club after the catch is made, together with entry properly witnessed, according to tournament rules and on the regular blanks.

In the heavy fish, or outside division, the buttons will have a red field, showing fish, crossed gaff and rod. Lettering, "Light Tackle," in gold, white border.

In the light fish, or inside division, up to fifteen pounds, same border and letting; inside, blue field, without the crossed gaff and rod.

In the gold star special, button to have white border, lettered in gold, "S. C. R. & R. C.—Light Tackle," white field, blue star crossed with gold fish.

The waters in which tournament catches may be made were limited to State waters, ranging from the Santa Barbara channel to San Diego, and including both these points. This will avert any possible controversy, such as arose last season through the limits not being established.

These classes and prizes are separate from the regular tournament prizes, such as were offered last season. Arrangements for the regular tournament will be made later on.

Drink Jackson's Napa Soda.

SAN CLEMENTE ISLAND TO BE A FISH PRESERVE.

San Clemente Island seems destined to come under Government protection as a fishing and forest reserve. Professor Charles F. Holder, the well known angler and writer on fishing subjects, recently returned from a mysterious trip to the island, with him went Gifford Pinchot, Chief Forester of the United States.

This trip was styled a fishing and camping vacation by those who participated in it, but a much deeper and more far-reaching motive is believed to lie behind it. For many years Professor Holder, A. G. Eddy of the Catalina Light Tackle Club and other sportsmen of the Pacific Coast have been deeply interested in the protection and the preservation of their piscatorial friends, and it was with these deep-seated interests in mind that the expedition to the Island of San Clemente with Mr. Pinchot was undertaken.

At no time within the history of San Clemente Island has the Government knowingly allowed this property to be abused, but recently several of the more enterprising sub-lease holders of land on the south side of the reserve have begun to "farm" out their shore privileges to seinemen or netters.

Some time ago Charles Howland secured a five years' lease upon the whole of the island and therewith he commenced to work to improve what he considered the most useful parts of the site. Australian grasses were immediately planted and at present over 40,000 head of sheep and goats are peacefully feeding the whole year round as a result of Mr. Howland's ingenuity. Being of a volcanic origin and showing but little verdure, Mr. Howland wired off a considerable portion of the northeast side of the island, built dams, re-opened disused wells and in the place of acres of natural spiny cactus he planted spineless cactus. As a result he now has fodder enough to feed for a whole season the vast number of almost wild sheep and goats.

To quote Professor Holder: "The island far surpasses any governmental possessions in the Pacific Ocean where almost barren land could be utilized to such advantages as those for forest and game protections." As a reservation for fishes and game the island has unlimited possibilities. Fresh water is plentiful, and the climate under normal conditions is all that one could desire to make an ideal reserve and spawning place for the many useful and gamey fishes of the Coast.

For some years attempts have been made, and there has been a common impression that at some time the waters surrounding Santa Catalina would be made Government reservations, but the present plans under consideration by Mr. Pinchot far supercede the hopes of Catalina fishermen.

In all probability Mr. Pinchot will recommend for Government consideration the whole of the island of San Clemente as a forest reserve, and the regulation three miles radius around as fishing preserves. In addition to this reservation it is understood that an application will be filed which will include the south side of the island of Catalina, making, in all, something like 50,000 acres for fishing preserves and 30,000 acres under the Government forest protection.

By creating three bird reservations, composed of a considerable number of islands well suited for the purpose, on the Coast of the State of Washington, President Roosevelt has made it possible to prevent the wanton destruction of certain birds and animals in that State, and has at the same time opened a way for experiments with new varieties of birds in the Puget Sound country. Primarily, the President's purpose was to prevent the extermination of birds and sea lions; but the proclamation issued by him establishing these bird and animal reservations has a much broader meaning.

Public interest is rather keen for experiments of this kind. Wooded areas that border Puget Sound should be brightened by pretty singers of rare plumage; with a large number of small islands in the waters of Washington set aside for the purpose of encouraging study and experiment along these lines, there is no reason why marked progress should not be made.

Many Washington citizens are already actively engaged in work of this kind on Puget Sound, and President Roosevelt's act should very greatly stimulate and encourage them in efforts they are now making. Provided with comfortable homes, and guarded against wanton and wasteful destruction, the birds of Puget Sound, and of all Western Washington, should prosper, and thus all much to the beauty of the woods.

In Texas the law which prohibits the killing of game birds out of season does not, strange to state, apply to wild ducks. These birds may be killed at any time, twenty-five being the legal individual limit for one day.

The game law of Texas is, in its punitive provisions, very severe, and provides that no one who has not lived in the State for at least six months shall be allowed to hunt there without first obtaining a permit from the State Fish and Oyster Commission, for which license a fee of \$1 is charged.

It is contended by some lawyers that the law which makes the mere possession of game an offense is invalid, and it is probable that a test case will be made soon to determine the point.

The open season for quail also begins on November 1st.

QUAIL HUNTING NOTES.

Quail hunting on the hills, knolls and upland feeding grounds of the birds requires a deal of walking under frequently unfavorable conditions. The experienced hunter pays particular attention to his feet and lightness of wearing apparel, other considerations being of rather less importance.

The value of carefully selected, perfectly fitting footwear to the quail hunter cannot be over-estimated. It may make or mar the entire trip. Sore or lame feet are the most persistent discomfort imaginable.

Stout hunting shoes of soft leather advises one experienced quail hunter, not waterproof, all such sweat and draw the feet, liberally nailed in the soles, are requisite. The soles should be thick to prevent stone bruise. The nails are set on in a sort of wedge outline with the tip to the toe; about four nails in the heel will do. Some like heels, others prefer the flat-footed sole, because it has the advantage of protecting the ankle. Other hunters again discard the nails and prefer rather flexible soles, without the nails. The chance of slipping on stones or boulders in a rough country is obviated; further, with a flexible sole one can move quickly and lightly, with a firmer hold on the ground.

A small canteen is a necessity. Some shooters fill the canteen with fresh water the night before, wetting the outside covering and allowing the canteen to hang in a breezy place over night; this insures cool drinking water. Whisky is a bad thing on a quail hunt; it stimulates the heart to an unnatural degree and enables one to perform perhaps a little more for a time, but the reaction is infinitely worse, and in hill hunting likely to result in lasting damage to the heart. Cold tea or coffee with milk and plenty of sugar added are infinitely preferable if a stimulant be needed at all. Sweet bar chocolate is a good thing to carry, and the all-around hunter has a few pieces of jerked venison or other meat in his pocket to gnaw on at times, often getting along without lunch by such measures. With most, lunch is a welcome rest, and a part of the day's fun, however.

A light sixteen or twenty-gauge gun is the best weapon for quail hunting. It necessitates a good shot, but either arm is deadly when pointed by an expert. The gun is lighter; the shells are less bulky; great weight is saved. The importance of this detail is such that experienced men calculate carefully just how many shells they want to kill the limit, and carry no more. Few take over two boxes, or fifty. When they do the extra boxes are cached somewhere in the line of march or left with the lunch to save lugging weight.

A thin skeleton coat, aptly described as a "string of pockets," with just enough cloth between to hold them together, is a universal favorite for quail hunting. Corduroy is hot; most men prefer light khaki, which is as enduring in the brush.

The quail hunter may expect to perspire, and dress with this idea in mind. It is well to take along a good warm coat to wear going and coming; it may be left with the rest of the cache, and often saves stiffness the next day, rheumatism, or worse. The body, hot, wet, tired, is particularly susceptible to severe colds, having lost some of its resisting power in the fatigue incidental to vigorous exercise in quail hunting.

A broad-brimmed felt hat to shade the eyes is excellent; a bandana neckerchief protects the neck from sunburn and the chafing of the clothing, which is no inconsiderable element in a long, hard tramp.

Recent quail hunting in the vicinity of Los Angeles is given in the following report:

Rain upset the calculations of a host of quail hunters Sunday, two weeks ago, and so effectively dampened the ardor of those who did brave the downpour that not a single limit was reported in the territory immediately adjacent to Los Angeles.

One result of the storms has been to give the quail some unexpected protection. The season was almost two weeks, but no very great inroad had been made in the quail ranks as yet.

One of the happy exceptions to the general rule of poor sport was a party of San Diego men who shot across the line Sunday, October 27th. D. W. King Jr. and Dick Reed, well known trap shots on the Coast, were with them, the scene being laid in Old Mexico, below Tia Juana. With the trap shots were Chas. L. Julian, Milt Barber, Thomas Coates and F. B. Naylor of San Diego. The party got 148 quail and this was reckoned by the San Diegans a "bum shoot." The San Diego men would like to get in some time when it is good.

J. F. Holbrook, Gen. C. F. A. Last, Jacob Adloff, Auguste Marquis, August Winstel and Jud Saeger shipped in one limit of quail each, bringing another with them after a very pleasant trip.

Fred B. Mills and D. W. King Jr. drove to Laguna Canyon from Long Beach early in the week, killing about twenty quail in a place that formerly was alive with them. They made the trip in Mills' automobile.

Although there is no bag limit in Old Mexico, the California law of not more than twenty-five in possession at one time applies as soon as the hunter crosses the American border. This in some measure affords protection for the birds across the line, but as a rule, hunters revel in the lack of limit and stop only when they have run out of ammunition or cannot possibly dispose of more birds.

Most of the Los Angeles hunters who had planned to hunt Sunday called off their trips after the downpour of the night previous, and quite a few set the date ahead so as to get away during the week. The

shooting, now that settled weather seems certain, should show marked improvement over anything enjoyed thus far this year, and the two weeks of poor sport may prove a benefit by maintaining the fun just that much longer.

On quite a number of menu cards in Glohe, Ariz., hotels and restaurants "quail on toast" is conspicuously printed. The managers of these places are taking chances on a \$300 fine and a term of six months in the County Jail, as the Arizona law strictly prohibits the vending of quail or other birds or wild animals, used for food, in any form. This law applies to hotels and restaurants, as well as markets.

Quail hunting conditions in this vicinity will be much better after rain enough has fallen to thoroughly wet and dampen the thick brush and tree cover that the birds frequent now. In many places it is very hard to find the birds out in the open or in low cover; when the heavy cover becomes uncomfortable for the birds they will take to the open places.

Frank Maskey and Doc Ayres enjoyed a hunt on the Point Reyes Sportmen's Club preserves one day last week. On these grounds the birds are plentiful and cover conditions favorable. Maskey got the limit with 28 shells.

Will J. Golcher, Geo. Uhl and Ed. Bosqui shot over the club grounds last Friday and each secured a limit. Golcher used a 20-gauge Hunter single trigger that is as effective and as prettily designed a gun as a sportsman could well wish for. Sixteen and twenty-gauge guns are coming more and more into favor for field shooting, one consideration alone, among others, is an incentive to their use and that is, the elimination of weight in carrying shells. Fifty 20's have an appreciable difference in weight from 50 12's.

Thos. and Geo. W. Pennington shot over the north end grounds of the club last Friday and Saturday, getting the limit each day.

DUCK HUNTING.

The marsh hunting contingent are still awaiting the advent of the northern birds. In the vicinity of San Francisco birds are exceedingly scarce. For the hunter who can take two or three days for a duck hunt, the up-river country is more than inviting, for in numerous resorts the birds are to be found by the thousands.

Last week, Otto Fendner and Frank Freeman took a trip to Middle river, a station twenty miles from Stockton. They went across the San Joaquin to Victoria island where Fendner was joined by three of his old-time hunting companions, Frank La Montagne Sr., Walter La Montagne, Geo. La Montagne and the Bryan brothers. This meeting was somewhat of a re-union, for Fendner and the now truck farmers used to shoot together for the market years ago. The island men are all shot-gun artists, in fact there are to be found few better shots. Friday the party went out after ducks and found Mallard, Sprig and Teal just as plentiful as twenty years ago, the birds were so numerous that they did not shoot Spoonneys or Widgeon. The seven guns accounted for 245 ducks; they could have killed hundreds, so fast did the birds come. The bag was composed of 110 Mallard and the balance Sprigtails, the plumpiest and finest conditioned birds that have been brought to the city this season. Many Sprig and Widgeon were northern birds. This section is one of the best duck hunting grounds in the San Joaquin valley and embraces about 8000 acres, two tracts of which have been leased within the week by gun clubs.

Mr. Carlos G. Young recently returned from a trip to Point Arena where he fished the Garcia river, from the mouth up about three miles. Mr. Young is enthusiastic in praise of the splendid fishing to be had there about this time of the year. This was his fourteenth annual trip to the river.

For a week (three weeks ago) the weather was fair and clear. Steelhead grilse, from 1 to 10 pounds, with a light rod and tackle, on a Katie May fly, No. 12 hook, he landed a number every day. Farther up the river, he states, there was quite a number of large fish in the holes, waiting for the freshets to enable them to get up stream. Smaller trout, from 6½ to 10 inches, were abundant and in nice condition. One could catch the limit of fifty in two or three hours any day. Sandbars at the mouth of the river, this year have spoiled several heretofore good pools.

E. A. Mocker and Game Warden Walter Welch had a great day Thursday of last week fishing in the Soquel, near Capitola. They landed, with a No. 12 coachman, 75 fine fish, 6 to 10 inches in length.

W. F. Hillegass, Geo. Hucks and Dave Harefield landed seven bass from San Antonio Slough Wednesday last week, the largest scaling 5½ pounds. On Tuesday Bill Goodwin hooked a 16-pound fish.

Last Sunday, at Wingo and San Antonio, the rodsters were out in force. General luck was very poor, but one or two fish were taken. Tide and weather conditions seemed propitious, but the fish would not bite.

Chas. Linn caught fourteen bass trolling off Rodeo last Sunday. Frank Dooliver fished from the shore and landed five.

PRICES PAID FOR ENGLISH DOGS.

Taking into consideration the published accounts of prices paid for dogs "on the other side" by American fanciers recently, prompts us to give the following statement by the London Field on this subject, which is of a nature calculated to afford a little contemplation when the reports of amounts paid, as given in some of our daily papers, is taken into consideration:

A correspondent has again asked us, says the Field, to inform him as to the particulars of the highest prices obtained for individual dogs, and the reason one variety will bring more than another, with no regulations or rule as to size. Demand is the great thing, and this is ruled by fashion or fancy. For instance, when St. Bernards were the rage, almost anything in reason could be obtained for a perfect specimen, and this breed has the credit of providing the highest priced dogs of any variety. The famous Sir Bedivere was sold about fifteen years since by Mr. T. H. Greene to Mr. E. B. Sears of New York for £1300 (\$6,800), and about the same period the almost equally famous Watch went to the same land of dollars for £1,000 (\$5,000), and three or four other specimens reached as much as £800 (\$4,000) apiece. Of course, prices are more or less unreliable, as there is a tendency to exaggerate or minimize them, as the case may be. But probably immediately following the St. Bernard come the Collies, several of which have brought extravagant prices, some of them £1,000 (\$5,000) each or approaching that sum. Since that time, a dozen or more years ago, even larger sums have been paid by American millionaires for English-bred Collies, but the exact prices given have not been allowed to transpire. Quite respectable fortunes in a small way were made during the St. Bernard boom. A similar remark applies to Collies, and the latter continue to bring what may be called extremely fancy prices, and are likely to do so for some time to come, as there are at least two kennels in America the owners of which attach little value to money when their hobby is in danger. Our British Bulldog has had many ardent admirers, who have not been afraid to open the strings of their purses to secure what were considered by the cognoscenti the choicest specimens. Here, again, prices perhaps have been much exaggerated, and dogs said to have realized \$5,000 were found to have brought but a fourth of that amount. It seems odd that, with all the popularity enjoyed by the Fox Terrier, no single specimen has yet been sold for more than £500 (\$2,000), and this sum has been reached on very few occasions. It was once reported that \$5,000 had been offered for a well known champion at a time when he had scarcely known defeat, but it transpired that an error had been made in a cablegram, English sovereigns to that amount having been the named price, which was refused. Yet a Fox Terrier can win more prizes than any other breed of dog, and this with less trouble and with a minimum amount of risk.

DOINGS IN DOGDOM.

A litter of four Boston Terrier puppies by Ch. Dick Dazzler, out of Mrs. Ella F. Morgan's Vixen III., attracted much attention one day this week on Van Ness avenue. The puppies were on exhibition in a drug store window (under Brother Richardson's watchful eye), and were the center of an admiring audience of the fair sex all day long. Two of the puppies, seal brindles, are beautifully marked and most promising ones, the bitch in particular.

Mr. L. Allen Shuter, who has for many years been in the front rank of English exhibitors and breeders of flat-coated Retrievers, has sustained a great loss by the death of Horton Rector and Royal River—the first named from a chill, while Royal River, a much younger dog, for he was only three and a half years old at the time of his death, died from an abscess on the liver. It was Mr. Shuter's Darenth which was said to have earned his owner close upon £1,400 (\$7,000) in his career.

The Pacific Setter and Pointer Club was organized in this city on Tuesday evening, October 29th. The meeting was held at the residence of Dr. L. W. Spriggs, an enthusiastic Setter fancier. The officers elected were: George W. Ellery, president; Fred P. Butler, vice-president; Dr. Spriggs, secretary; Victor Kuehn, treasurer. Show committee, Thos. J. Blight, H. B. Knox of Alameda, and W. H. Mackay of Stockton. There is a membership of twenty-five to start with and the prospect of a considerable increase.

Mrs. Phil. C. Meyers has sold the good parti-color Cocker Spaniel Glenwood Lucky to Kingsley Stevens of Pasadena. The Bulldog Endcliffe Baron was purchased by Freeman Ford of Pasadena and the very good Dalmatian bitch, about the best one on the Coast, Glenwood Minerva, is now owned by Mr. Fred Herr of Los Angeles.

The Santa Rosa bench show project is off.

SHOTGUN CHAT.

J. G. Naquin of Globe, Ariz., won the Arizona Amateur Championship on the remarkable score of 377 out of 395 targets—about 95½ per cent. He shot U. M. C. steel lined shells, a performance that once more demonstrates the superiority of the U. M. C. steel lined shell.

Mr. C. W. Clements, a popular sportsman of Phoenix, Ariz., and a noted trap shot, will join the forces of the U. M. C. Co. and Remington Arms Co., as a missionary and salesman in the district of California, south of San Francisco, and in Arizona. Mr. Clements is a bright young man of pleasing personality and has a host of friends. He will without doubt make his coming engagement a successful one.

There is a strong prospect of pulling off at Reno, next spring, a big live-bird shoot with \$5,000 in purses hung up.

The "pro" squad, composed of Tom Marshall, Dick Reed, D. W. King Jr., Chris Gottlieb and Hip Justins cut out a hot pace in the fifth event on the first day. Out of 125 birds only 3 were lost—here it is: Marshall 24, Reed 25, King 25, Gottlieb 24, Justins 24. This is about the record for the Coast. Holling broke 23, Hoyt 24—7 missed out of a total of 175.

Phil B. Bekeart, whom every sportsman on the coast knows and likes, has sent out a business card announcing his return to this city again as follows: "Removal. After the late unpleasantness, April 18, 1906, I found myself 'forced to the wall.' But I went through the wall—over the bay to Alameda, a pretty town of homes and clean streets; fortunately my principals never visited Alameda, and permitted me to stay there. However, on November 1, 1907, I will return to San Francisco, to the Kamm Building, 717 Market street, near Third, and will occupy the front suite on the third floor, numbered 301."

Needless to say, we all wish him continued success.

TRADE NOTES.

Advantages of the Single Trigger.

In all two-trigger guns changing from one trigger to the other shortens or lengthens the stock about an inch. If a 14-inch stock fits a sportsman, a 13-inch stock certainly does not; hence one shot fired from a gun that fits perfectly, and the next shot from a gun that does not fit at all. In other words, a two-trigger makes it necessary for a shooter to constantly try to get accustomed to two lengths of stock, while practically he does not get used to either. That is why so many second shots are missed.

The sportsman can shoot the Hunter One-Trigger just as well with thick gloves as with bare hands, owing to the very short release and the ample space in front of the trigger. This special feature makes shooting from a duck blind decidedly comfortable.

FEEDING HORSES FOR MARKET.

So common is it for Western farmers to sell their horses half fat, says a correspondent of the Drovers Telegram, that a number of horse-feeding establishments have sprung up in various parts of the country, in which these thin horses are gathered together and fatted for the market. The average farmer might find some useful hints from the methods followed by these professional fitters, which in the main, are as follows:

"The horses are purchased, their teeth are floated and they are all put in the barn and fed gradually, as great care must be taken for a few days to avoid colic. It seems preferable to feed them grain about five times per day, due to the fact that the stomachs of horses being proportionately smaller than those of cows, they need their feed in smaller quantities and often. The hay is placed in racks, so that they must have access to it at all times. They are given all the water they will drink twice a day. The following method is followed in feeding the grain:

"Corn is given at 5 o'clock in the morning, water at 7, the hay racks filled at 9 o'clock, when they are also given oats and bran, the proportion being two-thirds bran and one-third oats. Then at 12 o'clock they are fed corn again, and 3 in the afternoon oats and bran and the hay racks refilled; at 4 they are given a second watering, and at 6 the last feed of corn is given.

"The proportion for each horse when upon full feed is as follows: Corn, from ten to fifteen ears at each feed; oats and bran, about three quarts per feed, making in all from thirty to forty ears of corn and six quarts of oats and bran per horse per day. The horses are not given any exercise. It seems impossible to give them all sufficient exercise, thus they are not given any from the time

they are put in the barn until a few days before they are to be shipped.

"As a substitute for exercise, in order to keep blood in good order, thus preventing stock legs, Glauber salts is used. This is found to be quite satisfactory and will in most cases prevent this trouble. It is mixed with oats and bran, as in this way the horses eat it quite readily. These salts are fed about twice per week. They can be purchased very cheaply from the druggist when bought in considerable quantities. They are not so strong as Epsom salts, and they have a desirable and cooling effect upon the blood.

"Oil meal is also fed. They claim that it aids greatly in putting on flesh; also that it gives the skin a soft, mellow touch. The mangers and feed boxes are cleaned out twice a day, and the cobs and other refuse thrown out behind the horses and taken out with the manure. The horses should be given sufficient time to rest their stomachs, and this can be done by giving the first feed at 5 o'clock in the morning and the last between 6 and 7 at night. Horses fed as described above usually make good gains. In some instances horses fed in this manner have made a gain of five and one-half pounds a day for a period of fifty to 100 days. One horse gained 550 pounds in 100 days. In many instances from one dozen to twenty horses have made an average daily gain of three and one-third pounds per day for a period of ninety days.

"One of the largest horse-feeding establishments in the State of Illinois, a firm which has fed hundreds of horses annually, makes a business of buying in horses in the half-fatted condition from farmers and feeding them from one to three months in preparation for the market. The length of the feeding period would depend upon the condition of the animal when purchased and the prospective out-

U. M. C. Notes.

Mr. Riehl kept up his good work on the Coast by breaking 96 out of 100 at Medford, Ore., shooting his Remington gun-U. M. C. combination.

Billy Heer won the Perry, Okla., shoot, September 24th and 25th, dropping only 16 birds out of 380 targets with his Remington gun-U. M. C. shell combination. Billy's long rest has done him a lot of good. George Volk was high amateur at Mt. Clemens, Mich., September 26th, scoring 369 out of 400. R. O. Heikes was one bird behind him with 368. Both gentlemen shot U. M. C. shells.

Col. Anthony, September 23d, broke 93 ex 100 at Birmingham, Ala. Mr. Futton broke 91 on the 21st and the Colonel 92. Both these gentlemen were shooting U. M. C. shells.

H. E. Brown was high gun at Bradford, Pa., September 24th and 25th, breaking 358 out of 400, shooting U. M. C. steel-lined shells. Mr. J. F. Conneely was second with one target behind. He shot U. M. C. shells. Mr. C. B. Adams won the high average at Basin, Wyoming, under impossible weather conditions, as the score of 266 out of 320 targets will show. Mr. H. G. Taylor scored 72 out of 75. He won the amateur average, capturing everything on the program available, namely the amateur average, the Ithaca event, 72 ex 75, the cup event, 68 ex 75, and the Big Horn County Fair event, 94 ex 100. Mr. Adams and Mr. Taylor both used U. M. C. exclusively. Mr. Taylor also won the high average at the Cedar Bluffs, Neb., shoot, September 25th and 26th, where he ground up 378 ex 400 with U. M. C. shells.

66 to 2; 53 to 0; 25 to 5.

These figures are not old-time baseball scores. They are records of ammunition used at three of the big tournaments held recently, and give a fairly good idea of the strong, merit-earned preference among American shooters for Winchester shotgun shells.

There were sixty-eight shooters at the tournament given by the Tannhauser Gun Club, sixty-six of whom shot Winchester "Leader" shells. Mr. C. C. Spencer, F. W. Hoyt and Horace Heikes won first, second and third expert averages respectively, and all shot the Winchester shells, and in connection used Winchester "pump" guns. Mr. A. D. Mermud, J. W. Bell and Dr. W. S. Spencer were the three high amateurs, and they also all shot the Winchester shells, and Mr. Mermud and Dr. Spencer Winchester "pump" guns. The Ballistite trophy, the other honor at this tournament, was captured by Dr. Scherzinger with Winchester "Leader" shells.

Fifty-three shooters, all shooting Winchester shotgun shells, was the record at a recent all-day tournament held in Houston, Texas. It is quite evident from this that Texans are not only excellent shots, but they know which are the best shells to shoot. At this tournament Otto Sens, L. Moesser and H. Howard won the first three averages, Messrs. Sens and Howard shooting Winchester "pump" guns as well.

At the Waverly, Minn., tournament twenty-five of the thirty shooters present shot the Winchester shells. The winners of the three high amateur averages being Messrs. J. Jones, L. E. Parker and W. D. Steward, the two latter used Winchester "pump" guns as well.

The Winchester showing at these tournaments is true of many others the country over and tells a convincing story of the popularity, superiority and reliability of Winchester "Leader" and "Repeater" shotgun shells and Winchester repeating shotguns.

Peters Points.

On Labor Day, September 2nd, at Lexington, Ky., Mr. Wolkoff Henderson competing for one of the trophies offered by the Lexington Gun Club, won the race and established a new record for the Lexington crowd by a score of 124 out of 125. He shot Peters shells as usual.

At Osceola, Ark., September 12th, Mr. R. McCracken won high general average, and Hugh Lovewell second general average, both using Peters factory loaded shells. Mr. Will Welles won the Hunter trophy shooting at 30 singles and ten pairs, scoring 44 with Peters ammunition.

At Goldfield, Nev., September 2-3, Mr. J. E. Vaughan won high average breaking 184 each day with Peters factory loaded shells, a total of 368 out of 400.

L. H. Reid, shooting Peters factory loaded shells, won high average at the Cedar Springs, Ohio, tournament September 17th, scoring 190 out of 200. He also won the Navahoe Challenge Cup with 94 out of 100.

At Durant, Ia., September 15th, Mr. H. W. Kahler, shooting in the wind and rain, won high average with 159 out of 175 with Peters shells. Mr. Geo. Reimer of Durant won the championship of Eastern Iowa, scoring 49 out of 50, also with Peters shells.

Peters factory loaded shells were decidedly in evidence at the shoot given by the Bethel, Conn., Gun Club September 14th. Mr. Chas. Steven of Danbury, tied for first amateur average, 114 out of 125; Mr. W. B. Darton won first professional and first general averages, 121 out of 125; Mr. J. S. Fanning second professional average, 118 out of 125; all using regular factory loaded goods made by The Peters Cartridge Company.

L. I. Wade won high average at Chillicothe, Tex., September 17th and 18th, breaking 421 out of 460 under a sliding handicap. Mr. H. A. Murrelle was second, and Mr. J. D. Van Sickle third; all using Peters factory loaded shells. Mr. Van Sickle also won the Ithaca gun with a score of 46 out of 50.

High professional average at Donavan, Ill., September 18-19, was won by Mr. H. W. Cadwallader, who scored 374 out of 400 with Peters shells. W. D. Stannard was second professional with 361. First, second and third amateur averages were won by Messrs. J. Young, A. J. Stauber and J. Barto respectively, all of whom used Peters shells on the second day.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam
IT HAS NO EQUAL

For — It is penetrating, soothing and healing, and for all Old Sores, Bruises of the Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

All broken to harness. If all taken by one person, \$1,500. Can be seen near Lakeport, Lake Co., Cal. **W. L. COLLIER**, 312 Eighth St., S. F., Cal.

JERSEYS, HOLSTEINS AND DURHAMS—Dairy Stock a specialty. Hogs, Poultry. Established 1876. **Wm. Niles & Co.**, Los Angeles, Cal.

come of the same. Large-framed, coarse-blooded animals are always fed much longer than the fine, pony-built horses. The former class make heavier gains and require more flesh to give them finish and to make them attractive to the eye of the purchaser.

"Many people have doubted the wisdom of forcing the horses in this way. They claim that the animal will not wear as long after being subjected to such fattening processes. This may be so, and no doubt it is in no small degree. Still, we must cater to the demands of the market. We must give our purchasers what they want. In draft horses they demand fat, thus if we hope to get the highest value for our animals we must sell them in high flesh."

If you have a vicious sow that kills her pigs and is generally cross, send her to the shambles.

STAKES FOR 1909 and 1910

Entries to Close Monday, November 11, 1907

THE SPINAWAY (for Fillies) - - - - -	\$10,000
For Foals of 1907	Run in 1909
THE HOPEFUL (Estimated) - - - - -	\$30,000
Produce of Mares Covered in 1907	Run in 1910

Breeders Should Note This Stake
TO BE RUN FOR IN 1909

THE SPINAWAY of \$10,000

For Fillies Two Years Old, Foals of 1907—By subscription of \$5 each, the only forfeit if struck out by November 2nd, 1908. If left in after November 2nd, 1908, a further subscription of \$45 each; and if left in after May 1st, 1909, a further subscription of \$50 each. Starters to pay \$150 additional. The Saratoga Association to guarantee the gross value of the race to be \$10,000, of which the second horse shall receive \$1000 and the third horse \$500. The Nominator of the Winner to receive \$500 out of the Stakes. Winners of a race of the value of \$5000 to carry 3 pounds extra; of two of \$5000 or one of \$7,500, 6 pounds extra. Non-winners of \$2500 allowed 4 pounds; of \$1000 7 pounds. By filing with the Saratoga Association before November 1st, 1908, an accepted transfer of the engagement in this Stake, the Nominator will be released from further liability.

Five and a Half Furlongs.

Breeders Should Note This Stake

THE HOPEFUL for 1910

Estimated Value \$30,000

By subscription of \$10 each, for the produce of mares covered in 1907, the only forfeit if struck out by November 1st, 1909. If left in after November 1st, 1909, a further subscription of \$50 each; and if left in after May 2nd, 1910, a further subscription of \$100 each. Starters to pay \$250 additional. The Saratoga Association to add \$5000. The second horse to receive \$2000, the third horse \$1000, and the owner at time of entry of the mare producing the winner \$1000 out of the Stakes. Colts, 122 pounds; fillies and geldings, 119 pounds. Winners of two races of \$3000, or one of \$5000, to carry 3 pounds extra; of two of \$5,000 or one of \$9000, 8 pounds extra. Horses not having won \$2500 allowed 4 pounds; of \$1000, 7 pounds. If a mare in this Stake drops her foal before the 1st of January, 1908, or if she have a dead or more than one foal, or is barren, the entry of such mare is void. By filing with the Saratoga Association prior to November 1st, 1909, an accepted transfer of the produce, with its engagement in this Stake, the original Nominator will be released from further liability as to the engagement of the produce.

Six Furlongs.

THE RULES OF RACING, adopted by The Jockey Club, govern all races run under the auspices of the Saratoga Association.

Entries to either or all of the races advertised in this Blank will be received only with the understanding, and on the agreement of the subscriber, that the provisions of Racing Rules 42 and 43 (hereto appended) form a part of and govern the contract:

"RULE 42. Every person subscribing to a sweepstakes, or entering a horse in a race to be run under these rules, accepts the decision of the Stewards on any question relating to a race, or to racing.

"RULE 43. At the discretion of the Stewards of The Jockey Club, or the Stewards, and without notice, the entries of any person, or the transfer of any entry, may be refused."

TRAINING, BOARDING and SALE

Cor. Grove and Baker Sts., just at the Panhandle Entrance to Golden Gate Park. (Take Hayes, McAllister or Devisadero Street Cars.)
Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by autos or cars.

MANHATTAN STOCK RED BALL BRAND FOOD

Awarded Gold Medal at California State Fair, 1892. Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition. Ask your grocers or dealers for it. Positively cures Colic, Scouring and Indigestion. Manhattan Food Co., C. P. Kertel, Pres., 1001-1003 E. 14th St., Oakland, Cal.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

DON'T GO WRONG

To the winter quarters for the rest cure, firing, blistering and the usual methods are uncertain at best, they mend invariably for the moment only.

Have your horse sound for the big show, for the sale ring, for track or road work—absolutely and permanently sound. Don't take chances—use "SAVE-THE-HORSE;" don't think you are experimenting, write, read what it has accomplished for others, it will positively do the same for you.

On broken down, strained, bowed and injured tendons its power is un-failing.
Makes a tendon like a rod of steel.
Equally effective in the removal of all swellings on legs or throat.
Supersedes all known methods.

"SAVE-THE-HORSE" permanently cures Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Shoe Bole, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual. \$5.00 per bottle. Written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet.

At Druggists and Dealers or express paid.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c, 50c and \$1.00

WINCHESTER

HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1886 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

VOLUME LI. No. 20.

SATURDAY, NOVEMBER 16, 1907.

Subscription—\$3.00 Per Year

A FUTURITY CANDIDATE.

Bay Colt, Foaled 1907, by Ed. McKinney, Dam Mattie B. 2:15 $\frac{1}{2}$. Owned by William Van Keuren of San Francisco.

New California Jockey Club

The California Futurity Stakes for 1909 and 1910

Entries to close December 31st, 1907

THE CALIFORNIA FUTURITY

With \$5000 Added

To be Run at the Fall Meeting of 1909

For foals of 1907; \$10 entrance; \$25 unless struck out by December 1, 1908; \$50 unless struck out by August 15, 1909; \$150 to start; \$5,000 added, of which \$1,000 to second and \$500 to third; 15 per cent of the stakes to the nominator of the winner; \$10 per cent to the nominator of the second horse, and 5 per cent to the nominator of the third horse.

Winners of two sweepstakes or one of \$5,000 value to carry 4 pounds extra; of three or one of \$7,000 value, 7 pounds extra. Non-winners of a sweepstakes allowed 3 pounds, and if such have not won four races, 6 pounds; maidens, 9 pounds. By filing prior to December 1, 1908, with the New California Jockey Club an accepted transfer of engagement in this event, accompanied with all forfeits to date, the original subscriber will be released from any further liability.

SIX FURLONGS.

PERCY W. TREAT, Secretary

\$7,250 Guaranteed

Only \$2 to Nominate Mare

\$7,250 Guaranteed

Pacific Breeders Futurity Stakes No. 8

TO BE GIVEN BY THE

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1907 to Trot and Pace at Two and Three Years Old

Entries to Close Monday, December 2d, 1907

\$4250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners, and \$450 to Owners of Stallions

MONEY DIVIDED AS FOLLOWS:

\$3000 for Three-Year-Old Trotters.

\$200 for Nominator on whose entry is Named the Dam of Winner of Three-Year-Old Trot.

\$1250 for Two-Year-Old Trotters.

\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

\$750 for Two-Year-Old Pacers.

\$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

\$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

\$250 IN SPECIAL PRIZES FOR STALLION OWNERS

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize \$100
2d Prize 50
3d Prize 35

4th Prize \$25
5th Prize 20
6th Prize 20

The Above Prizes will be Paid on December 24th, 1907.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings, February 2, 1909; \$10 on Two-Year-Olds, February 1, 1910; \$10 on Three-Year-Olds, February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For Entry Blanks and further particulars address the Secretary.

CONDITIONS.

The races for Two-Year-Olds will be mile heats. 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before February 2, 1909, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contract for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will not be barred on pacing horses.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

THE NEXT BIG STAKE to close is the Pacific Breeders' Futurity No. 8, which closes for the nomination of mares on the 2d day of December next. The wise breeder has long known that stake entries are necessary and consequently he nominates his mares in these futurities and others when the time of entry comes around. The Pacific Breeders' Futurity is one of the great annual harness events on this coast, and is looked forward to by hundreds of horse lovers as the feature of the year in colts. The winners of the different divisions of the stake are not only greatly admired by their owners, but they attract the attention of horsemen all over the country and sell for high prices if the owner desires to dispose of them. One never knows how fast a colt can trot or pace until it is tried, and the greatest disappointment a breeder can have is to find that a two or three-year-old that shows him great speed is not entered in any stake. The time to enter is when the stake closes, and after that is done it is a good proposition to keep the foal eligible until it proves beyond a doubt that it hasn't speed enough to race. Many mares were sent to California stallions during the past year, and those now in foal should be nominated in this stake. The entry fee is low, only \$2, and within the reach of every owner, even during hard times.

AN EASTERN WRITER says: "I say without fear of contradiction that a better horse can be raised on the hills of New York and New England than in any corn State of the West. It is the grass on those hillsides, with the aid of the oats grown in the valleys, that makes bone, muscle and nervous vitality. While the corn and clover may make them like the Western hogs—a mountain of flesh—there is not the horse inside of the hide with the stamina that these pastures, oats and pure water can give." The author of the foregoing has failed to reason from cause to effect. The horses raised on the bleak hills of New York and New England are strong in muscle and nervous vitality, not because of any special virtues in the grasses that grow there, but because they are compelled to work to get enough to sustain life. The animal raised in luxury grows up soft and heavy, but if given exercise he will be a larger, a stronger and a more valuable animal than the one which survives the scant feed and cold winters of New England. The best horses raised in New England are those that are well fed while growing, not those that pick up a scant living from the bleak pastures.

THERE SEEMS TO BE a general movement all over the United States on the part of State fair managers to prohibit hookmaking, pool selling or any other sort of gambling on the races which are one of the principal features of the State shows. The abolition of betting was first brought about for moral reasons, but now the managers are all adopting it because they find it pays to keep gambling of all kinds off the grounds. The increased gate receipts at the fairs where betting is not held more than offsets any loss that is incurred from the non-sale of betting privileges. The time is coming when wagering on races will be confined to strictly racing meetings like those of the Grand Circuit and the big running meetings. It is not likely that betting will again be permitted at either the Oregon or the California State fairs.

PRODIGAL, the stallion owned by Senator Bailey of Texas has a record that has probably never been equaled by any other sire. Just ten of his two-year-olds were trained this year and each and every one of them took a standard record. Helen Hale, one of the ten, trotted to the world's race record of 2:13¼ for a two-year-old filly, and in addition to this Gen. Watts 2:06¾, the champion of all three-year-old trotters, is out of a mare by him. Prodigal is just old enough to vote, were he a human, as he was foaled in 1886. He was bred by J. C. McFerran of Louisville, Kentucky, and passed through different ownerships until the late Marcus Daly became his owner, and the horse was placed at the head of the Bitter Root Stud in Montana. When the dispersal sale of this farm was held, Senator Bailey secured Prodigal and placed him at the head of his breeding farm. Prodigal is a brown horse, sired by Pan-coast 1439, son of Woodford Mambrino and Bicara by Harold. The dam of Prodigal was the great brood mare Beatrice by Cuyler, son of Hambletonian 10, and her dam was another great broodmare—Mary Mambrino by Mambrino Patchen 58, while the next dam was Belle Wagner by the thoroughbred horse Emhry's Wagner.

MR. J. S. BRANSFORD was elected mayor of Salt Lake City at the recent election. Mr. Bransford is well known in California, having been a resident of Plumas county for several years, and since becoming a citizen of Salt Lake has visited California nearly every winter, generally making Los Angeles his headquarters, where he is a member of the Driving Club. He has purchased here a number of good horses for himself and his friends in Salt Lake, among them being Robert I. 2:08¾, Tom Carneal 2:08½, Dr. Frasse 2:11¼, McNally 2:15 and several others. Mr. Bransford is a first-class business man, and a gentleman of high ideals. His election as mayor of Salt Lake by a good majority is evidence of the esteem in which he is held among the best element of that city, and is a source of much satisfaction to the many friends he has in California.

FAILURE TO REGISTER is the cause of many failures to make sales. We have heard of several cases during the past month where buyers were compelled to turn down good offers simply because the animals were not registered. If the breeders of trotters and pacers would devote less time to railing at the rules of registration that prevent some favorite horse from being registered, and would register those of their stock that are eligible, they would make many more sales.

THE PHOENIX RACES.

Only a very short report of the first day's racing at Phoenix this week has reached us up to the time of going to press.

The great Dan Patch started to heat his record and paced the mile in 1:57¾, which we believe is the fastest mile he has paced this year. The quarters were in :29¾, :58¾, 1:28, 1:57¾.

There were four starters in the 2:08 pace, for a purse of \$1000, Bystander, Mandolin, Moy and Delilah. Bystander won the first heat in 2:07½, and then Delilah won the race, her fastest heat being 2:08, a new record for the daughter of Zolock.

In the 2:14 trot Wild Bell, Bellemont, Helen Dare, Goldennut, Dewey, J. J. N. Jr. and Richie Baron were the starters. Wild Bell won. The time of the first heat was 2:10½.

Over 12,000 people attended the races on the opening day, and seats in the grand stand sold at a premium. The fair is a big success.

Quite a number of horses are now in training at Agricultural Park for the races to be given on Thanksgiving Day by the Sacramento Driving Club for the benefit of the Protestant Orphan Home. The club committee which has charge of the arrangements expects to have a big meeting. The members are now working on the program and expect to have it completed within a few days. The following horses have been named: Ray Dittus' Instructor, T. Lindener's Lady Mignon, Jay Wheeler's Bobby Dohhs, I. Christie's Briarwood, Albert Elkus' Penrose, Charles Silva's Blanche T., J. Silva's John F., Ed. Kavanaugh's Dora, L. Beach's Baby Knight, M. F. Hunt's Presto, Walter Pierce's Lady Bird, Chris Jorgenson's Alick, R. Wilson's Benton Bowl, and Fred Raschen's Iron Bell.

Mr. Frank H. Burke, proprietor of La Sesta Farm, San Jose, will please accept our thanks for a generous contribution of old sale catalogues and copies of the Breeder and Sportsman of "the days before the fire." The catalogues were especially welcome, as among them were several which we have been unable to secure since the catastrophe, and which are almost absolutely necessary in compiling old-time California pedigrees.

A GREAT POLO EVENT.

The coming polo tournament to be held under the auspices of the Coronado Country club will prove by far the highest event of the kind that has ever been held on the Pacific coast.

Secretary Paul Schmidt, of the Coronado Country club states that while in Chicago last week he saw Frank J. Mackey, the well known polo expert, and that he will come to Coronado for the tournament next March, and that he will bring a polo team with him. This team, in all probability, will consist of English polo players and it is expected to prove one of the strongest that has ever been seen on the coast.

The Honolulu Polo Club will come to the Pacific coast the latter part of January. The Hawaiian team will bring their ponies with them and will play at Burlingame about the middle of February. After the Burlingame tournament they will go to Coronado and participate in the tournament for the international trophy. Honolulu will send a strong team and they fully expect to walk away with the big trophy.

In addition to the team which Mr. Mackey expects to bring to the coast, it is also expected that there will be another team composed of foreign players. The Mexico polo club, of the city of Mexico, is also discussing the plan of sending a team to try for the international trophy. The chances are therefore good for at least four foreign teams being entered in the tournament.

As usual there will be teams from Santa Monica, Los Angeles, Riverside, Santa Barbara and Burlingame. It is also expected that there will be one or two of the army cavalry teams entered.

HORSES SELL WELL DOWN SOUTH.

The most successful auction sale of horses ever held in San Bernardino county, and one of the most notable sales ever held in Southern California, was that at J. H. Kelley's auction stables, San Bernardino, on November 2, when 119 horses and mares were sold for a total of between \$13,000 and \$14,000. Every horse that was offered was sold, and the quality of the stock, the prices realized and the management of the sale all joined in making it a notable success, and emphasizing the fact that San Bernardino can be made a center for all Southern California, for the sale of stock.

Ed. Stuart, a well-known horseman, took down about 120 head of horses from Oregon and Idaho. Some of them had been worked on reservoir work in Idaho, but the most of them were range horses that had never been broken. The animals were in good condition, and in some cases, fancy prices were realized for work horses.

M. L. Frink paid the best price, giving \$225 for a splendid black mare. J. T. Hethlack paid \$425 for a span of black mares that many a bidder looked at with rather envious eyes. John Wallace paid \$665 for four animals. Joseph H. Kelly, the owner of the stable, bought seven at average prices, and the total returns for the sale count up to more than \$13,000.

CALIFORNIA HORSES WIN IN AUSTRALIA.

At the annual show of the Royal Agricultural Society, held at Melbourne, Australia, in September last, the California bred horses and their descendants made a good showing. Amongst the trotting broodmares none had a chance against two California mares—Diana Rose by Daly-Baby Button, and Sihamba by Charles Derhy-Paronella. The former, a very fine mare, was placed first, and Sihamba second, with Queenie by Chieftain-Miss Yattendon, third. The best trotting mare in harness was Coney Island, a fine strapping chestnut by St. Whips-Zora.

In the class for three-year-old trotters Crown Derhy by the California bred horse Rex Derhy won second prize, and third went to Owyhee Jr. by Owyhee. Dixie Tracy, a two-year-old by the Palo Alto bred horse Dixie Ato, won second in the two-year-old colt class, while in the contest for two-year-old fillies Lady Derby by Owyhee was the winner. Among the yearling colts, Arabian Bells by the Kentucky bred Ahhey Bells won first prize. But three yearling fillies were shown and all were by Owyhee. The trotting championship for mares was won by Diana Rose. This fine mare is owned by Mr. W. B. Veirs of Melbourne.

THE BREEDING OF CORSET BOY.

Last week we asked for information as to the breeding of a horse called Corset Boy. Barney Simpson, who now owns the good stallion Arner 2:17¾, writes us as follows in regard to the matter:

Breeder and Sportsman: I noticed your inquiry about the horse Corset Boy last week. "Farmer" Bunch worked a horse here by that name and he told me he belonged to B. Croner, the corsetmaker, was bred by the late George Woodard of Yolo county, and was by Arthur Wilkes, dam by Alex. Button. I bred a mare owned by Mr. Woodard to Arthur Wilkes in 1891 or 1892, which would make this horse fourteen or fifteen years old. He is a horse 16 hands or over and a bay in color. Det Bigelow of Woodland can doubtless give the breeding of his dam and when and where the horse was sold.

BREEDERS' FUTURITY No. 7.

Third Payment of \$5 Each Made on 205 Foals of 1907.

Owners who nominated mares bred in 1906 in Pacific Breeders' Futurity No. 7 have made third payment on 205 of the foals of this year, which is an excellent showing for such troublous financial times as the daily press would have us believe these are. The list of those making third payment follows:

A. Allen's b f by Diablo, dam Lady Allen by Echo Chief.
 Cbris Anderson's foal by Cassiar, dam Theresa by Waldstein.
 T. W. Brodnax's ch c by Strathway, dam Bonnie B. by Tom Hal Jr.; *foal by Strathway, dam Gertrude.
 Cbas. H. Burlock's ch f by Strathway, dam Tia Juana by Kewanna.
 J. N. Blair Jr.'s foal by Demonio, dam Butcher Girl by McKinney.
 Tbos. H. Brents' b f Princess Del Norte by Del Norte, dam Laurelia by Caution; blk c Northalis by Del Norte, dam Miladi B. by Chehalis.
 I. L. Borden's s f by Cresco Wilkes, dam La Belle Altamont by Altamont.
 T. W. Barstow's blk f Eva B. by Nearest McKinney, dam Trueheart by Nearest.
 Mrs. S. V. Barstow's b c Lucky Strike by Star Pointer, dam Maud J. by Nearest.
 Mr. Banker's b c by Dumont S., dam Whisper by Gossiper.
 Robt. S. Brown's foal by Wayland W., dam Foxie B. by Secretary.
 H. Brace's *b f by Star Pointer, dam Banker's Daughter by Arthur Wilkes; *b f by Star Pointer, dam Myrtle Kinney by McKinney; *b f by Star Pointer, dam Belle W. by Harry Wilkes.
 H. F. Bliss' br f by Stoneway, dam Iris B. by Iris.
 Martin Burnell's b c by Montesol, dam Marcelle by Fay Wilkes.
 Jacob Broliar's foal by Red McK, dam Ethel Basler by Robt. Basler.
 E. F. Binder's *b f by Worth While, dam Emma Z. by Zolock; b c by Worth While, dam Silklock by Zolock; br f by Mein Kleiner, dam Eugenia B. by Zombro.
 S. S. Bailey's foal by Tidal Wave, dam Vinnie Mann by Alexis; foal by Tidal Wave, dam Bessie L. by Montana Director.
 D. L. Bachant's b f Athget by Athadon, dam buckskin mare Nugget; foal by Athadon, dam Miss Guide by Guide.
 Henry Busing's blk c by Bonnie McKinney, dam Amazonian by Jas. Madison.
 Alex Brown's foal by Nushagak, dam Kinocha by McKinney; foal by Prince Ansel, dam Majella B. by Nushagak; foal by Prince Ansel, dam Daisy B. by Waldstein; foal by El Rio Rey, dam Lottie by San Diego; foal by El Rio Rey, dam Nutflower by Nutwood Wilkes.
 W. V. Bennett's br f by Arner, dam Martha Blaine by Arthur Wilkes.
 W. O. Bowers' b c by Bon Voyage, dam Silvia B. by Silver Bee; b f by Zolock, dam Betsy B. by Silver Bee.
 John B. Benedict's foal by Robert Direct, dam Zephyrus by Zombro.
 W. L. Bolton's *gr c Sir Lewis W. by Gen. J. B. Frisbie, dam Dolly K. by Fallis.
 N. P. Batchelder's *foal by Star Pointer, dam Luella by Nutwood.
 Curtis Colyear's foal by Petigru, dam Maggie McKinney by McKinney.
 S. Christenson's br f by Zolock, dam Marguerite K. by Don Pedro.
 B. E. Combs' foal by Nutwood Wilkes, dam Opereta by Longworth.
 S. G. Cousin's b f by R. Ambush, dam Dolly Wheeler by Joe Wheeler.
 W. S. Clark's s f Mary Wallace by Dictatus, dam Ethel C. by Sidney.
 L. J. Caplatz's br c by Welcome, dam Hagar Wilkes by Nutwood Wilkes.
 Robt. T. Curtis' br f by Adjutant, dam Connie by Lottonio.
 E. M. Conroy's b f by Star Pointer, dam Frances C. by Wasutch.
 W. A. Clark Jr.'s br c by Bon Voyage, dam She by Abbottsford; br c by Bon Voyage, dam Ruth Mary by Directum; b c by Bon Voyage, dam Reina Del Diablo by Diablo; *s f by Zolock, dam Myrtha Whips by Whips; b f by Highland C., dam Patty D. by Ultimus; b c by Bon Voyage, dam Lucie May by Oakland Baron.
 S. H. Cowell's foal by Kinney Lou, dam Central Girl by Nutwood Wilkes; foal by Henry Nutwood, dam Two Minutes by Wildnut; foal by Henry Nutwood, dam Sultana.
 Lewis Charlton's ch f by Dumont S., dam Nellie J. by St. Patrick.
 Jos. Cunningham's ch c by Dumont S., dam Catharine by Wayland W.
 Sam Casto's foal by Zolock, dam Stamboul Bell by Stamboul.
 Marion Case's c Arthur B. by Arner, dam Black Gipsy by Kentucky Baron.
 J. D. Chappell's foal by Lynwood W., dam Lenmetta by Norcatour.
 Ed. Coe's *b f by Stam B., dam Klickatit Maid by Dumont.
 E. H. Dudley's foal by Palite, dam Lorna Doone by

Bayswater Wilkes; foal by Prince Ansel, dam Ima Jones by Captain Jones.
 Estate of Ben Davies foal by Exchange, dam Ella T. by Ben Roe; foal by Izalco, dam Queen by Raymond; foal by Worth While, dam Dixie S. by Zolock.
 Wm. E. Detel' *b c by Bon Voyage, dam La Moscovita by Guy Wilkes.
 Chas. De Ryder's *b c by Star Pointer, dam by Abbottsford Jr.; *foal by Star Pointer, dam Cleo G. by Yosemite.
 A. Edstrom's foal by Athablo, dam Carmon by News Boy.
 A. R. Fraser's *f Lady Ezelda by Coronado, dam Belle Pointer by Sky Pointer.
 Rae Felt's foal by Star Pointer, dam Edith by Dexter Prince; foal by Bonnie Sain, dam Alameda F. by Timothy B.
 A. J. Gillett's foal by Ed McKinney, dam May W. by Red Cloak.
 J. E. Goad's foal by Stoneway, dam Pet by Bay Rose.
 A. W. Garrett's foal by Wayland W., dam Kitty by Jim Budd.
 Geo. Gray's foal by Cassian, dam Winona by Welcome.
 T. B. Gibson's foal by Iran Alto, dam Maggie by Soudan.
 A. Galbraith's blk c by Highland C., dam Miss Derby by Cbas. Derby.
 Aug. Gandrau's *c by Diablo, dam Susie Hall by Junio.
 H. S. Hogboom's b c by Iran Alto, dam Beautiful Bird by Nutwood Wilkes; ch c by Palo King, dam Diawaldia by Diablo; br c by Bon Voyage, dam Carrie Malone by Steinway.
 J. N. Harlan's c Prince Alto by Iran Alto, dam Rita H. by Diawood.
 S. C. Henderson's foal by Zombro, dam Arabella by Black Pilot.
 Wm. Hashagan's foal by Kinney Rose, dam Chittwee by Chas. Derby; foal by Kinney Rose, dam Rita H. by Nutwood Wilkes.
 W. J. Hackett's ch f by Prince Nutwood, dam Fly Way by Glenway.
 C. A. Harrison's b c North Star Pointer by Star Pointer, dam Maid of Del Norte by Del Norte.
 J. W. Halle & Co.'s foal by Demonio, dam Minerva by Guy Wilkes; foal by Demonio, dam Mamie Airlie by Prince Airlie; foal by Demonio, dam Hanora by Oro Wilkes; foal by Demonio, dam Rose Budd by Fallis; foal by Demonio, dam Olita by Bradtmere.
 Mrs. L. J. H. Hastings' b c Robt. McGregor Parole by Parole, dam Sapho by Robt. McGregor.
 W. A. Hunter's foal by Money Mc, dam Lady B. by Steppen A.
 F. K. Hurxthal's b f by R. Ambush, dam Altighe by Alcantara.
 E. P. Heald's foal by Count Hannibal, dam Lady Marvin by Don Marvin.
 S. H. Hoy's b c by Jules Verne, dam Miss Davis by Zolock.
 I. W. Hazelett's *foal by Zombro, dam Lady Bird by Pope Leo.
 F. P. Hellwig's *b f Zoe Dell by Zombro, dam Lovely Dell by Lovelace.
 J. B. Iverson's s f by Nutwood Wilkes, dam Ivoneer by Eugeneer; s f by Eugeneer, dam Roseat by Guy Wilkes; b f by Bonnie McK, dam Amy I. by Diablo.
 Robt. Johnson's foal by Humbletonian, dam Dot by Dudley.
 J. H. Jack's foal by Star Pointer, dam Winnie Wilkes by Rey Wilkes.
 M. C. Keefer's blk c by Nusbagak, dam Advosta by Advertiser.
 J. A. Kirkman's foal by Stoneway, dam Carrie by A. W. Richmond.
 Geo. W. Kirkman's foal by Stoneway, dam Belle Basler by Robt. Basler.
 L. L. Kennedy's foal by King Alexis, dam Ylang Ylang by Antelope.
 Thos. P. Kell's foal by Nearest McKinney, dam Babe by Danton Moultrie.
 Jos. H. Kelly's foal by R. Ambush, dam Hyto by Happy Prince; foal by Bolock, dam Violet by Conn.
 Fred Kline's foal by Zolock, dam Miss Handsome by Dictatus Wilkes.
 La Siesta Ranch's foal by Bonnie Direct, dam Wanda II. by McKinney; foal by Zolock, dam Wanda by Eros.
 I. M. Lipson's ch f Olive H. by Hamb. Wilkes, dam Sally B. by Gen. McClellan.
 Wm. K. Lindsay's blk f by Almaden, dam Queen by Nushagak.
 M. L. Lusk's gr f Alma Belle by Almaden, dam May Belle by Don Marvin.
 O. Frank Leppo's b f by Wayland W., dam Robizola by Robin.
 J. A. Lane's *foal by Humboldt Dillon, dam Nellie by Sampson.
 J. D. Laidlaw's b c by Glenelg, dam Anelixa by Antrim.
 Ray Mead's foal by Zolock, dam Carrie B. by Alex. Button.
 W. C. McCully's foal by Cedric Mac, dam Concha by A. W. Richmond.
 Mabry McMahan's foal by I. Direct, dam Lady Ada by McKinney.
 H. B. Muzzy's br c Bon Baldwin by Bon Voyage, dam Princess Irene by Demonio.
 P. H. McEvoy's *foal by Milbrae, dam Debarcher by Geo. W. Archer.

J. C. Mowry's foal by Kinney Lou, dam Electress Wilkes by Nutwood Wilkes.
 Abe Marks' b f by Wayland W., dam Cecille M. by Robin.
 McLees Bros.' foal by Robert Direct, dam Kate.
 H. W. Meeh's foal by Bonnie Direct, dam Cricket by Steinway; foal by Stam B., dam Izobel by McKinney; foal by Star Pointer, dam Crispiana by Nutwood Wilkes.
 J. W. Marshall's b c by Star Pointer, dam Trix by Nutwood Wilkes; blk c by Zolock, dam Madeleine by Demonio; b f by Demonio, dam Louanna by Dictatus.
 Carey Montgomery's b f by Star Pointer, dam Effie Logan by Durfee.

EARLY HISTORY OF DAN PATCH.

A good many stories have been related of Dan Patch's early education, and they all have quite a little interest, as I think. As the expressions go, a born trotter, a horn pacer, or, with men, a born orator or any other unusual accomplishment, I have always regarded Dan Patch as a horn speed marvel, and nothing short of it, writes Walter Moore in Chicago Horseman.

Dan Messner, his breeder and early owner, told me the following story of Dan's handling as a two-year-old:

The colt was a rather angular looking fellow, made on the "lathy" order, with a pair of hind legs that were adorned with a good sized pair of "speed indicators," commonly known as curbs, and, as Messner doesn't believe in colt training to any great degree, he wisely decided that the best thing for the future king was to keep him sound and let him muscle up his body and legs. About the time he settled on a plan a wandering caretaker of German extraction dropped into Oxford, Ind., Messner's home town, in search of a chance to wield the rub-bag. Messner told him that if he could follow instructions to the letter he had a place for him. An answer in the affirmative got him the job, which was the care and exercise of Dan Patch. Messner's plan of growing and building his lanky colt into a muscular horse was to take the colt out every day and walk him ten miles in harness. So the new groom started on his summer's job of walking his colt ten miles every day, and was told emphatically it must be a walk, walk all the time, and the colt must not be allowed to trot or amble.

As far as is known now the instructions given in the spring were carried out to the letter throughout the summer. When the fall came and the German groom longed for the sights of a city and all that goes with it, he resigned and left his charge in the hands of his owner. Messner jogged the now famous horse occasionally and allowed him to strike a pace occasionally for a couple of weeks, when he chanced one day, when out with the colt, to meet Uncle John Wattles, who said he would like to see the colt started up, whereupon Messner asked Wattles to take his seat in the high-wheeled Frazier cart to which the horse was hitched. As the country roads near Oxford are all of the good black soil that makes the fastest tracks we have, and are usually in good shape, quite a number of quarters and eighths are staked off along them; so, after a little preliminary warming up, Dan was tried out for a quarter, and, to the astonishment of his owner and driver, stepped it in 31 seconds. Before going to the races as a four-year-old he worked a half-mile track in 2:10, which, from the appearance of the track, was one of the greatest miles ever shown by a four-year-old green horse, as I think it about the slowest track over which a horse ever paced as fast as 2:10.

When these facts—as they are vouched for by the most reliable men in all classes of business in Oxford, Ind.—are taken into consideration, I am more firmly entrenched than ever in my belief that Dan Patch was foaled a "phenomenon" and would have made a sensational horse in the hands of any trainer of average ability that would have kept him sound.

Uncle John Wattles raced Dan Patch when Dan was a four-year-old, and Uncle John, as he is now familiarly called, was 74 years old. He is now in his eighty-first year.

MEDIUM WEIGHT SPANS.

On the largest and best equipped farms the heavy draft horse is being used and will be used as long as there are heavy loads to be moved and heavy machinery to operate, says the Wisconsin Agriculturist. Horses of this type are with us to stay. We have so far discovered their value that we would not and could not well perform our work without them.

But there are other important duties for horses to perform in the management of a well managed farm besides this heavy draft work. There are times when we wish to move somewhat faster than drafters are inclined or able to go. There are quick trips to be made across the farm, from one farm to another, away to town, or over to a neighbor's. A pair of light horses come into play right here. They will be half way to the place in the time it takes to get the big fellows out, hitched up and started.

There will always be many places on the farm where the medium weight span is more useful than the big grades which may have all the good points of clean, flat-boned legs, strong loins, smooth, full quarters, well sloped shoulders, and large, perfect hoofs to match, but which can plow but little more, can not do as much of the light harrowing on soft ground, and are absolutely out of place in the corn-field, cabbage field, or potato lot, where weeding and light cultivating is to be done, as will a pair of lighter animals.

ANACONDA BEST AT BOTH GAITS.

Not long ago a group of practical horsemen were discussing the everlasting problem of why some horses are able to race well at either the trot or the pace, and then the talk drifted to an argument as to what horse had the fastest combined record at the two gaits, says Henry Ten Eyck White. This point was settled, after much overhauling of the record books, in favor of the hay gelding Anaconda, but the decision only whetted the appetites of the "bugs" for statistics on the subject, until finally one man offered to go through the entire 2:10 pacing list and see how many of its members had trotting records of 2:30 or better.

At a subsequent session of the nut college graduates he submitted the results of his search through various musty tomes in the form of a literary tabloid, which follows. It gives the fastest pacing and trotting record of each horse with a double record (that is also a member of the 2:10 pacing list), together with the combined time of the miles, it having been agreed that the horse which showed the lowest combined time should be crowned the champion double-gaited one of the universe. Here is the table:

Name.	Pace.	Trot.	Total.
Anaconda	2:01¾	2:09¾	4:11½
Jay Eye See	2:06¾	2:10	4:16¾
Connor	2:03¾	2:13¾	4:16¾
Miss Gay	2:07¾	2:11¾	4:18¾
Italia	2:04¾	2:14¾	4:18¾
George	2:06¾	2:13¾	4:19¾
Satin Slippers	2:09	2:13	4:22
Direct	2:05½	2:18¾	4:23¾
Little Squaw	2:04¾	2:22¾	4:26¾
Coleridge	2:05¾	2:23¾	4:28¾
Vassar	2:07	2:21¾	4:28¾

Eleven of them, all told, but among them many a great race horse at both ways of going. While there was none to dispute the supremacy of Anaconda, a lion-hearted nag from colthood to old age, the old-timers called attention to the fact that, while both records of "the snake boss" were made to bicycle sulky, the trotting mark of Jay Eye See, which is only a quarter of a second slower than that of Anaconda, was done to high wheels, and, moreover, was the first mile ever trotted in 2:10. The 2:06¾ pacing mark of the black pony was made after he had retired for two or three seasons, and, moreover, it was accomplished when he was dicky-legged. But the Anaconda people came right back with the statement that their horse was worn out as a pacer before he was put to trotting, and that, under the circumstances, his mile in 2:09¾ was equal to about 2:07 had he been allowed to go the gait when young. So it was resolved that, while Anaconda must, by the operation of the rule, head the list, Jay Eye See was right on his neck at the finish, in, indeed, it was not a dead heat between them.

For Jay Eye See was far more than a remarkably fast horse at two gaits. He was the champion four and five-year-old trotter, the world's champion trotter, the champion double-gaited horse when his pacing record was made, and for the last dozen years he has been the champion pet horse of the world on the Case estate, at Racine, Wis., where his every want is looked after by those who love him for what he has done as well as for the fact that when he was champion trotter of the world Jerome I. Case owned him, and when he paced in 2:06¾ the only son of Mr. Case held the reins. Both men are dead, but they loved horses from the time they were able to hold the reins over one, and it is meet that the one horse of the hundreds they owned that was dearest to them should not leave the family ownership or domain.

Of the old age of Anaconda I know nothing. He was foaled in 1893, took his best pacing record in 1901, continued at the side-wheel game until 1904, when, under a new name, bestowed upon him for the purpose of advertising a food commodity, he came out as a trotter. His name does not appear among the trotters of last season, wherefore it may be concluded he is "all in" as a race horse. Unlike Jay Eye See, which was always inclined, after his colthood days were left behind, to be an equine of much sedateness, Anaconda was a romping sort of horse in harness, even when a dozen years of strenuous life had set their mark upon him, pulling so hard and being in general so "hawky" that surely it could have been no pleasure to drive him on the road.

And yet, in spite of his overwhelming energy on the track, Anaconda, like many another nag of spirit, was inclined to be made much of in the stall—but only by his regular attendant. The various rubbings, the foot pickings, and all the other attentions a good race horse is sure to receive from a "swipe," were to Anaconda a pleasure, while some horses fuss and fight them all the time. But what he enjoyed most of all was to have his boy sleep in the stall with him. A nervous horse, but withal a brave one, Anaconda felt better after darkness fell over the race track if his attendant was snoring in one corner of the stall. Then he was content to rest quietly, but otherwise midnight was likely to find him up and alert. Johnston, another world's champion pacer, felt the same way about something he had confidence in being in the stall with him, but a dog would do Johnston, while Anaconda wanted a familiar man around after dark.

Jackson's Napa Soda is the best hot weather drink.

BREEDING DRAFT HORSES.

E. S. De Lancy, a successful breeder and importer of draft horses, in an address made these sensible suggestions:

The first detail to be looked after in producing a draft horse is that he should be bred right. Anyone that deviates from this principle of draft horses breeding, and undertakes to build up a breed of his own or a type of his own, will almost certainly meet with failure.

In the breeding of draft horses the farmer should select that breed which is best suited to his conditions and environments, and after he has made this selection under no circumstances should he allow himself to deviate from using his purest blood in that breed and the type which predominates in it.

I care not what kind of a pure bred sire in the draft horse line that a farmer selects if he is raising draft horses at a good profit. I have no sympathy, in fact, I get out of patience with some of the parties who are writing at so much a column for the agricultural press urging the farmer to breed to a type in draft horses and not allow the accepted type of any draft breed.

We have first-class sires among all of our draft breeds and in most localities of this State they are accessible, if the farmer will only take advantage of them, and will only breed to the best of that particular breed which he has selected, he will certainly meet with success. The novice in breeding draft horses would advise you to take your native mare and mate her with a draft stallion, and if the offspring is not a prize winner his advice would be to breed your mare to a sire of another breed and keep changing from year to year. The average farmer has not the time nor inclination to go into the principles of breeding as the best breeders of the country have. The best breeders have taught us that the way to produce a first-class horse is to take the best mare that we can get, cross her with the best sire to be found of the same breed and to keep doing this until we approach our ideal. Any advice to the contrary is misleading to the farmers and bad advice in the extreme.

I do not wish it to be understood that if any farmer has a Clydesdale or shire mare he should not cross her with a good Percheron stallion or vice versa, rather than not breed her. I do wish it to be understood, however, that promiscuous outcrossing in draft horse breeding will result in a deviation from all types of the different breeds and just as sure as it is followed to the extreme, will result disastrously. My advice to you would be to pick out your sire of the breed that suits you and, for all time, have access to a first-class sire of that breed.

The effect of the pernicious practice that a great many of the farmers have of breeding to grade and scrubs has already been felt, and the longer they continue it the greater the disappointment will be to the man that wishes to raise first-class draft horses. I believe that the farmers of this country, taken as a whole, are too intelligent a class to make it necessary for me to dwell further upon this subject here.

I only have to cite one or two instances to prove that it pays to breed right. Twenty-five years ago a horse that could trot in 2:30 was a curiosity and his name was almost held in veneration. To-day, after the brains and perseverance of our light harness horsemen have been concentrated upon producing speed, what have we? A family of horses in the American trotter where thousands of them have unlimited speed and speed alone. This lesson is enough to show the average farmer what he could do in lines of draft horse breeding if he would only use the same perseverance and the same tenacity in producing draft horses as the race horseman has in producing speed. I am often asked why it is that importers go to Europe for their stallions. France does not give us any better Percherons than we produce in America. Scotland does not give us any better Clydesdales than some of the American breeders, but they do give us more of them and they are nearer to a distinct type. The reason of this is that the European farmer has his lines more closely drawn, his ideals more firmly established and does not so easily deviate from them. Whereas, the American farmer is more given to running after gold bags at the end of the rainbow and deviating from the steadfast course which our European breeders have taught us is the most profitable.

If twenty-five years ago, with the start the American farmer had, he had gone to work to produce the ideal draft horse of the world, the draft horse would have gained the same prominence that the American trotter has to-day. And we all know, as far as speed is concerned, the point at which they aimed, they have been eminently successful.

There is one man in this vicinity who can boast that he once rode Flora Temple, the first trotter to knock time below 2:20, writes Col. Edwards in the Newark Sunday Call. It is a good while ago, but the boy who did it is now in his 74th year and can still drive a horse with a master hand. Captain E. V. Gager, member of the Road Horse Association and owner of Dick 2:21½, is the gentleman of whom the above is true. The captain recently had a birthday and in recognition of the event his friends presented him with a diamond studded pin. President Groel, of the Road Horse Association, presented the token.

NOTES AND NEWS

Dan Patch 1:57 $\frac{1}{4}$ in November.

This mile was made at Phoenix last Monday.

And is the fastest mile ever paced this side of the Mississippi River.

Dan Patch is now eleven years old, having been foaled in 1896.

There were 12,000 people at the Phoenix track to see him pace this wonderful mile.

A first-class trainer desires a position. See advertisement.

An advertiser at Irvington, Cal., offers for sale a fine carriage team by Monterey. Read the advertisement.

Clipper 2:06 by Diablo is the boss of the road and of the matinee races at Danville, Illinois.

The race between Sweet Marie and Major Delmar, that was billed for Point Breeze track, Philadelphia, had to be called off, as the Major had the pink-eye.

The great drawback to the success of most theorists is that they regard one favorable fact as absolute proof and throw aside a dozen unfavorable ones as having no bearing on the case.

Sonoma Girl 2:05 $\frac{1}{4}$ will be wintered in the South, either Memphis or Selma.

Bingen 2:06 $\frac{1}{4}$ will probably be taken to Ohio for the season of 1908, as his owner believes in the "climatic outcross."

Mr. Fred Wadham of Tia Juana owns a fine black colt by Strathway, out of the dam of Coronado 2:09 $\frac{1}{4}$. This colt is a foal of 1907 and is entered in the Pacific Breeders' Futurity.

Chas. De Ryder is expected home in a few days. His horses won well at Phoenix.

Mr. Andrew Robertson, the Australian horseman, visited Pleasanton last week, and spent two or three days there looking over the horses at the track. He was greatly pleased with the three-year-old pacer Aerolite, and says he has all the marks of a great race horse.

Among the horses consigned to the Chase combination sale of December 23d is that magnificent son of McKinney, called Washington McKinney. He is a grand looker and his get are all nicely turned, speedy trotters.

Woodland Stock Farm has consigned some grandly bred young horses to the Chase combination sale on December 23d.

Chase's combination sale, to be held December 23d, will draw a big crowd. Catalogues will be out soon. No more consignments can be accepted.

The bay colt by Bon Voyage 2:12 $\frac{1}{4}$, out of La Moscovita by Guy Wilkes, owned by William E. Detels, the popular harness-maker of Pleasanton, has been named Bon Guy. He is entered in the Breeders' \$7,000 Futurity for foals of this year.

Mr. J. B. Iverson's entry in the Breeders' Futurity for foals of this year is an own sister to North Star 2:11 $\frac{1}{4}$.

Victor Verilhac advertises his very fast mare Gertrude A. by Diablo 2:09 $\frac{1}{4}$ for sale. She has two-minute speed and is in foal to Star Pointer. She is a bargain at the price asked.

Carrie B. by Alex. Button, dam of Ray o'Light 2:13 $\frac{1}{2}$ as a two-year-old, has a foal at foot now by Zolock 2:05 $\frac{1}{4}$, that looks like another stake winner.

Wanda 2:14 $\frac{1}{4}$ by Eros, the once famous trotting mare, that is now gaining fame in the broodmare ranks, as the dam of The Roman 2:09 $\frac{1}{2}$, Wanda II. 2:20 $\frac{1}{4}$ and Search Me 2:21 $\frac{1}{2}$, and more to come, is represented in the Breeders' Futurity for foals of 1907 by a foal by Zolock 2:05 $\frac{1}{4}$. All Wanda's foals have been trotters, but if this one paces, look out for a mile in two minutes some day.

With the development theorists the filly by Star Pointer 1:59 $\frac{1}{4}$, dam Belle W., the dam of Bolivar 2:00 $\frac{1}{4}$, would be a heavier favorite for the Pacific Breeders' Futurity for foals of 1907, had Belle W. been highly developed and possessed of a fast record, but among those who think C. B. Whitford's reasoning is about right, the very fact that Belle W. was not highly developed, but has already produced a very fast one, makes the filly worthy of a good bet at almost any odds. Belle Pointer, as this filly is called, is now owned by Bert Elston of Woodland, and will probably be educated by H. S. Hogoboom.

Portland held a very successful horse show last week. Over 200 horses were exhibited and society turned out in large numbers.

The demand for roadsters and track horses is fairly good, and Fred H. Chase & Co. report many inquiries already for catalogues of the combination sale, to be held at the big pavilion, 478 Valencia street, December 23d.

Fanny Pointer, the four-year-old Star Pointer filly, owned by John Minneley of Meadville, Pa., stepped a half mile in 1:09 $\frac{3}{4}$ and a quarter in 32 $\frac{1}{2}$ seconds, a 2:10 gait, at the fair grounds Friday afternoon. Fanny Pointer is a full sister of Morning Star 2:04 $\frac{1}{4}$, formerly owned by Mr. Minneley.

We should judge from the list of foals of 1907, on which third payment was made November 1st in the Pacific Breeders' Futurity that McKinney mares were not put to breeding to any great extent last year in California, as only eight of the 205 foals paid up on in this stake are out of McKinney mares. Fifty of these foals, however, were sired by sons of McKinney.

W. L. Vance of Marysville, who owns the stallion Sir John S. 2:04 $\frac{1}{2}$, says he will not race this great son of Diablo in the East next year if there are enough good purses for the 2:05 and free-for-all classes here on the coast.

Easter Bells, own sister to Sir John S. 2:04 $\frac{1}{2}$, will be put to pacing next year in all probability. She raced fairly well as a trotter in 1906, but this year did not do well and it was given out that rheumatism was the cause.

Henry Rohner of Eureka has purchased from Oakwood Park Stock Farm the three-year-old colt Oakwood Derby by Charles Derby, dam Algerdotta, dam of Thornway 2:05 $\frac{1}{2}$, Christobel 2:11 $\frac{1}{4}$, and two others in the list.

Races will be held at Riverside Driving Park on Thanksgiving Day. A purse of \$200 is offered for the free-for-all trot, one of \$200 for the free-for-all pace, and \$100 for the 2:40 class trot or pace. Three running races are also on the card. Entries close November 23d.

The young Kinney Lous are nearly all showing speed at the trotting gait. Mr. P. W. Bellingall has a yearling filly by this horse, out of a Secretary mare, that is greatly admired by those who have seen her on the track. Lou Carillo is taking care of her, and Mr. Bellingall goes up twice a week to drive her. She is just broken, but can step a 2:40 gait already.

At Point Breeze track, Philadelphia, October 30th, the bay gelding Ed Bryan 2:16 $\frac{1}{2}$, trotted five miles to wagon in 13:03, lowering the world's record 13 seconds. The first mile was in 2:26 $\frac{1}{2}$, the second in 2:28 $\frac{1}{4}$, the third in 2:33 $\frac{1}{4}$, the fourth in 2:42 and the fifth in 2:50.

A. G. Vanderbilt of New York recently purchased a pair of trotting bred high steppers at a long price. They were by Billy Parks 2:15 $\frac{1}{4}$ and Wilton 2:19 $\frac{1}{4}$.

It is reported that next year at least two of the leading horse show associations of the East will bar out horses that had previously won blue ribbons from all their classes excepting the championships, making the classes practically for "green" performers alone. In this way many new exhibitors will be gained it is thought when these latter learn they will not have to compete with champions.

There is a possibility that Highball 2:06 $\frac{1}{4}$ will become a stable companion of George G. 2:05 $\frac{1}{4}$, and Major Delmar 1:59 $\frac{1}{4}$, as the owner of these two is looking for another fast gelding to hitch double with George G., and try for the pole record.

The mare Zarina 2:13 $\frac{1}{4}$ by Dexter Prince, which Dr. J. J. Summerfield of Santa Rosa purchased at the Aptos Farm sale last winter, was in foal to Cupid 2:18, and the colt which she dropped is a fine youngster that has been named in the Breeders' Futurity.

There are a couple of pacing foals of 1907 running out on good pasture near Putah creek, the dividing line, between Yolo and Solano counties, that should have by their breeding a mortgage on part of the money in Breeders' Futurity No. 8. These are the bay colt by Star Pointer 1:59 $\frac{1}{4}$, out of Trix, the dam of Aerolite (trial) 2:05 $\frac{1}{2}$, Mona Wilkes 2:06 $\frac{1}{2}$, etc., owned by James W. Marshall of Dixon, and the bay filly by Star Pointer, out of Effie Logan, dam of Sir Albert S. 2:03 $\frac{1}{4}$, owned by Carey Montgomery of Davisville.

A horse which looks as if he is destined to prove the fastest yet bred in Australia is Dan Patch, named after the American champion. He recently paced a mile in 2:11 on a grass track with the greatest ease and will shortly go against Ribbonwood's 2:09, the fastest yet put up in Australia. Dan Patch is by Rothschild, the leading sire in New Zealand, and is a magnificent seal brown stallion, five years old, standing about sixteen hands.

A new rule has gone into effect on the New Zealand tracks by which the totalisator betting machine is closed ten minutes before the horses go to the post.

The mare Lady W. 2:16 $\frac{1}{2}$ trotting, is probably the fastest four-year-old trotter by the records that has been raised in the Northwest. She is by King Alexis 3:55 $\frac{1}{4}$, a stallion owned by Charles S. Taylor of Walla Walla. Lady W.'s dam is Cayuse Mollie.

When Budd Doble drove Dexter 2:17 $\frac{1}{4}$ to his record the gelding pulled a 72-pound sulky with high wheels. Goldsmith Maid pulled a 54-pound high-wheeler when Doble drove her in 2:14, and Nancy Hanks was hitched to a bike, weighing 42 pounds when he drove her in 2:04.

The Sacramento Union printed in its edition of November 8th a picture of Lady Search, two-year-old filly by Searchlight 2:03 $\frac{1}{4}$, dam Winnie Wilkes 2:17 $\frac{1}{2}$, that shows her to be a very handsome filly. This filly is owned by C. H. Chandler of Sacramento, and was bred by Mr. R. P. M. Greeley of Oakland. She is entered in the Breeders' Futurity.

Of course, many of the fastest performers of each year have famous mares for their dams, but there are many trotters and pacers that obtain fast records and win many races that are out of obscure mares, who were unknown to the world until their produce gained them fame. The owner of a good mare should never hesitate to breed her because she is not registered or has no record. No person should ever send a poor mare to be bred, but a good one should be used, no matter how unfashionable her blood lines. There are many famous horses whose dam is given as untraced, but when investigation is made it is always found that she possessed many excellent qualities, although her pedigree was lacking.

The Los Angeles Driving Club will hold a big matinee on Thanksgiving Day. There will be five races on the card and several of these are expected to be sensational. The scheduled events are the free-for-all trot, free-for-all pace and three other races. The free-for-all pace will bring together Will Clark's Miss Georgia, who has worked a mile in 2:04 $\frac{1}{4}$ and Zolock, who has a record of 2:05 $\frac{1}{4}$. This will be the first appearance of Zolock in a matinee race. Miss Georgia will attempt to break the Coast wagon record of 2:11 $\frac{1}{4}$ and the bike matinee record of 2:08 $\frac{1}{2}$, both being held by Welcome Mac. L. E. McLellan will also go after the coast team record of 2:18 $\frac{1}{2}$, using his Nut Buster and Red. These races alone will be worth going to see, even without the parade that is to precede the races. This parade is not intended as a "horse show," but that is just what it will be. A large number of club members will take part in this and some fine "turn-outs" will be shown.

TROTTERS FOR DENMARK.

Mr. Hugo Jorgensen, secretary of the Danish Trotting Association, and Julius Pajonek, the leading trainer in Denmark, have bought from Walter Janvier of New York, for \$10,000, the stallion Dreamer (3) 2:14 $\frac{1}{4}$, for the Danish Trotting Association. Mr. Pajonek also bought for himself from C. G. Wicker, for \$4,000, the three-year-old, 16-hand stallion Dreamer Boy, out of Potenta (3) 2:17 $\frac{1}{4}$, by Potential. With very limited training Dreamer Boy trotted the Silver Springs Stock Farm half-mile track, which is 25 feet over a mile, in 2:20, with last quarter in 34 seconds. Mr. Pajonek arrived at Ticonderoga at 4 o'clock, October 24th, in a rain storm, and on a muddy track, in the rain drove Dreamer Boy a half mile in 1:09, with last quarter in 33 $\frac{1}{2}$ seconds.

In addition to the above, they bought the following horses: Princess Red, seven years old, by Red Wilkes, out of Fanny S., by Mambribo Boy, with foal at side by Baron Dillon 2:12, and bred back to Berkshire Chimes; Sister Princess, four years old, full sister to Princess Red, with foal at side by Baron Dillon 2:12, and bred to Cochato 2:11 $\frac{1}{2}$; Stella Wilkes, four years old, by Patchen Wilton, out of Stella Belmont 2:19, with foal at side by Fair Promise 2:18, and bred back to him; Belle Bond, three years old, by The Bondsman, out of Maggie Medium, and bred to Cochato 2:11 $\frac{1}{2}$; Lenice, nine years old, by Jay Bird, out of Katia Bells, with foal at side by The Bondsman, and bred to Cochato 2:11 $\frac{1}{2}$; Alluring, six years old, by Allerton 2:09 $\frac{1}{4}$, out of Anita Bell, bred to Cochato 2:11 $\frac{1}{2}$; Sable Trinket, five years old, by Sable Wilkes 2:18, out of Charm, dam of eight, with foal at side by Dreamer 2:14 $\frac{1}{4}$, and bred to Early Reaper 2:09 $\frac{1}{4}$; Spring Charm, six years old, by Handspring 2:18 $\frac{1}{2}$, out of Charm, dam of eight, with foal at side by Royal Swell 2:48 $\frac{1}{2}$, and bred to Dreamer 2:14 $\frac{1}{4}$; Peeress, eleven years old, by Dexter Prince, out of Peko 2:11 $\frac{1}{4}$, by Electioneer, with foal at side by Baron Wilkes 2:18. For Mr. Eiermann, a member of the club, the following mares were bought, and will be taken over in the same shipment: Bella Bells 2:21 $\frac{1}{4}$, by Bow Bells 2:19 $\frac{1}{2}$, out of Fantasma, with foal at side by The Bondsman, and bred to Cochato 2:11 $\frac{1}{2}$; Hyita, trial 2:13 $\frac{1}{2}$, by Dexter Prince, out of Helena by Electioneer, bred to Moko. Mr. Pajonek also bought Kentucky Boy, a two-year-old stallion by Silent Brook, out of Chate-laine, that showed a mile in 2:22; Oro Osa, a three-year-old filly by The Tramp, out of Milliner, that has been a mile in 2:21 as a two-year-old, both for himself. The horses were shipped to Denmark on Saturday, November 2d.

SCALPING AND SPEEDY CUTTING.

Speedy cutting and scalping are two closely related forms of friction and unquestionably make more trouble for the trotter and his trainer than all other faults of gait combined. In the acts of speedy cutting and scalping both offending feet are always in the air. The offending front foot, usually the outside half of the toe, strikes the hind hoof and the horse "scalps." The same front toe hits the hind pastern above the coronet and below the ankle and he "speedy-cuts."

A trotter can scalp, but cannot speedy cut, at a slow jog. He must step along some to hit his pasterns, which accounts for the fact that evidence of this fault in a colt has always been considered a sign of some speed, hence the term "speedy-cut."

It is hardly necessary to say that pacers do not scalp or speedy-cut—that is, none but the freaky-going things of the saddle-gaited variety. Pacers do, however, touch the inside of the hind hoof, or, more often, the coronet with the diagonal front foot in the act of crossfiring, but that fault is never called scalping.

The pacer crossfires while the trotter scalps and speedy-cuts, and as the trotter's faults are the most difficult to remedy, he is the hardest to train. We see but few trotters that do not wear either scalpers or pastern boots, and it's a sure thing that practically all of these have worn such hoots at one time or another during their colthood days.

The short-backed families of trotters are handicapped with these faults of gait to a greater degree than the longer bodied ones, for obvious reasons. Likewise, the same faults handicap the open-gaited, more than they do the line trotters. Your open-gaited trotter usually scalps on a jog with his feet lined up and, in order to clear himself, straddles out behind as he increases his clip, until he clears his front feet on the outside at top speed. At the gait where he commences to straddle he will dust both boots every step, and again, at top speed he will dust one boot when you pull his head out of line, particularly on a turn. Therein often lies the cause of the difference in racing quality between two horses of equal speed and gameness, because a trotter whose gait will not permit of his being pulled from one path to another is a poor racing tool.

If we knew of a sure and certain remedy for the faults we are discussing, I am sure that half the horses that now beat 2:20 would beat 2:10. Of course, we have boots. The scalper, in point of fit, is the neatest hoot made, nor does it interfere with the movements of joints, tendons and muscles as do most of the others, but the boot itself affords absolute protection only in the cases of the lightest hitters, and it is often a handicap in other ways.

You get a fair idea of the pain caused by the act of scalping when you tap your thumb nail with a hammer. So, when a trotter uses his front foot, armed with a heavy shoe and possibly a toe weight, to pound the sensitive portion of a rear hoof near the coronet with every step he takes, we can hardly expect a light leather or felt scalper to do more than modify the trouble. Even with the best of scalping hoots the punishment takes all the trot out of the soft-hearted ones and more or less out of the dead-game ones.

I have often thought that this fault is a pretty fair test of gameness. We see some trotters curl up and wilt under the punishment, while others will struggle and try to go on.

It is remarkable, too, how a colt will pick out a certain spot on his coronet, no larger than a quarter, and hit it every step that he takes. The advantage in making a scalper to protect that spot only in place of the whole hoof is obvious. Unnecessary leather adds to the weight, and weight behind is almost always a detriment. A perfect fitting scalper, also, will not pick up a pound of dirt or mud as a poor fitting one is quite likely to. The well fitting one is also more likely to stay on during a battle.

The speedy-cut hoot, or, rather, attachment, as it is called, because it is always attached to either the scalper or shin boot, presents an entirely different problem. A home-made one is out of the question, and it is not always an easy matter to get shop-made ones to protect the right spot. The shin-hoot attachment is always to be preferred to one attached to the scalper; in fact, the latter is the meanest and most troublesome boot combination ever put on a horse, and is only used as a last resort, when the other sort fails. When attached to the scalper the speedy-cut part projects away from the pastern at a nasty angle when the foot is flexed and is consequently likely to be torn off at any minute. Many horses have to wear them, though, and very hard hitters often wear both kinds with the scalper attachment on the outside. But no matter how the hoots or attachments are made, or whether they are made of felt, leather, steel, aluminum, fiber or any other material, all trainers know that they are the first and most essential requisite in treating the fault they are designed to remedy. It is useless to try and modify the trouble by any sort of shoeing or rigging until the animal is fitted out with the necessary boots and, in fact, the hoots themselves often work the cure without any assistance from the smith. This happens when a green horse or colt hits himself through awkwardness or weakness. In such a case the animal, without the protection of boots, might lose confidence, shorten his stride, go sidewise, or hop, until his gait was ruined; while, with the boots on, he would change his action for the better with added strength and

confidence. Unquestionably most all green colts and horses do scalp through weakness and awkwardness and few would ever outgrow such faults without the aid of hoots.

The driver's touch on the bit has a great deal to do with this sort of friction. A heavy hand will aggravate the fault, and a light band, vice versa. The "drive-em-with-one-finger" trainer will find a few colts that he can train without scalpers, but the one who drives with a double wrap and a lean back will never get hold of one of that sort. This is very true also in connection with speedy-cutting. Almost every puller speedy-cuts, and I have seen many a one of that variety go clean when he dropped the pulling habit through a change of drivers.

The condition of the footing, too, is another factor that has no little bearing on the scalping habit. Soft, meaty, sandy footing always complicates the case and makes the remedy more difficult. Consequently a shoe that would correct the trouble on the smooth, firm track at Cleveland, would hardly do the same work on a sand track, such as is often found in the south.

The height of the action cuts no figure with the fault, or its treatment. There are as many hard-hitters and as many clean-gaited trotters among the low-going daisy-cutters as among the high-going tree-climbers. But a curious feature of the problem is that changes in shoes or rigging that will improve the balance at speed often aggravates scalping and speedy-cutting at the slower and intermediate gaits. In all such instances, however, the horse has one rate of speed at which he hits the hardest.

The folly of working the horse at that particular rate of speed is self-evident, and likewise, the folly of long-drawn-out jog work for any horse that hits hard at a slow gait.

This common peculiarity of hitting at a slow, or intermediate gait, and then going clean at top speed, makes it possible in all such cases to do away with the boots in a race after the warming up process. It is a big help to most horses, too.

As I have before stated, weight behind is generally a handicap and a scalper loaded up with dirt, sweat and leg-wash may mean quite a few seconds in a long race.

Next to hoots the most important thing in connection with the treatment of scalping and speedy-cutting is the side-strap or gaiting-pole. Few people in the grandstand would ever guess that the gaiting-pole is first cousin to the scalper and the speedy-cut hoot, but such is the fact.

After the scalper comes the gaiting-pole, if the horse hits himself hard enough to amount to anything. Nine times out of ten in trying to get away from the punishment the horse will put one hind foot in between and the other outside of his front ones, "go sidewise" and hop. Then even with his new boots on, that really do afford protection, you must show him that he has been rigged so that he cannot hurt himself before he will go straight in the harness again. The quickest and most effective way of doing that is with the aid of a side-strap or gaiting-pole.

It is, of course, possible to make a bad hitter go straight and forget his troubles by stopping his fast work and keeping him on a jog for eighty or ninety moons; but that is a senseless thing to do when life is short, training is expensive and horses and gaiting-poles are cheap. The gaiting-pole can help the scalping boot, and together they are always a great help in solving the shoeing problems usually involved.

Now that I have led up to the shoeing question, I want to stop and explain that the fact that I did not discuss that factor first does not mean that I underestimate its importance. My object in leaving the shoeing until now was in order to make it plain that there are many other things that have a bearing on my subject and these things might be largely responsible for the success or failure of any scheme of shoeing or balancing.

It is hardly necessary to explain that all shoes made for the unbalanced, scalping or cross-firing trotter must be designed to quicken and round up his action in front, or shorten his stride behind, or both. This can be accomplished by four or five simple patterns of shoes, depending on the peculiarities of the individual. The "freak" shoes for "freak-gaited" trotters, are hardly worth considering.

The first thing that a wise trainer looks to in shoeing a hard hitter is the outside edge of the toe of the shoe. That part of the shoe must be rounded off smooth, otherwise the shoe will cut gashes in, or pieces out of, the boots.

The second point is the shortening of the hind toe. A shorter hind toe is often all that is necessary to do the work.

As to shoes that will quicken and round up the front action, the most effective one for very green horses and newly broken colts is the common, rolling-motion shoe. An excellent shoe for the babies can be made of quarter-round iron. For a first shoe to be worn a short time there is nothing to beat it. A fast trotter can seldom wear a rolling-motion shoe after his gait has become firmly established, but there is no doubt of the value of that shoe as a remedy for youngsters and green ones.

Later on in the career of the horse it is possible to get the desired effect with the square-toed shoe. The latter is worn by hundreds of horses that would otherwise be bad hitters.

One of the best front shoes for speedy-cutting is the four-calked shoe with the calks running lengthwise. I think it was invented, or owes its popularity to, either John Hussey or Dr. J. C. McCoy. At any

rate, both of these very successful horsemen use this shoe on all sorts of horses.

For extremely hard hitters there is nothing to compare with the double bar Memphis shoe, or the modified form with the bars across the web only.

In any case, where the shoe falls short of a complete remedy, it is in order to try light toe-weights, bell quarter boots or rolls.

As to shoes for the hind feet, we have several that will shorten the action. The most popular one nas an extension outside heel, armed with a blunt calk. When carried to extreme this shoe has crippled hundreds of horses, but, made with discretion, particularly without calks, it does no harm and is very effective.

For speedy-cutting, where the horse twists his hind foot as it leaves the ground, some trainers use a shoe rigged with a low rim-calk on the outside toe, as on a cross-firing shoe. In race cases speedy-cutting has also been remedied by lowering the hind foot on one side—usually the outside, if he is a line trotter; or the inside, if he is open-gaited.

The worst kind of a speedy-cutter to help is the one that "paddles" out with one front foot. This sort of a paddler gets in his work when he begins to tire, and I know of several horses of two-minute speed that were failures as race horses merely on this account.

Other factors that should not be overlooked in training any faulty-gaited horses, are the whip, the bit and the checkrein. Failure to consider these factors might nullify the benefits of any balancing prescription for the two faults discussed. But the reader of this article will realize that the subject, if exhaustively treated, could not be condensed within the limits of one article.—Murray Howe, in Chicago Horse Review.

DEVELOPMENT OF COLTS' TEETH.

The horse has two sets of teeth, the milk teeth are temporary, and are the ones which the colt sheds, while those that come in or remain without being shed, are called the permanent teeth. The cutting of the teeth in the foal varies some, but at or within nine days after birth the foal has four front teeth, two in the center above and two below, and in the back part of the mouth he is found to have twelve molars, three on each side of jaw; at from seven to nine weeks he gets four more incisors in each jaw; at nine months old he gets the last of his milk or temporary teeth, these being the four corner teeth, two in the upper and two in the lower jaw.

Now he has his full set of milk or temporary teeth, consisting of twelve molars or grinders and twelve incisors or front teeth, six above and six below, making twenty-four teeth in all. As the colt advances in age he must shed all these. After this age the colt commences getting his permanent teeth. At one year old he gets four permanent molars, two in each jaw, one on each side behind the three temporary ones. At two years old he gets four more permanent molars, one on each side of each jaw. When the age of two years and nine months has been reached he sheds the four front nippers or center teeth, two above and two below, which are replaced by two permanent incisors in each jaw and at the age of three years these four permanent incisors are up and in wear. At this age the first eight temporary molars are shed, two on each side of each jaw, and are replaced by eight permanent molars, which are also up, and at three years and nine months old he sheds four more front teeth next to the ones shed at three years old, two above and two below. These are replaced by four more permanent incisors, or front teeth, which are known as the lateral incisors, which are up in wear at four years old. Also at this age he sheds the four remaining temporary molars which are replaced by four more permanent molars at the back of the mouth. Thus at the age of four years the colt has a full set of permanent molars, consisting of six on each side of each jaw, making twenty-four in all. This is the hardest year on the colt.

At four years and nine months old he sheds the four remaining temporary incisors or front teeth, which are replaced by four permanent incisors. These are known as the corner teeth, and should be up and in wear at five years old. It is well to become familiar with the time the colt sheds his different teeth, for sometimes the caps or shells of the teeth do not fall off when they should. These should be watched for if they do not fall off when they should, they greatly interfere with the animal's feeding, and should have the attention of some good veterinary dentist. At five years of age the canine or bridle teeth, four in number, make their appearance, so at the age of five years the colt has all his teeth, or what is known as a full mouth of teeth, numbering forty in all.—Frank L. Steele, D. V. S.

The Fresno Driving Club has completed arrangements for a race meet to be given at the race track on Thanksgiving Day. The events will be bicycle and motor racing and harness and running races. The program was finally completed only yesterday. It is expected that some of the best horses in that part of the State will be entered, and it is even probable that D. L. Bachant's Athasham, which has been doing the Grand Circuit this summer, will trot an exhibition mile. Athasham's record is 2:09¼.

CONDUCTED BY J. X. DeWITT

SPREAD OF SHOT CHARGES.

An interesting review of experiments for examining the gradual spread of shot pellets as they pass along the range has recently been published in England, and a few remarks made thereon by Arms and Explosives, may serve to throw light on a subject of some considerable practical importance in gun experiments. Briefly stated the idea consists in measuring at various distances the size of a circle which contains the same number of pellets as are contained in a 30-inch circle at 40 yards. The firing of a large number of shots under such conditions, showed, for instance, that the pellets of a full choke pattern occupy the area enclosed by a circle of five inches diameter at 10 yards. A seven-inch circle on the other hand is required in the case of a cylinder gun to hold the pellets which are contained in the 30-inch circle at 40 yards. The whole series of values can be set out in table fashion as follows:

Yards	Inches					
	10	15	20	25	30	35
Cylinder gun	7.0	9.8	13.0	16.3	20.3	25.0
Half choke	6.0	8.8	12.0	15.5	19.6	24.5
Full choke	5.0	7.8	11.0	14.7	19.0	24.0

These figures at once make it clear that the pellets composing a charge of shot do not travel in anything approaching a straight line, but that the rate at which they move away from their common center is in greater ratio than is directly proportional to the forward movement. It does not follow that the individual pellets follow a curved path. It is possible, on the other hand, that they do. Slight surface irregularities and a slight spin would easily impart a bias to the pellets, giving them a mode of travel which may be likened to the eccentric behavior one notices in the game of bowling. Another explanation of a dispersion of the pellets greater than would be represented by a straight-line course is the possibility that the gas blast from the muzzle, and the possible interference of the wadding may give the various pellets constituting the charge a variety of different lines of flight, the angle of divergence of each pellet varying in accordance with the disturbing forces which have acted upon it. Whatever may be the precise explanation the fact remains that the above measurements show that the central and the consistently flying cluster of pellets opens out or spreads trumpet fashion, so that there is a greater relative spread at the longer distances than measurements at short ranges would suggest. However that may be, the fact remains that the shotgun experimentalist is now possessed of a curve showing the average dispersion of each of the three main borings of gun. The full-choke, which is the closest shooting at the long distances, is not only closer shooting at the short distances, but the degree of extra concentration of the pellets is far more pronounced than with cylinder guns.

So far as the experiments already conducted have been able to show a series of patterns measured say on the basis of an 11-inch circle at 20 yards for a full choke gun give within experimental limits the same average result as would be expected shooting the same gun under the normal 40 yards conditions. Moreover, the variations from round to round in the number of the pellets counted would not be markedly different from the variations experienced under the ordinary conditions of a pattern test. More than this, those who have enjoyed considerable experience in judging the behavior of the guns, as displayed by the patterns produced at 40 yards, can find no difference in the general style and character of the arrangement of the pellets when comparing the perforations produced in a cardboard sheet, shooting at short ranges with the visual effect produced by an actual pattern taken under ordinary conditions. Cartridges and guns which give patchy distribution under the full distance test similarly misbehave themselves at the reduced ranges. Patterns themselves vary so much from day to day, from powder to powder and from shot to shot that no one would be justified in making capital out of minor divergencies between a short distance test and one conducted at longer ranges. The general tendency is well expressed in the table of values already given, and gunmakers will certainly find the 20 yards test for choke guns and the 15 yards test for cylinders a valuable addition to their methods of test. The advantage of the short distance pattern is that it can be taken on cardboard sheets in a form which readily lends itself to permanent storage. To supplement the records supplied to a shooter concerning the 40 yards behavior of his gun on a whitewashed plate with a series of cards showing the absolute result which has been obtained at the half-way distance should certainly secure added appreciation for a well made gun. As a means of illustrating in the show-room the relative effect produced by variations of charge the two-foot square sheet has many striking merits. A rabbit cartridge, with its 172 pellets of No. 4 shot, would make a splendid showing against a larger charge of smaller shot; the one being obviously suited to the purpose in view, the other quite unsuitable.

The use of the cardboard sheet does not constitute

a discovery, seldom as it is used. On the other hand the power to scribe a reduction of the 30 inch circle true for the lesser distance—at which the shooting is done certainly represents a new idea. As already explained, the size of the circle varies with the boring of the gun used. To be able to say here is the actual 15 or 20 yards pattern; here is a circle which is proportional with the rest of the pattern to 30 inches at 40 yards is to place the shooter in immediate possession of facts which cannot be conveyed by mere verbal description. Great as is the information which can be derived from the personal examination of gun patterns, taken not only at 40 yards but at other distances, the record is unfortunately of a kind which can never be adequately expressed on paper. Such impression as is conveyed to the mind by the examination of targets is either forgotten or remains stored up in the minds as a memory impression or vague instinct. At shorter distances where the enlarged splashes on the white-washed plate are so close together as to overlap and to form solid bunches the usual visual effect disappears. With cardboard, or better still, with cheap strawboard sheets faced with white paper, the shot pellets make clean perforations of their own size. Hence the card target of reasonable dimensions commences to be most useful when the whitewashed plate shows little more than an unmeaning jumble of marks. An incidental use of the dispersion table above given is that the values can be subdivided for every yard of range, so showing the serious influence which is produced when pattern tests are conducted at other distances than those laid down. For instance, 38 yards seems near enough to 40 for practical use, but with a full-choke gun the circle should have a diameter reduced to 27½ inches, and everyone knows that such a difference must exercise an important influence on the records obtained.

FIREARMS CANNOT BE IMPORTED OVER THE MEXICAN BORDER.

The importation of firearms and ammunition into the State of Chihuahua has been stopped by the Mexican Government the same as was done in Sonora long ago. This action was taken very quietly through the Custom-house at Juarez over two weeks ago and no reason was given therefor, but it is very plain that the reason is nothing more nor less than the fact or suspicion that firearms and ammunition have been purchased of dealers here for the warring Yaquis in Sonora.

Dealers in firearms in Chihuahua have received notice that no more importations will be permitted. This notice came from the Custom-house at Juarez. Travelers and prospectors coming in from the States through Juarez have also been prohibited from bringing in their arms and ammunition. It is understood, however, that in one case particularly where a man well known to the Customs authorities wanted to bring in a shotgun just for a few days' hunt, permission was granted.

There seems to be some reason for believing that the Yaquis may have been sending emissaries to Chihuahua to buy arms and ammunition, for the local dealers say their sales have been unusually large during the past few months.

Two Riverside citizens had a rather hair-raising and unique adventure last week. E. W. Tucker and David Ormand, while returning from a drive from West Riverside, encountered a mountain lion, while they were coming into the city limits on Huntington Drive, near Seventh street. They noticed a large cat-like animal approaching them, but they thought it was a huge dog, and as they approached the animal they were horror-stricken to find it was a lion.

The horses, too, noticed the strange animal and, frightened at the sight, began to balk. By this time the men recovered their presence of mind and got the horses under control to prevent a runaway.

The lion in the meantime kept on walking toward the carriage, apparently unmindful of its presence. Suddenly it let out a wild cry and, turning around, made for the mountains in great leaps. The lion's cry was heard for several blocks, and now the Riverside residents are terror-stricken for fear this unwelcome visitor will prowl around their homes until shot.

Whether the same lion was encountered near Redlands or another is not known, but nevertheless two Redlands hunters, who were in the Moreno Valley recently, saw a mountain lion eating at the carcass of a horse. They passed within fifty feet of the beast, which watched them closely, but did not seem frightened and did not leave the carcass. Ranchers in that section have been missing pigs, calves and sheep, the loss being attributed to coyotes, but it is probable that the lion has been doing the work.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

DEATH ATTENDS SMOKELESS POWDER MAKING.

It is doubtful if the sportsmen or any other man who is more or less familiar with smokeless powder and its uses ever fully realizes the danger that constantly surround its manufacture. Death is never far away from the men who toil in and about the mills where this and other explosives are made. Working in a smokeless powder mill is like sitting on the lid of Vesuvius, only more dangerous. The volcano grumbles and quakes, giving ample warning before belching forth its torrents of fire and lava. But the powder mill is like a gigantic bomb filled with human creatures, loaded with tons upon tons of nitro-glycerine and gun-cotton, primed and ready to explode from a score of known and unknown causes. Sometimes when a danger house blows up, tearing men within to atoms, rending the building into matchsticks and ploughing a gaping hole thirty feet across into rocks and gravel, it is impossible even to tell what caused the accident. Other times it is traced to the carelessness or disobedience of an employe. Occasionally catastrophe is due to an unavoidable accident like the mere stubbing of a toe. Whatever the cause, when the crash comes it is the most inconceivably frightful ordeal to which the human nervous system can be subjected. How human creatures can be induced to take the risks of working in such an earthly inferno, ready to burst on the instant in all its horror, may seem past understanding; still thousands upon thousands of men work in these mills scattered throughout the United States. The gun-cotton drying house, where the washed nitrated cotton must be dried absolutely, says an exchange, shares with the nitro-glycerine building the reputation of being the most hazardous on the face of the earth.

The gun-cotton drying house, containing as much as five tons of the frightful explosive, a half-teaspoonful of which would be enough to blow you into smithereens, stands isolated on pillars above a marsh 400 yards from the nearest building. Nothing, except the portentous word "danger" painted in big black letters over the entrance distinguishes this house from the other structures, yet as you gaze in its very isolation you approach with deep respect. Only one person is permitted in this house, an Italian; a medium-sized, chunky man he is, dark and swarthy, with black eyes and a blacker mustache. He is a man of years of experience, so trained to caution that it has become a habit exercised like second nature. The man in charge will not permit you inside this house, no matter how favored a visitor you may be. You may peep into the drying room, but that is all. He knows, of course, that if he violates any of certain rules he and his house are going to leave together. He wears rubber-soled tennis shoes wherein he walks silent and ghost-like. As he opens the door of one of the drying rooms, heated to a temperature of 110 degrees, a breath of hot air from within strikes the visitor. You see what appears to be chunks and slabs of a dirty white blotting paper heaped in metal pans, two by three feet in size, and set in a series of spacious racks like so many big pigeonholes. Even now there is nothing in the appearance of the stuff to prevent you from throwing it out of the way and you wonder if this seeming rubbish can be the dreaded explosive, a mere fifty pounds of which could send an 18,000-ton Dreadnought to the bottom of the sea. Yet the slightest sudden jar against even a pinch of this insignificant appearing substance and there would follow a flash and a crash that would shake the earth for miles around, and nothing but a pall of smoke drifting skyward would remain of house and man. The slightest grain of sand under foot to cause friction against dust invisible to the naked eye, or a mere spark, knocked perhaps from the head of a carpet tack, and the house and man would be annihilated. A spark of static electricity of the sort by which you can light a gas jet, a spark leaping from the knuckle of a finger after sliding your feet across the carpet, and you would have vanished tracelessly. Owing to this deadly sensitiveness, every precaution for safety is taken by the man in this building. The floors are covered with rubber sheets, fastened by brass-headed tacks to prevent danger of sparks. Dustpans and utensils are of brass or copper. When the panfuls of cotton are transported in or out of the place the floors are covered with sheets of canvas to be removed and shaken clear of possible dust outside the building. Twice a day the floors are scrupulously brushed. In short, every conceivable precaution is taken to prevent catastrophe.

Robert O. Stevenson, a native Oregonian, is Governor Chamberlain's latest appointee, having been appointed to fill the office of State Game and Forestry Warden, made vacant by the resignation of John W. Baker of Cottage City. Mr. Stevenson was born in Yamhill county fifty-five years ago, and is the son of the late Mrs. Ruth T. Scott. He is the father of John H. Stevenson, a well known Portland newspaper man. For many years Mr. Stevenson has been living on his fruit farm, near Forest Grove, where he will continue to hold his residence and to direct the work of his duties from there. The office carries a salary of \$100 a month, with traveling expenses.

The new game warden has announced his policy to be that of a strict enforcement of the laws,

WASHINGTON TOURNAMENT.

Thirty-two entries were on the firing line on the opening day, October 24th, of the thirteenth annual tournament of the Washington State Sportsmen's Association on the Squilicum grounds near Bellingham, Wash. The averages for the first day were rather low, with the exception of those made by the experts. The heavy fog which enveloped the traps in the morning probably had something to do with the shooting, as the scores improved later in the day when the fog lifted. For some time it was difficult for the shooters to see the targets at long range, barring this feature the weather during the shoot was otherwise pleasant.

George Miller, of Bellingham, demonstrated his marksmanship at the shoot in the morning. His average in a number of the events was the highest. Dell Cooper failed to come up to his usual mark. Mrs. E. E. Young, the only woman who took part in the tournament, made fairly good scores, but none that would rank among the high averages.

The shooting the first day was all at 16 yards, and Frank Riehl, who is now looking after U. M. C. Remington interests in the north coast country, got away to the good early in the game and held the lead all day. Harry Ellis, the popular young expert from Portland, recently affiliated with the same interests, was learning to handle a new gun, and therefore did not shoot up to his average, but was second expert. Among the amateurs Ed. Ellis, of Seattle, led the field, though he had several pretty close competitors, notably Barclay and Dell Cooper, of Bellingham, R. F. Steinke of Spokane, and E. J. Chingren of Spokane.

The State team championship event was last on the program. This is shot in teams of three, twenty targets per man. The event was scheduled over the "hard" set of traps and scores were unusually low. The first Seattle team, composed of E. E. Ellis, Ed. Garratt and H. Juncker, won with score of 48 out of a possible 60. W. A. Robertson, representing the Dupont Powder Company, and C. M. Logan, representing the Selby Company, were the other professionals in attendance. Scores:

Events	1	2	3	4	5	6	7	8	9	10
Targets	15	15	20	20	20	20	25	25	25	25
Denham	12	12	15	17	14	14	19	18	14	21-156
Van Eaton	11	12	17	16	15	17	19	13	23	17-160

Young	13	11	13	12	13	12	15	21	18	18-128
Mrs. Young	12	9	13	13	13	12	12	16	...	100

The second day the weather was fair, and shooters made better scores, despite handicaps in a number of events. Frank Riehl, shooting from 19 yards in special events, finished high professional and general average. Harry Ellis took second general professional; Bill Hillis, of Peters fame, came up from California for the last day and shot a good race, taking second expert for the day's program. E. J. Chingren shot in fine form and won the day's average on 202, one target over Riehl, and finished out high amateur for the meet.

The day's special events were the L. C. Smith cup won by R. T. Steinke of Spokane. He broke 23 with Chingren and Geo. Miller and won out on the tie. The Spokesman-Review cup went to Harry Denham of Tacoma on the only clean score.

The individual State championship was won by H. Juncker of Seattle. He and Denham broke straight in the original race, each scored 22 in first tie and on second tie score stood 23-22.

The second day's individual scores were: Young 190, Mrs. Young 120, Guist 146, Pauley 158, Cunningham 166, Barclay 186, Chingren 202, E. E. Ellis 180, Geo. Miller 191, Riehl 201, Denham 192, Steinke 193, Rice 159, Van Eaton 157, Robertson 190, Junker 197, Garratt 191, Williams 139, Nelson 171, Lipskey 167, H. Ellis 191, Hillis 198, Patterson 179.

West Seattle was selected as the place for the next meeting, and the following officers of the association were elected: President, A. Purdy, Seattle; vice-president, Dr. P. Lipsky, Seattle; Secretary-treasurer, A. W. Leipsky, Seattle; directors, E. J. Chingren, Spokane; Dell Cooper, Bellingham; Stub Williams, South Seattle; T. D. Barclay, Prescott; Charles Longfellow, South Seattle; R. E. Allen, Walla Walla.

A recent shoot of the Sonora Gun Club shows the following scores: Twenty-five targets—Otis 10, Carkeek 20, Carne 15, Hood 7, Ball 15, Belli 15, Booker 11, Scott 7, Richards 16. Second score—Carkeek 20, Richards 8, Ball 18, Belli 14, Hood 8, Carne 18, Booker 15, Otis 15, Scott 7, Ellis 17.

CLEANING GUN AND RIFLE BARRELS.

An all English patent has recently been granted, covering the treatment of rifle barrels for the removal of metallic fouling.

The metallic fouling is removed from gun or rifle barrels by treating them with a solvent, consisting of a solution of ammonium hydrate, to which has been added an oxidizing agent—preferably ammonium persulphate. This latter substance is preferred on account of its great solubility. A stronger solution of the persulphate may be used than would be possible were potassium persulphate or other persulphate employed. Other ingredients might be added to the solution if it were necessary. The ammonium persulphate, to which is added a little ammonium carbonate, is dissolved in ammonium hydrate having a specific gravity of about 0.935. About a 5 per cent solution of ammonium persulphate is obtained.

The following example is quoted. To one volume of ammonia of specific gravity 0.880 is added an equal volume of water. In 100 cubic centimeters of this diluted ammonia is dissolved five grams of ammonium persulphate, and about one gram of ammonium carbonate. This solution will completely dissolve copper or copper alloy when applied to a fouled surface. The solution, however, will not keep for any length of time, and the ammonium persulphate and ammonium carbonate are therefore made up into tablets. Five, ten or twenty per cent of ammonium carbonate is ground up intimately with ammonium persulphate, and the mixture is moulded so as to produce tablets, each containing any desired number of grams of ammonium persulphate. A five-gram tablet is, when the solvent is required for use, added to 100 cubic centimeters of ammonia, diluted so that its specific gravity is about 0.935.

The solution before use is colorless, but when the fouling is dissolved the latter imparts a blue color to the solution. This coloring of the solution forms a guide as to absence or presence of fouling in the barrel. After each treatment of the barrel with the solvent the barrel is washed out with water and is then dried and lubricated as usual. The acid decomposition products resulting from the explosion of the charge and the cap are also, it is claimed, rendered inert by the solvent. Rusting and corrosion of the barrel are thus prevented.

MUMMIFIED SPINNING BAITS.

American tackle manufacturers might do well, possibly, to follow out and elaborate the novel plan of a French angler in his effort to secure a dry, tough, natural bait. If these experiments are attempted and should result in the manufacture of unbottled baits, the American fisherman would owe a debt of gratitude to this Frenchman. The method which he followed is described below and will certainly be found very ingenious.

He first procured some small, fresh dace, which he placed in a large bottle of salted water, where they remained for several days being removed several times and washed. Finally they were taken out of the bottle, an injection of chloride of zinc made through their vents, and they were left on a board to dry. Twenty-four hours later he had a set of beautifully "mummified" baits, bright and clear as silver and perfectly odorless. A coat of varnish was then applied and when they had dried they were wrapped in bits of silver paper and left alone for six weeks, before any attempt was made at their use. When unpacked they were discovered to be in excellent condition and, upon a thorough trial, were found to act well and prove an attractive bait. The only fault to be found was that the varnish had slightly dulled their former silvery appearance. The French angler suggests that if the matter were to be taken up by some enterprising and intelligent tackle maker who could correct that defect, the latter would soon be able to offer the trade and consumer a very low-priced "mummified" bait, which would leave the ordinary preserved or artificial baits far behind.

Almost any American tackle maker can answer the "enterprising and intelligent" end of the French angler's requirements, and there is no reason why this experiment should not be tried, as there would be little or no expense involved. Such a bait should prove popular for black bass fishing.

Game Warden Welch of Santa Cruz county knows all the rivers and streams of his district and many others intimately and possesses as thorough a practical, as Prof. David Starr Jordan does a theoretical, knowledge of fish and their habits. He holds an interesting opinion, which he supports by clear arguments, that the steelhead trout under several forms is the only fish of the trout variety that is found in the streams of California. His knowledge gained along the streams, combined with his experience at the Brookdale Fish Hatchery, have convinced Mr. Welch that this fish is wonderfully sensitive to its environment and takes on the coloring of the bottom of the stream it frequents and otherwise adjusts itself to local conditions. He cites the instance of the trout in Scott creek, which are differently marked at the head of the creek and lower down, and refers to the marked difference that appears between the trout of the same species that reach the sea and the trout that remain all the year in fresh water. This difference, the game warden declares, amounts to the creation of a new variety.

DUCK SHOOTING IN IMPERIAL VALLEY.

Those who are planning a duck hunting trip to the Imperial country cannot go too soon, states E. L. Hedderly, a prominent Los Angeles sportsman, last week, even if the reports brought by returning hunters are discounted by half.

Many who visited the new country early in the season before the storm were much disappointed, having made their long trip for nothing, ducks at that time being very scarce indeed. Since the rains they have invaded the overflows in such vast numbers that three ordinary shots a few days ago brought into Imperial fifteen sacks of assorted varieties, mallards being included in considerable numbers. Teal, spoonbills, sprigs, widgeon and gadwell are plentiful.

This particular hag was made a few miles south of Calexico and across the line, where no game law governs, although it becomes operative when one tries to bring his birds back, if a watchful game warden happens around. Ducks are so plentiful at Imperial that some of the ranchers at certain seasons are glad to house and entertain the hunters if they only will keep the birds off their grain fields.

The duck shooting at Imperial is not of a type to make much of a hit with the experienced duck hunter, as it is largely a night-shooting proposition, firing into big flocks as they pass overhead, and listening for the "thump" of falling birds as almost the only guide to knowing whether the shot was a hit or a miss. Those who shoot for sport like to know what they are shooting at, and take pleasure in seeing the game come down, but the Imperial method has one advantage in that it gets the ducks, although the State law taboos night shooting.

Owing to the frequency with which the water changes in the overflows about Imperial, it is impossible to forecast where the ducks will be working. The system of irrigation practiced in Imperial is to turn a young river into a forty or eighty-acre field, properly diked, and fill it a foot deep with water, which can be done over night, when it is remembered that a thousand miners' inches often are let loose for the purpose. This water is then left to soak into the ground and do its work. To-day one rancher has the ducks on his place, to-morrow they may be twenty miles away, visiting somebody else. For this reason any who contemplate a visit to Imperial had better communicate with some one there who is reliable and can give them the latest information, else the trip is likely to be a succession of wild-duck chases and always about one day behind the ducks.

Comparatively few hunt in the day time, the usual procedure being to lay alongside some dyke on a moonlight night and rip into the packed bands as they whizz overhead. It is more like shaking dice than shooting ducks, but those who never have had better profess to enjoy it greatly.

Once in a while on a nasty day a good shoot can be had on some of the overflows by staking out dead birds for decoys, and throwing up a rude blind for the time being. A few good shots about El Centro and Imperial hunt in this manner, and by "throwing in" with one of these, a hunter may get the shoot of his life, if the weather conditions happen to be propitious.

South of Imperial, over the Mexican line, is an endless and inexhaustible supply of quail, which assures the hunter an opportunity to make a good mixed bag, and plenty of upland game, if the ducks are not working to suit his convenience.

One of the worst things about the Imperial trip is the inconvenience of the train-time, which necessitates rising early in the morning before daylight, but those who shoot at night generally hunt the last night, so lose but little time.

Prior to the rains, walking about and "jumping" ducks was the most popular method of securing them, but since the showers this is too much of a job for any but a Hercules in gum boots. Much of the soil is a rich, red earth and sticks when wet until one has to carry nearly an acre of it about on each boot, which soon ceases to bear a sporting look, and becomes killingly hard work.

The hospitality of the ranchers in the Imperial Valley is commented on favorably by returning hunters, who say they never were better treated and that nothing was too good for them. "The farmers appreciate a sportsman in that country, for he means money in their pocket by keeping the ducks from eating up their seed grain," says one.

In very few places can a boat be used to any purpose, although there are some spots where it might help. Several parties have taken folding boats from Los Angeles, only to leave them at the depot untouched during their entire stay.

DUCK HUNTING NOTES.

Duck hunters who went to the marshes and ponds in the vicinity of Rio Vista recently in search of game report a scarcity of ducks. Hunting as yet is below the average for this time of the year.

Though many complain of the scarcity of ducks in the marshes, they know that sooner or later there will be fine sport. Everything depends on the climate in the north, for with a blasting storm sweeping over Oregon, Washington and the lower part of Canada, ducks will migrate to warmer regions, and then all will have a chance to waste ammunition. A glance at the weather reports and temperatures of the North does not show that there will be the sport expected for some time. The temperature around Baker City and other sections around where

ducks abound, had not dropped below 40 degrees and the heaviest wind recorded was only sixteen miles an hour. With these conditions prevailing up North the ducks will not come South, for temperature of 40 degrees or even a few degrees below that is to their liking. Therefore, it is believed by experienced hunters that it will be well into November before Northern ducks will arrive in any large number.

Wild geese are beginning to become quite numerous, however, and are in the best condition, and will be until the grain begins to sprout and they feed on the green grass. Some good bags have been made in that section on geese.

Outside of the limit reached on opening day no one has succeeded in killing the limit of ducks, and as we have before stated, the bags have been rather light.

A party composed of Capt. W. E. Elliott, H. B. Holmes, Judge F. J. Kalber and others visited preserves north of town last week and report a showing of thirteen ducks. The trip was made in Capt. Elliott's launch, and from reports was an eventful one. It is stated that the launch ran aground in one of the sloughs. The party was preparing a meal and the "jolt" upset the coffee pot, spilling the "coffee" over the deck. Matters were soon righted and the ponds visited. Elliott claimed seven ducks for his showing and Kalber five, leaving one for Holmes, who, it is claimed, killed the unlucky number.

A recent report from Yreka states: The hunting season for ducks and quail is just opening in Siskiyou county. Ducks are reported quite plentiful at the Yreka Gun Club's preserve at the Big Springs. Several members of the club were out last Saturday and Sunday, and they came home with the limit. Both mountain and valley quail are plentiful in the Bogus country, as well as in other parts of the county. From a party that has just returned from the Butte Creek country it is learned that the lakes out in that section are alive with ducks and geese. These game birds generally remain at the lakes there until the water freezes, when they migrate to the rivers and warmer springs. As soon as that section has freezing weather for a few days Shasta River and the Big Springs will have an abundance of game.

Reports from the many choice reserves in Sacramento and Yolo counties are to the effect that canvasback ducks are beginning to favor the swamps and marshes with their presence. Quite a few of the Capitol City hunters bagged a "can" or two Sunday, and hopes of continued improvement in shooting are commencing to take the place of the kicking that has been indulged in since the season started because of the scarcity of water fowls.

George Raggio and John and Joe Corotto, two San Jose sportsmen, returned Monday from a short hunting trip to the Panoche district in San Benito county. They report that quail are thicker than sparrows in that district, but the ranch owners are very strict in prohibiting trespassers on their lands for fear that a wholesale slaughter might be made. The three hunters returned with full bag limits.

In speaking about the trip, Mr. Raggio said this morning: "The large number of quail to be found in the district we visited is simply wonderful. They are as numerous there as sparrows are here. The country is not thickly wooded and the birds are so plentiful that they can be killed by the hundreds if required. They are in a sense considered a pest by the farmers, but these people are dead against allowing their preserves to be molested for fear of a wholesale slaughter of the quail.

"One rancher, a friend of mine, told me that the people in the Panoche district would have little or no objection to hunters visiting the locality and hunting quail in a reasonable manner. They do not believe in shooters being hoghish. Experiences in the past have taught them to be very careful. My friends and myself had no trouble in procuring the bag limits. We enjoyed ourselves throughout and had a good outing."

A number of the members of the Santa Cruz Rod and Gun Club were at their quail preserve, up the coast in Santa Cruz county, Sunday. Lew Gates bagged the limit, 25; W. J. Keating 16, while R. H. Pringle, U. Thompson and Clyde Stone all got good bags.

The record bass for local waters was landed from San Antonio Slough on Thursday, November 7th—it scaled 36 pounds.

Other anglers have also made good catches there in the past two weeks. Al Cuming landed a 21-pounder and a number of smaller fish. A large number of anglers have been on the slough daily since the fish are now in evidence again.

The suppression of the illegal net fishermen is, without doubt, the reason for the present revival of the sport at their favorite resort.

Drink Jackson's Napa Soda.

THE SPANIEL AS A RETRIEVER.

The utility of the Field Spaniel for Coast sportsmen has recently been aptly demonstrated by the work of Mr. A. Balfour's two good ones, Inchkeith Billie and Chesterton Bess. This brace has filled the bill acceptably on the Empire Gun Club grounds. The Spaniel can be used to great advantage by our sportsmen, there is no doubt. For duck and snipe shooting he can stand the cold and wet.

Oregon sportsmen are now cognizant of the Spaniel's worth on Mongolian pheasants. Not only is the Field Spaniel adapted for work on these birds in the Northern cover, but also is the Cocker Spaniel, properly trained, a grand dog on pheasants. What the Spaniel is adapted to and capable of is well known in the East and England, but for some reason the breed has not yet been given its proper standing in work to the gun by Coast sportsmen. A writer in the St. Louis Sportsman gives the following interesting data on the Spaniel in the field:

One scarcely sees at the present day a sportsman keeping a Spaniel for the sole purpose of a retriever, to be used with his other field dogs to save them from the task of hunting and retrieving dead birds. This is certainly the case in the West, but possibly in the New England States or the grouse sections of the Northern tier of States the Spaniel may occasionally be found in heel while the Pointer or Setter ranges in search of birds. Many are of the opinion that the Spaniel does not possess the pointing instinct, or, if so, he can never be held steady on his birds. The writer's experience on Spaniels has been limited to only two strains of the Spaniel family, the Irish Water Spaniel and the more diminutive Cocker Spaniel, and especially with a cross of the

panion was only a task of separating two combatants every fifteen minutes.

The next Spaniel I saw point was of the large type, a magnificent big fellow, who crashed through heavy cover with the strength of the lion. He pointed nicely, but nothing could ever induce him to give up the habit of hunting by foot scent. I have never seen the other types of Spaniels afield, either the Sussex or Clumber dogs, that are held in high esteem by foreign sportsmen, and certainly would feel it a treat to witness their possibilities on quail. But I am rather of the opinion that in spite of the great favor they are held in abroad they will never become serious competitors of the Pointer or Setter for field shooting. If they had any disposition to offer high class in this line the best strains years ago would have been selected.

Spaniels have great strength for their size, are also unusually healthy dogs, but their coat is against them, too heavy in warm field shooting, and no sporting dog suffers as much from a visit to a burr patch as they. Their love of water and their ability to stand constant exposure to the wettest conditions makes them the peer of all water retrievers. Few Setters ever develop the ability to scent on water as a Spaniel, though often Pointers and Setters will brave the coldest streams to retrieve a duck. The Pope strain of Pointers are especially fond of water, something unusual to the tribe but no matter how good these latter dogs may be in this art it must be looked upon as a cruel sport to expose them to the conditions that a Spaniel is by nature fitted for. Truly the Pointer and Setter grit will often permit them to go to extremes on this point, but it is often at a risk of the poor dog's health. The Spaniel is a willing, merry companion; carries a constant chic air of self-importance, and we hope they will always find a place in the well equipped kennels.

TRADE NOTES.

U. M. C. Notes.

Mr. George Maxwell showed his old friends at Hastings, Neb., how he earned his salary by going out in his home town and breaking 142 ex 150 with his Remington gun and U. M. C. shells.

Mr. Ed. S. Graham broke 96 per cent at Chicago, October 19, shooting U. M. C. shells, and on the 20th 91 per cent.

Mr. J. M. Hughes broke 380 out of 400 at Bloomington, Ill., on the 3d and 4th with his Remington gun and U. M. C. shells. This was the high score of the shoot, and Mr. F. E. Rogers was second professional with 376, also shooting U. M. C. steel-lined shells.

Mr. R. J. Jackson broke 450 out of 480 at Waco, Texas, October 24, shooting U. M. C. shells and a Remington autoloading gun.

Mr. George Maxwell tore off 100 straight at Fairplay, Mo., and Mr. Denny Holland broke 97 out of 100 to keep him company. Both were shooting U. M. C. steel-lined shells.

Mr. J. M. Speary tied with the high professional at Sistersville, W. Va., breaking 364 out of 405 and winning for him the high amateur score. Mr. H. H. Stevens broke 359 out of 405. Both shot U. M. C. shells.

At Herrington, Kan., Oct. 28, Pat Adams tied for high gun, breaking 208 out of 225 under bad weather conditions. He used U. M. C. shells and a Remington gun.

Mr. E. L. Wilson broke 158 out of 180 at Princeton, N. J., October 19, using U. M. C. Steel-lined shells.

At Clarksburg, W. Va., October 25, Mr. J. F. Malory and Mr. W. Wiedebush tied for second amateur score, breaking 179 out of 200. Both were shooting U. M. C. shells.

At St. Louis, October 20, Billy Heer broke 97 ex 100 on the grounds of the Tannhauser Club. He used his U. M. C. shells and Remington gun combination.

The Fastest Rifle.

For certainty of operation and rapidity of fire, no rifle has ever equalled the Winchester self-loading type, made in the powerful .351 caliber. In support of this statement are the clean sweeps made in all the military rapid fire contests last year and again this year. At Sea Girt, Creedmoor, Wimbleton, Camp Perry and Camp Logan, contestants using Winchester self-loaders carried off all the prizes. Not only is this rifle fast and sure, but it is simple and strong in construction, handsome in outline and powerful enough for the largest game. It shoots an up to the minute cartridge, which is neither so bulky nor as expensive as the less modern type no more powerful.

The Peters Cartridge Company calendar for 1908, which is now ready for distribution, compares very favorably with the artistic subjects presented by this company in former years; in fact, many who have seen it pronounce it the best thing of its kind ever published. A duck hunting scene in early morning is pictured, and the work of both artist and lithographer is so excellent as to give a most beautiful and real effect.

The calendar will be sent to any address upon receipt of ten cents in coin to defray the cost of mailing.

Write The Peters Cartridge Company, Advertising Department, Cincinnati, Ohio.

two had very little trouble in teaching them to back or to point, and particularly is this true in one case. The dog had extreme range, but was so small that it was hard to see him in sedge or other Southern cover grasses. His greatest fault was, no matter how wide he scouted, invariably he sought foot scent, and only on rare occasions, when a heavy wind was blowing, did I ever see him attempt to try to find his birds in the wind. His staunchness on game came more from his quick ability to learn without any prompting or persuasion than through any attempt at training on the writer's part. He developed this trait, which I thought at the time was no gift of the race, through being permitted to follow at heel, and when a Pointer or Setter was slow at finding a cripple he was permitted to assist in the game. Later I found him on point and soon backing the other dog followed.

Shortly afterwards I came into possession of a pure-bred bitch of the Irish strain and the first signs she ever showed of this gift were on snipe and woodcock, but it was not long before she developed the sense of being able to point quails, and so intense did this instinct become impressed on her that it was painful at times to see her overcaution; but she was of little use for this purpose except in timber when working close, for she was a dwarf of her tribe, only weighing twenty-two pounds, so to see her at a distance was almost impossible. Aside from this trait she had the most unruly disposition I ever saw a dog possess, and fought every opportunity she could get, constant defeats never chilling her ardor, but rather increasing it. To hunt her with a com-

THE FARM

PROCESS OF FEEDING SHEEP.

Whether shipped in from the range or the stockyards, the sheep will be gaunt, hungry and tired when they arrive at destination. I always try first to fill them up on stubble fields or prairie grass before giving them any grain. If they are put into the yards at once, give them all the hay or other roughage they will eat for a day or so until they get rested up and accustomed to their new surroundings. I like to start sheep on oats, if possible, or oats and corn mixed half and half. As we all know, oats is an almost naturally balanced ration, but also the highest priced grain, pound for pound. Bran is a good substitute for oats, in about thirty days strong wethers will eat about a pound and a half of grain a day and this is about all they will stand for any length of time.

If ground oil-cake is not too high, say twenty-five dollars a ton, two or three ounces of it daily to each sheep will be a paying investment. My favorite ration would be two-thirds shelled corn, one-third oats, with an addition of either the oil-cake or bran, or if possible both I suppose our learned professors would call this a fairly well balanced ration. For roughage alfalfa is of course decidedly the best. In the absence of alfalfa, I use sorghum and kafir corn with equally good results and I have made some very fat sheep on nothing but good straw for roughage. I believe in feeding plenty of hay or its substitutes. Of course it goes without saying that sheep should always have access to pure water and salt, whether in feed lots or grain fields. When in feed lots, I believe not more than 500 head should be kept together, and 300 is even better. Probably half the sheep are fed annually in open yards without sheds. For my part, I prefer a good shed, open to the south. I think the sheep are more comfortable and I can sleep better in the event of a blizzard. To keep yards and sheds dry and well bedded is very essential.

The profit in the business is very problematical and depends entirely upon the supply and demand, as well as the skill with which the sheep are handled. The American people are somewhat erratic. If, for instance, we have had good prices for fat sheep one year and have made a little money, a lot of new feeders are apt to jump in next season and overdo the business and the result is disastrous. The packers are sure to take advantage of a glut and hammer the prices below the cost of production. A man cannot jump in and out and hit the high places and he is more likely to strike the low ones. If a man is fixed to feed sheep and has a liking for the business, the only rational way is to stick to it and take the average. To the beginner I would say: Start in slowly and get experience. Buy a carload or two and see how you like it. Then, if successful, try some more next season; but do not think that because you have handled a thousand head profitably you can do the same with 10,000, and multiply your profits by ten for you cannot do it.—Peter Jensen in Denver Field and Farm.

Poultry foods are high in price, so are poultry products. We believe the farmer who reduces his stock of laying hens at this time, is making a serious mistake—unless he has a lot of scrub hens that wouldn't pay for their feed under any condition. The Farm Stock Journal believes in expansion of the poultry industry all along the line. The market demands a large production of first-class poultry and eggs.

There are no secrets in the production of sanitary milk. The essential points are a healthy herd, quartered in a clean, well ventilated and well lighted stable, cared for and milked by clean attendants, and the product stored in clean utensils in a clean room.

FEEDING PROSPECTIVE MILKERS.

Perhaps the most useful thing that I learned in Europe was concerning the treatment of heifers to develop in them the milking habit, writes Joseph Wing, in Breeders Gazette. In ignorance of the right treatment of heifers is our greatest sin. Successful dairymen never permit their heifers to become fat. They must not accumulate fat in their udders; it is surely fatal to the best development of milk. They must not form the habit of turning their food into fat. All European dairymen seem agreed in their practices here. The Jersey men keep their heifer calves growing nicely, but as lean as deer. The Danish men do the same. In Holland the young things have grass alone and grow up long and lanky, and turn to milk when they become cows. In England I found the same practices. Breeders of milking Short-horns raise their heifer calves on skim milk, and often on very little of that, with some substitute or other to help out. Even in Scotland I found the great breeder, William Duthie, taking his heifer calves and putting them on his lightest milking cows, so that they should not get too fat before they became mothers. I am firmly of the opinion that milk has not in America been so much bred out of cattle as it has been managed out of them.

Then they understand that in order to get milk from a cow she must be bred early so that the habit of maternity is fixed within her the first thing. She should drop her first calf, so they say and so they practice, when she is about 26 to 30 months old. Thus early the habit of devoting her food to her offspring is set up, and she never thereafter outgrows it.

A round roly-poly heifer calf is a pretty thing. Her owner likes her and she is an ornament to the premises. Yet viewed in the light of her future, she is a blunder, and greatly has her usefulness been marred when she has been permitted to accumulate this fat. Our judges in the show rings are responsible for much here. We need reform from bottom to top. Exhibitors should be cautioned when bringing forward heifers fattened to the point of ruin and the wiser ones commended, and given awards whenever possible.

CATTLE IN THE MIDDLE AGES.

An English writer says: "The oxen, cows and steers reared on the farm in the fifteenth century were not more than a third of the bulk of cattle in the present day, and probably many a sheep is now sent to the markets which would have outweighed the cattle of those days, and yielded a greater quantity and a better quality of meat than such cattle would have produced. The size of the sheep of the fifteenth century may be gathered from the fact that fleeces produced upon an average about a pound of wool, 'often much less.' In winter, the salted beef was reserved for sale in towns, and for the consumption of the manor house and the farmers.

"In the middle ages cows fetched a considerably lower price than oxen. Bulls, too, were cheap; but, in 1255, two bulls sold at Winchester fetched a higher price than oxen sold there. At Moldon, in 1299, a bull fetched 17 shillings, an unprecedented price. In 1309 another bull was sold for 17 shillings and one for 20 shillings in 1309, but between that year and 1307, the bulls sold at and above 17 shillings do not number over a dozen, while, in all cases, oxen, and even cows, brought higher prices every year.

"Entries for shoes for oxen are found in many old papers. There was no great variety of breed, and no marked difference in the price of north and south country cattle. The carcass was light, unless cattle had deteriorated in the sixteenth century, for the oxen bought for victualing the navy averaged not more than four hundred weight. Taking the hide—a very valuable part of the animal in the middle ages—at an average value of 2s. 6d., the flesh of the average ox was worth about 10s. 6d."

Only the best bred pigs which are pushed from the start to the finish make the most money.

STABLE HINTS.

Exercise is about as important as feed for the young colt.

A horse will get most good from his grain if he eats it slowly.

A hat for the horse is a comfort. Fix it so that the air can circulate beneath it.

If your horses ever needed comfortable fitting harness they need them now.

If the brood mare fails to give enough milk to nourish her colt, feed her a little bran.

The weak points of a horse can be discovered better while standing than while moving.

If your horse does not eat all his grain, clean the box out before it becomes sour.

The cost of raising colts is so slight, comparatively, that the farmer can hardly afford not to.

A yearling mule recently sold for \$220, so we are told. Of course, this was a Missouri mule.

Bring a team from an exclusive diet of green grass and putting it into hard work is dangerous.

Keeping the work team in the pasture nights is a good plan. It is more comfortable than a hot stable.

It frequently happens that the horse that succumbs most quickly to heat is the horse that has the least care.

Neither hard work nor fast driving should be done immediately after a heavy feed. The horse is not in fit shape.

In a three-horse team, the middle horse is especially susceptible to heat. Avoid danger by changing every half day if you can.

Horses vary in disposition as much as men. The same method of handling will not do for all. It's the man who knows how to make a success.

An occasional drink of cool water during the day will taste as good to the team as it does to you. A milk can full of water, a pail and a little shade where both may be kept will help.

As help costs more, horses are used more. A few years ago all the work was done with a two-horse team. Then the three-horse teams became popular, and now, everybody who can, sends his man out with four horses. Three horses are used on the two-row corn plows and three or four on the spreader. It pays because it makes the work easier for the team and one man can do more in a day.—Kimball's Dairy Farmer.

We all know how the natural color of milk fat from which butter is made varies during the different seasons of the year with variations of feed, breed and period of lactation. Butter made when cows are on full pasture is naturally of deeper yellow than that made when the cows are on dry range, which comes along at this time of year and the milk of fresh cows likewise often makes more highly colored butter than that of strippers. The characteristic yellow color of butter made from milk of Guernseys is well known to most breeders. All these factors influence the natural color of the butter fat so greatly that a collection of samples of butter made from different herds may show as many shades of yellow as there are packages of butter. Some markets prefer more highly colored butter than others, but all demand that it shall be of uniform color. These peculiarities of markets and of cows have led to an almost universal custom among buttermakers of adding artificial coloring matter to satisfy the demands of the trade. The addition of honest coloring matter is therefore not a deception, but the result of a desire to cater to the popular demand for a uniform color at all seasons of the year. The national pure food law which is now in effect does not forbid the coloring of butter, but prohibits interstate commerce in any article of food containing any added poisonous ingredients which may render such article injurious to health, and this shuts out the coal-tar brands, while anatto is recognized by the chemists as all right. The anatto is purely vegetable, not unlike the carrot and is consequently a harmless compound when used as coloring in a lot of good butter.—Farm & Field.

DAIRY NOTES.

The Texas Farmer says: Those who expect to lead in the dairy business often find someone crowding them for the same honor.

Every dairyman should run his business on a cash basis—sell for cash, buy for cash and get cash discounts instead of making bills.

It is generally true that the average dairymen will deliver just as poor milk and butter as the average customer will tolerate.

There may be some luck in dairying, but it is not all luck. Most of it is the legitimate reward of intelligent methods.

The most careful butter makers sift their salt. The most careful hand occasionally lets a lump slip through it, and if the lump is hard it does not dissolve.

Sometimes when cows have been milked a long time the butter is slow in coming. They will hardly be noticed if there are several fresh cows milked into the same batch.

It is believed that the fertility resulting from feeding clover hay is equal in value to the price of the hay itself. Therefore all the clover hay possible should be fed on the farm.

When the weather is cold, the hutter is sometimes slow in coming because the cream is too cold, or too old. In the summer time it is often too sour and too warm. A thermometer helps to decide. The best temperature is about 68 to 72 degrees.

The matter of the milk flow needs to be watched closely so that if there be a falling off it can be corrected. If it becomes permanent it is very hard to re-establish. Busy times, flies and short pasture often gets the advantage.

Not so very much is known about the causes which affect the flavor of butter. The latest investigations conclude that it depends upon bacteria, which after using some of the materials in the butter, form a by-product and gives it its odor.

The matter of sitting on one's heels and milking with one hand should be a thing of the past. It is no wonder that the cow becomes tired and walks off, or kicks. The arm is heavy and the pull stronger than when using a stool. Let the stool be higher than the usual low stool.

In estimating the worth of cows it is estimated that a cow that will give 300 pounds of butter fat in a year is worth \$100, if she is not more than five years old. This is the average cost of cows kept by the central west dairymen, all of whom use the best up-to-date methods for making the most of cows and knowing just what the products are costing them.

TIMELY HINTS.

Heavy draft horses are born with an inclination to walk and work. It is inherited.

A good draft stallion, crossed on mares with good dispositions, produces colts that are naturally quiet and easy to train to the slow work of the farm.

Trotters are born to go, and the restraint of the slow work on the farm makes fretters that soon wear themselves and their drivers out.

Breed for a purpose. The average farmer should breed the draft horse.

Breed preferably to a sire that is regularly worked on a farm, or has regular road exercise every day.

Colts from a stallion that is kept in a stable, with little or no exercise, are usually inferior.

See that the mangers are kept sweet and clean. Sour and moldy grain will quickly get a horse "off his feed," and a lack of nervous energy soon follows.

Shake up the bedding and put it outside the stable on a rack to air and dry.

Flies just about pester the life out of horses at this time of the year. It is a good plan to spray them just as you do the cows, every morning. It helps a lot.

Very few horses are naturally ugly and when they are it is usually in the belief that they are defending themselves, all brought about by some previous mismanagement.

SCIENTIFIC FEEDING.

"Give your fowls sulphur occasionally; put tincture of iron in their drinking water, often; also occasionally put a small lump of stone lime in their drinking water; as iron, lime and sulphur are necessary for egg production and formation.

Just such advice starts beginners on the wrong track, writes J. H. Davis in the Petaluma Poultry Journal. Nature supplies fowls with everything necessary for the production of eggs. There is lime, sulphur and iron in grasses and plants as well as in grains, and fowls which get plenty of grass feed, get all the constituents required for their health and for the natural duties devolving on them in a state of domestication.

Turnips, onions, cabbage, cauliflower, water-cress, blue-grass, alfalfa and some other plants and vegetables contain sulphur. In potatoes we get potash, while water-cress, spinach, beans, peas, beets, celery, parsley, mustard and tomatoes contain salts of potassium and iron.

Clover and grasses generally contain lime. It is hard to find a plant, grass or vegetable which does not contain some of these necessary requisites for the well being of man, bird, fowl and beast. If food did not contain the chemical properties needed, animal life could not exist.

Our fruits contain acids and salts in varied proportions and of different kinds. Nature has done the work thoroughly, and nature cannot be improved upon by any of the tinkers who profess to write scientifically (?) on things of which they are densely ignorant.

How foolishly inconsistent and unnecessary to be giving fowls drug preparations under the impression that nature is lacking and does not provide the things it should as constituent parts of food for fowl life. And this is what the "scientific" people are doing who scribble so much about phosphates, lime, potash, sulphur, iron and a lot of other rot, which puzzles the beginner and forces him to imagine that he must take a course in chemistry before he is fit to feed chickens.

A few years ago a celebrated (said to be celebrated as all French savants are celebrated) French scientist and chemist startled the world by declaring that salt—table salt—was the cause of our moral and physical degeneracy; that salt was the cause of all the diseases which afflicted humanity; that if people would quit salt entirely they would live to be as old as Methuselah. And he pointed to Lot's wife, turned to a pillar of salt, hence the curse on salt from that day on.

Another learned doctor in New York proclaimed potatoes to be the cause of diphtheria and throat diseases. Another of these learned (?) savants declared that bread—wheat bread—was deteriorating the human race, and caused all sorts of intestinal troubles, and he advised people to eat potatoes and rice, with plenty of salt, and to avoid pork as poison.

At a medical convention held in New York, the doctors unanimously decided that the healthiest, most strengthening and best meat for people to eat is bacon—just plain bacon. And in McClure's Magazine for September, Dr. Woods Hutchinson declares that beans, cheese, nuts of all kinds, bananas, all the berries, oatmeal, cornmeal, etc., are poisonous foods, and attempts to show how and why they interfere with digestion.

And so it goes. There is not a plant, vegetable, grain, meat, condiment or drink used by man which has not been pronounced poisonous and injurious by the so-called scientists and some of the doctors. So we see that these people disagree radically, and that the so-called scientists are merely clumsy guessers and sensationists. The doctors are at war with each other on causes, diagnosis and treatment of diseases.

What is really needed in the world is more honest common sense. In the poultry yard common sense methods will win every time. There is too much so-called scientific foolishness, too much quackery and humbug in poultrydom—for dollars.

I am a firm believer in and sup-

porter of the science of things. But quackery is not science. Big words, not understood by the average reader, with a lot of chemical terms and figures, may astound and fool the verdant, but the man who feeds his fowls to corn, wheat, oats, plenty of grain and insect feed on a good range, knows that his is the only scientific method—that it is the science of common sense and there is no other kind of science worth a whoop.

Brother breeders, you all know this to be so. You old breeders who have been in the harness many years, know all about feeding and raising fowls scientifically. You know your way is the true scientific way because it has brought you success. And every breeder who succeeds is a scientific breeder despite the theories of the quacks who have somehow obtained an audience among latter day breeders.

Most any farmer's wife or daughters can give these scientific theorists points on feeding and chicken raising.

CATTLE AND SHEEP ON PULP.

A steer and sheep feeding experiment was last season carried on by a practical feeder at the Logan, Utah, sugar factory. The experiment was to run 120 days, but owing to the very bad weather and other unavoidable conditions, it closed at the end of seventy days. The animals were weighed for three consecutive days at the beginning and at the close of the experiment. The sheep were yearling, grade Cotswold wethers. The steers were two-year-old grade Short-horns. The former were divided into lots of fifteen each and the latter into lots of five each. The feeding was done in the open and at times the yards were very muddy, which of course was detrimental to good growth.

The steers in Lot 1 that received all the alfalfa and beet pulp they would take, made 1.37 pounds gain a day, and for one pound of gain required 12.5 pounds of alfalfa hay and 33.8 pounds of pulp; while the steers in Lot 2 that received the same, with the exception of four pounds of grain additional, made two pounds' gain and for each pound of gain 6.6 pounds of alfalfa, 51.6 pounds of beet pulp and 1.92 pounds of grain were required. The addition of four pounds of grain daily reduced the cost of 100 pounds gain from \$7.31 to \$5.77. By reducing the pulp on Lot 3 to 58 pounds daily, 10.8 pounds of alfalfa and 28.9 pounds of pulp were required for one pound of gain and the cost per cwt. was reduced to \$4.14, while the gain remained the same as in Lot 2.

The steers in Lot 4, on which the pulp was further reduced made a daily gain of two pounds a day and one pound gain required 12.4 pounds alfalfa and 14.5 pounds of pulp. The cost per cwt. was \$3.83. The steers in Lot 5 that received all the pulp they would take and were limited to one-half the alfalfa they would eat, made a daily gain of 1.5 pounds each and one pound of gain required 6.12 pounds of alfalfa and 91.8 pounds of pulp. One hundred pounds increase cost \$6.11. These results indicate that by adding four pounds of grain to a ration of alfalfa and beet pulp for steers, larger and more economical gains will be secured; further, that by limiting the amount of pulp feed in a ration of alfalfa and pulp, more economical gains will be secured and that in feeding all the pulp that will be taken, limiting the alfalfa, reduces the daily gain and increases the cost.

The sheep in Lot 3 that received all the alfalfa and beet pulp that they would take made .2 pounds' gain daily; and for one pound of gain took 8.5 pounds of alfalfa and 38.4 pounds of pulp. The sheep in Lot 1 that had all the alfalfa and beet pulp they would take and one pound of grain daily, made .31 pounds' gain; and for one pound of gain took 5.7 pounds of alfalfa, 23.3 pounds of pulp, and 3.2 pounds of grain. The lambs that got one pound of grain each made 100 pounds gain for \$5.15 and those that got no grain made it for \$4.05.

The lambs which got one-half pound of grain a day took more alfalfa and pulp for one pound of gain than did those that received twice as much grain and the cost of increase was

reduced sixty-eight cents. By reducing the pulp on Lots 4 and 5, as compared with Lot 3, the gains were slightly increased and the cost per cwt. of increase was lessened. By increasing the pulp and decreasing the amount of alfalfa fed, the cost of production was slightly increased as compared with Lots 3 and 4 on which the pulp was limited, but this reduced the cost of production as compared with animals in Lot 2, which were allowed all the alfalfa and pulp they would take.—Denver Field & Farm.

RATION FOR FATTENING HOGS.

Professor Forbes, of the Missouri station thinks that corn supplemented with wheat middlings and oil meal makes the best and cheapest ration for fattening hogs. He says: "For dry lot or pen feeding of hogs the cheapest feed is corn supplemented by wheat middlings or oil meal. At the Missouri station we have made 100 pounds of pork from five parts of thirty-cent corn and one part of \$24 oil meal at a cost of \$2.75 per hundred weight. At the same time we made 100 pounds of pork from two parts of corn and one part of \$15 wheat middlings at a cost of \$2.88. In the same experiment corn alone made pork at a cost of \$3.63 per hundred weight."

When pasture can be provided, pork can be made the most economically on it. The same authority above mentioned writes: "Experiments at the Missouri agricultural college show that with corn at thirty cents per bushel, it costs \$2.79 to make one hundred pounds of pork where blue grass is fed with the corn, with rape and corn the cost is \$2.50 per hundred weight, and with alfalfa and corn the cost of 100 pounds of pork is but \$2.13." When pasture can not be provided, hay should be fed in the way we have suggested so often in this paper. Cut it into bits, soak it for an hour in warm water, then mix enough soft feed to take up the moisture. This is a perfect substitute for pasture and can be provided any time of the year.

BEEF-RAISING AND DAIRYING.

Those of our readers who are engaged in the work of dairying, know very well just how confining it is, says the Practical Farmer. The cows have to be milked twice a day, come what will. During recent years, those who have gone through the humdrum of dairying have found a rich reward in the splendid returns that have been realized. These returns have often been so large, relatively, that many of them have come to the conclusion that they were "in the swim," as compared with the beef growers. However, these conditions have, in a measure, changed. Seven and eight cents a pound for beef is certainly remunerative to those who feed systematically. While meat making is also a confining business, it is not as confining as dairying. During the finishing season the cattle must be fed at least twice a day, and otherwise cared for; but in the summer the animals require comparatively little attention. Because of this, the temptation is very strong, in many sections, to swing over from dairying to beef growing. With reference to the advisability of doing this we urge our dairymen not to think of making such a change unless they can give the best reasons for doing so. Successful dairymen have already mastered their business and made it a success. They had better let other business ventures alone, as the outlook for the future of dairying is also good. If the successful dairyman takes up beef growing he will have to take up a comparatively new line of work, and will probably need to practice it for years before he is completely successful. For a long time we have held that the trend of prices is upward, notwithstanding great depressions may be in store for us. When depressions do come, beef growers usually suffer more than dairymen, since milk is a necessity. Again we say, dairymen make no change in your line of work, unless you are absolutely satisfied that your reasons are sufficient for the move.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Struck Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

"SAVE THE HORSE" SPAVIN CURE

DON'T GO WRONG

TO THE WINTER QUARTERS FOR THE BEST CURE, FIBING, BLISTERING AND THE USUAL METHODS ARE UNCERTAIN AT BEST; THEY MEND INVARIABLY FOR THE MOMENT ONLY.

Have your horse sound for the sale ring, for the track or road work—absolutely and permanently sound. Don't take chances; use "SAVE-THE-HORSE." Don't think you are experimenting; write for copy of contract and information; read what it has accomplished for others; it will positively do the same for you.

"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

Troy Chemical Co. Binghamton, N.Y.

Formerly Troy, N. Y.

D. E. NEWELL,

56 Bayo Vista Avenue, Oakland, Cal.

PETER SAXE & SON, 513 32d street, Oakland, Cal., Importers, Breeders and Dealers for past thirty years. All varieties Cattle, Horses, Sheep, Hogs. High-class breeding stock. Correspondence solicited.

Fred Mast Successor to Zibbell & Son THE AVENUE STABLE.

672-680 11th Ave., one block north of Ghuts.

A nice line of New Livery; Large, Clean Box Stalls. Special attention paid to boarding high-class horses. Work horses for any business for hire at all times. All kinds of country horses for sale.

SITUATION WANTED.

A first-class trainer, driver and colt developer is open for an engagement with a good stable of horses or a stock farm, or a good location to open a public stable. Very best of Eastern and local references as to ability, sobriety, etc. TRAINER, Breeder and Sportsman, Drawer 447, San Francisco, Cal.

FOR SALE.

Fine bay carriage team, full sisters by Monterey, kind and gentle, single or double, about 16 hands, weight 2475; price \$700. T. D. WITHERLY, Irvington, Cal.

Racing!

New California Jockey Club

Oakland Race Track
OPENING DAY

SATURDAY, NOV. 9

Races Commence at 1:40 P. M., Sharp.

For special trains stopping at the track, take S. P. Ferry, foot of Market street; leave at 12, thereafter every 20 minutes until 1:40 P. M. No smoking in the last two cars, which are reserved for ladies and their escorts.

THOMAS H. WILLIAMS, President.
PERCY W. TREAT, Secretary.

WANTED

SET OF GOODWIN'S TURF GUIDES. Address Post Office Box 569, Victoria, British Columbia.

BROODMARES AND STALLION COLTS WANTED.

Three well-bred broodmares in foal to good stallions.

Two yearlings, or two-year-olds. Must be well bred and good individuals. Address, giving price, breeding and particulars, **ANDREWS**, care Breeder and Sportsman, 616 Golden Gate Ave., San Francisco, Cal.

GOOD ONES FOR SALE.

A number of good mares, geldings, colts and fillies by such sires as McKinney, Searchlight, Lecco, James Madison, Daedalus, Morengo King and Bonnie McKinney. Good individuals, all kind and gentle. For further information and to see the horses apply to

H. BUSING,
Race Track, Alameda, Cal.

THICK, SWOLLEN GLANDS

that make a horse Wheeze, have Thick Wind, or Choke-Cow, can be removed with

ABSORBINE

or any Bunch or Swelling caused by strau or inflammation. No blister, no hair gone, and horse kept at work. \$2.00 per bottle, delivered. Book 2¢ free.

ABSORBINE, JR., for manhood, \$1.00, delivered. Cures Gout, Tumors, Varicose Veins, Rheumatism, etc. Book free. Made only by

W. F. YOUNG, P. D. F.

54 Monmouth St. Springfield, Mass.
For Sale by—Langley & Michaels, San Francisco, Cal.; Woodward, Clark & Co., Portland, Ore.; F. W. Braun Co., Los Angeles, Cal.; Western Wholesale Drug Co., Los Angeles, Cal.; Kirk, Geary & Co., Sacramento, Cal.; Pacific Drug Co., Seattle, Wash.; Spokane Drug Co., Spokane, Wash.

JACK FOR SALE.

Weights 1,000 pounds; is well turned, good looker and without blemish. Is a prompt worker. Apply to

S. E. WRIGHT,
Santa Rosa, Cal.

IMPORTED HACKNEY STALLIONS At one-half other people's prices. If you want bargains write at once to **R. P. STERICKER**, West Orange, N. J.

Tuttle's Elixir

Greatest maker of sound horses in the world. Tested many years, never fails if cure be possible. \$100 reward if it does. For lameness, curb, splint, spavin, ringbone, swellings, etc.

Tuttle's Family Elixir

liniment for household use. Ask for Tuttle's American Worm and Condition Powders and Hoof Ointment. "Veterinary Experience," perfect horse-man's guide free. Symptoms and treatment for all common ailments. Write for it. Postage 2c. **TUTTLE'S ELIXIR CO.**, 52 Beverly St., Boston, Mass. Los Angeles, W. A. Shaw, Mgr., 1621 New England Ave. Secure of all blisters; only temporary relief, if any.

TRAINING, BOARDING and SALE

Cor. Grove and Baker Sts., just at the Panhandle Entrance to Golden Gate Park. (Take Hayes, McAllister or Divisadero Street Cars.)
Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by autos or cars.

CHARLES DERBY PACER FOR SALE.

Brown gelding, foaled April 20, 1903; 15.2 hands, perfectly sound and in the best of condition. He is now in training in Jack Phippen's string at Pleasanton. Has had six months' work. Stepped a mile in 2:18, half-mile in 1:06, quarter-mile in 32½ seconds. Is a matinee horse right now and a wonderful racing prospect. Mr. Phippen thinks he can drive him in 2:14 or 2:15 at any time if called upon. Horse can be seen at any time. His regular work-out days are Wednesdays and Saturdays at the Pleasanton track. This horse was bred at the Oakwood Park Stock Farm.

Sire, Charles Derby 4907.

First dam Algerdeta (dam of Thornway 2:05½, Allandora 2:17¼ and Sable Steinway 2:23½), by Allandorf 7462.

Second dam King Girl by Mambrino King 1279.

Third dam Leah by Wilson's Blue Bull 75.

Fourth dam by Tom Hal.

S. M. VANDERVOERT, Owner,
Box 893, Palo Alto, Cal.

GOOD MARE FOR SALE.

GERTIE A., chestnut mare by Diablo, dam by Sydney, eight years old, matinee record 2:12 pacing. Was nosed out in a race in 2:08½ by Tom Carneal. Gertie A. is in foal to Star Pointer, entered in Pacific Breeders' Futurity Stakes No. 8, \$7250 guaranteed. For price and particulars address **VICTOR VERILHAC**, care Breeder and Sportsman, 616 Golden Gate Avenue, San Francisco, Cal.

Remington AUTOLOADING SHOT GUN

YOU CAN AFFORD IT.

The Remington Autoloading Shotgun is within the reach of the moderate purse. It has the well-known Remington pattern and penetration. Without the punishing "kick" and with the new Autoloading System, which requires the shooter only to pull and release the trigger for each shot, this new Remington represents gun luxury. The solid breech secures absolute safety. The recoil loads the gun.

List Price, \$40; Liberal Dealers' Discount.

"LOOK FOR THE BIG RED W"

THE big red W is the connecting link between the consumer and the makers of Winchester goods. Over a year ago we adopted this safe-guarding trade-mark and since that time every box, carton and package put out by us has borne the big red W, the hall-mark of goods as perfect as brains, experience and ingenuity, coupled with a modern and complete plant, can make them. Our object in adopting this trade-mark was to make it easy to distinguish Winchester goods from other makes, which equal them neither in quality nor reputation, and thus protect you and protect ourselves. We have done our part. Will you do yours by looking for the big red W whenever buying anything in our line? The big red W is to guns, cartridges and loaded shells what the word "Sterling" is to silverware the world over. For your own protection we again ask you to "Look for the big red W"

If a mare nominated drops her foal before the 1st day of January, 1908, or if she has a dead or more than one foal, or is barren, the entry of such mare is void. By filing prior to December 1, 1909, with the New California Jockey Club an accepted transfer of the produce, with its engagement in this event accompanied with all forfeits to date, the original subscriber will be released from any liability as to the engagement of the produce.

SIX FURLONGS.

THOS. H. WILLIAMS, President.

**THE WEEKLY
BREEDER AND SPORTSMAN**

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO
P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

THE OLD GLORY SALE will open in Madison Square Garden, New York, on Monday next, with 992 horses catalogued. It will be a test of the horse market and a severe one, as the financial condition in New York is such at the present time that money is very hard to get, and nothing but money will be accepted for these horses. A thousand horses thrown on any market will test the demand to its utmost. We will wait the result of this sale with great interest.

THE Sonoma County Driving Club advertises two stakes of \$500 each to be trotted on the Santa Rosa track in 1908. No. 1 is for foals of 1906, and No. 2 for foals of 1905. The entrance fee is but \$2.50, which must be made December 20th, 1907. A payment of \$2.50 will be due April 1st, 1908, one of \$5 on July 1st, 1908, and another of \$10 ten days before the race. This makes a total entrance fee of but \$30 in a \$500 race. Entries are open to colts owned in Sonoma, Napa, Lake, Mendocino and Marin counties. In guaranteeing these two stakes to be worth \$500 each, the Sonoma County Driving Club has shown a liberal spirit and we urge the owners of colts and fillies in the counties mentioned to be liberal in making entries to these events. The Santa Rosa track, where the races will be trotted, is one of the best and safest tracks on the Pacific Coast, and horses can be worked there summer and winter.

STAKE ENTRIES are good investments, whether one races his colts or offers them for sale unbroken. They are the real life of the trotting horse business and were it not for them harness racing would not interest so many people. Gen. Watts would have been an obscure colt without fame as a champion had it not been for colt stakes, as he would have had no earning capacity as a three-year-old, consequently would not have been required to trot to a world's record. The most obscure colt or filly of this year may be the proud champion of next year, provided it has stake entries, but without them its owner cannot expect it to be more than a "likely" colt, or a "good prospect." The proper thing to do is to nominate your mares in the futurities, and as the Pacific Breeders Futurity, \$7250 guaranteed, for foals of mares bred this year, will close one week from next Tuesday, that is an excellent opportunity to start your prospective foal on the way to fame and your own fortune. Look up the advertisement of this stake in this issue of the Breeder and Sportsman and make your entries in time. It will be a good investment.

At a meeting of the New England Trotting Horse Breeders' Association in Boston the other day, A. J. Welch of Hartford caused a sensation by making the prediction that in the near future bookmaking and poolselling will be prohibited at every track on the Grand Circuit. Though he is himself the best known bookmaker on the trotting turf. Mr. Welch said at Boston that in his opinion all race track managers must soon choose between conducting their meetings without public betting or closing their gates. He advocated a big fair at the Readville track, which the Breeders' Association owns, and said that arrangements had been made to hold such a fair next year at Charter Oak Park, in Hartford, with harness racing as the main feature. He believes the gate will support the meeting under these conditions and intends to make the experiment.

THE PRINCIPLES OF BREEDING is the title of a new work published by Ginn & Co., 29 Beacon street, Boston, and from the pen of Eugene Davenport, dean of the College of Agriculture of the University of Illinois. It is a volume of 727 pages, profusely illustrated and elegantly printed. Professor Davenport's treatise on this subject of widespread and popular interest is the most comprehensive work of the kind ever attempted. The author is dealing with his specialty, and his experience on the farm and in the laboratory has enabled him not only to understand the problems of the breeder, but also to treat his subject authentically in the light of the latest developments in biological science. He has presented the science in an entirely new aspect, that is, he has made variation instead of heredity the initial thought. The portion treating of the statistical method of study in heredity is the first of its kind in agricultural literature. The aim of the author is to present a safe and reliable text rather than to construct new theories of evolution. He has adapted his material especially to the student in the junior year of his college course, and to the practical breeder on the farm, care having been taken to present the technical matter in a way easily comprehensible to the student of breeding who may not be familiar with the phraseology of biological literature. The text, however, is thoroughly scientific in its treatment, and will therefore appeal to the student of evolution and of sociology as well. The footnote references are to standard authors, and the additional references at the close of each chapter enable the student to pursue a particular subject further if desired.

BIG CARRIAGE HORSES are in demand in London. A writer in a London trade paper says: "It is enough to say that the great and wealthy jobmasters of London are unable to let or hire anything but big horses; hence, in the absence of home-breds, they buy them in America or on the continent of Europe. The number they now require could be expressed in thousands, and the checks they send would amount to something more like millions. To give an idea, a jobmaster's limited company recently paid £40,000 in one bargain for London carriage horses. The rapid growth of London will soon make 5,000,000 persons into a population of 15,000,000, and with increased wealth there will be a vastly increased demand for big London carriage horses, as long as men remain about the same height. Scientists tell us that there has been no material change of stature during the last 300,000 years, so breeders need have no doubt about future markets for any stylish, full-sized carriage horses they may be enabled to put upon the London market. In advocating the production of such full-sized carriage horses as now appear in the parks and fashionable streets of London, I have no desire to discourage the fashionable Hackney which adorns the elegant victoria, but I want the larger type to be bred in equal numbers."

When Jay-Eye-See electrified the horse world by trotting a mile in 2:10 at Providence twenty-three years ago, who would have dreamed that before the little hack son of Dictator passed away more than three hundred horses would equal his then unprecedented performance? In the campaign of 1907 thirty-two newcomers were added to the 2:10 list, swelling the total to 318, according to the official count in Wallace's Year Book. It is not quite fair, however, to say that all these horses have equaled the performance made by Jay-Eye-See in 1884, for all save Sunol 2:08 1/4, Maud S. 2:08 3/4, Palo Alto 2:08 3/4, Alerton 2:09 1/4, and Nelson 2:10, were aided by the pneumatic sulky, which revolutionized trotting records in 1892, and some of them even had to get behind a wind shield to gain their illegitimate "records." Counting the pneumatic sulky as adding five seconds to the speed of a trotter—this is just what it added to the speed of Nancy Hanks—and eliminating all the wind shield performances there have been only eleven trotters since these "modern improvements" came into use that could stand comparison with Jay-Eye-See and the old time champions.—Ex.

A press dispatch from Napa states: If present plans materialize, Napa will ere long have one of the finest race tracks in the State. George W. Berry, who is superintendent of A. B. Spreckels' large stock ranch south of town, is looking for a suitable site for the course. A tract of at least eighty acres of land is desired, and a joint stock company will be organized to purchase the land, build the track, erect proper buildings and operate the enterprise. Mr. Berry will subscribe for the major portion of the stock of the concern, if he can get a number of prominent local citizens to take a few shares of stock in the project.

SAN FRANCISCO DRIVING CLUB.

A program of three good races, in which horses owned by members of the San Francisco Driving Club were competitors, drew a large crowd to the Stadium in Golden Gate Park last Sunday, and all seemed to enjoy the sport thoroughly, as they stayed until the last heat was decided.

Dr. C. F. Miller, Al Schofield and William Lawson were the judges; H. Schottler, William Todd and F. Lauterwasser held the timing watches, and William O'Kane acted as marshal. The starter's box was filled by W. J. Kenney, and his work is entitled to more than ordinary mention. Mr. Kenney is the official starter for this club and is showing an aptitude for the work that has gained him an excellent reputation. He is very careful to show no favors whatever, and very particular to see that every horse is on his stride and in his position on the track. These are the real qualifications for a good starter, and Mr. Kenney has the confidence and esteem of all his club members.

With no seats for the crowd there is always an inclination to push out on the stretch, but on Sunday the marshal seemed to have excellent control over the spectators and the track was kept reasonably clear for all the races.

Many ladies graced the throng during the afternoon, the fair sex seeming to be very strong supporters of matinee racing.

In the first race Sidney B. looked like a winner, after he had finished in front the first heat in 1:44 1/2, but Lady Falrose took the next two in 1:43 1/2 and 1:45 as if the first heat had been but a warming-up mile. Direct Steinway refused to score on a pace, and tired the other horses as well as wearing out the patience of the spectators. This horse shows a very high turn of speed when he does hit a pace and might make a race horse if the "underwear" were used on him.

The second race was at mile heats and was for trotters. It was a nice race to look at, for while the O'Kane mare, Babe, won the event in straight heats, she had close company all the way in every mile. The first half of the first heat was trotted in 1:11, but as the horses had to breast a strong wind twice to the mile, they stopped some at the last end.

The third race was between Little Dick, Deroll and Kitty D., and looked like the real thing as they scored like the 2:10 class, and in the first heat went to the first half in 1:05 1/4. Kitty D. had the race won at all stages this day, but not so easily but either of the others might beat her back some other day. The summaries:

First race—
Lady Falrose (Al Benson) 2 1 1
Sidney B. (Frank Burton) 1 2 2
Direct Steinway (L. C. Becker) 3 3 3
Time—1:44 1/2, 1:43 1/2, 1:45.

Second race, mile heats, 3-in-5—
Babe (Wm. O'Kane) 1 1 1
Monk (Fred Clotere) 2 2 3
Havana (Victor Verilhac) 4 3 2
Neko (Frank Burton) 3 4 4
Time—2:24 1/2, 2:25, 2:24.

Third race—
Kitty D. (Al Hoffman) 1 1
Little Dick (Luke Marisch) 3 2
Deroll (George Kitto) 2 3
Time—1:41, 1:42.

Helen Hale, the racy built two-year-old which trotted to the world's race record of 2:13 1/4 at Lexington this year, and whose picture adorns our front page this week, was bred by United States Senator J. W. Bailey, and is by Mr. Bailey's stallion Prodigal 2:16, a son of Pancoast. The Prodigal family tree has the reputation of producing early speed, Prodigal being a bright example of this ability to sire youngsters possessing early and extreme speed, who also possesses other qualities that commend them to public favor. The dam of Helen Hale is the record pacing mare Red Silk 2:10, a record earned some eleven years ago. Red Silk is by Baron Wilkes. Her dam is the brood mare Nannie Etticoat, who is a great brood mare, being credited as the dam of Split Silk 2:08 1/4, Red Silk 2:10, Geo. C. Easton 2:14 1/4, Brown Silk 2:19 1/4, and Ettie Baron 2:21 1/4. Nannie Etticoat is by Bellwood 756, a son of Belmont 64, and out of Vanity Fair by Abdallah 15. Nannie Etticoat is the granddam of thirteen, showing how remarkably well the blood of this great mare is breeding on.

Mr. R. P. M. Greeley of Oakland, Cal., has sold his trotting mare, Hester Diablo by Diablo 2:09 1/4, dam Winnie Wilkes 2:19 1/4, to Mr. J. A. Grove of Santa Clara. Mr. Grove also purchased from Mr. Greeley, Hester Diablo's coming two-year colt by Lecco 2:09 3/4, that is pronounced by all horsemen to be one of the finest individuals of its age in the State. Hester was a very fast trotter, but was never raced and she should make a great brood-mare.

Mr. F. W. Perkins, owner of that very handsome and well proportioned trotter, Athamax 2:22, writes us that he has shipped this horse and several of his colts to Arcadia, near Los Angeles, where Mr. Perkins has purchased a ranch. Athamax will be a benefit to any horse breeding community and should be well patronized in his new home.

NOTES AND NEWS

Arizona's Fair was a hummer.

Dan Patch paced in 1:57 $\frac{1}{4}$ and 1:57 $\frac{1}{4}$.

Charley De Ryder won a heat with Argot Boy in 2:03 $\frac{1}{4}$.

Zolock won a great race in 2:05 $\frac{1}{4}$, 2:07 $\frac{1}{4}$ and 2:06 $\frac{1}{4}$, beating his son, Bystander 2:07 $\frac{1}{4}$.

Wild Bell, driven by Charley De Ryder, put the track trotting race record at 2:08 $\frac{1}{4}$.

Bellefont, Robt. Smith's Zombro mare, won a third heat in 2:09 $\frac{1}{4}$, and gave Zombro his fourth 2:10 performer.

Budd Doble drove Kinuey Lou a mile in 2:11 $\frac{1}{4}$, a great mile for a stallion that has not been raced for four years.

Kinney Al, a son of McKinney, took a race record of 2:16 $\frac{1}{4}$, driven by C. C. Crippen.

Queen Pomona, the handsome little pacing mare by Pomona, out of the dam of The Donna 2:07 $\frac{1}{4}$, won her race in straight heats, the second of which was in 2:07 $\frac{1}{4}$, the same record as that of her half-sister.

Geo. W. Ford's horse Goldennut, by Neerunt, took a record of 2:11 $\frac{1}{2}$.

The attendance was never less than 5,000, and some days as high as 12,000.

The Arizona people showed that they knew how to run a fair and race meeting.

The California horsemen all say they were shown every consideration, and they all want to go again.

The stalls are all full at the Hudnut half-mile track at Bakersfield, and twenty additional stalls could be filled. William Baker, Walter Maben and other trainers are getting horses ready for the Thanksgiving Day races, which will be given by the Hudnut Driving Club. Tom Fogarty is training his own horses, including Richmond Chief, and expects to be close to the winner in every race in which he has an entry.

E. Stewart's auction sale of range horses and broke workers on the 19th inst. was a complete success. The halter-broke "double-square" brand horses from the Button Rauch, weighing from 1,000 to 1,200 pounds, sold readily at from \$80 to \$175, the latter figure being paid by the Guadalupe Dairy for a well made buckskin gelding that had never had harness on, but looked like a \$300 horse when broke. The well-broke chunks shipped from Eastern Oregon, weighing from 1,200 to 1,400 pounds, brought from \$125 to \$260 each, and the bidding was lively. There did not seem to be anyone present among the bidders that was the least bothered about the money panic, and the clerk had a tin box full of gold, silver, and clearing-bouse certificates at the close of the sale—no distinction being made between them and coin by the auction firm.

The Horse Review calls attention to Metella A., a new producing mare for 1907, who shows up well as the dam of the trotter Lake Elect 2:17 $\frac{1}{4}$, and Baron Whips 2:11 $\frac{1}{4}$. She was bred at Palo Alto and is by Whips 2:27 $\frac{1}{2}$, dam Matron, by Clay 2:25, both Whips and Clay being sons of Electioneer.

King Edward, a very fine jack owned by A. C. Potter of Hanford, Cal., was recently sold to a company of mule breeders at Tipton for the record price of \$2,500. We believe this is the highest price ever paid for a jack on this Coast, and the sale was made since the recent alleged panic started.

Robert Leighton, who was one of the judges at nearly all the meetings on the North Pacific Circuit, arrived in San Francisco this week and will remain here a few days before going to Los Angeles, where he will have a position with the new association, which will open Arcadia track on Thanksgiving Day. Mr. Leighton has with him several photographs taken at the Spokane Fair, which shows the immense crowd that turned out to the races each day. He says the harness racing up North this year was excellent, and the public were greatly interested in it.

Ruff Brothers of Tehama county sustained a heavy loss last week by the death of six valuable brood-mares and one yearling colt. These animals were running at large on their range with no apparent disease and in good condition, when they were suddenly taken with fits and died, all having the same symptoms. The owners are making a thorough investigation to ascertain the cause of the deaths. The stock lost was valued at \$1,500.

Fantasy, whose three-year-old race record of 2:08 $\frac{1}{4}$ has stood as a world's record since she made it in 1893, until the great colt Gen. Watts reduced it to 2:06 $\frac{1}{4}$ this year at Lexington, has been booked to the colt for the season of 1908. The mating of these two highly developed champions will cause horsemen to watch the results with great interest.

Sonoma May 2:29 $\frac{1}{4}$, the full sister to Sonoma Girl, will be sold at Madison Square Garden next week. She is not only extremely fast—she has been a mile in 2:10 $\frac{1}{4}$ —but she is a good looking mare, as is evidenced by the fact that she won three red ribbons in classes where there were from fourteen to eighteen contestants. Sonoma May is owned by Arthur Brown of Napa, who has gone East to see her pass through the sales ring.

Two ex-champion trotters are to pass under the hammer at the coming Old Glory sale at New York—Sunol 2:08 $\frac{1}{4}$ and Nancy Hanks 2:04.

Ten years ago, at the close of 1898, the 2:06 trotting list had a total membership of but five—Alix 2:03 $\frac{1}{4}$, Nancy Hanks 2:04, Azote 2:04 $\frac{1}{4}$, Direc-um 2:05 $\frac{1}{4}$, and Fantasy 2:06 $\frac{1}{4}$. During 1907 just five trotters raced to records of 2:06 $\frac{1}{4}$, neither of which had even been in the 2:10 list previously—Sonoma Girl 2:05 $\frac{1}{4}$, Highball 2:06 $\frac{1}{4}$, Axcyell 2:06 $\frac{1}{4}$, Wilkes Heart 2:06 $\frac{1}{4}$ and Gen. Watts (3) 2:06 $\frac{1}{4}$.

The Western Horseman received a total of 2,016 nominations to its \$10,000 Futurity for foals of 1908.

Bellefont, Robert Smith's good Zombro mare, reduced her record to 2:09 $\frac{1}{4}$ at Phoenix last week.

Citation 2:03 $\frac{1}{4}$ got over the effects of the nail she picked up prior to the Dallas, Texas, meeting and won the free-for-all on the last day, giving the track a race record of 2:06 $\frac{1}{4}$ and won again at Houston, making her fourteenth winning race this season.

The owners of Wilkes Heart 2:06 $\frac{1}{4}$ tried to get a match between their horse and Sweet Marie 2:02 for a race over the half-mile track at Newark, N. J., but the Sweet Marie people declined, as the mare is being prepared for the horse show in New York this week, and among others will meet the crack ring performer, Auditor B., that was a competitor at the International Show in England last spring.

Argot Boy broke the Arizona record when he won a heat in 2:03 $\frac{1}{4}$ at Phoenix last Friday. He is in De Ryder's string.

Zolock 2:05 $\frac{1}{4}$ paced a heat right at his record at the Arizona fair.

There are said to be sixteen trotters that have beaten 2:11 but have not earned a place in the 2:10 list.

When Geo. Ketchum bought the stallion Siliko a few days ago for Louis Winans of England, paying a price reported at \$35,000, but which is probably exaggerated, he also purchased for the same party the mare Icon 2:10, by Peter the Great. This mare is out of Alberta, a daughter of Albert W. 2:20, son of Electioneer. Alberta was bred by Mr. J. B. Haggin at his Sacramento ranch. Her dam was the Jones mare, a Maine bred trotter, that the late Senator John P. Jones of Nevada used to drive on the old Cliff House road.

The Gilroy Race Track Association has secured a lease from Mr. Henry Miller of the big firm of Miller & Lux, of the ground on which the new race track, built last summer, is situated. The track is inside the city limits, and but four blocks from the center of town. The track is excellent for training purposes at all seasons of the year, and the management will be glad to correspond with trainers who are looking for a first-class winter track, where expenses are low and terms easy.

Prodigal, one of the great speed sires of 1907, is a son of Pancoast. The blood of the last named horse is rather scarce in California. One of the best bred daughters of Pancoast on the Coast is owned by George Fox of Clements, Cal. She is called Kitty Fox, and is registered in Vol. 14 of the American Trotting Register. Her dam is by Dictator. Mr. Fox bred this mare to Silver Bow 2:16 and got the fine looking stallion Mokelumne, that has never been trained. He also got a filly called Sipan, which he sent East and bred to the champion, Cresceus 2:02 $\frac{1}{4}$, and now has two fine young trotters by the champion on his farm at Clements. The oldest is a four-year-old filly, and one of the best individuals in the country. The other is a colt, coming two years old, and a finer looker cannot be found in the State.

Thos. Rouan has returned to Pleasanton from his trip to Washington, and brought down seven head of trotting bred horses from his farm near Dayton.

P. W. Hodges has taken several colts and fillies to Pleasanton track for a little training.

Dr. Evans of Modesto, has shipped his mare Nutwood Princess home. She raced all through the California and North Pacific Circuit.

Joe Cuicello has seventeen stalls full of horses at Pleasanton, but has consigned five head to the Combination sale at Chase's on the 23d of December.

The death of M. J. Smeltzer, editor and proprietor of the Salinas Journal, occurred last Saturday and was not unexpected. Since receiving a stroke of paralysis six weeks ago he had been confined to his bed and death came as a relief to one who had lived an active and useful life of fifty-nine years. Mr. Smeltzer was born in Maryland in 1848, and came to California when a young man. He taught school in Monterey county, and filled the offices of auditor and superintendent of school of that county at different times. He became connected with the Salinas Journal in 1889, and on the death of his partner, Thomas Harris, became the sole proprietor of the paper. Mr. Smeltzer was born with a love for the light harness horse, and bred and owned several good ones. His reports of the harness races held on the Salinas track were always accurate in every particular and written by one who was a close observer of every feature of the sport. As a school teacher and journalist Mr. Smeltzer worked faithfully and with ability and staunch honesty to build up the interests of the community where he lived and his death is a severe loss to it.

Mr. Eugene Cerciat, a prominent member of the Park Amateur Driving Club of this city, has purchased from Capt. Bennett the chestnut trotting gelding, Dr. Hammond 2:11 $\frac{1}{4}$, and is driving him on the road. Mr. Cerciat is greatly pleased with his new purchase and will probably have him ready for matinee racing in a few weeks, although the horse has been running out for more than a year. Dr. Hammond has won some good races in his day and seems to have as much speed as ever. He is by Chas. Derby 2:20, dam Bella 2d by Nutwood. Mr. Cerciat may conclude to hook him up with his other fast trotter, Major Cook, and they should pole together better than 2:20.

A reliable company that will insure live stock is the Indiana and Ohio Livestock Insurance Company, whose advertisement appears in this issue. This company insures against death from any cause and pays promptly. Not long ago the Livermore Valley Belgian Horse Company lost its fine stallion, Trappisto, on which it held a policy in the Indiana and Ohio, which was promptly paid. When Sterling R. Holt of Indianapolis purchased twenty-one head of young Sidney Dillons here in 1906, he took out a policy of \$21,000 on them with this company before shipping them to his Indiana farm. This action of Mr. Holt shows what he thinks of the reliability of this company, whose headquarters are in his own State. Applications for blanks and information should be addressed to Arthur Wolf & Co., resident managers, 321 Merchants Exchange, San Francisco, Cal.

At Schofield's Sales Mart, Valencia street, a corral full of "sore" horses and "orchard" stock was sold last Wednesday. The bidding was prompt and lively and the "aged" division brought from \$60 to \$80 each.

Chase's Holiday Sale will be held December 23d at his big pavilion, 478 Valencia street. Sixty-three head of good ones will be sold. Send for a catalogue. It will be out next week.

Washington McKinney 35751 will be sold at the Chase Holiday Sale, December 23d. This magnificent individual is growing in favor as a coming sire of speed. His oldest are five years old and but very few have been trained. The first one to race took a record this year below 2:20 and is a trotter, as are nearly every one of his get. He is a well bred horse, a fine individual, and a money maker in any good locality.

Joe Cuicello is training five head at the Pleasanton track for the Chase Holiday Sale in this city, December 23d. If you want to see them, go to Pleasanton any day and Cuicello will be pleased to show them. He has some great prospects.

Chas. DeRyder and Budd Doble reached Pleasanton this week from Phoenix, Arizona, where their horses started in the races held during the Territorial Fair, which closed last Saturday.

Members of the San Francisco Driving Club and their friends sat down to a banquet in Liberty Hall, Fourteenth and Mission streets, last Monday evening and had a most enjoyable time. Covers were laid for 125 persons and every place was occupied. With good music, good speeches, good stories and good cheer the evening passed most pleasantly. Dr. C. F. Miller, one of the most active members of the club, made an address on the subject of the club's best interests, that was a splendid effort.

W. J. Kinney, at 531 Valencia street, has just received several new runabouts and park speedway wagons that are up to date and to be sold at low prices. Kinney has several second-hand sulkies and carts on hand that have been repaired and put in first-class shape for road and track work. Last week Kinney sold Lightweight Schottler (337 lbs.) a McMurray cart, and another to Tom Corcoran, who will drive the fast mare, Lady Falrose, to it. Schottler always rides in a McMurray and says it is the best weight carrier.

THE PHOENIX FAIR.

California Horses Make Fine Showing at Arizona's Big Annual Meeting.

The Annual Territorial Fair and race meeting, which opened at Phoenix, Ariz., on Monday, the 11th inst., and continued during the entire week, was an even greater success than the inaugural fair of 1906, and sensational races occurred nearly every day. Among the big features at the track were the M. W. Savage horses, Dan Patch 1:55 and Cresceus 2:02½, under the management of Trainer Hersey, and the California string of trotters, headed by Kinney Lou 2:07¼, and owned by Budd Dohle. Charley De Ryder was also there with some of his Grand Circuit performers. Henry Delaney, Geo. W. Fort, Geo. T. Beckers, I. M. Mosher and others went over from California and the racing furnished by the horses owned by these gentlemen was first-class in every respect.

The week was a great one for California horses, and in fact, they made the racing successful.

The following account of the week's racing is from the Phoenix Republican:

On the opening day the weather was ideal, both for racing and the attendance of visitors. The chief object of almost everybody was to see the performance of Dan Patch. The grandstand was filled promptly on time, but the races were a little late in starting, for the people were still coming by hundreds. It is hard to find out just what the seating capacity of the grandstand is. The opening day was no criterion, for it was utilized in accordance with its standing capacity, except in the boxes and the reserved seat section. Those who had no seats at all crowded in front of the reserved seat section, so the latter, while they had seats, had a somewhat obstructed view. Though great preparations had been made, the crowd was larger than had been anticipated. There was some criticism of the management and a little explanation is due in their behalf. The management had no intention of overselling the grandstand, and as soon as it was discovered at the fair office that the good work had been overdone, the sale of grandstand tickets was stopped. Being the first day, it was a hard situation to regulate or control. So many people bought season tickets and reserved seats for the week that were not to be used the opening day that it was impossible to tell when tickets enough had been sold. And when the fact became known another 500 people rushed in before the ticket sellers could be curbed in their enthusiastic efforts. Planks were brought in front of the grandstand and seats improvised in the enclosure between it and the track for a great many, but still there was a great crowd in the stand.

The judges' stand was occupied by Dr. Frank E. Stone of Burlington, Wis., as starting judge, Hugh E. Campbell of Flagstaff, Ed Woodward of Denver and Mr. Carpenter of Salmonville as judges of the races, and Paul Kruger, clerk.

The first race was the 2:08 pace for a \$1,000 purse, best three-in-five. Mandolin drew the pole, with Delilah in second place, Moy in third place and Bystander, the Phoenix favorite, on the outside. Delilah was driven by Ben Walker, while Moy was driven by Haynes. Bystander led the field all the way round, but was close pressed all the way by Delilah until she broke in the stretch and dropped back to fourth place. It was Bystander's heat with a record by quarters of 0:32, 1:04, 1:36½ and 2:07½, the fastest heat of the race. In the second heat Bystander made a good get-away and his stock was rising, but he threw a shoe and had to finish on a bare foot, which incident retarded his speed. However, he led until the stretch, when Delilah passed him and finished in 2:08, Mandolin dropping to last place. The third and fourth heats were Delilah's all the way round, but Bystander hurried her all the time. Mandolin was third and Moy was last in the last two heats, Moy being distanced in the last one.

The other harness race of the day was the 2:14 trot, three-in-five, for \$1,000. There were seven starters out of eight entered, and they were given their positions from the pole—Wild Bell, owned and driven by De Ryder; J. J. M. Jr., owned by Adams and driven by Hall; Helen Dare, owned and driven by George Becker; Bellmont, owned and driven by R. A. Smith; Richie Baron, owned by Morris Bros. and driven by Haynes, and Goldennut, owned by George W. Ford and driven by Walker. It was a fine field; any of them looked like they might get the money. Helen Dare was quite a notable performer here last year, but the best she could do was fourth money, and Wild Bell picked up the long end of the purse, Richie Baron took second and Bellmont third. There was considerable trouble in scoring. Wild Bell led all the way round in each of the three heats, but Bellmont crowded her in the first and Richie Baron in both the second and third. In the first heat the half was made in 1:06 and the finish in 2:10½. In the second heat the half was made in 1:05 and the finish in 2:09½. The third heat time was, by quarters, 0:34, 1:07, 1:39, and 2:10¼. J. J. M. Jr. broke at the start of the second heat and could not recover until the quarter was reached.

It was right after the trotting race that the big thing happened. Dan Patch had been warming up all afternoon, and it seemed to the anxious grandstand that he had already traveled at least a hundred miles, and the timid were afraid Mr. Hersey would run him to death. But Mr. Hersey knows his business and so does Dan Patch. When the time came for the start the sun had dropped behind

the grandstand so the track and wire were shaded, making the famous horse look almost jet black. Chas. H. Deau had been out on the track for some time warming up Cobwebs, the pacemaker, and getting the fine runner in good action. Dan Patch, with Driver H. C. Hersey attired in a white silk jacket, next scored by, followed by a third driver in a blue sweater, with the running horse that accompanies Dan. With the red, white and blue all in readiness and Ed Hall on the farther side of the track with another runner to strengthen the field, it was very evident there would be something doing. Budd Doble, another famous driver, was in the time-keeper's stand along with a bunch of enthusiasts who know how to hold watches and hold them right.

About three times they scored down, and the last time they came in splendid order. The big runner at Dan's right reached out, the started yelled "Go!" and everybody in the grandstand held their breath to see what the time would be at the quarter. Twenty-nine and three-fourths beat anything that ever went up on the sign board, but it was plain to see no world's record would be broken. Still it was the sort of traveling mighty few people in the world ever see, and it was a certainty that two minutes would be shaved. Fifty-eight and a quarter at the half! For the first time in Arizona a half-mile had been recorded in two decimals. At three-quarters 1:28 flat went up on the indicator, and it was plain the gait was being well maintained. Down the stretch they came like a whirlwind. Not a foot did they seem to vary from their traveling order. Ed Hall joined the excursion party around near the half-mile post and came in the field, but he didn't win. It was once he didn't expect to win. About the time the flag pole was passed a mighty cheer rose up, for it was apparent the big air-splitter was doing his best and his best was mighty good. The record smashing was all off, but the people saw a great mile anyhow and were well satisfied. As Dan passed the wire, Vernon Clark, representing a number of Phoenix ladies, walked out on the track with a huge horse-shoe wreath of American Beauty roses. When the idol of the hour came back and was properly blanketed, his neck was adorned with the big floral token, and he stepped off the track seemingly fully appreciative.

Dr. Stone then announced the official time 1:57¾. He stated also a fact that has been hitherto given wide circulation for fear it would make people doubtful of the exhibition, that is, that Dan has been quite lame for some time, due to his exertions in the East during the summer, and that this was the first fast mile he has made in several weeks. It shows that he is making fine progress, and with two or three days more of good Arizona air he may yet break the record.

Pacing, 2:08 class, \$1000—

Delilah, b m by Zolock (Ben Walker).....	4	1	1	1
Bystander, b g by Zolock (Hall).....	1	2	2	2
Mandolin, b g by Alcone (Mosher).....	2	4	3	3
Moy, b m by Prodigal (Hayes).....	3	3	4	d
Time—2:07½, 2:08, 2:08½, 2:11½.				

Trotting, 2:14 class, \$1000—

Goldennut, by Neernut (Walker).....	4	4	6
Dewey.....	5	6	5
J. J. M. Jr.....	6	7	4
Time—2:10½, 2:09½, 2:10¼.			

Second Day.

The first race called was the 2:24 trot, three-in-five, for \$1,000, with the following entries in the order of positions drawn: Dyke, owned by T. E. Pollock and driven by Mickens; Kinney Al, owned by Doble and driven by Crrippen; The Major, owned and driven by J. K. Wheat, and Modicum, owned by Morris Bros. and driven by Hayes. The heats were all finished in much better time than the class required, and the race was a good one. It was Kinney Al's all the way through, with a hard fight between Dyke and Modicum for second money. Kinney Al broke at the start and Dyke reached out, but Kinney Al recovered, crawled up at the half-mile post, and though Dyke led at the head of the stretch, Kinney Al passed him just before the wire was reached. There was delay in scoring for the second heat, and when they got away Dyke broke and Modicum passed him, going neck and neck with Kinney Al at the half, the other two being neck and neck a hundred yards behind. The time was 1:41¼ at the three-quarter pole and at the finish Kinney Al found Modicum a close second, Dyke third, the Major breaking in the stretch. There was a beautiful start in the third heat and all passed the quarter in order, the time being 35 seconds, Modicum crawled up, Dyke broke and was passed by the Major. At the three-quarter pole they were in the same order and well bunched and came down the stretch like a prairie fire. Modicum finished a close second, Dyke third, with the Major close up.

The four entries in the 2:16 pace, three-in-five, for \$1,000, drew positions as follows: Pointer Star, W. D. Hammond, owner, Richardson driver; Katherine, D. M. Francis owner, Mickens driver; Monkey Mack, J. Jones owner, Trost driver; Arro, E. J. Whitley owner, Bell driver. This was also a fine race. Monkey Mack passed to the lead at the quarter, Katherine all but caught up at the half, and

Pointer was way back, but in the stretch Katherine broke, Arro gained the lead, Monkey Mack went to pieces, Pointer Star passed him a neck at the finish, the order being Arro, Katherine, Pointer Star and Monkey Mack.

In the next heat they strung out in position at the quarter, which was passed in 0:32¾. Monkey Mack passed Pointer Star and at the half took second place, evening up at three-quarter pole and looked like a winner, when he broke, and the finish was Arro E., Monkey Mack second, Pointer Star third, Katherine fourth. In the second heat Arro lead all the way round, Katherine broke, Pointer Star had fallen behind but caught up with her and they finished in the order of the start.

The other harness race was the three-year-old trot, two-in-three, with five entries, \$500 and added money. Odd Mark was conceded first money by the other drivers and never showed up on the track. The other four horses which fought it out for second and third money started in the following order: Margarite A., owned by Wm. McIntyre and driven by Trost; El C. J., owned by E. A. Star and driven by Wheat; Senator Tirzah, owned and driven by W. N. Tiffany; Col. Roundtree, owned and driven by Tom Johnson. The latter horse was distanced in the first heat, allowed to start again and the same thing happened, when he quit trying. Tirzah took second position soon after the start, but broke beyond the quarter, and El C. J. passed him. These positions were maintained until the head of the stretch, when Margarite broke and El C. J. won easily, Margarite second, Tirzah third. In the second heat Senator Tirzah trailed El C. J., but Margarite passed both at the quarter. Beyond the half El C. J. was neck and neck with the mare, with Tirzah behind. It was a pretty race when the stretch was entered, but El C. J. broke, followed by Tirzah, and Margarite led at the finish. In the third effort they held their positions, gradually lengthening out to beyond the half, when El C. J. crawled up and entered the stretch close to the mare, but broke, and it was all off.

Trotting, 2:24 class, \$1000—

Kinney Al, b s by McKinney—by Altamont (Crippen).....	1	1	1
Modicum (Hayes).....	3	2	2
Dyke (Mickens).....	2	3	3
The Major (Wheat).....	4	4	4
Time—2:17¾, 2:16¼, 2:17¼.

El C. J. (Wheat).....	1	2	2
Senator Tirzah (Tiffany).....	3	3	3
Col. Roundtree (Johnson).....	4	d	
Time—2:38¼, 2:34¼, 2:30¼.			

Third Day.

The first harness race called was the 2:14 trot, a consolation event, with a purse of \$750, best three-in-five. The entries in the order of starting were: J. M. Jr., owned by J. C. Adams and driven by Hall; Goldennut, owned by Geo. W. Ford and driven by Ben Walker; Dewey, owned and driven by L. J. Smith; Bellmont, owned and driven by R. A. Smith, and Helen Dare, owned and driven by Geo. Beckers. The quarter-pole was passed in 0:33¼, with Dewey crowding for first place. Helen was lagging, but the others were well bunched at the half. J. J. M. Jr. broke, but recovered and there was a warm finish, with Bellmont leading, Goldennut, J. J. M. Jr., Dewey and Helen in order. 2:12¼.

In the next heat Dewey gained the lead at the quarter in 0:33½, close crowded by Bellmont at the half, passing the last pole in 1:38¾. Dewey broke a little in the stretch, and the finish was Bellmont, Goldennut, Dewey, Helen Dare and J. J. M. Jr. A second was clipped off the first heat, in both this and the last one.

The final heat was the prettiest race of all, J. J. M. Jr. finishing last, the other four coming in almost in pairs. J. J. M. Jr. got second place early, crowded Bellmont at the quarter, but fell behind on the farther side of the track and the fight lay between Bellmont and Dewey for first position and between Helen Dare and Goldennut for second position, the first named winning in both cases. The two pairs raced down the stretch like mad, and Helen for third place was barely a neck ahead.

The free-for-all pace, three-in-five, purse \$1,000, was the harness event of the day, and it would have been a beautiful exhibition on any track. There were but three entries, but all are famous, and the first two heats were hotly contested. The last heat was an excellent exhibition, but Argot Boy landed so easily he could hardly hold himself back to 2:05¼, which is but three-quarters of a second behind the track record set a year ago by Phalla. The entries and positions were Jonesa Basler, owned by C. J. Snyder and driven by Hall; Argot Boy, owned and driven by Charles DeRyder, and Zolock, owned by the Ben Davies estate and driven by Walker. Zolock and Jonesa Basler were both old favorites on the Phoenix track, the former having divided honors with Hazel Patch at the first fair and the latter having performed well last year.

The first quarter was made in :31, Argot Boy having displaced Jonesa. They held these positions, but strung out when the half was passed in 1:01½, and the next post at 1:33½. On the stretch Jonesa forced Argot Boy and cleared him by a few feet in 2:07¼, with Zolock several yards behind.

In the second heat Zolock got second place for a few seconds, then Argot Boy resumed and passed the quarter in :31½, Jonesa having broken soon after the start. The positions were the same at the half and three-quarters in 1:05½ and 1:33½. It is suspected that Argot Boy violated the rules in that third quarter by flying instead of traveling on the ground. He finished twenty feet or more ahead of Zolock, who was going some, with Jonesa far behind. Time 2:09½.

The last heat was not much of a race, but it was a magnificent exhibition. They strung out in order and on the back stretch were about equally distant, each horse traveling as true as a bullet and like a clock, only that Argot was gaining a little all the time. The quarters were :31, 1:01½, and 1:34, and the stretch show was much like a procession of express trains. All were in the same positions they had at the start but Argot Boy was far ahead of the other two. The air brakes failed to work, and he sailed under the wire at the terrific speed of 2:05¼.

The two-year-old trot, two in three, half mile, for \$500 and added money, was a comedy event, though it had some serious features. Of the three horses, Electwood Jr., owned by E. A. Starr and driven by Tom Johnson, drew the pole. Royal Vasto, owned and driven by W. N. Tiffany, second, Delfino, owned and driven by A. Lopez, third. Electwood took the first heat, easily making a pretty exhibition for a young horse. The other two broke and barely reached the flag. In the next heat the judges had a suspicion that Lopez was not driving as he should, and put Hall in the sulky behind Delfino. He led at the start but soon broke; Royal Vasto took the lead and finished first, Electwood a close second. Vasto broke and ran almost through the stretch, but recovered just before the wire was reached. Johnson protested, but the finish stood. Delfino in the meantime recovered and came in last, pacing with a Dan Patch stride. In the third heat Delfino went all to pieces and Lopez, who had been put back in the sulky, made a bad mix-up. Electwood was crowding Vasto in the stretch, when Delfino forced him into the pole horse and narrowly escaped a crash. In this maneuver Electwood got behind Vasto in a way he could not pass. There were charges and counter-charges of jockeying but the judges held firm to the order of finish and it was so recorded. The time though, was good for colts.

Oddmark was given first money in this race (\$250) and stayed in the barn, while the others competed for the balance of the purse.

Trotting, 2:14 class, \$1000—

Bellemont, b m by Zombro (Smith)	1	1	1
Goldennut, b h by Neernut (Walker)	2	2	4
Dewey (Smith)	4	3	2
Helen Dare (Beckers)	5	4	3
J. J. M. Jr. (Hall)	3	5	5

Time—2:12¼, 2:11¼, 2:11¼.

Pacing, free-for-all, \$1000—

Argot Boy, b g by Argot Wilkes (DeRyder)	1	1	1
Zolock, b s by McKinney (Walker)	3	2	2
Jonesa Basler, br s by Robert Basler (Hall)	2	3	3

Time—2:07¼, 2:09½, 2:05¼.

Trotting, two-year-olds, half-mile heat, \$500—

Royal Vasto (Tiffany)	2	1	1
Electwood Jr. (Johnson)	1	2	2
Delfino (Lopez)	3	3	3

Time—1:25, 1:23½, 1:22½.

Fourth Day.

The overshadowing single attraction yesterday was Budd Doble and his notable black stallion, Kinney Lou 2:07¼. The horse appeared on the track early in the afternoon in his warming up exercise and was loudly cheered. He is a fine looking animal, and so many fine ones have been seen here in recent years that the people are all divided in sentiment as to their order of rank for beauty.

Between 3 and 4 o'clock the horse reappeared with the veteran Budd Doble in the sulky, attired in a dark blue suit with a cap to match, and a great ovation was given to both man and horse. With but little scoring the start was made to beat the track trotting record. The effort was not a successful one, but it was a fine exhibition, Kinney Lou being paced by Cobwebs, Dan Patch's famous thoroughbred pacer.

The first quarter was made in :33½, and the picture along the back stretch was a pleasing one. The big black horse seems to travel just as true as Dan Patch himself, and that is saying something, but his action of course is not quite so rapid. When the half was passed in 1:05 it was seen the speed would not equal the mark set, but it was an exhibition worth while for all that. The next post was reached in 1:37½, and down the stretch the two horses raced neck and neck, finishing in 2:11¼, amid the plaudits of the multitude.

During the afternoon George Beckers started his trotting horse, Zowboyetta, to beat 2:15¼, and accomplished his purpose. No pacemaker was used and the exhibition was a pleasing one. There was never a break and the stride and gait were apparently perfect. The time was :33¼, 1:06¼, 1:40½, and 2:14¼, with a second and much glory to the credit of horse and driver.

The harness races were very interesting and quite speedy and everything went off smoothly.

The 2:12 pace came first, three in five, for \$1000. The entries in the order of starting were Looking Out, owned by Lee Hall, driven by Bell; Ginger, owned by C. B. Loose, driven by Spicer; Mandolin, owned and driven by J. C. Mosher, and Queen Pomona, owned by M. A. Thompson, and driven by Hall. Queen Pomona was a fine performer on this track last year and became a great favorite. Yesterday and her first appearance here this year, and though she was not so imposing in her general looks as some of the others, and started last, she took the money for the simple reason that she had the speed.

Soon after the start Ginger got the pole from Lookout and at the quarter Queen Pomona took second place. The half was passed in 1:06½ and the positions were maintained to the last post at 1:38½. Ginger led to the draw gate, when Queen passed him and finished in 2:09¼, Ginger, Mandolin and Look Out in order. In the second heat they maintained the order of starting clear to the stretch, the quarters being made in :32, 1:03¼ and 1:35½. In the finish Mandolin pressed ahead of Ginger and the ending was Queen, Mandolin, Ginger and Look Out. Time, 2:07¼. In the third heat the quarter was passed in :31½. Mandolin broke on the back stretch and Ginger took second place. They were bunched at the three-quarter pole, 1:36¼, and finished close together, Queen Ginger, Look Out, Mandolin, 2:10¼.

The special race for \$1000 was participated in by Arro E. Monkey Mack and Daniel J., starting in that order. This was a fine race and a most remarkable one in this respect. The horses were entered in the order given, drew positions in the same order, finished each of the three heats in the same order and Arro E. made each of the heats in the same time, 2:14½. In the first two heats the traveling was always in the same order, and they were most of the time quite close together. The only deviation was in the last heat when Monkey Mack took the pole, leading from the quarter to the half, when Arro resumed and Daniel hurried Mack until the former broke.

The two-year-old pace, half mile, two in three, for \$400, was a slow race, but the colts traveled very smoothly, Onward Prince, owned by B. B. Beecher, winning first money. Elbert D., owned by S. Y. Barkley and Lottie Chambers, owned by W. T. Barkley, made a family affair of it and divided second and third money.

Pacing, 2:12 class, \$1000—

Queen Pomona, b m by Pomona (Hall)	1	1	1
Ginger (Spicer)	2	3	2
Mandolin (Mosher)	3	2	4
Looking Out (Bell)	4	4	4

Time—2:09¼, 2:07¼, 2:10¼.

Special pace, \$500—

Arro E. (Bell)	1	1	1
Monkey Mack (Trost)	2	2	2
Daniel J.	3	3	3

Time—2:14½ each heat.

Pacing, two-year-olds, half-mile heats, \$400—

Onward Prince (Beecher)	1	1
Lottie Chambers (W. Barkley)	3	2
Elberta D. (S. Barkley)	2	3

Time—1:37¼, 1:32¼.

Fifth Day.

The most wonderful mile made, by a harness horse anywhere in the world during the year 1907 was seen at the Phoenix track Friday, when the peerless Dan Patch broke his record of last Monday by a quarter of a second and was credited with a well earned mile in 1:57½.

It was not the worst day in the world, but it was far from the best from a racing standpoint, and did not compare with Monday, when the first start was made. It was cloudy and chilly all day, not uncomfortably so for the visitors until late in the afternoon, but from the horseman's view point it was chilly all day. The contrast was easily noted between the appearance of Dan Patch when he started Friday as compared to Monday. While he had been quite thoroughly exercised and had gone a mile in about 2:13 only a few minutes before, as a part of the warming-up process, when he came out for action he did not appear from the benches to be perspiring at all. When he started on Monday he looked as though he had just stepped out of a bath tub, and was so wet his coat was darkened several shades.

The early part of the afternoon was almost without wind, and it was hoped would stay so, but about 2 o'clock a little breeze sprang up and was maintained until just before Dan was in condition for starting. In the work-out mile Mr. Hersey said the wind did not bother much and he paid little attention to it, but a moment later the breeze stiffened, and while it was little noticed by the crowd, being broken by the grandstand, there was a heavy atmospheric movement which the horse had to face for a half-mile beyond the quarter pole. He finished with the wind, and very much like it, only a good deal faster, but while it was with him for a few yards, it was against him the greater part of the way. Dr. Stone, who drove round to the further side of the half-mile track to start a running race immediately afterward, says the breeze was stronger than most people imagined and that in his opinion it held the horse back at least a second.

When Dan came out for the final effort and Mr. Hersey took his seat in the sulky, a great cheer arose. Only a couple of times did they score before

the final start was made and the getaway was a very good one. It was a wavering streak of red, white and blue from the start to the quarter pole, Dean marking the pace with his red sweater, all eyes on Dan and Mr. Hersey in white, with Driver Nash as escort. The little bunch swept by the quarter in 0:29½. Down the back stretch they went, the prettiest sort of an exhibition. Unlike a race where the horses try to string out, their effort was to keep together, and the bunch moved around as spectacularly as a balloon crosses the heavens, a great deal faster, and with much more assurance in the minds of the witnesses as to what the finish would be. The second quarter was 0:58¼, or just a quarter second less than the first quarter, and that going dead against the wind. The watch said 1:27¼ at the third post and the finish was the prettiest ever seen on the Phoenix track, or that will be, no doubt, for some time to come. It was the opinion of most people as he entered the stretch that he would not equal Monday's performance, and when the time, 1:57½, went up on the board a cheer split the circumambient atmosphere, whatever that may mean, and there was general rejoicing. The third quarter, made in 0:29 flat, was the fastest, showing that the wind had held him back before and tired the horse so his last quarter was the slowest, 0:29¼.

The first race of the afternoon was the 2:19 trot for \$1,000. The entries were Wild Bell, owned and driven by De Ryder; Burnut, owned by Geo. W. Ford and driven by Ben Walker, and Dyke, the handsome Pollock horse, who finished the first heat third and was drawn on account of lameness. They started in the order given. Burnut caught up with the pole horse at the quarter in 0:34¼, and they traveled almost abreast to the three-quarter pole in 1:44¼ and on into the stretch, finishing with Burnut a very close second in 2:16¼. In the second heat Burnut was quite close all the way round, but it was evident that it was by Wild Bell's permission. The quarter was 0:33¼, the next post 1:06¼ and the finish fairly close at 2:18¼.

The third heat was no race at all, though Burnut was in hailing distance at the quarter in 0:32, and at the half-mile in 1:04¼, a little further back. Then the grandstand was treated to a surprise party. Wild Bell is a traveler, but they had not been fully apprised of the information before. After entering in this race some months ago he made a mark in the East of 2:08¼. The crowd had been a little disappointed the day before, when Kinney Lou failed to break the track trotting record, and Mr. De Ryder felt so bad about it, he thought he would treat the grandstand to an exhibition. He conferred with Wild Bell and he was "willin'" and began putting one foot out ahead of the other, regardless of the danger of making Crescens jealous, when he heard the news over in the Savage stable. The three-quarter pole was passed in 1:36, and Burnut was unable to communicate any more except by long-distance telephone. "What's he whipping him for," came the cry from the grandstand as Wild Bell came down the stretch, and then it was seen that De Ryder was engaged in making a new track trotting record of 2:08¼. When Wild Bell came back and faced the people he got a beautiful reception and Mr. De Ryder got the congratulations he deserved.

The entries for the 2:29 trotting race in the order of starting were Odd Mark, Hutchinson owner, Mickens driver; Kinney Al, Doble owner, Crippen driver; Ramona S., Beckers owner and driver.

It was Modicum's race all the way through, Kinney Al being the only contestant for first place. Kinney Al took the pole for a brief space after the start, then Modicum regained and led to the half in 1:09¼, the three-quarters in 1:44¼ and came down the stretch closely followed by Kinney Al, Odd Mark third, Ramona last.

In the next heat Kinney Al hurried Modicum to the three-quarter post in 0:33¼, 1:08½ and 1:42¼, when Kinney Al broke, but still finished a good second. Ramona gained third, sending Odd Mark back. In the third heat Kinney Al broke on the back stretch and the two slow horses changed back to their positions in the first heat. Half-mile 1:07½, three-quarters 1:43, finish 2:17¼.

The three-year-old pace for \$400 and added money had three Oh So colts for contestants—Nettie Oh So, owned by H. C. Lockett; Prize Oh So, owned by W. W. Cook, and Oh So Hamburger, owned by L. M. Hoghe. They started in the order of entry and finished both heats that way. It was rather an amusing race, Nettie Oh So being easily the victor from the start, though Prize Oh So was always giving her a race.

Trotting, 2:19 class, \$1,000—

Wild Bell, b g by Wildnut (De Ryder)	1	1	1
Burnut, b g by Neernut (Walker)	2	2	2
Dyke, ch g by son of Allerton (Hall)	3	3	3

Time—2:16½, 2:18¼, 2:08¼.

Trotting, 2:29 class, \$1,000—

Modicum (Morris)	1	1	1
Kinney Al, b s by McKinney (Crippen)	2	2	2
Odd Mark (Mickens)	3	4	3
Ramona S. (Beckers)	4	3	4

Time—2:17½, 2:17¼, 2:17¼.

Trotting, three-year-olds, \$600—

Nettie Oh So (Lockett)	1	1
Prize Oh So (Cook)	2	2
Oh So Hamburger (Hoghe)	3	3

Time—2:26¼, 2:25.

Last Day.

The bright particular star of Saturday's track per-

formance was Argot Boy, though there were several that shone with only a slightly lesser light. It was the special pacing race between Argot Boy and Queen Pomona, both favorite horses with the Phoenix visitors, though Argot Boy is the larger animal and accounted the faster one. Incidentally, it was understood the winner would make an effort to beat the track record for pacing in a race, and the winner did so, Argot Boy drifting in at the finish of the second heat on a speed breaker that landed him in the life-saving station in 2:03¼, amputating a second and a quarter from the track record of 2:04½ made a year ago by Phalla of the Gatcomb stable.

They made the first heat in the order of starting, with Argot Boy at the pole, keeping well together and in the following time: 0:35, 1:07½, for the quarter and 2:08½ for the mile, the last half being made in 1:01. In the second heat Queen Pomona went like the wind, abreast of Argot Boy, both passing the quarter in 30 seconds, or at a two-minute clip. But the little mare could not stand that kind of action for so long a distance and began to fade as the half was reached in 1:01¾. Argot Boy passed the three-quarter post in 1:31¾. As he entered the stretch Queen Pomona made an extra exertion as the distance between them was too great to look good. De Ryder turned a few more volts of encouragement into Argot Boy, and down about the draw gate he tapped him a time or two with the whip just to let him know that he was still holding the lines and watching the game. The audience was breathless, for it had already figured up the quarters and knew the record was broken, but its heart was with the pacer, and everybody wanted to see him make a name for himself. It was a short suspense, for he passed the wire before the people hardly had time to cheer and Queen Pomona came rushing in about 150 feet behind, a slow second to Argot Boy, but nevertheless gaining in speed the entire length of the stretch and making a pretty exhibition. The mile, 2:03¼, is not only the new record for the track, but it equals the best record made by the same horse on the Boston track.

The 2:05 pace for \$1,000 was but little less notable a race and almost as interesting. The entries in the order of starting were Bystander and Zolock, both well known horses here, and Ginger, owned by C. E. Loose. Zolock got the pole at the eighth and held it clear to the finish, forced all the time by Bystander, with Ginger not far to the bad, the heat being finished in 2:05¼, equaling the time of Argot Boy earlier in the week, and which was the best race record on the track this year until Argot changed it.

The second heat was traveled without change of order, Bystander contesting hard for first position until he broke and came under the wire running. The time was 0:31¼ at the quarter, 1:03¼ at the half and the finish in 2:07¼. The third heat was probably the best exhibition of the three, and all three horses went pretty close together from start to finish. There was never a time that Bystander and Ginger did not have a show if anything happened and never a time that they did have a look-in, if all went well, and it did. The time was 0:30¾, 1:01¼, 1:34¼ and 2:06¼.

The 2:11 trot was participated in by the following horses in the order of starting: Bellmont, R. A. Smith of the Los Angeles Gentlemen's Driving Club, owner and driver; Athasham, L. Bachant owner, De Ryder driver; Dewey, Smith & Smith owners, Walker driver; Richie Baron, Morris Bros. owner, Hayes driver. Bellmont broke early and Athasham took the lead at the quarter in 0:33. The others were bunched just behind him at the half. They passed the last post in 1:39 and then Bellmont took the lead and ended the stretch in 2:11¼, with Athasham, Richie Baron and Dewey in order. The same performance was repeated in the second heat, Athasham not seeming to have wind for a mile at his fastest clip, but Dewey and Richie Baron changed places at the finish, which was made in 2:10¼. In the third heat it was the same way to the three-quarter pole in 0:31½, 1:04 and 1:37. Here they all bunched for a fight down the stretch. The finish was the same order as the first heat, but the judges placed Richie Baron third. The time was 2:09¼.

Katherine, who started to beat her pacing record of 2:17¼ with a running pacemaker, gained her point in a pretty performance. The time was 0:31¼, 1:07 at the half, finishing in 2:16.

Goldennut, in like manner, used a pacemaker in an effort to beat his trotting record of 2:14, which he did, taking a mark of 2:11¼.

Margaret A. and Prince Zombro pulled off a matched trotting race, which was neck and neck at the half-mile post, in 1:14 and 1:15½ at the next station, and 2:28¾ at the wire, Margaret A. winning and the other horse a good second.

Pacing, special—
Argot Boy, b g by Argot Wilkes (De Ryder) . . . 1 1
Queen Pomona, b m by Pomona (Hall) 2 2
Time—2:08½, 2:03¼.

Pacing, 2:05 class, \$1,000—
Zolock, b s by McKinney (Walker) 1 1 1
Bystander, b g by Zolock (Hall) 2 2 2
Ginger, b g (Loose) 3 3 3
Time—2:05¼, 2:07¼, 2:06¼.

Trotting, 2:11 class, \$1,000—
Bellmont, b m by Zomhro (Smith) 1 1 1
Athasham, b s by Athadon (De Ryder) 2 2 2
Richie Baron, b g by Baron Wilkes (Hayes) 3 4 3
Dewey (Walwer) 4 3 4
Time—2:11¼, 2:10¼, 2:09¼.

SANTA MARIA RACE RESULTS.

The races held at Santa Maria during the week of October 21-26 inclusive resulted as follows:

Horses without records, \$150—
Pauline H. (p), h m by San Luisito (Carson) 1 2 1 1
Almo (t), b c hy Almonado (Mauchaca) . . . 3 1 3 3
Black Bart, b g by Gen. Gomez (Mead) . . . 2 3 2 2
Amapola, s m by Diablo (McCormick) . . . 4 4 4 4
Time—2:28, 2:28½, 2:29, 2:30.

2:25 class, \$200—
Flora B. (p), s m by Elite (Blosser) 1 1 1
Loretta F., b m by Ontap (Ferguson) . . . 3 2 2
Wayward Jr., b s by Wayward (McCormick) 2 3 3
Alamo, ch g by Almonado (Cody) 4 4 4
Anona, b m by San Luisito (Hamilton) . . . 5 5 5
Time—2:21½, 2:24½, 2:25.

Special, \$80—
Sultan Boy (t), b s by Bendon (Ferguson) . . 1 1 1
Tobasco, b s by Morris W. (Mead) 2 2 2
Nellie K., b m, untraced (Cody) 4 3 3
Bahe, hlk g, untraced (McCormick) 3 4 4
Time—2:34, 2:36, 2:28.

Free-for-all pace, dash, \$100—
Wild Nutting (p), b s by Wildnut (McCormick) . 1
Diablito, b g by Diablo (Ferguson) 2
Time—2:25.

2:40 class, \$150—
Almo, b s (t) by Almonada (Mauchaca) 1 2 3 1 1
Black Bart, blk g (p) by Gen. Gomez (Mead) 2 1 1 2 2
Honas Bismark, br g by Purissimo (Hamilton) 3 3 2 3 3
Time—2:25, 2:28½, 2:30, 2:30, 2:29.

2:20 class, \$200—
Flora B. (p), by Elite (Blosser) 3 1 1 1
Wayland Jr. (p), b s by Wayward (McCormick) 1 2 2 2
Loretta F., b m by Ontap (Ferguson) 2 3 3 3
Time—2:25¼, 2:26, 2:30, 2:35.

Special, \$75—
Honas Bismark (p), br g by Purissimo (Trainer) 1 1
Sultan Boy, b s by Bendon (Ferguson) 2 2
Alamo, ch g by Almonado (Mauchaca) 3 3
Time—2:27, 2:27¼.

Special, \$60—
Tobasco (p), b g by Morris A. (Mead) 1 1
Babe, blk g, untraced (McCormick) 2 2
Nellie K., b m, untraced (Mauchaca) 3 3
Time—2:24, 2:36.

MATCH UP THE HORSES.

This does not imply that those of the same markings or same color are to be worked together. Matching farm teams is more difficult than matching driving teams. A slow walking horse should never be put with a fast walking one, for you will have to constantly urge the slow one, and this soon irritates the other one. Match gaits; match temperaments and match horse-power. These are the three essentials to keep in mind when matching up the team for heavy work. Never put a young horse to very heavy, steady work, such as plowing alongside of an old staid horse. The youngster is apt to do more than his share, in spite of all you can do to equalize the work. When breaking a colt I have always found it best to put it alongside an even tempered horse that is not easily rattled. Such a mate will soon give confidence to the colt and he readily falls into work without much trouble. A correspondent says give the colt some light farm work at first, such as plowing or harrowing. That's risky. I would never hitch a colt to a harrow. You never know what they are going to do, and a harrow is a mean thing to get a horse mixed up in. I would rather give the colts light driving and as they become seasoned give them some heavier work. Match up the colts as soon as possible and when the teams are matched up don't change them all around unless for some very good reason. Horses have to learn how to pull and work together.—Farmer and Breeder.

Have you ever known any fashion more generally disfiguring than that of docking horses, except perhaps that other horror of "pricking" them? Big or little, the knife always goes through the same joint in the tail and the pitiful stump is then further tortured by the severing of sinews until it sticks up like a sore thumb. Did we graduate the amount of mutilation to the size of the bone, appearances would not be so incongruous. But we rarely do, and the 17-hand coacher flourishes a brush that would not dust a fair sized goat, making him as ill balanced and as much "down by the head" as a barge without a rudder.

WILL RACE THANKSGIVING DAY.

The members of the Sacramento Driving Club are all hard at work getting their horses ready for an afternoon of racing, to be held on Thanksgiving Day. It is proposed to charge admission to the track on that day, all the money to go to the Home for Orphans in that city, that the children may have a generous Christmas. According to the Bee the members of the club are entering into the affair with much spirit, and their work will meet with nothing but success. Six thousand tickets have been issued, and the way they are selling predicts a tidy sum for the homeless and parentless waifs for whose benefit the affair is to be given. Should the present ideal weather prevail, there will doubtless be a great outpouring of people to the race track on the holiday.

The afternoon's card will consist of three races. The entries to these races include the fastest horses in the city, for the driving club has invited all owners of fast horses to enter in the events. During the interval between the heats a band will play enlivening airs.

The judges of the races will be no other than the three Superior Judges—J. W. Hughes of Department 1, C. N. Post of Department 2 and Peter F. Shields of Department 3. These three servers of justice will hear no arguments of cases by drivers, all demurrers and answers will be overruled, and any disobedience of orders will be adjudged as contempt of Court. The Judges, however, retain the privilege of taking decisions under advisement.

When the affair was first proposed it was before the recent municipal election. The committee at that time agreed that the Mayor-elect, whoever he might be, must officiate as timekeeper. As the lot has fallen to Clinton L. White, he will have the honor of registering and authenticating all records made.

Chairman I. Christie of the program committee has to date received the following entries for the races: Class A—Instructor (Ray Dittus), Alton (W. A. Sayers), Briarwood (I. Christie), Penrose (Albert Elkus), Blanche T. (Charles Silva), Iron Bell (Fred Raschen).

Class B—Bobby Dobbs (Jay Wheeler), Baby Knight (L. Beech), Alick (Chris Jorgenson), Lady Bird (N. Pierce), Dr. Ryan (Walter Forbes).

Class C—Lady Mignon (F. Lindner), John F. (John Silva), Benton Bowl (R. Wilson), Presto (N. T. Hunt), Dora (E. C. Kavanagh).

SUCCESSFUL SALE.

The shorthorn sale of thirty-nine hulls and thirty-six cows and heifers, drafts from the Enterprise herd of H. P. Eakle, Jr., and the Roselawn herd of T. B. Gibson, at Woodland last week, was a great success. The prices realized were in the main satisfactory, and at the close of the sale Mr. Gibson announced that another sale will be held next year. Bull calves of the spring of 1906 brought an average of \$150, while the calves of the spring of 1907 averaged about \$70. The cows with calves at their sides did not sell quite so satisfactorily, but altogether the average was good.

Some of the buyers from abroad were Senator Rush, Howard Cattle Company, F. E. Johnson, Freitas Bros., the Glide estate, J. Van Meter, Dr. M. D. Hopkins, Mr. Fennell and several others.

One of the best features of the sale was a vigorous address on the cattle industry by the auctioneer, Colonel George P. Bellows of Mayfield, Mo.—Mail.

Sunol 2:08¼, the trotter that held the world's record in 1891, is among the mares that John H. Shults has consigned to the Fasig-Tipton sale. The big daughter of Electioneer is now twenty-one years old. Nancy Hanks 2:04, the trotter that first lowered Sunol's record after pneumatic sulkeys came into use, is also in the Fasig-Tipton sale. Mr. Shults is selling every stallion and broodmare he owns and is going to give up breeding trotters. He has reserved only thirty-one young horses to train for racing purposes.

Register your colts and fillies. If they are not eligible as standard, have them registered as non-standard. Sales are lost every day because owners cannot furnish an authentic and registered pedigree.

That the Thanksgiving matinee of the Los Angeles Driving Club will probably be the best the club has ever given, is the opinion of every lover of the harness game in Los Angeles. Frank Long is working his well known Siegfried, with a record of 2:16, and the horse is showing good form. Dr. Dodge has out his pacer, Lohengrin, who made a mile in 2:09. Godfrey Fritz is working Gen. Boodle, and this one stepped a quarter of a mile in 30 seconds on Friday. Boh Morehead will drive Boodle in the matinee. Fritz is also working his pacer, Billy Red, whose record is 2:10. Vice-president John W. Snowden has bought a new trotter in the East, which he will uncover at the meeting and, while he will give no information about the horse, it is known that it has an Eastern record of 2:16. G. A. Pounder is training Glory, who covered a half mile in 1:05 last Friday. Glory will be in against Danube in the free-for-all trot. John Reynolds is trying out his trotter, Hazel McKinney 2:09¼, and this one will appear in the 2:15 trot with Gen. Boodle and Ida Millerton. Dr. J. A. Edmonds, who has charge of the horse parade that will be seen just before the races, reports good progress and says the entry list will be large.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

GAME AND FISH CONVENTION AT LOS ANGELES.

The annual meeting of the California State Fish and Game Convention convened at Los Angeles on Friday, November 8th, with an attendance of over sixty delegates. Rapid work characterized the session, routine business taking up the forenoon. In the afternoon reports of committees and of the officers were read and approved.

The officers elected for the ensuing year were: H. T. Payne, president (re-elected); Edwin A. Mocker, secretary-treasurer (re-elected); Charles L. Powell of Pleasanton, W. A. Correll of Riverside, W. I. Keating of Santa Cruz, M. J. Connell of Los Angeles, H. A. Green of Monterey, vice-presidents.

After the reading of the secretary's report, which showed a good surplus of cash on hand, ten new members were elected by acclamation. The total membership is now 228.

After the business of the association was completed several interesting papers were read. President Payne read a protest on the recommendation of the Fish Commissioners that the fishermen's license be raised from \$2.50 to \$25.

Senator H. M. Willis of San Bernardino delivered an address in which he told of the obstacles he met with in procuring the passage of the hunters' license bill in the State Senate last winter.

The delegates appointed three committees to attend to the resolutions, constitution and game laws. Any questions which arise will be threshed out before the proper committee.

President H. T. Payne in his report said that two members of the Fish Commission who had opposed the sportsmen were no longer members, and that there was over \$85,000 in the fish and game fund, with rapidly increasing revenue. Mr. Payne also pointed out that bills for the protection of shrimp and striped bass, and also a bill lowering the sale of trout from one pound to one-half a pound, were killed in the last Legislature. For the next session he demanded that the taking of all kinds of fish by aliens for alien markets be stopped and that the license for commercial fishers be raised from \$2.50 to \$25.

Amendments to the constitution were passed, providing that all clubs or associations pay annual dues of \$5 to the Fish and Game Association; that the executive committee may advise change the date of the annual convention, and that persons under the age of 18 may become members without the payment of dues and without vote until they are 21, when they will pay regular dues.

As the association will meet again before the next Legislative session, it was deemed best not to suggest changes in the fish and game laws at this time, but to leave this matter to the next convention.

The Legislative Committee recommended that a hunting license be expended in the native varieties of game, rather than in the importation of new varieties, and that numerous field deputies be appointed to patrol various counties and enforce the laws.

The committee on resolutions recommended that one game warden be appointed in each of the game counties of the State, and that a fish hatchery be established in Tulare county.

Assemblyman Root of Nevada county criticized vigorously the State Fish Commissioners, claiming that they have ignored the association absolutely and that they had given no protection to game in the mountains.

State Senator Willis of San Bernardino county urged the delegates to use diplomacy if they expected to get anything from the governing powers. Such attitude was not favored by the convention, and it was evident that the Commission had lost in large measure the confidence of the sportsmen.

A. T. Jordan of San Diego asked the association to assist in securing the passage of a law to prevent seining in San Diego harbor, also a law forbidding the catching of croaker, yellowfin or corbina except by hook and line. The latter measure was similar to the one proposed by the Southern California Rod and Reel Club, which was killed in committee at the last Legislative session through the influence of the market fishermen. It is probable that should a reasonable mesh law be asked for there would be a better chance of securing legislation.

Santa Cruz is the meeting place of the next convention, to be held in November, 1908.

The remarks of Senator Willis and Assemblyman Root, above referred to, are in part, as follows:

Senator Willis said in defense of the Fish Commissioners:

"I have been interested for years in hunting and game laws, and I have learned that hunting depends on the strict enforcement of the game laws. I am gratified at the results of the license law. But in justice to the Fish Commissioners I want to say right here that this association should think long before it offends or criticizes by resolutions the governing powers and State officials. Sportsmen must use diplomacy if they hope to win any concessions.

"I have been informed that 105,000 license tags have been taken out and paid for so far, and I believe that before the end of the present fiscal year there will be over \$100,000 in the fund.

"There are two salient points for sportsmen to consider. First, to procure, propagate and preserve game; second, to prosecute every law breaker. Public sentiment, however, is necessary. I know that never in the history of San Bernardino county, during the last fifty years, has a jury convicted any violator of the game and fish laws. Only last week the District Attorney himself went so far as to advise a man to trap quail, and told him he had a right to do so on the theory that the quail were destroying his property because they happened to get into his peas!

"I defend the Fish Commissioners. They have promised me that they will introduce wild turkeys and Hungarian grouse."

Assemblyman Root of Nevada county followed Willis and aroused the convention with an attack on the Fish Commissioners, whom he accused of deliberately ignoring the sportsmen and allowing law breakers to continue their murder of game.

"A true sportsman does not go out with his gun and dog merely for the purpose of coming back to brag to his friends that he got a bag of twenty-five birds. The real sportsman goes for sport and clean enjoyment, and is satisfied to return with eight or ten birds, even though he may have opportunity to kill the limit.

"We demand that the State give every county a paid warden and that these game wardens be appointed not for their political pull, but for their knowledge and experience in game and fish.

"We demand that the Governor of California set aside the Fish Commission from politics. We want Commissioners who will really protect the game instead of giving up all their time to commercial fish."

"I differ from Senator H. M. Willis of San Bernardino. I think that the time for diplomacy and shillyshallying is past. I believe in going the limit in the prosecution of all violators of the game laws. And I want to emphasize right here my opinion of the State Fish Commissioners. They have ignored this association absolutely in the past. I know that they have given no protection to game in the mountains. We all know that law breakers have killed birds in the nest and deer in the milk.

"Let us demand of the Legislature to district the State, reduce the limit on every kind of game, and give a warden paid by the State to every county in California.

"The Fish Commission is hereby requested to consider the following recommendations: First, we recommend one game warden in each of the game counties of the State. Second, the people of Central and Southern California by petition have urgently asked this convention to recommend that the State establish a fish hatchery in Tulare county. Therefore, we request that you give this matter your attention, believing that it would be a valuable acquisition to the State."

On Saturday the delegates enjoyed an excursion to Mt. Lowe and other points. On Sunday numerous duck and quail shoots were in order.

A Practical Gun Club.

In order to afford further measures of protection to the game of the locality, the residents of Bangor, Butte county, have organized a gun club. The land within the radius of five miles around Bangor has been thrown into a reserve, as far as hunting is concerned, and notices posted that hunting upon the ground without a permit will result in prosecution.

The land thus placed in the preserve constitutes some of the best quail hunting ground in the county. This fact has been taken advantage of, and as a result the residents of the locality state that there is not half the quail there this year that there was last year, despite the fact that quail are generally numerous. This, they state, is due to the fact that the grounds are hunted out. It is to prevent this that the gun club has been organized.

Among the property owners who have taken an active part in the formation of the club, and whose property is included in the reserve, are Messrs. E. E. Allen, Fred Turner, Joseph Keif, Edward Aldersley, Henry King, C. M. Osgood, Will Reed, L. R. Hedges, Supervisor Rutherford, Frank Gooch, Samuel Duggins and Lloyd Boone.

Reports from the mountains are to the effect that the mountain quail are beginning to come down into the valleys, and that the birds are exceptionally numerous this year. In the Swedes Flat country, in particular, the birds are said to be very numerous.

A number of Bangor hunters were out on Sunday and returned with good bags.

It is reported that the game laws are "almost openly violated by the game dealers and restaurant keepers every day" in Pasadena.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

DUCK SHOOTING IN MEXICO.

Within easy reach of the City of Mexico can be found a veritable paradise for the duck hunter, if the following is a true story, and which is recounted by a local sportsman who has but recently returned from a business trip through the Republic.

The methods employed to slaughter ducks for the market will no doubt have a correspondingly depleting effect upon future supplies. For the sportsmen, who is orthodox in his observance of the ethics of sport, the story is, to a certain exasperating extent, an interesting one:

Down in Old Mexico the duck season is now on. It will be better a few weeks later, but just now the sportsmen of the Republic who "have a friend" and who can get the necessary permission for shooting over any of the numerous haciendas where the game wardens protect the ducks, have shooting which is not equaled in any other part of the world.

On the larger lakes, like Lake Chapala, for example, it is possible to hunt without a permit of any kind and no one will molest the sportsman. But in the valley of Mexico particularly, the ducks come wherever there is a damp spot, almost, and the numerous little shallow lakes team with thousands of the feathered game, which are easy marks for the sportsman.

But the man with the gun who has not some friend or some special manner of getting permission to do his shooting over some of the protected area, has more difficulties in Mexico than he would have in perhaps any other section. The hunting of the sportsman with his shotgun is put under the ban in order that the "armada" may do its work. This is a contrivance for the wholesale slaughter of the ducks and is one of the most deadly devices of its kind which has been put into use for getting game in large quantities for the market.

The "armada" is a battery of from fifty to one hundred guns, which are set in a row at a given angle so as to cover an expanse of the shallow lake where the ducks are known to gather for feeding. They are always placed on a natural feeding ground and this feeding ground is often made doubly attractive for the ducks by the scattering of wheat or other grain on the water, so that the ducks will come there.

The guns are arranged in a line and are so set that they will slaughter the ducks as they swim on the water. Some of the "armadas" are really made up of two batteries instead of one. One of the batteries will cover the water and the other is made for firing just after the discharge of the first armada and is so leveled that it will catch the ducks just as they start on their flight, after the discharge of the first set of guns.

The guns are so arranged that by pulling a wire the entire battery is discharged at once. Sometimes the guns which compose the battery are of a special design on a swivel and are made for this very purpose, but often the crudest sort of material is resorted to in order to make up the battery. Often good strong gaspipe is secured, pipe which is reasonably sure not to burst, and is converted into a crude weapon for the purpose of the armada.

Invariably the guns are loaded literally "up to the muzzle" and anything hard serves as ammunition, old nails being included in the category. When the armadas are constructed, instead of the crude gas pipe, of a most approved type of shotgun, made for this purpose, which scatters widely and which will stand without bursting, being jammed full of shot and powder they are often discharged by the use of electricity, and thus every modern expedient is adopted in order to get at the ducks and to slaughter them in large numbers for the market.

It is often the case that three or four boat loads of ducks are killed at one discharge of an armada of this character. In addition to those which are killed at the discharge of the armada in wholesale firing of this character there are naturally very large numbers of wounded which are hunted down singly by hunters who may have been invited to witness the discharge of the armada.

While the best feeding grounds are always selected for the planting of the armada, at the same time artificial methods are in vogue for getting the ducks in large numbers on the feeding grounds in front of the guns. This is in addition to the device of throwing food on the water.

It is often the custom to have a number of Indians go out in the neighboring marshes and shallows where there may be ducks, and by gradually closing in large circles to frighten up the ducks from place to place until they are driven to the feeding grounds where they are destined for the slaughter of the armada.

This is made possible by the fact that the ducks there are much tamer than those found in most sections of the United States, and therefore when frightened up do not fly entirely out of the section. They are content with a short flight, and when started up rarely go a great distance. They naturally gravitate to the best feeding ground and there meet slaughter.

The duck shooting in Mexico is best in the early morning, although the ducks are so numerous that there is good shooting practically at any time of the day. But in Mexico, for some reason, the ducks do not fly in the afternoon or evening until about dusk or after. They do not move in their flights early enough for the sportsman to have a chance for good shooting. Generally they rise at a time when it is possible to see them against the Western

sky and then the man with the gun has to do his firing by guesswork to a large degree. Even under these conditions the good sportsman who is clever with his shotgun will get a plentiful bag. On account of this late flying just at the time when dusk is becoming night, the sportsmen choose the early morning, that is to say, the sportsmen who follow the standards of the game and who do not shoot at ducks as they swim, but only on the wing.

With the ducks protected as they are for the purposes of getting them by the wholesale through the use of the armada, the restrictions are decidedly severe as regards the average sportsman who wants to hunt with his shotgun and go after the ducks on the fly. Those who have charge of the armadas appreciate the fact that much shooting by sportsmen is likely to frighten the ducks away and this is made the grounds for refusing 99 out of 100 sportsmen who want to get out and hunt the ducks in the approved fashion of those who love the sports of the field.

Railroad men are generally hunters, and through their acquaintance "along the road" they have the opportunity of getting permits for themselves and a friend or two to hunt over some hacienda, even where the ducks are protected. The ordinary sportsman, therefore, usually has a railroad friend and the pair go together. The ducks are so numerous that they can be found even on the haciendas on which there are no lakes. The irrigation ditches are sufficient, apparently, to attract the ducks.

There are a few canvasbacks to be found in Mexico and few mallard. But of the teal duck there is an endless variety. The ordinary large duck, which is plentiful is called the "golondrina," and corresponds to the American widgeon or pintail. In duck shooting the season lasts during November, December, January and February. There are no general game laws to protect the ducks. The restrictions of the individual haciendas, however, are harder on the average sportsman than would be a law for the general protection of game.

Lake Chapala is the place with the reputation for duck shooting in this section, and this is one of the few places in Mexico where geese are also to be had by the sportsman.

In the neighborhood of Mexico City there are the endless numbers of small lakes, where the ducks can now be found by the thousands. This is the case at Penon, for example, but the ordinary citizen with the gun will have very little chance here on account of the fact that the ducks are protected in order that the work of the armada may be more destructive when it is discharged.

Once a week is about the ordinary interval for the discharge of this battery for the slaughter of ducks and in the intervals those who have charge of the armada do not like to have hunters shooting about among the ducks and frightening them.

In the Laguna district of the Republic ducks by the thousands and the thousands, might be said even by the millions, are to be found. Travelers report that on one large lake between Monterey and Torreon, the face of the water is literally covered with ducks. About Guadalajara and Zapotlan, ducks are shot in large numbers. Lake Cuizeo and Lake Patzcuaro are points where sportsmen often resort for duck shooting, being in train distance of the capital.

City of Mexico sportsmen who enjoy shooting of this character were early this month busily engaged in going over their kits and preparing for the shooting season. Ducks in numbers are now being seen swung over the shoulders of Indian vendors, who cry their wares through the streets of the city as do the fruit and the honey and the vegetable man and the cry of "duck" will, within a short time, become almost as common as that of "oranges for sale," until the season has closed.

Several weeks ago we published a list of counties and amounts collected in each and turned over to the State Controller for the hunters' license fund. Since then returns have been received from other counties as follows: Santa Cruz county, \$1,175; Mono, \$160; San Luis Obispo, \$268; Placer, \$1,000; Inyo, \$586; Riverside, \$1,695. The total amount collected in San Bernardino county thus far amounts to \$2,625. The total amount of collections in the State is now close to \$70,000.

One of the first cases reported where an attempt was made to evade the provisions of the hunters' license law is that of Dr. J. H. Seager, a well known dentist of Sebastopol, Sonoma county, who was arrested by A. F. Lea and Frank McAninch, deputy game wardens, for hunting without a license. He entered a plea of guilty before Justice of the Peace S. Graham of Sebastopol and was fined \$15. Dr. Seager is not a citizen, and would have had to pay \$25 for a license to hunt, so borrowed the license of a friend, and sallied forth in quest of quail. The case was reported to the game warden and an investigation made with the above result. The borrowed license was confiscated, and it will be traced to the owner by the records.

TROUT PLANTING.

To the Fish Commission is due the good will and support of the anglers for their recent excellent work in stocking many fishing waters with trout fry.

French Creek, a tributary of the Feather River, was stocked last week with 50,000 young trout, sent from the Sisson Hatchery by the Fish and Game Commission.

The evening the thousands of finny beauties reached Oroville they were immediately loaded on John Gable's wagon and started for French Creek, as in order to keep the fish alive the water must be changed or kept in motion. The latter was the easier, so Gable started on an all-night drive over mountain roads.

French Creek is about twenty-five miles from Oroville. Its waters are very cold, even in the heat of summer, so there is every reason to believe the trout will thrive and multiply in it.

A score of San Jose sportsmen, under the leadership of Game Warden Koppell, and assisted by employes of the Interurban Railway, labored from dusk one night until 3 o'clock the next day stocking the streams within reach of San Jose with 60,000 young trout. The fish were received at 3:30 in the afternoon from the State Hatchery at Sissons and were in charge of W. O. Fasset. There were 5,000 trout in each of the twelve cans, and as it was necessary to constantly air the water, it was decided to immediately distribute them. A special car was furnished by Manager Chapin to convey the party to the various points of distribution.

Stevens, Guadalupe, Saratoga, San Felipe and Los Gatos Creeks each received a quota of the trout, and ten hours' of arduous work was necessary before the task was completed. There was a steady downpour of rain throughout the night, but no true disciple of Sir Isaac fears a little wetting. Hubbard McKee, George Osborne, Charles Pierce, F. S. Narvaez and L. M. Greeninger were among those who helped Mr. Koppell to stock the streams.

There have been 100,000 young trout recently placed in the surrounding creeks, but Mr. Koppell says that a great many more are necessary. There is so much water being taken from the streams that the steelhead and other parent fish cannot ascend the creeks in the spawning season, although dams have been placed in many of the streams to assist the fish to their spawning grounds.

Mr. Koppell suggests that local sportsmen co-operate with the Brookdale Hatchery. Plans are now being devised by San Jose Waltonians to assist the hatchery financially, as the return from the donation would more than recompense for the outlay.

G. H. Grey of Washington, D. C., has been placed in charge of the Tehama Fish Hatchery, on Mill Creek, near Red Bluff. The place is more correctly known as a station, or eyeing station. The salmon eggs are brought only to the State when the young fish begins to move within the egg. The new method of taking eggs allows the fish to be killed before spawning. After the spawn are taken they are placed in metal baskets, which are dropped into wooden troughs. The eggs are inspected daily and non-fertile ones taken out. After the embryo fish reach the proper state they are shipped to the hatcheries at Sisson or elsewhere and later distributed to various streams.

The hatchery is a mere shed, but contains ninety troughs, with a capacity for 25,000,000 eggs. Auxiliary troughs can be used, making a total of 50,000,000 eggs capacity.

Last year seventy tons of female salmon and forty tons of male were taken. Only the largest and most vigorous were used for propagation. Forty million eggs were taken, and all but 7 per cent matured.

About twenty men are employed. Some sell for fish, others sort the eggs. The work is very interesting to a spectator, but damp and productive of colds and rheumatism for the workers. Constant vigilance is required to keep out poachers, who would find the preserve an easy place to obtain a load of salmon.

The salmon industry is greatly benefited by the hatcheries, as by natural laws about 10 per cent of the eggs deposited in streams mature, the others being destroyed by the pirates of the streams.

The Los Molinos Land Company controls the water now used by the Government in the station and unless an agreement is reached there will be no Government station there.

A consignment of fish to stock the streams of San Benito county was received from the State Fish and Game Commission early this month. The young trout were placed in Bird, Los Viboras, Dos Picachos, Pescadero and Pacheco Creeks, and the black bass in the Pajaro River.

Large numbers of black bass were collected last week from the rapidly drying pools and overflow reservoirs caused by the breaking of the Sacramento River levees during the flood last spring. Deputy Commissioner Manuel Cross and Game Warden Geo. F. Neale of Sacramento were engaged in the work of rescue and looked after the transplanting of the fish in other waters of this State and Nevada.

This work is being done at the behest of the Fish Commission, and residents of the districts in which these pools and reservoirs are situated are aiding in the work. It will be the endeavor of the Commission to save all the fish that have been landlocked.

A GOVERNMENT BUFFALO PRESERVE.

The buffalo herd presented to the National Government by the New York Zoological Society last year to form the nucleus of a great Southwestern herd has just been transported to the new range of 7,680 acres prepared for it in the best portion of the Wichita forest and game preserve, Southwestern Oklahoma.

Fifteen fine animals, the pick of the splendid herd of forty-five head in the New York Zoological Park, were crated for shipment October 10th, each in roomy and comfortable crates, and sent to Cache, Oklahoma.

In view of the nature and object of the shipment, a gift of the people, for the purpose of helping to preserve the American bison from ultimate extinction, the American Express Company and the New York Central lines transported the two cars free of charge from New York to St. Louis, and the Wells-Fargo Express Company also made a free gift of the transportation over the Frisco Road from St. Louis to Cache, Oklahoma.

The idea of a Southwestern National herd, founded by a gift from the New York Zoological Society, originated with Dr. William T. Hornaday, director of the Zoological Park, and from its earliest mention it was warmly indorsed by the executive committee of the society. The offer was made to the Secretary of Agriculture, who immediately accepted it, and invited the society to select a site for the new fenced range that would be necessary. Forthwith the society dispatched a special agent, J. A. Loring, who went to the Wichita reserve and with Supervisor E. F. Morrissey, carefully examined the whole available territory.

A location was urged upon and duly mapped out. Mr. Loring submitted to the society an elaborate and thorough report, which was transmitted to the Department of Agriculture, and to Congress. Secretary Wilson secured a special appropriation of \$15,000 for the erection of a wire fence to inclose twelve square miles of range, and to erect corrals, sheds and a hay barn.

This work has been proceeding, and will soon be completed, under the direction of the Forestry Bureau of the Department of Agriculture, whose officers have from the first been keenly interested in the undertaking. All the improvements were planned by Mr. Hornaday, and the animals for the nucleus herd were carefully selected by him.

The buffalo herd of the New York Zoological Park has for a long time been one of the finest sights of that great home for wild animals. Originally planned to contain twenty head, it numbered previous to this shipment forty-five as handsome buffaloes of all ages as ever were brought together. Ten lusty calves have been born this year.

But notwithstanding the fine condition of this herd, the officers of the Zoological Society know that the only sure way by which the American bison can be preserved in full vigor for the next 200 years or more is by establishing herds under National or State ownership, on public lands, in ranges so large and so diversified that the animals will be wild and free. Under such conditions Dr. Hornaday declares that no ill effects from inbreeding ever need be feared.

The herd for Oklahoma is composed as follows: Six breeding cows, one big bull, "Comanche," five years old and master of the herd; one bull three and a half years old, two bulls and one cow in third year, one bull and one cow in second year, and one pair of calves, male and female, six months old.

In this collection four different strains of blood are represented, and there will be nothing to fear from inbreeding.

The shipment was in charge of Frank Rush, keeper of the Wichita buffalo range, and H. Raymond Mitchell, chief clerk of the New York Zoological Park. The buffaloes were in two patent stock cars, and traveled in passenger trains the whole distance. On arriving at Cache, fifteen teams were in readiness to haul the buffaloes, crated as they were, twelve miles to the new range. The utmost care will be observed to prevent infection by the Texas fever tick that is such a scourge to cattle in the Southwest.

Jack Fanning came to the front at a recent shoot of the Pleasure Gun Club at Englewood, N. J., with 151 out of 160 targets, on November 5th. Jack's shooting eye is always in good working order. Jim Elliott was second with 150 and Sim Glover knocked out 148. The amateur high averages were shot by Fred Truax and Will Sorter, 151 each. Dr. Richter was next gun up, with 135.

The second shoot for the new challenge cup of the Hawaiian Gun Club was held at the Kakaako traps, October 16th, and resulted in a win for J. E. Whitney, who made a perfect score, picking off his ten birds in succession without a bit of trouble. J. W. Harvey, who won the first shoot, fell down a little from his previous records, and made eight out of ten, a score which was equaled by Irving Spalding. The fact that the cables Restorer is at Guam has taken away several members of the club, and their return is being awaited anxiously by all those who are interested in the sport. The scores of the day were: J. E. Whitney, 10 out of 10; I. Spalding, 8 out of 10; J. W. Harvey, 8 out of 10; K. B. Porter, 7 out of 10; T. Treadway, 7 out of 14; A. Waterhouse, 3 out of 14.

MARSH AND UPLAND SHOOTING NOTES.

These uncertain days of the duck hunting season are trying the patience of the local powder-burners to a great tension. All down the line of nearly all the bay counties marsh duck shooting resorts the query is the same—where are the ducks? Ducks are in plenty in the up-river overflowed districts, but they might as well be on the moon for all the good the man who cannot take three or more days away can get out of present conditions.

On the Suisun marsh the majority of the ponds are frequented only by chirping mudhens and squawking bitterns. The famous Stewart ponds have been the exception, however, last week Jack Bourdette and several friends shot good bags of quackers.

A report from Suisun last week states that big flocks of Northern birds were arriving and numerous limit bags were shot. Members of the Joyce Island Gun Club have been getting good bags of ducks for a week past. Last Sunday Jas. Maynard Jr., "Doc" Ayres and Dr. C. B. Leonard bagged limits of teal and sprig.

Canvasback have been rather plentiful in the Yolo Basin during the week, a number of Sacramento sportsmen having secured good bags of "cans."

The duck situation will not locally improve materially until freezing weather sets in up North and compels the birds to light out on the Southern migratory trip.

The use of live decoys in duck shooting is becoming more and more popular. W. W. Richards recently secured from Otto Feudner several cross-bred birds raised on the Feudner ranch, near Dixon. These decoys soon become wise to the situation and their own peculiar sphere of usefulness, so much so that it is surprising to observe the clever and intelligent manner in which they lure their wild cousins within reach of the waiting gunner in the blinds.

Richards is responsible for the following solution of the problem as to why ducks are scarce in the immediate vicinity of Cygnus station. He declares that "Achille Roos" marsh palace is so big and imposing that it scares the ducks out of the whole country."

Will J. Golcher enjoyed a shoot last week at Richard's preserve, near Cygnus station. A fair bag fell to the different guns. Golcher tried a 20-bore Hunter single-trigger, full-choked, on the ducks and found the firearm just as effective as the heavier 12-gauge gun is. The small bores, 16s, 20s and 24s are gaining in favor every season. As to their shooting qualities they are not a whit behind the heavier guns and have the added advantage of an appreciable difference in weight, particularly as applies to the ammunition.

Last week the Suisun club preserves located near the bay shore districts afforded some good bags. On Wednesday Achille Roos bagged the limit on sprig, widgeon, mallard and cans.

Reports from southern California state that Los Angeles sportsmen are getting limit bags of ducks quite a few English snipe and good quail hunting.

Hunting conditions round about Sacramento last week are evidently enjoyable, as given in the following report.

It was a happy bunch of hunters that returned from the Big Lake Gun Club preserves Sunday, for after over a month's vain search for good sport they had at last found a quantity of ducks on the lakes and some excellent shooting was had. When the smoke of burned powder had cleared away, after a hunt lasting a good part of the day, a number of the hunters found they had killed the limit. Some were not so fortunate as those who bagged as many as the law permits, but everyone had superb hunting and returned well pleased.

The condition of affairs which prevailed at the Big Lake region near Clarksburg was not general on other hunting grounds. The members of the Del Paso and Glide preserves found no improvement in the hunting that has been had since the season opened. Ducks were few and far between and it became a question of getting even a shot at the broad-billed tribe. Hunting coats looked no fatter than empty flour sacks for those who spent the day in these preserves. Sometimes a hunter thinks himself fortunate in bagging just one lonely bird, but at this time of the season nothing but fifteen or twenty is considered to be even a respectable showing. Yet there are an awful lot of duck chasers who have not carried this number of dead fowls home during the entire season.

In the lake regions conditions seem to be improving. At the Washington Lake, Will Johnston succeeded in bagging twenty-six. Will Hintz killed eleven and Frank Johnston an even dozen. Shooting on the Washington Lake is not what it should be for so late in the season and some of the members are getting disgusted with spending a day in the marshes and bagging one or two birds.

The long expected birds from the northern regions have not yet come down in thousands. Weather conditions up there are just what the ducks enjoy and until there is a big change they will not leave.

Quail hunting needs more moisture and more icicles before the conditions will be of the best. The whole secret of this sport is how to hunt the birds. Any number of sportsmen may invade a region where quail abound and unless they know the habits of the birds the best they will get is one pot shot when the band jumps up. An experienced quail hunter knows just where the birds go when the band is scattered and goes to work to rouse them up.

Geese are reported to be coming in by the thousands and the section around Gridley is already infested with them. The species are speckled breasts and yappers.

Quail hunting conditions for local sportsmen will improve after the rains have made the heavy brush cover untenable for the birds. At that, sportsmen who have hunted the various resorts in the Marin hills have secured many limits of quail.

DOINGS IN DOGDOM.

The Southwestern Kennel Club is to be congratulated on its radical departure from conventional lines. The judges for the coming show at Los Angeles will be a selection of home talent. Now that the precedent has been established by one of our prominent Coast clubs the course is clear for others to follow. One of the greatest handicaps kennel clubs out here have been burdened with in the past is the heavy expense attendant upon the engagement of a judge or judges from the East or across the water. There is no question but what there is thoroughly competent judges among the Coast fanciers. But, heretofore the old axiom, "a prophet is unhonored in his own country," has been a potent factor in denying recognition to home developed material. There is no reason why the good example of the Los Angeles club can not be followed, and with appreciable benefit.

Exhibitors, as a rule, are generally solicitors for a judge from beyond the Rockies. That is to be expected; neither individuals nor specialty clubs foot the hills and in such case it is very easy to urge the selection of a prominent judge from afar. If the distances and time consumed were not so great it would be different, but under the circumstances the sooner Coast clubs and exhibitors accept Coast judges the better will it be for Coast bench show clubs.

The judges agreed upon are the following: Norman J. Stewart of San Jose, Bulldogs and Collies; Chas. K. Harley of San Francisco, Fox Terriers, Irish Terriers and Foxhounds; Arthur Bennett of Oakland, Pointers, English Setters, Gordon Setters, Irish Setters, Irish Water Spaniels, Clumber Spaniels, Field Spaniels and Greyhounds; John Brown of Riverside, Airedales, Dalmatians, Bull Terriers, Boston Terriers, Scotch Terriers, Skye Terriers, Black-and-Tan Terriers; James Ewins of Los Angeles, Bloodhounds, Mastiffs, St. Bernards, Great Danes, Russian Wolfhounds, Deerhounds, Dachs-hundes, Cocker Spaniels, French Bulldogs, Corded Poodles and all toy breeds.

The gentlemen above named are well known and popular, and are enthusiastic fanciers and winning breeders. Among other things, we might mention the most pleasing success of Mr. Harley in breeding and sending a dog to the New York show, Ch. Wandee Knight, that lowered the colors of the best the East or England put in the going.

The Southwestern Kennel Club is going ahead and making every preparation for the banner Southern show up to date. Mr. Geo. F. Herr, the well known Boston Terrier fancier, is at the helm this year, and that, without disparagement to the gentlemen who have so successfully carried on the previous shows, means that the coming show will be well managed in every detail.

As an indication of a great and growing interest in dogs in Southern California, the Los Angeles Tax Collector's records alone shows that nearly 6,000 residents of the city of Los Angeles have paid dog license this year, which is gratifying to all dog lovers, as these registrations and the little tag furnished to protect "man's best friend" from the dog-catcher cost \$2 each, and it is doubtful if any other city in the United States can show such a record, in proportion to its population.

The dates for the Los Angeles show are February 19th to 22d inclusive.

The hench show committee consists of Kenneth Pruess, Kingsley Stevens, P. N. Nisson, Count Jaro von Schmidt, Dr. L. W. Young, Paul Pipers, Huron Rock, C. T. Torrey, Richard Halsted, R. T. Cochran, Ernest Kennedy and W. K. Peasley.

Every effort will be made to pull off a five-point show.

Rumor has it that a string of Eastern cracks will come to the Coast next spring.

An effort was recently made to arrange for a spring circuit, beginning with Los Angeles. This project has fallen through so far as the South is concerned. The orange belt club is not inclined to change dates; the claim is made that the month of February is the best time, for many reasons, for the holding of the Southern show. This is too early for San Francisco, Oakland and Portland. The shows at the three latter named cities will probably be arranged so that there will be a three-show circuit, at all events.

The Pacific Coast Field Trials Club's annual trials are scheduled for Bakersfield, commencing on Monday, January 20, 1908. Derby entries will close December 15th, the All-Age nominations are open until the night before the drawing.

Local dogdom has been awaiting a favorable response from the Hotel Del Monte management, with

the end in view of holding a one-day show at the famous Monterey hostelry. The prevailing sentiment among the fanciers is keen for these one-day doggy functions, and should the Del Monte project not mature there is a probability that a shift will be made and Tanforan selected for an open-air one day dogfest some time next month. The show held at either place will no doubt draw a big entry. Judging will necessarily be done by home talent. At that there is most excellent material available. It is believed that should Tanforan be finally decided upon, by reason of the track being within easy reach of this city and other acceptable conditions, shelter for everybody and his dog should it rain, for instance, that there will be a very large attendance and benching of dogs.

The Pacific Advisory Committee held a rather strenuous session Tuesday evening, November 12th. This body is the Coast "big stick" for the executive fountain head of dogdom in the United States. The aftermath of the recent Stockton Kennel Club show, in the shape of several individual protests, and also the committee's criticism of technical details in the management of the exhibition, were gone over by the Committee in executive session. There was a large attendance of interested fanciers.

Among other rulings of the board it was decided that in the case of the protest of George A. Nieborger, contesting the award of a cup for the best brace of Cocker Spaniels shown, the cup given to McKay & Leonard of Stockton was ordered returned to the club's secretary, A. M. Barnett, to be held for future competition. The competition was deemed irregular, in that the bench show committee at Stockton refused to allow, under a misapprehension of the club rules, the entry of Nieborger's Cockers. The Committee therefore ruled that the competition was not complete and the award for this prize void.

In the matter of the entry of the Portland Pointer Mason's King, the club was ordered to refund the entrance money and repay Mr. Pabst his expenses in sending the dog from Portland to Stockton and back. Mason's King was not judged, the claim being made that the entry was received after the closing date.

Another protest considered was on the construction of the A. K. C. rule which prohibits an official of the show from "exhibiting" a dog in the regular classes and in competition for prizes. Superintendent Tom Blight handled a dog in the ring and won with his charge. The losing fancier protested the win on the ground that Mr. Blight violated the rule. This protest was not allowed and the win of Mr. A. P. Cresswell's Cocker Spaniel Ch. Cressella Nancy stands. There is quite a distinction and difference between "exhibiting" and "handling a dog in the show ring." Exhibiting a dog is entering, benching and competing for a prize in the manner specified by the rules. Handling a dog in the ring is entirely another matter and does not come under the technical supervision or distinction of the show officials or rules, it being merely a matter of displaying the style and quality of the dog.

The Stockton Club was penalized in a minor amount for publishing a catalogue not of regulation size.

The members of the Advisory Committee present were: Dr. W. S. Burnett, W. W. Stetheimer, Chas. K. Harley and J. P. Norman.

Frisco Kennels recently purchased of George M. B. Gray two good Irish Water Spaniels, Pat M. (Ch. Dan McCarthy-Dot C.) bred by T. A. Carson of Toronto, and a bitch Dot Malone (Dennis O'Neil-Coats' Malone) bred by a well known Wisconsin fancier. Pat M. was first winners at the last Oakland show. The bitch is a very promising one-for brood purposes.

Mr. Bay states that his kennels are attracting the attention of Eastern fanciers, so much so that he has recently received some flattering offers for his premier brood matron, Ch. Rowdy Girl.

Dr. J. A. Wiborn of San Francisco recently purchased two good Bull dogs, Walsingham Roy and a bitch. Both dogs reached here this week in good fettle. The Bulldog fancy on the Coast has lately taken on quite a jump up.

The California Cocker Club held a well attended meeting on the 18th inst. The officers elected for the ensuing year were: J. Hervey Jones, president; Mr. Blackwell, first vice-president; Mrs. W. C. Ralston, second vice-president; Alex. Wolfen, secretary-treasurer; executive committee, D. P. Cresswell, A. L. Cresswell, Leo Parks and Phil Wand.

The club is in a very prosperous financial condition and with a large membership roll.

It was determined to hold a specialty show next February. This is a move in the right direction, the more specialty shows the better for the regular kennel club shows.

A Fox Terrier specialty show is on the card at Victoria, B. C., for Thanksgiving Day—John Turner of Vancouver will judge. Sixty-eight dogs are entered and there is a long list of regular and special prizes.

THE FARM

EQUINE LIKES AND DISLIKES.

"Did you ever hear of one mare kidnapping another mare's colt?" asked a stock man from Tee Dee, Mont., who drifted into town last week with a carload of horses just off the range to a Omaha Bee representative. "It isn't exactly common, still scarcely a spring passes with its crop of young colts that I don't have one or two cases right in my own house hunch.

"It's one phase of the love horses feel for another. The attachments of animals for one another and for men and places make an interesting chapter in natural history.

"You can't work much among horses—or cattle, either, for that matter—without coming up against their friendships and their dislikes. And even mules—Western mules, that is—sometimes show a genuine affection and something enough like conscience and what in a man you'll call professional pride to be taken for them.

"The kidnapping of colts generally takes place after the first colt or two have come. The first colt is always an object of tremendous interest to the rest of the bunch. The grown-ups hang around it, they watch its every movement, protect it, pet it. It's like the first baby born to a young couple, with a big circle of adoring uncles and aunts and grandpas and grandmas, standing around worshipping it.

"Sometimes this affection will run away with one of the mares, especially if she has lost her own colt. She will hang around a colt trying to enlist its affections, with a view of coaxing it away from its mother, and some fine day she will sneak away with it.

"Of course, the true mother is frantic at the loss of its kid, and I have to drop everything and restore the lost child to its rightful parent. Sometimes the colt prefers to stay with the wicked, designing mare. Sometimes it runs back to its mother with every show of joy. But, either way, it's a clear case of kidnapping.

"These western range animals have lots of the old Adam in them, meaning what was good in Adam as well as what was bad. Take the friendship of horses for one another, for instance. There's something very pretty in that.

"Horses run together in hunches or groups. These hunches are like big families or clans or fraternities. The horses of a hunch get so attached to one another that it is impossible to separate them on the range.

"Say you want a couple of mares out of a bunch. Do you think you can just ride out and bring them in? No, sir. You'd take every horse in the bunch or none at all. They stick close together, herding one another, watching out that the weak old ones and the little young ones don't get cornered or left behind, and the leader—every hunch has its leader—would see to it that you took 'em all or left 'em all. If I want to get in one colt to brand I have to corral all of the eighty in my horse hunch.

"It's only Western range horses, so far as I know, that develop friendships like this. In other sections it's every horse for himself and the devil take the hindmost. There's just as much difference, for instance, between the Blue Grass horse and a Montana bronc' as between a Kentucky colonel and a Custer County cowboy. Kentucky horses are that selfish!

"We Montana fellows had an illustration of the difference at the beginning of the war with Spain. It was down in Chicamauga, and we had Kentucky horses for mounts.

"The first night after we had reported we turned our horses loose in the country outside the town, supposing, of course, they'd stick together throughout the night like broncs and that next morning a man could go and bring the whole bunch in.

"But instead of banding together and keeping bunches in the chummy 'How are you, old man?' style of the prairies, no sooner had each horse slipped his bridle than he lit out for

a corner where he could be by himself.

"When morning came the Montana cowboys were in despair. But bring in the horses they must, so Bert James and one or two other fellows went out with their ropes, determined to rope something or hust.

"James succeeded at last in locating his own horse and roping it. And then there was something doing sure.

"Old Kentucky had never seen a rope before, and never seen one descend, writhing and hissing through the air, over the head and around the neck of any horse of his acquaintance, much less his own. As he felt it tightening around his windpipe, he naturally tried to shake it, rearing and plunging, now standing on his hind legs, now hoisting, until he had pranced and sidestopped plumb into a tent that happened to be in the way.

"James stayed with him till he had succeeded in getting a hackamore on his head. By that time the tent looked as if a Kansas cyclone had struck it. The pegs had been pulled out, the sides gashed, the guy ropes snapped and the whole top had collapsed.

"A voice came out of the ruins of the tent.

"Who are you?" is demanded in a tone of authority.

"Bert James, Montana First Volunteers."

"Well, I don't want this thing to happen again," went on the voice that was used to being obeyed.

"The cowboy faced about in the direction from which it came.

"You blankety, blank, blank," he thundered, "do you think we want it to happen again?"

"Then he chanced to look up. Towering above him out of the wreckage of the tent stood General Grant.

"There was a twinkle in his mild blue eyes.

"Young man," he said sweetly to the Montana cowboy, "you want to be a little more subordinate in the future or you'll get into trouble."

"Talking of friendships of range horses for one another reminds me that range cows show a curious affection for the spot where they have their first calf. For years afterward, if it is possible, they will return and have their calves in the same old place.

"A few years ago I hought a bunch of cows in Ekalaka and seven out of the number that looked to be in the poorest shape I put in the cow shed. There a little later they had their calves. Then as soon as the calves were branded I turned them all out on the range.

"The following spring when the shed was left open to dry, six of those seven cows came back and had their calves in it again. They didn't come together, but during April and May they all sauntered in. They had found their way back, one thirty miles, one ten, one over twenty-five, and so on up to fifty. The seventh cow had died or doubtless she'd have turned up too.

"Peculiar? Well, the peculiarest thing about the whole business to me was that each cow returned to the exact corner or stall where she had been kept the year before. And the six cows kept that caper up as long as I kept them, which was five years or better.

"But the most interesting exhibition of instinct or memory or association of ideas, or whatever you like to call it, that I ever saw was in a couple of cow ponies and an old mule that used to be drifting about on the range north of the Yellowstone a few years ago.

"You sometimes read in the papers of worn out old fire department horses who, when an alarm rings, forget the peddler wagons, or dump carts they are pulling and dash off for the fire, all their dormant selves awaking at the dear old familiar clang. Well, that's the sort of a thing that happened to Button on Sunday, the old X I T cow ponies.

"Year after year they had worked on the round-ups till their joints got stiff. Every May they would start out with the outfit, following down one creek and up another till November and frosts made rounding up uncomfortable. Then they'd be turned out on the range for the winter till

the next May would begin the old round-up life all over again.

"Round-up work is devilish hard on ponies. Worse than polo, if possible. They age early under it. Button and Sunday couldn't have been over seven or eight when the X I T men decided they were worn out, put a couple of fresh ponies in their place and started off without them.

"In the course of the summer the outfit struck the valley where the two old broncs were grazing. No sooner did the derelicts catch sight of the familiar round-up wagon and the boys who had been their pards than they insisted on throwing in with them. The boys couldn't shake 'em.

"And so as long as the X I T was operating in that country, Button and Sunday would continue to work in with them. Without any man riding 'em, they'd spend their morning circling, then stand on herd or help work the herd afternoons. Say, but they were stars at standing on herd! There weren't no foxy old cow or cocky young steer could rush 'em or fool 'em.

"When the outfit had worked its way out of the valley where the ponies were located they'd shake a day-day, as it were, to the gang and return to their grazing.

"These two cow ponies loved their business better than many humans love theirs, but they don't love it as well as Billy, the old mule at Bar 2. He was plumb in love with his.

"He, too, had had his day with the round-up, and he, too, had been discarded for a younger, smarter animal. When spring came Billy was looking to go as usual, and it almost broke the old fellow's heart to see the boys pulling out of Miles City without him.

"Ain't I a Bar 2 hoy as much as any of 'em' he sorter says to himself. 'They ought to give me a square, even if I have hipped myself and have corns forrard. They can't shake me so easy!'

"And with that the old hoy lit out after the others. And he followed the Bar 2 outfit of his own accord for two years, working just as he'd been used to work in his young, smart days. Then he got so ornery that Dynamite Joe, the foreman, was afraid he'd hurt someone who wasn't onto his temper, and he sold him."

LIVED NEARLY THIRD OF CENTURY.

Belle, a fine old Percheron mare that Mr. R. P. Lathrop of the Lathrop Hay Company, Hollister, Cal., owned for twenty-nine years, died recently at the age of 31, Mr. Lathrop having purchased her as a two-year-old. The Free Lance says she was a terror to break, but when she learned what was required of her showed marked intelligence. When four years old she was put to work in the Lathrop warehouses, and for eighteen years did her work faithfully and well. True as steel, and game to the core, when her 1800 pounds of flesh was thrown into the collar something had to go, and it is related of her that in her prime she would pull a car with ease that it now takes two good horses to handle. In her work she displayed almost human intelligence, as when starting a car she would exert her strength gradually, then at the proper moment putting on full steam would have the car rolling with little apparent effort; and she would hoist bales, going out and hacking up without the aid of a driver, using better judgment than many boys and men employed at the warehouses. After she was broken to the work any hoy could drive her, but from neither man nor hoy would she stand abuse, fighting viciously if whipped.

Invariably there is a good story that goes with a good horse, and Belle is not an exception. After serving her master faithfully until too old to work, Belle was turned out to a life of ease in the pasture. With her were some colts. She presided over the band as peace maker, permitting no nonsense and brooking no interference. On one occasion a span of driving horses was turned into the field. Belle objected to the liberties they took with the colts, and a fierce battle ensued. After knocking one of the horses down, Belle turned on the other and securing a neck hold with her teeth was fast killing the animal, when she

was driven off. It was the same when she was used to break colts, at which she was very clever. She would permit the young horse to crowd into her a few times, then becoming tired, she would grab the youngster with her teeth and summarily stop all nonsense. Mr. Lathrop owned the mare for 29 years, she was 31 when she died, and naturally became quite fond of her. He had many opportunities to sell her after she became too old for his use, but as she had grown up with the business, which during her life grew from almost nothing to the largest concern of its kind in the world, money would not tempt him to part with her. This example of devotion to a horse will be appreciated by many who understand how strong becomes the attachment for faithful animals. Not all of them, however, are so well treated as was Belle, though there are many instances of horses being tenderly cared for after the days of their usefulness were over. Fondness for the dumb creatures who serve us so unselfishly during the days of their strength is truly a noble sentiment to cultivate, and no one will begrudge old Belle the life of ease that was hers to the end of her days.

TRAINING YOUNG HORSES.

There are two things which the young horse should never know, says Charles McIntyre. The first is that there is a halter in the world which he can break, and the first time the youngster is tied up an unbreakable halter must be used. It is doubtful if there is a worse habit formed by young horses than pulling or halter breaking, or a habit which is harder to remedy. Many horses once forming this habit can never be cured of it. The proper time to begin halter breaking is when the foal is a few days old, and only a good strong halter should be used. If the youngster succeeds in breaking the halter even a time or two when first haltered, the habit will be formed and may last a lifetime. The breaking of halters and bridles soon becomes expensive. The halter breaking horse can never be tied while hitched to a rig, and when not hitched to a rig the owner never knows where he is to find the animal. By using a strong halter, one that cannot be broken, no horse need ever form this very disagreeable habit.

The second thing which the young horse should never know is that there is a load in the world which he can not pull. Balkers are made, not horn, and overloading at first is almost sure to make a halter of a horse. This habit, like halter breaking, is hard to remedy; and every one owning a haly horse knows the disadvantages connected with it. Too much care can not be taken to never overload a young horse. Never load at first heavier than the horse with which the youngster is hitched can pull, and this horse should always be a reliable puller. Young horses, I think, should be broken double before being hitched singly. After a horse is thoroughly broken double there is seldom any trouble to break him to drive singly. All young horses should be broken to drive single, as this is a market requirement.

To let the young horse know what is wanted of him is absolutely necessary. When this is once known the youngster will usually fulfill the requirements. After the young horse is thoroughly halter broken the harness should be put upon him and he should be led and driven around four or six times a day for two or three days before being hitched, with a good, level-headed, fast walking horse, one that can start quickly and go fast if necessary.

Do not hitch the young horse to a high-priced rig for the first time. He may break it up for you. There is nothing better and no better time than a sled in winter when there is snow on the ground. Driving through either soon takes the wire edge off and in case the youngster should throw himself he is not likely to get bruised or scarred. The farmer also has more time at this season of the year than any other to train his young horses properly. Nothing but good, strong harness should be used.

When, from bad management, the sole and frog have become dry and contracted, no grease or tar should be used; but water should be used freely, and then the hoof should be dressed with glycerine, which will mix with water and does not displace it. Glycerine contains no acid or acrid properties, but is soft, bland, emollient and does not evaporate. It therefore softens the horn and allows the fibres to expand. Contraction is thus prevented, or is overcome when it has actually occurred.—Northwestern Farmer.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam
IT HAS NO EQUAL

For the Human Body—It is penetrating, soothing and healing, and for all Old Sores, Bruises or Wounds, Felons, Exterior Cancors, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints.

REMOVES THE SORENESS—STRENGTHENS MUSCLES
Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than \$100.00 paid in doctor's bills."
OTTO A. BEYER.
Price \$1.50, per bottle. Sold by druggists, or sent by express prepaid. Write for Booklet R.
THE LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

The best shade is a shed on elevation over which the wind can sweep without obstruction. Dusty holes in fence corners or in stifling underbrush are not desirable.

"SAVE THE HORSE" SPAVIN CURE
Registered U. S. Patent Office

DON'T GO WRONG

TO THE WINTER QUARTERS FOR THE BEST CURE, FIRING, BLISTERING AND THE USUAL METHODS ARE UNCERTAIN AT BEST; THEY MEND INVARIABLY FOR THE MOMENT ONLY.

Have your horse sound for the sale ring, for the track or road work—absolutely and permanently sound. Don't take chances; use "SAVE-THE-HORSE." Don't think you are experimenting; write for copy of contract and information; read what it has accomplished for others; it will positively do the same for you.

"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

Our Christmas Issue
Will Be Out December 21, 1907

It will have a handsome Cover and the inside will be embellished with numerous illustrations and contain many articles of interest that will appeal to breeders and all lovers of the horse, including much statistical matter, the list of new performers, etc., that will add greatly to its value for reference.

THE FIELD SPORTS DEPARTMENT, handsomely illustrated, will be replete with articles that will interest those who are devoted to the Gun, Rod and Dog.

ADVERTISE IN IT.
You will reach the people whose trade you are after.
WANT AND FOR SALE ADVERTISEMENTS.
\$3.00 buys an inch single column space, and all you can get in it. If you have a horse for sale, you can tell more people about it this way than by any other possible means. Try it and get results.

STALLION OWNERS, who are desirous of getting in an early announcement, should make arrangements without delay for using this issue so that illustrations can be made. It will be a valuable medium for this purpose, as it will be preserved for its statistical matter.

THE PRICE WILL BE 10 CENTS A COPY.
Send in Your Orders Now.
Breeder and Sportsman - San Francisco

\$7,250 Guaranteed Only \$2 to Nominate Mare \$7,250 Guaranteed

Pacific Breeders Futurity Stakes No. 8

TO BE GIVEN BY THE

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1907 to Trot and Pace at Two and Three Years Old

Entries to Close Monday, December 2d, 1907

\$4250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners, and \$450 to Owners of Stallions

MONEY DIVIDED AS FOLLOWS:

- \$3000 for Three-Year-Old Trotters.
- \$200 for Nominator on whose entry is Named the Dam of Winner of Three-Year-Old Trot.
- \$1250 for Two-Year-Old Trotters.
- \$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.
- \$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.
- \$1000 for Three-Year-Old Pacers.
- \$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.
- \$750 for Two-Year-Old Pacers.
- \$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.
- \$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

\$250 IN SPECIAL PRIZES FOR STALLION OWNERS

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize	\$100	4th Prize	\$25
2d Prize	50	5th Prize	20
3d Prize	35	6th Prize	20

The Above Prizes will be Paid on December 24th, 1907.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings, February 2, 1909; \$10 on Two-Year-Olds, February 1, 1910; \$10 on Three-Year-Olds, February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

For Entry Blanks and further particulars address the Secretary.

CONDITIONS.

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before February 2, 1909, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contractual for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will not be barred on pacing horses.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

E. P. HEALD,
President.

F. W. KELLEY, Secretary

TRAINING, BOARDING and SALE

Cor. Grove and Baker Sts., just at the Panhandle Entrance to Golden Gate Park. (Take Hayes, McAllister or Devisadero Street Cars.)

Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stables and not have their horses frightened by autos or cars

CHARLES DERBY PACER FOR SALE.

Brown gelding, foaled April 20, 1903; 15.2 hands, perfectly sound and in the best of condition. He is now in training in Jack Phippen's string at Pleasanton. Has had six months' work. Stepped a mile in 2:18, half-mile in 1:06, quarter-mile in 32½ seconds. Is a matinee horse right now and a wonderful racing prospect. Mr. Phippen thinks he can drive him in 2:14 or 2:15 at any time if called upon. Horse can be seen at any time. His regular work-out days are Wednesdays and Saturdays at the Pleasanton track. This horse was bred at the Oakwood Park Stock Farm.

Sire, Charles Derby 4907.

First dam Algerdetta (dam of Thornway 2:05½, Allandora 2:17¼ and Sable Steinway 2:23½), by Allandorf 7462.

Second dam King Girl by Mambrino King 1279.

Third dam Leah by Wilson's Blue Bull 75.

Fourth dam by Tom Hal.

S. M. VANDEEVOOET, Owner,
Box 893, Palo Alto, Cal.

GOOD MARE FOR SALE.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior. The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Goll Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c, 50c and \$1.00

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

Isn't He Worth Saving?

ABSOLUTELY CURE
QUINNS
OINTMENT
REMOVES
SPLINTS
SPAVINS
WIND SWAYS

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuifs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitation that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circular, testimonials, etc.

"LOOK FOR THE BIG RED W"

THE big red W is the connecting link between the consumer and the makers of Winchester goods. Over a year ago we adopted this safe-guarding trade-mark and since that time every box, carton and package put out by us has borne the big red W, the hall-mark of goods as perfect as brains, experience and ingenuity, coupled with a modern and complete plant, can make them. Our object in adopting this trade-mark was to make it easy to distinguish Winchester goods from other makes, which equal them neither in quality nor reputation, and thus protect you and protect ourselves. We have done our part. Will you do yours by looking for the big red W whenever buying anything in our line? The big red W is to guns, cartridges and loaded shells what the word "Sterling" is to silverware the world over. For your own protection we again ask you to "Look for the big red W"

Money Divided in Each Stake, 50, 25 15 and 10 Per Cent.

Entries Open to Sonoma, Napa, Lake, Mendocino and Marin Counties.

\$2.50 to Nominate Dec. 20, 1907; \$2.50 April 1, 1908; \$5 July 1, 1908; \$10 starting payment, payable ten days before race.

The race for two-year-olds will be mile heats, 2-in-3, and for three-year-olds, 3-in-5. Entries must be accompanied by entrance fee. Failure to make any payment forfeits all previous payments. Right reserved to declare off or re-open these stakes in case the number of entries is not satisfactory to Board of Directors. Address all communications to

Dexter Prince Stables

TRAINING, BOARDING and SALE

Cor. Grove and Baker Sts., just at the Panhandle Entrance to Golden Gate Park.
(Take Hayes, McAllister or Divisadero Street Cars.)

Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by autos or cars.

Agents and Correspondents Wanted Everywhere for The Breeder and Sportsman

New California Jockey Club

The California Futurity Stakes for 1909 and 1910

Entries to close December 31st, 1907

THE

CALIFORNIA FUTURITY

With \$5000 Added

To be Run at the Fall Meeting of 1909

For foals of 1907; \$10 entrance; \$25 unless struck out by December 1, 1908; \$50 unless struck out by August 15, 1909; \$150 to start; \$5,000 added, of which \$1,000 to second and \$500 to third; 15 per cent of the stakes to the nominator of the winner; \$10 per cent to the nominator of the second horse, and 5 per cent to the nominator of the third horse.

Winners of two sweepstakes or one of \$5,000 value to carry 4 pounds extra; of three or one of \$7,000 value, 7 pounds extra. Non-winners of a sweepstakes allowed 3 pounds, and if such have not won four races, 6 pounds; maidens, 9 pounds. By filing prior to December 1, 1908, with the New California Jockey Club an accepted transfer of engagement in this event, accompanied with all forfeits to date, the original subscriber will be released from any further liability.

SIX FURLONGS.

PERCY W. TREAT, Secretary

THE

CALIFORNIA FUTURITY

With \$5000 Added

To be Run at the Fall Meeting of 1910

\$10 each for mares covered in 1907; \$25 each for the produce of such mares unless struck out by December 1, 1909; \$50 each unless struck out by August 15, 1910; \$150 to start; \$5,000 added, of which \$1,000 to second and \$500 to third; 15 per cent of the stakes to the nominator of the dam of the winner; 10 per cent to the nominator of the dam of second horse and 5 per cent to the nominator of the dam of the third horse. Winners of two sweepstakes or one of \$5,000 value to carry 4 pounds extra; of three or one of \$7,000 value, 7 pounds extra; non-winners of a sweepstakes allowed 3 pounds, and if such have not won four races, 6 pounds; maidens, 9 pounds.

If a mare nominated drops her foal before the 1st day of January, 1908, or if she has a dead or more than one foal, or is barren, the entry of such mare is void. By filing prior to December 1, 1909, with the New California Jockey Club an accepted transfer of the produce, with its engagement in this event accompanied with all forfeits to date, the original subscriber will be released from any liability as to the engagement of the produce.

THE WEEKLY

BREEDER AND SPORTSMAN

(Established 1832.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco
Postoffice.Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCEMoney should be sent by Postal Order, draft or letter
addressed to F. W. Kelley, P. O. Drawer 447, San Fran-
cisco, California.Communications must be accompanied by the writer's
name and address, not necessarily for publication, but
as a private guarantee of good faith.

IN SPITE OF the money stringency all over the United States at the present time, the prices of horses of all kinds are keeping up remarkably well, and the results of the auction sales from San Francisco to New York are surprising even the most optimistic horsemen. While of course the high figures of last year are not being reached at these sales, the average is holding considerably above the figure to which it was expected the money situation would cause it to drop. The reason for this lies in the fact that there is now and has been for several years past a shortage in the supply of good horses for draft or road purposes, and the shortage is certain to continue for years to come. A gentleman who recently made a trip through a dozen counties in this State informed us that he was surprised at the few mares in use for breeding on the farms he visited. He desired to purchase three or four mares in foal for shipment to a foreign country, and while he found what he wanted, he stated that the number of broodmares for sale was small in the aggregate, and the majority of owners did not care to sell at all. During the past four or five years a large number of draft stallions have been brought to the Coast from the Eastern and Middle-Western States, but the number of mares imported is hardly worth mentioning, they are so few. It is the sparse amount of breeding that has been done in all sections of the country in recent years that will prevent horse values falling to an unprofitable level for many years to come. The outlook for a sudden and firm raise in prices of horses as soon as the financial sky clears is excellent, and all dealers confidently expect a strong demand for horses of all kinds in the spring. Those who have the cash to pay during these winter months will get horses much cheaper than they can be obtained a few months hence. Dealers are not counting on an extraordinary demand, but they know to a certainty that there is now and will continue to be a big shortage in the supply.

THE CHICAGO HORSEMAN, in its anxiety to give every paper a whack that promotes a guaranteed stake and refuses to pay more than the guarantee, states that this journal is in the game itself, and, like other Futurity promoters, hopes for a large reward for what it is doing. The learned Horseman is mistaken. The Breeder and Sportsman is not the promoter of a guaranteed stake. The Pacific Coast Trotting Horse Breeders' Association promotes a Futurity every year, however, and we can say that this colt stake has done more for the breeding interests of the Pacific Coast than any scheme ever before devised. The Breeder and Sportsman is not promoting any stake of its own, but we have only words of good will and praise for those journals that do promote them. All that horsemen are interested in knowing is whether the money will be paid according to the guarantees. Each one of these journals has a different plan from the others, but all are good for the horse business. If the Chicago Horseman can afford to guarantee a \$15,000 stake and add all money in excess of that amount to the stake, well and good. We hope its stake may fill and cost its promoter nothing, but we believe nine out of every ten of those who enter in it will be perfectly willing for the editor to take out enough of the excess money to buy "an ounce of civet to sweeten his imagination."

SIXTY-THREE HEAD of well bred trotters and pacers have been catalogued to be sold at Fred H. Chase's holiday sale, which comes off Monday evening, December 23d, at the big pavilion, 478 Valencia street. This is the most important sale of standard bred stock that has been offered in San Francisco for some time, and the class of horses to be offered averages high. Some excellent racing prospects are among them, and a number of well mannered and fast roadsters, besides a number that are safe for ladies to drive. The date of the sale—two days before Christmas—offers an opportunity to get something that will make about the most acceptable Christmas gift one could make, and as there are a number of very beautiful as well as perfectly gentle horses catalogued, husbands and fathers cannot do better than select a fine animal at this sale for a present to loved ones.

THE AMERICAN ASSOCIATION of State Fairs and Expositions will hold its annual meeting at the Auditorium, Chicago, December 5th. Many important subjects looking toward progress in State Fair management will be up for discussion and action, and much good will be sure to follow the exchange of ideas on important features of State Fair management.

F. F. Euren, secretary of the London International Horse Show Association, and the American and Canadian directors held an important meeting last week at Madison Square Garden. Alfred G. Vanderbilt and James T. Hyde represented the United States, and the Hon. Hamilton Black represented Canada. The first work of the directors was to revise the prize list recently adopted, the new list being adopted for the coming season. It was announced that the King and Queen of England will each give a cup valued at \$1,000, as will also the Prince of Wales, the trophies to be given for the horse show in London next year, to be held at the Olympia from June 18th to June 27th. Secretary Euren also stated that the management of the International Show will offer for prizes next June the total sum of \$50,000, which will be a fraction over \$12,000 more than the total of the last event. Several challenge and championship cups will also be added to the list of last June, including the trophies to be given by the King, Queen and the Prince, all of whom have announced their intention of attending the show.

"For the first time in the entire history of the National Horse Show we close the week with a loss," was the statement made by Col. Cornelius Fellowes, president of the association, to a reporter, just before the curtain fell on the twenty-third annual event. He assigned the cause of the deficit to the present condition of the money market, the collision of the horse show with the Grand opera and partially to the weather. Colonel Fellowes added: "The week closed with a far better showing financially than I expected, and our loss, I am glad to say, will not be half what we thought it would. The horse feature of the show just closed, as frequently stated, was the best for the past decade or more, a fact which more than fully reimburses the managers of the show for the small loss of money." What the shortage will be Col. Fellowes could not say, and whether he meant that the annual event really will be a losing thing this year, or that its profits will not reach the former record, is left in doubt. It has been often stated that the week's profit for the association has averaged from \$35,000 to as high as \$55,000 on an actual investment of \$25,000 and a nominal capital of \$100,000, so that if really there was an actual loss this year it will not be felt. The attendance was unusually and unexpectedly light during the first half of the show, but it came up to a fair record during the second half. The vacant chairs just behind the boxes were in evidence every evening, however, so that the falling off at the sale of best seats was a fact.

The Western Horseman received 2016 nominations to its \$10,000 subscription stake. Empire Farm, the home of McKinney and Axworthy, nominated 56 mares, leading all other nominators.

The dam of Trampfast (2) 2:12½, Medium's Last, is with foal this season by Jay McGregor 2:07½, whose sire, Jay Hawker (3) 2:14¾, was an own brother to The Tramp.

GOOD PROSPECTS AT AUCTION.

To the Holiday Sale of trotters and pacers which Fred H. Chase & Co. will hold at their big pavilion on Valencia street, Monday evening, December 23d, Capt. C. H. Williams of Palo Alto has consigned seven head. They are numbered from 24 to 30, inclusive, on the catalogue, and are of the sort that wise buyers who know a good horse when they see one, will be found bidding on.

No. 24 is the bay mare Greggite, bred at Oakwood Park Stock Farm, standard and registered, and credited with a trial mile in 2:40, trotting. She is by Steinway and out of that famous old broodmare, Maggie McGregor by Robert McGregor. She is only six years old and is a great prospect.

Oro W. is a black gelding, bred by Capt. Williams. He is by Del Oro 2:23½, son of Oro Wilkes. His dam is the registered mare Royal Net by Royal Sid. This is a three-year-old. He showed a great deal of speed as a three-year-old, but was then gelded and turned out.

A sixteen-hand sorrel gelding that paces and paces fast is Collis H. He has trialed in 2:11½, and is by Nutwood Wilkes out of Net, dam of two in the list, by Magic. Collis H. can pace a quarter in 30 seconds, and is fast enough to beat the majority of San Francisco matinee horses, and is a great racing prospect.

Iranwood is a four-year-old, sixteen hands, and a trotter. He is by Iran Alto 2:12¼, a horse that is gaining fame every year as a sire of fast and game trotters. Iranwood is out of Nettie Nutwood, the dam of Hillsdale 2:15 by Nutwood. He is absolutely fearless and safe to drive anywhere and should make a great road horse for a gentleman to drive.

The queerest named trotter in the State is Twenty-three Skidoo, No. 23 in the catalogue. She is a foal of this year, and was sired by Nutwood Wilkes, and her dam is Twenty-third, dam of Sterling McKinney 2:09¾, by Director, second dam Nettie Nutwood, dam of Hillsdale 2:15 by Nutwood. This filly should be a great broodmare, and although she is only just broke to harness she shows a very nice way of going.

A six-year-old gelding is Derby O., a son of Charles Derby and the mare Abanteo 2:17¾ by Anteeo. This is a sixteen-hand horse, good gaited and fast. He is not afraid of anything and safe for a child to drive.

The four-year-old brown pacing mare Royal Del is not large, being small and blocky, but is about as fast as they make them. She is safe for a lady to drive.

All the above are now at the Pleasanton track in the hands of John Phippen, who will show them to prospective purchasers at any time. By taking the 7:40 a. m. boat from the foot of Market street, Pleasanton can be reached soon after 9 o'clock, the horses looked over and the 2:30 return train will land one back in San Francisco soon after 4 o'clock in the afternoon.

CURBS AS SPEED INDICATORS.

An article treating of the early history of Dan Patch, taken from the Chicago Horseman, appeared in this journal a few weeks ago. In the article it was stated that when a two-year-old, Dan Patch's hind legs were adorned with "speed indicators," commonly called curbs. The term "speed indicator," of course, was used in a jocular sense, and is a very common expression among horsemen, especially as so many fast horses have them. A reader of the Breeder and Sportsman, who resides up in the State of Washington, read the article and writes us as follows:

"I was very much surprised to read in the Breeder and Sportsman that Dan Patch had what the writer terms 'speed indicators.' I have always called them curbs, and I supposed them a fatal weakness. The reason I write you, I have a two-year-old colt, royally bred, which I have been trying to sell very cheap on account of those legs, which I have blistered severely. I wish you would kindly inform me if they are really an indication of speed, or an indication of weakness. If the latter, what is best to do. Thanking you in advance, I remain, etc."

The writer of the above evidently took the term "speed indicator" in a serious sense. Curbs are no indication of speed in reality, but are indications of a strain, or as the United States Government's book on Diseases of the Horse states, is "caused by a sprain of the tendon, which passes on the posterior part of the hock, or of one of its sheaths, or of the strong ligament situated on the posterior border of the os calcis." Many record breakers have been afflicted with them, and so many fast horses are troubled with them at times that the term "speed indicator" has come into general use.

Many trainers assert that after the soreness and lameness which a curb causes when it first appears, has passed away, the leg is as strong as ever, and that there are no evil effects except the blemish. Some colts are born with a badly formed hind leg and are called sabre-legged or sickle-hocked. Such horses are more liable to develop curbs, and horsemen always look on such legs with suspicion. A good veterinarian is the best person to consult about a colt with curbs.

Mr. E. J. de Sabla advertises for sale a prize winning lady's driving horse that is absolutely sound, a seal brown, and stands 15.3. Read his advertisement.

NOTES AND NEWS

Pacific Breeders Futurity No. 8 closes next Monday.

It only costs \$2 to nominate your mare bred this year.

The only way to win stakes is to have a starter when the race comes off.

And the only way to have a starter is to have it entered and paid up on.

"Jack" Fronefield is again out visiting the horse-men throughout the country in the interest of the Breeder and Sportsman. He was down Salinas way last week.

It is reported that Harry Stover of Petaluma has decided to give no purses for trotters or pacers next year, but will hold a three weeks' meeting for runners exclusively at Kenilworth Park.

Thos. Charlton of Ukiah, owner of Dumont S. 2:20, is thinking of sending this full brother to Sonoma Girl 2:05½ to Woodland for the season of 1908, as there he will have a chance to be mated with some good mares. Dumont S. is looking fine and promises to be a great sire. His colts are all large and fine lookers. The only one yet broken is pointed for the Pacific Breeders Futurity and Mr. Charlton says he will make the colt that beats him "step a few."

If you want to sell a trotter or pacer take a \$3 ad. in the Christmas issue of the Breeder and Sportsman, to be issued December 21st, as it will be read by everybody on the Pacific Coast that is interested in horses.

We have not yet received from Secretary Snowden of Los Angeles, the list of mares nominated in the California Breeders Futurity and Canfield stakes which closed November 2d. We understand the Los Angeles Association is much pleased with the number received however.

A yearling colt by John A. McKerron 2:04½, dam Lady Jean, by Young Jim, trotted a quarter in 36 seconds at Cleveland not long since, the second eighth of which was in 17¼ seconds.

Everybody will be looking for the report of the Old Glory Sale, which is going on this week in New York. We hope to give the particulars of it in our next issue.

If you want to see some good horses that are to be sold at auction at Chase's Holiday Sale, December 23d, take the ferry and train to Alameda and look over the nice ones H. Busing has at the Alameda track shaping up for this sale.

Sonoma May, the sister to Sonoma Girl, brought \$2100 at the Old Glory sale and was purchased by Gen. C. C. Watts, owner of the champion three-year-old, Gen. Watts 2:06¾. For an untried mare this is a good price.

Nora McKinney 2:12¼, brought \$1300 at the Old Glory sale and was bought by H. C. Lee of Missouri. She is now ten years old and while she won a heat at a matinee pulling a wagon in 2:09¼ two years ago, has not been able to trot any faster since then.

Papinta, the famous fire-dancer, and owner of the Papinta Stock Farm at Concord, Cal., dropped dead on the stage of the Apollo Treater at Dusseldorf, Germany, on Thursday of last week. Her husband, Mr. C. Halpin, died at Concord about three years ago. Papinta was a very handsome woman, and her fire-dance has been one of the best features and highest priced acts seen on the vaudeville stage for the past seven or eight years. She was a great admirer of horses, and some years ago purchased a tract of land near Concord and established a breeding farm for thoroughbreds, heading the stud with the stallion El Rayo.

San Luis Obispo is to have a race track with a grandstand and stalls. Mr. Thos. Barrett Jr., a prominent resident of that place, has interested a number of his fellow citizens in the project. A tract of land is to be leased for a term of years, on which to build the track and erect the necessary buildings.

Such sires as Hart Boswell, Mendocino, Regal Wilkes, Monterey, Washington McKinney, Geo. W. Archer, James Madison, Marengo King, Searchlight, Arner, Boodle Jr., Daedalion, Gossiper, Cassian, Stam B., Alta Vela, Steinway, Del Oro, Nutwood Wilkes, Iran Alto, Chas. Derby, Arthur Wilkes, Athadon, Nushagak, Diablo, Azmoor, Easter W., Exell, Sable Wilkes, Blue Dawn, Rey Direct and others are represented in the horses consigned to Chase's Holiday Sale to be held at 478 Valencia street, on December 23d.

Had he lived, Alcantara 2:23 would now be thirty-one years old. Several new standard performers were added to his list this season. Among these are two three-year-olds, the trotter Rosabell 2:23¼, and the pacer, Ravenwood 2:21¾, which were gotten when Alcantara was in his 28th year.

An exchange says: Jessie McEwen 2:21¼ is the only mare to have two of her produce enter the 2:10 list this year. This mare is the dam of Pearl Hal 2:09¾, and Addie C. 2:10. Both pacers and both winning race records. While this may be strictly true, the Fresno mare Nugget had two pacers that took records of 2:07¾ this year. The Donna reduced her record from 2:08¾ to 2:07¾ and Queen Pomona reduced her from 2:13¼ to 2:07¾, while Trix by Nutwood Wilkes is the dam of Mona Wilkes 2:06½, a new 2:10 performer, and the three-year-old Aerolite, whose exhibition mile in 2:05½ at Woodland was witnessed by 2,000 people.

The Minneapolis Horseman and Stockman says: C. E. Hasey expects to move to California soon and will ship his stallion, Patchenwood 2:17¼, and some of his other horses out to the coast. Patchenwood will leave a number of good ones in Minneapolis and vicinity and if he shows the same quality as a race horse in California that he has here, it will not be long before some of the best broodmares out there will be sent to his court." C. E. Hasey is an old friend of Charley DeRyder, and the latter named the pacer for him that is now known as Castanada 2:09¾.

Dr. C. C. Meade, Cincinnati, O., recently refused an offer of \$1500 for his yearling filly by Cresceus 2:02¼, out of a mare by McKinney 2:11¼.

Frank Caton, the ex-American trainer who has trained and raced an extensive stable of trotters in Russia for the past fourteen years, arrived in Cleveland recently, where he is visiting relatives and friends for a short time. He brought with him to this country two Russian-bred trotting mares that are to be mated with Bingen 2:06¾, and McKinney 2:11¼, respectively.

Some owners and drivers pretend to believe that when the flag is not dropped a horse cannot be distanced, even though he was forty rods back of the distance stand when the winning horse passed under the wire. The rules provide for just such emergencies, and owners should post themselves.

At a sale of Shetland ponies recently held in England two stallions sold for \$600 each. Eighty-four ponies in all changed hands at this auction, the average being \$115.

Icon 2:10 and Sadie Mac 2:06½ are bred in similar lines, as both were sired by Peter the Great 2:07¼ and produced by mares sired by sons of Electioneer, the first named being out of Alberta by Albert W. 2:20, the second out of Fanella by Arion 2:07¾. Through her dam Icon gets the blood of the Lamott mare, who also appears in the pedigree of Paronella, dam of Kentucky Todd (3) 2:08¾.

Suppression of time reduced to a fine art must have been practiced at the Greenville and Hart, Michigan, September meeting, if one is to judge from the statement made in the catalogue by a consignor to a recent sale. He gives the time of the three heats of one race as 2:34, 2:30, 2:29¼, and adds: "Last heat of this race 2:23½. The time of the other race was 2:30, 2:29¼, 2:30, 2:29¼, and the consignor says: "One heat in this race was 2:20½." The American Trotting Association might look into the matter and ascertain whether that is mere catalogue talk.—Ex.

Sterling McKinney 2:09¼, with \$5680 to his credit, is the biggest money winner on the Great Western Circuit this year. A filly out of his dam, and by Nutwood Wilkes will be sold at Chase's Holiday Sale.

Virginia Lee, a filly by Iran Alto 2:12¼, dam Maggie by Soudan, is certainly a very promising miss. She is owned by Mr. T. B. Gibson of Woodland, who turned her over to Det Bigelow to break and train on the 13th of last month. In four weeks Bigelow drove her a mile in three minutes, a half in 1:27 and a quarter in 42 seconds. This is making speed pretty fast. There are a number of Iran Altos in Yolo county that are very highly thought of by their owners.

Lou Dillon 1:58½ and John A. McKerron 2:04½, with their weanling daughter, arrived at the Glenville track, Cleveland, last week from Litchfield, Ohio. As usual, they will winter in "Doc" Tanner's care. Those who remember Lou as the lithe and dainty "two-minute mare," would scarce recognize her now. She has developed, thickened and let down into a robust and rugged matron of a grand type. She is a splendid mother, and the little Princess Lou has grown and thrived since the moment of her birth. She is a slashing big weanling, but also of very fine finish, wonderfully intelligent and apparently absolutely fearless. She will probably be placed in the hands of some one of the country's most expert colt trainers next spring. Lou is again safely in foal to McKerron, and both Mr. Billings and Mr. Devereux are hoping that the produce will be a colt.

The weanling colt Kinney B. 01143 by Red McK., out of Ethel Basler, dam of My Way 2:15¼ and Stonelita 2:15¼, is a very well developed and handsome colt, according to a photograph of him recently sent us by Jacob Broliar. Kinney B. is the first of Ethel Basler's foals to be a positive trotter, and Mr. B. intends to nominate him in the Occident and Stanford Stakes. He states that Red McK. is one of the most impressive breeders in all Southern California, and is sure to force himself into recognition on his merits.

In a letter from Jacob Broliar of Visalia, under date of November 20th, he enclosed a front view picture of a filly, in which a protuberance about as large as half an average sized orange is shown on her front leg. Mr. Broliar says that he has always been led to believe that a splint (which he believes this to be) was a temporary ailment and never serious, but he thinks otherwise now. He says: "I turned this filly in the pasture, to all appearances sound, on the 1st of May, and departed for Los Angeles. On the 1st of August I returned and found her in the condition as shown in the picture. I immediately called a veterinarian and fired and blistered it to no purpose. That is has effected her complete ruin I fully believe, and shall henceforth look upon a splint as a serious ailment."

Mr. Chas. A. Smith of Phoenix, Arizona, has sent us a fine photo of his stallion Senator L. 2:23, holder of the world's record of 10:12 for the fastest four miles ever trotted in harness. Senator L. made this record in 1894. He is now nineteen years of age, having been foaled in 1888, but is a remarkably well preserved and robust looking stallion. He was bred by Senator Langford of Lodi, and is by Dexter Prince, dam Fanny Bayswater, dam also of Bayswater Wilkes 2:25½.

Ray Mead, the breeder of that record breaking colt Ray o'Light (2) 2:13¼, writes us that the colt's dam, Carrie B. 2:18, by Alex. Button, is not in foal. This is indeed unfortunate, but Mr. Mead will send her to be bred to Bon Voyage 2:12¾ early in the spring. Lovelock, her weanling by Zolock, is a very fine individual, and shows more class than did Ray o'Light at the same age. It is Mr. Mead's intention to train Carrie B. next summer, with the view of reducing her record, as she is in fine shape and can surely knock several seconds off her mark.

Harry Gear 25382 is the sire of Milton Gear, that took a pacing record of 2:16½ at Tulare this fall, and also of Miss Gear, that took a trotting record of 2:29¼ at the same meeting. The dam of Harry Gear is Lulu N., by Dawn 2:18¾, second dam Alice by Brown's McClellan. The dam of Miss Gear is Lily by Iris, second dam Lulu N., as above.

On our front page this week is a picture of the two-year-old filly Lady Search, bred by Mr. R. P. M. Greeley of Oakland, and now owned by Mr. C. H. Chandler, 731 G street, Sacramento. Lady Search is said to be as near a perfect animal as this State affords, and is reckoned very promising by horse-men. She is by the great race horse and sire Searchlight 2:03¼, and her dam is Winnie Wilkes 2:17½, a mare that had two-minute speed.

Tennessee Wilkes 2:27, one of the few living sons of George Wilkes in recent years, died at Ewell Farm, Spring Hill, Tenn., on Nov. 9th, of acute indigestion. Tennessee Wilkes was 27 years of age, being a son of George Wilkes 2:22 and out of Lizzie Hayden by Peavine, grandam Lizzie Brinker (dam of Bud Croke 2:15½, Lucy Fleming 2:24¼, Brinker Sprague 2:28, and the dam of eleven standard performers) by Brinker's Drennon. Practically all of Tennessee Wilkes' stud career was at Ewell Farm and although his opportunities in the stud were limited, owing to Brown Hal 2:12½ and McEwell 2:18¼ being in the stud at the same establishment, he is credited with 28 standard performers. The most prominent of his get include Mazette 2:04¼, ex-champion world's pacing mare, Roan Wilkes 2:04¾, Dick See 2:08¾, Morelia 2:10¾, Cassie 2:12¾, Mississippi King 2:13¼, Ialene 2:14, Paul Clifford 2:14¼ and Argot Wilkes 2:14¼. Argot Wilkes has achieved considerable fame as a sire of extreme speed during the past few seasons, among his get that have raced successfully on the Grande Circuit being Argot Boy 2:03½, Alfalfa 2:05, The Bishop 2:06, Argoret 2:09¾, Arrow 2:09¼, etc. Five of his sons have sired forty-five standard performers, this season's leading money-winning pacer, Kruger 2:04, being among the number. Daughters of Tennessee Wilkes are credited with twenty standard performers.—American Sportsman.

Geo. W. Ford of Santa Ana, Cal., writes that the Phoenix, Arizona, Fair, which he recently attended, was the best conducted fair he has ever saw, and he has seen many on this Coast and in the East. He believes the directors of the California State Fair could learn many things about running an exhibition of this kind if they would attend the big annual show at Phoenix. He says the commissioners and the secretary down there treat the public royally, and make everyone feel glad they came. He says Phoenix is the Lexington of the Pacific Coast. Chas. De Ryder, Budd Doble, C. C. Crippen, Henry Delaney, Robert Smith and I. Mosher all speak in the same way of the Arizona Fair management.

PLEASANTON PICK-UPS.

The stalls at Pleasanton training track, which were partially vacant during the summer months, are again rapidly filling up, and by the first of the new year accommodations for trotters and pacers will be hard to find for those who are not provided for before that time.

Owner Thos. Ronan has several men at work hauling and spreading manure in the infield, clearing up the pasture paddocks and getting ready for the rainy season. On one of his fields he raised twenty-four tons of sugar-beets to the acre this year, but then Pleasanton track was always a record breaker.

Mr. Ronan recently returned from his Washington ranch with seven head of trotters and pacers by Alexis and Arronax, out of dams by Antrim and Meredith. Some of them he has on pasture and others are being handled by H. Rucker, who is finding some fast ones among them. The fine stallion Birdman, that is out of old Birdie, by Jay Bird, is looking in great shape and will get a low record if raced. His colts are showing up in fine style. Mr. Rucker owns a yearling filly by Bonnie McK., out of a mare by Greywood, that is very speedy.

Chas. De Ryder and Budd Doble got in last week from the Arizona Fair at Phoenix and all their horses arrived in good shape. De Ryder had a fairly good year, but was glad to get home and begin work on a lot of promising young horses that will be raced next season. He found old Star Pointer in fine shape, and had heard many complimentary things said about the old horse's first California crop of foals, which are just now being weaned.

C. C. Crippen brought Budd Doble's Kinney Lou 2:07½ back in fine shape, although the horse was thrown down in his car just before reaching Phoenix by a collision, and was sore and lame from the accident while at the Arizona track. The mile in 2:11¼, which Mr. Doble drove him at Phoenix was, under the conditions, a good showing, as on the day before the trial Mr. Doble thought Kinney Lou too lame to start. Kinney Al took a record of 2:14¼ at the meeting, and Crippen says he is a 2:10 trotter, sure.

Among the young trotters that are being talked about at Pleasanton is Little Rey, the colt that Joe Cuicello bought for a client at the last Chase combination sale. Ed. Parker is working this handsome fellow a little and he is stepping fast—faster than his half-brother, Happy Madison, did at the same age. The owner was offered \$125 advance on the figure he paid for him at the sale, but declined it. Parker is certain that he has a high-class trotter in Little Rey.

Barney Simpson, who spends his summers in Chico with his stallion Arner 2:17¾, own brother to Don Derby 2:04½, Diablo 2:09¾, etc., etc., has returned to Pleasanton for the winter with his handsome stallion, and has a couple of youngsters he is working. One is a three-year-old pacing filly by Arner, out of a mare by Direct 2:05½. She is a nice goer and looks like a great prospect. A mile in 2:30 with the last half in 1:07½ and the last quarter in 32½ seconds was only play for her. Barney is handling a two-year-old for Geo. Gray that is a trotter and a nice one. This is a bay colt, a fine looker and is by Mendocino, out of the dam Iloilo 2:15. He is only just broke, but trotted a half in 1:24 on his own accord.

Henry Helman is wintering Berta Mac 2:13¾, the leading money winning trotting mare on the California Circuit this year, and she is big and strong with her winter coat on, but looks like 2:10 next year, and perhaps three or four seconds better than that. She is a typical McKinney and her story, which will be in the Year Book of the 1907 races, will show what a race mare she is. Helman's Jay Bird colt is growing into a fine stallion and will have some foals to represent him in the crop of 1908. Helman only bred him to a few mares last spring, and they all are in foal.

A. P. Church, the expert track horse-shoer, dropped his hammer for a few minutes Saturday to show us his Bonnie McK. colt. Mr. Church thought he owned a trotter, but the youngster has taken to the side-wheel gait and can just fly at it.

Mr. S. K. Trefry, owner of Kenneth C. 2:13¾, by McKinney, is thinking of taking that fast trotting stallion to Stockton for the season of 1908. Several owners of good mares who reside there have requested him to bring Kenneth C. there, and he is seriously considering the idea. His colt Ben Hur, by Stam B., out of the dam of Kenneth C., worked a half at the trot in 1:07½ last week. He is only a three-year-old and is growing into a very fine stallion.

Mountain Maid, the dam of these two colts of Trefry's, was purchased the other day by Mr. Ronan, owner of Pleasanton track, along with two of her colts by Stam B. She is a fine large mare, well preserved and looks to be about nine years old, but is now seventeen. She is the dam of two pacers, Tom Carneal 2:08½ and another, and of the trotter Kenneth C. She is registered in Vol. 14 as a pacer. Her sire is Cresco 4908, son of Strathmore, her dam Lucy M., dam of Betty M. 2:20, by Cloud, a son of the thoroughbred horse Rifleman, that sired the old-time gray trotter Col. Lewis 2:18¾, second dam the Hathaway mare by Easton's David Hill.

P. W. Hodges recently moved his horses here from Santa Clara. He has a couple of Zombro stallions that are very highly regarded by horsemen generally. Mr. Hodges recently sold five good broodmares to Mr. F. E. Alley of Roseburg, Oregon. The high-

class pacer Copa de Oro 2:07¼, that Will Durfee campaigned so successfully this year, was bred by Mr. Hodges, who purchased his dam, Atherine, by Patron, especially for a broodmare.

Col. Kirkpatrick was at the track last Saturday and drove his pacer Charley D. a few miles. This son of McKinney is beyond all question one of the best individuals ever sired by the champion 2:10 sire, and is undoubtedly the fastest unmarked pacer on the Coast that has ever been raced. The Los Angeles green pacer known as The Pig, although that is not his name, has shown faster miles in his work, but he has never started in a race.

Mr. P. W. Bellingall, the Customs broker, has three trotters at the track. His chestnut stallion by Nutwood Wilkes, out of a Secretary mare, has an ankle that was injured a year ago in an accident, and is only being jogged, at which he shows no signs of lameness. Mr. Bellingall's greatest pleasure is in visiting the track twice a week and driving a couple of yearling fillies he has that are out of mares by Secretary. One is by Coronado 2:09¾, the other by Kinney Lou 2:07¾, and both are born trotters. Louis Carrillo is taking care of these three and has them in fine shape. Mr. Bellingall has recently been using an ankle-boot of his own invention on his colts that is an improvement over the hard leather boot. A piece of rubber is used to cover the point of the ankle usually struck by the other foot, and it prevents concussion and seems to work to a charm.

William Hendrickson, the veteran of Geo. M. Patchen Jr. fame, has several horses at the track, among them a few youngsters by the Palo Alto owned stallion McKenna (McKinney 2:11¼-Helena 2:11¼), that look like very likely young trotters. Mr. Hendrickson is highly pleased with them and believes McKenna will make a great sire if given an opportunity.

Capt. C. H. Williams of Palo Alto has five or six very promising young horses in Jack Phippens' stables being fitted for Chase's big holiday sale in San Francisco on December 23d. Among them is a pacer by Nutwood Wilkes, that is fast enough and looks good enough to be a race or matinee horse. A more extended notice of these horses will be found elsewhere in this issue of the Breeder and Sportsman. Phippen was working on Saturday a three-year-old Searchlight trotter that has a lot of style and substance, and both Capt. Williams and Phippen believe he will be a fast one with a little work. He is a regular devil for work, don't know what it is to get tired, and is ready to kick up his heels in play after the stiffest sort of a workout. He is not so large, but is formed very much like his illustrious sire.

Fred Chadbourne, of the firm of Sutherland & Chadbourne, who was pretty well run down from over work at the close of the California Circuit this year—having given a string of twenty horses nearly all their fast work during the spring, is back from a two months' trip to the mountains of Siskiyou looking like an eligible to the fat men's race. He is jogging seven or eight horses every day, among them the great three-year-old Aerolite by Searchlight, owned by James W. Marshall of Dixon. This colt is growing into a grand stallion, and has an individuality that stamps him as one of the great ones. He is big and stout, with as perfect a set of legs and feet under him as any horse ever stood on. Fred has another three-year-old that will be heard from later on. This is The Limit, L. C. Crellin's colt by Searchlight, out of Bertha, the dam of four with records better than 2:10. Mr. Crellin determined he would not race this fellow until he was a five-year-old. He had Chadbourne work him up to a mile in 2:15 last spring in his three-year-old form and then turn him out. He will have him show a mile in 2:10 as a four-year-old and he will then be turned out again. As a five-year-old he should be a great pacer. He showed two-minute speed last spring. A coming two-year-old full sister to The Limit was in a box-stall, having just been brought in from the pasture. She is under Mr. Sutherland's charge, who is beyond question one of the best men with a colt there is in the business. The filly was making matters pretty lively in her stall, as it was the first time she had seen the inside of one, but Sutherland said she would get over it. She looks more like her famous dam than any of the family and is a grandly formed filly. She should make a great broodmare when she is done racing. The Dixon pacer, McPadyen 2:12½, by Diablo, owned by E. D. Dudley, is again in Chadbourne's charge and will be got ready to race again next year, when he will be five years old. This is one of the best bred pacers in America, and was a stake winner both in his two and three-year-old form. As he is absolutely sound and a well mannered horse, he will doubtless be a hard nut to crack in any class he starts in, his three-year-old record of 2:12½ giving some idea of the speed he has.

Mr. Detels, the Pleasanton harness-maker, was at the track giving his weanling by Bon Guy an airing to halter. This colt is by Bon Voyage 2:12¾, dam La Moscovita, the dam of Yolanda 2:14¾, by Guy Wilkes 2:15¼, and is like all the Bon Voyage colts we have seen, a highly formed and classy looking youngster. Breeders in this part of the State regret that Mr. Clark decided to take Bon Voyage to Los Angeles for the season of 1908, as many here would like to send their mares to him again. Ed Parker showed us a couple of Bon Voyage weanlings, one out of Missie Medium by Rampart, the other out of Sidlette by Sidney, that are both very fine looking.

Joe Cuicello has quite a large string, four or five of which are catalogued for the holiday sale at Chase's, December 23d. One of these, a mare by Alta Vela, dam by Osito 2:13¾, a well bred son of McKinney, is a particularly well turned mare and a trotter that looks and acts as though she would be a race mare. She is a handsome thing, but her breeding is what particularly attracted our attention. By one of Electioneer's fastest sons and out of a fine mare by one of McKinney's best racing sons, she should be almost invaluable as a broodmare bred in those lines.

Among the other trainers who have horses at Pleasanton are Dr. Boucher, J. M. Alviso, Will De Ryder, Al Charvo, William Brown, Ted Bunch, Bert Webster, Henry Dunlap, George Helman, Mr. Curley, Harry Brown, and a number of others. Nothing much will be done with the horses now at the track until after the holidays, but work will begin then in earnest, and the chances are that 1908 will see as many future record breakers and money winners learning their lessons at this famous speed school as have ever been seen there during any one year.

DOWN THE LINE.

At Salinas, J. N. Anderson's mare Nora D., by Del Sur, dam of the stake winner, Della Derby (3) 2:17, is safe in foal to Bon Voyage (3) 2:13¾, and has been nominated in the Los Angeles and the Breeders' Futurities.

J. B. Iverson has three nice yearlings that will be tried out for their stake engagements. One is by Delphi 2:12¾, another by Lecco 2:09¾, and the other by Coronado 2:09¾.

Mr. H. H. Mason of Salinas spends many a pleasant hour behind his four-year-old trotting mare by Geo. W. Archer, a son of Allerton 2:09¼. She is out of a mare by Antinous, a son of Electioneer, and is a good looker.

J. D. Kaler has named his three-year-old Searchlight "Peaches," and after watching her brush a quarter last Saturday in 32½ seconds the writer's only comment was: "Peaches and cream." If she is raced next season she will surely be an addition to Searchlight's list.

W. H. Williams in handling several horses at Salinas and will have a trotter and a pacer in his string next season in Sidonis and Kermit, that will be entered all down the line. Both have shown very satisfactory in their work this year.

Chas. Whitehead has leased Della Derby 2:17 and will race her next season along with North Star 2:11¼, and the sensational Ray o'Light (2) 2:13¾. Others in his stable are a yearling by Delphi 2:12¾ and one by Robin, that are taking daily lessons, also a two-year-old by Delphi that looks like he will do.

Alhert Direda, the son of Robert Direct, is now sound again, after being laid up with a strained hock, the result of a fall. He had shown his trainer, W. H. Combs, a mile in 2:15 and many quarters around 30 seconds early in the summer. This fellow is of the Direct type, and those who have seen him work say he is a very fast colt.

Without undue compliment, Albert Mac, full brother to Berta Mac 2:13¾, the leading money winning trotting mare on the Coast this year, may be said to be one of the handsomest stallions standing for public service in California. He is now in the hands of W. H. Williams, who gives him an occasional mile around 2:40, and has him looking fine as a fiddle. He will make the season of 1908 at Salinas and will then be trained for speed.

Watsonville has taken a strong position as a breeding center of light harness horses, and the people there demand the best in looks and blood lines. Henry Struve has replaced Welcome 2:10, who has stood there the past three years, with Highland C. 2:19¾, one of the best bred stallions of the Electioneer family in America. Highland C. has fine looks, size and extreme speed, having a trial of 2:12 as a four-year-old. Colts by him show that he will render the breeding interests of the State a good service.

J. P. Soares has leased Steam Beer and will make the season of 1908 with him at Watsonville. While this horse is a natural pacer, most of his colts show considerable trot.

Ray o'Light (2) 2:13¾ is furnishing down into a compact, well turned colt, and has a great career ahead of him, not only as a race horse, but as a stock stallion as well. Mr. Train, his owner, will allow the colt to serve a few choice mares early next season, and he will then be sent to Chas. Whitehead to train for his three-year-old engagements.

At San Jose, T. W. Barstow will have at the head of his stud this coming season Nearest McKinney. His blood lines team with producing strains. He has been a mile in 2:15 over a half-mile track, and Mr. Barstow says this is no measure of his speed. He is a magnificent bay, built without flaw, and of perfect disposition.

At Santa Clara, W. R. Johnson is now giving his stallion Sadi Moor 39989 his first regular training. This three-year-old has shown him a quarter close to 35 seconds, and bred and gaited as he is, cannot miss being a fast trotter. His services as a public stallion for the season of 1908 will soon be advertised. He has a great pedigree and is bound to be a great horse.

MAY TRY IT AGAIN.

Among the visitors to the office of the Breeder and Sportsman this week was Mr. J. D. Springer, whose winning of this year's M. and M. with the great mare Sonoma Girl 2:05½ and his subsequent sale of her to Miss Lotta Crabtree for \$26,000, were the features of the Grand Circuit of 1907. Mr. Springer has been at his old home in Boise, Idaho, for several weeks, and left his wife and daughter there while he took a run down to California to look over the field here before deciding whether he would again move to Los Angeles, where he still has three or four horses. Mr. Springer looks as if the campaign among the top-notchers and the glory of having brought out the greatest trotter of the season had agreed with him. He spoke very highly of his treatment over East by the horsemen and the associations and remarked that he and Mr. Geers could race horses against each other without any judges, and he believed the result would be satisfactory to both. Mr. Springer told us that during the time he raced Sonoma Girl she won for him \$12,000 net in purses, and on her chances in the M. and M. he played \$1,000 against \$5,200, which, of course, he won. Then selling the mare for \$26,000 cash, made the total amount of his receipts for his trip the neat sum of \$43,200. He firmly believes Sonoma Girl will reduce her record several seconds next year, and trot in 2:02 anyway. He believes he could have won the second heat of the M. and M. in 2:02 had it been necessary. Sonoma Girl was at the three-quarters in 1:32 and was pulled to a jog at the end of the mile in 2:06¼. As she was never better in her life and trotting like a runaway horse at the head of the stretch, he is perfectly confident that she would have trotted the last quarter in 30 seconds had he asked her to, which would have made the mile in just 2:02.

Her actions in other races when she lost he attributes to her soreness. She had a thoroughpin (not a bad one, however), and he treated this with liniment. Before she ever started on the Eastern tracks she sometimes seemed to favor one hind leg, and he could not determine whether it was in the hock, stifle or hip. On any day when she did not favor this leg she could trot the last quarter of any mile in 2:10 as fast as 29 seconds, and she did not seem to know what getting tired was. Mr. Springer believes that she will be as high a sensation next year as she was this, and she was the drawing card of every meeting where she was engaged. He says Highball is a wonderfully speedy horse, as his races show, but that where both are in shape Sonoma Girl could beat him rather handily after the first heat, as he could not repeat as she could.

Mr. Springer may pick up a horse that he thinks of Grand Circuit caliber if he can find one priced right anywhere, get him ready at Los Angeles and try the big ring again, but unless he does he will probably again take up his residence in Boise, Idaho, which he still calls his home.

He has a host of friends here in this State who would like to see him locate here permanently, as men of his stamp are an honor to any community in which they may reside.

PLANS BIG STOCK SHOW.

Portland is to have a live stock show next year that will be on as large a scale as was the one held during the Lewis and Clark Exposition. The Portland Country Club and Livestock Association started the movement recently, and already has assurances of co-operation and assistance that will make the event the biggest of its kind on the Pacific Coast next year. The show will probably be held some time between September 15th and October 1, 1908, the exact dates being as yet unsettled.

Premiums to a total value of \$40,000 were voted at a recent meeting of the directors of the association, who met in the Hamilton Building. Nearly the entire directorate of thirty members was present. S. G. Reed, president of the organization, presided. All agreed that a stock show on the scale of the Lewis and Clark Fair display will be a splendid thing for Portland, and will do much to encourage the breeding of fine cattle and horses throughout the Pacific Northwest.

It was decided to send M. D. Wisdom to Chicago as a special representative of the organization at the convention of the International Livestock Association, which meets there from November 30th to December 7th. Each standard breed of stock has a distinct association, but these are all represented in the International Livestock Association, which is one of the biggest organizations of its kind in the world. It is felt that a special delegate from Portland in the interests of the show there next year will have a splendid effect in enlisting support for the exhibition.

This international organization will be asked to select dates for the Portland exhibition that will be favorable for the participation of members of the International Livestock Association, and it will be suggested that between September 15th and October 1st will be the most acceptable to the local association.

Livestock men all over the West will take a lively interest in the affair, and their participation on a big scale is assured. The decision to hold the stock show means an active campaign from this time on by the local association. The event will be widely advertised and widespread support will be enlisted for it.—Oregonian, November 21st.

BREEDING A CHAMPION.

One need not look in vain for the source of the great speed and race-horse quality of the world's champion three-year-old trotter, General Watts 2:06¼. Students of breeding may differ in opinion as to the ancestor whose blood was most potent in the production of this modern speed marvel. But those who are ever ready to give due credit will be forced to agree that in him are bound up the elements which go to make good to great performers every year. The blood of the old time pacing queen, Pocahontas, is carried by him, coming through Strideaway 2:31, sire of the second dam of his sire. The blood of Bicara, greatest of all the daughters of Harold, descends to him through Pancoast 2:21¼, sire of Prodigal 2:16, who sired the champion's dam. The blood of Lady Bunker, doubly famous as a broodmare, he gets through his sire, whose paternal grandsire was a son, though not a highly successful one, of that daughter of Mambrino Patchen. And, closer up, therefore probably of far more account is the blood of Annie Wilton, who produced seven trotters, some of whom were above the ordinary. Other broodmares of note appear in his pedigree and until the fifth remove is reached there is no suspicion of the blood lines going into the woods.

Whether this colt points the way to breed the best, is, however, not certain. There may be other colts by the same sire and out of the dams of similar breeding that will be disappointments of the most pronounced kind. But the successful colts will nearly all carry some such admixture of blood.

There is nothing in the breeding of this particular colt that can be used, with honesty, to bolster up any pet theory. He was sired by a colt trotter and produced by a young mare who, up to the time she produced him, had been trained but little. She is the only mare in his pedigree with a record and hers is but 2:28, not enough to attract attention and certainly not sufficient, of itself, to justify the belief that nature destined her to produce a champion.

Tabulated at the time he was foaled, the pedigree of General Watts would have carried the name of no mare with a record in standard time. And of the fifteen sires in it, five never entered the 2:30 list, though one of the five, Strideaway, took a record of 2:31 at a time when that was equal to the 2:25 of today. Therefore the pedigree of the colt, best of this or any other year, is a mixture of developed and undeveloped stallions and undeveloped mares.

Perhaps it teaches a lesson in breeding. Perhaps it teaches none. But in our opinion it proves conclusively that development of the inherited ability to trot does not add to the ability to transmit the trotting instinct or speed at the trot.—Horse News and Speed Bulletin.

REMARKABLE SISTERS AND BROTHERS.

During 1907 no less than three sets of own brothers and sisters raced to low records, a rather remarkable incident. Beatrice Bellini 2:08½ and Tokio 2:09, both consistent trotters and good winners on the Grand Circuit, are by Bellini 2:13¼, and out of Trixy Nutwood 2:18¼, which matron is also the dam of the ex-Cleveland matinee trotter, Albany 2:24¼, wagon record 2:14¼. Bellini has the distinction of being the only sire to be credited with three new 2:10 performers in 1907, his third being Carlo 2:08¼, whose dam is Cricket by Pilot Medium, also the dam of Trixy Nutwood.

In point of average time the records of Hedgewood Boy 2:04¼ and Lady Maud C. 2:04½ make them the fastest own brother and sister seen on the harness turf since the days of Fanny Dillard 2:03¼ and Hal B. 2:04½. Hedgewood Boy and Lady Maud C. were not only prominent on the Western tracks, but also proved star performers when they met Grand Circuit company at Columbus, the former winning three races at that meeting. They are by Chitwood 2:22¼ and out of Noretta 2:22¼.

While Blacklock had a record of 2:07¼ when he began the season, he reduced the same to 2:04½, while his own brother, Joe Brown, paced to a new record of 2:08¼ out West. This great pair are by Cuckoo 2:16½ and out of Jenny Brown by Brown John.

Two sensational performers in 1907 in the far West were Aerolite, the three-year-old pacing stallion that equalled the long-standing record of 2:05½, established by Klatawah in 1898, and the pacing mare Mona Wilkes, that raced to a record of 2:06½. Aerolite is a son of Searchlight 2:03¼, while Mona Wilkes is by Demonio 2:11¼. Both are out of Trixy Nutwood Wilkes 2:16½, this mare being sister in blood to the fast trotting stallion John A. McKerron 2:04½, both being by the same sire and out of mares by Director 2:17, the sire of Directum 2:05¼, and Direct 2:05½.—American Sportsman.

It is said that Millard Sanders believes that the three-year-old filly Ruth Dillon 2:15¼, by Sidney Dillon, will eventually crown herself champion trotter. Sanders drove the filly in 2:10½ on two different occasions and believed this fall that she could trot in 2:07 or better if asked to go that fast. Ruth Dillon's dam is Russie Russell by Bay Rose 2:02½, son of Sultan 2:24, second dam Oakley Russell, by Happy Russell 2:21¼, son of Mambrino Russell, third dam Oakley, by Orestes 1920, son of Casius M. Clay Jr. Ruth Dillon's inheritance is good in the maternal lines, and she will be no freak if she goes on and does what Sanders expects her to do.

THE BELMONT STRAIN.

Were any horseman to be asked to name the three leading families of light harness race horses he would almost beyond question answer promptly: "Wilkes, Electioneer and Nutwood." That these three enjoy, in wide popular and also in select critical estimation, a deserved pre-eminence, there can be no doubt. As the returns have kept coming in, however, we have been struck with the frequency with which the blood of Nutwood's sire, Belmont, is found in the pedigrees of the season's most prominent performers, aside from those which descend from him through Nutwood exclusively. Among these we may name:

Highball 2:06¼, the world's champion green trotting gelding, sired by Dr. Hooker 2:23¼, son of Vatican 2:29¼, by Belmont.

Watson 2:07½, the conqueror of Sonoma Girl in the Oakland Baron stake at Poughkeepsie, who has a double Belmont cross on his dam's side, once through Nutwood and once through King Rene.

Helen Hale 2:13¼, the champion two-year-old trotting filly, whose grandam is by Bellwood, son of Belmont.

Angus Pointer 2:01¼, the champion pacing race horse of the year, whose sire, Sidney Pointer 2:07½, is out of a mare by Vespasian 2:24¼, he by Hull, son of Belmont.

Clare Cooper 2:11¼, the extremely successful Western trotting mare, a winner of six fast races, including \$2,000 events at Galesburg, Hamline and Sioux City, whose sire, Combination 2:18½, is by Egmont, son of Belmont.

Tbornfield 2:10¼, a Grand Circuit winner and second in the \$9,000 Massachusetts stake, whose grandam was by Erelong, son of Belmont.

Aunt Jerusba 2:10¾, one of the trotting stars of the Great Western Circuit, who began the season without a record, and whose dam is by Davenant 2:26¼, son of Belmont.

May Earl 2:10¼, a winner of fast trotting races at Terre Haute, Kalamazoo and Indianapolis, whose dam is by Earlmont 2:09¾ (pacing), son of Belmont.

Fedora's Athol 2:11¾, winner of the \$3,000 event for 2:14 trotters at Detroit, whose dam is by La Crosse 2:30, son of King Rene, by Belmont.

Etha R. 2:12¼, winner of a five-heat trotting race at Galesburg, in which the time averaged 2:12½, a mare that has been timed below 2:10 in her races, by Hershon 2:29¼, son of Herschel, by Belmont, her dam being by Uranus 2:17¼ (pacing), also a son of Herschel.

Wilson Addington 2:07¼ (pacing), a Grand Circuit winner, prominent all along the line, whose dam is by River Bend 2:24¼, son of Belmont.

Turley 2:07¼, the veteran trotter of the Geers stable, winner of a \$2,000 event at Buffalo and always a contender, who is by French Plate 2:26¼, son of Wedgewood 2:19, by Belmont.

Aerolite 2:11¼, public trial 2:05½ at three years, and Ray O'Light 2:13¾ at two years, the two sensational California pacing colts, both by Searchlight 2:03¼, whose dam was by Furor, son of King Rene, by Belmont. (Aerolite has a double Belmont cross, tracing also to Nutwood.)

Hazel Grattan 2:13¼, a triple winner on the Great Western Circuit, whose dam is by Nugget 2:26¼, son of Wedgewood 2:19, by Belmont.

Eph Cinders 2:06¼, winner of a brilliant pacing race at Columbus, whose dam is by Wedgewood 2:19, by Belmont.

Here are representatives of eleven different sons of Belmont, all star performers, to whom we might add a number of others, were it not that these are sufficient for our purpose. As for the representatives of the Nutwood branch, they are so numerous that we will not attempt to name but a selection of the most prominent, as follows:

In direct male line—Early Alice 2:07½, Wild Bel 2:08¼, Merico 2:09¼, Just the Thing 2:10¼, Jaguar 2:12½, Onwis 2:14¼ (half-mile track), Montell 2:14¼ (half-mile track), trotters; Hedgewood Boy 2:04¼, Aileen Wilson 2:04¼, Lady Maud C. 2:04¼, Dan S. 2:05½, Harry D. 2:08¼, Byron Kay 2:08¼, Manager H. 2:09¾ (three years), pacers.

Through other channels—Sonoma Girl 2:05¼ and Sterling McKinney 2:09¾, both having Nutwood grandams; Beatrice Bellini 2:08½, Claty Latas 2:08¼, Tokio 2:09 and Allanwood 2:04¼ (pacing), all out of Nutwood mares; Kentucky Todd 2:08¼ and Douglas 2:12¼, the two three-year-old Futurity winners, whose sire, Todd, is out of a mare by Arion, he out of a Nutwood mare; George G. 2:05¼, whose grandam was by a son of Nutwood; R. F. D. 2:05¼ (pacing), with a double Nutwood cross; Watson 2:07½, dam by a son of Nutwood; King Entertainer 2:10¼, Zaza 2:11¼, North Star 2:11¼, Copa de Oro 2:07¼ (pacing), Pacemaker 2:09½ (pacing) and Will Mayhurn 2:08 (pacing), all by sires out of Nutwood dams; Aerolite 2:11¼, public trial 2:05½ (pacing), and Mona Wilkes 2:06½ (pacing), whose dam's sire is out of a Nutwood mare; Mattie Chimes 2:08¼, Red Bow 2:09¼ and Boro Wood 2:09¼, pacers, whose dams are by sons of Nutwood.

This is certainly a grand showing, speaking volumes for the prepotency of the great son of Alexander's Abdallah and Belle, by Mambrino Chief, and demonstrating that aside from the broad stream of his blood which flows down through Nutwood, it is being also kept alive through numerous other channels.—Horse Review.

THE NEW 2:10 PACERS.

A list of the pacers that entered the 2:10 list for the first time this year shows that it contains sixty-six names, and of these eleven were bred in California, or 16.2-3 per cent. The list follows:

John A., by Eddie Hal (p) 2:15, dam by Newsboy	2:03 1/2
Hedgewood Boy, by Chitwood 2:22 1/4, dam by Norris 2:22 1/4	2:04 1/4
Lady Maud C., by Chitwood 2:22 1/4, dam by Norris 2:22 1/4	2:04 1/4
Hidalgo, by Warren C., 2:11 1/4, dam by Merrill	2:04 1/4
Alleen Wilson, by Arrowwood, dam by Redfield 2:19 1/2	2:04 1/4
Wm. O., by The Director General, dam by George Simmons 2:28	2:04 1/4
Reproachless, by Direct Hal (p) 2:04 1/4, dam by Prince Regent	2:04 1/2
Jenny W., by Alcander 2:20 1/2, dam by Gilroy 2:28 3/4	2:04 1/2
Leland Onward, by Game Onward, dam by Leland Stanford 2:21	2:04 1/2

JOHN SPLAN TALKS OF TROTTERS.

The man who made Rarus 2:13 1/4 and himself famous on the trotting turf thirty years ago now makes his home in Lexington, Ky., where he gives much of his time to the management of L. V. Harkness' Walnut Hall Farm, the largest trotting horse breeding establishment in the country. Splan said yesterday in speaking of the stud that it embraces at present three stallions—Walnut Hall 2:08 1/4, Moko and Ozono—about one hundred and seventy-five broodmares and a large number of young trotters, including one hundred and twenty-five weanlings and eighty yearlings.

Mr. Harkness has adopted the running horse breeders' plan of marketing his trotters, and instead of maintaining a training stable for the development of the youngsters he now sells his entire crop of yearlings under the hammer. They are to be offered in New York at the Fasig-Tipton Company's January horse auction.

Splan is deeply interested in the development of the European market for American trotters, and is rather proud of the fact that he was one of the first horsemen here to foresee the present demand for our light harness horses abroad.

"I remember twenty years ago," he said, "that when I came back from an extended trip to Europe and predicted that the Europeans would be great customers for the American trotter and that they would make a success of the breeding and racing of them in that country, many horsemen in this country gave me the laugh. It all came true as I predicted, and very much sooner than I thought it would. I suggested at that time that if the American breeders would make an organized effort to introduce the trotter abroad it would bring great results. They gave me the laugh again, but if the trotting horse breeders of this country had used as much effort and energy to advertise their business abroad as an ordinary everyday Yankee would to advertise a patent mouse-trap, it would have been the greatest thing that ever happened."

Splan takes the broad-minded view of the exportation of such horses as Silko 2:06 3/4, recently sold by John E. Madden to Louis Winans of Brighton, England.

"There are many reasons why I hate to see Silko leave this country, and the greatest is that I think he will be a great sire that will produce not one, but many trotters that will have a chance to go in 2:00. But he will be the best advertisement for the American trotter that ever went abroad."—New York Herald.

TEXAS NOW A FACTOR.

The Lone Star State gives promise in the near future of becoming an important factor in the light harness horse business. The recent meetings at Fort Worth, Dallas, Houston and San Antonio furnished some high-class sport, and a good class of horses contested the various liberal stakes and purse offerings.

The sensation of the circuit was the performances of the trotting stallion Todd Allerton 2:12 1/4. This stallion, who had been converted from the pace only twenty-five days before his first start on the trot, won three straight races in a week at Dallas, in the last of which he secured his record. Todd Allerton is considered one of the best trotting developments of the year, and will be brought North next season. He could probably have stepped in 2:10 in his last race. He is owned by R. B. Hutchinson of Checotah, I. T., and is trained and driven by Billy Wilson.

The two Chicago trainers, Dick McMahon and George Castle, were quite successful. McMahon won the free-for-all at Dallas with Citation and lowered the Texas race record to 2:06 3/4. Clifton Star won \$1,200 stakes, as did Directness. It was a fitting close to the Chicago reinsmen's great campaigning. George Castle showed a real high class trotter in his recent purchase, Queen of Woodcliffe. His four-year-old pacing filly Miss Castle beat 2:10 at Dallas, but did not lower her record.

The outlook for the harness horse in Texas is bright. New breeding establishments are being founded in different sections of the State, and high-class stallions and broodmares are in demand and bring high prices. A new market is being formed which will pay Northern breeders to cater to. These new farms, together with such pioneer breeding establishments as Colonel Henry Exall's large and noted Lomo Alto farm, are producing a high grade of youngsters. Stallions like Governor Strong 2:10 1/4, Governor Francis (3) 2:11 1/4, John Kerby (3) 2:13 1/4, Al Bock 2:08, Zola, and Cecil Allerton are making large stud seasons at good fees, and the training barns of the various Texas trainers are well filled with desirable prospects.

GENERAL WATTS A PERFECT HORSE.

Mike Bowerman was asked if General Watts 2:06 3/4, the champion three-year-old, has any peculiarities. "Yes," said the veteran trainer and driver, "he has one great peculiarity; he is absolutely perfect in every respect. He is the most sensible, even-tempered, best-mannered and speediest horse I ever trained. I never pulled the reins over but one other that approached him in these admirable traits, and that my old stud, Wilton. In many respects the two horses are almost identical, or I should have said were, for old Wilton has gone to horse heaven.

"General Watts is a very effectionate colt, and would be fond of pets, but I never have a dog or a goat about the stable. They are good in the case of a nervous, excitable horse, but General Watts is not that. He is fond of sugar, as the majority of horses are, and he will chew tobacco whenever he can get it. His groom taught him this. Whenever the boy takes a chew, he always gives the colt a nip off the plug. This colt has the best stomach any horse ever possessed. He will eat as regularly as it is put before him, and usually lies down after eating.

"He is the smoothest gaited, most earnest and most self-confident trotter I ever sat behind. When I drove him that mile in 2:06 3/4 I was just as safe in the sulky as one feels in a Pullman car riding over a perfect road with a good engine pulling the train and a sober man at the throttle. He is one horse that you can always judge correctly; you know just what he is going to do, and he always responds to the call with the best that is in him."

DAN PATCH A MARVEL.

Old Dan certainly is a marvel among exhibition horses, and the way he has continued, season after season, to go miles better than two minutes is remarkable, as it is seldom that a fast horse will keep on trying when pitted against the watch, usually getting cunning after a couple of seasons. Along in the early part of October it was thought the champion pacer was out of the game for good, as he fell seriously lame, and the veterinarians, while they conceded he might be gotten up to a mile around 2:03, were positive he would not beat two minutes again. He became perfectly sound, however, paced a poor track at New Orleans in 2:01, and after being shipped to Arizona looked so good it was decided to have Dean come on and drive the runner, which goes directly in front of Dan during his fast miles. Dean has held that job in all of Dan's fast miles of late years, and it means a lot to a trotter or pacer following a wind shield, whether or not the driver of the front runner is an artist in the matter of regulating pace.

The first man I ever saw do the job artistically was Scott Hudson, when McHenry had Dan Patch, and with the Kentuckian teaming the runner and the man from Illinois behind Dan, the public was given a chance to see the best reinsman of their day in action, both trying to make the same horse win. Dean is a great man, both in temperament and skill, for the job of driving a runner in front of a horse. In addition to being a skillful reinsman he is naturally a fine judge of pace, and this counts in many ways that cannot be clearly told in print. "Billy" Andrews is another good man at the game, and I am sure Dick McMahon would be, although I have never seen him try, because he is cool to the point of chilliness when driving, no matter whether he is in sixth position in a field of seventeen hobbled pacers or working out an easy going nag all by itself.—H. T. White.

There are few persons, says an exchange, who know how the name of "huckboard" came to be applied to a vehicle. It was "way hack" in the '20s, when the transportation of goods, wares and merchandise was almost entirely done by wagon. A Dr. Buck, who for many years afterward was the military storekeeper at Washington, was then in charge of military stores en route to army posts in the Southwest. In East Tennessee much difficulty was experienced by reason of the rough roads, and there were frequent mishaps, mostly from the wagons overturning. Dr. Buck overhauled the outfit, and abandoning the wagon bodies, long boards were set directly on the axles, or hung below; and the stores were loaded in such a manner that there were no further delays from break downs, and the stores safely reached their destinations. In special emergency, too, the load could be shifted or taken off in a hurry. The idea was probably not new, but Dr. Buck's example was followed, especially when roads were rough, and soon much hauling was done by the use of wheels, axles, and boards only. Now we have the huckboard, both in carriage and automobile forms, conforming closely to the original idea, though few suspect the source of it.

Conditions in the New York horse market remain substantially unchanged and are not different from those reported in nearly all other branches of trade at the present time. The auctions, where most of the second-hand horses, wagons, carriages and harness are bought and sold, seem to be suffering but little from the effects of the money famine, and in some cases are even exemplifying the old saying that it is an ill wind which blows nobody good.

Jackson's Napa Soda is the best hot weather drink.

CONDUCTED BY J. X. DeWITT

ETIQUETTE OF QUAIL SHOOTING.

The man who has a good Pointer or Setter, thoroughly broken, will usually get lots of invitations to go bunting with the boys who know of a good place where there are lots of birds and favorable ground to work them.

The peculiar part of these invitations are that the person extending same generally has no dog of his own at the time and seldom has one at any time when they are required, but depends for his sport upon "inviting" his friends who keep one or more dogs at all times, and consider it a part of the necessary equipment of a sportsman.

The writer recently accepted an invitation to hunt quail with a casual acquaintance and was surprised to find at the meeting place not only one, but three, other invited guests, none of whom had any sort of a dog, and all were more than glad to find the writer had brought along three Setters for their entertainment—and such it proved to be, for none of them seemed to have any idea of field etiquette, and most of the time acted as though the owner of the dogs was deriving great sport in bandling them for the benefit of others.

The day was fine, cool and clear and when we arrived on the grounds the sun was just beginning to shine warm enough to wipe from the face of mother earth the frost, which had been heavy the night before, and the grass and weeds were still quite wet as a consequence, although a heavy pair of canvas pants and oil-tanned bunting boots was preparation enough for that—by the man who owned the dogs—the others, well, they got wet as they walked through the weeds in their every-day pants and shoes, and also got literally covered with tar weeds and other kinds of sticky vegetation. The whole country looked fine, the weeds and woods showed a great variety of browns, with an occasional clump of green and yellow willows and some rich, dark green grass along a creek bed to finish off the picture.

I soon saw my companions knew little about the country we were in and less about the etiquette of the field and forest, and I rather think they judged me a sort of a dictator, when I suggested to them the customs of hunters, and they will probably not "invite" me out again when they need the use of a brace of quail dogs for a party of five. The following is part of the free advice given and which they needed badly:

Don't invite anyone to hunt over another person's dogs.

See that you have the proper equipment for comfort and convenience and try to be perfectly agreeable in every particular, and don't forget the rights of your companions.

Hunt twenty-five or thirty yards apart from your companions. When the dogs come to a point, don't rush wildly over to them, but take your time. If the dogs be closer to you, wait until your companions come close enough to get a shot, when the birds are flushed. The man behind the dogs should take the straight away shots. The right and left birds should be shot at by the hunter on their respective sides.

Don't shoot too quick in the attempt to get the first shot. If but one bird is flushed it belongs to the man on whose side it flies; if he misses you can then shoot.

Excepting in the brush or cover there is no need for "snap shooting." More birds are missed by shooting too quick than too slow. Two and one-half drams of smokeless and one ounce of number nines will get them if you hold right, and a 28-inch cylinder barrel will do the nicest work and not cut up the birds.

When you knock down a bird don't "race in" to get it; let the dog do the retrieving if he will; if he don't retrieve, take your time, anyway; don't get excited about it and get the dog excited also.

Don't leave dead or crippled birds until you have searched thoroughly for them, unless you want to spoil the dog.

Don't yell at the dog; talk in an ordinary tone or whistle to him.

Don't shirk your part of the hunting and expect your companions to take all the bad places. You may be a good fellow at home, but you should also be willing to take an even break with your companions in the field.

Don't kick at everything—"take your medicine" as it comes. If you are not hitting your share of the birds your companion will divide his bag with you anyway, if he is the right sort of a fellow.

If a single straightaway bird is killed by two shooters firing simultaneously don't claim it, but pick it up and toss it to the other fellow. If a bird flies to the other shooter's side, don't shoot, it's his bird. If the birds are scattered in the open and you are getting up single birds, take turn about at them.

In all cases and at all times keep the muzzle of your gun pointed away from your companion's, and in the brush and cover you should know where he is and not shoot in his direction.

Don't shoot in the direction of cattle and other stock. If the birds scatter in a garden patch, be careful where you walk and do no damage to the crops. If you open a gate, close it after you. If the gate is open leave it open—there is some reason for its being open.

Don't target your gun on "keep out" signs. Go up to the house and ask permission to hunt and you will generally be rewarded with a favorable reply.

Don't point your gun at yourself or your companions or at the dogs, and use care and good judgment in your sport, as you would in your business affairs—in other words, don't be a fool, or grab all, or a miser. Pay your share of the expenses and don't expect to measure your pleasure by the amount of game you can kill.

LIABILITY FOR GUN ACCIDENTS.

The vexed question of a dealer's or manufacturer's liability in the event of injuries being caused by the bursting of a gun barrel or any similar mishap has on various occasions come up for decision in courts of law. To prove defects of material or workmanship is, in such cases, difficult, and negligence on the part of the user is often shown to have existed. In 1901 an action was brought in Ireland against the makers of a nitro powder for damages for injuries sustained through the bursting of a gun. The gun was shown to be a muzzle loader, and the action was dismissed. In 1902 an important case on similar lines was decided in France, the manufacturer of a burst gun being exonerated because the shooter had loaded his own cartridges and had probably used an excessive charge. In 1903, for a similar reason, the case of Favo vs. Remington Arms Company, was decided against the user of the gun. Recently another case has been decided in the Supreme Court of New York. Full details are not, at the moment, before us. It appears that a repeating shot-gun had been purchased from a dealer in New York City, and the second day it was used the gun burst, causing injuries for which suit was brought to recover \$2000 damages. The verdict was awarded to the defendant. Evidence brought out the facts that the weapon was charged with a factory-loaded cartridge and that the catalogues issued by the manufacturer represented the goods stated therein to be perfect in construction and to be made of the best material. The judge charged the jury that, if a manufacturer shows that he has exercised reasonable care in the selection of materials, and carefully makes and inspects his products before sending them out to customers, he is not thereafter liable, unless it be shown that there were defects in materials or carelessness in manufacture.

The quail situation in Washington State is described by a Northern sportsman as follows:

"It is the California valley quail that is multiplying so rapidly in Washington. They are not as good a game bird as bob white, but that very fact makes them better able to hold their own against the gun and dog. Bob white flies perfectly to a dog, but the valley quail is foxy enough to think of getting out of danger. In this section he appears to be a brush bird, and when he takes to cover it is little use to follow him unless you are anxious to wear your eyes out looking for a little body to pot.

"It was not long ago that an Eastern magazine contained an article on quail in the Pacific Northwest. It was pointed out that bob white thrived on account of his ability to take care of himself, while the poor little California valley quail, being given to life in the open, was rapidly exterminated. The truth of the matter is that the writer got things turned around."

Henry Schock of Yreka and Dr. E. G. McConnell of San Francisco, who were out hunting last week, succeeded in bagging 100 geese.

Schock has the edge on the local sportsmen when it comes to goose shooting. He has a band of twenty-five wild geese that he caught when young. He takes them out with him and stakes them out, and when the wild geese are flying these live decoys call to the wild geese and they immediately circle around and light among the decoys. When a large band of the wild fellows have comfortably settled among the decoys, Henry comes forth from his blind, and a couple of war whoops causes the birds to take wing, when the firing commences and a large number are killed, after which the process is repeated as often as is necessary to get as many geese as they want.

William Campbell of Stockton, and Harley Clark and Cliff McCarty recently succeeded in bagging seventy wild geese at the Chatom Ranch, on the San Joaquin River. The birds were found in great numbers, but were difficult to approach, and most of the honkers bagged were shot as they flew from one pond to another. The geese are in excellent condition from feeding on the tender grain now sprouting in the wet lands.

SEATTLE TOURNAMENT.

Seattle men showed up well in the tournament of the Southwestern Washington Gun Club Association, which opened at Cardmore Station, November 16th. About thirty shooters were in attendance, comprising six squads of shooters.

In the race for the Hansen cup, Ed Garrett of Seattle, J. E. Rice of Bellingham, George Miller of Bellingham, and Ed Young of Tacoma were tied. Each man had broken twenty-four out of a possible twenty-five birds. In the shoot-off Young won by breaking twenty-three out of a possible twenty-five.

Mac and Garrett were tied for the high average, with John Rice second, and H. T. Denham and E. E. Ellis tied for third honors.

Nelson of Kent did good work during the tourney, and Ed Young of Tacoma also showed considerable ability. George Miller of Bellingham also made a good record. Junker of Seattle had the high average during the early part of the tournament, but fell down badly toward the close.

The third annual shoot of the rejuvenated Southwestern Washington Gun Club Association ended after a two days' session at the grounds of the Seattle Gun Club at Cardmore, under whose auspices this year's meet was held.

Top honors of the two-day meet were carried off by E. C. Garrett and J. McLaughlin, both of the Seattle Club. Garrett was high gun on the first day, with 175 argets out of 200, which brought him high average money. McLaughlin was second with 173, and John Rice of the Bellingham Club was third with 171.

McLaughlin was the principal winner of the day and annexed high money. He was fortunate in dropping into several events all alone for the money.

In the team shoot three teams tied. They were Seattle team No. 1, Garrett, McLaughlin and E. E. Ellis; Bellingham team No. 1, Miller, Rice and Patterson; Seattle team No. 2, Junker, Nelson and Hall. The score was 65 out of 75. Tacoma team shot into second place with 63. Seattle team No. 2 dropped out on the first shoot-off, leaving it up to Seattle No. 1 and Bellingham. It finally dropped to Seattle by one bird. There was a medal for each of the team members and the entrance and added money, \$15, was divided.

In the second day's work, Garrett tied with Junker for high gun with 171. McLaughlin was second with 170, which made Garrett high gun for both days and McLaughlin second for the meet. Garrett and Junker divided the money instead of shooting off.

William Stewart took the Seattle Sporting Goods cup with 23 out of 25, added money \$20. He shot to a tie with Nelson, but took it, 21 to 19, on the shoot-off.

In the championship event first money and the medal went to McLaughlin, \$20 added, and Garrett and Carlson shot to a tie for second. They divided the money.

The professionals who shot through both days were: W. Hillis, Peters Cartridge Company; Harry Ellis, Selby Cartridge Company; W. A. Robertson, Du Pont Company; Fred Clewley, U. M. C. Company; Frank Reihl, U. M. C. Company. Hillis was high gun the first day with 170 out of 200. Robertson and Reihl split second with 161, and Clewley was third with 165.

Mr. James Hildreth passed away at Denver on November 7. Mr. Hildreth was a well known representative of the Winchester Repeating Arms Company and was extremely popular. His demise will be keenly felt, both by the employing company, the trade and shooters generally in the territory he so long and competently covered.

In Oregon there is at the present time no closed season on trout. This untoward condition of affairs was given out by the Portland Telegram recently, as a result some anglers prepared for an all-year onslaught on the trout. Afterwards other Portland papers insisted that the open trout season closed on midnight, October 31st. In this the warning was a year behind time.

The following synopsis of the law is given by Albert E. Gebhardt, secretary of the Oregon Fish and Game Association:

"The trout season is closed during the months of December, January and February along the Umpqua River and its tributaries, and is open elsewhere in the State the year around. Trout may be caught only with hook and line. The limit of size is not less than five inches. The limit of catch is 125 per diem for each fisherman. Night trout fishing is prohibited, except within the tide waters of the Coquille River. The sale of trout is prohibitive at all times. The salmon trout season is open the year around. They may be caught only with hook and line."

Formerly the law had the trout season closed all over the State from November 1st to April 1st, but a rural representative from Douglas county tried to get some special privileges from the Legislature for his constituents along the Umpqua River and had their closed season shortened to three months. That would not have been so bad, as the Umpqua waters have probably the largest trout population in the State, but in wording his bill he left the season open in every other part of the State, so his constituents still suffer. Thus the seven years' work of the Oregon Fish and Game Association was wiped out.

Drink Jackson's Napa Soda.

HUNTERS' LICENSE AND GAME PROTECTION AND PROPAGATION.

[By H. T. Payne.]

The hunting license, which in the first season of its operation in California has netted the magnificent sum of \$80,000, is in fact, a voluntary contribution by the sportsmen of the State for the purpose of maintaining and increasing, if possible, a game supply which is an asset of the State equal in value to half of her gold product.

The proposition to license the hunter for the purpose of raising a fund adequate to the necessities of consistent game preservation originated at the last annual meeting of the California Game and Fish Protective Association, and the bill was introduced in the Senate by Senator Willis at the request of the president of that association. When the bill creating this license came up before the Fish and Game Committee of the Senate the spokesman of the then Fish Commission made the statement that "it wouldn't amount to anything, as not more than \$7,000 at the most could be collected, and it would cost all of that to collect it." To this the president of the Protective Association, who had made a careful study of the subject, replied: "Figuring by the same percentage of the total population that had taken out licenses in the States of Oregon and Washington, and estimating the population of California at 1,700,000, the license should produce \$82,000 a year." Nevertheless the Senate Committee opposed it and reported the bill back with the recommendation that "it do not pass." The sportsmen of the State were earnest in their desire to contribute this money for the better preservation of the game and urged their Representatives in the Legislature to stand by the bill. It finally became a law, with the happy result of placing upward of \$80,000 at the disposal of the Board of Fish Commissioners for the preservation, restoration and propagation of game.

The payment of this large sum of money into the State Treasury to the credit of the game preservation fund has awakened a deep interest in the minds of all classes of people. Those who were not in touch with the sportsmen of the State were astonished to learn of this widespread interest in the sports of the field and the large number of persons who shoot for pleasure and recreation, and those who are not posted on the game conditions of the State and the many advantageous uses to which this large sum can be put are asking the questions: "What is to be done with it? How will it be used? What new varieties of game are to be introduced into the State?"

The proper expenditure of this money will require the most careful consideration of the Commissioners, coupled with the best advice they can obtain from the experienced sportsmen of the State, and therefore should not be too hastily undertaken. But there are two uses to which a large portion of this sum must be put that demand the immediate attention and prompt action of the board. The first is the employment of a number of experienced patrolmen, who are practical sportsmen, with their hearts in the work, to enforce the laws, and enforce them properly, especially in this city, where they are being almost openly violated by the game dealers and restaurant keepers every day in the week. Secondly, the restoration of the native quail in sections where they have been depleted by constant shooting. This should command the immediate attention of the Commissioners, for if this work is not taken up at once it will soon be too late to accomplish anything until another year. In fact, this should have been commenced six weeks or two months ago, although quail can be trapped fairly well for the next two months, and if properly handled a considerable start in the right direction may yet be made.

The trapping, transportation and distribution of quail will require the special attention of a man with a practical knowledge of the habits and food of these birds, as well as a wide acquaintance with the conditions of the supply of quail in the several sections of the State. This and the handling and distribution of new species that must later be introduced is of sufficient importance and will require such intelligent care and understanding of the subject as to be worthy of being made a separate department of the work of the board.

California is a State of widely varying climatic conditions, caused partially by its great latitude, but more particularly by its remarkable variations of habitable altitudes. In the distribution of our native quail even this climatic difference must form an important factor in the work to be done. When one speaks of California quail, even to the great majority of active sportsmen, it conveys but one idea; yet in California we have two separate species and one sub-species of the same genus, not including the mountain varieties. These three varieties of the valley quail are known to the ornithologist as the lophortyx californicus, inhabiting the humid regions of the Coast mountains and valleys from the Bay of San Francisco north; the lophortyx californicus valli-cola, inhabiting the valleys and foothills of the Coast from San Francisco south, the Sacramento and San Joaquin Valleys and the foothills of the Sierras for their entire length; and lastly, the lophortyx gambelii, inhabiting the Colorado desert to the eastern slope of the Coast range northward to the Panamint Mountains and eastward into Southern Nevada. This species enjoys the distinction of being generally known in California as the Arizona quail and in Arizona as California quail.

A little study of the flora of the three sections of the State inhabited by these three varieties of the same genus will show how each has selected a habitat peculiar to itself. It is a well known fact that the distribution of both animal and plant life is governed by the temperature and humidity, and while birds are more easily migratory than other animal life, they are often more closely restricted in habitat because of the effects of temperature and humidity on certain endemic plants necessary to their existence.

California has been divided into four faunal zones as relating to animal life generally, and it is interesting to note that these faunal zones correspond exactly in their demarcations to the habitats of the several varieties of California quail. The humid zone of the Coast is the habitat of the first mentioned species (californicus). The Sierran zone is the habitat of the mountain varieties. The California zone is the habitat of the valli-cola, or the valley quail proper, and the arid zone the habitat of the gambel quail. While originally each of these species was found in great abundance in its particular zone, no one of them encroached upon the domain of the other. The species inhabiting the humid Coast zone are found in rank growths of underbrush, weeds, ferns and other moist places. Those of the California zone are frequenters of the sage districts, the open hillsides and the dry sandy washes, while those of the arid zone limit their range to the driest sections of the State, where, as a rule, there is but little brush, and undergrowth is almost entirely absent.

Whether it is because of the temperature and humidity of themselves or of their effects upon the plant life of these sections, experiments have already determined that the gambel quail will not become acclimated in either of the other zones. A few years ago the Country Club turned out a large amount of this species on its preserves at Point Reyes, but within a short time they had entirely disappeared. The writer, on two occasions, liberated a number of the same species in the Cucamonga Valley, San Bernardino county, and even in that dry section the same result was had. Therefore, in any scheme of rehabilitating depleted coverts the gambel quail must be eliminated from consideration. The sections that need restocking the most are the natural habitat of the valli-cola, or valley quail proper. This species can be secured in great numbers in certain sections of the State. Trapping should begin about the middle of August, and can be successfully continued until about the first of January. A large enclosure should be provided, sheltered from the storms and furnished with plenty of dry fine sand. In this the birds should be kept and fed until the close of the hunting season, when they should be liberated in bunches of about a dozen pairs, care being taken to see that this is done near some suitable roosting place and close to such coverts as they are wont to select for nesting purposes. Handled in this way the birds will be in healthy condition when liberated and will soon pair off and begin nesting. For each dozen pairs so liberated there should be at least eight or nine fine beavies ready for the gun when the season opens in the October following.

It was with the expectation of having this important work intelligently and conscientiously handled that the sportsmen of the State imposed this hunting license upon themselves. It is also because of the importance of this work and the special care with which it must be handled—not for one year, but for all the years to come—that it should be made a special department of the labors of the commission. By the proper handling of this work all the coverts of the State around the big cities, notably Alameda, San Mateo, Santa Clara, Contra Costa and Los Angeles counties, where the constant shooting of the large number of sportsmen of these cities will deplete any naturally produced supply, can be kept in good shooting condition from year to year, furnishing excellent sport for those who are voluntarily furnishing ample money for the purpose and who are placing at the same time millions of other dollars in general circulation for the benefit of the whole people.

There are other species of quail that will be better adapted to the conditions of certain sections of the State than our native species, and which are superior to them as a game bird, but of these I shall speak in a future article.

The problem of introducing these, as well as other species of upland game birds, will require the still more careful consideration of the climatic conditions of the several sections of the State wherein they are to be liberated, as well as the habitat and habits of the varieties selected for importation. In the solution of this problem the theoretical opinions of the naturalist will avail but little. The knowledge of sportsmen of wide experience and close observation should be freely consulted. Because a bird thrives well and is popular with the gunners of its native heath is no argument that it will flourish in a country whose temperature, humid conditions and flora are radically different. In a future article I shall speak of other species of upland game birds, and give my reasons why they will or will not do well in the State, or to what sections they will be best adapted.

DUCK HUNTING NOTES.

Wild duck shooting in the vicinity of San Francisco has been more than indifferent during the week. In Southern California conditions are more congenial to the sportsmen, judging from the following report of the doings of Los Angeles shooters last Sunday.

The Bolsa Chica duck hunters bagged many limits Wednesday. In spite of the evil effect of the full moon in giving ducks a chance to gorge themselves during the night hours, the gunners had royal sport.

The first flight was prolonged and lively, and there was something going on all morning until the big bands came in off the ocean about the time the battleships began tooting their sirens and heaving up anchor off Long Beach.

From then on until nearly everybody quit with the limit, the sport was fast and exciting. The freshly arrived Northern birds came down in splendid style whenever they were given a chance by the heavy artillerymen below. Teal and spoonbills were the prevailing birds early in the day, and for the first time this season, but after the first flight the sprigs began to come in.

Thousands of new birds came in on the Northwest wind, there being quite as many as were seen last Saturday, if not more. Teal in particular were more numerous, and widgeon not quite as plentiful.

The teal pitched freely to the ponds and everybody's bag partook of them to a considerable extent. Limits were killed early, many being in by 10 o'clock.

Redheads, bluehills and gadwell were presented quite generally, and a number were accounted for in the bags. On the Cerritos and Pasadena Clubs a small flight of canvasback was in evidence, and several were killed.

Geese were seen in the Bolsa, but so far as known none were shot. The hunters were too busy with the ducks to bother much with the checkerbreasts.

On the Green Wing Land and Water Company, Gen. C. F. A. Last, August Winstel, Jacob Fieber and two guests, one of them Fred Holbrook of the Recreation Gun Club, got the limit; sprigs, teal, spoonies and widgeon being the birds.

On the Chico Land and Water Company's preserve, a shoot of the old-time sort was enjoyed. Chris Krempel, Ed Golter, Percy Schumacher and one guest all got the limit and took the 2 o'clock car home. An immense number of birds settled on the reserve ponds, and when the keeper rode through them the ducks rose in a dense mass and could have been visible three miles away.

On the Olympic Gun Club, Mel Nordlinger was high gun with twenty-nine. B. F. Blinn killed twenty-two. Dr. Schiffman got eighteen. The Baum brothers killed a large mess, and Frank Bowles got a dozen.

On the Canvasback Gun Club, E. L. Hedderly shot a twenty-gauge and got the limit. Ed. A. Featherstone shot his new sixteen for the first time, and killed twenty-three. L. A. Denker and his guest, Harry Snowden, both got seventeen. George S. Hupp killed fifteen. Henry Haack, a guest, accounted for seventeen. Ernest Julian got a dozen.

On the Christopher, H. C. Dillon, Godfrey Fritz, J. W. Morrison, William Frick, A. W. Eager and J. A. Crook were shooting, and Fritz, Frick and Eager got good bags. Eager was high with twenty-eight; Crook had two dozen; Frick got twenty-one; Godfrey, Fritz, nineteen; J. W. Morrison, seventeen; H. C. Dillon, a good mess, and Messrs. McLeod and Burns, guests, had good sport also.

On the Blue Wing four limits were reported, the rest being within a few birds. H. N. Manington, R. B. Stephens, the Glassel brothers, Perry Howard, W. F. Ball, W. J. Patterson, are reasonably certain to be on the marsh every Wednesday. They had great sport and quit early.

At the Sunset Club, F. H. Fox and D. Hartman, who were visitors, secured thirty-five and fifteen birds respectively. Club members secured bags as follows: E. Paggi, thirty-five; N. L. Biehl, thirty-five; Dr. F. Dillingham, thirty-five, and C. E. Groat, thirty.

On the Westminister, F. E. Browne, C. C. Carpenter and E. H. Barmore all got the limit. On the Golden West, E. A. Curtis and Dr. Mathes got all the law allows. Asa Casner and E. W. Selback both got the limit on the Los Patos grounds, and Herman had twenty odd. Drs. Parker and Colwell also did well. The mid-week squad on the Little Center Club had the best shoot for some time, and made heavy bags.

The Lomita and Bolsa Chica were no exceptions to the rule, and both had splendid sport, with goodly turnouts on the ponds.

In the Bixby district the shooting was the best since the first of the season, the Northern birds affording some fast sport. On the Cerritos grounds, Walter Clark got the limit, including two canvasbacks and one gadwell. Dr. W. L. Graves got twenty-six, one canvasback and one mallard. Robert E. Ross killed twenty-five, including three canvasbacks. Charles McFarland bagged twenty-two of them canvasbacks. The Pasadena Club had good sport and so did the Green Wing Gun Club, the latter killing limits.

ENGLISH SPARROW IN THE SOUTH.

The invasion of Southern California by the English sparrow—the "avian rat"—is now in full swing. The advance guard made an appearance at Newhall two months ago. At this time there were none of the unwelcome visitors in Los Angeles. By some curious chance the English sparrow got into Owens Valley a few years ago and is now seen in large numbers in Independence. Possibly the Newhall invaders came from the Owens Valley brood.

That the English sparrow may be destructive to small fruits and berries is possible, and if that be so, he will be an unwelcome addition to the feathered population of San Fernando Valley, but in some respects his bad reputation is undeserved. The common charge against him is that he drives song birds away, and it is asserted, as if it were an undisputed fact, that he has evicted all other small birds from the parks of Eastern cities.

It is not true, however, that the English sparrow drives other birds way. There are thousands, perhaps millions, of English sparrows in Central Park, New York, but they have not driven the other birds out. One writer states: "I have observed them closely during all seasons, and although they fight furiously and frequently among themselves, I never saw them attack other species. Thrushes, warblers, vireos, flycatchers, orioles, chickadees, nuthatches, song sparrows, blue birds, cardinal birds, robins, grackles, starlings, finches—all the native birds of the Eastern woods and fields, and various imported species—are plentiful in Central Park and show no fear of the English sparrow. The sparrow, however, is very respectful to the robins and grackles and keeps his distance from them. When a robin hops near a flock of feeding sparrows, the little birds scatter out of his way."

Some of the popular aversions to the little Briton may be pure prejudice, yet there may be good reason for classing him with the "undesirables." The game warden plans a campaign of extermination against the Newhall invaders, and we suggest to him that he go about it in a scientific way and make examination of the interiors of as many birds as he can kill to ascertain what they are eating. We venture the guess that he will find more insects than berry seeds.

A BADGER HUNT.

The village is talking a holiday, for the squire's gamekeeper has bagged a badger, and there is sport afoot. The animal has been captured in the old-fashioned, sweet and simple way. Badger-drawing for business purposes is a proaic arrangement in these parts. The men just dig down to the cavern where the creature lives when he is at home, and, when the opening is wide enough, an expert creeps into it. He carries a lighted candle in his cap and a long pair of pinchers, or nippers in his hand.

Mr. Badger, seeing a visitor whose presence is not desired, backs from him until he reaches his uttermost wall. Then, unable to get further away from the trouble that threatens him, he becomes savage and spiteful. He is cornered, and is aware of the fact. As his dander rises he opens his mouth. That is the fatal moment, for a badger is like a human being—he can open his mouth too soon and once too often. The expert has only waited for this. As the snapping jaws divide, the man dexterously seizes the lower one with his long pinchers, and Mr. Badger, at his mercy, is triumphantly drawn out and clapped into a bag.

This is the preliminary procedure; the opening round. The remainder of the sport is to make the day a red-letter one. The badger is to be drawn again, this time by a dog, and dozens of men and boys are trooping along the road to the scene of action. For the young squire of the village is of a sporting turn, and has made proclamation that he will present a whole sovereign to the man whose dog shall draw this particular animal; and a sovereign is a deal of money hereabouts. It represents nearly two weeks' wages to most of the inhabitants. So every able-bodied man and every hobbledochy loses a morning's labor, and journeys forth to see somebody's dog win its master a pound.

All the local sporting folks are, of course, early on the spot. There are dogs to be backed and dogs to be laid against, bets to lose and bets to win. It is like a local "Derby," with a "satty" fair thrown in. There are serviceable dogs present; even the boys have brought their animals, likely animals, too, some of them—fit to go anywhere, do anything, and fight everything. In the country poor people do not keep dogs for the look of the thing, nor for company. They are kept for work. When a farm laborer pays seven and sixpence a year for a license, he expects a profit on his outlay. His dog will have to provide many dinners in the course of the twelve months.

The squire comes along in person to see the conditions properly fulfilled. He settles the order of the attack, and, of course, his word is law. He gives his special favorites the first chance, but they gain nothing by the preference, for this badger is a "hot 'un."

A trench has been dug for the creature—a trench that starts level with the surface and gets rapidly deeper until the hole at the other end is about three feet from the top. The badger is popped out of the bag into the trench. He immediately retreats to the far end, and there he places himself, like a hero, with his back to the wall. He is game.

The dogs discover this. Each man in his turn places his tyke in the trench, and encourages him

with, "Now, boy!" "At him, Rover!" But Rover, and Tohy, and Jasper, and Jack, and Carlo are not so eager for the fray as are their masters. Not one of them will tackle the badger, who, with his jaws open waiting for them, looks a very formidable opponent indeed. He is ready for all comers, but none come.

The dogs back away, much to the fury of their owners and the amusement of the young squire.

"Well, boys," says that gentleman, "I'm afraid I shan't lose my sovereign to-day."

But at that psychic moment, as is the usual course of things, the unforeseen and unexpected happens. On the top of the bank appears an old shepherd. At his heels is Mary, an antique and dilapidated mongrel.

"Can she have a go?" he inquires. Everybody roars with laughter. The humor of the idea is exquisite, and the countryside rings with the jests of the sportsmen. But the shepherd maintains a calm and imperturbable demeanor.

"I'd like my bitch to have a try," he observes.

"Why, she hasn't got a tooth in her head!" Everybody is aware of that.

"It's a pound if she draws the badger, ain't it?" the shepherd, humbly suggests.

There is another spasm of laughter. But before it dies away, the shepherd catches up his Mary and drops her bodily into the trench. Then there is a strained silence; for the derided mongrel has been dropped in "backwards." Her tail is towards the badger, and her head is towards safety. She follows her nose and makes for home. But the badger has fixed on her hindquarters like a leech, and when Mary emerges from the trench she brings the badger with her.

The mongrel has "drawn" the badger, after all the champions have failed. She could not help herself. And the placid shepherd draws the sovereign.

THE SULKER; HOW TO USE HIM.

The peculiarities of dogs are more noticeable in proportion to the number one comes in contact with. Many have already framed a mode of behavior for themselves that it often takes many weary days to change, and that is one reason why trainers, as a rule, prefer to work dogs that have never been handled before, writes Loch Laddie in the St. Louis Sportsman. But these cases are generally out of the ordinary, and the monotony of daily life afield is changed by the unexpected appearing.

About one of the most despicable habits an old dog can get into is that of habitually getting into the sulks when the handler differs with him over some point. Two-thirds of well bred dogs seldom develop a real case of the sulks, but in old dogs of high class it often occurs when the handler tries to force the canine to do something he doesn't like. He at once refuses to hunt. Take, for instance, an old covey dog, who is confirmed in his belief that the Creator destined him alone for a covey dog and that the matter of single birds was to be left to some pottering youngster. If you take this fellow and hold him up on singles and insist on it by punishment, you frequently find a sulker, whose pride if offended by the chastisement, and any attempt to encourage him further appears useless. He will lie down and refuse to follow. The best way to cure this fellow is to leave him to his own wits about finding the road home and abandon him there. This will cure the most unruly in his line.

But the sportsman who has only one dog afield and wants to hunt will have to resort to the old maxim of kindness; by the man who is shooting in a strange country and has to take a train home this rule could not be followed. But if you are in a country where you reside and there is no danger of the dog becoming lost and you have another dog with you, pay no further attention to the sulky fellow, but attempt to drive him home at the first signs of an attack.

The writer recently had an old Setter dog who developed this trait; it became especially evident when he was commanded to search for scattered birds in plume grass. This he disliked very much, and finally sulked and refused to hunt. All persuasion of the gentle order failed and resorting to violence proved about as unavailing. He deliberately laid down in the field and was left there without any further use of words. This proved his cure, for he has never attempted a repetition of his former behavior.

Other readers of The Sportsman inquire about breeding their field dogs, stud fees, etc. As soon as a dog makes a winning in an All-Age field trial stake he is placed in stud. No matter how his winning was made, he gets the credit of a class dog. At once his stud fee runs up from \$35 to \$75, and it appears to some novices that the higher the price the greater must be the value of the offspring. This is certainly not true, for even the greatest field trial dogs have the habit of very often throwing pups that the ordinary scrub would be ashamed of. So you can not always bank on winnings as criterion of what the progeny will be. Breed to a sire who has earned his title by hard work and bird finding qualities, and you are more certain to secure desired results than otherwise, for a field dog is a working animal. If perpetuation of this trait is desired the types of dam and sire must conform to it. A thoroughbred running horse is seldom selected as the sire of work horses. So the dog who has won in field trials only by his speed is not the one to breed your good shooting bitch to.

Many of the prominent field trial dogs have certainly the bird sense and other combinations desired by

the shooting dog man and he is the one to patronize. But if you have in your vicinity a well bred shooting dog that you know can deliver the goods, it is certain that if you breed to him you will not regret failing to send to some dog you know nothing of but his printed field record.

A new ruling has been made by the game wardens of Arizona concerning game brought across the International line from Mexico. All game is to be subject to the same restrictions as game killed in Arizona, wherein is prohibited the sale of the meat of deer, antelope, mountain sheep or goats, or the carcasses of wild turkey, dove, quail, partridge, grouse, wild duck, goose, snipe or game fish. Until lately the border towns have enjoyed the importation of large quantities of venison, brought in by the hunters from the mountains of Mexico.

TRADE NOTES.

U. M. C. Notes.

At Mt. Pleasant, Iowa, October 17th and 18th, Mr. George Maxwell broke 387 targets out of 400, making 94½ per cent. Billy Heer broke 93 per cent. Both were using U. M. C. shells and Remington double barrel guns. Mr. Harry Taylor won the handicap event on the 17th, breaking 25 straight from 21 yards, with U. M. C. shells and a Remington gun.

At Ossining, N. Y., October 16th and 17th, Mr. Ray Hendricks won the high amateur average, breaking 325 out of 375 under very hard weather conditions. He used U. M. C. shells. Mr. George Lyon was a close second, breaking 324. He also used U. M. C. steel lined shells. Mr. C. Haight on the 17th, the last day of the shoot, won the merchandise event, breaking 24 out of 25 with U. M. C. clubs, and on the first day, Mr. G. K. Kouenhoven, known to his friends as "Kelly," made a new ground record, breaking 99 out of 100 with U. M. C. shells.

At Ottawa, Ill., October 16th and 17th, Jesse Young broke 363 ex 400, shooting U. M. C. shells, and thereby tied Billy Stannard for the high average. Max Kneussi was a close second with only one bird behind, also shooting U. M. C. shells.

At Springfield, Ohio, October 16th and 17th, "Pop" Helkes broke 280 out of 400—96 per cent—with his U. M. C. shell Remington gun combination. Mr. Ed Cain broke 370 out of 400, also shooting U. M. C. shells.

Mr. C. B. Adler, dropping off at Stokeville, Neb., October 11th, broke 91 out of 100 for the local boys. U. M. C. shells and a Remington gun were used. Mr. Adams also won the high gun at Ozawie, Kan., October 17th, breaking 192 out of 200, with a run of 82 straight.

On October 18th at Atglen, Pa., Mr. Lester German broke 140 out of 150 with U. M. C. shells.

Hunter One-Trigger.

The Hunter Arms Company are anxious to equip your L. C. Smith gun with the Hunter one-trigger, if it is not already complete with that up-to-date improvement. It shoots either barrel any way you want it; either right-left, left-right, right-right, left-left. The Hunter Arms Company, Fulton, N. Y., will send you full information if you write them at once.

Get One.

The Winchester Repeating Arms Company of New Haven, Conn., is just now sending out a handsomely printed and highly illustrated catalogue of its shells. The shooter (and particularly the novice) possessing one of these little booklets, who is not familiar with the kind of a load he should use for different kinds of game, can, by the aid of it, order his supply of ammunition and feel assured that he is getting just about what is required. This useful booklet can be had for the asking. Mail a request to the Winchester Repeating Arms Company, New Haven, Conn.

Peters Points.

Mr. H. J. Borden, the well known powder representative, shot at Fort Gibson, Miss., October 25th and made the splendid score of 195 out of 200 with Peters factory loaded shells.

A most remarkable score was made and a new amateur team record established at Wilmington, Ohio, November 11th. The Wilmington Gun Club accepted a challenge from a five-man-team, representing one of the St. Louis clubs, the match to be at 100 targets per man, amateurs only eligible, all 16-yard shooting. Scores made by Wilmington team were as follows: Ed Stephens, 99; Sabin, 96; Lewis, 97; Sayers, 96; Dr. Gaston, 96; Total, 484. So far as is recorded, this is the best score ever made by five amateurs in a team match. The entire team used Peters factory loaded target shells. After the match Dr. Gaston broke 119 out of 125; Mr. Stephens, 109 out of 110; Mr. Devoe, 106 out of 110; Mr. C. A. Young, 144 out of 150; all using Peters shells, a pretty convincing demonstration of the superior quality of these goods.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

THE FARM

GOOD GROOMING INDISPENSIBLE.

The horse is so closely allied and identified with all man's interests that the transactions of every-day life cannot be consummated without his aid, says the Team Owner. The proper management and care and control of this indispensable animal is an art to be proud of. When the pleasure horses of a millionaire come in from a couple of hours' spin in the park, each horse is taken in charge by a trained groom as soon as the horses come to a standstill. The animals are then led into the stables and treated to a rubbing and handgiving of limbs warranted to scare away the holdest sign of stiffness. They are refreshed in every way possible and altogether treated according to a well-tryed rule. How different the home-coming of the weary horse that has been hauling heavy loads through the streets all day. He comes plodding into his stable and in many cases is allowed to go right to his stall with no attention, where he immediately falls to eating the meal already there. This is a pernicious habit. Live mechanism can no more resist the wear and tear of constant work than can inanimate, and who would expect a machine to go very long without proper care?

The care of the skin and coat is not a matter of smoothness or ugliness of the coat; it is merely a question of cleanliness of the skin, which is an essential to the health of the horse. Some people reason that as a horse turned out to pasture does not need grooming, it is not natural and the horse should not be groomed. The necessity for grooming comes with the amount of work done and the kind of food given the horses. The secretion of the glands of the skin are enormously increased by work, and also the work horse must be fed nutritious food, which also largely increases the secretions of the skin.

Nature must be assisted by artificial means to remove these increased secretions, or the pores of the skin will become clogged and the health be impaired. The greater the activity of the skin the greater the attention necessary. The horse in the state of nature takes only the exercise necessary to obtain his food and he feeds principally on laxative diet, and as the debris of the food and excretions of the system are carried through the kidneys, grooming is not necessary.

The appearance of the coat readily shows the healthy or unhealthy condition of the skin. Without grooming, the dirt remains not only in the hair, but through the excretory glands enters the system. This important set of glands acts as drains, and when these are checked with impurities the general health necessarily suffers.

When the horse sheds its coat in spring and autumn the nourishment of the old hair is arrested and the soft, pulpy extremities shrink and dry up, the hair becomes detached and falls out; at the same time a new hair is formed and pushed up to its side.

Grooming answers two principal and several subsidiary ends. First, it removes from the skin those particles of perspiration, dust, and dirt which would otherwise impede and clog the free action of the sweat and oil glands. Secondly, it removes the scurf or worn-out cells, which are no longer required on the surface of the skin, and which would, especially when cemented together by particles of sweat, add to the obstruction of the glands.

In order that grooming should produce the two above-mentioned principal effects, it is necessary that the skin be cleaned with a good bristle brush, strongly applied and well laid on. Against argument in favor of the brush, it may be urged that in racing stables the wisp and the rubber, though use of the brush is not altogether neglected, are largely employed. It would be absurd to say that trainers do not know their business. A distinction may fairly be drawn be-

tween horses in training and other horses. The thorough cleaning of the skin of the horse is an operation requiring both skill and hard labor. To make his labor effective and to produce the greatest effect with the least expenditure of power and in the shortest time, the groom should add his muscular strength with his weight. He should, therefore, stand well away from the horse and lean his weight on the brush, which thus used will penetrate the coat more effectually and with less exertion to the man than if worked only by his muscular strength. The principal working of the brush should follow the natural direction of the hair. It will penetrate as deeply and thoroughly when worked with it as against it. To remove, however, external dust and sweat, which may have caked in the coat, it may sometimes be necessary to brush against the hair.

When grooming is neglected, the horse, for the reasons already given, soon loses flesh and condition, and generally deteriorates in health, while eventually actual disease of the skin may be the result. Among the more common diseases arising from neglect of grooming are those which are caused by the presence in the skin of parasitical insects, such as mange and lousiness. The insects inducing these disorders, when not disturbed by the action of the brush, breed rapidly. All such diseases are sure and certain signs of neglect. These insects will not attempt to obtain a lodging in the skin when the pores and glands are constantly disturbed by the use of the brush.

Soft and glossy coats, as a general rule, indicate good grooming and careful stable management, while long, dull coats argue the reverse. But I must give a warning against the practice of administering tonics and other stimulants, which, by artificially exciting the system, produce temporarily a good external appearance, but in the long run are the fruitful parents of disease. Not only is it necessary that the horse should be groomed after exercise, but it is essential that he should be groomed immediately after the exercise. All the pores of the skin are then open and the brush will more effectually clean the skin than if the operation is delayed until the skin has cooled and its pores have closed and the perspiration has dried and caked on them. No horse which is heated or has been perspiring should be ever allowed to stand undried one moment longer than is absolutely unavoidable. When a delay cannot be avoided, the evil consequences should be reduced to a minimum by clothing him warmly, or by allowing the saddle or harness to remain on and by preventing any draught from coming on the animal.

"DIAMOND BILLY" HALL THE WORLD'S FOREMOST HORSE AND MULE DEALER.

Lancaster, Mo.—This thriving county seat town owes most of its prosperity and its fame abroad to the gift that came to a poor farmer boy about twenty-five years ago. When William P. Hall began swapping plugs over on the farm, four miles east, Lancaster was a hamlet with an old-fashioned square Courthouse and a few stores scattered about it. The place was rarely heard of, as it was hack of the main line of railroad, and the few people who went there journeyed in a hack. To-day there is a magnificent modern building for official business, "the square" is built up with handsome new mercantile houses, there is a good electric light system and every adjunct to a hustling American city.

"Billy" Hall has become the largest individual horse, mule and wild animal dealer in the world, and Lancaster is his home. In consequence of his immense stables the farmers of Schuyler county have a home market for all their grain, horses and mules. From 18,000 to 20,000 animals pass through Mr. Hall's stables yearly, and the normal population is from 1,500 to 2,000. A large proportion of his stock goes to Cape Town, South Africa, where for fifteen years Mr. Hall has maintained a branch establishment under the management of his brother, Louis J. Hall. Down

there the Missouri mule is regarded as one of the main features of America's splendor, and it commands a higher price than the same class animal from any other part of the world.

When Mr. Hall began shipping large consignments of horses and mules to Germany, England and South Africa some people called him a "plunger" and predicted early disaster. They said he was foolish to go into countries where they could teach Americans the science of breeding. To even a cautious man it did not look reasonable that a farmer boy of twenty could make good in such a market. But he did, and his success is easily explained—he knew a horse. The animals he took across the water were the representatives of the highest type of American production. "Billy" had personally selected and appraised every one. The remarkable faculty has stood the test of twenty-five years' constant service. The odd part of it is the big horseman can't tell you how he does it, but says he goes largely upon the looks of a horse's eye.

"When you meet a man of nerve," he said, "there's something about his eye that tells you he's a stayer in an emergency. It is the same way with a good horse. His eye shows his blood."

Mr. Hall's method, one he has followed for many years, is illustrated by a late transaction at Corydon, a small town in Southern Iowa. Previous to his visit the town was hilled as if for a circus. Great posters were placed on the hoards and thousands of handbills scattered throughout the county. On the day of sale farmers began bringing in their stock with the dawn. Hundreds of families came just to see the show. Churches took advantage of the opportunity to pay off debts or get new organs by serving meals to the throng. Mr. Hall, in his high hat, fur overcoat and gold-headed cane, stood on the square and reviewed the offerings as the owners led them before him. The examination was apparently the most casual, as 326 head were purchased inside of the four hours he remained in town—devoting less than a minute to each animal. The prices paid ran from \$50 to \$275 a head, and when Mr. Hall left town the farmers had checks to the extent of \$51,000 in their pocket-books.

"Prices are higher just now than I have ever seen them," said Mr. Hall recently, "and my opinion is they will stay up for some time. Many said when the automobile came it would put the horse out of business, but I never felt afraid. You might as well talk of doing away with men because of the automatic machinery. And then what's the good of an automobile up and down hills? A mule will haul you anywhere, good road or bad, but the auto halks the first time you strike a stormy road. They talk about the cussin' a mule gets, but it's only a friendly whisper compared to what's said by the motorman when he gets out in the country with his oil machine.

"You see, a horse is something you can sorter freeze to. A good man has a real regard for a fine horse, and always will have. You can string your auto cars out from here to Kansas City, but the old Missouri mule will still have work which nothing else can do, and the horse has stronger friends than has the huzz-wagon."

Mr. Hall generally has two or three circuses on the road, and is an extensive importer of elephants and other wild animals. Not long ago his brother, Mr. Louis J. Hall, traveled 3,000 miles through the heart of India, negotiating with the rajahs for the big animals which delight the eyes of young America. The elephants will be shipped direct to Lancaster, accompanied by natives, who will train them in Mr. Hall's barns and lots.

One season, when Mr. Hall wintered two of his circuses in Lancaster, his barns were crowded with horses and he had to keep the wild animals in upper rooms of the buildings around the square. The hoarse constrictors were housed in the basement of the Courthouse. Some of the officials sent a traveling plumber down there to fix a heating pipe. He came out without his hat, and when he could talk he said he began feeling for the break in the steam pipe over the fur-

nace when it seemed to move. Of course, he said, he knew it was an illusion, and that something that he had eaten or drunk had gone to his head, but he believed he would go over to the hotel and lie down until his nerves got steadier.

One night a bear got out and had the whole town to itself the next morning. It circled around the square, looked in at store doors, and finally laid down across the walk in front of the entrance to the court house. Some very dignified people climbed trees, and others stayed in their storm cellars. It was a big animal, and nobody felt like asking it to please "step aside." It was a rather quiet day in Lancaster until the keeper got hack to town and coaxed his pet to return to the cage.

Mr. Hall is now forty years old. At twenty-two he was the largest individual shipper of horses in the world, and now his business is the making of his home town. In spring, summer and fall every day brings buyers from the Atlantic to the Pacific, and in the winter the town is full of show people, who are generally patrons of the merchants. Mr. Hall's telegraph and cable toll last month amounted to \$335. The Western Union Company keeps an extra operator at Lancaster to look after his business alone. He has a wife and several children. Mrs. Hall had greater opportunities for education than her husband, who had to shift for himself at twelve, and she attends to his books and correspondence. They occupy a handsome home a block from the square, the yard in front of which is often alive with deer, sacred cows and queer looking animals from the tropics.

IMPROVING DAIRY CATTLE.

The first step in the line of improvement should be the selection of a pure-bred sire. Select one from a dairy breed and select the breed that with your care and feed and conditions, will produce a pound of butter fat for the least money, give it is nearly as is possible the care and food it had in its native home. Never use a cross-bred or a native sire.

If you select Jerseys, give them the Island-of-Jersey care; if Holsteins, such care and feed as they receive in their Holland home.

In selecting a sire do not be governed by pedigree alone. There are thousands of pedigrees that do not amount to the paper that they are written on. Don't bank on pedigree, but make performance the test.

Pedigree is valuable in a way, but it must be backed up by the performance of ancestry at the pail. When you have a sire, test, with the scales and Bahcock test, each cow in the herd. Select the best ones and begin breeding for milk and butter.

Don't try to run a dairy without special purpose cows.

Beef and butter can not be developed in the same cow. Either breed for one or the other, for there is no half-way road to success.

Wheat bran and middlings are as good, if not better, all things considered, than any other foods. Gluten, oil meal and many of the other foods are good for milk, but are deficient in minerals that the animal requires. We are too apt to look for protein alone; but the cows should have mineral matter.

There is a larger amount of mineral matter in wheat bran than in any of the other feeds. But a mixture of wheat bran and gluten, half and half with good ensilage will make a very good ration and is more commonly fed than any of the houghten feeds in the best dairy sections.

If a cow is ailing, call a good veterinary or else some farmer who has had experience in doctoring sick cows, seek his advice, for as a rule he will know what is the matter and what to prescribe.

There is no one breed that is adapted to all climates and to all conditions. In order that they may be at their best they must be kept as nearly as possible under the same conditions of food and climate as those under which they attained their excellence. Any material change in either of these conditions is certain to make more or less change in the character of the individuals of the breed.—Farm World.

DEATH OF R. ASHBURNER.

About 3:30 o'clock, October 16th, Robert Ashburner passed away at his home on what is known as the Hebron farm, three miles east of Woodland. The announcement of his death caused no surprise, as he had been in failing health for some time. His affliction was further complicated by a slight stroke of apoplexy two months ago, and that induced partial paralysis.

Deceased was a native of England and 73 years, 1 month and 11 days old. He came to California in 1860, first locating in San Mateo county. He brought over from England for the late John Parrott, a herd of fine cattle. After a residence of 18 years he removed to Lakeville, Sonoma county, where he lived for six years. He removed to Yolo county three years ago.

Mr. Ashburner was for many years a great fancier of Shorthorn cattle. He was an exhibitor at the State fair and was awarded third prize for his herd. On account of failing health he made up his mind over a year ago to dispose of his cattle. Last year he joined with T. B. Gibson and H. P. Eakle Jr. in inaugurating the first big sale of Shorthorn cattle ever held in the county. A few days after the State fair he sold a number of his cows and calves to the supervisors of San Diego county as the nucleus of a county farm herd.

On the 6th of February, 1869, Mr. Ashburner was married to Miss Maria Reading, who is also a native of England, and who came to California in 1868. She survives him. They have no children.

Deceased was a good citizen and a devoted husband. An honest, upright course in all his dealings with his fellow men earned for him the esteem and respect of all who knew him.—Woodland Democrat.

Last summer, a man who should have known better, tied a heated horse under a shade tree, and left it uncovered. In twelve hours it was dead from congestion.—Farm Journal.

Some feeders say that it is bad practice to place before hogs more feed than they will eat up clean. While it is true that there may be some waste in this method a pig is good for nothing else but feeding, and he should have access to his grub at all times.

Keep close watch of the team, while working on a hot day. If the horses do not sweat, there is something wrong.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

Our Christmas Issue

Will Be Out December 21, 1907

It will have a handsome Cover and the inside will be embellished with numerous illustrations and contain many articles of interest that will appeal to breeders and all lovers of the horse, including much statistical matter, the list of new performers, etc., that will add greatly to its value for reference.

THE FIELD SPORTS DEPARTMENT, handsomely illustrated, will be replete with articles that will interest those who are devoted to the Gun, Rod and Dog.

ADVERTISE IN IT.

You will reach the people whose trade you are after.

WANT AND FOR SALE ADVERTISEMENTS.

\$3.00 buys an inch single column space, and all you can get in it. If you have a horse for sale, you can tell more people about it this way than by any other possible means. Try it and get results.

STALLION OWNERS,

who are desirous of getting in an early announcement, should make arrangements without delay for using this issue so that illustrations can be made. It will be a valuable medium for this purpose, as it will be preserved for its statistical matter.

THE PRICE WILL BE 10 CENTS A COPY

Breeder and Sportsman - San Francisco

\$7,250 Guaranteed Only \$2 to Nominate Mare \$7,250 Guaranteed

Pacific Breeders Futurity Stakes No. 8

TO BE GIVEN BY THE

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1907 to Trot and Pace at Two and Three Years Old

Entries to Close Monday, December 2d, 1907

\$4250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners, and \$450 to Owners of Stallions

MONEY DIVIDED AS FOLLOWS:

- \$3000 for Three-Year-Old Trotters.
- \$200 for Nominator on whose entry is Named the Dam of Winner of Three-Year-Old Trot.
- \$1250 for Two-Year-Old Trotters.
- \$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.
- \$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.
- \$1000 for Three-Year-Old Pacers.
- \$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.
- \$750 for Two-Year-Old Pacers.
- \$200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.
- \$100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

\$250 IN SPECIAL PRIZES FOR STALLION OWNERS

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

1st Prize	\$100	4th Prize	\$25
2d Prize	50	5th Prize	20
3d Prize	35	6th Prize	20

The Above Prizes will be Paid on December 24th, 1907.

ENTRANCE AND PAYMENTS—\$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; \$5 May 1, 1908; \$5 October 1, 1908; \$10 on Yearlings, February 2, 1909; \$10 on Two-Year-Olds, February 1, 1910; \$10 on Three-Year-Olds, February 1, 1911.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace; \$35 to start in the Two-Year-Old Trot; \$35 to start in the Three-Year-Old Pace; \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer. Colts that start at two years old are not barred from starting again in the three-year-old divisions. For Entry Blanks and further particulars address the Secretary.

CONDITIONS.

The races for Two-Year-Olds will be mile heats, 2-in-3, and for Three-Year-Olds, 3-in-5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. If a mare prove barren or elope or lose a dead foal or twin, or if either the mare or foal die before February 2, 1909, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracts for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1907.

Entries must be accompanied by the entrance fee. Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for \$7,250, the amount of the guarantee, only. Hopples will not be barred on pacing horses. Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division than there are starters. Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

P. O. Drawer 447, San Francisco, Cal.

Some of the range horses that seem to be the most nervous and retain their fear the longest, very often make the most valuable animals when carefully handled. The chief point is to handle them so as to control them and in this way remove that fear which seems to be inherent in every colt, whether range or native bred unless they are accustomed when very young to the things that might later cause them fear. We are satisfied that the best plan for preparing range colts for market is to take them as weanlings and then bring them up in the way they should go. Be sure to get those with good heads and well-set underpinning. When brought in as weanlings they are just as susceptible to kindness and careful management as farm stock and there is no reason why they should not be as valuable on the market if not more so than the native product. The range horse has better feet, better bone and more satisfactory quality throughout than most native horses considering both in an average way. Another feature about the range product is the bravery possessed. When once broken such an animal will face almost anything. This spirit gives the fitter of horses an opportunity to bring out a market product especially striking in style and finish. The broncho blood, however, is likely to crop out at any time and a bad runaway is often the result of too much confidence.

It is more than probable that there will be a great deal of soft corn this fall, particularly in the Northern Corn Belt, and hog raisers may have a hard time getting through the winter.

Good drainage, either natural or artificial, is essential for success with alfalfa.—North Dakota Experiment station.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

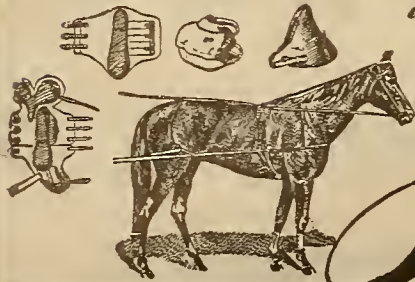

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c. W. B. Eddy & Co., Whitehall, N. Y.

"LOOK FOR THE BIG RED W"

THE big red W is the connecting link between the consumer and the makers of Winchester goods.. Over a year ago we adopted this safe-guarding trade-mark and since that time every box, carton and package put out by us has borne the big red W, the hall-mark of goods as perfect as brains, experience and ingenuity, coupled with a modern and complete plant, can make them. Our object in adopting this trade-mark was to make it easy to distinguish Winchester goods from other makes, which equal them neither in quality nor reputation, and thus protect you and protect ourselves. We have done our part. Will you do yours by looking for the big red W whenever buying anything in our line? The big red W is to guns, cartridges and loaded shells what the word "Sterling" is to silverware the world over. For your own protection we again ask you to "Look for the big red W"

THOS. H. WILLIAMS, President.

THE WEEKLY BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco
Postoffice.Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCEMoney should be sent by Postal Order, draft or letter
addressed to F. W. Kelley, P. O. Drawer 447, San Fran-
cisco, California.Communications must be accompanied by the writer's
name and address, not necessarily for publication, but
as a private guarantee of good faith.

PACIFIC BREEDERS' FUTURITY No. 8 has filled beyond the expectations of the directors of the Pacific Coast Trotting Horse Breeders' Association. Up to this writing (Thursday) Secretary Kelley has received 397 nominations to the stake, which is about thirty more than were received last year and within a half-dozen of the largest list ever received for this stake, which is now in its eighth year. Stake No. 4 had a total of 403 nominations, the largest in the history of the event, and the mails may yet bring in seven or eight additional nominations from distant points and place Stake No. 8 at the top of the list. When the financial situation all over the country is considered, the showing made by Stake No. 8 is remarkable, and is proof positive that breeders of the trotting and pacing horse are more numerous and as enthusiastic as ever over the outlook for colt racing in California. This liberality and enthusiasm are commendable and show that interest in the American trotting horse is on the increase. A further proof of this fact is the forming of new driving clubs and harness racing associations and the building of new tracks throughout the State. At least a half-dozen new tracks have been built during the year, and several are to be constructed during 1908. Stallions were fairly well patronized during the past season and the outlook is for increased business for them during the coming spring. There was never a time when so many fast horses were driven on the roads and raced on the Park speedway in this city as were in evidence the past summer, and it is certain the number will be even greater next year. Taken altogether, the harness horse business is in good shape in California at the present time, and with a good circuit for 1908 a year of still greater prosperity is in store for those who breed, train or drive the light harness horse.

EVERY CALIFORNIAN will rejoice to learn that the National Trotting Association has dismissed the case against Millard Sanders, which has been on its hooks for the past two years in connection with the Lou Dillon scandal. Those who know Millard Sanders never for a moment believed that he had anything to do with the doping of Lou Dillon, if such a thing were done, which is doubtful. His only connection with the case was his natural desire to see his brother not punished for the crime, and he would not have been worthy the name of brother had he felt or acted otherwise. During all the case Millard Sanders carried himself with dignity, refusing to be drawn into it in any way and declined to be interviewed. That he is entirely innocent of any wrong doing whatever in the matter is the relief of every one who knows him, and the dismissal of the case and his complete exoneration will be received with the sincerest approval by all Californians.

THE PICTURE OF MAUD FOWLER, the dam of Sonoma Girl 2:05¼, with her weanling by Lynwood W., which appears on the front page of this paper, was taken at the farm of the mare's owner, S. B. Wright, of Santa Rosa, last August by photographer Hall of that city. The filly is now known as Lotta Lynwood and is owned by Geo. A. Pounder of Los Angeles.

Thanksgiving Day was the occasion for many trotting matinees in California this year. The day was perfect and large crowds attended all the meetings.

IT IS TIME the Secretaries of the different organizations throughout the State that propose giving harness race meetings in 1908 should begin making a study of conditions on this Coast with a view to the arranging of programs. Lists of all the horses that have been raced here during the past two years should be compiled and all trainers should be communicated with as to the classes they desire. Programs for early closing stakes should be ready not later than February 1st, and classes made for purses to close late in the season. A little intelligent and energetic work on the part of secretaries during the next two months should enable them to arrange programs that will not only fill well, but secure plenty of starters in every class. California should have the greatest circuit in its history in 1908.

NATIONAL BREEDERS' ASSOCIATION.

The second annual meeting of the American Association of Trotting Horse Breeders met in New York Friday of last week.

The meeting, which was attended by about one hundred horsemen from every section of the country, was presided over by William Russell Allen of St. Louis, in the absence of the president, Senator Bailey of Texas. Gen. C. C. Watts offered a resolution advocating that the three-in-five plan be abolished in colt races, and called attention to the unsatisfactory results of many of the two and three-year-old races, and said he desired the association to go on record as being in favor of the abandonment of the present plan, irrespective of the attitude of other trotting associations.

Secretary Henry K. Devereux of Cleveland said that the committee appointed by the American Association of Trotting Horse Breeders had decided against the continuation of the three-in-five heat plan for three-year-old colts at the meeting held last month at Lexington, Ky. The resolution will now be sent to all trotting associations.

It was decided to assist in every way the Bureau of Animal Industry of the United States Department of Agriculture in the development of horses for carriage service. The request was made by the bureau to work in harmony with the committees of other breeds of horses.

W. E. D. Stokes secured the passage of a resolution to encourage with cups and other trophies amateur light harness sport. He suggested that every effort should be made to interest young men, and help them train and drive horses, and in this way popularize trotting.

A committee consisting of H. B. Bain of Poughkeepsie and C. A. McCully and W. E. D. Stokes of New York was appointed to revise the list of the Board of Directors, which consists of fifty members, representing thirty-one States. C. H. Aldrich of Nebraska resigned, and Col. J. C. Kirkpatrick of San Francisco, S. Walton of Falls Mills, Va., and W. F. Garth of Huntsville, Ala., were added to the list.

It is the intention of the association to secure mile tracks in both the East and West for annual meetings, and a committee will probably be appointed at the next meeting to take up the matter and secure the tracks.

GOOD ONES BY RED MCK. 43766.

Red McK. 43766 by McKinney, dam Bonnie Red by Red Wilkes, next dam by Almont 33, etc., is proving himself, as might be expected from his breeding, a sire of speed and high class youngsters. His yearlings that have been broken all show much natural speed, and his crop of weanlings are hard to equal in any country. With Red McK.'s conformation and breeding it could not very well be otherwise. He is the only stallion in California that has a sire and dam sired by the two best sons of George Wilkes.

In the Year Book the maternal breeding of that sensational pacing gelding Argot Boy 2:03¼, by Argot Wilkes 2:14¼, that Chas. De Ryder has at Pleasanton, is not given beyond his first dam, Annie Miller, by American Boy 16963. From his breeder, Chas. A. Carpenter, of Anderson, Ind., the Horse Review learns, however, that his granddam was the noted broodmare Annie Miller (dam of the fast trotter Sag B. 2:13¼), by Jim Monroe 835, son of Alexander's Abdallah 15; third dam the famous Bruna (dam of one, of two sires and two producing daughters), by Pilot Jr. 12. Mr. Carpenter writes the Review that he has an own sister of Argot Boy, seven months old, that is a horn pacer and very promising.

GOOD HORSES WELL BRED.

Henry Busing, whose stock farm is located at Byron, Contra Costa county, has consigned a half dozen good horses to the Chase Combination Sale, which is to take place at 478 Valencia street on the 23d instant. If you have received a catalogue of this sale you will find them numbered from 10 to 15, inclusive:

The first is Amazonia, a brown mare standing 16.1. She is seven years old, a pacer, and a fast one, as she has trialed in 2:15. She is standard and registered, sired by James Madison, and her dam is Amazon by Chas. Derby. Her second dam is the dam of W. Wood 2:07. This mare is a pleasant driver and city broke.

Prince Allen is a five-year-old black gelding, 16.1 hands and his sire and dam are both registered. He has shown quarters in 34 seconds and is a nice-gaited trotter. Is well broke and a nice horse to drive.

Florence Searchlight is a gray filly. She is a trotter. Her sire is the great Searchlight and her dam a registered mare by Rustic, one of the best stock horses ever owned in California. Florence is handsome, good gaited and level headed, but being only two years old has never been worked for speed.

Palomita is a nicely named three-year-old black beauty that can step so fast at the trot that she is looked upon as a great prospect. She is by Diablo's good brother, Arner, a horse that is siring speed from all kinds of mares. Don't let this one get by you when the sale is held.

Mr. Busing has all these horses at the Alameda track, which can be reached from this city in forty minutes, and he will be pleased to show them to those who call.

ANSWERS TO CORRESPONDENTS.

William Clark, Medford, Oregon—The mare you refer to is probably Princess Alice 2:16. She was a black mare by Dexter Prince, dam by Gen. McClellan 143. We know nothing further about her breeding. She was campaigned in Oregon in 1891.

F. P. Ogden, Highgrove, Cal.—The mare Lou 2:14½ by Ira, is not registered, and she is not eligible to registration.

W. M. Kniebes, Newman, Cal.—Where at the end of a race two horses stand 3-2 and 2-3 respectively in the summary, they divide second and third money between them. That is, the two moneys are added and each awarded one-half the amount.

Ed Graser, Riverside, Cal.—We do not believe Ed Geers ever drove Sweet Marie in a race, at least we can find no record of his having done so. We are not sure, but we believe the fastest mile ever made in a harness race west of the Mississippi River was made by Chas. De Ryder's pacer, Argot Boy, when he won the third heat of a race at Phoenix, Arizona, last month in 2:03¼.

Lou Mativia, Dixon, Cal.—Zolock was foaled in 1895. His name first appears in the Year Book of 1904, when he was nine years old. He started in two races at the State Fair that year, being third to Kelly Briggs in the 2:10 class pace, and third to Highhall in the free-for-all pace. He took a record of 2:09¼ that year at San Jose.

J. P. Soares of Watsonville expects to stand the percheron stallion Van 9940 and Van Jr., also the trotting bred stallion Steam Beer the coming season. Both these horses are well known and popular throughout the Pajaro Valley. Mr. Soares has a fine nineteen-months-old old colt by Welcome 2:10, dam Pajaro Belle by Adrian 2:26½, that is a natural pacer and shows so much speed that Mr. Redman, who recently purchased Pajaro Belle, has entered her in the Pacific Breeders' Futurity Stakes No. 8, in hopes of winning with his prospective foal by Steam Beer.

Among the few living sons of George Wilkes are Baron Wilkes 2:18, Gambetta Wilkes 2:19¼, Patchen Wilkes 2:29½, Kaiser 2:28½, Sentinel Wilkes and Woodford Wilkes. It is a question of but a very few years when the only direct descendants we will have of the famous founder of the Wilkes family will be in the second and later generations.

Another hoost was given to trotting-bred high steppers during the Horse Show last week, when it was announced that Alfred Vanderhilt had paid \$10,000 for Sir James, a heavy harness horse, that won his maiden entrance into the ring on the first day of the show and that is essentially American in breeding. Though a fine type of hackney for ring purposes, Sir James is a pure American trotter. He is by Bow Bells 2:19¼, out of a Red Wilkes mare. This is the highest price paid at the show, though several head of likely-looking stock changed hands. In Sir James Mr. Vanderhilt has a horse for which George Watson refused several handsome offers, and had he not been able to command the fancy price never would have let go. Sir James should land many a blue in the coming season.

Geo. W. Ford of Santa Ana sold his trotter, Burnut, at the auction held at the Arizona Fair. Burnut brought \$515.

Thanksgiving Day Races

At Sacramento.

The Thanksgiving race meet at Agricultural Park, Sacramento, under the auspices of the Sacramento Driving Club for the benefit of the Protestant Orphan Asylum, was a success in every way. The spectators were given more amusement and genuine sport to the minute than could be seen at a regular State Fair meet, says the Union, and on the whole the events were closely contested and classy for horses not in the racing business and trained for only a few days for the trials. Although it was the one afternoon in the year that people pined for the dining-rooms of their homes, there was a good attendance and several hundred dollars was realized for the cause of charity. The events were all interesting and some of them exciting in the extreme.

The best race of the day was third on the program, when Lady Bird, owned and driven by W. V. Pierce, showed two bursts of speed that brought the race followers to their feet in cheers for the plucky little mare. In the first heat Lady Bird, after several trials for the start, finally got off ten lengths behind the bunch. She went from the post to the quarter before she got within reach of the dust of the other carts, but by the time she had made the half-mile post she had overhauled Baby Knight, Bobby Dobbs and showed her heels to Katy B. The crowd in the grandstand at once realized that a race of the spectacular kind was on, and all arose to their feet and cheered for the mare. Bobby Dobbs, an old horse that has trotted since the flood, plowed along steadily and seemed, notwithstanding his great age and former hard knocks, to hold his own. Lady Bird made the heat in 2:35.

In the second heat Lady Bird refused to start, preferring to do a few fancy jig steps for the edification of the grandstand. She was not in the running at all. But when the third heat was trotted—well, the crowd sat up and took notice. The little mare was almost an eighth of a mile behind at the start, but she was going like the wind, passing all the rest at the three-quarter post and won from Katy B. by several lengths. If the first heat had been exciting, the last heat was a perfect whirlwind of excitement. The mare proved to be the best trotter of the day, although she did not make the time that was accredited to Briarwood in the second race.

It was an ideal day for racing. The sun was warm and the track was never in better condition. Very little dust was on the course, and the spectators could see every second of action while the races were in progress. A certain amount of dignity was lent to the occasion by the presence of Superior Judges Peter J. Shields, J. W. Hughes and C. N. Post in the judges' stand, and Mayor-elect Clinton White in the timekeeper's stand. The races were well conducted; it was a gentlemanly meeting in which the owners of the horses were the drivers and were striving for the honor of their stables.

The receipts amounted to several hundred dollars, which sum will go to assist in caring for the little tots in the Orphan's Home. Summaries:

First race, class D—	
Major McKinley (F. H. Metz)	1 1
Sir Charles S. (W. J. Ivey)	2 2
Time—2:57½, 2:58½.	
Second race, class A—	
Briarwood (I. Christie)	1 1
Penrose (Frank Wright)	2 4
Instructor (Ray Dittus)	4 2
Blanch T. (Charles Silva)	3 3
Time—2:25½, 2:23½.	
Third race, Class B—	
Lady Bird (W. V. Pierce)	1 4 1
Katy B. (G. N. Shane)	3 1 2
Bobby Dobbs (Jay Wheeler)	2 3 3
Baby Knight (L. Beech)	4 2 4
Time—2:35, 2:35, 2:34.	
Fourth race, class C—	
Presto (N. T. Hunt)	1 1
John F. (John Silva)	2 2
Anheuser (F. Wright)	3 3
Time—2:39½, 2:40.	

Fresno Races.

The races given by the Fresno Driving Club proved a great success, according to the testimony of many spectators, and they were certainly good from the point of view of the horsemen or the bicycle enthusiast, who could appreciate the close competition and fine work. According to the Republican, the feature of the day was the ladies' driving contest, pacing, distance one mile, best two-in-three heats, won by Danny Morris' Newport, in two heats, each of which was stepped off in 2:20; Mrs. Strong driving. David St. Clair, driven by Mrs. D. L. Bachant, won the first heat, but broke in the second, coming around almost the mile in a gallop. Mrs. Bachant hrough him down to a stop, and then fainted. Mrs. Wilburn then drove the next heat.

The first heat was won by David St. Clair; Mabel C., driven by Mrs. Schuyler Walton was second, and Newport, driven by Mrs. W. C. Strong, was third. Time, 2:25. The second heat was won by Newport,

with Mahel C. second and David St. Clair third. Time, 2:20. The third heat was won by Newport, with David St. Clair second and Mabel C. third. Time, 2:20.

This gave first place to Newport and second to David St. Clair. The first prize was a hat, while the second was a pair of shoes.

After several running races there was a one-mile novelty race for mules. In this event the mules were to walk the first quarter, to trot the second and gallop the third. When it came to walking and trotting, the mules showed up well, but fell down on the running part. A mule owned by O. E. Kunde won from a field of four entries. A set of harness was the prize.

The seventh and last event was a novelty driving contest, in ordinary road buggies, first prize to the one driving nearest to three minutes. It was won by Mr. Johnson in a top buggy.

A large crowd was present, the unusual features embodied in the races attracting many persons. The day was good, but the track was not in the best imaginable condition.

Los Angeles Driving Club.

In the presence of 15,000 spectators the Los Angeles Driving Club held one of the most successful matinees in its history Thanksgiving Day. Though the track was dusty and hardly in condition for fast work, two Pacific Coast records were smashed and nearly all of the heats were negotiated in less than the classified time.

W. A. Clark Jr. drove his mare Miss Georgia against the Coast record for pacers, hitched to a road wagon. The former record was held by Welcome Mack, his time being 2:11¼. Though the track was not in condition for record breaking, Mr. Clark succeeded in lowering the mark by one and one-quarter seconds, finishing in 2:10 flat. The first half-mile was made in 1:04½, but the pacemaker wearied and Miss Georgia was forced to finish by herself.

Bellefont, driven by Bob Smith, smashed the Coast trotting record for road wagon in 2:10 flat. The former record was held by Hazel Kinney, who raveled the mile in 2:14½ last year, also driven by Smith.

The matinee proper was preceded by a horse parade, conducted by Dr. J. A. Edmonds. It was the third horse parade which Dr. Edmonds has arranged under the auspices of the Los Angeles Driving Club and was by far the most successful. One hundred and seventy-nine were in the procession—an extraordinary showing, considering the fact that no prizes were offered nor awards made.

The most notable of the entries in the parade were six coal black draft horses, shown by the Maier Brewing Company. Evenly matched in size and color and almost perfect in conformation, the animals made a brave show as they passed around the track.

The feature of the saddle class was Rosemead, a bay stallion belonging to F. E. Judd. Dan Hogan showed a fine road four hitched to a drag. His horses are wonderfully matched, both in color and size and step well together. Unfortunately, there were no other entries in the class, so Mr. Hogan was not given an opportunity to show his team in competition with others. Had he been, however, it would only have served to accentuate the fine points.

A fine gig horse, exhibited by L. P. Ramsey, also attracted much attention. The horse is a bay gelding named The Demon and has fine action.

Dr. J. A. Edmonds, after the parade, said that he was entirely satisfied with the result. "It certainly showed that there are still good horses and good turnouts in Los Angeles," said he.

"Those who entered their horses did so purely out of sportsmanship, as no trophies were offered nor awards made. I certainly am delighted with the interest shown. This is the third Thanksgiving Day parade which I have organized, and it is by far the best."

The parade started at 1:10 o'clock. Dr. Edmonds was told by the directors of the club that but one hour could be allowed. Everything was carried through without the least confusion and forty minutes from the time the first horse stepped onto the track the last horse had left it.

The first race of the matinee proper, the mile dash, three-minute, mixed, was won by Tobasco, owned and driven by Charles Chick, in 2:31. Maxine, owned and driven by Perry B. Lowe, took second place and Nonie, owned and driven by R. B. Moorhead, finished third. Vilday, Maggie Mason and Charles N. also started.

The second race, the 2:30 pace, mile heats, best two out of three, was won by Zoelletta, owned and driven by Harry Mesmore. Bernie Wilkes, owned and driven by L. A. Denker, took the first heat in 2:23½. In the second heat she got away badly and at the quarter was second from the end, but showed a wonderful burst of speed and at the three-quarters seemed a likely winner, but broke on turning into the home stretch and finished last.

The third race, 2:15 trot, mile heats, best two out of three, was won by Ida Millerton. Hazel Kinney won the second heat of this race in 2:14, amid great applause. The fourth event, the free-for-all trot, was won by Helen Dare. Her most spectacular performance was in the first heat. She broke at the start and got away at the tail of the bunch. Not until the half was reached did she get into her stride, but then she settled down to

down to work and pushed Glory hard for first place at the finish.

The time being limited in the third race, the 2:25 pace, it was declared a dash. The sixth race, the free-for-all race, was declared off. There were but two entries in this event, W. A. Clark Jr.'s Miss Georgia and Zolock, belonging to the San Bernardino Driving Club. Zolock was withdrawn on account of injury.

The 2:30 trot was changed to a dash and was won by J. Direct, owned and driven by J. R. C. Burton. The 2:25 trot, dash, was won by Almont, owned and driven by Charles Nowlin, in 2:22. The last race of the day, the mile dash for pole teams, was one of the most exciting events. It was won by a pair of bays, Red and Ned Buster, owned and driven by L. E. McLellan, in 2:34. The winning span got a bad start and seemed to be out of it, but on the quarter they settled down and left their opponents hopelessly in the rear. The only other entry was a span belonging to Dr. W. A. Connoly, Palo Verde and Senator Smith. The summaries:

Mixed, 3:00 class—	
Tobasco, b g (Chick)	1
Maxine, b m (Lowe)	2
Nonie, b m (Moorhead)	3
Time—2:31.	

Pacing, 2:30 class—	
Zoelletta, blk m (Messmore)	4 1 1
Bernie Wilkes, b m (Denker)	1 7 5
Tom Hayes, blk g (Snowden)	2 3 2
Isabelle, s m (Lowe)	3 4 4
Irish, b g (Watkins)	5 2 3
Joe Athby and Lady Sefton also started.	
Time—2:23½, 2:23, 2:26.	

Trotting, 2:15 class—	
Ida Millerton, blk m (Delorey)	1 2 1
Gen. Boodle, b g (Moorhead)	2 3 3
Hazel Kinney, b m (Reynolds)	3 1 2

Trotting, free-for-all—	
Helen Dare, b m (Beckers)	2 1 1
Glory, blk m (Pounder)	1 3 2
Regalo, b g (Cline)	3 2 3
Time—2:15½, 2:12½, 2:13.	

Pacing, 2:25 class—	
Siegfried, b g (Long)	1
El Diablo, b g (McLellan)	2
Artesia, b h (Jones)	3
Josh S., Bulah and Rancho del Paso also started.	
Time—2:21.	

Trotting, 2:30 class—	
J. Direct, b h (Burton)	1
Belle Mason, b m (Gant)	2
Nat Bruen, s g (Snowden)	3
Monk R., Liberty Song and Direct Maid also started.	
Time—2:25.	

Trotting, 2:25 class—	
Almont, b m (Nowlin)	1
Zombretto, br m (Christopher)	2
Buck, b g (Clark)	3
Glennetta also started.	
Time—2:22.	

Dash, pole team—	
Red and Ned Buster, b g (McLellan)	1
Palo Verde and Senator Smith (Connoly)	2
Time—2:34.	

Berendos Park, Red Bluff.

The races given at Berendos Park Thanksgiving Day by the manager, F. N. Frary, were quite successful, though the attendance was not as large as the high class racing program deserved, for though good horses can go against time and each other, they have a hard time getting ahead of a good Thanksgiving dinner.

The program was fully carried out, and Mr. Frary deserves great credit and the support of the community for the effort he is making to revive the interest in the light harness horse.

The first race advertised was a matched race for a purse of \$200 between F. N. Frary's Loring and H. C. Weitfeld's 19-year-old horse Escort 2:23. This did not take place, as Escort was declared unable to start. Instead a race between Loring and Mrs. Frary's four-year-old stallion Herbert Dillon, was substituted. Herbert Dillon won two heats and the race in 2:31 and 2:33.

Next was a running race, one-quarter mile and repeat. The entries were Kitty, owned by James Smith of Hay Fork; Gabriel, owned by F. Story of Anderson; Sweetheart, owned by Cone Ranch of Red Bluff. Both heats were easily won by Kitty. Time, 0:24 and 0:24½.

Third came an exhibition mile by F. N. Frary's yearling filly Leta Dillon to beat three minutes. She was paced by her sire, Herbert Dillon, and easily went under the wire in 2:51.

The fourth was an exhibition mile by W. F. Brooke's yearling colt to beat three minutes. He was paced by his sire, Andrew's Altamont, and trotted a good mile in 3:12.

Then followed the feature of the afternoon, the trial mile against time by Herbert Dillon. It was trotted in 2:21, last half in 1:08, last quarter in 0:33½. He trotted this mile without a pacemaker and he and his driver, Lou Rowley, who is a master in his business, were loudly applauded as they came under the wire.

The novelty race, the conditions of which required

the entries to walk to the first quarter, trot to the half and run home, created much amusement. "Slim" Hudson's black saddle horse reached the quarter first in a walk and won the \$5 purse. Mrs. Lilly Guersy on her sorrel reached the half first on a trot and won the second purse of \$5 amid a round of cheers, getting quite a start on the home run, but Ed Frary on his mare Esther only waited to finish his trotting stunt before he speedily overtook her and won the last purse of \$5 in a run under the wire.

The afternoon's entertainment closed with a half-mile running race between Adonis, owned by Frank Story of Anderson, and Kitty, owned by J. Smith of Hay Fork. As the little mare Kitty had seemed well high invincible earlier in the day the air was full of hats and cheers as Adonis came under the wire a neck ahead in 51 seconds.

As the people filed out of the gate on their way home a veteran lover of the sport was heard to remark: "Well, our track record for half-mile for yearlings of 1:27½, made eighteen years ago by Escort, was lowered to-day by 2½ seconds by little Leta Dillon, as she trotted the first half of her mile in 1:25."

The Day at Newman.

Over a thousand people attended the matinee races given by the Newman Fair Ground Association, which opened the new track at Newman, Cal., on Thanksgiving Day, and all enjoyed an excellent program of racing, with many hot contests that brought cheers from the crowd as the horses dashed under the wire. The weather was ideal and not an accident or disagreeable incident happened during the day.

Joseph House and C. W. Schank were the judges, E. S. Wagenheim and William Lunn acted as timers, and F. Meredith was marshal of the day. The horses were started by L. Dobrzensky, who got the horses away well and without long delay. The track is to be rented to Mr. A. J. Gillett, who will train a number of good horses there. He has the good McKinney stallions Ed McKinney and Advertiser, both of which will make the season there.

The summaries of the day's races follow. All harness races were at half-mile heats:

First race, free-for-all, \$150—

Cranky Thorn (Helm)	1	1	1
Advertisor (Gillett)	4	2	2
Albert E. (Allen)	3	4	2
Roan Wilkes (Drake)	2	3	4

Advertisor and Albert E. made dead heat for second position in last heat.

Time—1:09¼, 1:10, 1:09.

Second race, 3:00 class, \$75—

Gossamer (Dirst)	1	1	1
Dewdrop (Gates)	4	2	2
Experiment (Allen)	3	3	3
Professor W. (Gillett)	2	4	dr

Time—1:17½, 1:15, 1:19.

Third race, buggy horses, \$35—

Rattlesnake (Hiesguera)	1	1
Beauty (Whittle)	2	3
Leading Lady (Kniebes)	3	2
Rix (Sparks)	4	4
Tobie J. (Jones)	5	5

Beauty and Leading Lady divided second and third money.

Time not given.

Cowboy relay race, one mile, \$35—

A. Ordway won first money, Happy Jack second.

Matinee at Riverside.

Never has Riverside held more successful racing than that which took place at the Driving Park Thanksgiving afternoon. The grandstands and bleachers were crowded and the open spaces around the track were filled with enthusiastic race goers. Even if the local horses did not carry off the major portion of the prizes, the races were fast and the sport was good. Every one seemed pleased with the afternoon's meet, and E. F. Binder is to be congratulated upon the success of this year's Thanksgiving races.

There were six events on the program, all run off on schedule time. They included a free-for-all trot, purse \$200; free-for-all pace, purse \$200; 2:40 mixed, purse \$100 (all half-mile races); half-mile running race for ponies, and quarter-mile dash, purse \$50.

The opening race was the free-for-all trot. Five horses were entered, and all keyed up to the highest pitch. Ovita, the Los Angeles horse, one that has done such fine work on the circuit this year, looked the winner she proved to be, winning the first heat in 1:07½. But in this heat Mein Kleiner pressed her hard and only missed winning by a close margin. The second heat was also fast and interesting, but Mein Kleiner would not act right and came in fourth, while Goldennut came in second and Mari-gold third. The third and deciding heat was exciting, with the four horses all anxious to get in first, but Mein Kleiner again acted badly and broke, and Goldennut, taking advantage of the chance, slipped in for second money, not being able to overcome Ovita's lead.

There was a lot of excitement in the free-for-all pace. Queen Pomona won the first, third and fourth heats. But it was a close race. Each heat had its exciting moments, when, for instance, in the first heat

Queen Pomona was first, with the three-year-old Josephine right behind and McO. D. a close third. Time, 1:05½. The second heat was won by McO. D., and great hopes were expressed that he would do it the second time, but failed. Dewey came in third. Time, 1:06. The third heat, with Queen Pomona again leading, and Josephine second and McO. D. third. Time, 1:07. The deciding heat was a bad one for McO. D., who finished fourth, although for a time it was thought he would beat the Los Angeles horse. Dewey was second and Josephine third. Time, 1:07.

The three heats in the 2:40 mixed were all good ones. Only three heats were trotted, on account of darkness setting in. Tom McKinney saved the day for Riverside, winning handily the second and third heats in 1:15. In the first heat Pete came in first, with Tom McKinney right after, and Coupon a good third. The second heat was also interesting. McKinney winning it, with Pete and Coupon right after him in the order named. The third heat caused much speculation as to who would win, but McKinney was right there, with Pete second and Coupon third. It was a great race, one of the best during the day.

DOWN THE LINE.

[By J. R. Fronefield.]

Dumont S., full brother to Sonoma Girl 2:05¼, has a monopoly of the breeding business in Mendocino county, and well he should have, as his colts, like him, have style, size and speed, and more than 85 per cent of the mares bred to him prove in foal. As Mr. Charlton had expressed his desire to sell Dumont S., he was asked his price. His answer was that he had priced him some time ago to Mr. S. B. Wright of Santa Rosa, who bred him, at \$2,500, but the deal finally fell through, and as the breeding season was now close at hand, he hardly knew whether he wanted to sell him or not.

H. B. Smith will most probably send Ayeress, his fast trotting mare by Lynwood W., to Zombro 2:11 next spring. She has shown fast enough to race, but being a busy man in other lines, Mr. Smith thinks he would rather breed them and let some one else do the racing.

Dr. Cushman, a progressive breeder of Talmage, Mendocino county, sent a nicely bred mare to Lynwood W. last summer. Such breeders help the horse business, as they are looking for good roadsters and use nothing else.

Fred Jasper of Ukiah has two colts by Wayland W. 2:12½, and one by Dumont S. 2:20, that he thinks well enough of to keep paid up in the Pacific Breeders' Futurity. A yearling that on looks has at least a "look in" in the Breeders' Futurity is one by Dumont S., that stands 15.2 and weighs close to 1,000 pounds. This strapping youngster is not only good to look at, but can show a 2:40 clip at the trot.

Abe Marks, the president of the "Club" at Ukiah, is surely in luck, as the result of his first venture in horse breeding is a faultless filly by Wayland W. (sire of Bolivar 2:00¼), out of his mare Cecelia by Robin. This young miss has fallen in good hands and will be given not only every chance to become a great performer, but every comfort in the meantime.

F. C. Handy and Henry Hooper are two residents of the Ukiah Valley that breed to the best and enter liberally in stakes. The colts they have bred are the kind that in looks, at least, are sure to repay their owners and keep the "buzz-wagon" in the rear division.

The weanling filly by Wayland W. 2:12½, out of Robizola 2:12½, has the look of a racing machine, with plenty of size at the age. The mare is again in foal to Wayland W. This mating should produce race horses.

Frank McGregor's three-year-old filly by Stone Robin, out of a mare by Redwood, was not entered in any stakes this year, so was not raced. She has "proven up," however, as right after the races at Santa Rosa she worked a mile with Berta Mac 2:13¼ in 2:17, last quarter in 32½ seconds.

The books of both Lynwood W. and Wayland W. are fast filling for the coming season. Both these grand stallions have sired champions that give them reputations that will not dim.

James H. Gray drove R. W. P. 2:13¾ out to the Santa Rosa track the other day, hitched to a cart, and after warming him up with a half-mile in 1:08½, jogged him two slow miles and then let him step the last quarter in 30¾ seconds by everybody's watch. Guess that is some trot for a horse that has not seen a race track for over a year.

Lewis Pierce of Suisun sent a gelding of more than ordinary promise to Bob Sparks for three months' education this fall. He is by Diablo 2:09¼, out of Hazel Mac, by Director 2:17, and at the end of his short term of schooling worked a mile in 2:16¾, last quarter in 31½ seconds.

The trainers at the Santa Rosa track say that McMyrtle, a five-year-old stallion by McKinney 2:11¼, is the best green McKinney left in the country. With very limited training he has been a quarter in 34 seconds, and a full mile in 2:19. Some of his colts are now old enough to show him up as a sire, and many will conclude on seeing them that this horse is good enough, and send their mares to him at Petaluma.

The quartet of stallions that Frank Turner has at the Santa Rosa Stock Farm are the kind that mare owners can take no exception to, as they rank

with the best in size, breeding and individuality. The broodmares at this famous old farm are among the best, and the weanlings and yearlings are worth looking at. In this latter bunch are three colts that Frank has reserved for sires. If one has any preference over the other it is the one by Guy Dillon 2:23½, out of Stamboulita by Stamboul, second dam Biscari, dam of eight in the list with race records, and three more with trials better than 2:30, by Director, third dam the famous Bicari by Harold. Youngsters of the finest type by Guy Dillon 2:23½, Major Dillon, F. S. Turner, Sky Pointer and Dr. William S. Jennings, are for sale and are fit to strengthen the breeding lines of stock farms anywhere in the country.

The many friends of Henry Carlton don't want Lynwood W. taken away from Santa Rosa, and they say they have an outside chance of inducing Carlton to keep the sire of Sonoma Girl at home for all time to come.

S. B. Wright is going right on breeding Sonoma Girls and Charley Beldens. He adds a good mare to his farm whenever one that suits him comes his way, and mates his mares to the best sires in the State, and is particularly pleased with the results of sending mares to Lynwood W. and Wayland W. He always has a price set on every foal when it is a yearling and is willing to give the purchaser a chance to make something.

Henry Carlton has selected a colt to follow in the footsteps of Lynwood W. It is by the sire of Sonoma Girl 2:05¼, fastest green trotting mare, and out of Mirabel by Owyhee 2:11, second dam Inex, the dam of three in the list, by Sweepstakes 298, third dam Dolly Bull, dam of Inez 2:22¼, by Kentucky Bertrand, fourth dam Nancy by American Star, fifth dam by Gridley's Roebuck. This colt is a beautiful brown, with star and both hind feet white, just enough color to add taste, has splendid style, action and beauty, as though from the hands of a sculptor. Henry says when he steps a mile in 2:10 he will advertise him for public service.

Mart Rollins, the veteran horseman, who developed, trained and owned Charley Belden 2:08½, has been very ill at his home in Santa Rosa. His friends all over the Coast hope that he will round to and be himself again before long.

Dr. Summerfield, the veterinarian, has a very promising filly by Cupid 2:18, out of Zarina 2:13¾, the mare he picked from one of Chase's bargain counter sales last winter. The young miss is entered in the Breeders' Futurity and will be given a chance. The genial Doctor will take care of some of the breeding business in Sonoma county next season with Lord Dillon (trial 2:28), by Sidney Dillon, dam Roblet 2:12, and will also use his grandly bred, broken-legged stud, Don Sonoma.

William Morris of Santa Rosa probably takes more pleasure in mannering and developing some early step in likely looking horses that he picks up than any man in the country. He is now giving lessons to a snappy black mare by Lynwood W. that can mock a trotter to perfection.

AT FRESNO TRAINING QUARTERS.

About fifty per cent of the animals in training here range from fifteen to twenty-four months old.

Schuyler Walton has among his ten head of horses, five stake colts, three of which are by a son of McKinney, and out of good mares.

D. L. Bachant owns an 18-months-old filly, full sister to The Donna 2:07¼ and half sister to Queen Pomona 2:07¼. He has given her the name of Sadie B.

Budd Doble's colt by Kinney Lou 2:07¼ is doing pretty work under Mr. Walton's care.

A two-year-old by Sidney Arnett chopped off a mile in 2:22 here the other day and is a trotter. Kinney Rose, the McKinney stallion, is working nicely with the above bunch of horses.

Many persons regret very much the departure of Charles Middleton, who so successfully worked and developed several good speed prospects during his several summers and winters here at the track. He is now employed handling some of Mr. Bachant's stock, Athasham 2:09¼ included, and has access to the track daily.

Mr. Owens informs me he has Nettie C, daughter of Milton Gear, that as a four-year-old stepped a half in 1:04, pacing without hoppers. He also has a fine stepper, sixteen months old, by Zelock 2:05¼, dam a 2:15 mare.

J. W. Zibbell and son, Willard, are kept quite busy with nineteen or twenty horses, some of which are owned by their senior trainer. Adam G. 2:11¼ by McKinney, Fresno Girl 2:10½ by Seymour Wilkes, and Katalina 2:22½, the two-year-old stake winner, are in fine shape. A full brother to Katalina, fully entered in the stakes, is now 16 months old and working better than Katalina did at this time last year. Two twenty-months-old Diablo colts are both pacing fine and taking regular work.

Sister Bess, owned by J. McKay of Fresno, that stepped a half in 1:07 last year, is doing fine. She is by Senator L. 2:23½ and her dam is Nugget, the dam of The Donna and Queen Pomona.

Four green trotters, some stepping quarters as fast as 32 seconds, are good racing prospects.

Tom Smith 2:13¼ will make his second season here. He is by McKinney.

Mr. Malcolm owns an elegant gray trotter, five years old, that stepped a mile recently in 2:15, with faster halves and quarters, driven by Mr. Zibbell, who has had him but a short time.

NOTES AND NEWS

Our Christmas number will be out December 21st.

It will be an excellent medium to advertise your horse for sale.

Don't fail to enter in the Sonoma Driving Club stakes if you live in that district.

When Helen Dare won the free-for-all trot at the Los Angeles matinee Thanksgiving Day she won the second heat after making a break at the first turn in 2:12½. She stepped through the stretch in 31½ seconds in this heat, and was timed the mile separately in 2:11-5, the last half in 1:03¾.

The sales of trotting bred horses all over the country have been successful this year. The demand for good horses is not falling off, but is on the increase.

If anyone desires a handsome dapple-gray gelding that can trot a 2:30 gait and pace a 2:20 gait, he should attend the Holiday sale at Chase's pavilion, 478 Valencia street, Monday evening, December 23d, and bid on No. 31 in the catalogue. This gelding is 16 hands high, sired by Arthur Wilkes and out of a mare by Mendocino. Besides being an ideal roadster he is a fine saddle horse and can single-foot a 2:40 gait. Don't let him get by you when the auctioneer is asking for bids.

If you desire something real choice, a handsome mare that is only four years old, has only been handled three months, is a natural fast trotter, and bred in the purple, look at No. 20 at the Chase Holiday sale, December 23d. This mare is by Alta Vela 2:11¼, one of Electioneer's fastest sons, and is out of a mare by Oseto 2:13½, a grandly bred race winner by McKinney. This mare is a bay, 15.3 and is a picture. Don't let her go for a song. She is one of the kind that will increase in value.

As fine a bunch of young trotters as have been consigned to an auction sale in years are the seven young horses sent by Woodland Stock Farm to the Chase Holiday sale, which comes off December 23d. The oldest are four years old, but all are nicely broke and good lookers. There is not only profit in buying this kind, but a deal of satisfaction, as they are well enough bred to put to training with the chance of getting something very fast.

The address of Mr. S. Hooper, who formerly owned and trained Alta Vela 2:11¼, is desired by one of our subscribers, who is anxious to establish the pedigree of a mare bred by Mr. Hooper. Please notify this office.

In all probability the good trotting stallion Marvin Wilkes 2:12½ has been sold by Walter Mastin of Sacramento to Mr. Andrew Robertson of Melbourne, Australia, and will be shipped to that country about Christmas time. Mr. Robertson, who is an excellent judge of a horse and a keen buyer, has picked up one of the best bargains in California. But for Mr. Mastin's illness he would have had to pay much more than the price asked for this horse, which was \$2,000. Marvin Wilkes is not only a horse of magnificent proportions, but he is a very fast trotter, his mark being no measure of his speed. He has shown quarters in 30 seconds more than once and should beat 2:10 another year. He was sired by Don Marvin 7927, dam Nora S. by Sahle Wilkes, second dam Grace by Nutwood 600. He was foaled in 1901, and tied with Carlokin for second money in the Occident Stake of 1904, and won the Stanford Stakes the same year. His record of 2:12½ was made this year at Santa Rosa in the 2:15 trot. That Marvin Wilkes will sire speed and be a very valuable horse for Australia we regard as certain. He is young, sound, and an excellent prospect.

Col. J. C. Kirkpatrick of San Francisco was elected a director of the American Association of Trotting Horse Breeders at the meeting held in New York last week.

A splendid series of ice meetings over the Canadian tracks are anticipated this winter. The Ottawa, Ont., meet will be held the first week in February, eight stake events of \$1,000, as well as a number of class races being booked there.

Secretary of War Taft, who at the present time is prominently discussed as likely Presidential timber, has long been looking for a horse strong enough to carry his avirupolis gracefully, and the much wanted horse has finally been found in Missouri. It is a hay of blocky conformation, with a white star and a flowing mane and tail. The horse is now being trained by an Army officer and is to be shipped to Washington some time before Christmas.

William G. Layng, former editor of this paper, who is now in Philadelphia, has written an article for our Christmas number entitled "Happy Medium and His Forer Home." He may also write an article giving his impressions of the recent Old Glory sale New York, which he attended.

When Roht. Smith drove his mare Bellemont 2:09¾ a mile to wagon in 2:10 on Thanksgiving Day at Los Angeles, he set a record for wagon trotters that will be hard to beat by any trotters at present in California.

Inferlotta 2:04¾, the sensational pacing mare of the Pacific Coast in 1907, was bred to the great pacer Audubon Boy 1:59½ last spring and is surely in foal, as she has been nominated in the Pacific Breeders' Futurity, which closed December 2d. If the foal arrives all right, maternal duties will keep Inferlotta off the track during 1908, which will be a disappointment to those who saw her race last summer, as a record of 2:02 or better was expected of her in 1908.

Hazel Kinney 2:09¼, like the majority of McKinney's get, has the "wine" quality of improving with age. This mare is now fourteen years old and has been campaigned and raced as well as served time in the breeding ranks, yet she won a heat at Los Angeles on Thanksgiving Day in 2:14, a great mile for a mare not in regular training.

Helen Dare, the Zombro mare, must be a pretty high class trotter. A mile in 2:12½ in a race November 28th is a good showing. She is out of a mare of untraced breeding, but is a fine looker and a beautifully gaited trotter.

Among the promising trotters driven on the track in Golden Gate Park is the black gelding Charley B., owned by Charles Becker, that has competed in several races during the past year. This horse was bred in Santa Clara county and is by Col. Benton. The first time Charley B. was ever started in a race was at Vallejo this summer, and he was in no condition whatever, yet he was a close second in 2:18. He looks like one that would do for the circuit with proper training.

It looks very much as though entries for Pacific Breeders Futurity No. 8, for the foals of mares bred this year, will number 400 when all the returns are in. Up to Thursday entries had been received for 396, against a total of 367 last year. A few distant points are yet to be heard from, and it looks as though the record of stake No. 4, which had 403 entries, will be broken in spite of the fact that there is a money panic all over the country.

Mr. C. A. Canfield of Los Angeles owns a yearling by Zombro 2:11, out of Mamie Elizabeth 2:20, that can trot a quarter in 35 seconds. Walter Mahen says it is the best yearling trotter he ever sat behind. He has only been trained about seven weeks.

Geo. H. Estabrook of Denver, Colo., has sold to his townsman, J. Fred Roberts, the pacing gelding Castanada 2:09¾, by Don Derby 2:04½, dam Cyrene 2:17½ by Guide 2:16. On November 11th the gelding's new owner drove him a mile in 2:11 to wagon over the Denver half-mile track. Joe McGuire raced Castanada at a number of Michigan meetings, giving him his record in a winning race at Lansing.

Philip C. Byrne, the well known horseman of Hanford, Cal., and owner of the good stallion Billups 2:20½, by Boydell, is located at the Hanford track with his horses. Billups looks like he would weigh 1,400 pounds, but is always ready to show a fast clip at the trot. He will do a big season in 1908, many mares being already booked.

In the list of foals on which third payment was made in Pacific Breeders' Futurity No. 7, printed in this paper November 16th, Mr. F. P. Hellwig's filly Zoedell was given as by Zombro. She is by Zolock 2:05¼.

Mr. H. A. Carlton, owner of Lynwood W. 2:20, sire of Sonoma Girl 2:05¼, Charley Belden 2:08½, etc., has decided to take this stallion to Stockton for the season of 1908. A gelding owned by David Key, a dairy man, who resides on the Coast, west of Santa Rosa, had been at the Santa Rosa track just seven weeks on November 26th and that day trotted a mile in 2:29, last quarter in 35½ seconds, doing very well for one that was never off the dairy ranch before. This gelding is said to be out of a thoroughbred mare.

Sonoma Queen (3) 2:26, full sister to Sonoma Girl 2:05¼, is in foal to Wayland W. 2:12½, the sire of Bolivar 2:00¾. Sonoma Queen is still owned by her breeder, Mr. S. B. Wright, of Santa Rosa.

Of the thirty-three new 2:10 trotters, twenty-six are said to be out of dams that have no record.

Bonnie McKinney, a four-year-old son of McKinney 2:11¼, and Bonnie Searchlight, a three-year-old son of Searchlight 2:03¼, will do stud duty at the stables of H. Busing, Alameda race track. Both these young stallions are out of good dams, and are fine specimens of the trotting horse, and as the McKinney and Searchlight blood is much sought after, they should get their share of the business.

Miss Georgie's mile in 2:10 at Los Angeles on Thanksgiving Day is the fastest mile ever paced to wagon on this Coast. The McKinney-Nutwood Wilkes mare was driven by her owner, W. A. Clark Jr., who is an amateur driver.

The second heat in 2:12½ by the Zombro mare Helen Dare at the Los Angeles matinee Thanksgiving Day was an excellent performance.

Jack Groom is working ten head at the Alameda track. He has three youngsters that can step fast right now.

When Sam Norris leads Washington McKinney into the sales ring at Chase's pavilion, December 23d, buyers will have a chance at a stallion that can make money in any country where there are mares to breed. He is large, very handsomely turned, with a splendid head, and is a pronounced success as a sire of generally useful horses and fast trotters. There are a few of his get now being handled, and they show well. He will make money for any owner that will handle him right.

While trotting and pacing horses were selling last week at as good prices in New York as the Old Glory sale has averaged in years, the big sale of thoroughbreds at Lexington was a frost, and had to be discontinued after two or three hundred royally bred runners were knocked down at an average of less than \$100.

Secretary Frank Turner has already received several entries for the two stakes of \$500 each offered by the Sonoma County Driving Club for foals of 1906 and 1905 to trot in 1908, and to close for entry on the 20th of this month. Every colt owner in the district should make entries in these stakes.

John Quinn, who now owns the stallion Greco B. 43129, writes us that the horse will make the season of 1908 at the State Fair grounds, Sacramento. He should get a large number of mares, as besides being a fine individual and a good gaited trotter, he is more closely related to the champion trotters than any horse in California, as he is by McKinney and his dam is a half-sister to Lou Dillon 1:58¾.

Sonoma May 2:29¼, the full sister to Sonoma Girl 2:05¼, that Gen. C. C. Watts purchased at the Old Glory sale last week, will be bred to the three-year-old champion trotter Gen. Watts 2:06¼.

The trotters that comprise the select 2:10 list now number 318. Of these about sixty, or a little less than one-fifth the total, were bred in California.

It looks as if there would be more horses in training at Pleasanton next spring than ever before. If the rainfall is sufficient to insure good crops throughout the State, stall room will be hard to get at Pleasanton by March 1st.

George Helman left Pleasanton for Humboldt county last week and may remain there to train several horses owned by Mr. Miner.

P. W. Hodges has worked his Zombro stallion Umatilla a mile in 2:14 at the trot on the Pleasanton track.

The San Luis Obispo Driving Association has been organized with Benjamin Brooks as president, H. E. Leveridge secretary and Antone Luchessa treasurer. The directors are C. A. Younglove, Otto Sinsheimer, H. N. Hansen and L. F. Andrews. Over fifty substantial citizens of San Luis Obispo are members of the organization. A lease of the Beebee tract of land, a mile and a quarter from town, has been secured, and work has already been started on the race track and athletic grounds. Matinees will be held frequently as soon as the track is finished.

The Sixth District Agricultural Association of Los Angeles will hold one of the old-fashioned country fairs next season, with good prizes for all farm products and harness races that will be worth going to see.

Mose Hart is driving a four-year-old bay gelding by Nutwood Wilkes, out of a mare by Gaviota, son of Electioneer, that is attracting much attention on the Park roads and the Speedway. The gelding has had little or no training, but is showing a lot of natural speed at the trot, and showed a quarter in 36 seconds the other day. He has great knee action, and can be driven without check or martingale, and is tending to business all the while. He looks like a good prospect for the races next season, as he will be five years old in the spring, and is absolutely sound in every way. Mose has picked out and sold many a fast one, including Billy Red 2:10, John Caldwell 2:08½, and others, but thinks this gelding is about the most promising green horse he ever handled.

Dr. Holt of Indianapolis says: It is worthy of mention that "Mike" Bowerman has not used bandages on the sound legs of horses under his control for more than sixteen years, which is an evidence that the popular fads to which a majority yield have not influenced him in doing that which he regarded as a foolish expenditure of time as well as a positive injury to the horse with sound legs.

With \$2,500 in prize money offered for the trotting classes at the New York Horse Show, only thirty odd entries were made. And yet one sees ten or a dozen horses battling half a dozen heats for a \$200 purse over a county fair track.

OLD GLORY SALE.

Money Panic Has Little Effect on Prices—Stallion Todd Sells for \$30,000.

It takes something more than an ordinary panic to knock the American trotter off his pins. He is the one product of this glorious country that has maintained his value in spite of bursting banks, and a financial situation that is frenzied in the extreme. At the Old Glory sale, which opened in New York on Monday of last week, the prices have fully equaled if they have not exceeded those of the memorable sale of a year ago. At the close of the fifth day, according to the New York Times, 588 horses had been sold for a total of \$348,710, an average of \$591.32 per head. There were yet some 400 more horses to be sold, and as some of the cheaper ones are generally left until the last of the sale, this average may be reduced some by the time the sale ends, but the outlook is that it will exceed that of last year. When one stops to think of a thousand trotting and pacing bred horses being offered at one sale in New York during the prevalence of a money panic, and that they sold at as high an average as the same class of horses brought last year in good times, the stability of the American trotter as an American product is proven beyond any doubt. The much vaunted thoroughbred was unable to stand up under the same conditions, as the big sale at Lexington last week had to be stopped for want of bidders, after a hundred or so royally bred runners were sold at less than \$100 average. The American trotting and pacing horse is in demand in spite of the bad condition of the money market and breeders here on the Coast should make a note of this fact. Breeding cannot be overdone in California for years to come, and those who send their mares to good stallions in 1908 will not regret it.

On the opening day of the sale the highest price paid was \$1,500 for the black stallion Lecco 2:09 1/4, that made two seasons in California a short time ago. He was purchased by Frank Caton to take to Russia.

On the second day the young McKinneys and Axworthys from Empire City Farm were sold, and brought lower prices than were expected. The entire consignment of twenty-eight head averaged \$430. The young Sidney Dillons also fell below the average.

Sensational prices prevailed on the third day of the sale and all records for one day were broken with 117 horses selling for \$151,550. The features of the sale was Todd 2:14 1/4, who brought \$30,000, the largest price of the sale. The son of Bingen was knocked down to W. Bradley of New Jersey after some spirited competition. The total for the Johnson Farm consignment of twenty-four horses was \$58,105, an average of \$2421.

On Friday, James Butler's East View horses were sold. It was stated that Mr. Butler is not to retire from the breeding of trotters after all, but that the consignment represented all but about twenty head of youngsters that he had retained on the farm, and that he will campaign a string from them in 1908. Of the Butler horses Directum Kelly 2:08 1/4 brought the top price, \$4550. The Phantom 2:10 1/4 selling at \$2500 and King Direct 2:04 1/4 at \$2100. The old mare, Consuela S. 2:07 1/4, fetched \$1050, California Cresceus \$410; Bolivar 2:00 1/4, \$1000; Claro, the Mendocino pacer, \$785; Aristo 2:08 1/2, \$250; Judge Green 2:09, \$450; the pacer Edwin S. 2:08, \$560; Rajah 2:10 1/4, by Chas. Derby, \$325; and Forest W. 2:14 1/4, \$450.

Sonoma May, the full sister to Sonoma Girl, and owned by Arthur Brown of Napa, brought \$2100. Charley Belden 2:08 1/2, owned by Mart Rollins of Santa Rosa, went for \$1010, and as he was knocked down to W. Jermyn of New York, a brother to Frank Jermyn, who, with Chas. DeRyder, had a lease on this horse in 1906, it may be that he was not sold. We hope not, as Charley Belden is worth more money and we should like to see his venerable owner get every cent the great trotter is worth.

The complete list of horses sold at the Old Glory sale would require three or four pages of this journal to print, but we give below a list of those whose mention we think will most interest our readers. It will be noticed that many of them are California bred and many have campaigned here and on the Grand Circuit:

Property of J. H. Shultz.

Governor Axworthy, trotter, ch c, weanling, by Axworthy-Sunol; Turlington Bros., Fair Oaks, Virginia	320
Doctor Axworthy, b c, weanling, by Axworthy-Fruition; Al Thomas, Benson, Neb.	530
Sarah Axworthy, trotter, b f, 3 years, by Axworthy-Serpolita; J. Goldstein, Kearney, N. J.	520
Eveworthy, trotter, b m, 7 years, 15.2, by Axworthy-Evonia	700
Jerome Axworthy 2:29 1/4, trotter, b c, 3 years, by Axworthy-Evonia; Bertha Dab Farm, Macon, Ga.	270
The Spoliers, trotter, b c, 2 years, by Moko-Mendocita; Al Thomas, Benson, Neb.	735
Jay Guy, trotter, h c, 1 year, by Guy Axworthy-Rose Croix; A. C. McMillan, Manhattan	735
Guy Axworthy 2:08 3/4, trotter, b s, 5 years, by Axworthy-Lillian Wilkes; Abe Garson, Manhattan	8100
Town Lady 2:10, trotter, br m, 17 years, by	

Wilton-Kadijah; George Edwards, Brooklyn	800
Directum Lass 2:09 3/4, trotter, blk m, 3 years, by Directum-Madera; A. W. Parrish, Cleveland, Ohio	1050
Plumline 2:12 1/4, pacer, b m, 11 years, by Woodline-Plumlena; W. E. D. Stokes, Manhattan	400
Mendoza M., trotter, br m, 8 years, by Mendocino-Cressida; R. Magowan, Mount Sterling, Ky.	285
Nutrix, trotter, ch m, 11 years, by Alcatrex-Nutula; J. A. Skinner, Westford, N. Y.	255
May Naudain, trotter, ch f, 3 years, by Baronmore-Miss Lambert; Al Thomas, Benson, Neb.	260
Marcia 2:08 1/4, pacer, b m, 6 years, by Margrave-Suzelle Wilkes; W. E. D. Stokes, Manhattan	750
Belle Winnie, trotter, b m, 9 years, by Adbell-Gertrude Russell; William Simpson, Manhattan	625
Esperita, trotter, ch m, 11 years, by Mendocino-Sprite; J. R. Magowan, Mount Sterling, Kentucky	250
Add Cord, trotter, ch c, 1 year, by Silk Cord-Abuda; Al Thomas, Benson, Neb.	200
Eve Cord, trotter, b f, 1 year, by Silk Cord-Eveworthy; C. Waters, Bergen Point.	2050
Silk Cord, trotter, b s, 6 years, by Prodigal 2:16-Red Silk; A. C. McMillan, New York City	1550
Octa Worthy, trotter, b f, 3 years, by Axworthy-Octavia; N. Bartholomew, Des Moines, Iowa	265
Sunol 2:08 1/4, b m, 1886, by Electioneer; A. B. Coxe, Paoli, Pa.	400
Directum Lass 2:09 3/4, br m, 1889, by Directum; Frank Caton, Moscow, Russia	1050
Property of Sterling R. Holt.	
Sonoma Dillon, trotter, b f, 2 years, by Sidney Dillon-Maud Fowler; Charles Deane, Palatine, Illinois	525
Eveline Dillon, pacer, b i, 2 years, by Sidney Dillon-Eveline; A. Von Nostrand, Saddle River, N. J.	310
Lottie Dillon 2:26 1/4, trotter, ch f, 4 years, by Sidney Dillon-Carlotta Wilkes; A. Garson, New York City	600
Millard Dillon, trotter, ch c, 2 years, by Sidney Dillon-Mildred Russell; J. Thompson, Troy, N. Y.	350
Kate Dillon 2:24 1/4, pacer, ch f, 4 years, by Sidney Dillon-Roblet; Charles Deane, Palatine, Ill.	800
Adioo Dillon 2:24 1/4, pacer, b f, 3 years, by Sidney Dillon-Adioo; C. M. Buck, Fairbault, Minnesota	525
Gertrude Dillon, trotter, b f, 2 years, by Sidney Dillon-Biscari; F. H. West, Saratoga, N. Y.	500
Sadie Dillon 2:21 1/4, pacer, b f, 3 years, by Sidney Dillon-Biscari; P. Montell, New Haven, Conn.	410
Direct Dillon, trotter, b c, 2 years, by Sidney Dillon-Lilly S.; Edward Mullen, Jamaica, N. Y.	300
Edith Dillon, trotter, ch f, 2 years, by Sidney Dillon-Russie Russell; B. F. Ames, Cape Charles, Va.	485
Property of Empire City Farms.	
Rio McKinney, trotter, br c, yearling, by McKinney-Lady Rivers; A. Garson, New York City	1200
Warder McKinney, trotter, br c, yearling, by McKinney-Keeper; J. W. Grant, New York City	325
Comely McKinney, trotter, b f, yearling, by McKinney-Sylpine; J. W. Grant, New York City	360
Electro McKinney, trotter, by McKinney-Ohm; Floyd Bros., Bridgeton, Va.	575
Barona McKinney, pacer, br f, yearling, by McKinney-Barona; Floyd Bros., Bridgeton, Virginia	460
Medio McKinney, trotter, br c, yearling, by McKinney-Midi; Johnston Brothers, London, Ontario	650
Kingwood McKinney, trotter, b c, yearling, by McKinney-Mary Belle Kingward; J. W. Grant, New York City	325
Shady Bower, trotter, b f, yearling, by McKinney-Bower; J. W. Grant, New York City	350
Thrilling, trotter, b f, yearling, by McKinney-Thrill; J. W. Grant, New York City.	400
Charma, trotter, h f, yearling, by McKinney-Charming Bunker; J. W. Grant, New York City	400
Grayla, trotter, gr f, 2 years, by Jay McGregor-Boquita; H. C. Lee, Endora, Me.	850
Government Bond, trotter, br c, 2 years, by The Bondsman-Rose Direct; G. Watrous, Amityville, L. I.	550
Toa, trotter, br f, 2 years, by Chimes-Duskess Queen; H. C. Lee, Endora, Me.	500
Clover Patch, pacer, br f, 2 years, by Dan Patch-Midi; H. C. Lee, Endora, Me.	1000
Matchless McKinney, trotter, b c, 2 years, by McKinney-Charming Bunker; Johnston Bros., London, Ontario	1000
Gazant, trotter, br f, yearling, by Beauseant-Gazelle; W. M. Probasco, New York City.	400
South 2:17 1/2, trotter, br s, 9 years, by Prince of India-Amaryllis; J. R. MacGowan, Mount Sterling, Ky.	360

Nora McKinney 2:12 1/4, trotter, h m, 10 years, by McKinney-Salle Dexter; H. C. Lee, Endora, Me.	1300
Property of Various Owners.	
Billy H. 2:10 3/4, trotter, b g, 8 years, by Knight; Paul Connolly, Philadelphia, Pa.	\$ 700
Charley Belden 2:08 1/2, trotter, br g, 8 years, by Lynwood W. Juanita Skinner; W. Jermyn, New York City	1010
Admiral Togo 2:29 1/4, trotter, b g, 5 years, by Iran Alto-Aria; J. Farley, Plattsburg, N. Y.	480
Lecco, trotter, 2:09 3/4, blk s, 13 years, by Bonnie Boy-Lucy Horner; George J. Dietrich, Cleveland, Ohio	1500
Sonoma May 2:29 1/4, br m, 6 years, by Lynwood W. Maud Fowler; Gen. C. C. Watts, Charleston, West Va.	2100
Hal Direct 2:06 3/4, pacer, blk h, 6 years, by Direct Hal-Chime of Bells; J. H. Dillon, New Haven, Conn.	1400
Jack Axworthy 2:15 1/4, trotter, b g, 5 years, by Axworthy-My Trinket; George Swartz, Smithtown, N. Y.	500
Grace Bond 2:09 1/4, trotter, b m, 6 years, by The Bondsman; W. E. D. Stokes, New York City	6100
Phalla 2:04 1/2, pacer, b m, 1901, by Allwood-Amis; W. E. D. Stokes, New York City.	3700
Praetoria Bingen, trotter, b f, 3 years, by Bingen-Praetoria; W. E. D. Stokes, New York City	900
Priscilla Bond, trotter, b f, 3 years, by The Bondsman-Mantua Maker; W. E. D. Stokes, New York City	600
Belle Archer 2:12 3/4, trotter, b m, 20 years, by Rene-Mary Drake; W. E. D. Stokes, New York City	850
Angus Pointer 2:01 3/4, pacer, b g, 9 years, by Sidney Pointer-Jane; Charles E. Rounds, Bristol, N. H.	7400
Emma Lou 2:25, b m, 1900, by Welcome; A. D. Pinsonnault, Montreal, Canada.	160
Bi-Flora 2:09 1/4, trotter, br m, 12 years, by Expedition-Heliotope; C. A. Boutelle, Cuba, N. Y.	2600
Extasy 2:10 1/2, trotter, b m, 11 years, by Baron Wilkes-Ethelwyn; C. W. Baker, Aberdeen, Md.	3000
Highball 2:06 1/4, trotter, b g, 7 years, by Dr. Hooker-Lena S.; E. S. Burk, Cleveland, O.	9400
William O. 2:04 1/4, pacer, blk g, 6 years, by The Director General-daughter of George Simons; Charles Staff, Wampau, Pa.	1750
Ardelle 2:04 1/4, pacer, b m, 6 years, by J. H. L. Lady Yeiser; Burt Whitley, Munail, Ind.	3600
Tempus Fugit 2:07 1/4, trotter, ch g, 7 years, by Mark Time-Altamona; J. H. Cornish, New York City	2000
Fantasy 2:08 3/4, trotter, b m, 17 years, by Chimes-Honora; H. Brehm, Baltimore, Md.	750
Direct Hal 2:04 1/4, pacer, blk h, 11 years, by Direct-Bessie Hal; Howard Cobb, Ithaca, N. Y.	10,000
Turley 2:07 3/4, trotter, b g, 10 years, by French Plate-Ellemac; Dr. R. C. McCully, New York City	1600
Todd 2:14 1/4, trotter, br s, 8 years, by Bingen-Fanella; Abe Garson, New York City.	30,000
Nancy Hanks 2:04, trotter, br m, 21 years, by Happy Medium-Nancy Lee; E. & J. Madden, Lexington, Ky.	1500
Nancy McKerron, trotter, b f, by John A. McKerron-Nancy Hanks; H. K. Devereux, Cleveland, Ohio	1000
Fanella 2:13, trotter, b m, 14 years, by Arion-Directress; E. & J. Madden, Lexington, Ky.	3725
Toddington, trotter, b c, yearling, by Moko-Fanella; J. W. Daly, Mt. Kisco, N. Y.	3300
Nella, trotter, b f, 2 years, by Bingen-Fanella; J. R. Magowan, Mt. Sterling, Ky.	1750
Anella 2:20 1/2, trotter, b m, 5 years, by Bingen-Fanella; Dromore Farm, Port Huron, Mich.	1600
King Direct 2:04 3/4, pacer; A. S. Rodney, Lowell, Mass.	2100
Directum Kelly 2:08 1/4, trotter; Emil Jacobson, New York City	4550
The Phantom 2:10 1/4, trotter; B. O. Shank, Cleveland, Ohio	2500
Daphne Direct 2:10 1/4, pacer; G. D. Sherman, Port Henry, N. Y.	1050
Consuela S. 2:07 3/4, trotter; J. W. Daly, Mount Kisco, N. Y.	1050
Ann Direct 2:12 1/4, trotter; J. R. Magowan, Mount Sterling, Ky.	835
Bolivar 2:00 3/4, pacer, 10 years; J. D. King, Paterson, N. J.	1000
Claro, pacer, 6 years; Joseph F. Gibbons, New York City	785
Hetty G. 2:04 1/4, pacer; W. E. D. Stokes, New York City	600
Stiletto C. 2:12 1/4, pacer; H. Jones, Rushville, Ind.	1500
Hal R. 2:07 1/4, pacer; B. O. Shank, Randall, Ohio	3400
Edwin S. 2:08, pacer, 8 years; A. J. Furbush, Brighton, Mass.	560
Aristo 2:08 1/4, b g, 1899, by Nushagak; T. E. Gross, Albany, N. Y.	250
Judge Green 2:09, b g, 1899, by Directum; S. W. Winner, New York	450

CONDUCTED BY J. K. DeWITT

GAME FISHES OF THE PACIFIC.

[By Chas. F. Holder.—Read at the Anglers' Conference in New York.]

In a conference of this kind, when the purpose is avowedly to discuss ways and means of reform along the lines of greatest resistance, it may not seem out of place to glance at one of the successful efforts which have been made on the Pacific Coast to establish a high standard of sport, and to stop the unnecessary destruction of the splendid game fishes, which have made the Government islands of San Clemente, Coronado and Santa Catalina, Santa Cruz and the Bay of Monterey famous the world over. In attempting this, I may be pardoned for referring to the work of a single organization, the Tuna Club, which was founded a decade or more ago, as I am best informed as to its methods and development.

It may seem absurd to the layman to be told that the Tuna Angling Club had as its prime motive—its fundamental principle—not the catching of tuna and other game fishes, not sport, but rather the conservation of the resources of this portion of the ocean. To the uninformed public, the Tuna Club has been an organization for the enhancement of sport; its beautiful prizes and trophies have been apparently designed to encourage anglers to fish, first, last and all the time, and to catch and land the largest and seemingly the greatest number of fishes. But the fundamental principle which has underlain the Tuna Club has been entirely and absolutely the reverse; its object has been to restrict the catch, to throw every obstacle in the way of the angler, and to make the attainment of his desires as difficult as possible.

This can, possibly, best be illustrated by giving a brief outline of the actual current of events which led to the founding of this experiment in piscatorial philanthropy. Some twenty years or more ago I visited the island of Santa Catalina, which the Smithsonian Institution had recently exploited in an archaeological sense, and being an angler, I was duly impressed by seeing yellowtails ranging from eighteen to forty pounds taken from the beach, not one or two, but dozens. I became an habitue of this sea angler's paradise, and as time went on it became known as the best sea angling locality on the Coast; indeed, attained an international reputation for its big game fishes, photographs of some of which I hope can be shown you this evening. Personally I used a rod from the beginning, but for some years the majority of pleasure seekers here, to facilitate the slaughter, used hand-lines of a large and menacing caliber, and it was not unusual in the early days to see a launch go out equipped with from four to six of these engines of war and return with a load of yellowtails, white sea bass, albacore and bonito—splendid fishes, ranging up to fifty pounds—hard fighters, well deserving a better fate.

The standard of sport appeared to be based on the theory of catching the most fish in the shortest time, and the man who could boast that he had killed the maximum number of fishes in a day posed as the lion of the hour. One of these piscatorial Neros informed me in a burst of confidence that in one day he had taken 1,000 trout from a little stream, the San Gabriel, and Dr. Jordan will tell you that he saw a heap of several hundred of the rare golden trout lying on the banks of a stream in the high Sierras, evidence that some of the unmentionable tribe had been trying to attain merit by seeing how many they could catch in a given time.

Finally convinced that it was a waste of time to argue, and that the "game boat" was determined to remain one, I decided to abandon him to his fate, or resort to some other method. The opportunity came one day when by mere good luck, the real "fisherman's luck" which we all know so well, I took after a four hours' struggle a tuna which towed me ten miles before it was brought to gaff. The fish was taken with a 16-ounce rod, and what is known as a 21-thread line. The catch created a sensation, the details being telegraphed far and wide, as the greatest feat with a rod ever perpetrated upon an unoffending and helpless public. The interest this catch aroused became the inspiration of the Tuna Club and the idea was conceived, that if a number of gentlemen would band together and agree to use rods and the light 21-thread line for all these big game fishes, wholesale slaughter could be shamed out of existence.

So the Tuna Club took form in a guileless sort of fashion, and its constitution and by-laws were much the same as those of many clubs designed for the attainment of sport, the social amenities, and a big killing. But this club was bound to the use of light rods and lines, and hand-lines were referred to as sportsmanlike and detrimental to the public interest. In brief, the club rules established at one

move, a high standard of sport and fair play, and every man who joined the organization agreed to stand by it and promote its interests in every way.

The club, which grew rapidly, had three classes of membership, those who landed a 100-pound tuna according to club rules were called active members, as they certainly had to be very active to qualify, and they had the right to vote; there are but sixty-seven in the club to-day; then came the associate members, who were skilled anglers, in spiritual accord with the object of the movement, and the club has a membership of over 300 of these; finally came the honorary members, gentlemen who had in some signal manner aided in the cause of the protection of game fishes. This membership included some of the most distinguished anglers in this country and in England, whose names stood for all that is honorable in sport. Among them were Theodore Roosevelt, Grover Cleveland, Henry Van Dyke, David Starr Jordan, Gifford Pinchot, Charles Hallock, Joseph Jefferson, the president of the British Sea Anglers' Association, and others.

One of the first official acts of the club was to organize an angling tournament, or, as a cynical paper said, "offer a premium on slaughter." The club offered prizes—gold medals, cups, rods, cash to anglers and boatmen—for the largest fish in the various classes. These prizes, at least the cups and medals, were to remain the property of the club, and to be imperishable monuments to the prowess of the angler. The club made a special point of offering prizes to the boatmen of successful anglers, and on the first of May, 1895, the first Tuna Club tournament opened and continued until October, when the prizes were given out. I had the pleasure at the annual banquet of the club of reporting the outcome.

The first result was that boatmen refused to allow hand-lines in their boats, as their use disqualified anglers for club prizes, rewards and records. Then they all equipped themselves with rods and lines of the club's required size, and at once victory was in sight. The hand-line who could kill a 50-pound fish in two minutes disappeared from the waters of Santa Catalina (a marvel, when it is considered that at least 100,000 persons visit this island annually), and every one became a rod fisherman. What was the result? It was manifestly impossible for any one to land an 18 or 20-pound fish with light rod and a 21-thread line in less than ten or twenty minutes, and half the fish hooked parted the lines if the anglers did not play them carefully. The use of the rods, of course, enhanced the sport 75 per cent, and the catch was reduced to a normal humane number. This confession, by the very exigencies of the situation, is, of course, strictly confidential, as I doubt if any of the thousands thus converted suspected that they were being tricked into fishing like gentlemen, and taught the lesson of a square deal to even a fish.

Every year this tournament is given and new ideas introduced, new prizes awarded, and every year the catch is reduced until to-day, with the aid of other and younger clubs—the Light Tackle, Rod and Reel, Striped Bass, Coronado Rod and Reel, Aransas Pass Tarpon Club, Asbury Park Angling Club, and others, the spectacle of scores of splendid game fishes being towed out to sea and thrown away, is, at least at Avalon, but a memory. The boatmen of Avalon have, it is estimated, \$100,000 invested in fine rods, reels, cleverly equipped launches and boats of various kinds, and I venture the assertion that nowhere in the world does a higher standard of sport prevail, and as 25 per cent of the anglers are from without the State, the good work and example still goes on among the heathen, who are always with us.

While this work has been pre-eminently successful, so far as it goes, and in one locality, I submit to the anglers of this convention that the proper way to carry on such a reform movement is to make the fight in the public schools. Every normal boy is a future angler or hunter, and the place to reach him is in the public schools, where he is "tutored in the rudiments of many desperate studies." I consider the splendid lecture system of the American Museum, established by Professor Albert S. Bickmore, as one of the most far-reaching and valuable educational factors of the past three decades, but one of the lectures should be on sport; its standards, its limitations and legitimate field—a lecture to be repeated in every public or private school in the land. This would be followed by the elimination from our common language of those more than offensive terms "pot-hunter" and "game hog." Sport is degraded because the average hunter or angler obeys the instinct to hurt, and has not been told that there are high standards to be lived up to, and I can conceive no more important result of this notable assemblage of honest anglers than that it procure for schools, public and private, university and college, the giving of a lecture or lectures bearing on the subject of standards in sport, the rights of fishes, birds and all animals to humane consideration from sportsman or angler.

The oceanic fishes of California are remarkable

for their size and fighting qualities. At the head stands the tuna, the record rod catch of the Tuna Club being 251 pounds. This fish has fought an angler from one to fourteen hours and then escaped. Then comes the yellowfin tuna, a splendid allied visitant, ranging up to 75 pounds, a fine game fish, as uncertain in its coming and going as the larger fish, yet in 1906, five hundred yellowfin tunas were taken at Avalon with the six-ounce rods and 9-thread lines, introduced by President Arthur Jerome Eddy, of the Light Tackle Club.

Next is the albacore, or long-finned tuna, a hard and vigorous fighter, ranging up to sixty pounds; the bonito, twenty; the yellowtail (*Seriola*), seventeen to sixty pounds. In the bass tribe we have a colossus, the black sea bass, the club record of which is 436 pounds. The swordfish is a game fish in California. It leaps like the tarpon or the beautiful dolphin, also taken here, and a 156-pound swordfish has fought an angler three hours, giving a fine play.

The white sea bass of these waters is a cousin of the Eastern weakfish. None that I have taken were under fifty pounds, and specimens weighing eighty pounds have been caught from Coronado to Monterey.

Then there are the sheepshead, from ten to twelve pounds; the barracuda, ten pounds; the rock bass, twelve, and many more from the Roncadors to the salmon of Monterey, which afford much sport in these summer seas.

It is impossible without encroaching upon the time of the conference to more than hint at the game fishes of the interior of California, the streams which rise in the Sierras, as the McCloud, the Russian, the Kern, Sacramento, Feather, Santa Inez, Carmel, and others, all of which lure the angler to a wonderland of sport, where the golden trout, the rainbow, salmon, and almost every American trout may be seen. During the past summer I fished the Feather River over the divide of the Sierra Nevada, and took living rainbows of seven pounds, and saw New England brook trout and a forty-pound salmon in the same stream, suggestive of the variety of fishes found on the Pacific Slope, where there is an earnest desire to elevate sport and to establish a standard that shall command the respect of all men.

GREENHEART VS. SPLIT-CANE.

For some weeks past a spirited controversy has been waging in the columns of *The Fishing Gazette*, London, England, over the respective merits of greenheart and split-cane fishing rods. Advocates of both makes, including the manufacturers who make a specialty of either greenheart or split-cane, have zealously presented their opinions. Probably the most able champion of the greenheart rod is P. D. Malloch, 26 Scott street, Perth, N. B., the well known maker of all kinds of fishing tackle. Mr. Malloch founds his arguments in favor of greenheart upon a long experience in the manufacturing field, and also experience in actually fishing with almost all kinds of rods made by the best English and American makers. He offers six different reasons why greenheart is superior to split-cane as a rod-making material. From the side of a believer in greenheart, they are convincing, though in some cases unsubstantiated by anything but the writer's own assertions. 1st. The split-cane does not possess the same amount of casting power; (a) greater exertion is required in getting out the line, therefore more tiring; (b) a cast can not be made with ease against the wind. 2d. The split-cane does not impart the proper movement to the fly; (a) when a fish takes hold of the fly the top of the rod bends down, and has not sufficient power to hook them; (b) once hooked, the fish has such control of the line that it becomes "bagged" and command of the fish is lost. 3d. Double time is required in killing a fish and far more are lost with split-cane than with greenheart. 4th. Split-cane rods are more liable to break, and when broken are more difficult to repair. 5th. No two split-cane rods can be made exactly alike, and if the balance is not satisfactory at first it can not be altered. 6th. They have to be made uncomfortably heavy to give the same power as greenheart. Continues Mr. Malloch: "A greenheart rod has a feel about it that can not be had from cane, the slightest touch at the hook being conveyed right to the hand. Again, the steely spring that it is imbued with makes casting a pleasure; the line lifts easily from the water and is sent forward without exertion. In fact, the rod does the whole thing. With split-cane, on the other hand, a strong pull is necessary to make the line go out. In casting where there is any obstacle behind the angler, such as a high bank or under bushes, the greenheart will swing and switch out a line where cane would prove inadequate." The concluding assertion of Mr. Malloch is that, given two rods—one a split-cane and the other a greenheart—both of the same length and weight, and casting the same length of line, far less power is required in doing the work with a greenheart. We fancy there are many American manufacturers and users who will take exception to many of the positive assertions of the English manufacturer, especially in view of the fact that certain classes of American-made rods have never been seriously considered by English sportsmen and manufacturers.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

IMPORTANCE OF STUDY OF FISH FOOD.

[Chauncey Juday in the Bulletin of the United States Bureau of Fisheries.]

In considering the life conditions of a living organism, one of the most important factors to be taken into account is, naturally, the food. It is essential to know something about the quantity and kind of food required not only for existence, but also for the best and most complete development of the organism. In agriculture this question has received the attention of many investigators, and the results of their labors are apparent everywhere. To mention only two instances: We know that plants and soils have been studied to determine what plants are best adapted to the different kinds of soil; where certain food elements are lacking in a soil, fertilizers are added, or the soil is inoculated with bacteria which will produce the desired results. In stock feeding much has been done to determine the relative value and nutritive qualities of the various kinds of food generally employed, so that this industry may now be conducted along scientific lines. Comparatively little attention has been given to the food of our useful aquatic animals, however. The whole subject of aquiculture, in fact, has been very much neglected. Analysis have been made and we have been told that our regular food fishes are very nutritious and make an excellent food for us, but our knowledge as to what produces this nutritious food is entirely too limited. The whole question of the relation of quantity and quality of food to the rate of growth and physical well being of fishes needs much more thorough investigation than it has yet received.

This neglect of aquiculture is certainly not due to its slight economic importance, or perhaps it would be better to say to small possibilities of its great economic importance. It has been estimated that a body of water of average fertility will produce five times as much as an equal area of average land. Sweeney (1898) calls attention to the fact that a small fish pond (60 by 120 feet) in Indiana produced 1,000 pounds of black bass and 250 pounds of yellow perch in fifteen months without being supplied with any artificial food. At the price of 8 cents per pound he estimated that if the natural waters of Indiana had been relatively only about a tenth as productive as this pond, the fish products would have been almost equal in value to the corn crop of the State in 1896, the year of this experiment, and a little more than twice the value of the wheat crop. Yet, in spite of the great possibilities of our natural waters from an economic standpoint, most of them receive little or no attention except annually or biennially, when our Legislators wrestle with the complex problem of devising laws for the protection of fish and aquatic birds. There is little doubt that if more attention was given to investigations relative to increasing the producing efficiency of our natural waters, many of the stringent protective laws that now adorn our statute books would become superfluous.

Like other living organisms, fishes are affected by both the quantity and quality of the food available for them. The quantity of suitable fish food found in a stream or lake determines not only the number of fish that may be supported, but also the physical condition of those that do survive. When food is scarce a smaller number will be able to win in the struggle for existence, and those that do win will usually be poor and stunted in their growth. Fish epicures have persistently maintained that the flavor of a poorly fed fish is much inferior to that of one which has had an abundant supply of food. They also assert that the flavor is affected very much by one kind of food on which the fish feeds. It is stated, too, that the kind of food affects the growth of a fish very materially. Baird (1857) cites an experiment in which young trout, presumably the same number and of the same size, were placed in three separate tanks and were fed upon different kinds of food. The trout in one tank were supplied with worms; those in another were given live minnows; while those in the third were fed upon "water-flies." The trout which subsisted upon worms grew slowly and had a lean appearance; those which were supplied with live minnows became much larger; "while those which had flies alone given to them attained in a short time prodigious dimensions, weighing twice as much as both the others together." It is true, of course, that there is a very marked difference in the rate of growth of trout, even under apparently the same food conditions. Trout culturists, for instance, find it necessary to sort the young trout of a pond at regular intervals after they are a few months old, and separate the larger, precocious individuals from the smaller, weaker ones in order to keep the former from preying upon the latter. But, in spite of this apparent contradictory evidence, there is little doubt that the great difference in the results obtained in the above experiment was due, in some measure at least, to the different kinds of food supplied.

As long ago as 1653 Walton appreciated the importance of the quality of the feeding ground, for he says: "And certainly, as some pastures breed larger sheep, so do some rivers, by reason of the ground over which they flow, breed larger trouts." Francis (1868) makes the assertion that "trout in

one stream will be much larger, firmer, redder and better shaped than in others. This may, in a measure, be owing to the greater abundance of food, but I have every reason to believe that it proceeds quite as much from the kind of food that they are enabled to obtain." Further on he says: "In lakes also it is a very common thing to find the trout in one lake large, bright and well fed, and in another very similar in appearance, and perhaps only a bare half-mile distant from the other, they will be long, black and lean, with heads out of all proportion to the thickness of the body. In another, probably but a similar distance from the first two, the trout will be abundant, but very small, though bright and well colored. To exemplify this he cites a group of small lakes in which he had fished and attributes the superior condition of the trout in the smallest lake of the group to the abundance and greater variety of the food found in it. Baird (1857) cites a similar difference between the trout of two streams, one of which is a tributary of the other, and he ascribes it to the great difference in the quantity and variety of the fish food which he found in the two waters.

Thus it is evident that a knowledge of both the quantity and kinds of food found in a stream or lake is of very great importance when it comes to the question of trout culture. This, doubtless, is true also of the culture of all other fishes, and this knowledge would be very valuable in the introduction of a species of fish into new waters. If we know the kind of food on which the fish thrives best, and if we also know the quantity and kinds of food available in the water to be stocked, then the problem of stocking the water can be attacked in such a way as greatly to increase the chances of success. Until such knowledge is acquired we must continue to experiment more or less blindly.

Walton tells us that the trout "lies at watch for any fly or minnow that comes near him, and he especially loves the May-fly." In the two and a half centuries since Walton wrote, relatively little has been added to his observations on the feeding habits of most of the trouts, though several writers, especially writers on trout culture, have commented in a general way upon the great variety of trout food. There is very little definite information as to the quantities and proportions of the various component elements, however. From general statements we learn that the food includes various kinds of worms, all kinds of insects (both adults and larvae), mollusks of one sort or another, crustaceans, small fish, fish eggs; in fact, almost anything that is digestible as well as many things that are not digestible. Trout are regarded as carnivorous from choice, but omnivorous in cases of necessity.

DIAMOND FISHING TROPHY.

Donald P. Gillies of Goldfield, Nev., has placed a \$200 medal at the disposal of the Catalina Light Tackle Club, to be awarded yearly to the person capturing the biggest yellowtail with light tackle. The first medal has been given to Edward C. Sachs of Butte, Mont., for his catch of a 41¾-pound fish last summer.

Gillies' medal is to be contested each year. It is designed with the figure of a yellowtail in the center, with a blue sky on the upper half of the field, and the green sea on the lower portion. The medal is solid gold, with a valuable diamond inclosed in a Maltese cross at the top. "Gillies' Medal" is inscribed on a blue field on the top cross-bar, and the names of winners are to appear successively below this, on a second cross-piece.

The members of the club have not been notified of the donation of the medal, and Secretary Brewster only received word recently that the jewel was to be placed in his custody by a Los Angeles jeweler. Mr. Brewster will notify Mr. Sachs, the winner, that the medal is in the club's possession, and the latter will designate what disposal is to be made of the trophy for the ensuing year.

Hyde Creek Stocked.—Twelve cans of 10,000 fish each arrived from the State Hatchery recently, consigned to the Tuolumne County Fish and Game Association of Sonora, which have in hand the important work of stocking the streams of the county. Two cans were placed in Sugar Pine Creek, which flows into the north fork of the Tuolumne River, and the balance in Hyde Creek at different points along the stream. All the fish were put into the water in first-class condition. Another consignment of fish is expected soon.

Hyde Creek is one of the best trout streams within easy access of Sonora. It has never been systematically stocked, and although it has been more thoroughly fished every year than any other stream in the county, yet the supply of fish therein have held out remarkably well.

At the Battle Creek Fishery 23,000,000 salmon eggs have been taken to date. At the Mill Creek Fishery, near Tehama, 13,000,000 have been gathered. Captain Lambson, superintendent, says that the season is an average one. A total of 45,000,000 will be collected at Battle Creek, the largest fishery in the world, and 23,000,000 at Mill Creek. Fifteen men are employed at each fishery.

The fish, stripped of their spawn, are given away to those who will take them. Farmers haul them away by wagon loads. Some are salted down for food, although as a food they are not very good. About the best use the bruised carcasses can be put to is as a fertilizer for fruit trees.

HUNTERS' LICENSE REVENUE.

As a revenue producer for the Fish Commission the sale of hunters' license tags has been, beyond all anticipation, a most successful measure. According to recent advices from Sacramento the amount already realized is \$110,000. This sum is made up from the sale of annual tags at \$1 per tag. The amount given does not include the non-resident licenses at \$10 each, or the foreign licenses, costing \$25 each. This total was up to the first of last week, and was given in a report made to the Governor by Charles H. Vogelsang, secretary of the Board of Fish Commissioners.

It is estimated that the State will realize sufficient money to support the Commission, and it is understood that no more appropriations will be asked from the State. The money taken in by the County Clerks for hunting licenses goes direct to the funds of the Commission. With the \$110,000 added to the appropriation of the last Legislature for carrying on the business of the Commission, it is estimated that there is now a sufficient fund for all purposes.

The Legislature appropriated \$5,000 for the propagation and protection of fish, \$40,000 for building and maintaining hatcheries through the State, \$1,000 for printing, and \$7,500 for building and equipping and maintaining a railroad car to be used to distribute fish from the hatcheries to the waters of the State.

The hunters' license tax has been more successful than was expected. It shows that there is approximately 115,000 hunters in California, and that they have paid the license without grumbling. Practically every man who hunts has a tin tag for which he paid \$1. The tags cost the State 5 cents each, delivered to the hunters, leaving 95 cents clear profit for the Commission. The County Clerks do the extra work and receive no commission.

LIVE DECOYS.

The wiles of the hunter to deceive the innocent wild duck are becoming more advanced as the sport of duck hunting grows. The art of man is being pitted against the wisdom of the feathered tribe and each day must the wehfeet learn of new dangers that besiege them.

Years ago hunters merely took to the tules as a blind behind which to hide and wait for the ducks to pass. Then some imitative genius started to making ducks of wood to entice the flying birds to settle in range of the gun. Boats were constructed to resemble, to almost an exactness, a floating hunch of tule, and in this way many of the tribe were deceived into death, for the drifting imitation with a hunter concealed within could play havoc in a flock of feeding ducks. The hunted ones, however, became wise to this deception and now are not beguiled as before, and the hunter must devise other means of deception.

Among the latest of these means is the interbreeding or crossing of tame and wild ducks. Tame ducks were and are yet used as decoys, but their call is not always sufficient to lure the wild duck to the water from his lofty flight. As taming a wild duck for a decoy was out of the question, the next practical thing was done, and that is to cross a wild and tame fowl. A hunter once found a wounded wild mallard drake, and taking it home bred it with some tame mallards. He found that as a decoy the crossed bird is hard to heat. His success led to other hunters taking it up, and now many sportsmen use live decoys of crossed birds and say they give good results.

A drake and two ducks are generally taken out for the hunt and are placed apart from each other on different sides of a patch of tule. When the drake looks up and sees a hunch of wild ducks flying over, he, in his lonesomeness, calls out to them. The decoy hens, hearing the drake call, then give their answer, and as a result of the long-distance conversation the wild ducks circle around and then join those on the water. The hunter does the rest.

At the regular monthly meeting of the Southern California Rod and Reel Club, held last week, it was decided to inaugurate a gold-button contest for big fish, to include all the waters in Southern California, from Santa Barbara to the Mexican line. A six-foot, ten-ounce rod and a nine-strand line must be used by competitors and each one must pay \$1 entrance fee. This button division will comprise a special class by itself and no member of the club need join it unless he desires. There will be three kinds of buttons, one for outside fishing, another for inside and the other for maximum limit fish in each class.

M. A. Carpenter has been appointed Deputy Fish Commissioner for the Redding district. He was the most efficient policeman Redding ever had and proved to be the dread of all crooks and evil-doers. He has made a good record also as a detective with the railroad. His appointment as Deputy Fish Commissioner is expected to result in the detection of some of the violators of the game and fish laws, of whom there are hundreds, particularly among the Greeks, although there has not been a single conviction in Shasta county this year.

Jackson's Napa Soda is the best hot weather drink.

TRICKS IN SHOTGUN MANUFACTURE.

Comparisons between the conditions that surround the manufacture of guns in America and the same industry as carried on in England are frequently made. Without going into a discussion of the merits in each case, the main point of difference that at first presents itself is the British gunmaking custom of proving firearms. The English Proof House is an institution with which few Americans are familiar. For that reason a few remarks about its operation and the loopholes by which certain gunmakers evade the law and profit by an illegal traffic in guns should prove interesting. One of the strangest things about the English Proof Acts is that they apply only to England and not to Scotland. For instance, in Scotland each gunmaker is responsible for the safety from bursting of his own guns, just as in America. In estimating the cost, then, of a gun sold, in Glasgow, for example, one has not to calculate the cost of proving the barrels, which put at least some cents on to the price of all guns sold in England. It is possible, therefore, for a Glasgow firm of gunmakers to have guns made for them in England, and sold to their customers, wherever they may be, from Glasgow without having to incur any expense whatever in Proof House charges. It seems to follow that shotguns made, let us say, in Birmingham and engraved with the name of a Glasgow gunmaker do not require to be proved at all. The maker or the seller can pocket the Proof House charges as additional profit on the cost of making the gun. It may be that the gun can be sent unproved direct from Birmingham to some other town without having to travel to Glasgow and back again from Glasgow to that town. This is not asserting that such proceedings actually occur, but is merely citing a supposition case to show what is possible and probably not actually illegal. The reverse of this occurrence again would be where the gun manufacturer uses the Proof House as a cover to his selling foreign guns as British-made weapons, even though bearing his Liege proof marks, for example when imported. The filing off of the proof marks entirely from the barrels and thereafter re-proving the weapons at the English Proof House obtains for them the hallmark of Proof House approval in Britain, and enables them to be sold at the price of British-made weapons, which, of course, are higher than Belgian ones, giving all the more profit to the so-called maker, and enabling him to compete unfairly with bona fide British makers. The English proof marks are paid for in this case only for one purpose and that is to deceive the buyers, who believe that they are buying English-made guns. The guns, no doubt, may be good enough sporting weapons, having stood the proof charges both in Belgium and England, but they certainly are not what they are represented to be, and the legality of their sale is open to question.

If by such ingenious evasions of the law, says the County Gentleman, London, gunmakers were able to give their clients corresponding reductions in the prices charged, and still to supply strong, reliable weapons of good shooting powers, there are no doubt many sportsmen who would pocket deception and say nothing. But seldom, indeed, are the sportsman's interests studied by such dealers as would resort to such means of manufacture. They would do so undoubtedly merely as a means of increasing their own profits, while supplying their customers with less valuable guns than they imagined they were purchasing. If such things were done anywhere it would be difficult to describe them as straightforward dealing, and it is even doubtful if the law would protect the doers of them were the facts to become clearly ascertained. There are, of course, a multitude of shooters who do not care a jot for finish so long as they get the good shooting qualities in a strong, medium-priced game gun. There is a greater proportional profit on a cheap gun thrice sold than on a higher class weapon once supplied to the more limited demand therefor. It is not intended to go deeply into the question of profit, and allusion is only made to it so far as affecting the sale of guns. It is always a very invidious task to have to show a sportsman how much profit his gunmaker has made in supplying him with a gun. At the same time in looking into the question of value in one gun compared with another, or, in other words, the worth of one gun compared with another, the price is often a guide. But price again is not an infallible guide, because some gunmakers can buy cheaper than others and some have devices unknown to other gunmakers of securing bargains in sound enough stuff that is difficult to trace to its origin. It would take an extremely good judge of a gun and careful examination of the parts and the shooting to detect where in such cases the inferiority came in. Belgian work, for example, is very cheap and substantial, and it is not easy to detect it when treated as it is by some gunmakers in the Midland capital.

The great southward flight of the wild ducks, which has been expectantly awaited by Los Angeles sportsmen for several weeks by the scatter-gun pointers, took place Sunday.

From early morning great flocks of the wild fowl came winging down from the North throughout the day and by nightfall the ocean off the beach resorts was literally covered with the feathered visitors.

Old-time hunters say it is the largest flight seen in the south in years, and gives promise of splendid sport when the ducks locate their feeding grounds and desert the security of the ocean.

POSSIBILITIES IN THE .22 CARTRIDGE.

Though there is nothing of a magical quality about the dimension .220 of an inch it seems destined to play a large part in the future of firearms. Public opinion at first condemned this as an inappropriate bore of cartridge for the shooting of small game, and yet to-day it forms the favorite missile of the rabbit and pot-hunter, to say nothing of the sparrow shooter. He realizes as no one else can the circumstance that there are other things to consider than mere stopping power. Given a sufficient degree of accuracy, the efficiency of the .22 bullet leaves but little to be desired, whilst offering other advantages, such as the minimizing of noise and saving of expense. Just at the present time, says an English contemporary, everyone favors the longest of the three cartridges which fall under the .22 designation in a great measure from the circumstance that rifle barrels are constructed to take the long cartridges, and gunnery abhors a vacuum. The air rifle, with its .177 of an inch, demonstrates that we have not arrived at the end of things in the L. R. .22 rim-rifle cartridge. For a start at any rate the short .22 is worthy of careful consideration. Given a chamber dimensioned to the short cartridge, and the enhanced shooting accuracy obtained will bring its due reward. At the present moment the bullet from the shorter cartridge, when fired from any of the rifles as commonly offered for sale and suited only for the tallest members of the family, gives a dispersion greater than the personal error of the shorter. Its chances of success are prejudiced so long as it is well known that the fixed rest results of the alternative cartridge go one better than the most perfect holding of a practiced shot. This anomaly can be overcome, and the sub-division of .22 cartridges into short and long will represent a step in advance. The next stage of development will be to produce an internally lubricated .22 cartridge requiring a chamber formed on rational lines, that is the exterior diameter of the case must be greater than that of the bullet by the slackness of the metal forming the mouth of the case. When these things have been accomplished other problems will follow; but sufficient unto the day is an excellent principle to adopt in mapping out a program of research.

Early English Gunpowder.—A bucket containing bullets and gunpowder has been discovered in the roof of Durham Castle, where it is believed to have been walled up about the year 1641, when the castle was being prepared to withstand a Scottish raid. The bullets are molded spheres of two sizes, and, according to the analysis of Messrs. Silberrad and Simpson, consists of a little over 99 per cent of lead, with iron and silver, and traces of bismuth, arsenic and antimony. The gunpowder is not granulated like that of the present day, and was evidently prepared by simply mixing the ingredients. It contains about 1 per cent of moisture, and the proportion of the constituents calculated on the dry powder is practically identical with that of the black gunpowder of to-day, viz.: niter, 75 per cent; carbon, 15 per cent, and sulphur, 10 per cent. It is pointed out by Messrs. Silberrad and Simpson that this is a remarkable fact, since the gunpowders made in England at that time contained a considerably larger amount of sulphur. The only gunpowder with the modern proportions in use in the seventeenth century was Prussian musket powder, and hence it is suggested that the Durham powder was probably of Prussian origin.

Fishing Rod Ferrules.—An eminent English authority writing of fishing rod ferrules, says these should be fitted with a lock fastening, which "is very superior to the old way of tying the pieces to prevent them from coming loose." This may seem curious to anglers in the United States, accustomed as they are to the excellent ferrules supplied by our own makers, but the fact is that English ferrules of brass, while beautifully made and finished, are ineffective. It is by no means unusual, while casting with an English rod, to have a tip or middle joint thrown out because of loose ferrules, whereas with American German silver ferrules it often requires some skill and no little strength to take the rod apart after use, for the ferrules fit tightly and give no trouble.

KENNEL SUGGESTIONS.

We have often wondered at the very great amount of fuss and trouble that the inexperienced breeder, in his deep anxiety for the welfare of the coming litter, expends upon a bitch who is expecting a litter. Carefully measured exercises at certain hours, carefully prescribed meals, both as to quality and quantity, doses of various aperients, and specially prepared beds are only some of the fussy and totally unnecessary preludes to the great event. Now all these preliminaries are superfluous, and are certainly worrying to the expectant mother, and go far to bring about the very evils they are meant to obviate. As in many other matters with dogs, the bitch herself is by far the best judge at this critical moment, as a rule. We say this advisedly, for of course, there are some bitches that, owing to savagery, sheer indolence, or even excessive fondness for their offspring, are quite unfit to be trusted with their newly-born offspring for more than a few minutes at a

time. Still, it is very remarkable that young bitches with their first litters are very seldom anything but the very best of mothers, and we have often had evidence that bad mothers are the direct result of injudicious meddling and interference at the time of their first whelping. However, we will dismiss this kind of bitch and her works by advising the provision of a foster mother, which is certainly a cheap and effective way out of the difficulty. Now, as to the best manner in which to treat a bitch in the advanced stages of pregnancy. Ordinary treatment and exercise should be followed till the end of the sixth week, by which time our novice will know whether or not his hopes of a litter are to be realized. Then, if an outhouse is available, the bitch should be kept loose in it, or, under favorable circumstances, even free to run about the dwelling house is advisable. As to food, as a staple there is nothing better than raw paunch, well washed and cleaned. This, in most instances, will keep the bowels open enough without giving castor oil, sypup of buckthorn, or other purges, the administration of which at this stage often does more harm than the physic itself does good. All causes of excitement should be avoided. Let the bitch alone; anything likely to upset her nerves should be kept at arm's length. But if the raw paunch does not keep her bowels open, it is more than probable some meal drop with a little dripping melted in it and given warm will have the desired effect if its administration is persisted in. If the bitch is obstinate it will be ample time to give castor oil, but great care must be taken in handling her for its administration. As the time gets nearer and nearer, the bitch, if left to herself, will find a resting place in some out of the way corner. A clean, soft sack or two—and there is nothing better than a couple of biscuit bags—put down in this particular place, and is possible, fixed in some way to the floor, to prevent "rucking," is the next requisite. The bitch will settle down to her bed, will have her puppies thus, and in ten out of twelve cases give no trouble whatever. Again we repeat, leave her to her own devices.

In a few cases, mal-presentation, a dead puppy, or other obstetric trouble may make manipular assistance necessary. Then send for a vet at once. Scores of bitches are ruined by inexperienced handling at such a juncture, and it is not a moment for economy or even delay, in the hope that "she will be all right in the morning" to be practiced.

With this treatment a bitch will do all right, bring her family into the world, and have all clean, dry, and cuddled up before her owner even knows that the all-important moment has arrived.

Business methods may not alone insure success, but few people ever make a success of the live stock business without them. The no-accounts kennel is apt to degenerate into the kennel of no-account, for shiftless, haphazard ways of doing things soon spoil any business. They do that!

Getting together a few good dogs and a beautifully illustrated dog book does not necessarily mean a famous kennel and heavy profits. The fact of the matter is that the dog-producing industry requires as much brains and shrewdness as any other; and it just has to be run on business lines to be a commercial success.

Good penmanship, book-keeping and spelling though desirable, are not necessary. The great essential is to start a simple book or set of books now, and jot down everything therein so that you understand it yourself. Keep a strict account with each dog. Charge it with its keep, and credit it with all it brings in.

Then, once or twice a year take stock by totalling up the sums of the receipts and expenses, and estimating the present value of the live stock on hand, so that you know just where you are, and what profit or loss has resulted from the last year or half-year of trading.

Of course, it means a certain amount of extra trouble; but it has always been the trouble taken with things that counts. "Seest thou a man diligent in his business, he shall stand before kings." That is as true to-day as it was when King Solomon wrote it.

Have a little account book, too, in which to put down the chains, leads, collars and kennel sundries you loan to other folks. That is much better than by-and-by forgetting who had some of them—especially when the borrower suffers from an even shorter memory than your own.

Then it is an excellent plan to keep careful record of your breeding work and of the little things you learn as you go along. This often saves one making the same mistake twice; and, if it does take a little time, it is one of the matters for which time must be found if waste and error are to be eliminated.

A good scale for weighing purposes is a fine kennel appurtenance; and it is an excellent plan to weigh all stores on receipt, seeing that the weights correspond with the invoice. The man without a scale is always at a disadvantage. He cannot check his purchases properly, and never knows for sure that he is getting what he pays for. He is reduced to hoping that the butcher sent the right weight. While no one supposes for a moment that any decent tradesman would intentionally do otherwise, an honest man is liable to make mistakes, and thus a careless buyer may be a loser.

"Putting it down" is the one sort of kennel account every beginner should piously eschew. Buying on credit is bad enough policy, for indebtedness means worry all the world over; but selling dogs on credit is worse, because you sometimes never get the money at all.—Illustrated Kennel News.

NEWS FROM THE NORTH.

[Portland Rural Spirit.]

Frank E. Alley of Roseburg, Oregon, is now the leading breeder of trotting horses in this State.

Unless sufficient inducements are offered on the Coast next year Robert Brady may send his fast pacer Knick Knack 2:11½ through the Grand Circuit.

Lou Childs thinks his McKinney stallion Merry Monarch, whose dam is an own sister to Chehalis 2:04¼, etc., is fully as fast as Sherlock Holmes 2:06¼.

Henry Tillman has concluded to put his young stallion Padishah, by Keeler, into training next year and has arranged with L. B. Lindsey to handle him.

Prof. E. B. Turner has quite a school of horses at his training quarters in the old Irvington stables. The professor knows how to give them the best of manners.

H. C. Davis, formerly of Portland, is now located at The Dalles, where he is training horses, among which are two sired by Phallamont Boy and owned by Geo. N. Crossfield.

A. J. Boyle writes that he has a most beautiful filly sired by his stallion Burion 2:29 out of Lady Mack 2:22½ by Lemont, that looks good enough to take to the races.

That the horse show in Portland has come to stay and is a fixed affair is a certainty. The management is already talking of the 1908 show, which they intend to make even better than this year's show.

We are informed that J. T. Wallace has traded his stallion, Bonnie Tangent, for a farm and has retired from the training and racing business, and will devote his time to breeding trotters hereafter.

At Valdez a year ago horses brought about any price their owners cared to ask. This year you can get horses at Valdez for about any price you care to pay. The sudden cessation of work on the Home Railway project threw a lot of heavy draft animals on the market, and early freighters over the trail from Fairbanks, who cleaned up well on their single venture, sold off their stock and came back to civilization.

A Rural Spirit representative visiting Hillsboro not long since went out to the old Tongue ranch and race track, where he found I. D. Chappell hard at work jogging his horses in the mud and rain, just like an old-time "Webfoot." Gray & Chappell have leased and taken an option on the place, intending to again convert it into a breeding and training ranch. They have Oliver J., who already has a fairly good mark and promises a much lower one; Gray Grattan, the richly bred three-year-old, is probably their greatest pride and he will be used in the stud to a limited extent next season as well as trained. A promising four-year-old is King Miller by King Patchen, the horse that sired so much speed over in British Columbia. They have Gen. Jones and Daisy McKinney in training for J. A. Jones and of their own stock they also have Wilmot D., Elma O. 2:15¼, and Lenmetta 2:21½. Lenmetta has a fine filly by Lynwood W., the sire of Sonoma Girl; Neda, a nice three-year-old, is in foal to Gray Grattan and this will be an in-bred Grattan. They have a nice colt from Zolock out of a Del Norte mare. They also have several others coming, including the dam of Trampfast, and expect to add a number of good mares until they have quite a large breeding ranch.

SOME OF WINANS' PURCHASES.

The prominent English horseman, Louis Winans of Brighton, England, who recently purchased the great trotter Siliko (3) 2:11¼, for a reported price of \$35,000, has done more to introduce and make the trotter popular in Great Britain and Europe than any other one man, as he has purchased more than a score of fast record trotters and pacers during the past half-dozen years. Among the most prominent ones exported by him during the past three seasons might be mentioned Prince Alert 1:59¼, Gallagher 2:03¼, Fanny Dillard 2:03¼, Don Carr 2:06, Robert Lee 2:06, Alton 2:09¼, Alta Axworthy 2:10½, Lord Ravelstoke 2:12¾, Katherine A. 2:14¼, Virginia Jay 2:14¼ and Central G. 2:16. Early in 1906 Mr. Winans engaged A. C. Pennock, the Cleveland trainer, to take charge of his racing stable, and Pennock made a splendid campaign over the Austrian tracks with the Winans horses.

Wig Wag 2:16¼, with which trotter the Winans stable had won the European trotting championship in 1905, and expected to duplicate the performance last season, was taken sick and died suddenly just before the big race. Alta Axworthy (3) 2:10½ also died after a brief illness, and a number of other members of the stable had to be taken out of training. Sickness also interfered with Mr. Winans' stable success this season, although Pennock's winnings for the year exceeded \$20,000.

HORSE BREEDING ON THE FARM PROFITABLE.

At a farmers' institute, held in Washington county, Maine, Dr. G. W. Twitchell talked of horse breeding on the farm. He said in substance as follows:

A draft colt will earn its own living after two years of age. To grow this class of stock suitable mares are demanded, those of fair size—1,000 to 1,100 pounds—with sound legs and roominess of body. It is of little use to breed from runts or broken down "skates." These are a disgrace to our agriculture and a positive hindrance to any farmer. In buying chunks select mares, not geldings. Look to feet and legs. See that they stand squarely on their feet. Avoid those who toe in or out—or whose hocks touch behind. The foot determines the horse. Good hoof structure, round and well set at heel, with short but not straight pasterns are wanted. In drivers seek the long, springy pastern, the angle from ankle joint being 45 degrees, shorter and stronger, but the same angle for draft. A straight pastern is likely to cockle, while too sloping a pastern will be likely to break down. Watch out for sickle or straight hocks, as well as tendency to curbs. The hind legs propel, and therefore must be built in right proportions to lift and sustain the greatest effort. Above all, avoid coarse bone or joints. A good leg feels like a piece of polished steel. The cannon bone, hide, hair and eye are among the best advertisers of quality in a horse. Trueness of action increases power. The eye is the telltale of energy; the ear, nostril and lips the indicators of courage and disposition.

First equip the farms with this type of mare and then breed only to a pure bred sire. He should intensify the good qualities of the mare and carry more of action and style. Never patronize an unsound horse. Better no colt than a poor one. Seek positive virtues through positive sires. Reproductive powers in our mares are burned out by constant grain feeding. A physical examination is necessary in every case. Cool down, one month before breeding, with bran mashes, green food and roots, and put organs in more normal condition. It is a waste of time to breed without this preparation. A whole year is lost by neglect. Less than 20 per cent of services prove fertile, whereas the average should be 30. Stallions need exercise to sustain virile energy. Padded stalls and heavy blankets do not insure living foals. More roots in winter and more regular work all the year is called for. Fat is not congenial to prepotency. With the growing interest in the subject stallions will be forthcoming as the evidence of good, sound mares is seen. Don't expect to combine draft and stylish road qualities in one horse. Seek for well built, symmetrical, fast walking draft colts and a foundation will be found for the road horse. The money to-day lies along well-built, strong, full quartered, clean limbed stock.

Don't use a stallion with a small, dull eye or misshapen head. Intelligence in our coming colts must be intensified that safety may follow. The automobiles make necessary a safe horse, and this will come through critical breeding. There's no chance for indifferent work in any direction.

Feed broodmares liberally and keep in good condition. If allowed to run to pasture with foal, protect from the flies. Never allow either to lose flesh. Keep the colt growing. Its size will be determined the first six months. See the stock at pasture daily and look out for accidents. There is no limit to the demand for good draft colts. Clean out the deadwood this winter, if there is any, and put in one or two shapely, sizable, true gaited, fast walking mares, and be ready to breed in May, so as to have the colt drop as warm weather is approaching. This is business, and good farming justifies nothing else.

BUYING HORSES.

The distribution of horses to consumers has become an immense industry. The great teaming interests of cities are supplied with equipment by professional dealers who either purchase their supplies in the country or at some wholesale market, the latter being the principal source of supply. The consumer cannot afford to lose the time necessary to canvass the country to purchase horses direct from breeders and relies on the professional dealer in all classes of commercial offerings for necessary supplies.

Dealers prefer to purchase their horses at wholesale markets on account of the wide range of classes and the volume of consignments. At the Chicago market 2,177 horses have been received in one day, 4,768 in one week, 18,448 in one month and 127,250 in one year. The immense volume of daily receipts of all classes of commercial offerings at the Union Stock Yards makes it an ideal point for professional operators to obtain their supplies. This market has an international reputation of being the largest distributing point of horses in the world. More horses are annually purchased there for the Eastern trade and export than at all the other domestic markets combined.

The consumers of horses are timid buyers and prefer in most instances to place their orders with dealers who are expert judges of all kinds of industrial offerings. To tell correctly the age and soundness of a horse requires wide experience. There is supposed to be more deception embodied in horses than in any other class of domestic animals. Many horses are afflicted with vices that are concealed at time of purchase, and unless the animal is guaranteed at the time of sale it may turn out a counterfeited and the buyer suffer a material loss. On account of the difficulty of selecting the right kind of a

horse and determining his soundness and commercial qualities consumers prefer to pay a bonus to reputable dealers to execute their orders.

Every dealer has had a wide and expensive experience, and it is only right that he should charge for his education when executing orders. From all the great metropolitan cities of the East are assembled every week 100 to 200 horse buyers purchasing supplies for their customers. They inspect horses more closely in a minute than a novice could in eight hours. Their losses in acquiring their experience have made them adept in discovering every defect in an animal when offered on the block or at private sale. Blue eyes, cut wind, spavins, string-halt, splints, side-bones, curbs and blemishes that depreciate the value of the horse they are able to discover almost by intuition. Even a cribber, weaver or halter-puller can be detected by experienced dealers where the novice would overlook these equine vices.

In purchasing horses it is good economy to rely on the judgment of a reputable dealer, whose interests are best conserved by treating his patrons fairly, rather than take the chance of buying a counterfeited.—Drovers' Journal.

ROBERT MCGREGOR ON PEDESTAL.

An Eastern breeder, says Henry Ten Eyck White, calls my attention to the fact that Robert McGregor is one of several prominent stallions whose blood is most potent in the female line, being moved thereto by an item about Nutwood, a great horse, but far more famous through his daughters than his sons, as 155 of the former have given the turf 214 trotters and 71 pacers, while only 145 sons of Nutwood have sired speed. As to McGregor, he has eighty-five producing daughters, and fifty-one represented sons, and in other respects than this he resembles Nutwood. I have been told by men who saw Nutwood race when he was at his best that he was not a game horse, and while Robert McGregor has been placed on a pedestal by his admirers and dubbed "the monarch of the homestretch," some men fitted to pronounce judgment in the matter maintain he was not game, but that as he had more speed than any other stallion of his day, he could always win if the issue was left to a brush in the stretch, but if the fight was carried to him from the time the word was given, he could be beaten, and in such cases he would stop in the homestretch. Drivers who raced against McGregor when he was in his prime say that, with all the horses fit, either Santa Clus, Piedmont or Hannis could beat him, although Piedmont was not strictly a game horse.

But McGregor outbred himself on both sides of the horse. No other horse ever sired a trotter like Creseus, for instance, and his daughters produce well. A Chicago institution, the Grattan Farm, has the largest collection of them, seven in number, among them the dam of Grattan Boy 2:08, and Roxane 2:12¾, the second fastest daughter of McGregor. Like all breeding establishments that are up-to-date, Grattan Farm is going in for colt training.

FREE MARKETS FOR PRODUCE.

The Board of Supervisors of San Francisco recently adopted resolutions providing for the establishment of free markets in this city where farmers, fruit growers and others can sell the produce of their farms and orchards direct to the consumers. All who are interested in selling their produce in this manner should write to John E. Behan, Clerk of the Board, for particulars in regard to the manner in which they can take advantage of the establishment of these free markets.

Senor Rodriguez of Mexico owns a span of horses with a record probably not approached. A few years ago he conceived the idea of visiting all South American points of importance, and he included in his itinerary several out of the way places not ordinarily on the route of travelers. Accompanied by a friend and a half-breed Indian mozo, he started in a conveyance drawn by two horses. These horses trotted nearly 40,000 miles in six years. This distance is equal to seven times across the United States and back.

An exchange aptly says: Of course, we can't (because we won't) race horses in this country as they race them abroad, yet over there they seem to do some things that are about right. An account of the racing on the season's closing day at Vienna says: "The feature of the day was the Vindolona Handicap for the second-class inlanders, distance two miles and upward. The horses were spread over a distance of 260 yards at the start, but the handicap was so well made that the seventeen starters finished all in a bunch."

W. L. Spear of Lexington made a record as a breeder of Futurity timber this year to well be proud of. Not only did he breed Trampfast (2) 2:12¼, holder of the race record for his age, but Thistle-down, which drove the former to his mark; The Laird, that divided fourth money with Helen Hale, and in addition Shakespeare (3) 2:09¼, a winner of the pacing Futurities this season.

Among the fairs that show a tidy balance on the right side of their ledger is that held annually at Brocton, Mass. The net profits for the 1907 show almost reached \$20,000.

THE FARM

ENGLAND HAS US BEATEN.

About a half a dozen years ago or more a certain clique of American racing men and representative racing men at that, became enamored of the possibilities of racing in England, and they invaded that country with American horses, American trainers, American jockeys, and American methods.

Their welcome was not enthusiastic, but their presence was tolerated until their methods began to show results. Then there was what is colloquially called in this country a "holler." They were weeded out singly and in groups, until now there are a few borsemen racing on the tight little isle who have gone over from this country.

Danny Maher is the only exceptional jockey. And from all accounts he has ingratiated himself with the Brits through the simple process of becoming a confirmed expatriate. Richard Croker is the only exceptional horse owner, and it is not necessary to relate how dearly he is beloved by the stewards and the members of the Jockey Club. It is only necessary to say he is not wanted at Newmarket, which is the cathedral of British racing.

American racing methods were not fancied in England. Our sportsmanship was questioned. Our trainers were considered too tricky, and the horde of turf followers who went in their wake were considered to have an unhealthy influence on the sport. All of which may have been true. As a matter of fact, divers and sundry American turf busters and bounders, whose presence was not considered an addition to social fabrics on American tracks, fastened themselves on the British game.

What they did we do not know, but with what they were capable of doing we are quite familiar. We are willing to grant their work must have been pretty course; their sins—if they committed any—were visited upon the reputable American borsemen who went racing over there.

The methods of those desperate and irresponsible camp followers should not have been regarded as an innovation in England. Their foibles were an old story in England three-quarters of a century ago. They were imported to this country with the game itself. The tout arrived in America with the importation of Glencoe and the tout has been a part of the game on either side of the Atlantic ever since.

America has invented nothing in the art of separating men from their money through the medium of a horse race, and the Americans who have invaded England in recent years had nothing to show their British cousins, unless the latter had forgotten all that their great-grandfathers knew.

The advertising tipster, who is not as prevalent in this country now as he was a half a dozen years ago, thanks to a more stringent enforcement of the postal laws, is not indigenous to this country. He flourished in England seventy-five years ago and came to be regarded as a pest over there fifty years ago. He used the same specious pleas for wheedling his clients and practically the same terms in his advertisements.

The American advertising tout with a "system" to beat the races had his prototype in the English advertising tout with a modus as far back as 1346. English reformers deplored the fact that racing was not loved for itself alone but as a convenient peg to hang a bet on.

Quoting from an article printed at that time:

"It may safely be asserted that among Londoners not one in 500 could mention the chief qualities a racer should possess; but this goes for nothing; or perhaps it might be said it goes for everything. It is each man's faith in the ignorance of his neighbor, and his high respect for his own sagacity and his 'good luck' wherein resides the secret of the horse betting mania at the present time afflicting the nation."

That was written in London sixty

years ago. How often have you heard it repeated since?

The sporting prints of those days were regarded as mediums of communication between the ignorant people who stood in need of horsey counsel and the knowing ones of the turf who for an exceedingly trifling consideration were ever ready to give it.

The field cultivated by those knowing ones was as wide as the kingdom itself and the methods they employed to lure fish to their nets were bold enough to make the most desperate turf buccaneer stand aghast. Their audacity was incalculably greater than that of the get-rich-quick schemers who flourished for a time in the United States.

Their future books, called "specs," were out and out lotteries. These "specs" were made on all the classic events. This feature of race gambling eventually was suppressed. Then the advertising tipster stepped in and took the play. His promises were extravagant. He publicly boasted of being in possession of the secrets of even the stables of the Royal Family. These secrets he was willing to impart to his clients in exchange for a paltry shilling's worth of postage stamps.

The man with the modus evidently was no piker. Among the smaller fry of advertising tipsters one was known as "Stable Mouse," another as "Earwig" and another as "Spy in the Manager." Certainly America has not improved on these names.

Did ever any advertising tipster in America, even in the days of raw cracks, spread it as broadly as this:

"Do not be guided by the betting, but back my outsider, whose name has scarcely ever been mentioned in the quotations, because the very clever division to which it belongs have put their money on so quietly that this secret is known only to a few.

"I am in the swim, and know that the horse did not start for one or two races it could have won easily, but has been expressly saved for this. I have several other absolute certainties, and guarantee to be particularly successful at Chester. Terms: Fourteen stamps the full meeting. Many of the minor events will be reduced to certainties; and in order to take advantage of it, I am willing to telegraph the very latest, without charge, to those who will pay me honorably from winnings; or I will invest amount remitted to me, guaranteeing to telegraph before the race is run the full particulars."

Did America ever send a tout to England that ever put up a stronger spiel than this? Did any American advertising tipster ever dare say that it was in his power to fix races for the benefit of his clients? Well, hardly. Yet such brash promises were scattered broadcast throughout England dozens of years before an American stable ever invaded the classic domain of the Jockey Club. It was not up to the American invaders to introduce new touting methods in England.

The English touts in the days when telegraphy was as new as the dirigible balloon it now could forget more about the art than the American tout would dare try to commit to memory.—Hugh E. Keough in Chicago Tribune.

GRADING UP THE DAIRY COW.

[By Prof. W. A. Henry, late Dean of the Wisconsin Agricultural College.]

Despite all the past educational efforts by many earnest men, a vast majority of Wisconsin dairymen are still using grade or scrub bulls. Even when using grade bulls, there is no adherence to a given breed, on a given farm or in a given neighborhood, the sole purpose seeming to be attained when a calf of some kind arrives and the cow freshens. These observations are only too abundantly verified by a visit to the farm districts anywhere in the State. Almost without exception one sees in barnyard and pasture cattle of the most promiscuous breeding, or rather no breeding at all. A single herd will often show cows that are of a solid red, or they may be black and white, red and white, or blinded, many of them, however, showing traces of Shorthorn, Holstein, Jersey, or even Hereford or Angus Blood. This low condition of the breeding interests is costing the Wis-

consin farmer millions of dollars annually.

While the cows of our farmers have been promiscuously bred, they still possess many good qualities, and most fortunately, can be successfully used in any advance movement which may take place in the future. We have a foundation to build on.

On the institute platform, in the dairy paper, and at the college, much has been said about the Holstein, the Jersey, the Guernsey, and the other breeds of dairy cattle. A great part of this exposition has fallen on barren ground. The average dairyman has come to think and act upon the basis that the breeding of pure bred, registered animals is a specialty, to be followed by a few persons only; that the whole subject of breeding is something beyond him, or at least entirely out of his sphere.

These farmers, in many cases, have not had it impressed upon them, as it should have been the vital fact that good grade cows of any of the dairy breeds produce practically as much milk and butter as do pure bred, registered specimens of those same breeds. This is the one vital fact for the great mass of farmers that patronize our creameries and cheese factories. We must endeavor more forcibly and explicitly than ever before to impress this upon their minds.

To this end, all friends of dairy advancement in Wisconsin should work together in urging upon our farmer dairymen:

1. That they use only pure bred, registered sires of the dairy breeds.

2. That they at once set about grading up the herd, generation by generation, until in looks, quality, productiveness and profit at the pail, the cows equal pure bred and registered stock.

3. That all the farmers in any given neighborhood use sires of one breed, and the larger this district the better.

4. The cause will be greatly advanced by those who have small herds of cows combining and jointly purchasing a registered bull. When he has been used two or three years he can be passed over to another group of dairymen in the neighborhood.

With the adoption of the practice of using only pure bred sires of one breed in a given neighborhood or region, we will find dairy advancement rapid and abiding, and the farmers taking new interest and pleasure in their vocation, because:

1. All the animals in all the herds of a given neighborhood will resemble one another in size, form, quality, markings, and dairy characteristics.

2. Because of uniformity in so many points, there will be neighborly rivalry, since individuals in the herd, and different herds, can be easily compared with one another.

3. Buyers from near and far will visit neighborhoods breeding but one kind of grade dairy cattle to get what they want and their coming will make sales brisk and prices good.

Almost without exception, Wisconsin dairymen can produce more roughage or coarse feed on their farms than their cows can economically consume. Many farmers cannot provide milkers for all the cows they could otherwise keep because of the help problem. As a consequence some dairymen try to raise steer calves, or feed steers to consume the surplus roughage. To properly fatten a steer requires a hundred bushels of shelled corn, or equivalent of other grain. The Wisconsin farmer seldom raises grain enough for more than his dairy herd, his hogs, etc., and so is not in position to properly fatten a bunch of steers. Steers of the dairy breed always sell at a relatively low price, whether stockers, feeders, or when fattened.

If the dairy farmers in a given neighborhood will combine in an intelligent, co-operative way, on one breed of dairy cattle, and use only good, registered dairy sires, the cattle of that region will soon come to be widely known and there will be a steady and remunerative demand for all of the cows, heifers and heifer calves not needed to maintain the herd. By saving all the good grade female calves, the excess roughage of the farm can be profitably fed to such, and they can be disposed of at prices

equal to or better than that commanded by beef bred steers of the same age, and all this without the heavy feeding of grain, such as is demanded in fattening steers.

Wisconsin is the best State in the Northwest for a combination of dairying and the production of pure bred dairy stock by specialities, and the production of fine, high quality grade dairy cows by the great class of creamery and cheese factory patrons. There should be a combined effort of all the agricultural interests in the State favorable to dairying, to impress upon our farmers in the most forcible manner possible the importance of using only pure bred dairy sires and of neighborhood co-operation in having cattle of only one breed.—Hoard's Dairyman.

INFORMATION WANTED.

A trainer and driver, who owns one of the best trotting bred stallions on this Coast, would like to communicate with some one who can suggest a good location for the stallion during the season of 1908. Address
GEO. T. ALGEO,
P. O. Box 35, Irvington, Cal.

"SAVE THE HORSE" Registered U. S. Patent Office SPAVIN CURE

TO THE WINTER QUARTERS FOR THE BEST CURE, FIBROSIS, BLEMISHING AND THE USUAL METHODS ARE UNCERTAIN AT BEST; THEY MEND INVARIABLY FOR THE MOMENT ONLY.

Don't take chances, use "SAVE-THE-HORSE." Don't think you are experimenting; write for copy of contract and information; read what it has accomplished for others; it will positively do the same for you.

71 Fisher Ave., White Plains, N. Y.—I cannot speak too highly of your "SAVE-THE-HORSE." I had a gray mare eight years old, born with a ringbone, and that is something wonderful to say. I bought her two months ago dead lame, given up by all the horse doctors. I paid \$105 and since have refused \$400. Any time you want to send anyone to me I will be only too glad to show what your treatment has done for her.

JNO. W. SULLIVAN.
Office of Jacob B. Perkins, 39-40 Blackstone Building, Cleveland, Ohio—

I purchased a bottle of "SAVE-THE-HORSE" from Strong, Cobb & Co. and went to work. My colt had two small lumps under his jaw, the result of distemper. I treated them with "SAVE-THE-HORSE" and they disappeared.

JACOB B. PERKINS.
Inter-State School, Inc., Cedar Rapids, Iowa—

Enclosed find purchaser's acknowledgment of one bottle "SAVE-THE-HORSE," contract No. 31502. I have no complaint, all my spavins and curbs are gone.

PAUL F. DOLAN, care Fire Dept. Scotch Line, Ontario—

Some time ago I bought one bottle of "SAVE-THE-HORSE" from Lyman & Sons, Toronto. Applied for splint, which has disappeared entirely.

JOHN O. ALLAN.

"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

BinOne
is used and recommended by the largest fire-arm manufacturers in America. Experienced gun users everywhere say it is the best rust preventative on earth—on water, too.
Being a light oil it enters the pores of the metal and forms an impenetrable covering that is moisture-proof without making the gun sticky or greasy to handle. Best for oiling the fine mechanisms of the finest gun, because it does not dry out, gum, harden, turn rancid, collect dust, etc.
Sample, G. W. Cole
Free Company.
102 New St., New York, N. Y.

The famous cartoonist, Homer Davenport, has purchased the Arabian steed, Masoud, and has signed with General John B. Castleman of Louisville for an endurance contest with the latter's Carolina from the Pacific to the Atlantic. Carolina is a fine specimen of the Kentucky saddler, noted for her stamina and a majority of cavalry officers believe she will easily win and this is our opinion. This transcontinental go-as-you-please race is to be held next spring. The start will be made from Portland, Oregon, probably in March, and the Oregon trail, hazed and cleared by Lewis and Clark, is to be followed as closely as possible to St. Louis. At the latter city the riders will strike the old National road and will go over it into Washington. A similar contest was arranged about a year ago, but the Arabian which Davenport had entered became ill and was withdrawn.—Rural World.

Exhaustive experiments have been conducted to ascertain the proper amount of hay which should be fed to a horse doing ordinary farm work. The horses keep in better health and spirits, and in fully as good flesh when fed only one pound of hay for each 100 pounds of weight, this amount being not for one feed, but the entire daily ration of hay. Thus a 1,200-pound horse should receive twelve pounds of good hay a day. A larger amount seems to make the animals more lazy and sluggish, without producing any apparent gains in weight. Now, we know that most farmers feed fully three times this much hay to their horses. The farmer or his son will fill the manger in the morning before breakfast and usually twice more during the day and we have known farmers to feed as high as fifty pounds of alfalfa daily to a common 1,200-pound plug. The stomach of the horse is small, requiring that a large proportion of its food be in a concentrated form, and when we interfere with the plans of nature and try to feed the horse on the same plan that we do steers, the stomach of the horse and the pocket-hook of its owner will be the loser.

A cement feeding-floor comes pretty high in the first place, but it will pay for itself in a saving of feed:

Corn, alfalfa and clover pasture will lay fat on pigs about as fast as anything else that grows.

"LOOK FOR THE BIG RED W"

THE big red W is the connecting link between the consumer and the makers of Winchester goods. Over a year ago we adopted this safe-guarding trade-mark and since that time every box, carton and package put out by us has borne the big red W, the hall-mark of goods as perfect as brains, experience and ingenuity, coupled with a modern and complete plant, can make them. Our object in adopting this trade-mark was to make it easy to distinguish Winchester goods from other makes, which equal them neither in quality nor reputation, and thus protect you and protect ourselves. We have done our part. Will you do yours by looking for the big red W whenever buying anything in our line? The big red W is to guns, cartridges and loaded shells what the word "Sterling" is to silverware the world over. For your own protection we again ask you to "Look for the big red W"

Money Divided in Each Stake, 50, 25 15 and 10 Per Cent.

Entries Open to Sonoma, Napa, Lake, Mendocino and Marin Counties.

\$2.50 to Nominate Dec. 20, 1907; \$2.50 April 1, 1908; \$5 July 1, 1908; \$10
starting payment, payable ten days before race.

The race for two-year-olds will be mile heats, 2-in-3, and for three-year-olds,
3-in-5. Entries must be accompanied by entrance fee. Failure to make any
payment forfeits all previous payments. Right reserved to declare off or
re-open these stakes in case the number of entries is not satisfactory to Board
of Directors. Address all communications to

F. S. TURNER, Secretary, Santa Rosa, Cal.

Agents and Correspondents Wanted Every-
where for The Breeder and Sportsman

New California Jockey Club

The California Futurity Stakes for 1909 and 1910

Entries to close December 31st, 1907

THE

CALIFORNIA FUTURITY

With \$5000 Added

To be Run at the Fall Meeting of 1909

For foals of 1907; \$10 entrance; \$25 unless struck out by December 1, 1908;
\$50 unless struck out by August 15, 1909; \$150 to start; \$5,000 added, of
which \$1,000 to second and \$500 to third; 15 per cent of the stakes to the
nominator of the winner; 10 per cent to the nominator of the second horse,
and 5 per cent to the nominator of the third horse.

Winners of two sweepstakes or one of \$5,000 value to carry 4 pounds extra;
of three or one of \$7,000 value, 7 pounds extra. Non-winners of a sweepstakes
allowed 3 pounds, and if such have not won four races, 6 pounds; maidens,
9 pounds. By filing prior to December 1, 1908, with the New California Jockey
Club an accepted transfer of engagement in this event, accompanied with all
forfeits to date, the original subscriber will be released from any further
liability.

SIX FURLONGS.

PERCY W. TREAT, Secretary

THE

CALIFORNIA FUTURITY

With \$5000 Added

To be Run at the Fall Meeting of 1910

\$10 each for mares covered in 1907; \$25 each for the produce of such mares
unless struck out by December 1, 1909; \$50 each unless struck out by August
15, 1910; \$150 to start; \$5,000 added, of which \$1,000 to second and \$500 to
third; 15 per cent of the stakes to the nominator of the dam of the winner; 10
per cent to the nominator of the dam of second horse and 5 per cent to the nomi-
nator of the dam of the third horse. Winners of two sweepstakes or one of
\$5,000 value to carry 4 pounds extra; of three or one of \$7,000 value, 7 pounds
extra; non-winners of a sweepstakes allowed 3 pounds; and if such have not
won four races, 6 pounds; maidens, 9 pounds.

If a mare nominated drops her foal before the 1st day of January, 1908, or
if she has a dead or more than one foal, or is barren, the entry of such mare
is void. By filing prior to December 1, 1909, with the New California Jockey
Club an accepted transfer of the produce, with its engagement in this event
accompanied with all forfeits to date, the original subscriber will be released
from any liability as to the engagement of the produce.

THE WEEKLY

BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE.

SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

THE HOLIDAY SALE, which Fred H. Chase & Co. advertise to take place at their big Valencia street pavilion on Monday evening, December 23d, is attracting a great deal of attention, and promises to be one of the largest attended sales of trotting bred horses ever held in San Francisco. The wonderful result of the Old Glory sale at New York recently, where a thousand horses averaged over \$425 each, and the remarkable success of the two big sales of standard bred at Chicago and Indianapolis, has aroused buyers to a realization of the fact which the harness horse journals have been asserting for the past three years, that a shortage exists in the supply of standard bred. If the supply of horses was equal to the demand, prices would not have been so high during the recent New York sale. And this demand is bound to continue for years to come, and in the opinion of those best posted will never again fall off. The big horse breeding farms like the big cattle and sheep farms, are becoming less numerous every day. The cutting up of the great ranges and the increased value of farm property all over the country has made the keeping of large hands of cattle and horses less profitable than in former years, and the small breeder is now having his innings. The markets of the future must be supplied from the small farms, and the small breeder will find that the high prices will only be paid for the best. It will pay every farmer to own a few well bred mares and to patronize the stallions that sire style and speed. The day of purchasing run-down horses at sales and feeding them for the market has arrived in the East and will reach this Coast before long. Such a condition never existed when the big ranges were able to send fat stock to the sales by the train load. The prices of driving horses have not felt the money panic to any extent East or West. Horses are in demand for business and the supply fails to keep pace with the procession. At the holiday sale, one week from Monday evening next, sixty-one head are to be offered, and we can say with the utmost candor that a better bred, better looking or sounder lot of young horses has never been offered in this market at a combination sale. The best trotting and pacing blood in California is represented. There are mares, stallions and geldings by such sires as Hart Boswell, Mendocino, Regal Wilkes, Monterey, Washington McKinney, Geo. W. Archer, James Madison, Marengo King, Searchlight, Arner, Boodle Jr., Daedalion, Gossiper, Cassian, Stam B., Alta Vela, Steinway, Del Oro, Nutwood Wilkes, Iran Alto, Chas. Derby, Arthur Wilkes, Athadon, Nushagak, Diablo, Azmoor, Easter W., Excell, Sable Wilkes, Blue Dawn, Rey Direct and others, and they are from well bred mares in nearly every instance. Those who need good business or track horses, or have a place to keep a well bred broodmare, should not miss this sale.

Bingen 2:06½, measured by the commercial standard, is as great a sire as when judged by the speed standard. Twenty of his offspring, in the recent sale at Madison Square Garden, brought \$31,350, an average of \$2,567. Todd 2:14¾, at \$30,000, accounted for more than one-half the total, but there were eight others that brought more than \$1,000 each. Three were yearlings, four were two-year-olds and four were three-year-olds. Only five had public records. It is said that in the last three years fifty-four of Bingen's offspring have been sold for more than \$140,000. The horse is now fourteen years old.

THE SUBJECT of our illustration this week is the eight-year-old trotting stallion Todd 2:14¾, that topped the Old Glory sale at New York on Thanksgiving Day, bringing \$30,000 in cash and going to the bid of William Bradley of New York, who will place him at the head of his stock farm in New Jersey. Todd took his record as a two-year-old when he won the Kentucky Futurity in 1901. He is a brown stallion and was bred by the late J. Malcolm Forbes of Boston. Todd is by Bingen, a grandson of Electioneer, while his dam is by Arion 2:07¾, a son of Electioneer. The second dam is by Director 2:17, and the third dam the great broodmare Aloha, a mare bred by Hancock Johnson of Los Angeles, sired by A. W. Richmond and out of a mare by Crichton, a thoroughbred son of imported Glencoe. Todd, at eight years of age, has already proven himself a great sire. He is the sire of Cochoato (3) 2:11½, winner of Hartford Futurity; Kentucky Todd (3) 2:08¾, winner of Kentucky Stock Farm and Western Horseman Futurities; Douglass (3) 2:12¼, winner Hartford Futurity, and many other colts and fillies that have shown marvelous speed in races and trials. Five Futurities have been won by his get, and his services will be greatly in demand for years to come. A remarkable thing in relation to his pedigree is the number of California bred horses therein. His paternal grandsire, May King, and his maternal grandsire and granddam were all bred in this State.

J. D. Carroll of New York, whose forecasts of changing conditions in the horse market have come true with almost startling regularity during the last two years, now predicts for next season the greatest spring trade New York dealers have ever known in horses of all types used for business purposes. To dealers who are just now doing next to nothing this seems at first blush like an iridescent dream, but the man who in ten years has made the Fiss, Doerr & Carroll Horse Co. the largest concern of its kind in the world is, as usual, not dreaming, but reasoning. Asked what caused him to take so rosy a view of the near future in the trade, Mr. Carroll said the other day: "I have been around the Twenty-fourth street market all my life, and I never saw before so much sudden liquidation among big and little concerns that work horses as there has been this season. Everybody seemed to think that 1893 had come again and there was a regular stampede to sell horses, wagons and equipment of all kinds at our auctions. I venture to say that never in the history of New York have so many business horses been thrown on the market as in 1907, and especially in the last three months. Now that things are picking up as fast as they went down, and people are finding out that it was a false alarm, all these concerns are beginning to realize that they will soon have to replace the horses they were in such a hurry to sell. That is the extra trade I am counting on to make the horse market hum next spring. Nothing can hold it back but a serious business depression, and how are you going to have a serious business depression when farmers all over the country are prosperous, are gathering good crops again this year and getting the highest kind of prices for them? If you think the farmers are not prosperous and independent, too, just go out among them once and try to buy their horses."—N. Y. Herald.

William Higginbottom, the well known live stock auctioneer of this city, sold about 150 mules and horses at Fresno last Saturday for E. C. Buchanan of the Star Horse Market. They averaged over \$125, and the sale was a good one. Mr. Higginbottom will act as the auctioneer for the Stewart sale at Woodland next week, and will also sell a lot of work horses for E. C. Buchanan at Chico. Mr. Higginbottom's services are in demand, and he is on the go all the time.

Matt Zahner is now living at Los Angeles and has the old champion Waldstein with him. Mr. Zahner went to Los Angeles from Humboldt county for his health and has not yet decided just where he will stand Waldstein, but somewhere in that vicinity. By the great Director and out of a mare by the great Electioneer, Waldstein still holds the five-mile stallion trotting record of 13:05½, made in a race in 1892. He has sired quite a long list of fast ones since then, and is still a strong, vigorous horse.

AROUND SOLANO.

They breed race horses at Dixon, enter them in stakes, break and give them their early education over a good half-mile track, and send them out ready to meet all comers. Lou Mativia is there with the guiding hand, and when he says they are of the right caliber they seldom disappoint. He has a few in training now that makes one want to own them, including Alton, the handsome black stallion by Altamont, that won a half-mile race in 1:05 over this half-mile track last May. He also has a handsome and speedy two-year-old gelding by Jules Verne, out of a Robert McGregor mare, and a yearling filly by Nushagak, out of a mare by Antevolo, that is a Futurity candidate.

Deoro, a two-year-old chestnut stallion by Demonio 2:11¼, out of Hanoro, by Oro Wilkes 2:11, second dam the dam of four, and third and fourth dams producers, is a colt of great beauty, a rich chestnut, in color, compactly built and well turned. He looks like a stock horse, and is strongly bred in trotting lines. He will hold court to a select few this spring.

E. D. Dudley will race McFadyen (2) 2:15½ the coming season, but will have his royally bred stallion Palite in the stud at his farm, near Dixon. Palite should be well patronized, as he is by Nutwood Wilkes, out of Palita (2) 2:16, by Palo Alto 2:08¾, and has plenty of speed and substance. Three growthy weanlings make up the list at the Dudley farm, and at this breeding place entering in stakes is not overlooked.

J. W. Marshall, another breeder and farmer close at hand, that firmly believes in sowing good seed in early closing stakes, has named a weanling by Demonio, one by Zolock and another by Star Pointer very liberally, and they will be given a chance to come through. Mr. Marshall recently bought the mare Bernice by Owyhee 2:11, out of Bertha, the greatest broodmare in California. Bernice worked a mile in 2:13 this year as a four-year-old, and along with Mona Wilkes 2:06½ will be sent to Fred Chadbourne for the 1908 campaign. These mares are a nice pair for any one man to own. What a mare Mona Wilkes would make for the New York speedway. She has all the qualities of a fine roadster, and where is the pacer that can brush faster? She is out of the dam of the great Aerolite, whose mile in 2:05½ as a three-year-old last September was one of the year's sensations.

Prof. Heald 2:24½, winner of the Stanford Stake of 1906, will make a light season this spring and will then be trained at the Vallejo track, along with Margaret Hunt, a full sister, that show slots of trot as a three-year-old. These two are by Nutwood Wilkes, and out of Daisy S., the dam of Vallejo Girl 2:16¼, Tom Smith 2:13¼ and others.

Gen. J. B. Frisbie and Constructor, two full brothers to Tom Smith 2:13¼, by McKinney 2:11¼, and both qualified to get speed, style, size and good looks, having these qualifications themselves, will be at the stables of Thos. Smith at Vallejo during the breeding season of 1908.

Demonio 2:11¼, a game race horse himself, is not only the sire of game race horses, but his colts run uniform in conformation and soundness. He has been at the head of the stud at Rush & Haile's Stock Farm, Suisun, and is greatly appreciated in that locality.

At eleven Old Glory horse auctions held since 1897, 9,612 trotting bred horses have been sold for \$4,100,912, an average of \$427, or \$45 above the mean average of eleven years' sales. By comparison with last year's record the average price in 1907 was higher by \$49 on every horse sold.

Joe Cuicello sends us word that an accident has happened the black gelding by Dexter Prince, which he catalogued as No. 17 in the Chase holiday sale, and he substituted for him a three-year-old gelding by Bonnie Direct 2:05¼, dam Electress Wilkes 2:28½ the dam of Lady Mowry 2:09¼, by Nutwood Wilkes. This three-year-old is nicely broken and an excellent prospect.

George Starr is not going to Russia. He intends to train a public stable at Cleveland next season.

AT PLEASANTON TRACK.

Joe Cuicello is working a stable of twenty head. In the bunch is a nice looking sorrel mare by Prince Nutwood that has been a mile in 2:22½, last quarter in 31½ seconds. The black filly Grace Zolock has developed into a slabbing big three-year-old and is rounding to very fast after a six months' let-up. A three-year-old pacer by Sidmoor, that with fifty days' work stepped a mile in 2:22 and came the last quarter in 31½ seconds—the kind Joe likes to train. Another green over there that looks like he might do is a coal black stud five years old by Prince Nutwood.

J. S. Phippen has a stable of eighteen; all looking well and taking their work in good shape. In fact, all the trainers at the track have been pushing everything but the old campaigners, as a wet track and slower work is overdue. Debutante, the Kinney Lou three-year-old filly, that divided fourth money in the Breeders' Stake this season, will develop into a grand looking mare, and trainers say she will be a sure trotter. Alto Kinney is another sound young trotter in Mr. Phippen's string that with a bang-up third in 2:14½ this year looks like the kind to get ready for early racing next season. The gray gelding that is bred and shaped considerably like Anaconda 2:01¾ will be given another chance to make good, as he showed plainly that he had speed this year.

Dick Ables is "going easy" with a stable of six, being especially careful with the big yearling by Kinney Lou 2:07¾, out of the dam of Lady Mowry 2:09¼. They are all the property of Mr. Frank J. Kilpatrick.

Kinney Lou 2:07¾ is right now looking his best for C. C. Crippen, but still there is a little soreness from the car jam in the shipment from Indianapolis to Phoenix. Since the facts are known, this horse surely went a wonderful mile at Phoenix, after all. The last work that was given him and Kinney Al 2:14½ at Indianapolis was very satisfactory. Kinney Lou worked three miles that day better than 2:10, and one faster than his record. Kinney Al showed that the horse that heat him would have to step around 2:12. By next work day the track was too heavy, and arrangements was made to ship to Phoenix in order to be well rested up. But while their car was laying on a siding at Herrington, Kas., a carload of stone "dropped" on that siding that nearly put them out of business. Kinney Lou faring the worst of all; so much so that one mile in 2:18½ and a few around 2:30 was all the preparation that could be given him for his effort to lower the Phoenix track record. Kinney Al's showing in his first and only race over the Phoenix track was most satisfactory, and is evidence of what may be expected of him next year. Mr. D. Shelleburger of Decatur, Ill., gave as a present two handsome standard bred colts to his daughter, Mrs. T. H. Ramsey of Red Bluff, Cal. These mares were shipped West in Crippen's car, and later accompanied Kinney Al to Mr. Ramsey's farm, where they will be bred to this promising young trotter.

P. W. Hodges has a stable of five and expects to take up several more in a few days.

Henry Helman is working twelve, but his star trotter Berta Mac 2:13¾ is enjoying just exercise with plenty to eat. A very promising trotter in this bunch is a four-year-old mare by Zombro 2:11, that Henry brought down from Cathlamet, Wash. A green pacer owned by a gentleman in Butte, Mont., is also doing nicely—been a mile in 2:11½—guess that will do. A two-year-old trotting filly that can step a 2:40 clip, sired by Caution, out of a mare by Alexis, looks good to Helman. His good colt Baron Bowles 2:25 wasn't out of the money in several starts. He carries the blood that makes trotters. Henry brought another stud to this country that will be appreciated by Western breeders—the two-year-old by Jay Bird, first dam Alma Wilkes by Baron Wilkes, second dam Almata by Almont 33, third dam Alma Mater, dam of Alcantara, Alcyone, etc., and not only this, but is built right and looks like a stock horse.

The joke horse turned up in Helman's stable in a colt owned by A. P. Church, the "easy going" blacksmith. Church showed himself to be no common trader by buying two from the pasture of Mr. Rouan, and then "sparing" the bad one to a friend for the price of the two. At that, the bunch thought the smithy couldn't see very well, but he decided to work the colt. All the same, Bonnie Antrim is now a slick going pacer and shows the laugh to be on the other end. Church says he is now ready to be installed president and treasurer of the south savor-soft-saying society that meets regularly at Ronan's tavern.

Charles De Ryder's stable numbers eight. Wild Bell 2:08¼ looks fully as good now as he did before shipping East last spring. At that, a rest will do him good, and it is safe to predict that he will hang up new figures opposite his name next season.

Argot-Boy 2:03¾ at Phoenix clipped his record just a little, and incidentally set a new mark for west of the Mississippi. After a winter's rest in California this gelding that is still sound as a bell will surely be a race horse in his class.

Cbarley T. is growing new hoofs forward, and promises to be sound for 1908. This is good news, for he is another California production that can get the money on the other side.

The full sister to Perfection is going along nicely—a mare in 2:19, last quarter in 33 seconds looks good in December. De Ryder has another prospect that

can step about. A three-year-old stud called Odd Mark, by Cyrus Mark, been a mile in 2:15. A four-year-old mare by Washington McKinney also shows to be a decent kind of a trotter by stepping a mile in 2:35. A half in 1:13 and a quarter in 35 seconds is easy for her.

Mr. De Ryder did something for himself, for the breeders in this country and for Star Pointer 1:59¼, when by becoming a member of the American Association of Trotting Horse Breeders, and donating one service fee, every one of the Star Pointer foals of the year are eligible to the Matron Stake, and also to the Stallion Representation Stake, which will be worth no less than \$50,000. This kind of business is good advertising. Another good showing for Western bred stuff was an offer of \$1,000 for the colt by Star Pointer, still at the side of the dam of Aerolite, and the passing of three weanlings under the hammer a few weeks ago at \$360 and \$400 each.

Southerland & Chadbourne have a stable of fourteen. Aerolite 2:11¼ looks big and fat. He is the kind that don't tuck up if he has enough to eat, and miles around 2:05 can come pretty fast at that. By the way, two good producing mares are in foal to this horse—Bertha, the dam of four in 2:10, and Cricket 2:10, by Steinway, that is the dam of six in the list. All the horses in this stable are looking fine, especially McFadyen (2) 2:15½, and John R. Conway 2:09, that is always hard after the money.

Mr. Andrew Robertson will take to Australia Marvin Wilkes 2:12½, a yearling stud by Zolock and a yearling stud by Kinney Lou, also several mares.

Barney Simpson has three that he is giving some work, and will soon make arrangements for the stud season of Arner 2:17¾. A black filly by this horse, out of a mare by Direct, can show two-minute speed.

Henry Brown has Helen Keys, Walter K. and Cola Direct all looking good and showing plenty of step for this time of year.

Ed Parker has two weanlings by Bon Voyage (3) 2:12¾ that please him very much, especially one out of Myrtha Whips. Ed may consign Little Rey to the Blue Ribbon sale at Cleveland, Ohio, this spring.

S. K. Trefry is working a three-year-old by Stam B. 2:11, also Kenneth C. 2:13¼, and says two is enough for any one man.

William Brown has a five-year-old by Silver Bow that has been a quarter in 31 seconds; a nice looking two-year-old by Sidmoor and a four-year-old pacer by Diablo that can brush fast.

Thomas Ronan has up eighteen head. Several in this lot show very fast and all are large and the kind that would sell on looks alone. Mr. Ronan recently brought several head down from Walla Walla, Wash., including a fine looking three-year-old stallion by Arnonax, that should be a grand stock horse for somebody.

J. R. FRONEFIELD.

MATINEE AT PHOENIX.

The matinee given by the Phoenix Driving Club on Thanksgiving Day was a flattering success. Several hundred people were in attendance.

The entertainment was a good one, the races in the main being closely contested. The special buggy race class failed to fill, and it is presumed that either the drivers or the horses got cold feet. It was rather unexpected, too, for it was a warm, bright sunshiny afternoon. But the sport was all right, even without the buggy races and nobody regrets the time spent. Ed Hall served as starting judge and the races judges, who also served as timers, were A. L. Moore, W. W. Cook and Dr. Ramsey. The races were all half-mile heats, most of the horses being young stock and hardly old enough to be put to the strain of mile heats, where they were likely to be frequently repeated.

The first race was the 2:14 trot, in which there were two entries, the Davidson mare Dell Net and Frank Anderson's Burnut, a California horse brought there for the fair meeting and sold in the stock pavilion. Burnut took the first and third heats and Dell Net the second heat, making a nice contest all the way through. The time was 1:15½, 1:14½ and 1:13½.

The next race was styled the 2:40 trot, and it was given a slow name, for it was finished in two heats, and both of them were well under the class time. The heats were both finished in the same order, Maydello first, Lady second and Princess third. The time was 1:17½ and 1:16½.

A mixed race followed that was quite closely contested, and unlike the one above it, was named faster than the speed would indicate, being called a 2:25 race. The time though, was 1:28½, 1:27½ and 1:25. The first heat was taken by Candy Babe, driven by Harms, with Willie Amber second and Chella third. In the next heat the outside horse, Chella, secured the pole and took the candy from Babe, which finished second, with Willie Amber in third place. In the third heat Candy Babe got back to the lead place under the wire, with Willie Amber last and Chella in the middle rank.

The fourth race was a 2:29 trot, won in two straight heats in 1:20¼ and 1:23. It was a great day for L. M. Hoghe, for the star performer was Hamburger Oh So, who got rattled during the fair and only yesterday got into good lively action. Both heats were finished in the same order and in a direct reversal of the order of their names on the card, Hamburger Oh So first, Margaret A. second, El C. J. third, Punch the Breeze fourth.

RACING AT CORONADO.

The San Diego Driving Club held a Thanksgiving matinee, at which three races were decided. The first event was for colts four years old or under, mile heats, best two-in-three. The entries were: Woodlock, owned by Robert Green of Escondido, and driven by Fred Fanning; Ebony W., owned by L. E. Dadmun, and driven by John Sampsell, and Ted S., owned by Chas. Hakes, and driven by Joe Strathman. None of these horses were ever driven in a race before, and were never worked for over a half-mile at a time. Woodlock won in straight heats. Time, 2:41, 2:43.

There were three starters in the second race also—Dick Pogi, owned by Joseph Pogi, driven by John Sampsell; Fox S., owned and driven by Chas. Stewart, and Dewey, owned and driven by Joseph Strathman. Dick Pogi won in 2:30 and 2:30½.

A mule race finished the program. It was gotten up for laughing purposes and was a success. The racers entered were John Douglass, driven by Joseph Strathman; Maud S., by George Combs, and the famous pacer Dan Patch (?), driven by John Sampsell. It was a walking match for the first quarter, the remaining three-quarters to be covered in a gallop, trot, pace, or any old way, just so they got there. John Douglass was the best walker, and he gained a good lead as the three went hiking down the track, amid the roars and yells of the spectators. However, all three were even up on the back stretch, going at an easy gallop, but on the home stretch it was a wild race as the three tore up the dust. John Douglass won, with Dan Patch second and Maud S. third.

The officials of the day were as follows: Judges, H. L. Weston, Will Rea and Stephen Brown; timers, W. V. McConnell, W. H. Phillips and E. Pidgeon; starter, H. L. Weston.

THE FAIR CIRCUIT FOR 1908.

It will very soon be time to take up the initial fair work for 1908. The important part of the work falls to the secretary. It is his part of the work to study out and make plans for next season and be ready to submit the same to the officers at the annual meeting. Right here it might be well to urge the importance of holding annual meetings as soon as possible after the year's business is closed, which gives more time to mature plans for the coming year. The other officers should give the secretary their hearty co-operation and support. The secretary should be active and prompt in every way, as much depends on how capable and well he fills the important office. Where race meetings and county or district fairs are conducted by county fair associations the work of the secretary differs to a great extent from the work of the secretary who merely has a race meeting alone to look after. But so far as the speed departments are concerned the work does not differ. The main proposition in the speed department to consider in time is the stakes and purses to be given, and the selection of classes so that satisfactory entry lists may be secured. In order to do this the secretary should devote some time to the study of the race results of 1907 and familiarize himself with the probable number of horses in the territory from which he expects entries, that are eligible to the various classes, and, as far as possible secure as much information as possible from drivers, trainers and owners as to the number of green starters.—North Pacific Rural Spirit.

PLANNING A CIRCUIT.

Says the Napa Register: Geo. W. Berry, the efficient superintendent of the Spreckels Stock Farm, is planning to build a new race track near Napa in a short time. It is believed that a site for the track can be obtained along the west side of railroad, south-east of Napa, which will be convenient and accessible and with good shipping facilities. Mr. Berry is now conferring with A. B. Spreckels on the matter. The plan includes the proposition of organizing a circuit for trotting, pacing and running races, to comprise tracks at Santa Rosa, Napa, Petaluma, Vallejo, Sacramento and Stockton.

An agricultural association would be organized at Napa to consist of eighty representative citizens, who would not be expected to invest financially in the association so much as to take an active interest in it and support it in the community. Mr. Berry expects to build a modern track with first class grandstand, judges' stand, paddocks and other features. The best horses in the State and the East would be brought to race on the Napa track, as the owners would have an extensive circuit on which to race the animals.

A PRIZE WINNER.

D. E. Morlock, Morrilton, Ont., writes November 14, 1907: "Your letter at hand. I think Absorbine the best remedy I have ever used. Have a fine yearling carriage colt that got a bog spavin a few days before Guelph Show. I used Absorbine as directed from four to six times a day, rubbing it in well, and inside of a week you could not tell which leg was hurt. She carried the red ribbon at Guelph and at four other shows after the cure. Whenever I hear of a neighbor having trouble with his stock I hand one of your pamphlets or advise him to get Absorbine, and quite a number are now using it around here."

Absorbine penetrates to the seat of trouble promptly and effectually without blistering or removing the hair. Does not require the horse to be laid up. Mild in its action, but positive in its results. It will give you satisfaction. \$2 a bottle at druggists. Manufactured by W. F. Young, P. D. F., 54 Monmouth St., Springfield, Mass.

NOTES AND NEWS

Stake No. 8 of the Breeders' Futurity has broken all records.

The list of entries is the largest in the history of the Stake.

The full list will appear in our holiday issue, out next week.

Mr. Andrew Robertson of Melbourne has purchased about a dozen head of standard bred horses and will ship them to Australia some time during the latter part of this month.

Hans Frelsson, the well known trainer, who sold his stables at the Casino to Frank Burton, intends building a new stable on Thirty-ninth avenue, near the proposed new stable of the Park Amateur Driving Club.

The owner of Sterling McKinney 2:09 $\frac{1}{4}$ expects to beat all aged stallion records, except that of Crescens 2:02 $\frac{1}{4}$, with him next season.

The Occident Stake of 1910, which is for foals of 1907, to trot as three-year-olds, will close for entry on January 1, 1908. Make your entries with Secretary J. A. Filcber, Sacramento.

Dan Patch will be in the exhibition business again next year.

Oliver H. Barr has purchased the bay mare Tuna 2:08 $\frac{1}{2}$ by James Madison, dam Ituna. She will probably be driven to pole with Czarina Dawson 2:11 $\frac{1}{4}$.

A feature of the New York sale was the absence of John H. Shults from the ranks of buyers. For a dozen years he has been nearly always the heaviest buyer at the auction.

The average of the entire Old Glory sale this year was very close to \$475.

A \$10 payment will be due Thursday, January 6, 1908, on all foals to 1906 entered in Pacific Breeders' Futurity No. 6. See advertisement.

The sales for Thanksgiving Day at the Old Glory sale totaled \$15,050 for 117 head, an average of nearly \$1,300 each, which is the record for any one day at any one sale ever held at Madison Square Garden.

Forest W. 2:14 $\frac{1}{4}$, eleven years old, brought \$275 at the New York sale.

It is said that Ed. Geers will again have Highball 2:06 $\frac{1}{4}$ in his string next year.

Strikebreaker Jim Farley is the man who bought the California horse Admiral Togo (2) 2:29 $\frac{1}{4}$ by Iran Alto at the Old Glory sale.

Ed Geers is suffering from a cracked rib, the injury being received by falling on the edge of a bath-tub.

Three high class horses are offered for sale by H. Olsen of Haywards, who makes a specialty of selecting fine carriage and road horses for those who want good animals at a reasonable figure. Read his advertisement in this issue.

Mr. Frank M. Barrows, owner of that fast stallion and good sire Del Norte 2:08, writes us that his horses are all wintering fine. Del Norte is just like a colt. He put five new ones in the list this season—Van Norte 2:21 $\frac{1}{4}$, Idlewise 2:22 $\frac{1}{4}$, Reina del Norte (3) 2:24 $\frac{1}{4}$, all trotters, and the pacers Del McKinnon 2:22 $\frac{1}{2}$ and Hazel Norte (3) 2:24 $\frac{1}{4}$.

Bellini 2:13 $\frac{1}{4}$ leads all sires of 2:10 trotters for 1907. Three trotters by him have entered the 2:10 list this season as follows: Beatrice Bellini 2:08 $\frac{1}{2}$; Carlo 2:08 $\frac{1}{4}$, and Tokio 2:09. All three were bred by W. B. Dickerman of Hillandale Farm, Mamaronck, New York, who bred Bellini 2:13 $\frac{1}{4}$ and his dam. Probably no other man has ever lived who has bred three 2:10 trotters by one sire, bred their sire and was also the breeder of the dam of their sire. Tokio 2:09 is a full brother of Beatrice Bellini 2:08 $\frac{1}{2}$.

Boom prices were obtained for horses 2,000 years ago if we can believe old Plutarch. Alexander the Great wanted as much for his domesticated war horse as would be asked today for a high-class trotter. He offered to sell Bucephalus to Philip of Macedon for 2,518 pounds sterling, or \$12,500. This indicates the value placed upon sensational horses at the time when money was not the chief worship of mankind. Bucephalus was higher at \$12,500 in 345 years B. C., than was Maud S. at \$40,000 two thousand years later.—Ex.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

The once famous running horse Lamplighter, that won close to \$60,000 during his career, and that was once sold for \$30,000, was knocked down last week at auction in Lexington for \$100.

Allerton 2:09 $\frac{1}{4}$ is now credited with 170 sons and daughters that have made standard records, 129 of which are trotters. Only three stallions have sired a greater number of standard performers, viz: Onward, 195; Gambetta Wilkes, 192, and Red Wilkes, 176.

The Understudy is the apt name of the yearling half-sister of the Leading Lady (2) 2:16 $\frac{1}{4}$.

The sale of a yearling filly under the hammer for upwards of \$2000 whose sire though remarkably well bred is young and untried, proves that youngsters that show phenomenal speed find ready purchasers at high prices, provided they are entered in the rich stakes.

Strathmore is the only sire with two daughters that have each produced a pacer with a record below 2:04. These are Solita, dam of Citation 2:03 $\frac{1}{4}$, and Queen Ethel, dam of Bumps 2:03 $\frac{3}{4}$ (to wagon.)

The sensational two-year-old trotting colt Trampfast 2:12 $\frac{1}{4}$ is running out at Walnut Hall Farm and will be taken up again by trainer Ed. Benyon about March 1st next, and prepared for his three-year-old engagements. Trampfast has an own brother, one year older, this one being called Tramp Medium and being a larger and better made colt than his famous younger brother. He is owned by W. L. Spears, of Muir, Ky., owner of the fast pacing colt Shakespeare (3) 2:09 $\frac{1}{4}$.

M. W. Savage has had constructed at his International Stock Food Farm, Minneapolis, Minn., a covered half-mile track, for use during the winter months. The track is 30 feet in width, has 1,400 widows and cost \$17,000. Trainer Hersey and his assistants will use it extensively from now until spring, in educating the many youngsters at the farm and by such famous sires as Dan Patch 1:55 $\frac{1}{4}$, Crescens 2:02 $\frac{1}{4}$, Directum 2:05 $\frac{1}{4}$, Roy Wilkes 2:06 $\frac{1}{2}$ and Arion 2:07 $\frac{1}{4}$.

Trainer Charley Dean, of Palatine, Ill., and E. S. Cone, of Chicago, who made the New York sale together, purchased the two-year-old filly by Sidney Dillon, out of the dam of Sonoma Girl 2:05 $\frac{1}{4}$; the four-year-old pacing filly Kate Dillon (3) 2:24 $\frac{1}{4}$, trial 2:08 $\frac{3}{4}$ the past season, by Sidney Dillon, out of Roblet (p) 2:12, dam of Bonalet (p, 3) 2:09 $\frac{1}{4}$, etc., and a yearling colt by Direct Hal (p) 2:04 $\frac{1}{4}$, out of Bessie Bonehill (p) 2:05 $\frac{1}{4}$.

Adbell 2:23, the dead yearling champion, gets his first producing son in Swift Bell, a six-year-old son of his out of Tintoret 2:24 $\frac{1}{4}$, by Dictator; grandam the renowned matron Ethelwyn, by Harold. Swift Bell's representative is the two-year-old pacing colt Swiftward 2:21 $\frac{1}{4}$, a record made with only sixty days' speed education. Swiftward was bred and is owned by H. E. Robbins, Viola, Ill., also breeder and owner of Alice Redlac (3) 2:29 $\frac{1}{4}$, trotting, by Redlac 2:07 $\frac{1}{2}$, another new performer, both the pair being from the same dam, Abby M., by Game Onward.

Barney Demarest has the smallest horse in the world. It is a four-year-old stallion, standing 27 $\frac{1}{2}$ inches and weighs 47 pounds. This freak was bred in Oregon and was sired by a 1500-pound horse, out of a 1250-pound mare. It weighed seven pounds when foaled.

Brooke Nooke Ranch, Home Park, Mont., has lost by death the past autumn the trotting bred stallions Keeler 2:13 $\frac{1}{4}$, by King Rene, and Jubilee de Jarnette 2:29 $\frac{1}{4}$, by Jubilee Lambert. Keeler sired Chase 2:07 $\frac{1}{4}$, Onoqua 2:03 $\frac{1}{4}$, Warren C. 2:11 $\frac{1}{4}$, Tonita F. 2:11 $\frac{1}{4}$, etc.

Harry Thompson of Salt Lake, Utah, has purchased from the Walnut Grove stock farm at Topeka, Kansas, the trotting stallion Harriman 36101, a son of Onward 2:25 $\frac{1}{4}$ and Purple, by Stamboul 2:07 $\frac{1}{2}$. He is the sire of the four-year-old black pacing gelding Joe Harriman, that obtained a record of 2:15 $\frac{1}{4}$ at the recent Texas meeting. Harriman is eight years old.

The Hambletonian family has absorbed and assimilated several of the other trotting families, and greatly to the benefit of the Hambletonian strain, says the Horse Breeder. That it will eventually absorb all the others seems certain. One cause of this absorption is that nearly every prominent breeder of trotting stock for the past twenty-five years has had at the head of his stud a stallion that is a direct descendant in the paternal line of Rysdyk's Hambletonian. The Hambletonian strain is far superior to any other, for producing and perpetuating the trotting inclination and trotting gait. There have been other strains, however, which were greatly superior to that of Hambletonian in speed ability and other important race-winning qualities. By blending these race-winning strains with the Hambletonian strain, far better results have been obtained than could otherwise have been secured.

Twenty-nine head by McKinney 2:11 $\frac{1}{4}$ at the Old Glory brought \$13,750.

Directum is in excellent health since going to the Savage Farm. He is jogged every day, which seems to keep him in rugged condition.

Secretary W. H. Knight of the American Trotting Association has shipped his mare Fricka, by Bingen 2:06 $\frac{1}{4}$, out of Annetell 2:20 $\frac{1}{2}$, by Axtell 2:12, to Los Angeles, where she will be bred to Zombro 2:11.

Redlac 2:07 $\frac{1}{2}$ will be shipped to Los Angeles the latter part of this month, as owners Justice & Grubb of Galesburg, Ill., will have him make a spring stud season there again.

It is reported that the management of the Minnesota State Fair will not only give the regular \$5,000 purses that they have been giving, but that from six to eight other purses will be hung up, varying in size from \$2,000 to \$3,000. This will make the meeting one of the most important ones of the year.

Two California horses beat everything on the New York speedway Sunday, December 1st, when all the horsemen attending the Old Glory sale were out to see the sport. The Roman 2:09 $\frac{1}{4}$ was king of the trotters, and Don Derby 2:04 $\frac{1}{2}$ beat all the pacers.

J. M. Johnson of Ponkapog, Mass., made a neat profit when he sold Todd for \$30,000 and his dam, Fanella for \$3,725 at the Old Glory sale, as eight years ago he purchased Fanella with Todd then a weanling thrown in, for \$575.

Mike Bowerman expected to make a campaign with Sister Collette last season, but the sister to Charley Herr 2:07 got off her feed at a most inopportune time, greatly to the disappointment of her trainer. Bowerman will drive her on the road all winter and early in the spring will begin her preparation for a Grand Circuit campaign. She is a glut-ton for work and Bowerman will begin with her early. She has never looked better than she does this winter.

The horsemen of Suisun and vicinity have clubbed together and leased the old Peyton track and intend to improve it and put it in first-class condition. Carpenters are now at work putting up ten new box stalls, and in the spring ten more will be built. Trotters and pacers will be trained there and meetings may be held.

The final matinee of the Boston Driving Club was held last week and the principal attraction was a race at quarter-mile heats between the two pacers B. S. Dillon 2:14 $\frac{1}{4}$, and Rondo 2:14 $\frac{1}{2}$ for the pacing championship of the club. They had met twice before, and each had won one event. The contest resulted in a clean-cut victory for B. S. Dillon who, by the way, is a son of Sidney Dillon, and was bred at Santa Rosa Stock Farm.

Belleflower 2:12 $\frac{1}{4}$, the fastest of the produce of the great Beautiful Bells, died at Hillside Farm, Reading, Pa., November 24th. She was eighteen years old and was the dam of Flying Axworthy 2:15 $\frac{1}{4}$. She was bred at Palo Alto Farm and sold as a three-year-old to Miller & Sibley for \$15,000. She won four races as a three-year-old, taking a record of 2:16 $\frac{1}{2}$, and was second to Directum in 2:13 $\frac{1}{2}$. She took her record as a four-year-old. She has a wonderful flight of speed and trotted quarters at a two-minute gait, but became a bad actor and would make stand-still breaks that often cost her the race. She leaves a couple of foals by Axworthy and one or two by Ashland Wilkes.

A writer in Colman's Rural World says: There has been much discussion as to the merits and demerits of record or non-record animals. Many exponents of the development theory would have us believe that developed dams are the only animals to be used if a high grade trotter is to be produced. Let not the small breeder of the owner of a good mare without a record be discouraged, as many of the greatest mares in history had no recorded speed. Many of the greatest of present-day matrons have never been trained. Granted that a mare has good blood lines, the right conformation and shows a clean, frictionless gait, her chance of becoming the dam of a race horse is as good as if she had been raced to a record of 2:10, and much of her vitality sapped in the process. Study the question from all points of view and arrive at your own conclusions. It is safe to assert that the breeder will not fail, provided he is honest with himself and is not influenced by sentiment of prejudice. On no consideration use a mare for breeding purposes that the experience of breeders in the past classes as unfit. Profit by their mistakes and do not pay dearly for knowledge for which a big price in time and money had already been paid. True an animal with the right conformation, which has proven herself a race mare, provided she has not been raced until her vitality has been impaired, would ordinarily be expected to produce a faster foal than a mare equally well bred which had not been put to the test; but it is the unexpected that happens frequently the obscure sister becomes the great one.

A STAMPEDE TO BUY TROTTERS.

Many horse auctions have been held in Madison Square Garden in the last fifteen years, but it is doubtful whether during this period one was ever undertaken in the face of greater odds or conducted with greater measure of success, all circumstances considered, than the sale of trotting stock this month under the management of the Fasig-Tipton Company.

With New York the storm center of a financial scare which swept the country like a cyclone, suddenly and senselessly locking up hundreds of millions in currency and literally paralyzing business for want of ready money, horsemen were asking one another a little more than a fortnight ago whether "Ed" Tipton and "Jimmie" Tranter were showing good judgment in not taking the bull by the horns and declaring off the annual "Old Glory" sale for this season. The talk was heard everywhere that it was bound to be a failure, that fifty per cent. of the consignors would not send their horses to the auction block, and that those sent would be slaughtered. Not a few horsemen predicted that if the sale were attempted it would break down after one day, like the sale of thoroughbred horses attempted at Lexington, Ky., last week.

The last thing that anybody dreamed of was the sale of a trotter for more money than had been paid for one in New York since 1892, when E. H. Harriman bought Stamboul for \$41,000. And the next to the last thing expected was a total of \$151,550 and an average of \$1,295 for 117 horses offered on Thanksgiving Day, both the total and the average being the best on record for one day's sale by the Fasig-Tipton Company. Instead of the expected panic in the market there was pretty near a stampede to buy trotters. Prices were uniformly good and in many instances astonishingly high for high class horses. That the consignors thought so was apparent from the fact that the percentage of horses catalogued and not sold was about the smallest ever known.

To say that breeders, trainers, turfmen, road drivers and all who love the light harness horse were gratified by the result of the sale is not half the truth. Expressed in English as she is spoke, they were "plumb tickled to death." It meant to them that the trotting horse of America has a hold on the public strong enough to survive the threatened wiping out of all racetrack speculation; that John Splan was right when he said years ago that the automobile would put the horse out of business about the same time that the typewriter took the place of the piano, and last, but not least, that the country is full of people who not only have plenty of ready money, but who are getting over the sudden spasm of fear that financially the end of the world was at hand.

Clear outside the horse interests the splendid success of the sale was regarded as most significant of returning confidence in the business world. A hundred representative bankers, merchants and manufacturers at the Garden on Thanksgiving Day expressed the opinion that the pouring out of so much money for anything as much of a luxury as a trotting horse afforded unmistakable proof that apart from a bad case of "shivers" there was nothing the matter with the country.—New York Herald.

FAIR MCGREGOR AS SPECIMEN.

The University of Illinois has selected the stallion Fair McGregor as a class specimen of the standard bred trotter, and in a letter to M. T. Grattan of Preston, Minn., who bred Fair McGregor, Prof. R. C. Obrecht says most of his class pronounced the horse to be the best of his kind they ever had seen.

Fair McGregor was sired by Bay McGregor, dam by Stiles' Abdallah, second dam by Western Lad, third dam by King Herod. He is owned by J. A. Cunningham, Virginia, Ill., who bought him as a yearling from Mr. Grattan. He was foaled in 1901, is a rich brown in color, and was selected by Mr. Cunningham, who wanted a good sized handsome horse which also was a brisk, good mannered roadster. Stiles' Abdallah, sire of the dam of Fair McGregor, united in his pedigree lines to Volunteer, Alexander's Abdallah, and Gaines' Denmark. He was a big handsome horse of good disposition, whose progeny brought fine prices in the East, and the same was true of the get of Western Lad, an inbred Swigert with outcrosses to Alexander's Abdallah and the imported thoroughbred Eclipse and Glencoe.

King Herod was a beautiful Morgan horse, strongly inbred, and the best speed sire of his day in Northern Iowa. Bay McGregor was a trotter with a record better than 2:30, a big, pure gaited, strong going fellow ready and anxious to show speed at any time and in all sorts of footing. Like many members of his family, he had his likes and dislikes, and a marked antipathy to negroes was one of his characteristics. Mr. Grattan owned Bay McGregor a number of years and had a high appreciation of his many good qualities. Bay McGregor traced to Alexander's Abdallah, and his second dam was the dam of Jay Bird. Taking Fair McGregor as an example, the formula for producing a handsome big trotter would seem to be to unite lines from Alexander's Abdallah, reinforced by the blood of such fine lookers as appear in the pedigree of the stallion selected by Illinois University.—H. T. White.

Five of the produce of the broodmare Fanella :13 have sold within recent years for \$56,650.

A FINE STALLION.

When the late Dr. Finlaw of Santa Rosa purchased the stallion Washington McKinney he picked him because he was a son of McKinney 2:11¼, and a grand individual. He is a large horse, standing 16.1 and one of magnificent proportions. His dam was the great broodmare Lady Washington 2:36, by Whipple 8957, a producing son of that great early California sire Whipple's Hambletonian 725. Lady Washington also produced that very fast trotter Geo. W. McKinney 2:14½, El Molino 2:20 and Idle Gossi, with a trial of 2:25. The next dam was Lady Mayberry, grandam of Dubec 2:15, Mista 2:19, etc., and she was by Chieftain 721, sire of such good race horses of the early days as Defiance 2:17¾, Cairo 2:21 and others. Washington McKinney has other qualifications, however, besides his breeding and good looks. He is a sound horse and is a line trotter and has shown a trial in 2:22½. Then he is beginning to show as a sire. Very few of his get were ever worked or trained until the past year, when he had two very promising trotters enter the list—Lady McKinney 2:19¼ and McKinney Belle 2:30. Both these mares can trot in 2:15 and both are beauties. All the sons and daughters of Washington McKinney show fine form and style and are all natural trotters. He will make a great stock horse. He is standard and registered. He will go to the highest bidder at Chase's holiday sale, Monday evening, December 23d.

ZOLOCK'S TURF RECORD.

In the "Answers to Correspondents" in last week's Breeder and Sportsman it was stated that Zolock's name first appeared in the Year Book when he was nine years old. This is an error, due to the fact that until that year his name was spelled Zalock, instead of Zolock in the index to races given, and consequently was overlooked in hunting up the horse's performances.

Zolock first appeared as a five-year-old in 1900. He won three races that year and took a mark of 2:10½ at San Jose. The next two years he made quite heavy seasons and was not raced. He started seven times in 1903, but while he won one race and was nearly always in the money, did not reduce his record. In 1904, when he was nine years old, the Year Book got his name spelled right for the first time. That year he made a record of 2:09¼. In 1905 he reduced his record to 2:05¼ at Fresno and was unbeatable. There were no classes for him in 1906, and he was not raced. This year he was in the stud again, and not started until the Proenix meeting, when he equalled his record of 2:05¼. He is now twelve years old.

FROM OREGON.

Mr. C. A. Harrison writes that his colt North Star Pointer weighed 570 pounds at eight months, and is nicely broken to harness, and adds: "I have him at a fine place in a paddock with a filly by Lynwood W. and one by Zolock, at Hillsboro track. J. D. Chappelle has the place. Chappelle is working quite a few and has Lord Lovelace in charge.

Lute Lindsey is wintering a stable of horses in Portland. Padisha, by Keeler, is his best one. This is a pure gaited hay stallion from the Larrabee ranch. John Sawyer is at Irvington track. Some of the stalls are up, though all the place is staked out into lots, but not plowed up.

Henry Ossman is going to Vancouver, Washington, with Hal B., Oregon Patch and all his horses.

Work on the new Portland track is going on. It will be a fine plant and should be a payer, as Portland needs a good track.

ANSWERS TO CORRESPONDENTS.

W. Mastin, Sacramento.—There is a pacer called Cavaleiro 2:09½, by Stanton Wilkes, but we can find no record of a horse called Sir John 1st or Sir John 2d by Stanton Wilkes that has a record. In fact, there is no horse by the name of Sir John that has a record better than 2:10 except Sir John S. 2:04½, son of Diablo.

F. J. Bettincourt, Watsonville.—A stallion called Backman is registered. His number is 9750. He was by Leland 1300, a son of Hambletonian 10, and his dam was Miranda 2:31, by Messenger Duroc, second dam Green Mountain Maid, the dam of Electioneer. Del Sur 1098 was by The Moor 870, dam Gretchen by Mamhrino Pilot 29.

There is a gelding called McDougall catalogued in the Chase holiday sale, to be held December 23d, that deserves more than passing notice. He is a bay, 15.3 hands high and a trotter. He is good gaited, doesn't pull, is an excellent road horse and should be a good matinee performer. He is bred all right, as he is by Stam B. 2:11½, dam by Fallis, second dam by Belmont 64. He has a trial of 2:18¾, and should be looked over. He is owned by H. S. Hogoboom of Woodland, one of the squarest men in the horse business, whose statements can be relied upon. He states that he drove him the trial mile last July, and the horse was timed by Chas. Spencer and others. As Mr. Hogoboom has Palo King and Monocrat for the same class races, he wants to sell the gelding. Another reason is that he needs money. McDougall is a good looker, weighs 1,100 pounds, and is ready to put to training. He should beat 2:15 pretty haudy.

ANTRIM FARM SALE.

Royally bred thoroughbreds bring small prices now, whether the sales are held in New York, Lexington or San Francisco. As the thoroughbred is nothing but a gambling tool it is perfectly natural that when there is a gamblers' panic there should be little demand for them. The sale of yearlings from the Antrim Farm, held at Fred H. Chase & Co.'s big pavilion, at 478 Valencia street, on Tuesday evening of this week, drew a large crowd, but the yearlings averaged only \$126. The list of sales follow:

Bay filly by Kismet-Belle Platt; W. S. Schrick, \$100.

Chestnut colt by Cromwell-Nomades; Joseph Swift, \$60.

Chestnut filly by Kismet-Playfere; Dr. W. Sylvester, \$80.

Bay colt by All Green-Nimbleness; W. R. Acock, \$90.

Bay filly by Cromwell-Goltese; R. D. Hume, \$60.

Bay filly by Kismet-Promise IV.; Dr. W. Sylvester, \$150.

Chestnut colt by Cromwell-Picklow; A. Hinkel, \$50.

Bay filly by Kismet-Jenuie Neviue; W. R. Acock, \$70.

Chestnut colt by Cromwell-Perfection; W. R. Acock, \$70.

Bay filly by Kismet-Bonita R.; Dr. W. Sylvester, \$80.

Bay colt by Cromwell-Rillito; J. H. Spratt, \$410.

Chestnut filly by Kismet-Chitose; C. McGowan, \$130.

Brown filly by Cromwell-Lotrix; Major Benson, U. S. A., \$70.

Chestnut colt by Cromwell-Sunnie; C. B. Hitchcock, \$100.

Chestnut filly by All Green-Victoria; W. R. Acock, \$150.

Chestnut colt by Kismet-Tyrone; W. R. Acock, \$180.

Bay filly by Cromwell-Tribulation; Dr. Stiss, \$70.

Bay colt by Kismet-Virginia Dare; Dr. W. Sylvester, \$350.

In addition two two-year-olds belonging to F. J. Conners of Berkeley were disposed of. Lovely Mary, a chestnut filly by Horatio-Mottle, went for \$160, and Amethyst, a bay filly by Paladin-Repeta, sold for \$125, W. R. Acock being the purchaser in both instances.

THE GRAND CIRCUIT.

A lot of interest is being taken in the Grand Circuit organization for next year, and horsemen are beginning to figure on what cities will constitute the "big ring." Last year, says Palmer Clark, Detroit opened the game with one of the best meetings of the season. Then came Cleveland, and next Buffalo, and these three cities will likely be found in their respective places again next year. But the Eastern cities may cause a change, owing to the unlooked for crusade against pool selling, which caused the "pool-less meetings" to come into vogue at Readville, Providence and Hartford. Syracuse is a State Fair meeting and pool selling is prohibited there.

For several years, since hetting was stopped, the management at Readville has faced a deficit each year, and it has been noised about that a big fair would be given next year in connection with the Grand Circuit meeting, but no decisive steps have as yet been taken in that direction. However, it is practically certain that Readville will sit in the Grand Circuit game another season. Providence and Hartford are not so certain as some would believe, as the forbidding of pool selling has made a change in the outlook. Here also fairs, in connection with the racing, are being talked of, but, like Readville, have not been definitely decided upon. In the West it is almost certain that Columbus will have another two weeks' meeting, which will again fill up the vacancy caused by the dropping of Oakley Park, and the successful meeting this fall will give impetus to the two weeks' affair of next fall. With the present outlook a new city or two would be welcome to the Grand Circuit organization for next season.

One of the sales at the New York auction that stirred up pity among the sentimental horsemen was that of the old mare Nancy Hanks 2:04. The daughter of Happy Medium was before the public for a little more than four racing seasons. About the time the bicycle sulky was put on the market in 1892, Nancy again rounded to her form and was started to further reduce her record. Starting at Grand Rapids she trotted a mile in 2:09, but the next week at Chicago she stepped off the distance in 2:07¼ and later at Independence she placed the record at 2:05¼. This was considered phenomenal, but on September 28th the champion started against her record at Terre Haute, where, driven by Budd Dohle, she trotted a mile in 2:04, placing the world's record so low that it held until 1894. Nancy Hanks is now twenty-one years old and is in foal by Todd 2:14¾. During her time she has foaled some sensational colts, among them being Admiral Dewey 2:04¾, by Bingen 2:06¼; Lord Roberts 2:07¼, by Arion 2:07¾; Nancy McKerron, by John A. McKerron 2:04½; King Todd, by Todd 2:14¾, and others. One nice thing about the sale of this old trotter is that she will go back to old Kentucky, as she was purchased for Edward and Joseph Madden at a bid of \$1,500. Nancy Hanks is the grandam of Vice Commodore 2:11.

ON HORSE BACK.

The best thing for the inside of a man is the outside of a horse. Do you feel the need of exercise and lack the time and energy to take it? If you do take up horseback riding. It is the best exercise known for those who have passed the age of competitive athletics, and is health-giving to all, young as well as old, women as well as men. Horseback riding is a sure cure for dyspepsia and all forms of stomach troubles, and a man with a healthy stomach must necessarily be in pretty good condition. There is an exhilaration that follows a ride to saddle that is not found in any other form of exercise, and any feeling of tiredness that comes will disappear as soon as you rest a little. That old saw, "The best thing for the inside of a man is the outside of a horse," is still true, and it is remarkable that more use is not made of this remedy.

Driving trotters or automobiles and riding bicycles are not in it with riding a galloper. Every minute spent in the saddle is beneficial, and the more you ride the better it is for you. A short ride before breakfast will insure a good appetite for the meal, but it is better to ride an hour or so after eating, and then take at least a couple of hours to it. But any sort of saddle riding taken at any time will surely help some if you are a man with business cares; it will refresh you and improve your general health in every way. Fleishy men will be reduced and thin men will take on flesh by regular riding to saddle. It will come nearer to rejuvenating your youth than anything else you can do, and at the same time you will be having the time of your life, if you go at it right. Don't try for style and punish yourself by riding a park trotter with an English saddle and short stirrups. That may be fashionable, but it is not comfortable, and once you learn to ride as you should it will not even look pretty to you. Get a McClellan army saddle, or, better still, a Mexican saddle with the high horn in front and wooden stirrups—one in which you can sit easily and comfortably all day if necessary. Set the stirrup straps the length of your arm, making it so that you can clear the seat when standing only a couple of inches. With such a saddle you will have no difficulty in learning to ride, even though you have never ridden before, and a couple of lessons at a riding academy to learn the proper way of mounting, dismounting and general directions about holding reins, etc., will be enough to set you going in the right direction. If your horse is a galloper and you keep off the hard pavements and much-used roads, you will not need any more riding lessons than you care to take, providing you always remember to keep your head up, heart up and arms close to your side. The saddle is made to sit on, so make sure that you sit on it. This may be a little difficult at first when for any reason you are forced to let the horse trot, for the temptation will be strong to do a lot of hobbling up into the air. This won't hurt you any, however, and it may help your digestion, and in time you will learn to keep your seat, no matter what gait the horse takes.

In large cities with their magnificent parks and beautiful suburban districts, it is truly remarkable that there is not more horseback riding. Thousands of business men who are threatened with nervous prostration because of their driving lives in pursuit of the elusive dollar persistently refuse this best of all nerve tonics, apparently for no other reason than that so few other men take it. Of course, there is a large number of American people who do ride, but the number is nothing like it should be, considering the advantages for the sport. The reason for the lack of interest in horseback riding in cities can be traced to several causes, the greatest of which is that so many of those who do ride try to make it a fashionable fad in place of a health-seeking exercise. The riding masters tell the inquiring beginner that he will try to make him skilled enough to go on the road in a dozen lessons, but that he must not think himself a rider until he has mastered a dozen or so more lessons in the art. This looks discouraging both from the standpoint of time and expense, and a large majority of those who make up their minds to ride never actually begin riding.

For a matter of fact, any man who is not afraid of a horse should learn to ride well enough to go on the road in a couple of lessons, providing he is properly fitted out with a well-broken horse. With that amount of experience he will not, of course, be fitted to be classed a horseman capable of showing off a gaited saddle horse, but so much knowledge is not necessary for those who are merely in search of health and recreation. In the country districts men, boys, women and girls learn to ride by getting on a horse and riding. It is just as unnecessary for any one to have a riding master in order to learn to ride as it is to have a skating master in order to learn to skate. You learn to skate by practicing and everlastingly sticking at it, and the same tactics will make a good rider of any one. Of course, you may not ride in a manner to suit these riding masters, but you can get all the good there is in it for you just the same.

Cross-country riders, those who follow the bounds, are skilled horsemen, but not usually the riding master's product. They are fearless of danger and ready to take chances of life and limb for the excitement experienced in following the chase. Following the hounds, like many other very de-

lightful but dangerous pastimes, is too tempting to be denied once you get a taste of it.

In selecting a horse remember that a short-barreled animal with good legs and feet, will give better service in saddle work than a rakish-looking trotter, but, above all, if you are a beginner, make sure that he has no vicious tricks, and is fairly good tempered. It is a most natural thing for a man to become very much attached to his riding horse, and if the horse is what he should be and is fairly treated the animal becomes very fond of his master. There is a much closer relation between man and horse in saddle riding than in driving, and for this reason it is important that there should be no natural antipathy between them. If you buy a horse for saddle use alone do not fear to select one that is young and rather wild, for unless he is naturally bad he will soon tame down with use and become perfectly manageable. If you are not a horse expert and find it necessary to make your selection of a horse at a sales stable, hunt up some friend who does know something about horses, tell him what you want and hire him to make the selection for you. Do not, however, be trapped by any of the "gypps" who hang around the sales marts with information to give away. If you do you must not be surprised if you lead away a worthless nag.

The ponies of the West and Southwest are wonderfully enduring, easily traveling distances that would lay up an Eastern horse in one day, and the ponies will repeat the performance for day after day, and this, too, on a quantity and quality of food on which the Eastern horse would starve. These ponies are captured out of the wild bands of horses to be found all over the wild Western country and seldom weigh over 700 or 800 pounds when in high flesh. In some districts they become so numerous that the herders round them up and chase them over cliffs and precipices in order to get rid of them and thus preserve the pasturage for their cattle. The plains Indians, until they were wiped out, utilized the ponies to their fullest extent, the Apache, Navajo and Sioux tribes having become most famous as marauders whom the government soldiers found hard to catch when mounted on their fleet Indian ponies.

The writer had a few months' experience with these Western ponies in the Rocky mountain district of the Southwest, and the performances which came under his observation were truly remarkable. Fifty miles over a rough trail, carrying a large man and going the greater part of distances at a good gallop, was nothing for any ordinary pony, whose market price may not have exceeded \$15. A good pony will travel 100 miles without rest and do it inside of twenty-four hours, and, if forced to, without food or water.—Kentucky Stock Farm.

DROVE HIS OWN HORSE.

A traveling man, intent upon a day's outing wanted to hire a dealer's best horse and trap, but not knowing his man, the dealer demurred at trusting them in his hands.

Determined to have his drive, the drummer proposed paying for the horse and the vehicle, promising to sell them back at the same price when he returned.

To that the other saw no objection, so his customer's wants were supplied, and off he went. He was back in time at the stables, his money was reimbursed according to contract, and he turned to go.

"Hold on!" exclaimed the dealer, "you have forgotten to pay for the hire."

"My dear sir," was the cool reply, "there was no hiring in the case. I have been driving my own horse and trap all day."

And the knight of the grip left the dealer to his sorrowful reflections.

This season has been a triumph for the light harness horse breeder, and especially is this true as regards the last great meeting of the year held at Lexington, says the Stolk Farm. Horses of the older division have done well in a measure, but the two and three-year-olds at the close of the year occupy the center of the stage. While it is true that several high class three-year-olds were incapacitated from doing themselves justice at the Lexington meeting as a result of the lack of skill of their drivers, the lot as a whole has never been equaled. Probably a half-dozen colts and fillies of this age were capable of trotting miles faster than 2:10, and this in itself is a breeder's triumph. One has but to compare closely the youngsters with the older trotters to find how far superior are the former, and while these colts and fillies now in the very zenith of their fame are almost sure to go the way of all precocious young trotters through the idiocy of the average trotting horse driver who finds somewhere in the remote corners of his cranium what he regards as a good reason for driving his pupils as fast and as far as they can go and as often as they can stand it. The breeder finds satisfaction and encouragement in the performance of two-year-olds that race in 2:12½ and in the fact that at least six of this age this year were capable of miles in 2:15 or better. It is a breeder's triumph because it is now possible with some degree of accuracy to follow certain well defined ideas and with some degree of certainty to produce youngsters that can trot fast. The time probably will never arrive when the breeder can expect to produce race horses at will, yet it has already come when he can expect and hope to produce early and extreme speed with regularity.

TOO MUCH HAY CAUSES HEAVES.

Heaves is a disease much too common and my observation has led me to the conclusion that a larger percentage of farm horses suffer from this malady than in the towns and cities of our country, and the reason for this is, in my opinion, due to the fact that a large number of our farmers feed too much hay.

No horse requires more than one full feed of hay once in the twenty-four hours. When farm horses are working every day they are subject to just this condition, because they have not time either at their morning or noon meal to eat too much hay, but in winter they often stand all day with hay before them all the time.

A horse to be in perfect health should have the stomach emptied of the previous meal for two or three hours before he is given another. If such is not the case, digestion will not take place in a perfect manner, and disease is likely to result. There is a remarkable sympathy between the stomach and the lungs, because of the fact that the same nerve trunk supplies nerve force to both organs. When the stomach is deranged from improper feeding the lungs are liable to become sympathetically affected and heaves often result. Care should also be taken that a horse should be fed no dusty or musty hay. This dust is as light as air, and the horse in breathing draws it right into the lung tissue with every breath, and this substance, being an irritant, is very prone to develop the heaves. If no better hay can be obtained, the dust should be laid by sprinkling with water, when the horse will not breathe it, but it will be swallowed with his feed and probably do him no harm; but when at all possible only bright, clean hay, free from dust, should be fed to horses. Again no horse is in fit condition for active exercise with a stomach distended with hay, because the stomach, situated as it is right behind the lung space, if full, bulges forward into the chest to such an extent that the lungs have not room to properly expand, and cannot perform their functions properly; and anything that interferes with the function of the lungs predisposes to heaves. In many cases if farmers would feed one-third less hay to idle horses in the winter months they would come out in the spring in better condition, and we would have fewer cases of heaves in the country than we have at present.—H. G. Reed, V. S.

THOROUGHBRED AND TROTTER.

Says the Chicago Tribune: Last week saw two big horse auctions, one exclusively for thoroughbreds, while the other was confined to light harness nags. Each had about 1,000 entries. That for thoroughbreds, scheduled to last a week, came to a dismal end after two days of spiritless bidding and low prices, while the mart for trotters was thronged. The contrast is suggestive and instructive. The harness horse sale was attended by people from every state in the union, and more than two score buyers were there from England, Germany, France, Italy and Russia. One thousand horses have found new homes, mainly for the reason that they can be used for the personal pleasures of their owners, as well as for racing. For half a century, from the days of Flora Temple to those of Lou Dillon, the champion trotters without exception have been bought for private driving. A thoroughbred, outclassed on the turf, has practically no value aside from breeding, whereas a Bonner gave \$36,000 for Dexter, and a Vanderbilt \$40,000 for Maud S., because those champion trotters could be driven on the road by an amateur reinsman. Dan Patch, with his pacing mark of 1:55¼, takes his owner's children to school in the winter, and Lou Dillon is "city broke." Speculation is not essential to the success of harness racing. Three of the richest events on the trotting turf, the Massachusetts, the Roger Williams, and the Charter Oak Stakes, were decided this year in three different states, where betting is not allowed, and it is noteworthy that on two of the tracks no liquor was sold. Try to imagine the Brooklyn Handicap, the Kentucky Derby and the Futurity—fixtures of corresponding importance on the running turf—being run off without betting or bars. Even Victor Hugo in his palmy days would not have ventured that far into the realm of weird and untrammelled fancy.

HEARD AT THE COUNTY FAIR.

If you would see a horse strapped, booted, braced and geared to the limit you must seek such a track as you see at the old time country fair. Here comes an awkward flea-bitten gray which never went under 2:50 in his life. He is hobbled and checked and goggled and hitched up sideways, lengthwise and crosswise until there is more harness than horse. You wonder how his driver ever got him into this rigging and how he will get him out again without cutting him free with a jackknife. A farmer with a gray heard and twinkling eye observes to his neighbor:

"Last time John Martin had that plug out on the road I told him he had the old cripple overloaded with fust aids to the injured. Them straps that was cal'lated to hoist up his knees must ha' pulled out tight, and the critter was yanked clean off the ground. What John was gettin' ready for was a race for flyin' machines, not a hoss trot."—David Lansing in "Outing Magazine."

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

THE CARE OF FIREARMS.

In sport, as in everything else, "A stitch in time saves nine." If you do not look after the accessories of your sport in the proper way at the proper time, the chances are that you will suffer for it, by having a perfectly avoidable breakdown, when the accessories are required after an enforced period of abstinence. And so with guns, rods, golf clubs, etc., in their various "off" seasons. They must all be taken care of in various ways, so as to be found in the highest state of efficiency when again required. As regards guns, there is no doubt that the simplest plan is to send them off, as soon as the shooting season is over, to your dealer, and he will look them over, and take care of them for you till they are required again. He will make a small charge for them, but if you can afford to buy a pair of high-class guns, you can afford to pay this charge to have them well taken care of. I propose to follow them there, and show what is done to them, so that those who either cannot afford to send them, or prefer not to, can, as nearly as possible, give them the same treatment.

When the guns arrive at the dealer's, he will first of all examine the barrels very carefully to see if there are any marks or dents in them. These may easily have been caused by the guns being knocked over by a dog when they are placed leaning against a hedge or stack whilst everyone is at lunch during a day's shooting. Another common cause of dents is the knocking of one gun against another when two or three men are standing talking together, with their guns over their shoulders, and one of them turns round quickly, with the result that his gun knocks against someone else's, almost to a certainty. The ring of the barrels as they knock together, and the mutual apologies of the owners, are of pretty frequent occurrence during a shooting season. All dents may affect the shooting of the gun, so have to be very carefully got rid of, and the inside of the barrel restored to its original shape. Any sign of rust must be carefully looked for along the rib, and if any wet has got in between it and the barrels, the rib must be taken off, and the rust got rid of. Next, the stock and barrels should be put together, and the gun shaken, to see if the barrels have worked loose. If so, they must be tightened up until they do not move. There is nothing that puts one off more than feeling the barrels move, however slightly, when you hold your gun by the grip; yet it is liable to happen to almost any gun, unless it is seen to in the "off" season. The next thing done is that the locks and all parts of the gun are "stripped," taken apart, and separately examined, to see if any rust has got into them. If they are very badly rusted, the best plan is to boil them in boiling water for about ten minutes; this will eventually kill the rust, but the pits or marks in the metal caused by it will, of course, remain. Having been well oiled and cleaned, the parts are reassembled, and the locks replaced. The "pull" of the triggers should next be carefully tested, and, if necessary, corrected. This is a very important point, as the "pull off" sometimes gets lighter after constant use, and the gun goes off rather quicker than one intends, with the result of a certain "miss." The guns will then be replaced in their cases after being carefully oiled with a soft oil rag, and a little vaseline rubbed on the inside of the barrels. If this is done, there is no necessity for baize-covered rods to be left inside the barrels, as is so often done. The guns may be put away in racks in airtight glass cases. They are easier to get at should occasion arise. If the "browning" has got rubbed, or worn off much, the guns should be rebrowned. This is done more for appearance than anything else, as I never could find out that there is any particular value in browning, excepting that it prevents the barrels from catching your eye when bringing the gun up quickly to the shoulder, which they might do if they were left bright, or, rather, light-colored, as they are when in the "rough." Your eye might get taken off the bird, just the same as it is often taken off the ball at golf by the iron clubs, especially on a bright day.

The fouling of a rifle barrel, particularly when nickel-covered bullets are used, is a thing totally distinct from the fouling of a gun barrel. An article in a recent number of that useful publication, *The Kynoch Journal*, deals with the former process of fouling in detail and deserves study by every man who uses modern ammunition; it was written primarily with an eye to the needs of the match shooting rifle from which many more shots are fired than from the game rifle; but inasmuch as the accuracy of one means success or the reverse at the target, while on that of the other the life of the owner may depend, it is surely needless to argue that the game rifle should be treated with at least an equal degree of care. In former days, we are told, the match rifle barrel might be depended on to last out a lifetime if properly cared for; but since jacketed bullets and high pressure explosives have come into use it has been found impossible to keep a barrel at its highest pitch of accuracy for more than a few

hundred rounds." Moreover, the "life" of a barrel is a curiously uncertain quantity; some rifle barrels will last out a thousand rounds without appreciable loss of accuracy, while others will show signs of failing after fifty shots have been fired. Loss of accuracy in either case is very generally due to the fouling with which modern ammunition has peculiarities of its own and is complex enough to require consideration at the hands of the chemist. The nickel covered projectile traveling first leaves metallic fouling; behind it comes a blast of white hot gas under enormous pressure depositing both solids and acids atop of the metallic fouling. The next shot deposits a new film of metallic fouling on that and the new layer of fouling from the powder; and as if these were not enough there is mingled with them "the steel washed away from the breech end together with the tarry matter deposited by the combustion of the vaseline and other hydro carbons of the explosives." The whole forming a spongy film of great tenacity—as we know to our cost when we undertake the job of cleaning. When removed by chemical reagents this fouling is found to contain copper, nickel, carbon, acid and iron in varying proportions; and the worst enemy of the barrel among these constituents is the acid: that is the "active rusting agent," and it is so incorporated with the solid matters that it cannot be reached by the application of an alkali.

As everyone knows, a barrel may be wiped and rubbed until it looks perfectly clean, and yet if left for the night is found to be foul when again examined. The barrel has not been properly cleaned; but it is perhaps consoling to be told that as a general rule barrels cannot be successfully cleaned by a single operation. This knowledge relieves us of a certain sense of chagrin and should serve to exonerate the servant who has produced the desired, but deceptive, brightness of the barrels. The apparently clean barrel "comes up" after some hours, and shows dull and dirty: this is the condition that indicates necessity for another thorough cleaning and that thorough cleaning must be repeated until the barrel no longer dulls or "comes up" after rest. Barrels cleaned with rifle oil (i. e., oil and alkali) or with mineral jelly such as vaseline always "come up" for several days, usually for a fortnight. The use of wire gauze is good in clearing the lands and grooves of metallic fouling but does not prevent rust, the great foe of the rifle barrel. The action of rust being brought about by chemical changes, the corrective is to be found among chemicals: no actual preventive of rust has been discovered and in the very nature of things it seems idle to hope that any preventive will be devised that is applicable to the interior of barrels.

The expert tells us that he tried the effect of putting a little powdered ammonium carbonate into the barrel after firing, with no other attempt to clean, and "the effect was all that could be desired. The surface of the metallic fouling, which consists chiefly of copper, turned blue, in consequence of the action of ammonia mixed with air; but the steel of the barrel remained unchanged." After a time, however, when the barrel had been wiped out and oiled rusting set in and made rapid progress. Again chemical knowledge was brought to bear and it was realized that the ammonia gas had combined with the acid products of firing imprisoned in the metallic fouling and "formed a hygroscopic nitrate which took up the water of the air and began a cycle of rust on its own account." This discovery made, the antidote was obvious: it was simply to wash out the barrel with plain water, after using the powdered ammonium carbonate, and dry it thoroughly before oiling. That done the cleaning by this method proved quite successful. It is one of the penalties of using highly finished weapons and ingeniously contrived ammunition that the matter of cleaning should become more important and less simple; but when the chemist comes to our rescue to undo the evils himself has contrived we have no cause of complaint against him.

So far this season has been a great disappointment to Watsonville duck shooters. There have been some good bags annexed but in most cases these have been by men who hunted in airships or something similar. The season has been exceedingly open and dry. This has delayed the migration of the ducks for some time. Those hunters who have had most experience have not lost confidence and will doubtless reap their harvest later, when the weather becomes more stormy.

At Long Beach, November 30th, a lohster, or rather a crawfish, was taken that weighed ten pounds and was two feet in length. Its feelers were a foot and a half in length. This crustacean is probably the record size for this kind taken in Southern California waters.

Jackson's Napa Soda is the best hot weather drink.

ELK'S TEETH THEIR DOOM.

Away back on the south fork of the McKenzie river in Oregon are the remains of an old hunter's cabin. All around it, telling a pitiful story of an unfair deal with the elk, are strewn the skulls and antlers of scores of these great animals, sacrificed by the professional hunter, to gratify a mere whim of man; for unfortunately for them, these magnificent creatures carry, in their upper jaws, a couple of ivory teeth, which have been sought eagerly during the past few years and proportionately high prices paid for the real thing.

In Colorado, Montana and Wyoming many risks have been taken in this illegal traffic, and though arrests and convictions have been followed by punishment to the extent of the law, the shameful practice has not been fully prevented.

The market hunter is not entirely responsible for the rapid decrease of the elk. The Indians play an important part in this destruction in every State and Territory where the animal still exists. In Oregon, the Warm Spring Indians are great hunters. They leave the reservation about the first of June, and travel and hunt all the way up the eastern slope of the Cascade Mountains.

In some favorite location on the western side, where the horse feed is good, and a lake or stream is accessible, they make a permanent camp. While the men hunt, the squaws do the tanning, and do it well.

The method of the Indians in hunting elk is very different from that of the white man. When one of their number discovers the fresh track of an elk, he trails it to where it joins the band. Then without firing a shot, he returns to camp.

Very soon fifty or twenty of the best hunters in camp are circling around the unsuspecting band, gradually closing into the center, crowding them closer and closer, until they have the whole band pretty well corralled.

Then they commence shooting and hallooing. The bewildered animals invariably stampede; one after another falls. Sometimes the entire band is slaughtered; sometimes two or three of the larger bulls break through the line and escape.

The Warm Spring Indians are not particularly skillful with the rifle, but they are fine hunters. Being naturally sneaking, their stealthy approach gives them close shots, and generally at standing game. They have a decided preference for the old '73 model Winchester rifle of 44 caliber, and a strong prejudice against any other firearm.

While hunting, an Indian of this tribe always carries two sticks somewhat longer than the gun barrel. In taking sight he places these sticks, tripod-fashion, in front of him, resting his gun between them. When he pulls the trigger from his rude rest, the shot is sure to be a close one.

The Indian shows much more intelligence than the white man in the matter of dress while hunting big game. Behold the anxious tenderfoot as he starts out fully equipped for a hunt. The overhanging branches knock off his broad-rimmed hat, the bushes slap and swish against the stiff khaki coat and trousers, and the dead twigs, under his heavily nailed brogans, crack like toy pistols.

The Indian, with his quiet, easy movements, arrayed in a soft dark-colored shirt and overalls, minus a hat, and with moccasins making his foot-steps absolutely noiseless, will shorten the distance between the fire and the game to one-third of that gained by the white man. This, and not accurate shooting, accounts for the wonderful success of the Indian as a hunter. It has been estimated, by the settlers on the western slope, that the Indians kill, on their annual trips to the Cascades, not less than 500 deer every year.

By the first of September the Indians follow the McKenzie, Santiam and Calipooia rivers to the Willamette Valley, where they pick hops for a month or six weeks. One or two of the more intelligent hucks usually are in advance of the others and canvas the ranches lying along the rivers, in search of deer skins, often paying as high as two dollars for a green skin. This is illegal for both buyer and seller, but the Indian is very glad to get the skins, and the rancher is just as delighted over the sale and promises all the pelts he may have the coming year.

At the end of the season they divide into bands and hunt the entire distance back to the reservation. By the first of November, all are back with hundreds of deer skins, and dried venison and elk meat enough to last until the coming season. The skins are made into gloves, and are a common article of merchandise in every store in Eastern Oregon. Considering the annual hunt, it is surprising that the western slope of the Cascade Mountains still harbors big game.

Deputy Game Warden H. J. Pritchard of Santa Monica returned from Bakersfield last week, where he had confiscated 228 ducks, shot in violation of the game laws, and presented them to charitable institutions in that city. He also arrested J. F. Baker, a market hunter of Long Beach, finding 79 ducks in his possession. The defendant was released on \$150 bail for trial before Judge J. T. Black of Bakersfield. The ducks were shot on Buena Vista lake.

AFRICAN GAME IN THE SOUTHWEST.

With the personal indorsement of the President of the United States and the hearty approval of the Los Angeles Chamber of Commerce, one of the most interesting moves ever made by public-spirited men in the Southwest is soon to be started.

It is for the transplanting of thirty species of African game animals to our preserves. Congress will be asked to set apart portions of the forest reserves as a perpetual United States sanctuary, and when this is done the importation will immediately commence.

Most concerned are Maj. F. R. Burnham of Pasadena and the eminent South African engineer, John Hays Hammond. Gardner Williams, a friend of these two gentlemen, has already been instrumental in having a portion of the Wichita reserve set aside for African antelope. Congress has generously appropriated \$15,000 to help him in his experiment.

Maj. Burnham does not propose to bring over lions, tigers or other beasts of prey, but creatures which by their hardihood and beauty will greatly increase the picturesqueness of our mountains and valleys.

So far as is known, this will be the first experiment of the sort ever tried on a large and governmentally-indorsed scale in this country. Once upon a time enthusiastic government officials brought over African camels and turned them loose in the desert. They grew, thrived and bore healthy young. They were in a fair way to become a permanent asset of "the land that God forgot" when an enterprising nutmeg Yankee from Connecticut appeared on the scene, rounded the whole herd up, and took them East with him. He made a profitable sale to one of the big circuses, and didn't lose one in the open.

Both Hammond and Maj. Burnham are thoroughly familiar with game conditions in South Africa, and have found localities identical with the mountain and desert places of our Southwest.

Many of the species under consideration are remarkable for their endurance without water. Some varieties of antelope have been shot by Maj. Burnham fully 100 miles from a drinking place.

Unless government provision is made for the protection of these animals they will not be brought, as a few ruthless rifle bullets from wandering hunters would quickly dispose of the parent stock.

However, it seems unlikely that the government will refuse its aid in the scheme, especially as it has not only made a reserve provision for Gardner Williams, but has placed \$15,000 in cash at his disposal besides.

The enthusiasm of Mr. Roosevelt also brightens the project. The President is an old-time friend of Maj. Burnham, and recently gave him a long audience in the White House, in discussion of the subject. As the President is an ardent sportsman, knowing Southwest conditions thoroughly, he was more than pleased with the idea, and promised to do all in his power to aid it.

Money is not wanting for the complete consummation of the scheme. At present \$50,000 awaits the word of the projectors, and all or any part of it may be used in bringing the game to this country, and establishing it upon a healthy footing.

Not more than a third of the proposed thirty species will be introduced at the start, other rarer varieties being brought in later, as fast as conditions warrant.

For the high mountains is proposed the tropical chamois, a beautiful creature, somewhat different from the Swiss chamois, but better adapted to Southern California climate.

Then will come the "Bush Bok," an African animal the size of the black-tailed deer. The flesh of this creature is good to eat, and its hide makes leather of extraordinary toughness, worth probably five times as much as ordinary leather. The Boers use it for the extreme ends, or "crackers," of their great fifty-foot whips.

For the open plains-country the "Spring-Bok" will be brought. There will be different varieties for different altitudes, and as the species is very hardy, it is expected that there will be no trouble in preserving the species. This is the species for which Congress has appropriated the money to the Wichita reserve, and the first experiment will be tried there. The local promoters, however, will procure their animals direct from South Africa, working in conjunction with Gardner Williams.

The mountain "Reed-Bok" will be imported for the foothills. It will stand a considerable amount of heat, and is about the size of a deer.

Another foothill creature will be the Greater "Koodoo," a magnificent animal the size of the Elk, weighing 400 to 500 pounds, with great spiral horns. Yet another is the Great Sable Antelope, the size of the Koodoo, black in color, with dainty white markings.

On the deserts will go the "Gems-Bok," and also the Grantai. The latter is an animal weighing about 150 pounds, and is capable of going great distances from water.

FOREIGN GAME BIRDS FOR SANTA BARBARA.

Fifty pair of Hungarian grouse will soon be received in Santa Barbara by Senator H. M. Willis from the State Board of Fish Commissioners. Senator Willis received a letter to this effect, and advising that be prepare for their distribution at suitable points among the mountains and foothills.

It is the intention to divide the consignment between the Santa Barbara vicinity and the western end of the county. Before the birds are set loose a study will be made of the various sections, with a view of liberating the little strangers at points most likely to meet all requirements—the food supply, shelter, water and other requisites being seriously considered.

It has been arranged to place three pair in charge of Fred Drew of this city, who has a place suitable for them, and he will make a close study of their habits, and obtain information in this way that will prove invaluable in the care of future consignments.

The birds billed to Senator Willis come direct from the great forests of Hungary, having been imported by the commissioners at a cost of \$4.50 per pair, wholesale. The species has been successfully turned loose in a number of the Eastern and Middle States, and it is believed that this departure of the commissioners will prove signally successful. They are a hardy bird, natural hunters for food, and one of the best birds in the way of adopting defensive habits when avoiding natural enemies.

As a breeder the bird has few equals, even the valley quail not being in the same class in this respect, and it has been shown that a change of environment has little effect upon their propagating habits. This fact leads to the belief that with a few years of protection the hills will become plentifully stocked, and another game bird added to the State's list.

Experts figure that the female birds will rear an average of 100 young per year. This would give the 50 pair now coming, an increase of 2,500 the first year. It is probable that other consignments will be received later, placing the county on an excellent basis to acquire a reputation as a grouse section. For several years the birds will be protected by law.

This is the first actual step taken by the Commission to use the moneys from the hunters' license tax to restock the game preserves of the State. Within a few weeks W. E. Van Slyke will leave for Mexico to make preparations to gather a large consignment of wild turkeys, and these will be liberated some time during the months of March and April, and like the grouse will be absolutely protected for years to come.

Danger of Cheap Firearms.—The menace to the songbirds and poultry yards, the danger to life and limb, which comes from walking in the woods, are not from valuable guns. It is from the cast-iron shotgun that is advertised for \$1.14, from the bulldog revolver that is marked down from \$2.50 and from the rusty and ramshackle rifles that are out of date and untrustworthy. These weapons are widely advertised and the pockets of small boys often contain several illustrated catalogues of the firms that handle these goods. Not only this, but many hardware and sporting goods stores are loaded down with cheap goods to supply the trade. The profit on cheap guns is, in some cases, more than upon reliable weapons, and a dealer can almost afford to give away a cheap revolver to a boy for the sake of the profit he is sure to receive later on from the sale of cartridges. It is not a case of depriving the poor and honest boy from having the solace of owning a gun, as has been claimed, which prompts sane men to limit the sale of cheap weapons. Fact is, many of the low grade guns and revolvers which are sold to the boys are more dangerous to those who stand at the breech than to objects at the muzzle. The reason why everybody should refrain from carrying and using cheap firearms is that they are unsafe. The man who wishes to use a gun at all should have one that will be of some service to him, and the cheap firearm is neither safe nor serviceable.

A Lucky Shot.

Few hunters have the pleasure of being remunerated in the sum of one hundred dollars for a single shot of the rifle, but such will be the good fortune of Jim Trimble, an eighteen-year-old boy of Cox's Bar, near Redding. While hunting a few days ago his dogs bayed a she cougar. Trimble rushed to the scene and with the first shot brought the animal to the ground. The male sat on a rock near by, but at the sound of the gun darted into the brush. The dogs immediately began pursuit, but hesitated in a near-by gulch. Upon investigation Trimble found three kittens hiding under a bush. He captured them but being unable to handle them, dispatched two with a club. He arrived in Weaver-ville with the live kitten, and the scalps of the other three upon which he will claim the State and county bounty of twenty-five dollars each.

Cougars are responsible in Trinity county for the scarcity of deer. Young Trimble found a buck partly eaten and discerned cougar tracks near by. The dogs took the scent and after a run of a quarter of a mile, came upon the animals.

CANINE EDUCATION.

In the education of the dog, as in the education of boys and girls and men and women, there are no educational systems which compensate for ignorance and inefficiency on the part of the teacher, or for incapacity on the part of the pupil. There must be ability to convey knowledge on the one hand, and, on the other, an ability to receive it, else there is no proper progress. The mental capacity of the dog and the knowledge necessary to serve him through life are infinitely less than those required to serve man, but none the less his manner of acquiring knowledge is much the same as man's. Still, while the manner of it is similar the dog's sources of information are much narrower, for being of a lower order of intelligence than man, and having no power of speech worth considering in this connection, he can learn only from repeated, direct experience.

Man learns much from his fellow man through the medium of speech, besides having the knowledge of the world to draw upon, as preserved in writings. The dog's lessons, as between teacher and pupil, must always be object lessons. Continued discourse conveys no knowledge to him, as it does between man and man.

This is considering the matter in the narrow scope as it relates to teacher and pupil. It may be possible to show that the dog has faculties of a higher order than the mere recognition and relation of objects, but he must acquire his knowledge before he is able to apply it, and the matter of acquiring it is what is herein considered; hence, without going into any abstruse treatment of the objective and subjective, it is sufficient for the purpose to ignore herein the more intricate phenomena of mind.

Thus, any system held forth as having some inherent virtue whereby a dog will be trained quickly and thoroughly regardless of his capacity to receive a training or the trainer's ability to give it denotes that the claimant of such system is either very simple in the matter of which he treats, or is not very scrupulous as to his manner of treating it.

Every one cannot train a dog, but every one can try to train, and after trying he will know more about it than if he had never tried; in fact, without having tried, one will never know definitely whether he can or cannot train. Nor are there any men who are born trainers. Some men may have a naturally, as they learn anything else quickly and aptly for it, and learn it quickly and accurately for which they have an aptitude. Contrary to common belief, therefore, the training of a dog is not one of the things which come intuitively. In theory, every man knows a sure cure for his friend's cold; what is the correct thing to do to start a gibbing horse, and without a moment's thought he can give an ex cathedra opinion on any great public question of the day—and they are all very good as theories. If they fail consecutively a thousand times in practice, they are equally as good to serve again on occasion. The more inexperienced the man the more impractical and opinionated he is certain to be. If he be experienced and correctly practical in certain specialties he may be visionary concerning those of others, of which he has little knowledge. It is not strange then that nearly everyone thinks he can train a dog.

Nor is dog-training a matter of set forms, and arbitrary methods of application on the part of a competent trainer, though the beginner generally proceeds on the theory that he has but to learn a method by rote, and the application of it is a matter of course. A method of training, as set forth in books, may be thoroughly efficient so far as a method can be expressed in words, but there is much beside all that, and essentially supplementary to it, which the beginner must acquire by observation and experience, and which he must learn for himself. Having the theory accurately set forth, he must thus qualify himself for its practical application, and in applying it, nothing is more important than a thorough understanding of the dog himself; that is to say, the understanding on the part of the trainer of the dog's capacity to understand and of what the dog understands of his teacher's purposes; and he should be able to judge of the dog's peculiarities of character. If the dog is incapable of learning quickly owing to stupidity, or, though highly intelligent he from obstinacy refuses to learn, the former would need the most patient consideration; the latter, due consideration with unremitting firmness, and perhaps punishment. Yet the novice would be likely to use the same set method in the same way on both and also on all others. There are hundreds of little differences of dog character and capabilities to be considered, and until the trainer reaches a point of discernment where he can perceive, understand and take advantage of them, his attempts as a teacher will be but little more than mechanical. He may, now and then, have success with a dog from the accident that the set, arbitrary method happens to fit the dog's peculiarities, but it is merely a happening. With a little thought over it, it is clear that it is palpably absurd to apply one set method to the nervous, the stupid, the intelligent, the lazy, the timid, the diligent, the fast, the slow, the weak, the strong, etc. Such must result in many failures, and the best success will be moderate.

Methods should be modified to the circumstances of each individual case, compromising with the idiosyncrasies of the pupil, and applying with a view to securing certain results and not with a view to preserve arbitrary methods of teaching. By kind-

ness, and preserving the dog's interest, always keeping progress within his capacity, success will be the result in every case where it is possible. There will be failures betimes, as in cases where the dog is mentally weak, so much so that he is a dullard, or understanding what is taught him for the moment he cannot remember from day to day; or if he is proficient in learning, he may be too indolent to work afield, so that if trained he is merely a trained loafer; or he may be well trained and diligent, yet incapable of good performance, owing to the functional powers of the nose, as an organ of scent, being deficient or absent. In such cases the trainer is powerless to correct the dog's shortcomings, also he may not be able to recognize the cause of the trouble, and therefore the greater need of close and careful observation of details from the start.

No trainer can supply qualities which Nature has omitted. To be able to determine nicely all these points requires close observation. A knowledge of dog character will come to a trainer after a certain experience, even if he is left entirely to his own resources, but such is from a long experimental experience; but what is learned slowly from many experiments, losses and failures could have been much better learned at the beginning from the observance of advice given in approved methods and the exercise of perception and judgment.

Thus having given some consideration to the dog, he next would act wisely in giving a great deal to himself. He will need to study himself from a new standpoint. As a teacher, he will find a new character in himself, differing essentially from his every-day one. As teacher he will find that he is irritable, impatient, and unreasonable in his requirements of the dog; that he becomes angry over the dog's failure to do in a few moments what the trainer directs, and that his anger increases when the dog shows utter ignorance of the language which the trainer knows so well. Knowing the language himself, he does not consider that the dog is ignorant of it, and has to learn the sound of the order so as to keep it in memory, and next its meaning and its application. At this juncture the amateur generally falls to and gives the dog a sound beating, and calls the tumult dog training. At the next lesson the poor dog associates the whole affair with a sound beating, and is in a state of mind for anything else rather than receiving lessons.

When a dog's fears are aroused, or he is made to feel needlessly uncomfortable, worried and uneasy, his progress as a pupil is slow. If the lessons are made obnoxious to him, the trainer has succeeded in making him more intent on avoiding them or having them ended than in learning their purpose. With a violent teacher the dog's life is truly a sad one. Knowledge is then acquired under the most disheartening difficulties. Under the same violent conditions the teacher would rise in rebellion and implore the world to witness his wrongs. If when learning his A B C's the good pedagogue had told him the names of the letters two or three times, then failing to receive proper answer, had jerked him violently by his neck, kicked him in his ribs and slashed him with a heavy whip, he would have considered a lesson as something devoid of pleasure. The harshness and efficiency so deterrent to the boy's progress and so harmful to his nature are equally so to the dog's. The same patient labor on the part of the teacher in dealing with the education of the boy is the same required in dealing with education of the dog. Their manner of gaining knowledge differs but little. Punishment teaches nothing in the way of acquiring knowledge, excepting that his teacher is an unpleasant person, and one to be avoided. Punishment serves in its place to prevent a dog doing certain things, and that is the extent of its mission. It is good in its place as a preventive, but it develops nothing useful. But when it is applied for the reason that the teacher is angry, it is entirely outside of the purposes of dog training, though the teacher may imagine the violence is a part of it. Until the trainer can control his temper and fit his efforts to the dog's capacity and progress, he will be inefficient. And these things no one can do for him. His own judgment and self-control are his only reliance, as they are entirely outside the scope of any system.

DEL MONTE SHOW.

The first annual bench show of the Del Monte Kennel Club is now a fixture for Saturday, January 4th, 1908. The bench show committee is H. R. Warner, chairman, Chas. S. Aiken and Emmet Husted.

The judges are the following well-known fanciers: Phil M. Wand of San Francisco, Great Danes, Russian Wolfhounds, Deerhounds and Greyhounds. Whippets, Italian Greyhounds, Chesapeake Bay Dogs, Retrievers, Irish Water Spaniels, Clumber Spaniels, Field Spaniels, Irish Terriers, Airdale Terriers and Variety Brace classes.

John G. Gleason of San Francisco: Bull Terriers and White English Terriers.

William E. Chute of San Francisco: Bloodhounds, English and American Foxhounds, Pointers, English, Irish, and Gordon Setters, Dachshunds, Cocker Spaniels and Beagles Collies, Bull dogs, Fox Terriers and Ladies' Variety classes.

Irving C. Ackerman of San Francisco: Mastiffs, Newfoundland, St. Bernards, Dalmatians, Old English Sheepdogs, Poodles, Chow Chows, French Bulldogs, Boston Terriers, Scottish, Welsh, Rose-

neath, Bedlington, Maltese, Dandie Dinmont, Black and Tan, Skye and Yorkshire Terriers, English Toy, Pekinese and Japanese Spaniels, Pomeranians, Pugs, Miscellaneous, and Variety Team class.

Superintendent, T. J. Blight. Veterinary Surgeon, Dr. K. O. Steers, V.S.

The premium list, it was stated, would be published and mailed yesterday. Entries will positively close on Saturday, December 28th. Medals will be awarded for winners classes and ribbons for all other classes. Forty handsome trophies have been guaranteed. Special railroad rates will be made for exhibitors and visitors.

The office of the club is located at 469 McAllister street, San Francisco (Robison's Bird Store) where entries can be made personally or by mail.

The prospect for a successful show at the famed and elegant Monterey hotel is assured, a large number of entries having been promised. Aside from the stimulus the show will give dogdom circles hereabouts, the project is one worthy of the support of every fancier who can be present. The trip, coming as it does on a Saturday, will afford a splendid outing. Special rates can be secured for those going down to Del Monte from this city on Friday evening.

Count's Gift was recently purchased, by Mr. Geo. B. M. Gray of Oakland, from Chas. R. Babcock. Mr. Gray also contemplates placing Avalon in his kennels. Another English Setter good one in his string is a very promising Tiverton puppy.

Mr. Geo. Boyd of San Rafael recently sent his English Setter bitch Iroquois Belle to be served by S. Christenson's field trial winner St. Ives.

Hon. Chas. N. Post recently sent his good English Setter bitch Sunburst (Fairland Dude—Merry Heart) to Hartford, Conn., where she was served by W. G. Comstock's Ruby's Dan.

There is a rumor that a two-day bench show will be held in Vallejo in May.

Mr. and Mrs. Chas. Reid Thorburn are now located in Portland, Or. Mr. Thorburn's business arrangements necessitated a change of base for the Stiletto Kennels. The local fancy, and particularly the Bull Terrier interests, will feel the loss keenly of two enthusiastic and genial factors at our shows and other functions dear to the doggy cult.

The inmates of the famous Stiletto Kennels, Ch. Meg Merrilies and her mates are now, for the time being, domiciled in the Leitrom Kennels of Mr. Chas. R. Campion. Mr. Campion has a number of good ones in his care, including Mr. Frank E. Watkins' good bitch Iras, heavy in whelp to Bloomsbury Baron.

Honolulu fanciers are now making great preparations for a bench show, to take place early in the coming year. The exhibition given there last year was a success and has resulted in the importation of a number of finely bred dogs, which were bought especially for bench purposes. This means that the show next year should have even more fine specimens, and therefore a better attendance than last year.

A meeting of a committee appointed by the local kennel club to start the preparations for the coming show was held recently at which Charles T. Littlejohn, Dr. A. R. Rowat and Dr. J. C. Fitzgerald were present. They talked over the matter of holding a show and will hold a second meeting in the near future at which a suitable building for the show will be decided on and other arrangements made.

Mr. Medcalf's Hilo Kennels received by the steamer Enterprise a pair of highly bred, prize-winning Bull Terriers. Chester Valley Captain was shipped from Philadelphia. He is a fine headed, upstanding dog without any superfluous flesh, weighing 55 pounds. The bitch is Englewood Blossom, from Mr. Bogen's Englewood Kennels. She is accompanied by one of her three months old puppies. These dogs will be exhibited at the bench show to be held in Honolulu in the spring, under the auspices of the Hawaiian Kennel Club.

Oakland show will take place either the week preceding, or that following the Frisco show.

It is reported that the Auditorium skating rink, on Fillmore street, this city, has been engaged for the San Francisco Kennel Club's show in April next. The hall selection is a very good one and should materially aid in making the show a big success.

A shipment of 25,000,000 salmon eggs from the Government fishery at Baird was forwarded last week to the Santa Cruz hatcheries. The eggs were packed in five boxes, 5,000,000 eggs in a box. The fish will be raised at the Santa Cruz hatchery, and good fishing is in store for sports of the seaside resort in a year or so.

Little idea is had of the importance of the State and Government hatcheries. It is an industry of no small moment, considering that in three years' time a shipment like the one to Santa Cruz will be bringing in money in goodly sums.

EASTERN PERCH.

What promises to be an important step in the general introduction of a most desirable game fish in our waters is the recent transplanting of a large number of Eastern sun perch in a lake on the Del Paso rancho near Sacramento.

Game Warden George Neale of Sacramento and M. L. Cross, Deputy Fish Commissioner, returned from a week's trip to Siskiyou county and brought back with them about a thousand Eastern green sun-perch. These sun-perch have been placed in the waters on the Del Paso reserve where they will be protected just as the black bass were when first introduced into Sacramento county, and in two or three years' time the sportsmen of that county, states the Sacramento Bee, will have some of the finest perch fishing in the country.

The perch were taken from a lake about four miles from Yreka on the property of Henry Schock and had been placed there a year or so ago by the authorities at the Sisson hatchery. Though there were not many of the perch placed in the Siskiyou lake, they have multiplied wonderfully, they being the only fish in the lake, until there are now, it is claimed, millions of them.

Warden Neale is elated over the introduction of the perch into Sacramento waters and considers them the greatest acquisition of the game fish outside, possibly, of the black bass. He believes the waters of the county are particularly adapted to the perch and has no fear of them not thriving. The value of the perch is that it is one of the gamest fish in the country and that it does not eat the spawn of other fish. These fish are not only very pretty but are toothsome panfish as well, and so there will be many benefits accruing from their introduction into the county.

Mr. Neale has made a study of the new fish which he is placing in Sacramento waters and gives a fine description of them. "In my mind the Eastern green sun-perch are about the gamest fish in the country. They are a magnificent fish and of rainbow color. When fully developed the green sun-perch weighs from one pound to a pound and a half, and, most important of all, are fine eaters."

"My idea in stocking the Sacramento waters with perch is to get a species of the finny tribe here that is adapted to these waters and is not a spawning fish like the catfish and the carp. In introducing the sun-perch I also bring a very game fish. They take the fly or spoon as readily as the trout and put up a corking fight when hooked. Sun-perch are real sports and when anything moves in the water like it was alive they are right after it. This is the season they will take after a fly or spoon. Unlike the black bass one must look for the sun-perch near the banks. In holes where many dead leaves have fallen or where a dead tree is lying in the water is the place where these fish abound."

"The lake we took these sun-perch from contained apparently millions of them and the fish had just been planted in it a year or so ago. So thick were the fish that it was almost impossible to catch one of any size with the hook for the reason that every time the fly or spoon was thrown into the water dozens of little fish would rush at it and begin tugging away. When you thought you had a big fish and jerked up your line there would be a perch of two or three inches dangling at the end. Mr. Schock was being robbed of good fishing in this way and when he told me of the condition I said I could remedy it by bringing him up a couple of hundred of black bass. I did this and he gave me the sun-perch. Those black bass will have some fine living in that lake and will quickly thin out the little wigglers."

The shipment of sun-perch was in six cans. Each can contained 162 perch, totaling 972 for the whole shipment. They run in size from two and a half to five inches. These fish, placed in water where their spawn will not be eaten by greedy carp and catfish, will multiply very fast and will be protected from fishermen until they attain a goodly number by being placed in waters where the public has no access. The members of the Del Paso preserve have assured Warden Neale that they will not catch the perch and there will be nothing to prevent the fish from thriving if the waters are adaptable, as Mr. Neale believes they are.

Next week another trip will be taken to the northern part of the State by Neale and Cross, and this time eastern yellow perch will be secured. The fish will be taken from Plumas lake and with their introduction into Sacramento waters another very game fish will be had. The yellow perch is different from the green sun-perch in that it is shaped much like a bass and if anything is a gamer fish than the sun-perch. It has a mouth like a hullo, with a square and determined hang of the jaw, and the fight it puts up when hooked resembles that of the bow-legged canine.

In three years' time when these two varieties of perch are so plentiful Sacramento county's reputation for being the ideal fishing ground of the country will be doubled and will attract many Easterners here for the perch are natives of the East.

IMPORTANCE OF CONSTITUTION.

[C. B. Whitford in Chicago Horseman.]

Few people not closely connected with the development of speed horses, either as owners or trainers, realize how many horses otherwise good fail to reach a high degree of excellence for lack of constitution, and it may be said, too, that there are a host of owners and trainers who do not recognize quite at its full value the importance of a rugged constitution. Their horses may be well bred, they may have good action, strength, lung power and an enthusiastic desire to race, yet they fail to reach the degree of excellence to which they gave promise. The failure in such cases is more likely to be attributed to something else than the true cause. Constitution is as much an essential speed character as action and strength. It is just as necessary to the appropriation of other speed qualities as the boiler is to making the well constructed engine useful.

The trotting horse must be constructed like a machine made for peculiar use. The action must be such that the strength necessary to keep it going may be conserved. The best action is that which needs the least strength for its performance of its proper functions. Strength that may be directly applied with small loss is necessary. Lung power to endure the severe strain of the hard work the trotter is called upon to do is equally necessary with strength. As much lung power and as much strength as is needed to carry the action to a successful limit must be had to place the trotter in a high class. And no more. Whatever of extra power is carried, whatever force that is not brought into use, amounts to so much lumber or dead weight. And it matters not whether this extra substance is as much as a square inch, or a pound, it is useless, and is just so much in the way of complete harmony. An exact balance of parts is never had; but the nearer we come to such an ideal, the better are the results to be expected.

But of what avail are all these good qualities in the trotter if he lacks constitution!

True, the horse does not trot with his stomach; nevertheless the trotting horse's stomach is just as essential to speed as good shoulders, good legs, good lungs or good strength. It is, in fact, the very inspiration of his speed.

The horse with a good stomach, or even with a fairly good stomach, may never be troubled with it so long as he is asked to go a slow pace or to pull a plow. But when he is taxed to the limit of his speed, so that action, strength, lungs and all the rest of his physical and nervous being as well is strained to the limit of endurance, his weak stomach will cry out for a rest.

He may have been a good feeder, or at least he may have given that notion; but his manner of eating when not taxed with severe work is not to be taken as a true measure of his stomach. It is the way he regards his feed after severe work which gives us a measure of his strength of constitution, for if there is any part of his constitution the least bit sensitive he will make the fact known at mealtime after severe work. Wherever the weak spot in his constitution may be located, the first spot to show the weakness will be the stomach.

Trainers all like to handle the horses which show in their jogging and preliminary work a smooth, easy action. They like to feel their strength as they go into a faster pace without apparent effort. They like to feel the atmosphere of desire that the well bred enthusiastic horse moves in. But, before all, trainers like a good feeder. In fact, no good trainer feels much confidence in his young horse until he knows what he will do at mealtime after strained a little with fast work. While the horse is jogging and taking little sprints there is no appearance of constitutional weakness. This begins to show itself after the horse has been given some hard work. If he will eat greedily he will work, and it is work that puts the horse in condition to endure a fast pace. If he will but eat, and if what he eats does him good, the trainer will be able to get out of him the last second of pace.

With a good feeder; a horse with an iron constitution; one that is benefited by good meals taken with a relish, the trainer may create speed. He can bring his genius for his calling into play, and handle his horse as he desires to handle him. He may map out a plan of work and carry it to a successful conclusion. His horse will not interfere with his plans by refusing to eat a good breakfast or supper. On the contrary, he will eat and make new substance to take the place of that which he had burned up in training. He will rest well and have at all times the contented spirit. He may be full of spirit, but he will be sour and mean, or indifferent about his work. On the contrary, he will be just as greedy for work as he is for good food.

The trainer can push a horse of this kind. He can give him a hard drilling at slow work, and then he can give him short spurts, or long, fast drives. He can make him strong, or he can make him as fast as his speed machinery will permit him to go.

And then, when it comes to racing, a horse of this kind may be depended upon to do his best when called upon. He can be made into a desirable racing tool.

The horse with a weak constitution may have a lot of speed naturally, but it is difficult of development. Just as he gets to going nicely and shows improvement, with promise of greater speed, he will nibble at his feed and go to bed with his nerves

dancing. He will not rest well, and the next day he will be as badly off in his work as he had been off his feed. If he has a weak spot anywhere it will show for want of nourishment. And for that matter, all his hard worked parts will miss the nourishment they need when he misses a good meal.

Such a horse must be allowed to rest and round to. Then just as he begins to show improvement again the strain of hard work will touch his weak stomach and he will not be able to take up the food his system needs. With him the trainer must ever be careful not to give him too much hard work. He must nurse him along, working him as best he can, resting him when he shows signs of going off his feed and his work. He may be ever so fast, but the trainer will find it difficult to keep him on edge. When he gets him keyed up for a race he will not stay there long, because he cannot stand the hard drilling necessary to keep him keen. He may win a brilliant race one day and then not be able to make a fair showing for a fortnight afterwards.

The horse with a weak constitution is never to be relied upon, for, no matter how carefully he is handled, he is likely to go off his feed and speed at any time after he has been keyed up to his limit. And a great many owners with horses of this kind never appear to fully understand what is the matter with them. They know they are freaky in their work and lose their appetite frequently, but they do not fully realize that it all comes about as the result of a naturally weak constitution.

It is very difficult under any circumstances to get satisfactory work from horses of this kind, no matter how much speed they may have naturally. However, when the true nature of the trouble is understood, the work of handling such a horse is somewhat simplified. Such a horse needs extraordinary care. Their food should be of a kind not calculated to tax the stomach severely. They need nursing in all things, but more particularly with reference to their food. If they can be given food which does not tax their stomachs too severely, and can be induced to take nourishment, they will do well. It requires a trainer of excellent judgment and great caution to bring out of such a horse the speed that is in him.

Breeders are none too careful in making their matings about the question of constitution. It is speed they are after, and they think they will be likely to get it where they select a speedy sire, for it is very simple to reason that speed is the product of all trotting horse virtues, including disposition. They overlook the fact that a good horse may have a slight constitutional weakness which has not been severe enough to stop him from getting a good mark, and they forget, too, that what is only a slight weakness in a sire or dam may be increased in the progeny, particularly where a mare with a tendency to such weakness is mated with a horse of a family that has constitutional weakness.

Constitutional weakness is more likely to show itself in highly bred horses than it is in horses of less fashionable blood. It grows as a result of refinement in breeding all kinds of animals. We go on specializing certain breed characters from generation to generation, and by that process lose much of the ruggedness of the breed. Carried far enough the highly specialized animals become delicate and subject to all the diseases and disorders of their kind.

On the other hand, cold-blooded stock and scrub stock of all kinds are usually blessed with a good constitution. They are always ready to eat, and they are not very particular about what it is, so that it is filling and calculated to stop the craving for food.

Breeders are often tempted to use a good individual even if they know he is not rugged in constitution. He has the breed qualities in excess, and they are plentiful back of him in the pedigree. There is always the hope that the constitutional weakness will not assert itself, and this is usually followed by disappointment.

Breeders will profit by a little study of the constitutional qualities of the horse they would like to mate with their mares. Other things being equal, the sire with a good constitution inherited from a rugged family should be given preference. We do not quite recognize the importance of good constitution in the trotting horse.

THE HOWARD CATTLE SALE.

Breeder and Sportsman: Herewith we beg to hand you list of animals sold at our second annual sale, held on November 13th, together with averages.

Although the animals entered did not bring such a high average as in our first annual sale, held in September, 1906, yet taking into consideration existing conditions and the lack of confidence in affairs financial, it is our impression that we did remarkably well. Mr. Geo. P. Bellows of Maryville, Mo., conducted the sale in his usual apt and businesslike manner, and it is worth an admission fee to hear and see him perform. The attendance, although not as large as last year, was very good. Yours very truly,

HOWARD CATTLE COMPANY.

Cows and Heifers.

Orinda Lass, red, calved February 16, 1905;

The University of Illinois has selected Fair McGregor as a class specimen of the standard bred trotter. Prof. R. C. Obrecht says most of his class pronounced him the best horse of his kind they had ever seen. Fair McGregor was sired by Bay McGregor, dam by Stiles Abdallah, granddam by Western Lad, great-granddam by King Herod. He is owned by Jas. A. Cunningham, Virginia, Ill., who bought him when a yearling of M. T. Grattan, Preston, Minn.

THE FARM

HIGHER QUALITY OF HOG MEAT
NOW IN DEMAND.

Everyone who has paid any attention to this must have come to the conclusion long ago that a change in manner of feeding is necessary in order to cater to the tastes of the consumer, as evidenced by the demands of the market. On this subject a writer who is well posted on this subject says:

The past fifty years has seen the production and sale of more fat hog meat than the next fifty years will see. Never again in this country will conditions be favorable to the production of hog meat having an enormous proportion of pure fat. We are beginning to pass out of economic conditions in which such meat can be produced at a very low cost and sold for a comparatively high price. The production of this kind of meat for half a century depended on the use of corn having a slight value in the world's markets. We never again will see corn selling at a very low price—10 to 20 cents a bushel. It has already become too costly to be used in a great measure for the feeding of growing animals.

The best markets of the world demand a leaner pork and a leaner bacon than is obtained from the hog fed on corn almost from birth to maturity. The markets of Europe and Canada pay more for the right kind of meat, but in the United States the wholesale markets have not yet come to the point of paying an advance for the hog that has a large proportion of lean meat in his carcass. But it is a fact well known to city buyers that the lean bacon is retailed at 4 and 5 cents a pound higher than is the fat bacon. The farmer does not get the difference, but someone does.

Sooner or later the buyer of hogs in the great markets in the United States will be compelled to pay a higher price for the hogs having the best quality of meat. The public is gradually becoming more exacting in the quality of meat it consumes, and the demand for high-quality hog meat is increasing so rapidly that the distinction must ultimately appear in the general market for live hogs.

With the change of conditions in the prices for feeds, it is certainly becoming cheaper to produce lean meats than fat meats. Up to this time the use of feeds having in them immense quantities of starch has been induced by the low price of such feeds. Corn was cheap and so was used excessively. But corn is now high, and the producers of swine are finding nothing so high in starch content that can be used in its place. It is proving more economical to use alfalfa, clover, soy beans and others of the leguminous crops, all high in protein rather than in fat. The farmers throughout the corn belt are beginning to grow these foods extensively for the feeding of hogs. The pork produced from them is of higher quality, from the standpoint of the bacon eater, than is the pork made of too much corn.

The farmer must figure on this higher quality of hog meat in the future and take steps to get from the hog buyer what his product is worth, for this kind of a product actually sells for more in the market and is worth more from the standpoint of the buyer. It is a fact that a grade known as "bacon hogs" has now appeared in the markets of Chicago and the West, but as yet the distinction does not reach to the point of insuring the producer of bacon hogs a larger price for his product, which is worth more, even if it costs the farmer no more.—Rural World.

The Iowa Experiment Station has demonstrated that pigs which are fed milk containing the germs of tuberculosis acquire the disease. The safe plan to follow is to heat the milk (if tuberculosis is suspected) nearly to the boiling point before it is fed to pigs. In Iowa the law requires that all separator milk shall be pasteurized before it leaves the creamery.

THE GOOD DAIRY COW.

The pail is indeed the only true criterion of the large milker and of the big butter producer, says Dairy Produce. One of the most instructive exhibits in our collection of dairy facts is a number of life portraits of great milkers and butter cows, but it would puzzle any good judge of such cows to select the champion cow out of the lot of over fifty portraits.

A heifer coming fresh in June would have the best opportunity of making a good udder, and, of course, the better the form or yielding ability of the udder, the more the cow would be likely to develop into a good milker. The first year of a cow's life will almost surely make or mar the future of the animal. But it is not sufficient alone, for a cow is growing in form and ability to milk for at least four years. I have known cows neglected for even three years after that age to make most excellent milkers, improving as buttermakers yearly up to five years or even more.

Great importance is justly given to inheritance. But heredity only gives the ability to develop parental qualities; it does not give any ability to make something out of nothing. Thus selection of parents is only the first element in the culture of good qualities in animals. It is the sowing of the seed; but good seed must be sown on good soil to insure a satisfactory product. Inheritance does not give good qualities any further than to enable the offspring of good parents to develop by the aid of their natural inherited abilities the good character of the parents. The inheritance is only developed by proper training; and it is the best culture of natural abilities which develops the possibilities of the day of the heifer's birth, and continue, without failure, until the cow, so reared develops into the maturity of her powers.

There are instances in which this natural ability may have been made dormant by neglect, and for years the cow has shown no special excellence either as a milker or a butter producer, until accident has brought out the dormant natural ability. It is also true that good milkers can be made as well as being born. It is well known that calves may be brought to milk when a few months old by the mere massage of the udder which stimulates its growth and premature development. Then it may be reasonably hoped that the calf of a superior milker may be able to succeed the dam in this way by the stimulation of the natural function by the well known process of massage. We have proved the great value of this treatment in the training of calves, and at the same time of the value of training in the way of culture of the appetite, and in the ability to digest ample rations of rich foods.

PACKING DRESSED POULTRY

G. C. Watson, Massachusetts Bureau of Agriculture, says a considerable proportion of the dressed poultry consigned to commission houses in large cities brings to the producer a much smaller profit than it would had the same poultry been dressed and packed for shipment with greater skill. It is of prime importance that the poultry products be placed on the market in a condition that will make them appear as inviting as possible. Proper feeding for two or three weeks before the fowls are slaughtered will improve their color materially.

The commission men and shippers who study in detail dressing and packing state that uniformly fine quality will soon acquire a reputation among buyers. The shipper should always be careful to have the product look as neat as possible. In some of the large cities ordinances prohibit the sale of dressed poultry with food in their crops. In a few instances the sale of live poultry in coops which contain food is also prohibited. In all cases it is best to withhold food from twelve to twenty-four hours before killing, but the fowls should have plenty of water during this time, that they may be able to digest and assimilate food already consumed. In all operations of dressing avoid cutting or bruising the skin or breaking bones. Care is required in the case of the heavy fowls in picking and handling to prevent bruising the skin.

KEEP THE BEST ANIMALS.

Many farmers are in the habit of selling their best animals because they will bring the highest prices. A greater mistake cannot be made. A difference of 10 or even 25 per cent in price of a single animal is a small matter compared to this difference in a whole herd. By keeping the very best to propagate from, the whole may be made of equal excellence, and in the course of a few years numerous animals might be produced having the excellent properties that now distinguish some few of the best.

What would you say of a farmer who sold his valuable varieties of potatoes and planted other kinds that were inferior? In consequence of this imprudent measure his next crop would fall short. Everyone will condemn this course, and few, if any, are so wanting in discretion as to pursue it. Yet many take a similar course in selling their best animals and propagating from the poor. Not only is this true of animals for breeding purposes, but those for work as well. Who does not know in his own experience of farmers who sell their best work horses and keep the poorer ones? Well, the consequence is that the poorer one costs a great deal more to keep each year and does less work, and in the end is the most expensive animal. The policy should have been to keep the better one, and to have sold the inferior. This is true in every case.

And doubly so, we believe, when the farmer has animals for breeding purposes. There is a vast difference in our cattle in sections where much attention has been given to improvements by selecting the best, when contrasted with those where little or no attention has been paid to the subject and as a matter of course, the best have been sold, or eaten, because they were the fattest. Every man that raises stock has it in his power to make improvements, and he should avail himself of all the advantages around him to turn his power to the benefit of himself and posterity.—Dr. C. W. Burkett.

OREGON STOCKGROWERS PLAN WAR ON WOLVES AND COYOTES.

The offering of bounties for the scalps of predatory animals has so often failed to accomplish the good hoped for that the bounty plan has lost favor in many localities. The Wool Growers' Association of Oregon has just gone on record at its recent meeting at The Dalles as favoring the abandonment of the bounty system and substituting the system of killing the animals by private effort and employment of professional hunters. The association will take up the work and ask assistance from the National Association.

J. N. Burgess, president of the association, estimates that Oregon sheep owners lost the past year \$250,000 by predatory animals, and that the loss of other farm stock, including poultry, would increase the loss to half a million dollars.

The United States Forest Service has demonstrated that efficient work can be done by trained hunters who are sent to the ranges to make a special business of killing wolves, and such other denizens of the forests as prey on flocks of sheep. A number of such hunters are now at work, and they are ridding some of the ranges very rapidly of the animals which do so much damage each year. Wolves are tracked to their dens, the pick and shovel as well as the rifle are brought into play, and the young are found and destroyed. A campaign of that kind strikes at the root of the evil.

So vast, however, is the Western country that the work of a few hunters can give only local relief, but if State Stock Growers' Associations go at it in earnest as Oregon organizations propose the war will soon grow decidedly interesting for the four-footed skulkers that have grown fat on mutton, pork, veal and poultry.

FOOD FOR CHICKENS.

The poultry business is improving every day. The reason of this is the fact that poultry raisers are getting better educated to their business. It

is, perhaps, the most important thing in the poultry business to keep well posted on the feeding of the fowls. In the way of feed there are many kinds that are good.

Corn is perhaps the best food to fatten a hen with, but should not be used too freely without other foods, to make her lay.

Corn, cotton seed meal, animal meal, bone and a general combination of feeds will bring the eggs better than any one feed.

During the moulting period hens should be well fed on animal or other protein feed to assist in the growth of new feathers. They should be feathered early, for the earlier the feathers grow, the earlier the eggs will begin to shell.

Skim milk is an excellent food for the chicks, and is not bad for the hen. It is a good feather grower and bone food; also is good for the laying hen.

Chickens should, in order to do well and fatten quick, be fed three times a day. Many think that a hen needs no food except in the morning; that after a "scatterment" of grain or corn meal "dough" just when they come off the roost they can be turned loose on the range for the rest of the day. This is the worst mistake a poultry raiser ever got into his head. The "range" is very good, but should not be depended upon too much.

You will hear people say that their hens do not pay for the food they eat. I've no doubt this is true; but if you watch these you will learn that they "drib" the food away a little every morning and depend on the "range" for the rest. No hen could do well with that treatment.

To do well, feed three times per day with a good combination food of corn meal, wheat, animal meal, and green cut bone for morning and night; and at noon, feed solid corn and feather producing food, with plenty of grit.

Many differ as to the kind of grit. Some say rough, sharp sand is best, while others want smooth stones. Personally, I believe the latter much better, as chickens die often when fed rough sand. Smooth stones are not at all dangerous, and should be fed in large quantities.

Hens very often run short of shell producing material. To guard against this, feed shell of some sort. Oyster shell is claimed by experts to be the best. Too much food only hurts, but too little will ruin. Do not crowd the pens with chickens.

Eight sheep to one acre (using ten acres) have been kept at the Minnesota station and nearly a full load of hay was also taken from each acre. On the ten acres were eighty sheep, which provided themselves with all they required, due to the use of hurdles, or temporary fences, which permitted of growing for them forage crops and which matured at different periods, including rape. With the hurdling system the number of sheep to an acre can be increased.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's
Caustic Balsam

IT HAS NO EQUAL

A
Perfectly Safe
and
Reliable Remedy
for
Sore Throat
Chest Cold
Backache

The LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

State Agricultural Society OCCIDENT STAKE OF 1910

TROTTING STAKE FOR FOALS OF 1907
ENTRIES CLOSE JANUARY 1st, 1908

To be trotted at the California State Fair of 1910. Entries to close January 1, 1908, with J. A. Filcher, Secretary, at the office in Sacramento. One hundred dollars entrance, of which \$10 must accompany nominations: \$15 to be paid January 1, 1909, \$25 to be paid January 1, 1910, and \$50 thirty days before the race. The Occident Cup, of the value of \$400, to be added by the Society. Mile heats, three in five, to harness. First colt to receive cup and six-tenths; second colt, three-tenths; and third colt, one-tenth of the stakes. Five to enter, three to start.

Nominations are not held for the full amount of entrance in case colt goes wrong; only forfeit payments made, which relieves you from further responsibility, and declares entry out.

Remember the Date of Closing is January 1, 1908.

J. A. FILCHER, Secretary.

B. F. RUSH, President.

When turkeys are dressed with only the blood and feathers removed the loss is small. If the head is off and entrails out the loss is about one-tenth of the weight. A gobler weighing 31½ pounds alive after bleeding and plucking weighed 29½ pounds, a loss of two pounds, or about one-fifth; ready for the oven he weighed 28¾ pounds, a loss of 3¼ pounds, or nearly one-tenth. If turkeys of this size were selling for 20 cents per pound on the market when dressed, 18 cents per pound live weight would be without loss, provided cost of dressing was not counted.

"SAVE THE HORSE" Registered U. S. Patent Office SPAVIN CURE

TO THE WINTER QUARTERS FOR THE BEST CURE, FIRING, BLISTERING AND THE USUAL METHODS ARE UNCERTAIN AT BEST; THEY MEND IRREVOCABLY FOR THE MOMENT ONLY.

Don't take chances, use "SAVE-THE-HORSE." Don't think you are experimenting; write for copy of contract and information; read what it has accomplished for others; it will positively do the same for you.

I cannot speak too highly of your "SAVE-THE-HORSE." I had a gray mare eight years old, born with a ringbone, and that is something wonderful to say. I bought her two months ago dead lame, given up by all the horse doctors. I paid \$105 and since have refused \$400. Any time you want to send anyone to me I will be only too glad to show what your treatment has done for her.

JNO. W. SULLIVAN.
Office of Jacob B. Perkins, 39-40 Blackstone Building, Cleveland, Ohio—
I purchased a bottle of "SAVE-THE-HORSE" from Strong, Cobb & Co., and went to work. My colt had two small lumps under his jaw, the result of distemper. I treated them with "SAVE-THE-HORSE" and they disappeared.
JACOB B. PERKINS.
Inter-State School, Inc., Cedar Rapids, Iowa—
Enclosed find purchaser's acknowledgement of one bottle "SAVE-THE-HORSE," contract No. 31502. I have no complaint, all my spavins and curbs are gone.
PAUL F. DOLAN, care Fire Dept. Scotch Line, Ontario—
Some time ago I bought one bottle of "SAVE-THE-HORSE" from Lyman & Sons, Toronto. Applied for splint, which has disappeared entirely.
JOHN O. ALLAN.

"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.
\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

DISSOLUTION OF PARTNERSHIP.
San Francisco, Cal., Oct. 12, 1907.
The H. D. Cowles Co., otherwise known as the Cowles-Payne Co., a partnership, is this day dissolved. I will not be responsible for any debts contracted from this date on account of the above named partnership.
C. S. PAYNE.

THREE HIGH CLASS HORSES FOR SALE TO CLOSE AN ESTATE.

No. 1. Seal brown gelding, five years old, stands 15 hands, weighs 1,150 pounds. Sired by Direct 2:05½, dam by Guy Wilkes 2:12½; second dam by Chas. Derby 2:20. This horse has never been trained, but is a fine driving horse and can trot a 2:40 gait. He is in every respect a very handsome and desirable animal, in first-class condition, very kind and gentle.

No. 2. Bay filly coming three years old, stands 15 hands, is a trotter. Sired by Greco B. 2:12½, dam by Poscora Hayward; second dam by Williamson's Belmont. She is a remarkably fine filly, gentle and kind, has been broken but four weeks, and think she can show a three-minute gait.

No. 3. Bay gelding, coming three years old, natural pacer. Sired by William Harold 2:13¼; first dam by Luster 2:22; second dam by Richard's Elector 2:17; third dam by Chieftain 7:21; fourth dam by Williamson's Belmont; fifth dam by imported Langford. Has been broken but two months, and shows great natural speed. Stands 15.3 hands, weighs 1,075 pounds. Is developed like a four or five-year-old. Very handsome and in first-class condition. A real show horse, with the kindest disposition and every promise to become a great race horse.

None of these horses wear boots or straps. They are not afraid of anything on the road, and I will guarantee each one to be sound and without blemish. For particulars address or apply to

H. OLSEN,

Beware of all blisters; only temporary relief, if any.

GOOD ONES FOR SALE.

A number of good mares, geldings, colts and fillies by such sires as McKinney, Searchlight, Lecco, James Madison, Daedalion, Morengo King and Bonnie McKinney. Good individuals, all kind and gentle. For further information and to see the horses apply to
H. BUSING,
Race Track, Alameda, Cal.

Our Christmas Issue

Will Be Out December 21, 1907

It will have a handsome Cover and the inside will be embellished with numerous illustrations and contain many articles of interest that will appeal to breeders and all lovers of the horse, including much statistical matter, the list of new performers, etc., that will add greatly to its value for reference.

THE FIELD SPORTS DEPARTMENT, handsomely illustrated, will be replete with articles that will interest those who are devoted to the Gun, Rod and Dog.

ADVERTISE IN IT.

You will reach the people whose trade you are after.

WANT AND FOR SALE ADVERTISEMENTS.

\$3.00 buys an inch single column space, and all you can get in it. If you have a horse for sale, you can tell more people about it this way than by any other possible means. Try it and get results.

STALLION OWNERS,

who are desirous of getting in an early announcement, should make arrangements without delay for using this issue so that illustrations can be made. It will be a valuable medium for this purpose, as it will be preserved for its statistical matter.

THE PRICE WILL BE 10 CENTS A COPY.

"LOOK FOR THE BIG RED W"

THE big red W is the connecting link between the consumer and the makers of Winchester goods. Over a year ago we adopted this safe-guarding trade-mark and since that time every box, carton and package put out by us has borne the big red W, the hall-mark of goods as perfect as brains, experience and ingenuity, coupled with a modern and complete plant, can make them. Our object in adopting this trade-mark was to make it easy to distinguish Winchester goods from other makes, which equal them neither in quality nor reputation, and thus protect you and protect ourselves. We have done our part. Will you do yours by looking for the big red W whenever buying anything in our line? The big red W is to guns, cartridges and loaded shells what the word "Sterling" is to silverware the world over. For your own protection we again ask you to "Look for the big red W"

THE HOLIDAY SEASON is here, and the Breeder and Sportsman extends to all its readers the compliments of the season. The past year has been a prosperous one in the United States, and especially in California, where crops have been abundant and prices for the same very remunerative to the producers. The financial panic which struck the country a few months ago has not affected business like the panic of 1893 did, because it arose from a different cause, but it has made money very tight and prevented the starting of hundreds of large business ventures. In spite of the money situation, however, the outlook is most excellent for a most prosperous season in 1908. The rains which are as yet a little below normal in amount, have been sufficient to enable the plows to be started in nearly all sections and farmers, fruit growers and stockmen are all looking forward to a most prosperous season. During the year which is now drawing to a close, the California light harness horse has been much in the lime-light. On the Grand Circuit, the mare Sonoma Girl, a product of this State, trotted the fastest heat ever trotted by a green mare, and ended the season the largest money winner that has been seen in years. Here on the Coast, while our circuit was not nearly so extensive as it should have been, was quite respectable and furnished the fastest races ever seen here. The home circuit did not bring out a new 2:10 trotter, and the number of pacers that entered the magic circle was larger than ever before in the State's history. Such great race horses as Sir John S. 2:04½, Inferlotta 2:04¾, Copa De Oro 2:07¾, and others furnished sensational racing whenever they started. Among the trotters and pacers there were some good money winners that raced only on the Coast. Nogi, winner of the three stakes for three-year-old trotters had over \$5000 to his credit at the end of the season. Berta Mac 2:13¼ won \$4,200, while the two pacers Sir John S. and Inferlotta both won large amounts, the former over \$6000 and the latter over \$5000. It was clearly demonstrated that a California Circuit can be arranged that will keep nearly all the California trained horses at home and be profitable to the race-winners. The North Pacific Circuit was particularly well managed this year, and the two \$5000 stakes given at Salem were completely successful in every way. We understand that a new Portland association proposes to give two \$10,000 stakes in 1908 and if it does, it can be assured of sufficient entries to guarantee it against loss. Everything points to a prosperous season in California in 1908 and it is to be hoped that the associations which propose giving racing during the year will arrange and announce their programs early so that owners may have some idea of what horses to put in training. With the hope that the California Circuit of 1908 will be worthy this great horse-breeding State, and that the year will be one of general prosperity to all horsemen, we will take this occasion to wish every reader of this journal a Merry Christmas and Happy New Year.

THE OCCIDENT STAKE OF 1910, which is for the foals of this year to trot as three-year-olds, will close for entry with Secretary Filcher of the California State Agricultural Society at Sacramento, on January 1st. This stake is California's trotting classic and has been won by some of the most noted colts which the State has ever produced. It is a

stake that should appeal to every person who is engaged in breeding trotters, and the entry list this year should be the greatest in the history of this well-known stake. The value of the stake to the winner has not been less than \$1500 for a long time, and if those who are most interested in the harness-horse breeding business will but make an effort to give it a generous patronage this year, it should be worth at least \$2,500 to the three-year-old that wins the event. A peculiar thing about this stake is the fact that since its inception it has never been won in remarkably fast time, and for this very reason colt owners can afford to enter liberally in it. The record of the stake is 2:15½, made by North Star in the fourth heat of the stake of 1905, and in but one or two other instances has 2:18 been beaten in this stake. Any colt that can trot in 2:20 as a three-year-old has a chance to win part of the money at least in the Occident, and as even the third money generally amounts to three or four times the entrance fee, every breeder who makes any pretensions toward breeding fast colts, should be represented in it. It only costs \$10 to enter in this stake and payments are made yearly and in small instalments. The Occident deserves a large patronage and it is a stake which no live breeder can afford to stay out of.

A MOST SIGNIFICANT FACT to ponder over during this holiday season is that the light harness horse is just as valuable an asset during these days of financial depression as he has been for the past six years. The auction sales east and west have shown that there is no falling off in the values of trotting and pacing horses even though the values of everything else have been lowered. During the panic of 1893 horse values went down in company with everything else on which owners tried to realize money, but at this time the average of the greatest annual horse auction in the country is larger than it has been during any of the last six years of good time and high prices. The prime cause is the growing popularity of the American trotter as a horse of pleasure and utility, but another reason is the great shortage in the supply of good animals suitable for the track, the road or for light business uses. It would be well for breeders to keep in mind this fact, and those who have the land which can be used for the growing of horse stock should see that their mares are mated with good stallions this year, as the demand is certain to increase instead of diminish. The breeder of good trotters and pacers will find that if they are properly reared they can be sold at a good profit as three-year-olds, and we believe the prices for them will be greater in 1911 than it will be in 1908. The small breeders are the ones who must be looked to in the future to keep the market supplied, and if the small farmers who have the land on which to raise a few horses do not take advantage of the conditions which now exist, they will be short sighted indeed.

H. O. Havemeyer, who died recently, was as fond of trotting horses as he was of violins or paintings by Rembrandt. In the palmy days of Charles Backman's Stony Ford stud in Orange county he was of the smoking room coterie which included General Grant, Robert Bonner and many other noted men who came together there to talk horse. At Merrivale Farm, on Long Island, where he died, Mr. Havemeyer had a few years ago a very select collection of trotters, among which were Harietta 2:09¾, winner of the Transylvania Stakes in 1893; Belle Vara 2:08¾, Lesa Wilkes 2:09 and Miss Lida 2:10¾. Two of these fast mares—Harietta and Miss Lida—were put together as a pole team and driven a mile in 2:13¾ by Carl S. Burr Jr., State Senator from Suffolk county, at a private trotting meeting on the farm. The performance was close to the world's record, then 2:12¾, and was really one of the most creditable performances ever made by a team, as the track was muddy and holding. As a breeder, Mr. Havemeyer made the mistake of using in the stud a horse that proved to be a failure as a sire.

Coronado 2:09¾ has been registered as Dei Coronado, the name Coronado having already been taken by an Eastern-bred stallion registered several years ago.

ENCOURAGE HONESTY.

Nothing will add more to the popularity of the harness sport than to free it from dishonest or questionable practices, and as a matter of fact it takes higher rank from year to year by reason of the war that is waged by an intelligent class of men of honest purposes who constantly strive to place it on a plane that will defy criticism.

"I do not mean to convey the idea that dishonesty among trainers is greater than among men engaged in other fields, but the acts of that class furnish the only targets for the shafts of bigots, and the thirst for sensationalism is so strong in the craven craws of the yellow journalists that they will magnify to any extent a crooked act in a turfman, while, on the other hand, they are owned body and soul by men who are unworthy to clean the footwear of the majority of gentlemen who frequent the harness race courses.

"If the critics were half as vigilant in looking for wrongdoers and one-half as prompt in publishing and punishing them in the churches as the National Trotting Association has been, the perfume of their purification would be incense worthy of the gods."—M. S. Holt in Western Horseman.

A CREDIT TO HIS SIRE.

The accompanying engraving is from a recent photograph of a colt now nineteen months old, standing 15½ hands and weighing 975 pounds, owned by Lewis Charlton of Ukiah, Cal., and sired by his stallion Dumont S. 2:20, own brother to Sonoma Girl 2:05¼. The colt's dam is Rose Thorn by Hawthorne (son of Nutwood), second dam by Dexter Prince. Here is a royal combination of trotting

blood—Wilkes, Electioneer, Nutwood and Dexter Prince—four great sires. The colt has only been broke to drive two months, is a square trotter and has shown a quarter in 40 seconds at that gait.

He is entered in the Pacific Breeders' Futurity, and Mr. Charlton thinks first money in that stake will be very close to him when the race is trotted, provided the colt does not go wrong. He is one of the first crop of Dumont's colts, as that grandly bred and handsome horse was in training in 1905 and only served three mares, all of which had foals.

NANCY HANKS AS A BROOD MARE.

The racing career of Nancy Hanks 2:04 is known to every horseman. Her career as a broodmare began in 1896. Since then she has produced ten foals and all of them are either bays or brown. They are by six different sires, viz.: Arion 2:07¾, Bingen 2:06¾, Peter the Great 2:07¼, John A. McKerron 2:04¼, Todd 2:14¾, and the thoroughbred stallion imported Meddler. She is now in foal to Todd. The list of her foals is as follows:

- 1896—B f Marion by Arion 2:07¾, dam of Vice-Commodore 2:11.
- 1898—B c Admiral Dewey 2:06¾, by Bingen.
- 1899—B f Princess of Monaco by imported Meddler, the dam of Vanitza 2:29½.
- 1900—B c Lord Roberts 2:07¾ by Arion 2:07¾.
- 1901—Br f Marlaka 2:18¾ by Peter the Great.
- 1902—B f Ondowa (injured) by Bingen 2:06¾.
- 1903—B f Palema by Bingen 2:06¾.
- 1904—B c Malcolm Forbes by Bingen 2:06¾.
- 1906—B f Nancy McKerron by John A. McKerron 2:04½.
- 1907—B c King Todd by Todd 2:14¾.

ZOLOCK AND R. AMBUSH.

By reference to our advertising columns it will be seen that the pacer Zolock 2:05¼ and his trotting son, R. Ambush 2:11¼, will both make seasons in the north this year. Zolock, who is the fastest entire son of McKinney, will make a short season at the San Bernardino track and then be taken to Walla Walla, Washington, which point he will reach not later than April 1st. R. Ambush, winner of the \$5000 stake at the Oregon State Fair this year will also make a short season at San Bernardino, and by April 1st will be at the Oregon State Fair grounds, Salem, for the balance of the season. These are two grandly bred horses and are worthy the patronage of our northern friends who own high-class trotting and pacing-bred mares.

BEST BY THE RECORDS.

The colt that first brought McKinney into prominence as a sire of fast race trotters was the incomparable Zomhro who, campaigned as a three-year-old in 1895, when he took a record of 2:13 and heat all the three-year-olds of that year (a memorable one, by the way, for high-class trotters of that age) put McKinney into the lime-light as a sire of speed. As a race horse Zomhro was a great success and the amount of his winnings was the largest of any of the McKinney's up to the time he was retired to the stud. As a sire Zomhro has also kept the lead of all others of McKinney's sons, and year after year his reputation increases.

No other stallion on the Pacific Coast has made the record as a sire that Zomhro has to his credit this year, as no less than nine of his get have taken new standard records in 1907, eight of these race records and seven better than 2:20. No other stallion in America has put seven in the 2:20 list this year, and even the great McKinney has not so many new standard performers. Zomhro has two new 2:10 performers and three new 2:15 performers.

Zomhro himself holds the Coast record for three-year-old trotting stallions, 2:13.

His daughter Bellemont holds the Coast trotting record for three-year-old fillies, 2:13½.

His son Hymettus holds the world's three-year-old gelding pacing record, 2:08½.

Zomhro's list of new standard performers in 1907 is as follows:

Hymettus, three-year-old gelding pacing world's record	2:08½
Era, trotting	2:11½
Lord Lister, pacing	2:16
Briquette, trotting	2:16¼
Bessie Barnes, pacing	2:17½
Henry Gray, trotting	2:18¼
Mike Duff, trotting	2:19½
The Zoo, trotting	2:25
Prince Zomhro (3), trotting against time...	2:30

Those of Zomhro's get that have reduced their records this year are:

Bellemont, trotting, from.....	2:13¼ to 2:09¼
Zombowette, trotting, from.....	2:16¼ to 2:14¼

Zomhro's list of performers that have records below 2:20 is as follows:

Trotters.	
Zephyr	2:07¼
Charley T.	2:11¼
Helen Dare	2:14
Zombowette	2:14¼
Henry Gray	2:18¼
Tee Dee Cee	2:19½
Bellemont	2:09¼
Era	2:11½
Helen Dare (mat.)	2:12½
Briquette	2:16¼
Mike Duff	2:19½

Pacers.	
Italia	2:04¼
Clara B.	2:13¼
Bessie Barnes	2:17½
Hymettus (3)	2:08½
Lord Lister	2:16
Zenobia	2:19

A great deal more might be written about Zomhro as a race horse and as a sire. It will be sufficient to say, however, that in spite of many handicaps he has forced his way to the front, and is now looked upon by breeders as one of the greatest producers of speed in America. His get have great uniformity, nearly every one a bay or brown with a few blacks, and they have style and action as well as great natural speed.

Zomhro will make the season of 1908 at the home of his breeder and owner, Geo. T. Beckers, at 3949 South Figueroa street, Los Angeles.

His service fee will be \$50, and at this figure there is no reason why he should not do a full season and have on his books mares that rank among the best in the State. The person who owns one of Zomhro's get can always sell at a profit over the cost of breeding and rearing, in fact the Zomhros sell themselves, as there is a greater demand for them than the supply.

CUT OUT THE GAMBLING.

Norman J. Coleman, former Lieutenant-Governor of Missouri, and we believe the first United States Commissioner of Agriculture, at present editor and proprietor of that excellent journal, Colman's Rural World, addressed the American Association of Fairs and Expositions held at Chicago last week, and in the course of his remarks said:

"Encourage good, clean horse racing and cut out all vulgar shows and you will have better attendance all around. God so made man that he wants to see contests. He will stop in the street to witness a dog fight and will watch two hoys hattle. Ministers of the Gospel and others of high moral tone will witness a horse race that is purely a contest for speed for a purse, where there is no pool selling or other form of gambling.

"Good, legitimate harness racing is a great educational institution and no hoy's education is complete without it. At the fair he is educated horticulturally, agriculturally and minerally. Let the hoy study these things in the morning and then for the afternoon desert give him some good, clean horse racing."

STANDARD REMEDY.

Fr. Z. Holden, Sheboygan Falls, Wis., writes: "Enclosed find check for half dozen Quinn's Ointment. I have never used anything its equal. Cured a horse with gouter which was pronounced incurable." For curbs, splints, spavins, windpuffs, etc., all blemishes use Quinn's Ointment. If cannot obtain from druggist, address W. B. Eddy & Co., Whitehall, N. Y. Price, \$1 delivered.

DEL CORONADO 2:09¼ WINS FIRST PRIZE.

There was but one 2:10 trotter on the California circuit this year and he had nothing to compete against as all the other horses named in this class were scratched. This horse was McKinney's magnificent son Coronado 2:09¼, to be known hereafter as Del Coronado, as that is the name under which he has recently been registered.

As an evidence of the popularity of Del Coronado with breeders, reference need only be made to the list of entries in Pacific Breeders' Futurity No. 8, which closed for nominations on December 2d. There were 39 of the mares bred to this horse in 1907, nominated in this stake, and to Mr. W. G. Durfee, his owner, goes the first prize of \$100, which the popularity of this great trotter has earned for him. Del Coronado is one of the grandest trotters that ever appeared in California and has the ability beyond all question to trot a mile in 2:05, and we believe that record or a lower one will be opposite his name next year.

He trotted an exhibition mile at Santa Rosa last August in 2:07½, and at Woodland the following month another in 2:07¼. We believe it is his

DEL CORONADO 2:09¼.

owner's intention to race him in the East next year.

Del Coronado is one of the most perfect horses of the standard-bred family and is the ideal type of the American trotting stallion. He looks and trots much like his sire, but is a much handsomer horse and a better gaited one. He has proved his racing qualities and is proving his producing qualities.

Three out of five of Del Coronado's first crop of colts have shown two minute speed at the trot, a showing that has never equaled by any sire so far as known to us. At ten years of age he has five in the list. His produce are all easy to train, are sound, good gaited and good headed. He has three colts that can or have beaten 2:10 at the trot, two of which are from pacing mares.

Del Coronado 2:09¼ is the winner of the three fastest heats ever trotted by a stallion on this Coast, and he is a winner of numerous blue ribbons at the Los Angeles, Pasadena, and other horse shows. He won over 23 competitors at one show and over 17 at another. He is a rich seal-brown, stands 15.3 and weighs 1150 pounds. His legs and feet are perfect, and his gait is so natural that he can show two-minute speed barefooted. He was bred to a large number of very high-class mares last year and as he is destined to be a phenomenal sire of extreme speed, the time to breed to him is now, so that you will have the goods on hand when the big demand for them begins, as it surely will and very soon at that.

HORSES AND MUSIC.

Regimental horses have recently been the subjects of musical tests in France, and nearly all enjoyed the experience, only a very small percentage of the animals remaining indifferent to sweet harmonies, while equally few showed active dislike. The great majority were soothed, inspirited, or excited by music. Most of the horses, like the war chargers one may suppose them to be, enjoyed the huge above any other instrument, and neighed gallantly when it was sounded, but thoroughbreds and colts generally were found to prefer the shrill treble of the fife, which roused them to great, and sometimes unmanageable, enthusiasm. This was the more significant because the fife was an unfamiliar instrument to them, not being generally used as is the huge in the French army. Finally, all enjoyed sweet sounds after a meal of oats, but before breakfast they showed restiveness when played to.—London Telegraph.

You should not overlook the necessity of paring the feet of the weanlings that you are taking up to halter-break and get ready for the winter. We have seen youngsters hardly able to walk in the spring, from no other cause than the overgrowth of hoof during the winter months. Boggy hocks, cock-ankles, sprung knees, and a host of other ailments, all caused by neglect of the feet. Many a good stallion has been dubbed a bad breeder because his colts were neglected in this manner the first winter of their lives.

Enter in the Occident Stake.

It closes on January 1st with Secretary Filcher.

The Pacific Breeders' Futurity Stake for foals of mares bred this year breaks all records for this stake.

An advertiser offers a nicely matched driving team for sale. Dark bays, mare and gelding, that can trot together better than a three-minute gait. Perfectly city-broke and well mannered.

At the sale held by E. Stewart & Co. in Woodland, Cal., at the Sam Grigshy yards, on December 17th, unbroken horses averaged \$96. Heavy draft, two and three-year-olds, were sold fast at an average of \$200, and a hunch of three-year-old mules sold readily at an average of \$195. The demand for this kind of stuff is brisk at prices quoted.

Mr. Ansel Easton, of Burlingame, California, is now the owner of the very handsome prize winning young French Coach stallion Ducasse, foaled 1903, bred by M. Valence, France, and imported to America in 1906 by Singmaster Bros. of Keota, Iowa. This horse is one of the highest type French Coach stallions ever brought to this country, and will be well patronized this year by those who desire to raise carriage horses of the most perfect type.

James Thompson, of Caldwell 2:08½, Little Thorne 2:07¼, and Charley D. fame, says he will have about fifteen big teams ready to begin hauling the structural steel for the new Palace Hotel in about three weeks. James says he is going to invite all the trainers and swipes down from Pleasanton on the day the hauling begins, just to show them how fours and sixes are hooked up properly. When the suggestion was made that a banquet at the Fairmont for his invited guests on the occasion, would be about the proper thing for him to give, he remarked that he thought the boys would be a little outclassed at the big marble hostelry on the hill, but that he was seriously contemplating having a big cauldron of "hoho stew," cooked by an expert, and served a la fresco, in the center of the big excavation where the new Palace is to be erected.

A cablegram from Milan, Italy, dated November 25th, chronicles the details of the first day's racing at the winter meeting, in which Kirkwood, Jr. won the Milan Premium, \$1,000, beating Grattan Bells, Onward Silver, Nelly Gay and others trotting the second heat in 2:14. Epine Kuser, by Col. Kuser 2:11¼, won the race for two-year-olds, a six furlong affair, in 1:56, 1:57¼. Both the winners of second and third moneys were also by Co. Kuser. The dispatch further states: "Contralto, a twelve-year-old chestnut mare by The Conqueror, out of Red Rose, has been retired to the stud and will be bred to Onward Silver. Contralto holds the record for money won in Europe by American bred trotters. Up to her retirement she has won 212,450 lire, or about \$42,500. Wainscott, winner of the championship of Europe in 1905, has been purchased by Count Andrassy, who will place him at the head of his stud in Parno, Hungary. The price was \$8,000. Max Blecher has sailed for New York to look for a good stallion and several mares for Mr. Schlesinger, owner of the Vienna Tattersals."

WASHINGTON MCKINNEY 35,571.

The accompanying engraving is from a photograph of that promising sire Washington McKinney, that is to be sold at the Chase Holiday sale on Monday evening, December 23d. This magnificent horse is by the great McKinney and out of the great broodmare Lady Washington, dam of three in the list. He stands about 16.1, and weighs over 1,250 pounds; in color a beautiful brown, with two white hind ankles. He has a good head and neck, fine

wither, good harrel, and close couple, standing on a splendid set of legs and feet. He is a line trotter, and with three months' training trotted a trial mile in 2:22½. His breeding is the kind that will cross well with descendants of Electioneer, Steinway, Sidney, Director, or any of the California sires. His sons and daughters not only show speed but are uniform trotters, and cannot be surpassed for color, good limbs and style.

Fastest Three-Year-Old Pacer

The Pacific Coast Circuit of 1907 brought out some remarkable pacers, horses whose names have become known wherever accounts of harness racing are read. In the aged division were such pacers as Sir John S. 2:04¼, Inferlotta 2:04¾, Sherlock Holmes 2:06¼, Copa De Oro 2:07¼ and a number of others that took records below 2:10, while among the colt performers were Ray o' Light 2:13¼ at two years old, and Hymettus, whose mark of 2:08¼ when winning the three-year-old division of the Pacific Breeders' Futurity, made him the champion three-year-old gelding of the world.

AEROLITE 2:11¼. PUBLIC EXHIBITION 2:05½.

But the most wonderful performance of the year was the mile in 2:05½, made by the three-year-old stallion Aerolite in the presence of two thousand people at the Woodland track on Saturday, September 7th, the last day of the Woodland meeting. This is the fastest mile ever paced by a three-year-old with the exception of one in the same notch by the colt Klatawah, eight years previous. Aerolite's record was not made in a race. His best record in an actual contest is 2:11¼, made at Petaluma the week previous, when he won the \$1500 pacing purse the largest purse for three-year-old pacers given in the State this year. In this race he defeated Hymettus 2:08½, Josephine and Radium, a very high class trio of youngsters.

At the Woodland meeting it was an absolute certainty that the colt that won the three-year-old pace would have to step faster than 2:08, and the owner of Aerolite scratched him from the event rather than to run the risk of putting such a valuable young stallion out of the 2:12 class for the small sum of \$250, the amount of first money. On the following day Aerolite was given an exhibition mile, just to show the people the wonderful speed possessed by the colt. His trainer and driver, Fred Chadbourne, was sick in bed, and Mr. Chadbourne's father-in-law, and partner James Sutherland drove the colt. Chadbourne told Sutherland that while he had never asked Aerolite to pace a mile in 2:10 he was confident that he could go to the half in 1:05 easily enough and then come the rest of the way in a minute. The judges, the timers, and nearly every horseman at the track knew the colt was to be sent a fast mile, but no announcement was made, and the majority of the people in the grand stand were not aware of the fact that Aerolite was out on a record-smashing trip when he started, as Mr. Sutherland did not wear his colors and drove the mile without a whip in his hand. The colt went to the first quarter in 33 seconds, and was at the half in 1:05 according to the slowest watch held on him—that of his owner. Here Sutherland gave Aerolite his head and if ever a shooting star shot round the turn and into the stretch he was one. He paced

LITTLE MISS MARSHALL AND TRIX'S COLT BY STAR POINTER.

the third quarter in 30¼ seconds and the fourth quarter in exactly the same notch. About fifty or sixty yards from the wire Mr. Sutherland uttered a sharp but whispered "whist," unheeded in the grand stand, but the colt heard it and rushed past the wire at much greater than two minute speed, and the time of the mile was announced as 2:05½, although Sutherland's watch and several others had it 2:04¾, having made the first half at 1:04¼. The watch of James Marshall, owner of the colt, showed 2:05½ and while his was slower than any of the timers held by those standing near him, he requested the judges to announce the mile in 2:05½, so there would be no question or dispute about it. Mr. Sutherland was sure he could have taken Aerolite out in twenty minutes and driven him in 2:03 or better.

Aerolite is a remarkable colt in many ways. He

is a blood bay with star and white hind ankles and is one of the most powerfully muscled young horses ever seen. His head is of good size and filled with a big brain. He is not a colt that is always on parade—he is too level-headed for that, but has a way of looking at everything when being led or jogged that leads one to imagine that he can reason. At work he is all business and being without a bump or a pimple of any kind, his legs being clean

three-year-old pacing Futurity at Santa Rosa, which was a five-heat race, Mona winning the first, second and fifth, the time 2:11½, 2:13, 2:14½, 2:17 and 2:16, a smashing good race for three-year-olds. Mona Wilkes was not raced as a four-year-old, but she was campaigned this year, returned a good winner and reduced her record to 2:06½, and is considered to be one of the greatest pacing mares in California.

Trix was bred to Azmoor in 1904 and in 1905 foaled the bay colt Moortrix, that was 3-2-2 in the Futurity won by the record breaker Ray o'Light at Santa Rosa in 2:16, 2:13½ and 2:18. Moortrix has beaten 2:15 repeatedly in his work as a two-year-old.

Trix's foal of 1906 is a colt by Zolock 2:05¼, and it shows faster than any of her previous foals did at the same age. It is just broken and is entered in all the principal stakes.

The foal of 1907 is a slashing bay colt by Star Pointer 1:59¼, and \$1,000 has been offered for it and refused. Trix is again in foal to the first two-minute horse.

Trix and all her foals are the property of James W. Marshall, who resides on a farm a few miles from Dixon, Solano county, Cal. While Mr. Marshall lives on rented land, he has a nice comfortable home, and says his ambition is to sell one of his colts for enough to buy a small place of his own. One of the features of his farm is a deer park, and the accompanying picture of the denizens thereof, taken when their horns were "in the velvet," makes an interesting nature study.

KINNEY LOU 2:07¾ AT SANTA CLARA.

Budd Doble has located his great trotter Kinney Lou 2:07¾, the fastest of all the entire trotting sons of McKinney 2:11¼, at the Brace place in Santa Clara. This is one of the most convenient places a stallion could be located, as it is but a very short distance from the Southern Pacific station at Santa Clara, and is at the terminal of the San Jose and Santa Clara electric line. Mr. C. C. Crippen will be in charge of Kinney Lou as usual and will be pleased to show him to visitors at any time. Kinney Lou's two-year-olds and yearlings are the talk of the State. There was never a more uniform lot of handsome youngsters seen anywhere, and the way they are showing speed is proof positive that he will be one of the great sires of race horses. Those who bred to McKinney before he achieved the reputation of being the champion speed sire, got the benefit of his fame when it was established, and profited much more than will those who paid \$500 for his service fees. Those who have bred to Kinney Lou and will do so next year are the ones who will get quick and certain profit on the investment as the sons and daughters

ON THE MARSHALL FARM—DEER WITH HORNS IN THE VELVET.

and hard and absolutely perfect from toe to body, he impresses everyone as a certain prospect for a two-minute pacer, and beyond all doubt the best horse in the 2:12 class in America.

Aerolite is bred to go fast and to go as many heats as any three in five race requires under any rules. His sire is the great Searchlight 2:03¼, one of the greatest race horses ever produced. His dam is Trix, the dam also of Mona Wilkes 2:06½, by Nutwood Wilkes 2:06½, second dam Trixy by Director 2:17, third dam Mischief (dam of Brilliant, sire of Brilliantine 2:17¼) by Tuckaho 2:28½, son of Flaxtail, fifth dam Lucy by Peoria Blue Bull, sixth dam Fanny Fern by Irwin's Tuckahoe and seventh dam by Leffer's Consul, running bred.

Trix, the dam of Aerolite, is destined to be one of the greatest of broodmares, as everything she produces shows extreme speed at the pace. Mona Wilkes, her daughter, by Demonio, was second to Delilah when that filly won the two-year-old pacing division of the Breeders' Futurity in 1904, the heats being in 2:22¼ and 2:16½. Delilah beat her again the following meeting, but Mona Wilkes won a heat in the race and took a record of 2:17¼, the fastest heat of the race. As a three-year-old Mona Wilkes started but twice. At Fresno, in July, she was second to Delilah every heat in 2:14, 2:14 and 2:17, and in August she was good enough to win the

of this horse are sure to be famous on the race track. Kinney Lou will make the season at \$100 as usual (cash or approved note), and we advise those who want to secure foals by a really great horse to correspond with Mr. Doble at once. His address is 15 North First street, San Jose, which is about as close to the business centre of that thriving city as one can get, and his phone number is James 611. Mr. Crippen, with Kinney Lou and the latter's son Diamond Mac is at the Brace place, at the head of Franklin street, Santa Clara, only a few blocks from the S. P. depot, and one block from the terminal of the San Jose and Santa Clara electric line.

WILL TRAIN AT WOODLAND.

W. A. Hunter, the well-known trainer of gaited saddle horses, expects to be again located at the Woodland track soon after January 1st, where he will train some young pacers and trotters, besides teaching the five saddle gaits to several likely youngsters. His stable will be open to both classes. Mr. Hunter hails from Missouri and is always ready to "show." He has a weanling now eight months old, by Money Mac, that is gentle and shows she has a claim on some of the money in the Pacific Breeders' Futurity for foals of 1907. She is a trotter.

... Down The Line ...

[By J. R. Fronefeld.]

Woodland.

Several good horses are in training this year at Woodland. Mr. C. A. Spencer has quite a stable including a bunch that are in splendid condition for the Chase sale. This bunch of sale horses is in perfect shape, having been brushed considerable; bow they can step! Noticeable in the string that are in regular training of the Woodland Stock Farm is Nusado, a good two-year-old by Nushagak, and Prince Lot, a colt that raced well this year and at the end of the season worked a full mile bandily in 2:15 $\frac{3}{4}$, last quarter in 32 $\frac{3}{4}$. The three-year-old filly by Dexter Prince out of Dione has grown to be a nice thing, and has been a full mile in 2:26 $\frac{1}{4}$, and a quarter in 34 $\frac{1}{2}$ seconds.

The yearlings and two-year-olds by Nusbagak and Prince Ansel are an impressive bunch, being a sound lot with plenty of substance.

Another good stock stallion added to the farm is El Rio Rey, a nice turned horse by Nushagak out of a mare by Dexter Prince.

M. C. Keefer, besides being busy with a nice hotel business, breeds a few choice mares every year, patronizing the best stallions in the country. He has a choice weanling colt, sired by Nushagak out of Avosta, a mare by Advertiser, that looks and shows now that he may be a fast colt trotter. Another one that he will give careful training is a black filly called Nada, a compactly built black filly by Nusbagak, out of Addie B. by Whips. This filly is a trappy going trotter and will learn to step fast.

Another young mare that will be trained is a three-year-old by Demonio 2:11 $\frac{1}{4}$. If there is anything at all in looks this mare will do, as she is built on racy lines, and with a little careful work has been a mile in 2:22, one-half in 1:07, one-quarter in 31 $\frac{1}{4}$ seconds.

Det Bigelow has seven head. Diablo Jr., a slashing big horse by Diablo out of a mare by Alcantara Jr., with two months' work stepped a quarter in 35 seconds.

Another horse that is showing nice in his stable is a three-year-old stallion by Diablo out of a mare by Goldrose. This filly has 2:30 natural speed and can step a piece at a faster clip.

H. Hogoboom has done a good business with his three stallions, Palo King, Iran Alto and Arthur W. Mr. Hogoboom is very busy, being first and second trainer in his stable, and is giving the first lessons to several weanlings; these youngsters can step fast right now, but one that stands out by itself in the lot is a sorrel colt by Palo King out of a Diablo mare.

A. B. Rodman is a breeder of some pretensions, having two young stallions by McKinney and a few youngsters that he will put in training.

Sacramento.

At the State Fair Ground track, Sacramento, a lot of good horses are in training this winter, where Superintendent Walter Tyron has everything in apple-pie order. The track is looked after early and late and will surely be as good a winter track as there is in the State. The trainers also have the advantage of first-class stabling.

W. J. Ivey has a stable of eight; in the aged division are two fine looking stallions by James Madison, both been miles around 2:20 and are the kind of trotters that this good sire turned out.

A two-year-old gelding and a yearling filly, full brother and sister to Swift B., are a nice looking pair of youngsters; the two-year-old has been trained some and shows to be a real trotter.

S. U. Mitchell is working four, including a four-year-old stallion by Zombro 2:11 out of Sydney mare. This fellow has been a mile in 2:18, and $\frac{1}{4}$ in 31 $\frac{1}{2}$ seconds.

The two-year-old filly belonging to W. O. Bowers by I Direct out of a mare by Silver Bee, just being broken, shows plenty of speed at the trot and a yearling colt by Silver Bee out of Sadie Benton is a bold-going, big-gaited young trotter that will pay to train.

In the next stable Mr. Chris. Jorgenson is busy with a stable of ten. He breaks and handles all kinds of horses, fast or slow. He has one of his own, a three-year-old pacer, that has been a mile for him in 2:24 $\frac{1}{2}$ and $\frac{1}{4}$ in 32 seconds.

Jack Quinn has a stable of fifteen head. At the head of this bunch is Greco B., 43129, trial 2:12 $\frac{1}{2}$. This horse's book is fast filling for the coming season in the stud. In registering this horse his number 43129 was confused with 44845, but as 4129 is on the certificate of registration the matter is finally settled.

Quinn has two young trotters by Greco B. that show the kind of trotters he gets. They are both perfect gaited and can step better than a 2:40 clip. In his stable is a black filly belonging to C. Paine, a pacer by Bayswater Wilkes, and with two months' work stepped $\frac{1}{4}$ in 34 $\frac{1}{2}$ seconds, and is gaited right to be a fast pacer.

Another three-year-old in the stable by John A. has been a mile in 2:21 and looks like a good prospect.

A black colt by Searchlight that is a square trotter is working nicely for Quinn, and with another month of good track will show a decent mile.

A mare by Iran Alto out of Bell-Bird, the dam of Wild Bell 2:08 $\frac{1}{2}$, is a nice going trotter that Jack thinks well of, as she has been a mile in 2:20 very bandily.

A yearling colt by Stam B., out of a Baybird mare, the second dam Mary Lou, the dam of Kinney Lou 2:07 $\frac{1}{2}$, has the colt trotter sign out, and whoever beats him in the two-year-old stakes had better commence to get ready now.

Another colt trotter that is really too handsome to be good, is a hay yearling filly by Zombro out of a mare by Stam B., second dam a mare by Sydney. This little miss can brush as fast as her big stable companion and being trappy gaited may be the fastest colt trotter of the two.

Billy Irwin, a popular liveryman, was seen at the track behind a nice gelding that has considerable brush to a road wagon.

Hymettus (3) 2:08 $\frac{1}{2}$, the holder of the world's record for three-year-old gelding, may not be raced this year, but be left to grow and fill out for a five-year-old campaign. Mr. L. H. Todhunter, his owner, believes in growing a horse mature before a severe campaign, and will now take up Silver Hunter, his full brother and race him next season.

W. A. Sayre, manufacturer of harness and horse boots, an enthusiastic member of the Sacramento Driving Club, everybody's friend for that matter, has for his private driver a handsome stallion by Zombro, out of a mare by Phalla, second dam by Nutwood 600. This horse has not had any regular training, but can brush fast on the road and never takes back from a pacer or trotter with a low record.

At a meeting of the Sacramento Driving Club, at the Capitol Hotel parlor, on the evening of December 12th, the Treasurer reported a net of \$312.15 to be turned over to the Protestant Orphan Asylum, a result of their Thanksgiving matinee.

At the close of its regular business a vote of thanks was tendered Mr. I. Cristee, for his untiring effort in making this meeting the success it was. This organization, now seven years old, has, during its life donated \$100.00 to another charitable institution, and \$100.00 to the good road commission. They have a nice balance in their treasury and early next season will announce a date for their Spring matinee.

W. O. Bowers, proprietor of the Capitol Hotel, is one of the enthusiastic promoters of matinee sport, also a prominent breeder.

Marysville.

Mr. W. L. Vance of Marysville is allowing Sir John S. 2:04 $\frac{1}{2}$ perfect freedom, but will be taken up in earnest before long and be given a preparation for the two-minute mark next season. A full sister, Easter Bell, that as a three-year-old showed an inclination to pace, then later on wanted to trot, is now going steady again at the pace, will be trained at that way of going this year, as she has shown $\frac{1}{4}$ in 31 $\frac{1}{4}$ seconds without the straps.

Tonopab, the big three-year-old stallion out of Eliza S. 2:16 $\frac{1}{4}$, dam of Sir John S. and Easter Bell, by Billups 2:12 $\frac{1}{2}$, a son of Boydell by Electioneer, is a square trotter—good trainers say he is a real trotter—at any rate he has been a mile in 2:26 with very limited training, $\frac{1}{4}$ in 33 seconds. He will be campaigned the coming year, and Mr. Vance thinks he may be as much of a trotter as Sir John is a pacer.

Eliza S., dam of the three mentioned, is due to foal on the 4th of January to Bon Voyage 2:12 $\frac{1}{2}$.

As Sir John S. will be raced this year, he will be limited in the stud to a reasonable number of mares.

The wise ones are booking early. Mr. Henry Lewis of Sacramento sends four.

At the track at Marysville E. A. Forbes has a very promising five-year-old pacer by McNear. He has been a full mile in 2:15.

Judge McDaniels and Mr. Renatti have several horses in training, including a good-looking brown stallion by the son of Billups. This colt will be used as a stock horse; they also have one of the best thoroughbred studs in the State, and as he is a big horse with a good disposition. He is well patronized.

John S. Sangster is training a few, including a nice looking mare belonging to W. A. Shippee, that shows lots of speed at the pace.

Slow work is being given Medford C., a bay gelding by Tybold. This fellow is double gaited, but paces when he is stepped up and acts like a good race horse.

N. J. Sligar, proprietor of a first-class livery at Marysville, is one of the few liverymen who realize that it pays to work good bred horses in his business. Nothing savoring of the cayuse can be found around his place of business. "Good rigs, good harness and standard bred workers" is his motto.

Chico.

When Chico lost her race track a few years ago the light harness horse business suffered an awful set-back, but now a few of the faithful are determined that they will have as good a training and race track as money can afford. They have selected a site convenient to both the electric and steam road, and if the deal can be closed for this ground, satisfactory to them, work will soon begin on this new plant. In the meantime headquarters for horsemen and borses in training is at the Barnard Livery Company's stables. By the way, this is the largest and best appointed livery, boarding and sales stable in the West; in connection, L. B. Daniels, one of the firm,

has full charge of a big string of horses that are gaited and given some speed work over a straight-away track close to town.

Fortunate to this firm and to the horse breeders of that entire country is the horse Moormont, a handsome big stallion by Azmoor, a son of Electioneer; first dam Rosemont, the dam of Montrose 2:18, Sweet Rose 2:25 $\frac{1}{4}$, etc., by Piedmont, a son of Almont; second dam the greatest of broodmares, Beautiful Bells, by The Moor; third dam Minnehaha, the dam of eight in the list, and six producing sons, and five producing dams.

A good prospect in this stable is a handsome red chestnut gelding by Toko, a son of Alcyone. This fellow was trained some this summer and at Santa Rosa worked a mile in 2:16. Another nice thing that shows lots of trot is a slashing big filly, three years old, by Moormont, out of Gladys B. 2:26, the dam of Leta C. 2:13.

A gelding that looks all over a race horse and has a tremendous flight of speed at the pace, is a dark chestnut gelding by Kinney Lou. Daniels is going careful with this fellow and when they finally get a track will prepare him for the races.

G. F. Parks of the Model Dairy Farm has a couple of youngsters that he thinks well of, both by Moormont. Mr. Parks is one of the enthusiastic promoters of the race track proposition. Under Daniel's care is a handsome chestnut mare belonging to Major A. L. Nichols. This mare is double-gaited, but pacing will probably be her fastest gait.

H. A. Butters, president of the North Electric Railroad, has a good prospect in a mare by Arthur Wilkes.

L. D. Macey, proprietor of the Johnson House, has a brow gelding by Arthur Wilkes that shows fast enough to put in training.

V. C. Richards, one of the proprietors of the Chico Morning Record, has a handsome black gelding by Kentucky Baron. This fellow is a nice mannered road horse, with lots of speed, and will most likely be trained when the new track is in condition.

Another handsome sorrel filly by a son of Dr. Hicks that shows considerable speed on the road is owned by George E. Vadney.

Wendell Miller, one of the staunch promoters of the race track, is something of a breeder in this part of the country, owning the chestnut stallion Pilot by Durfee, by Kaiser, out of a mare by Telegraph, etc., and several youngsters by Moormont. He is very anxious for the track, that the promising things he breeds may have proper training.

J. C. Hess, another breeder, owns a handsome and very useful stallion by Dr. Hicks, out of a mare by Welcome. This horse was a prize winner at the recent State Fair and is well patronized by horse breeders in his community.

Col. Park Henshaw has several youngsters coming on by Arner 2:17 $\frac{1}{4}$.

Red Bluff.

At Red Bluff G. Andrews has in training three belonging to his brother, including Andrews' Almont and two youngsters. A yearling stud colt by this horse has shown to be quite a colt trotter by stepping a full mile in better than three minutes. He is a good horse in any country and does a satisfactory business. On Thanksgiving Day Mr. Andrews put Miss Bessie, full sister to Lady Fair 2:17 $\frac{1}{4}$, in the list, giving her a record of 2:30. Same day worked a mare by Zolock belonging to a Mr. Biedman a mile in 2:17 $\frac{1}{2}$. Andrews thinks this mare capable of a mile in 2:10.

By some means the report of the first day's racing of the Thanksgiving races at Red Bluff was not sent in. The results of the first day's races follow:

Two-year-olds, half-mile heats—
Leta Dillon 2 1 1
Clyde 1 2 2
Time—1:40, 1:32 $\frac{1}{2}$, 1:32 $\frac{1}{2}$.

Mixed, 2:30 class, one mile heats—
Miss Bessie 1 1
Zoemma 2 2
Time—2:32 $\frac{1}{2}$, 2:30.

F. N. Frary has a stable of six head, including his stallion Loring 45147 by Nazote, a full brother to Azote 2:04 $\frac{1}{4}$. Then his stable companion, Herbert Dillon 44624, a good looking son of Sidney Dillon, belonging to Mrs. Frary. These stallions are bound to improve the stock in this country and the filly Leta Dillon by Herbert Dillon shows to be a fast colt trotter. Racing men can take a note of this one, as she is liable to be one of the extreme fast ones. Beside several promising youngsters that Mr. Andrews has been training at Red Bluff, he will send to Messrs. Sutherland & Chadbourne a gelding by Waldstein that has been a mile in 2:18 at the trot.

Kinney Al 2:14 $\frac{1}{4}$ will be located at the Red Bluff track for the spring season of 1908. This grand young horse will be welcomed back to his home country, where he showed fast as a two-year-old. He is in the hands of Mr. Rowley, who gave him all his early work, and as a three-year-old stepped him a mile in 2:16 at San Jose. Mr. Rowley contended that this horse would trot a mile in 2:10 or better, and as he took his mark in his first and only race, Rowley's prophecies are surely about right.

A few substantial breeders at Red Bluff raked their chestnuts from the fire in the race track proposition. Under the old management things had gone from bad to worse, and a mortgage given was about to be closed. A stock company was organized, and after buying the property, have put the track in perfect order, straightened up the fences, repaired the stables, and now the whole place has a prosperous look.

THE BLOOD THAT BREEDS ON.

The blood that breeds on is what breeders, both great and small, have been hunting these many years. The thoroughbred has been conceded this quality for generations past; and today, when great potency is found in trotting blood, the thoroughbred strain is usually discovered near up. It is often the stout backing of thoroughbred blood that gives to our best trotting families their quality of breeding on. On account of this thoroughbred foundation, we have always believed that Tom Smith 2:13 1/4, son of the great McKinney, out of Daisy S., dam of six in the list, would make one of the best sires in California. This opinion is being vindicated by the success of the filly Katalina, the first of his get to be trained and raced in this season's two-year-old stakes. This filly has not been beaten a heat this year, winning the Breeders' Futurity for two-year-olds, and all other races in which she started, notwithstanding she was suffering from distemper at Woodland and unfit to race. Mr. J. W. Zibbell, her owner and trainer, tells us he believes he could have driven her in 2:15 when she won the Breeder's Futurity at Santa Rosa, had it been necessary. This filly strongly resembles her sire in every particular. She possesses great substance, and has his resolute way of trotting, showing grace and strength in every movement. Barring accident, she is certain to be an important factor in next year's three-year-old stakes, the Breeders' Futurity, the Occident and the Stanford, in all of which she is entered and paid up to date. Mr. Zibbell says she has grown wonderfully since her last races, and he feels confident she will be able to beat 2:12 next season.

TOM SMITH 2:13 1/4.

The reason for our faith in the success of Tom Smith as a sire, however, is not because of the great success of this filly, Katalina, but on account of his breeding. We mention her only as an illustration of what may be expected when the strains of blood are right. It is not necessary to advance arguments to prove the breeding-on quality of the McKinney blood, as that has already been shown by the phenomenal success of several of his sons as sires of early speed. It is of the dam of Tom Smith that we wish to speak. His dam, Daisy S., was sired by McDonald Chief, 3583, a son of Clark Chief, 89, one of the greatest sons of Mambrino Chief 11. McDonald Chief's dam was practically thoroughbred, she being sired by one of the bluest-blooded thoroughbreds in Kentucky. Daisy S. is already the dam of six trotters, with several more ready to go into the list whenever they are trained. The second dam of Tom Smith was Fanny Rose, the dam of three trotters with records better than 2:30, among them being George Washington 2:16 1/4, one of the gamest and most consistent race horses of his day. She was sired by Vick's Ethan Allen, 2903, whose dam was claimed by his owners to be thoroughbred or largely thoroughbred. This was indicated by the fact that his daughters were universally producers of speed when put to breeding. The third dam of Tom Smith, Jenny Lind, was a thoroughbred mare, running successfully at all distances up to five miles. She beat many of the crack thoroughbreds of her day, winning races year after year. She, however, produced speed at the trotting gait, being the dam of Prince Allen 2:27, one of the early-day trotters of California.

It is by reason of these strong infusions of thoroughbred, through his first, second and third dams, all blending kindly with trotting blood, that proclaim our faith in Tom Smith as a producer of extreme and early speed. All of these dams being producers of trotting speed, shows that the mixture of the different bloods was a happy nick, combining the endurance of the thoroughbred with intensity of action of the trotter.

Unfortunately Tom Smith has not been much in public services in past years and his get is far from numerous. It is estimated that he has less than twenty living foals, which is a misfortune to the breeding interests of California. Being an exceedingly sure foal getter, however, like his sire, McKinney, it is not too late to remedy the lack of his stout blood on the breeding farms of this State.

Perhaps we ought to mention that Tom Smith was a colt-trotter himself, and a game performer in later years. He showed trials of 2:16 as a three-year-old and won second money in the Occident Stake of his year. His record of 2:13 1/4 was no criterion of his speed, as it is well known among horsemen that he would have greatly lowered that record, had not it been for an unfortunate accident. When it comes to prepotency in a sire, we do not depend so much on a fast record as we do on his breeding. "It is the blood that tells," after all.

Tom Smith is owned by Prof. E. P. Heald, of San Francisco, for many years past the President

of The Pacific Coast Horse Breeders Association. He has great faith in the horse as a sire, and says if the owners of the other colts by him will train them, they will find that all of them have speed.

It is a great misfortune for a horse to have speed enough to win races with a few months' training and preparation, if possessed by an ownership that does not know that speed is only a single factor in making a race horse. Geers is not the only man that has discovered that it takes at least two years continuous, all the year round, work to fit the best horse for successful campaigning. Any man who has been at all a discriminating observer has found out the same fact. A horse gifted with great natural speed may be made to go a few heats at a race-horse gait, on short order preparation, but he will not be a race horse. Nine out of ten cases he will break down at some point, and if he does not, he will incur the odious reputation of being a "quitter,"

"PEACHES."

In many cases when a horse is written up, or extensively advertised for sale, that particular horse "needs selling," but in this case it is easy to show that the mare Peaches "needs buying." If when Searchlight 2:03 1/4 was standing for public service here in California, breeders were in doubt as to his being much of a sire, that doubt is now dispelled, and it is remarked all up and down the coast that a really great race horse and sire has passed out of the country. There was a time when breeders frowned on a pacer, and even now in some quarters merry war is declared on one wearing hoppers in a race. This last matter is another question, however, that time alone will settle. But with the coming of the clear-gaited, airy-going trotting-bred pacer opinion has changed, and now the lateral gaited race horse that needs no boots or straps is really admired. To come to the point. Mr. J. D. Kaler, this mare's owner, has decided to take up a business proposition outside of the State and finding that he must dispose of his horses takes this plan of letting the public know just what sort of race prospect this Searchlight filly is. She is a solid bay in color, 15.3 hands, weighing close to 1000 pounds, and absolutely sound. Sweet tempered and pleasant at all times, in the stable, on the road, or on the track. She is a natural pacer, with a perfect way of going. The heel boots that she has worn in all of her work to date are without a scratch.

Peaches was bought by Mr. Kaler from the estate of Hon. Jesse D. Carr when she was four months old, and was never in the hands of a professional trainer. Up to January 1st of this year Mr. Kaler was County Clerk of Monterey county and spent his spare time mornings and evenings developing her when she was a yearling; he stepped her a quarter of a mile in 37 seconds. He felt then he had a great filly and let up on her. He took her up as a two-year-old, and in July she passed a full mile without a hobble in 2:28, last quarter in 32 1/2 seconds. This year as a three-year-old, she was not worked or even driven regularly on account of business which occupied Mr. Kaler's time more than usual. But early in the summer he gave her some attention for about a month and in June worked her a mile in 2:31, last quarter in 31 3/4 seconds. Mr. Kaler did not enter her in stakes, fully intending to grow her matured before racing her, firmly believing she would take a low mark the first season out. She is by Searchlight 2:03 1/4, the sire of Aerolite 2:11 1/4, with a public trial of 2:05 1/2, and Ray o' Light (2) 2:13 1/2, etc.

The first dam of Peaches is Lildine, reg. vol. 13, by Boodle 2:12 1/4, the sire of Ethel Downs 2:10, Thompson 2:12, Gen. Boodle 2:16, Little Louise 2:17, etc. Second dam Gabilan Maid, reg. Vol. 9, full sister to Lady Ellen, dam of six trotters in the list, including Eugeneer, the sire of Princess 2:13 1/4, and of the dam of North Star 2:11 1/4. The sire of Gabilan Maid was Carr's Mambrino, the sire of the dams of Sweet Marie 2:02, Helena 2:11 1/4, and Ellenwood 2:14 1/4. Carr's Mambrino is a son of the great broodmare, sire Mambrino Patchen 58, sire of dams of Ralph Wilkes 2:06 1/4, Jupe 2:07 1/2, Bouncer 2:09, Lizzie G. 2:09 1/2, Rubber 2:10, Craw-

or a one, or two-heat race performer. It is out of the nature of things that he will do what is to be regarded racing, or campaigning on fields where hard and fast heats are required to win. It takes sinew's and muscles of iron, and nerve and bone and fibre converted into steel, to fit a horse to race, and these are not things evolved out of flesh and blood in a few weeks or months developing.

Joe Thayer, one of the old-time trainers and horse breeders of Lexington, Kentucky, is thinking of leaving the blue-grass State and locating in California. He will be welcomed by every horse lover in California.

PEACHES, BY SEARCHLIGHT.

THE OLD GLORY SALE.

The averages of the Old Glory sale for the past eleven years are as follows:

Year.	Head.	Average Price.
1897	705	\$403.00
1898	714	361.50
1899	810	432.13
1900	702	501.50
1901	920	531.50
1902	969	389.86
1903	944	350.11
1904	987	454.08
1905	1014	417.61
1906	1013	419.57
1907	891	465.60

ford 2:07 1/4, Bright Light 2:08 1/2, Bourbon Patchen 2:09, Gitchie Manito 2:09 1/4, etc. Third dam Ida May Jr. by Owen Dale. Fourth dam Ida May by Williamson's Belmont. Fifth dam Ida May, by Red Buck, sire of dam of Black Pet P. 2:08 1/4, and of Red Buck Jr., the sire of Ben D. P. 2:06 1/2. The only question is, will she race? The answer is if she won't she has no business being the individual she is, gaited as she is, and bred as she is, already having done everything that was ever asked of her. Write Mr. J. D. Kaler, Salinas, Cal., for full particulars, and if you are interested enough to go and see the mare in action, he will show you all that is here vouchered for, and more.

Your Stomach is O. K. is you drink Jackson's Napa Soda.

FAST AND GAME RACE HORSE.

A stallion that makes a good and consistent showing his first year out, even though he is not returned a winner, always attracts the attention of the astute horse breeder that is looking for something good that has not reached the point where the highest price is asked for a service fee. Among the real good ones in the front rank this year was Col. J. C. Kirkpatrick's bay stallion Charley D. by McKinney 2:11½, that James Thompson took through the California Circuit, starting him in four races, and winning two second and two third moneys, without getting a record. In his first start at Pleasanton, Charley D. had to meet those two whirlwind pacers Copa de Oro 2:07½ and Inferlotta 2:04¾, and that he should be next to them in the summary caused

CHARLEY D., BY MCKINNEY.

every horseman to open his eyes in astonishment, especially as he was a close second in 2:07½, the fastest heat in the race. At Santa Rosa he met the same two speed marvels, and in this race Inferlotta won and took her record of 2:04¾ in the second heat. Charley D. was a close third in that heat, and a good second in the final heat, which was in 2:08. At Petaluma, the following week, Inferlotta again won, with Copa de Oro second, Charley D. being second to her the last and final heat, showing his gameness. At Woodland, where Inferlotta won in straight heats, Charley D. was a close second to her every time. He was not started after this as the chances could not be taken of giving him a record for the small purses that prevailed during the rest of the circuit.

Charley D., as his picture shows, is a horse of grand proportions, and is very near a perfect pacer and looks like one of the highest class prospects in the green class in the whole country. He was bred by his present owner, Col. J. C. Kirkpatrick, manager of the Fairmount Hotel in this city. As before stated, his sire is McKinney 2:11½. His dam is the fast mare Flewey Flewey by Memo 15907, a son of Sidney, second dam McAuliffe mare by son of Jack Nelson, he by John Nelson 187, fourth dam by General Taylor, the old thirty-mile champion, and fourth dam by a son of Argyle, thoroughbred.

Charley D. is a clean-gaited pacer, wearing neither boots nor hobbles, and is without any question one of the best headed horses that ever scored for the word, and acts right at all parts of the mile.

His trainer and driver, James Thompson, was asked to write something about this horse for insertion in this issue of the Breeder and Sportsman, but being a very busy man at this time, superintending about fifteen big draft teams that are hauling the structural steel for the new Palace Hotel, stated that he could only find time to indict the following:

San Francisco, December 18th, 1907.

Breeder and Sportsman:—

I will say in behalf of Charley D., that he is

- A fast horse
- A game horse
- A race horse

And one of the best horses that ever wore harness.

Yours truly,

James Thompson.

That is brief, but to the point, and we don't see that any more could be said in as few words for any horse in America.

Charley D. will make an early season in the stud at Pleasanton in 1908.

Farmer Bunch has returned home from his campaign among the first families of Virginia and the Pennsylvania Dutch, and will remain at Pleasanton until purses get ripe on the half-mile rings on the other side next spring.

CONFIDENCE IN OTHERS.

Horsemen have many peculiarities which have aroused a great deal of comment, but among their traits there is one in particular that seems to stand out more prominently than all the rest. It is the confidence that one horseman has in his fellow associates.

The amount of confidence that one man has in another when he is making a horse deal is so great that it seems almost incredulous at times, but, nevertheless, it is true. It is one bright, peculiar trait common to horsemen and has been prevalent ever since the light harness sport was started. Confidence and honor go hand in hand with horsemen and both are continually showing themselves.

Last spring at the May sale of the Fasig-Tipton

would be sweating over it until he had his deed showing that the title was clear and that everything about the transfer was O.K. After that he would worry about the property as long as it was in his possession, but not so with the horses. Bradley knew that they would be taken care of because he had confidence in Tanner, who had trained them and sold them, and he also had implicit confidence in the grooms to take care of them.

Shortly after making these purchases Bradley left for New York and before leaving told Tanner to send the horses back in their stalls and he would return in a week or so to make further arrangements for their future. That was every word Bradley said about the care these valuable trotters should get. He well knew that Tanner would know what to do with them and would take the best of care of them until he should return. He never had a fear about anything happening to them, as he had confidence in the men he was dealing with and knew that they would do what was right.

Such illustrations of confidence are quite numerous among horsemen. In shipping a valuable trotter or pacer around the country a horseman has every confidence in the groom in charge of the horse and knows that the equine will be given the best of care. Were men in other lines of work to be sent around the country with something worth \$10,000 to \$30,000 and probably valued higher than the real money value, they would have to take out a bond before leaving, but not so with horsemen. They will trust a valuable horse with a careful groom any time and always feel safe.

GUY ROCKWELL.

The San Francisco Driving Club, at its last meeting, elected new officers for the ensuing year as follows: President, W. J. Kenney; vice-president, C. Lecari; treasurer, F. Lauterwasser, Jr.; secretary, Chas. Becker. The club's membership is constantly growing and great preparations are being made for next year's races.

DE ORO, SON OF DEMONIO.

Working both ends against the middle and making everybody like it, is what Mr. T. C. Horigan, proprietor of the Capitol Hotel at Dixon, Cal., is doing. He not only owns the hotel and premises, but owns the half-mile racetrack and grounds just outside the town. Where the latter goes hand in hand with the hotel is that cows and chickens thrive there, get ready and do enter the list on the regular bill of fare, and the commercial man that registers once at the Capitol is sure to locate there again on his next trip.

At this track Lou Mativia gives the early training to the fast ones bred in that part of the country, and many smart race horses, including Mona Wilkes 2:06½, Aerolite 2:11½, and McFadyen (2) 2:15½, showed they "would do" before leaving Dixon.

Then to be in line as a breeder, Mr. Horigan has a few young trotters coming on, and has also a stallion that is allowed to serve a few choice mares at private contract. The horse business to Mr. Horigan is really a side issue, and in a small way, but he breeds, trains, buys and sells nothing but the best.

The stallion referred to and the subject of this illustration is De Oro. He is coming three years old, sound as a new dollar, stands about 15.3 and weighs close to 1050 pounds. Built much on the lines of Cresceus and only a shade darker in color—being a rich dark chestnut—may he prove to be as great a trotter. And he may, for with very little work this summer he stepped a half mile over this half-mile track in 1:13, and showed much faster clip. His sire is Demonio 2:11½, the sire of Mona Wilkes 2:06½, Memonio (3) 2:14½, Suisun 2:20, etc., and is a full brother to

Don Derby 2:04¾, Derbertha 2:07¾, Diabo 2:09¾, Ed Lafferty 2:16½, Arner 2:17¾, Jay Eff Bee (1) 2:26½, and Bertha Derby, the dam of Bertha Worthy (2) 2:27¾.

His dam is Hanoro, by Oro Wilkes 2:11, second dam Hannah, dam of Suisun 2:20½, and Grace R., another very fast mare (both by Demonio), Olga 2:29¾, and Elba (3) trial 2:20, by La Grand 2863. Third dam Hannah Price, dam of Lesa Wilkes 2:09, Charles James 2:22¾, Anita 2:25½, and Last Chance (2) 2:26¾, by Arthurton 365. Fourth dam Priceless 2:25½ by Mystery, son of Cassius M. Clay 2:18.

The commingling of these strains of blood has resulted in a grand colt. Demonio's influence shows itself in his muscular frame, while the other families manifest themselves in his high finish and racy make-up.

DE ORO.

tonished by the New Yorker's indifference about the horses and were worrying more about them than Bradley.

They wondered what he was going to do with them. Whether he would have them here in Cleveland for Tanner to train or whether they would be shipped to New York to be used on the speedway. But Bradley was not worrying about them in the least.

Even after he had paid \$22,000 to get the horses out of the sale barn he did not know whether they had left the stable or were still in the barn. He knew that the grooms in charge of them would see that they were well cared for until they received orders what to do, and so he never thought about them, let alone worrying over them.

Had a man invested \$22,000 in real estate he

AT THE OLD GLORY SALE.

[William G. Layng.]

There is no doubt that the greatest sales mart in America for horses of all kinds—drafts, thoroughbreds, trotters and pacers—is New York City, and the one event which has a most magnetic influence on every breeder, owner and purchaser of light harness horses is the "Old Glory Sale" held by Messrs. Fasig-Tipton Company, during the last week in November and part of the first week in December. For thirteen successive years it has been the "Mecca" to which all horsemen wend their way. It is a place where drivers, trainers and owners from far off Russia, Italy, Germany, Austria, France, England, Australasia, Canada, and all parts of the United States meet to inspect the offerings, renew friendships and take away the choicely bred stallions, mares, colts and fillies that are sold. Most of these comprise all that once constituted a stock breeder's investments, and represent the results of years of careful selection, breeding and development. Then again, there are others which are known as record holders, either as sires or campaigners. Such collections form object lessons for horsemen and all who are endeavoring to learn more of the fascinating study of breeding the "two-minute horse." In former years California's leading stock farms consigned their very choicest yearlings and two-year-olds to these sales. The number of large stock farms from whence many world's record holders come have passed away, and in their passing have left no others to take their places, for times have changed and the scattering of so many royally-bred sires and dams throughout America naturally compels one to admit that there is no one farm now—like Palo Alto—that can have a monopoly of record breakers. From the mountains, valleys and plains we see two, three and four-year-olds come and vanquish the choicest products of the few big farms which remain. These apparently "unknowns" have been bred, raised and developed in places where fast horses were almost unknown, and certainly unseen, a few years ago. Hence, this is the era for small breeders, the era which has created Futurity stakes of great value that are attracting the attention of new devotees to the industry. So it will be, and it is well that it is so. Many a large stock-farm owner has "gone to the wall, because he owned one or two stallions and bred every mare he owned to these sires irrespective of their bloodlines. The same rule has driven many a breeder of thoroughbreds to bankruptcy and will continue so long as men become "carried away," as it were, with narrow-minded views on breeding. Small breeders (men owning only a few mares) and stock owners who are progressive, study the breeding, gait, conformation and general characteristics of their mares and send them to the stallions whose blood-lines and speed appeal to their judgment as being the best to cross on these matrons. Distance does not prevent nor capital stop them in their endeavors to breed a Futurity winner, and too much credit cannot be given to the owner of a good stallion who describes the merits of his horse so that all who are interested may read, and the able turf journals of today also deserve untold praise for the valuable information they impart on all matters pertaining to the subjects of breeding, caring for and developing horses as well as for the Futurity stakes which they place at such a low figure for nominators. There should, however, if I may make the suggestion, be other stakes offered for four-year-olds. I am led into this train of thought by recalling the incidents of the few days I spent at the Old Glory sale, and as a Californian I was more than pleased to see that although no large consignments came from the "Land by the Sunset Sea" and not a yearling or a two-year-old bred in the "home of sunshine" appeared in the ring, nevertheless the highest prices obtained were for descendants of Electioneer, McKinney 2:11¼, Sidney Dillon, Lynwood W. 2:20½, Director 2:17, Direct 2:05½, Directum 2:05¼, and Guy Wilkes 2:15¼. Todd 2:14¼, the highest priced one, selling for \$30,000, having a double cross to Electioneer through May King 2:20, and Arion 2:07¾; one cross to Director 2:17 through Directress 2:19, and one to the late Jos. Cairn Simpson's favorite A. W. Richmond through Aloha. This was the highest price obtained since Stamboul 2:07½ was disposed of at the W. H. Hobart sale for \$42,000 to E. H. Harriman, the railway magnate.

There were a number of California trotters and pacers sold, the most notable one being Sunol 2:08¾, Bolivar 2:00¾, Aristo 2:08¼, Charley Belden 2:08¾, Directum Kelly 2:08¾, Edwin S. 2:08, Judge Green 2:09, Mammie R. 2:15½, Nora McKinney 2:12¼, Rajah 2:10¾, Sable Wilkes 2:18, Sonoma May 2:29¼, Stiletto C. 2:12¼, The Roman 2:09½, and Tuna 2:08½. These looked well and all brought good prices, in fact, the sale surpassed any ever held, and the greatest enthusiasm among horsemen prevailed. In the face of a crisis which, "croakers" claimed, would overwhelm it and that the prices would be lower than ever, owners and visitors were astonished and pleased to see that these evil prognosticators were again at fault. The figures and averages obtained are familiar to everyone interested in light harness horses.

For many, many years I had anticipated attending one of these sales and last week I availed myself of the opportunity to do so. To Californian horsemen who have never had the pleasure of being present at these great sales. With all sincerity I claim there is a rare treat in store for them. New

York contains so many attractions that a Native Son becomes bewildered, but in Madison Square Garden, on an occasion of this kind, one feels "quite at home." This "garden" is peculiarly adapted for the holding of such sales. It is fully 150 feet longer and 40 feet wider than the old Mechanics' Pavilion, formerly located on Larkin street, San Francisco. An elliptical clay track twenty feet wide is laid out in the building. All horses are kept in temporary box and single stalls in the basement, which extends the entire length of the building. This basement is illuminated by hundreds of arc and incandescent lamps, and is connected with the main floor of the "Garden" by a long inclined runway, at the top of which is a room 30x40 in which the horses are harnessed and from which they are led or driven to the track. The auction box is placed about the middle of the building, facing the grandstand, where hundreds of people were seated on benches watching the proceedings. An indicator, on which the number corresponding with the number on the horse to be sold, is placed conspicuously behind the auctioneer. About ten feet in the rear of this box is a small structure wherein the staff of clerks, cashier, treasurer, etc., are located. Behind this dining tables were set and a caterer and waiters were in charge, ready to take orders for dinners, a la carte. Toward both ends of the ellipse were sulkies, breaking carts, runabouts and booths with horse medicines displayed. In the basement every stall is numbered to correspond with its occupant, and many had pretty signs giving the name, record and the day on which the animal would be sold.

There is no one in the business who appreciates the value of advertising better than E. A. Tipton, and every turf and trotting journal in America and Europe receives his patronage. The catalogues issued by the firm he represents are models of beauty and correctness and reflect great credit upon the compiler. Mr. Tipton has proven to the satisfaction of consignors and buyers that a full and comprehensive catalogue is the best and only way to induce people to inspect horses; the question of cost in their compilation, printing and mailing does not stop him when it comes to this branch of his extensive business; he knows that horsemen like to read these books, whether they buy at his sales or not, and they take pride in keeping them for future reference.

When the whistle is blown by Mr. Tipton a neatly uniformed groom leads the colt into the ring and hands the lines over to a young man who is to drive the youngster around the ring similar to the way "Shorty Bill" used to handle the weanlings and yearlings for Messrs. Valensin, Corbett and Pierce in California. After the colt is well shown he is stopped in front of the stand and another groom takes him by the head and leads him around for close inspection. Geo. A. Bain, the gifted auctioneer, then asks for the bids after calling attention to the number in the catalogue. He does not yell in the old-fashioned cheap-John style, as if he were selling "hand-me-down" goods on the Bowery, but in a plain, simple manner asks: "Gentlemen what am I offered for this colt (or filly)? You can see he is bred and gaited right, his sire is and his dam is and she is the dam of ——" He then gives the most prominent blood lines quick and to the point and says again: "Make your bid gentlemen, what am I offered?" Then the bidding commences. In his colloquial style, punctuated with flashes of wit, he reminds me more of Wm. Fitch, the magnetic pool seller and auctioneer of Hamilton, Ontario, more than any man I have ever seen. His persuasive eloquence and familiarity with the individual traits of the most prominent horsemen finds a way of enticing prices for bidders that must make the hearts of the consignors and Mr. Tipton leap for joy. He is relieved by his brother, John, another fine auctioneer, and a better team of educated active horsemen in the box it will be hard to find anywhere.

After being welcomed by Mr. Tipton it was perfectly natural for me to see if there were any old Californians there, and the first one I saw was Matt Dwyer, formerly of the Palo Alto force, who before his departure for the East went to Fresno and handled the yearling champion Athadon for Mr. C. W. Warlow, and that year (1891) I saw him drive this colt a mile in 2:28¾ at Stockton. Mr. Dwyer has grown quite portly and is now the owner of the largest livery stable in New York. Under his "protecting wing" I found that I was in a good way to meet all the prominent horse breeders here and the California contingent. Andy McDowell, just from Austria, soon joined us. He has also grown stout, but is just as young looking as the day he drove Harry Agnew's stallion Boswell 2:19½ to his record on the Petaluma track. Johnny Dickerson, John (Directum) Kelly, Millard F. Sanders, Ed Laferty, Harry Stinson, Geo. Starr, D. Stimpson, D. Herpring and a number of others gathered around us and during my stay at the Garden, in the intervals of bidding and at dinner we talked of the good old days of the agricultural fairs in California, and some of the most prominent races and incidents of those meetings. We could not refrain from referring to the changes which had taken place during the past twenty years, even in this sport. We spoke of the skill and good qualities of the drivers who were "stars" at those gatherings. Men who were kind and friendly, no matter if they had to fight against each other for every inch in every race they contested at Stockton, Sacramento, Oakland, Petaluma, Woodland, Chico, Vallejo, the old Bay District track at San Francisco, San Jose Salinas, Fresno, Los Angeles, Marysville, Willows and Napa. We re-

ferred to Chas. Marvin, John Goldsmith, Orrin A. Hickok, Jas. Dustin, Lee Shaner, Thos. Keating, John Gordon, "Long John" Williams, By Holly, Wm. Murray, John Rodgers, Dan Dennison, Jas. Sullivan, Fred Loeber, Peter Brandow, Jas. McCord and "Buster" McConnell, men who have long since passed "over the divide," but the memory of whose achievements in the sulky and in their walks in life will not be forgotten, we hope, for many, many years to come. Then our thoughts turned to a few of those who have joined them, such as Monroe Salisbury, Col. Harry I. Thornton, Henry Pierce, D. E. Knight, Leland Stanford, L. J. Rose, Corbett, G. Valensin, H. W. Crabb, J. H. White, Chas. Chase, N. Killip, Frank Covey, Daniel Murphy, Ed Topham, Jesse D. Carr, Jos. Cairn Simpson, Geo. Woodard and other prominent California horsemen. It seemed as if every horse offered, whose blood-lines traced to California stock, awakened reminiscences. Conversation never ceased, and when at night we sat beneath the brilliantly illuminated arches in this great building our thoughts unconsciously reverted to California, and what a great future there was for the trotting horse industry there, and how well it was holding its own, even at this time, when there were thousands of well bred horses always ready to compete for first honors with those bred there.

I learned that in nearly all the cities to which these trotters and pacers were to be taken there were speedways and driving clubs, and that amateur driving is considered the healthiest, best and cleanest sport that men can indulge in, and this interest is increasing every year. In Philadelphia and surrounding towns there are seven flourishing driving associations and scores of campaigners are owned by the members who handle the ribbons over these horses in contests for ribbons and prizes. Throughout the East and Middle West, wherever I have visited, I have found that nearly every horseman I met was optimistic regarding the light harness horse industry, and many of these I saw at the big sale and they felt pleased that the total amount realized was an indorsement of their views.

POINTING A MORAL.

"Sonny," said Uncle Eben, "did you ever watch one o' dis here little tugboats come snortin' along takin' kyah of a gret big ocean liner?"

"Yass, indeed," answered Pickaninny Jim.

"An' did you ever see one er dese 'lectric motors pick up a han'some, shiny locomotive an' drag it frou de Baltimo' tunnel?"

"Lots o' times."

"An' did you ever see a quiet o' kneesprung white hoss pullin' a helpless automobile to town?"

"I sho' has."

"Well, sonny, dem's all to remind you dat no matter how big or important an' stylish you gits, dar ain' no tellin' when you may need help fum somebody dat don' seem to cut no figure wuf mentionin'."

COMIN' FOUR-YEAR-OLD.

The Houghton Sulky Company (Like all Other Three-Year-Olds) Has a Great Season in the Sale of Racing and Pleasure Vehicles.

Three years ago the Houghton Sulky Company was unknown. They have arrived at a degree of success and business standing in three years the equal of which has, in the great majority of instances, required four to ten times three years, an achievement suggestive of the phenomenal. Merit is what wins at the present time. The strict adherence to correct and legitimate business principles, the getting out of the common rut, the introduction of bright, up-to-date models, new features, has placed this company among the foremost leaders.

Another example of Houghton originality is the new aluminum-lined wood rim, which will be used on all of their track sulkies and speeding carts the coming season. This feature alone is worthy of considerable merit and will do away with the ever-lasting trouble and annoyance of the old style wood rim. This is the past season has been the best in the history especially desirable for half-mile and foreign tracks. Of this company, and many of the foremost horses and drivers used Houghton's last season. Mr. Geers used a Houghton to William O. Byron Kay, and several others of his good campaigners. Forest King, owned by that genial trainer, Mc Haffie, drew a Houghton when he made his world's record for three-year-old stallions over half-mile tracks. Straight Advice, the fastest green stallion of the year, drew a Houghton. Belle Bird, the fastest trotting filly of 1907, as well as many other horses in McDonald's stable, drew the No. 9 sulky. The list further includes such good horses as Copa de Oro of the Durfee training stables at Los Angeles, winner of the fastest five-heat race ever paced in California; Shakespeare, the champion and largest money winning three-year-old pacer of the season. Ecstatic's record of 2:01¾, made at Readville to the style No. 9, still stands unbeaten. The largest money winner that ever started on any circuit drew a Houghton sulky.

The new No. 77, 40-pound matinee cart is surely a winner. Their new catalogue illustrates this light cart carrying six people without a sign of spreading at the axle truss. Their No. 70 is too well known by all trainers to mention any particular instance of its merit, it being recommended by Hersey, Thomas, McDonald, Geers and many others of the most prominent trainers. Their No. 3 cart, in fact, every one of their models is being equipped with double wood forks, running from the shaft to the wheel, a feature that is indorsed by every proficient trainer.

In connection with these styles they manufacture a line of four-wheelers, both single and double seated, the finest top buggy on wheels, a strictly three-quarter job, that will be of interest to any lover of the harness horse.

The new catalogue for 1908 will be the most interesting booklet ever published, and will contain many new illustrations of race track scenes, etc., which alone are very interesting. Any one intending to purchase a racing or pleasure vehicle should by all means get a copy of this catalogue and their interesting quotations.

FIFTY YEARS AGO.

Long Distance Trotting Races on California Tracks Before the War.

[By Geo. H. Tinkham.]

"In the days of old" the turfman admired courage and endurance in the racer as well as speed, and the animal that could trot out a ten or twenty-mile heat without being distressed was admired by all lovers of horse flesh. Hence this paper will treat of enduring rather than speedy horses.

The turf record gives hut three 100-mile trotting races, that of 1853, won by Conqueror in 8:55:53, being the fastest. Perhaps it was to equal or beat this time that a purse of \$2,000 was hung up on the Pioneer course, San Francisco, in 1855, by Geo. Treat, afterward the owner of Thad Stevens and Nell Flaherty.

Two years previous D. O. Mills, the Sacramento banker, imported a roan horse from the east for his private use. He placed him in the care of C. S. Ellis, the driver and trainer, and he developing more speed than was necessary for a carriage horse, was sold to James Valentine. Ellis believing that Sacramento as he was named could trot 100 miles in less than ten hours, obtained the owner's consent and on June 1st started in the race. The track was near the corner of Howard and Twenty-first streets, in San Francisco, and hundreds of sports were in attendance. They were sadly disappointed, however, for the trotter broke down in the 77th mile, this ending his career as a race horse. The San Francisco Herald, in commenting on the failure said only four times had trotters stood the terrible strain, and two of the animals died after the race.

In the previous year, May 1854, a 20-mile match race for \$3,000 was trotted between Green's bay gelding Geo. Morgan and Charley Shear's Fred Kohler. The race created considerable excitement, over \$30,000 changing hands, Morgan winning easily and trotting 21 miles in 70:21½, his driver losing a mile in his count. At the drum tap, Morgan cut out the pace and held it up to the fourth mile, although Kohler moving up at the three-quarter pole, attempted to lead. In the seventh mile Kohler out-footing Morgan, took the heat in 3:13. This brush tired him and Green again moved Morgan to the front. In the eleventh mile Shear began using the whip but his horse was dead and Morgan, jogging along easily, in his 20th mile was only 250 yards behind Kohler, trotting his nineteenth mile.

In 1854, June 22, over the Union track, \$500 up, there was a very pretty two-mile-heat race between Ellis' black horse D. C. Broderick, named after the great political leader, and Crooks Sorrel Ned, each horse to harness pulling 145 lbs. Ned took the first heat in 5:42, the second was a dead heat in 5:46 and Broderick captured the race and coin in 5:50:47½.

Good time perhaps, but very slow in comparison with the pace in January, 1855. It was a match race for \$1,000 a side between Charles Shear's pacer Fred Johnson to saddle, and J. F. Eoff's Lady Mac to sulky, two-mile heats. It was a very unusual style of harness racing and of the hundreds I have seen—not one to saddle. A saddle trotter pulling no weight has the advantage and Fred took the heats in 5:00, 4:51.

A great race for that day and time was the pacing race over the Sacramento Sutterville track, in April, 1855, mile heats 2 in 3 for a \$400 purse. The two fastest nags of the State, Fred Johnson and Prince McGath, were the contestants, Johnson taking the money in 2:29 and 2:28, the second being a dead heat in 2:23.

Peculiar and novel races were contested in those days and one of them was a ten-mile out race over the Sacramento course, between Roanoke to harness and Wm. Shear's double team, Lady Suffolk and Lady Brutus. The double team cut the stride and Roanoke trailing to the seventh mile took the lead and race in 35:12.

In 1857, February 21, over the Union track, the flea bitten gray General Taylor took the thirty-mile race that stamped him as one of the greatest horses of the turf. His opponent was Rattler, a horse of no mean pretension. Taylor took the race in one hour and forty-one minutes, Rattler four minutes behind. Every mile was made in less than 4 minutes, except the 26th, 29th and 30th miles. The first mile was trotted in 3:09, the tenth in 3:24, the twentieth in 3:46, and the thirtieth in 4:29.

At Christmas time 1857, December 16th, the greatest heat race of that day took place over the Pioneer course, San Francisco. It was for a purse of \$1,000, mile heats, three-in-five, between four crack horses from the East, and owned in California. It took seven heats to decide the race, and New York came out ahead, he winning the fifth and two postpoued heats. Jim Barton took the first and fourth heats in 2:32½ and 2:36, Rhode Island the second and third in 2:35 and 2:35, and New York the last three in 2:35, 2:32 and 2:35.

In October, 1857, over the Pioneer track, General Taylor, in a ten-mile drive out, was beaten by L. G. Butler's gray gelding Honest John, a \$2,000 a side match. The track was heavy, and although John pulled a wagon, he won easily in 30:50, both horses being in splendid condition, it was said. At the start Taylor led, but John was driven to the front on the first turn and maintained that position throughout the race. Shortly after his defeat Taylor was started against New York, same purse and race, and won easily in 29:30.

Near Christmas, December 21, 1861, over the

Willows track Gen. Taylor was knocked out by Wm. H. Seward, probably the greatest long-distance horse in the United States. It was a match for \$2,000 a side, good day and track, W. D. Chapman backing Taylor. It was the inauguration of the Willows course, which succeeded the Union and Pioneer tracks, the track last named then being the camping ground of the Government volunteer soldiers.

On the day of the race Chapman was about to pay forfeit, as the movements of his horse did not please him, but remembering the fact that it was the first race, he resolved to lose his money rather than injure the future prospects of the track.

Over the contest there was great excitement, for Wm. M. Seward, then seven years old, a bright chestnut, was an unknown horse by Bellshazzar, bred and raised in Stockton by Henry Trembley, the owner also of State of Maine. Two days before the race every stable rig was engaged, and on that day the road was lined with teams, saddle horses and footmen. A little before 3 o'clock the horses were called up, and the fourteen-year-old campaigner Taylor came upon the track driven by J. M. Daniels, while Barney Rice drove Seward. The judges were Major Meeker, Fred Collier and Captain Card, the owner of New York. Taylor was the favorite, a 100-to-35, and he obtained the pole.

As the horses came down the track, Taylor in advance, Rice nodded to the judges and the word was given. Daniels kept his pace, as his only chance was to tire Seward out, the latter being able to outfoot Taylor anywhere on the track. Rice caught onto Daniels game, and on the back stretch moved up to Taylor's wheel and then fell back. At this the Taylor men cheered and increased their bets on the favorite.

Taylor took the mile in 3:08. On the second mile Seward again came up and fell back, and again coming up down the stretch, Taylor, a length ahead, took the mile in 3:02. At the end of the sixth mile, trotted in 2:59, Seward took the lead and was not passed from that on, taking the race in 30:16¼. They ticked off some pretty fast miles, the fourth in 2:57, the sixth in 2:58, and the seventh in 2:57¼.

Christmas, December 20, 1862, the Sacramento sports rode to the track to witness a match race for \$1,000 a side over the Union track between the pride of Sacramento, the chestnut mare Belle of Sacramento and A. F. Smith's mare Lady Lightfoot in a ten-mile contest, rain or shine.

The track was heavy and slippery from a previous rain, and Belle came onto the track with Geo. W. Bidwell in the sulky, he being fifteen pounds overweight. Smith drove his own horse, and although the Lady had the advantage of weight, the betting was about even.

The judges were Robert Beck, E. M. Skaggs and John Coleman, and at drum tap the horses started, first time down the track, the Lady leading. The two men kept their relative positions not over thirty feet apart up to the end of the seventh mile, Lightfoot about twenty-one feet ahead. Then came the fight for lead. The eighth mile was contested from wire to wire, the Lady winning in 3:02. Thus they drove up to the home stretch of the ninth mile, when Belle, forging ahead, took the mile in 3:00. Smith now began whipping the Lady, but it was all off, and Belle took the heat in 3:05 and the race in 31:10¼.

Bidwell, who came up from San Francisco to drive the mare, was so pleased with her performance that a few days later he bought her for \$2,500. On the 5th of January, the following challenge appeared:

"Lady Lightfoot wants another pull at the Belle of Sacramento before she rings herself out of Sacramento so pompously. Lady can beat Belle any race from one mile to ten miles, good day and track, any time within two months, for from \$1,000 to \$2,000. A. F. Smith and D. E. Callahan, Golden Eagle Hotel."

It was probably a bluff, for when Bidwell responded through W. H. Taylor, to trot ten miles for any amount, preferring \$3,000, \$4,000 or \$5,000 as the wager, they were, as silent as a sphinx.

GOOD FOR BAD LEGS.

Mr. Thos. Murphy, the driver of the world's fastest two-year-old stallion, Trampfast, and Mr. Mike Bowerman and Mr. Harry Stinson, the trainers of the two fastest three-year-old stallions, Gen. Watts and Kentucky Todd; also Mr. Ira Hays, trainer and owner of the fastest four-year-old stallion over the two-lap track, The Conquest, are all users of Wilcoxson's Perfection Liniment, the greatest remedy ever known or used on horses' legs. If you are not using this remedy there is still time to get in on the old prices. It is guaranteed to be the best remedy you ever used, or money refunded. Ask your dealer for it and if he does not carry it in stock, we will be glad to quote you our special price to trainers and give you our strong guarantee that it will please you. This remedy is also a blemish cure that will cure. You take no chance in giving it a trial. The F. A. Wilcoxson Remedy Co., Tiffin, Ohio.

About the surest way to get a Christmas present that just suits is to buy your own. If a fine, new sulky, cart or road speed wagon is what you have been longing for these many months, go out to 531 Valencia street and see W. J. Kenney, who can fit you out with just what you want and at prices that are right even in these days of clearing-house certificates and other kinds of skin plasters. The McMurray sulkies he has in stock can't be beat.

OWN BROTHER TO STERLING MCKINNEY
2:09/4.

The largest money winner on the Great Western Circuit this year was the California-bred stallion Sterling McKinney that trotted to a race record of 2:09¼ and was pronounced by many of the best horsemen and experts in the country as the most likely 2:05 trotter in sight for 1908. Sterling McKinney was foaled in 1900, and was bred by James W. Rea of San Jose, who sold him to Chas. A. Durfee, who in turn sold him to Sterling R. Holt of Indianapolis. Mr. Holt had him worked, but a mile in 2:16 was the best he showed him, and as he had Sidney Dillon as a sire he sold the McKinney stallion. In new hands Sterling McKinney began showing very fast at the trot and today is considered one of the very few horses likely to reduce the stallion record.

Capt. C. H. Williams of Palo Alto purchased the dam of Sterling McKinney from Mr. Rea and bred her again to McKinney, the result being a brown colt foaled in 1902 and registered as Unimak 40,936. This stallion is a grand-looking horse that Mr. Williams has had trained a little every spring, with the idea of not permitting him to race until he is six or seven years old, as he was a large growthy colt and he desired to take no chances of having him knocked out, but the horse trotted a mile in 2:26 last summer and has shown quarters at a 2:10 gait.

As an individual there are few stallions that attract more favorable attention from breeders than Unimak, and the announcement that he will be in the stud at Pleasanton during the season of 1908 will be gladly received by owners who are looking for a son of McKinney that has size, good looks, breeding and is a fast natural trotter.

Few sons of McKinney on this coast carry more of the fashionable blood lines than does this grand-looking stallion. Of McKinney himself little need be said, as every breeder in America is familiar with his history and his standing as a sire. He is the only horse that has sired eleven 2:10 trotters, and he is also the sire of seven pacers in that list, and has 44 with records of 2:10 or better and 62 in the 2:20 list.

Twenty-third, the dam of Sterling McKinney 2:09¼ and of Unimak, is by the great race-horse and sire Director 2:17, the sire of Nathan Straus 2:03½, Directum 2:05¼, Direct 2:05½, and of the dam of such great trotters as John A. McKerron 2:04¼, Ozanam 2:07, Leonardo 2:08¼, Sterling McKinney 2:09¼, and many others that have gained world's records and earned large sums for their owners on the race tracks, in some of the greatest contests ever seen on the trotting and pacing turf.

Nettie Nutwood, the second dam of Unimak is by the great Nutwood 600, greatest sire of broodmares that ever lived. Up to the close of 1906, Nutwood was the sire of 179 standard performers, 145 sons that had sired 556 trotters and 462 pacers and 155 daughters that had produced 214 trotters and 71 pacers. Nutwood's daughters produced Arion 2:07¾, Custer 2:05¼, and 14 more in the 2:10 list. Nettie Nutwood is herself one of Nutwood's producing daughters and is the dam of Hillsdale 2:15, one of the fastest trotters ever bred in California, and a horse that with any ordinary luck would have had a mark below 2:10.

The third dam of Unimak was a daughter of Ethan Allen, Jr., 2902, one of the best horses of the Morgan strain ever brought to California, and the fourth dam was by that great thoroughbred Williamson's Belmont, whose blood is in the veins of such trotters as Sweet Marie 2:02, John A. McKerron 2:04½, Directum 2:05¼, and other great champions.

John Phippen will have Unimak in charge at Pleasanton track, and arrangements have been made for good pasturage for mares sent to the court of this son of McKinney. Owners of good mares should correspond with Mr. Phippen as to terms, etc. They will not have an opportunity to breed to a better son of McKinney, breeding, size, conformation and trotting speed all considered.

Payments are due January 1st on colts entered in the Occident Stakes for foals of 1905 and 1906.

SOME WRONG IMPRESSIONS.

If you owned General Watts (3) 2:06¼, the greatest money winning colt of the year, or if you owned Sterling McKinney 2:09¼, the biggest money winning trotter on the Great Western Circuit, or Straight Advice 2:05½, leading money winning pacer of the same circuit, and had made such a conspicuous campaign as either of these horses made, and you intended to make a stud season with them in 1908, you would be apt to think that they would be too well known to be necessary to advertise either one of them, but that would be a great mistake, because then is the time of all that they ought to be put conspicuously before the breeding public. Fortunately the owners of these horses, General C. C. Watts of Charleston, W. Va., L. C. Shuler of Indianapolis, and Geo. K. Cornell of Chicago, are the kind that appreciate this fact, and they are having catalogues made, setting forth the merits of these stallions, as well as their small band of broodmares, to the best advantage, and they further realize to have this done it must be done by experts, consequently Magnus Flaws & Co., of Chicago, are preparing the handsome brochures that will make souvenirs to be valued by every student of the breeding problem. If you contemplate getting out a catalogue of your stock, or a stallion card, stallion poster, or want a stallion service book, or any specialty needed for a stallion, write Magnus Flaws & Co., 358 Dearborn St., Chicago, for samples and prices, and their work is not only the best to be had, but their prices are the lowest.

At the Old Home of Happy Medium by Wm. G. Layng.

When Nancy Hanks 2:04, the once famous world's champion trotter, was led into the sales ring during the Old Glory sale at Madison Square Garden last Thanksgiving Day, the crowd which forged its way around her in front of the auction box, wherein E. A. Tipton and Geo. A. Bain, the auctioneers, were announcing her qualities as a race mare and matron, preliminary to calling for bids, it seemed as if their remarks started a flood of reminiscences among the older horsemen, and when the last bid was called and she was sold to Joseph and Edward Madden of Lexington, Ky., for \$1,500, little groups of famous drivers spoke of her and Happy Medium, her sire, many claiming that sentiment had much to do with her sale to these young men, for their father, John E. Madden, one of America's foremost horsemen, dates the beginning of his long and successful career to the days which he spent as a young man in Philadelphia with the late Robert Steel, proprietor of the Cedar Park Stock Farm, who owned Happy Medium. Mr. Madden's well known devotion to Mr. Steel, and his high regard for Happy Medium and his best bred descendants are universally recognized, and no doubt he will watch the "queen" hrowsing in the blue grass of Kentucky, near the home of her kith. No broodmare he ever owned will receive greater care, for in looking after her welfare he will feel that all he may do will but feebly attest the great debt of gratitude he had for the owner of her sire, who showered him with kindness over thirty years ago. For Mr. Steel never felt it a trouble to encourage by word and deed every deserving young man who was struggling to earn an honest livelihood. Nancy Hanks was Mr. Steel's idol, although not foaled on his farm. She was bred by Hart Boswell of Lexington, Ky., who sold her seventeen years ago, when she was a four-year-old, to J. Malcolm Forhes for \$40,000. While in the latter's possession she won a number of races, earned over \$20,000 in exhibitions and after being placed in the breeding ranks on his farm produced Admiral Dewey 2:04½, Lord Roberts 2:07½, Markala 2:18½ and is the granddam of Vice Commodore 2:11 and Vanitza 2:29½. After the death of Mr. Forhes she was sold three years ago to J. M. Johnson of Ponkapog, Mass., for \$4,000, who consigned her to this sale. It is claimed she is now in foal to Todd 2:14½.

There has been a certain fascination for me about Happy Medium, her sire, ever since I saw his son Milton Medium in Lake county, Cal., in 1878. At that time I tried to prevail on several friends in Lakeport and Keiseyville to breed their mares to this horse, and, besides, I knew Jim Eoff and often heard him speak of the time he drove Princess 2:30, the dam of Happy Medium, in her races, and he never seemed to tire speaking of her gameness. I determined then that whenever an opportunity presented itself to visit the home of Happy Medium I would do so. On a recent visit to Philadelphia I accepted an invitation to go there and thought that the patrons of the Breeder and Sportsman might be interested in reading of the place and a partial list of the trotting stock that once occupied the paddocks and stalls on this fine farm.

Cedar Park Stock Farm was once considered "away out of town," but now it is within the northern boundary line of Philadelphia, the "City of Brotherly Love." In 1868, the late Robert Steel and Joseph Gallagher inspected this tract of land with a view of making it an ideal stock farm, and, as it suited the former, he purchased it and placed Mr. Gallagher in charge as superintendent, had his plans drawn and in a little while barns, stables, carriage houses and paddocks and a racetrack were dotting the landscape. On a knoll commanding an unobstructed view of this 200-acre farm, Mr. Steel erected his residence on the southerly side was a circular grove of chestnut trees, and on the northerly side he planted a number of cedar trees and from these the farm derives its name.

In many respects Mr. Steel was a remarkable man. Possessed of keen business ability combined with an innate love for fine horses, he allowed nothing to interfere with his plans to prove his ideas correct regarding the breeding, caring for and development of light harness horses. Being a man of great wealth and endowed with good taste and judgment he felt that nothing could thwart his ideas or make him tighten his purse strings whenever he saw a trotter that suited him. His success as a horseman was almost phenomenal, and to the stallions and mares he bought and bred can many of the champions of today be traced.

There are over 300 box stalls on the place. One row is inclosed in a building. Around the outside of this row of stalls is an elliptical covered driving

track, one-eighth of a mile in circumference, so that horses could be worked on it all winter. Light is admitted to the course through skylights and windows. In all of the latter are little panes of light blue and canary colored glass alternating. To the visitor the old dilapidated building is a revelation, only a relic of its former beauty, but it still shows that neither money was spared nor architectural taste curbed whenever a good effect was desired in its construction. I send a picture of this building, for in one of the largest stalls Happy Medium was kept and in another by Holly's California campaigner Woodnut 2:16½ found a home.

These buildings were finished early in 1871. Mr. Steel then visited Orange county, New York, where Rysdyk's Hambletonian and his son Volunteer were standing. He was in search of a horse to place at the head of this farm. At Mr. Alden Goldsmith's suggestion he drove over to Suffern, New York, and purchased the eight-year-old stallion Happy Medium 2:32½, by Rysdyk's Hambletonian, out of Princess 2:30, a mare that made quite a reputation in California. Mr. Steel paid \$25,000 for the stallion. This sale caused as much of a furor in those days as the sale of Arion for \$125,000 did many years after. He was so proud of his purchase that he immediately bought some of the Goldsmiths' best young mares and shipped them here. It was with pride he welcomed the scores of prominent people who came from far and near to see the farm and horses, and incidentally enjoy his hospitality. That day's enjoyment was followed by many others, and in the beautiful residence or on this velvet lawn in the shade of these wide-spreading trees, he greeted most of the foremost horsemen of America. Many of whom have since joined him in that land where sooner or later all of us must go. A few of the names of these recurred to me as I stood there and thought of Leland Stanford, A. J. Alexander, Jos. Cairn Simpson, Alexander France, J. W. Daly, Wm. M. Singlerley, John H. Shults, C. J. and Harry Hamlin, Wm. Simpson, Robert Bonner, W. W. Estill, Wm. E. Spier, J. H. Wallace, Wm. Corhitt, L. J. Rose, H. F. Stout, J. McFerran, B. F. Tracy, Col. H. E. Russell, W. C. Whitney, A. H. Moore, Richard Penistan, L. U. Shippee, C. F. Emery, Jno. E. Turner, Commodore Kittson, Wm. H. Allen, J. Malcomb Forhes, Wm. Rysdyk, Alden Goldsmith, Chas. Bachman, Monroe Salishury, J. E. Madden, Cyrus Lukens, P. J. Kellogg and others who have contributed so much toward bringing the "American trotter" before the public, and some are still in the land of the living, for I saw them at the Old Glory sale.

The selection of Happy Medium as a sire attracted the attention of owners of some of the most prominent mares in the country, and the result was that many famous sires and dams were foaled here. In one of the paddocks I was shown the place where the twenty-year-old mare Tackey 2:26, the marvelous gray daughter of Pilot Jr. 12, dropped a colt that in some sections was considered the "King among sires," Pilot Medium. It was within this inclosure this spotted gray foal, while playing, knocked his hip down. Mr. Steel told the breeder, a Mr. Alex. Davidson, of Williamsport, the youngster was well worth saving, so, when Mr. Walter Clark, a horse breeder from Battle Creek, Michigan, came to buy a Happy Medium colt, Mr. Steel advised him to take this one. This mare Tackey was also the dam of Class Leader 2:22½, the trotter which first brought that great horseman John Madden of Lexington before the public and gave him his start in life; doubtless it was with sentimental feelings toward Happy Medium that he had his sons buy this sire's most illustrious daughter Nancy Hanks.

Among the great brood mares that were at one time on this farm were Princess Ethel by Volunteer. She was the dam of Lady Ethel 2:24½ and Phantom 2:29½ and Queen Ethel, the dam of Bumps 2:03½, Baron D. 2:10, Baronine 2:24½ and Moko, one of the most fashionable sires of early and extreme speed in the world, being the sire of Ferenno 2:05½, Brenda Yorke (3) 2:08½, Susie N. (3) 2:09½, etc. Another famous mare bred here was Neta Medium 2:22½ which, when hitched with Maxie Cobb, another Happy Medium, established the world's record in 1884 of 2:15½.

Belle Knox by Knox was bred to Epaullet 2:19 here, and produced Brummell, the sire of Lucille 2:07 holder of the world's champion record to wagon for the year 1900.

Buzz Medium 2:20½ by Happy Medium, was a Cedar Park mare. She is also in the great broodmare table having produced Alkoran 2:16½ and Flutter 2:26½, and her daughters are the dams of Buzz Woodnut 2:20½ and Minneto 2:19½.

Mr. Steel purchased twenty-two yearlings from A. J. Alexander of Lexington, Ky., for \$22,000. Among them was Russella, a sister to Maud S. 2:08½, and when the "Queen" earned her record Mr. J. E. Tbayer of Boston came to the farm and purchased this gray daughter of Harold for \$10,000. Erin 2:24½ was another in this consignment. He proved a good sire of broodmares and was once owned by the late Mr. Henry Pierce, of San Francisco. Erin 2:29½ was bred to Farce 2:29, on this farm, the produce being Bon Mot, dam of the stake-winning four-year-old Bon Voyage 2:15½, now owned by Mr. W. A. Clarke Jr., of Butte, Montana; Endow 2:14½, Bequeath 2:20½, etc. Warlock, the handsome stallion that was shipped to England to sire coach and carriage horses and was then purchased for Mr. S. A. Greene, of Kalamazoo, Mich., through Mr. Madden, was another member of this consignment. Daybreak, by Harold, out of Midnight (dam of Jay-Eye-See 2:06½, Electricity 2:17½, etc.) by Pilot Jr. (12), was sold by Mr. Steel to Mr. Robert Bonner. Waterspite, by Belmont, out of Waterwitch, by Pilot Jr., was another of Mr. Steel's purchases. Ahbess (dam of Steinway 2:25½) was owned by him and afterwards sold at a big advance. He also purchased the gray pacing mare Lucy 2:14, one of the quartette of sidewheelers which went down the Grand Circuit in 1879 and 1880, furnishing so many exciting finishes during those years. The others were Sleepy Tom 2:12½, Rowdy Boy 2:13½ and Mattie Hunter 2:12½. Wm. Corhitt, of San Mateo, bought Lucy here and sent her to California and bred her to Guy Wilkes 2:15½, the issue being a chestnut colt with high blaze and four white legs; he was named Chris Smith, and got a pacing record of 2:14. Lucy was then made one of the members of the galaxy of broodmares at Palo Alto and bred to Electioneer, produced trotting fillies that were all solid hays or browns, thus convincing Mr. Corhitt that Electioneer could control gait and color.

Cigarette (dam of Cienega 2:15½, Kerwin 2:20½, Curio 2:25, The Nestor 2:27½ and Calvo 2:29½) by Administrator, was also owned by Mr. Steel.

Lady McCann (dam of Rupert Epaullet 2:26½, Marcela Epaullet 2:23½ and Eagle Woodnut 2:20½) by Red Wilkes, was another. Ruth Medium by Happy Medium out of Tamora, by Almont, was another bred by Mr. Steel. She produced Captain Walhridge 2:18½, Fayne Epaullet 2:26½, Hulda Epaullet 2:28, Ruth Woodnut 2:29½ and Yvette Epaullet 2:30. Mr. Steel purchased the gray mare Melody from Robert Bonner, of New York. She was by Nuthourne, out of Music 2:21½, by Middletown, and produced Adele Epaullet 2:24, Trader 2:25½, and Queen of Melody 2:28½. Toto, by Princeps, was another that nibbled the succulent grasses on this farm. She is also in the great broodmare table, being the dam of Falkland 2:13½, Brookline 2:29½, Chris Kringle 2:24½ and the dam of Capt. Bacon 2:10½, The Charming 2:15½, Fascination 2:15½, Spreckles 2:17½, Jewel Woodnut 2:17½, Holly Woodnut 2:20½ and Charming 2:17½.

Another of America's leading broodmares was owned on this farm, viz.: Four Lines, by Blacklock. She was the dam of the great sire Woodline 2:19, Cedarwood 2:24½, Foxglove 2:24½ and Nemesis 2:28, and her daughters have six in the 2:30 list. Mary A. Whitney, by Volunteer, was also one of the lot that Mr. Steel bought from Alden Goldsmith. She is the dam of Brava 2:14½, Nomad 2:19, First Love 2:22½, Blue Blood 2:22½. Another mare he purchased at the same time was Lady Grace, by Hamlet, out of the dam of Gloster 2:17 (a handsome horse that died shortly after his arrival at the old Bay District racetrack in San Francisco). Lady Grace was bred to Happy Medium, and produced Graceful 2:23½, the latter was bred to Smuggler 2:15½, and the produce, Grace Smuggler, became the dam of that sensational campaigner of 1906, Nutboy 2:07½. Priceless, by Volunteer, was another and her son, Ernest Maltravers 2:22½, won the first stake competed for by one of Mr. Steel's horses. Priceless was a full sister to Driver 2:19, the best campaigner ever owned by Mr. Goldsmith. Priceless had one daughter Princess, by Administrator 2:29½, also bred on this farm, which Mr. Samuel Gamble of San Francisco purchased for Messrs. Seth and Daniel Cook, Danville, Cal. She is the dam of Derby Princess 2:08½, Prince Away 2:11½, Princess Derby 2:13½ and Neva 2:27.

Happy Princess 2:22½ was also bred here. She was the dam of Lucia 2:22½, Happy Dan 2:26½ and Stormcliff 2:13½, sire of The Broncho 2:00½, one of the greatest pacers of 1906.

Bess (sister to Powers 2:21) by Volunteer, was another of Mr. Steel's selections. She was the dam of Camille 2:20½, dam of Red Medium, sire of fourteen in the 2:30 list.

So one could go on filling columns with the names and histories of mares and their produce which made this farm famous and contributed so much toward increasing the list of wonderful trotters and pacers. Very few stallions were kept here. Milton Medium, 2:25½, brought to this farm by Mr. Steel from Suffern, N.Y., at the time he purchased Happy Medium, in order that horsemen could see what a sire of beautiful horses the latter was. Milton Medium being overshadowed by his sire, was never patronized. He was sold to J. S. Mendenhall of Clarion county, Pa., who took him to Lake county, California, and bred him to a few mares. One of them produced Lou Milton, the dam of Lou Dillon 1:58½, the fastest trotter in the world.

PREACHER TURNS FARMER.

On that memorable Fourth of July at Long Beach when the irresistible small boy shot my mare in the abdomen with an air gun and I tried to play sky-rocket and lit on my right arm in the street, my whole system received more of a shaking up than I realized, and finding myself exceedingly short of nerve force, I purchased an eighty-acre mountain ranch in the Santa Cruz Range last April, resigned my work in Long Beach, purchased a big black, 1,200-pound, eight-year-old standard bred, and made a drive of about 450 miles up the Coast.

Friends told me of how far bronchos could travel without feed, of how sure-footed mules were (I have found them dead sure with the hind feet)—all varieties of plugs were recommended, but I have found the good standard bred so satisfactory on long trips that for a number of years I have driven nothing else. At one time our horse was two-thirds out of sight in the quick sands of the Salinas River, but his level head and game spirit saved the day.

I shall not attempt to give you a detailed account of our trip, but will say that after my drive with Sadie Moor 2:22 from Humboldt Bay to San Francisco, and another from Long Beach to Santa Cruz, with a standard bred gelding, I do not hesitate to state there is accommodation for 50,000,000 people in this glorious State of California. I prophesy this to be the center of a new civilization, in time, and consider we are as yet only pioneers.

On June 13th, at noon, we arrived on the ranch to find a barn without feed and a house without provisions. We began in genuine pioneer style to do business. I had the choice of submitting to the tortures of an osteopath to correct the irregularities of my broken shoulder, or such exercise as would come from general work on the farm, to answer the same purpose. I chose the latter. Twelve acres of ripe oat hay stood on the ground. It took me about thirty days of tremendous effort to land it in a stack, as I had to mow much of it with a scythe. Having no implements as yet, I used a piano box on an improvised sled and drew it all in with my standard bred. He was as patient and gentle as a work ox. One day I said to him, "Billie, these are pretty hard times." He gave a horse smile and said, "Mr. Speers, this is a snap. I was a lady's surrey horse for three years in the City of Los Angeles, and farm life, now, is a picnic for me."

BERTA MAC 2:13¼.

I bought a three-year-old heifer with a calf five days old, about the middle of August. The little fellow was a born sucker. So was I to ever purchase him. He never got over that first five days' nursing. I could not train him to drink, but we made very choice veal of him.

There is always a pleasure associated with what you do thoroughly, no matter how difficult. He was hand fed, for the first three weeks we gave him warm skimmed milk with a big handful of rolled oats and a little handful of oil cake meal, boiled well in water. I would carry this slimy stuff to the pen and reach out my hand to that calf. He would suck my hand with zeal. I would bend over and lower my hand in the feed while he beat time with his tail. The "goo" would disappear so fast that you could imagine the bottom of the pail loose. This calf showed great speed as a sucker, but he got into some bad habits. He would generally break on the home stretch. He would break away from my hand like a flash, but he would catch, just as quick. He would catch me by the ear. I did think of wearing an old pair of knee-boots on them during the operation. A shot in the neck from the slippery snout of a bunting calf has a tendency to make the language of an old preacher foul gaited. I tried toe weights, with very good effect—upon the calf. I put the toe weights on behind. Once or twice I overreached and sprung a few bad quarter cracks on him.

When the bucket was empty I made a grab for it and a scramble for the gate. The calf was a single-footer and would show a wonderful burst of

speed as I tried to make that gate. It was a very mixed gaited affair. If I did not outstep him he would ram his slippery nose between my legs, high up. I think he enjoyed his own cussedness. This generally finished the "work-out," after which I walked myself around for an hour's cool-out.

I don't like being wet-nurse to a calf, but hereafter I expect to eat hand-fed veal in silent meditation. It means much.

I very much prefer raising colts to calves. At the Brace sale I purchased Lizzie S. 2:28, by Antevolo; Belle W., dam of Bolivar 2:00¼, also the last filly that Monroe Salisbury bred, sire Greco, dam by Directum. The first two are in foal to Sadi Moor 39989, and make me a beautiful farm team, full of vigor, strong and level headed. I feel most at home with horses, but I must say I was very much impressed with the gratitude of the cow I bought. When I unloaded the calf from the wagon the anxious and excited cow, which had followed him up the mountain, did not know how to express her gratitude. She licked my hand, she licked my back, she licked my arms. I thought her the most grateful animal I had ever handled. It afterwards dawned upon me that perhaps she thought she had twins.

Thanking you most sincerely for past courtesies and congratulating you upon the paper which becomes more interesting each year, believe me, yours most sincerely,

W. J. SPEERS.

P. S.—I am sorry to write you that the horsemen of Santa Cruz have not been able to undertake the building of the track here. There is less prospect to-day than there was three months ago, the principal reason being that the promoters and the owners of the property cannot come to terms. There is quite a large number of enthusiastic horsemen in this vicinity, and a number of good horses, and more young stock coming on. Among some of the horses are F. E. George's pacer Kermit, by Henry Nutwood, out of Two Minutes by Wildnut, that has been a mile in 2:10¼, worked by W. H. Williams on the Salinas track. A yearling (entered in the Breeders' Futurity) and weanling, full sister and brother respectively to Kermit, owned by E. V. Cowell. Then there is Dione 2:07¼ by Eros, owned by S. H. Cowell, that has just weaned a Cupid 2:18 filly. Central Girl by Nutwood Wilkes, owned by Messrs. Cowell, has just weaned a Kinney Lou colt, and a number of others are owned by Messrs. Cowell. Then there is Mr. E. McHenry Train, who will soon move from Soquel to Santa Cruz, and who owns the great colt Ray o'Light (2) 2:13¼. Mr. T. B. Daken has a weanling colt by Dictatus Medium, out of a standard bred mare. A. G. Pryor has John A. 2:12¼ and Cassie G., recently bought at the Brace sale. L. J. Caplatzi has a weanling by Welcome, out of a mare by Nutwood Wilkes. J. M. Ferguson has a weanling by Welcome, out of a mare by Brown Jug. R. M. Whidden has a three-year-old by Mestor, a son of Sable Wilkes, out of a mare by Brown Jug, second dam by Gen. Benton, that he will send away in the spring to be worked, and many others which I cannot mention at the present time for want of space.

S.

FOR EXPORT.

The following horses were bought at the Old Glory auction, New York, for export:

Golddust Maid 2:07¼, brown mare, twelve years old, by Silverthorne 2:15, dam Mamie S. by Bobby Golddust; Frank Caton, Moscow, Russia.

General Kuser 2:18¼, brown gelding, ten years old, by Colonel Kuser, dam Erba by King Red; Harry Bell, Winnipeg, Manitoba.

Hester Schuyler 2:17¼, bay mare, seven years old, by Red Chute 2:24¼, dam Cammie L. 2:21 by Harold; J. S. Elliott, Toronto, Canada.

Miss Betterment, chestnut mare, six years old, by Directum Kelly 2:08¼, dam Miss Betterton 2:21¼ by Betterton; John Barnes, St. Thomas, Ontario.

Directum Lass 2:09¼, brown mare, eight years old, by Directum 2:05¼, dam Madera by Dexter Prince; Frank Caton, Moscow, Russia.

Ausberg 2:15¼, black mare, seven years old, by Austral, dam Taveretta by Sternberg 2:15¼; H. Bell, Winnipeg, Manitoba.

Bi-Flora 2:09¼, bay mare, twelve years old, by Expedition 2:15¼, dam Heliotrope (dam of six) by Princeps; Frank Caton, Moscow, Russia.

Alfo 2:12, brown gelding, six years old, by Bellini, dam Alma Nutwood by Nutwood 2:18¼; H. F. Pierce, Stanstead, P. Q.

Directum Kelly 2:08¼, bay horse, thirteen years old, by Direct 2:05¼, dam Rosa Ludwig by Anteco 2:16¼; Charles Neidl, Vienna, Austria.

The Phantom 2:10¼, black horse, five years old, by Boreal 2:15¼, dam Shadow 2:18 by Night Hawk; Frank Caton, Moscow, Russia.

A yearling trotter by Sidney Dillon, out of Future Princess, by Chimes, has trotted a mile in 2:44½ and a half in 1:19.

Sonoma Girl 2:05¼; Nut Boy 2:07¼, and Lotta 2:08¼, of the Crabtree stable, will be wintered at Savannah, Ga.

The Abbe (3) 2:10¼ is expected to be one of the best trotting stallions out the coming year. He has grown a great deal.

Happy Medium was at this farm nearly eight years. He was seldom driven, receiving nearly all his exercise under saddle ridden by Mr. Gallagher. Wm. T. Withers, of Kentucky, then purchased him from Mr. Steel for \$25,000. Happy Medium sired 88 trotters and 6 pacers, 69 sires of 284 trotters and 151 pacers and 78 dams of 100 trotters and 37 pacers. His blood is highly thought of by all horse breeders and none more so than the late Mr. Steel. After he sold the horse he paid \$29,500 for Epaulet 2:19 and Administrator 2:29¾, to breed to the Happy Medium mares. This last named sire was an excellent investment, one of his daughters produced Ashland Wilkes 2:17¼, sire of John R. Gentry 2:00¼, and many others. For Pedlar by Electioneer, Mr. Steel paid \$5,000 as a two-year-old. He purchased Don Monteith for \$2,500, and \$23,500 was the amount he paid for Antevolo 2:19¼, bred by the late Jos. Cairn Simpson. Mr. Steel sold this horse shortly after for \$40,000 to some horse breeders in Michigan. Woodnut 2:16¼, a chestnut horse bred by Peter Coutts of Mayfield, Cal., sold to the late By Holly of Vallejo, who trained and raced him, and was then sold by him to Mr. Steel for \$16,000. Woodnut died the property of Mr. Gallagher on a farm close to Cedar Grove Stock Farm last year.

In a few years this beautiful place, which once occupied so prominent a place in the trotting horse world, will be divided and sold for residence purposes and all traces of its former beauty will be obliterated.

THE FOUNDATION OF A FAST TROTTER.

[W. Parsons.]

In the year 1878 I was employed by Capt. O. H. Perry to take charge of The Ranchito, near Soledad Mission, in Monterey county. There were about sixty horses on the place that had to be herded on the stubble, and as there were no fences it was necessary to corral them every night. They were mostly young animals. There was one smooth turned, clean looking filly in the lot that took my eye. In driving them up in the evenings, I noticed that she showed more trotting action than any of the others, and one day I asked Captain Perry what she was by. He said her sire was a horse called Goldnote, a son of Kentucky Hunter. I always believed in commencing where the other fellow left off, and especially so in this case. I never knew a better judge of horse flesh than he.

He always bred to the best regardless of cost. This filly was bred near Stockton, Cal., before Captain Perry came to Monterey county.

When I left the place I bought her sire and and a half-sister, paying \$250 for them. The man who broke her called her Nettie, but I changed this to Maggie when I owned her. She was never trained for speed, but was a fast roadster. One of my neighbors, who thought he had a fast trotter came by my place on his way to town one day, just as I was starting in the same direction. As I came into the road I remarked that I could beat him to Salinas, six miles, for the drinks, and he replied: "I will go you." So off we went and I won the race and stakes, but beat him

I lost two or three of Maggie's first foals from one cause or another, and only about fifty yards.

the only one I succeeded in raising from her was a filly I called Gipsy, that was by Erwin Davis 5558. This filly grew to be a mare of fine style and finish and could show 2:30 speed and time with little or no training. When Gipsy was four years old I bred her to Altoona 6288, in my opinion, one of the best sons of Almont 33. The result of this union was Alberta, that took a race record of 2:29¾ at Salinas in 1897, and afterwards won a race in 2:25, although this is not in the Year Book. But for an accident Alberta would have trotted in 2:15. Bred to Fred Arnold, Alberta produced a colt that was gelded and called Dido. He was very fast and trotted miles in 2:28 before he was sold to parties in the Hawaiian Islands.

Then I concluded McKinney 2:11¼ was the best sire to mate Alberta with and her first foal by him was Berta Mac 2:13¼, the largest money winner in regular events on the Pacific Coast in 1907, with \$4,200 to her credit.

I was so well pleased with Berta Mac when she arrived, and knowing McKinney was to go East, I again sent Alberta to his court, and the result this time was a colt that I named Albert Mac. He is now a four-year-old, and a horse that has as much style and finish as any horse standing for service in California. He has been in Mr. Williams' care for three months and has improved very fast. He can show 2:20 speed already. Mr. Williams says he will be a bull dog trotter and that he will be as fast as his noted sister.

W. PARSONS.

At the annual meeting of the League of Amateur Driving Clubs, recently held in New York, H. K. Devereux, was elected president; J. D. Callery vice-president; T. L. Quimby secretary-treasurer, and H. K. Devereux, George W. Grote, J. D. Callery, Horace White and T. L. Quimby executive committee.

FROM OLEMA TO LAKEPORT BEHIND A GOOD TEAM.

[By Rustic.]

My dear readers, for such you surely are, dear to me if you read and enjoy what you shall find on these pages written to give you some of the enjoyment that the trip of which I am about to write gave the participants.

To premise—the old readers of Harpers' Monthly will surely remember the sketches of Porte Crayon through Old Virginia. How as a boy I used to love to go in spirit with him, his family and friends, o'er what is now historic ground, baptised with the blood of Virginian's sons!

Every nook is the old Dominion Porte Crayon visited, he dropped his book and caught trout wherever the fretted stream fell into a tranquil pool. Or with his gun across the hollow of his arm, Porte Crayon shot the bob white or the wood duck to replenish the larder of the camp.

All through these sketches runs the thought: This is my country, won by the blood and sacrifice of my grandfathers and mothers—

I love thy rocks and rills,
Thy woods and templed hills,
My heart with rapture thrills
Like that above.

So imbued with all these thoughts, my wife and I drove to Santa Rosa, put up our team and met our two friends, the Cutlers, at the railroad depot.

After a good lunch, washed down with some Asti claret, we looked over the stricken city springing up Phoenix-like from its ashes and earthquake ruins. My friends laughed when at the hour of 12, noon, I told them Will Kittle's story: "Mike, lave your sledge in the air, don't you hear the clock is striking twelve?" So, punctually did all the workmen quit their tasks for lunch.

We next went to the stables, where I interviewed my friend, Dr. Summerfield.

"Come, look at my horse, Rustic," said the doctor. "All right," I replied.

"Come on," I said to my companions. "Bring out Lord Dillon," said the big veterinarian, six feet four inches in his stockings, to his attendant.

Out came the chestnut Lord, 15.2 high, straight backed, heavily muscled on his arms and thighs, a grand three-year-old by Sidney Dillon, the sire of Lou Dillon 1:58½, the world's record for trotters, dam Roblet 2:12, she the dam of Bonalet, three-year-old pacing record of 2:09¼. Roblet's dam is Eveline, the dam of Ole 2:10¼, also the dam of Maud Fowler, she the dam of Sonoma Girl 2:05¼, the greatest green mare the trotting turf has yet known. Lord Dillon has worked a mile for John Quinn months ago in 2:28.

Bidding the genial doctor good-bye when his gallant horse was returned to his box-stall, we packed our belongings in our light wagon, seated the ladies comfortably in the back seat, gave the team the word, and off we went. No sharp command to start a double team for me. Suppose one horse is free and the mate slow, at the quick sound to start, the sharp cluck of the tongue or the crack of the whip, away goes the free horse and oftentimes away goes a tug or a single-tree.

But this is another story. Out of the City of Roses we rapidly passed, as either of the team could show 2:40, passed Dr. Finlaw's track, where Sam Norris was busy getting Washington McKinneys ready for a big sale at Chase's pavilion in the city. We admired a beautiful sorrel filly which was jogging along beside a saddle horse, with that low, swinging gait that is the foundation of great speed.

Soon we left the valley of the Russian River, turning to the right, and we were soon following the windings of Mark West Creek. We were abreast of Dr. Burke's Sanitarium, where invalids were basking in the warm sunshine. We had been constantly expecting to meet automobiles on the narrow way, but we only met a few heavy teams, the drivers politely pulled out and gave us the right of way.

At about 4 P. M. we reached Mark West Springs Hotel, where we expected to stay overnight. A single glance told us the season was over, perhaps the hotel was closed. We had driven thirty miles—far enough for pleasure, so we wanted to stop and rest. A young sprout lolled in his shirt sleeves in front of the bar-room.

"May we stop here overnight?" we asked. "Ain't got no 'commodations; hotel's closed." "How far is it to Calistoga?" "About twelve imles." "Too far to go with nightfall coming on." "Can't help it," replied the gawk. "Ain't got no cook; hotel's closed."

Our horses bad drunk their fill at the watering trough; a big six-mule team turned out to let us pass. Again we were bowling along.

"How like my own New England!" said our driver. "See how the maple leaves, bitten by Jack Frost, have fallen in the roadway and make a carpet for our horses' noiseless feet."

"Look! look!" said the Madam, "at the water lilies in the stream," which ran beneath our road.

"Indeed," said Mr. Cutler, "those are not water lily pads; they are the leaves of the wild grape."

Sure enough, the overhanging vines which festooned the waters of the creek had paid tribute to the frost. Here in silent pools the dead leaves rested peacefully, almost hiding the quiet waters, or in the rapid runs they floated and spun to shipwreck again the rocks or slipped into the quiet harbor of some pool below.

Now we had left the giant oaks, laurels and madrones and were out of the shadows into a little valley where scattered pines appeared, sure sign that we were climbing bigger. Here a little vale ran into the main valley, through which we were pursuing our winding way. Cattle were grazing up the tributary valley, which abruptly ended a mile or so away against the shoulder of a mighty bill bristling with giant pines.

Soon we turned and passed around a large vineyard. Beyond the vines there was a riven hill, which marked the watershed of the Santa Rosa and Napa Valleys. There, framed in the cloven bill through which our road passed, far, far in the distance was the noble landmark, Mt. St. Helena—

Silent, wonderful and grand,
Looking out across the land.

We were soon through the pass. The grand view of the upper Napa Valley broke upon our sight! Through the branches of the trees, which overhung our downward way, the clustered lights, like a storm of fire flies, located the towns of Calistoga and St. Helena, miles away. We saw scattered lights in the valley, beneath which, like the stars overhead, gemmed the landscape o'er, marking, let us hope, happy homes.

We were glad to draw rein at the Hotel Magnolia in Calistoga and send our tired team to the stable.

In the morning Mr. Cutler and I walked to the Warm Springs, which Calistoga means. Fire had destroyed the hotel built by Sam Brannan years ago. There was the hotel site. Many of the cottages still remained, but the old Californians who once drove from San Francisco in their own carriages come back only at memory's call to haunt the place.

You would know them not;
Their names are half forgot.

It was 10 o'clock under a threatening sky when we passed from out the town to climb the eight miles of grade to the toll-gate on the shoulder of Mt. St. Helena. We passed vineyards everywhere, a land flowing with wine and honey. At the foot of the grade we hought some flaming Tokays, as large and luscious grapes as I have ever seen or eaten. There below, as we looked backward from our climb, was Mr. Tubbs' great country home. We climbed up and up until we saw the world beneath our feet. We overlooked the lesser ranges of hills; only the mountain's crest towered above us. We reached the toll-gate just as the stage pulled by six horses drove up from Middletown. We put up our little team and saw them fed. We then turned to our hostess, Mollie Patton, of the Summit House, and asked if she had received our telephone for a good dinner.

"Why, yes," said our buxom hostess, "if you city people will be satisfied with what we've got and my plain cooking, it won't hurt ye. Pork just as sweet as honey, raised by my nearest neighbor. I've seen that pig raised from a shoat. He never had nothing but the best of feed; no slops, I tell ye. The vegetables are fresh. I picked 'em in my own garden this morning just as soon as I heard you was a coming."

We all proceeded with one voice to assure our voluble hostess that we knew our dinner was all right. We found the food nicely cooked and served.

"Dear Madam," your scribe said, "I have heard that a band of Russian Priests, retreating before the incoming Americans, left Russian Hill, in San Francisco, journeyed up the Coast. When they reached this mountain pass it was on the birthday of Helena, Princess of all the Russians. So, on that account the priests named this mountain St. Helena. They inscribed the name on a copper tablet, which they nailed in some prominent place upon the mountain's side. This copper tablet was in the possession of the California Pioneers at the time of the great fire in San Francisco and perished in the flames with many a memento of California's early history."

"That's true," said Mrs. Patton, "I've heard that before."

"Forty years ago," said your scribe, turning to the guests at the table, "I ran across the trail of these priests in Humboldt county. We camped alongside some great, bubbling springs, where my guide had shot five deer, one after the other, with a repeating rifle. 'Dan,' I said, 'why are these springs called Bell Springs?' 'Why, Rustic,' he said, 'many years ago while camped here a band of Russian Priests were attacked by Indians. Hampered by the bells of their church, they threw them into these waters, expecting to recover them later on. Retreating from their enemies, journeying northward, they never returned. Following the footsteps of these priests, the same who gave the name St. Helena to the mountain, came our own people, who found the hells in the pure waters of the spring.'"

Perhaps the running water from the Bell Springs sings in the moonlight anthems and strains of Russian melody that only the fairies hear.

From Mrs. Mollie Patton and the toll-gate we sped down a narrow defile into the giant howl of the hills where nestles Clear Lake, beamed in by mountain ranges and giant hills, which frown upon each intruder who comes to see the hidden lake. No doubt, hut that in California here was where the Titans struck the last blows to weld together the rock-ribbed hills and bind the fires beneath our feet. Here in Lake county is the devil's workshop. At the Geysers the steam, the beat, the internal rumblings of pent up forces fill the beholder with reverence and awe.

We passed a mountain of obsidian which looks

exactly like coarse blue-black glass, from which the Indians used to make their arrow heads. Sulphur Banks are mined for this mineral, and it is shipped everywhere.

Certainly in the gloaming of the evening, driving along the backbone of a mountain ridge, seeing mountain on mountain crowding the landscape until you scan the distant horizon, you feel God is here.

We passed here and there small pieces of level land alongside some turbulent brook. We passed cabin and bouse after bouse deserted, the sparse soil not rich enough to detain the anxious husbandman. Black forests or deep ravines rose above or frown beneath our onward way.

At last we pulled rein at Glenbrook, where we met a hearty welcome from Sally Treadway, whom the Cutlers remembered as a little girl. The glory of the place has departed, as Glenbrook is no longer a stage station. The stage turns off a mile or two before it reaches Glenbrook and then goes to Adams Springs, gets a relay of fresh horses and goes on to Lakeport. I never see a Concord stage coach full of happy faces with its gallant six horses but that I repeat:

Oh! for the days that shall ne'er return,
Of prancing steeds and brisk approach,
And the merry born and merry load
That used to ride in the old stage coach.

Steam or electricity will soon drive the stages from the direct line of travel to Lakeport, but never from the inner resorts of the county.

At Glenbrook our friends, the Cutlers, showed us where John Taylor had caught the two-pound trout, where Joe Eldridge, the auctioneer, had sat, where Will Talbot had slept, where a host of early Californians had come and gone who loved the country and had come to see and enjoy it.

The next day, Saturday, we went to Lakeport, via Coles Canyon, a miniature Colorado Canyon. The road we followed for two miles was blasted out from the standstone rock. Directly six hundred feet beneath us ran Kelsey Creek. The waters fretted and foamed, tumbled and tossed over and among the rocks which barred their way to the placid lake.

Now we lost sight of the troubled waters, now they ran between chimney rocks one hundred feet high or sped into caverns lost to view, from which they soon appeared jubilant to be free, as were we. Leaving the canyon we climbed onto a long ridge from which we saw the beautiful lake. Kelseyville lay nestling in the meadow lands at our feet. On the south side of the lake we passed through broad meadow lands, fields filled with lowing herds of cattle or bands of shapely horses. Orchards and vineyards blessed the laboring swain. Great, grand live oaks dotted the fields, affording shelter to the cattle. On the north, east and west sides of the lake mountains hemmed in the waters they seemed to love so well.

Before we reached Lakeport we passed a half-mile track just plowed up and harrowed for some local races. We put up at the best hotel and stables.

After supper we all walked to the wharf, waited a few moments to see the moon rise and ride across the lake upon a path of gold, attended by a host of glad stars. Mt. Konocti rose under the light of the moon, dark, majestic and grand, 4,400 feet high. This grand mountain guards the narrows of the lake, where the broad expanse of water narrows and divides into two bodies, Sulphur Bay and Lower Lake, where the lake empties into Cache Creek.

On Sunday we hired a launch and ran to Soda Bay and had "a cbicken dinnah cooked to a turn by a cull'd cook." After lunch we sat on the piazza and drank in the beauty of Soda Bay and the lake radiating it with smiles in the warm sunshine, sbimmering away to the feet of distant mountains.

After a rest of an hour or so we entered our launch. Our propeller soon churned the quiet waters of the lake behind us into foam. Out of Soda Bay into the narrows we ran up to the wharf at Kono Tayee, where the ill-fated Hallie Floyd lived and died. We picked up a little row boat here and left the foreign place behind. Soon we ran by Paradise Valley, passed Sulphur Bay to our left. Turning to the right our launch pushed its sharp prow into the waters of Lower Lake, past the Buckingham place, by wooded islands. We followed the curvature of the lake right beneath the shadows of Mt. Konocti. Turning to the left, leaving the mountain behind as we sped straight away for the foot of the lake. We stopped within one hundred feet of the shore and dropped our anchor. Our boatman loosened the painter of his skiff, entered and rowed ashore to meet and greet the Episcopal clergyman and wife, who returned with us to Lakeport.

Our boatman entrusted the tiller to our sky pilot while he attended to the gasoline engine. Away we sped on our homeward way.

I stood for an hour looking at wooded shores of the lake and at Konocti, the mighty hill covered with its green mantle of chapparel, its summit crowned with a star, for the night was on.

"This lake," I said to myself, "is as beautiful as Lake Champlain, historic lake! where I was born."

Then I thought of the vast expanse of my country and yours lying between the two lakes, and William Cullen Bryant's lines came to me:

Seas and stormy air
Are thy wide barriers, where
Thou laugh'st at enemies.
Who, then, in coming years shall tell
How bappy in thy lap
The sons of men shall dwell?

PAYNE J. SHAFTER.

PACIFIC BREEDERS' FUTURITY NO. 8.

Has Greatest Entry List Ever Received in any Stake on This Coast.

Pacific Breeders' Futurity No. 8, which closed December 2d, and is for the foals of mares bred this year, has received 417 nominations of mares bred this year.

Two hundred and fifty dollars in special prizes was offered to owners of stallions standing highest in number of mares nominated in this stake that were bred to their respective horses, as follows:

First prize, \$100; second prize, \$50; third prize, \$35; fourth prize, \$25; fifth prize, \$20; sixth prize, \$20.

The prizes will be awarded as follows:

First, W. G. Durfee's Del Coronado 2:09 $\frac{3}{4}$ 39
Second, W. A. Clark Jr.'s Bon Voyage 2:12 $\frac{3}{4}$ 22
Third, J. H. Nelson's Expressive Mac..... 20
Fourth, J. C. Wallace's Strathway 2:19..... 19
Fifth, Geo. W. Kirkman's Stoneway 2:23 $\frac{3}{4}$ 18
Sixth, Rush & Haile's Demonic 2:11 $\frac{1}{4}$ 17

The full list of nominations to the stake is as follows:

A. Allen, Lady Allen by Echo Chief, bred to Tom Smith.

Frank E. Alley, Lady Leemo by Memo, bred to Diawood; Diabolo by Diabolo, bred to Zolock; Welladay by Steinway bred to Bon Voyage; Alein by Anteco, bred to The Angelus; Fuschia by McKinney, bred to Nearest; Oniska by Nutwood Wilkes, bred to Greco B.; Stalene by Stam B., bred to Umattilla Chief; Grace A. Speers by Waldstein, bred to Greco B.; Fortuna by Guy Wilkes, bred to Greco B.; Maud by Stamboul, bred to Greco B.

Alex. Andersen, Lady Arnett by Sidney Arnett, bred to Expressive Mac.

J. N. Anderson, Nora D. by Del Sur, bred to Bon Voyage.

Bert Baker, Edith R. by Milton R., bred to Strathway.

E. M. Barber, Dawn by Athaneer, bred to Strathway.

L. E. Barber, Madge by Silver Bow Jr., bred to Nutwood Wilkes.

Mrs. S. V. Barstow, Maud J. by Nearest, bred to The Sur.

T. W. Barstow, Aunt Joe by Iran Alto, bred to Nearest McKinney.

E. L. Bartlett, Gertrude D. by Grand Moor, bred to Bonnie Steinway.

Geo. T. Beckers, Bena Brack by McKinney, bred to Prince Ansel.

F. G. Berry, Maude by Dexter Wood, bred to Tom Smith.

C. B. Bigelow, Lucy B. by Alex. Button, bred to Prince Ansel.

H. F. Bliss, Iris B. by Iris, bred to Stoneway.

G. W. Bonnell, Magnet by George Steck, bred to R. Ambush.

I. L. Borden, Hester McKinney by McKinney, bred to Bon Voyage; La Belle Altamont, bred to Barney Bernado; Allie Cresco by Cresco, bred to Barney Bernado.

H. Brace, Maud by Stamboul; Sadie Moor by Grand Moor and Banker's Daughter by Arthur Wilkes, bred to Greco B.; Myrtle Kinney by McKinney, Belle W. by Harry Wilkes and Lady B. by Petigru, bred to Sadi Moor.

Thos. H. Brents, Saffrona by Antelope, bred to Cauton; Reina del Norte by Del Norte, bred to Del Coronado.

T. W. Brodnax, Bonnie Red by Red Wilkes and Mary Chimes by Chimes, bred to Strathway.

Jacob Brolliar, Ethel Basler by Robt. Basler, bred to Best Policy.

Alex. Brown, Majella B. by Nushagak; Daisy B. by Waldstein; Lottie by San Diego; Lauress by Mendocino; Serpelo by Mendocino; Josie D. by Nutwood Wilkes; Viola by General Benton and Mamie Martin by Nushagak, bred to Prince Ansel; Steina by Steinmont; Zanita by Electricity and Nosegay by Langton, bred to Nushagak.

Harry D. Brown, Grace Cole by Nutwood Wilkes, bred to Arner.

Robert Brown, Rowena by Bertie Hayward, bred to Strathway.

Robert S. Brown, Arias by Mendocino, bred to Bon Voyage.

R. S. Brown, Hope B. by Paloma Prince, bred to Redlac.

Frank H. Burke, Wanda II by McKinney, bred to Bon Voyage.

Chas. Burlock, Dorothy Welborn by St. Vincent and Tia Juana by Kewanna, bred to Strathway.

L. Button, brown mare by Waldstein, bred to Iran Alto.

Byrne & Curtis, Dixie S. by Zolock, bred to Direct Heir.

L. B. Capps, Maggie Wilkes by Bayswater Wilkes, bred to Iran Alto.

Mrs. M. F. Case, Black Gypsy by Kentucky Baron, bred to Arner.

John F. Casey Queen by Our Captain and Molly by Frank B., bred to Demonic.

Peter Casserly, The Lady by Montesol, bred to Zombro.

I. D. Chappell, Nidda by Liddie Gratton, bred to Gray Gratton; Lettie J. by Jayhawker, bred to Colonel Cochran.

Lewis Charlton, Coleman mare by McKinney, bred to Dumont S.

S. Christenson, Simone by Simmons and Perza by Allie Wilkes, bred to Bon Voyage.

John Clark, Diorene by Diablo, bred to Palo King. W. A. Clark Jr., Centereye by On Stanley; Patty D. by Ultimius; Reina del Diablo by Diablo and Fussy B. by Stam B. bred to Highland C.; Bon Mot by Erin, bred to Moko; Lucy May by Oakland Baron; Ruth Mary by Directum; Sally Lunn by Wiggins and She by Abbotsford; bred to Bon Voyage. E. W. Clithrow, Ruby by Don Joan, Jr., bred to Expressive Mac.

Alvie Clow, Babe by Col. K. R., bred to Expressive Mac.

H. Coil, bay mare by Falrose, bred to Iran Alto. J. E. Connell, Belle C. by Atto Rex and Linnet by Electioneer, bred to Strathway.

E. M. Conroy, Frances C. by Wasateh, bred to Star Pointer.

Hugh Cox, Babe by Designer, bred to Dumont S. F. B. Crane, Fal by Falone, bred to Sir John S. Phil M. Crockett, Axceno by Axeyone, bred to Red Mack.

R. A. Cushman, Trilby Maid by Truman, bred to Lynwood W.; Daisy McKinney by McKinney, bred to Zolock.

John A. d'Artenay, Neta D. by Clarence Wilkes and Jetty Alex. by Clarence Wilkes, bred to Robert Direct; Vera by Clarence Wilkes and Philo A. by Boydell, bred to Best Policy.

J. F. Davies, Miss Sidney Dillon by Sidney Dillon, bred to Bon Voyage.

John H. S. Deal, Edith M. by Strathway, bred to Sky Pointer, Jr.

Wm. G. Devlin, Jean Waldstein by Waldstein, bred to Timothy B.

John R. Dimmick, Queen Alene by Coeur d'Alene, bred to Zolock; Ruth Spartan by The Spartan; Mira Golddust by Pero and Goldie Golddust by Diabolo, bred to Bonnie Tangent.

L. Y. Dollenmayer, Ida May by Grosvenor, bred to Nutwood Wilkes; Belle by Pasha, bred to Albert Direda.

R. L. Draper, Lady Hackett by Jerome, bred to Del Coronado.

E. D. Dudley, Bee Sterling by Sterling, and Paprika by Oro Belmont, bred to Palite; Lorna Doone by Bayswater Wilkes, bred to Jules Verne.

H. A. Duffield, Nell by Don Marvin, bred to Palite.

E. R. Dunn, Bonner Bell by Bonner N. B., bred to Zola.

W. G. Durfee, Jessie Madison by Jas. Madison; Sweetheart by Conifer; Scappoose by Roy Wilkes; Tanita by Gen. Beverly; Gladys M. by Ketcham; Atherine by Patron; Crosby Mare by Gen. Beverly; Rose of Peru by Charleston; Addie R. by Adirondack; Nona by Derecho; Subito by Steinway; Alias by Woolsey; Tacoma by Guycesco; Queen Director by Montana Director; Venus II by Dexter Prince; Doggs Mare by Dexter Prince; Freda S. by Lynnmont; Hazelwood by Sainwood; Miss Newlands by Kapila; Bay Mare by Ashwood; Annie Rooney, dam by Gibraltar; Luna by Hawthorne; Miss Direct by Direct; Violet by Bob Mason; Little Agnes by Gossiper; Estel by Azmoor; Directori by Direct; Birdie Mac by Elmwood; Lulu Wilkes by Bay Wilkes; Belle Pointer by Sky Pointer; Lady Alexandria by Bob Mason and Bessie B. by Dexter Prince, bred to Del Coronado.

Frank S. Ecker, Nellie E. by Alcazar, bred to Strathway.

A. Edstrom, Carmon by News Boy, bred to Athadon.

Ed. Erlanger, Fly by Pasha; Shoofly by Pasha; Kitty Clover by Strathway and Milk Maid by Iris, bred to Expressive Mac.

B. L. Elliott, Icehee by Chas. Derby, bred to Wayland W.

R. M. Ely, Vede by Native Son, bred to Palo King.

F. G. Ennis, Miss Lynnmont, bred to Teddy A.

E. W. Ewart, Judy by Potrero, bred to Strathway.

W. A. Ferguson, Kitty Clover by Pricemont, bred to Bonnie McK.

J. L. Field, Cammaneer by Nearest, bred to Nearest McKinney.

E. L. Fissell, Babe by Diablo, bred to Athamax.

Miss B. Fitzgerald, St. Gertrude by Diablo, bred to Palo King; Nellie by Advocate, bred to St. Anthony.

Ernest Fleet, El Mae by Electricity, bred to Strathway.

R. H. Fleming, Meriden by Wild Ntling and May Standard by Holmdel, bred to Redlac.

F. N. Folsom, Decoration by Diawood, bred to Lord Dillon.

W. B. Ford, Bell by Diablo, bred to Albert Mac.

A. Morris Fosdick, Athene by Dexter Prince, bred to Bon Voyage.

R. A. Fuller, Pelee by Zolock, bred to Raymon.

Henry M. Garcia, Just It by Nearest, bred to Nearest McKinney.

J. A. Garver, Sisie Way by Stoneway, bred to Best Policy.

T. B. Gibson, Maggie by Soudan, bred to Iran Alto.

Harry Gillman, Babe by Acquaintance, bred to Strathway.

W. A. Glascock, Bay Queen, bred to Murray M. Glide Bros. Eva by Nutwood Wilkes, bred to Star Pointer; Josephine by Nutwood Wilkes; Fannie G. by Nutwood Wilkes and Babe by James Madison, bred to Jules Verne.

Ralph Granger, Badger Girl, bred to Strathway.

Ed. Graser, Nellie Zolock by Zolock, bred to Audubon Boy.

John Grimes, Belle by Gossiper and Nancy by Prince Almont, bred to McMyrtle McKinney.

F. Hahn, Red Ruff by Chas. Derby, bred to Bon Voyage.

J. W. Haile & Co., Olita by Bradtmoor; Mamie Airlie by Prince Airlie; May Norris by Norris; Corine by Nutwood; Potrero Girl by Prince Airlie; Nellie T. by Dawn; Minerva by Guy Wilkes; Sister by Nutwood Wilkes; Laura H. by Nutwood Wilkes; Eva by Le Grande; Hannah by Le Grande; Rosebud by Fallis; Topaz by Bradtmoor and Elorita by Alban, bred to Demonic.

W. S. Harkey, Deviletta by Diablo, bred to Hal B. J. N. Harlan, Rita R. by Diawood, bred to Iran Alto.

C. R. Harrington, Virginia Vasto by Vasto, bred to Prince Ansel.

William Hashagen, Chittywee by Chas. Derby and Leta H. by Nutwood Wilkes, bred to Kinney Rose.

Mrs. L. J. H. Hastings, Sappho by Robert McGregor, bred to Del Coronado; Princess Louise by Del Coronado, bred to Redlac.

Ed. Hayes, Babe by Badger Boy, bred to Strathway.

E. E. Hays, Pet by Anteco, bred to Sir John S.

E. P. Heald, Princess McKinney by McKinney; Lady Marvin by Don Marvin; Venus Smith by Mambino Chief Jr.; Nona Washington by Geo. Washington; Lady Rowena by Pilot Prince and Lady Mitchell, bred to Tom Smith.

H. H. Helman, Electress Wilkes by Nutwood Wilkes, bred to Jay Bird-Alma Wilkes Colt.

F. P. Hellwig, Lovely Dell by Prince Lovelace, bred to Jay Bird-Alma Wilkes Colt.

Miss Lottie Hettman, Baby Nell by Nutwood, bred to Red McKinney.

A. J. Hodges, Flora G. by Alto, bred to Stam B.

John Hogan, Sally M. by Rinaldo, bred to Ray o' Light.

H. S. Hogoboom, Beautiful Bird by Nutwood Wilkes; chestnut mare by Diablo and Bessy by Tilton, bred to Iran Alto.

F. H. Holloway, Lady Woolsey by Woolsey; Belle by Connifer; Lady Zombro by Zombro, bred to Geo. W. McKinney; Nealy W. by Geo. W. McKinney, bred to On Stanley.

Thos. Holmes, Happy Maid by Happy Prince, bred to Zolock.

Chas. Hoppin, Mollie B. Falrose, bred to Palo King.

W. A. Hunter, Lady B. by Stephen A., bred to Turban.

F. K. Hurxthal, Altighe by Alcantara, bred to R. Ambush.

E. P. Iverson, Queen Mab by Nutwood Wilkes, bred to Highland C.

J. B. Iverson, Anita I. by Prince Neerly, bred to Delphi; Amy I. by Diablo, bred to Jay Bird-Alma Wilkes Colt; Ivoneer by Eugeneer, bred to Nutwood Wilkes; Roseate by Guy Wilkes, bred to Eugeneer; Dictatus Belle by Dictatus, bred to Star Pointer.

Toni Jarcovich, Balda by Lanco, bred to Albert Mac.

Fred Jasper, Nellie J. by St. Patrick, bred to Dumont S.

Chas. Johnson, Trickey by Falrose, bred to Iran Alto.

M. C. Keefer, Bessie Rankin by Alamont, bred to Jules Verne; Advosta by Advertiser, bred to Prince Ansel; Dimontes by Diablo, bred to Zombro; Annie McKinney by McKinney, bred to Jay Bird-Alma Wilkes Colt.

Geo. A. Kelly, Birdal by Birdalex, bred to Bonnie McK.

Geo. W. Kirkman, Flora by Bay Wood; Lena by Red Oaks; Maud by Red Oaks; Lottie by Red Oaks; Glora by Red Oaks; Belle Basler by Robert Basler; Susie D. by Clipper Denmark; Myrtle H. by Torso; Ella B. by Ruth Barrett and Malplaquet by Hyder Ali, bred to Stoneway.

J. A. Kirkman, Carrie by A. W. Richmond; Viva by Antevolo; Polly by Strathway; Mayway by Stoneway and June, bred to Stoneway.

Ed. Lamb, Mollie by Harry Whippleton, bred to Dumont S.

S. L. Landis, Mary by Glenbrook and Clara by St. Clair, bred to Expressive Mac.

J. A. Lane, Nellie by Sampson, bred to Humboldt Dillon.

H. W. Lawrence, Bonita by Knight, bred to Murray M.

Sid Leather, bay mare by John A., bred to Iran Alto.

Joe Lemon, Babe by Junio, bred to Expressive Mac.

John H. Leonard, Minerva by Alpheus, bred to Elbrioso.

O. Frank Leppo, Robizola by Robin, bred to Wayland W.

C. F. Leroux, bay mare by Lynnmont, bred to Bonnie McK.

W. M. Liggett, Irene, bred to Nutwood Wilkes.

Frank Long, Nellie R. by Wayland W., bred to Zolock.

Nicholas Lux, Babe L., bred to Senator H.

D. Lynn, Azina by Azmoor, bred to Albert Mac.

W. S. Maben, Mamie Elizabeth by Red Regent; Sue by Athadon and Cleo by Conifer, bred to Walter Barker; Dixie W. by Zolock, bred to Redlac.

J. A. Mackinnon, brown mare by Major Ban, bred to Sky Pointer, Jr.

F. W. Madison, Queen by Altitude, Jr., bred to Strathway.

L. Madison, Babe, bred to Strathway.

Geo. H. Magruder, Bell of Silver King, bred to Star Pointer; Babe by Linmont, bred to Sir John S.

R. Malcolm, Miss Mooney by Brigadier, bred to Demonic.

Wm. Manske, Eralut hy Tipton Almont, hred to Redlac.
 J. W. Marshall, Trix by Nutwood Wilkes, hred to Star Pointer.
 F. B. Martin, Lauretta H. hy Alexis, hred to Bonnie Mc K.
 J. B. McDonald, Bahy Mac by Strathway, hred to Athadon.
 P. H. McEvoy, Nakarch hy Geo. W. Archer, hred to Millrae.
 Clarence H. McFeely, Glassy hy Arthur Wilkes, hred to Bon Voyage.
 Frank H. Messmore, Belle hy Titus, hred to Auduhon Boy.
 Chas. Middleton, No-Na C. hy Strathway, hred to Sky Pointer, Jr.
 C. F. Millar, Maud hy Diahlo, hred to Palite.
 Edmund Z. Miller, Straightness hy Chas. Derhy, hred to Stam Boy.
 Thurlow E. Moit, Dolly hy Ira Woolsey, hred to Monterey.
 Arthur E. Moit, Irene Geer hy Harry Geer, hred to Robert Direct.
 Carey Montgomery, Lady Caretta hy Nutwood Wilkes, hred to Prince Ansel.
 E. A. Montgomery, Bahe, hred to Red McK.
 J. E. Montgomery, Effie Logan hy Durfee, hred to Star Pointer.
 Sam Montgómery, Irish Lassie hy Waldstein, hred to Prince Ansel.
 Hugh Morgan, Lady Helen hy Norceto, hred to Robert Direct.
 William Morgan, Grace McK. hy McKinney, hred to Direcho; Sonata hy McKinney, hred to Redlac.
 W. R. Murphy, Lady Marlow hy Red Star, hred to Red McK.
 Thomas Murphy, Margaret H. hy Guy Wilkes, hred to McMyrtle McKinney.
 John Myres, Bahe hy Iris, hred to Expressive Mac.
 J. H. Nelson, Dolly hy Bay Wilkes; Athella hy Athy and Bessie hy Col. K. R., hred to Expressive Mac; Goldnut hy Petigru, hred to Dr. W.
 R. O. Newman, Peerless Maid hy Strathway; Ida Stoneway hy Stoneway; Stonelita hy Stoneway and Zephyrus hy Zomhro, hred to Robert Direct; Elizabeth Direct hy Robert Direct; Daisy Basler hy Robert Basler; Dewdropt Basler hy Robert Basler and Addie Direct hy Robert Direct, hred to Best Policy.
 Rohl. Nohle, Vaida N. hy Diahlo, hred to Humboldt Dillon.
 F. P. Ogden, Lou hy Ira, hred to Monicrat.
 H. T. Owen, Irene Ayers hy Iris, hred to Lynwood W.
 John Owens, Santa A. hy St. Clair and Glenella by Athy, hred to Expressive Mac.
 H. L. Parady, Thais hy Direction, hred to Athadon; Lady Barry hy McKinney, hred to Athahlo; Phyliss hy Sonnie and Maggie Gywner hy Hawthorne, hred to Derby Direct.

SAN BERNARDINO MATINEE.

San Bernardino, Redlands and Riverside horses all scored in the matinee meet held under the auspices of the San Bernardino County Driving Club at Association Park, December 5th. Three of the events were captured by "San Berdoos" horses, and two each by the neighboring communities.

No records were smashed and the time made was not very fast, but the finishes were almost invariably well hunched, lending a charm and attractiveness to the races seldom witnessed on any track. The course was good, the morning shower of rain being just sufficient to settle the dust well, and the horses had firm footing for their flying hoofs.

The crowd numbered 700 or 800, and this was considered good in view of the amount of advertising the races had. A thousand or more patrons of the sport would doubtless have attended the races had the weather been less threatening.

The seven events resulted as follows:

First event, 2:40 pace—
 Velox, hy Zolock (Chas. Thomas)..... 1 2 1
 Redlands, hy Zolock (R. T. Curtis) 2 1 2
 Time—2:54, 2:46, 2:36.

Second event, 2:25 trot—
 Marigold, by Zolock (R. F. Garner) 1 1
 Bonnie June, hy Zolock (J. Fairchild) 2 2
 Nearest, hy Nearnut (Dr. W. L. Spoor) 3 3
 Tom McKinney, hy G. W. McKinney (Peter Beatty) 4 4
 Time—2:23, 2:25½.

Third event, 2:30 pace—
 McO. D., hy Zolock (Alex Nelson) 2 1 1
 Proctor (Dr. F. A. Ramsey) 1 2 3
 Dewey, hy Harry H. (J. Lazenby) 3 3 2
 Time—2:22, 2:18, 2:18.

Fourth event, 2:35 trot—
 L. Kinney, hy McKinney (Rourke) 2 1 1
 Deidrich, hy Direct Heir (J. Poole) 1 2 2
 Ben Z., hy Zolock (Nick Young) 3 3 3
 Time—2:36, 2:36, 2:35.

Fifth event, 2:25 pace—
 On Bly, hy On Stanley (J. Campbell) 1 1
 Aqalantha, hy Zolock (G. W. Prescott) 2 2
 Time—2:24, 2:21½.

Sixth event, colt trot—
 Reginald, hy On Stanley (Ramsey) 1 1
 Easter, hy Monicrat (S. B. Wright) 2 2
 Arrow Stanley, hy On Stanley (E. D. Roberts) 3 3
 Time—2:31, 2:38.

Seventh event, 2:50 trot—
 Morgan (W. R. Cheney) 2 1 1
 Mark Twain, hy Zolock (T. Well) 1 2 2
 Miss Patrick, by Ben Z. (Eastwood) 3 3 3
 Time—2:44½, 2:40, 2:42.

Officials for the day were:
 Judges—George W. Parsons of Highland, H. G. Stanley of Riverside and Frank J. Holmes of San Bernardino.

Timers—Charles Thomas of Redlands, J. J. Shay of San Bernardino, B. L. Hutchins of Redlands.

Starter—J. E. Fairchild of Redlands.

Marshal—Ed Brazelton of San Bernardino.

Secretary—Thomas Holmes of San Bernardino.

Blue, red and yellow rosettes of ribbon were awarded the first, second and third winners, respectively, in the different events, each bearing the official hut-ton of the driving club in the center. Merchandise prizes were donated by James Campbell, Ingersol & Esler, Mrs. M. S. Severance, Frazer & Barnes of Highland, John Poppett, C. A. Poole & Bro., Thomas Holmes, Poole Bros., and awarded to owners of winning horses, as were whips for second prizes by the driving club.

When Ed. Geers took charge of Fantasy as a two-year-old she was a big, long-legged filly, but had great speed at the trot. For a two-year-old to heat 2:20 was in those days considered a great feat, but Fantasy did it by a wide margin, and still had something left. As a three-year-old she was a real champion, with a mile in 2:08¾, made over the Cumberland Park track at Nashville, Tenn., with Geers up, figures that withstood for thirteen years the onslaughts of the three-year-olds, and that were not beaten until the present year. As a four-year-old her mile in 2:06 again put her at the head of all trotters of that age. The fact that she brought hut \$750 at the recent Old Glory sale is due to the fact that while she is seventeen years old, she has had hut five foals, and none have standard records, although hut three of these are living and all are said to be fast.

Hetty G. 2:04¼ sold recently at the New York sale, that held the record for pacing mares on a half-mile track, and that incidentally brought into notice as a trainer and driver "Tommy" Murphy, who is now a Grand Circuit reinsman of note, came from Kentucky. "Doug" Thomas, who perhaps has brought out as many fast ones as the next fellow in the business, had "troubles of his own," as it is said, with Hetty G. She was a double-gaited one of the hard-to-cure variety, and all through her long turf career it was said of her that a change of shoes and the application of toe weight would make her a trotter with 2:10 speed. Hetty was thought to be a back number when Murphy got her, hut reduced her record upon her return to the Grand Circuit after becoming a half-mile track champion.

Jackson's Napa Soda is the best hot weather drink.

CONDUCTED BY J. X. DeWITT

WHAT THE FEDERAL GOVERNMENT IS DOING FOR SPORTSMEN.

[By John Elfreth Watkins.]

Uncle Sam now maintains in Washington a bureau of information for sportsmen. It is a branch of the biological survey, Department of Agriculture. Just in advance of the Fall shooting season it issues, each year, a little pamphlet containing the revised game laws of the United States and Canada, also tables showing the close season for various kinds of game, the cost of hunting licenses to residents and non-residents, laws as to shipping game or carrying it home, and so on. Last autumn's issue of this booklet, besides giving all of this information, contains a digest of the new game laws passed within the year.

Thirteen game preserves have been set aside by Uncle Sam up to present writing. Congress last year established one in the Grand Canyon forest reserve in Arizona, and another in South Dakota, where the Secretary of the Interior is now negotiating to lease 3500 acres of land for the purpose. In Oklahoma 57,000 acres has been set aside as the Wichita game preserve, wherein deer, elk, antelope and bison, also many game birds, will be protected from the ruthless exterminator. For the erection of a buffalo inclosure here \$15,000 was expended. The Bronx Zoological Association of New York promised the Government some 18 or 20 bison for this preserve, which were but recently forwarded to their new home. A herd of the small San Joaquin Valley elk has been established in a preserve within the Sequoia National Park, California. Lately it was discovered that of this once abundant native species, which up to some years ago ranged over the southern San Joaquin Valley, less than 150 individuals were left by the game vandals. An attempt to capture these by driving them into a corral was made last Fall, but only 20 were safely caught and placed in the preserve.

The Yellowstone National Park is our greatest Federal preserve. It now contains 1500 antelope; 100 mountain sheep, about 100 bison and numerous deer, elk, black bears, beaver and smaller game. For a new bison refuge in the park Congress appropriated \$15,000, and the necessary inclosures have now been built. A herd of 21 of these animals purchased a few years ago for this inclosure has already increased to 56, and beside these there are some 40 or more wild bison ranging in the park at will. There are more elk than any other species of big game in the great preserve. Formerly the greater number of these animals left the Park in Winter to feed in the lower ranges of neighboring states, but now they are fed in the preserve during the cold months and are becoming remarkably tame. In fact, several different species venture close to the buildings of the park and even upon the parade ground of Fort Yellowstone. The experiment with big game in the Yellowstone has demonstrated how readily our big game can be saved from extermination wherever Congress shall authorize game preserves in other National parks or forest reserves. The hunting season in the Yellowstone Park is always closed. No firearms are admitted inside its boundaries save those carried by the military guard. If the civilian insists upon carrying a gun into the park he may do so by first having it sealed against use.

A Federal preserve for the sea otter is maintained on Afognac Island, off the southern coast of Alaska, and a general preserve for all sorts of animals—foreign and native—is constituted by the National Zoological Park in the District of Columbia. Six small islands, furthermore, have been set aside as Federal bird preserves in Florida, Michigan, Louisiana and North Dakota.

A vast game preserve of more than a half million acres has been lately provided by Wyoming which thus takes the lead among the states in the movement to preserve our native game. A number of other states have gone this far. The Canadian Government has set aside a game preserve of 16 sections in the Province of Alberta, while on the Gaspé Peninsula, Quebec, a large park of 2500 square miles has been given over for the same purpose. Quebec had already another preserve of about the same size, as has also Ontario.

The collection of valuable big game in preserves, such as those of our National parks or forest reserves, naturally attract the greedy poacher, for whom Uncle Sam's game wardens and forest rangers are forever on the outlook. These skilled and experienced vandals, who live in the vicinities of the game refuges, do no illicit killing in Summer or Autumn, when they make their \$5 a day as guides for hunting parties of Easterners in the outside territory. But as soon as the snow falls deep in Winter they skulk through the forbidden areas, often on snowshoes, and evade the guards, whose paths of patrol are closed by the elements. The best specimens of elk, deer or other big game raised by the care of Uncle Sam are too often selected by these despoilers. The typical poacher of this stripe when put to bay is as desperate a character as he is a

dead shot, and a lone warden, ranger or soldier, if cautious, would hesitate to challenge a group of such offenders.

Our states are protecting their big game by tightening their laws, as needs be, from year to year. New Jersey has recently extended her "close season" for deer until 1909, which means that until then no deer may be shot in the State. It is illegal to kill female deer and fawns in Arizona, Louisiana, Missouri, Nevada and Texas; also deer without horns in Colorado, New Mexico and Nebraska; deer in red coat and fawn in spotted coat in Michigan, and fawns in New York.

In addition to these restrictions as to deer, many States forbid hunting the year round of other big game. Thus there is no hunting of elk allowed at any time of year, now, in Arizona, California, Colorado, Iowa, Minnesota, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Dakota, Oregon, Utah, Washington or Wyoming. All of these states, except Arizona, Iowa, Minnesota, North Dakota and Oregon, are now closed the year round also to hunters of antelope, as are Idaho, Kansas, Montana, Oklahoma, South Dakota, and Texas. Likewise there is no longer any shooting of the once abundant mountain sheep in Arizona, California, Colorado, Nevada, New Mexico, North Dakota, Texas, Utah or Wyoming, or of mountain goats in Arizona or Nevada.

Moose or caribou hunting are forbidden the year round in Idaho, Minnesota, Montana, New Hampshire, New York, North Dakota and Vermont, while caribou shooting is forbidden in Nevada and Maine, the latter state allowing the hunting of moose bulls, but not cows or calves. Bison or buffalo hunting is forbidden all the year in Colorado, Iowa, Montana and North Dakota, the law being easily enforced, inasmuch as there have been no wild bison spared

WYOMING ELK AND BIG HORN.

by the big game vandals. Washington state forbids the shooting at any time of female moose, caribou, antelope, mountain sheep and mountain goats, while Montana extends the same protection to female elk in Nevada to female antelope.

The extent to which the deer, elk, antelope, mountain goat and mountain sheep have been ruthlessly slaughtered, as have the moose and caribou also, can be judged by this brief summary of prohibitory laws enacted by the states wherein these animals once roamed by the thousands. The game preserves would seem to offer some prospect of their regaining their foothold. What has thus been accomplished with the bison offers this gleam of hope. That noble animal was practically extinct 20 years ago. A herd of 600 remaining in the No Man's Land strip was soon killed out through the indifference of Congress. The 300 surviving in the Yellowstone Park were almost exterminated by poachers. A larger herd survived in Canada, but it has been sadly reduced in numbers by the wolves, and today it is reported that calf tracks are no longer seen by those who occasionally come upon the trail of a herd. The wolves attack the calves only, and if they thus succeed in killing them off from year to year the herd is, of course, doomed. Today the only herds outside of the Government preserves which remain intact are several remaining in private hands. There are now, all told, only about 1000 bison left alive in the world.

But the fact that the herd in the Yellowstone preserve has more than doubled—has increased, in fact, from 21 to 56—within a few years is an arguement of what can be done for the bison elsewhere in the country. The American Bison Society, of which President Roosevelt is the head, is diligently study-

ing the problem, and the saving of the most picturesque of our native animals seems to be assured.

Uncle Sam is also co-operating with private enterprises in the work of bison preservation. A large tract of Government land has been leased at a nominal rental to James Phillips, better known as "Scotty" Phillips, of Pierre, S. D., with the understanding that the area is to be used as a range for his private herd of bison. Another tract, in Arizona, on the Western edge of the Grand Canyon, has been similarly leased to C. J. Jones—"Buffalo" Jones—who is not only rearing bison, but making experiments in cross-breeding them with Galloway cattle. The hybrid resulting from this cross is named by Mr. Jones the "catalogue." He recently brought to Washington a "catalogue" robe, a skin about eight feet square covered with a glossy, soft, blackish-brown hair, not quite so long as the fur of a bear. The bulls of the "catalogue" hybrid, like the jacks of the mule species, are sterile, as are also the quarter-blood catalogue bulls; but the "eightbs" are fertile, according to Mr. Jones.

The final knockout blow to the pot-hunter, so far as legislation could put him down and out, was given when Mississippi passed a statute completing a chain of non-export laws which now surrounds every state in the Union. In other words, now that Mississippi has at last fallen in line, every state now prohibits the export of game of one kind or another outside of the boundaries. Development of cold storage and extension of railroads throughout the West in the early seventies allowed an apparently inexhaustible supply of game to pour into the Eastern markets. So rapidly did this commerce increase that some of the Western states, devastated by pot-hunters, sought self-defense in steps to restrict shipments of game beyond their borders. In 1896 a decision of the Supreme Court of the United States established the right of the states to do this. Then they continued to fall in line one after the other; but in spite of these non-export laws the pot hunter continued to thrive. Enormous quantities of deer, other big game and birds were poured into the big cities and the states not endowed by nature with deer forests or natural refuges for other big game. The state authorities found it impossible to detect forbidden shipments of game to points outside their borders until Congress came to the rescue by prohibiting all interstate commerce in big game and certain game birds shipped in violation of the state laws. This bill also required the proper marking of game under a heavy penalty for violation.

Government "spotters" have since watched the consignments to the express companies, and many convictions have been thus secured. Fines of \$100 or more have been imposed in nearly half of these cases. Venison and other game have since been illegally shipped in greatly diminished quantities. Concerns employing pot-hunters are now afraid to express their game, and have been driven to adopt other means of transportation so unsatisfactory and expensive that the illicit business in export game is about on its last legs. Non-export laws are now in force also in practically every province of Canada. The result is that in the two countries there remains but slight danger that the game of a region will be exterminated by wholesale slaughter for the purpose of feeding the epicures of some distant city, and with the result of cheating the true native sportsman of the birthright with which nature endowed him. All of the states and territories west of the Mississippi, except Wyoming and Iowa, prohibit the carrying across the state line of any game, and New York, Pennsylvania, Michigan, Virginia, Mississippi and Tennessee have made the same requirements. The remaining states prohibit the taking out of certain kinds of game only. South Carolina forbids export of game intended for sale.

Another blow aimed at the pot-hunter has been the "non-sale" law. Such acts have now been passed by 42 states. Montana, Idaho, Nevada, Arizona, Minnesota, Missouri, Kansas, Arkansas, Mississippi, and Michigan prohibit the selling of all game, wherever shot, if protected by the state laws. Colorado, New Mexico and Texas prohibit the sale of protected game taken in the state. Laws which prohibit the placing on sale of certain kinds of game have been passed by all of the other states except the Virginias, North Carolina, Tennessee, Georgia, Iowa, Louisiana and Indian Territory.

Thwarting the pot-hunter still further are the "non-resident" licenses, now required by 37 states. Before he can shoot any of certain kinds of game in these states the non-resident must pay a fee ranging from \$10 in a number of states to \$50 in Wyoming, the latter figure being the same as exacted in British Columbia and Newfoundland. In 16 states even the residents must now pay a fee, ranging from 75 cents to \$5, before being allowed to hunt. A new kind of hunting license has recently been adopted by several states to restrict hunting by persons who are not citizens of the country. Thus Pennsylvania, Louisiana, Utah and Wyoming provide that all hunters who are un-naturalized residents of the state must obtain the same license required of non-residents. Massachusetts has a special \$15 license for resident aliens, Washington a \$50 license for non-resident foreigners, California a \$25 license for aliens and a \$10 license for non-residents, and Manitoba a \$100 license for all hunters who are not British subjects. In Maine, South Dakota and Wyoming non-residents are not permitted to hunt big game unless accompanied by qualified guides.

TALE OF AN OREGON GRIZZLY.

"Old Eph" had been a terror to the stockmen in Lake View valley, Oregon, for nearly twenty years. You may be surprised at this statement. Possibly you do not know that a grizzly will live so long if let alone; but he might. Monarch in Golden Gate Park is at least twenty years old; a black bear in the zoological gardens in Paris lived to be forty-seven years old.

Old Eph was a corker. He made a track like the teeth of a harrow.

He was often seen by the stockmen and hunters, and it was estimated that more than 100 shots had been fired at him, but he was a cute old chap, and no one ever got near enough to him to get a dead cinch on him. He was nearly always on the jump by the time the gun or the six-shooter cracked, and was mostly in the brush or heavy timber.

Eph had killed hundreds of cows, calves and steers in the many years he had worked the Lake View range, and had become so expert at stalking his game that it seemed easy for him to get a square meal whenever he wanted it. After the first two or three years of his experience he never returned to a carcass after his first interview with it. He did most of his hunting at night. The cow-men said that judging from the signs he left he seemed to have a scheme of approaching the herd from the windward when they were lying down, sleeping it off. He would crawl on his belly half a mile to prevent any watchful cow from getting a glimpse of him against the sky. He knew enough not to try to get into the hunch of cattle, but invariably stole a march on some stragler that had lain down, perhaps twenty or forty feet from the others.

It is said that old Eph would apparently crawl within fifteen or twenty feet of his victim, and then, judging from the way he tore up the earth, would make a mighty leap and land on top of the sleeping cow or steer. Every Western hunter and stockman knows the great power which a grizzly carries in his immense bone and muscle, and only one stroke of his mighty arm is needed to smash the shoulder, the ribs or the spine of any steer or horse. Frequently with this same terrific blow he disembowels the animal completely. He rarely tries to hold it down when he springs on it. He knows his game and strength. He simply deals the poor brute a blow that he knows will finish it within a few seconds and then lets it struggle to its feet and run, if it can. With its entrails trailing on the ground it can go but a short distance. When it falls, old Plantigrade walks up, smacking his chops, and begins the feast.

The stockmen of the Lake View district had cursed and threatened old Eph for years. There were other bears in that country, but there was no mistaking the trail of this one, and rarely any question when a carcass was found as to whether Eph or some other bear had killed the animal. All kinds of schemes had been talked of and tried for capturing Eph. He had been hunted time and again by men, singly or in groups; he had been still hunted; he had been run by cowboys with ropes; he had been hunted with dogs; and traps had been set for him in the rocky canyons where the cattle did not penetrate and where old Eph made his home; yet the wily old patriarch had evaded his enemies in every instance. A big reward had been offered for his skin, but no one had been able to earn the prize money.

Why not poison him, did you say? You might as well try to poison a cast-iron bear. As I said before, Eph rarely returned to a carcass, and when he did would not touch it if a human being had been anywhere near it in the meantime. Chunks of meat were poisoned and thrown out on old Eph's runways, but his tracks the next day would show that he had shied around the bait, even as a thief dodges a policeman.

Finally, in the fall of 1899, a meeting of a dozen stockmen was held for the express purpose of planning another hunt against old Eph. It was determined that this one would be to the death if it took all winter. The dogs in that section had hunted old Eph so often and had been so easily distanced by him that they seemed to have grown discouraged. It was therefore decided that there would be no use of going after him with any local pack that existed or could be made up. There was a famous pack of bear dogs in another section of the country, however, that it was thought might be able to run Eph to his lair and corral him. These belonged to W. P. Vanderwert, who lives at Lava, on the Des Chutes river. This is a conglomerate sort of pack. One of them is a full-blooded foxhound which, having the nose of the lot, always leads the pack. Two others are half foxhound and half hulk. These have fairly good noses and immense courage. Then there are two full-blooded Scotch deerhounds and one greyhound. These latter three are, of course, built for speed, and once the game is sighted they leave the rest of the pack in a hurry.

Vanderwert was requested to bring his dogs and join in the hunt, or rather to lead it. At the appointed time he arrived on the scene. More than twenty of the local cow-punchers and ranchmen, mounted on picked horses and armed with the best weapons the country afforded, were there, and soon after daylight the party started up the valley. It took only an hour to find the remains of old Eph's last victim. This was a fat two-year-old steer that had been killed the night before, and the trail leading from the carcass was still warm. The dogs were put down, and old Texas, the foxhound, led off.

It was three miles to the foothills and all plain sailing. The distance was covered in a few minutes. Then began a slower and more tedious threading of the canyons, scrambling over the bog-hacks and picking of ways through dense jungles and briars and chaparral. This part of the trail was about seven miles long, and frequently the voices of the dogs were lost to the horsemen. The old grizzly had doubled on his trail repeatedly, and had circled hither and thither in an effort to elude possible pursuers. These tactics frequently brought the dogs back to where the hunters could hear and occasionally see them. Thus the men were enabled to follow the dogs. Finally they jumped the bear. He had lain down in a thicket for a morning nap. He had

side of the mountain before he could stop; but the men who composed this party had been on the range for years, had encountered all kinds of dangers and hardships that cowmen are ever subjected to, and had lost any sense of fear they might have had in their youth.

Finally one man, who from long exposure to dangers had become wholly reckless, told the others he would go in the cave and punch the bear out. They told him he was a fool to think of such a thing, and that the bear would certainly kill him. He replied that he would take the chance; that they had come a long way to get this bear, and now that they had him corralled, he, at least, would not suffer the old hatcher to haffle the crowd. This man was Jeff Howard, who had trapped and hunted many years before he went into the stock business. He was a man of such coolness and daring as Israel Putnam probably never dreamed of.

Jeff got a big club about six feet long, and with this in one hand and his six-shooter in the other he got down on all fours and went into the cave. As he moved slowly and got the light behind him, his eyes gradually became accustomed to the darkness and he was able to see that the cave branched about ten feet from the entrance. His sense of smell told him the bear was in the right-hand chamber. He circled around until he got against the extreme right-hand wall and followed down this some twenty feet. Finally he could see by the faint glimmer of light from the entrance the bear's eyes, which were of a dark, ominous green. Old Eph growled savagely at the intruder, but Jeff moved slowly along with the back to the wall until he finally got behind the bear. Then he made a vicious lunge at him with his prod and caught him in the flank.

Why the bear did not turn on Jeff and crush him as he had crushed so many hundreds of cows and steers, no one will ever know. The only possible explanation is that which has accounted for many

other escapes where human beings have shown such courage when in contact with savage beasts. It seems that the superior mental force of a brave man asserts itself over the instinct, or intellect, as you please, of the lower creature, weakens him and causes him to retreat. At any rate, the bear made a break for the mouth of the cave, and as he went out he caught several bullets in his back and neck, from the men who had climbed on to the shelving rock above the mouth of the cave.

He went plunging and tumbling down the side of the mountain, and the dogs after him, but it was easy to see that he was dead before he had made three turns in his perilous drop. The men followed and found him at the foot of the mountain, done up for sure. The dogs were holding a savage carnival about him, but they could make little impression on his tough old hide.

The bear was stretched out and his skin taken off in short order, the process revealing more than a dozen old wounds. The carcass was partially dissected and seven bullets of various weights and calibers were found. Some of these the old chap had carried many years, but none of them had found a vital spot.

The skin measured eight feet four inches in length and tied to a pole it was all two men could carry through the jungle to where the horses were tied.

Thus the cattle on the Lake View range were emancipated from the reign of terror which Old Eph had exercised over them twenty-three years.

Oh, give me the wildwoods,
With their quiet trend of things—
The fields, the stream, and the forest,
Where the wild birds ever sing.

A long pole was cut and the investigating committee, after inserting it to its full length in the dark abyss, reported that they knew no more of the bear's whereabouts than they did before. Several shots were fired into the cave, at various angles, with the hope that some one of them might find the target, but the only result was an occasional low, savage growl that fairly shook the cliffs and made the bravest of the men turn pale. No one could tell what part of the cave these messages came from.

The bear evidently stirred about, for now and then there came a stronger whiff than before of bear smell.

It took good nerve to do all this investigating, for no one knew when the bear might decide to resent the intrusion on his domain and charge the whole outfit. There was but a narrow shelf of rock in front of the cave, and any man who might make a misstep would go several hundred feet down the

SCIENTIFIC AND HUMANE DEER HUNTING.

The sport of deer hunting in California has many enthusiastic devotees. Protective legislation enacted in recent years has done much, not only for the protection of the deer, but for the future continuance of the enjoyment of the chase. Not so long ago, owing to the short-sighted policy of many hunters in "getting all they could," as well as the unscrupulous methods of the hide hunters and other wholesale butchers, there was the certainty of extermination of deer in many favorite hunting resorts. Now conditions are different and the sport gives promise of continuance annually for years to come.

Deer hunting has an absorbing interest for the sportsman, and each year sees an appreciable addition to the ranks. But at that, a successful or skilled hunter is not the result of one season's devotion to the sport. In this respect the following remarks by a sportsman who has been an ardent buck hunter for many years past, one who has laid low lordly bucks in many hunting grounds on this continent, is not without interest:

There is a class of men who hunt with their feet. Their plan is to walk at random through the woods from morning to night in the hope that they may accidentally "jump" a deer, and accidentally hit it, by shooting as fast as possible as long as they "can see a hair."

Many hunt in this way, because they know no better method. Experienced hunters are usually reticent; masters in woodcraft are seldom given to instructing amateurs in the mysticism of the wilds.

Without going into the preliminary details of the hunt, we will suppose now that we see our deer, within range and looking at us seriously. You raise your rifle slowly, slowly, and aim at his neck, if you are a good shot. At his neck because a bullet through any part of the neck will knock him down and keep him down until you can deliver the mercy shot, and because a neck shot does not spoil meat, nor the head for taxidermy. If he is too distant for a sure neck shot, then the shoulders, or low down, to get the heart. If you have overcome the natural tendency to overshoot, the high spot is the best, because the deer falls where he stands, while he may run miles with a shot near the heart. In all cases, choose the exact spot you mean to hit, aiming at an imaginary bulls eye on the deer hide, and pull the trigger without flinching. Having fired we try to see the bullet strike. Sometimes a flash of red is visible. We also listen to hear the bullet spat. The sound of the impact on flesh is different from that afforded by striking anything else. If he fall, and his head sinks to the ground, there is no need of haste. He will rise no more. If, after falling, he hold his head erect, shoot him again through the neck, without moving. A step forward on your part may cause him to jump up and run, which he may do as long as he can hold up his head. If he falls nose down first, he is hit through the neck and shoulders. If he falls tail first, he will probably also bleat and his back is broken. Run then, and give him the mercy shot, for he cannot rise, but will make desperate efforts with his fore legs. If he kicks up when hit, he is shot through the paunch.

If he gives no sign but simply runs away, the question is, was he hit at all? If he carries his tail down, he is hit, but if he carries it jauntly upright, that is not sure evidence that he is not hit. In all cases, go and examine the ground. No matter how small the chance that he is hurt, go and make sure. Thousands of deer have been left to die a lingering death, or to become the prey of wolves, coyotes, or cougars, because the hunter turned away in disgust, taking it for granted that he had missed. A professor once told a class in surgery, in dressing a fracture, to use "too much cotton." After repeating this to a tiresome extent, he told them he entertained the wild hope that he had so impressed them, that possibly they might use enough cotton. I am purposely tiresome on this point; many things will tempt you not to look; always go and examine the ground. It is a duty. Go and look for blood and hair. If there is a breeze, look ten yards down the wind for hairs. If neither is to be found, follow the trail two hundred yards. If the buck kept running, with tracks evenly and naturally placed without faltering, and no blood, it is safe to conclude that he is probably not hurt.

If there is a little blood, sit down and wait an hour before following the trail a step. If there is much blood, wait a half hour. That is to allow time for the sickness and weakness, the "shock" that follows a wound, to make itself felt. As the deer has no memory beyond an instinctive one, he forgets the hunter the moment he is out of sight, his attention being attracted by his wound. If not followed at once, for which he will instinctively watch, he will soon seek the thickest cover to be found, and lie down. If fatally hurt the hunter will likely find him either dead or unable to rise. If able to rise, he will not be able to run as he would have done immediately after the shot; and further, after an interval, he having forgotten the hunter, may be more easily approached. If hotly chased at once after being shot, a deer will often run miles, and finally drop, and the hunter then has to carry him back.

Having waited then, from thirty to sixty minutes, which to the novice will seem an age, we will endeavor to follow the trail.

If there is blood on both sides of the trail, the bullet passed through, and he is bleeding from two

wounds. If the bleeding is profuse, and especially if the blood contain bubbles, probably the lungs are punctured. Fecal matter will show if the stomach or bowels are hurt. Follow the trail slowly, and so carefully that the deer will not hear you, even though he be lying near. Within a few rods, you will almost always find where the deer stopped, and watched and listened for pursuit. The amount and character of the blood found here, will give valuable information. If he resumed running after leaving this spot, he is not likely to be badly hurt. If he walked away, look ahead for a dense thicket. When one can be located mark the spot where you leave the trail, so that you can come back to it

for a moment, but if the sounds do not approach, he soon forgets them.

One may often shoot repeatedly at a standing deer before he will take to flight. The report of the gun confuses him, but will not make him run as would a single footstep.

Approaching footfalls, the creak of wavelets on a paddled canoe, leaves rustling, these are the sounds that admonish him to fly.

Having jumped another, shall we take a running shot?

I imagine the reader exclaiming, "Of course! Nearly all the deer I ever killed were running!" No doubt; and thought on these points brought out in this article will show many reasons why.

I expect many hunters to disagree with my theories about hunters, and probably the majority of my readers will dissent when I say, that in my opinion to fail to get a standing shot, near enough for a sure kill, is bad hunting. To be able to do it is good hunting, is it not? I believe that is the ideal towards which sportsmen, gentlemen hunters, should strive. If we take life let it be done mercifully. Many fine woodmen, lovers of nature, condemn all hunting as cruelty, contending that beneath feathers and furs is part of the same life that animates ourselves, and that the commandment "Thou shalt not kill" does not apply to human life only.

As to the running shot, here is the argument. No sportsman would intentionally wound a deer and leave him to die slowly. May he so act in following the sport that the probabilities are that he will wound many deer which he will not get? He may not.

If one is an expert shot; if the range is short; if the chances are in favor of success, the trial may be justifiable. If the hunter feels sure of hitting the deer, only, with fair certainty, he should refrain. He should not practice at living things. I practiced at a beer keg, rolled down a steep bank by an assistant to learn shooting at a moving target. If the shot be hazarded, and the deer run across the field "quartering" away, hold on the tip of the nose. If he runs straight away, his head and neck will come into view each jump, as he rises. Shoot on the rise. Shoot at the head and neck always, in running shooting, because you are likely to miss outright, or make a killing hit in neck or shoulder.

When a deer starts to run, if he jump high and look back he will probably stop. A whistle or bleat will help stop him. If he run in long, steady leaps, he has fully made you out, and is going somewhere.

Do not fancy that you renounce any of the pleasure of the hunt, by refraining from random shooting. As the deer runs away try to hold on his neck. Not intending to fire, you are not excited, and may be able to get a certain aim. I believe that enough deer will stop that otherwise would not, so that a man will get as many in the long run. But if you allow him to vanish, then the real pleasure of the game begins. When a waving white flag bobs out of sight, I feel the same thrill that inspires the angler when he has a strike. The contest is about to begin, the preliminaries having now been settled.

Note where he jumped from. What was he doing there? Where is he going, and why? A skilled hunter would not follow him at all. He would form a judgment as to where the deer had gone, by an instinct as sure as the deer's own, and go there by a round about way, and kill him where he stands. Bearing steadily in mind that the deer is a creature of circumstances, impelled by desires and fears, and not by a will of his own, the reasons for all the incidents of the chase will form a most engaging study. The circumstances will never be the same; but the underlying principles will never vary. Therefore, hunt with your mind, instead of with your legs, and as youth passes away, and you lose the blood lust natural to youth, you will find your pleasure in following the deer and gaining a vantage point from which you might slay, but do not. The real sport lies in the conquest, not in the killing, for who would like to shoot a deer that was tied to a tree? The real hunter can go after them, and have them at his mercy as surely as though they were tied.

These remarks are given in pure love of true sport, and the true sportsman in the hope that it may prove helpful. To learn sportsmanship, one must study the book of Nature, and study himself. And he must have Love, and Faith, and Hope, and Patience, and all these will not avail without meditation.

A LARGE BLACK BASS.

Governor Gillett was presented last week by Game Warden George Neale, with what is claimed as being the largest black bass ever taken in Sacramento Basin waters.

The fish was caught by Neale in the waters on the Del Paso Grant, and he says it is the largest black bass he has ever seen, and he has certainly seen a few. Measurements taken of the big fellow showed him to be twenty-four and a half inches in length, just a half inch over two feet. The spread of the tail measured six inches and from back to belly he was seven and a fourth inches. The bass tipped the scales at exactly eight and three-quarter pounds.

Neale thought for a while that he had a small whale when he caught the bass. He has handled thousands of black bass but this one eclipses anything he ever saw in size. It was fitting therefore that the fish be given to the Governor and it was presented last Friday.

HIS FIRST DEER—A "SPIKE."

again, then make a detour and enter the thicket from another direction, and against the wind. If there are thickets on both high and low grounds, he will choose the high, if he have strength to get there.

If you jump him shoot "as long as you can see a hair." Take every possible chance to get a deer already wounded. There will sometimes be others with him when he breaks cover. Shoot at the wounded one, no matter how much better shot the others may offer. That is duty again. Having wounded a deer, the sportsman must get him if it be possible, without taking into account how much hardship it may cost. I have known hunters to quit a trail, saying "Pshaw! I can kill another one before I can find this fellow!" This is not right.

NEXT SEASON—AN IMPROVEMENT.

We must eliminate from our hunting all cruelty, wantonness, and waste of life.

This is the one place where the writer advocates the use of a dog. Get him, even if you have to use a hound.

Having found our deer, despatched him, dressed him, and hung him up; or, if not practicable to hang him up, having tied our handkerchief or vest, or some other article of clothing to the carcass, to keep wolves, coyotes or other marauders away, we start to find another deer.

We may jump one from a thicket not a hundred yards from where we have made a great deal of noise. A deer is not alarmed by noise which does not approach him. Shouts, gun shots, the sound of an axe, may startle him and put him on the alert

FIELD TRIAL NOTES.

The saying that the gentleman was known by his horse, his hawks and his hounds is a very ancient one, and indeed old King John is recorded as having accepted coursing hounds in lieu of money fine. This is indicative of the fact that the hunting of game by specially trained dogs is one of the very oldest, yet one of the most fascinating, innocent and invigorating of sports afield. It is a pastime that has lost none of its fascination with age but rather has expanded and developed with the centuries until today its devotees include not only the wealthy but gentlemen in all walks of life, and it stands to the credit of the followers of either coursing or field trials that the sport has kept scrupulously clean from even the taint of any feature of an objectionable nature.

Field trials are pre-eminently an American sport, though they originated in England and are very closely allied to the good old English pastime of coursing.

In some sections the dogs are trained to hunt the prairie chicken on the "open" prairies; down south the trials are run on bob white quail in the various kinds of "cover" found there. On the coast the trials are run on valley quail in California, bob whites in Washington, and Chinese pheasants in British Columbia.

It is always a social frolic, and those who follow the dogs are invariably good fellows and agile and healthy ladies, who are as much at home in the saddle as in the drawing-room, and of whom it has been truly said that during the meet they all think only of dog, talk of dog, and dream of dog.

The true sportsman finds as much, if not more, real, genuine pleasure and satisfaction in watching his dogs hunting and locating game with all their really natural and acquired skill than he does in bagging the game. It is the sport of a gentleman who delights in nature manifesting itself. The dogs are bred primarily for the love of the animal truly termed "man's truest friend;" and many there are now who devote almost as much attention to their kennels as to their racing stables, good dogs commanding a price about on a par with the kings and queens of the turf; for breeding of the bird dog is a venture fraught with such uncertainty and so many obstacles that few even among the "initiated" fully realize the ceaseless efforts required on the part of successful breeders and fanciers to attain the instinct and sagacity required of the animals in hunting game birds. This is not the work of a day nor of a season. It is one of the most complex of problems, for the bird dog is not really a natural animal, but rather a creation born of necessity. He has many peculiar traits that are purely artificial and can be perpetuated only by eternal vigilance and forethought. No bench show requisites must dictate the procedure, for the bird dog must be bred for brains and must combine in his small, agile body the speed of the race-horse, the endurance of the roadster, the courage of a bull dog, the hound's sense of smell, and the spaniel's tractability. He must also have qualities that are peculiarly his own and which are the points upon which his special merit hangs, namely, form, style, character, bird sense, and pointing instinct or ability to handle game. The last three characteristics are, of course, the most important, but at the same time the most difficult to perpetuate in breeding.

The bird instinct, which manifests itself even in the puppy just beginning to frolic around and chase anything with wings, from a grasshopper or butterfly up to the barnyard chicken, is no doubt the result of centuries of training of certain species of dogs to hunt feathered game and may now be regarded as a natural instinct. It is the one characteristic which separates the bird dog from all others of his species. It is peculiarly an attribute of the setter and pointer because they have been specially selected by breeders and fanciers for this purpose, and as a consequence are generations ahead of all others of the canine tribe in development in this respect. Which of these breeds excels is an open question as there is and always has been a keen and commendable rivalry between the fanciers of the pointer and the setter.

The pointing instinct is the most remarkable, even wonderful, quality of the hunting dog; without it he is useless; and yet with it too finely developed he is spoiled because then he will false point—a most annoying fault. Pointing is an instinct which can scarcely be explained. It is said, and probably this may be true, that sense of smell is so keen, so sensitive, that at the scent of the game bird, the dog trained to hunt it will throw him into a hypnotic state where he remains rigid, almost unaware of the lapse of time or of what else is going on around him save the directions of his master in locating the game. The latter is all he seems to be actually conscious of. A deficiency of the pointing instinct is almost worse than too much of it for when a dog is lacking in this respect he almost invariably flushes his game by getting too close to or paying no attention to the birds.

Bird sense is an indefinable instinct also combining acute scenting powers with hunting judgment which causes the dog to search out the likely territory first with a promptness that indicates possession even of reasoning powers. There is no denying this and every really successful high class field trial dog has it to a greater or less degree. It cannot be accidental, inexplicable and mysterious. Dogs possessing it go to the birds often without undue

ranging with despatch and decision though it may also carry them far afield. Without it the brilliant, stylish, dashing ranger seems only to blunder on game as if merely by accident.

The work of the dogs at a field trial is recorded by a number of somewhat technical terms which are applied to the characteristics which the judges are called to pronounce upon. To the initiated many of these are simply Greek and consequently in an article such as this an explanation of some of these might be a pardonable digression.

The course is the section of country and direction mapped out by the judges for the running of the various heats; and it must be followed as closely as circumstances will permit. It is regarded as a serious error for a handler to permit his dog to leave it beyond control.

A "holter" is a dog which dashes away off the course and out of sight; and is an unpardonable offender. Too much life or headstrong will and insatiable desire to hunt may often cause an otherwise excellent dog to sin thus grievously.

A cast is made by the dog in going wide from his handler and returning, searching out the country on the course. The good, wide-going dog will frequently make casts of a mile in either direction, yet will be always under perfect control and will never leave the course, always obeying the whistle or slightest motion of his handler whose commands he implicitly executes, coming in, going out, or otherwise altering his direction in accordance with the signal given him by a wave of the hand or a hat.

Ranging is really the dog's hunting ability and is descriptive of the country he covers and the distance he goes from his handler.

A point is the rigid position a dog assumes immediately upon scenting game.

GLEN TANA DAHLIA.

In locating game a dog is said "to road" when he goes to the bird by following foot-scent on the ground. But when he throws his nose into the air and depends on body scent for location, he is said "to draw." This, of course, is the more stylish and vastly superior characteristic in the game work of a high-class field trial dog. Some dogs will draw to a covey of fifty, sixty or seventy yards away with a precision which manifests a marvellous sense of smell, and such an exhibition is always one of the spectacular and most attractive performances of a trial.

Backing is the position which a dog should instantly assume upon seeing another dog at point. He is required to at once assume a pointing position and be ready to move up to assist in locating the game when the time is opportune.

"Trailing" or "tagging" is an error which a dog lacking in independence or energy and ambition will commit by persistently following in another dog's footsteps.

"Flushing" is also an error caused by the dog putting the game to wing by going too close in or carelessly about his work. When it occurs on a down wind course it is often regarded as "excusable," according to the circumstances of the case. When the game takes to wing and the dog promptly points or remains on point he is said to be "steady to wing" and this is a hard and sure test of his game work.

"Style" characterizes the general work of a dog both in his going and in his handling of game and when on "point." There is so much difference in dogs in these respects that it has to be seen in order that it may be appreciated.

In deciding a trial the judges now use what is known as the "spotting" system, the old method of "knock out" heats having long ago been found often

unfair and altogether impracticable, tedious and protracted when there was a large entry. The judges now watch and note the work of the dogs in the first series and after it is completed they "spot out" or retire from competition all the dogs they consider to enter the second series. Against their decision there is no appeal. Thus it is narrowed down to a small percentage from which the winners are finally selected.

Field trials is a line of sport peculiarly adapted to the Coast, where there is an abundance of game birds and other natural conditions indispensable to the development and displaying of field trial qualities and characteristics. But they owe their existence here to the enthusiasm of the Pacific Coast Field Trial Club, which has been in existence now for a quarter of a century. The British Columbia Field Trial Club, and the Pacific Northwest Field Trial Club are also strong factors, recently, in keeping up the interest of Coast sportsmen in the game.

DOINGS IN DOGDOM.

Tommy Banks is in line for congratulations. For a quarter of a century he has been connected with Spratts, twelve years of which time have been devoted to the interests of the Coast fancy. Spratts have gracefully acknowledged Mr. Banks' able and satisfactory management of their Coast business and his long continued attention to his business engagements.

The attention of Collie fanciers is called to the announcement, in this edition, of the Valverde Collie Kennels. The influence of the Valverde Kennels is bound to become potent for the benefit of Collie breeding on the Coast. The bench career of the Valverde Collies is notable as being a winning one by California bred dogs in almost every instance.

Glen Tana Dahlia is a six months' bitch Collie by Ch. Squire of Tyton, out of a Wishaw Leader bitch. She is sable and white, has a straight head, large boned, level mouth and is all round promising as a comer. Glen Tana Collie Kennels of Spokane have not set a price on this puppy, which if wanted by any of our readers, will be a matter of correspondence with Mr. T. S. Griffith.

The premium list for the Del Monte show was not, we regret, received before going to press this week. Entries will be \$2 for the first and \$1 for each additional class, and will positively close on Saturday, December 28th.

Indications point to an unusually good entry. The Los Angeles Fanciers and also fanciers from other Southern points will be largely in evidence with entries. Local enthusiasm promises strong support for the show.

Mr. Frank Worthington of Twenty-fourth street and Potrero avenue, recently received a grand ten-months-old Bloodhound dog, Knight Templar (Ch. Magician-Kohanza). He was bred by Dr. Knox of Danbury, Conn. Mr. Worthington will also get a brood bitch or two and proposes to devote his fancy and attention to Bloodhounds.

Ch. Edgewood Biddy is now owned by C. G. Israel, a prominent Bull Terrier fancier of Seattle. It is reported that Frank Dole received \$1,000 for her. Biddy is regarded as the best Bull Terrier bitch in the United States. She is credited with over 100 wins in this country—a number of these being for best in the show and nineteen being firsts in winners.

Edgewood Biddy was bred by Mr. Sharples of Yorkshire, England. She was born January 7, 1901, and is solid white in color. Her sire, Finny, while not so well known himself, is a son of the great Champion Greenhill Romeo, and his dam is by Champion Lord Roberts.

In England, it is reported, Biddy won twenty-one first prizes before she was a year old, then being known under the name of Millstone Biddy. Frank Dole of New Haven purchased her in 1903 and since then she has been the greatest winner of this well known New Haven kennel. It is estimated that in her career both in England and in America she has traveled over 15,000 miles, and yet she is as young and spry and as perfect a show animal as in her puppyhood. She was shown recently at Hartford Conn., under her new colors, and as usual led the procession. Mr. Israel will have Biddy sent to the Coast immediately after the New York show in February. She will be seen at San Francisco and Los Angeles in the spring.

Always on Top.

Phil B. Bekeart is now located in spacious front offices in the modern Kamm office building, 717 Market street. Phil reports business for the past year very good and prospects for 1908 most excellent.

The Captain is On Deck.

Tom Lewis, Captain of the Union Gun Club, reports a prosperous sporting goods business for the O. A. Bremer-Lewis Co., 140 Van Ness Avenue, for the past year. During the past season Captain Lewis has taken an active interest in baseball and football, and has been a successful manager in promoting some lively amateur games.

TRADE NOTES.

The Du Pont Calendar.

The demand among sportsmen for authentic pictures of some of our National Field Trial winners is happily catered to by the Du Pont Powder Company in the liberal offer made on the elegant calendar issued by the company for 1908. In artistic conception and truthfulness of treatment there can be no question, for the pictures are by the magic brush of Mr. Edm. H. Osthaus, who needs no introduction to the lovers of hunting dogs—the fact that the pictures here referred to are exact copies of his work is enough to commend them to every one.

The picture of Joe Cumming, winner of the National Field Trial Championship of 1899, the champion bird-dog of his year, is the chief feature of the calendar. The series of four pictures consists of portraits of each National Field Trial winner since the inaugural trials in 1896—Ch. Count Gladstone IV., in 1896; Tony's Gale, 1898; Joe Cumming, 1899, and Lady's Count Gladstone 1900. There was no championship decided in 1907, owing to inclemency of weather.

These portraits are in water colors and they are reproduced in the best possible style.

Copies in color are now ready for distribution, about 20x16 inches with a white margin and suitable for framing, there being no advertising matter on them. Single copies will be mailed in tubes on receipt of 75 cents, or the four pictures will be sent on receipt of \$2.50. Address all requests to the E. I. Du Pont De Nemours Powder Co., Advertising Division, Wilmington, Del., or to any of the branch offices at the following points: Birmingham, Ala.; Chicago, Ills.; Cincinnati, O.; Denver, Colo.; Duluth, Minn.; Hazleton, Pa.; Houghton, Mich.; Huntington, W. Va.; Joplin, Mo.; Kansas City, Mo.; Nashville, Tenn.; New York, N. Y.; Philadelphia, Pa.; San Francisco, Cal.; Pittsburg, Pa.; Scranton, Pa.; St. Louis, Mo.

A New World's Record.

To accomplish the feat of smashing 15,000 inanimate targets without a miss argues that the shooter must use accurate firearms and reliable ammunition. This phenomenal feat was accomplished by Mr. J. W. Akard of Fairplay, Mo. "The King of Rifle Shots," in five days' shooting, from October 11th to 16th, and is supported by the testimony of affidavits. Mr. Akard shot each day until he became tired, cleaning his rifle only at night. He used U. M. C. 22 short cartridges. Another world's record was the tossing up and hitting without a miss 1659 marbles. Mr. Akard has a repertoire of difficult and trick shots that are remarkable exhibitions of skill with rifle and shot-gun. He uses a Remington auto-loading 35 rifle, a 22 rifle and a Remington auto-loading shot-gun. He has broken two world's records since August 24, 1907. Some of his feats with the Remington auto-loading rifle, showing the wonderful penetrating power of the arm are almost incredible. Among others a piece of steel, three inches square and one-quarter inch thick, is tossed in the air and pierced by a bullet; three oranges thrown up at the same time are shot at with a soft-pointed bullet and made to disappear successively, thus illustrating the marvellous mushrooming power of the rifle and ammunition.

U. M. C. shot-gun shells and Remington guns are a winning combination. At Forney, Tex., Nov. 28 and 29, U. M. C. shells won the live bird handicap with two Remington auto-loading guns in the tie, Mr. E. F. Forsgard was high amateur and high gun, breaking 286 out of 300—95 1-3 per cent. Mr. F. M. Faurote won the professional average. Both shot U. M. C. shells, Mr. R. J. Jackson won the 50-bird handicap scoring 47 from 19 yards, and Mr. Forsgard won the Du Pont trophy with 20 straight. Mr. Forsgard was also one bird behind Mr. Jackson in the 50-bird event. As stated before, both shot U. M. C. shells.

Clever Rifle Shooting.

Captain Geo. E. Bartlett has recently given some high-class and skillful exhibitions of rifle and shotgun shooting at Shell Mound, Berkeley, and Croll's Gardens, Alameda. Large and interested audiences were present. Shooting holes through pennies tossed up was one of the extraordinary feats performed by him. Captain Bartlett was at the park in the interests of the Peters Cartridge Company, whose shells he was demonstrating.

Besides never failing to hit small metal disks the size of pennies when they were thrown up, the expert scored on his mark whether the rifle was held upside down or on the ground, and when the object was focused by means of a small mirror. His aim was marvelous and his speed wonderful. But four misses in more than 200 shots at small bits of brick with a .22-caliber rifle was part of his record during the afternoons.

Some confusion has arisen in connection with the record of 13,066 straight made by Capt. A. H. Hardy at Lincoln, Neb., November 13-18. This record stands without an equal, the objects shot at having been wooden balls and blocks 2 3/4 inches in diameter, thrown into the air at a height of about 20 feet at 15-foot rise. This, as every shooter will readily understand, is quite a different proposition from shooting at 4-inch blocks or 4 1/2-inch clay targets.

Capt. Hardy used the regular .22 short semi-smokeless cartridges, loaded with bullets, not shot, and made the entire run of 13,066 with one rifle, which was not cleaned from start to finish.

496x500 Shooting 980x1000.

The Winchester "Red-W" squad of world's champion shots, who have been shooting at tournaments in the South and who have been breaking old and making new world's records with an abandon that has astonished the shooting fraternity, recently tacked up another world's record for squad shooting, breaking 496 out of 500 in an open tournament, shooting over Leggett traps at Leesburg, Fla., November 21st. The scores of the individual members were as follows: W. R. Crosby and J. R. Taylor, both 100 straight; Fred Gilbert, 98-100; J. H. Hawkins, 99-100; L. R. Barkley, 99-100. This same squad shot at another 500 targets and scored 484, making the total score of 980x1000. The whole performance is remarkable, and shows not only what expert shots the members of this squad are, but also lays emphasis on the high quality of the Winchester shotgun shells, which they are all using, and also draws attention to the shooting qualities of Winchester repeating shotguns, as Messrs. Taylor, Hawkins and Barkley are using them also.

In New Quarters.

Mr. A. Muller, Coast representative of the Winchester Repeating Arms Company, is now located in cozy and centrally located offices at 714 Market street, in the Magee Building. The offices as now established, near the corner of Market, Kearny and Third streets, are easily reached from any portion of the city, a matter of utmost importance and convenience for a large business corporation at the present time, when the streets of the downtown section are and have been so much obstructed.

A Popular Quintette.

A Coast trap shoot without the attendance of all or a part of the five "trade representatives," Clarence A. Haight, Dick Reed, Hip Justins, Emil Holling, or D. W. King Jr., has become looked upon as lacking in certain necessary essentials.

Popular with all and painstaking to a degree, the appearance of either of the "bunch" is a guarantee that a tourney will be successful and smooth running. Many an ambitious amateur has benefitted by the sage advice and direction of these practical and skilled trap shooters.

DICK REED. HIP JUSTINS.
EMIL HOLLING. CLARENCE A. HAIGHT. D. W. KING JR.

Well Liked by Sportsmen.

During the past season there has been a growing demand on the Coast for high grade Ithaca guns. The popularity of small bores has resulted in the Ithaca Gun Co. placing on the market, besides their well known grades of 16-gauge guns, a 20-gauge gun that has received the recognition of many sportsmen. A feature of the Ithaca gun is the coil mainsprings, which are guaranteed against breaks and misfires. The 1907 model, three bolted

gun embodies all the requisites of a perfect gun. A single trigger Ithaca will soon be at the disposal of sportsmen, a gun that will meet every requirement that a modern shotgun should have.

Send to the Ithaca Gun Co., Department 15, Ithaca, N. Y., for the new Art Catalogue, descriptive of eighteen grades of guns.

Will Have To Move.

Golcher Bros., located at 511 Market street, this city, have, during the past year, found an increasing volume of business makes necessary a removal to more commodious quarters. The change of location will be announced in due course.

This enterprising firm of dealers in sportsmen's goods are at present carrying a stock of goods equal in quality and variety to that which they were famous for before the disaster of 1906. The season's sale of high-class rods and fishing tackle has been larger than anticipated. For the devotee of the gun and rifle the store invites an inspection of a line of goods second to none on the Coast. Outing and athletic goods, as well as a large and complete side line, are in stock also.

The Old Reliable.

"Point it straight and a Parker will do the rest, every time," is an axiom that contains more truth than poetry. What has been done and what can be done with the hardest hitting of all American guns, its careful and skilled construction and the different grades in which it is built, can be ascertained by sending to Parker Bros., Meriden, Conn., for a catalogue.

The Hunter Single Trigger.

Since the introduction of the Hunter single trigger there has been an increasing demand for the L. C. Smith gun.

The Hunter one-trigger is very simple, having only three important parts. The action is positive and works every time. It cannot possibly balk or double. It will make a better shooter out of you, no matter how good you may be.

The New Art Catalogue will be mailed on written request to the Hunter Arms Co., Fulton, N. Y.

A Home Product.

Selby factory loaded shells have been used by thousands of Coast sportsmen for years past. The fact that the output for this good and reliable ammunition has steadily increased from year to year, is an unanswerable argument that quality and results are satisfactory. These goods are on sale by all Coast dealers. If you have a special load you wish put up, the Selby Smelting and Lead Company will put it up for you and you will be satisfied in every particular. Try it.

The Shreve-Barber Company are now in business in commodious quarters at 1023 Market street. A full line of guns, rifles, revolvers and ammunition is always kept in stock. Rods and fishing tackle are carried in variety and grade ample to meet the demand of all sportsmen. A suitable surf fishing reel has been a long-felt want that is now filled by the "Good Luck" reel, that should be seen to be fully appreciated.

The Accepted Standard Veterinary Remedy

We Guarantee that one table-spoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin cure mixture ever made.

Leading Horsemen Use It. San Francisco, Cal. The Lawrence-Williams Co., Cleveland, O.: Please send me your horse pictures advertising GOMBAULT'S CAUSTIC BALSAM. All the leading horsemen around here use it, and are well pleased with the work it does.

THOMAS WELCH.

Used Successfully for Twenty-five years on Sweeney, Windgalls, Etc. I have used GOMBAULT'S CAUSTIC BALSAM for sweeney, windgalls and caloused scars resulting from wire cuts, and collar sores, with very best results. I have used it for the past 25 years and it always gave entire satisfaction.

JESS W. HARPER, Glenullin, N. Dak. Caustic Balsam Good For Cancerous Sores.

I used GOMBAULT'S CAUSTIC BALSAM for a cancerous sore on foot of horse. I found it a most powerful liniment and it has done for me all that is claimed for it.

P. WINKELMAN, Granville, N. Dak. Sold Caustic Balsam to Satisfied Customers.

Please send me pictures of "famous horses." Have sold GOMBAULT'S CAUSTIC BALSAM for years to satisfied customers.

C. S. BURROUGHS, Jennings, Okla. Caustic Balsam A Good Seller. Please send advertising matter of GOMBAULT'S CAUSTIC BALSAM. It is a good seller with us.

PALACE DRUG STORE, Sayre, Okla. That Stuff is All Right. Enclosed find money order for \$1.50, for which please send me one more bottle of GOMBAULT'S CAUSTIC BALSAM. That stuff is all right.

JOS. BOGUE, Mesa, Colo. All Right For Shoe Boil, Sprains and Swellings.

I used GOMBAULT'S CAUSTIC BALSAM for shoe boil, sprains and swellings. It is all right.

E. R. TIBBALS, Denver, Colo. Used 12 Years With Success For Spavin, Ringbone, Splint, Curb, Sprains, Etc. I have charge of from 30 to 50 mules and have used your GOMBAULT'S CAUSTIC BALSAM for the last 12 years, and find nothing to equal it for spavin, ringbone, splint, curb, sprains, bunches and other diseases.

WM. JOHNSON, Rockvale, Colo. A Very Effective Remedy. Kindly send us your pictures of "famous horses." We have GOMBAULT'S CAUSTIC BALSAM in stock, and find it a very effective remedy.

LEAVER DRUG CO., Salt Lake City. Druggist Says Caustic Balsam Always Pleases.

We have a very good sale on GOMBAULT'S CAUSTIC BALSAM and have always found that it will do all you claim for it. It is always found in our stables.

LARSON DRUG CO., Phoenix, Ariz. Caustic Balsam Always Pleases.

Please send me your pictures of "famous horses." I have a good sale on GOMBAULT'S CAUSTIC BALSAM, and never hesitate to recommend it in cases of curb, sweeney, spavin, etc. It always pleases.

A. W. DAVIS, Safford, Ariz. Sells Lots of Caustic Balsam. Please send pictures of "famous horses." I am selling lots of GOMBAULT'S CAUSTIC BALSAM.

J. MCINTOSH, Parma, Idaho.

None genuine without the signature of The Lawrence-Williams Co. Sole Importers & Proprietors for the U.S. & CANADAS. CLEVELAND, D.

We Guarantee that one table-spoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin cure mixture ever made.

Caustic Balsam—Best For Rheumatism, Sore Throat, Bruises, Etc. I have been using GOMBAULT'S CAUSTIC BALSAM for 15 years and I think it is the best liniment for rheumatism, bruises, cuts and sore throat. I would not be without it.

ROBT. NELSON, Victor, Mont. Caustic Balsam Always Good For Hard Bunches.

I have used GOMBAULT'S CAUSTIC BALSAM on hard bunches on my horse's shoulders and it took them off smooth and clean, without leaving a scar. It is a wonderful medicine. I cannot say enough for it.

JAS. L. FLEMING, Dell, Mont. Likes to Sell Because It Gives Satisfaction.

I note a considerable increase in the sale of GOMBAULT'S CAUSTIC BALSAM here during the past year. I like to sell it because it gives general satisfaction. Kindly send me horse pictures and advertising matter.

H. W. PAULING, Condon, Oregon.

Caustic Balsam a Favorite Remedy. GOMBAULT'S CAUSTIC BALSAM is a favorite remedy with my customers. J. E. HAYNIE, Ph. G., Halfway, Ore. Veterinarian Thinks Caustic Balsam Alright.

I would like some of your advertising matter to hang in my office. I have used your GOMBAULT'S CAUSTIC BALSAM and it is all right.

DR. HENRY NUNN, V. S., McMinville, Oregon.

Good For Anything That Needs A Blister.

GOMBAULT'S CAUSTIC BALSAM is all right for anything that needs blistering. I used it on spavins with success.

H. F. SHERMAN, Toledo, Wash. Cured Bad Case of Sweeney.

I cured a bad case of sweeney with GOMBAULT'S CAUSTIC BALSAM after other remedies failed.

GLENN JOHNSON, Colfax, Wash. Caustic Balsam Will Cure Lump-jaw.

You should place lump-jaw among the ailments which you mention as being curable by GOMBAULT'S CAUSTIC BALSAM. It would increase your sales. One application will cure it. It is the best liniment I have ever seen, or used, and I would like to see it in the hands of every dairyman.

DAN. DUPERTUIS, Curtis, Wash. Caustic Balsam Worth Twice The Price.

I have used GOMBAULT'S CAUSTIC BALSAM, and would not do without it for twice the price.

M. E. NICWOD, Roselawn, Cal. Has True Merit—Cured Fistula.

Feeling that true merit should be recognized, I want to give my experience with GOMBAULT'S CAUSTIC BALSAM. A month ago one of my horses gave every indication of having a fistula. I was told that his case was incurable, but sent for a bottle of GOMBAULT'S CAUSTIC BALSAM and applied it per directions. The case yielded to the treatment from the first, and the horse is now entirely cured.

C. T. GREATHEAD, Tancred, Cal. Caustic Balsam A Good Seller.

Kindly send me pictures of "famous horses." I keep GOMBAULT'S CAUSTIC BALSAM in stock and find it a good seller.

G. M. LUTTRELL, Santa Rosa, Cal. Druggist Could Not Keep House Without Caustic Balsam.

We always carry GOMBAULT'S CAUSTIC BALSAM in stock. We could not keep house without it.

MISSION PHARMACY, Orangs, Cal.

VALVERDE COLLIE KENNELS

(REGISTERED)

The Home of the Cup Winners

We exhibited at Nineteen Shows during 1906-7, including New York, Harrisburg, Pa., Hartford, Danbury and Simsbury, Conn., and won 119 firsts, 19 seconds and 8 thirds. We had the "Winning Dog," (best over all Collie Dogs) at nine shows, and "Reserve" (or next to the best) at three shows. We had the "Winning Bitch" at Fourteen shows (or at every show where we had a bitch entered, and also had the "Reserve Bitch" (next best to winner), at three shows. Seventy Championship Points were won, four Full Champions Made, and Seventy Cups and Specials were annexed. (The majority of these wins were made by dogs and litters of our own breeding.)

We now have Seven Champions in our Kennels.

RECOMMENDED BY MOST PROMINENT TRAINERS

Los Angeles, Cal.

Gentlemen:—I used a Houghton Sulky exclusively this year in forty-one races, also loaned them occasionally, and in each case the user was very favorably impressed. I am more enthusiastic than ever over your sulky. After having conducted a public training stable for twelve years, I have about discarded other makes. I appreciate that there are other good sulkies, but so far I cannot find any other make that suits me as well as the Houghton. Yours very truly,

W. G. DURFEE.

PERCY W. TREAT, Secretary

THE

CALIFORNIA FUTURITY

With \$5000 Added

To be Run at the Fall Meeting of 1910

\$10 each for mares covered in 1907; \$25 each for the produce of such mares unless struck out by December 1, 1909; \$50 each unless struck out by August 15, 1910; \$150 to start; \$5,000 added, of which \$1,000 to second and \$500 to third; 15 per cent of the stakes to the nominator of the dam of the winner; 10 per cent to the nominator of the dam of second horse and 5 per cent to the nominator of the dam of the third horse. Winners of two sweepstakes or one of \$5,000 value to carry 4 pounds extra; of three or one of \$7,000 value, 7 pounds extra; non-winners of a sweepstakes allowed 3 pounds, and if such have not won four races, 6 pounds; maidens, 9 pounds.

If a mare nominated drops her foal before the 1st day of January, 1908, or if she has a dead or more than one foal, or is barren, the entry of such mare is void. By filing prior to December 1, 1909, with the New California Jockey Club an accepted transfer of the produce, with its engagement in this event accompanied with all forfeits to date, the original subscriber will be released from any liability as to the engagement of the produce.

SIX FURLONGS.

THOS. H. WILLIAMS, President.

APPEARANCES SOMETIMES MISLEADING.

The value of a stock horse depends upon his ability to transmit and perpetuate with uniformity his most desirable qualities, or those for which his ancestors were noted. It sometimes happens, however, that the sons and daughters of a stallion, which perpetuate his most valuable qualities in the highest degree, and with the greatest uniformity, are not those which bear the closest resemblance to their sire in size, conformation, color, and general outward appearance. The breeder who pays fancy prices for the untried produce of any noted sire simply because the animal, in outward appearances, bears a close resemblance in color, markings and general outward appearance to that sire is liable to be disappointed.

Imported Messenger, to which the American trotter is probably more largely indebted than to all other sources combined, was a gray in color. The two sons of Messenger, from which nearly all the trotters of the present day are descendants, were Mambrino and Bishop's Hambletonian, both of which were bay in color. There was a gray son of Messenger that was named Mambrino. As an individual he was evidently far superior to the bay Mambrino that got Abdallah, and Mambrino Paymaster. Judging from the description of him, this gray Mambrino got excellent stock that was noted for size and substance, and some of his get had quite a local reputation, both as trotters and runners.

Though never broken to harness this gray Mambrino was quite popular, and was once sold for \$1,200, if we remember correctly, while the bay son of Messenger known as Mambrino changed hands several times for a consideration of about \$200. This gray Mambrino was not registered as thoroughbred either in Wallace's or Bruce's American Stud Books, but both the bay Mambrino and Bishop's Hambletonian appear in Bruce's Stud Book. We do not remember of ever having seen the name of this gray Mambrino, either in the pedi-

grees of any of the old-time trotters of note, or those of more modern times.

Rysdyk's Hambletonian bore little resemblance to his noted sire, Abdallah, in conformation, in fact was decidedly unlike him at many points, especially in barrel, quarters, and gaskins and quantity of hair on his tail, yet he was the only son that the Year Book credits to Abdallah as a sire of 2:30 speed. It is very probable, however, that Conklin's Abdallah, the sire of the old-time world's trotting champion Rarus 2:13 1/4 was by old Abdallah, the sire of Rysdyk's Hambletonian. Old Abdallah was kept for some years in New York City after his return to the North from Kentucky. We were informed years ago by a man who took care of the old horse, either late in the forties or early in the fifties, that, as the old horse received no paying patrons, he was occasionally mated with mares that were used on teams for hauling manure from the stable in which Abdallah was kept and no charge made for the service. It is not improbable that Conklin's Abdallah may have been the result of one of those surreptitious matings, but since he left neither a son nor daughter that perpetuated speed, the origin of Conklin's Abdallah is of less interest than it otherwise would have been.

The most noted son of Rysdyk's Hambletonian, as a perpetuator of speed, was George Wilkes, yet there was probably no other son of Hambletonian that was more unlike him in general appearance. The size, color, markings, gait and some of the other characteristics of George Wilkes, and the blood of the dams from which some of the best of his get were produced, bear very strong witness to a Clay and Morgan combination of blood lines in his dam.

Neither Onward 2:25 1/4, Red Wilkes, nor Jay Bird, which are among the best of the sons of George Wilkes as sires and perpetuators of speed, would have been suspected from their size, color and general appearance to have been begotten by that noted son of Rysdyk's Hambletonian. Allerton 2:09 1/4, the

most successful son of Jay Bird, as a sire of uniform standard speed, would not be suspected from his color of being related to Jay Bird.

So, too, the most famous descendants of the stallion Justin Morgan, as perpetuators of speed, each differs from his sire in some market respect, though in others there was a family resemblance. The original Justin Morgan was a bay in color, but Sherman Morgan, the most noted son of Justin Morgan as a perpetuator of trotting speed, was a chestnut in color, with some white markings, qualities that he evidently inherited from his dam.

The fastest son of Sherman Morgan, and his most successful one in transmitting speed, style, and superior road qualities was Vermont Black-Hawk, and as his name indicates his color was black, as was also that of his dam. The most successful son of Vermont Black-Hawk as a sire was Ethan Allen 2:25 1/2, undoubtedly one of the best-gaited trotters and finest gentleman's roadsters that lived in his day.

The best son of Ethan Allen as a sire of speed was Daniel Lambert, whose color was chestnut, though his dam, Fanny Cook, a chestnut in color, was by the bay stallion old Abdallah. Harold was a bay in color and the noted broodmare Miss Russell was gray, yet the old-time noted trotting champion Maud S. 2:08 1/4 was chestnut. Alexander's Belmont 64 was bay, yet the gray mare Miss Russell was mated with Belmont 64, and the produce was the chestnut stallion Nutwood 2:18 1/4, that has proved far superior to any other son of Belmont 64, not only as a sire of standard performers, but also as a speed perpetuator through both sons and daughters.

Columns might be filled with similar cases, but enough facts have already been given to convince new beginners that, in selecting the sons or daughters of some famous sire, they should test the qualities of the animals themselves, rather than select those which bear the closest resemblance to the sire in color and conformation, otherwise they will be liable to overlook the ones that really possess the most merit.—Am. Horse Breeder.

FOR LICE ON ANIMALS.

The "Agricultural Epitomist" says that aloes in fine powder is a specific for the destruction of lice on all animals and as it has no poisonous properties, the intense bitterness being what kills, it can be freely applied and as it is to be used in a dry state its application is as safe in cold as well as in warm weather, consequently it is free from all objections urged against other remedies. The use of a fine pepper box, dusting and rubbing it in all over, then curry out inside of a week, is the best way to apply it. Or take a pound of fresh lard, a fourth of a pound of kerosene oil and four ounces of flowers of sulphur; mix them thoroughly. With this mixture rub the animal's head, also the spine and upon the shoulder and brisket and under the thighs and wherever the vermin is seen. Repeat the operation once a week until the lice disappear, which will not be long. One application will kill the lice and in case of nits that are not hatched, the second application, put on a few days after, will entirely rid stock of all vermin.

SALTING BUTTER.

We think it is the Iowa station that says the amount of salt to be incorporated in the butter depends directly on the amount of moisture the butter contains. Butter fat is not a salt-dissolving substance. This can be done only by the moisture in the butter. The first thing, then, to get a uniform amount of dissolved salt in butter is to get a uniform amount of moisture.

The water should be evenly distributed through the mass of butter. If it is present in the pockets or crevices in the butter when the salt is added, much salt will be lost in the form of brine, besides those particles of butter near the pockets will contain more salt than those farther away.

Best results are obtained by allowing the butter to drain well after washing and then applying the salt. In no case should salt be added till the butter has assumed a gathered condition.

When the butter is medium soft after being worked, it has been found that from three-fourths to an ounce of salt for each pound of butter is not far from the correct amount.

The experiments in feeding cattle at the Missouri Experiment Station, extending over several years, have demonstrated very forcibly the superior value of red clover, cowpea and al-

falfa hay over timothy or sorghum hay when fed in connection with corn. This is proof, anew, of the value of the balanced ration. Protein feeds must be mixed with corn to get the best results in fattening animals.

Kenneth C. 2:13 1/4, three year-old record, is one of the handomest, gamest and best young sons of the great McKinney on the Pacific Coast. He is a high class individual in every respect. Season of 1908 at Pleasanton, Cal. Address for particulars, S. K. TREPREY, Pleasanton, Cal. FEE FOR SEASON—\$40

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c and \$1.00

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

"SAVE THE HORSE" SPAVIN CURE

Registered U. S. Patent Office

TO THE WINTER QUARTERS FOR THE BEST CURE, FIRING, BLISTERING AND THE USUAL METHODS ARE UNCERTAIN AT BEST; THEY MEND INVARIABLY FOR THE MOMENT ONLY.

Don't take chances, use "SAVE-THE-HORSE." Don't think you are experimenting; write for copy of contract and information; read what it has accomplished for others; it will positively do the same for you.
71 Fisher Ave., White Plains, N. Y.—
I cannot speak too highly of your "SAVE-THE-HORSE." I had a gray mare eight years old, born with a ringbone, and that is something wonderful to say. I bought her two months ago dead lame, given up by all the horse doctors. I paid \$105 and since have refused \$400. Any time you want to send anyone to me I will be only too glad to show what your treatment has done for her.

JNO. W. SULLIVAN.
Office of Jacob E. Perkins, 39-40 Blackstone Building, Cleveland, Ohio—
I purchased a bottle of "SAVE-THE-HORSE" from Strong, Cobb & Co., and went to work. My colt had two small lumps under his jaw, the result of distemper. I treated them with "SAVE-THE-HORSE" and they disappeared.
JACOB E. PERKINS.
Inter-State School, Inc., Cedar Rapids, Iowa—

Enclosed find purchaser's acknowledgment of one bottle "SAVE-THE-HORSE," contract No. 31502. I have no complaint, all my spavins and curbs are gone.
PAUL F. DOLAN, care Fire Dept. Scotch Line, Ontario—

Some time ago I bought one bottle of "SAVE-THE-HORSE" from Lyman & Sons, Toronto. Applied for splint, which has disappeared entirely.
JOHN O. ALLAN.
"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.
\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

is used and recommended by the largest fire-arms manufacturers in America. Experienced gun users everywhere say it is the best rust preventative on earth—on water, too.
Being a light oil it enters the pores of the metal and forms an impervious covering that is moisture-proof without making the gun sticky or greasy to handle. Best for oiling the fine mechanisms of the finest gun, because it does not dry out, gum, harden, turn rancid, collect dust or sample. G. W. Cole Free Company.

DISSOLUTION OF PARTNERSHIP.

San Francisco, Cal., Oct. 12, 1907.
The H. D. Cowles Co., otherwise known as the Cowles-Payne Co., a partnership, is this day dissolved. I will not be responsible for any debts contracted from this date on account of the above named partnership.
C. S. PAYNE.

THREE HIGH CLASS HORSES FOR SALE TO CLOSE AN ESTATE.

No. 1. Seal brown gelding, five years old, stands 16 hands, weighs 1,150 pounds. Sired by Direct 2:05 1/2, dam by Guy Wilkes 2:12 1/4; second dam by Chas. Derby 2:20. This horse has never been trained, but is a fine driving horse and can trot a 2:40 gait. He is in every respect a very handsome and desirable animal, in first-class condition, very kind and gentle.

No. 2. Bay filly coming three years old, stands 15.1 hands, is a trotter. Sired by Graco B. 2:12 1/2, dam by Posora Hayward; second dam by Williamson's Belmont. She is a remarkably fine filly, gentle and kind, has been broken but four weeks, and think she can show a three-minute gait.

No. 3. Bay gelding, coming three years old, natural pace. Sired by William Harold 2:13 1/4; first dam by Luster 2:22; second dam by Richard's Elector 2:170; third dam by Chieftain 721; fourth dam by Williamson's Belmont; fifth dam by imported Langford. Has been broken but two months, and shows great natural speed. Stands 15.3 hands, weighs 1,075 pounds. Is developed like a four or five-year-old. Very handsome and in first-class condition. A real show horse, with the kindest disposition and every promise to become a great race horse.

None of these horses wear boots or straps. They are not afraid of anything on the road, and I will guarantee each one to be sound and without blemish. For particulars address or apply to
H. OLSEN,
814 B St., Hayward, Cal.

Isn't He Worth Saving?

ABSOLUTELY CURE
QUINN'S OINTMENT
REMOVES
CUBS
SPLINTS
SPAVINS
WIND PUFFS
BUNCHES

Why trade off or sell at a haggardly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried. Price \$1.00 per bottle. Sold by all druggists of west by mail. Write for circulars. W. B. Eddy & Co., Whitehall, N. Y.

Remington AUTOLOADING SHOT GUN

YOU CAN AFFORD IT.

The Remington Autoloading Shotgun is within the reach of the moderate purse. It has the well-known Remington pattern and penetration. Without the punishing "kick" and with the new Autoloading System, which requires the shooter only to pull and release the trigger for each shot, this new Remington represents gun luxury. The solid breech secures absolute safety. **The recoil loads the gun.**

List Price, \$40; Liberal Dealers' Discount.

REMINGTON ARMS COMPANY, Ilion, N. Y.
Agency: 315 Broadway, New York City.

"LOOK FOR THE BIG RED W"

THE big red W is the connecting link between the consumer and the makers of Winchester goods. Over a year ago we adopted this safe-guarding trade-mark and since that time every box, carton and package put out by us has borne the big red W, the hall-mark of goods as perfect as brains, experience and ingenuity, coupled with a modern and complete plant, can make them. Our object in adopting this trade-mark was to make it easy to distinguish Winchester goods from other makes, which equal them neither in quality nor reputation, and thus protect you and protect ourselves. We have done our part. Will you do yours by looking for the big red W whenever buying anything in our line? The big red W is to guns, cartridges and loaded shells what the word "Sterling" is to silverware the world over. For your own protection we again ask you to "Look for the big red W"

WINCHESTER REPEATING ARMS CO. New Haven, Conn., U. S. A.

NEW THREE BOLT MODEL

Our 1907 New Model Three Bolted Gun embodies all of the requisite qualities of a perfect gun—safety, strength, durability, superior shooting qualities, beautiful lines, nice balance, and in our high grade guns very fine finish and richness of ornamentation. See cut No. 7 \$300 list gun shown above—special price \$213.75, ejector \$10 extra. We guarantee the three bolts to hold the gun tight for all time and not allow the gun to fly open in discharging. We guarantee the coil main springs forever against breaks and miss-fires.

Send for 1907 Art Catalog describing improvements and special prices on eighteen grades \$17.75 net to \$300 list.

Brighton Beach Racing Association

LIST OF STAKES CLOSING THURSDAY, JANUARY 2, 1908

Entries to the following Stakes will close with the Racing Secretary at the office of the Association, 215 Montague St., Brooklyn, N. Y.

..... TO BE RUN IN 1910

PRODUCE STAKES - - Guaranteed Cash Value, \$30,000

For the produce of mares covered in 1907, the Stakes to be run in 1910, for then two-year-olds, as two events, one race for Colts and Geldings and one race for Fillies. The value of the event for Colts and Geldings to be \$15,000, and the value of the event for Fillies to be \$15,000.

For The Midsummer Meeting, 1908.

THE BRIGHTON HANDICAP, Guaranteed Cash Value \$25,000, for three-year-olds and upward—One and a Quarter Miles.
THE INVINCIBLE HANDICAP, \$7,500 added, for three-year-olds and upward—One and a Quarter Miles.
THE BRIGHTON MILE, \$3,000 added, for three-year-olds and upward—One Mile.
THE TEST HANDICAP, \$3,000 added, for three-year-olds and upward—One Mile.
JAMAICA STAKES (Selling), \$1,500 added, for three-year-olds and upward—Six Furlongs.
THE ISLIP HANDICAP, \$2,000 added, for three-year-olds and upward—One Mile and a Furlong.
NAUTILUS STAKES (Selling), \$1,500 added, for three-year-olds and upward—One Mile and a Sixteenth.
SEAGATE STAKES, \$2,500 added, for three-year-olds—One Mile and a Furlong.

GLEN COVE HANDICAP, \$2,000 added, for three-year-olds—Six Furlongs.
MONTAUK STAKES, \$2,000 added, for two-year-olds—Six Furlongs.
ATLANTIC STAKES (Selling), \$1,500 added, for two-year-olds—Five and a half Furlongs.
WINGED FOOT HANDICAP, \$2,000 added, for two-year-olds—Six Furlongs.
DISTAFF STAKES, \$1,500 added, for two-year-old fillies—Five Furlongs.
BRIGHTON STEEPLECHASE, \$5,000 added. The full course, about Two and one-half Miles.
PUNCHESTOWN STAKES, Steeplechase, \$1,500 added. Short course, about Two Miles.
CURRAGH STAKES (Selling), Steeplechase, \$1,500 added. Short course, about Two Miles.

For The Autumn Meeting, 1908.

THE BRIGHTON CUP, Guaranteed Cash Value \$10,000 and \$1,000 Cup, for three-year-olds and upward—Two Miles and a Quarter.
THE CUP PRELIMINARY, \$2,500 added, for three-year-olds and upward—One Mile and a Half.

The Rules of Racing adopted by The Jockey Club and the National Steeplechase and Hunt Association govern all races run under the auspices of the Brighton Beach Racing Association.

JOHN BODEN, Racing Secretary.

C. J. FITZGERALD, President.

New California Jockey Club

The California Futurity Stakes for 1909 and 1910

Entries to close December 31st, 1907

THE
CALIFORNIA FUTURITY
 With \$5000 Added
 To be Run at the Fall Meeting of 1909

For foals of 1907; \$10 entrance; \$25 unless struck out by December 1, 1908; \$50 unless struck out by August 15, 1909; \$150 to start; \$5,000 added, of which \$1,000 to second and \$500 to third; 15 per cent of the stakes to the nominator of the winner; 10 per cent to the nominator of the second horse, and 5 per cent to the nominator of the third horse.

Winners of two sweepstakes or one of \$5,000 value to carry 4 pounds extra; of three or one of \$7,000 value, 7 pounds extra. Non-winners of a sweepstakes allowed 3 pounds, and if such have not won four races, 6 pounds; maidens, 9 pounds. By filing prior to December 1, 1908, with the New California Jockey Club an accepted transfer of engagement in this event, accompanied with all forfeits to date, the original subscriber will be released from any further liability.

SIX FURLONGS.

PERCY W. TREAT, Secretary

THE
CALIFORNIA FUTURITY
 With \$5000 Added
 To be Run at the Fall Meeting of 1910

\$10 each for mares covered in 1907; \$25 each for the produce of such mares unless struck out by December 1, 1909; \$50 each unless struck out by August 15, 1910; \$150 to start; \$5,000 added, of which \$1,000 to second and \$500 to third; 15 per cent of the stakes to the nominator of the dam of the winner; 10 per cent to the nominator of the dam of second horse and 5 per cent to the nominator of the dam of the third horse. Winners of two sweepstakes or one of \$5,000 value to carry 4 pounds extra; of three or one of \$7,000 value, 7 pounds extra; non-winners of a sweepstakes allowed 3 pounds, and if such have not won four races, 6 pounds; maidens, 9 pounds.

If a mare nominated drops her foal before the 1st day of January, 1908, or if she has a dead or more than one foal, or is barren, the entry of such mare is void. By filing prior to December 1, 1909, with the New California Jockey Club an accepted transfer of the produce, with its engagement in this event accompanied with all forfeits to date, the original subscriber will be released from any liability as to the engagement of the produce.

THE WEEKLY
BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco
Postoffice.Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCEMoney should be sent by Postal Order, draft or letter
addressed to F. W. Kelley, P. O. Drawer 447, San Fran-
cisco, California.Communications must be accompanied by the writer's
name and address, not necessarily for publication, but
as a private guarantee of good faith.

OWNERS OF TROTTERS AND PACERS and all who are interested in the sport of harness racing should interest themselves in the proposed amendments to the rules which are designed to permit amateur clubs to charge admission fees to club races and also to race for prizes without having their horses penalized with records. Some time ago the American Trotting Association made such an amendment to its rules, but the National Association has never concurred in the amendment, and it now proposed to have the matter acted on at the next congress of the associations, to be held in February. At the last meeting of the Board of Review, held in New York, resolutions to this effect were passed and horsemen all over the country, and associations in affiliation with the National Association, are requested to meet and take some notice of this proposed change, that at the congress in February some definite and final action may be taken in the matter. We now have a strong matinee club in San Francisco, and there is another in Los Angeles, besides several smaller clubs in other places on the Coast, and some united action on their part in conjunction with the Pacific Coast Trotting Horse Breeders' Association and other members of the National Trotting Association, should be taken that the Pacific Coast horsemen should be represented at the congress. There is a big demand all over the country that driving clubs be permitted to charge admission without penalizing horses with records, and the rules need changing to conform to this demand. We hope to see those interested in matinee and regular racing take steps immediately in this matter.

ATTENTION IS CALLED to the advertisement of the Brighton Beach Produce Stakes, which is worth \$15,000, and to the fact that it only costs \$10 to nominate a mare, the produce of which is eligible, irrespective of whether the produce be a colt or filly. No breeder of thoroughbreds can afford to neglect patronizing this Stake, as the first payment does not become due until after the yearling sales, the obligation thereby passing to the purchaser. The fact of the yearling being eligible to this rich Stake will make the youngster much more valuable than it would be if it did not have this engagement.

BOARD OF REVIEW, N. T. A.

Usual Grind of Routine Cases Heard by Board at
Its Annual Meeting.

The Board of Review of the National Trotting Association met in New York City, December 8, with the following members present: President P. P. Johnston, Lexington, Ky.; Charles Dana Palmer, Lowell, Mass.; W. Perry Taylor, Buffalo, N. Y.; William Russell Allen, St. Louis, Mo., and W. H. Gocher, secretary.

The secretary brought before the board the previous resolution and action of the board on the subject of matinee races, as follows:

"The matter of matinee races, in connection with the new rule adopted by the American Trotting Association on the subject, was brought before the board by the secretary, and after a discussion, the board, on motion of Mr. Devereux, seconded by Mr. Palmer, adopted the following:

"In answer to the inquiries addressed to this association as to what now constitutes a public race, a time trial and an amateur event, at which records and bars may or may not be had, we beg leave to state that any contest between horses for purse, premium, stake or wager, or involving admission fees, on any course, in the presence of judges and timers, constitutes a public race.

"Records are made in public races and in performances against time when the horse trots or paces a full mile according to rule.

"Time otherwise taken on any track constitutes a bar, whether made on a track in membership with the National Trotting Association or on a track not in membership with it.

"The strictness of this rule was relaxed some years ago by the American Trotting Register Association, the American Trotting Association, and the National Trotting Association, adopting rules providing that horsemen may have 'trials of speed' at any time without incurring records or bars, where there is no pool selling, book making or other public betting on the event, no money competed for, no entrance charged or collected from competing horses, no admission fee charged to the gate or grandstand, and no privileges of any kind sold, and by the further provision that amateur driving clubs in membership with the League of Amateur Driving Clubs and in membership with this association, might give one meeting, not to exceed three days, each year, at which gate admission may be charged, if all the other speed trial conditions above mentioned are complied with. At such a meeting records cannot be made or bars incurred. They are not considered public races.

"The American Trotting Association is now working under a different rule, passed by its congress last winter. It is best for the horse interest that the rules governing it should be uniform, and we recommend horsemen and track organizations to give this question, among others, careful consideration during the season, and come to the National Trotting Association Congress next winter prepared to take such action as may seem wise and best for all concerned."

The secretary also laid before the board the correspondence between himself and the secretary of the American Trotting Association.

Whereupon, after discussion, on motion of Mr. Taylor, the board adopted the resolution and instructed the secretary to send the same, preceded by a copy of the former resolution of the board, in circular form, to the members:

"The above resolutions call the attention of members to the fact that a proposition to amend the rules would be brought forward at the coming congress, to allow greater freedom to race, charge gate money, and give things of value as premiums without incurring records. As far as we are now informed, you will be asked to consider the wisdom of adhering to the present rule on the subject, to substitute a rule, providing that records can only be obtained where a fee is charged for a horse to enter a race, or where money is competed for, with other intermediate propositions.

"We trust you will give this question thoughtful consideration and come to the congress in February prepared to take such action as will be best for the trotting horse interest."

Resolutions were adopted on the death of Paul Huges Hacke, of Pittsburg, Pa., who was a member of the board from 1884 to 1890, and whose death occurred on September 7.

On motion of Mr. Allen, the president was authorized to prepare suitable resolutions establishing mutual relations between the Victoria Breeders' and Owners' Trotting Horse Association of Australia and the National Trotting Association.

RACING AND BETTING.

Grand Circuit racing during next year is likely to be given with little attempt at betting, for while a few of the meetings will be able to conduct this feature of the business unmolested, there has been no change as regards Readville, Cleveland and Hartford, writes Hawley in the Stock Farm. The struggle that the Readville association has made has been a heroic one and New England breeders, as well as horsemen throughout the country, owe it to themselves to support this association in its endeavor to continue light harness racing in the face of adverse conditions. Cleveland has done right nobly and there is no reason to believe that this association will give up until it is forced to make a change of base through the encroachment of the city's growth. Nothing has shown the stability of the sport of racing more emphatically than the ability of various trotting associations to conduct meetings without the financial aid and the additional attraction that comes from speculation on the races. The mere fact that any association can raise by subscription funds necessary to pay the purses and to meet all expenses incident to the giving of such speaks volumes for the popularity of the sport of racing and the appreciation that is felt by the subscribers for the importance of maintaining that which is the very life of the horse business.

Doubtless the future will prove that whenever light harness racing is given in a community such as that in which Readville is situated, on a plane that attracts lovers of keen sport, it will not be absolutely essential to furnish betting to attract large concourses of people, for the average race goer, while he may thoroughly enjoy the speculative end of the business and keenly relish risking his money and backing his judgment, has already shown that the prime attraction at a harness meeting is the contest that is furnished. The absence of pool-selling keeps away the gambler, the tout, the unscrupulous trickster, and possibly is a source of disappointment to some who plan to win their expenses by betting, yet the rank and file, the real horsemen, the pleasure seekers can be educated to

the fact that betting is not absolutely for their pleasure. Many owners who campaign extensive stables and who know that even the greatest success can hardly compensate them for their outlay, seek the pool box in order that they may replenish their funds; yet if the truth were known, it would probably be found that a very small percentage of them ever came out ahead. It is the sharp shooter who wins the money, the sure thing player, the framer of jobs, and not the unsophisticated public.

The same feeling that prompts men to pay fabulous prices for trotters and pacers for breeding purposes, for driving for pleasure, or for racing incites them to visit race meetings and contents them to sit in the stand and watch the proceedings. The men who furnish the sport of racing are not by any means those who furnish the pool buyers, and thus it would seem that by making racing thoroughly attractive, by eliminating the old-fashioned methods, abolishing protracted scoring, by enforcing discipline and by furnishing an attractive background to the scene, the racing public would find the pleasure of watching the sport keen enough without the opportunity being given of gratifying the desire to gamble. It has been said that the American people are by nature gamblers, and while this in a sense may be true, it is no less so with men the world over, yet there are many whose desire to speculate rises only when the opportunity is placed before them. Betting is indulged in on the great foot-ball games held between the various colleges, yet if it were impossible to indulge in it, fully as many thousands would attend the struggles on the gridiron. Betting is indulged in at elections, yet the abolishment of the practice, the elimination of all possibility to back one's judgment would not put an end to the system of election by ballot.

The only form of sport I know of in this country that seems to be absolutely dependent on betting is racing the thoroughbred, and for this unhealthy condition of affairs neither the horse himself nor the "sport of kings" is responsible. It is the fault of the men who have controlled its destinies, the insatiate greed of the pool room vampires, the hold that unprincipled men have been allowed to obtain. The sport itself is all that it should be and can furnish pleasurable excitement sufficient to gratify even the most blase spectator. Racing the thoroughbred has been made a means of gambling, yet it is not a gambling devise and millions of men and women have enjoyed it to the utmost with never a thought of speculating. Betting on light harness racing has never had the same attraction for the American people because of the methods pursued, which delay a decision and deprive a bettor from what is termed quick action. There is every reason to believe that in the future trotting meetings can be so conducted that the racing public will find attractions other than those that come from speculation, and it behooves racing associations to so appeal to the sport loving instinct of the spectators that the patronage will be all that is essential to maintain racing without the aid which has in the past been derived from the revenues paid into the treasuries by the men who are awarded betting privileges. Lovers of the light harness horse have shown their enthusiasm over the sport and their admiration for the American trotter in more ways than one, for they have been willing to condone the offenses of racing associations in neglecting much that should have been done in the past.

A visit to the betting ring during any of the important trotting meetings in this country will convince the casual observer that between heats the betting ring does not attract more than a very small percentage of the spectators, for the stands are not depleted, nor is the ring crowded at such times. It would of course be beneficial to trotting associations if betting could be conducted as has been done in former years, but merely because steps have been taken to put a stop to all forms of speculation at many meetings does not mean that racing is to cease or even be curtailed. The future of racing the light harness horse depends largely on the attitude of the managers of the racing associations themselves, for it is absolutely essential that associations make the sport popular and this can only be done by doing away with the unpleasant features that have been so noticeable in times gone by. Methods that have obtained in the past will not do, and if remunerative crowds are to be had at trotting meetings, the judging and the starting must be well-balanced, drivers must be forced to do their best and the horses must be sent away on even terms after only a few scores. The pool box has been responsible for many evils and now that betting has become a secondary consideration, all the evils must be eradicated. If five thousand people can be attracted by a trotting meeting, it is surely possible to double this number under improved conditions, and it will depend upon the managers of associations whether or not the sport which has been shown to be more popular with the masses than any other shall thrive or become commonplace.

WOULD NOT BE WITHOUT IT.

Pasadena, Cal., Nov. 29, 1907.

Tuttle's Elixir Co., Los Angeles, Cal.—

Gentlemen: I have used both your horse and family Elixir for the last fifteen years. Have it in my house and stable continually, and would not be without it. I consider it best of all I have ever used, for what it is claimed. Very truly yours,

M. E. WOOD.

CHASE'S HOLIDAY SALE.

Cold and foggy weather kept so many people at home last Monday evening, that the crowd at Chase's pavilion, 478 Valencia street, was not a large one, when the holiday sale was held. While prices were not high, there were many good sales made and the bidding, under William Higginbottom's persuasive pleading, was lively. The demand for horses that are ready to do something on the road or track, was very good. Some good bargains were picked up by wise bidders, and a few brought prices at which they were well sold.

Washington McKinney only brought \$825, about half his worth in good times, and he was purchased by Sam Norris, who will keep him in the stud at Santa Rosa.

Sir Charles Valpey, a very handsome and well-bred trotting stallion by Nutwood Wilkes out of a mare by Silver Bow, was not sold, Mr. Vandervoort of Irvington retaining him. This horse is a grandly-bred fellow and should be patronized liberally by breeders wherever he stands.

The record of the sale follows:

Morgan, b g, 1903, by Hart Boswell, dam by Director; E. Stewart, \$180.

Belle H., b m, 1901, by Hart Boswell, dam by Bally; H. Olsen, \$150.

Edna Rose, ch m, 1900, by Imp. Bassetlaw, dam by Midlothian; J. C. Smith, \$90.

Ned Dennis, b g, 1905, by Mendocino, dam by Cropsy's Nutwood; H. Olsen, \$200.

Regal Belle, ch m, by Regal Wilkes, dam by Arthurton; E. A. Heesing, \$130.

Don Archer, ch g, by Geo. W. Archer, dam by Steinway; E. Schofield, \$225.

Button Boy, b s, by Washington McKinney, dam by Derby, E. Schofield, \$300.

Amazonian, 1900, br m, by James Madison, dam by Chas. Derby; O. Redemeyer, \$405.

Prince Allen, blk g, 1902, by Marengo King, dam by Mambrino Wilkes; A. Marshal, \$300.

Florence Searchlight, g f, 1905, by Searchlight, dam by Rustic; John Page, \$220.

Lorraine, b m, 1903, by Daedalion, dam by Greenwich; F. Schrick, \$185.

Sorrel Gelding, 1900, by Gossiper, dam by Abotsford; William Watt, \$140.

Prince, blk g, 1898, by Son of Dexter Prince; B. Blake, \$160.

Bay gelding, 1905, by Cassian, dam by Guy Wilkes, W. Mendenhall, \$60.

Bay gelding, 1906, by Stam B., dam by Secretary; C. Atkinson, \$85.

Bay mare, 1903, by Alta Vela, dam by Osito; H. Dunlap, \$340.

Impulse, ch m, 1902, by Green's Rufus; W. Watt, \$200.

Washington McKinney, br s, 1896, by McKinney, dam by Whipple; Sam Norris, \$825.

Greggie, b m, 1901, by Nutwood Wilkes, dam by Magic; A. Scofield, \$335.

Iranwood, b g, 1902, by Iran Alto, dam by Nutwood; H. Olsen, \$105.

Twenty-three Skidoo, b f, 1907, by Nutwood Wilkes, dam by Director; James Marshall, \$275.

Derby O. b g, by Charles Derby, dam by Antee; E. Stewart, \$140.

Royal Del, br m, by Del Oro, dam by Royal Sid; Chas. Relling, \$100.

Greyling, gr g, 1903, by Arthur Wilkes, dam by Mendocino J. G. Thomas, \$275.

Dixie, gr m, 1903, by Dick Russell, dam by Alex. Button; P. J. Howard, \$115.

Casey, b g, 1902, by Holdfast, dam by Secretary; W. M. Higginbottom, \$80.

Carter Wilkes, b c, 1904, by Nutwood Wilkes, Allie Cresco 2:13½; E. Reese, \$135.

Chin Wah 2:25, b g, 1897, by Athadon; E. Buchanan, \$115.

Dan Rankin, b g, 1903, by Diablo, dam Bessie Rankin 2:16¾; J. Deschler, \$290.

McDougall, b g, 1902, by Stam B., dam by Fallis; M. C. Delano, \$290.

Moffat D. 2:22, b g, 1897, by Sable Wilkes; McGowan & Butler, \$220.

Bay Mare, by Blue Dawn, dam by Mambrino Russell; J. McGrath, \$140.

Rey Direction, blk g, 1902, by Rey Direct, dam by Steinway; H. Scofield, \$175.

Pair of Mares by Lynwood W.; Sam Norris, \$260.

Alex B. 2:24½, b m, 1893, by Nutwood Wilkes, dam by Albert W.; A. Gower, \$120.

The State Agricultural Society has decided to postpone disposing of the State Pavilion at Fifteenth and M streets until after its new Agricultural building is completed. This means that the pavilion will remain where it is for nearly a year to come. Work on the new structure, money for which has been appropriated, will begin on the 1st of January. At a meeting of the Board of Directors of the Society last week plans and specifications for the proposed State Fair Pavilion were accepted. The plans were drawn by State Architects Sellon and Hemmings. At the last regular meeting, a month ago, several bids for the purchase of the Pavilion were received, but thrown out because they were considered too low. The Directors have now made up their minds not to sell their quarters until they have a new home to go into. It had been intended to have the Fifteenth and M street structure torn down and removed by the first of the year.—Sacramento Bee.

MARVIN WILKES 2:12½.

Our front page illustration this week is of the stallion Marvin Wilkes 2:12½, the grandly bred trotter and excellent race horse that Mr. A. Robertson of Melbourne, Australia, purchased two weeks ago from Walter Mastin of Sacramento, and will ship to Australia soon after the holidays. This is one of the best young stallions in California, and we believe he is the best ever bought here for the antipodes, everything considered.

Marvin Wilkes stands full sixteen hands, weighs with black points and with legs and feet that are nearly 1200 lbs., and is a beautiful mahogany bay as near perfect as can be found. He has a remarkably short back, but stands over a lot of ground and his proportions could hardly be improved upon. We don't know where a trotting stallion with as fast a record and as good all over in size, form, color, disposition and soundness, could be found in America at anywhere near the figure paid for Marvin Wilkes by Mr. Robertson.

His breeding combines the blood of Electioneer, Wilkes and Nutwood, backed by two crosses of Williamson's Belmont.

His sire is Don Marvin by Fallis, he by Electioneer. Don Marvin's dam Cora 2:22½ (dam of two in the list) by Don Victor, thoroughbred son of Williamson's Belmont.

Don Marvin's second dam Clarabell (great broodmare) by Abdallah Star.

The dam of Marvin Wilkes was Nora S. (public trial 2:17) by Sable Wilkes 2:18, son of Guy Wilkes 2:15½, and she had but two foals, the other being injured and not trained.

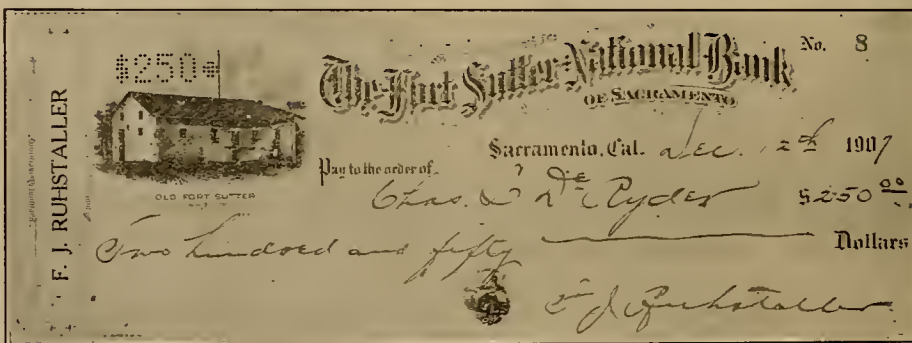

The second dam of Marvin Wilkes was Grace by Nutwood 600, and the third dam the thoroughbred trotting mare Gracie, that had a race record of 2:37¼. Gracie was by Jack Hayes out of Princess, a daughter of Williamson's Belmont. A horse whose pedigree is made up of the blood of Electioneer, Wilkes and Nutwood, and whose third dam is a thoroughbred mare with a trotting record of 2:37¼ can be called as well bred as any horse ever bred in the United States, as it has no weak points in it anywhere.

Marvin Wilkes divided second and third money in the Occident Stake when a three-year-old, and won the Stanford Stake the same year.

Mr. Robertson has made an excellent selection, and we believe that Marvin Wilkes will be a great sire of speed. He has but two two-year-olds and ten yearlings, his stud season having been very limited, but the lowest price Mr. Robertson could get on any of them was \$500, which speaks well for the horse. Marvin Wilkes is now at Dan Misner's stables at the White House Tavern, and will remain there until shipped to Melbourne next month.

A. H. Scofield has sold the colt Button Boy to parties in the Fiji Islands. This colt is a grand individual and shows fast at the trot. He is by Washington McKinney and out of a mare by Daly 2:15, second dam by Steinway and third dam by Denmark. He should be a good sire.

Fereno 2:05½ produced a foal by Walnut Hall 2:08¼, this year, while Ozanam 2:07 had one by Moko.

A GILT EDGE ACKNOWLEDGMENT.

When Chas. De Ryder returned home from his Grand Circuit campaign he sent to Mr. Frank J. Ruhstaller, proprietor of the Ruhstaller Brewery, at Sacramento, where is made the famous Gilt Edge beer, a statement of the racing and training account of Mr. Ruhstaller's great trotter Wild Bell 2:08¼, which he had campaigned all through the Grand Circuit, together with a check to cover the balance due after all expenses were deducted. In a few days Mr. De Ryder received the following letter:

Sacramento, Cal., Dec. 12, 1907.

Dear Mr. De Ryder: As I have just a few minutes to myself I take the opportunity of writing a line or two informing you that I am enjoying good health and that business is fair, all things considered. It has been my intention ever since you returned to pay a visit to Pleasanton, have a talk with you over your trip and regarding Wild Bell's work and racing, but up to the present time I could not do so. I want to say to you, however, that I am satisfied with results, and to show my appreciation of your services and dealings, I enclose check for \$250 as a Christmas gift.

If you could arrange to bring Bell home it would afford a good opportunity for our talking things

over. I would like to jog him here during the winter a little, or if better, turn him out in some good pasture in day time and have him taken up at night. Will be pleased to hear from you at your convenience. Yours very truly,

F. J. RUHSTALLER.

In accordance with Mr. Ruhstaller's request Wild Bell 2:08¼ is now at Sacramento, where his generous owner will enjoy seeing and driving him during the winter months. While the gift sent by Mr. Ruhstaller was a most generous one, Mr. De Ryder sets even a higher valuation on the letter which accompanied it, and treasures it as evidence of that genuine kindness and gratitude which only emanate from true hearts and noble souls.

AMERICAN TRAINER RETURNS FROM RUSSIA.

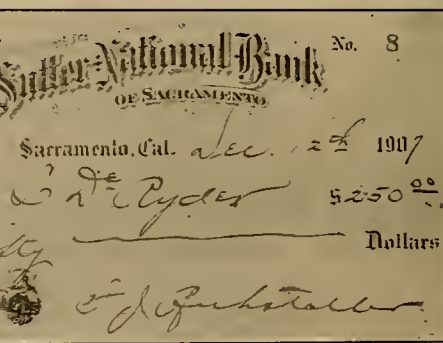

Frank Caton, the ex-American trainer, who has trained and raced an extensive stable of trotters in Russia for the past fourteen years, arrived in Cleveland the past week, where he is visiting relatives and friends for a short time. He brought with him to this country two Russian bred trotting mares that are to be mated with Bingen 2:06¼ and McKinney 2:11¼.

Caton was one of the very first American trainers to invade Europe and to his remarkable success on the Russian turf can largely be attributed the increasing popularity of the harness sport in that country, and the great demand for American bred trotters. He formerly was trainer for C. F. Emery's Forest City Farm, the latter establishment exporting several horses to Russia a dozen years ago, among them being Passe Rose by Patron, a stallion that took a record of 2:14½ and was a prominent performer there in his day.

American training methods proved so much superior to those in vogue in Russia and other European countries that trainers from here were offered liberal inducements for their services abroad. Sam and Will Caton, sons of Frank Caton, joined their father several years since, the Caton family having been among the top-notch money winners in Russia for several years past, with one of them usually at the head of the list.

Caton is loud in his praise of the manner in which harness racing is conducted in his adopted country. Everything is done in a systematic manner, with the most minute details carefully looked after. The horses in that country are not classed according to records, but in regard to the amount of money they have won, horses graduating into another class when their earnings have reached a certain limit. Under this system a horse's usefulness for racing purposes is prolonged and the plan seems a most just and satisfactory one.

The strictest of discipline is in evidence in connection with the racing turf, the slightest attempt at fraud or infraction of the rules being promptly and severely dealt with. Horses are often handicapped, starting from various points along the track, the starting being done by electrical bells, while of late the timing is done by the winning horse breaking a cord stretched across the track, thus automatically registering the exact time on a large clock and preventing any errors or fraud.

The drivers wear tasty silk uniforms, while neat costumes and perfect comportment on the part of the grooms is also insisted on.

Often times there are eighteen races on the program, these being mostly on the dash order, one stable being permitted to start two or three horses in the same event. The races continue until 9 o'clock in the evening during the season of their long days, the attendance being very large, with the betting all done on the Paris mutual system.—American Sportsman.

The San Bernardino track will be a popular training ground this winter. Already there are many applications for stalls, and the interest in harness horses is increasing all over that part of the State. G. H. Judd, the well known Riverside trainer, has completed arrangements for wintering there with the borses that he handles, which includes the Dr. Ramsey string, Lauretta, owned by W. A. Hayt, and others. The great sire and pacer Zolock 2:05¼, and his fast pacing daughter, Delilah 2:08¼, are now quartered at the track for the winter. They have been leased to Homer Rutherford. Other horses are coming, which will make times lively at the track this winter.

BOSTON AND AMERICAN ECLIPSE.

"Race track devotees nowadays want quick action for their money," said Senator Blackburn of Kentucky recently, to a reporter of the Washington Star. "When I was a young man the betting proposition was subsidiary to the sport and was in the nature of side wagers between owners. Now racing has grown to be a game where every one is trying to get the best of the bookmakers. I think every one who loves the thoroughbred for what he is and what he can do, regrets that he has of late years become, to a large extent, a tool of the gamblers.

"My father was among the first citizens of Kentucky who bred, trained and raced horses. Blackburn's Whip, whose blood has blended so kindly with trotters and thoroughbred, was his property. Boston, sire of the immortal Lexington, died in my father's stable, and the great and unbeaten Eclipse was in my father's possession in the years 1837 and 1838. These horses were the champions of their day and the greatest horses of their generation; they were not furlong sprinters, but four-milers.

"It will hardly be believed in these days of palatial stables that while these valuable horses were in my father's care they occupied a very ordinary log stable, through which the winds whistled on wintry nights and through which the snow drifted on occasions. When Boston and Eclipse were brought to Kentucky they did not make the trip in palace cars, as do the costly thoroughbreds of to-day; walking was good enough for them, and it was by walking every inch of the route that they reached their destination.

"Boston caught cold on the way to Kentucky and went blind soon after his arrival. I was a small lad at the time, and used to visit Boston's stable every morning to see him cared for and walked by the colored groom. In the fall of 1849, then seventeen years old, he began to grow decrepit from the effect of severe racing and duties in the stud, and frequently had to be helped to rise. When on his feet he seemed to be all right again and able to take his morning exercise.

"Early one morning, in the year named, I slipped out of the house and down to Boston's stable. The door was closed and fastened within. I hammered on it and clamored for admittance. The door was cautiously opened far enough to admit the passage of my body, when a black hand seized me by the arm and dragged me inside. I was no sooner in than the groom was out and the door fastened. I took the matter good naturedly until my eyes became accustomed to the light, when I saw something that curdled the blood in my young veins. Boston was lying on his side in a corner of his stall, lifeless, and great splashes of blood were on the wall. In his dying struggle he had beaten his head against the logs. I screamed lustily for the groom, and, seeing he had carried the joke far enough, he came to my rescue. I have been in danger a score of times since on the battlefields and elsewhere, but I was never quite so badly scared.

"I presume I am among the very few men living who ever saw Boston. He was the greatest race horse and race horse sire of his day, and his descendants are even now racing at Bennings. He was bred by the late eminent jurist, John Wickham, of Richmond, Va., foaled in 1833, and was got by Timoleon, by Sir Archy, out of an own sister of Tuckahoe, by Ball's Florizel, a horse that during his turf career was never touched by whip or spur and was never beaten. The great-great-grandam of Boston was never fully traced. In his two-year-old form, and while he was unbroken, he was sold to Nathaniel Rieves of Richmond, Va., for \$800.

"A peculiarity about him was that he could not be safely ridden with a spur. In his first race he holted because his rider used a spur on him, and was distanced. He was never again ridden with a spur until he ran against Fashion, in his old age, and was beaten. In 1839 he became the property of James Long of this city, for \$12,000 and half the purse.

"Boston was a chestnut horse, with a blaze in his face and white stockings behind. He stood fifteen hands, three inches under the standard, but looked taller on account of his prodigious size. He was a short-limbed horse, with unusually short canon bones. His eye, ear and nostril were fine, but his head was not what you would call pretty. His neck came out well from his shoulders, the latter being oblique, broad and muscular. His depth of chest was immense and his throttle perfect.

"His back was the prodigy of strength as well as his loins, so that ten pounds' extra weight was not felt by him at the end of a hard day. The muscular development of his arms and thighs was almost unparalleled. He ran close to the ground and was not a longer strider. Usually he began a race without much show of spirit, running the first two or three miles with his head nearly on a level with his back. When he began to get warm and interested in the running his head was gradually elevated, and when he drew it up he set at work in earnest. Then you saw a sure enough race horse, for no locomotive on four legs that tried was ever able to go the pace with him.

"Eclipse was also a chestnut horse, and was foaled nineteen years earlier than Boston, or, to be exact, in 1814. Eclipse was by Duroc, by imported Diomed, the latter being Boston's great-grand sire; dam Miller's Damsel, by Messenger, the great-great-grand sire of Hambletonian 10, founder of the Ham-

bletonian family of trotters. He was bred by General Nathaniel Coles of Long Island, and his training commenced as a three-year-old.

"He had a star on the forehead and his left hind foot was white some distance above the ankle. In height he was about 15 hands 2 inches, but was built on a massive pattern. He was not a handsome horse, probably due to his Messenger blood through his dam. Duroc, his sire, was an exceedingly handsome horse. Eclipse's action in front was heavy, and he struck the ground heavy, dwelling a little, but the style and regularity with which he brought up his haunches and the power with which they propelled him forward overbalanced all criticisms of his individuality and way of going.

"His temper was good, and he required a good deal of work, and in his running a good deal of whipping. The account of his great race with Henry, which was virtually between the North and South, still thrills the blood of men who have an ounce of love for the thoroughbred in their hearts. Henry won by a head in the first heat, but Eclipse won the race. It is estimated that 25,000 people witnessed the race, and that over \$200,000 in side bets changed hands.

"While Eclipse was in my father's stable my father received one day an unexpected visit from Henry Clay, who was accompanied by several gentlemen from Fayette and Woodford counties. They had been fox hunting in the immediate neighborhood. Mr. Clay was a connoisseur of thoroughbreds and a breeder of them, and was very anxious to see the horse that had won world wide fame on the turf.

"My father was peculiar, in that every horse he owned or had charge of was a trifle better than his predecessor. And as he was a fluent talker and could describe all the good points of a horse, Mr. Clay, it appears, for the amusement of the gathered company, decided to draw out 'Uncle Ned,' as my father was called. After Eclipse had been viewed and admired the guests adjourned to dinner. Mr. Clay was in excellent spirits. While the wine was being passed he raised his glass to his lips and proposed the health of my father and the health of Eclipse, 'the greatest horse on the continent.' My father was not to be outdone. Filling his glass and rising slowly from his seat and bowing to Mr. Clay, he responded, 'Eclipse is among horses, but Henry Clay is among men.' This display of repartee and gallantry put Mr. Clay on edge, and he scintillated as only 'Gallant Harry of the West' could when he was at his best.

"Eclipse lived to be thirty-three years old and died at the farm of Jilson Yates, near Shelbyville, Ky.

"The breeding problem is worthy of profound study, for those who seek to solve it enrich mankind. It is not and never can become an exact science. I state this as an abstract proposition without going at this time into the whys and wherefores. I knew A. Keene Richards, who attempted to solve it by importing Arabians, very well, indeed. He was an excellent man, an enthusiast, and deserved a better fate than was his. As Senator McCreery has already said in the Star, he bred his Arabians with the very best blood that could be found in Kentucky.

"When his youngsters came on the turf they were badly beaten. Turfmen who disbelieved his theory, that the Arabian could fertilize the blood of the modern thoroughbred, allowed him first seven pounds, and they were beaten. Then they made the generous concession of fourteen pounds—equal to a double distance, and still they were beaten.

"Mr. Richards did not give up the fight. Accompanied by the eminent animal painter, Troye, he turned his face once more toward the Orient. He lived with the Arabs in their tents. He ate and slept with them, worshipped with them, and dressed like them, and all for the purpose of getting the best Arab horses to be found among the descendants of Ishmael. He studied and rode Arab horses until he could judge of conformation, disposition and type, and he was especially careful to purchase nothing that could not be traced in an unbroken line to one of the mares of the prophet. His later purchases proved as great failures as his first.

"Now, as to the facts. Mr. Richards did not comprehend, what every successful breeder must comprehend, that the horse has a psychical as well as a physical organization, and that these Arabs had no inheritance of a racing will. Having it not themselves, how could they transmit it to their progeny? It is as plain as the nose on one's face that you cannot make a good whistle from the tail of a pig, nor can you gather grapes from thistles, nor figs from thorns. Nature works more intelligently. She never performs miracles, but produces results through natural laws.

"The supreme trial of the Arabian consists in being mounted at midnight and carrying his master a hundred miles across the desert without food or water. In this style of racing he could beat Hamburg, Henry of Navarre, a Tenny or a Salvador. The truth is, the Arabian has not been subjected for 200 years or more to a scientific course of training and preparation to run one mile or four miles, and having no cultivation of will nor consciousness of power to beat all others that distance he miserably fails when brought to a supreme test.

"A single illustration of my proposition, for it is important to every man who breeds either runners or trotters, and I am done. In Abbeville district, South Carolina, in the last century, there lived a large breeder of thoroughbred horses named Richard A. Rapley. He imported a number of the most

fashionably bred stallions and mares that could be found in Great Britain. He was scrupulously careful in all the crosses that he made, and soon gathered about him a herd of pure bred animals that had never seen a race course. He kept up this fancy through several generations of horses. The attention of racing men was naturally turned in time to this stud of pure bred animals, and a number were selected and tried. But notwithstanding their high lineage and perfection of form they did not prove to be race horses. The speed which they inherited from their ancestors had been lost through lack of usage. The consciousness of speed and the will and ambition to win had died out."—Washington Star.

VICIOUS HORSES THE RESULT OF BRUTAL TREATMENT.

That the bad temper and viciousness displayed by stallions, as well as some mares, and geldings, can be traced directly to brutal treatment, or harshness on the part of the ignorant or vicious care-taker, has been proven time and again. Some horses are of a more nervous disposition and possessed of a higher strung temperament than others, and quickly resent ill-treatment, and soon develop real viciousness, which only kindly but firm treatment will overcome. In a recent well written article from the pen of Geo. P. Floyd, a splendid illustration of this is given:

"Some very pronounced cases of vicious horses being subdued by kind and proper treatment are known in this and other countries. The case of the English stallion Corsair is one of the most noted ever known. That stallion was one of the most vicious, ugly, man-eating brutes of his day. For over a year, the horse stood in his box; no human being dared to enter his stall and he was fed and watered from the top of the box. The English lord who owned him offered to give the horse to any person who would go into his stall and take him out. That person was not found until John Rarey went over from this country and performed the trick. After watching and studying the horse for forty-eight hours, Mr. Rarey managed to get a rigging onto him from the top of the box, which confined his legs, after which he fearlessly entered the box. The horse was deprived of food and water for twenty-four hours previous to this. It would seem to some people, that Mr. Rarey took his life in his own hands, when he entered the stall and faced the crazy, man-eating brute, but Rarey knew his business. There never was, and never will be, a dumb beast or animal of any kind, no matter how ugly or vicious, that cannot be subdued by man, or I might say by woman, if that man or woman has self confidence and uses the proper methods, and system to accomplish his object.

In forty-eight hours after Rarey laid his hands on Corsair he had him under perfect subjection and subdued. It was done through sheer kindness, yet with firmness. Rarey brought the horse to this country in 1853, and exhibited him in public.

The first exhibition was at the old Music Hall in Boston, September 15, 1853, and I witnessed the handling of the horse by Rarey. He had taught the horse to perform a number of tricks. A more docile, obedient animal I never saw.

Until Corsair was two years of age he had displayed no signs of viciousness, although he was high strung. At that age the horse was placed in charge of a groom, proved to be an ignorant, ill-natured person, and he undertook to govern the horse by rough treatment and the club. The horse having more good sense and intelligence than the man who was attending him, fought back. It was a scrap between an ignorant brute of a man and an intelligent, well bred horse. The horse won the fight. In two weeks after the horse fell into the care of that groom he asserted his rights, and wouldn't allow the man to come near him, and the owner of the horse, not having sense enough to change the tactics from the club to kindness, the horse became a raving maniac.

Mr. Rarey proved to the world that kindness and gentle treatment, combined with firmness, will subdue and reform a vicious horse.

The Melbourne Leader of November 16th contained the following: The imported trotting mare Diana Rose, purchased by Mr. W. B. Veirs in America some few years ago, is now to be retired from the race course and show rings after a brilliant career. She is by the famous American sire Daly, who has produced many of the fastest trotters in the land of Stars and Stripes. Diana Rose started in seven trotting races in Victoria and only failed to catch the judge's eye in one event, when she ran a good second. In the show ring she has won ten firsts and thrice won the championship of the Royal Agricultural Show in Melbourne, and won first at the Royal in Sydney. This is truly a rare performance, and the champion is now to be retired on her laurels, and will go into the stud, where she should be an acquisition in improving the trotting studs of that State.

J. M. Herbert of Denver, Colo., and D. D. Streeter, Kalamazoo, Mich., have made a match "colt for colt," to take place next summer. Mr. Herbert names the three-year-old filly Catherine Direct, trial 2:18, by Direct-Pepper Sauce, by Onward, and Mr. Streeter names the three-year-old colt Thespian 2:18½, by Direct Hal-Anvil Cborus, by Chimes. Both are pacers and the owner of the winner will own both colts at the end of the contest.

NOTES AND NEWS

Happy New Year to all!

Don't fail to enter in the Occident Stake.

Keep all the colts paid up on that are entered in the Stakes.

What association in California will be first to announce a program for 1908?

There should be at least four months of harness racing in this State next season, with not less than twelve good meetings.

The grouchy fellow next summer will be the one that has a fast colt with no stake engagements.

Breed your mares during the coming year. Horse values are high considering the times, and they will be higher.

Fred. Chase will hold another combination sale, February 10th. Only 50 horses will be catalogued. Get in early if you want to sell.

California can be depended upon to furnish a star performer or two every year on the Grand Circuit. In 1907 Sonoma Girl was the sensation. What horse from this State will occupy the very center of the stage in 1908? It will very likely hail from California, but will it be a trotter or a pacer?

Through an error it was stated in last week's issue that Trix, the dam of Aerolite (3) 2:11 $\frac{1}{4}$, was the mother of a yearling by Zolock 2:05 $\frac{1}{4}$. This is an error. The Zolock yearling owned by Mr. Marshall is out of a mare by Demonio. Trix has no foal by Zolock.

Mr. S. B. Wright of Santa Rosa, who owns the mare Maud Fowler 2:21 $\frac{1}{4}$, dam of Sonoma Girl 2:05 $\frac{1}{4}$, and who bred the latter and the fast trotter Charley Belden 2:08 $\frac{1}{2}$, has now purchased from Mr. W. J. Speers of Santa Cruz the mare Belle W., dam of Bolivar 2:00 $\frac{1}{4}$. This purchase makes Mr. Wright owner of the dam of the fastest pacer ever bred on the Pacific Coast, as well as owning the dam of the fastest green trotter that ever raced in America.

Henry Helman has a filly in his string at Pleasanton that is for sale at a bargain price. This filly is by Stam B. 2:11 $\frac{1}{4}$ and out of a mare by Boodle 2:12 $\frac{1}{2}$. She was foaled in 1905, and is entered and paid up on in the Breeders' Futurity and the Stanford Stake for 1908. She is owned by Henry Hahn of 2125 Buena Vista avenue, Alameda, who may be addressed for further particulars. The filly may be seen at any time at Pleasanton.

Budd Doble has in his string at the Brace Farm, Santa Clara, a two-year-old that has quite a speed inheritance and was born fast, as he was foaled on the train, when the dam was being shipped. He is by Kinney Lou 2:07 $\frac{1}{4}$, out of Catinka 2:20 $\frac{1}{4}$ by Abbotsford, and he is showing his inheritance and early environment already.

James Marshall of Dixon, the owner and breeder of Aerolite 2:11 $\frac{1}{4}$ and Mona Wilkes 2:06 $\frac{1}{2}$, keeps nothing but well-bred stock on his farm. He raises full-blooded Shropshire sheep, and fine chickens, turkeys and hogs, and all are pedigreed stock. He has just purchased the first, second and third prize-winning Shropshire ewes that were shown at the great International Stock Show at Chicago, last month.

The Crabtrees, Jack and Miss Lotta, are looking forward to the season of 1908 with some degree of confidence. Their horses will be trained in the South. Nut Boy 2:07 $\frac{1}{4}$ will be out for the money after a good long rest, and much will be expected of Lotta, Sonoma Girl and the rest.

It makes but little difference nowadays in which class an owner enters a green horse. A three-minute class is apt to be won in the teens. The slow classes are trotted about as fast as the fast classes. It matters little in which class a horse is entered; he is certain to have to go fast. Many green horses without records have fast miles to their credit before they are asked to go fast in a race.

Most racing men consider that the chestnut gelding Tempus Fugit 2:09 $\frac{1}{4}$ was about the best bargain at the New York sale, it does look as though at \$2,000 he was a good buy for either racing or speedway purposes.

Not many breeders would in these days refuse an offer of \$5,500 for a two-year-old, and yet this is what W. E. D. Stokes did when the proprietor of a prominent stock farm tendered him his check for that amount for the colt Peter Donna by Peter the Great 1:07 $\frac{1}{4}$, dam Prima Donna 2:09 by Betterton. This colt worked a quarter in 31 seconds on a half mile track last fall, stepping the last eighth in 14 $\frac{1}{2}$ seconds. There have not been many two-year-olds that could do that.

The next big auction event will be Fasig-Tipton's Midwinter sale at Madison Square Garden, New York, January 28 to 31. The Chicago Horse Sale Company also look for a successful sale in February.

The pacing stallion King Direct 2:05 $\frac{1}{4}$, credited with the world's race records for pacing stallions to wagon of 2:04 $\frac{3}{4}$, may be seen in Grand Circuit Company in 1908.

It is said that Andy McDowell, who recently returned from Germany, will not return to that country but will remain here and train a public stable next season.

The Belgian Revue de Cavalerie estimates the horse population of the world at 80,000,000, of which 41,000,000 are in Europe, 19,000,000 in North America, 11,000,000 in Asia, 6,000,000 in South and Central America, 2,000,000 in Australia and 1,000,000 in Africa.

Extasy (3) 2:11 $\frac{1}{4}$, pacing record as a two-year-old 2:10 $\frac{1}{2}$ by Baron Wilkes 2:18, and out of Ethylwyn (dam of seven) by Harold, cost C. W. Baker, of Aberdeen, Md., \$3,000 at the recent New York sale. She is in foal to Admiral Dewey 2:04 $\frac{3}{4}$ and is to be bred back to that horse next spring. Two of her foals brought \$11,000 at auction last year.

At the annual meeting of the League of Amateur Driving Clubs recently held in New York, H. K. Devereux was elected president; J. D. Callery, vice-president; T. L. Quimby, secretary-treasurer, and H. K. Devereux, George W. Grote, J. D. Callery, Horace White and T. L. Quimby, executive committee.

An advertiser offers five choice horses for sale. They are a three-year-old gelding by Searchlight 2:03 $\frac{1}{4}$, out of the dam of Yolanda 2:14 $\frac{1}{4}$; a two-year-old gelding by Stam B. 2:11 $\frac{1}{4}$, out of the same mare; a three-year-old by Searchlight, out of a mare by Director, the brown gelding Billy B., trial 2:13, and the trotter Auger Baron, that has a trial of 2:15 trotting. These horses can be seen at Pleasanton race track, or write to John Green, 1918 Steiner street, San Francisco. All these horses are sound, thoroughly broke and in fine condition.

Bingen 2:06 $\frac{1}{2}$, measured by the commercial standard, is as great a sire as when judged by the speed standard. Twenty of his offspring, in the recent sale at the Garden, brought \$51,350, an average of \$2,567. Todd 2:14 $\frac{1}{4}$, at \$30,000, accounted for more than one-half the total, but there were eight others that brought more than \$1,000 each. Three were yearlings, four were two-year-olds and four were three-year-olds. Only five had public records. It is said that in the last three years fifty-four of Bingen's offspring have been sold for more than \$140,000. The horse is now fourteen years old.

A marvelous success this year has been Bellini, who has not one drop of either Wilkes or Electioneer blood in his veins. He has three new 2:10 trotters to his credit: Tokio 2:09, Beatrice Bellini 2:09 $\frac{1}{2}$ and Carlo 2:08 $\frac{3}{4}$. Bellini is by Artillery 2:21 $\frac{1}{4}$ by Hambletonian, while his dam was Merry Clay by Harry Clay; second dam Ethelberta by Harold; third dam Juliet by Pilot Jr. Tokio, on the dam's side, is equally devoid of Wilkes-Electioneer crosses, as his dam was by Nutwood, second dam by Pilot Medium and third dam by Louis Napoleon.

William Bradley, owner of Todd 2:14 $\frac{1}{4}$, is a contractor. He helped to build the subway for the Interborough Company in New York City, and is now aiding the Pennsylvania Railroad in its immense tunneling and building operations in that city. He is known about the New York City Hall as the "snow man," having held many big contracts in cleaning the streets of snow. He is a large stockholder in the Fiss, Doerr & Carroll Company, and is understood as being mainly responsible for the erection of that firm's immense building on East Twenty-fourth street where its big sales are conducted.

The tendency of breeders is to follow the fashion, but a glance at some of the pedigrees of the new 2:10 trotters must be distinctly cheering to that large body of intelligent breeders who rightfully believe that it would be a fatal mistake to so concentrate on two or three fashionable branches that several of the minor families would soon become practically extinct. This year the winners in the male line outside of the distinctly fashionable sires have been conspicuous. The five-year-old Icon 2:10 by Peter the Great 2:07 $\frac{1}{4}$ is a sterling representative of that wonderful sire Pilot Medium by Happy Medium. No horse had a more romantic career than Pilot Medium. An obscure and crippled colt he was bought for a song, taken to a little town in Michigan, where at a low stud fee he secured the services of a very inferior class of mares, but the Happy Medium-Pilot Jr. blood was a rich inheritance, and his colts soon began to make turf history. That great campaigner Jack was the first to attract attention to the unmarked sire, while Peter the Great was practically the climax of his stud career. Peter the Great was a star two-year-old, a wonderful three-year-old, and at four he took a record of 2:07 $\frac{1}{4}$ and then went to the stud, in which he is already a conspicuous success.—Stock Farm.

A. I. Stewart, the hustling secretary of the Los Angeles Driving Club, is bubbling over with enthusiasm concerning the prospects of the club for the coming year. "Next year," said Mr. Stewart, "we plan to have two driving matinees every month instead of one, as has been our program during the last few years. We will start with two meets during the month of January and keep it up. We have some mighty fine harness horses in Southern California, and I look for some great developments in this respect during the coming year. Our club has prospered to the limit of our expectations and we are all proud of the club and the good work it has done. The club was organized and is maintained solely for the pure love of the sport. Never a penny is taken in, as matinees are absolutely free and everybody is welcome who attends. At our club banquet at Levy's on December 28th, we are going to have a good old-fashioned, heart-to-heart talk and allow every man to talk about his horse or horses until he is black in the face."—Los Angeles Examiner.

Angus Pointer 2:01 $\frac{3}{4}$, the champion pacer of 1907, died at Lebanon, N. H., on Monday, December 16. Angus Pointer was by Sidney Pointer 2:07 $\frac{1}{4}$, and during the past season was invincible on the Grand Circuit after the meeting at Detroit, where he was defeated by Baron Gratton.

Angus Pointer was bred by W. H. Buchanan, of Kemptville, Ont., and was first campaigned by George McPherson in 1904. The campaign was a remarkable one, as the pacer won something like fifteen races, to ice and dirt, before hitting the Grand Circuit. At Hartford the driver was suspended for a year and Angus Pointer was purchased by Frank Jones, of Memphis, under whose colors he completed the campaign to Memphis, and after that he became a member of the C. K. G. Billings matinee stable. When the latter held his disposal sale, Angus Pointer was sold, Morning Star being reserved. He was purchased by Hon. George Whitney, of Lebanon, N. H., and in the hand of Trainer Ed Sunderlin, became the foremost pacing gelding in the country. In 1906 he won nine out of thirteen races, was second three times and fourth once. His campaign the past season is fresh in the minds of all.

Angus Pointer was foaled in 1898 and his dam was Jane, by Grant's Hambletonian, and his second dam was Fan, by Young Highlander. He was the winner of the fastest three-heat race by a gelding in 2:03 $\frac{1}{4}$, 2:03 $\frac{1}{4}$ and 2:04 $\frac{1}{4}$, beld a matinee wagon record of 2:03 $\frac{1}{4}$, the world's pacing race record to wagon of 2:04 $\frac{1}{2}$, and the fastest three-heat race to wagon, 2:06 $\frac{1}{4}$, 2:04 $\frac{1}{2}$ and 2:06 $\frac{1}{4}$.

Angus Pointer was consigned to the recent Old Glory sale by George E. Whitney, who bid him in at \$7,000, as he considered the gelding was worth more than that. In the opinion of the race-going public, Angus Pointer was as game and consistent a race horse as ever looked through a bridle.—Western Horseman.

AS TOLD OVER THE TELEPHONE.

The story of a balking mule named "Magnolia," driven by an old negro named "Abe," and owned by a wholesale feed house. One day Magnolia balked on Broad street and refused to be driven again. After old Abe had spent his energies on Magnolia for an hour in the vain endeavor to get him to start, he went into a store to telephone his employers. The following is what a party of gentlemen near the telephone heard:

"Please, marm, gimme number two hund'ed an' 'leven. Is dat you, Marse Henry?—yessir, dis is Abe. I dun ring yer up, sir, ter tell you about Magnolia. Magnolia, he dun balk down on Broad street, sir."

"'Bout a hour, sir."

"Yessir, I bus' him in de head."

"I dun wear de whip handle out on him, sir."

"Yessir, I kick him in de belly, 'bout eight times, sir."

"Marse Henry, I would ha' kick um some mo' but I hu't me big toe on um de las' time I kick um."

"'Twis' he tail? No, sir, not dis nigger. A gentleman from New York, he twis' he tail."

"No, sir, I dou't think he dead. De doctor take him 'way in de amb'lance."

"Yessir, it was sure foolish."

"Marse Henry, I done set fire und'r Magnolia."

"De harness? Dun hu'n de harness clear off um."

"Decart? Yessir, dun bu'n de cart, too, sir, all 'cept one wheel sir."

"Yessir, I git de feed out fust, sir."

"Marse Henry, is you want me to come back to de store and go to work, or mus' I wait fer Magnolia to move?"—Exchange.

Your Stomach is O. K. is you drink Jackson's Napa Soda.

THE ARMOUR GRAYS IN ENGLAND.

Armour & Co., the great meat packing firm of America, has put together a team of six gray Percherons, that is known as "The Big Six." They are handled by William Wales and were sent to the International Horse Show at London this year, where they created a sensation, King Edward being one of the many enthusiastic admirers of the horses and their appearance. The following story of how they were trained and handled was written by their driver, William Wales, and is taken from the Chicago Breeders' Gazette's holiday edition:

Getting a four or six-horse team so that it will drive together is a matter of breaking first and habit later. When you are handling four or six from the box of a big truck anything is liable to happen when your horses weigh from 2,000 to 2,400 pounds, but with the horses Armour & Co. have given me to work I can say that I have never had an accident of any kind, never hurt anyone and never got into serious trouble. If you break them patiently until you get them mannered it becomes a habit with them to do what they should do when you want them to do it. Understand that two ton-horses at the end of the leader's long lines can not be done much with if they get the jump on you. Just think of the length of these lines!

Driving six is not much different from driving four, and my plan is to begin with the wheel pair and get it so that it will do what I want it. Then with this as an anchor I take another pair intended for leaders in the six and go through the same process with them—in the wheel—until they learn my ways. Next I take the first wheelers and give them an extra lesson or two and finally hook the second pair to the end of the tongue. As each horse knows just what is wanted of him when his mouth or ear gets the signal from me there is no trouble in driving them anywhere. These go into the wheel and are thoroughly broken and mannered as the others were. Then I use them in the lead of one of the other pairs and get them so I know they

can be handled. It takes a lot of patient work to do all this, but it must be done. The wheelers are so heavy usually that I do not change positions with them at all, though I have sometimes had sixes in which I could drive any pair in any position. That, of course, was when the horses were all of about the same size and weight.

When it comes to the fancy stunts which entertain the crowds so hugely, it is again merely a matter of patient breaking. A horse soon knows, when you handle him always yourself, what you want him to do. The firm has always given me the best it had in the shop to work with, and to this I attribute much of the success which has been achieved. Sure it is that if the horses had not been what they are I never could have nailed the championship colors to the big yellow wagon as I have in both the old and new worlds. I just go at it with the horses and by patiently trying again and again get them to do what the public wants them to do—drive figure-eight, whirl with the wheelers standing and the leaders running, leaders eat off the tailboard, and so on. Some horses learn more quickly than others. Mack, the off leader, was one that was taught easily. It did not take long until I had him so that he would pick a cigarette off the tailboard. I do not make much use of the whip, but when a horse needs a good licking he gets it, and he never forgets it.

It is astonishing how small a space you need to drive a big six in. When we had the grays in London and were "commanded" to appear at Olympia before King Edward and Queen Alexandra, they had laid a whole lot of sod down in the arena in front of the royal box, leaving roads through it, on which it was designed to drive the high-steppers in pairs and singles. Well, I pulled up in front of

preventing any more from entering. It took an extra platoon to make way for us to drive into the ring.

It had been fixed so that the Armour grays should follow the king's carriage into the ring. The royal box stuck out a little beyond the rest of the seats, and we were so timed that the king had got seated before we pulled up in front of him. He looked us over, and then his equerry came out and told us to turn around and get a little further away. We did so, and then the equerry made several trips back and forth to us bearing the regal questions, which I answered as well as I could. Ever hear a crowd cheer? Well that Lincoln outfit sure did split the air.

What the people seemed to wonder about most was our hitch. Times without number we had to tell them what the swing pole was for, and the principle of the evener and singletrees no one seemed to be able to comprehend. When we were in Glasgow, Wardie Co. sent a man down to investigate and Guinness & Co. sent a pen artist to make complete sketches of our entire equipment. Another thing that seemed to puzzle them sadly was that we drive the six with all the reins inside, with spreaders. In the old country they drive four by running the leaders' lines outside the heads of the wheelers. We allow our horses to go so much wider here than we can drive with spreaders inside. If we had to run the swing and lead lines outside we never could hold the horses at all. In Edinburgh an old four-in-hand coachman who had been at the game for forty years offered to bet me that I never could drive the team with the reins inside. I had to show him. A Scotchman sure is from around St. Louis. They never seemed to get to understand how the team was put together. We showed them time and again and the same folks would come back the very next day and ask what the swing pole was for and how we got the leaders hooked on to the wagon.

They used us mighty well over there. We were gone just one week less than five months and we never had any trouble or an accident, though the people did not seem to think it was horses we were driving. They would crowd upon us so close that the "bobbies" had to clear a way for us. We had a splendid time. We showed at many shows and mostly the ground was soggy with rain and the wagon cut down. We paraded in several cities, including London. It was quite a sight in Regent's Park to see all the fine Shires and suffolks, led and driven single and tandem, and once in a while a pair abreast hitched to a stiff bar. We drove along just as we would in Chicago and the people sure took it out in applauding. When we landed in Liverpool we had to get a special permit from the city to drive the six, because the people did not believe one man could drive six without getting into trouble. At Burton-on-Trent, where the Bass ale comes from, Sir Oswald Mosely presented me with a fine medal, and I got three others and a handsome piece of plate. There is a gold medal due from the International at Olympia to the team. The horses weighed just as much when they got home as when they went away and they certainly do have oats in Britain. I think they liked the horses a little better in Scotland than in England. Anyway, it was a triumphal procession all over John Bull's little island.

There was a bit of amusement, too, at times in it all. I will bet I answered a million questions, so it was a comfort to know that some one else had to do the same. During the International at Olympia one of the London morning dailies had a headline like this

WALES THE HERO OF THE WEEK,

and before 8 o'clock in the morning all Britain was asking what the Prince had done to break into type that could be heard a mile. I had not heard the last of that when we sailed, but anyway it is something to be mixed up with royalty.

THOMAS HOLDS THE RECORD.

Al. Thomas, as all horsemen know, is the man who rides the pony and drives the trotters, tandem fashion, at the Garden sales, says the New York Herald. He is no spring chicken, for the records of the War Department show that he was scouting under Miles in the days when old Spotted Tail was a bigger man than Bryan and Sioux Indians in war paint were thicker and more troublesome than populists in the territory that is now Nebraska.

Thomas shows, on an average, about one hundred trotters on the miniature track at the Garden, besides exercising sometimes forty or fifty horses before the sale begins. He estimates that each horse shown at the sale goes six times around the track, or about one mile, before the auctioneer's hammer falls. He is in the saddle constantly from early morning until after ten o'clock at night. Figure out the distance ridden by this grizzled centaur of the Garden during an eight days' sale, and think on him, ye dilettanti of the bridle paths in Central Park!

After having ridden nearly seven hundred miles in six days Thomas said that he felt as if he could go on indefinitely, whenever he and his bronchos—he uses six of them—are nicely warmed up for the work. When asked how he kept himself in such physical condition he said that a liberal use of rum was largely responsible. Being a teetotaler, Thomas takes it externally, in the form of a liniment, which he says is as good for his horses as it is for him.

THE ARMOUR BIG SIX.

A lot of tommyrot was published about the showing of the six-horse teams at Olympia. Guinness & Co., the stout brewers, had three lorries, two horses tandem to each, one man on lorry and one man leading—six men with three lorries. The Yorkshire and Lancashire Railway Co. had six bay Shire horses hitched to one lorry with two pair of shafts and swing team trace chains hitched to them, lead team traces hooked in swing team traces and a man to each horse. Sir Cuthbert Quilter had four Suffolks hitched tandem to one lorry and two men managed them by word and walked alongside of them, one by lead horse and one by shaft horse. There was a showing of twenty-two horses by four different firms, each having a style of its own. We paraded once and then they turned the home-bred horses all out of the ring, but shut the gates in my face, telling me to go ahead and do some fancy driving.

At the Royal Show at Lincoln it was sure a caution. It rained and the ground was wet and the temporary sheds none too good. Did the loyal men of the fens want to see the horses? Well, the jam of the crowd was so great in and about the stalls that we could not get the horses out to hitch up when it came time to get busy. It was bad enough in London where we never got rid of the last of the visitors till after two in the morning, but at Lincoln it was a fright. The jam was so great that we had to get a bunch of "bobbies" to clear it out. To do this they had to break out a door in the end of the shed and drive them out that way,

I have never been able to do anything with a horse that was not hard-bitted. He must be prompt to go up on the iron or he will throw everything out of gear. One lagging horse spoils the whole performance. A tender-mouthed horse will never stand the swinging around the small arenas in which we very often have to show. The leaders must be mouthed so that they will go up on a curb bit, with the buckles of the lines in the middle or lower bar. You must have this and you must have them all mouthed alike, then they will swing for you like one horse. If one lets go, there is trouble, because you have to pull all the others down till you can catch up the delinquent again and set him on his pins. In a six, understand, you have a pair away out in front of you that is doing its best to keep the rigging all taut. The wheel pair may be doing fine, but if you have a tender-mouthed one in the swing you have the wheeler behind him treading his heels off and the leaders trying to yank him along. Not all horses will make good in the swing. You need them with a good bit of courage. The wheelers must be steady so that they will stand still when you are doing fancy stunts and the leaders

HUNTING IN THE GRAND CANYON.

When President Roosevelt, during his last visit to Arizona, stood on the end of Grand View Point and looked off into that silent grandeur of desolation that is called the Canyon of the Colorado, for want of a better name, little did he know that in its depths is game that challenges the pursuit of the world's sportsmen. But it is a fact that chasms apparently destitute of a life contain wild animals well worth the pursuit of any big game hunter, as those who have picked their way along the mesas and gone down into the gorges will testify.

The few who have ventured into this underworld know that it is not one but many canyons. From the spot where the Little Colorado flows into its big brother on the verge of the Painted Desert to far below Bass' Camp, the mesa has been rent asunder, not only along the course of the river but on either side, forming canyons some of which are a dozen and a score of miles in length, and where the main canyon broadens out until it is twelve and fifteen miles from rim to rim, buttes and pillars arise to heights which give them the majestic proportion of the mountain. Stand where the President did and look off at the bareness of plateau and cliff side, the miles of crumbling rock and the absence of any form of vegetation, and you think of it as a sunken desert. On the north rim, however, there is a fringe of what seems to be bushes. A powerful glass will show that they are trees. In fact, for several miles on either side of the branch canyon, which Major Powell dubbed "Bright Angel" the rim is covered with a heavy forest growth with a few openings here and there. Through Bright Angel flows the creek on the banks of which Powell and his fellow explorers camped when they made their daring journey along the river of mystery. But long before the white man had quenched his thirst with its clean, sweet water the deer and bear drank here as they do today.

Only a few years ago did the white man attempt to cross the Colorado. Not many even of the trailmen have made the perilous passage at the foot of Bright Angel, for the river, though apparently calm at this place where it widens into a basin, conceals rocks that create treacherous under currents. In 1904 two boatmen rashly tried to reach the south shore when the stream was in flood. Caught in a miniature whirlpool, their craft was literally sucked beneath the surface. A few days later pieces of the boat were picked up near the foot of Bass' trail, but not a vestige of the men was ever seen. The passage of the Colorado has probably deterred many from going into the almost unknown region on the north side, but there are spots where it is not difficult nor dangerous if one exercises reasonable care.

Among those who have crossed to the north side have been several hunters whose stories of game have been proved by the trophies with which they have returned. A half dozen deer in one day is only a fair record, for this hunting ground of the Canyon. The specimens which have been secured are among the largest of the species found in the country west of the Mississippi, and the bucks are remarkable for the size of their antlers.

As already stated, the mouth of Bright Angel Canyon begins at the river gorge just across from the Bright Angel trail, which is one of the main footways into the Grand Canyon. At its head dwell the only human beings who live on the north edge of this sunken world—the half-dozen ranchmen of the "V. P." outfit. In one of the few natural clearings of the north forest range the drove of horses which graze upon its bunch-grass. But to reach the nearest bit of civilization beyond this you must journey nearly one hundred miles over the Caaan desert to the little Mormon hamlet of Kanab, where the "V. P." horses are sold. So it is that the deer and bear and wild cat have this wilderness nearly all to themselves, and the many pathways they have made even along Bright Angel's banks show their numbers.

Over twenty years ago came old "Cap" Hance through the Coconino forest searching for bunch-grass for his cattle. He literally stumbled upon the Canyon which the forest skirts and put up the little log cabin amid the pines which has been his home for most of the time since. Not satisfied with the vista from above, he worked his way down upon the mesa nearly a mile below by building the old Hance trail, a part of which was along the face of Amid the gigantic fissures and along the crags of rock walls so steep that the adventurer climbed up and down by the rope line. Truly it was a journey into the unknown and "Cap" took his gun along, the great buttes he found game famed to hunters the world over. The Grand Canyon today is the home of the bighorn as it was twenty years ago, for the only persons who have pursued it here have been the few prospectors and trailmen who, in the days before civilization, made the south rim a pleasure resort, and who at times had to live on venison and mountain mutton or starve.

Of the big game of America every sportsman well knows that the mountain sheep is one of the wariest. Its flesh is not only of a fine flavor, but its great spiral horns make a trophy worth the chase. The full-grown "bighorn," as the Western hunter always terms it, is nearly as large as a small elk and anything but a sheep in size or appearance. President Roosevelt and others who have followed it in the Bad Lands of Dakota and in the foothills of the Rockies, as well as on the slopes of the mountains themselves, tell many an interesting tale of its wonderful strength and agility. Nothing on four feet is more sure-footed—not even the cougar or wild cat. Thus it can reach the scanty patches of herbage on which it feeds, although they may spring up on a rock ledge a thousand feet above the river plateau, where even a mountain goat could not go. But the herds which live in these depths, as already stated, have had few pursuers. For years Captain Hance had his hunting ground all to himself and he has probably killed as many as any hunter in the West. Later, however, "Buckey" O'Neil went down into the depths in quest of gold and not a few fell before his aim. It is a fact worth telling that before Buckey put on the khaki of the Rough Riders to die in it on the fighting line in Cuba, he had a claim to one of the richest copper mines which has yet to be opened—in the heart of the canyon—but that is another story.

The sportsman who is willing to rough it in spending a few weeks in this great chasm and who is familiar with the habits of the bighorn, has a good opportunity to get a prize of which he can well boast, but it is not an easy task to get within range of this superb creature. There is no trouble about descending from the rim, for in a distance of thirty miles four trails reach the mesa at the top of the river gorge. Of these, the Bright Angel and Grand View are both safe and accessible, as I found in walking down them. One can guide a mountain pony along the mesa between the trails, camping for the night upon it with the stars for a canopy. The river can be ferried from the foot of either way. It is only from the plateau that the places most frequented by the bighorns can be approached, and to get within shot of one the sportsman must expect to do some hard climbing. While few have been shot recently, they are seen quite frequently by trail guides, and occasionally the spectator sees a tiny bit of life on some nearer ledge beneath him—a bighorn searching for a grazing spot perhaps a half mile in mid-air.

THERE'S MUSIC IN MY HEART TO-DAY.

There's music in my heart to-day;
The Master-hand is on the keys,
Calling me up to the windy hills
And down to the purple seas.

Let time draw back when I hear that tune—
Old to the soul when the stars were new—
And swing the doors of the four great winds,
And my feet may wander through.

North or South, and East or West;
Over the rim with the bellied sails,
From the mountains feet to the empty plains,
Or down the silent trails—

It matters not which door you choose;
The same clear tune blows through them all,
Though one heart leaps to the grind of seas,
And one to the rain-bird's call.

However you hide in the city's din
And drown your ears with its siren songs,
Some day steal in those thin, wild notes,
And you leave the foolish throngs.

God grant that the day will find me not
When the tune shall mellow and thrill in vain—
So long as the plains are red with sun,
And the woods are black with rain.

Russian River Fishing.—The bar at the mouth of the Russian River opened early last week, much to the satisfaction of many anglers, who each season, look forward to a few days' splendid steelhead fishing at Duncans. This year it looks as if the hopes of the fishermen were to be realized, but meagrely, if at all. When the bar opened the river was hardly high enough to give the fish opportunity to get up stream. The rains last week and this week have rolled the stream so much that the fishing has been very poor. About the only clear water available was to be found at the mouth of the Austin, where the catch was a few pound and pound and a half fish. Should the stormy weather continue there will be plenty of water for the fish to get up to the spawning beds, but there will be but little fishing—this being the case, the only consolation is that there will be more fish next season.

The best hot weather drink is Jackson's Napa Soda.

THE OLD AND THE NEW.

He who hunts with a modern hammerless gun, breech loading, short of barre, and light in weight, has little conception, says an old hunter, of the labor that our fathers, who shot large and small game with a long single or double barrel muzzle loading gun, had to go through for his sport. Many men not fifty years old, who were great hunters in their boyhood, would be bothered to know exactly what to do with the newest pattern of gun; and there is no doubt that many such men would be delighted if they could get hold, for a single day's shooting, of one of those old muzzle loaders.

Not long ago, adds the old hunter, he did get hold of such a gun and with it went on a hunting expedition with his two sons, who had all the "latest improvements."

This old firearm was about a foot longer than either of the boys' guns, and beneath and between the two barrels a long wooden ramrod nestled, with which it was necessary to ram the powder and press the shot into the barrel for every discharge.

When our old friend had poured upon the palm of his left hand just enough of the powder—the art of measuring to a nicety with the eye and the hand was one that every boy acquired in those old muzzle loading days—he poured it carefully into the barrel. It was a knack in those days to wrinkle the palm so that no powder would fall to the ground and he wasted.

Next the old time hunter tore off a few small scraps from a newspaper he carried in his pocket. This was another knack, for too much or too little wadding might injure his marksmanship. Then he drew the ramrod, turned it "end for end" in the air with a graceful flourish, and let it drop of its own weight into the barrel.

Then came the process of ramming the powder. With deft and forcible downward thrusts the old hunter packed the powder into the base of the barrel and also sent some grains up into the nipple which was soon to be covered with the percussion cap, thus "priming" it, so that the cap would not explode without exploding the powder.

Now he withdrew the ramrod, dropped it back into its place beneath the barrels, measured out the shot with the same acquired skill with which he had measured the powder, and let it flow rattling into the barrel.

The old man's boys could not help noticing that the rolling of the shot down the long barrel made a peculiarly musical sound. The old-timer used to think that this was the most musical sound in the world; it was associated with fair skies, broad fields and deep, dim woods and with thrilling sport. Such surroundings would make almost any musical sound; and this sound was musical to begin with.

Next came the wadding for the shot—just about as much as for the powder, but more carefully and lightly pressed in. If the hunter wished to bring down large game or for any reason to plump his shot into one spot he wet it in his mouth before he put it into the gun.

Both barrels loaded and the ramrod back in its place, the hunter rested the gun on his left arm, half cocked both barrels and proceeded to take his round box of caps from his pocket with his right hand and put two of these little detonating engines on the nipples. It was always necessary to have good caps and keep them dry, for nothing in the old timer's experience was more distressing than to get an excellent aim and then have the cap snap without discharging the gun.

When the old man took with him the boys on the occasion referred to the latter watched this long loading process and wondered how men could ever have been content to take up so much time getting ready to fire. But they did not realize that a gun of this sort was a big improvement on all that had gone before and that percussion caps had marked almost as great an advance as breech loading arms were to make afterward.

There have been hunters on the Coast, even in recent times, who have refused to give up their old muzzle loaders for improved weapons. Some ten years ago there died at Yreka an old backwoodsman named Alexander Tyler, who was commonly known as "Long Aleck."

He was a Tennessean of the Daniel Boone type. He crossed the plains in 1851, carrying with him an ancient Kentucky rifle, muzzle loading, of course, and five feet three inches long.

It matched well the stature of "Long Aleck," for that worthy stood six feet three inches in his stockings. He was for all the rest of his life a miner in the wild districts, and it is known that with this rifle he killed many Indians.

A colossal enterprise for the preservation of big game is being undertaken in New Brunswick, where a syndicate of a hundred American plutocrats has obtained a lease of all the lands of the New Brunswick Railway Company. The area to be enclosed is 1,700,000 acres, and over \$20,000 will be spent in its development. A splendid club-house is to be erected, a corps of guides organized, a chain of hunting camps will be established, and boats and launches will be provided for fishermen. The district is noted for its big game, moose and caribou deer and the black bear being found in abundance,

SHOOTING ON STILTS.

In the early autumn of 19— good Dame Fortune brought me an invitation from an old school friend, a Frenchman, to join him in Paris, and accompany him to his home which was situated near La Rochelle in the west of France. The letter came most opportunely, as I was becoming weary of myself, and longing to get away for a few weeks; the weather was simply atrocious, and almost every one was in the country shooting with their friends. I had only returned from Ireland a few months previously, and was as a stranger in the land. Had there been any vacillation in my mind as to accepting the cordial invitation, one sentence would have decided it. That was, 'Bring your gun, and, if possible, a good retriever. There are any quantity of fowl in the surrounding marshes.' That decided the matter; I borrowed a dog, and the 8 p. m. mail from Victoria the following night had 'Nep' and I as passengers. We just had a run round Paris. There was nothing new, therefore nothing specially attractive; so, after two nights' festivities, we mutually agreed to quit for La Rochelle, where we safely arrived in due course. I was most warmly greeted by a family that had long been familiar with me by name, and before many hours had passed I was quite at home in the quaint chateau, that still bore trace of the famous siege of Monseigneur le Cardinal Richelieu.

Next morning we started early for the marshes, and commenced field operations. These marshes, or landes, as they are called, lie between La Rochelle and Biarritz, and are as much like an Irish bog as anything to which they can be compared.

In the Gascony marshes tracks of sound hard land run in all directions through them; but here, directly you reached the outskirts of the marsh, it was just that and nothing else. Slimy mud, more or less soft according to the soil, produced a rank undergrowth, intersected by pools of water covered with aquatic growth, reeds and rushes, and what in England we term "Cat o' nine tails," growing six or seven feet in height. We tried along the edge, but, only having ordinary laced hoots coming about half-way up the calf of the leg, we simply splashed ourselves freely with mud and water, and never saw a bird. Old "Nep" was in his element, and found any quantity; but the reeds grew so high, we could not see them, unless they crossed one of the open spaces.

"Confound it," said my friend; "I thought we should have been in better luck than this. All that remains to us is to do as the Romans do when at Rome, and as the landes' fowlers do when fowling in the 'landes.' Can you walk on stilts?" he queried suddenly.

"Well, it's a few years since I tried," I answered, "but I used to be rather a good hand in the old days. Why do you ask?"

"See that man over there? That's a professional fowler. Let's go and engage him for to-morrow to find stilts, and show us the best ground."

This fowler was the quaintest looking figure I ever saw. Clad in the short round jacket, knee-breeches, gaiters, and cap of the province, he carried a gun in his hands, and at his back was slung a long light pole, about seven feet long, having three finger-like hooks of iron attached to the lower end; thus equipped, he stalked along on a pair of stilts that were firmly strapped to his legs at the ankle and knee. The stilts were fully five feet high, and he towered above the reeds like Gulliver among the Lilliputians. By his side trotted a dog, usual cur type of any French village. The hargain was soon struck, he promising to bring us some stilts that evening, so as to give us time to have a little practice. Great fun we had with them when they came, and we speedily had every servant of the family watching our gyrations in the courtyard. I soon became fairly at home on mine, but Alphonse was in sore trouble, and staggered from wall to wall in a somewhat erratic manner. However, an hour's fun worked wonders, and next morning we sallied forth at our fowler's call, and speedily entered the marsh.

It was with no small feeling of envy on my part that I watched the easy swing of our guide and contrasted it with our own plodding steps.

As we progressed, fowl rose almost every step. 'Nep' had made friends with 'Sancho,' and they worked most amicably. We, standing high above the reeds, could see by their waving where the dogs were, and, as duck, teal, and snipe rose, in quick succession, we duly accounted for a fair average.

"This is fine fun, old man," said I, "but it cramps your feet dreadfully."

"Then lets turn back, it's no use wearying ourselves. We are not here for a day only."

"Right!" responded I; "thought I would fain shoot and watch that dog Sancho retrieve all day."

He was a most wonderful animal, shaggy, hulk-headed, coarse in every point, and of a dingy yellow and white color, but with an expression of 'hohom-mie' in his face that made us good friends at once. That dog would flush a bird, and then stand at point. Bang! went the gun, and he would turn his head knowingly on one side and listen. If he heard the 'swish' of a body falling in reeds, away he would go for it; but if not, he quietly resumed his heating. 'Nep' was a good dog, but he was utterly lost here, and I do not think he retrieved two birds out of ten. As we approached the edge of the marsh, a heron went towering up behind Alphonse. "Let me have it! Let me have it!" he cried, and bending back he raised his gun and fired. Down

came the heron; but, alas for the vanity of human greatness, down also went Alphonse. He had leant too far back, and the recoil had completed the work. There he lay, flat on his back, partly covered with mud, and wholly with water. Quick as thought, our guide caught him behind the neck with his hook and pulled him to a sitting posture.

"Sit up, sir; sit up."
"Ob, yes," said my friend, "it up is easy enough, but how about get up?"
"You must cut the lashing of the stilts and wade out," was the reply.

A rueful glance at me, and he bowed to the inevitable, and following our pilotage, soon reached firmer soil. After that, we went nearly every day to the marsh, and had excellent sport, without further mishaps.

At times there would be half-a-dozen or more of these strange-looking fowlers in sight, and most comical they looked when viewed from the distance. I jotted them down in my note-book as another 'rara avis' in the world of sport, and came away after a most enjoyable time, full of regret at leaving.

We cannot tell what the future holds, but I trust it will be my good fortune to pay another visit to La Rochelle.

INTERSTATE ASSOCIATION.

The able work of the Handicap Committee has been recognized by the Interstate Association in the following set of resolutions forwarded by Mr. Shaner:

Pittsburg, Pa., November 27.—Honorary Member Interstate Association.—A mail vote of the stockholders of the Interstate Association, taken under date of November 26th, resulted in the following preamble and resolutions being adopted:

"Whereas, a little dissatisfaction has been openly expressed in regard to the handicapping done at the 1907 Interstate Association tournaments by members of the Handicap Committees who so kindly undertook the thankless task of awarding penalties for expert work with the shotgun; and

"Whereas, it has been held that it was mandatory upon the Handicap Committees at the five Interstate Association tournaments to place contestants at 23 yards; and

"Whereas, Such a ruling would be arrogating to ourselves an important part of the duties imposed upon the members of the committees by virtue of their officers; therefore, he it

"Resolved, That the duty imposed upon the committees and what the Interstate Association did insist upon and provide for in its programs was that no contestant, however expert he might be, should be placed farther from the traps than the 23-yards mark. Everything else in the handicapping line it left to the acknowledged good judgment of the individual members of the Committees.

"Resolved, That their work was well done, was, we believe, fully proved by the result of the events in which that work figured, and we, the stockholders of the Interstate Association, tender our thanks for the services so kindly rendered, and our appreciation of the care and thought given to the allotment of handicaps at Richmond, Va., Chicago, Ill., Boston, Mass., Denver, Colo., and Spokane, Wash., by the following named gentlemen: Messrs. Elmer E. Shaner, Pittsburg, Pa.; B. Waters, New York, N. Y.; C. M. Powers, Decatur, Ill.; W. D. Townsend, Omaha, Neb.; Dr. Edw. F. Gleason, Boston, Mass. Also to those gentlemen who gave their services substituting for members of the Handicap Committee who were absent.

"Resolved, That these resolutions be spread upon the records of the Association, and a copy thereof be transmitted to each of the gentlemen who served on the committees, and to each of the sportsmen's journals honorary members of the Association." Very truly yours

ELMER E. SHANER,
Secretary-Manager.

DISTANCE HANDICAPS.

Many systems have been tried to place trap shooters on an equal footing, but it is now the general opinion that there is no fairer plan than handicapping by distance. It has been proved that when a shooter misses the clay bird from the 16 yards mark, he seldom makes the same mistake twice in succession; but if he is placed at 20 yards or further, he may miss several, and never be certain as to the reason for his doing so. Every long-distance shot has to shoot as quickly as he can in order not to increase the distance from his target, and it is this top speed which often causes him to miss. It has been proved by experiments and tables worked out on averages that this system of handicapping is certain in its action, and that a 90 per cent. man when placed further and further back will, as if following a certain law, gradually lose his superiority and become an 80 or 70 per cent. man. And the reason is not difficult to explain, for, at a short distance even the fringe of the load is going with sufficient force and compactness to smash a clay bird; but as every yard tends to diminish the striking force of the shot, and more particularly to spread it, it stands to reason that, leaving out the question of accuracy of shooting, which, naturally, suffers much more as the distance grows, a considerable penalty is imposed on the shooter.

CANINE EDUCATION.

As these instructions are written mostly for the benefit of the novice, it is necessary to give a list and definition of the commands in common use in handling the dog. Of course any one can train his dog to obey any commands he chooses to adopt, as there is no inherent potency in one word as compared with another when used as a command; but when one buys or sells a dog for field work it is well to know and use such commands as have received the sanction of usage. In any case it is desirable, for the sake of convenience, that each command consists of not more than one or two words, and those should be distinctly different from those used in any other command. Nearly all the commands have corresponding signals, so that the shooter may be able to handle his dog silently when working near game, or, for that matter, when working at all; but they are specially useful when there is any probability that the shooter's voice would alarm the birds. The signals also serve to assist in handling the dog when the shooter's voice cannot be readily heard, as when the dog is working far away, or when he was upwind from the shooter. The following are sufficient for the requirements of field work:—

"Come in" is the order which denotes that the dog is forthwith to come to the trainer. A few prolonged blasts on the whistle have the same significance.

"Heel" is the order given to the dog when he is to get behind, and follow behind the trainer. A motion of the hand to the rear is the corresponding signal.

"High on," some years ago, was considered the most elegant command to use in ordering a dog to begin ranging.

"Go on," or "Get away," is the command now commonly used for that purpose. A wave of the hand forward, or a wave of the hand accompanied with a snap of the finger or a simple click of the tongue has the same significance.

"Drop," is the command commonly given when the dog is required to lie down. The orders more in use some years ago are "Charge," and "Down charge," but they are now almost obsolete.

The right or left hand raised a little higher than the level of the head is the signal for the dog to drop.

"Hold up" signifies that the dog is to rise to his feet, and therefore it is given to him when he is dropped or lying down. A slight heckon with the hand or forefinger has the same significance. As the dog is rarely in the position required by the drop except when obedient to that command, the signal to rise is in accord with his inclination, hence is soon learned and eagerly watched for. A click of the tongue also serves the same purpose.

The dog can also be trained to obey orders given by the whistle, each order having a distinct note or notes which are used invariably with it. This, however, is an unnecessary refinement and of but little practical use in actual work. They are, moreover, rather difficult to teach to any dogs other than the most intelligent ones.

The foregoing are the commands which are used the most and they are of constant service, whether the dog is idling about the house or working in the field.

"Fetch" is the command used in ordering the dog to retrieve. "Find" denotes that the dog is to seek for a dead or wounded bird. "Seek" and "Seek dead" are sometimes used for this purpose, but less so now than formerly.

Obedience to "Toho" was formerly considered essential in a dog's education. It is the order which denotes that the dog is to stop and stand still. The trainer was supposed to derive great assistance from it in teaching the dog to point, for in times past it was commonly supposed that the trainer taught the dog to point. As "Toho" was very plausible in theory, and served well to stuff a part of a hook on instruction, it did a graceful service in that respect. It is one of the most difficult orders to enforce, and the discipline required to make the dog reliably obedient is, in most instances, a hundred times more difficult to establish than it is to teach the dog to point. After the trainer had taught it by much pains, he had little opportunity to use it; for, inexplicable as it is, few, if any, considered the fact that out of the total opportunities for the dog to point birds, the trainer would not know the correct time and place wherein to order the dog to make his stand, he not knowing where the birds were, or indeed whether there were any at all. If by any chance the trainer did know where the birds were he could seldom get the dog into the right position to fit the order—for it follows as a sequence that if the trainer saw the birds the dog could scent them—and the attempt to get him in the right place with the bawling out of "Toho" at the same time seldom failed to flush the birds. Again, if the dog by chance did stop to the order without having a scent of the birds it was a meaningless act, and if he really got a scent of them, he in his excitement paid no more attention to the order than he paid to the murmur of the breezes. He might be delightfully obedient in the yard, or even in the field when game was not present, and absolutely unmanageable when on game. A further absurdity is that the dog learns to point from experience, some taking to it quite readily and naturally almost from the beginning. To force a dog to stop and stand still when he is roading does not constitute a point. Nevertheless, a few of the old

school will maintain that they taught their dogs to point in that manner, when in fact the dog learned to point in spite of it. The arm extended at a little less than a right angle from the body was supposed to be the signal which denoted "Toho." Most dogs which were obedient to it were good for little else.

Long commands, such as "Come here to me, I tell you!" or "Dead bird, hunt it up!" or "Hie, there! What are you about?" should be avoided if the trainer can possibly do so, but if he must talk or perish, it is better then to use plenty of words.

"Hie!" or any other exclamation consisting of a single word, may be used to command the dog to desist from undesirable acts or to attract his attention to a signal. One word serves the purpose better than more, particularly if the more are epithets.

Whatever words or notes of the whistle or signal are used to denote the command, they should be used alike invariably, so that they will always have a fixed and definite meaning to the dog. Sometimes the beginner, when the dog, birds and himself are excited, will deliver a continued discourse to the dog, which for any beneficial effect might better be delivered to the trees.

Teaching the dog obedience to the foregoing commands, and giving him the necessary discipline to make obedience habitual can be done in what is called his yard training.

The implements commonly used in training are the whip, whistle, check cord and spike-collar, the latter being heartily denounced by many sportsmen, as being an instrument of unnecessary cruelty. Again, others object to the whip for much the same reason. Whether they are cruel or not depends entirely on the manner in which the trainer uses them. If he loses his temper and then beats and checks the dog to gratify it, the whip or collar are used cruelly, but so would any other article under the same circumstances. The fault then lies with the trainer and not with the instrument. If he cannot use the whip or collar as useful adjunct to the training, it is then much better not to use them at all, and the use of his boots or the first club at hand is not permissible at any time. Indeed if he finds that his temper is beyond his control and that he cannot refrain from punishing his dog unnecessarily in consequence, it is better to give up the attempt at training. Anger and violence unfit the trainer to teach and the pupil to learn. But cruelty being inflicted the trainer should blame himself and not the instruments used.

The whip is commonly used to punish the dog for any misbehavior, though some trainers use it to assist in forcing the dog to retrieve. The whips most in favor are those which are flexible and, therefore, easily stowed in the pocket. The ones heavily loaded with iron or lead at the butt should never be used as there should be no intention to kill the dog at any time as part of his training, and the whistle in the end of a whip is also a very useless article. The trainer should select one which tapers nicely to a point which ends in a linen or silk cracker, as the crack of the whip will, at times, serve the purpose quite as well as its direct use.

The spike-collar should be both of good material and simple in construction. Its purpose should be solely to inflict pain without any accompanying physical injury, hence the points should not be long and capable of piercing the skin when ordinary force is applied. Though commonly called a spike-collar, it is a combination of spike-collar and choke-collar. It has been claimed that the choke-collar without any spikes serves all purposes for which a collar is needed in training the dog. However, it is far more cruel than a spike-collar. It requires more force to make it effective, and the consequent choking and shocking injures the whole organism, differing thus from the local harmless hurting done by the spikes. The correct use of the collar will in due time be fully treated in connection with the subject of retrieving.

As to the material and construction of the collar, a brief description will suffice. The material should be the best medium weight harness leather, free from sponginess or flaws. For convenience in using it the collar is made in two pieces. The longer part should be about 22 or 24 inches in length by 1½ inch in width. The strap when looped should play through a square or more properly an iron parallelogram, for if a ring be used instead the collar when in use will roll and twist and thereby impair its efficiency. The inside dimensions of the iron parallelogram must be governed by the width of the strap and the thickness of the leather used. The shorter strap, 2 or 3 inches in length, has a square buckle in one end and a ring in the other. The spikes, screwed through a steel plate on one side of the leather strap and secured by nuts on the other, should project about one-half inch or five-eighths inch and the points should have a very short bevel so as to hurt the dog without injuring him or inflicting unnecessary mutilation. It should always be kept in mind that mutilation or real injury is neither desired nor intended, and also that the least possible punishment which will accomplish the purpose is all that is necessary or desirable.

Moundain lions, big ones, are getting a little too numerous about Escondido for comfort. At Twin Oaks recently a trap was set for coyotes, and next morning the trap was found torn to pieces. Evidence of a big lion being the cause were found in his tracks, which were as large as a man's hand.

PACIFIC COAST FIELD TRIALS.

Entries for the Derby, to be run next month near Bakersfield, total seventeen in number—fourteen English Setters and three Pointers. Among the entries are E. Courtney Ford's Tiburon, winner of the Derby last January, and S. Christenson's St. Ives, winner of the Northwest Derby, near Seattle, last year. The All-Age stake will close on the night of the drawing. There will also be a Members' Stake run, and possibly a Champion stake. Birds are reported to be plentiful where the handlers are located, thus enabling the dogs to do plenty of bird work. W. B. Coutts is at Pylema, J. E. Lucas at Rosedale, M. R. Dodge and N. Carlile are at Stockdale. Fred Coutts is at Merle, San Diego county.

The trials this year will be run on familiar ground near Bakersfield. This section has been patrolled for some time past, birds are plentiful and weather conditions permitting, the outlook for a successful meeting is assured.

It was decided last January to have the dogs retrieve in the Derby and All-Age at the coming trials. Since then the matter of retrieving has been threshed over again with the result that there will be no retrieving in these two events.

The judge or judges for the trials had not been announced up to press time this week. Home talent, it is hinted, will officiate in the saddle. Among other visitors to the trials will be Mr. H. H. Abbott, of Vancouver, B. C., the owner of Abbott's Jack, entered in the All-Age. Judge Macdonnell, of Vancouver, B. C., will also take in the Bakersfield trials. Both of these gentlemen are prominently identified with field trial affairs up north.

The list of Derby entries is the following:

J. G. Roberts, Madera, white, black-and-tan English Setter dog Madera Dick (Uncle Jimmie Whitestone-Belle Fontaine) whelped March 2nd, 1906. S. Christenson, breeder.

J. G. Roberts, Madera, white and lemon English Setter dog, Lemon Eye (Uncle Jimmie Whitestone-Belle Fontaine) whelped March 2nd, 1906. S. Christenson, breeder.

S. Christenson's, San Francisco, white black-and-tan English Setter dog St. Ives (Uncle Jimmie Whitestone-Belle Fontaine) whelped March 2nd, 1906. S. Christenson, breeder.

E. Courtney Ford's, San Francisco, lemon and white English Setter dog Uncle Fontaine (Uncle Jimmy Whitestone-Belle Fontaine) whelped March 2nd, 1906. S. Christenson, breeder.

E. Courtney Ford's, San Francisco, white, black-and-tan English Setter bitch Tiburon (Uncle Jimmie Whitestone-Belle Fontaine) whelped March 2nd, 1906. S. Christenson, breeder.

J. W. Considine's, Seattle, white, black-and-tan English Setter dog Kil's Dash (Ch. Kilgarif-Iona S.) whelped April 5th, 1906. Jos. E. Terry, Sacramento, breeder.

J. W. Considine's Seattle, black, white-and-tan English Setter bitch Thier's Dot (Thier's Dan Melrose Toodles) whelped June 21st, 1906. J. W. Considine, breeder.

J. G. Roberts', Madera, black, white-and-tan English Setter dog Boy Blue (Rival-Lightheart) whelped January 10th, 1906. Hon. Chas. N. Post, Sacramento, breeder.

Jos. E. Terry's, Sacramento, black, tan-and-white English Setter bitch Linda (Ch. Kilgarif-Iona S.) whelped April 5th, 1906. Jos. E. Terry, breeder.

Sunlit Kennels' (Post and Taylor), Sacramento, white, black-and-tan English Setter dog Singold (Don Jose-Gleam Girl) whelped July 22nd, 1906. Hon. Chas. N. Post, Sacramento, breeder.

Sunlit Kennels' white, black-and-tan English Setter bitch Lovelass (Count Whitestone-Loveknot) whelped April 10th, 1907. Hon. Chas. N. Post, Sacramento, breeder.

Sunlit Kennels' orange and white English Setter bitch Golden Gleam (Don Jose-Gleam Girl) whelped July 22nd, 1906. Hon. Chas. N. Post, Sacramento, breeder.

Hon. Chas. N. Post's, Sacramento, white, black-and-tan English Setter dog Rivalry (Rival-Lightheart), whelped January 28th, 1906. Hon. Chas. N. Post, breeder.

Hon. Chas. N. Post's, Sacramento, white, black-and-tan English Setter bitch Lightsome (Rival-Sweetheart) whelped January 28th, 1906. Hon. Chas. N. Post, breeder.

J. W. Considine's, Seattle, white, black-and-tan English Setter dog Policy Boy (Avalon-Policy Girl) whelped March 17th, 1906. California Kennels, Redwood, Cal., breeder.

J. W. Considine's, Seattle, white and black English Setter bitch Kil's Jessie (Ch. Kilgarif-Melrose Nora) whelped January, 1907. J. W. Considine, breeder.

Hon. D. G. Macdonnell's, Vancouver, B. C., English Setter dog Jack Stone (Count Danstone-Sister Okaw).

W. H. Easterbrook's, Yreka, liver and white Pointer bitch Santa Rosa (Recruit-Pandango), whelped February 14th, 1906.

H. H. Abbott's, Vancouver, B. C., Pointer bitch Sallal ()

If your dogs are covered with fleas, a very simple way to get rid of the pest is to provide beds of fresh cedar shavings; or, better, cedar excelsior, in the kennels or wherever the dogs sleep. The cedar is not at all unpleasant to the dogs, but is abhorrent to the fleas. When a dog's coat gets thoroughly scented not only do the fleas leave him while asleep, but they will not jump upon him when he is out in the sand or elsewhere during the day.

DEL MONTE SHOW.

Entries for the Del Monte show will close today. The outlook for a three-point show seems to be very encouraging. Local entries, as is usual, will not come in until the last day. Entries from the South are pretty strong; there will be at least fifty dogs sent up from Los Angeles and adjacent points.

Additional trophies have been offered as follows:

Chas. K. Harley, cup for the best Boston Terrier. Irving C. Ackerman, cup for the best Bull Terrier. Robison Bros., prize for the best Bull Terrier bitch. San Francisco Kennel Club, cup for the best Bulldog.

Miss Jennie A. Crocker, cup for the best of opposite sex.

W. W. Stettheimer, cup for the best novice Boston Terrier.

Hotel Del Monte, cup for the best in the ladies' class.

The American Fox Terrier Club offers (competition for members only), cups for the best American or Canadian bred smooth Fox Terrier; for the best wire Fox Terrier; for the best novice dog and for the best novice bitch.

DUCK HUNTING NOTES.

Local duck-hunting conditions are not by any means what hunters would like. On the Suisun marsh conditions have been irregular. On some days the birds were plentiful and moving, and then again the birds would desert the marsh for other feeding grounds. The conditions two weeks ago are given in the Suisun Republican as follows:

The success of duck hunters during the past ten days has been varied. On Wednesday of last week there was splendid shooting at all the clubs, while last Sunday ducks overlooked some of the best ponds; but taken as a whole, shooting was quite up to the average.

At the Suisun Gun Club only six ducks were obtained by the three members who occupied blinds. The poor showing was the result of an invasion by no less than eight poachers. The poachers were at the ponds shooting before daybreak and when Allen Chickering, Frank King and Walter Starr, the members referred to, put in an appearance, they were interrupted in their shooting until all the ducks were frightened away. Not knowing the intruders they were unable to swear to warrants for arrests. Mr. Chickering, who is well known and popular among the local sportsmen is adverse to punishing even violators of the law, but there is a limit even to his patience and he has taken steps to put a stop to the imposition. Several arrests are likely to be made in connection with previous occurrences on the Suisun Gun Club's preserves.

James Irvine and Ben Upham each killed 35 ducks, 57 of which were canvasbacks, on the Peyton ponds, last Sunday.

At the Joice Island Club four out of six guns scored 15 ducks each.

W. W. Richards and Dave Hearfield got a dozen birds each at the Green Lodge.

At the Teal Club, Luis Titus, Wickham Havens, John R. Burnham and a guest got a total of 120 ducks.

At Frank Maskey's Club there was splendid shooting for himself, John Bourdette and Amby Buckley, his guests. In addition to a limit on ducks Buckley killed eight geese.

At the Family Club on Wednesday of last week Phil Beakart and Alcock Sprigs each got the limit.

At the Marsh Club, last Sunday, H. E. Rose got 30 sprig. Achille Roos' limit bag included 22 canvasbacks.

Walter Cooper and John Brownlee Jr., of Vallejo, got 15 fine ducks at the Stewart ponds.

There was shipped from the Government hatchery at Baird, on December 18th, three hundred thousand salmon eggs to Buenos Ayres, Argentine. The eggs will go by way of London and thence to the South American republic. They will be five weeks in transit, though they will travel by the most expeditious method.

The Fall season for taking salmon eggs has closed at the United States fisheries at Baird, Battle Creek and Mill Creek. The total take was 75,000,000, which is only average.

There was excitement among the Izaak Waltons on the Redondo pier, one morning recently, when Frank Whitman of Los Angeles felt a pull on his line that indicated a big catch of some sort, and there was still more excitement when the fish began its fight for liberty.

With a great deal of skill Whitman manipulated his rod and reel, playing out and drawing in the line until the monster black bass or jew fish was worn out, and then with the aid of men from the fish market loaded his big catch into a skiff and later hoisted it to the market.

The big fellow weighed four hundred and forty pounds, the largest that has been caught from the pier this year and one of the largest that has been taken at any time either from the pier or deep sea fishing.

Carence Owens brought in another weighing about three hundred pounds the same morning, caught in his skiff not far from the pier. Then he went back for another.

THE FARM

HORSES IN EARLY AMERICA.

Horses are not natives of America. Those running wild in South America and Mexico are descendants of the animals brought over from Europe by the first Spanish colonists, and either escaped from captivity or were purposely turned out to take care of themselves. The first horses imported into New England were brought over in 1629, or nine years after the landing of the Pilgrims at Plymouth Rock. One horse and seven mares survived the voyage.

Horses were not highly esteemed nor much needed in America at that time nor for a hundred years afterward. No race courses or trotting parks would have been allowed by those stern old Puritans who first settled in New England, and the roads generally were so poor and rough that speed on them was not desirable or possible with safety to the vehicle or its occupants. Oxen were found to be far better and more pleasant for all kinds of farm work, and even for traveling on the road and drawing the family to church. Most of the land was rough, rocky and full of stumps, so that oxen, being strong, patient and slow, made a far better team than horses for agricultural purposes, lumbering and clearing land. They were more cheaply kept, needed little grain when at work and none at all when idle. They required no expensive harness (only a cheap yoke and chain), costing not more than \$4, and were quickly yoked. Under such circumstances it is not surprising that horses in America during that period were not greatly esteemed or well taken care of. A farmer was much more proud of a fine yoke of red oxen, four years old, well matched and well broken, than of a span of degenerate horses such as were then common in the colonies. They were seldom stabled or groomed; the colts under three years old were wintered in the barn-yard in order (as it was supposed) to make them tough and hardy.

Horses had degenerated to such an extent under bad treatment that in 1668 the general court, or legislature, of Massachusetts enacted a law with this preamble: "Whereas, the breed of horses in this country is utterly spoiled, whereby that useful creature will become a burden, which might otherwise become beneficial, and the occasion thereof is conceived to be through the smallness and badness of the stallions and colts that run in our commons and woods." Then the law goes on to fix heavy penalties against allowing "any full grown horse over two years old to run on any commons, roads or woods unless he be of comely proportions and of good size—not less than 14 hands high." The selectmen of the town were empowered, and, under severe penalties, required to see that the law was enforced.

This action of the general court of Massachusetts shows that the people then believed that horses for the best service can be too small, and that they should not be less than 14 hands high. This law was no doubt effectual in making the people raise better horses, for at that time artificial pasturages were few, and the commons and woods were the main dependencies of the colonists for stock feeding during eight months of the year. It is probably better known now than it was two hundred years ago that the size of animals depends in a great measure on the fertility of the soil where they are raised and the capacity of producing an abundant food supply, together with judicious care in feeding, watering and keeping young stock growing all the time unchecked from birth to maturity. Wherever horses have been allowed to run wild, browse in the woods or on prairie grass, exposed to the cold storms of winter unsheltered and unfed, they have invariably degenerated in size like the Indian ponies and Mexican mustangs. There is not much doubt that the diminutive ponies of Shetland and Iceland were descended from large horses taken

to those inhospitable islands centuries ago, or escaped from wrecked vessels, but the scanty subsistence with which they were provided and the rigorous climate to which they were exposed gradually dwarfed their bodies to the present size.

The French who first settled in Canada brought over fair sized Percheron horses from France, but a harsher climate and a scantier supply of food caused a gradual diminution in the size of their descendants. They became much smaller than their progenitors, but retained the shape and build and their courage and hardiness were increased.

The Germans who settled in the counties of Lancaster and Berks, Pennsylvania, brought over the heavy draft horses of their fatherland. The climate was as mild as that to which the horses were accustomed, the soil was as productive as along the Rhine, the horses and their descendants fared sumptuously every day, and the descendants of those German horses first brought over average as large, if not larger, than their ancestors. A breed was developed in Lancaster county called the Conestoga horses. They were not a new breed, only the large German horses made still larger by breeding for greater size.

It is not known when the first horses were brought into the colony of Virginia, but Fearnought, whose pedigree could be traced back to the purest blood of England, was brought over in 1764, and left his mark on a numerous progeny of uncommon size, heavy, bottom and speed. He was the ancestor of some notable race-horses of Maryland and Virginia, which defied all comers on the race track until a little mare from New Jersey named Fashion was taken to the old Dominion and beat the champion runner, which belonged to John M. Eotts, afterward noted for his opposition to the secession of Virginia. Some large horses were imported into New England in 1630 from Denmark, but were found to be too large for the best service there and soon disappeared.

In colonial times the stallions were kept at work for nine months in the year, and this work was not only advantageous to the owners, but was undoubtedly a benefit to the horses and the colts begotten by them. Every bone, sinew and muscle in the bodies of the sires being hardened and strengthened by labor, they were enabled to transmit a strong constitution to their colts, which were foaled in perfect health and strength. Not only did these hard working stallions get better colts, but they were better behaved and more easily handled in the coupling season.—Tribune.

HYPOTHESIS OF HEREDITY.

The fundamental principles of poultry breeding are few and simple. The mechanism of a violin is simple—four strings and a bow—so simple that it requires many years of arduous toil to complete its mastery, but under the magic of a master it stands unrivaled in the world of music—the king of instruments. So with the principles of breeding; the practical application of those principles is beginning to attract the highest efforts of which the mind is capable. Every breed and each variety owes its existence to two latent forces of nature—the inheritance of ancestry, habits acquired through many generations, and constitutional vitality—in a word, heredity, and the force of circumstances controlled by surroundings. The eternal force of creation acts slowly but surely. We note a variety of one breed for a season and are unable to remark a change, yet we know by the immutable law of nature that a latent force is at work—the unchangeable law of the universe is change—and retrogression or progression is in effect. Note the same strain year after year and the fulfillment of this law becomes apparent. Slight, perhaps—very slight—but slowly and surely the change will be noted either for good or for bad. Let this fact, then, impress itself upon every breeder, whether for utility or for fancy, that there isn't a bird of any breed or of any variety that is not slowly undergoing this change. The vital force of the bird will attempt to adopt tendencies acquired through generations of ancestry to the necessities of exist-

ence. With an understanding of the laws that govern these changes it is the province of the breeder to direct these tendencies and direct the interaction of the eternal forces. The types nearest the ideal today are the result of careful direction of vital tendencies through selection and restriction.

Scientific breeding is just beginning to be studied. Its possibilities can not be estimated. In the past, those who sought certain results did so through guesswork rather than otherwise. The underlying principles that govern the tremendous life forces were but partially known. Order is now being brought out of chaos. The breeder of today is beginning to observe, to study and to learn. To intelligently guide the inherent life forces into new creations of better type, a knowledge of the underlying principles that govern must be known. The plan of the universe is progression. The things of today are better than those of yesterday. The plants and animals of today are better than those a thousand years hence. Zoologically it is the plan of nature to ignore the individual that the type may be preserved. Eventually the type is destroyed to be succeeded by a new and better one. Through each succeeding stage, we note first progression, then retrogression, to be succeeded by still further progression. Through each succeeding step forward, then backward, then forward again, it is nature's plan to cross genera, species and varieties the purpose of which seems to be to create general disturbance that will later result in the combination of individual tendencies which in succeeding generations become disassociated and variously reproduced in other combinations. It is within the province of the breeder, therefore, to take advantage of these tendencies and guide these life forces to earlier progression at an infinite saving of time by avoiding the retrogressive stages. A knowledge of zoology and biology, the ability to correctly estimate the action of inherent and circumstantial forces and last, but not least, a definite plan constantly in view are necessary to successfully guide these life forces to progression without retrogression.

In nature's crossing we note that the process is very slow, requiring often centuries to accomplish her purpose, which by artificial methods may be accomplished in as many years. Each breed and each variety of the domestic poultry is the result of a cross. The numerous breeds and varieties owe their origin to the forces that constitute heredity and environment. The type in none of these has ever been constant, nor will it,—for the inherent life force must adapt itself to the forces of environment, or become obliterated. There must be progression along the line of the ideal or there will be retrogression. It is the purpose of nature to preserve life and perpetuate it but she is seemingly unmindful of quality. She has given the world the jungle fowl but she has never improved upon it so far as we know. Given time, and there can be no doubt of the result, for progression is nature's law. It is therefore left to the breeder to not only aid in perpetuating life, but to guide the inherent life forces into useful channels by crossing and by radically changing the surrounding conditions. In attaining certain results, we want most to keep the ideal in mind with a definite plan constantly in view to attain the end. We want a description of the individual ancestry in a lineal descent, for we know that both good and bad traits will be transmitted through generations and in time become fixed to such an extent that these same traits will be reproduced in each succeeding generation; given these, and we select for our breeders the individuals nearest our ideal. The same ideal must be kept in mind year after year. Year after year the blood line must be restricted. Year after year, with patience and persistence, each individual destined for the breeding pen must be carefully selected with reference to the special object to be attained. In working along these lines, almost any feature in a bird may be intensified—that is, the trait will be transmitted to the progeny in an intensified form. Time and patience are potent factors in molding

the type and a knowledge of inherited tendencies, with the ability to direct them, is essential.—C. S. Gorline, in Des. Farmer.

BEN: A CLEVER HORSE.

When I first became acquainted with Ben he was assisting in the erection of some telegraph poles along a railroad, and he was working as intelligently as any of the men.

There was a certain independence about the animal that rendered him trustworthy to a remarkable degree. Ben knew what was expected of him as soon as his breakfast was finished, as well as any man in the gang—better than some of them. His first duty was to walk over a bridge across the river which separated him from his field of labor. This he did unattended, although the bridge was a rude affair, consisting of sleepers some distance apart.

His orders from his master were brief, and seldom required repetition. "All ready Ben! Go on!" With a low whinny, the horse would back out of his stall, rub his nose gently against his master's shoulder, and then take up his line of march.

Upon reaching the bridge, which was but a short distance from the stable, Ben usually stopped a moment, as if considering. Then he would put one foot carefully upon the first sleeper as if to test its strength; and finding it all right, he would begin his cautious walk across. People who were in the habit of watching him noticed that while he used his forefeet with the same confidence as when he was in level ground, he felt his way more cautiously with his hind feet, never putting them firmly down until he was sure of his footing.

The sight of the horse walking across the bridge in the morning and again at night was always witnessed by an interested gathering of people.

Once across the bridge, Ben's work for the day was fairly begun. He understood perfectly that his next duty was to report for service. He would walk leisurely up through a gang of men until he came to the one who had charge of him during working hours. Then he would back around and wait patiently five, ten, fifteen minutes, if necessary for a long pole with chain attachment to be fastened to him.

This pole Ben knew was to be carried to a certain hole, and left there; and he also knew that the next pole he carried was to be left at the hole just beyond. When he reached his destination, he would back around and leave the pole almost at the edge of the hole where it was to be set up, stand until some one came to unhitch the chain and throw it over his back, go for another pole, wait for it to be hitched on and start off again without a word being spoken. All day the horse plodded back and forth, never once making the mistake of leaving two poles at the same hole.

Ben knew just as well as any of the men when the noon bell rang. Then, instead of keeping on at his work, he would walk off in the direction of the restaurant where he dined, which was a shed nearby, and here he would stand until his rations were dealt out to him. His water he always went for himself, taking a long draught from a large tub at a pump on a neighboring corner.

Everybody in the vicinity knew and loved the horse and spoke to him as one addresses a companion. Many a juicy apple, accompanied by a loving pat, varied the monotony of his daily round of duties. And when the time came for Ben to leave for other fields of labor there was a feeling of genuine sorrow in the community as at the loss of a faithful companion and friend.—Youth's Companion.

According to a recent hog feeding experiment in Virginia, linseed meal is the best market feed to combine with corn. With a mixture containing 200 pounds corn meal and 39.5 pounds linseed meal, it took 3.6 pounds of feed to make a pound of gain. With a mixture containing 100 pounds corn meal and 39.5 pounds linseed meal, it took only 3.1 pounds of feed to make a pound of gain. Just as good results, however, were obtained by feeding skim milk (at 20 cents per 100 pounds) in addition to corn meal. Cotton seed meal was not used.

KILLING POULTRY FOR MARKET.

Killing is done in two ways. The plan most in favor is to dislocate the neck. This is done by holding the legs of the bird firmly in the left hand just over the operator's hip, with the back of the bird toward you. Seize the head of the bird with the right hand, the forefinger back of the neck, the crown of the bird in the palm of the hand and the other three fingers in front under the head. Draw the head down over the right knee, stretch the neck and bend the head backwards, dislocating the neck. Draw an inch and a half from the neck, hold the head so as to allow the blood to collect in the neck. This method of killing gives a juicer, better flavored product than does that of letting the blood out by cutting deeply with a sharp pointed knife into the roof of the chicken's mouth just below the eyes from the inside, of course.

Plucking should begin immediately after the neck is broken. Pull the quill feathers of the tail and wings and breast. Never allow the chicken to cool before plucking, as the flesh is sure to tear if plucked cold. Leave a couple of inches of feathers on the neck nearest the head, a little rough around the hocks and last joint at tip of wing. Pluck all the rest clean, leaving no pin feathers. Do not tear the flesh. If you should happen to do so in your hurry, be sure to draw the skin together with a white thread. Leave your bird looking as attractive as possible. As soon as you have finished plucking, fold the legs up along the breast and place the bird's breast down, in a shaping board, cover with a paper and place on its back a brick or iron. The shaping board is made with inch lumber. It is simply a right angled trough, six inches deep and six feet long. It should be tipped up a little and the birds placed in it side by side with weights to press them into shape. Allow them to cool twelve to twenty hours before packing. They should be packed neatly in a box three feet long, twelve inches deep and twelve inches wide. The box should be lined with parchment paper to keep the fowl clean and dry. Pine or basswood make good boxes. Cedar is apt to taint the meat.

Having a first-class product, you should aim to have it reach the best customers in order that your products may have a ready market. Always have the best article and there will be no danger in regard to its disposition at a good remuneration.—Professor W. J. Kennedy, Iowa Experiment Station.

The Merino sheep industry in Vermont is again entering an era of prosperity that presages a boom. While by no means approaching the palmy days of thirty years ago, the industry is reviving and each year for a decade past has shown an increase in shipments of fancy strains of Merino breeding sheep to Africa and Australia.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

If cattle are to be finished during the winter season they must be fed a good ration of grain and roughage, the grain constituting a large part of the ration. If, however, they are to be finished on grass the following summer, it is better to feed during the winter, so that they will make very moderate gains and be somewhat thin, though in healthy condition. Cattle that have been wintered on a heavy grain ration do not gain well when turned out on grass in the spring.

Fairmont Hotel

Management of

Palace Hotel Co.

A Guarantee of Excellence

The only large hotel commanding a view of our incomparable bay. The best located hotel in the world, as it is the most convenient to the business centers, while its elevation affords wholesome advantages in the way of pure air, sunshine and the absence of all annoyances connected with the rebuilding of a great city.

BREEDER AND SPORTSMAN,
616 Golden Gate Ave.,
San Francisco, Cal.

DIVIDEND NOTICE.

THE SAVINGS AND LOAN SOCIETY,
101 Montgomery St., Cor. Sutter

has declared a dividend for the term ending December 31, 1907, at the rate of three and eight-tenths (3-8-10) per cent per annum on all deposits, free of taxes, and payable on and after Thursday, January 2, 1908. Dividends not called for are added to and bear the same rate of interest as principal.
EDWIN BONNELL, Cashier.

STAM B. PILLY FOR SALE.

A coming three-year-old, entered and paid up on in Pacific Breeders' Futurity and Stanford Stakes, sired by Stam B. 2:11½, dam Henrietta by Boodle 2:12¼; second dam Flora H., dam of Thompson 2:14½, and Bonetti (trial 2:14½); third and fourth dams by producing sires. Is now in Henry Helman's string at Pleasanton, where she can be seen. Trotted a mile in 2:50 as a two-year-old. An excellent prospect. For further particulars address HENRY HAHN, 2125 Buena Vista Ave., Alameda.

FIVE CHOICE HORSES FOR SALE.

Bay gelding (3) by Searchlight, out of La Muscovita, the dam of Yolanda 2:14½. This colt is a nice big fellow, 16 hands, and can trot a 2:30 clip.

Bay gelding (2) by Stam B. 2:11, out of same dam; a very handsome colt, that can beat a three-minute gait.

Bay gelding (3) by Searchlight 2:03½, out of mare by Director 2:17, that will learn to pace fast.

Billy B. (trial 2:13), brown gelding, by a son of Button, 16 hands, weighing 1100 pounds; a very nice horse.

August Baron (trial 2:15).
All of these horses are sound, thoroughly broke, in splendid condition, and can be seen at Pleasanton race track. Inquire there of G. H. FAEBEE, or JOHN GREEN, 1918 Steiner St., San Francisco, Cal.

"SAVE THE HORSE" SPAVIN CURE

Isn't This a Clincher?

Hartford, Conn., Dec. 2, 1907.
Troy Chemical Co., Binghamton, N. Y.
Gentlemen: Your SAVE-THE-HORSE is a wonderful discovery. It does more than you claim. A little over a year ago Saint Anthony (sorrel gelding) injured one of his tendons. It was the worst case I ever saw. He could not touch his foot to the ground for weeks. I had several veterinarians and they said he would never go sound. Knowing he was a good colt I meditated for a long time, reading all the advertisements for such cases, decided on SAVE-THE-HORSE, and to my surprise it cured him, so that I drove him in more races the past season than any other horse in my stable. He was six times first, nine times second, three times third, once fourth, and I gave him a record of 2:15¼ over half-mile track, and he is sound to-day.

PERCY BURNHAM,
96 New Britain Ave.
"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

THREE HIGH CLASS HORSES FOR SALE TO CLOSE AN ESTATE.

No. 1. Seal brown gelding, five years old, stands 16 hands, weighs 1,150 pounds. Sired by Direct 2:05½, dam by Guy Wilkes 2:12½; second dam by Chas. Derby 2:20. This horse has never been trained, but is a fine driving horse and can trot a 2:40 gait. He is in every respect a very handsome and desirable animal, in first-class condition, very kind and gentle.

No. 2. Bay filly coming three years old, stands 15½ hands, is a trotter. Sired by Greco B. 2:12½, dam by Poscora Hayward; second dam by Williamson's Belmont. She is a remarkably fine filly, gentle and kind, has been broken but four weeks, and think she can show a three-minute gait.

No. 3. Bay gelding, coming three years old, natural pacer. Sired by William Harold 2:13¼; first dam by Luster 2:22; second dam by Richard's Elector 2:17; third dam by Chieftain 721; fourth dam by Williamson's Belmont; fifth dam by imported Langford. Has been broken but two months, and shows great natural speed. Stands 15½ hands, weighs 1,075 pounds. Is developed like a four or five-year-old. Very handsome and in first-class condition. A real show horse, with the kindest disposition and every promise to become a great race horse.

None of these horses wear boots or straps. They are not afraid of anything on the road, and I will guarantee each one to be sound and without blemish. For particulars address or apply to

And winner of American Horse Breeder Futurity. It pays to book to such a sire.

When writing kindly mention this journal The Empire City Farms, Cuba, N. Y.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c. W. B. Eddy & Co., Whitehall, N. Y.

"LOOK FOR THE BIG RED W"

THE big red W is the connecting link between the consumer and the makers of Winchester goods. Over a year ago we adopted this safe-guarding trade-mark and since that time every box, carton and package put out by us has borne the big red W, the hall-mark of goods as perfect as brains, experience and ingenuity, coupled with a modern and complete plant, can make them. Our object in adopting this trade-mark was to make it easy to distinguish Winchester goods from other makes, which equal them neither in quality nor reputation, and thus protect you and protect ourselves. We have done our part. Will you do yours by looking for the big red W whenever buying anything in our line? The big red W is to guns, cartridges and loaded shells what the word "Sterling" is to silverware the world over. For your own protection we again ask you to "Look for the big red W"
