NORTH STAR 2:13½
By Nutwood Wilkes, Dam Ivaneer 2:27, by Engineer 20450.
Owned by J. B. Iverson, Salinas, Cal.

Starting Payments Due Aug. 4th, 1907

FOR TWO AND THREE YEAR OLDS

—in the—

Pacific Breeders' Futurity Stakes--4 and 5

For the Race Meeting To Be Held at

Santa Rosa, Aug. 14, 15, 16, 17, 1907

FUTURITY STAKE No. 4, \$6000 (For Three-Year-Olds) FUTURITY STAKE No. 5, \$7000 (For Two-Year-Olds)

ON 3-YEAR-OLD TROTTERS.....\$50 ON 2-YEAR-OLD TROTTERS.....\$35
ON 3-YEAR-OLD PACERS.....\$35 ON 2-YEAR-OLD PACERS.....\$25

Money Divided.

Money Divided.

\$2000 for Three-Year-Old Trotters.
\$1000 for Three-Year-Old Pacers.
\$200 for Nominator Dam Winner of Trot.
\$200 for Nominator Dam Winner of Pace.

\$1250 for Two-Year-Old Trotters.
\$750 for Two-Year-Old Pacers.
\$200 for Nominator Dam Winner of Trot.
\$200 for Nominator Dam Winner of Pace.

\$100 for Owner Stallion Sire of Winner of 3-Year-Old Trot When Mare was Bred
\$100 for Owner Stallion Sire of Winner of 3-Year-Old Pace When Mare was Bred

Nominators must designate when making payments to start whether the horse is a trotter or pacer.

Two-Year-Olds that start are not barred from starting again at three years old. Make payments to the Secretary.

E. P. HEALD, President. F. W. KELLEY, Secretary,

Gombault's Caustic Balsam

The Worlds Greatest and Surest

Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Caustery or Firing. Invaluable as a CURE for

FOUNDER,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENEY,
BONY TUMORS,
LAMENESS FROM
SPAVIN,
QUARTER CRACKS,
SCRATCHES,
POLL EVIL,
PARASITES.

REMOVES

BUNCHES or
BLEMISHES,
SPLINTS,
CAPPED HOCK,
STRAINED TENDONS.

SAFE FOR ANYONE TO USE.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

The Accepted Standard
VETERINARY REMEDY
Always Reliable.
Sure in Results.

None genuine without the signature of
The Lawrence-Williams Co.
Sole Importers & Proprietors for the
U.S. & CANADA. CLEVELAND, O.

NOTHING BUT GOOD RESULTS.

Have used GOMBALT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBALT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CHAMBER, Training Stables, 900 Jennings Street, New York City.

Gray mare, six years old, by James Madison; first dam Bessie Bell by St. Bel; second dam Belle B. by Belmont (son of Lexington); third dam Intallible by Lightning. See Bruce's American Stud Book. A very fast mare, can show now a half in 1:04 and a quarter very close to 30 seconds, trotting. Is not keyed up to a fast mile, but can convince any one she is a 2:10 trotter.

Also a bay gelding, five years old, by James Madison; first dam by Albert W.; second dam by Algona; third dam Mabel by The Moor; fourth dam Minnehaha. This horse has had very little work, but can show a half in 1:06 and is one of the best prospects in this country. Can be seen at work at Agricultural Park, Los Angeles, in charge of Walter Maen, or address

COLONEL WALTER TRACY CHESTER, the great-
est and most accurate compiler ever connected with
trotting and pacing statistics, is dead. Col. Chester
was on the staff of the American Horse Breeder of
Boston and was known to the readers of that journal
as "Griffin," over which name he wrote. His death
is a great loss, and his department will be greatly
missed by all turf editors and students of breeding.
The American Horse Breeder gives the following ac-
count of his life: "Colonel Chester was a native of
Buffalo, N. Y., where he was born in 1843. He gradu-
ated from Yale College in the class of 1861, and soon
after entered the Union army as captain in a com-
pany of the 94th New York Volunteers. He was
promoted through different grades, and was made a
staff officer with the rank of colonel. After the close
of the war, Colonel Chester entered the field of jour-
nalism. He was an expert statistician, and finally
became the editor of the Spirit of The Times. Later
he was connected with the Turf, Field and Farm,
edited by Hamilton Busbey, and contributed regularly
to the statistical departments of that paper. While
connected with the Turf, Field and Farm, he com-
piled the valuable work known as Chester's Complete
Trotting and Pacing Records, which was published
in 1884, and contained an account of all the principal
trotting and pacing races of America from the earliest
dates of trotting to the close of 1883. He continued
to issue a supplement every year, giving the result
of all the races of that year up to and including the
season of 1890. Colonel Chester was for a time lo-
cated at Middlebury, Vt., and assisted Joseph Battell
in compiling his works on the horse. During the past
two years he has been located at Hartford, Conn.,
and has had charge of the statistical department of
this paper. Griffin's Corner has been very popular.
Colonel Chester was of a genial disposition. He
made many friends and retained them. He will be
greatly missed and sincerely mourned. 'May his
ashes rest in peace.'"

THE OPPORTUNITY for the people of Yolo county
to bring a large number of visitors and tourists into
their section is offered this year by the assembling
of the Irrigation Congress at Sacramento during the
first week in September. During the last four days
of that week there is to be held at Woodland one
of the best harness race meetings of the California
Circuit. Of the several thousand people from all
parts of the United States who will attend this Con-
gress with their friends and families, a very large
proportion could without doubt be induced to join
an excursion to Woodland on one day of the meet-
ing. This excursion could leave Sacramento in the
morning, stop at Davisville, where the new State
Agricultural Farm could be inspected, and then
proceed to Woodland for the races and a horse pa-
rade during the afternoon. The possibilities of such
a day for Woodland and Yolo county are great, and
we do not doubt in the least that if the Yolo County
Board of Trade should take this matter up, that the
greatest crowd of people ever seen in Woodland
would result. All classes of people enjoy good con-
tests between highly bred horses, and the race meet-
ing at Woodland track would furnish them the chance
to indulge in this pastime. If it were known that
such an excursion was to be run from Sacramento,
the trains from all other points within a radius of
one hundred miles of Woodland would be crowded
with people anxious to be there on such an occa-
sion. Yolo never had such an opportunity to show
to "the wise men of the East" her beautiful vine-
yards, orchards, alfalfa fields and fine stock farms.
Let the Woodland business men and the promoters
of the fair and race meeting make an effort to have
Yolo Day made a part of the entertainment offered

the delegates to the Irrigation Congress and there is
not a particle of doubt but it will be accepted by
a very large proportion of those in attendance.

FIFTY YEARS is a long time for a breeding farm
to have been in existence in California, but such is
the record of the Howard Cattle Company, that began
breeding Shorthorn cattle in this State in 1857, when
it was established by W. D. M. Howard, so well
known to early Californians as the first president of
the Society of California Pioneers. Mr. Howard pur-
chased in New York in 1857 and brought to this
State the two cows, Miss Nightingale and Hopeful,
and the two bulls, Orion and Young Belvidere. Ever
since that importation the herd has been maintained
at a high standard and is to-day one of the best
in America. This company has just issued its semi-
centennial catalogue, an elegantly printed and beau-
tifully illustrated book of fifty-two pages, from the
Murdock Press. Persons interested in this grand
breed of cattle, who desire one of these catalogues,
should address the company at its main office, 641
Mission street, San Francisco.

THE REGISTRATION of every horse starting in
a pacing or trotting race should be compulsory. It
is the very best plan to catch the ringers and will
simplify matters greatly in compiling the breeding
register, as well as working good in many other ways.
All that is necessary to bring about this registration
is for the National and American Association to pass
a rule that before any horse can start on an asso-
ciation track a full description of the horse, with his
pedigree so far as known, shall be filed with a rep-
resentative of the two associations and that a list of
all horses so registered shall be printed every year.
A fee of one dollar required for each registration
would pay all the expenses. The next congress of
the two associations should provide for this.

MR. H. K. DEVEREUX of Cleveland is sending
out a neat little folder with the title, "How the Mc-
Kerrons Have Sold." The front page has a fine
half-tone engraving of the head of his noted stallion,
John A. McKerron 2:04½, while the inside pages
contain the pedigree of this horse and a summary of
foals by him that have been sold to date at auction
or private sale. It is a remarkable showing, as it
sets forth that two three-year-olds by John A. Mc-
Kerron have averaged \$3,755 each, six two-year-olds
\$2,233 each, and six yearlings \$825 each. A weanling
sold for \$260 at auction. The total for fifteen head
of McKerrons sold was \$25,160, and average of
\$1,677 per head.

THERE is in this office an autograph letter signed
"J. D. Carr, Salinas, Cal.," and addressed to Ben E.
Harris, Esq., San Francisco. Both these gentlemen
have crossed the dark river. The letter is of much
interest as it gives in Mr. Carr's hand writing, the
breeding of the stallion known as Carr's Mambrino,
and registered as Mambrino 1789, which reads as
follows: "Carr's Mambrino was by Mambrino Patch-
en, who was a full brother of Lady Thorn. Mam-
brino Patchen was by Mambrino Chief. Carr's Mam-
brino's first dam was by Mambrino Chief also; his
second dam by imported Jordan, third dam by Ber-
tram, fourth dam by Cherokee, the two last both
thoroughbred horses.

ALTHOUGH the season has only just opened in
the East, the ringers are beginning to appear and
a half dozen horses have already been held up for
identification. California has never been troubled
with this evil to any extent, but secretaries should
keep their eyes open, and see that each horse is fully
identified before permitting him to start. About the
only possible chance to get in a ringer here in Cali-
fornia, where all the horsemen know each other and
the horses in training, is by bringing one from the
East, as was done in the famous Walter K. case.

THOSE WHO ATTEND the race meetings at Santa
Rosa and Petaluma next month will have a chance
to compare California and Missouri starting methods.
Ed. R. Smith of Los Angeles will do the starting at
Santa Rosa, while H. E. Woods of Missouri will say
the word at the Petaluma meeting. Mr. Woods is
said to be one of the best starters in the middle
West and has done the starting on the North Pacific
Circuit for the past three years.

GOOD HAY is selling loose in the fields in the
vicinity of Salinas and Hollister for \$9 a ton, and

the baled article is bringing as high as \$13 there.
Still the difference between that price and the \$21
to \$25 per ton asked in San Francisco seems more
than a fair profit requires.

THE BEGINNING OF THE SEASON.

The trotting season has just commenced and in a
few weeks will be in full swing. Would it not be
well for the officers of the various trotting associa-
tions to go into committee and discuss the important
subject as to how they can make their meetings
more popular with the general public. It can be laid
down as a fundamental fact that the lack of atten-
tion to details and the want of punctuality in the
conduct of light harness racing are the principal rea-
sons for the light attendance. There are other
causes and we will therefore refer to a few points
which require the most careful attention of the race
track manager or secretary who really wishes to
make his meeting popular with the public.

We shall assume in the first place that he has
arranged a liberal program of purses and secured
good entry lists in all the classes. There will be
good fields of horses in every race. The next im-
portant matter is the selection of the occupants of
the judge's stand and the starter. Upon that to a
large extent depends the success or failure of the
meeting. Fortunately of late years all associations
of any importance employ a professional starter, who
must be licensed by the parent association, so that
now we have a reputable number of men of honesty
and ability who when the horses come under their
jurisdiction can attend to their duties. We regret
to say that the judge's stand, with the exception of
the Grand Circuit and a few important meetings, is
still in the same position it was since the year 1812.
The amateur judge is still to the fore. As there is
no rule compelling the appointment of a paid presid-
ing judge, the vigilant and wide-awake secretary who
wishes to avoid had decisions and subsequent pro-
tests with ultimate expensive appeals to the boards
of review will look very carefully around and select
the very best man who is acquainted with the rules
and knows the horses, to fill the place. If he suc-
ceeds he is a very lucky man.

But when he has got his presiding judge and
starter he will be wise if he impresses upon them
the absolute necessity of getting the horses out on
time, starting on time, avoiding all long scoring and
so pushing the card through that there are no tedi-
ous waits between heats and that the card is com-
pleted before 6 o'clock. How often when the first
race is announced to begin at 2 o'clock is the starting
bell sounded at 2:30 and it is 3 o'clock before the
first heat is in progress, with the result that the
last heat is decided near sundown with one or two
races unfinished. In the meantime from 5:30 there
has been a steady stream of spectators from the
grandstand homeward bound and when the last
heat is over, only the track officials, the trainers,
owners and drivers and a few regulars are there to
hear the old announcement "the unfinished races
are postponed till to-morrow, when racing will begin
at 1 o'clock sharp." No manager of a theatre could
announce his curtain to rise at 8 o'clock and keep
the audience till 9 and then at 12 o'clock state that
the last act would be given the next evening. Our
baseball contests and every other game and sport
are governed by commonsense time conditions and
that is the reason the public go to see them. As
soon as our trotting managers follow these obviously
good examples the public will come and also stay.
If the programmes are long and the fields large then
associations should follow the wise example of the
Kentucky Trotting Horse Breeders Association and
start racing at 1 o'clock prompt, bring out every
field for the heats to the minute and thus be able
to get a big programme of four races through in
time to send the spectators home in good time for
dinner. With the average public trotting sport is a
pastime, not a study, and like all other amusements
it must fit into the time which the public is willing
to spend on it. The thoroughbred people under-
stand this perfectly. They charge \$3 admission, yet
they get the crowd, but to the second the races start
at 2:30, the last race starts at 5:00 and the vast
crowd is at home by 6 o'clock. One more important
point, the programmes. The average score card is
jumped together in the most careless manner, and is
almost unintelligible to the average spectator. In
the first place the breeding of the horses is seldom
mentioned; color and sex are often, if noted at all,
inaccurate; if the colors of the drivers are taken
notice of they are often wrong, and to crown the
comedy of errors the owners of the horses are named
instead of the drivers. A thoroughly vigilant secre-
tary will see to it that the public gets a programme
with which it can identify the horses and drivers
when they come out on the track; then it can in-
telligently enjoy the race. How often do we hear
the question: "What horse is that in front?" even
on a half-mile track, when the horse and driver are
in plain view. The great national sport is handi-
capped by slipshod methods. With good procedure
and quick, snappy racing and the same attention to
time which the American public demands not merely
for its amusements but from its railroads and busi-
ness engagements there is every reason to believe
that the trotting tracks would attract full grand-
stands and a crowded attendance.—Sports of the
Times.

IN TRAINING AT SALINAS.

Many Good Trotters and Pacers That Will Race on the Circuit.

One of the few district agricultural associations in California that has refused to be put out of business because an appropriation was not awarded it by the State is the Monterey Agricultural Society, whose annual fairs have been held at Salinas for many years past. For a long period the late Jesse D.

SIDONIS.

Carr, known to every stock breeder on the Pacific Coast from Seattle to San Diego, was the president of this organization, and at his death a few years ago, Mr. J. B. Iverson, a pioneer resident of Salinas and one of Monterey county's foremost citizens, succeeded to the presidency and still fills that responsible position. With an excellent board of directors and an efficient secretary in the person of Mr. J. J. Kelly, to assist him, Mr. Iverson has in recent years been the leading promoter of the Monterey County Fair, which has given a most creditable live stock exhibit and race meeting every year since the State appropriation was cut off. The citizens of Salinas, recognizing that a county fair is of great benefit to the town where it is held and to the county in general, have been very liberal supporters of the enterprise, for which the Board of Supervisors of Monterey county with wise foresight and good judgment appropriates a goodly sum to be used in giving premiums for live stock and other exhibits.

The Sherwood Park track, one mile from Salinas, where this annual fair is held, is a fine tract of land on which there are numerous excellent stalls, a good grandstand and other necessary buildings, and one of the best training tracks on the whole Pacific Coast.

The track is a mile in circumference, built in regulation manner, and is now under the management of the well known trainer and leading Futurity winner, Mr. Chas. Whitehead, formerly of Stockton. Mr. Whitehead has been the lessee of the Salinas track for three years, during which time he has trained and driven two winners of the Pacific Breeders' Futurity for three-year-old trotters, two winners of the Occident Stake, one winner of the Stanford Stake and two second money winners of the two-year-old trotting and one third money winner of the three-year-old pacing divisions of the Breeders' Futurity. This is a record for any trainer to be proud of, but Mr. Whitehead modestly says that he could not have been so successful had he not been fortunate enough to have such good colts and such an excellent track to train them on.

Salinas track at the present time is in splendid shape. It is well taken care of every day, the work is not slighted and plenty of water is used, until the surface is just right for training purposes. The track is not kept fast, but perfectly safe, which is better, and while late harrows are set to cut a little deeper than they would were it race week, the footing is moist and springy underneath and does not break away under the feet of the fastest horses worked over it.

The climate of Salinas valley could not be improved on. Far enough from the Coast to escape the fogs, it is yet near enough to have the sea air keep the temperature many degrees below the intense heat of the big interior valleys of the State. There is plenty of sunshine in the day, but the nights are cool and delightful.

The track is one of the most neatly kept that we have visited in California. Around the stalls the ground is kept clean and well sprinkled, as are all the roads and walks on the premises, while the county roads leading to it are kept in the same condition.

At the time of the writer's visit to this track, on Saturday, June 22d, there were four trainers working horses there—Chas. Whitehead, who has the largest string; W. H. Williams, formerly of San Jose; W. H. Combs, who recently came there from Hanford, and Russell Gray of Irvington.

Mr. Williams has eight head in his string, headed by the bay stallion Sidonis, by St. Nicholas, son of Sidney, owned by Mr. C. J. Caplatzi of Santa Cruz. This horse under Mr. Williams' training, has developed into one of the most promising trotters in California and two weeks ago trotted a mile in 2:12½, with the last quarter in 31½ seconds. This being some for a green trotter, but Sidonis has reached the limit of his speed by considerable,

and every horseman at Salinas looks upon him as a 2:10 trotter this year. He is out of Hagar Wilkes, an eleven-year-old mare, whose colt was taken from her last year in August that she might be given a few weeks' training for a record at the Salinas fair. She made the mile in 2:29¼ at the first attempt, and two days later worked a mile in 2:26. Sidonis is a very stylish trotter, good headed and good gaited, with plenty of knee and hock action, although he wears but five-ounces in front and three behind. He is well entered on the California Circuit.

A brown mare by Wild Nutting, out of a mare by a son of Geo. M. Patchen Jr., is owned by James Smith. This mare has been a mile in 2:20, with the last quarter in 30½ seconds. She is considered one of the most promising trotters at the track, as she is a green mare and her speed is natural.

Peter Thompson of Watsonville has placed in Mr. Williams' hands a three-year-old filly by Boodle 2:12½, out of an Electioneer mare. She has shown a mile in 2:35 after two months work, and looks like a good prospect.

Kermit by Henry Nutwood, dam by Wild Boy, is owned by Frank George of Santa Cruz. He has trotted a mile in 2:18 and been a half in 1:05. He will be seen in the 2.24 trot at the Salinas meeting this month.

Diabull is the name given a Diablo pacer with Blue Bull blood on his dam's side that Williams is training for W. Griswold of Los Gatos; 2:12 is the fastest mile Diabull has shown to date, which he did nicely. A good looking bay gelding that will not be raced is also owned by Mr. Griswold. This horse has trotted a mile in 2:23. Harry Cowles owns a three-year-old pacer by Royal Sid, out of a Nutwood Wilkes mare, that is not staked and will not start this year, which is unfortunate, as she is very promising and has shown a mile in 2:21 with very little work.

Mr. Williams had just received a nice three-year-old filly from Louis Estabough of San Jose that he will give some work during the summer. She is by Chas. Derby, out of a mare by Brown Jug, and acts like a trotter.

Mr. W. H. Combs, a young trainer from Hanford, has only been at Salinas a few weeks, but he has been able to show the boys a high rate of speed

ALBERT DIREDA.

with two good pacers, the only horses in his string. He has the hopped horse Doctor W. 2:08½ by Robert Basler, that Mr. I. M. Lipson has leased and will race in the 2:08 class through the circuit. The horse looks to be in fine shape and shows as much speed as he ever had.

A pacer that fills the eye, however, is the three-year-old Albert Direda, that is entered in the Breeders' Futurity, and if no accidents happen should be able to get some of the money, no matter how fast they go, as there seems to be no limit to his speed. As will be seen by the picture accompanying this article, he is almost a model young horse. He is of the Direct type and while not yet keyed up for fast miles, has shown quarters at a two-minute clip and an eighth in 14½ seconds. On his breeding he should be able to go the route and be in at the finish in split heat races. His sire is Robert Direct, son of Direct 2:05½, and Daisy Basler by Robert Basler. His dam is Ida May (the dam of Homeward 2:13¼, the sire of George G. 2:05½) by Grosvenor 1833; second dam Susie K. by Alaric, son of thoroughbred Hercules; third dam Fashion by Jack Hawkins, sire of the second dam of Direct 2:05½. His breeding, like his looks and gait, can hardly be improved upon for a racing pacer. Mr. Combs has him in fine shape, and the colt is as sound as a new dollar.

Russell Gray, the colored trainer, has but two in his stable, both trotters. The trotting mare Ollie B. 2:26¼ by Nutwood Wilkes, owned by Mr. O. C. Benbow of Irvington, was worked out while we were at the track. She is improving greatly at every trial, and on Saturday did her heats in 2:25½, 2:21½, 2:20¼ and 2:17½, going good gaited and having a reserve of speed.

A two-year-old filly by Nutwood Wilkes out of a Piedmont mare, owned by Thos. Coram of Newark, is moving nicely and has been a mile in 2:48, with a quarter in 38 seconds. She is in the Breeders' Futurity.

Chas. Whitehead's string is a large one, but all are not in training for the races this year.

For Mr. J. B. Iverson he is training the reliable money-getter Princess 2:13¼, by Eugeneer, a two-

year-old trotter called Ernest S. by Scott McKinney out of a Diablo mare, and the five-year-old gelding North Star 2:13½ by Nutwood Wilkes. Princess has been a mile in 2:17 this year, is in good shape and doing all she is asked to. The two-year-old is just beginning to learn the game and outside of being a little too anxious at the start is showing an excellent way of handling his feet and looks as if he might make a very fast trotter. He is out of a Diablo mare and will be a good sized horse.

North Star never looked better than he does now. His coat is as smooth and slick as a mole's, his long legs clean and hard and he likes to trot. As those who saw him as a three-year-old when he won the triple crown of California trotting stakes, the Futurity, Occident and Stanford, he has, what some writer has asserted no champion trotter ever lacked—a great shoulder. His withers are so high and his shoulder muscles so large and prominent that at first glance he lacks development behind, but while he is not a heavily quartered horse, there is nothing lacking except by comparison with his foreband. His bone is a trifle light for so tall a horse, but is of the fine, clean texture of the thoroughbred. When he won the Futurity at Santa Rosa with two heats of it in 2:13½ some of the horsemen said he was too big gaited and would tire in a long race. Two weeks after this he won the Occident Stake at Sacramento over a new track that was deep and dusty and considered three seconds slow by every trainer who drove over it. After losing three heats by bad breaks at the start, although a close contender in each finish, he won the fourth in 2:15½, the record for the stake, and won the sixth heat in 2:18, really a marvelous showing for a three-year-old. North Star has more speed than ever. The other day a friend of Mr. Iverson sent him word that North Star would have to step to win the 2:14 trots this year, as a mare entered in them had worked a mile that day in 2:14½ at Pleasanton. As Mr. Iverson had seen North Star work the day before and timed him a mile in 2:11¾, with the last quarter in 31 seconds, he was not much worried over the news from Pleasanton.

For Mr. C. J. Herbert of Salinas, Whitehead is working Louisa A. 2:19¼ and the brown four-year-old mare Elaine, that is by Robin out of the dam of Louisa A. Both these mares are pacers, but a two-year-old brown gelding by Delphi 2:12¼ from the same dam is a trotter and a nicely gaited one at that. Elaine and Louisa A. will be seen in the races this year.

There are two trotters owned by John Rowan of Stockton in the Whitehead stalls. One is the McKinney stallion Mechanic, the other his sister, Belle McKinney. They are out of Mission Belle. Mechanic has shown great speed, but is now temporarily disabled and may not start this year. He has been used in the stud and his colts are quite promising.

Two other Stockton-owned horses are the six-year-old black mare Belle W. by Delphi, owned by A. W. Cowell, and Babe, a black gelding by Delphi, owned by F. W. Foley. Belle W. has shown Whitehead a mile in 2:16¼, and an eighth faster than a two-minute clip, having worked that distance in 14½ seconds. She is on the "long-and-low" order and looks to be a most excellent prospect. Babe has shown better than a 2:30 gait with little work, in fact, has been a mile a few seconds faster than that.

A good looking colt is a two-year-old by a son of Strathway out of a mare by Robert Basler. He is owned by Jack Muer of Salinas and is a trotter.

Editor M. J. Smetzer, who edits that newsy paper, the Salinas Daily Journal, and is a great lover of the harness horse, has his horse Dictatus S. 2:27¼ in training under Whitehead's care. This horse is out of a mare by Brown Jug and is in a fair way to lower his record considerably before the year is ended. A two-year-old by Delphi out of a Brown Jug mare is also a good prospect.

Chas. Callahan's chestnut three-year-old colt by Robin, dam by Brown Jug, has trotted a mile in 2:36, with the last quarter in 36½ seconds and is improving right along.

Alfred, a nice large gelding by Clay S. 2:13¼, is

RAY O' LIGHT.

another good trotting prospect. He is owned by Mr. William Hendrickson of San Francisco, one of California's pioneer horsemen. Alfred is a trotter and is working miles between 2:30 and 2:40.

One of the most promising two-year-olds in the country is Ray O' Light, a brown colt by the great

Searchlight 2:03½. This colt was bred by Ray Mead of Hollister and sold to Mr. E. H. Train, who now owns him. Ray o' Light is very much like his sire in appearance and has that determined way of going. He has race in his head, and is ready and willing to try conclusions with any horse that comes alongside him on the track. He is in the Breeders' Futurity and will make a good showing, barring accidents in the meantime. Ray o' Light is out of Carrie B. 2:18 by Alexander Button; second dam Carrie Malone, an own sister to Klatawah 2:05½, Chas. Derby 2:20, etc., by Steinway.

Mr. Whitehead recently received from Geo. Erlin, proprietor of the Dexter Prince Stables in San Francisco, the gelding Topsy 2:10 by Delphi. Whitehead sold Topsy to Mr. Erlin some time ago, and the pacer was used on the road and Park Speedway. Whether he became sore or did not like city life is unknown, but Topsy would do nothing but trot while in San Francisco, so Mr. Erlin concluded the horse's old trainer might coax him back to the lateral gait. Topsy stuck to the trot, however, and we saw him work a mile at that gait in about 2:50, and he was a good gaited trotter. He had undoubtedly become sore on the San Francisco roads, and Whitehead thinks that a week or so at pasture will be all that is necessary to bring him back to the pace, at which he is one of the sweetest drivers any person ever sat behind.

The stallion Delphi 2:12½ never looked better than he does now. He has made quite a season, and some of the best mares in Monterey county have been bred to him. Mrs. Whitehead uses him for a buggy horse whenever she wishes to go to town, and he is an ideal lady's horse, perfectly reliable anywhere and afraid of nothing.

A two-year-old black filly out of The Mrs. and a yearling out of Nina B. by Electioneer, both bear strong resemblance to Delphi, who sired them. They are being handled a little, but will be turned out soon to run another year.

The Mrs., still unmarked, is in training again and looks as if she might do this year. She has paced some very fast miles in some of her races in the past but always happened to meet horses that were faster, consequently was never able to get a record.

Mr. Whitehead's horses all look as if they were well cared for, and one of the noticeable things at this track was the absence of ailing horses, or those with bad legs. This speaks well for the condition of the track.

Ex-County Clerk J. D. Kaler goes to the track often to work a couple of youngsters he has there. One is a three-year-old by Searchlight out of a Boodle mare, the other a yearling by Delphi. The three-year-old paced a mile in 2:21 for him and is a nice prospect. Mr. Kaler greatly enjoys driving and can "team" a fast one with the best of the amateurs.

After inspecting the track and the horses, the Breeder and Sportsman representative enjoyed a ride with President J. B. Iverson behind a Nutwood Wilkes mare, and was shown over the Iverson farm, where the great Futurity winner, North Star, was foaled. In one of the fields about sixty head of splendid grade Shorthorns were feeding on the rich pasture, nearly ready for consignment to the butcher. The horses, of course, interested us most. The old stallion Eugeneer 2:04½ by Electioneer out of Lady Ellen by Carr's Mambriano, second dam by Owen Dale, son of Williamson's Belmont, is now twenty years old, having been foaled in 1887. He looks younger than his years and is a very vigorous horse. Eugeneer's daughters are very highly prized as broodmares by Mr. Iverson and he expects to raise a few more North Stars from them. Ivener 2:27, dam of this horse, is at present at Nutwood Stock Farm, where she is being bred to Nutwood Wilkes again. A couple of yearling colts, one by Coronado 2:09¾, the other by Lecco 2:09¾, were shown, and are both very fine lookers. The Coronado colt is a hay and has little more finish than the Lecco colt. He is bred on his dam's side almost exactly like Sweet Marie. Old Prince Gift 2:12 has been in training for the races, but struck his knee pretty badly, and while not lame, is not being driven much. A full sister to Dictatress 2:08¾ is not a bit like that sweet little pacer, except that she is a lateral gaited one also. She is much larger and rather coarse, the Red Wilkes traits probably predominating.

In a paddock was the yearling full sister to North Star. She is a twin. Her twin brother was foaled dead, and was not fully developed, having died from some cause, probably quite a while before foaling. Ivener began "making bag" several weeks before she was due, and in Mr. Iverson's opinion this was the result of the colt foal dying. When the filly was born she was not able to stand, the bones in her legs being so soft and her tendons so weak that her feet folded over when she tried to stand. Her owner had her lifted up, however, so that she could nurse her mother, splints were put on her ankles, but they did not seem to do any good, but with constant care and attention she finally, after several weeks, was able to stand. She is now a good looking filly, with an awkward walk that shows her limbs are still a little weak, but when not moving looks as well developed and as straight as any filly of her age. She is not deformed in any way, and but for the pre-natal death of her twin would doubtless have been foaled a strong, healthy filly. She is a pacer and can outstep all her mates in the field at that gait. Mr. Iverson intends using her as a broodmare, knowing there was nothing of a hereditary nature in her affliction.

Among the many former acquaintances we met at Salinas was Mr. J. W. Anderson, who bred and still

owns the Futurity and Occident winner of 1906, Della Derby 2:17. He is breeding her dam, Nora D. 2:23¾ by Del Sur, to Bon Voyage 2:12¾ this year, and a letter from Mr. Gerrety conveyed the good news that he was quite certain Nora was in foal. The old mare is now just twenty years old, and since foaling Della Derby has missed every year, so the news that she is safe to such a grandly bred young horse as Bon Voyage was very pleasing to Mr. Anderson.

The business men of Salinas are giving the coming fair and race meeting their hearty support, and on the day of our visit Mr. Iverson had the neat sum of \$1,690 subscribed to the fund for its aid by them. The Salinas valley is one of the most productive in the State, and the crops of hay, grain and sugarbeets harvested there are enormous. The big Spreckels sugar refinery is only a short distance from the town and turns out thousands of tons of sugar every year.

Several good hotels in Salinas offer excellent accommodations to the traveling public, the Bardin Hotel, conducted by mine host, Lapierre, and especially popular with horsemen, and the Abbott, one of the best hostleries to be found anywhere, being the leading houses.

For a few days' outing, to be combined with the pleasure of harness racing with the best and fastest

BELLE W.

horses in the State competing, the Salinas meeting, which opens on Wednesday, July 24th, offers an opportunity that should be embraced by every person who can spare the time to attend.

MATINEE RACING AT SEATTLE.

A perfect day and a fast track at the Meadows, the beautiful racing plant near Seattle, enabled the Speedway Club of that city to give some excellent racing on the afternoon of Saturday, June 22d. Six harness races were on the card, together with a number of pony races, and dashes for saddle horses.

The star of the matinee was the trotting mare Lady D., that won both her races, splendidly driven by Mr. C. A. Harrison, formerly of Victoria, but now of Seattle. Mr. Harrison is an excellent reinsman and his driving came in for many complimentary remarks from the horsemen present. Lady D. came out of a livery stable cold and never had a day's training, nor had Mr. Harrison ever driven her before. She is an eight-year-old brown mare by Tyeo, by Connaught, and her dam is Lady Mack 2:23½ by Lemont. She won both her races in the same notch—2:28½—and is certainly a good one. She is the dam of a nice colt by Meteor. If regularly trained Lady D. should be able to win on the regular circuit in fast company. In the free-for-all she beat Kinmont 2:24½, reckoned one of the best trotters in Seattle. Kinmont was driven by Mr. A. T. Van DeVanter.

All the races were well contested and furnished excellent sport. Results:

Trotting—Doc McKinney won, Texas second, Gray Ghost third. Time—2:30.

Pacing—Nome Duchess won, Bob Fitzsimmons second, Billy Yerkes third. Time—2:30¾.

Trotting—Lady D. won, Peanuts second, Altho third. Time—2:28½.

Pacing—Julius Riddell won, Nome Duchess second, Dick third. Time—2:33½; first half in 1:07.

Team Race, Half-Mile—Fad and Fancy won, Nauskatie and Babe Meade second. Time—1:30.

Trotting—Lady D. won, Kinmont second. Time—2:28½.

There is a good string of race horses working out on the Hudnut Park track at Bakersfield these days in preparation for the races on the Fourth. On Sunday William Baker's pacer Ferndale was paced around a half in 1:10, which is record time for the track. Ferndale is entered in the 2:20 class, and may be able to clip a second or two from this time when the track is in better condition. Ferndale has so far proved to be the best pacer on the track. Baker will not enter this animal against Richard B., however, and it is probable that the Sears horse will be put upon the track with a couple of runners to establish the track record. Other harness horses which are being worked out at the track are Tom O'Brien's May Hogan, Tom Klipstein's Maud, Joe Yancey's Blue Dick, Baker's pacer Vernon B. and Austin's oil fields pacing gray mare.

WHERE TROTTING HORSEMEN FAIL.

The greatest drawback to the general, rapid and universal popularity of the American trotter is the neglect of the public show ring by trotting-horse breeders and trotting-bred interest promoters.

The quickest, cheapest and most direct route to public favor for any special breed of live stock or domestic animals is through the publicity of the public show rings. Breeders, registry associations and other promoters of public favor for breeds of draft horses, imported coach horses, cattle, sheep, hogs, fowls, etc., have long ago recognized this fact, and have greatly profited thereby. Importers and breeders of draft and coach horses have always made a specialty of the show ring, and the register associations of the various breeds of draft and imported coach animals, as well as State and other breeders' associations of these breeds, are ever in evidence with special premium offerings at leading State and other fairs for the class or breed which they are engaged in seeking to make and keep popular with the general public.

Breeders' associations, register associations, etc., of the various breeds of cattle, hogs, sheep, etc., do the same thing, but nothing of the kind is ever done by this same class of promoters of popularity for the American trotter.

No one ever heard of the American Trotting Register Association—composed of trotting-horse breeders though it is supposed to be—contributing a single dollar towards a special prize for any special class or classes of standard-bred horses at any State or other fair, nor of either the American or National Trotting Associations contributing a cent towards any special prize in a trotting turf event.

These associations, posing as promoters of the trotter, seem perfectly content to gather in the shakels coming their way in the form of fees, i. e., promoting their own financial interest instead of promoting the interests of the trotter and his breeder. They don't even seem to care to go to the trouble of boosting their own game by promoting the interests of the game on which they themselves feed. For instance, the greater number of trotters registered in the American Trotting Register, the better it is for the association—and really every one else at all connected with trotting-horse breeding.

By distributing a few special prizes through the various leading State fairs for certain classes of standard and registered horses, only those registered being eligible to show, the Register Association would not only very materially increase registration, and hence profits, but the whole trotting horse breeding industry would be benefited by the increased registration, and the trotting breed would gain much general popularity through such extra public exhibitions. It is not so much what a horse can actually accomplish in the special line for which he is bred that brings him public favor and admiration, as it is his beauty, grace, grandeur and general attractiveness when led or driven into the public show ring.

The draft horse's "strong point" is his strength, yet it is not his strength, but his physical grandeur in the show ring, which adds most to his general popularity. The same is true of the various breeds of imported coach horses. They make their grand conquests in the show ring, as a rule, to rein, not to coach or carriage, and are exceedingly pleasing to the average eye when fitted for the show ring—and "fitted for the show ring" means a lot. With the regular and special prizes offered these breeds, exhibitors can, and do, put them in the best possible show ring form and condition, and here is where they "win out" with the general public. They are, to the average spectator, the most attractive horses which appear in most show rings, because they are in the best show ring condition. Put the trotting breed in show ring condition, and there is not a breed of horses on earth which can show with them or that could get a "look in," when it comes to the matter of public favor and admiration. Draft and imported coach horses which are used for show purposes are not, as a rule, used for any other purpose, and hence are fat, slick, shiny and beautiful.

On the other hand, owing to the general lack of interest in the matter by those who should be trotting-breed public-favor promoters, the average show ring trotter is a finely drawn, coat-burnt, booted-up track trotter or an everyday road horse—which is entered merely to "hold a stall!" Fine feathers may never make a fine bird, but a crow all "togged up" in the plumage of the "Bird of Paradise" would have a lot of admirers. Fat and a shiny coat cover a multitude of homely angles in many imported heavy harness horses, and the lack of these makes many a high-class trotting-bred horse "look cheap."

Give the trotter and trotting-horse owners and breeders the aid and encouragement in the matter of making public exhibitions that owners and importers of the heavier breeds are given, and on his show ring merit the American light harness horse, as well as the American coach horse, will gain immeasurably in public favor. Even without any of the aid mentioned, trotting-bred breeders should devote much more attention to the matter of show ring exhibits of their stock. It would be money in their pockets to do so, both directly and indirectly.—Westrn Horseman.

California's favorite hot weather drink is Jackson's Napa Soda.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Salinas	July 24-27
Pleasanton	July 31-August 3
Breeders' Association (Santa Rosa)	August 14-17
Petaluma	August 26-31
Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair)	September 23-28
Spokane, Wash. (Inter-State Fair)	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

W. A. Clark Jr. now owns Myrtha Whips 2:09 and her colt by Zolock.

Dredge, the James Madison trotter that won his first start at San Diego and trotted the third heat of the race in 2:14½, is owned by Mr. Loftus, who purchased him the first of last month from Frank Wright of Sacramento. Mr. Loftus also owns the good green trotter Zomont.

Prince Herschel 2:13, an American bred stallion, now owned in Italy, was sired by Herschel, a son of Belmont 64, that was out of a mare by Edwin Forrest. Prince Herschel's dam was by Princeps, and his grandam by Volunteer, so the Hambletonian blood in him is very strong. He was mated with a mare by the English thoroughbred stallion Sunderland after reaching Italy, and the result was the colt now known as Principe, and one of the best three-year-old trotters in Europe.

The crop of two-year-old trotters in the East is said to be one of the largest in years. This comes from there being so many stakes with two-year-old divisions provided for. Money makes the colt go as well as the mare.

The Los Angeles contingent will fill about three cars with trotters and pacers when they start north next week. They will doubtless follow their established custom of taking home a good share of the money at the close of the season.

There are some who think that if Highball and Sonoma Girl are beaten in the \$10,000 trot at Detroit it will be owing to the fog, as the mare Sadie Fogg, entered in this event, is moving like a candidate for 2:04. She is now a five-year-old and is credited with working a mile in 2:09¼ as a three-year-old.

Highball trotted a workout mile in 2:07 last week. No wonder he is favorite for the M. & M.

Sonoma Girl's lameness is reported to have left her and she is stepping to suit those who are backing her for the M. & M.

The Sidney Dillon pacer, Custer 2:05¼, is showing so much speed and acting so well this year that two minutes is now being set for his record this year.

The meeting at Salinas opens July 24th and continues four days. Pleasanton's meeting is during the following week, racing to begin there on Wednesday, July 31st, and closing Saturday, August 3d. Two weeks will intervene between this and the Breeders' meeting at Santa Rosa. Here is a chance for Vallejo and Concord to hold racing. If each will hang up purses of \$200 or \$300 for a two or three days' meeting, and advertise the fact immediately, they can get plenty of horses and good crowds to see them race.

Much interest is being centered in the two-year-old events on the California Circuit this year. While the last payments in the Pacific Breeders' Futurity are not due yet, several two-year-old purses have closed with fair entry lists, showing that quite a number of colts and fillies of this age are in training. No less than fourteen two-year-old trotters are named in the \$1,500 purse for this class at Petaluma. Nearly all of them are eligible to the Breeders' Futurity, which will be trotted at Santa Rosa a week prior to the Petaluma meeting. There are eight fillies, four colts and two geldings entered in the Petaluma race as follows: Fillies—Bessie T. by Zombro, Rose Lecco by Lecco, Memonis by Demonio, Birdie by Alta Vela, Miss Lloyd by Rohin, Idolway and Miss Stoneway by Stoneway, and Anjella by Prince Ansel. Colts—Sista by Iran Alto, Del Oro by Demonio, Kinney Back by Kinney Lou and Musado by Nush. Geldings—Boaz G. by Greco, and California Coronado.

Ben Kenney will drive the Crabtree horses the coming season. Among those he will have charge of will be Nut Boy 2:07¼, My Star 2:03¾, Princine 2:45¼ and the crack green pacer Hal Direct.

Mainland 2:09¼, the great trotting stallion, died at Terre Haute two weeks ago of inflammation of the bowels. He was owned by W. P. Ijams of that city, who had refused \$17,000 for the horse. Mainland was sired by Axtell, dam Princess Mahel, by Kentucky Prince, and grandam Lady Rysdyk, by Hambletonian. He was foaled in 1889, and he took his trotting record of 2:09¼ at Columbus, Ohio, September 21, 1905.

Dad Trefry's Kenneth C. (3) 2:17 has been well entered on the circuit. His first start will be at Pleasanton. This son of McKinney should take a record close to 2:10 should he be returned a winner.

Prof. Heald 2:24½, winner of last year's Stanford Stake, is being entered on the circuit this year by his owner, Mr. Thos. Smith of Vallejo. He is in the 2:24 trot at Woodland, where he will meet some of the best aged trotters out this year.

Vallejo Girl 2:16¼, winner of the green trot and the \$1,500 purse for 2:24 class trotters at the State Fair last year, is getting down to racing form at Pleasanton under Patsey Davey's good care and training. She trotted a mile in 2:14 one day last week, and it didn't seem to bother her much.

The showing made by the trotter Burnut by Neerut in the 2:20 trot at San Diego was a good one. He was driven by his owner, Mr. George W. Ford of Santa Ana, who makes no claims to being a reinsman, while Dredge was driven by Will Durfee, a past master in the art. Burnut drove Dredge out in every heat and each was faster than its predecessor. In the last heat Burnut forced Dredge to trot the mile in 2:14¼ to win, a fast mile for the first race of the season. Burnut is undoubtedly a faster trotter than he has been given credit for being and should be trotting in 2:10 before the summer is over.

By the performance of the James Madison gelding, Dredge, at San Diego it looks as if he would be a hard one to beat in any of the races where he is entered. He is in the 2:24 trot at Salinas.

Prince Gift 2:12 struck his knee the other day and may not start in the 2:10 class at Salinas, but Coronado 2:09¼, Adam G. 2:11¼ and Princess 2:13¼ should make a race worth looking at.

The Woodland track record is 2:06¼, made by the pacing mare Miss Logan on September 4, 1902, when she beat Kelly Briggs, El Diablo and Topsy three heats in 2:07½, 2:06¾ and 2:06¼. That record will be in danger when the 2:08 pacers line up for the money at the meeting this year. Ten high-class side-wheelers are in this event and with a fast track a heat in 2:05 is not improbable. The horses entered are Kelly Briggs 2:08, Dr. W. 2:08¼, Daedalion 2:08½, Miss Georgie 2:08½, John R. Conway 2:09, Deliah 2:09¼, Miss Idaho 2:09¾, Sir John S. 2:10¼, Cresco Wilkes 2:10¼ and Memonio 2:14½. As all these horses are seasoned campaigners and were in good shape June 17th, when the Woodland entries closed, the probability is that nearly every one will start in the race. There will at least be a field of six or eight, and when they score for the word and get it, a sight worth seeing will be in store for all who are fortunate enough to be there.

Easter Direct, the mare by Direct out of Cleo G. by Yosemite, that was credited with a trial mile of 2:03¼ at Lexington last year, is being trained at Readville this season and two weeks ago paced a mile in 2:14½ with the last half in 1:05¼.

The famous Madison Square winner, Drummer Boy, owned by M. H. Tichenor & Co. of Chicago, will be sent to the Iowa State Agricultural College, at Ames, for a couple of months. While there he will be bred to some high class mares for the production of some heavy harness horses. Drummer Boy has sired some very fine specimens of this class and is a standard bred trotter, having been sired by Equity, dam Bessie by Messenger Duroc, second dam Rosetta, by Hambletonian. The Agricultural College secured this stallion to aid in its experimental work in horse breeding.

Considerable excitement was created among the farmers and other owners of horses in the vicinity of Cordelia, Solano county, last week, through the discovery that glanders in a bad stage was prevalent among the horses on the Hatch ranch in Suisun valley, owned by R. D. Robbins, the Suisun banker. County Veterinarian Sullivan pronounced the disease as glanders and his statement was corroborated by the State Veterinarian and Dr. Kennon of Napa. Twenty-nine of the animals were found to be affected with the disease and were condemned to be shot by the officials. It is estimated that the loss to Mr. Robbins will be in the neighborhood of \$8,000. Since the presence of the disease has become known it is said that the horses on the Hatch ranch have been afflicted with the same ailment for the last three or four years, but either through ignorance or neglect nothing has been done toward stopping the spread of this incurable disease.

SPOKANE NEWS.

(Special Correspondence.)

With the great interest and enthusiasm now manifested in baseball, field meets and various athletics the public has almost forgotten the existence of the race track, and few realize the number and quality of the horses now located here. However, I write these few lines just to let our California friends who contemplate coming up on the North Pacific Circuit this season know that we will give them a race for the money. Although no fast miles have been worked, the horses are all in fine condition and the various trainers are patiently saving their speed for race day. Undoubtedly the best known horse here is the champion guileless pacing stud Del Norte 2:04¼. Del Norte is the leading sire in the Northwest, being the sire of Oregon Maid 2:08, Helen Norte 2:09¼, Magladi (3) 2:10½, and many other promising ones. He has done a large season here and along with Mr. Barrows' (his owner) racing stable will be shipped to Walla Walla about July 15th. Mr. Barrows' racing stable consists of the good son of Old Hundred, Fremont S. 2:14¼, who will be shipped to Kalispell, Mont., for the 2:13 pace there on July 5th, after which he will return for the North Pacific Circuit. In the three-year-old trots Mr. Barrows will have May Mason by Major Mason 2:09¼, and Mable Norte by Del Norte 2:04¼, dam by a son of Ingram, while in the three-year-old paces the game little Del Norte filly Ruth Norte, dam by McLellan Jr., is entered. Mr. Barrows also has a number of other promising Del Norties not in any of the stake events. Associated with Mr. Barrows are the Elliott Bros., with the good green pacing mare Nellie E. by Encounter 2:20, dam by Antrim, and the promising green trotter Zella Norte by Del Norte 2:04¼, dam Rose Caution by Caution.

As usual, the Childs stable is well to the front, and I think they have a distinction which can be accorded to no other stable in the Northwest, namely three entries in the Greater Salem stake. These are Sherlock Holmes, the good son of Zolock, who was so successful both here and on the Montana Circuit last season. Sherlock has not been worked faster than 2:20 yet, but those who have seen him work claim that he could come right down to his work if called upon. The next is Queen B. 2:13¼. This mare is big and strong and will round into fine shape before the racing season opens. The other entry is the good mare Ruby H., who has paced trial miles in 2:08, and her owner, C. D. Jeffries, claims that she will step in 2:06 or better this season. Out of these three entries they will surely be able to draw a winner. In the trotting class Childs has the good trotter Dallas 2:20. This horse is working right round his record and doing it easily. Besides these the stable has a number of good green ones, including the royally bred stud Merry Monarch by McKinney.

Al Phillips has a fine string, including Regal Baron 2:23¼ by Baron Wilkes. This game little trotter is working very nice and should be good in his class. In Van Norte, the big son of Del Norte, Phillips has one of the most promising prospects at the track. This colt is working around 2:25 and doing it as if only jogging. The nice little mare Ozolote is also a good prospect. This mare is by St. Vincent 2:13½, dam by Billy Wilkes. Phillips claims that she has more natural speed than any trotter on the track. Another good one is Zantos by Zombro, dam by Steinway. Besides these Phillips has a number of colts which are showing up well.

Mr. J. H. McKowen is busy with Maud H. by Clatawah, out of the dam of Kittas Ranger 2:11. This mare is working very nice and should be a good contender in the various paces. Mr. McKowen has a good colt in Violin, a son of Nocturno, which is showing up well.

Dr. Coyne is out with the game little trotter Deception 2:29¼, and the promising young stud Bull McKinney, a grandson of the great McKinney. This is one of the most promising horses here and will be heard of this fall.

Dr. Coe, V. S., has the Altamont string, including King Altamont 2:13¼, so popular in local racing circles. Effie La Mont, the game little daughter of King Altamont, out of the good mare Lady Prompter and a full brother a year younger, who shows lots of speed. Besides these the Doctor has a number of others, all showing up well.

Mr. Harry Green, who has had a string of runners here, will ship five to the Meadows this week for the meet there. This string includes Royalty, Oronta, Elven Griffin, Miss Spokane and Buttrick. Mr. Green will surely be able to win his share with this bunch.

"SPOKANE."

A report comes from the East that Charley Belden appears to be slightly lame. The same thing was said about him last year, but if he was lame he forgot all about it in his races.

A number of big wagers have been laid at Glenville on the M. & M. and C. of C. candidates; \$6,300 placed against \$1,500 on Sonoma Girl, \$4,000 against \$500 that she would not win, \$1,500 against \$500 that she would not place, and the same amount at the same odds that she would not come third. W. H. Mallow has laid \$345 against \$4,700 that Major Mallow 2:16¼, will win the Chamber of Commerce Stake.

Drink Jackson's Napa Soda. It means health.

UPON THE GAIT OF THE HORSE.

(By C. A. McLellan.)

There is an old saying, "No foot, no horse," and it has more truth to-day than it ever has had in the past, and the reason is that to-day we have more fast horses than ever before, and the faster the horse travels the more quickly he shows the effect of an unnatural position of the foot, because any unnatural position of the foot causes extra strain upon some muscle and extra concussion upon certain parts of opposing bone surfaces.

If a slow speed machine does not run in perfect alignment it may run for a long time without appreciable damage, but increase the speed of that machine and the whole structure is soon badly injured. This same fact is true of the horse with his feet in an unnatural position, or out of balance, but it may not be noticed as quickly as in the case of the machine because the horse does all that he can to reconcile himself and gets along as best he can with the unbalanced foot with which he is compelled to travel, thereby often getting into a very deplorable condition before the owner or trainer realizes that anything is wrong with him.

The horse cannot tell in words that his foot is unbalanced no more than he can tell in words that he has pain, but the position in which he stands will tell the experienced eye where he is unbalanced just the same as his actions will tell the experienced veterinary where he has pain. Many that read this statement will think it a queer one, but it is a fact that the horse is so constructed that when standing at rest he is practically obliged to point out, from the position in which he stands, the point at which his foot is too high or too low; further it is a fact that the horse in motion, follows the same lines that he points out when at rest. For a simple illustration, and one that many have noticed, a horse that is chest foundered (so called) always stands with his front feet way in advance of a plumb line from the shoulder, and when in motion his stride is way in advance of his shoulder; and this holds equally true of any other position in which he stands when at rest. One difficulty is to be able to see these things when you come to the more difficult positions, and another is to remedy them after you see them.

The horse that cross fires or interferes, or that over-reaches shows plainly by the way he stands that he is obliged to do these things. Long before a horse becomes knee-sprung, in most cases, you will notice him standing with his front feet back of a plumb line, showing plainly that his heels are too high; then when in motion he finishes his stride back under his body too far, again following, in motion, the position he takes when at rest. While, on this part of my article, I will state that in most cases, knee-sprung is caused by too high heels, although too much height, especially on the inside of the front foot, will cause too much bearing to come upon the inside of the corresponding joint surfaces and this will tend to spring the knee, and not only spring the knee, but the horse will depend so much upon the muscles of the arm to lift the foot that the muscle will enlarge until in some cases it will be nearly double the size of the corresponding muscle of the other leg, assuming, of course, that leg is not affected by a foot out of position. The heels being too high, the horse does not bring the necessary strain upon the back tendons and they are affected; also extra height at the heel tips the foot bone down so that concussion upon the bearing surface of the joints, above, does not come where it should, causing the animal to stand over on the knee as a means of changing his bearing.

I should like to see a knee-sprung horse, unless there is a strong counteracting difficulty, that does not put his heel on the ground much sooner than he does the toe, and if you watch him in motion, you can see his toe come to the ground with a thud or slap, after the heel strikes. Had I the space I could give a mechanical drawing illustrating that knee-sprung is caused by too high heels. Many writers disagree with this argument, but I notice that one writer, in particular, and the only one that claims a remedy, says that he has the best success with a toe weight shoe with the heels made narrow and thickened somewhat. He probably does not realize that on any road, except a very hard one, the narrow heel, although somewhat thickened, sinks into the surface, while the wide webbed toe of the shoe will not sink into the surface, so that unconsciously, this writer lowers the heel, thus shoeing the horse properly.

It is a fact that any knee-sprung horse, unless an old, long standing case, can be greatly helped, in fact often completely straightened, by putting the foot in balance, and in most cases, among other things, it is necessary to lower the heels.

There is another condition, often found, known commonly as cockled ankles, behind, and in most cases this is caused by an improperly balanced foot. Watch the horse that has a tendency to cockle as he stands at rest and you will notice him standing with his inside heels about as near together as he can get them, and if he could get one by the other he would do so. When in motion, again following the standing position, he will place one directly in front of the other and often way inside or across the center line of travel. Finally, after standing the concussion upon the inside of the joint surfaces as long as he can, over go his ankles. Proper balancing will greatly assist and often completely remedy this evil. Many that read this article have perhaps owned a horse that would stand one foot across so far that he would, in hunting for an even bearing, place it on top of the other hind one and then when asked to

move would lift the underneath one first and calk himself. This condition is simply one of too much height inside, generally the whole inside or toward the toe.

Herein, I have stated a few simple facts that any reader can easily see cannot be otherwise than true if he will look at any case in point that I have mentioned and watch for himself; except perhaps, some may question the statement in regard to the cure of sprung knees, but it is a fact nevertheless and I can convince any reasonable man or body of men of the truth of my statement by a practical illustration.

I claim that every ailment of the foot has its origin in an improper position of the foot bone, excepting, of course, accidents from blows, etc., and that there is a remedy for what seem almost hopeless cases.

From investigations during the past few months, I am satisfied that the horse that toes out so badly, and hits his knees in consequence, can be greatly helped and if taken in hand in early life many cases can be completely cured. I find in these cases there is generally a serious contraction at the coronet or along the side of the foot at about the same place in each instance, and also height at a point where I myself, and all others I have talked with upon the subject have heretofore considered the foot was low, and it is now my opinion that is the reason why the question of remedying the difficulty has been such a serious one in the past. I have had grand results by working upon my present theory which I "doped" out from what the toeing-out horse tells me, in his mute way, by standing in the position he does when at rest.

In reality the hoof of the horse, as far as balancing is concerned, is no more his foot than the boot a man wears is his foot, and in a sound man's case, the gait is effected by an improper boot in a somewhat similar manner to the way the horse's gait is affected by an improper hoof, or hoof and shoe taken together, as the two together affect the bone as though they were one. Of course the horse has four feet to contend with while man has but two.

Just stop and think. Did you ever see a woman with the present-day high-heel shoe, walk off with a natural and proper length of stride the same as she would with the commonsense shoe, so called? Haven't you often banged your ankle when you got the outside of the heel and sole of your shoe worn away? Don't we wear our shoes hard at the extreme heel with the present-day, rather high heel shoe, when with the so-called "sneaker" we wear much more even?

The horse puts his foot to the ground with due regard to an even bearing of the joint surfaces, and in doing this, he often is obliged to place an unbalanced foot where it, or the leg it supports, is in the path of some other foot. This is caused by height or width of hoof where it should not be. So, I claim that a very large percentage of errors in gait of the horse can be traced directly to the unbalanced foot.—American Horse Breeder.

WHAT HOOF CONTRACTION MEANS.

[Chicago Breeders' Gazette.]

Many a horseman talks glibly of "hoofbound" and "contraction of the heels," and considering such conditions detrimental forthwith applies all manner of dopes and hoof dressings to promote growth, softness and expansion of the horny box of the horse's foot. But how many know what really happens when the wall of the hoof dries out and contracts, or when the frog shrivels up and the sole withers and becomes abnormally concave? Far more serious effects are present in such conditions than the ordinary observer imagines and to understand them properly one should know a little of the structural anatomy of the foot.

To watch some shoers at work one would think they considered the hoof a chunk of soft white pine to be whittled and pared for the very pleasure of noting the sharpness of the keenly tempered knife and seeing the pretty whiteness and cleanliness of the horn denuded by its use. But the hoof in reality is a most delicate, sensitive appendage, though the strongest ground contacting organ possessed by any animal. Underlying the horny exterior are sensitive, blood-fed, nerve-endowed tissues—the "quick," one calls them if a layman, the "pododerm," if he be a veterinarian—and these living feeling parts produce the outer structures that are insensitive to pain.

The insensitive and sensitive parts are intimately associated one with the other, so much so, in fact, that it is a most difficult operation to separate one from the other and the doing of it causes excruciating pain and much loss of blood. If one allows decomposition to progress a certain length or macerates a severed foot in water for several days, it becomes possible to separate the horny wall from its matrix and to strip away the sole from its sensitive underlying layer, and when this is done it is seen that five or six hundred horny leaves run lengthwise of the front and side parts and are dove-tailed intimately between red fleshy leaves of like shape and number. Between the horny leaves and the outer surface of the foot run thousands of little horn tubes, from coronet (hoofhead) to sole and they are held together by cement-like substance and have their source in minute fleshy protuberances (papillae) studing the surface of the coronary band which fits into a groove just inside the top border of the horny wall. As the horny leaves (insensitive laminae) of the wall have fleshy leaves (sensitive laminae) grasped between each pair, so the open end of each horn tube grasps a fleshy protuberance. The fleshy leaves and

the fleshy protuberances are alive and they feel acutely and produce the horny leaves and tubes described.

So, too, when we study the horn of the sole, we find that it is formed of short horn tubes, each of which springs from a corresponding fleshy protuberance upon the sensitive sole, and going farther we find a similar formation underlying the horny frog which is produced by sensitive tissue, as are the other parts of the horny covering of the foot. The pododerm in turn covers the bones and other inner structures of the foot, just as we pull on a sock and then enclose it in a protective insensitive shoe of leather. If the shoe is too small it pinches our foot, obstructs the blood circulation, impedes the action of the joints, irritates the nerves and causes pain and consequent lameness.

Understanding this meagre description of the inner structures of the foot, one may readily conceive what happens when the horny leaves contract, shrink and shrivel. Necessarily each pair of horny leaves must pinch upon the fleshy leaf they grasp, each horn tube contracts upon the fleshy papilla it embraces and the same effect takes place where the sole and frog dry out and shrink upon their producing tissues. Place a cord or rubber band around the finger tip and instantly there is felt a sensation of fullness, then pain, numbness and throbbing. The circulation of the blood has been checked, the veins no longer are able to carry away the blood supplied by the arteries and stagnation follows, leads to distension, discoloration and eventually would mean death of the part. When the rubber band causes pain, we can remove it instantly. If the shoe pinches, we can kick it off and sigh with relief as discomfort subsides and the blood courses back into its accustomed channels.

But alas, poor horse! If the horny box of his hoof, which corresponds to the leather shoe we wear, contracts and pinches those intensely sensitive fleshy leaves and protuberances, he has no recourse. His shrunken hoof is a fixture. He cannot kick it off. He cannot ease its pinching by loosening laces. No, he has to suffer excruciatingly as he works, eats or lies down on his too often comfortless bed and seeks to rest—with his boots on! When it is time to wake up, drink, eat and go to work again in the morning, the pain, somewhat relieved by resting in the recumbent position, returns anew. It is one prolonged squeeze upon each sensitive tissue of the foot. Little wonder then that he goes out of the stable "groggy," sorefooted, stiff, spiritless, sluggish and loath to take up the work horse's burden of the day. After a while he limbers up a bit—"warms out of his lameness," we say—and manages once more to put in the weary day of labor. But it hurts, and it is a shame that such suffering goes unheeded and usually is due to man's stupidity and cruelty. Let us stop that terrible "squeeze" and make life more worth while living for the dumb brute that so patiently, so faithfully labors for his master upon the city streets or in the fields of the country!

The foot furnished the colt by the Allwise Creator fits perfectly. It properly accommodates the bones and joints and tendons underlying the pododerm so that action is easy, graceful and painless. It gives security of foothold to its owner and assurance of safety to the sensitive structures which it protects causing no abnormal pressure and, while left to nature, preserving its natural dimensions and health. But man commences to maltreat it by standing the horse upon a dry board floor, by cutting, rasping and burning in the process of adjusting shoes that often fail to fit and are held in place by too many over-large, too high-driven nails. The rasping of the hoof walls removes the cortical layer of varnish (periole) provided as a protective coating to prevent evaporation and contraction. The cutting away of the sole and frog exposes incompletely formed tissues that were purposely protected by old horn and now shrink by drying out. The heels contract by reason of removal of the bars and this objectionable result is augmented by the silly practice of cutting a great notch at each side of the frog to "open the heels," but in reality close them. Necessarily the contraction means pain, because of the pinching upon sensitive structures and as necessarily this means lessening of the blood supply and the nutrition dependent upon the blood. Consequently the hoof becomes unhealthy; the horn structures stop growing, the hoofs become small, brittle, hard, wrinkled, acutely concave or abnormally convex (from founder) and, having become unnaturally small, no longer perfectly accommodate the structures which they cover or permit them to perform their normal functions.

Taking the pastured colt's unshod foot as a criterion, everything possible should be done by the owner to maintain like development and healthy conditions, when the adult horse has to be stabled, shod and worked. To this end the chief measure must be the absolute prevention of unnecessary, detrimental mutilation of the horse's hoof in the shoeing shop, while prompt resetting of shoes, sanitary stabling, proper feeding and grooming and occasional pasturing likewise will have their beneficent effect in the same direction.

A. S. ALEXANDER,
Veterinary Editor Gazette.

Morning Star 2:04½, the crack pacer by Star Pointer, that was sold at the Billings sale to E. S. Burke Jr. of Cleveland, is in fine fettle this summer, as he reeled off a mile in 2:08½ two weeks ago today hitched to a wagon. He paced the last half of the mile in 1:02.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. K. DeWITT

THE LAST HUNT OF THE SEASON.

The quail now can, unmolested, call in the open. The scattered birds may come together again in bevsies, feed upon the tender grasses and even with impunity enter the farmer's barnyard, scratch the barnyard refuse over and look for scattered seeds, as was their want before the opening day of the shooting season last fall.

The long-haired Setter or smooth-coated Pointer may tug at the chain or charge up and down the kennel enclosure in vain effort to be free, so that with the master they may point, shoot and retrieve.

But now this may not be. Alas! the favorite gun is put away, oiled inside and out, laid up in ordinary until October 15, 1907.

How many changes may occur, ere the world turns more than one-half around, who can tell?

"Never mind, dear Will," I remarked to my friend, the companion of many a jaunt in the upland ground and open cover with out guns and dogs. "If we do not hunt some others shall take our place, as good dogs as ours shall point the quail. As steady hands, as clear eyes as ours shall use the guns. And so, dear friend, let us believe, on this, the last day of the open season, that we shall enjoy seeing some fine dog work, shoot well and drink in health with each draught of clear country air whilst we admire the handiwork of Him who makes no mistakes."

So with this and other conversation we passed the time in pleasant anticipation as we bowled along the country road behind Colonel and Pete, a spirited team of gray geldings, our destination being the Zoppio Gulch, a favorite quail shooting section in Marin county—the country par excellence for the sportsman.

"See, Payne," said Will, "there is a trillium."

"And why a trillium?" I replied.

"Three leaves, three blossoms, all threes, a pretty little plant, which comes forth at the first solicitation of spring. Look, there is a Cooper's hawk, it never should be shot, for it is a friend of the farmer, it destroys gophers, moles and all the rodents which infest and deplete Mother Earth's breast."

"Well," I rejoined, "why kill the hobcat? He will sit by the hour over a gopher's hole waiting to destroy it with one bat of his paw."

A hail from a horseman silhouetted against the skyline of a nearby hill told us that our mounted attendant, Jack, was waiting for us, and judging from the looks of things he evidently had birds located. So driving up the gulch as far as we could, the grays were pulled up, when we were opposite our man Jack, and at a convenient spot where we proposed leaving the outfit for the time being. Before leaving the team Will took the wise precaution of fastening the lines taut hauled to the brake and at my suggestion loosened one tug of each horse, so that the team, if they started, would pull first by the reins before they could pull by the tugs. Jack by this time was down from the hill, turned over his horse to Will, I mounted my led horse, the eager dogs jumped out of the wagon—Diana, a Black Joe Pointer bitch, followed by Star, a small, strong inbred Gladstone English Setter dog, next my two dogs, Nancy, a light-built Starlight W. English Setter bitch, and her son, Boy.

Climbing the opposing hill slope, the dogs quartering merrily in front of us, covering in workmanlike style their ground to right and left. Suddenly Star came to a point, firm as a rock. Perfectly satisfied a bird was right there. "Hie on!" Will commanded, not a stir. So up walked the hunter slowly. Diana, wheeling across the tainted air, came into a pretty back behind Star. A picture so fair to my doggy eye that I was not aroused until the bird flushed and Will scored a kill.

"Look out, Payne, there is Nancy and the pup on a point," called Jack.

How important was the pup's attitude and demeanor, standing behind his dam, half turned, as if watching me and the bird at the same time. Nancy flushed to my word and well marked where the quail, bard hit, fell in the cover. The youngster ran hither, thither and yon until he heard the fluttering of the dying quail in Nancy's soft-mouthed control, when he, an eager, ran over to find out what caused the noise, and finding the bird in his mother's possession, he impulsively snipped it away from the older dog and brought the dead bird to me, showing in every movement and glance of his eyes the utmost indication of his own individual importance.

Following over the cover, suffice it to say, Will flushed four birds, dropping three of them. I flushed three and killed one. Evidently now the birds had legged it away from the danger zone, as the dogs were unable to locate any more feathers, without making too long casts and in this consuming too much daylight. So down the steep hill we rode to our team, jumping the dogs into the wagon Jack again took pilot position on the hurricane deck of his saddle horse whilst I rode with him across the hill. Will, meanwhile drove the team around the road to meet us at a spring.

A short while prior to this day, just above the spring, on the hillside, while calling for quail to rise, up

sprang a big wildcat and away he bounded on his course. I yelled to Jack to head him off. I spurred my horse into a lively run to intercept the varmint for the chance of a shot at him. Jack had called my attention earlier in the day to the fact that my saddle was loose, but as it was a double-cinch saddle, I thought it would hold in place all right. My horse ran down a slight grade, across a little flat, as soon as he began climbing the opposing hill back the saddle slipped and off I fell behind my mount. I landed on my head and shoulders and the bucking, plunging horse kicked himself clear of the inverted saddle and away he stampeded and was soon out of sight. Picking myself up I found, luckily, that I was only badly shaken and none the worse for the adventure. Gathering up the cinches and saddle I had the saddle rigged up again by the time that Jack returned with Billy, the runaway. Re-saddling, we went on our way again. I firmly determined never in the future to take any further chances on loose cinches.

Beyond this little Sylvan spring, in the weeds, we soon came up with Will and the wagon, dismounting I joined my friend on the front seat, leading my horse the balance of the way to Zoppio Gulch. Here we unhitched the horses, took off the bridles, put on the welcome nosebags, half filled with rolled barley. Whilst our four-footed friends munched their midday grain we disposed of an appetizing lunch, spread out invitingly on a clean buggy robe—a cold leg of Australian mutton, with chutney sauce for a relish, cold ham sandwiches, French bread and fresh-made butter and oranges. All washed down with enough clear, cool spring water to temper two fingers of the best whiskey—what could a hunter ask for more?

Lunch being disposed of, Jack re-saddled Colonel for Will and we rode from the pretty little valley up to the foothills, home of the pine and huckleberry. Suddenly Will, pointing to the ground, called out, "That big wildcat, Payne, just caught a gopher!" Sure enough, on looking down, there half out of his hole, the gopher was shaking his paws at Nancy. Not long did the rodent bark, however, when Di came up one snap was sufficient to quiet his burrowing career.

Shortly after this Jack located a bevy of birds near the head of a ravine. The quail were laying close in a tangle of brush, covered with wild blackberry vines. It was but a short time, the quartet of dogs were pointing, backing and retrieving, when Will had seven quail and I bagged six. As these seven birds made up the club limit of 300 quail for the season, for my friend, he called quits for his gun. Turning back we proceeded to the wagon, hitching up Jack drove Will to Point Reyes station in time to catch the 4:30 train to San Francisco.

Left to the devices of my own inclination I jogged my pony over to a cover I well knew, when I soon had twelve birds more. The more I worked the puppy the more I liked him. Nancy roared a wounded hen quail into a jush, the pup hurried to the other side and between the two the bird was soon caught and brought in alive in Nancy's mouth to her master's hand.

Suffice it to say, when I climbed the last hill, in the twilight, I had killed and bagged twenty-three quail. When I reached the water shed slopes I could see the twinkling lights at Point Reyes station all aglow at my feet. Far in the distance the lights of Tamalpais Inn lit up the sky, while like a good deed in a wicked world the heaming flash-light on the Farallone rocks shone o'er the calm Pacific.

"Good-by, dear day," I said. "The night has come, the season's ended."

RUSTIC.

Black Bass in Kern River.—Guy Lovelace, a popular Los Angeles sportsman, is authority for the statement that the Kern River is full of black bass. Having outfitted fully for bass, Lovelace, who annually takes an outing trip to that delightful region, evidently has satisfied himself as to the plenty of the fish. They no doubt ran into the river from some of the lower streams into which it empties, and it is believed a number of bass fry were put into one of the Kern lakes a few years ago.

Sportsmen are wondering somewhat how the bass and trout will work together; the bass are likely to clean out every other fish that inhabits the same water. They will run out even the porcine carp.

Prize For Black Bass.—Marysville anglers are having fine sport with the gamey black bass. So much is the sport thought of in that section that one enthusiastic merchant, G. W. De Lashmutt, has an elegant meerscham pipe which he is offering as a prize to the angler catching the largest black bass. A pair of scales are kept ready to weigh the catch of any of the local fishermen, and the contest is creating quite a bit of interest.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

MOOSE AND CARIBOU IN DEADLY COMBAT.

George La Rose, the old-time trapper of KeWatin, Ont., recently returned from his fortieth winter's bunting in the country north of the Wabushgang reservation, says a Kenona (Ont.) letter to the New York Sun.

He brings back a story of a spectacle such as perhaps no other man ever witnessed—a duel between a moose and a caribou. This is the way he tells it: "I was up on Rat Lake. Don't know where it is, eh? Well, just get a map of the district of KeWatin, run your eye along the English River and take a line due north from Vermillion Bay station on the C. P. R. about 120 miles. There's Rat Lake.

"We had camped about six miles west of the lake and needed some fresh meat. I took a day off and made for an old caribou stamping ground.

"Now, every one knows that the caribou never lives alone. Sometimes there is one hulk and several females, sometimes two hulks, but they always go in herds, in this country, at all events. Maybe it's for protection against the wolves, which are no joke up there. I'm just telling you this to show what a courageous fellow the moose was.

"I approached the lake from the west. I was in dead luck. From a little hillock I spotted a herd of about five caribou out on the ice eating snow, and the wind was dead in my face.

"I could afford to take some chances, and walked to the edge of the lake rapidly. There I dropped and waited for a chance to get nearer.

"The herd was having a good time. The animals were chasing around as frisky as you like, all except the leader, who kept facing the wind, sniffing for danger.

"Suddenly the leader of the herd wheeled and whistled. At once they all stopped playing and stood still as posts; then he gave another whistle and they came down the lake like thoroughbred race horses. A caribou can run like the wind; a moose can't run at all, because his hind legs are too short and his front legs too long.

"Well, they came down straight toward me. I got ready to bring down that leader. He was a fine hulk, and, unlike most leaders of the caribou up in that country, he ran ahead of the herd instead of behind.

"The big fellow was about 200 yards off, running close to the shore, when a lumbering moose with part of one horn torn off made straight for that herd. I never saw, nor did any other man, I believe, anything like it before.

"The big, lumbering, clumsy brute didn't single out any particular animal; he just made for the center of the whole lot. I gave up all idea of getting a caribou there and then. I thought the herd would split up and make off, to collect again some other place, but I had another surprise coming.

"That caribou bull was no coward, either. He stopped short, wheeled around, and, with his huge horns lowered, made for that moose the way a buffalo would.

"The big fellow lowered his head to meet his smaller opponent, and then a hutting match began. The moose's broken antler appeared to be hurting him some, for every now and then he would sort of take the caribou's charge with the side of his head and moo like one of his cows when calling for a mate.

"Bit by bit the big moose began to give way. I knew that if that gritty caribou could get his clumsy enemy into the brush he would finish him for sure, but I wanted to see how. The remainder of the herd of caribou made for the opposite shore of the lake, where they disappeared in the woods, I guess, waiting for their leader to come back to them.

"Well, as I was saying, this moose was slowly giving way, and in the mean time I was crawling closer and closer to the fighters. Up till now they seemed content just to go at each other head to head, but when they got near the shore the caribou began to charge at the moose's flank.

"I watched that caribou's strategy, scarcely daring to breathe. That little fellow made for the moose's shoulder time and again, and time and again, as the moose turned to take the charge on his horns, he gave way a few steps.

"Each time the moose turned to meet the attack he came nearer to being broadside to the brush on the shore. Well, that caribou kept it up until he had his enemy within two or three feet of the wood and broadside to the brush. Then he went hack to running straight at the moose.

"All this time it seemed to me that the caribou was the attacker and the moose on his defense, and I began wondering whether that moose had enough. The caribou fell in one of his charges. He slid to his chest and before he could get to his feet again that big moose was on him.

"With a scrunch that made my spine cold he dug his huge antlers into the caribou's shoulder and started boring. I thought it was all over and got ready to finish the one that lived—can't forget your grub up in that country, you know—when that caribou got a chance and was up on his feet again.

"It happened like this: The moose after going for some minutes hacked away and appeared about to rush on the other animal in one last big effort to finish him. He backed too far, though, and the caribou managed to get into the wood. Here he had it on his big enemy, and although it seemed to me that his plan to force the moose into the brush ahead of him had failed, he quickly fooled me.

"That moose was frenzied. He shook his great, ugly head, stamped and snorted, hesitated a minute, then charged.

"Well, you know when a moose goes in the brush he lays his head back until his antlers are almost flat on his shoulders, so as to avoid the branches. This fellow charged head down into a wood where the trees were only a few feet apart and struck one of them full tilt.

"The jar was too much. He fell, and while he was trying to get up and get his horns out of a tangle of fir and pine branches that little caribou was on him again. He got the moose fairly in the middle this time and punctured him.

"The moose got his horns free of the green and tried to get at him again, but again those pine branches interfered and the snow he shook off the trees was falling into his eyes. He made one more rush, again struck a tree and again that caribou hit him.

"The last wound was too much for the moose. He was bleeding badly and staggered to his feet again, bent only on getting away from his savage little enemy. Throwing his antlers back he started off through the woods, smashing down branches and young shrubs as he ran, with the other animal in pursuit.

"He only went a few feet and I ran after the two. Both were so engrossed in their own business that they did not notice me, anyhow. The moose ran about thirty yards, got tangled up in a thick growth of young spruce and while trying to untangle himself got another terrific blow from the caribou, this time just in front of the right hind leg.

"That moose dropped there. He shook his head once or twice in a last effort to get up again and laid still.

"Well, I guess I'm a fool, but even the needs of the camp couldn't bring me to kill that caribou. I gave a yell that frightened him more than any moose had done, and the last I saw of him he was scampering off, not back to the lake—he was too wise for that—but through the woods, leaving a blood trail from the wounds the moose had made.

"Well, that trail might have led the wolves to him, and if he lost much blood he probably was killed by them, but I hadn't the heart to do it."

GRAND AMERICAN HANDICAP.

The eighth Grand American Handicap at blue rocks, under the auspices of the Interstate Association, was held at Chicago last week, June 18-21 inclusive, on the new grounds of the Chicago Gun Club. All previous records in entries and attendance were beaten, the shoot being in every respect one of the most successful trap shoots ever held. The grounds cover some twelve acres and are up-to-date in every respect, being provided with every modern equipment that the most captious could suggest.

President J. A. Haskell, vice-president W. F. Parker and Directors Tom H. Keller, J. T. Skelly and A. H. Durston, and Treasurer A. C. Barrell of the Interstate Association were in Chicago several days prior to the opening day looking after various matters connected with the tournament and taking care of visiting shooters. The shoot was under the immediate and personal direction of the tournament wizzard, Secretary-Manager Elmer E. Shaner, who was assisted by Fred Whitney of Des Moines as cashier of the shoot, Tom Graham, Ingleside, Ill., assistant cashier, and J. K. Starr of Philadelphia compiler of scores. The tournament committee was: Paul North, chairman; A. C. Barrell, J. T. Skelly, S. G. Lewis, Harvey McMurchy, T. H. Keller and A. H. Durston. The handicap committee were: Elmer E. Shaner, chairman; B. Waters, W. D. Townsend, C. M. Powers and Dr. Edw. F. Gleason. Mr. A. W. Higgins and Mr. Edw. S. Lentillon were the trophy committee.

The Chicago Gun Club grounds and club-house were formally opened on the 15th inst. Dr. C. W. Carson, president; J. M. Morehouse, vice-president; C. P. Zacher, treasurer; Secretary Teeple; George W. Strell and others were the speakers. A large number of club members and visiting sportsmen were present.

Monday, June 17th, was devoted to preliminary practice, ten 20-target events, entrance \$2, sweepstakes open to amateurs only, and optional, was the card for the day. That brought out nearly every shooter entered in the regular events. Tuesday, the opening day of the tournament, the program called for 100 targets in five events, 20 targets each, \$2 entrance, \$25 added, open to amateurs only, no handicaps.

The Preliminary Handicap followed on Wednesday, the conditions were 100 targets, unknown angles, \$7 entrance, targets included, handicaps 16 to 23 yards, high guns, no class shooting, \$100 added to the purse. The number of entries controlled the division of moneys, open to amateurs only.

The winner turned up in Mr. George L. Lyon, a young capitalist of Durham, N. C., who is connected with a large tobacco concern and a nephew of Geo. Duke, of the United States Tobacco Company. He broke 96 out of 100 at 19 yards rise. Besides the trophy, valued at \$100, he received first money—the total purse amounted to \$1,495. Lee Barkley of Chicago, a professional, made the highest score of the day, breaking 97. He was shooting for "targets only," however, and did not figure in the purse distribution.

Lyon, although handicapped by his use of glasses, shot a steady race throughout. He broke 19 targets in each of four sections and made a straight score in the last twenty. He is but 26 years old and has been shooting only four years. He finished second

to F. E. Rogers in the Grand American Handicap at Indianapolis last year.

Barkley, who was the high man so far as actual scores were concerned, has also been shooting only four years. He made two straight scores of 20 in his first and last sections.

Close behind the leaders came two of the three Graham brothers of Ingleside, Ill. Tom Graham made 95 and J. E. Graham scored the same.

The leading scores in the Preliminary Handicap were the following:

Amateurs—	Yds.	Broke.
G. L. Lyon, Durham, N. C.	19	96
J. R. Graham, Ingleside, Ill.	19	95
Tom Graham, Ingleside, Ill.	16	95
Mark C. Bolton, Gilchrist, Ill.	18	94
George Volk, West Toledo, O.	19	93
T. H. Clay Jr., Austerlitz, Ky.	19	93
W. N. Wise, Noblesville, Ind.	17	93
J. G. Groutcup, Nicholls, Ia.	16	92
Otto Sens, Houston, Tex.	17	92
A. Holt, Abilene, Tex.	18	92
Lem Willard, South Chicago, Ill.	17	92
T. Tansey	17	92
D. E. Hickey, Millvale, Pa.	19	92
W. T. Coyle, Torras, La.	18	92
C. Rotnour, Bebron, Ill.	18	92
A. W. Woodworth, Missoula, Mont.	18	92
W. H. Schultz, Tomah, Wis.	17	92
J. M. Hughes, South Milwaukee, Wis.	19	91
W. F. Holtz, West McHenry, Ill.	19	91
W. S. Hoon, Jewell, Ia.	19	91
F. D. Peltier, Mt. Clemens, Mich.	17	91
W. Beckwith	17	91
B. Waggener, Lomax, Ill.	17	91
F. M. Gaines	16	91
S. Glover, New York	19	91
D. A. Upson, Cleveland, O.	16	91
L. I. Wade, Danas, Tex.	16	90
W. R. Chamberlain, Columbus, O.	16	90
G. V. Deering, Columbus, Wis.	19	90
W. Einfeldt, Oak Park, Ill.	17	90
E. S. Graham, Ingleside, Ill.	17	90
H. Hoon	17	90
J. Foley, Nicholls, Ia.	16	90
G. M. Collins, Due West, S. C.	19	90
M. E. Hensler, Colorado Springs	18	90
Dr. C. W. Carson, Chicago, Ill.	17	90
Trade Representatives—		
Lee R. Barkley, Chicago, Ill.	21	97
J. M. Hawkins, Baltimore, Md.	20	91
R. J. Maryott, Fort Collins, Colo.	16	90
R. O. Helkes, Dayton, O.	20	90
H. E. Poston, Memphis, Tenn.	18	90

The State Team Event, open to amateurs only, was the special feature for Wednesday. Each team was composed of five bona fide residents of the same State. The race was at 100 targets per man, team entrance \$35, targets included; no handicaps, high guns, ten moneys, winning team to receive a trophy in addition to first money. This race was rather disappointing, inasmuch as but nine teams were entered, making a total of forty-five competitors. It was after 6 o'clock when the last shots were fired in the Preliminary Handicap, and the State Team shoot was put on and hurried through. Of the nine teams entered five came from Illinois and one each from Nebraska, Wisconsin, Missouri and Iowa.

The winning quintet was that rated as the second Illinois team and was composed of B. Dunnill, H. Dunnill, J. Young, J. Graham and H. M. Clark. They made a total of 458, Graham and Young being high men of the team with 95 each. It was nearly dark when the shoot was closed.

On account of the good work shown by several members, great hopes were placed on the Missouri team by its friends. Riley Thompson of Cainesville, Mo., had been showing such good form in his practice work that he was mentioned as a possible winner of the event. He did well in the Preliminary Handicap, but failed to come up to his mark in the State shoot.

The Grand American Handicap started at 9 o'clock Thursday morning, June 20th. The conditions were: open to all, 100 targets, unknown angles, \$10 entrance, targets included; handicaps 16 to 23 yards, high guns, not class shooting, \$200 added to the purse; moneys divided according to entries—over 250 entries, 50 moneys; trophy and first money to winner. The handicaps were published on Saturday, June 15th, and were individually the same throughout the tourney. Of a total of 496 entries defaults were recorded against 36, leaving 460 guns competing. It was 7 o'clock in the evening before the last shot was fired, and at that there were a number of shooters to complete their last section of 20 targets on Friday morning.

After a hard day's shooting, marked by the unexpected reverses which have always characterized the Grand American Handicap, three contestants were tied for first place in the big event and two others had a chance at leading positions if they could score a straight twenty in finishing up the next morning. Jefferson J. Blanks of Trevezant, Tenn., Chan M. Powers of Decatur, Ill., and Miles J. Maryott of Fort Collins, Colo., were the high guns, with a total of 96 each. Lem C. Willard, president of the Illinois State Sportsmen's Association, and Tom Graham of Ingleside, Ill., had a chance to get into leading position with straight scores of 20. Every man who had a chance to win was an amateur, and of the three men who were tied for second place two were amateurs. J. R. Taylor of Newark, Ohio, is the sole professional who had a chance to break into sec-

ond position. M. C. Bolton of Gilchrist, Ill., and Bert Waggener of Lomax, Ill., made totals of 95.

Powers had the handicap apparently in his grasp until the last twenty birds were thrown. He had been shooting steadily and evenly and had missed but one target out of the first 80, a record which seemed to give him a safe lead over his field. When he stepped to the traps for the last round the crowd gathered about in the expectation of seeing him run out and win the handicap.

Instead, he was clearly not in trim, for he missed his second target, was skaky on the three following birds, which he scored by a bare margin, and missed two more before he left the traps. This gave him a total of four missed and brought his mark down to 96. Until he fell down in the last section it seemed that the big event was at his mercy.

George Roll of Blue Island, who was one of the high men in the competition, also fell down miserably in his last round of 20 and lost his chances, which seemed bright at one time for tying the leaders.

Two were left to complete their scores and several shooters bad their marks but half finished in their final series of twenty. The race, however, was between the quintet mentioned.

More than 2,000 persons attended the handicap, and interest was intense throughout. When the shoot opened the crowd gathered around the set of traps, at which were Charley Spencer, W. H. Heer, Lee Barkley, Fred Gilbert and W. R. Crosby. It was expected that these men, all of whom were shooting from the 21-yard mark, would perform in exceptional style. Instead, each and every man made a bad score from the start. Barkley, who was watched closely in the belief that he would repeat his performance of the previous day, when he totaled 97, fell far below that mark.

This squad were the only 21-yard men shooting, there was no heavier handicap imposed during the tournament than this distance.

One of the features of the day was the appearance of Father W. S. Hart, pastor of St. Mary's Church in Minneapolis, who attended in his priest's garb and who shot throughout the first four series of twenty. While Father Hart did not make any sensational scores, he seemed to thoroughly enjoy the sport.

Harry C. Marshall, a 13-year-old boy, broke a total of 90, surpassing his work of the previous day, when he made but 80.

Powers is a man of wealth who has attracted some notice by following the trap shooting circuit without being connected with any firm of manufacturer. He now shoots a hand-made gun, built to his order, which cost \$1,000, it is said. It is a single-barrel weapon, with a matted rib raised about one-half inch above the barrel and with a Swiss cheek piece and stock like that on a target rifle.

Of the five former winners of the Grand American Handicap competing not one reached the 90 mark. The tradition of the event, as always going to a dark horse, was upheld. Every shooter on the 21-yard peg did comparatively poorly.

After \$920 had been deducted from the purse to pay for targets the total remaining amounted to \$4,290. Of this the first received \$429.90, the second \$386.25, the third \$343.35, the fourth \$300.45, the fifth \$257.50, the sixth \$214.60, the seventh \$171.70 and the eighth \$128.75. The balance was distributed among the other shooters who were the forty-two highest guns.

When the shoot started on Friday morning at 9 o'clock intense interest was felt in the performance of Lem C. Willard and Tom E. Graham. Had either been able to make a straight score he would have been tied with the leaders and would have had a chance for first money. Both "fell down," however, and the original trio were left to compete.

In the shoot-off at 20 targets Powers was the first man up. The Decatur man seemed nervous and ill at ease when he took his stand on the 20-yard mark, and, although he broke his first target, he followed with two misses in succession, which brought groans from his friends.

Maryott raised their hopes, however, by missing his third target and Blanks followed suit by merely "dusting" his fourth bird. Many called that the shot should be allowed, but the referee decided otherwise and a miss was scored against him, in accordance with the rule.

Powers, clearly out of gear, missed his thirteenth, fourteenth and sixteenth birds. Maryott missed his ninth and his twelfth. Blanks, shooting placidly and without any apparent emotion, kept breaking target after target.

When it was clear that he had Powers tied, at least, cheers commenced to arise from the crowd. Secretary Shaner rushed to the traps and begged the spectators not to applaud until the event was over, so as to avoid disturbing the contestants. Powers still showed traces of nervousness, and missed the sixteenth bird, which put him clearly out of the running. Blanks had made a score of 18 in the shoot-off, Maryott had totaled 17 and Powers had made but 15. They finished in the order named.

Blanks was greatly pleased at his victory and declared enthusiastically that he would rather win the Grand American than be sent to Congress. This is his third year at the trap shooting game, although he has been a field shot for many years. He is a bachelor, lives in a store which he owns at Trezevant.

Blanks' victory over the professional shooter and the star amateur, against whom he seemed to have no show at the start of the tourney, was the sensation of the shoot. No one conceded him a chance,

he was only regarded as an 80 per cent shooter, and nearly every one held that fortune played heavily in his hand when he broke 96 on Thursday and tied Powers and Maryott. But the Tennessee marksman was fully supplied with nerve, which was largely responsible for his victory.

"No one considered me in the running in the shoot-off," Blanks declared, after he won the trophy. "I felt sore and went in to do up Powers and Maryott. Well, I won. I have tried for a long time to put Trezevant on the map, but I was forced finally to shoot it on the map. I would rather win this water pitcher than go to Congress."

Blanks was favored slightly by shooting from the 17-yard mark. Maryott, the professional, was on the 18-yard mark and Powers fired from the 20-yard line. A slight breeze which blew from the south also gave the winner an advantage, but his aim was keen and his victory clean cut and none of his rivals he-grieved him the trophy.

Maryott is a well known shot of Fort Collins, Colo. The high guns and handicaps were the following:

	Yds.	Broke.
C. M. Powers, Decatur, Ill.	20	96
M. J. Maryott, Fort Collins, Colo.	18	96
J. J. Blanks, Trezevant, Tenn.	17	96
J. R. Taylor, Newark, O.	21	95
M. C. Bolton, Gilchrist, Ill.	18	95
B. Waggener, Lomax, Ill.	19	95
B. H. Black, Nicholls, Ia.	17	94
W. S. Spencer, St. Louis, Mo.	—	94
N. E. Poston, Memphis, Tenn.	18	94
F. E. Foltz, McClure, O.	19	94
E. N. Gragg, Lowell, Ind.	18	94
W. S. Hoon, Jewell, Ia.	19	93
Geo. J. Roll, Blue Island, Ill.	20	93
F. Fuller, Mukwonago, Wis.	19	93
R. G. Hook, Ingleside, Ill.	18	93
Lem Willard, South Chicago.	—	93
Max Kneussel, Ottawa, Ill.	18	93
J. Martin, Brooklyn, N. Y.	18	93
F. Burnham, Lowell, Ind.	16	93
W. R. Croshy, O'Fallon, Ill.	21	92
J. W. Hightower, Americus, Ga.	18	92
W. H. McCreery, Loveland, Colo.	18	92
W. D. Thompson	18	92
J. A. Blunt	17	92
F. H. Allen, Richland Center, Wis.	16	92
W. B. Stannard, Chicago, Ill.	20	91
C. B. Adams, Rockwell City, Ia.	19	91
Neaf Apgar, Plainfield, N. J.	19	91
B. T. Cole, Thomson, Ill.	19	91
B. Dunnill, Fox Lake, Ill.	19	91
G. H. Steenberg, Chicago, Ill.	19	91
E. S. Graham, Ingleside, Ill.	17	91
W. H. Schultz, Tomah, Wis.	17	91
O. Von Lengerke, Chicago, Ill.	17	91
H. C. Marshall	16	90
H. M. Clark, Urhana, Ill.	19	90
G. M. Collins, Due West, S. C.	19	90
H. Dixon, Oronogo, Mo.	19	90
J. W. Garrett, Colorado Springs, Colo.	19	90
J. W. Bell, St. Louis, Mo.	18	90
H. W. Cadwallader, Decatur, Ill.	18	90
W. T. Coyle, Torras, La.	18	90
K. P. Johnson, Kenton, O.	18	90
G. W. Kregar, Redfield, S. D.	18	90
G. S. McCarty, Philadelphia, Pa.	18	90
J. T. Park, Brook, Ind.	18	90
J. T. Skelly, Wilmington, Del.	18	90
J. T. Anthony, Charlotte, N. C.	17	90
W. Hass, Davenport, Ia.	17	90

Owing to the small number of ties the Grand American Handicap was decided early on Friday morning, after which followed the Amateur Championship race at 200 targets, unknown angles, \$20 entrance, targets included; 18 yards rise, high guns, not class shooting; \$100 added to the purse, 93 entries—20 moneys; trophy and first money to winner. The Professional Championship was shot at the same time. The conditions were 200 targets, unknown angles, \$20 entrance, targets included; 18 yards rise, high guns, not class shooting; \$50 added to the purse, 54 entries—12 moneys; trophy and first money to winner.

The winner of the Amateur Championship was Hugh M. Clark of Urhana, who broke 188 out of the 200. C. M. Powers was second, with 187, and Joseph Barto of Chicago, J. R. Graham of Ingleside, Ill., and Will S. Hoon of Jewell Ia., tied for third place, each with 186.

W. R. Croshy of O'Fallon, Ill., captured the Professional Championship with a score of 192. Fred Gilbert of Spirit Lake, Ia., Croshy's old rival, was second with 190, and John R. Taylor of Newark, O., finished third, with 189. Rollo Heikes, W. K. Kahler and R. Klein were next in order with 186 apiece.

When the squads were reduced, little by little, until finally Fred Gilbert and "Bill" Croshy were in the same squaa, interest became intense. The spectators gathered around the traps, and when Croshy broke his last bird, after Gilbert had missed, a cheer went up on all sides. Both men were congratulated on the race they put up.

The amateur race was conducted in more prosaic fashion, as Clark completed his run before the average spectator knew that he had won. Some of the amateurs were under something of a disadvantage here, owing to the high wind which arose about 3 o'clock. The gusts swept the targets about in unexpected style, and at one stage the dust was so thick that the traps were stopped for a time. The threatened storm did not materialize, however, except so far as a few scattering drops of rain were concerned.

Following is a list of amateurs who finished with a score of 180 or better in the championship shoot:

Hugh M. Clark	188	W. Henderson	183
C. M. Powers	187	George J. Roll	183
J. B. Barto	186	Frank Fuller	182
J. R. Graham	186	J. S. Young	182
W. S. Hoon	186	O. N. Ford	181
J. A. Flick	185	Guy Dering	181
A. B. Richardson	185	G. M. Collins	180
W. T. Garrett	184	John Martin	180
Lem Willard	183		

Following is a list of professionals who finished with a score of 180 or better in the championship shoot:

W. R. Croshy	192	L. S. German	183
Fred Gilbert	190	Walter Huff	183
J. R. Taylor	189	H. C. Hirschy	182
Rollo Heikes	186	L. I. Wade	182
H. W. Kahler	186	C. A. Young	182
R. Klein	186	L. R. Barkley	181
R. R. Barber	185	J. L. D. Morrison	181
Harold Money	185	W. H. Heer	180
Guy Ward	185	C. B. Adams	180
Ed O'Brien	183		

The entry of 495 shooters is the largest ever recorded in any trap event, either in the United States or abroad. It surpasses the noted shoot of 1902, the last Grand American Handicap at live birds, by two entries.

Powers, after going to pieces in the shoot-off for the Grand American prize, showed a complete change of form in the Amateur Championship, and took second honors, only one point behind the winner. The professionals lined up according to class, and there were few upsets. Neither Lyon nor Blanks, the winners of the previous events, made a strong try in the amateur event.

There was at least 1,000 spectators in the gallery when the main tie was shot off. It was up to Blanks to hang the twentieth clay or accept a tie with Maryott. He hit the final clay in the center, blowing it to smithereens.

It was Blanks' first appearance in the Grand American. He had competed in only two tourneys previous to this event. These were the last tournaments at Memphis and at Denver. He declares he spends most of his time at home shooting quail. He is of short, stout build and is a hachelor. Trezevant, where he resides is a town of 700 inhabitants, 100 miles northeast of Memphis.

There were two shooters from California in attendance, Fred B. Mills of Long Beach and M. G. Lane of Los Angeles. Mills scored 90 out of 100 on Tuesday. In the Preliminary Handicap he shot at 19 yards and broke 88 out of 100. In the Grand American Handicap he scored 87 out of 100 at the same distance. In the Amateur Championship, at 18 yards, he broke 174 out of 200. Lane broke 76 out of 100 at 18 yards in the Grand American Handicap.

In the Preliminary Handicap, 368 shooters entered, 89 were "pros." First money \$149.50 (96 breaks), two 95's \$127.05 each, 94 paid \$97.15, 93 paid \$47.80, 92 paid \$19.20, 91 and 90 paid \$14.95, 89 paid \$8.30.

In the G. A. H. five 95 scores paid \$214.60 each, the 94's \$85.85, 93, 92 and 91 scores \$42.90 each, the 90 men \$16.50 each. The first three moneys are given above.

There were 495 entries, of which 34 forfeited—461 contestants, a number of whom did not finish.

Ninety-four shooters were in the Amateur Championship. First money paid \$226.80—188 breaks, second \$194.40, 187 breaks; 186 paid \$128.60 each, 185 paid \$105.30 each, 184 paid \$81, 183 paid \$64.80 each, 182 paid \$43.20, 181 paid \$32.40, 180 and 179 paid \$12.95 each.

First money in the Professional Championship, 192 breaks, paid \$186, 190 paid \$148.80, 189 paid \$120.90, 186 paid \$80.60 each, 185 paid \$51.15 each, 183 paid \$37.20 each, 182 paid \$6.20 each.

Canada was represented by 14 shooters.

New Gun Club's Reserve.—The Galt Gun Club is now fully organized and has adopted a constitution and by-laws. The club has made temporary arrangements with Mr. George B. McCauley for the use of the lake on Forest Lake Farm, and a club-house is now being erected at the lake side. Boats are also being provided, and when the club headquarters are fully furnished and equipped there will be nothing in the interior of California to equal them. The lake is about six miles long, is already pretty well stocked with fish, and affords a splendid preserve for ducks during the hunting season. It is the intention of the club to add to the supply and variety of the fish now in the lake, which will be made one of the most popular fishing and hunting grounds in the valley.

Game Law Violators.—Deputy Sheriff D. A. Walker of Marin county, who is foreman of the Burdell ranch, in San Antonio, recently caught two local men who killed a deer on the ranch. Mr. Walker came to town the following day and gave the men a chance to plead guilty and thus avoid a trial. The lawbreakers were Dr. Ralph Mazza and Raoul Cantel. The men appeared before Judge N. King of Petaluma and pleaded guilty and paid a fine of \$25 each into the city's treasury.

TRADE NOTES.

U. M. C. Notes.

George W. Maxwell, the well known one-armed shooter, broke 575 out of 600—nearly 96 per cent—at the three-day tournament given by the Missouri Game and Fish Protective Association. He used, as usual, U. M. C. shells. On April 20th, at Steamboat Rock, Ia., he broke 195 out of 200 with his U. M. C. shells.

Send For One.

The latest hanger of the Hunter Arms Company, of Fulton, N. Y., is certainly worthy of mention and high praise, as it is a very artistic and attractive possession for any sportsman. The firm was so pleased with the hanger when it came from the lithographers that they ordered a large supply, and stand ready to send one to any address on receipt of only a quarter.

A Winchester Triumph.

The great American shooting classic—the biggest trap shooting event of the year—known as the Grand American Handicap, held at Chicago, June 18-21, resulted in an overwhelming victory for Winchester shells and Winchester shotguns. The Professional Championship was won by W. R. Croshy, of O'Fallon, Ill., and the Amateur Championship by Hugh M. Clark, of Urbana, Ill., both shooting Winchester "Leader" shells. In the Grand American Handicap, W. J. Maryott, of Fort Collins, Colo., shooting a Winchester repeating shotgun, and an Illinois shooter, shooting Winchester "Leader" shells, tied with one other shooter. The Preliminary Handicap was won by Geo. L. Lyon, with a Winchester shotgun. High average for the tournament was won by Jno. R. Taylor of Newark, O., with Winchester shells and a Winchester shotgun. This remarkable list of winnings for Winchester shells and guns in an entry of 452 of the very best shots in the country is incontrovertible proof of the high merit of these goods, which are growing more popular every year amongst all classes of shooters.

Peters Points.

Among the most remarkable performances in recent trap shooting events was the score made at Columbus, Ohio, during the State tournament, June 4-6, by Master Deskin Reid, a lad of fifteen years, of New Paris, Ohio, in the open championship event. This boy scored 49 out of 50, displaying remarkable nerve and giving promise of great things when he takes on a few years. At this shoot Mr. C. A. Young scored 30 straight in the Ohio State Journal trophy event, and Messrs. Young and L. H. Reid made high scores in the two-man team race, scoring 49 out of 50. All of the above shooting Peters shells.

Mr. E. Holling won high average at the Sacramento, Cal., tournament, May 25-26, breaking 370 targets out of 400 with Peters loaded shells.

L. I. Wade, one of the most remarkable shooters ever produced by the high State of Texas, has been keeping up a very fast pace since he has devoted his time exclusively to the traps. As a sort of preliminary to the Grand American he stopped off at the Lowell, Ind., tournament, June 13-14, winning high average with a score of 370 out of 400. C. A. Young was second with 368, both using Peters shells.

On the first day of the Grand American, Mr. Wade tied for high professional average, breaking 99 out of 100, and Mr. C. D. Linderman of Lincoln, Neb., tied for high amateur average, scoring 98 out of 100. Other contestants making high scores in these events and using Peters shells were W. D. Stannard 98, H. E. Poston 97, Neaf Apgar 96, Miles J. Maryott 95 and C. A. Young 94.

At the Atlanta Gun Club, June 11th, Mr. H. D. Freeman, using Peters Factory Loaded shells, broke 195 out of 200, with a run of 104 straight, winning high average, of course.

Practical and Good.

The attractive catalogue entitled "Dog Culture," which is issued by the well known firm, Spratts Patent, contains practical chapters on the feeding, kenneling and general management of dogs, also chapters on cats. This firm has agencies at Newark, N. J., St. Louis, Mo., San Francisco, Cal., Cleveland, O., Boston, Mass., and Montreal, Canada. For information, the nearest depot should be addressed.

Santa Cruz Fish Notes.—Fish and Game Warden Walter R. Welch is spending these days planting trout fry and more than fulfilling the expectations of intelligent and painstaking work his appointment as county warden augured.

Among the waters already stocked are Corcoran's lagoon with salmon fry—about 20,000. The salmon placed in Wood's lagoon on May 7th have doubled in size.

Recently he went to Eagle Glen to stock Majors creek, and while up the Coast, Eastern brook and rainbow trout will also be placed in Liddell and Baldwin creeks.

After he finishes the Coast he is to stock Tynan Lake, near Watsonville, with Mackinaw lake trout, and the tributaries of Soquel creek with Eastern brook and rainbow varieties.

Warden Welch believes, and in this he has the support of the angling fraternity, that trout fry less than three inches in length should not be liberated—it is almost invariably death to the young fish, for the larger fellows eat them.

STAMINA AND COURAGE IN THE TROTTING HORSE.

Horsemen as a rule are of the opinion that the thoroughbred possesses more stamina, courage and gameness than the trotter and the question regarding the relative merits of the two types in this respect has never been an open one, for few advocates of the trotter have been found when the question has come up for debate. There is very great doubt in the minds of more than one observer concerning this subject, for many reasons can be given which tend to show that justice has never been done the light harness horse in this regard, and that too much credit has been given the thoroughbred. We are of the opinion that the systems of racing the two types of horses tend to prove that the trotter is capable of undergoing greater ordeals than the thoroughbred, for the light harness horse is in no sense pampered or indulged either in his preparation or in his racing. The logical conclusion to any one who studies the breeding of these two types of the equine race is that as the thoroughbred has been produced for a hundred and fifty years with a view of making him carry his great flight of speed as far as possible, and as his blood contains very little that is foreign, he should be gamier than the trotter, whose breeding has been done haphazardly and who not infrequently has more cold or foreign blood than any other kind. A careful survey of the facts, however, will not substantiate the statement that the thoroughbred is gamier than the trotter. In any race in which thoroughbreds take part, a false break, if it includes a run of any distance, is regarded as an accident likely to result in the defeat of the horse making it, for while in every race where the barrier is not used thoroughbreds brush away for a hundred yards, they rarely ever attain a high rate of speed for more than half that distance.

The trotter, on the other hand, invariably scores at top speed, and the distance covered is frequently fully an eighth of a mile. This effort is repeated from three to ten times in each heat, and many a horse has taken the word for what is destined to be a very fast mile, after having scored that distance in eight attempts. The fact that the trotter can withstand such a tremendous task and repeat it for many weeks during the season would seem to refute the idea that his superior in point of gameness is to be found. Whenever a thoroughbred breaks away from the post and covers a quarter of a mile before he is brought to a stop, his owner is found bemoaning his fate or hedging his bet, and if by any chance the jockey is unable to control the horse before a half mile is covered, all hope of victory is abandoned. It can be said and frequently is by way of argument that the high rate of speed attained by the thoroughbred is so much greater than that of the trotter that no comparison can be made concerning the effort that each type of horse is put to, yet it should be remembered that the supreme effort of any horse is bound to have its effect, and it is as great a task for a trotter capable of 2:10 speed to score at that clip as it is for a thoroughbred to break away and run a quarter in twenty-three seconds. In his training and his racing the light harness horse does ten times as much work as does the thoroughbred, and he lasts longer under it and is less likely to be the victim of an early breakdown than the runner. It is extremely rare for even a very fast trotter to stop when in the lead so badly that he is overtaken by a majority of the field opposed to him; yet every day at any race track runners are seen to open a gap, to lead their fields by many lengths and then to blow up and finish last or in the ruck.

Instances are cited whenever the great gameness of the thoroughbred is being exploited of race horses struggling toward the wire after meeting with serious accidents, and while it is doubtless true that McWhorter finished a race on two broken legs, such instances are extremely rare, and the average thoroughbred will stop to a walk even when a misstep makes him slightly lame. A thousand whose shins are bucked will either make no effort to run or will stop to a gallop before the race is over, and the slightest lameness puts him hors de combat. Many instances can be cited of lame trotters continuing a successful campaign to the very end, and who does not remember the heroic efforts of Hal Pointer when he was so lame that it seemed impossible for him to encircle the track? We believe that almost any trotter possessed of a reasonable amount of gameness will finish on his courage, no matter how severe may be his pain, and while he may lose his stride, he will not flinch or give up the struggle as long as his legs stand up under him. Trotters have been known to keep on trying until they fell, and many a horse has broken down in a heat and given no evidence of it until pulled up after the wire was reached. That the trotter is possessed of fully as much courage as the thoroughbred we firmly believe, and we are equally sure that he possesses greater endurance, a stronger constitution and greater determination than the thoroughbred. It is by no means an unusual occurrence for a trotter capable of a mile in 2:10 to race five heats ranging from 2:11 to 2:13 in one afternoon, and to add to this twenty-five scores at approximately his greatest speed.

If there is in the world to-day a thoroughbred

capable of five heats of a mile each of an average of 1:43, his identity has never been disclosed, and we feel sure that if such a task were put to the greatest race horse in training and he was forced to break away and run an eighth of a mile at top speed a half a dozen times before each heat, he would either die from exhaustion or would finish his last mile in a walk. It is very true that thoroughbreds are put to different uses than those employed by the light harness horse, yet this is no reason why the wonderful courage, gameness and endurance of the trotter should fail to meet with the proper recognition. If it is a fact that the trotter is no less game than the thoroughbred, it would seem unreasonable to attribute the courage and endurance of the harness horse to his remote thoroughbred ancestry, and that such a claim by the advocates of the thoroughbred blood in the trotter is not a sound one can be proved by the innumerable examples of game trotters whose ancestors were without a drop of thoroughbred blood. Many advocates of thoroughbred blood in the trotter attempt to bolster their arguments by citing instances of great performers at the trotting gait whose remote ancestors came under the head of thoroughbreds, yet entirely overlooking the fact that these ancestors may have been absolutely worthless as race horses or sires. We can see little advantage to be derived from an infusion of thoroughbred blood that carried with it no merit, for we have known many worthless thoroughbreds, and the Stud Book contains many families without the slightest capacity. Whenever a controversy arises over the merits of the two strains of blood, the argument is advanced that because some famous trotter is descended from a remote ancestor who was himself a thoroughbred much of his merit, both as to speed and gameness, should be attributed to the blooded horse; yet while we believe firmly in heredity and the influence it has in the reproduction of any form of animal life, we cannot reconcile ourselves to the theory which teaches that remote ancestors have a stronger influence than top crosses.

Trotting blood is that quality which predominates in the pedigree of a light harness horse, or that which he inherits from one or more ancestors who were themselves trotting bred, and any horse whose top crosses were performers with capacity must inherit the characteristics of these antecedents to a greater degree than those of some remote ancestor. A trotter whose sire was a performer and whose paternal ancestors were full of trotting blood, whose dam is equally as well bred in trotting lines, must necessarily feel the influences of these crosses to a greater degree than those of a fifth dam or of a great-great-grand sire, and consequently it would seem illogical to attribute the success of the modern trotter to the blood of Diomed or even Messenger. While it is very true that a vast majority of the greatest performers of to-day are descended from the thoroughbred horse, the percentage of the blood of this remote ancestor is so small as to be almost incalculable, and being so slight, can have little effect in changing the influences of the sire of dam, or grand sire or granddam. If a trotting horse carries in his veins 90 per cent of trotter blood and 10 per cent of thoroughbred, is it not reasonable to attribute his success to the greater rather than to the less inheritance. If a trotter is influenced by the blood of a remote ancestor who was a thoroughbred, he certainly is influenced in the same ratio by the blood of the ancestor of the thoroughbred, who was a Barb; and yet no intelligent breeder would care for the Arab strain close up in his horse's pedigree.

The thoroughbred of to-day carries in his veins such a small percentage of Arab blood that it is not even considered. He has gone on from generation to generation, has been bred and inter-bred until he has founded a family of his own, a family superior to any other for the purposes for which he is intended, therefore it would seem folly to ignore the lesson that has been taught in the production of the thoroughbred, in breeding the light harness horse. The gait of the trotter is diametrically opposed to that of the thoroughbred, and while the functions of each are similar, the instinct to gallop must be bred out of every horse with thoroughbred blood in his veins, and the instinct to trot accentuated. To do this trotters should be bred to trotters, alien blood should be bred out and trotter blood increased until its influence is the only one felt.—Kentucky Stock Farm.

THE KICKING HORSE.

Another cure for a stall-kicking horse comes from Virginia. When the horse begins to kick, slip quietly to the door or partition nearest to him and pound on it with an ax, being careful not to let the horse hear your voice. It is said that this treatment may have to be repeated more than once, but as it does not cost anything repeated applications can be readily tried. It is affirmed to be a "sure cure" by our Virginia correspondent.

It may be. But personally we believe that a horse that has kicked once will kick again. We have watched the professional horse-breaker do really wonderful work in subduing refractory, unruly, vicious and kicking horses, and we have seen the swift foot shoot out in a well-directed kick when the eye of the master was withdrawn or his tension on the reins relaxed. Doubtless horses have been broken of kicking, but we would not trust a "cured kicker" as far as we could throw a cat by the tail. It may be possible to cast out seven devils, but this one kicking devil is very hard to dispossess. The kicking horse is safest when dead.

THE HARVEST NOT FAR AWAY.

Barely a few weeks until the first meeting of the Grand Circuit for the season of 1907 opens at Detroit. The outlook for the horses that will be raced in the Grand Circuit are just as bright as are the conditions that should make every meeting of the circuit a successful one and a financial success. It should be a profitable season for the horses, as both class races and early closing purses are liberal and the opportunity to win money was never greater. In the early closing purses offered by the respective associations, horsemen responded very generously with entries, so that there seems to be a winning combination, so far as good intentions go for the season. The meeting at Detroit always attracts attention for the one reason at least, that two big stakes are to be raced for and there is always glory as well as money for the owner whose horse can capture either of these races. The M. and M. serves as a preliminary test of the season's trotters, as those who show up conspicuously in this event are most always prominent at the meetings which follow. The last two or three seasons may have been exceptions to this rule, but it was formerly true, and may be again this season. Two trotters are very prominently mentioned for this rich stake—Highball, in the Geers' stable, and the fast California trotting mare, Sonoma Girl, who has a matinee record of 2:07. From what one hears from both of these fast trotters, neither is lacking in speed capacity. Highball was recently purchased for some \$17,500, and being in the stable of so skillful a trainer as Mr. Geers must be something out of the ordinary as a trotter. Sonoma Girl has her matinee record to distinguish her. Highball was once a cast-away and has never been raced, while Sonoma Girl has been troubled with lameness, although she is now reported as going sound. A good many things may happen in the next six weeks and it may be that neither of the above named contestants for first honors, in Detroit's classics, will be able to start when the time comes. Some of the other entries have, for various reasons, fallen by the wayside. Others will fall out until the field is reduced perhaps to some ten or twelve. The bad weather has precluded any fast work by the other eligibles. If the weather becomes good, which it surely will, some others are likely to show up, which may change the complexion of affairs, so far as the favorite is concerned.

The favorite in the Chamber of Commerce will likely be one of the several entries who was raced last season, and not one of those that has no record or is green. The change of the class from 2:24 to 2:13 will make some difference in the complexion of the race and in the selection of the favorite. One of the interesting features of this race heretofore has been that it usually uncovered some green pacer, that often became a sensation and the largest money winning pacer of the season. No doubt there will be several high-class green pacers start, but whether they have a chance to win against horses of more experience in the racing game remains to be seen. It was thought that the change of class for the Chamber of Commerce would result in a larger number of entries. It is probable that had the conditions remained the same, the entries would have been just as large.—The American Sportsman.

FOREST RANGERS.

Examinations for the position of forest ranger will be held at the supervisor's headquarters of every National Forest on July 23 and 24. Forest supervisors will conduct the examinations. The Civil Service Commission, at Washington, D. C., is sending specific information on the examination to all who write in and request it.

Experience, a thorough knowledge of forest conditions, and a sound body, rather than book education, are the qualities sought in examining applicants who desire to become forest rangers. The man must have the ability, however, to make simple maps and write intelligent reports upon forest business connected with the position.

A ranger must be sound of body and able to take care of himself and his horses in regions remote from settlement and supplies. Necessary qualifications of applicants include knowledge of trail building, construction of cabins, and the ability to ride, pack and deal tactfully with all classes of people. He must know something of land, surveying, estimating and scaling timber, logging land laws, mining, and the livestock business. The applicants should be thoroughly familiar with the region of the country in which he seeks employment. In Arizona and New Mexico, the ranger must know enough Spanish to conduct forest business with Mexican users of the National Forests. Personal equipment and horses for use in connection with duty of a ranger are furnished by the rangers themselves and not by the Forest Service.

Working under the direction of the forest supervisor, the ranger's duties include patrol to prevent fire and trespass, estimating, surveying, and marking timber, supervision of cutting and similar work, all of which a man thoroughly familiar with forested regions and possessing a fair education is able to fulfill. It is the policy of the Forest Service to fill vacancies in higher positions by the promotion of rangers rather than by the appointment of men without experience on the National Forests, although otherwise well fitted.

THE FARM

OFFICIAL CALL OF FIFTEENTH NATIONAL IRRIGATION CONGRESS.

An advance copy of the official call of the Fifteenth National Irrigation Congress has been received by the Breeder and Sportsman. It is issued from the headquarters of the Congress at Sacramento, California, and announces that this important convention will be held in that city September 2-7, inclusive, next. The document recites the purposes of the Congress, invites the appointment of delegates by organized bodies of all kinds and announces special railway rates over all railway lines to California. An Interstate Irrigation and Forestry Exposition, the California State Fair and special harvest excursions over California are among the entertainment features promised those who attend.

The purposes of the Congress are declared to be "Save the forests, store the hoods, reclaim the deserts, make homes on the land," and all who are interested in these objects or in any of them are invited to participate in the deliberations and thereby contribute to a wise direction of national policies and development of practical methods of conserving and developing the great natural resources of the country.

The personnel of the Congress, as stated in the call, includes the President and Vice-President of the United States, members of the Cabinet, Senators and Representatives, Governors of States and Territories, members of State and Territorial Legislatures and State Irrigation, Forestry and other Commissions. Delegates may be appointed by Governors of States and Territories, Mayors of cities, county governing boards, official and unofficial public bodies, and organizations of every kind including agricultural, horticultural and commercial, as well as boards of trade, chambers of commerce and development associations.

The Interstate Exposition of Irrigated-land Products and Forest Products will be held simultaneously with the Irrigation Congress. The largest and finest list of trophies and prizes ever offered will stimulate competition. The California State Fair will follow the Congress with joint opening and closing ceremonies attended by a great irrigation celebration, the day closing with a magnificent allegorical irrigation parade and electrical illuminations.

Special emphasis is laid upon the opportunity afforded by this Congress for the study of irrigation, irrigation practices and results, irrigated crops of every kind and irrigation opportunities. Sacramento is situated near the center of the great valley of California, which extends lengthwise through the State a distance of nearly five hundred miles and comprises approximately nearly ten million acres of fertile land. Colossal plans for the construction of storage dams, and distributing canals for the irrigation of this great plain are now being made by engineers of the Reclamation Service and money has been apportioned from the Reclamation Fund for the construction of an initial unit of the great system contemplated.

Special excursions will enable delegates to see California. These will cover the Sacramento and San Joaquin Valleys, the mountains, the copper belt, the vintage districts, the redwoods, seacoast and mountain resorts, orange and lemon districts and irrigated districts. Special railway rates to California will prevail over all the trans-continental lines.

Poultry, bees, fruit and the garden are the big four that place many an extra dollar in the hands of the farmer and his wife. On five acres the wife and children can make as much money from the poultry, fruit, honey and chickens as the farmer does on the rest of the farm. Do not overlook these seemingly little things, but assist the wife in paying strict attention to their needs.

SUGGESTIONS FOR CATTLE FEEDERS.

[Chicago Breeders Gazette.]

In cattle feeding it is highly important to start right—to build upon the right kind of a foundation. There is a trite but true saying to the effect that you cannot make a silk purse out of a sow's ear, and this is nowhere more forcibly exemplified than in the business of fattening cattle for market, many a man wasting his time and labor in feeding a class of cattle that can only return him minimum profits, instead of the maximum return which must be the aim of every successful producer. The proposition cannot be successfully contested that for the largest profits and best results generally it is necessary to select a good grade of feeders, and in making this statement we do not lose sight of the fact that cheap and inferior grades, if handled rightly, can also be made to produce satisfactory profits. Nevertheless, the first and greatest rule with nine out of ten of the best and most successful cattle feeders is to feed only well bred, carefully selected cattle.

By way of illustration we cite the sale recently made by our firm for C. L. Kolb of Iowa of seventeen head of very good quality, well fattened grade Short-horn steers, averaging 1,520 pounds at \$6.50, topping the market 20 cents per cwt. over all other sales that day. These cattle were of Mr. Kolb's own feeding. They had been on feed something less than six months, and their condition and the prize realized for them show very forcibly what a good feeder can accomplish if he has the right kind of cattle to build upon. In passing it may be of interest to note that a few weeks ago Mr. Kolb also had a drove of steers, which topped the market at \$6.75 over all other sales that day.

Cattle of good breeding, quality and proper conformation mature much more quickly than the scrub sorts, and it does not cost nearly so much to fatten them. There is not so much bone to cover up, and the type of steer that is "built for feeding" lays on flesh in a way that his inferior brother does not. About the only way that steers of common quality can be fattened to any advantage is to give them a short feed. Up to a certain point they will put on flesh fairly satisfactorily, but after the "dead center" is passed they can consume an astonishing amount of corn without making much further gain. If a man wants to feed cheap and inferior cattle his best plan is to buy them in the late summer or early fall, as he can carry them through the fall months on feed which costs practically nothing, such as fall pasture and, later on, stalk fields, giving them just enough corn during January and February to keep them gaining, and getting them on full feed say about March 1st and feeding out for market any time between the middle of May and the middle of July, during which period light-weight beefs are in most demand, as they suit the warm weather trade and sell relatively better than heavy-weight cattle that cost anywhere from 50 cents to 75 cents per cwt. more to produce. On the other hand, cattle of good quality can be fed to advantage for marketing any time during the year.

As a contrast to the \$6.50 cattle mentioned we sold on the same day a drove of common Minnesota steers, averaging 1,298 pounds, that had been fed seven months, at \$5.40, a very good price, considering their class and quality. The man who bought the \$6.50 load, which had been fed less than six months, but had the quality, would not buy the other load at any price, neither would any of the other buyers who had orders for good cattle. The result was that the owner of the \$5.40 cattle was quite disgusted with the outcome and remarked that he would not feed any more cattle if he could not get a better price than that, oblivious of the fact that the fault was with himself; that had he put into his feed lot the right sort of cattle in the first place, even at a considerable higher original cost, he too, could have had the satisfaction of seeing his cattle sell right up to the top of the market. The difference of \$1.10 per cwt. in the selling price,

with about seven weeks shorter feed, furnishes an eloquent commentary on the advantage of feeding the right kind of cattle. It is of further interest to note that the \$5.40 load, after a seven months' feed, weighed 1,298 pounds, while the \$6.50 load, fed less than six months, weighed 1,520 pounds. Of course, the latter were probably heavier to start with, but in addition to that they made a much more rapid gain and put on more pounds of flesh per head than the others.

We had on a recent market six or seven loads of common quality cattle which had to sell at low prices for the simple reason that they were not the kind that the majority of the buyers wanted, consequently attracted only limited competition. We explained personally to each owner the advantage of securing the right sort of foundation to build upon in the first place. The foregoing remarks are prompted by what we see on the market every day, and by the desire to place before our customers information that will, if acted upon, increase their profits.

CHAS. O. ROBINSON.

MARKETING LIVE STOCK.

In discussing the marketing of live stock, and especially relating to the subject of post-mortem inspections, the National Stockman and Farmer offers some valuable suggestions as follows:

The present system of marketing live stock has been evolved after many years of effort by sellers, buyers, transportation companies and the supervising government. It has some drawbacks and difficulties, as any system will have, but, as a rule, it has been satisfactory to all concerned. The seller has a cash market for all stock; the buyer has a constant supply without violent price fluctuations; the transportation companies get their shares both ways from the central market point. But a situation has arrived which threatens to revolutionize the system and which promises endless trouble. It is proposed by the slaughterer to buy subject to post-mortem inspection. This means that the seller receives his returns after the stock has been slaughtered, thus delaying and hampering him in his business: that he must buy in the country as he sells on the market, subject to post-mortem inspection, and anyone who knows how stock is bought and sold in the country will readily realize what opportunities there must be for trouble in such trading.

Theorists argue that the shipper should bear the loss because he has sold the diseased cattle. But he should not bear it, because he, like the slaughterer, is an innocent purchaser. The producer of diseased cattle should bear the loss, and that is where the trouble arises. Stock changes hands often, and to attempt to fix the loss on the individual producer is impracticable, however just it may be. There is no way to avoid some loss to all concerned, and the only question is how it can be handled so as to least interfere with trade. The packer kills thousands of animals and knows or can know the number of condemnations. He should buy accordingly, and make allowance for these losses just as he makes allowances for other losses in his business. Ultimately he will place it where it belongs, on the producers, by paying a price that enables him to make this allowance. With the most expert buyers, the most perfect business system, and, such a large influence on the market for live stock, he should be in a position to handle this matter, and to do so without interfering with our present satisfactory system of marketing live stock.

One of the greatest drawbacks to the long harrow is the fact that it will "wobble" when the horses are hitched in the middle. That is, first one end will swing forward and then the other. The latest device for overcoming this defect is to attach a pulley to either end and run a rope through both of these and attach a two-horse double-tree on either end of the rope. In this way there is an equalization of draft between the four horses and at the same time the "wobbling" tendency is prevented.

DRAFT MARES ON THE FARM.

In the way of horse flesh the best property for the farm is a choice lot of draft mares for breeding purposes. Many farmers breed to the best horse in the country, but do not give the mare the consideration she deserves.

A good mare on the farm will eat no more than a poor one. A good mare's colts are worth \$50 to \$100 more per animal than the poor mare's. The good colts are as cheaply grown as the poor ones, and the satisfaction one gets out of being at the top cannot be computed in dollars and cents.

An old horseman's advice is to go into horse breeding when the prices are down. Low prices are always succeeded by higher ones; as sure as the pendulum swings to the right it goes back again to the left—one extreme always follows another.

In these days of plenty the market is up. It is up where horses are commanding their actual value—no more, no less. The impetus given the business by the hundreds of importers is being felt. Prices will go higher and higher.

When good teams of 1900-pound colts bring \$500 upwards they are none too high in price. Teams of broodmares are worth \$600 to \$1200, the exact figure depending on breed, whether they are registered or not, size, age, color, conformation and soundness.

A team of pure bred draft mares on the average farm are worth say \$500, they being of good color, size and bone, free from blemish. Each mare will raise a colt that will bring \$150 to two years of age, ordinary skill and attention being given them.

Is the investment worth the profit? This depends on the man behind it.

The high figures for good mares are causing many farmers to let their best farm animals go. Farmers should hold to them and continue breeding. In the course of time any breeder would get too many mares on his farm and then is plenty of time to get rid of the surplus.

When he has more mares than he can care for satisfactorily then he has a chance to show his skill and knowledge of the breed by selling those that do not reach the ideal he has set for himself, or the standard of the breed.

In the Central West where farms are of such a large average size every farmer might keep three or four teams of good mares. They would not need to be out of work more than thirty days annually because of their foals.

The man who makes horses pay a good profit knows a good animal when he sees it. He knows the value of care, keeping them in good coat, feet in perfect shape and good feeding. He understands that horses develop best in kindly hands.

They should not be driven off a walk, as at this gait they show off best and display their worth. Clean, free-action, good limbs and feet are important. In fact, they are the first qualifications essential to a good one.

Drafters continually pounded along at a trot do not learn fast, nor clean, free walking and in addition are harder to keep because the gait and its attendant worry are conducive to knocking off the flesh.

Breed for better drafters by improving the quality of the mares by rigid selection. When breeding them to imported horses make sure that you know the horse. Too many of the imported stallions are the cast-offs of France, England, Belgium and Germany.

The systems of government supervision in horse breeding in those countries are such that poor horses—those of blemish, poor breeding and not characteristic of the breed they are from—cannot stand in public stud. America gets the majority of the best cast-offs, hence know the animal you are breeding to. The average price paid for imported horses in Europe is low. Ask the Bureau of Animal Industry, Washington, D. C., for their statistics. These will open your eyes indeed.—Farm World.

Eggs should be set as soon after they are laid as possible. It is also a good practice to set the eggs which were laid on the same day the incubator is set. The hatch will be more uniform.

Carrots are often looked upon as a kind of delicate food for sick horses. If a horse is out of sorts and off feed, refusing almost everything and eating with the greatest indifference and carrots are offered they are eaten at once with much appreciation. They help to restore the appetite and give condition to the horse. In these respects carrots are invaluable and may well be looked on as safe correctives. But their usefulness extends beyond the period of sickness and depression and horses in health may receive them frequently as a good food to maintain condition and activity. When first given their effect is a little laxative, but this is desired in many cases and once given regularly, they act as qualifying food. They are an excellent food for itching horses and all in had coat, as they are cooling to the blood and give a glow to the hair. Horses of all ages may receive them, including even the youngest backward foals. Carrots should not be looked on as mere additions to other foods, but substitutes for them, as they are quite capable of acting as real food. They should be pulped and mixed with grain or chaff. Twenty to thirty pounds a day is a good allowance.

Every intelligent man can make dairying pay because intelligent methods always win.

The "hook-farmer" who puts his learning into practice will make dairying pay where the other fellow, who derides so-called "book-farming," will fail.

"SAVE THE HORSE" SPAVIN CURE

Registered U. S. Patent Office

Makes a Tendon Like a Rod of Steel

Makes money winners out of cripples; age of horse or age of lameness makes no difference. It will strengthen, repair and cure any broken down, weak or injured condition of the tendon; it infuses strength and acts as a permanent bandage to the parts.

It is the only remedy of its kind ever conceived, and the only one so positive and successful as to warrant selling under a signed guarantee to refund money if it fails.

"SAVE-THE-HORSE" Permanently Cures Spavin, Ringbone (except Low), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse works as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy, booklet and letters on every kind of lameness.

At Druggists and Dealers or Express Paid.

141 Valencia St. San Francisco

FOR SALE.

The Handsome Standard Bay Gelding, Hondras.

Nine years old, by Prince Nutwood 2:11 1/4, dam by Strathway. Stands 16 1/2 hands and weighs about 1225 pounds. Has worked miles in 2:24, quarters in 33 seconds with six weeks' training. He has never been injured since, but was used on the roads at Palo Alto. He is good gaited, wears no boots, does not pull a pound, absolutely sound, afraid of nothing, a lady can drive him with perfect safety. W. H. Williams had him in training and says that he looks like a 2:10 trotter. He is a remarkably good individual in every respect and a high class roadster and matinee horse.

Will also sell a good Studebaker buggy and a McKerron harness. The above will be sold on account of the owner leaving for Europe. Horse can be seen at Hans Frelson's Stables, Twenty-fourth Avenue, near the Casino. For further particulars address this office.

Seldom See

a big knee like this, but your horse may have a bunch or bruise on his Ankle, Hock, Stifle, Knee or Throat.

PETERS SHELLS WIN!

At the tournament of the Pacific Coast Trap Shooters' League, San Francisco, May 10-12, HIGH GENERAL AVERAGE was won by Mr. Otto Feudner, shooting Peters Factory Loaded Shells. He also won the Dupont Trophy, 24x25, and in the 100-bird race, the high score was made by Mr. J. E. Vaughan, with Peters Shells. Other recent winnings made with this ammunition are:

212x215—At Veedersburg, Ind., April 18, made by C. A. Young, winning HIGH AVERAGE.

513x545—At the Texas State Shoot, Mexia, Tex., April 24-26, by Mr. L. I. Wade, winning HIGH AVERAGE.

48x50 —At the Texas State Shoot, Mexia, Tex., April 24-26, by Mr. Carter, winning CHRONICLE TROPHY.

190x200—At Freehold, N. J., April 18, by Neaf Apgar, winning HIGH AVERAGE

50x50 —In the Individual State Championship Event at the Texas State Shoot, April 24-26, by L. I. Wade, being the ONLY STRAIGHT SCORE.

362x380—At Chanute, Kansas, April 19-20, made by Ed. O'Brien, winning HIGH AVERAGE.

113 Straight—By L. I. Wade, at Mexia, Texas, April 25, being the LONGEST RUN.

The Championship of the United States

PROFESSIONAL AGAINST PROFESSIONAL
THE BEST PITTED AGAINST THE BEST

All contestants standing at the long range of 18 yds. This great race for the Championship of the United States, held at Chicago during the week of June 16, 1907, was won by W. R. Crosby, shooting the PARKER GUN, with a score of 192 out of 200 targets shot at—96 per cent.

THE PARKER GUN

The next highest score, 190 out of 200 targets shot at—95 per cent, in this same great championship event, was made by Fred Gilbert, also using the PARKER GUN.

This greatest contest of professionals shows positively the pattern and center of the gun. The PARKER GUN shoots where you look. The proof is evident. Surely the OLD RELIABLE, when put to a severe test, proves what we have always claimed—that the PARKER GUN outshoots them all. Send for Catalogue.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c, 50c and \$1.00

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

Wanted-

AGENTS AND CORRESPONDENTS WANTED IN EVERY TOWN ON THE PACIFIC COAST FOR THE "BREEDER AND SPORTSMAN."

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. J. H. Davenport, a prominent physician of Sheridan Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly and it has proved a remedy without hesitation. It is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc.

PRIVILEGES FOR SALE

TROTTER HORSE BREEDERS RACE MEETING.

SANTA ROSA

August 14, 15, 16, 17, 1907

Bids for the following privileges will close August 1, 1907:

BETTING (Auction and Mutual Pools. PROGRAMMES. CANDY, FRUIT, NUTS and ICE CREAM.

Bids should be accompanied by a check for 50 per cent. Right reserved to reject any or all bids. Address

F. W. KELLEY, Sec.,
616 Golden Gate Ave., San Francisco.

HORSE EDUCATION.

Position wanted on stock farm or in sales stable by a highly competent horse educator. Method for breaking every bad habit a horse has. Eastern man. First class references. Address

R. S. PRUYNE, Address
708 Buchanan St., San Francisco.

RUBBEROID ROOFING

Weather Proof, Acid Proof, Fire Resisting.

BONESTELL, RICHARDSON & CO.,
473-485 Sixth St., San Francisco, Cal.

FOR SALE CHEAP.

Gray mare, six years old, by James Madison; first dam Bessie Bell by St. Bel; second dam Belle B. by Belmont (son of Lexington); third dam Infallible by Lightning. See Bruce's American Stud Book. A very fast mare, can show now a half in 1:04 and a quarter very close to 30 seconds, trotting. Is not keyed up to a fast mile, but can convince any one she is a 2:10 trotter.

Also a bay gelding, five years old, by James Madison; first dam by Albert W.; second dam by Algona; third dam Mabel by The Moor; fourth dam Minnehaha. This horse has had very little work, but can show a half in 1:06 and is one of the best prospects in this country. Can be seen at work at Agricultural Park, Los Angeles, in charge of Walter Maen, or address

L. J. ROSE, Jr.,
Ornard, Cal.

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco
Postoffice.Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCEMoney should be sent by Postal Order, draft or letter
addressed to F. W. Kelley, P. O. Drawer 447, San Francisco,
California.Communications must be accompanied by the writer's
name and address, not necessarily for publication, but as
a private guarantee of good faith.

A LAW that should be changed because it is seldom enforced is section 1 of rule 2, which reads as follows: "All entries must be made in writing, signed by the owner or his authorized agent; and, within the time appointed for closing, they must be addressed and forwarded according to the published conditions, or deposited with the secretary or other person authorized to receive them. The entry shall give the name and address of the owner, and, if signed by an agent, the name and address of said agent; also the name and color of the horse, whether a stallion, gelding or mare, the name of the sire and the name of the dam, if known; if unknown, it shall be so stated in the entry. If any of these requirements are not complied with, the offending party shall be fined not less than \$5 or more than \$50 for each offense, and if the facts are falsely stated for the purpose of deception, the guilty party shall be fined, suspended or expelled." There is probably not a meeting held anywhere in the United States, but entries are accepted which are not up to the requirements of this rule. Secretaries hate to lose an entry on account of an omission or two, and hate to fine where they feel there is no wrong intended. All trainers and owners do not have clerical ability, and filling out an entry blank properly is to many of them almost an impossibility. The rule should be changed so that secretaries will be barred from accepting entries that are not made according to it. This would cause them to lose a few entries the first season after its adoption, but there would be no trouble thereafter.

THE FIRST RACE of the season in which the two most talked about M. and M. candidates met, was trotted at Libertyville, July 4th, when Highball and Sonoma Girl, starting for a purse of but \$400, trotted so fast that the winner broke the world's record for green trotters by winning the heat in 2:06½, with the California mare only a length and a half behind him. She must have beaten her Los Angeles mile (2:07) in this heat. The second heat was in 2:08, with Highball again a winner, but the Lynwood W. mare was right at him, and all the turf writers agree that but for Highball, she would be the greatest green trotter that ever started. Both these trotters are entered all down the line of the Grand Circuit, and will meet at nearly every meeting. It may be that the California mare will improve, and lower the colors of this trotting wonder for which \$17,500 was paid but a few weeks ago, and over which Ed. Geers, the master reinsman of America, holds the lines. Mr. J. D. Springer undoubtedly has in Sonoma Girl one of the grandest trotters this State has produced, and that he, who is not really a professional trainer, as he only trains his own horses, should make such a drive against Ed. Geers and Highball, entitles him to high praise. One week from next Tuesday Geers and Springer will again meet in the great M. and M. \$10,000 race, and there will probably be a dozen more in the race. At this distance it looks as though the race for first money will be between these two, with Highball the favorite. That it will be the fastest M. and M. ever trotted is pretty certain, and the stake's record of 2:08¾ made in the race when the California bred Dexter Prince mare won the third and final heat of the 1901 contest, should be lowered at least three seconds should Highball and Sonoma Girl get off in front the first heat.

THE TROTTING HORSE PAPERS should get their pictures of Sonoma Girl ready. She'll just about trot in 2:05 before the season is over.

THE MONTEREY FAIR and race meeting will open at Salinas one week from Wednesday next. A four days' program of harness racing has been provided and as the horses entered are of higher class than have started at Salinas in many years, the largest attendance ever seen there is confidently expected. Salinas is a pretty town of nearly 5000 inhabitants, with excellent hotels and restaurants, so that accommodations can be had by all who attend. The mile track at Sherwood Park, just outside the town limits, is one of the safest and will be one of the fastest trotting tracks in the State when the races are called. President Iverson and Secretary John Kelly of the Monterey Agricultural Association are well and favorably known to all horsemen who have ever visited Salinas, and can be depended upon to do everything in their power to make the stay of the visitors pleasant, while that popular trainer and futurity winner, Chas. Whitehead, who is lessee and superintendent of the track, will attend to the wants of all those who will have horses at the track. Those who wish to enjoy a few days recreation should not fail to be at Salinas on Wednesday, July 24th, to see the first race on the card, and to remain during the rest of the week.

THE PENALTIES inflicted by the courts on automobilists for running over people are not severe enough. In addition to fining them heavily, where gross carelessness is proven, this should be added to by taking away the license of the person running the machine. Too many accidents are occurring, and in a majority of cases the machine was running over the speed limit, and the chauffeur paying little or no attention to the rules of the road. Taking their licenses away will put these fellows where they will be less dangerous, and the fear of losing their occupations may deter them from riding the roads like a cyclone.

DERBERTHA 2:07¾, one of the famous Chas. Derby-Bertha family, to which belongs Don Derby 2:04½, Diablo 2:09¾ and many more fast record holders, is dead at Cleveland, where she suddenly succumbed to influenza last Thursday. She was owned by Robt. Niles and trained by Dr. A. W. Boucher of Pleasanton, who confidently expected her to be a big money winner this year. She was entered all through the Grand Circuit, and up to the time of her illness was in fine condition and faster than ever.

SECRETARY FILCHER TALKS TO EDITORS.

J. A. Filcher, secretary of the State Agricultural Association, addressed the California State Press Association at its annual session at Tahoe Tavern, says an exchange. His object was to explain to the newspaper men the lines on which the Fair is at present being conducted and to enlist the association and co-operation of the press of the State.

Mr. Filcher said that at present the association was working on lines radically different from those of the past. It was aimed to make the State Fair similar to those held in the Eastern States, where the farmers and fruit raisers could exhibit their products; where fine stock could be on display, and where races could be run without pools being sold on them. He said the directors had decided to allow no pool selling and no liquor selling in the Fair grounds.

"The sports laughed at us," said Mr. Filcher, "when we announced our policy, and they said we couldn't run a fair successfully on those lines. We told them that we were going to run it without gambling and without whisky, and we are convinced that the people of the State, when they understand the matter, will approve our policy in this respect, and that the annual State Fair will grow in popularity from year to year.

"At the present time the applications for space from the various counties are far ahead of what they were for the corresponding period in previous years. We want to get all the counties interested, so that it will be a real State Fair. Heretofore some people have said that it was merely a Sacramento proposition, but we intend to have it so that the farmers of other sections can show their big pumpkins in competition with the big pumpkins raised near Sacramento.

"We want the newspaper men of the State to understand thoroughly that we are emphatically in earnest in our stand to have no pool selling and no whisky selling. We intend to win or lose on a high moral basis. Not only will there be no saloon privileges granted on the grounds, but we will issue no return checks, and by that means hope to prevent people from going outside the grounds to patronize

the saloons. We are not against horse racing, for we believe it is legitimate for farmers to raise fast stock and to exhibit their running qualities as well as their other good points, but we want this done without pool selling or bookmaking.

"We are greatly desirous of enlisting the co-operation of the women in the State Fair, and would like to have a woman's building. We find that this feature is doing more than any other thing to build up the Fairs in Eastern States."

In conclusion Mr. Filcher said: "If the policy we have outlined and intend to maintain meets with the approval of the representatives of the press, we would like to have your formal endorsement if the same."

The following resolution was adopted unanimously: Resolved, That the California Press Association, in convention assembled, endorses the efforts of the present management to enlarge the work and influence of the State Agricultural Society and eliminate the gambling and drinking features from its Fairs, and we pledge our support to all legitimate efforts to build up the institution and improve the Fairs until they shall be not only clean, but representative of all the industries of the State."

RUSSIAN RACING.

Says the Louisville "Courier Journal:"

George Lindenberg of this city is in receipt of an interesting letter touching upon turf conditions at Moscow, Russia. It was written by C. S. Lyon, formerly of Louisville, who is training for G. Ouchkoff, one of the leading horsemen of the land of the Czar. Mr. Lyon says:

"This country is totally different from any I have seen. It is like being in another world. Moscow has more than 1,000,000 inhabitants. I believe it is one of the greatest racing centers in the world. They have racing here most all of the year. The tracks are closed only a short time in the spring and fall.

"At present there are 4,000 horses racing and training at Moscow. The purses here are in a majority larger than those in America. It is possible for a trotter to win \$75,000 in one year.

"The Moscow plant is the finest in the world. The grandstand cost more than a million dollars. There are three tracks in connection with this plant. Two of them, made of natural soil, are used for exercising horses. The other is for racing. It is made of stone, which extends into the ground two feet. This stone is covered with sand and loam. It never gets slippery. Seventeen trotting races take place every afternoon, Sunday included. Sunday is the biggest day of all, for then the big stake events are run. The trotting races enthrall the Russians to the highest degree. These people do not think so much of running races.

"There are four betting rings. Women mingle with the men, and the way they back their choices is amazing. It is a sight to witness the bettors, for the races are only twenty minutes apart. Most of them are dash races of various lengths. All are run right on the minute. The attendance, like the betting, is beyond belief. The association in charge of the track realizes 10 per cent rake-off from the ring receipts and this revenue amounts to an enormous sum. The association nets \$1,000,000 a year. One of the features of the races is the music. It is grand.

"There are 200 men employed on the track and grounds. This does not include the employes in the track restaurants, etc. Laborers receive only a few copecks (a copeck is about six cents) a day. Everything is done by hand. One morning I counted forty-eight men picking stones off the track. Order in all things is the rule of the day.

"There are 300 trainers here. Among the number are about ten Americans. The Russians knew little about training horses until the Americans showed them. However, they are quick to learn. The game is harder now than it was ten years ago.

"Considering the track and the weight they draw (216 pounds), I believe some of the half-breed horses here are as good as some of the best horses in Kentucky. But the full-blooded Russian horse is inferior in everything except looks.

"Spring is backward (April 12). Generally it is about two weeks from snow and ice to good weather. This is the strangest country you can imagine. It is the land of the greatest luxury and extravagance for the rich and the greatest poverty and misery for the poor. The government imposes an enormous tax on almost everything, and is bleeding the people, rich and poor alike, for all it can get. Some things made here are cheap. Food is three times higher than in America. Everybody almost, it seems, is talking against the government. It is only a question of time until something occurs. That is will occur is sure, but when is guess work.

"C. S. LYON."

The carts and sulkies sold by W. J. Kenney from his shop at 531 Valencia street this week would fill a car. Lou Matvia of Dixon purchased a cart to work his fast pacing stallion Alton in, William Hamerton of San Francisco took a cart, Charles Mitchell of the M. and M. did the same, the Honolulu trainer, McManus, who is training Nazon for the Pleasanton races, bought a sulky, Al Hoffman and Mr. Kloter of San Francisco both bought sulkies, Mr. T. Argente purchased a road buggy, Capt. Olsen took a speed cart, and Schuyler Walton of Athasham fame had a sulky shipped to him at Fresno. Kenney has been busy.

HIGHBALL BEATS SONOMA GIRL.

Breaks World's Record for Green Trotter by Heat in 2:06 1/4.

[H. T. White in Chicago Tribune.]

Highball, the gelding for which Frank G. Jones of Memphis gave \$17,500 a few weeks ago, the highest price ever paid for a "green" trotter, made the judgment of his new owner look good July 4th when he trotted the opening heat of his race at Libertyville in 2:06 1/4, lowering the best previous record for a trotter during a first season on the turf, the 2:07 1/4 of Lord Derby.

It was the famous California mare, Sonoma Girl, that made Highball do the trick, and she was second in each of the heats, the time of the second mile being 2:08, while three other horses of ordinary speed plugged along as best they could, far behind the flying leaders.

Not only was the mile by Highball a record breaker in respect of the time made, but it was made more impressive by the fact that race horses are not at their best until later in the season. More than this, the Memphis trotter was never "stretched" during the mile, and under the guidance of Geers he simply played with Sonoma Girl, letting her make the pace for the first quarter, which she traversed in 0:30 1/2, a 2:02 gait, and then stepping past her on the back stretch as if she were tied to the fence.

Again in the home stretch the mare made another rush, but when she came to the gelding Geers merely eased away on the lines and the horse sped off as if he were scoring for the heat instead of finishing a record breaking mile.

Before the race was called it was the opinion of horsemen that Highball would win, his preparation being more advanced than that of the mare, but some who had seen her wonderful rushes declared her invincible. She would have been with an ordinary trotter for a competitor, but Highball is a world beater. The mare got the pole in the draw for positions, with Highball next to her, Iceclander third, Athasham fourth and Dr. Frasse on the outside. Sonoma Girl came to the wire at a terrific clip, her gait being of the low, stealing sort that is so deceptive, and as soon as the word was given she went away at top speed.

But Highball was right with her, and it looked as if Geers, having heard so much of Sonoma Girl's wonderful brush, was resolved to put it to the test right from the jump. The track was fast, firm, but velvety, and the footfalls of the flying trotters could not be heard as they sped around the first turn. At the eighth pole the watches showed 0:15 1/2, and it was evident the mile was to be way better than 2:10.

Sonoma Girl more than kept up the clip, but not for one stride did she gain on Highball. He was at her throat latch all the way, and, trotting the second eighth in 0:15, a two-minute gait, they were at the quarter in 0:30 1/2 on exactly even terms.

And then Geers did something. Merely shifting the bit in his horse's mouth to remind Highball that more speed was wanted, he woke the gelding to a new effort that made the previous electric burst of speed seem tame and common. Before the spectators, who were cheering the display on the bulletin board of the fast time made for the quarter, could realize the fact, Highball was three lengths ahead of Sonoma Girl and had the track to himself.

In spite of the fact that Geers took him back a trifle, Highball was at the half mile pole in 1:02, and yet there had not been a spot in the road that he seemed to be at full speed. The race evidently was ended, and Highball, looking to be jogging, went around the upper turn at his ease, trotting the third quarter at only a 2:10 gait, the three-quarters time being 1:34 1/2.

In the meantime Sonoma Girl was making ready for another rush, and in the home stretch she came flying to the gelding, and for an instant it seemed as if she might win. But Geers, alert but impassive, once more shifted the bit in the gelding's sensitive mouth and Highball came away like a quarter horse. The mare was beaten in a few strides, and quite a distance before the wire was reached Geers had Highball in hand and he came home at three-quarter speed in 2:06 1/4.

The heat was a hard one on Sonoma Girl, which was not up to miles of that sort, as she finished only a length and a half back of the gelding, but Capt. Springer, her owner and driver, made a determined effort in the second and last heat. This time Highball had the pole, and he kept it. There was no sensational speed this time, the mile being 2:08 and the quarters 0:31 1/2, 0:32, 0:31 1/2, 0:33. Highball led more or less all the way, and although the mare came to him with a great spurt in the home stretch he moved away from her at his ease and finished alone.

Later in the afternoon he was worked a third mile for training purposes in 2:13 1/4, the last quarter in 0:31 1/2. Sonoma Girl also went another mile, hers being about 2:16.

Highball is entered in more than \$100,000 worth of stakes and purses, all of which look to be at his mercy if he holds his present form, as it would have taken better than a 2:05 trotter to beat him yesterday. When it is considered that in the \$10,000 M. & M. race at Detroit, a race that brings out the best "green" trotters every year, 2:10 has been beaten but once, that mile being 2:08 3/4, the 2:06 1/4 of Highball the first week in July, with a repeat in 2:08 1/4 in a known high class trotter like Sonoma Girl, it is no wonder that the Jones horse is in a class by himself.

With the exception of the first race, a 2:18 trot,

in which he had no starter, Geers took down the whole program, three races falling to his stable. De Ryder, just in from California with a lot of good ones, captured the 2:18 money with Wild Bell, a rangy gelding that did not have to go better than 2:19 1/4 to win from the other starters, Corsicana and Sterling McKinney. The first part of the opening heat in this race was a joke, the quarter being trotted in 0:38 and the half in 1:16.

Sterling McKinney was trying to win at this clip, and as he was credited with a workout mile in 2:10 1/2, it looked as though he might land, but when the other horses moved up to him at the three-quarters he jumped high, and Wild Bell was first to the wire in 2:23 1/2.

A second mile in 2:19 1/4 settled the trouble, but the race was not impressive, as Corsicana has worked the track better than 2:15. Wild Bell was set down for a real good mile an hour later, and trotted in 2:09 1/2, the quarters being 0:31 3/4, 1:04 1/2, 1:37, 2:09 1/2.

The 2:05 pace was awarded to Ardele in advance, it being known she was up to a pretty stiff mile if asked for her best. Her heats were 2:06 3/4, 2:07, and the only interesting features, aside from the workmanlike performance of the mare, were the speed displayed by Willie Benton in the first half of the opening heat, and the extra good manners and speed of the "green" pacer Hidalgo, from the Lon McDonald string.

Willie Benton was brought over from the Dean track at Palatine simply to give him a race. He had been but one mile this year better than 2:15, and yet in the opening heat he carried Ardele to the half in 1:01, doing the second quarter in 0:30. Seeing he was beaten, Dean took the stallion back, and in the second mile drove him simply for a good workout.

Hidalgo, that was a close second in each of the heats, is one of the Chamber of Commerce entries, and was started in the 2:05 class to receive needed racing education, and also to avoid any chance of getting a record. He showed the best of manners and had a lot of speed on tap whenever McDonald called for it. He is a lusty bay gelding with an extra good way of going, and while he may not win the Detroit classic for pacers he will make a good showing.

Geers had a buggy riding race in the event for 2:12 pacers, he starting the green gelding Dan S. His miles in 2:07 1/2, 2:09 1/4 looked like an easy workout, Miss Cappy being the only thing in the field that could get close at the finish, although Richard Grattan, minus the hobbles he wore last year, went an extra good race, considering the change in rigging. He was raced with the idea of accustoming him to going without "the straps," and, to prevent the possibility of a break, no effort was made to make use of his tremendous speed, Putnam being content to jog along in third place.

During the day Sadie Fogg, a prominent M. & M. Candidate, was given a stiff workout, the miles being 2:12, 2:10 1/2, 2:11 1/2. She trotted the last half of the third heat in 1:03, finishing strong after going away back of the pacer Kruger and brushing past him in the home stretch. The summaries:

2:18 trot, purse \$400—
Wild Bell, b g by Wildnut (De Ryder)..... 1 1
Corsicana, b m by Wildnut (Kimlin)..... 2 2
Sterling McKinney, b h by McKinney (Shuler)..... 3 3
Time—2:23 1/2, 2:19 1/4.

2:12 pace, purse \$400—
Dan S., b g by Greystone (Geers)..... 1 1
Miss Cappy, b m by McRobert (Russell)..... 2 2
Richard Grattan, blk g by Grattan (Putnam)..... 3 3
Bert Logan, ch h by Colbert (Rash)..... 4 4
Time—2:07 1/2, 2:09 1/4.

2:12 trot, purse \$400—
Highball, b g by Dr. Hooker, dam by Tom Covington (Geers)..... 1 1
Sonoma Girl, b m by Lynwood W. (Springer)..... 2 2
Dr. Frasse, blk g by Iran Alto (Squires)..... 3 3

Hidalgo, b g by Warren C. (McDonald)..... 2 2
George S., b h by Gen. Wilkes (Squires)..... 3 4
Cascade, br g by King Pilot (Davis)..... 5 3
Willie Benton, b h by Wilton (Dean)..... 4 5
Time—2:06 3/4, 2:07.

Highball is simply in a class by himself, so far as all the green trotters of the past and present are concerned. Before the Libertyville race it was known he was an extraordinary trotter; that he had trotted the Memphis track in 2:08 before coming to the Illinois course, and that a mile in 2:08 1/2 one day at Libertyville looked like play for him. Sonoma Girl, which trotted a mile at Los Angeles last Christmas day in 2:07, was named to start against Highball, and although the mare had not been a mile better than 2:11 since coming East, she had shown such phenomenal speed in rushes with other horses that the critics rated her up to a mile in 2:08.

Sonoma Girl was good on the day of her race with Highball, but even her terrific speed in a rush faded and shriveled before the mighty burst Highball showed when Geers turned him loose for about an eighth of a mile down the back stretch in the opening heat. The mare had drawn the pole and went away like a free-for-all pacer, trotting to the quarter in 0:30 1/2, with Highball looking her in the eye all the way. The second eighth of this quarter was done in 0:15, and that there still was a reserve of speed in the gelding no one could believe. And yet when Geers eased away on Highball, just as the

quarter pole was passed, he stepped by Sonoma Girl with exactly the same ease a 2:20 trotter takes the track from a 2:30 nag.

Geers was not busy teaming his horse, either, when this was done. On the contrary, according to the testimony of Capt. Springer, driver of Sonoma Girl, he sat perfectly still and looked Sonoma Girl's driver in the face, much as the occupant of one buggy would glance at the man in another vehicle of like description as he casually passed him at a four-minute gait.

"I didn't think he could do it, but he did," Capt. Springer said, in speaking of the occurrence to a friend.

For a little way in that spurt Highball certainly was going better than a two-minute clip, as he had just trotted an eighth head and head with Sonoma Girl in 0:15, and then stepped away from the mare at a much increased rate of speed. He was well in hand at the half in 1:02, and looked like a horse jogging as he went under the wire in 2:06 1/4.

It was a performance that fairly stunned horsemen who thought they knew something about what green trotters were capable of the first week in July, but after the shock was over and a critical analysis of the heat could be made, all hands agreed that Highball certainly is a 2:05 trotter, with the chances largely in favor of his being able to step a mile in 2:04 or better before the season closes.

F. G. Jones of Memphis, who paid the record price of \$17,500 for a green trotter when he bought Highball a month or so ago, was on the ground, and I had a talk with him while he was watching the horse warm up for the race. It is a fact not generally known that for the last week Highball has been troubled with a sore mouth, that made him nervous and a trifle fretful. He showed this in his jogging, but when turned the right way of the track he forgot everything but the fact that speed was expected of him, and a better mannered trotter never scored for the word.

After the race was over and Highball had done far more than is to the credit of any other green trotter, Mr. Jones said:

"Yes, I was nervous all right, because a good many of my friends questioned the wisdom of paying as much as I did for Highball, although it seemed to me he was the cheapest horse I ever bought. But I could think of nothing else but that gelding, because of what I had seen him do over the Memphis track, and the way he did it forced me to think him the best racing prospect in sight. He had manners as well as speed. He had the education of a really great trotter, and Geers had asked him to do things that would have floored an ordinary horse. He did them all, and did them with ease. I saw him work in 2:08 with one of the best pacers in Geers' string, and he did some things in that mile that decided me to close the option for his purchase that I had secured. Now I am satisfied, and if Highball should be knocked out to-morrow I could stand the misfortune, because he has shown to-day that I made no mistake, from a business or a sportsman's point of view, in buying him."

But while Highball is the king, Sonoma Girl is the queen, and her work in the Libertyville race should by no means be overlooked or belittled. With Highball out of the way she would look like the best green trotter that ever faced the starter, and with more work and a couple of races under her belt she is likely to enter the select 2:05 list. She has, from a horseman's point of view, a better way of going than Highball's, and indeed it would be hard to improve the California mare's gait. She goes low all around, apparently with not the slightest loss or waste of locomotive power. She can turn and get away like a pacer, and no matter how hot the clip she does not want to break.

It was the most severe test to which a horse could be put that she underwent in the first heat of the Libertyville race. Down to the quarter in 30 1/2, trotting the last eighth in :15, she was then, seemingly in a few strides, left in the rear by a horse that was evidently her master. But she did not falter. She did not jump. On and on went the little mare. She was not in order for any such an effort as the circumstances demanded of her, but that did not matter. She tried hard every time she was asked, and although she could not again reach Highball's side she made him beat all the records for green trotters and put himself at once in the free for all class in order to lead her to the wire.

It looks now as though the Cleveland man who made a book on the M. and M. would have to pay off on the Highball tickets. On the same day and track that Highball and Sonoma Girl had their sensational duel "Lon" McDonald gave the black mare Sadie Fogg, also M. and M. entry, a stiff workout. She went with the pacer Kruger, and her miles were 2:12, 2:10 1/2, 2:11 1/2. Those were three heats that would win any ordinary M. and M., as in only one instance in the history of the race has there been a mile trotted as good as 2:10, that being the 2:08 3/4 of Eleata.

Sadie Fogg, barring accidents, will be up to three miles in 2:10 on the day of the Detroit races, but that sort of speed, if Highball stays good, will not beat either the Geers horse or Sonoma Girl. It looks right now as if the trio mentioned are the best in the race. It is sure Shadeland Faustlear has been a mile in 2:08 1/2, but somehow the people that have seen him work do not rate him high, and the same is true of the Eastern mare, Claty Latus. In fact, as matters now stand, it is the old story of Eclipse over again—Highball first and the rest nowhere.

LOS ANGELES DRIVING CLUB.

Fully a thousand enthusiastic lovers of light harness racing gathered at Agricultural Park Saturday afternoon, June 29th, says the Examiner of that city, to witness the June matinee of the Los Angeles Driving Club. No more perfect day for displaying the top speed of the horses engaged could possibly have been chosen, not a breath of air stirring and the track being in perfect condition when Starter E. J. Delorey gave the word that sent them off for the first heat.

While the class of horses entered was scarcely up to the mark and the fields were small, some of the heats were sufficiently close to call for an unlimited amount of enthusiasm from the friends and adherents of the gentlemen drivers. Owing to the poor condition of Ramona S., the 2:40 thot, in which Sona was her only competitor, was declared off. All the events were run off heat two in three heats.

The fastest time of the day was made by William Morgan's Era, driven by Frank Williams, when she won in 2:14 flat. Williams scored the only double win of the day by also driving Ethel Kinney to victory in the three-minute trot. A feature of the afternoon was the fine exhibition of high school work given by J. P. Kerner, a member of the club, with his bay saddle horse, Sunny Jim.

Every event was won in straight heats, with the exception of the last race, Glenita capturing a heat and Billy M. winning the next one. In a terrific finish, which brought the spectators to their feet, Glenita won the third and deciding heat by a nose from Billy M., with Bernie Wilkes coming like a shot on the outside, a bare nose behind Billy. Summaries:

2:40 Pace—

Zela Z., blk m (M. Dixon).....	1	1
Isabel, s m (Lowe)	2	2
Amos Ketchem, s g (McLean)	3	3
Barney, b g (Walker)	4	4

Time—2:36, 2:29.

Zela Z. off in front first heat, never headed all the way, won hard held by three-quarters of a length. Isabel in close attendance, maintained position throughout. Barney, coming fast last quarter, went to pieces and ran under the wire.

Second and final heat practically a repetition of the first, but Isabel did not get as close to leader. Barney evidently out of condition, was never dangerous.

3:00 Trot—

Ethel Kinney, b m (Williams)	1	1
Mylock, br m (Smith)	3	2
George P., br g (Stewart)	2	3
Oneta B., b g (Lowe)	4	4

Time—2:37½, 2:35.

George P. and Mylock raced off in front for half a mile, when Ethel Kinney, much the best and ably driven by Frank Williams, came on and easily wore down the two leaders in the stretch, winning pulled to a walz by twelve lengths. George P. was an easy second.

Ethel Kinney led all the way in the second and final heat, allowing Mylock to come within a length at the wire, purely on sufferance. George P. broke and was far back. Oneta never cut any figure in the race.

2:20 Pace—

Fresno Boy, s g (Glascok)	1	1
Siegfried, b g (Long)	2	2
Silver Dick, gr g (Payton)	3	3

Time—2:18, 2:15.

Fresno Boy, with Silver Dick close up, led for half distance, when he was momentarily threatened by Siegfried's rush, the latter coming far back, but Fresno Boy won going away by two lengths. Silver Dick weakened badly at the end.

Fresno Boy won the second and deciding heat as he pleased, while Siegfried just as easily disposed of Silver Dick. Latter not much account.

2:20 Trot—

Era, blk m (Williams)	1	1
Ida Milerton, br m (Delorey)	2	2

Time—2:14, 2:18.

Ida Milerton led for half the distance in the first heat, where Era assumed command and was never headed thereafter, winning by three lengths. Zomboyette scratched out.

Era won the final heat in easy manner, leading all the way and never threatened seriously by Ida Milerton at any time. Time of first heat fastest of the day.

2:30 Mixed—

Glenita, b m (Kellar)	1	4	1
Billy M., b g (Willis)	2	1	3
Bernice Wilkes, b m (Denker)	3	3	3
Gen. Garcia, b g (Colyear)	4	2	5
Wild Rose, br m (Silverthorn)	5	5	5

Time—2:21, 2:22, 2:23.

Billy M. obtained early lead first heat and appeared winning easily when overhauled by Glenita 100 yards out and beaten under wire by a head. Second heat, Billy M. out in front again, lasted just long enough to withstand Geo. Garcia's rush at the end, winning by a neck.

The third and deciding heat looked like another win for Billy M. until the middle of the stretch, when under a terrific drive both Glenita and Bernice Wilkes beat him out, all noses apart at the finish, Glenita getting the verdict.

MATINEE AT PORTLAND.

More than 5,000 lovers of the sport of Kings attended the races at the Irvington track, July 14th, says the Oregonian. The meeting was under the auspices of the Riverside Driving Club. Fred Brooker, starter; J. A. Westgate and H. M. Tillman being in the judges' stand. C. Bryant, G. A. Rohse and S. C. Beach officiated as timers. The card was made up of eight events, including a match race between M. J. Jones' New Moon and A. C. Lohmire's Rockford for \$100 a side, the former winning both heats easily.

Lohmire had bad luck with his entries, as he was unable to keep his nags on their feet. In the fourth race, a free-for-all mile trot, Lohmire's Red Skin showed good speed occasionally and closed up gaps two or three times, but broke badly and came in third. In that race L. Zimmerman's McBriar and Frank Richardson's Pius were scratched.

The most exciting race of the day was between Al Powell's Crochet and J. M. Creamer's Agnes Lemay, driven by Ed Hansen. Crochet won the first heat in a close finish in 2:24¼ and the second in 2:28½.

J. S. Crane captured two cups, one in the 2:30 mile trot with Hallie C., and another in the free-for-all mile trot. The cup offered by the National Livestock Association was captured by L. H. Tarp-ley's Alt with J. W. Johnson in the sulky.

The racing stallion Hal B. 2:04½ and Zolock 2:05¼ were exhibited in halter and E. E. Merges' trick horse was put through some of his paces in front of the grandstand by Professor E. B. Turner.

Taken as a whole the meeting was a big success, the grandstand being crowded. Smartly dressed women were much in evidence. A party of army officers who had appeared in the parade occupied boxes. The results:

Trotting, 2:35 class—

Horse.	Owner.	Driver.	
Ray Mack, D. Dupee (D. Dupee).....			1 1
Max Lovelace, W. Gelinsky (W. Gelinsky)....			2 2
Sailor Boy, F. Anderson (D. Anderson).....			3 3

Time—2:40, 2:38½.

Mixed, mile dash, 2:40 class—

Horse.	Owner.	Driver.	
Blue Jacket, L. W. Watts (L. W. Watts).....			1
Fannie B., E. W. Bartlett (E. W. Bartlett).....			2
Lady Line, R. J. Debber (R. J. Debber).....			3

Time—2:52½.

Trotting, 2:30 class—

Horse.	Owner.	Driver.	
Hallie C., J. S. Crane (J. S. Crane).....			1 1
Ned Thorn, A. Lumsden (A. Lumsden).....			2 2
Chico, G. Lowitt (A. Truby).....			3 3
Red Rock, J. W. Bailey (J. W. Bailey).....			4 4

Time—2:27, 2:25.

Trotting, free-for-all—

Horse.	Owner.	Driver.	
Hank, J. S. Crane (J. S. Crane).....			1 1
Will Lane, W. G. Brown			2 2
Red Skin, A. C. Lohmire (A. C. Lohmire).....			3 3

Time—2:20, 2:23.

Pacing, 2:25 class—

Horse.	Owner.	Driver.	
Alt, L. H. Tarpley (J. W. Johnson).....			1 1
Lady Lovelace, J. F. Shea (Chas. Shea).....			2 2
Teddy Roosevelt, L. W. Watts (L. W. Watts)...			3 4
Miss Altelena, O. J. Brown (O. J. Brown).....			4 3

Time—2:29, 2:22½.

Match race, \$100 a side—

Horse.	Owner.	Driver.	
New Moon 2:21½, M. J. Jones (M. J. Jones)....			1 1
Rockford 2:20, A. C. Lohmire (A. C. Lohmire)..			2 2

Time—2:23½, 2:22.

Free-for-all pace—

Horse.	Owner.	Driver.	
Crochet, Al Powell (W. Squires).....			1 1
Agnes Lemay, J. M. Creamer (Ed. Hansen)....			2 2

Time—2:24¼, 2:28.

DRIVING CLUB ORGANIZED.

The San Joaquin Valley Driving Club is the name of the new horseman's club recently formed by local horse owners for the purpose of having a place to drive and train their horses. The officers of the club are the following well known horsemen and lovers of fine stock: President, Fritz Wille; vice-president, J. D. Galloway; secretary, Art Fitzgerald; treasurer, F. Murray. The club meets every Tuesday night and has the following board of directors: Frank Lieginger, William Miller, Jack Grigsby, Walter Trefry and Charles Parker. The club has secured the Stockton race grounds and has had the track put in fine condition for driving. There are now over a hundred members in the club and about that many more have signified their intention of joining, which will make the club one of the strongest driving clubs in the State. The club intends to hold friendly contests and matinees among members of the club, but there is no intention of making the sport a gambling proposition. This driving club is just what Stockton has needed for some time.—Independent.

The great pacer Dan Patch will appear at the following points on the following dates: Galesburg, Ill., August 13; Davenport, Iowa, August 20; Minnesota State Fair, Sept. 2; Sioux City, Iowa, Sept. 10; Kalamazoo, Mich., Sept. 18; Columbus, Ohio, Sept. 25, and may appear at one or two more points, but it is not intended to give a very heavy campaign this season.

THE FOURTH AT FRESNO.

One of the best racing cards ever given at the Fresno Fair Grounds track for many moons was run off on the afternoon of July 4th. The people got their money's worth of excitement. The only kick that could hold well was that the excitement was diluted to a considerable extent by long waits between acts.

The ladies running race was a star feature of the day, and was one of the prettiest races ever seen on the track, the winner being Miss Anita Minor.

The chariot race was good, what there was of it. The local team was very skittish when hitched four abreast and at the three-quarters turn two breast straps on the right-hand horses were broken and the accident precipitated an equine rough-house which, fortunately, did not result in any serious accident.

Ribbon, who broke most of Porterville and a good deal of Fresno in a little match race some weeks ago, was defeated in the half-mile run by Bowman the Fiddler.

First on the program was a free-for-all trotting event. This required three heats and was well contested throughout, Diabless keeping the spectators guessing. Three horses were entered in all, Diabless, Corey's Mabel C. and Danny Morris' Newport.

Mabel C., piloted by Joe Crawford, came in first in the opening heat in 2:17¼, with Diabless second and Newport third. Diabless was driven by Charles Middleton. In the second heat the veteran driver, J. W. Zibbell, had the mount behind Diabless and won the heat in 2:13¼, according to the Fresno papers, although a correspondent who telegraphed the Breeder and Sportsman the next morning gave the time as 2:15¼, which is probably correct. Mabel C. was second in this heat and Newport third. In the third heat Zibbell landed Diabless in front again in 2:17¼, with Mabel C. again second.

The next race was best two in three heats between Prince, owned by B. Douglass, Topsy, owned by Mrs. Schuler, Ordway, owned by Mr. Awalt and Rob Roy, owned by W. O. White. The first heat resulted in first place for Ordway, driven by Frank Tickle, Topsy, driven by Schuyler Walton came in second and Prince, driven by Will Duglass, came in third. The time was 2:24½.

In the second heat Ordway was first in 2:22, with Prince second and Topsy third. Topsy and Prince divided second place money.

Then came a quarter-mile dash for horses with lady riders. There were three starters—Sylvia, guided by Miss Joseph, Grip, ridden by Miss Minor, and Cassie, with Mrs. Fitzgerald for a pilot. The race was won by Miss Minor, with Miss Joseph second. The time, 23½ seconds, was excellent. All the ladies rode astride.

The chariot race furnished plenty of excitement, as the Fresno four, driven by O. E. Kunde, met with a mishap at the three-quarters pole, where the breast straps broke, letting the pole down and the horses fell. Levengoods' four finished alone, and he was awarded the race. Neither the driver nor any of the horses in the defeated team were injured.

The half-mile running race was won by the lightweight, Bowman, defeating the Santa Ana horse Ribbon at the finish by a nose. The grandstand went wild over the victory of the Porterville horse.

The attendance was large, there being 1,192 paid admissions. Willard Zibbell, R. T. Owen and E. J. Boust were the judges.

PARK DRIVING CLUB RACES.

Several hundred people were at the new three-quarter mile track in Golden Gate Park on July 4th to witness the second matinee of the newly organized Park Driving Club. A fresh breeze retarded the time a little, but otherwise the day was a perfect one. The results:

First race, Class A pacers, heat winners sent to stable—

D. E. Hoffman's King Cadenza	1
T. B. Bannan's Jim Chase	2 1
W. Olsen's Zulu	3 3 1

Time—1:44¼, 1:46, 1:51¼.

Second race, Class A trotters—

E. Cerclat's Major Cook	1 1
G. E. Eslin's Moffat D.	2 2
A. Joseph's Vic Schiller	3 3

Time—1:45, 1:48½.

Third race, Class B trotters—

F. W. Thompson's Lady Washington.....	1 1
F. J. Kilpatrick's Clipper W.	2 2
M. W. Herzog's Lady Nell.....	3 3

Time—1:47¼, 1:47½.

Fourth race, Class C trotters—

G. R. Gay's Laddie G.	2 1 1
A. P. Clayburgh's Charles H.	1 3 2
F. J. Kilpatrick's L. W. Russell Jr.	3 2 3

Time—1:48¾, 1:51½, 1:49½.

Fifth race, Class D trotters—

E. Stock's Director B.	1 2 1
I. B. Dalziel's Martha	2 1 2
W. Smedley's Lady Smedley	3 3 3

Time—2:03½, 2:06, 2:04.

An excellent disinfectant where injurious germs are suspected to exist in a stable is two ounces of carbolic acid to a gallon of water, sprayed over the place. It should strike every part of the stable, including floors, walls and ceiling. Before the disinfecting, remove all filth and litter.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Salinas	July 24-27
Pleasanton	July 31-August 3
Breeders' Association (Santa Rosa)	August 14-17
Petaluma	August 26-31
Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair)	September 23-28
Spokane, Wash. (Inter-State Fair)	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

Highball 2:06¼.

World's record for a green trotter.

Sonoma Girl was hut a length and a half behind him.

And the old cripple, Iran Alto, was third in both heats.

Athasham was last in each heat, hut probably De Ryder was not driving hard, as there was no use.

The fact that Sweet Marie 2:02 could only trot in 2:06 at Indianapolis, the same afternoon, shows what a high-class trotter the \$17,500 horse is.

The race at Libertyville on July 4th, in which the three California horses—Wild Bell, Corsicana and Sterling McKinney—started was a farce. Wild Bell won as he pleased in 2:23½ and 2:19¼ after the race was over. Sterling McKinney is credited with a workout in 2:10½ and Corsicana has worked in 2:15. The first quarter of the first heat in this race was in 38 seconds, which shows that none of them were being driven.

Bert Logan was last in the race won by Dan S. at Libertyville, July 4th. The heats were 2:07½ and 2:09¼.

T. W. Barstow has his string of trotters and pacers at the Salinas track.

Will Durfee and the other trainers who will race on the California Circuit reached Salinas on Tuesday of this week.

One week from next Wednesday the Salinas meeting will open with a fine program. Don't fail to be there.

The fall races at Hollister will be held from the 8th to the 12th of October, with a program of four running events and one harness race each day.

Hattie Croner and Alto Down were starters at Conneaut Lake, Pa., on the Fourth of July and took third and second moneys respectively.

Race meetings are being held all over the East and Middle West, and the trotting season is in full blast. The Grand Circuit will open at Detroit July 22d, one week from next Monday.

The Breeders' meeting will open at Santa Rosa August 14th, consequently ten days prior to that time starting payments will be due and payable on all two and three-year-olds that are to start in the different divisions of the Pacific Breeders' Futurity to be decided at this meeting.

Entrance in the 2:15 pace at Pleasanton will be open until July 22d. See advertisement.

Daedalion 2:08½, that holds the State Fair track record of 2:10, is in fine shape this year and will be a dangerous horse in the 2:08 class is the opinion of Ben Walker, who saw him work at Pleasanton last week.

H. E. Coil of Woodland bred his Falrose mare, dam of the fast trotting stallion Kinney Rose, owned by Mr. Hashagen, to Zombro 2:11 this year. This mare is only ten years old and throws speed with great regularity. Renown, her colt by Diahlo, was a wonderfully fast three-year-old, having paced trials in 2:14, but unfortunately died. Her colt by Searchlight, now a three-year-old, was sold by Mr. Coil to Mr. Murphy of Los Angeles and is now showing great promise. Mr. Coil owns a yearling and a suckling from her by Iran Alto 2:12¼ that are very promising.

An unusual case of protracted gestation is reported by an Illinois breeder. The mare has produced three foals, and the period of gestation of each was 368, 365, and 363 days, respectively.

Sterling McKinney, by McKinney 2:11¼, recently worked the Indianapolis track in 2:10, with the last quarter at a 2:04 clip.

M. E. McHenry has a hind trotting gelding named Amos in his stable, that came to him early in May and has already beaten 2:15, with a half in 1:03¼. Up to the time he reached McHenry it is said that the gelding had not been worked for speed.

Dan Patch 1:55 will try to beat his record at Galesburg on August 12th, and Sweet Marie will take a shy at her own record on the next day.

H. J. Kline says: "We yield to no one in our admiration for Cresceus. But we protest against using his race at Ft. Wayne, in 1897, when he was three, as evidence to prove his superior gameness. That race went to eight heats and was a postponed affair. Cresceus should have won it in straight heats. Some stakes to which he was eligible closed that day, but he would have ceased to be eligible had he won any heat. Next day he made the aged horses pitted against him look like thirty cents, and trotted the three winning heats in 2:12¼, 2:11¼, 2:11¼. And that's the truth about it. So far as Cresceus was concerned, the first day's doings did not constitute a horse race."

The green trotter Corsicana, that was turned over to McGinness, a Cincinnati trainer after Henry Dunlap sold her in Cleveland last May, during a recent workout went a number of comfortable miles and then stepped it off in 2:13½. This made her look like a 2:10 trotter on a faster course, as she has had hut little work. Corsicana is a big mare, standing over sixteen hands and weighs in trotting condition at least 1200 pounds. She is true gaited, going as smoothly as a pony, and can be placed where the driver wants her during a heat. She is by Wildnut, whose dam was the one time champion two-year-old trotter Wildflower, and her first dam was by Dexter Prince.

The prices of ordinary saddle and driving horses in Arizona have increased forty per cent during the past few months or more than 100 per cent during the past year. Animals that could have been bought for \$60 and \$70 a year ago are now held from \$125 to \$140 and are hard to get at that price.

Era, a daughter of Zombro that is well entered through the California Circuit, won a matinee race at Los Angeles June 29th in 2:14, 2:18. Era is owned by Mr. William Morgan of Pasadena. Her first start after leaving Los Angeles will be at Pleasanton in the 2:24 trot.

Three additional races are advertised by the Pleasanton Association for its meeting which opens July 31st. Entries for these races will close July 22d. See advertisement.

Some sensational workouts are reported from the Los Angeles track. The Pig, Lee Maybury's sensational pacer, that Walter Mahen has been training for the past two years, worked a mile in 2:03¼. This horse is not entered in any races, and Mr. Maybury has refused many good offers for him. Will Durfee stepped Mrs. Bonfillo's Nutwood Wilkes pacer Copa de Oro a mile in 2:07¼, and as he is well entered through the circuit this is pretty good evidence that he has a mortgage on a good share of the money. Inferlotta, the mare by the Diahlo horse, Inferna, out of Carlotta Wilkes, bred at Santa Rosa Stock Farm, paced a mile in 2:06¼. This mare is a hard one to control in a race, but has so much speed that she should be a dangerous one on the California Circuit, where she is well entered.

It is reported that Flexo 2:14¼ died several days ago from injuries received while being transferred from one car to another while en route from Boston to King Hill Stock Farm, St. Joseph, Mo. Flexo was sold at the recent Fasig-Tipton sale at Readville, having been purchased by Mr. Louis Pfingst of Boston, acting for Mr. John Donovan, the price paid being \$2,600. Flexo was driven to his record by Mart Demarest and had been timed in a race in 1906 in 2:08½, while the property of the late A. C. Maynard. He was a remarkably handsome horse, and would no doubt have been a very valuable sire had he lived.

Bread, once the staple food of horses in England, is still used in some parts of Europe. An English army officer, remarking on the condition of a mare behind which he was traveling in Switzerland, was told by the driver that her condition was due to the ration of bread, which, he said, was given to all working horses in the Engadine. This bread is made is long loaves, the usual foreign shape, from third-class rye flour, they are baked as hard as a brick, and are perfectly dry, the people holding that dry bread is more digestible and also keeps longer. The coachmen give their horses one pound of bread in the morning, and a feed of bread when halting to halt; hay and oats are given as well. Two pounds of this rye bread is considered equal to about three pounds of oats, but the bread is more expensive than oats.

The newly organized "California Breeders' Association" of Los Angeles will offer a futurity stake of \$9000 for two and three year old trotters and pacers. Nothing helps the business like colt stakes and when this new stake is advertised all should enter in it.

Ben Walker, who has spent several months in Los Angeles recovering from injuries received in a rail road wreck last winter, has been in Pleasanton for a week or two and came down to the city this week on his way to Detroit. He carries a cane yet, but is well enough to drive and will follow the Grand Circuit this year. He will have all the engagements he cares to take.

E. B. Lawrence of Modesto sold a pair of fine black horses to the agent of an Oakland undertaker last week for a little over \$1000.

The Western Horseman has the following in its account of a recent matinee of the Gentleman's Driving Club of Indianapolis: "The exhibition mile of Sterling R. Holt's Mary and Kate Dillon, by Sidney Dillon, driven by Millard Sanders and assistant, was a pleasant surprise to those present. Although they were announced to go a slow exhibition mile, they stepped the distance in 2:11¼ without raising their heads. It was a beautifully rated mile. The first quarter was in :33, the second in :33¼, the third in :32¼, and home in 32¾. Later in the afternoon Mr. Sanders drove Ruth Dillon, a three-year-old filly, by Sidney Dillon, a mile in 2:18¾."

Millard Sanders started Mary Dillon by Sidney Dillon in the 2:10 pace at Indianapolis, July 4th. She took fourth money, her positions in the final summary being 5-3-2, and the time 2:12½, 2:11¼ and 2:09¼. The race was won by Ivan B., who just equaled his former record in the last heat.

The little town of Weston, Oregon, had a horse parade the other day that drew thousands of people from the surrounding country, and it was well worth seeing. Thirty ladies on horseback headed the parade, in which were 183 head of fine horses and colts. Two big six-mule teams brought up the rear and the column was nearly a mile in length. The former Californian, Wm. Hogoboom, was one of the judges, and among those who had winners in the trotting bred classes were Alex. Still, Henry Barrett, Tim McBride, H. D. Herrick, J. A. Baddeley, Geo. Perringer, A. L. Swaggart, Wm. McBride and others.

Sonoma May, own sister to Sonoma Girl, started at Indianapolis on July 4th, and finished 5-3-6 in a field of seven trotters. The time was 2:16¼, 2:16¼ and 2:16¼.

Martha Dillon, bay mare by Sidney Dillon, took a time record of 2:29¼ at Indianapolis July 4th.

A matinee wagon that cost \$250 and is as good as new is offered for sale by an advertiser, whose address is 1126 Park avenue, Alameda, Cal.

Sweet Marie was lame on the Fourth of July, when she trotted her first public mile of the year in 2:06. On Tuesday of that week she pulled up slightly lame after working two miles, but on Wednesday she was apparently as sound as ever. When ready to start on Thursday she was perceptibly lame, but Andrews started her, and the 25,000 people present were unaware that anything ailed the daughter of McKinney. After the mile in 2:06 she was taken to the stable with a slight swelling on her off hind leg about six inches above the hock. Hot applications reduced the swelling and on Friday she was a great deal better. It is not thought the lameness is anything serious.

Dr. O. C. Higgins of Porterville now owns the old stallion Frank Arthurton 7635, foaled in 1885, consequently 22 years old. Frank Arthurton was sired by Arthurton and his dam was Nelly by Eugene Caserly, a son of old Gen. Taylor, second dam Peanuts by Geo. M. Patchen Jr., and third dam Old Peanuts, said to be by Morse Horse 6, the sire of Gen. Taylor. There is lots of the good old fashioned blood in Frank Arthurton and he is yet a very vigorous horse.

Highball and Sonoma Girl, the two best green trotters in America, made their wonderful race on July 4th for a purse of \$400. Some of our California trainers who think nothing of asking \$10,000 for a \$500 horse would have heart failure if asked to enter in any purse of less value than \$1000, and would give as a reason the danger of getting low records and "showing up" their horses so as to "spoil the hetting" later on. They will doubtless spend considerable of their time from now till December trying to prove that Geers was a chump for marking Highball in 2:06¼ for \$200.

Another Spavin Cured.

Mr. John W. Sanner of Decatur, Ill., writes April 27th as follows: "I have used Quinn's Ointment to remove splints and reduce soreness in spavins, with very satisfactory results. Recently I advised a friend owning a horse with a bad spavin to use Quinn's Ointment, and he informed me to-day that the horse is going sound, this result being produced in two weeks, the horse being used daily on paved streets." This is the general verdict of horsemen all over the country who are using Quinn's Ointment. For splints, curbs, spavins, windpuffs and all burses there is nothing better. Price, one dollar per bottle. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain from druggist.

CALIFORNIA HORSES AT LIBERTYVILLE.

The July 1st issue of The Horse News, printed at Chicago, has the following from a correspondent who had just visited Libertyville track:

John Springer is one of the characters that you read about in books, but seldom meet. The boys have been calling him Captain, and the title does not please the westerner, and he is not a bit slow in correcting you should you make the mistake of calling him Captain or Colonel. "I am plain John Springer without any handles of any name or nature," he informed the writer when we shook the strongest and hardest hand we have had hold of in an age, and let me give some of you wise fellows a tip—John was not born yesterday either, he will not need a guardian to pilot him down the Grand Circuit and he is no mere amateur in the matter of driving and racing horses as you all will find out before the season is over. He is a thoughtful and intelligent gentleman and is a man that will make many friends before the racing season ends.

The majority of the rail-birds up at Libertyville can see and talk of nothing else but High Ball; we have not had the pleasure of seeing that horse work as yet, but we saw the great Sonoma Girl uncover a bit of her speed that was truly phenomenal. She was working out with Athasham 2:12, one of the ruggedest and best going stallions that we have seen in many a day. The wind was blowing a gale down the home stretch, but Mr. Springer had determined that a mile in about 2:12 was what he would ask of the mare. They scored several times at about two-thirds speed and then to a flying start they stepped down to the first eighth in 15 seconds or a bit faster, Athasham slightly in the lead, and in going to the quarter between 30 and 31 seconds the stallion had opened up several lengths on the mare; soon after passing that point Springer turned her head loose for a short distance and in the next eighth she stepped past the stallion, who it must be remembered was stepping close to a two-minute gait, as if he was tied to the fence; going down the back stretch the mare was taken back, Athasham again assuming the lead, and the mile was finished in 2:11½. I certainly was much impressed by this mare Sonoma Girl and the way she has of doing things. The surprise of the day was to come, however, and it was not from any of the highly touted ones either. DeRyder has a brown mare he calls Perfection; she is by Meridian 2:12½, a son of Simmocolon 2:13, and her dam is by a son of Guy Wilkes 2:15½; so you can see, with the double Wilkes-Mambino Patchen crosses in her pedigree, she has license to be something extra. She was being worked some slow miles, but Charlie said in a quiet way, "Just notice this one's way of going and tell me how you like her; I will let her step home the last eighth of a mile as that will not bother her against this high wind." I noticed her all right and I have not been able to get the notice out of my head since that time. I saw Lou Dillon in all of her flights in record breaking trials, Cresceus, John A. McKerron, and all of the fastest trotters that have shown on the turf; but I wish to state without the least equivocation or reservation that I have never seen a trotter that had a more wonderful flight of speed than has Perfection. I caught a snap of her while coming through the stretch, the eighth being trotted in 14½ seconds, and I think you will say that you have never seen a motion picture of a trotter that shows more perfect action and speed. She is a rugged, strong substantial mare, perfect in disposition and manners, has a rather long head, clean and bony, with profile slightly roman; one of the best shouldered mares you ever saw, with deep long and very strong quarters, and the best legs and feet imaginable. She looks like a coming champion.

SONOMA VALLEY DRIVING CLUB.

Twelve hundred enthusiastic admirers of harness racing were at the Santa Rosa Stock Farm track on the afternoon of July 4th to witness the race program prepared by the Sonoma Valley Driving Club. Five harness events and two running races were on the card and there were good contests in nearly every one. The results:

Trotting, purse \$10—Millerick's Shellville Queen won, Kiser's Sweetheart second, Marcy's Fanny Parnell third, Jasen's Dollie fourth and Harry Sophey's Aloha Girl fifth. Time—2:35, 2:50.

Trotting, purse \$40—McDonnell's Babe won, Dr. Button's Waldstein McKinney second, Weaver's Ray McKinney third and Knuckles' Honduras fourth. Time—2:42, 2:31.

Road race, prize, fancy robe—Joe Keechler's Tule Boy won, T. Matthews' Lynam second, Knuckles' Elderwood third, Wall's Pat fourth, Weaver's Lafayette fifth. Time—2:38, 2:35.

Mixed, trot or pace, purse \$75—W. Nolan's Lady Seymour won, Dr. Button's Docus D. second, S. Norris' Ena Z. third. Time—2:32, 2:25.

Free-for-all trot, purse \$75—J. Ryan's Myrtle won, D. McGovern's Dan Frazer second. Time—2:27, 2:25.

Running, half mile, purse \$40—Concord 1st won. Time—0:51.

Running, quarter mile and 1/2 mile, 2 horses fancy bridle and blanket—Petaluma 1 2 1, 1 1 1.

Drink Jackson's Napa Sod... 2 1 as health.

FUTURITY FOR SOUTHERN CALIFORNIA.

The breeders and owners of harness horses in Southern California have organized a breeders' association and will arrange to establish a Futurity something after the plan which the Pacific Coast Trotting Horse Breeders' Association has made so popular with California horsemen. The Los Angeles Times states that the association has been formed to promote the interests of the harness horse, and includes many of the prominent horsemen of the Coast, as well as a large number of Southern California breeders and horse fanciers. The Futurity will go to the track or association making the highest bid, but will be kept in Southern California, and, if possible, in Los Angeles.

At the first meeting C. A. Canfield was unanimously chosen president of the new association. John W. Snowden is secretary, L. J. Christopher, treasurer, and W. G. Durfee first vice-president.

The list of directors includes the following local horsemen: C. A. Canfield, L. J. Christopher, George A. Pounder, W. S. Maben, Charles Saddler, Fred E. Ward, Robert I. Moorehead, John W. Snowden, I. C. Mosher, W. G. Durfee, J. A. Fairchilds, J. G. Mott, Dr. William Dodge, John H. Norton, M. S. Severance, J. H. Reynolds, M. M. Potter, H. N. Henderson, John Springer, Robert Smith, E. J. DeLeroy, N. Bonfilio, Henry Berry, J. C. Cline, Byron Erkenbrecher, Dr. Ralph Hagan, Capt. William Banning, L. H. Mabury, J. H. Williams and F. H. Messmore.

Other directors from various parts of the State are: James Wallace and James Connell, San Diego; E. D. Waffle, Santa Ana; Mr. Prescott, San Bernardino; George Marlow, Fresno; William Loftus, Fullerton; S. S. Bailey and A. T. Van De Vanter, Seattle; F. W. Kelly, John A. McKerron, M. A. Murphy, Prof. E. P. Heald, San Francisco; William Morgan and Capt. J. C. Newton, Pasadena; Lou Crellin, Pleasanton; Charles Donlan, Oxnard; M. D. Wisdom, Portland; C. A. Durfee, Oakland; Charles F. Silva and Frank E. Wright, Sacramento; Alexander Brown, Woodland; Judge Thomas H. Brents, Walla Walla; C. H. Thompson and J. S. Bransford, Salt Lake; S. H. Hoy, Winters; Joe Terry, Long Beach; Judge Colburn, Denver; Jacob Broliar, Exeter.

The formation of the new organization is said to mean the decay of the Los Angeles Harness Horse Association, which has had bad luck in recent years, and has conducted losing ventures in the meets held at Agricultural Park. All the strength of the professional horsemen in these parts is said to be pledged to the new association, which in no way conflicts with the Los Angeles Driving Club, a purely amateur organization.

The members of the association hope to secure concessions from the city authorities relative to conducting meets at Agricultural Park. If not, the San Bernardino and San Diego tracks will be given an opportunity to secure the races.

CONCORD TRACK.

Quite a number of horses are quartered at the Concord race track at present, says the Transcript.

Pilot paced a mile in 2:19 the other day. The horse looks and acts as if he might soon step in 2:15. Vince Galindo is proud of his horse, C. D. Walker has charge of this pacer. He also has charge of Hunkey Dory, a 2:26 trotter. He is showing up well.

Miss Horgan, the winner of last year's Horgan Yearling Futurity Stake, looks as if she would keep up her pace.

George Whitman's Dr. Waddell has a lot of speed. Mr. Walker has charge of a yearling colt by Bonnie Direct, the property of Martin Joost, that is a beauty.

Frank Hammit has a three-year-old trotter by St. Nicholas.

Orvil Smith's Ray Wilkes, under the care of Mr. Walker, is doing very nicely.

READVILLE GRANDSTAND BURNED.

The fine grandstand and also the bleachers at the Readville trotting track were consumed by fire on Thursday evening, the 27th ult. The fire was started by a spark from a passing engine of the railroad, the tracks of which are quite close to the track. A large number of wagons and other track implements owned by the association, which were stored under the bleachers, were totally destroyed. The property was well insured, but the insurance money will probably come considerably short of replacing the property destroyed, owing to the increase in price of materials, since the grandstand and bleachers were constructed.

Pinkeye and Its Cure.

Pinkeye in horses and colts is caused by minute organisms called germs, which course through the blood and settle in the glands, muscles and joints. The blood and glandular system are poisoned and the diseases cannot be radically and permanently cured until the blood has been purified and all germ life destroyed. Dangerous as this form of distemper is, there is one way to positively cure and prevent it. Modern science furnishes a specific in the well known and popular remedy Craft's Distemper and Cough Cure, made by the Wells Medicine Co., chemists, Third street, Lafayette, Ind., which practical experience has proven reliable in all forms of the disease. Craft's Cure has the endorsement of leading veterinarians and practical horsemen the world over, not only for pinkeye but for all forms of distemper, coughs, colds and all germ diseases. Further particulars concerning the remedy may be had by writing to the Wells Medicine Co., 13 Third street, Lafayette, Ind., for their latest pamphlet, "Dr. Craft's Advice." It is free and may be had for the asking. Write for it to-day.

RECORD CROWD AT EMERYVILLE.

It has always been considered that no attraction could draw a bigger crowd to the Emeryville track than the races held on Butchers' Day, but the program of harness racing furnished by the San Francisco Driving Club on the afternoon of July 4th, broke all records of the track for attendance. The grandstand, betting ring, lawns and the home stretch were crowded so that it was hardly possible to edge one's way through the crowd, which was estimated at 25,000 people.

There was no admission charged and no betting was done except between private parties, and the crowd was a holiday one that enjoyed and applauded every finish.

W. J. Kenney did the starting and announcing and did them well.

The time was fast, especially in the free for all pace, where three different horses paced the mile in 2:14. As the track is very slow and heavy for pacers this time is as good as 2:10 over a first-class course. The results follow:

2:40 class, purse \$150—
 Lady Irene (W. R. Pease)..... 1 1
 Fly (C. L. Becker)..... 2 2
 Darby Mc (Jas. MacTigue)..... 3 3
 Rose Derby (W. Scitti)..... 4 4
 Time—2:33, 2:30.

Free for all, purse \$150—
 Geo. Perry (G. Giannini)..... 6 5 3 1 1
 Clara L. (A. Schwartz)..... 3 3 1 2 2
 Ring Rose (M. Donnelly)..... 1 2 6 3 3
 Kitty D. (A. Hoffman)..... 2 1 2 4 dr
 Charley J. (C. J. Lecari)..... 5 4 4 5 dr
 Little Dick (L. Marisch)..... 4 6 5 dr
 Time—2:17, 2:14, 2:14, 2:14, 2:18.

2:30 class, purse \$150—
 Teddy W. (L. Whiteman)..... 2 1 1
 Don L. (R. Green)..... 1 2 2
 Tommy F. (F. Franceshini)..... 3 3 4
 Darby (J. Deschler)..... 5 4 3
 Toledo Boy (E. A. Buck)..... 4 5 dr
 Time—2:27, 2:28, 2:28, 2:23.

2:25 class, purse \$150—
 Lady Falrose (T. Corcoran)..... 3 1 1
 Prince H. (Henry Helbush)..... 2 2 2
 Bessie B. (F. E. Burton)..... 4 3 3
 Bessie H. (Herman Helbush)..... 1 4 dr
 Time—2:23, 2:23, 2:23.

ALBANY, OREGON, TRACK.

It is probable that the next few months will see some fast racing in Albany on the race track at the Fair grounds, says the Herald of that city. Mr. Bailey has put the mile track into good shape and is planning to hold a race meet here some time soon. Those who are interested in fast horses around here are very enthusiastic over the prospect of holding a race meet in this city, and declare that should one be held it would no doubt be a great success from every point of view. Albany people and residents of this section have not had an opportunity to see any good horse racing here for many years. Formerly the Albany race track was one of the fastest in the Northwest. The soil and situation are ideal.

Since Mr. Bailey has had charge of the track he has improved the grounds greatly. Stalls have been built and now he is completing a gravity water system which will supply the track and all other needs. The race meets which Mr. Bailey intends to hold here will be conducted on a strictly first-class basis.

In charge of the Bailey stables is J. E. Kirkland. Among the horses which are being worked here now are Tidal Wave 2:09, Oma 2:16½, (p) 2:10½, Seattle 2:25½, Doc Munday 2:21½ and Captain Anderson, one of the most promising Zombro three-year-olds in the Northwest. All these horses are in the pink of condition and are working well but have not yet been asked for fast miles. Tidal Wave is a grander horse than ever before and is a confident candidate for the \$5000 at Salem. It will be a disappointment to all who know this horse if he is not capable of lowering his record this year. Tidal Wave has made a good season this year, catering only to high class mares. His colts are full of quality and establish the conclusion that he will be a success as a stock horse. In individuality, breeding and in speed Tidal Wave attracts immediate attention in the stud. At the Albany track are several of this season's get of this great stallion, all good. A black filly three months old, from the dam of I. C. Mosher's fast two-year-old Tidal Wave colt, is one of the most perfect individuals ever seen. A stable mate, from a Silkwood mare, and a trotter, is another Tidal Wave exhibit. Vinnie Mann is matronly in appearance and is expected to foal to Tidal Wave within a few days. In the Bailey string are a number of high class brood mares, which are being added to as opportunity offers. It is worth a visit to this track to see this breeding establishment, which is a splendid effort on the part of a good citizen to improve the harness horse in Oregon. Mr. Bailey is about the busiest man in the force and is one of the best amateur drivers in the circuit.

Sonoma Girl certainly made good at Libertyville, even though she did not win. To chase a horse out in 2:06¼, the fastest time ever made by a green trotter, proves her class. Robert Duncan, of Ukiah, has for sale a pacer by Sonoma Girl's sire that has worked a mile in 2:13½ with the last half in 1:04 and the last quarter in 30½ seconds. This horse is now at Santa Rosa track in charge of Dick

CONDUCTED BY J. X. DeWITT

FUR AND FEATHER ANGLERS—THE GREAT HERON.

While the kingfisher feeds by day, the great heron begins his fishing at dusk, just as the stars peep forth. When I am about to make the last few casts and stop fishing in a trout pool, I hear the loud whiz of his vast stretch of wings passing close by, flying low, to a favorite shallow part of the river, and down drop his long legs, and he settles right down to business, motionless as a stone; sometimes for half an hour not a feather moves. He watches with unwearied patience; when he does strike, it is as quick and as sure as fate, for the first luckless fish that approaches within his reach is seized with surprising dexterity. Like the kingfisher, the heron beats to death those fish of larger size, swallowing them whole, head foremost, such being their uniform positions when found in the stomach. He will then at once assume the same attitude of silent watchfulness, and the finny tribe, though frightened at his first dash among them, return again in a short interval only to be transfixed with his long lance-shaped bill. Hornaday's "Natural History" says: "When a heron is fishing, it stalks slowly and silently along the shore, preferably in water about six inches deep, its head carried well forward, but about on a level with its shoulders, while its big eyes keenly scrutinize every object in the water. It takes long steps and plants each foot softly in the true still-hunter fashion, to avoid alarming its game. When a fish is found within range the kinks of the neck fly straight and the fish is seized between the mandibles. The fish is not stabbed through and through." This latter statement is only correct when small fish are taken. I have it on expert authority that herons repeatedly stab large trout up to two pounds in weight, making a hole in the back large enough to insert the thumb. The fish, though mortally wounded, escape on account of their being too strong and lively for the heron to handle. I have caught trout wounded in a like manner. Trout that have been mauled by larger fish or by animals are usually ripped or torn. If a round hole is made we can account for no other way than that of a heron stab. But it is the smaller fish this bird goes for. Generally five to eight inches long suits its taste to a nicety, and a bird of so large a size requires not a few to fill up, Audubon says: "In their natural element most herons consume more than their weight of food per day. The food consists mostly of fish, but it will eat reptiles and small mammalia, such as mice, or even water rats. In the stomach of one of these birds were found seven small trout, a mouse, and a thrush." So that fish is by far the larger part of its diet.

The bird knows that fish are most active and in search of their own food during late evening and at early dawn, and at that time makes the best endeavor to let few escape. He continues to fish far into the night, when the moon is shining on the water, otherwise at pitch dark he flies off to roost, returning just before dawn. The heron is extremely shy and watchful, and the height they are able to overlook with the advantage of their long legs and neck renders them difficult of approach. "Their prey appears," says Audubon, "to be nearly always transfixed, be it fish, frog, mouse or bird, and even the slippery eel is often found pierced with their sharp beak; the prey is then carried to the edge or bank of the water, held firmly between his beak. He then skillfully manipulates so that the head points downward, otherwise the spines of the fish causes trouble on its way down its long neck, which he writhes back and forth to make the fish go down. If the bird is with young he at once rises and carries it to the nest. So great a devourer of fish is the heron that they will eat up fifty moderate sized trout or other fish in a day. The bird is extremely common all over the continent—more abundant near large lakes and rivers well stocked with fish—and with his wide stretch of wings flies astonishing distances in search of food, with his neck doubled, head drawn in and long legs stretched far out in a right line behind, appearing like a long rudder tail, when just as he is about to alight on the ground, down go his legs and with a curious wobble he rights himself and stalks out into deeper water.

The readiest method of destroying this mischievous bird is by fishing for him in the manner of pike fishing—with a baited hook. When the tracks are seen on the sandy or muddy shore, three or four

small fish are procured and each of them is baited on a wire with a strong hook at the end, entering the wire just as the gills and letting it run under the skin to the tail. The fish will live in this manner for five or six days, which is a very essential thing, for the heron will not touch dead fish. A strong line of silk-covered wire should be fastened to the hook and the other end tied to a rock.

If three or four of these baits be sunk in different shallow parts of the pond in a night or two the heron will not fail to be taken. This method is more sure than trying to shoot, and much less trouble than waiting all night for the bird. Parties having private trout ponds or preserves should try it and they will find their fish decrease less rapidly. Many persons wonder what becomes of their fingerling and yearling trout, but if they will carefully examine the shore prints they will find that this notorious night poacher has something to do with it. This heron is a large and elegant bird, with a wing stretch of over six feet, and is undoubtedly an impressive sight when flying low or soaring high, as it is also when in repose. Standing alone and still in the water, with the long rushes and grass as a background, his sight as well as his hearing are so keen that very few get a glimpse of him.

The damage done to game fish caused by these everlasting day and night poachers is much greater than one would suppose without investigation. It is impossible to see and therefore to know the full extent of their depredations, which are continually going on, in public and private waters containing game fish, but in the astonishing scarcity of fish in many places where they have been placed at considerable trouble and expense, the blame is often put where it does not belong. Nature's checks upon over-production are sometimes more effective than man's most ingenious devices.

As an angler and nature lover the writer is convinced that in these days of strenuous work it is of the utmost importance that outdoor recreation giving healthful exercise should be provided. Wading a trout stream is perhaps the best and most agreeable method of getting it. Very few anglers are hutehers or wanton destroyers, a fact that cannot be said of either bird or beast. Under the present laws no intelligent discrimination is apparent. For instance, the wild turkey is being exterminated, sadly in need of adequate protection. The heron, on the other hand, is over protected and on the increase, to the destruction of man's food and pleasure. Moreover, the turkey is highly esteemed as a food, and it feeds on nature's bounty without any destructive harm. The great heron is not the only one of that family to subsist on a fish diet, but out of over a dozen species it is the largest and most gluttonous of its kind, and without a single redeeming quality, except perhaps, the laughable and grotesque manner it swallows a fish. Steps should be taken by followers of Izaak Walton to see that the lawmakers in our various States should pass laws that will give the needed protection from these destroyers of our game fish.

Hunters' Licenses.—The demand for hunters' license tags has exceeded all anticipation, the supply of aluminum tags for resident and citizen sportsmen being already exhausted, something like 25,000, we believe, and provision is made, temporarily, for the hunters immunity from arrest by issuing a receipt for \$1 and an acknowledgment that application for license has been made by the bearer.

From all appearances the license plan is here to stay and has the strong endorsement of our sportsmen.

Reports from many county seats are that the County Clerks can not supply the demand. A number of County Clerks have doubled and trebled their original estimate and called, by wire, for more tags. Governor Gillett was among the first applicants with the Board of Fish Commissioners for a license, sending in a properly filled out blank, together with a money order for \$1. Being a thorough sportsman, he is heartily in favor of the law.

To Protect Trout.—The Kennett Fish and Game Protective Association was organized last month with Frank Moulter as president and H. H. Geiger as secretary. The object of the new organization is to protect the game in that section from annihilation by those who seem to have no regard for the game laws of the State. Especially is the association anxious to put a stop to the wanton destruction of fish in the near-by streams of Shasta county by dynamite used by the Greeks and Italians. Because of the large amount of blasting now being done near there on railway construction, it is difficult to detect the dynamiting of fish, except by the dead bodies of the finny tribe as they float down the stream.

A State fish hatchery, it is reported, is to be established at Lyon's dam, in Tuolumne county.

California's favorite hot weather drink is Jaskson's Napa Soda.

THE BROWN TROUT.

Twenty years ago if the average Eastern fly-caster were asked what kind of fish he meant by "trout," he would say "brook trout." To have told him that his favorite was not a trout at all, but a charr would have called forth his ridicule.

Nowadays the mention of trout in any part of this country must be properly qualified. It may not be generally known, but for more than a decade California and the Coast in general have been doing yeoman service in supplying the East with trout to take the place of thousands caught every year by sportsmen and market fishers in the few places where such are permitted to ply their vocation to the gradual extermination of the finest game fish that interests fresh-water anglers.

Having found that the rainbow trout would thrive in many of the Eastern streams, sportsmen and leading fish culturists soon entered upon the introduction of the new species with the result that it has taken hold in all places where the native speckled "trout" could thrive and in a few favored sections, by its rather more rapid growth and greater ability to stand warmer water, already has become more abundant than the indigenous species.

Other varieties have been introduced also, and in nearly every case it has been found that the hardy trout from the Pacific Coast show vigorous qualities. Some of the large lake kinds from Tahoe and adjacent bodies of water are said to be doing well in the cold lakes of Maine, and that State, which always has had not only a high regard for the interests of sportsmen but a most keen realization of their immense value to the State in an economic sense, has entered upon the propagation of the new varieties in a businesslike manner which promises a continuance of the present supply for centuries, provided proper protection be maintained.

The Pacific Coast is rich in trout, but the most farsighted among Western anglers and piscatorial scientists are agreed that the proper time to inaugurate a sweeping campaign of protection is while there is yet something left to protect, and not wait, as many Eastern States did, until the supply practically was exterminated, and the streams had to be re-stocked.

Not only is systematic protection hinted at; California began that some time ago. Propagation of the native species is resorted to extensively in large hatcheries erected for the purpose, and it is suggested that the European brown trout, known to fish culturists as *Salmo Fario*, truly a grand game species, attaining considerably greater weight than the local stream trout and capable of standing successfully much warmer waters, be introduced west of the Rockies and given a comprehensive trial in order to see if the already long list of local game fish cannot be increased still further.

The claims of the brown trout are admitted by Eastern sportsmen. The fish has been introduced extensively in New England, and plenty of them are to be had from Eastern hatcheries.

The most serious complaint made against the brown trout deals with catching him. In fish commission reports many have expressed opinion that he is not game in the sense that the speckled variety is, and other anglers find difficulty in taking him.

The only way to reconcile these statements is to assume that the right tackle was not employed in the fishing, as the gameness of the fish in Europe is far-famed. One would not go tuna fishing with a smelt outfit, but some persons in the East persisted in trying to catch five-pound trout on the same gear they employed in the pursuit of fingerlings.

In point of delicacy of flavor, the European trout, from all the evidence obtainable, is somewhat inferior to the indigenous product, but his greater size is enough of an argument in his favor to more than balance the other.

In the East, the wholesale denuding of the watersheds by lumbermen has affected water supply both as regards temperature and as to the quantity. The water in the brooks becomes several degrees warmer in mid-summer than it formerly did, and conditions are rapidly becoming such that the native trout, or charr, does not thrive as once he did, even under careful protection and artificial propagation. As the same thing happens on the Pacific Coast—for the lumbermen are already cleaning out the redwoods and other timber—perhaps Californians at no remote day may find themselves confronted with the same problem that the Easterners believe they are solving with the brown European trout to-day.

Many of our streams present the condition brown trout like. For one thing, the Lower San Gabriel, and in fact, any of the larger southern streams in their lower courses look promising, so much so that several prominent Los Angeles sportsmen's organizations have interested themselves in the trout matter. As soon as the Southern California Rod and Reel Club gets a little relief in the present sea fishing situation it expects to turn its attention to the matter of trout.

Eventually the brown trout is to be given a conscientious trial in Southern California, and it may be that the vigorous alien will be discovered what local trout result have prayed for so many years in vain—a trout of hard flavor, sterling gameness, and three to four times the weight, willing to take the artificial fly per bottle, and all but quantity, and big enough to test the skill of the angler, if you can expert.

AT THE TRAPS.

Under the auspices of the Suisun Gun Club a very successful and well attended live-bird shoot took place on the grounds just east of Fairfield on Sunday, June 23d. The shoot was arranged and under the immediate supervision of John A. Wilson, Dr. W. E. Downing and William Crowley, officers and members of the Suisun club. These gentlemen did their work well, everything being arranged with the greatest possible comfort and convenience for the visitors and shooters.

Many very creditable scores were made, J. W. Harper of Suisun and Clarence Nauman of San Francisco carrying away the highest honors.

About a thousand birds were grassed during the day. As a rule, the birds were lively and flew well. A large delegation of countryside "sharp-shooters" were in evidence to pot the birds which managed to escape the contestants and find their way outside the lines. Following are the scores of the principal events, all six-bird races:

Downing	1	1	1	0	0	1-4
O'Hara	0	1	0	0	1	2-3
Mayfield	1	1	1	0	1	1-5
Clark	1	1	1	0	1	1-5

Drake	1	1	1	1	1	0-5
Crowley	1	1	1	1	1	1-6
O'Hara	1	0	1	1	1	1-5
Downing	1	1	1	1	1	1-6
Mayfield	1	1	1	1	1	1-6
Bassford	1	0	1	0	1	0-3

Morrill	1	1	1	1	1	0-5
Suggs	0	1	1	1	0	1-4
S. Reams	1	1	1	1	1	1-6
Roy Bassford	0	1	0	0	1	1-3
Harper	1	1	1	1	1	1-6
C. Kagee	1	1	1	1	1	0-5

O'Hara	1	1	1	1	1	1-6
C. Reams	1	1	1	1	1	1-6

Downing	1	0	2	1	0	1-4
Mayfield	1	1	0	2	0	2-4
L. Pierce	1	1	0	1	1	1-5
Nauman	1	1	1	1	1	1-6

Krake	1	0	2	2	1	1-5
Wilson	1	1	1	2	2	2-6
Ben Reams	2	1	1	1	1	1-6
Kagee	1	2	1	1	1	2-6
Mason	1	0	1	0	1	1-4

S. Reams	2	2	1	1	1	1-6
Suggs	1	0	1	1	2	0-4
Harper	1	1	1	1	1	2-6
Chas. Reams	1	0	1	1	1	1-5
Clark	1	1	0	2	1	1-5
O'Hara	1	2	2	2	1	2-6

Mason	1	1	0	2	1	2-5
Pierce	1	2	1	2	2	1-6
Downing	1	1	1	2	1	1-6
O'Hara	1	0	0	2	2	2-4
Nauman	1	1	1	2	0	0-5

Crowley	1	2	1	2	1	2-6
S. Reams	1	0	1	2	1	—

Wilson	1	2	0	—	—	—
Flammer	1	2	1	0	1	2-5

The Interstate Association circuit for the balance of the season is the following:

Eastern Handicap, July 16-18, at Boston, Mass., under the auspices of the "Palefaces." Added money, \$1,000.

Western Handicap, August 20-22, at Denver, Colo., under the auspices of the Denver Trap Club. Added money, \$3,000.

Pacific Coast Handicap, September 10-12, at Spokane, Wash., under the auspices of the Spokane Rod and Gun Club. Added money, \$1,000.

Communications relating to these tournaments should be sent to Elmer E. Shaner, secretary-manager, 219 Coltart Square, Pittsburg, Pa.

The closing circuit for Coast events will start at Spokane with the Pacific Coast Handicap in September and close at Douglas, Ariz., October 13th, with only an occasional day off during the interim, with the exception of the time necessarily passed on the trains traveling to and fro.

The Coast Circuit dates are: Spokane, Wash., September 10, 11, 12; Portland, Ore., September 15, 16, 17; San Francisco, September 20, 21, 22; Western Gun Club at Los Angeles, September 25, 26, 27; Los Angeles Gun Club, September 29, 30, October 1; Coronado, October 3, 4, 5; Douglas, Ariz., October 11, 12, 13.

A little over a month is required, and the shooters who make the journey will take part in at least seven tournaments, and each one will burn about eight cases, or 4,000 shells, on an average. Preparations already are being made by the local tournament committees.

Pleased at the reception they were accorded on their first visit to the Coast, the celebrated Eastern expert shots, headed by William R. Crosby, will again go down the line of the Coast Circuit this fall.

Among those already planning to come are William R. Crosby, Rolla, O.; Helkes, Thomas A. Marshall, Fred Gilbert, William H. Heer, Ralph Trimble, Chas. A. Young, Otto Sens and others of the Southern squad. Hirschy and the Northern brigade are sure to be on hand. Gilbert was not out with the rest last year, owing to illness, but is fully recovered. H. D. Freeman of Peters fame also will be here, it is reported, with the rest of the Peters squad.

In addition, the full force of the San Francisco, mid-State and Puget Sound champions will make the trip.

This phenomenal turnout of shotgun masters only is made possible by the syndicating of the clubs into a big association with power to allot dates. This year a circuit has been arranged which permits those who care to do so to take a trip beginning at Spokane.

Fred B. Mills and M. G. Lane, who attended the Grand American Handicap in the East, have returned. They say the climatic conditions are very trying to a Western shooter, who is confronted with them for the first time.

At a recent shoot of the Hanford Gun Club the following scores were shot:

W. R. Newport, 73 birds out of 80; L. S. Chittenden, 71-80; R. R. Cadwell, 68-80; A. Vaughn, 62-80.

The Willow Slough Gun Club of Woodland, Cal., held a meeting recently and elected the following officers: J. L. Harlan, president; Tracy Boesstler, secretary; L. Lieber, treasurer; James Keys, R. Cassell and J. B. Baker, trustees. The club has a membership of sixty.

The Arcata Gun Club entertained members of the Eureka Gun Club June 23d. The scores, in a 25-target race, were as follows: Eureka—E. Halling 25, J. Smith 23, W. Parker 21, S. Clanton 20, Dr. Perrott 20, H. Buhne 19. Arcata—Len Yocom 18, H. Parton 17, H. Brizard 17, J. Sammons 16, N. Yocom 16, D. Tinkey 16, T. Barter 16, E. Beaulieu 16, L. Everding 17, C. Falk 15, H. Wahl 15. Chicken dinner was served the members and visiting shooters at the Union Hotel.

One of the Vallejo shooters writes us: "The Vallejo sportsmen who attended the live-bird trap shooting tourney at Suisun returned that evening with all kinds of good things to say of the hospitable manner in which they were received and entertained by the Slough City shots. Some of the best scores

of the day were made by the Vallejoites, whose nerve and eye at the traps have long been known throughout Solano county.

"A big meet is to be held in Cordelia in the near future and the Vallejo boys will again clean up their guns and acquire their shooting eyes before taking part."

A good story is told about Tony Prior, P. B. One of the Rio Vista shooters who intended going to the Suisun pigeon shoot, a good shot, too, he was, desired to know what shooters would be in attendance, was given the names of a number of shotgun artists, each of whom he commented on as to his chances against them, finally the name of Tony Prior was mentioned. "Oh, rats!" he exclaimed, "I ain't afraid of none of those Portuguese shooters, I kin outshoot him, all right." The river man thought everybody named Tony was a Portuguese. They are, up in his section, and he was guided accordingly. But what a difference he would find if he met our Tony at the traps.

The San Andreas Gun Club had a preliminary shoot last Sunday. The meeting was for the purpose of trying the traps and getting the members into shape for a regular shoot, which will take place next Sunday. The work was new to most of the members, as few of them had ever before shot over traps. All seemed to be enthusiastic over the result of the first shoot and there is much looking forward to the next meeting. The following are the scores at 21 targets:

C. J. Tiscornia 10, J. B. Reddick 12, G. Pfortner 18, Mat Zwinge 5, Robt. Crossett 0, Robt. Casey 8, J. P. Snyder 10, F. J. Soinsky Jr. 2, F. C. Wells 3, R. W. Decker 9, J. A. Treat 0, J. Dasso 9, H. Zwinge 8, B. Raggio 8, M. A. Kiser 4, C. Nuland 4.

The West Seattle Gun Club shoot on June 23d was well attended, twenty-five shooters being present, among whom were Mr. Hillis of the Peters Cartridge Company and members of the Ballard and Seattle Gun Clubs.

Some good scores were made, Charles Longfellow winning in the 50-bird event, breaking 45 out of a possible 50, and Arnold second, with 43. Following are the scores.

First event, 50 birds, known traps, unknown angles, Sargent system—C. Longfellow 45, Arnold 43, Williams 40, Valleen 36, A. Schram 33, Purcell 37, Barthelme 30, Rowley 18, Schultz 33, Battie 16, G. Nehrbas 10, Hillis 36, Sweeney 21, Diller 35, Dethridge 35, Johnson 31, Burnett 39, Lipskey 32, J. Nehrbas 33, C. Schram 17.

Second event, 25 birds, unknown traps and unknown angles—Williams 23, Burnett 13, Arnold 20, Valleen 21, Schultz 7, Purcell 21, Rowley 9, Hillis 20, Sweeney 11, Johnson 12, Dethridge 16, Lipskey 17, G. Nehrbas 15.

Third event, 5 pairs—Williams 5, Lipskey 4, Rowley 2, Longfellow 4, Schultz 3, Valleen 7, Arnold 6, Nehrbas 7, Hillis 7.

Fourth event, 15 singles—Hillis 13, Arnold 12, Longfellow 12, Valleen 11, Williams 8, Nehrbas 9, Schultz 8, Lipskey 9, Rowley 4, Williams 8, Diller 15.

The San Luis Boat and Gun Club shoot on June 23d resulted in the following scores in five events, 12, 20, 20, 20 and 6 pairs respectively: H. A. Martin, 11, 19, 16, 17, —; Louis Steen, —, 10, 10, 14, 6; A. B. Van Scoy, 9, 16, 12, —, —; Lee Parsons, 7, 18, 14, 11, 8; J. C. Hill, 8, 14, 18, 11, 4; E. Taylor, 6, 12, 17, 15, —; J. E. Van Schaick, 9, 13, 13, 12, 5.

The Goldfield Gun Club was recently organized by some fifty sportsmen hailing from the Nevada mining town.

Thieves broke into the Tacoma Gun Club's traps on the tide flats recently and carted away a lot of valuable fixings required in operating the traps. The police have been notified and a search is being made for the culprits.

The club's traps are located on the tide flats and in that lonely locality it was an easy matter for the thieves to force an entrance to the small building where the traps and other machinery necessary in operating flying targets are kept. The miscreants passed up the large quantity of "birds" that were stacked into the place and devoted their attention to the batteries, magnets, cable and other valuable fixings. A complete electrical apparatus for pulling and operating the traps was taken and five traps were ruined by the thieves in prying off the magnets with an instrument thought to be a crowbar.

It is estimated that it will cost the club in the neighborhood of \$100 to replace the stolen articles.

A recent report from Loyalton, Sierra county, states that M. Manosaro was arrested last week and taken before Judge Mouroe for violating the State game law, he having been found with some little ducklings in his possession.

He had robbed a wild duck's nest and hatched the eggs under a hen.

The offender tried to shift the blame to some of his fellow countrymen, but the evidence against him was so conclusive that the Judge fined him \$100.

Dr. W. D. Coats immediately went and pleaded guilty to the same charge, he having some wild duck's eggs under a hen at the time. He was fined \$25.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

BULL TERRIER CLUB OUTING.

The initial annual summer outing and specialty show of the Western Bull Terrier Breeders' Association will go down in the records of Coast dogdom as one of the most pleasant and successful functions enjoyed by the fancy up to the present time, not only that, but the seed has now been planted for, it is to be sincerely hoped, not only future gatherings of the association, but as well a healthy growth of fanciers reunions all over the Coast. These little gatherings will do much to foster good fellowship and sportsmanlike interest and enthusiasm among the fanciers and specialty clubs.

Last Sunday morning the members of the association and invited guests with their Bull Terriers journeyed by early trains, from this city and Oakland, to San Jose, the trip through a beautiful countryside, on both sides of the bay, is a most enjoyable one. At the Garden City, Mr. Will Bogen was in waiting for the party with a special car. A delightful ride of seven miles through a magnificent fruit growing country, said to be, acre for acre, the most valuable orchard land in the world, soon brought us to Englewood, a magnificent orchard domain fair to look upon and teeming with a bounteous and ripening crop of the various fruits that the Santa Clara Valley is world famous for. Here, with genial hospitality, Mr. and Mrs. Bogen welcomed the party and made everybody thoroughly at home and comfortable. The day was an ideal one, the visitors were soon at ease on the lawn and in the cool shade of the grand olive and pepper trees surrounding the Englewood country house.

After a brief time devoted to pleasant and timely topics, an inspection of the Englewood kennels, etc., not overlooking the inner man in an irrigational way, the program for an impromptu show was entered upon and carried out to a jovial finish that was thoroughly enjoyed by all present.

A number of regular and irregular classes had been arranged, Phil M. Wand, who knows a Bull Terrier as well as he does an English Setter or a Pointer, judged all classes and did so in a way that would put some professional judges in the shade. Will Bogen was ring steward and Elliott Pierce acted as superintendent. The chairman of the bench show committee, Master Bride Donaldson Thorburn, was a model official, in a way, he is only two months old, he let the show take its course, while he calmly slept under the shade of a great olive tree.

The first class on the lawn was the infant dog class. Numbers were placed in a hat and drawn by the ladies who handled the puppies with numbers corresponding. Englewood Kennels came out on top with E. Lizard, handled by Mrs. W. C. Bogen, first; E. Wizard, Mrs. Bell handler, second; E. Blizzard, Miss Shortall handler, third. The infant bitch class followed: E. Josephine, Mrs. C. R. Thorburn handler, first; E. Vaseline, in charge of Mrs. Phil Wand, second; and third to Little Orphan Anne, handled by Mrs. Bell. In the next class, a special mix-up of both sexes of puppies, E. Josephine was first and E. Lizard reserve.

The infant classes were a very nice lot of promising puppies, in awarding the ribbons the classes will go on record possibly as being the only ones wherein exhibitors and spectators gave way to unanimous applause for every award. The work of the handlers was up to the best seen in the show rings of more ambitious shows, nor were the ladies unstinted in receiving spontaneous applause.

In dog and bitch puppies there were five good youngsters, better than are usually seen at the regular shows. Judge Shortall's Silkwood Ben Ali took the blue, looking way better than at the Chutes show, where he won special for best puppy and is as stylish and showy an actor in the ring as one wants to see. Stiletto Cold Steel and Stiletto Blade, two Woodlawn Baron ex Ch. Meg Merrilies puppies, were given red and white. This trio will bear watching at future shows. W. H. Carmichael's Lady Topper came in for v h c.

Novice dogs were S. Coldsteel first, J. M. Taft's Haymarket Prince, a neat headed, well built dog, second, S. Blade third.

Open dogs—Ben Ali first, Cold Steel second, Englewood Vanguard, in fine fettle and improved over Stockton and Frisco specialty shows, third. Blade v h c, Haymarket Prince v h c, Silkwood and Glen absent. Winners dogs—first Ben Ali, res Cold Steel.

Novice bitches—first Mrs. Hugh McDonald's Princess, second W. H. Carmichael's Englewood Blix, third Mrs. Bell's Lucille, res W. H. Carmichael's Lady Topper.

Open bitches—first Princess, second Blix, third Newmarket Pride, v h c Lady Topper, Lucille, Englewood Blossom.

Special novice bitches, over 12 months and never exhibited—first Princess, second Blix, third Lucille. Canadian bred class—first Haymarket Prince, second Market Pride.

Winners bitches—first Princess, res Blix. Best stud dog, judged by two of his get—first Woodlawn Baron (S. Cold Steel and S. Blade), second Bonnybred Suietto (E. Vanguard and E. Blossom).

After lunch the "lemon" class was judged. There were four entries. Little Orphan Annie won the lemon. Ch. Meg Merrilies got the gate. Dougie, a Dach, properly whitewashed for the occasion, was disqualified. Mrs. Wand's entry lost a chance for the lemon. Mrs. W. had to rescue little Miss Wand's puppy. Mrs. Denny's puppy was making a lunch of it. Mr. Thorburn returned to the ring with a Spring-

field shooting iron to argue the case with Mr. Wand, the latter made a Mercurial dissolving picture of himself in the direction of the barn.

All of the dogs present were next brought in, the yellow ribbon was awarded S. Cold Steel for the best eye. For the best ear crop Mr. Taft's Haymarket Prince won the yellow.

Mrs. Wand won a handsome young puppy by Chaddie Wild-Newmarket Pride which was raffled for, the proceeds will be devoted to the purchase of a cup to be put up at a future bench show.

An interesting contest closed the show features. Englewood Vanguard was scored on the standard of points by Mr. Wand and Mr. De Witt. Each of the ladies and gentlemen members of the club individually scored the dog. The score nearest the figure first made was to win, this figure averaged 73½. Mr. Thorburn's score total was just 73½.

In all there were thirty-three dogs shown, a lot that averaged better in type and class than we have yet seen benched at our Coast show.

Luncheon was served in a spacious and cool grape arbor; the menu was bountiful and appetizing. Speeches were made by Mr. W. C. Bogen, Mr. Chas. R. Thorburn, Judge Shortall, ex-Gov. Salomon and others. Toasts were drunk to the health and prosperity of the hosts and a vote of thanks unanimously tendered to Mr. and Mrs. Bogen for open handed hospitality and their kindly efforts in giving the company so pleasant an outing entertainment.

A meeting of the club was held during which reports of the various officers showed the club to be in a prosperous condition. Mr. Frank Medcalf of Hilo, Hawaii, Judge E. P. Shortall, Mr. Harry Bogen and Norman T. Rogers of Oakland were elected to membership.

The officers of the club are: W. C. Bogen, president, Campbell, Cal.; F. E. Watkins, first vice-president, Portland, Ore.; W. H. Carmichael, second vice-president, San Jose, Cal.; Elliott H. Pierce, treasurer, Berkeley, Cal.; Chas. R. Thorburn, secretary, 225 Alcatraz Ave., Oakland, Cal.

Among those present were: Mr. and Mrs. W. C. Bogen, Mr. and Mrs. Chas. Reid Thorburn, Mr. and Mrs. Phil M. Wand, Mr. and Mrs. A. D. Bell, Judge E. P. Shortall, Miss A. R. Shortall, Mr. and Mrs. W. H. Carmichael, Mr. and Mrs. J. Taft, Mr. and Mrs. Ben Wall, Mr. and Mrs. C. W. Denny, Mr. Elliott H. Pierce, Mr. A. F. Kindt, Miss D. Emerson, Mrs. Hugh McDonald, Mr. and Mrs. Lee, Mr. and Mrs. W. Bogen, Mrs. Tyler Beach, Ex-Governor Salomon, Dr. Salomon, Ed Salomon and Harry Bogen.

DOINGS IN DOGDOM.

Derby entries for the twenty-fifth annual Pacific Coast Field Trials will close this year, we are informed, on August 15th. Further information, blanks, etc., may be obtained by addressing the secretary of the club, Mr. Tudor J. A. Tiedemann, 802 Fifth street, San Rafael, Cal.

Entries for the Collie show, in conjunction with the State Fair, September 13-14, at Sacramento, will close on August 25th. Entry blanks and further information can be had by addressing Secretary J. A. Filcher, Sacramento, Cal.

A prominent local fancier and sportsman during a recent discussion over the field merits of two well known English Setters, Ch. Stylish Sergeant and Ch. Mallvyd Bob, and their value as producing sires, made the statement that he would wager \$1,000 that Sergeant judged by two of his get would handily win out over two of Bob's sons or daughters. This offer was made in good faith and stands, should there be any desire to take issue on this challenge the Kennel Editor will furnish the name and address of the principal.

Mr. Fred P. Butler, the popular secretary of the San Francisco Kennel Club has, we regret to note, been laid up for several weeks with an attack of typhoid fever. The fact that Mr. Butler is now convalescent and on the road to recovery is a matter of keen satisfaction to his many friends.

Clancey III, the winning Boston bitch at Riverside show, recently purchased by Miss Jennie Crocker, arrived at San Mateo safe and sound. The newcomer is a handsome little bitch full of class and quality and a most vivacious shower. With Ch. Endcliffe Tortora, Frisco Cinders and Dick Dazzler the San Mateo Kennels should make the pace with Coast Bostons.

Elsworth Yale, a winning Boston, owned by Miss Crocker, succumbed to a severe fit last Sunday morning.

A recent whelping by one of J. I. Sparrow's bitches to John Calkwell's Silkwood Surprise, produced five dogs and four bitches, every puppy pure white. Miss Crocker has purchased the dog puppies and they are now at San Mateo.

Valverde Collie Kennels' fine young bitch Ch. Valverde Venus (Ch. Southport Philosopher-Gladys May) was served by Ch. Anfield Model July 1st. Southport Servant, a grand-daughter of Ch. Wellesbourne Conqueror, and Ch. Parbold Piccolo, winner of fourteen firsts in England, was served by Ch. Wishaw Leader July 2d.

George A. Cranfield's imported English Foxhound Sweet Music whelped July 1st eight dogs and two bitches to Harkaway III, now at stud in England.

This breeding should produce some desirable English Foxhounds.

James Rolfe Jr., president of the Mission Bank, has just returned from a trip to Europe, and while in England he purchased three good Cocker Spaniels, a black bitch and two white and black parti-colored dogs. The new Cockers were due to arrive here this week. It is said Mr. Rolfe paid a long price for the three. He is entitled to the support and congratulations of the fancy for his efforts to improve the breed here.

Mr. B. Colfish's handsome black Cocker bitch Jennie (Ch. Woodland Duke-Princess Flora) was served by D. P. Cresswell's Ch. Mepals Saxon this week.

Mrs. Whipple's grand black bitch Sis Hopkins was also served by Saxon this week.

There is a chance for some good missionary work in the interior, if the following from the Tulare Register is reliable:

"Justice of the Peace James H. O'Leary is the proud possessor of a valuable Scotch Terrier pup, which he purchased recently for a pretty penny from an owner of high-bred dogs. The animal is beautifully marked and intelligent and is considered one of the most handsome specimens of dog flesh of its kind seen here for some time."

If the pup has a "black roof" in his mouth, web-feet and dew claws this combination would work well with the "beautiful" marking.

DOVES NUMEROUS.

The dove season will open on the 15th of July. The bag limit for doves is twenty-five. According to reports this will be one of the biggest seasons in the State. Doves are plentiful in all parts of the Sacramento valley and in the foothills.

Out near Santa Ana, Clearwater and Garden Grove, Southern California, the supply of doves is very much larger this season than it was last, and this is explained by the rigid enforcement of the "no sale" law and the length of the closed season. In fact, a large number of the birds can be seen on a run to any of the interurban towns. Riverside and San Bernardino are good breeding spots for doves and the supply is plentiful.

A great many quail have been seen by automobile parties near San Diego, Elsinore, Murietta and Pala. The calling of large flocks of quail can be heard in the Temescal canyon at all hours of the day. The disastrous fires in the San Fernando valley last year destroyed a large area of favorite quail ground.

TRADE NOTES.

Dupont Smokeless at the G. A. H.

That the du Pont Company can point with pride to the outcome of the Grand American Handicap tournament at Chicago, June 18-21, 1907, is beyond question. The following record made by that company's smokeless shotgun powder during that tournament speaks for itself: "The trophy and the first eight moneys in the amateur championship event went to men who shot the above powder, Mr. H. M. Clark of Urbana, Ill., winning the event by reason of his consistent shooting. In the Professional Championship Mr. W. R. Crosby won the title, trophy and first money, while Fred Gilbert finished only one target behind him; both men shot Dupont Smokeless. The State amateur team championship was won by the Illinois team No. 3, composed of Messrs. B. and H. Dunnill, J. R. Graham, Jesse Young and H. M. Clark, all of whom shot Dupont Smokeless in that event. In addition to the above, high average for the entire 500 targets of the program was won by an Illinois amateur, who broke 472 targets, beating his nearest competitor, a professional, by two targets. In making this record the gentleman used the powder above mentioned. Other honors won by the du Pont Company were: The long run of the tournament, as well as 97 out of 100 from the 21-yard mark in the Preliminary Handicap, and 96 out of 100 (tie for first place) from the 20-yard mark in the Grand American Handicap itself. A specially notable feature is the fact that in the Amateur Championship over 79 per cent of the total purse went to those who preferred to shoot Dupont Smokeless to any other powder. The above makes a record never even approached by any other smokeless shotgun powder ever made or now on the market."

Reliable Ammunition.

An interesting fact, contrasting the good and bad features of shotgun loads, is the observation of a prominent local sportsman, who has taken part in most of the Coast big trap tournaments this season. In referring to the many shooters who scored high averages using Selby Factory Loads, he said:

"These reliable loaded shells won at the tournaments held in San Francisco, February 22,23,24; March 10; April 14; May 10, 11, 12. Won at Fresno, March 3, 4; at Modesto, March 17; at Los Angeles, May 4, 5; at Walla Walla, Wash., May 16, 17, 18, and at Sacramento, May 24, 25, 26. This is a guarantee for these popular loads, which have had a deserved reputation for years past for accuracy and reliability. A good loaded shell is an absolute necessity for the shooter these days, for one must score straight or nearly so to come out on top at the traps."

THE FARM

PURE MILK AND THE FAMILY COW.

It not infrequently happens that when the family cow is left to the care of thoughtless employes, unsanitary conditions arise which are unsuspected, and possibly the spread of contagious disease.

It is of the utmost importance that every family cow be in perfect health to begin with. This can be determined by calling in a veterinary surgeon. The small amount of money spent for this purpose will not be begrudged when the fact is considered that the health of the entire family, and especially the children in it, is at stake.

When the fact is established that the family cow is in perfect health, certain rules should be laid down for employes and adherence to these rules insisted upon.

A gentleman who produces milk for the consumption of infants and invalids, and who is extremely careful to insure absolute purity, has formulated a number of regulations for his employes which contain suggestions worth considering.

He insists that the cows shall have at least four hours every day in the open air, winter and summer, unless the temperature goes above 90 degrees or below 30 degrees. In this case the cows are Holsteins, and are accustomed to out-of-door life even in winter. It would be a mistake to suddenly expose cows which have been closely stabled to extremes of weather.

It is insisted upon that the cows shall be treated kindly and gently at all times, and any employe who strikes a cow, twists her tail, or in any other way maltreats her, is immediately ordered from the premises. The animals are fed three times daily and watered twice, being given all the water they will drink.

The milker is ordered to keep his nails short and clean, and to wash his hands before milking each cow, and after emptying each can. He must also wear a clean milking suit, which is used at no other time. Any employe who is sick or indisposed is not even allowed inside the barn until he has recovered.

The owner insists that his cows shall be thoroughly brushed every day, and that the udder is carefully cleaned before any milk is drawn. The first milk from each teat is always drawn into a special pail, used for that purpose alone. This practice has been adopted because of the fact that disease germs often find lodgment in the entrance to the teat and come away with the first milking. Some milkers never draw this fore milk into the milk pail, but they do milk it upon the floor of the stall, which is almost as bad a practice, as the milk often sours before it is washed away.

Such rules as these should be enforced by every man who owns even one cow, if he has employes, and should be followed as closely by himself if he does his own milking.—R. L. Rawson in Suburban Life.

MEAT FOR LAYERS.

One of the best foods for making hens lay is lean meat. When the supply of eggs fail, stop all other foods, and feed lean meat or liver (any cheap meats will answer) and it will be found superior to anything that can be used. Green bone, containing a large proportion of lean meat, is even better, provided the fat portions are removed from the bone. It will be found cheaper than grain, because it will make eggs. One reason why the hens fail to lay when they have plenty of grain is that they require a change, and meat supplies the needful. If the hens are fat, give one ounce of lean meat each day, allowing no other food for a week or two, and watch the results.

PRIZE BULL.

Among the many prizes which will be offered for displays at the National Irrigation Congress, which will be held in Sacramento, Cal., during the coming September, none will excite more general interest than that which is offered by The California Promotion Committee for the best display of the products of a single irrigated farm.

This prize is a registered bull from the famous Pierce Riverside Premier Herd of Holsteins, and is registered in the Advanced Register as "California Promotion Boy."

California Promotion Boy was born October 10, 1905, and will be two years old just after the close of the Irrigation Congress. He combines the best blood lines of imported and American breeding, and is worthy of heading any man's dairy herd. He will be on exhibition during the entire session of the Congress, having been made a delegate, and will undoubtedly attract as much attention there as did the famous Juliana de Kohl, sent by The California Promotion Committee as a delegate to the Butter-Makers' Convention, held at the Louisiana Purchase Exposition at St. Louis.

California Promotion Boy was sired by the famous bull Jetze, winner of eight gold medals obtained in show rings of Holland and America, and generally conceded to be the finest bull in America. California Promotion Boy's dam, Idlewild Blanco Belle, was officially tested at the age of twenty months, and gave 231 pounds of milk, making over 10 pounds of butter in seven days. Her dam, Idlewild Blanco, was officially tested at the age of three years, and gave 322 pounds of milk, making 13 pounds and 7 ounces of butter in seven days. The dam's dam's dam, Victor Idlewild II, made an official seven-day record, giving 371 pounds of milk, making 17 pounds and 8 ounces of butter. The three sires on the dam's side of this pedigree have all been placed on the Advanced Register.

CHANGE IN SHIPPING CONDITIONS.

Montague, June 28.—This town and Gazelle, a few miles to the south, have been the main feeding and shipping points for the country to the east of here. Cattle and horses from Eastern Oregon and Northeastern California have been driven here in large numbers in years past and fattened on the great stocks of alfalfa and wild hay that is grown in the Little Shasta Valley. When ready for the market these cattle have been shipped northward to Portland and Seattle markets, and southward to San Francisco. Montague is midway between Portland and San Francisco and annually thousands of dollars have changed hands at this point, the buyers usually coming here to transact the business.

The California Northeastern road now being built from Weed to Klamath Falls will run beyond the mountain range east of these feeding grounds and will furnish transportation for the stock shippers many miles nearer to the stock ranges, thus saving miles of the long overland drive. It is thought that this fact will alter conditions here very much and that the main stock shipping point in future will be at Mount Habron, a station on the new road.

In this event it is said that the farmers and heavy feeders will buy cattle from the ranges and feed for the markets as before, thus entering into competition with present stock raisers. They will also engage in the raising of cattle themselves and can use their hay to better advantage. The Edson Company at Gazelle fed 1,500 steers in their yards the past winter.

Never feed your birds anything that is not well advertised. An article which will not keep up its reputation when well advertised, is not fit to be fed to anything.

Everything should be kept as clean on the little chick's feeding floor as it is on the floor of the kitchen. If this is done the little birds will never have gapes or many of the diseases.

STABLE AND LIVE STOCK.

It is necessary that the cows be given an abundance of shade during the hot season. It is often best to keep them in the darkened stable during the middle of the day, allowing them the run of the pasture or an open lot during the morning and evening.

There are various preparations which may be used to advantage in preventing flies from tormenting the cows, but perhaps there is no simpler way of making the animals comfortable in the barn than by covering them with a blanket made of light meal bags. There will be much less work in keeping the horses clean and their coats in good condition if light blankets are used.

Cows which are fresh this month should have particular care. They should be kept quiet and in as cool a place as possible. After the calf comes the cow should be given a bran mash, slightly salted, and plenty of water. The milk should not be used for ten days, but it is best to remove the calf immediately. If the mother never sees it, she will be less fretful and uneasy.

If the calf is to be raised, it should be quickly taught to drink milk by dipping the fingers in a dish of milk and thrusting them into the calf's mouth. It is a mistake to attempt to teach the calf to drink from a pail, as the pail is so deep that it shuts off the youngster's vision and he becomes frightened. If a shallow dish is used, his eyes are not blinded and he learns to drink much more quickly. Be sure to wipe the milk from his nose and mouth; it may sour and spoil his appetite.

STICK TO ONE BREED.

Whether your stock is Jersey, Guernsey, Holstein, Brown Swiss, or any other class of cattle, stick to your text, and once having made up your mind what you want, keep on in that line with a pure bred bull, and you will have a uniform herd of some kind and as a general proposition a better grade of milkers than to jump from one breed to another each succeeding season. You get a reputation in a short time of having a herd of Jerseys, Holstein, Swiss or some other breed of cattle, even if you never had a pure-bred female on the place, providing you have a sire of the same breed for two or three succeeding generations.

Even with the greatest care that can be used in selecting calves there will be disappointments. Occasionally a calf that you expected the greatest things from proves a disappointment. The best sires are often sacrificed before their real worth is known. On several occasions we would have given many times what a comparatively good bull could be bought for if we could get back some animal that had been sent to the butcher before his real worth as a breeder was known. Of course, this is an unfortunate condition that only time and close observation on the part of the breeder can obviate.—Extract from address of W. E. Jones before Illinois Dairymen's Association.

A woman subscriber writes that she never puts more than twenty chicks with each hen and keeps them in coops on grass sod. She never allows the mother hen to run at will, but keeps her tied to one side of the coop or to a wire, so that she can pass from one end of it to the other. She never gives an entire ration of corn, but feeds wheat and oats chop in connection. Last year she raised 500 chicks out of 700 hatched.

It is an excellent plan to plant the runs to some kind of a crop as soon as the chicks are removed from the little coops to the colony houses. The growing crop has a tendency to destroy many of the germs and leaves the run in a healthier shape for the chicks the next year.

As soon as the hatching season is over, separate the cocks from the hens and feed them a little extra. Many male birds on the average farm are overworked and need a few weeks' rest.

IN THE POULTRY YARD.

The old hens which are to be disposed of should be marketed before they begin to molt. If they are to be sold as dressed poultry, they should be deprived of food for twenty-four hours before being killed. Let them have plenty of water during this time, however. A few weeks before the hens are sold it is well to feed them liberally on soft food containing plenty of corn meal, in order to get them as fat as possible.

The cockerels should be separated early from the pullets and put in a pen by themselves, where they may feed a day and be allowed only enough exercise to keep them in a healthy condition.

Kerosene and whitewash should be used freely throughout the poultry-houses all through the summer to keep down lice. It is a wise plan to have roosts which can be taken out of the house at least once each week and treated to a kerosene bath, in order to get rid of the red mites which collect underneath the roosts and infest the fowls at night.

If the flock of poultry is kept confined in small quarters, animal food in the shape of beef scraps or cut bone will be needed in summer as well as in winter. Green food in some form will also be needed, but this generally can be supplied in sufficient quantities from the vegetable garden or by using lawn clippings. Oftentimes it is possible to let the hens out of their yards for an hour or two just before dark, when they will not roam far from their quarters and will secure enough grass and other green food to balance their rations.

The price of meat continues to advance, and Secretary Wilson expresses the opinion that it will go still higher. The Secretary believes, further, that it is the natural result of the law of supply and demand, and cannot be charged to the machinations of the packers. He points out the fact that there has been a constantly increasing demand for meat, due to the prosperity of the country, and that the production of meat animals has not increased correspondingly. "The American people," says the Secretary, "are eating more meat to-day than ever before in their lives. The American workman has meat every day, and, as a matter of fact, most of them have meat for breakfast and for dinner. And the American workman wants the best meat in the market, too. He is earning to-day better wages than he ever earned before in all his life. A man digging a sewer to-day is better fed than Queen Elizabeth in all her glory." The Secretary also points out that in the face of the increased demand for meat the number of cattle received at Chicago during May was 10,000 less than in the same month of last year. Secretary Wilson's explanation, however, is poor comfort to the housekeeper who is compelled to pay constantly increasing prices for the necessities of life and who sees further advances ahead. Some persons figure, too, that the difference between what the packers pay to the cattle raiser and what they charge the consumer is larger than ever before. In fairness it should be said, however, that the packers have made and are making large expenditures for the improvement of their plants so as to meet the rigid requirements of the Federal inspection system, and they must have a larger margin of profit to cover this. The public is undoubtedly now getting more wholesome meat prepared under more sanitary conditions, but it is also being compelled to pay higher prices.

The poultry raiser is now finding out that the early hatched chicks are more vigorous and profitable than the late hatches. The birds hatched in March are healthy and vigorous, while the birds hatched a few weeks ago are infested with lice and many of them are falling victims to disease. The early hatches will be ready to go on the market in a very short time when the price is high, while the late hatches will not be ready for a month or more. Then the market will be overstocked and the price will be low.

THE MAN AND THE COW.

There are three kinds of cows in this country: The special-purpose, the general-purpose, and the no-purpose. The latter are in the majority.

The West Virginia experiment station got more value out of skim-milk by feeding it to hens than some dairymen get for the whole milk, when it is sold for city consumption.

The farm separator separates the fertility from the sunshine and water in milk, and keeps the fertility on the farm.

We know an Illinois swine breeder who has become rich buying skim-milk at the near-by creameries at 20 cents the hundred pounds. This milk is what the creamery patrons do not think it worth while to haul back home.

Scalding water and summer sunshine are both death to bacteria. Make the stables light and keep the milk things in the hot sun as much as possible.

The dairyman who doesn't know what profit each cow yields has not learned to take the first step toward success.

Don't buy a cow until you have tested her, by milking her more than once. Selling cows and trading horses are deals that try men's morals.

Keep the milk flow up as long as possible. After a cow begins to fail, it is hard to induce her to gain what she has lost.

A fat dairy cow gives her owner notice that she is being put to the wrong use.

One germ produces another in twenty minutes in warm milk. Get the milk cooled as soon as possible. It should be cooled to 40 degrees if possible.

A careful system of keeping accounts with a large number of dairies in Illinois showed that 25 per cent of the best cows produced more profit than the remaining 75 per cent. This is worth knowing—if you will think about it and act on it.

A Holstein heifer at the Nebraska Agricultural College gave 8,640 quarts of milk in one year, that sold for \$518.40. The cost of feeding the heifer was \$71.43, leaving a profit above the feed cost of \$446.97. Here is a text for a mighty good sermon.

An Ohio dairy farmer owning 100 acres of land made a net profit of \$18 per acre last year. This means that at the end of the year he had paid all his expenses and had \$1,800 in the bank to show for his year's work.

The farm separator pays if for nothing else except getting the milk, warm and perfectly sweet, to the calves within a few minutes of the time it is drawn from the udder.

Give the calves a wisp of nice clover hay and a box with corn-meal in it. Then feed them skim-milk and let them learn to eat as soon as possible. You will be surprised how young they will eat hay and how much of it they will eat.

Butter absorbs foul odors almost instantly and should be kept where the air is clean and sweet.—American Farm.

The coat of the primitive sheep is supposed to have been composed mostly of hair with an undergrowth of fine wool. In this particular it was different from the goat proper, thus indicating that the sheep, although belonging to the goat family, it yet a distinct species. By a system of careful breeding the hair has been eliminated and the wool cultivated and increased until it has formed a complete covering. This has not been possible with the goat, which still carries its characteristic coat of hair, although greatly improved by scientific breeding. We yet find traces of the old hairy strain in the fleeces of the native sheep of Mexico and other countries where little attention has been paid to the blood of the flock. We also notice a natural tendency toward the return to the old hairy or kempy condition as a result of carelessness and negligence or too much inbreeding. Wool shows good blood and good breeding just as surely and accurately as the highly bred race horse can himself and any neglect is soon perceptible in the deterioration of the flock.

NOTES OF THE HOG LOT.

When fed dry, shelled corn is more economical than corn-meal to feed to fattening hogs.

To secure the best results care should be taken to feed the hogs according to age, conditions and time of marketing.

When an all-corn ration is fed to growing pigs the muscles of the body do not develop to their normal size.

Desirable breeding qualities in a herd are fixed by a long line of careful selection and breeding.

In selecting breeding stock it is an item to know whether they are from a family noted for fertility, as this is an inherited quality.

The swine breeder is responsible not only for the conditions he provides but for those he permits.

The boy and the big, generally speaking, are the important factors on the American stock farm.

The successful swine raiser is the practical one. He thinks out his work and then works out his thoughts.

One man says he knows there is "money in hogs," because he put some there. Not how to put money in hogs, but how to get money from hogs is most important.

See that the fattening hogs are protected from cold winds and rain. It requires additional corn to keep the animal comfortable if exposed to inclement weather.

The swine breeder of to-day cares very little for theories that cannot be practically applied. This is equally true with those following other lines of farming.

The old method of the haphazard feeding of the swine and the lazy man's method of throwing out corn to the hogs in quantity are fast becoming obsolete. The feeding of swine has become a science. Rations are prepared with a definite end in view.

Keep wood ashes in a convenient place so the pigs can eat all they wish. Ashes furnish mineral matter—potash, lime, soda—which helps build up the digestion and kill intestinal worms. If wood ashes are not plentiful give coal ashes.

An old boar or "stag" is too fierce a disciplinarian to be kept in the same lot with shoats; the pigs will soon learn deference for their elders, but pigs can't stand such culture and thrive.

More than 20,000 hogs were condemned in the United States in 1906 on account of tuberculosis, and it is feared by the Government inspectors that the number this year will be larger.

Hog prices seem high this year, but how can a farmer raise swine on land worth \$150 per acre for any less?

The hog raisers of the United States must, sooner or later, take South America into account. Strong competition will come from that country in time.

The chief fault of the common cattle found in this country to-day is the lack of quality and uniformity. This is not due so much to the lack of infusion of good blood as to the indiscriminate admixture of the blood of breeds of both beef and dairy types. The late Major Du Bois used to always get warm under the collar every time we would talk about this distressing discrepancy in the quality of our dairy herds. In traveling about the State by wagon road or rail, note the number of animals in each herd seen, also the variation in type, form and more particularly color. Except for the herds of the few growers of pure bred, or high grade cattle, the common bunches include a great variety of colors, and types. In some herds red, white, black, brindle and all conceivable combinations of these colors are to be found. At the same time some individuals will conform in a measure to strictly beef form, others quite markedly to dairy type with all gradations between these two. The indications of blood as seen in color will undoubtedly attract the attention of the casual observer more readily than other features. In other words, the presence and admixture of so many colors in common herds indicates that Shorthorn, Holstein, Jersey and less frequently Hereford, Brown Swiss and Ayrshire blood has been freely admixed.—Denver Field and Farm.

TROTTING BRED COLTS.

When the colt is one year old he should have a run at grass. A good pasture is an important part of the outfit of the farmer who wants to raise horses. It is not enough to turn them out in any old pasture and let them run until fall. If they get thin and wormy it may take the whole of the next winter to get them back into growing condition, and you have lost nearly a year's growth. Keep them thrifty all of the time, then you will get the size you look for and they will be strong to do something when you begin to educate them. In the winter before the colt is two years old the farmer should begin his education in harness, and right here I trust that the reader will pardon another lesson from my own experience. Among the first colts that I ever trained to harness was a colt of seeming docile disposition, and his first lessons went very smoothly, but one day when turning him around his head went to one side and he refused to go. He had been taught to obey, so when I insisted with a little emphasis from the whip he moved, but each day when I drove him he refused to turn, and each day it was harder to make him obey. Finally on starting out with him one day I happened to notice a little blood trickling down his lips. I immediately stopped and made an examination of his mouth, and to my surprise found that the corners of his teeth were sharp, so that when the bit was pulled to rein him that great gashes were cut in his cheeks. I immediately led him to the barn, waited for his mouth to heal, then rasped off the corners of his teeth and began driving him again, and a better behaved colt I never wish to see. How easy it would have been to have spoiled him. The lesson is obvious. Never begin to bit your colt until you have made sure that his cheeks will not be lacerated by the bit. And right here I want to say a word about the use of the whip. You often hear theorists and sentimentalists say "don't use a whip," and you often hear a man say, as if it added value to his horse, "he don't know what it is to be touched with a whip." Now I believe that such remarks are all hosh. A man should never lose his temper, and should never abuse his colt with a whip, but the colt should never be allowed to grow up without an education as to the proper use of a whip. One of his earliest lessons should be to learn that the touch of the whip means to move and move quickly. This can be taught him as easily as any other lesson, and without abuse or injury. The reason for this is that in driving one often gets into a tight place when only instant obedience will save a wreck, and if your horse has been taught the use of a whip you can, by a timely touch, make him realize that there is more trouble behind than ahead, and you may be saved from what otherwise would have been a frightful disaster. All this time when the farmer is not rushed he can get his colts accustomed both to single and double harness. Then another run to grass as a two-year-old will bring him where his education can be continued the following winter, and in his three-year-old form if you get where you need the help of another horse in the busy season it won't harm your three-year-old to do some light driving or light raking during haying, then, the next winter use him regularly, get him accustomed to everything, and in the spring that he is four years old he will be well broken and well muscled, and when a customer comes along that will give you a profit don't fail to let him go and put your time on the three-year-old. So that if you are raising only one colt a year you will have something to turn into money each year. Don't get scared if you sell a colt and some very skilful horseman puts him into condition so that he gets a long price. Remember that you perhaps haven't that ability to do this, and be content to do faithfully what you are capable of doing and take a fair profit for your labor when you can get it. The horse is eating all the time, and you want to aim to get him to market at as early an age as possible. Remember, too, that every one you sell that

proves a money maker for the purchaser adds value to what you have left, and makes it easier for you to sell. In short, start right, think, keep your head level and don't forget to sell for a fair profit.—Frank H. Briggs in Lewiston, Me., Journal.

Some U. S. Government meat inspection officials believe that if the packers are firm in their determination not to pay for condemned cows and heifers, it will be a long step toward wiping out tuberculosis among both cattle and hogs, the latter being largely infected by the proximity to the former. A signed circular issued recently by the American Meat Packers' Association says in part: "Our reason for applying this rule to female cattle only is that tuberculosis is largely confined to dairy cows, and from them the disease is communicated to other classes of cattle and hogs. We are assured by the best authorities that if the disease in cows is stamped out the result will be its final disappearance in all live stock. For these reasons we ask the co-operation of live stock breeders and shippers in an earnest effort to wipe out the disease, feeling sure the justice of our position merits its approval. In addition to the fact that shippers of sound animals should no longer contribute to the carelessness and negligence of breeders and shippers of diseased animals, as evidenced by the increase in the price paid for healthy animals as a result of our stand taken against the payment of those diseased.

Keep a strict record of your breeding, also number in litter. Don't trust to memory in this or any other matter of the kind. If you are in the business as a swine breeder, it is simply a matter of business proposition that you keep such records. While on the other hand, if you are engaged in raising swine for market purpose, try keeping a record of this kind for a few years, selecting the young sows from the most prolific old ones.

If the Bureau of Animal Industry had not done any other useful thing during the past year its investigation of hog cholera and the remedies for it have been worth all it cost.

If one of your sows has lived after having cholera keep her—she is immune.—Farm World.

The old question of whether cocks should be left with the laying hens after the period of incubation is over, is being revived. There is argument on both sides of this question. The writer believes that better results are shown when no cock is kept in the pen with the laying birds. He bases his opinion on the fact that where only two or three birds are kept in a pen by themselves they produce more eggs per bird than where a dozen or more are kept with a cock. Of course the number of birds may have something to do with this, but it is also more than probable that the presence of the cock is also responsible for the decreased number of eggs.

Do not kick about the weakness of pure bred dairy cows. True they have been raised under what might be called hot-house conditions for so many generations that they are unable to rustle on the same terms with the scrub that has known nothing else, but we do not keep dairy cows just to see how much ill treatment they can endure. They are developed to convert the largest possible amount of their feed into milk, and in that excel the scrub. If you want cows just to keep cows for the sole purpose of eating your feed, keep scrubs. But if you want cows that will show some return at the milk pail, get the dairy bred cow and treat her right.

When the birds have been fed a great deal of mouldy bread they are liable to develop a disease known as "mould." While the trouble is very difficult to treat, it will usually yield to a dose of two drops of carbolic acid in ten of castor oil. This should be made into a pill by mixing with a little bran or corn meal and forced down the bird's throat. Repeat the dose once each alternate day till relief comes. When the disease has become very pronounced, rarely any medicine will effect a cure. Change the feed to clean, bright grain.

FARM NOTES.

Several readers have requested that we send them certain bulletins. The applications for all bulletins and circulars issued by the Department of Agriculture should be made to the Secretary of Agriculture, Washington, D. C.

One farmer has made the test and says that when corn is worth 50 cents per bushel the first 100 pounds of gain in hogs cost him \$3; the second, \$3.75; the third, \$4.50. However, by reducing the corn diet and feeding more grains rich in protein, these figures can be greatly reduced.

The good farmer is invariably a reader of several good farm papers. The really good farm paper, whose subject matter is written by those who know, is always filled with suggestions which benefit, and he who reads can not help but become a good farmer if he follows the suggestions.

It is much better to invest in a manure spreader than some of the mineral fertilizers offered on the market. Every soil that requires enrichment needs organic matter more than it does insoluble plant food. Organic matter can be added by a manure spreader, but never from a bag of cheap mineral fertilizer.

No matter if there are trees in the pasture, there should be a shed under which the cattle and horses can find shelter during a rain or on cold evenings. There may be hut one or two days and nights during the entire summer when the shed will be necessary to the comfort of the animals, but exposure during those days may cause serious trouble.

The largest farm in the world is said to be in Mexico, Don Luis Terrazas being its owner. It consists of eight million acres, and is located in the State of Chihuahua. It takes the Mexican Central train more than a half day to cross this farm. Don Luis is said to own more than 1,000,000 cattle, 100,000 horses, 700,000 sheep and 300,000 calves. More than 1,000 cowboys are needed to look after his herds. He has a slaughter house of his own near Chihuahua City, at which more than 250,000 head of cattle and as many more sheep and hogs are slaughtered every year. He owns his own refrigerator cars in which his packed meats are shipped all over that Republic. Over 40,000 people dwell on this landlord's estate.

POULTRY NOTES.

The comb is as sure an indicator of the health of the bird as the tongue is of the person. Watch the comb to know when the bird begins to feel badly. A healthy comb is a deep red. Any other color means that something is wrong.

The very best kind of a pen for ducklings is one that can be easily moved from one part of the yard to another. The stationary pen soon becomes infested with disease germs and the easiest way to overcome these is to move to other quarters.

Watch the little chickens for head lice. This is the time of the year when that pest thrives. When the bird is moping around and dragging its wings, it should not be doctored for cholera till the attendant is sure that there are no large lice on it. Three lice can suck more vitality from the little chick than all its food can supply.

Sometimes the setting hen will show the presence of a number of worms after a period of incubation covering from three to six weeks. Two grains of santonin to each fowl once each day for two days will usually correct the trouble. Dissolve the drug in water and use this in mixing the mash. Follow with a dose of castor oil. Another remedy is three drops of turpentine in ten drops of castor oil. Mix this with a little bran and force down the bird's mouth.

Just because the price of feed is high, do not yield to the temptation of allowing the older chicks to get along without feed. The older the bird, the more feed it needs and especially does it need feed when producing a heavy growth of feathers. If the bird is worth keeping at all, it is worth keeping right. Any attempt to economize on feed will result in loss.

Leg weakness is generally noticed about the time the fall rains set in.

For this reason it is charged to wet weather. The cause, however, is forcing and too much rich feed. The trouble can only be prevented by feeding more moderately from now until the bird is ready for market. Feeds rich in nitrogen, such as wheat, bran, clover, meal and meat should be given instead of a pure ration of corn.

Do not place a young brood of chicks in the quarters vacated by an earlier brood. There will be too many impurities and insect pests to insure good health for the young chicks. The coop should be thoroughly scrubbed, disinfected and removed to a place where there have been no chicks before the younger brood should occupy it.

"SAVE THE HORSE"
Registered U.S. Patent Office
SPAVIN CURE

Makes a Tendon Like a Rod of Steel

Makes money winners out of cripples; age of horse or age of lameness makes no difference. It will strengthen, repair and cure any broken down, weak or injured condition of the tendon; it infuses strength and acts as a permanent bandage to the parts.

It is the only remedy of its kind ever conceived, and the only one so positive and successful as to warrant selling under a signed guarantee to refund money if it fails.

"SAVE THE HORSE" Permanently Cures Spavin, Ringbone (except Low), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse works as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy, booklet and letters on every kind of lameness.

At Druggists and Dealers or Express Paid.

HALFTONES AND LINE ENGRAVING
Artistic Designing.
141 Valencia St. San Francisco

FOR SALE.
The Handsome Standard Bay Gelding, Hondrae.

Nine years old, by Prince Nutwood 2:11½, dam by Strathway. Stands 16½ hands and weighs about 1225 pounds. Has worked miles in 2:24, quarters in 33 seconds with six weeks' training. He has never been trained since, but was used on the roads at Palo Alto. He is good gaited, wears no boots, does not pull a pound, absolutely sound, afraid of nothing, a lady can drive him with perfect safety. W. H. Williams had him in training and says that he looks like a 2:10 trotter. He is a remarkably good individual in every respect and a high class roadster and matinee horse. Will also sell a good Studebaker buggy and a McKerron harness. The above will be sold on account of the owner leaving for Europe. Horse can be seen at Hans Frelson's Stables, Twenty-fourth Avenue, near the Casino. For further particulars address this office.

ABSORBINE

Removes Bursal Enlargements, Thickened Tissues, Infiltrated Parts, and any Puff or Swelling. Cures Lameness, Always Pains without laying the horse up. Does not blister, stain or remove the hair. \$2.00 a bottle, delivered. Pamphlet 1 C free.

ABSORBINE, JR., for manking, \$1.00 bottle. Cures Synovitis, Weeping Scurf, Strains, Gouty or Rheumatic Deposits, reduces Varicose Veins, Varicocoele, Hydrocele. Always pain. Look free. Genuine only by

McMurray - McMurray

The Championship of the United States

PROFESSIONAL AGAINST PROFESSIONAL
 THE BEST PITTED AGAINST THE BEST

All contestants standing at the long range of 18 yds. This great race for the Championship of the United States, held at Chicago during the week of June 16, 1907, was won by W. R. Crosby, shooting the **PARKER GUN**, with a score of 192 out of 200 targets shot at—96 per cent.

THE PARKER GUN

The next highest score, 190 out of 200 targets shot at—95 per cent, in this same great championship event, was made by Fred Gilbert, also using the **PARKER GUN**.

This greatest contest of professionals shows positively the pattern and center of the gun. The **PARKER GUN** shoots where you look. The proof is evident. Surely the **OLD RELIABLE**, when put to a severe test, proves what we have always claimed—that the **PARKER GUN** outshoots them all.

Send for Catalogue.

The Empire City Farms, Cuba, N. Y.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

HORSE EDUCATION.

Position wanted on stock farm or in sales stable by a highly competent horse educator. Method for breaking every bad habit a horse has. Eastern man. First class references. Address

R. S. PRUYNE,
708 Buchanan St., San Francisco.

RUBBEROID ROOFING

Weather Proof, Acid Proof, Fire Resisting.

BONESTELL, RICHARDSON & CO.,
473-435 Sixth St., San Francisco, Cal.

FOR SALE CHEAP.

Gray mare, six years old, by James Madison; first dam Bessie Bell by St. Bel; second dam Belle B. by Belmont (son of Lexington); third dam Infallible by Lightning. See Bruce's American Stud Book. A very fast mare, can show now a half in 1:04 and a quarter very close to 30 seconds, trotting. Is not keyed up to a fast mile, but can convince any one she is a 2:10 trotter.

Also a bay gelding, five years old, by James Madison; first dam by Albert W.; second dam by Algona; third dam Mabel by The Moor; fourth dam Minnehaha. This horse has had very little work, but can show a half in 1:06 and is one of the best prospects in this country. Can be seen at work at Agricultural Park, Los Angeles, in charge of Walter Maen, or address

L. J. ROSE, Jr.,
Ozard, Cal.

BLAKE, MOFFITT & TOWNE
Dealers in PAPER

1400-1450 4th St., San Francisco, Cal.
Blake, Moffitt & Towne, Los Angeles.
Blake, McFall & Co., Portland, Oregon.

3 in One

Lubricates properly the sensitive mechanism. With perfect action the reel never fails at a critical moment. "3 in One" wont gum, dry out, contains no acid. "3 in One" prevents rust on every part, adding years to the life, and brightness to the beauty of even the finest. Good for the rod too—preserves the wood, promoting pliability—protects the metal. Good for fisher also—the delicate, pleasant odor keeps off mosquitoes.

Try it. All dealers. Trial bottle cent free. Write to

cisco, California.Communications must be accompanied by the writer's
name and address, not necessarily for publication, but
as a private guarantee of good faith.

SONOMA GIRL has again had her speed and endurance pitted against the mighty Kentucky gelding, Highball 2:06½, considered the greatest trotter that has appeared in years, and this time she has beaten him. In the first race, on the Fourth of July, he managed to defeat the mare in a two-in-three contest for a purse of \$400, but on Wednesday of this week, over the same track, with a purse of \$5,000 to contend for and the race three best heats in five, she took the \$17,500 gelding into camp in three straight heats, in 2:06½, 2:08 and 2:07, the fastest three heats ever trotted by any horse that had no record when the race opened. The great mare from Santa Rosa has made good, and more than good. She is now the fastest green race mare in the world and the time of the three heats shows that she is game, as a third heat in 2:07, after heats in 2:06½ and 2:08, requires gameness and endurance as well.

Sonoma Girl was bred on the farm of Mr. S. B. Wright, who lives about two miles from Santa Rosa, Cal. As all know, her sire is the stallion Lynwood W., two-year-old record 2:20½, and her dam is Maud Fowler 2:21¾, as a five-year-old. She was sold by Mr. Wright when a young filly, according to his rule, which is to sell and not race the horses he breeds, and after passing through the hands of another owner was finally purchased by Mr. J. D. Springer, who was at that time living at Pleasanton. Mr. Springer formerly lived in Idaho, where he at one time was Sheriff of a county in that State, and was afterwards engaged in the sheep business. Mr. Springer came to California for his health and for the purpose of being near good educational institutions, and took up driving as a recreation. He trained and drove his own horses, and soon became known as a man of good judgment in buying prospects, and during his first campaign marked the pacer Billy Red, a green horse he had purchased, in 2:10, and the following year gave another green pacing mare, Miss Idaho by Nutwood Wilkes, a mark of 2:09¾ and won two seven-heat races with her. From the time he first purchased Sonoma Girl he believed he had a great trotter, and on several occasions declined a big price for her, at one time saying that he put her price so high because he did not want to sell her. Three years ago she was showing wonderful speed at Pleasanton, but eventually developed a lameness that the best of veterinarians and expert horsemen could not locate. Monroe Salisbury diagnosed it as rheumatism and advised Mr. Springer to keep on working her. Two years ago Springer removed to Los Angeles and last year the mare's lameness was attributed to a blind splint, which was treated, and it was thought the lameness was cured. A Los Angeles horseman informed the writer a few weeks ago that in his opinion the lameness was caused by the mare striking herself in her work, but so slightly as not to remove the hair or draw blood, but to so bruise the leg that lameness resulted. Whatever the cause of her lameness, she got over it last summer, and all know the remarkable performance of the mare last Christmas Day, when she trotted a mile in 2:07 without company at a matinee of the Los Angeles Driving Club. She kept sound after that, and when the Grand Circuit programs were advertised last spring her owner named her in over \$100,000 worth of purses and stakes. Her next start will be in the \$10,000 Merchants and Manufacturers' Stake, at Detroit next Tuesday, and after her performance of last Wednesday she will probably be the favorite, as no horse has more speed than she, and there are no better actors in or out of a race.

Her sire, Lynwood W., a photograph of which, taken last Saturday at Santa Rosa, is on the front

page of this issue, was himself a very remarkable trotter when a colt, and when a two-year-old was driven four times at the Stockton track for a record. The first trial he trotted two heats in 2:31 and 2:31½, just failing to enter the standard list. This was October 13, 1892. On November 2d he was again started and made his mile in 2:28. Five days later he reduced this record to 2:23¾, and then on November 12th made a final race against time and finished the mile in 2:20½. Some time after that the coronets of his front feet had a blister applied to them, but for some reason his head was not tied up and he gnawed at his feet until he had eaten the hide off them. Both are now blemished with an enlargement covered with white hair, but even with these he could step quarters in his seventeen-year-old form close to 30 seconds if driven for it. His speed is natural and his gait almost perfect. Lynwood W. is a son of Guy Wilkes and his dam the mare Lindale by Sultan Jr. 12771. Sultan Jr. was by Sultan, a son of The Moor, and his dam was May Sproule by The Moor out of a Williamson's Belmont mare. The dam of Lindale was Flora Pierson by Gen. McClellan 144, and her granddam was a daughter of Langford, son of Williamson's Belmont. Lindale had therefore two crosses of The Moor and two of Belmont.

The dam of Sonoma Girl, Maud Fowler, is by Anteo (son of Electioneer and a mare more than half thoroughbred), the next dam being Eveline by Nutwood, and the next dam untraced. Both Maud Fowler and Eveline are still owned by Mr. Wright. Maud Fowler is the dam of Sonoma Girl 2:06½, Dumont S. 2:20, Sonoma Maid 2:29¾ and Sonoma Queen 2:25. Eveline is the dam of Ole 2:10½, Roblet 2:12, Tretam 2:19, Maud Fowler 2:21¾ and others in the list. Producers and performers make up the pedigree of Sonoma Girl for several generations on both sides. Her sire, grandsire and great grandsire were all great trotters and producers of great speed. The dam of her sire was bred as a three-year-old, but trotted quarters in 40 seconds as a two-year-old. Flora Pierson, granddam of her sire, took a record in double harness of 2:33 on a half-mile track and trotted a trial in 2:26. Nearly all of Sonoma Girl's ancestors were developed at the trotting gait, and although her veins are full of hot blood, she is one of the best headed and constant trotters ever trained on a California track.

In driving her to her record in the second race she ever started in her owner, John D. Springer, met such drivers as Geers, McDonald and others that are reckoned as the very best in the country, but the man from Maine, by way of Idaho and California, has shown them that he is better than a raw hand at the game. May he continue on with his great mare through the Grand Circuit, and return with her the greatest money winner of the year is our earnest wish.

SEVENTY HEAD of standard bred trotters and pacers from the celebrated Ookwood Park Stock Farm will be sold at Chase's Pavilion, 478 Valencia street, this city, on Monday evening, August 12th. These horses are three, four and five-year-olds, all broken and out of the best mares on this great speed producing farm. There are stallions, geldings and fillies by Steinway, Chas. Derby, Owyhee, Searchlight and Stam B., and they will all be in good shape and ready to use. Some very fine broodmares will also be consigned to this sale, as well as several fancy carriage pairs and single drivers. The horses will be at Chase's stables on August 8th, four days prior to the sale, so all will have a chance to inspect them carefully. Catalogues will be printed within a few days and will be mailed on request. This will be the time to pick out a well bred one at your own price.

Sonoma Girl came from the leading wine-producing county in California, and naturally felt a little bashful when Geers set that Kentucky Highball in front of her on the Fourth of July, but when he offered it again, two weeks later, she swallowed it. We hope she will be able to keep it down during the rest of the season. Perhaps she was a little afraid to tackle it at first because it was offered over a cheap \$400 counter, but when invited to take it at the \$5,000 one she stepped right up to the rail and downed the new Geers drink three times in 2:06½, 2:08 and 2:07, and they say it did not make her the least bit dizzy.

SUDDEN DEATH OF WILFRED PAGE.

After complaining to his wife of severe pains in his chest, Wilfred Page, a prominent stockbroker of San Francisco, died suddenly at his home, 2600 Bancroft Way, Berkeley, about 5 o'clock, July 17th. Heart disease is supposed to have been the cause.

A son was dispatched for a neighboring physician, but Page expired before the doctor reached his bedside.

Wilfred Page moved to Berkeley immediately after the fire of a year ago. He was a member of the San Francisco Mining Exchange, and also of the California Stock and Oil Exchange, of which organization he was president for many years. He was 67 years of age. He attended all the sessions of the exchanges on the 16th and seemed to be in his usual health.

Page was a son of Dr. Thomas Page, and was born at Valparaiso, Chile, on February 20, 1849. The family moved to California and settled in Sonoma county shortly after the birth of Wilfred, the family operating the Cotati ranch. Page was educated in the public schools and was a graduate of the University of California.

In the early seventies he started in the grain business under the firm name of Bennett & Page, and continued in the grain market until the oil boom in the Kern District, when he changed his field of operations.

Mr. Page was the first secretary of the Pacific Coast Trotting Horse Breeders' Association, and afterwards one of its directors for many years. He was greatly interested in trotting horses at one time, establishing a breeding farm on the Rancho Cotati, in Sonoma county, and buying at a long price from Palo Alto Stock Farm the young stallion Eclectic 11321, an own brother to the \$125,000 Arion 2:07¾. Eclectic proved a failure in the stud and in 1898 or 1899 Mr. Page consigned him to an Eastern sale, where he only brought \$125. Mr. Page receiving after expenses were taken out the sum of \$7.50 for an investment of many thousands.

Wilfred Page was a man of attainments, honest and upright in all his dealings, and leaves an honored name as a husband, father and citizen.

He leaves a widow and seven children, Wilfred Jr., Edith, Roy, Marjorie, Edwin, Elizabeth and George R. Page. He was a brother of Attorney Charles Page and Arthur Page, a ship broker, both of San Francisco.

REGULARLY INCORPORATED.

Articles of incorporation of the Tulare County Agricultural Association, being the new fair and amusement company recently organized at Tulare City, have been filed. The company is capitalized for \$35,000, of which \$3,000 has been actually subscribed. The directors are A. G. Wishon of Fresno and Joe La Marsh, William Swavy, H. W. Whaley, W. E. Green, T. C. Carruthers and W. F. Ingwerson of Tulare.

It is proposed to construct a new pavilion in the shape of a cross with each wing fifty feet long, making the total 100x100 feet.

A general recreation park will be established, where various forms of amusement will be provided, including a natatorium 50x100 feet in size. The reservoir for this will be built on top of the ground and the water when drained out used for irrigating purposes, both on the fair ground tract and on a near-by section which will be put on the market and sold in small tracts, with water. It is expected that the amusement feature will make the park self-supporting.

Now that Tulare is in the fair circuit splendid exhibits and splendid racing are assured. The purses offered will be large, and are expected to attract the foremost horsemen and the best racing stock in the State. The valley circuit includes the four counties of Fresno, Kings, Tulare and Kern, and the fairs will be held successively in the order named immediately following the State Fair at Sacramento in September. The fair at Tulare and racing meet commences on September 30th. The Supervisors have agreed to donate \$1,000 toward the fair.

A special excursion rate from Los Angeles is being worked up to bring sightseers and prospective residents from that section every Wednesday during the four weeks that the fairs in the four counties named are in session.

RACING AT BLUE LAKE.

The half-mile track at Blue Lake, Humboldt county, was the scene of some good racing between local horses on the 6th and 7th of this month. The purses were small, averaging only \$50, but the horses contested for them to the best of their abilities, just the same.

In the 2:45 trot Guy D., owned by L. G. Barker of Arcata, won in straight heats, best time 2:38½. Cartolvin, owned by Robert Henry, was second.

A half-mile buggy horse race went to Gladys B., owned by Herman Wahl, with Walter Dodge's Babe in second place.

The free-for-all was won by William East's Casiar in straight heats.

A couple of races for mules made great sport. Bear Tooth, a running mule, won a quarter-mile dash in 32 seconds. The trotting mule race went to Geo. Parham's mule.

SANTA ROSA TRACK.

Horses Now at the Birthplace of the World's Champion.

There must be speed bacilli in the soil of Sonoma county, and horses bred there get it into their system. Sonoma county has produced Lou Dillon 1:58½, the fastest trotter in the world, Dolly Dillon 2:06¾, Stanley Dillon 2:07¾, Directum Kelly 2:08¼, Charley Belden 2:08½ and Sonoma Girl 2:06½, who beat the great Highball, Wednesday for a \$5,000 purse at Libertyville, Illinois. Besides these trotters Sonoma county has produced the fast pacers Custer 2:05½, Lena N. 2:05½ and others, and there are a number of green horses now in training in different parts of the United States that will still further swell Sonoma's list of 2:10 performers when they are ready to race.

Sonoma is one of the most prosperous and most productive counties in California, and Santa Rosa, although nearly shaken off the map by the big quake of 1906, is re-building so rapidly that all traces of the tremor will be removed within two years, and it will be one of the most solidly built and prosperous county seats in California.

The Santa Rosa Stock Farm track, known far and wide as one of the fastest mile tracks in the world and as the birthplace of the fastest trotter in the world, is now in fine shape for working horses over, and the trainers are all loud in their praises of the way Manager Frank Turner is working it. It is good all the way round and is worked nearly its entire width, so that four times the number of horses now in training there could be accommodated easily.

Among the trainers who have horses stalled there are Richard Albes, Thos. Holmes, Frank McGregor, Charley Dodge, Cal Rodriguez, E. L. Hunt and F. S. Turner.

Ables has eight horses in his string, the majority of which he is training for Mr. Frank J. Kilpatrick of this city, who was at Santa Rosa last Saturday and had a lot of pleasure driving several of them on the track. Mr. Kilpatrick is one of San Francisco's most enthusiastic road drivers and is a prominent member and vice-president of the newly organized Park Driving Club. He remarked to the Breeder and Sportsman representative that he has seven horses, all trotters, that can beat 2:30, but hardly thinks there is one of them that can win a race. We think he is a little too modest in his assertion, as all his horses are green prospects, several of them not yet matured horses, and it need not surprise anyone if from the seven will come more than one 2:15 trotter, which is not only fast enough to win matinees with in Golden Gate Park, but in circuit races.

A three-year-old filly that he drove in 2:28 and that Ables managed to drive two seconds faster is one of the handsomest young mares at the track. She is not large, but is well turned and round, and has a nice way of going that only comes in for slight criticism when she shows a desire to plunge and break. She is handy, however, and in one heat went from a few jumps back into a square trot, trying the while to defeat her opponent in a manner that made her look like one that has race in her head. She is by Washington McKinney and out of a mare by Daly 2:15, and is in the Breeders' Futurity.

A four-year-old bred like her, although the dams are not sisters, has a little more speed than the three-year-old, but cannot beat her very much at that. This mare has worked in 2:25.

A four-year-old brown gelding by Chas Derby is trotting like one that justifies paying training expenses on. In just two months handiug he is able to trot a mile nicely in 2:30 and to shade that a little if necessary.

Another four-year-old mare by Washington McKinney out of a Daly mare has been a mile in 2:25 this year, but beat this a full second as a three-year-old. She will beat 2:20 before fall.

One of the best prospects in Ables' string is a six-year-old by L. W. Russell. He has shown a very comfortable mile in 2:21, is a stylish, up-beaded, fine looking horse and is worth keeping one's eye on for a fast mile in the near future. Another six-year-old by Lynwood W. is also a good going trotter and a nice looking.

The pacer by Lynwood W. out of a mare by St. Patrick, that Dick is working for Robert Duncan, has shown a mile in 2:13, and the last half of it very fast. This horse could beat the majority of the driving club pacers raced on the tracks in the vicinity of San Francisco.

All of the horses in Ables' string seem to be in fine shape and are doing well.

A new trainer at the track is E. L. Hunt, who came down from Eureka with a string of eight. One is a six-year-old gray horse, called Jim Whitney, that is by Wayland W. 2:12½, out of a mare by Ira Jr. Jim Whitney has a trotting record of 2:27¼ and is considered a good one that will come very close to his sire's record. He is owned by S. W. Thompson of Humboldt county.

Mr. Hunt has a "hot one" in Tohasco, a pacer, sired by Timothy B., own brother to Wayland W. The dam of this pacer is by Poscora Hayward. Tohasco has worked a mile in 2:11 and will be seen in some of the green class races this year.

Another pacer by Aptos Wilkes, is another good prospect, a mile in 2:13½ being to his credit this year.

Another green pacer Hunt is working is a bay six-year-old gelding by Gossiper, that is owned by Mr. Yandell, the well known foundryman of Santa Rosa. This fellow has shown a mile in 2:12, pretty fair for a green one.

Charley Dodge has charge of four youngsters that Hunt is training. They all belong to Dr. Rae Felt of Eureka.

A two-year-old sorrel by Searchlight 2:03¾, out of Edith 2:10 by Dexter Prince, is well developed and will grow into a very handsome animal.

One of the best finished fillies we have seen is a bay by Bonnie Sain, out of a mare by McKinney 2:11¼, second dam said to be by Williamson's Belmont. Bonnie Sain is by Bonnie Direct 2:05¼, out of a mare by imported Sain, Barney Schriber's great thoroughbred sire. This filly is a beauty, has a nice way of going and will probably trot fast.

A three-year-old filly by Greco, dam by Wayland W., is trotting nicely and is a fine mover. She is a beautiful brown in color. Unfortunately, she is not staked.

Last but not least in this string is "the circus filly," as the boys at the track have nick-named Telltale, three years old, by Edward B. (son of Stam B.), out of a mare by Mustapba, son of Guy Wilkes. Telltale is a freak in more ways than one. She has not much more hair on her than a Mexican dog, and is a sort of spotted red and gray roan, with a nose that looks as if she had just lifted it from a bran mash, it is so spotted. Her tail was docked by nature before her birth and while it hangs reasonably straight, is curved like a letter "s." Telltale is well formed otherwise, having a short back, although rather high on her legs, and is a sure trotter. She is a nice gaited one, with nearly as much knee action as a show hackney. She is entered in the Breeders' Futurity for this year and on Saturday last trotted an easy mile in 2:26 as steady as a clock, and finished like a race horse. In spite of her peculiar color she is not bad looking, and in harness has a very attractive appearance. She is a great favorite at the track.

Cal Rodriguez has a string of four at Santa Rosa track, all owned by C. H. Widemann of Gonzales, Monterey county.

The two fastest are Joe Robin and Fred W., full brothers, by Robin. Both are pacers. Joe is a black, goes without the straps and is a good looking. He has been a mile in 2:15. Fred W. has had one in 2:17. He is a bay and is also a clean nice pacer.

Miss Lloyd, a two-year-old filly entered in the Breeders' Futurity, is a trotter with a good gait and showing considerable speed for the training she has had.

A bay mare by Dexter Prince out of Countess by McKinney, that Mr. Widemann purchased at one of the Aptos Farm sales, is about as sweet gaited a trotter as there is at the track. She is filling out into a very handsome mare, and Rodriguez thinks she will do to get the money with proper training, as she shows plenty of speed and is extra good headed.

Frank Turner is about the busiest man in Sonoma county, but his better-half sets such a good table that Frank is taking on flesh in spite of the work he is doing. He comes pretty near having a corner on the Sidney Dillon blood in California, and is showing that they have all inherited the family speed trait. The pride of his heart is the two-year-old colt California Dillon. He tried mighty hard to make this chestnut fellow trot, but the colt refused to display any of his speed at that gait, and shifted to a pace at every opportunity. Finally, on the last day of last month, just thirteen days prior to Saturday last, Turner concluded to let California Dillon go the gait he wanted to, and the colt showed at the first trial he was "oil in the can" as a pacer. On Saturday we saw Turner drive him a full mile without company in 2:37, with the last half in 1:15 and the last quarter in 36 seconds. If he don't make that other pacer, Custer 2:05½, move up faster to keep the reputation of being Sidney Dillon's fastest pacing son, it will be because some accident happens him. Frank says California Dillon is the best bred Sidney Dillon on earth, and this is mighty close to the truth. His dam is Caritone by Antone (son of Dexter Prince and a Stamboul mare), second dam the famous old mare Biscari by Director, that had eleven foals, eight of which have standard records and the other three with trials below 2:30; third dam that other famous broodmare, Bicari by Harold, dam of six in the list. Tahulate it out and California Dillon will be found pretty closely related to nearly all the champions.

Turner recently purchased a nice looking bay mare that he calls Katie Dillon from Mr. Taylor of Santa Rosa, and believes he has a great trotter in her. She is only three years old, but with the little work she has had gives every promise of being very fast at the trot. She is by Sidney Dillon out of a mare by John L., second dam by Bell Alta, son of Williamson's Belmont, and third dam said to be a mare called Katy Darling, that was brought out here from Kentucky in the early days and won a ten-mile trotting race in or about San Francisco.

Mr. Turner has worked his stallion Guy Dillon a mile in 2:36, last half in 1:11½ and last quarter in 34¾ seconds.

Martini Dillon, a three-year-old filly by Sidney Dillon out of an Electioneer mare, is also working nicely, as is Caramo C., a mare by McKinney out of a mare by Guy Wilkes, that he has only just commenced on.

Between his horses in training, his stallions and

looking after the track, Turner is kept busy "from early morn till dewey eve," but seems to thrive on the treatment.

Tom Holmes, formerly of Sacramento, is at Santa Rosa track with a four-year-old bay gelding by Lynwood W., dam by Illustrious, that belongs to Mr. T. C. Driscoll. This horse is a trotter, and Holmes thinks he will be quite fast, as he shows the symptoms, although he has not been worked very much.

There is no sickness among the Santa Rosa track horses, and the weather is so near perfect that training can be regulated to a nicety.

Great preparations are being made for the Breeders' meeting in August, and there need be no fear but ample accommodations will be found for all who attend. The many fine buildings being erected are evidence of the confidence of all in the future of the city, and it is certainly destined to be known as not only one of the most picturesque and beautiful towns on the Coast, but one of the most substantially built and enterprising. Its population at the present time is over 6,000.

SAN BERDOO HORSES READY.

The boys are off for Salinas with their speedy trotters and pacers.

"Best wishes and good luck to you all"—and the train pulled out carrying the fast steppers with their trainers and caretakers to Salinas, where they begin their racing season next Wednesday.

G. W. Bonnell and Homer Rutherford of San Bernardino and G. H. Judd of Riverside filled the car with their strings. Every one of the bunch is entered for a big purse, are in the best of condition and fit to make record time, barring future accidents.

R. Ambush heads the string and needs no introduction to the public. Next to Zolock he is the pride of this section. He belongs to N. A. Strong, and will be taken through the circuit by G. W. Bonnell. Ambush is entered in the 2:14 trot at Salinas and should make a good showing under any circumstances, while his friends here have strong hopes of his winning the money.

G. W. Bonnell also takes the pacing mare Norda of Bonnell & Prescott's, who has made a good showing at the matinees, and won first money at Corona the Fourth, one half-mile heat being paced in 1:08. Norda is fine looking, and well bred, her sire being Mercury, her dam Bessie Dale by Brown Hal.

Following close to R. Ambush in popularity comes the Riverside favorite, J. P. Ogden's trotting stallion Monocrat, under the care of G. H. Judd, the famous reinsman of that city. Monocrat entered in the 2:20 trot, but at Pleasanton Monocrat and R. Ambush will meet in the 2:14 race for trotters, when the question of supremacy will undoubtedly be settled on equal terms. Both horses are in the best of condition and horses starting against them will have to "go some" if they keep in the ring with these two "stars" from Southern California.

Homer Rutherford takes the black stallion Amado, belonging to Mrs. M. S. Severance of the Valencia Rancho. Amado is by Direct Heir out of the mare La Belle 2:15, the two-year-old champion of 1894. Amado will start in the 2:20 trot at Salinas.

The Valencia Rancho sends another horse, The Conqueror, a bay colt two years old, and one of the most promising youngsters that has ever been raised in this part of the valley. He is entered in the Breeders' Futurity Stake for two-year-old pacers, and is a full brother to Amado, but is a pacer, while the former is a trotter.

Rutherford also takes the three-year-old pacing filly Lady Josephine, belonging to Wm. Russell of this city. She has shown excellent work here during the season and has that racing stability that makes the genuine race horse famous.

The sixth horse of the bunch is Annie Turner, owned up in Oregon, and is on her way home. G. H. Judd has had her in training during the past season at Riverside.

It is expected that all of these horses will have an opportunity of showing their speed in their home town later on in the season, for if present arrangements do not miscarry there will be a big fall meeting with all the best horses the Coast, as well as many from the East, entered.

Chas. Thornquest has gone with Will Durfee, taking Jim Campbell's two-year-old pacer On Bly, by On Stanley, dam Nellie Bly, with him to be raced through the circuit.

Harry Eastwood and Mr. West of Colton have been trading horses. Harry gets the promising three-year-old mare by Ben Z., out of Laura Inca by Inca 557, second dam Fairy Queen, while Mr. West now owns the two-year-old filly by Richard B. out of a dam by Woodbury, the thoroughbred, second dam by A. W. Richmond.

W. C. McCully of Bloomington has sold his Zolock mare Zoralock to Frank Johnson, the County Recorder.

No track or trace has been found of the mare belonging to Harry Eastwood that was stolen from the Oxley pasture three weeks ago.

Wm. Rourke has returned from the East, bringing with him a bride, who was a sweetheart of his in "days gone by." Hearty congratulations from the horsemen of San Bernardino.

MRS. G. H. PARKER.

California's favorite hot weather drink is Jaskson's Napa Soda.

AT ALAMEDA TRACK.

Probably a thousand people were at the Alameda race track last Sunday to see the races between horses owned by members of the San Francisco Driving Club. The big drawing card was a match race for \$250 between George Giannini's George Perry and A. Hoffman's Kitty D., but it failed to come off, as Kitty D. met with an accident a few days before the race, falling on the track and pitching her trainer, Victor Verilhac, on the ground. Mr. Hoffman offered to pay the full forfeit of \$150, which was up, but Mr. Giannini generously refused to take any more than \$50, which covered his expenses in getting George Perry ready for the race.

In the 2:30 class, with a stake of \$150, Fly, owned by Charles Becker, won in straight heats over R. Green's Don L. in 2:23 and 2:29. A strong wind, against which the horses had to contend on the back stretch, had a material effect on the time.

The real contest of the day was in the 2:20 class, for which a purse of \$180 was offered. The entries were Charley J., owned by Charles Lecari of Alameda, and Little Dick, from the stable of Luke Marisch. Charley J. won the first heat in 2:20 and seemed a likely winner in the second, but the heat was awarded to Little Dick in 2:19 3/4, the judges refusing to allow the claim of foul made in behalf of Charley J. This necessitated a third heat, in which Little Dick led the way to the tape.

The owner of Charley J. was by no means satisfied as to the relative merits of the two horses and offered to bet Luke Marisch \$1,000 on a similar race to be held on July 28th. It is probable that the offer will be taken up.

In a special race for \$200, A. Schwartz' Clara L. carried off the honors from Ring Rose, owned by M. Donnelly, in 2:20.

The officials of the meet were: Judges—Joseph McTigue, James O'Kane, Thomas Cochran. Starter—W. J. Kenney. Timekeepers—Jack Postene and George Giannini. McTigue is president of the club, Kenney vice-president, A. Schwartz secretary, and F. Lauterwasser treasurer.

LOS BANOS RACES.

Many people turned out to see the races at Los Banos on the Fourth of July. The results were as follows:

2:25 Pace—
Advertiser (Gillett) 1 1 1
Albert E. (Allen) 2 2 2
Time—2:25, 2:24 1/2, 2:24 1/4.

Local Road Race—
Professor W. (Gillett) 1 1
Sleepy Jack (Allen) 3 2
Daisy (Clark) 2 3
Time—3:05, 3:00.

Quarter-Mile Dash, Running—
Little Roan 0 1
Peekaboo 0 2
Rattle Snake Bill 3 dr
Time—0:24 3/4, 0:24.

A saddle horse race, won by a three-year-old filly, and a broncho busting exhibition filled out the rest of the program, and were very entertaining.

CONDITIONS OF THE M. AND M.

The \$10,000 Merchants and Manufacturers Stake for 2:24 class trotters which is to be trotted next Tuesday at Detroit will be on the three-heat plan this year, the money to be divided as follows:

\$1300 to the winner of each heat in the main race, \$700 to the second horse in each heat, \$500 to the third horse in each heat, and \$500 to the winner of the race. In the Consolation Race, which is to be trotted three days from the date of the decision of the first race, and is open only to horses that start and do not win more than \$450 in the Main Race, \$300 will be paid to the winner of each heat, \$200 to the second horse in each heat, \$100 to the third horse in each heat, and \$200 to the winner of the race.

In the event of there being less than three horses eligible to the Consolation Race, there will be paid to the fourth horse in each heat in the Main Race the sum of \$300, to the fifth horse in each heat \$100, and the remaining money divided pro-rata among the horses finishing first, second and third. Should it amount to more than the sum mentioned, the surplus will be divided pro-rata among the winners of the Main Race.

SHORTHORNS AT AUCTION.

Fred H. Chase & Co. announce that a descriptive ad. and catalogue of a sale of short-horned cattle from Lone Pine Ranch, owned by Judge Carroll Cook, will soon be out.

This sale will include forty head of registered prize-winning short-horned cattle, consisting of bulls, cows, heifers and calves; also twenty head of registered Berkshire swine, consisting of boars, breeding sows, gilts and pigs.

This sale will take place at the State Agricultural Fair Grounds, Saturday, September 14th, at 10 a. m., this being the last day of the California State Fair, the best bidders in this part of the country should be attracted.

Write Fred H. Chase & Co., 478 Valencia street, San Francisco, for catalogues of this sale.

ROHNERVILLE RACERS.

The track at Rohnerville, Humboldt county, is in fine shape for training at the present time, and quite a number of trotters and pacers are being speeded over it every day.

Among those getting regular work, according to the Enterprise of Ferndale, are Nick Friel's Betsy Waldstein by Waldstein, and Hauck Bros. two-year-old by Nutwood Wilkes, both being trained by Matt Zohner, who thinks he will win with both of them during the fall races.

Frank Miser bas in his string the following: Dr. Ring's three-year-old by Bonnie Direct, dam California Maid, and she is a very clever pacer; Matt Clausen's four-year-old by Beau B., which he is gaining, and she is showing speed; Billie Bounce, a two-year-old by Billionaire, owned by Rasmus Neilsen of Ferndale. This is surely a good green colt. He is not much more than broke and can step a merry clip at the pace. He also has the two-year-old by Cassiar, owned by Robt. Stocks of Blue Lake and himself. This is a very promising colt and Will East is willing to bet that he will win the two-year-old colt stake this fall at Ferndale.

Robt. Noble is training his two-year-old by Humboldt Dillon and she is working nice. The Fortunatees think she is a sure winner.

W. J. East is working eight head of horses. Among them are Cassiar, a candidate for the 2:20 and free-for-all pace; Evelyn E., a four-year-old by Cassiar, that took a three-year-old mark of 2:30 in a winning race, and Gloria, a sister to Evelyn E., which he intends to start in the two-year-old stake race; Cassine, a three-year-old trotter, and about the only horse here in training that trots. He has developed into a fine big horse and will be most carefully handled until he gets age. Cyrus E., another three-year-old, owned by Cyrus E. Bryant of Alton, is being trained for the three-year-old colt stake race and is a fast pacer. Among the others in his string are Guy D., Tony Girl and Dolson's pacer by Dudley, that is also being trained for a match for \$300 a side, to be raced over the Blue Lake track July 21st against Charley Ford's Waldstein trotter, which is being trained by Matt Zohner. This race is creating quite an interest in Arcata, as both horses are owned there, and grew out of a few little races over the roads, both claiming to have the best horse. They finally made a match to settle the difficulty.

HOW THE GREAT RACE WAS TROTTED.

The following account of the great race at Libertyville, wherein Highball defeated Sonoma Girl, is from the Horse Review, and will be of interest to all our readers, as it describes the race in detail:

Sonoma Girl drew the pole with her rival second, Athasham 2:12 being in third position, Dr. Frasse 2:11 1/4 fourth and Icelander 2:12 1/4 on the outside. Dr. Frank Stone had no difficulty in getting them off, and at the word Sonoma Girl went away at a terrific clip. She reached the quarter in 30 1/2 seconds, Highball being a full length behind her. Mr. Geers moved the gelding up to her side after straightening into the back stretch and soon the pair were head and head. For the distance of 100 yards they raced in this wise at better than a 2:00 clip, during which the crowd evinced its excitement in breathless silence. At the three-eighths pole Highball flashed ahead with a burst of speed which made the awful clip they had been going seem ridiculously slow. He passed the half in 1:02, leading the mare an open length and increasing the gap to about two lengths, when the third quarter was reached—time, 1:34 1/2; second quarter in 0:31 1/2, third quarter in 0:32 1/2. That Sonoma Girl was beaten was patent to everyone, but that a green trotter in his first race could romp home in 2:06 1/4 with his driver looking around at the contending horse was scarcely to be expected. Mr. Geers waited for the mare in the stretch, and while Captain Springer was driving his great mare, Geers, paying no attention at all to his mount, watched lest Sonoma Girl steal up on him. While the official timers caught the mile in 2:06 1/4, most of the outside watches had it in 2:05 1/4. Sonoma Girl was not more than five feet from Highball's wheel at the finish, her time being a half-second slower than his. The significance of the performance caught the crowd, which applauded vociferously when Dr. Stone announced that the mile constituted a new record for green trotting geldings, displacing the 2:07 of Lord Derby, and likewise was a new trotting record for the track. The second heat was featureless, Highball having matters all his own way. He assumed a long lead on the third turn, reaching the three-quarters in 1:35, being eased up in the stretch. Mr. Geers let him down to a 2:20 clip nearing home, and Captain Springer, taking advantage of the slow pace, closed up the long interval till at the seven eighths he was close to Highball's wheel. Mr. Geers picked the gelding up and he sprinted home in 2:08.

Charley De Ryder's Athasham was looked upon as the probable winner of third money, but he proved very rank, making breaks and acting like a wild horse. Dr. Frasse, well driven by Sam Squires, who rated him nicely, was third in both heats, beating his record in each. Icelander went a nice race, she finishing with the Doctor and doing both of her miles right at 2:10.

Ray del Diablo won another race over one of the New York State half-mile tracks two weeks ago, and paced twice round the ring in 2:13.

SALINAS PROGRAM.

First Day—Wednesday, July 24th.

No. 1, 2:24 Class Trotting, Purse \$800.

F. E. George's ch g Kermit by Henry Nutwood.
O. C. Benbow's ch m Ollie B. by Nutwood Wilkes.
Rice & Blosser's bl m Moorita by Purissima.
W. Parson's br m Berta Mac by McKinney.
M. C. McCully's ch s Cedric Mac by Nearest.
John Doe's br m Fresno Girl by Seymour Wilkes.
C. D. Stewart's b g Parachute by Altitude Jr.
Dr. Alfred McLaughlin's br g Kelly by Gossiper.
Valencia Stock Farm's bl s Amado by Direct Heir.
P. G. Ogden's b s Mouicrat by Woodmon.
W. G. Durfee's br g Dredge by James Madison.

No. 2, 2:16 Class Pacing, Purse \$300.

Frank S. Barstow's b m Just It by Nearest.
Chas. Whitehead's b m The Mrs. by Derby Asb.
C. Z. Hebert's b u Louisa A. by Hambletonian Wilkes.
G. W. Bonnell's b m Norda by Mercury.

Second Day, Thursday, July 25th.

No. 3, 2:10 Class Trotting, Purse \$400.

W. G. Durfee's br s Coronado by McKinney.
W. A. Mack's br g Prince Gift by Good Gift.
John Doe's b g Adam G. by McKinney.
J. B. Iverson's b m Princess by Eugeneer.

No. 4, Pacing, Horses Without Records, Purse \$300.

C. Z. Hebert's br m Elaine by Robin.
J. B. Iverson's s m Thelma by Dictatus.
C. Whitehead's bl m Belle W. by Delphi.
Hamilton & Steele's b m Anona by San Luisito.
C. D. Stewart's ch g Fox S. by Thos. Rysdyk.
Geo. T. Algeo's b m Babe Madison by James Madison.
James Sutherland's Opitah by Wm. Harold.
W. H. Coomb's Albert Direda by Robert Direct.

Third Day, Friday, July 26th.

No. 5, 2:14 Class Trotting, Purse \$400.

J. B. Iverson's b g North Star by Nutwood Wilkes.
Geo. T. Algeo's b g Bob Ingersoll by Nutwood Wilkes.
G. W. Bonnell's b s R. Ambush by Zolock.
John Rowen's bl s Mechanic by McKinney.

No. 6, 2:08 Class Pacing, Purse \$400.

W. A. Clark Jr.'s br m Miss Georgie by McKinney.
S. C. Kimball's s m Miss Idaho by Nutwood Wilkes.
I. M. Lipson's bl s Dr. W. by Robt. Basler.
W. G. Durfee's br s Kelly Briggs by Bayswater Wilkes.
Meese Bros.' s s John R. Conway by Diablo.

Fourth Day, Saturday, July 27th.

No. 7, 2:17 Class Trotting, Purse \$300.

W. H. Williams' b s Sidonis by St. Nicholas.
M. J. Smeltzer's s s Dictatus S. by Dictatus.
W. A. Clark Jr.'s b m Sally Lunn by Wiggins.
Frank Eastman's b g Ben Russell by L. W. Russell.
C. O. Thornquest's b m Neerest by Neerut.
G. H. Judd's s m Miss Monbells by Monbells.

No. 8, 2:20 Class Pacing, Purse \$400.

A. M. Davis' b m Lettie D. by Boodel.
T. W. Barstow's b g Highfly by Nearest.
C. Z. Hebert's b m Louisa A. by Hambletonian Wilkes.
Hamilton & Steele's b m Anona by San Luisito.
W. Griswold's ch g Diablun by Diablo.
W. G. Durfee's b s Copa de Oro by Nutwood Wilkes.
Geo. T. Algeo's b m Babe Madison by James Madison.
D. D. McDonald's b m Diabless by Diablo.
C. T. Hewitt's b m Inferlotta by Inferno.

The Klamath County, Oregon, Agricultural Association has made a settlement with the Southern Pacific Company for the release of the lease on the grounds used as a fair grounds and as a race track. The land has been purchased by the Southern Pacific, and will be utilized for railroad yard purposes. The agricultural association had a lease on the land until 1912, and for the cancellation of this the representative of the Southern Pacific Company, W. S. Worden, acting under instructions from Chief Engineer William Hood, paid the association \$2,500. The association has practically concluded negotiations for a forty-acre tract of land near town, and as soon as the purchase is made the grounds will be improved so as to be in readiness for the big fair and race meet this fall. The annual fair and meet will be held the first week in October, and the management is already planning for a big time in the horse racing line.

The largest horse in the world generally shows up during the county fair season. The latest claimant is a mare owned in Falls City, Nebraska, that is 81 inches, or 6 feet 9 inches in height, 11 feet and 8 inches around the girth, wears a 30-inch collar and weighs 2,800 pounds. She is perfect in proportion, gentle and intelligent, and was bred by S. E. Sparks of Falls City.

The Breeder and Sportsman acknowledges receipt of complimentary tickets to the annual fair and race meeting of the Monterey Agricultural Association, to be held at Salinas, July 24th to 27th inclusive.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Salinas	July 24-27
Pleasanton	July 31-August 3
Breeders' Association (Santa Rosa).....	August 14-17
Petaluma	August 26-31
Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair)	September 23-28
Spokane, Wash. (Inter-State Fair).....	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

Sonoma Girl 2:06½.

And she beat Highball.

Hats off to Springer and his great mare.

Salinas races open next Wednesday.

Pleasanton follows one week later.

Fast time will be the rule in nearly every race.

Oakwood Park Stock Farm has consigned seventy head of standard bred three, four and five-year-olds to sale at Chase's Pavilion, Monday evening, August 12th.

Better make your application for place to sleep at Pleasanton during the meeting, which opens July 31st. The town is filling up rapidly and the outlook is for the largest crowd ever seen at Pleasanton. The races will be the best ever held in Alameda county.

The fellows who always look for the cause for an effect say that Geers drove Highball out in 2:06¼ on July 4th for the sole purpose of scaring owners who had entries in the M. & M. and making them scratch, so that the field would be a small one, as Highball is not a good headed horse in a big field. That Geers scared them all right is pretty certain, as nearly half the original entries were scratched on July 9th. Now that Sonoma Girl has beaten Highball, trotting her three heats in 2:06½, 2:08 and 2:07, some of those who were not scared will probably wish they had been.

Miss Horgan by Sidmoor 2:17½, a nice two-year-old filly, winner of the Horgan Futurity for yearlings at Concord last year, is offered for sale by John Ott of Concord. He also has yearlings, two and three-year-olds by Sidmoor out of producing dams by Alcona, Dexter Prince and other good sires.

Modesto citizens have organized and propose to hold a county fair in September.

The 2:15 special pace at Pleasanton will be for amateur drivers. An amateur is defined as a man who has never accepted wages or hire for his services as a trainer or driver.

Santa Rosa will have plenty of good music during the Breeders' meeting. On Petaluma Day the Petaluma band will be in attendance, and the Ukiah band will furnish the music on the day of the excursion from Healdsburg, Cloverdale and Ukiah. On Santa Rosa Day the Santa Rosa band will do the tooting.

Mr. H. Brace of Santa Clara will sell all his trotting bred horses, including Greco (trial 2:12½) by McKinney, dam by Anteeo, and second dam the dam of Lou Dillon 1:58½, on or about the 15th of October. Among the mares to be sold are Belle King, dam of Bolivar 2:00¼, with suckling filly by Star Pointer 1:59¼; Myrtle by McKinney, with suckling filly by Star Pointer; Banker's Daughter 2:13¾ by Arthur Wilkes, sire of Wayland W. 2:12¼, the sire of Bolivar, that also has a filly by Star Pointer at foot. In all, Mr. Brace will consign some forty-five head to the sale that will, it is safe to say, be able to show more speed than any like number offered at a sale in California. There horses are now being prepared for the sale. All the two-year-olds and over will be safely broken, single and double, and the yearlings and weanlings halter broken and led by saddle horse. They are all bred to trot or pace and will show for themselves. Sadie Moor 2:26, now seventeen years old, but looking like a four-year-old, will be given a record this season better than 2:20 unless all signs fail. She has been a mile in 2:23½ over a half mile track.

James P. Gray, the popular land owner and dealer in real estate of Santa Rosa, is driving on the road this summer and using as a business horse the big bay gelding R. W. P. 2:13¾ by Lynwood W. This gelding is one of the fastest trotters yet sired by the horse that got Sonoma Girl 2:06½ and Charley Belden 2:08½. He can march a quarter in 30 seconds most any time.

S. C. Kimball of Hanford is at Salinas to see his mare Miss Idaho start in the 2:08 pace next week. Miss Idaho has a record of 2:09¼ and enjoys the distinction of being the winner of two seven-heat races in 1905, when she was owned and driven by Mr. J. D. Springer, owner of the great trotting mare Sonoma Girl 2:06½.

The M. & M. will be trotted next Tuesday.

C. L. Rice of Santa Maria is at Salinas with Wild Nutting 2:11¼ and Miss Gomet, a green mare, and will start both at the meeting next week.

Athasham won in straight heats at Libertyville last Wednesday and reduced his record to 2:11¼ in the final heat. He beat a good field, among others the chestnut stallion King Entertainer 2:11¼, that Chas. De Ryder had in his string last year and wintered at Pleasanton.

Have you ever noticed how many horses sold at the Oakwood Park Farm sales turn out well and make low records? This farm has furnished a big proportion to California's 2:10 list. Among the notable 2:10 performers bred at this farm are Brilliant Girl 2:08¼, Derby Princess 2:08½ and Tuna 2:08½ among the trotters, and Don Derby 2:04½, Klatawah 2:05½, Captain Derby 2:06½, W. Wood 2:07, Much Better 2:07¼, Derbertha 2:07¾, Javelin 2:08¾, Agitato 2:09, Diablo 2:09¼ and Silver Coin 2:10 among the pacers, in addition to a very large list of 2:15 performers and race winners with low records at the pace and trot. Seventy head of young horses from Oakwood Park Farm will be sold at Chase's Pavilion, August 12th.

Richard B. 2:17¾ by Woolsey, that took his record in 1901, when a four-year-old, will be seen on the Central California Circuit this year. He is owned by Dr. Sears of Bakersfield and is expected to lower his record several seconds before the season ends. Richard B. has shown miles in 2:10 at at pacing gait. He will probably make his first start at Sacramento. Richard B. is the sire of a number of very promising colts and fillies.

Millard Sanders surprised spectators at the Indiana State Fair grounds on Friday last by going a mile in 2:08¾ with the pacing filly Kate Dillon. This chestnut filly was foaled in 1903, and is out of Roblet 2:12 (dam of Bonalet 2:09¼, and Robin Stanley 2:29¾), by Robin 2:22¾. Kate Dillon is a full sister to the three-year-old stallion Lord Dillon 39587, owned by Dr. J. J. Summerfield of Santa Rosa.

Harness racing made up a portion of the program of sports at Ferndale, Humboldt county, on July 4th. A race at half-mile heats for three-year-olds was won by Will East's Cassene by Cassiar. The time was 1:27¼ and 1:22. A colt owned by Ernest Bartlett was only beaten a neck in this race. The pacing race, mile heats, best two in three, was won by East's Cassiar. The heats were in 2:30 and 2:32, with Betsy Waldstein second. Theodore Rasmussen won the race for farmers' buggy horses.

Grattan Bells 2:10, imported to Austria last winter, is proving to be the king of the European light harness horse race courses. In a letter to John Splan, Mr. Woss, the owner of the horse, says that Grattan Bells has started eight times and has won six events and finished second in the other two. His races have made him the favorite race horse in Austria, and Woss has cleaned up a fortune through his success. His latest and most notable victory is that over the American mare Susie N 2:09¼, to which he gave a handicap of 30 yards and defeated easily.

Bellemont 2:13¾, the Zombro mare, owned by Robt. Smith of Los Angeles, that won the two-year-old trotting division of the Breeders' Futurity at San Jose in 1904, and was second to North Star in the Occident Stake of 1906, has been scratched from the Horseman and Spirit of the Times Stake for 2:14 class trotters at Detroit. Bellemont is said to have struck herself in her training, injuring a leg so that she will not be able to start for several weeks yet. Every horseman in California will sympathize with Bob Smith in his bad luck, and hope that his great little mare will round to and be able to meet her later engagements. She can beat 2:10 easily when right.

Minnehaha, the handsome little Strathway mare, owned by W. O. White of Fresno, presented him on June 29th a very fine bay colt by Athablo. While it is a late foal, it is so strong and lusty that Mr. White believes it will be able to give a good account of itself in the Breeders' Futurity, in which it is entered. The colt is inclined to pace, and Mr. White says he will probably take that gait.

Drink Jackson's Napa Soda. It means health.

CALIFORNIA HORSES ARE WINNING.

Sonoma Girl Turns the Tables on the Great Highball.

Libertyville, Ill., July 16.—Horsemen from all over the country were present to-day at the opening of the Western Grand Circuit races. Many famous horses which will make the circuit are here, and it is figured these races will give a fair line on what may be expected at other tracks. The veteran, Ed Geers, is present with a large string, and practically dominated affairs to-day. The favorites got almost everything they went after. The over-night rain cut down the attendance, but the track was in perfect condition. Dan S., the bay son of Greystone, had to lower his mark of 2:07¾ to 2:05½ to beat Hidalgo less than a length in the first heat of the 2:13 pace. It was one of the gamest contests ever witnessed over this course. Dan S. opened at 3 to 2 and was forced to even money.

In the first heat of the 2:08 pace Early Alice, the even-money favorite, had things her own way, winning as she pleased, and shutting out Robert Mac and Patchen Maid in 2:10½. John A., the chestnut son of Eddie Hall, and owned by Geers, was easily the best of the field of four in the 2:08 pace. Summaries:

2:13 pace, purse \$5000—			
Dan S., b g by Greystone (Geers).....	1	1	3
Hidalgo, b g (McDonald).....	2	2	2
Tommy Grattan, b g (McGuire).....	3	3	4
Leland Onward, b g (Murphy).....	4	4	1
King Pin, b g (Baker).....	5	d	
Jim Daly, h g (Clark).....	d		
Time—2:05½, 2:09¼, 2:07½.			

2:08 trot, purse \$1,000—Early Alice, b m by Early Reaper, first; Watson, ch g, second; Turely, h g, third. Time—2:10½, 2:10½, 2:10¼.

2:08 pace, stake \$1,000—John A., ch g, by Eddie Hall, first; Kruger, ch g, second; The Donna, ch m, third. Time—2:06¼, 2:06¼, 2:09¼.

July 17.—Highball and Sonoma Girl, two hot choices in the M. & M. stakes at Grosse Point, Detroit, next Tuesday, were the magnets which drew a record-breaking crowd at the track to-day. The battle for the \$5,000 purse was somewhat of a disappointment, as Highball was apparently not at himself and Sonoma Girl had little difficulty in turning the trick, winning in straight heats. Sadie Fogg set the pace, but the California mare had easy picking when it came to getting first under the wire. She stepped the first mile in 2:06½.

Athasham won the 2:12 trot in straight heats and trotted a great race.

There was a desperate battle in the finish of the \$5,000 purse hung up for the 2:13 pacers. Three of the best drivers in the land—Geers, McDonald and Murphy—behind Dan S., Hidalgo and Leland Onward, furnished the fireworks, the victory finally going to Geers with his tired horse, which, after winning two heats on Tuesday, failed so lamentably in the third and fourth heats that he seemed to be out of the race. Summaries:

2:20 class, trotting, purse \$5,000—			
Sonoma Girl, br m by Lynwood W. (Springer)	1	1	1
Highball, b g by Dr. Hooker (Geers).....	2	3	2
Sadie Fogg, blk m by The Director General (McDonald)	3	2	3
Margaret A., b m by Onward (Davis).....	d		
Tolling Chimes, b g by Chimes (White)....	d		
Time—2:06½, 2:08, 2:07.			

2:12 class, trotting, purse \$1,000—			
Athasham, b s by Athadon (De Ryder)....	1	1	1
Baraja, b g by Col. Cochran (Shaw).....	2	4	2
Icelandier, b m by Red Heart (Foster)....	4	2	5

Jesse James, b g by Forsee (Agnew).....	6	5	3
Thor, b h by Gold Hill (Pearson).....	4	6	d
Time—2:11¼, 2:09¼, 2:09¼.			

July 18.—Geers swept the whole board at Libertyville this afternoon, winning all three races on the card, but it required three of the hardest battles of his life and took thirteen heats to settle the fierce contests. The second race alone was taken in straight heats.

Tempus Fugit was favorite in the trot, and, after winning the first heat in easy style, the second choice, Silver Band, acting badly, the event was thought to be all over. In the next heat it was Tempus that went to break, and it was only with the hardest driving that he was able to save his distance, Silver Band winning after a royal race with Codero and Wild Bell. Geers gave Tempus Fugit an easy beat in the third, saving him for the two heats to follow, which he won by simply out trotting his tired field.

In the 2:25 pace Geers had it comparatively easy with William O., shutting out half of his field in the first heat.

The 2:05 pace was a long-drawn-out battle which, according to rule, ended with the fifth heat, the

money going to Ardelle, but honors really belonging to Cascade, as the summary of the race shows. Summaries:

2:15 class trotting, purse \$2,000—
Tempus Fugit, ch g by Mark Time
(Geers) 1 6 6 1 1
Silver Band, blk g by Col. Cochrane
(McGuire) 6 1 1 3 4
Codero, br g by Bingen (McDonald) 4 2 3 4 3
Wild Bell, hr g by Wildnut (De Ryder) 5 3 4 5 2
Duchess of Claire, Silver, Tom Moore, Baron Arnold and Lillian B. were distanced.
Time—2:11½, 2:10¼, 2:12¾, 2:13, 2:14.

2:25 class pacing, purse \$800—
William O., blk g by Director General
(Geers) 1 1 1
Star Direct, ch h by George Starr (Agnew) 2 2 3

Time—2:08¼, 2:08, 2:10, 2:08¾, 2:15.

DEMANDS OF THE CARRIAGE HORSE MARKET.

[By James Hope.]

Years ago there was some sort of a demand for big coach horses in the leading markets of this country. There is hardly any now. A horse of the size for which sale was readily enough found in New York fifteen to twenty years ago goes into the expresser class now. They want horses standing from 15.1 to 15.3 hands. Occasionally a big pair of 16 hands is wanted, but it is not so very often. At the New York show the dividing line is 15.2 hands. The "big class" comes above that limit and there are far more horses in that class that stand 15.3 or less than stand 16 hands or more. They require a horse of fine quality, good action at both ends, fine head and neck, proud carriage, roundly built and strong, deep in his ribs and standing squarely on his pins. What they will not have at any price in the carriage horse class is any sort of a big, loosely coupled, slab-sided, coarse headed, spongy-boned brute, no matter how he is bred. That kind never can go as they want them to go.

Now all this is subversive of the teaching of the old school that a stallion of coach breed should weigh from 1,500 to 1,600 pounds. I believe that most of the failure has come from using these big common duffers, fit for little else than express work or the plow in an effort to raise carriage horses. They are not carriage horses themselves and they cannot be expected to heget a progeny of that sort. Many of these coarse ungainly stallions have been bred to mares of more or less draft blood and the result has, of course, been nothing but failure, for the reason that the men who ordered such matings were trying to produce carriage horses from parents that were not carriage horses themselves. They were foredoomed to failure from the start. On the other hand, men who have used stallions of the coach breed that were of medium size on mares of thoroughbred or trotting blood have won out handsomely. There are plenty of mares rich in blood in the Lone Star State, and the breeders of that State who select one of these great lubbers scaling from 1,500 to 1,600 pounds will miss it by a very long way.

The late C. J. Hamlin, who was the greatest breeder of speed and beauty combined in the trotter, crossed the French Coacher on the standard-bred quite extensively. Cogent, one of the best ever shown at Madison Square Garden, was of this cross, and Crescent also. When Lord Charles Bressford, Admiral of the British fleet, was visiting in Buffalo, Harry Hamlin met him somewhere with this pair and the Englishman said they were the handsomest pair of carriage horses he had ever seen. Another product of the French Coacher-trotter cross was a young stallion that was bought by the Japanese government, and he was about as handsome a horse as the writer ever saw, but all may rest assured that there was not a lubberly hair in the parents of the half-breeds produced at Village Farm. Mr. Hamlin was the greatest stickler for quality that ever was. He wanted it from the tip of a horse's ears down to the very end of the longest hairs in his tail, and he wanted the legs what he called "fluted"—that is, with the hollow between the canon bone and the tendon very well defined.

Following out his aims, which experience had taught him would lead him to success, he selected the French Coacher to make his crossing experiments. He maintained that the almost strictly thoroughbred foundation on which the French Coacher has been developed, coupled with the training which the best families of the breed obtain on the French trotting course, fitted the French horse eminently well to nick with our mares of running and standard-bred blood. Mr. Hamlin was a bitter enemy of any sort of an overgrown stallion. He said he never knew a good one that was too big. He certainly was right. No great big duffer of an expresser masquerading as a coach horse has ever begotten good ones with the regularity which spells profit for his owner.

MANAGEMENT OF HALF-MILE TRACKS.

The following article from the pen of F. E. Baxter of Lima, Ohio, will be of interest to all track managers, whether their track is a half or a full mile:

The building of any track is so largely based upon the local conditions of geography and topography that a statement of methods used here would not apply elsewhere. Our track, widely recognized as one of the safest and fastest in the country, was built in 1886, the usual form and measurements being followed. A clay sub-soil, slightly mixed with sand, forms the foundation as well as the surface, with an interlying mixture of black loam between. This has proved satisfactory to us in making a safe, fast and easily drained track. Drainage was provided by open ditches on the inside of the track extending from the upper, or first turn, down the hack stretch and almost to the head of the home stretch. This main ditch is connected by many small laterals to drain directly from the inside of the track. Land tile are laid the full length of the stretches next to the pole and on the outside, and these connected by laterals to the open ditch inside the fence. This drainage has proved adequate and satisfactory.

In the care of tracks, authorities so differ and conditions in one community may be so entirely different from those in another, that no hard and fast rule can be laid down which would apply to all sections alike, but in a general way it may be said that the chief requisite to keeping a track in proper condition is plenty of water and the liberal use of the track harrow. On our local track we keep a team and man constantly employed the year round, and believe that the results attained justify the attendant expense which to some half-mile plants might seem unusual and unnecessary. One of the principal criticisms of the ordinary half-mile track is that they are permitted to become saucer shaped and the turns not kept well thrown up. This we avoid by the frequent use of the road scraper, carrying the dirt and such accumulation of wash as may come to the pole to the center or outside as may be needed, where it quickly becomes packed and furnishes as good footing as any other portion of the track. The nightly sprinkling (in dry weather) and daily harrowing and floating is a too well known process to require more than passing notice. We keep everlastingly at it, with the result that we have shown records during the last five years of 2:04 pacing and 2:08½ trotting. A few short years ago trainers fought shy of this kind of a track, but today, with advanced methods of training, faster horses and more liberal inducements, the up-to-date man prefers a safe fast track to a slow unsafe one.

Relative to management I wish to offer just a word of well-meant advice to those interested in the harness horse, and more especially to those upon whom rests the responsibility for the management of half-mile tracks: Keep this fact constantly before you—to make your meetings a success, you must have the support and attendance of the public; you may have the horses, you may have the weather and all other necessary conditions, but if you don't have the public to pay at the gate your meetings will necessarily prove a failure. To get them, and what is more material, to keep them, is largely a matter of liberal advertisement. When you get them to coming, provide clean and attractive grounds and grandstand; look after their comfort; put men in the judges' stand who understand the game and who will enforce the rules without fear or favor; don't permit long, tedious and unnecessary delays, and then let them race. The public will come back if you furnish the right kind of sport and not keep them so long in one afternoon that they will have had enough to last a week.

Harness horse racing, well conducted, is one of the cleanest and best of all our sports. The half-mile track is the bone and sinew of the game, and if clean, honorable business methods are followed by those who have the interests of the sport at heart it will ultimately be upon the plane where it properly belongs. The great big majority of horsemen who help and the sooner the small minority of the kind who are not willing to help in this building up are weeded out of the ranks the sooner the game will assume its proper place in the estimation of horsemen and public.

Half-mile tracks furnish a very large percentage of both horses and spectators for the mile track meetings—it is the basis upon which is builded the entire fabric of harness horse racing. Its success is the success of all; its failure, or demoralization, the failure of all.

KNUCKLING.

Most writers ascribe knuckling to traumatic causes (diseases which proceed from wounds and accidental external injuries), but I wish to state that for one case arising from these visible and palable injuries to the perforans (middle back) tendon, there are scores of instances which exhibit no sign of any external injury whatever by which they may be accounted for.

Every one in the following category of causes is in itself a distinct cause of knuckling, and some of them combine and produce the same effect.

First—A long toe standing or traveling upon soft ground, or standing upon soft bedding, will cause the foot to rock backward and strain the perforans tendon. Be it remembered that whatever causes a strain to the perforans tendon is a cause of knuckling.

Second—A high toe will strain the perforans on any kind of surface.

Third—A long and high toe combined will produce the same effect in a still greater degree while traveling.

Fourth—A contracted outside heel corresponding with full inside toe will lower the heels and cause strain to the perforans.

Fifth—Both contracted quarters will strain the perforans.

Sixth—A soe fitted short at both heels will cause them to wear faster than the toe, thereby causing strain to the perforans.

Seventh—A shoe too thin at the heels, any shoe thinner at the heels than at the toe, will produce strain upon the perforans.

Eighth—A shoe fitted too tight at the outer heel, will wear fast at that point and cause strain to the perforans.

Ninth—The whole inside half of the foot, being higher relatively, than the outside half, will produce strain upon the perforans tendon, and will derange the functions of the pedal articulation. In short, any cause or causes combined that derange the seat of bearing in the pedal articulation and cause strain upon the perforans tendon will produce the abnormal condition called knuckling.

When a horse commences to knuckle, if it proceeds from being too high on the inside half of the foot, whether it be before or behind, he will either stand with his feet close together, or cross his legs, resting one foot upon the other; and he will travel with his feet unusually close together. The effect of this form of the foot will cause the kneesprung condition with an outward direction of the knee.

Long and low oblique pasterns are not so sensitive to changes in the form of the feet as the shorter and more upright ones. The straighter the pasterns, all else being equal, the more readily it becomes affected by changes in the bearing of the hoof.

To prevent knuckling is easier than to cure. It is easy to cure in its earlier stages, but when it has become chronic it is not easily disposed of.

Working the animal too young must be considered a cause of knuckling; but not so much on account of the animal being young as that the feet have not been properly taken care of. The well balanced foot is the first and most essential part of the horse to be considered. When a young horse has become knuckle-jointed, I have invariably found that the walls of the foot have been allowed to grow unduly long and project beyond the sole in a greater or less degree, thus compelling it to work under the disadvantages of a leverage force at the toe arising from a disproportioned foot.

In regard to treatment, would say that when the case is a serious one, and the heels have to be raised, shorten the toe at the same time as much as possible. A four-calk shoe works best, the calks being set back well from the toe (much as a Memphis shoe from which the bars crossing the foot have been cut out, leaving only the broad flat calks close to the toe and also close to the heel). Never raise or lengthen the toe. After a drive that has been sharp or a trifle long, paint the legs with a solution of camphor-gum cut in alcohol, to which has been added about double the amount of iodine crystals that is usually put into tincture of iodine. Keep water away from legs at time you are using the iodine solution, for water kills the effect of iodine.

Cut the feet down to the line of safety; practice this early and often and you will never be troubled with the contingency termed knuckling. The white line at union of the sole and wall is the line of safety.—David Roberge.

While the racing drama is one of the most popular forms of theatrical entertainment in which horses are employed, there are, as has been seen, many other plays in which the nags may be used.—Ex.

A white horse was one of the features that attracted most attention in "Comin' Thro' the Rye." Bessie Gihson rode the horse part of the time, and Nita Blake rode him the rest. A song was written around this horse, and the song, called "My Broncho Boy," was one of the hits of the piece.

"Black Beauty" has been announced for dramatization, and in this play, of course, the chief figure will be the horse. It comes pretty close to being the chief figure in "The Flaming Arrow," in which play Go Won Go Mohawk, the Indian actress, has played for many years with more than ordinary success.

There are several horses in "The Clansman," in which play the horses carry members of the Ku Klux Klan, who are shown as starting upon one of their expeditions. There was one horse in "Alexander the Great," which was played by Frederick Warde and Louis James, and the managers of the play had some trouble getting a nag that possessed the true martial fire and spirit.

Robert Fitzsimmons is another eminent actor who thinks that the presence of a horse in a drama in which he is engaged lends eclat to the occasion. Fitzsimmons' horseshoeing in one of his successes was a more artistic performance than that which used to be given by Joseph Murphy. The latter was a pretty good horseshoer for an actor, but Ruby Rohert had shod horses for a living before he began to elevate the stage, and his touch was surer and his method more artistic.

CONDUCTED BY J. X. DeWITT

SALT WATER TROLLING.

A catch of twenty-one salmon one day last week by anglers in a launch trolling off the Bolinas beach is probably the beginning of the outside trolling season. The salmon were all fine, large, fresh run fish in splendid condition and evidently after the schools of anchovies, which were running off the beach at the time. The fish were caught by trolling at varying distances from shore—from fifty yards to two miles out. The killing lure were No. 6 Wilson spoons, brass and German silver.

The subject of trolling is particularly interesting at present, as the season's sport cannot be far off. All the artificial baits are more or less good, but frequently they unlay, or knot up the running line. This difficulty is easily to be avoided. The twisting of the line is caused by the swivels refusing to turn, and transmitting the twist imparted by the whirling of the bait. Any lure exerts considerable strain upon the line in its passage through the water, and this drag has a tendency to wedge the swivels enough so that they will impart considerable tension.

What is wanted is something to force them to turn, and nothing is better than a curved sinker for this purpose. A swivel is made fast to each end of the sinker, which may be of the ordinary double-ended variety, known to the trade as "ringed sinkers," and the line is fastened to one swivel while the spoon leader is attached to the other. The sinker has been bent so it hangs below the plane of the line in a half-moon shape. The twisting never can acquire enough purchase on the swivels to throw the sinker up over the line and transmit the twist. Once the idea is grasped, many ways of conquering the difficulty will present themselves.

A favorite sinker in San Francisco trolling waters is a flat one the shape of one-half an ellipse, with a swivel at each end. The bellied portion of this sinker always hangs below the plane of the line. It has been found to work very satisfactorily.

No artificial bait can be expected to prove as killing as the real thing—the sardine, or large anchovy. Most false baits are made in imitation of it, and it is not yet of record that the imitation has ever surpassed the original in any line. When sardines can be procured, they should be given a thorough trial. The fresh fish are unquestionably the best, but the salted ones do well at a pinch. There is a great deal of art in hooking them so that they will stand the shock of a strike without going all to pieces in case the fish fails to hook himself.

Experienced anglers in Southern California waters, in using the sardine, hook him through the tail, and bring the head up along the leader of the hook, fastening it there with a number of turns of soft, fine copper wire, so the fish will travel head first in a lifelike manner and right side up. Some hook their sardines to spin by running the point of the hook from the gills to near the tail and taking a turn of the leader around the shank of the hook and head of the bait. This style has been found to give a killing, spinning bait. Others endeavor to so affix them that they will travel through the water with as little whirling motion as possible—some can hardly be avoided. One big advantage of the sardine is that a fish generally keeps striking at it until hooked.

Unless sardines are wired on carefully, or otherwise made fast, the drag of the water will soon pull them to pieces; they are tender little things, and the first strike, especially if a bonita, is likely to mutilate them so that nothing else but a bass will take any further notice of them. One angler when sardine fishing makes it a point to have fifteen or twenty extra hooks laid out within reach, each with its sardine affixed and wired on ready to use. He employs a quick changing snap swivel in his gear and as fast as one bait has done its duty he snaps on a newly baited hook, thus losing no time when in the school at work.

When a fish is caught this quick change frequently enables a second strike immediately, the bait being put overboard again. The sooner one gets a fresh bait in the water after landing a fish the better. The short delay required to release and bait a hook gives the fish, that are nearly always following the one captured, time to turn away, which they are most apt to do.

Some salt water fishermen have a small hook wired onto their piano wire leader and put it through the lips of the sardine, putting the other larger one through his tail as in the other manner described. Game fish, as a rule, strike at the eye of the bait, and as the bait is in rapid motion, they fall a little short, so the hook catches them about right.

Usually the best results will be had with sardines of medium size. The big ones will occasionally tempt a white sea bass or small tuna, but for yellow-tail the six-inch sardine is the best, as a rule. It makes a neat bait and is sure to attract notice.

The Wilson spoon, generally used down south, is changed somewhat from the original arrangement and is fixed parallel with the concavity of the spoon. A hole of the same size as the eye of the hook is

drilled through the spoon about midway between the staple of original attachment and the hack end of the spoon. Just in the tail of the spoon two small holes are drilled far enough apart to permit the hook to lie between them. A rivet is put through the larger holes and the hook is first riveted on firmly with an ordinary copper harness rivet. Then a piece of soft brass or copper wire is bent over the hook in staple form, passed through the twin holes in the tail of the spoon and both ends riveted on the opposite side of the hook, thus holding the shank firmly against the spoon and making both a neat and a rigid job that will stand any number of strikes without loosening. Some add solder, but it is not necessary if the stapling and riveting he carefully done.

Bone jigs are still a popular bait with the trollers, but few know how to select them. As a rule a jig made of very porous bone and rather deep in form like an inverted boat is the most successful. It should show free, likely motion of a wobbling character when dragged behind the boat, and if mottled brown and white in color, is most likely to prove a killing bait.

The lead and block tin squids used in blue-fishing on the Atlantic Coast are good baits for yellowtail and haracuda trolling, the fish sometimes taking a fancy to them. It is well to be provided with an assortment of baits when going outside on the ocean fishing grounds. Fish are capricious, and one can never predict to a certainty just what bait they prefer. Doubtless this depends much upon what kind of feed they have had last. The white squid, which is one of the greatest delicacies the albacore, yellow-tail and bonita can get, although usually rather rare, is sometimes plentiful, and at such times no doubt the white bone jig will give splendid results, as it is the closest possible imitation of the squid that can be made. When sardines are running the spoons and fish baits will serve better.

Too much importance cannot be given to the use of wire in trolling tackle. Most big marine game fish have sharp teeth and plenty of them; they will strike at knots in the line, at lead sinkers, or anything else that attracts their attention, and often cut the line in two doing so. The wire is tooth-proof. Some kind that will not kink and shear off is best. Phosphor bronze and piano wire are used generally, although both have their defects. Special care should be exercised in making the fastenings; clean, round loops should be turned in the wire with a pair of round-nosed pliers and no sharp angles permitted, as they are sources of weakness. The leader should be longer than the fish one is after, four feet will generally be found long enough for any fish save the tuna, which requires a five or six foot leader. It is not a matter of strength, but length. So far as strength is concerned the wire (No. 6 piano) would part a dozen lines, but the fish often makes a rush directly away from the boat, and with sides and tail chafing the leader, the line should be far enough back to escape this wear and tear. Every salt water angler should have plenty of assorted wire, a pair of nippers of the combination kind, and a pair of round-nosed pliers in his kit. He will find plenty of use for them. Snap swivels of sufficient strength are now made; these permit ready, rapid changing when necessary and are a great boon to the fisherman who must improve his time when the fish are biting if he would make much of a catch.

SOUTHERN ANGLERS' TOURNAMENT.

The Southern California Rod and Reel Club's committee on casting tournament arrangements and rules has made a report setting forth the conditions that will govern the competition at the fish barbecue, which has been scheduled for July 21st at Terminal Island. There will be three classes of casting, two of which will be confined to light tackle, the other to be unlimited.

Casting will be done from the level, and from the wharf, parallel with the surf line, in each competition. A course will be marked off which will be of triangular shape, the caster standing at the apex and landing his weight within the triangle, which will be formed by drawing a line thirty feet wide across the casting course 120 feet from the casting point and setting up stakes at each end thereof, lines being drawn over each stake to the central point of focus, continuing outward therefrom at a divergence. Casts must land within these diverging lines to count.

Each contestant is to be allowed three attempts. Backlash counts as a trial. Casting may be done in any recognized manner, overhead, overhand or sling. The average of casts is also to be computed. Contestants are to step to the score and be ready to cast at one minute's notice. No interference with contestants is to be permitted at the casting point. The following classes are made:

Single-handed, half-ounce bait casting, any rod.

Single-handed 2½ ounce bait casting, light tackle tournament rules of the Southern California Rod and Reel Club to govern.

Two-handed unlimited surf casting, any rod, line and sinker.

Weights will be furnished by the club committee. In the 2½ ounce competition nothing larger than nine-thread line, and rod not under six feet are to be used.

All disputes are to be left to the committee, and the word of the referee chosen by the committee is final. These rules are designed to give all classes of bait casters a chance. Some excellent casters are members of the Southern California Rod and Reel Club, and good records should be made.

SAN FRANCISCO FLY-CASTING CLUB.

Saturday contest No. 8, Medal Series. Held at Stow Lake, July 13, 1907. Wind, southwest. Weather, cloudy. Judges, Dr. W. E. Brooks, T. C. Kierulff, C. G. Young. Referee, F. H. Reed. Clerk, E. O. Ritter.

Note—Event 1, long distance, feet. Event 2, accuracy, per cent. Event 3, delicacy; A, accuracy, per cent; B, delicacy, per cent; C, net per cent. Event 4, lure casting, per cent. The fractions in events 1, 2 and 3 are 12ths. The fractions in lure casting are 15ths.

Prospective Trout Hatchery.—Charles A. Vogelsang, chief deputy Fish Commissioner, and R. W. Requa, foreman of the Sisson Hatchery, recently returned from their trip of inspection to Hales Mills and the Lyons dam country, near Sonora.

They report that country an excellent site for the establishment of a hatchery. As soon as the title to the land is secured work will be rapidly pushed for completion of the hatchery. Owing to the lateness of the season the young fish will be sent to Sonora this year, a carload, for free distribution, probably arriving in August.

Much credit is due Senator Curtin in his tireless efforts to establish the hatchery, and for the interest he has shown at all times in the preservation of fish and game.

With the assistance of Messrs. Vogelsang and Requa, and the co-operation of the Commission, who have forged ahead and made of the Sisson Hatchery one of the finest in the world, Tuolumne county would in a very few years have as excellent a hatchery as Siskiyou.

Trout Scarce.—A press dispatch from Reno states: There is much complaint because of a great scarcity of fish in the Truckee River. One of the oldest anglers on the river says that nothing but rainbow can be landed this year between Derby and the California line. Above that there are brook trout. It is claimed that the Nevada State Fish Commission is lax in the discharge of its duties in that it does not have the Government erect a fish-ladder at the Derby dam, so that trout could get up from the lake to the spawning beds.

This condition of affairs could not be compensated for by the planting of 5,000,000 fry above Derby, and the loss of a majority of the fish hatched in Carson by a recent water failure makes the condition even worse.

Time was, and not so many years ago, when the Truckee was one of the best trout streams in the world, but its glory is departing through failure to give the fish a thoroughfare from Pyramid Lake and the lower reaches of the river.

Doves Plentiful.—Doves are reported unusually plentiful in the vicinity of the Buttes, Sutter county, and great sport is anticipated. Last year the birds were unusually scarce, for what reason no one could determine.

The birds are also very plentiful near Marysville, it is reported. Near Orosi, in the foothills, doves have bred plentifully this season, but are still too young to be hunted.

THE GAME WARDEN OF TO-DAY.

(By R. W. Williams, Jr., Assistant, Biological Survey, in the Year Book of Department of Agriculture.)

For several hundred years the enforcement of criminal laws of all kinds in the United States has been entrusted to sheriffs, constables and police officers, and until the middle of the nineteenth century this method was considered satisfactory. But with the growing demand for more game enactments for the preservation of game and the increasing complexity of statutes for this purpose it was found no longer practicable to include the burden of enforcing them among the duties devolving upon general officers, and their enforcement has consequently been entrusted to special officers, usually called game wardens.

The origin of the term "warden" in relation to game is somewhat obscure, but it was probably adopted in analogy to church and wood wardens, in England, where the word first came into use. However this may be, a game warden is now generally understood to be an officer charged with the enforcement of laws for the protection of game and fish. Several substitutes for the term are in use in a few States and Canadian Provinces. Thus in New York all, and in New Jersey and Pennsylvania some, game officers are styled "protectors"; in New Hampshire the designation "detectives" is employed; in Prince Edward Island, "inspectors," and in Alberta, Manitoba and Saskatchewan, "game guardians."

Wardenships for the protection of fish existed quite early in the history of this country, and some time after the establishment of similar offices for the protection of game the duties of the two were united and entrusted to the same officers. Consequently to-day, in all but a few States, the game warden is a fish warden also and performs manifold duties in that capacity. The present article does not deal with this phase of his duties, but is limited in scope to those he performs solely as a game warden.

In the United States the establishment of a special office for the protection of game and the enforcement of the game laws dates back to 1852, when the Legislature of Maine created the office of moose warden, directed the Governor to appoint one for each of the counties of Oxford, Franklin, Somerset, Penobscot, Piscataquis, Aroostook and Washington, and allowed the warden three-fourths of the fines recovered for killing moose and deer contrary to law. This seems to be the first game wardenship established in this country. For three decades there was very little further activity in this direction. A few States authorized the appointment of local wardens, but the experiment was almost entirely a failure. During the period between 1878 and 1888, however, the urgent necessity for enforcement of game laws forged to the front, and in that decade ten States created a State office or department charged with the enforcement of the game laws. Other States quickly followed, and at the present time in thirty-six States and Territories the enforcement of the game laws is entrusted to a State board, a warden, or, as in North Carolina and Delaware, to an incorporated association. Florida, Georgia, Kentucky, Louisiana, Nevada and South Dakota, still adhere to the county warden system, and Texas, Alabama and Arkansas provide no special officer for protection of game. Correlated with the establishment of these offices has been the increasing complexity of game laws, until at the present time the modern game statute assumes the magnitude of a criminal code, and to enforce its provisions and exercise the powers thereunder require a high degree of judgment and skill. The necessary qualifications of an officer in this department of the State's service are consequently much greater to-day than formerly. This is apparent from an examination of the one hundred and fifty-six sections of the Colorado game law, which, it may be noted, do not include the provisions relating to non-game birds.

The Office of Game Warden.—Since the establishment of State offices or departments for the protection of game, the position of warden, whether the jurisdiction extends over the entire State or is confined to a small area, has assumed an importance and dignity it did not formerly possess. Fortified by plenary power to enforce the game laws, and with a consciousness of the important public service performed, the warden of to-day stands upon an equal footing with other executive officers of the Government and commands like respect. The salary attached to the position of State Commissioner or Warden in those States providing for a salary compares favorably with the compensation of other State officials. In New York it is \$5000 a year, in Illinois \$2500, and in other States it varies from \$1000 to \$2000. In the States which entrust the administration of the game laws to a board of commissioners, position on the board, except in Connecticut, Massachusetts and Maine, is honorary and with compensation. Such is the case in Arizona, California, New Hampshire, New Jersey, Minnesota, Ohio, Pennsylvania and Rhode Island, but even under these circumstances the States have no difficulty in securing ready and capable men.

The compensation of deputies varies even more than that of the State officers, and the system of payment adopted by each State has features distinct from those of any other. A few States pay their deputies a salary. In Montana each of the eight district wardens receives a salary of \$100 a month, and in California the salary of county warden in graduated according to the population of the county, \$50 to \$125 per month, with an additional allowance of \$25 for expenses. Colorado allows each of her five chief wardens \$900 a year and \$300 for expenses, besides

a share of fines and officer's costs. In Illinois the ten district game wardens receive \$900 a year each and their actual and necessary expenses while under the direction of the commissioner. Game protectors in New York, except the chief, first, second and third assistant protectors, who receive annual salaries of \$2000, \$1400 and \$1200, respectively, are paid \$600 a year, and receive one-half of the fines in actions brought upon information furnished by them; and they are allowed also \$450 a year for their expenses. In some States the deputies receive the whole or part of the fines, together with the usual fees of a sheriff or constable. In Tennessee the State warden serves without compensation.

The terms of service are usually the same as those of other officers. The State Warden of Tennessee, however, is appointed for eight years, a longer term than is usual for any State officer.

It may be of interest to note, as showing the type of men required for this work, that the present warden of Tennessee was a former member of the Federal House of Representatives; that one of the members of Congress from Michigan was the first warden of that State; that the present game commissioner of one of the States was formerly United States minister to Turkey; and that several prominent lawyers and physicians are serving their States in the capacity of State warden or as members of the board of game and fish commissioners. The Governor of Nebraska is nominally fish and game commissioner of that State, but the active work of the office devolves upon his chief deputy. This somewhat anomalous condition is due to a constitutional prohibition against the creation of any executive State office not provided for in the constitution. Hence the law of 1901 establishing the office of game and fish commissioner provided that the duties of the position should devolve upon the Governor.

Duties.—The duties of a game warden are those usually performed by a sheriff, but they differ in one important particular, and this difference inheres in the object for which the wardenship was established. A sheriff ordinarily acts only in pursuance of preliminary proceedings by private persons or by a court officer and usually under a warrant issued by a court commanding him to arrest a certain person, summon a jury, or perform similar acts; but a warden cannot await the initiative or detection of a violation by others. He must act, must himself search out violations, find the evidence wherewith to convict offenders, and institute prosecutions. This is one of the primary reasons for the existence of a special officer to enforce the game laws.

During the open season much of the game warden's time is spent in examining shipments, and if his territory includes a railway center this service is arduous and requires much night work. The devices employed by shippers to conceal contraband trade in game compel wardens to examine many packages the contents of which are not exposed to view. It frequently happens that the warden must perform detective duty in order to secure the evidence necessary to convict suspended parties, and this means that occasionally he is subjected to all the dangers of such service. In States prohibiting sale or possession of game he must periodically visit and inspect hotels, restaurants and other resorts where it is likely to be served to guests, and must keep a watchful eye on markets and coldstorage plants. In a few States and in several of the Canadian provinces wardens issue hunting licenses, and in consequence are compelled to keep accounts. By the passage of laws in several States prohibiting the hounding of deer and directing the wardens to kill dogs found chasing or molesting deer or found in the deer country, another task, and often a disagreeable one, is added to the warden's duty. The secretary of the Game Commission of Pennsylvania in January, 1906, estimated that 1,500 dogs had been killed in that State during the few months of the operation of the law. Examination of hunting licenses issued to non-residents requires the warden's attention, and it is always necessary for him to make sure that all persons found hunting are provided with the proper license. In many States wardens are required to destroy traps and devices employed to capture game, and in a few to seize guns and shooting paraphernalia used in violation of law. They often perform the duties of auctioneers in the sale of confiscated game, guns, traps, nets, etc. Occasionally when an offender against the game laws has escaped into another State the warden is required to enter that State and, with proper requisition papers, apprehend and bring back the fugitive. In nearly every State wardens are empowered to serve criminal and civil process just as a Sheriff would, and this requires knowledge of the proper procedure.

Every statute providing for the appointment of a warden defines his duties, some more explicitly and in greater detail than others; but the officer who would perform the greatest service to the State must do many things not laid down in the law. As a rule, the active field work of the game department is performed by deputies under instructions from the State warden, but the laws of Idaho and Wyoming declare that the State warden shall be an active executive officer, and when possible shall take the field in person in performance of his duties.

An officer who realizes the responsibility of his position can do much to bring game protection into proper favor. He may easily become an educator, however circumscribed his field. Much of the wanton destruction of animal life proceeds from thoughtlessness, and few persons once impressed with the

importance of preserving wild creatures continue to destroy them. In North Carolina the bird and game wardens, in addition to their official duties, spend a considerable portion of their time educating the public as to the value of birds and game to the State. During the close seasons they visit farmers, explain and discuss the game laws and their object, and hear complaints. Each warden is supplied with a selection of standard books on birds and is required to familiarize himself with them, so as to be able to answer the numerous questions propounded.

A very useful and interesting feature of a warden's duties in Illinois is the periodical census made by him of certain species of game. In this way the commissioner, with reasonable accuracy, can determine the status of certain species and recommend necessary legislation. Similar service is performed by the wardens in Pennsylvania. The general adoption of this scheme over the entire country would greatly facilitate the drafting of proper laws and in addition furnish very interesting statistics.

Another valuable service performed by the Illinois wardens consists in rendering aid to the farmers in enforcing the trespass laws. Telephone connection makes it possible to quickly reach the scene of a trespass, and their ready response has greatly reduced the number of such offenses in that State. The Illinois and Wisconsin wardens, as part of their duties, periodically examine and check up the hunting license accounts of the County Clerks.

The rapid decrease in the number of quail in several States, due to starvation in severe winters with heavy snows, has awakened the citizens of those States to a realization of the necessity of providing food for the starving birds during such periods. The game departments in some of the States have adopted a systematic plan for purchasing and distributing this food by the aid of wardens. During the winter of 1904-5, which was very severe and protracted as far south as North Carolina, thirty wardens in that State devoted much of their time distributing grain for the quail and in enlisting the co-operation of the farmers in their behalf. During the same winter some of the wardens of New Jersey purchased grain at their own expense and distributed it widely in their territory, and the Indiana wardens employed men with sleighs to distribute food for the quail. In Illinois quail were systematically fed by the game department during that winter. An expenditure of \$25 in each county was authorized by the State game commissioner to be used in February, and with the means thus supplied the wardens were able to scatter a large amount of grain throughout the region inhabited by quail. The mounted police on duty in the neighborhood of Washington, in the District of Columbia, under instructions from their superintendent, who is ex-officio game warden of the district, carry with them regularly, during severe weather, bags of grain from which they scatter food for the quail.

(To be continued.)

AT THE TRAPS.

The Union Gun Club's regular blue-rock shoot for July will take place at Ingleside to-morrow.

At the Sunset Gun Club shoot on the 14th inst. the following scores were shot:

At 10 targets—Burfiend, 6, 8, 9, 8; Frankel, 7, 6, 9, 7; White, 7, 7; O'Connor, 4, 5; Lewis, 4; Rodgers, 5. At 15 targets—Burfiend, 8, 14; Frankel, 7, 10; White, 8, 8; Rodgers, 7; O'Connor, 5; Lewis, 10. At 20 targets—Burfiend, 15; Frankel 15; White, 6. At 25 targets—Burfiend, 20; Frankel, 18; White, 16; Rodgers, 13. At 25 targets—Burfiend, 19; Frankel, 21. Lewis medal race, 10 targets—Burfiend, 20 yards, broke; Frankel, 16-6; White, 16-5; Lewis, 18-4.

Lon Elshere, whose string at last Sunday's shoot of the Sonora Gun Club, when he broke 18 out of 25, gave him the honor of being high gun three consecutive Sundays, was presented with the Du Pont Powder Company's trophy.

In the final medal shoot of the Folsom Bluerock Club, June 30th, the medal was won by Henry McBerby, who scored 24 out of a possible 25. Ollie Ferguson made the high score, 23, in the shoot for the Du Pont trophy.

Ellis, Steele and Junker of the Seattle Gun Club returned July 5th from Aberdeen, where they participated in the Southwestern Gun Club Association shoot. The Seattle men captured one medal and most of the cash put up. On the first day (Thursday), Ellis took high average, with Steele second and Wray third.

On the second day Steele took high average, with Junker second and Ellis third. Steele took high average for the two days.

The shoot for the manufacturers' agents or representatives resulted in Ellis first, Haight second, Rohinson third, Hillis fourth and Howe fifth.

The Seattle Sporting Goods Company's cup was won by E. Garvin of Olympia.

The individual championship of the Southwestern Gun Club Association was won by E. E. Ellis, whose score, 25 out of 25, was the best made. M. Winters of Portland was second in this event, scoring 24 out of a possible 25. E. Garrison, who made a score of 24 out of 25, was awarded a silver cup.

The Seattle team tied with Grays Harbor team for the championship honors. The Portland team was second. The place for the next shoot of the association has not yet been chosen.

The Paso Robles Gun Club members met shooters of the San Luis Boat and Gun Club at the Paso Robles trap grounds on June 30th, the former club shooters prevailed. These two clubs have contested in friendly trap shoots several times this season. This meet will about conclude the season for the Monterey shooters, most of whom will now devote their shooting attention to deer and dove shooting. Among other pleasant features of the day was a barbecue, served at noon, at which about seventy-five sportsmen were gathered around the tables.

The team shoot was won by Paso Robles on a score of 143 to 120. Brendlin of Paso Robles was high gun with 19 breaks out of 20 targets.

The medal for the day's shooting was won by Will Martin of San Luis Obispo.

The scores shot in the main events: Team race, 20 targets per man, 15 targets and 10 targets respectively:

Martin, 17-13-6; Wilhoit, 9-13-10; Taylor, 12-11-9; Van Scoy, 13-11-7; Van Shaick, 15-12-6; McCaffery, 12-8-7; Shien, 6-11-4; Parsons, 7-11-6; De Nise, 12-9-6; Renetzsky, 11-0-0; Gaxiola, 15-10-6; Green, 15-10-7; Johnson, 16-11-6; Dougherty, 16-7-7; Crees, 13-9-7; Mader, 9-0-2; Brendlin, 19-9-6; Keller, 9-8-7; Wood, 9-11-5; Colling, 9-9-7; Hamilton, 13-10-0; Wilder, 0-6-5; Estudillo, 0-12-9; Hearne, 0-0-2.

The Hanford Gun Club wound up the club trap season on Sunday, June 30th. The highest averages were made by the following: R. R. Cadwell, 84 out of 100; L. S. Chittenden, 83-100; Willett Foster, 77-100; H. T. Hendricks, 77-100.

The Richmond Gun Club shot on the 7th inst. In a 25-target race, unknown angles, the scores were: Picton 24, Truax 21, Purdy 20, Baker 19, Curry 19, Harsbner 18, Clark King 15, Dietrich 10, White 8.

At Albuquerque, N. M., the last shoot of the season was held by the South End Gun Club, Sunday morning, June 30th. The shoot was at 25 clay birds each. The scores were: Joseph Bowdish 18, Harry Shoop 21, Earl Bowditch 22, Alex Craig Jr. 19, Alex Bowditch 20. James and Alvin Stewart, trappers for the club, shot at five birds each and tied with three each. Four of the members of the club were formerly residents of Carthage, N. M., and would like to hear from the marksmen of that camp.

The Santa Fe Rod and Gun Club have held a number of shoots this season and now has an enthusiastic membership. At a practice shoot June 30th the results were, in 25 target races:

First match—McHughes 22, Jones 18, Webb 15, Davis 12, Hunter 6.

Second match—Jones 23, Webb 21, McHughes 15, Hunter 7, Davis 6.

Third match—King 22, Farah 6, Garrett 5.

Fourth match—Hardinge 13, Andrews 10, Farah 6.

The Goldfield Gun Club at a recent meeting decided upon the location and fitting up of the club trap grounds, and the crack of the guns will resound from a point about one-quarter of a mile west of the old grounds, on Crook avenue.

The new site is ideal for the purpose in that the ground selected is level and has a natural backing in the malapaia.

The choice was made after an extended examination of different locations selected by Captain Bradley, Jerry Revere and W. M. Clayton. Messrs. Revere, Law Dyer and W. M. Clayton have been in consultation with a number of crack shots at Tonopah looking toward the organization of a gun club at that place.

It is proposed to hold a tournament on September 2, 3 and 4, at which time over \$3,000 will be expended in the purchase of trophies.

This will be a combination shoot in which live as well as clay birds will figure.

Hector Fraser of Melbourne, referred to by English sporting exchanges as the boy champion pigeon shot of the world, distinguished himself signally at Monte Carlo. One journal (dated March 16th) says: "Young Fraser has shown the pigeon shots of all nations what a wonder he is behind the traps, for such an exhibition as he has given at Monte Carlo this season has, we think, never been equaled or beaten before, and his consistent shooting has likewise been remarkable. His handicap is now 33 metres (over 35 yards), which, as all shooters know, is a big distance to ask anyone to perform from against so many good shots, some of whom stand on the 20 metres mark. It reminds one of the old saying that you can handicap a racehorse so that it will be beaten by a donkey by putting weight enough on the racehorse's back; but we certainly think that, man for man, Fraser could beat any one of the cracks if both shot off the same mark, and it would be interesting to see a match between him and any of the best of them at 50 birds each, say at 30 yards. We venture to say that the junior shooters would start favorite."

Regarding a later and more remarkable performance, a London writer states: Australia was very much to the fore in the Triennial Championship Pigeon Shooting Competition, held at Monte Carlo early in March. Of the 87 shooters who entered and took their places, 25 were Italians, 20 English, 19 French, 12 Austrians, 3 Americans, 3 Australians, 3 Belgians, 1 German and 1 Spaniard. The shooting lasted over three days, and at the end of the twenty-fifth round H. Fraser and Donald Mackin-

tosh of Australia, and Greig of England, had each killed 23 out of 25 birds. They agreed to divide the first, second and third prize money, amounting to 17,328 francs, and to shoot off for the championship medal. Fraser led off with a kill, and Mackintosh and Greig missing, the young Australian crack secured the coveted trophy. Its name will be inscribed on the marble tablets at the back of the stand recording the skill and nationality of the different champions. Fraser is the first Australian to achieve this honor. The competitors in the event will stand on the 27 metres mark, and pay £4 to enter. To this sweepstake the sum of £400 is added. The three first prizes, divided by Fraser, Mackintosh and Greig, were worth, all told, nearly £700, or \$3,500.

WORKING COLLIES.

In view of the proposed competition of working Collies at the coming fair of the State Agricultural Society at Sacramento, September 13th and 14th, it may be of some little interest to our readers to get a few pointers concerning a working Collie show. In Australia and New Zealand these competitions are popular and regular fixtures. Just what manner of arrangement of the ground covered and other details we are at present not cognizant of, but the following results taken from the Christchurch (New Zealand) Weekly Express, are suggestive to a degree of what is required of the dogs and the system of scoring awards:

The twenty-second annual competitions of the Waitaki Collie Dog Trial Club were held at Hakatearamea on Thursday, Friday and Saturday, May 9th, 10th and 11th. Rain on the opening day, combined with loss of time on the second through some straggling lots of sheep, caused the trials to extend till Saturday, when they were concluded in a howling gale. The entries numbered ninety-three, and the work shown in the yarding and huntaway classes was decidedly good, but in the long pull it was very much below the average. Mr. R. Fraser of Albury was the most successful competitor, taking £13, besides the gold medal, value £2 2s, presented by J. McArthur Esq. for the best and quickest head in the long pull, also the club's gold medal, value £2 2s, for the dog scoring most judges' points during the meeting, both with Marvel with 50 points, followed closely by Mr. T. Hogg with Kiwi 40 points. Mr. R. R. Pollock takes £16, and Mr. J. B. Purdue of Nightcaps, £6 and Mr. R. O. Campbell's gold medal, value £2 2s, for the quickest working dog in the yarding class with Loy, and Mr. J. Coumban takes Mr. R. O. Campbell's gold medal, value £2 2s, for the dog with most noise in the huntaway. The judging, which was undertaken by Messrs. D. Jardine and A. Munro for the yarding and long distance, and Messrs. Green and Stewart for the huntaway, gave every satisfaction. The following are the results, with the judges' notes on the placed dogs:

Huntaway 10, slewing 11, noise 13, command 6. Twenty-four entries:

First—R. R. Pollock's Rave, 10, 9, 11, 4—34 points.

Second—J. Delargy's Spring, 8, 8, 11, 3—30 points.

Third—A. H. Kerrow's (Hampden) Help, 10, 7, 10, 2—29 points.

Fourth—R. W. Trotter's (Hyde) Swamp, 8, 6, 11, 3—28 points.

R. R. Pollock's Rave hunted away splendidly, slewed well, under good command, plenty of noise; time, 9 minutes. J. Delargy's Spring, huntaway fairly good, slewing good, noise good, fair command. A. H. Kerrow's Help hunted away well, slewing fair, noise good, command only fair. R. W. Trotter's Swamp hunted well on the course, good noise, slewing fair.

Class 3—Heading and bringing back, about half a mile; time 15 minutes. First prize £10, second £6, third £3, fourth £1. Points: Heading 11, command 7, bringing back 15, holding 7. Thirty-five entries:

First—A. Sutherland's (Morven Hills) Lass, 6, 5, 7, 5—23 points.

Second—J. B. Purdue's (Nightcaps) Jack, 5, 4, 9, 4—22 points.

Third—R. Fraser's (Albury) Lilloco, 4, 4, 8, 5—21 points.

Fourth—D. McKenzie's (Table Top) Mac, 7, 5, 8, 0—20 points.

Fraser's Marvel 19 points, T. Hogg's Kiwi 18 points, and A. Patterson's Clyde 18 points were the only others that brought the sheep into the ring. Sutherland's Lass hunted on left and crossed cast, headed in 2½ minutes, pulled slackly, holding very fair; time, 12 minutes. Purdue's Jack hunted on right, went out with many instructions, and headed in 5 minutes, pulled well, held well; time, 12 minutes. Fraser's Lilloco hunted on right and made a loose head in 3 minutes, went out freely, pulling only fair and trifle slack, holding good; time, 9 minutes. McKenzie's Mac hunted on right, went out fairly well, made a long head in 5 minutes, pulled firm on a good course.

Class 1—Heading, bringing hack and yarding, 8-mile; time, 15 minutes. First prize £10, second £6, third £3, fourth £1. Points—Heading 8, bringing back 12, yarding 3, work at yard 12, command 5. Thirty-four entries:

First—R. Fraser's (Albury) Marvel, 5, 8, 3, 11, 4—31 points.

Second—R. R. Pollock's (Palmerston) Boyne, 5, 8, 0, 10, 4—27 points.

Third—J. P. McIntyre's (Gore) Lass, 5, 7, 0, 10, 4—26 points.

Fourth—W. J. Scott's (Mataura) Flo, 4, 5, 3, 9, 3—24 points.

R. Fraser's Marvel hunted on right, going out freely, making good head in two minutes, pulled fairly well, worked well at yard, and yarded in 13½ minutes. R. R. Pollock's Boyne went out well, headed in 2½ minutes on the left, pulled fairly well, good command, worked well at yard, but failed to yard. J. P. McIntyre's Lass hunted on left, crossed going out, making good head in 2½ minutes, pulled well, good work at yard, but failed to yard. W. J. Scott's Flo hunted on left, went out fairly well, made fair head in 2½ minutes, pulling fair, rather rasb, worked well at yards and yarded.

Class 2—Huntaway with slew, ¼-mile, between three sets of flags about 2 chains apart; time, 12 minutes. First prize £10, second £6, third £3, fourth £1. Points:

The results of the Marlborough Collie Dog Trial Association's annual competitions, held on Saturday and Monday, May 18th and 20th, were:

Class 1—Heading, bringing back and yarding, T. Henry's Ben 1, T. Henry's Sharp 2, J. McIsaac's Rough 3.

Class 2—Team of three dogs driven through three gateways and back to starting point, C. Tate's and T. Henry's teams tied for first place, W. Watson's team third, G. Hare's team fourth. Huntaway, with slew—B. Francis' Rock 1, W. Watson's Speck 2, R. O'Brien's Nap 3.

The annual field day in connection with the Cheviot Collie Club was held on Friday and Saturday, May 17th and 18th, in Mr. Pulley's paddock. The attendance was very small on the Friday, owing to the wet weather, but Saturday's attendance was large, and some very creditable performances were given. The events resulted as follows:

Class 1—Heading and bringing back, prizes £4, £2 and £1—H. Little's Doon 1, A. Oliver's Scott 2, G. McRae's Corbie 3.

Class 2—Heading and bringing back and yarding, first prize £5 and a sweepstake of 5s each, second prize £2, third prize £1—J. Little's Coy 1, H. Little's Doon 2, F. Richardson's Boen 3.

Class 3—Huntaway with slew, prizes £4, £2 and £1—J. Little's Rock 1, F. Richardson's Laddie 2, H. Little's Liddle II 3.

Class 4—Driving and yarding competition, prizes £3, £2 and £1—C. Bruce's Bess first and only dog to score.

Class 5—Visitors' trial (same as Class 4)—W. McRae's Cassino 1, J. Little's Coy 2.

Special prizes—Dalgety & Co., £1 1s for dog scoring most points, H. Little's Doon; J. J. McCaskey, 10s 6d, for dog scoring most points at meeting, J. Little's Coy; Cheviot Co-op., £1 1s for team scoring most points, J. Little; shepherds' race, £1 1s, given by N. Campbell, T. Hawkins 1, Webb 2, J. Shand & Co., £1 1s, for best smooth-haired dog, J. Oliver's Dandy; D. McGilvray, £1 1s, for best long-haired dog, A. Cameron's Rock; A. W. Rutherford, M. H. R., £1 1s, for competitor who showed best style in handling his dog, J. Little.

On Saturday evening the annual social in connection with the club was held in the Town Hall, and songs were sung by Messrs. McRae, Robinson, Kingsland, Perry, Bosomworth and Lee, and a recitation was given by Mr. Ledsham. A number of toasts were proposed and responded to, that of the judge being received with much enthusiasm, the chairman speaking highly of Mr. W. O. Rutherford's ability and services.

DOINGS IN DOGDOM.

Mr. Wm. Bay recovered his Irish Water Spaniel bitch Ch. Rowdy Girl last week. The bitch was in the custody of a young man who did not very strenuously assert his ownership. She had been closely shaven, but notwithstanding, Mr. Wm. Larson recognized her and took possession for Bay. The latter is to be congratulated upon getting back, so soon, a valuable bitch who, by the way, it is believed was, at the time of recovery, on the way to be bred. She will hardly have her coat in shape for the September show at San Mateo or for Stockton in October.

Dublin, a daughter of Ch. Rowdy Girl, was served by A. Christensen's Ch. The Gossoon on July 2d.

Mr. Bay recently received a commission from Mr. G. W. Bennett, who is located in Alaska, for two Irish Water Spaniel hitches. He took a young hitch he bought from Mr. Bay up north sometime ago and found that the breed, if the showing of the bitch he took with him is any criterion, is wonderfully adapted to the climate beyond the arctic circle. As a sled dog, his bitch, he claimed, was as good if not a better performer than the native dogs—she could withstand the cold climate and water better than any of the other dogs he had.

George Fraser's Irish Setter bitch Molly Swiveller whelped on June 29th a fine litter of puppies to F. T. Keene's Sure Mike.

J. H. Goldsworthy's Bull Terrier bitch Hawthorn Snowflake (Ch. Banjo-Hawthorn Torpedo) is due to whelp to Mrs. Dr. J. A. Welsh's Edgecote AI (Ch. Edgecote Peer-Edgecote Beauty).

In our report of the Western Bull Terrier Breeders' Association show at Englewood on the 7th inst., the special for best stud dog, judged by two of his get, was inadvertently credited to Woodlawn Baron (through Stiletto Cold Steel and Stiletto Blade) in-

stead of to Bonnybred Stiletto (through Edgewood Vanguard and Englewood Blossom). Mr. Frank E. Watkins' dog Bonnybred Stiletto received the yellow ribbon, for which honor we now make proper mention.

Mr. J. H. Dorian is "strictly in it" back East. His recent going over to Bulldogs has been a series of successes in every venture he has interested himself in. We take pleasure in giving the following, recently received, which intimates that Nairod Kennels is going some:

Nairod Kennels of Brooklyn, N. Y., announce the birth of a rather remarkable litter of ten English Bulldog puppies (nine dogs) by their celebrated stud dog Young Mahomet, out of their bitch Miss Hurdle, dam of the well known Nairod's Pluto. The remarkable vigor and prepotency of this young dog is shown in the fact that nine of these puppies are the exact image of their sire in markings, conformation and every other respect. The tenth (a dog) is a beautiful dark brindle. Mr. Dorian reports them as being the most vigorous, sturdy lot of youngsters he has ever seen; and the general interest in the litter is evidenced by the fact that he has already booked several orders for them at good prices, though they will not be ready for delivery for some weeks, having been whelped on June 12th. The reason will be readily seen when their breeding is considered. There is probably not another Bulldog litter in America that can boast so many names of the very best dogs ever shown in the breed among its immediate ancestors. The first four generations show the following famous names among others almost equally famous:

Champions Mahomet, Rodney Stone, Nuthurst Choice (dam of Nuthurst Ambition and Nuthurst Surprise), Nuthurst Doctor, Ivel Doctor (litter brother of Champion Ivel Rustic and sire of Champion Ivel Damon and Sir Launcelot), Primula (full sister of Champion Woodcote Galtee More), Prince Albert, Don Salano, His Lordship, Katapult, Boomerang and descendants of Champions Pathfinder, King Lud, Ivan and Wild Fang.

The litter, as a whole, is one of the most even ones ever whelped, and there are several youngsters in it that should be heard from in the top fight, if their owner succeeds in raising them.

Coast field trial enthusiasts are keeping close tab on coming field trial fixtures.

W. B. Coutts left last week, headed for Winnipeg with a string of ten dogs, six Derbys and four All-Age entries. He will get his dogs ready for the Manitoba trials, starting September 5th. The purses for the Derby and All-Age Stakes are \$375 for each event, three moneys—\$175, \$125 and \$75. For the Champion Stake, a gold medal to winning owner and \$50 bonus to handler.

Coutts' Derby dogs are: Courtney E. Ford's Tiburon (winner of the Pacific Coast Derby, Bakersfield, 1907), and Uncle Fontaine, both Belle Fontaine puppies; S. Christenson's blue belton English Setter dog St. Ives, J. G. Roberts' English Setter Madera Dick, W. H. Estabrook's Pointer bitch Santa Rosa and Jos. E. Terry's English Setter bitch Kilgariff's Linda. Madera is also a Belle Fontaine puppy. The All-Age entries are: S. Christenson's Goliath, Jos. E. Terry's Kil's Blue Belle and Ramona, and Elmer E. Cox's Sensation, all English Setters.

Following the Manitoba trials Coutts will attend the Victoria and Washington trials.

John Lucas will go north with a string, starting at the British Columbia trials in September, thence to the Pacific Northwest Club's trials in Washington, following up with the Texas Club's meet and back to California in time for the Pacific Coast trials in January. Mr. Victor Caglieri's sensation performer Carmen, one of the best English Setter field trial hitches on the Coast, will be in the Lucas string. Mr. Caglieri and Mr. Courtney E. Ford of this city propose to be at the British Columbia and Washington trials. It is rumored that Mr. Henry L. Betten of Alameda, the most prominent and able field trial judge on the Coast, will officiate in the saddle at the British Columbia trials.

Derby entries for the twenty-fifth annual Pacific Coast field trials will close this year, we are informed, on August 15th. Entries for the All-Age will close about the middle of November. Further information, blanks, etc., may be obtained by addressing the secretary of the club, Mr. Tudor J. A. Tiedemann, 802 Fifth street, San Rafael, Cal.

Entries for the Collie show, in conjunction with the State Fair, September 13th and 14th, at Sacramento, will close on August 25th. Entry blanks and further information can be obtained by addressing Secretary J. A. Filcher, Sacramento, Cal.

GOSSIP FOR SPORTSMEN.

The Deer Season.—Reports from all over the State show that the opening of the season for hunting bucks was pretty generally taken advantage of. Results in many sections have apparently been satisfactory to the many Nimrods out, judging from first reports, however, anything at present like a fair approximation of the bucks bagged is rather early, general returns had not been received up to the time of going to press. One report from Mendocino county states that forty bucks were secured on Monday. Comparatively, the returns all along the line are of

the same import, the quantity of venison secured being, of course, in keeping with the number of guns out.

Anglers Turn Out in Force.—As an indication of the great number of sportsmen who indulged in trout fishing this season, the statement of Mr. Will Golcher, of Golcher Bros., that his stock of Leonard and other high-class rods was entirely sold out before the opening day, is to be taken as a guiding point. The tackle stock of reels, lines, flies, leaders and all the necessities of the angler was never better—even before the fire last year. The raid made on this supply by the angling fraternity well nigh cleaned out several lines which, by the way, this enterprising firm have since replenished in every detail.

Black Bass Angling.—Oroville, Butte county, has become quite a Mecca for the disciples of Isaac Walton and every day anglers from other parts of the country go there to engage in the fascinating sport. Bass, carp, cats and other kinds of fish were never so plentiful at this point of the Feather River as now and some good catches have been made. Bass seems to be the fish most sought for, and many of this species have been caught weighing from six to nine pounds.

Anglers report that black bass are plentiful in Butte Slough, near Gridley, some catches of forty-five having been made during the past few days.

A string of twenty-six fine black bass rewarded the labors with hook and line of Alex Peterson, Will West and A. J. Lewis of Watsonville in Kelly Lake recently. The whole lot, which averaged about four pounds in weight each, were all caught at one point within two hours' time.

Rio Vista, on the Sacramento River, is another favorite resort for black bass anglers, the fishing there being excellent at the present time. Last Sunday Otto Feudner and Clarence Nauman both made good catches.

Licenses in Demand.—California has 60,000 or more hunters, according to statistics of the California Fish Commission, which has already issued more than 40,000 licenses to would-be nimrods and has had to put in a new order for 20,000 additional tags. It is expected that the new order will sell like hotcakes, and the third requisition may have to be made.

For Killing Quail.—K. Koye, a Japanese, was arrested near Healdsburg last week and charged with violating the game laws. He was taken into custody by Game Warden Ingalls and Constable Ben H. Barnes. He had a large number of plump quail in his possession when arrested. He had been killing the birds for several hours and found the shooting good until the arrival of the officers. Koye was fined \$25, which he paid.

An interesting and complete illustrated catalogue, recently published by the J. W. Brittan Company, Van Ness avenue and Turk street, should be in the possession of every angler and shooter. Other lines of goods for outing, camping, etc., are also complete in detail. Now that the fishing, hunting and camping season is in full swing it behooves the wise sportsman to be posted.

Large Reward Offered.—The Board of Supervisors of Yolo county have passed an ordinance providing for the payment of \$100 reward for the arrest and conviction of any one violating the fish and game laws.

The ordinance is an important one, and it is believed will tend to materially reduce the number of transgressions it aims to punish. It is proposed to make an example of game law violators until the practice in that particular county is stopped.

Quail For Anacapa Island.—Capt. Ray Webster, lessee of Anacapa Island, will stock that little rock off the Southern Coast of California in the Pacific with valley quail, if the authorities will give him permission. He has made application to the State Fish Commission. If permission is granted, which is expected, Captain Webster will immediately proceed to trap a number of pairs of the little birds and take them to his preserve, twenty miles off shore. Anacapa would be a prime place for the raising of quail.

There are no wild animals whatever on the island, such as foxes, wildcats, skunks, weasels or the like, nor are there any snakes, or other living things, outside of rats, and it is not thought these latter would bother the birds, preferring to live on the fish leavings and about the houses of the island fishermen. The rats were left on the island by the wreck of the old steamer Winfield Scott in 1849. At one time there were hordes of them, but they are getting scarce now. The quail put on the island would have a free run and would, it is thought, increase rapidly.

Killed Three Coyotes.—Mrs. George Pearce, who resides near Bloomfield, Sonoma county, brought three coyote skins to the County Clerk's office last Monday. The animals were killed by Mr. Pearce and his wife, who takes a deep interest in outdoor sport, assisted in the hunting. She left the Court-house with a smile in the afternoon jingling three \$5 gold pieces in her hand. The county allows a \$5 bounty on every coyote killed in the county.

TRADE NOTES.

Get One.

The Ithaca Gun Company of Ithaca, N. Y., has just issued a new and handsomely illustrated catalogue that is a gem in its way. The illustrations are good, and the catalogue being printed on fine calendered paper, the colors show up nicely. The sectional parts of the gun, to be seen on page three, show that the Ithaca as now built has three bolt fastenings, which make the gun very strong. Another illustration shows the firing pin, the hammer and the coil spring that operates the hammer when the gun is opened or the trigger pulled, and gives one a very correct idea of what he will get when he buys an Ithaca gun. These guns are made in all grades, from \$300 down to \$29, and the catalogue describes each gun fully, while the company guarantees every gun it puts in the hands of a sportsman. As this is the season of the year when many are thinking of purchasing a new gun for the fall shooting, it would perhaps be well for such people to send for one of these catalogues before placing their orders and see for themselves what kind of a gun the Ithaca Gun Company is building.

U. M. C. Victories.

When the last shot had been fired in the eighth Grand American Handicap blue-rock tournament at Chicago, June 18-21, Mr. J. J. Blanks of Tennessee, winner of the chief event and coveted honor of the tournament—the Grand American Handicap at 100 targets, prevailed over 436 actual contestants and won out after shooting a tie with two other shooters, he used U. M. C. shells and a Remington Auto-loading shotgun, scoring 96 out of 100 and 18 out of 20 in the tie shoot, all at 17 yards rise.

This was not all; the Preliminary Handicap was won by Mr. Geo. L. Lyon of North Carolina, 96 out of 100 at 19 yards rise with U. M. C. shells.

In the State Team event at 100 targets per man three out of five members of the winning Illinois team used U. M. C. shells.

In the Grand American Handicap there were winning shooters who used U. M. C. shells in the first, second, fourth, fifth, sixth and seventh monies, the big ends of the total purse of \$4,292. These were J. J. Blanks, 96 per cent; M. C. Bolton, 95 per cent; J. M. Hughes, 95 per cent; L. Willard, 93 per cent; M. Knussel, 93 per cent; W. D. Townsend, 92 per cent; J. A. Blunt, 92 per cent; Allen, 92 per cent; C. B. Adams, 91 per cent; B. Dunnill, 91 per cent; C. D. Plank, 91 per cent; G. S. McCarty, 90 per cent; J. T. Park, 90 per cent; J. T. Anthony, 90 per cent. No other averages, championships or honors can be compared with these wins—Eleven of the eighteen Grand American Handicaps have been won by U. M. C. shells. Does it pay to shoot them?

The Grand American Handicap Tournament.

The outcome of the big Grand American Handicap target tournament, held at Chicago, June 18th, 19th, 20th and 21st, was substantially the same as in 1906; that is, another practical demonstration of the overwhelming popularity and winning qualities of Winchester shotgun shells and Winchester repeating shotguns. Five out of the seven firsts is the record they made. The Amateur and Expert Championships (200 targets at 18 yards rise), conceded to be the most trying and conclusive tests of shooting skill and merit of shells and guns, were both decisive victories for Winchester shells and Winchester shotguns.

A word as to their wonderful popularity shown at this tournament and then for the records they made. The maximum number of contestants on any one day was 452. Of this number 196 (43 per cent) used Winchester shotgun shells and 158 (35 per cent) used Winchester shotguns. As there were five different brands of shells and innumerable makes of guns used at this tournament, the percentage of Winchester shells and Winchester shotguns is the strongest kind of proof of the oft-stated claim that they are the most popular among American shooters. Now as to the records they made:

Amateur Championship—First: Hugh M. Clark, shooting Winchester "Leader" shells, score 188 x 200. Second: C. M. Powers, shooting "Leader" shells, score 187. Third: J. B. Barto, shooting a Winchester "pump" gun and the "Leader" shells, score 186.

Professional, or Expert Championship—First: W. R. Crosby, shooting "Leader" shells, score 192 x 200. Second: Fred Gilbert, shooting the "Leader" shells, score 190. Third: J. R. Taylor, shooting a Winchester "pump" gun and the "Leader" shells, score 189.

Grand American Handicap—C. M. Powers, shooting "Leader" shells tied with two other contestants, score 96 x 100.

Preliminary Handicap—Won by Geo. L. Lyon, an amateur, shooting a Winchester "pump" gun, score 96 x 100 from 19 yards rise.

High expert average in this event was made by L. R. Barkley, shooting Winchester "Leader" shells and a Winchester "pump" gun, with the splendid score of 97 x 100 from 2y yards rise.

High general average for the entire tournament was captured by J. I. Taylor, shooting a Winchester shotgun and the "Leader" shells, with the grand total score of 470 out of 500 (94 per cent), thus it would seem that in a long pull Winchester merit tells.

ENGLISH HURDLING SYSTEM.

The English farmer has a system of grazing animals, particularly sheep, which is interesting to say the least; and as the English are the best sheep raisers in the world, any method that they pursue is worthy of our attention, writes A. O. McNair in *Farm and Ranch*.

Of course, much land is grazed in the ordinary way but when the English farmer wants to get a lot of feed from each acre of land and get it in a manner that will do the sheep the most good he "hurdles" his sheep upon some growing crop. To hurdle them is merely to put "hurdles" or temporary fences around them. They are confined to a given area until that is eaten, and then moved to new feed. The problem of drinking water under this system is really no problem at all. The English farmer is firm in the belief that sheep are best fed when they show no desire to drink water. In other words, they are hurdled on green succulent crops that have so much water in their composition that the sheep gets all the water it needs through the crop. A favorite crop to hurdle sheep on is turnips. The English climate is very favorable to the growth of turnips and the yield is very large. Being a bulky crop to handle it is much better to feed the turnips off with the sheep than to attempt to harvest them. Some other feed is given at the same time, particularly "cake," which means either flax seed cake or cotton seed cake.

One of the great considerations in this hurdling system is the matter of enriching the soil. The confinement of a flock of sheep to a small area until the feed on that area is consumed means that the droppings are exceedingly well distributed on the same area. So strong is this desire to enrich the land that in times when turnips are especially abundant or when a farmer has more turnips than his own sheep can consume he allows his neighbor's sheep to consume them free of charge in order that he may get the benefit of the manure. Sheep manure is richer than horse or cow manure and, in the natural order of things, is much better distributed.

The hurdles used to confine the sheep may be made of wood or may be rope or wire netting. The rope netting is much in use for this purpose. It is light and easily set up or taken down. Stakes have to be driven to attach the netting to and light pegs are driven at intervals to hold it close to the ground. Sheep handled in this way are very tame and are not "breachy."

In this country the hurdling system has never made much headway, probably because of the high price of labor and the labor involved in setting up and taking down the hurdles. Another reason lies in the fact that there have always been cheap pasture lands in this country and there has been no necessity for a more "intensive" method of grazing. Professor Thomas Shaw, however, at the Minnesota Experiment Station practiced hurdling sheep for several seasons and on land of inferior fertility he produced more than 500 pounds of live mutton per acre. The writer has seen even better results on a small area by grazing alfalfa within hurdles. Whether the hurdling system or any modification of it will ever take root on American soil time only will determine. Some people see, in the silo, something better than any system of grazing—something suited to an intensive system of stock farming, but ensilage while fairly popular for cattle is not so popular for other animals unless as a minor part of the ration.

In England they are, by intensive methods, enabled to keep a vast number of sheep in a small country. There is an average of one sheep to every two acres throughout the entire extent of England, Scotland and Wales which would be equivalent of a flock of 320 sheep on every "section" of land.

RED POLLED CATTLE.

The Red Poll is one of the newer breeds of cattle, and is gaining considerable popularity in the country. In many characteristics this breed resembles the Devons, but is not related to the little red cattle from

Southern England. It is believed that the "muley" cows, once quite numerous in the backwoods settlements of Pennsylvania and other Eastern States, and now found occasionally in the farming districts, are the descendants of the progenitors of the Red Polls. The first importation of the breed in its modern form was made by Gilbert F. Taber of Putnam county, N. Y., in 1873, and several additions of imported stock were made to this herd in later years.

The late Henry E. Alvord in his "Breeds of Dairy Cattle" says of the Red Polls: "The animals of this breed are about the same size as Devons, and, being of the same color and of the beef form, the resemblance is still greater. The absence of horns and the change thus caused in the shape of the head, which assumes a comparatively high and sharp crown, or poll, with a tuft of hair upon it, is the only noticeable distinction. The development of the milking parts has been better maintained in the Red Polls, so that at present their udders, teats, and milk veins show the better. In the matter of teats this may have been over done, as with the Polls these are often unduly large, puffy and conical. While red is the required color, it is permissible to have a white tip to the switch and some white upon the udder, although the latter is deemed undesirable. The Red Polled cattle are strong in constitution, hardy, good grazers, active in movement and quiet in disposition.

"In general appearance the animals of this breed are of the beef type—blocky, round, full, smooth and fine-boned. Their aptitude for making meat seems to be greater than for making milk. Their special friends claim them to be good at both, and press their merits strongly as the general farm cow.

"As dairy animals the Red Polls must be placed in the second class with the other breeds which aim to serve the dual purpose. They appear to give rather more milk than Devons on the average, but not quite so rich in quality. In England good herds average 5,000 to 5,500 pounds of milk annually per cow, and when small and selected occasionally rising to 7,000 pounds. One record is claimed of 7,744 pounds each for twenty-two cows. One record is published of a twelve-year-old cow giving 14,189 pounds of milk in a year."

The Red Polled Cattle Club of America was organized in 1883, and issued its first volume in 1887. The Year Book for 1907 is a large handsome volume containing the names of 653 breeders, and pedigrees of 1,274 bulls and 1,575 cows. Ohio has long been the center of the Red Polled cattle breeding interests, but the membership of the club is now widely distributed throughout the United States and Canada. There are sixteen breeders of Red Polls in New York State, and the number is increasing each year. P. G. Henderson, Central City, Ia., is president, and Harley A. Martin, Gotham, Wis., secretary of the club.

A grade Red Polled cow made a record for the year ending October 14, 1903, of 13,403.7 pounds milk, 549.1 pounds butter fat, equal to 640.6 pounds butter. The net profit returned by her for the period was \$34.9. She was placed on an official test by the Illinois Experiment Station on January 9, 1904. Thirteen days after calving and during the following seven days she produced 406.1 pounds milk, 17,566 pounds fat. The best day's record for fat was 2.68 pounds. P. G. Anderson's herd of twenty-two Red Polled cows was at Central City, Ia., averaged 270 pounds of butter in a year, and an Ohio herd made an average annual production of 355 pounds of butter. These are good yields and prove that a well selected herd of Red Polls can "make good" on the farm where a general purpose animal is desired.

Painting the roosts and the walls of the poultry house with one part crude carbolic acid and two parts kerosene once every six weeks will keep the worst case of mites ever known in subjection. The hay in the nests should be removed every week and the nest well dusted with any of the prepared insect powders.

FEEDING FOR EGGS.

A poultry farmer writes the North-western Agriculturist:

By observation as well as experience we obtain much information that assists us materially in our life work, whether upon the farm or in any other avocation. For many years past I have fed my pigs swill composed of shorts, milks, and water, with salt added, in troughs. The hens had access to them, and I observed them flocking around the troughs eating with avidity. So I concluded to give the matter a thorough test; realizing that in egg production, as well as in that of milk, the hens require feed having a large per cent of protein. Early last winter I commenced feeding them in their yards, the above mixture, adding more shorts; also fed wheat and oats. I fed them no corn, for they had access to it at all times. But I observed they would eat but little corn, when they could get something better. I will say in connection, they had access to coal screenings, also as the weather grew colder, I would occasionally mix a little red pepper in feed; and they would go around singing of mornings when the mercury was playing about the zero mark.

The result was very satisfactory, for we got eggs every day; many days from three to six dozen from ninety-five hens. I met a neighbor one morning in January and asked him how many eggs they were getting. "Well, sir," he said, "we haven't had an egg for over three months and have ninety as fine laying hens as there are in the country." I told him we had been selling eggs every week, frequently at twenty-five cents per dozen. "What do you do to your hens?" he asked. I gave him my plan, then I wanted to know what he fed his hens. He replied, "They have a corn crib and a corn pile to run in. And now and then we give them a little oats. My wife wanted to feed them wheat, but I objected."

Meeting him shortly afterwards he said, "Say, that plan of yours works fine. My wife sold fourteen dozen eggs last Saturday at twenty-two cents a dozen." I would say to those who have never adopted the above plan to try it and note results.

PAINT ON FARM BUILDINGS.

Whether it pays in dollars and cents or not to paint outbuildings, it does pay in appearance, says Wallace's Farmer. Outbuildings that are kept painted with any kind of paint, no matter how cheap, proclaim loudly that they are owned by a successful farmer; while it is hard to resist the inference in passing by on the roadway that unpainted buildings belong to a man who either has no taste for the beautiful or is not able to afford the paint.

Those who do not feel justified in using first-class paint on the cheaper sheds and outbuildings may find some of the cheap home-made paints satisfactory. Many farmers use mineral paints of various kinds. There are several kinds of paints in use in other countries where the conditions are more trying even than in America and which have the approval of their agricultural departments.

One is from the agricultural department of the Transvaal colony in South Africa, as follows:

"Stir into one gallon of milk about three pounds of Portland cement and add sufficient Venetian red powder or any other paint powder to impart a good color. The milk will hold the paint in suspension, but the cement, being very heavy, will sink to the bottom, so that it becomes necessary to keep the mixture well stirred with a paddle. This feature of the need of stirring is the only drawback to the paint, and as its efficiency depends upon administering a good coating of cement, it is not safe to leave its application to untrustworthy help. Six hours after painting, this paint will be as immovable and unaffected by water as month-old oil paint. The party giving this recipe claims that he has heard of buildings twenty years old painted in this manner in which the wood was well preserved. The effect of such a coating seems to be to petrify the surface of the wood. Whole milk is better than buttermilk

or swim-milk, as it contains more oil, and this is the constituent which sets the cement. If mixed with water instead of milk the wash rubs and soaks off readily. This cement-milk paint brushes on smoothly and easily—almost equal to genuine oil paint—is cheap and easily made."

The agricultural department of Queensland, Australia, has published several recipes for whitewash, any one of which could be used by our readers. We would be glad if our subscribers would make tests of one or the other of these and give the results in this paper.

"No. 1. Twenty pounds of lime (un-slaked), three pounds common salt, one-half pound alum. Slake the lime with boiling water until the consistency of the wash is similar to thin cream. To increase its antiseptic properties add one-half a pint of crude carbolic acid to each bucketful of wash.

"No. 2. To half a bucket of lime add two handfuls of common salt and two handfuls of tallow, or, better still, soft soap, at the rate of two pounds to thirty gallons of wash. Slake slowly, stirring all the time. This quantity will make two bucketfuls of wash, which possesses the properties of being very adhesive and unaffected by rain.

"No. 3. Slake lime with water and add sufficient skim-milk to bring to the thickness of thin cream. To each gallon add one ounce of salt and two ounces brown sugar dissolved in water.

"The germicidal values of Nos. 2 and 3 can be increased by the addition of one-fourth pound of chloride of lime to every thirty gallons of wash. Before applying the wash to wooden, metal, or stone structures, precautions should be adopted to clean the surface of foreign matter, thereby increasing the benefits of the solution. Care should also be taken to bring all crevices under the influences of the antiseptic."

AMERICAN MEATS IN ENGLAND.

L. A. Lathrop, United States Consul at Bristol, England, says in his annual report:

A number of inquiries have come during the year from American packers of meats and provisions as to local conditions. The reply until lately invariably has been to the effect that any general campaign of advertising was premature. There have been signs of late, however, of re-establishment of public confidence in these products. Local newspapers have commented favorably on contracts made by British public authorities with Chicago packers. From time to time, also, paragraphs have appeared about the effective system of government inspection now established in our packing houses. It is generally allowed throughout England that our meat products meet "felt want," and I think 1907 will witness a large increase in consumption. Bristol and its district being far less thickly populated than the north, and being surrounded by agricultural and grazing counties, is not the most important English market for our packers. It may be expected, however, to follow the lead of the manufacturing districts in its consumption of canned meats.

The simple and lower-priced products, the ones which are the valuable adjuncts to the workman's dietary, are, I think, the things which it would pay to push with energy. The luxuries and delicacies—the additions to the table of the more well-to-do classes—must surmount prejudice of more lasting character.

Our canned vegetables, with the exception perhaps of tomatoes, are practically unknown here, though one or two stores in Bristol and Bath sell the canned corn. The products of one American firm are, however, somewhat known, owing to their spirited policy, and to the energy and capital which they have invested in bringing their goods to the notice of consumers throughout the country.

The milling capacity of England has been increased during the year by four large mills at Tidewater, two of which are on the Bristol Channel; thus the inevitable progress goes on, of lessening the import of flour, of increasing the import of wheat.

SOME FACTS ABOUT GUINEAS.

Guinea fowls, sometimes called guinea keets, are probably natives of the west coast of Africa. In Jamaica, in some of the lesser Antilles, and also in the Cape Verde Islands, they have gone back to their wild state and are hunted in their season as game birds. Large flocks are sometimes kept in game preserves in England, where they are also hunted as game birds. There are several varieties of wild birds known as guinea fowl in Africa, among the most striking the vulturine royal guinea, which is noted for its beautiful plumage, and is seldom raised in captivity. European writers and epicures consider the eggs of the guinea hen a great delicacy, with rich flavor, resembling that of the much-prized plovers' eggs. The delicate flavor is especially noticeable in the yolk, and the eggs are regarded by many as very delicious when eaten cold with aspic jelly or other relish.

With Southern cooks the belief is quite generally held that guinea eggs are superior for cake making and similar purposes, since the white is thought to be lighter when whipped than that of hens' eggs.

COLTS AND BROODMARES FOR SALE.

Miss Horgan, winner of the Horgan Futurity Stake for yearlings last year, by Sidmoor 2:17½, out of a producing dam.

Yearlings, two and three-year-olds by Sidmoor out of producing dams, and broodmares that are producers and stunted to Sidmoor 2:17½. These mares are by Alcona, Dexter Prince and other good sires. These horses can be seen at the Concord race track. For further information address JOHN OTT or ED. WALKER, Concord, Cal.

FOR SALE AT PLEASANTON.

Five-year-old pacing Stallion. Can step a mile in 2:13 or better, and a quarter in 30 seconds.
Sired by Chas. Derby, first dam Monaco by McKinney, second dam by Director, third dam by Hawthorne, fourth dam by Black Hawk. This horse is sound, gentle, and can be seen any time this month at J. R. Albertson's stable at the Pleasanton race track. A. G. SHELPEE, 227 W. Fremont St., Stockton, Cal.

FOR SALE.

The Handsome Standard Bay Gelding, Hondnas.
Nine years old, by Prince Nutwood 2:11½, dam by Strathway. Stands 16½ hands and weighs about 1225 pounds. Has worked miles in 2:24, quarters in 33 seconds with six weeks' training. He has never been trained since, but was used on the roads at Palo Alto. He is good gaited, wears no boots, does not pull a pound, absolutely sound, afraid of nothing, a lady can drive him with perfect safety. W. H. Williams had him in training and says that he looks like a 2:10 trotter. He is a remarkably good individual in every respect and a high class roadster and matinee horse.
Will also sell a good Studebaker buggy and a McKerron harness. The above will be sold on account of the owner leaving for Europe. Horse can be seen at Hans Frelson's Stables, Twenty-fourth Avenue, near the Casino. For further particulars address this office.

POULTRY NOTES.

A bone cutter costs money, but it helps to make more money from the flock.

A good insecticide can be made by putting a pint of kerosene in a gallon of whitewash.

One good breed of chickens on a farm is worth more than ten different breeds.

Pulverized charcoal should be set where the fowls can partake of it when desired. Besides brightening the plumage it is a conditioner that has few equals.

A spoonful of kerosene should be always kept in the drinking water at this time of the year. Many diseases are held in check in this way. The fowl gets a little of the oil every time it takes a drink.

"SAVE THE HORSE" SPAVIN CURE
Registered U. S. Patent Office

Makes a Tendon Like a Rod of Steel

Makes money winners out of cripples; age of horse or age of lameness makes no difference. It will strengthen, repair and cure any broken down, weak or injured condition of the tendon; it infuses strength and acts as a permanent bandage to the parts.

It is the only remedy of its kind ever conceived, and the only one so positive and successful as to warrant selling under a signed guarantee to refund money if it fails.

"SAVE THE HORSE" Permanently Cures Spavin, Ringbone (except Low), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse works as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy, booklet and letters on every kind of lameness.

AUCTION SALE

AT CHASE'S PAVILION

Monday Evening, Aug. 12, '07

SEVENTY HEAD OF OAKWOOD PARK STOCK FARM Standard Bred Horses, three, four and five years old, Stallions, Geldings and Fillies, by Charles Derby 2:20, Steinway 2:25¾, Owyhee 2:11, Searchlight 2:03¾, and Stam B. 2:11¼, out of the best producing mares on the farm.

Here are speed prospects that can show. They are bred in the purple and will be given light work right up to the sale. The good brood mares also go at this sale, and several fancy carriage pairs and single drivers, suitable for pleasure and business, by a Cleveland Bay Stallion, out of standard mares. These horses will be at our stables August 8th. We invite you to look them over before the sale. Catalogues mailed on application.

The Championship of the United States

PROFESSIONAL AGAINST PROFESSIONAL
 THE BEST PITTED AGAINST THE BEST

All contestants standing at the long range of 18 yds. This great race for the Championship of the United States, held at Chicago during the week of June 16, 1907, was won by W. R. Crosby, shooting the PARKER GUN, with a score of 192 out of 200 targets shot at—96 per cent.

THE PARKER GUN

The next highest score, 190 out of 200 targets shot at—95 per cent, in this same great championship event, was made by Fred Gilbert, also using the PARKER GUN.

This greatest contest of professionals shows positively the pattern and center of the gun. The PARKER GUN shoots where you look. The proof is evident. Surely the OLD RELIABLE, when put to a severe test, proves what we have always claimed—that the PARKER GUN outshoots them all.

Send for Catalogue.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c, 50c and \$1.00

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

DID THAT CURB cause Highball to break and act badly at Libertyville or was the curb the result of his jumping and plunging in scoring, or trotting so fast to make up his lost distance? Highball may be the greatest trotter on earth, but the report of his Libertyville defeat reminds us of the late Senator Stanford's first great trotter, Occident 2:16 $\frac{3}{4}$, that held the champion trotting record in 1873. Occident had wonderful speed for his time and could show it in a race, but not so well as in his work. His record was made against time and he was never able to equal it in any of his contests. When another horse had speed enough to carry him a quarter at top speed, the bees in his bonnet would buzz and he would indulge in the wildest of breaks, his driver being compelled to pull him almost to a walk to get him settled. In the famous race between Occident, Blackbird and Sam Purdy at Sacramento in 1872 or 1873, Occident would make those disastrous breaks in the first quarter, and be a distance out, but after recovering his stride would astonish the natives with his speed in an endeavor to reach the flying leaders. At the end of the mile Tennant could urge him to the utmost and he would not break, as the great effort had quieted the "bees," but he failed to win the race, which went to Sam Purdy, a slower but a steadier horse. Highball had the reputation of having been a bad scorer when Jones purchased him, but it was thought Geers had cured those faults, and in his first race his manners seemed perfect. They scored down very fast in the next race a few times and it may have been that Highball's leg was ailing then, but there is a possibility that the trouble was in his head and that the curb was an effect instead of a cause. This is written before the M. and M. has been raced, and that stake may put Highball back on the pinnacle he occupied before the Libertyville race on the 17th inst. During all her training in California Sonoma Girl never showed any symptoms of nervousness or irritability, and as she possessed the faculty of scoring at faster than a two-minute clip and getting up to this speed in a few strides, if in condition she can make almost any trotter dizzy that is inclined to be so when out-trotted.

THE FIRST CALIFORNIA BRED TROTTER to win an M. and M. Stake was the Guy Wilkes mare Siva, driven by John Goldsmith. She won the stake of 1893, which was the fifth since its inauguration in 1889. There were twelve starters in the event that year, Siva winning in three straight heats and taking her present record of 2:13 $\frac{3}{4}$ in the race. Directum Kelly, driven by John Kelly, was the next California bred trotter to win this great classic, which he did in 1898, five years later. There were sixteen starters that year and five heats were trotted, the fastest in 2:11 $\frac{1}{4}$. In 1901 the Palo Alto bred mare Eleata, driven by Marsh, won the race in three heats from a field of fourteen others, and set the record of the stake at 2:08 $\frac{3}{4}$. Stanley Dillon was the next California bred horse to get first money in the big event, beating eleven others in three straight heats, the fastest of which was 2:11 $\frac{1}{4}$. Stanley Dillon was driven by Geers in this race and afterwards trotted to a record of 2:07 $\frac{3}{4}$. Coming as it does, the first large trotting stake of the year and being for horses of the 2:24 class, it has never but once had less than ten starters, and but four times out of eighteen renewals has there been less than twelve horses to score for the word in the first heat. No harness race of the year is as much talked about and speculated on as this one, and it is probably the only trotting race on which a book is made months before its occurrence. There is more search

through the country for a horse that is considered good enough to enter and train for the M. and M. than for any other event offered harness horses. It is and has been for years the opening classic of the annual trotting season.

And now the last and greatest of all the M. and M. Stakes has been won by Sonoma Girl, who looks to be the greatest trotter California has yet produced, as many good judges are of the opinion that were she specially prepared for a mile against time the 2:02 of Sweet Marie would be beaten.

CLEANER RACING is held nowhere in the United States than is seen on the California Circuit. There is less laying up of heats, and a closer observance of the rules than is found in most sections of the country. One reason is that there is comparatively little betting done on the California tracks. Since a six-months season of running racing was inaugurated here in California some thirteen or fourteen years ago, the majority of the sporting fraternity has forsaken the trotting game and devotes its time exclusively to the runners. As soon as the season ends at Oakland in May, the sports that have the price leave for the East or go north to Seattle, while the pikers buy a commutation ferry ticket and make daily visits to the pool rooms at Sausalito, where they play "form" and "tips" until the season opens again at Oakland in November. The trotting game has become too slow for the gamblers, and the result is that harness racing was never so clean or so free from suspicion as it is now in California. Laying up heats is seldom attempted and there are very few cases where drivers, owners or any one else connected with the sport attempt to violate any of the rules. Although nearly all the harness races in California are on the old three in five plan, they are seldom prolonged to more than five heats and the majority end with a less number. At the Breeders' meeting of 1905 there were but two races that required five heats to decide and none were longer. Last year there were three five-heat races out of a program of fourteen events. There is no bookmaking at the principal harness meetings in California, all the wagering being done through auction pools and mutuels.

A SUCCESSFUL MEETING is in progress at Salinas this week and will close to-day, when the horses will move to Pleasanton, where a grand program of harness races will begin on Wednesday next. The entries for the Pleasanton meeting were much more numerous than for the Salinas races, consequently the winners at the latter place will meet new horses when they reach the famous winter training track at the "horse center." The Pleasanton Matinee Club of which Mr. Lee Wells is president and Dr. L. A. Colestock secretary, has been untiring in its efforts to have everything in readiness for the horsemen and the public who are expected to attend in large numbers. There will be accommodations for all, many of the private residences having been turned into rooming houses temporarily, and the trains in and out of the town are so arranged that San Francisco and Oakland people can go up in the morning, attend the races and return on the train leaving Pleasanton at 5:35 in the afternoon, by which time the racing program will generally be finished. There should be a large crowd in attendance every day. The racing opens on Wednesday.

THE PUBLIC in general and horsemen in particular are interested in harness racing wherever it occurs, whether it is regular or matinee racing. We would esteem it a great favor if the managers of meetings where trotting and pacing events are held would send us summaries of the races. Small meetings are held all over the coast which the local papers often overlook, and if they do report only give the winners and often omit the time. It is impossible for any journal to have a representative at all these meetings, consequently we hope managers will see that we are sent a correct official summary of each event. These reports will help to advertise the track and the horses and will be beneficial to all concerned and cost nothing but a little time and labor.

THE MINNESOTA LAW in regard to giving financial aid to county fairs is a good one. It authorizes Boards of Supervisors of each county to appropriate a sum for this purpose each year, and provides that the money shall go for premiums on exhibits. Cali-

fornia should have such a law and it should not be difficult to secure its passage in the next Legislature. Then if the people of any county desired to aid a local fair, the money could be appropriated from the county treasury.

THE NEW RULES of the American Trotting Association, which move the distance flag up to sixty yards from the finish and provide that a horse need not be driven out at the finish, is working pretty well on the tracks in membership with this association that have already held meetings in the East. It affords a horse that is interfered with or gets off badly a chance to save himself, while the bad breakers and poor race horses who cannot finish any closer get what they deserve.

BONNIE DIRECT 2:05 $\frac{1}{4}$ is the only California bred horse that ever won the Chamber of Commerce Stake at Detroit. Bonnie Direct accomplished this feat in 1900, and was driven in the race by McHenry. Fifteen starters faced the starter that year and the race lasted for six heats, of which one in 2:10 $\frac{1}{2}$ was the fastest.

THE LISTS OF ENTRIES of all the meetings on the California Circuit from Salinas to Sacramento, inclusive, have been compiled and printed in a neat little book for gratuitous distribution. It is published by the Breeder and Sportsman.

GREAT IS SONOMA GIRL.

First Trotting Classic of Year Goes to California Mare. Her Owner Wins Thousands.

Detroit, Mich., July 25.—Argument that was started when Highball and Sonoma Girl met at Libertyville for the first time July 4th, and continued at the same track later, was carried to its completion today at Grosse Point, when the pair met in the \$10,000 M. and M. There were some other horses in the event, of course, a field of ten starting, but those eight did not figure heavily, the race from the first being between the California candidate and Geers' entry.

Sonoma Girl won so impressively that there was never any doubt that she was the best horse in the race. Highball took the first heat, thanks largely to advantage of racing luck and a very fine bit of teaming by Geers. That heat was negotiated in 2:07 $\frac{1}{2}$, which smashed the record for the M. and M. set by Eleata in 1901 at 2:08 $\frac{3}{4}$.

Sonoma Girl came right back at them in the second and set another new mark for the event, one that is likely to stand for a time. She turned the mile in 2:06 $\frac{1}{4}$, the same figure that Highball made at Libertyville. That track is faster than Grosse Point, and Grosse Point, because of the rain during the week, is not up to its usual speed yet, all of which adds to the merit of Sonoma Girl's performance. The California mare was favorite, selling at \$100 to \$50 for Highball. Summaries:

2:08 class pace, purse \$1,500—

Kruger, ch g by Mercury-Mary C. (A. McDonald)	1	1	1
John A., ch h (Geers)	2	2	2
Judex, b g (McKinney)	3	3	5
Wilson Addition, b h (Cox)	4	4	3
Billy Cole, b g (E. Dickerson)	4	5	4
Bystander, b g (Hall)	5	6	6

Time—2:05 $\frac{3}{4}$, 2:06 $\frac{1}{4}$, 2:06 $\frac{3}{4}$.

Merchants and Manufacturers' Stake, 2:24 trot, purse \$10,000—

Sonoma Girl, br m by Lynwood W. Maud Fowler (Springer)	2	1	1
Highball, b g by Dr. Hooker (Geers)	1	2	5
Beatrice Bellini, blk m (J. Dickerson)	3	3	2
Marjorie, gr m (Cox)	7	4	3
Margaret O., b m (Davis)	9	8	4
Sadie Fogg, blk m (A. McDonald)	4	6	dr
Kenneth Mc., br h (Nuckols)	6	5	dr
Claty Latus, ch m (Lessell)	5	9	dr
Tolling Chimes, b g (White)	8	7	dr
Johnny, b g (Johnson)	10		dr

Time—2:07 $\frac{1}{2}$, 2:06 $\frac{1}{4}$, 2:09 $\frac{1}{4}$.

2:15 pace, purse \$1,500—

Judge Wilson, b g by Gigantic (Spencer) ..	1	1	1
Byron Kay, b g (Geers)	2	2	4
Whitelock, gr g (Evans and Nuckols)	5	4	2
Nellie, ch m (J. Dickerson)	8	3	3

Cold Steel, Kato, Baronmore, Castuada, Village Boy, Old Maid, Alice Pointer, Moko Tuber, Miss Abdell, Glidewood and Gentry Star started.

Time—2:07 $\frac{1}{4}$, 2:08 $\frac{3}{4}$, 2:09 $\frac{3}{4}$.

2:10 trot, purse \$1,500—

Watson, ch g by Hinder Wilkes (Loomis) ..	4	1	2
Lady Resolute, b m by Allerton (Lessell) ..	3	4	1
Emboy, b g by Elire (W. McDonald)	1	3	4
Bonnie Russell, b h (Curry)	2	2	3

Time—2:08 $\frac{3}{4}$, 2:09 $\frac{1}{4}$, 2:11 $\frac{1}{2}$.

Lou Dillon, Sweet Marie and Souoma Girl three of a kind—bald to beat.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Salinas	July 24-27
Pleasanton	July 31-August 3
Breeders' Association (Santa Rosa).....	August 14-17
Petaluma	August 26-31
Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12
Santa Maria.....	October 22-26

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair) ..	September 23-28
Spokane, Wash. (Inter-State Fair)....	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

Pleasanton races open next Wednesday.

Good racing every day and fast time is assured.

The Pleasanton Matinee Club and the citizens of the town generally have made every arrangement to entertain visitors royally.

The opening day at Pleasanton will see some hot contests. The 2:08 pace has eight of the fastest pacers on the Coast entered, the 2:40 trot has a field of a dozen good green trotters, while the three-year-old pace will bring out six grand three-year-olds. The great Aerolite 2:15½ will probably be the favorite in this event, but Albert Direda will make him pace to win.

Inflammation of the bowels was the cause of Derbertha's death, according to an Eastern exchange, which states that soon after Dr. Boucher had worked her a mile in 2:07¼ she was taken sick and died within a week.

Dad Trefry's McKinney stallion Kenneth C. is all right again after a slight illness and can trot three heats in 2:15 or better.

McKinney will get several additions to his list of standard performers in California this year.

Col. J. C. Kirkpatrick's McKinney pacer Charley D., that James Thompson is training, is one of the best pacers in training at Pleasanton. He has been miles around 2:12, but Thompson has never called upon him for one as fast as he could show.

La Siesta Farm's pacer Friday 2:11¼, that raced last year on a curby hock that made him quite lame, is sound and all right this year and looks as if three heats in 2:10 would not stop him.

Daedalion will probably not start this year on the California Circuit. His first entry is at Woodland, but James Thompson, his trainer, does not believe he will start him there.

Athasham 2:12, according to later reports, did not reduce his record at Libertyville. His heats were in 2:12½, 2:12½ and 2:13. He could have gone faster but didn't have to.

Can any of our readers furnish us the breeding of a stallion called Archer, by Abbottsford Jr? Any information in regard to where Archer was bred and who bred him will be thankfully received. We desire to get the name and breeding of Archer's dam.

A mile in 2:06½, with the last half in 1:00 and the last quarter in 29 seconds, is the official time for Sonoma Girl in her Libertyville race. No other trotter ever equaled the time of that last half and quarter in a race. Sonoma Girl, when right, has a license to beat even Sweet Marie after such a showing.

It is very appropriate that the Pacific Coast Trotting Horse Breeders' Association should hold its meeting at Santa Rosa. Both Lou Dillon and Sonoma Girl were bred and reared there.

J. J. Rorhpuro, the well known artist of this city, reports that his mare Kate by a son of Boots' Kingston, has a fine filly by Kinney Lou 2:07¼, foaled about the first of June, that is a seal brown like her sire, and a fine large filly and a natural trotter. At the side of her dam in the pasture she has shown nothing but a clear trotting gait.

Gateway 2:12¼ by Strathway, the California trotter which Henry Helman had over East several years ago, is now owned by E. S. Shepard of Rhine-lander, Wis. He is in splendid condition and will be raced this year.

The railroad company has fixed a round-trip rate of a fare and a third from San Francisco, Stockton and San Jose to Pleasanton during the race meeting at the last named place next week. Tickets will be on sale from July 31st to August 3d inclusive, and will be limited for return to August 4th.

The pretty town of Auburn, located in the foothills of the Sierra Nevadas, about forty miles from Sacramento, is to have a race track and fair grounds. J. A. Filcher, now secretary of the California State Agricultural Society, formerly resided in Auburn, where he published a newspaper, and is now the sole survivor of a board of trustees, in whom the title to the Auburn race track and fair grounds is vested, the property having been deeded to the board in trust for the people of Auburn. Mr. Filcher, as the surviving trustee, has now executed a lease of the property for five years to Fred E. Brye, D. W. Lubeck, Chas. Keena and John Fulweiler, who will improve the same, enclose the ground with fences and erect sheds and barns that fairs, race meetings and shooting tournaments may be held. At least \$5,000 will be spent in these improvements.

Horsemen have been looking for some time for a three-year-old pacer to reduce the record of 2:05½, made by the Oakwood Park Stock Farm's Klatawah, brother to Chas. Derby, nine years ago at Louisville, Kentucky, when he started in a field of aged and tried campaigners, and led them to the wire the first heat in 2:05½, the famous Miss Logan 2:06¼ and others being behind him. Aerolite 2:15½, winner of last year's Breeders' Futurity for two-year-old pacers, is looked upon as the most likely three-year-old in California to do the trick of equaling or lowering Klatawah's record. He is a big, strong fellow and quarters in 30 seconds seem play for him. He is owned by James W. Marshall of Dixon, Cal., and is trained by Fred Chadbourne of Pleasanton.

Vance Nuckols is reported to have a great three-year-old pacing filly in Betty Brent, a daughter of Wiggins, that has already paced a half for him in 1:01½.

Prince Direct 2:07, will be seen at some of the half-mile track meetings in Ohio and Indiana in the free-for-all paces.

Twenty head of valuable horses, owned by the E. Clemens Horst Company, have died near Tehama within the last three weeks because they cannot shut their mouths. They virtually starved to death. Veterinarians say the disease is something entirely new. The first symptom is that the horses go around with their mouths open. They cannot close their jaws or swallow food and drink. Otherwise they are apparently well, but at the end of ten days or two weeks they die from starvation. It is strange, however, that only yearlings and two-year-olds are the animals that are stricken. Colts and older horses escape. The only diseased animal that has recovered was an old mare which had only a light attack. The Horst Company estimates its loss at \$2,000. Twenty horses out of a herd of 100 have succumbed and no relief has been found. Fortunately the malady is not spreading to adjacent farms.

Fred H. Chase & Co. have been awarded the pool selling privilege for the Pleasanton meeting.

There is quite a neat sum to be divided between the starters in this year's Breeders' Futurity that are also paid up on in the Crowley Stake. Two races in one will make this stake a very interesting one.

Catalogues are out for the great sale of trotting and pacing horses from Oakwood Park Stock Farm, to be held at the sales pavilion of Fred H. Chase & Co., 478 Valencia street, on Monday evening, August 12th. There are sixty-eight head of horses catalogued, three, four and five year olds, and all well bred. Some of them should sell for high prices on their breeding alone, for instance, the five-year-old Bowye by Chas. Derby, out of Bertha by Alcantara, therefore an own sister to Don Derby 2:04¼, Derbertha 2:07¼, Diabolo 2:09¼, etc. This filly is not large but is very fast and with little handling has paced a quarter in 32 seconds. There are many other royally bred ones, some young colts well enough bred to head a stock farm. Send to Fred H. Chase & Co. right away for a catalogue of these horses.

Alfred G. Vanderbilt has accomplished something that no other American amateur horseman has ever before done. He has sold to King Edward of England a pair of prize-winning, high-stepping American bred coach horses, 16.2 hands high, that were bred and raised by George D. King, Springboro, Pa., and bought from his by Mr. Vanderbilt about one year ago.

The New England trainer, Ed. Bither, has Mack Mack 2:08 in great shape. The son of McKinney can equal his record right now. A mile in 2:10½ to wagon was nothing more than a jog for him when worked that way a few days ago, says an Eastern exchange.

Mr. S. B. Wright of Santa Rosa, who bred Sonoma Girl, has a yearling by the same sire, Lynwood W., and out of Maud Patchen, that he says is the best colt he ever raised on the farm. This yearling is certainly a big fine fellow with a nice way of going, and as much good looks as anybody's colt.

The lameness with which Sweet Marie was afflicted on the Fourth of July has disappeared, that is, the mare walks and trots sound, but there is still a slight swelling which is being reduced, says Western Horseman. A consultation of veterinary surgeons was held and they agreed that the chances were all in favor of the swelling entirely disappearing, and that she will soon be as sound as ever. The lameness was probably caused by a slight bruise, caused in shipping, and followed by a slight cold which, of course, settled in the afflicted part. That it will be of only a temporary nature is the hope of all. The mare has more brush than ever and the opinion was quite generally expressed by all who saw her perform that she would establish a new record for trotters without a runner in front.

A full sister to that very last trotter, Dr. Hammond 2:11¼, will be sold August 12th with the Oakwood Park consignment. She is but three years old, is good gaited and a nice one.

The job of coachman has not yet passed out of existence in Chicago. According to Bit and Spur the Coachman's Benevolent Association has not an idle member in its ranks of 200, and only six of them have been converted over into drivers of autos. Recent applications to the association's employment bureau for six coachman and three second men could not be filled, as all members were employed.

A commendable effort is now being made to hold a big county fair in connection with the race meeting at Bakersfield during the week ending Oct. 12th.

The name of the trotting mare Lady Thistle 2:16¼, recently purchased for the Crabtree stable, has been changed to Lotta, in honor of her owner.

The Santa Maria Racing Association has decided to hold its regular fall race meeting, commencing October 22d and lasting five days. Purses will soon be announced.

The dead sire Adbell 2:23, holder of the world's champion yearling record, undoubtedly would have proven a great sire had he lived. Three of his get have already obtained records so far this season.

John M. Davidson of Xenia, O., who bought Major Delmar, Jr., the only foal sired by Major Delmar 1:59¼, before he was unsexed, last spring, says that horse is doing well in the stud at Xenia and is getting a good class of mares. The horse is also being worked and is showing so well that Mr. Davidson is confident he will be able to take a creditable record in the near future.

A fast green pacing mare by Zombro, that has been in the stable of the New England trainer Ed. Bither all the spring, has been shipped west for a campaign over the half-mile tracks. This mare could beat 2:10 before leaving Readville.

The gallant old pacer, Princeaway 2:11¼ by Steinway, new record made over Belmont Park, Philadelphia, two weeks ago last Wednesday, comes pretty close to being a world's record for a seventeen-year-old baby. He is owned and driven by R. L. Smith, son of President Alan Wood Smith of the Clearfield, Pa., Trotting Association. Princeaway's dam is Princess by Administrator and she is also the dam of Derby Princess 2:08½, Princess Derby 2:13¼, and Neva, all trotters.

Grace Bond 2:09¼ picked up a nail a few days ago and the injury will keep her out of her earlier engagements. The one-time futurity winner was in fine form up to the date of the accident, giving every indication of fulfilling the promise of her three-year-old form.

The first foal by Kinney Lou 2:07¼ to be born east of the Rocky Mountains put in its appearance recently at the Maywood Stock Farm. The mother of this youngster is Ellis M., by Cupid 2:18, son of Sidney, dam Countess by McKinney; second dam Miss Valensin (dam of Zarina 2:13¼, and Dreyfus 2:17¼), by Valensin 2:23. Doble drove Ellis M. a mile in 2:13 and the last eighth in 13½ seconds, and considered her a 2:05 pacer. He bred her to Kinney Lou and consigned her to the last Indianapolis sale, where she was purchased by August Uihlein of Milwaukee, Wis., who sent her to the Maywood Farm to be bred to Sidney Dillon.

A splendid three-year-old colt is Lord Dillon, owned by that popular veterinarian, Dr. J. J. Summerfield of Santa Rosa. Lord Dillon is properly named, as he is related to the royal families, his sire being Sidney Dillon, and his dam Rohlet 2:12, dam of Bonalet 2:09¼, etc., by Robin, grandson of Director, second dam Eveline, dam of five in the list, and granddam of Sonoma Girl, by Nutwood. Lord Dillon is a good looking and will not only trot fast but be a sire if given the opportunity!

Visitors at the Breeders' meeting at Santa Rosa next month will have an opportunity of seeing Wayland W. 2:12½, sire of Bolivar 2:00¼, the fastest pacer ever bred in California. Wayland W. is kept at Hockings Stable, and W. C. Helman, his owner, is always ready to show him to visitors. The horse has made a good season and is in fine shape. He is a grand looking stallion and his popularity with breeders is deserved.

The fired-and-histered on-every-leg trotter, Dr. Frasse 2:11½, is a wonder. He finished third both heats in the race won by Highball at Libertyville on the Fourth of July and they say trotted in 2:10 both times. July 18th he was a starter in the 2:12 trot at Aurora, Illinois, won the first two heats and was second in the next three won by Eleanor B. The time was from 2:16½ to 2:13¾, pretty fast for a half mile track.

The morning after Sonoma Girl beat Highball at Libertyville, the latter's caretaker found that the gelding had developed a curb. The leg was treated with liniments and during the afternoon Highball jogged sound on it.

Judging by the summaries of the races thus far reported from the Great Western and Grand Circuit, laying up heats is a pretty common practice. A printed summary, with no other information, is not to be depended upon in this matter however, for there may be good reasons why a horse finishes ninth in 2:07½ and then wins in 2:06¼. There is no doubt, however, but many a heat is laid up by the leading drivers on the Grand Circuit, when they think their chances to win the race are bettered by it.

Ed. R. Smith of Los Angeles is doing the starting at the Salinas meeting this week.

The opening day of the Breeders' meeting at Santa Rosa will have a rattling good program. The 2:14 trot with twelve of the best trotters in the State entered, the \$2000 California Stake for 2:24 class trotters, and the 2:12 pace with thirteen entries, will furnish a program that will be worth seeing. It is the best program for an opening day the association has ever had.

Since the Stockton Driving Club secured the use of the track there and put it in shape, speeding over it has become very popular with horse owners. Owing to the climate of Stockton being very warm during the middle of the day, speeding does not commence until six o'clock p. m. and continues until dark. Rivalry is very keen and quite a large crowd gathers each evening to enjoy the sport. Mrs. B. J. Pope, a lady driver, owns a trotter that has beaten several of the best trotters owned in the club. All sorts of rigs are used, from the latest model speed cart to the old fashioned buggy. The club's membership is increasing daily.

Dextermont 2:20¼ by Dexter Prince, the trotting gelding that showed such high-class form at Rockport, O., last fall and was well entered down the Grand Circuit, has gone wrong and is out of training.

Chas. W. Winter of Alhambra, Cal., has put his handsome stallion, Andy McKinney, in training again and hopes to give him a fast mark this fall. Mr. Winter has a fifteen months old colt by Direcho, dam a full sister to Andy McKinney, that is a candidate for the Occident Stake of 1909. This colt has had two months work and trotted a quarter in 45 seconds, a pretty good starter for a youngster of that age.

Highfly and Miss Idaho worked a mile in 2:09¼ at Salinas last week and finished nose and nose.

Trains for Pleasanton leave the foot of Market street each morning at 7:40 and 9:00 o'clock. Returning trains leave Pleasanton at 2:15 and 5:35 in the afternoon.

A dispatch from Los Angeles, dated July 19th, states: Ascot Park was given a knockout blow today, when Judge Houser of the Superior Court confirmed the legality of the "shoe string" strip annexation to the city. Ascot is in this strip, and the racing people contested in the hope of being left to their own devices outside the municipal limits, but it is understood they will accept the decision as final. As the City Council took a firm stand against pool and liquor selling, and, as racing could not be made profitable or even self supporting without them, it is not expected another meeting will be held. The grounds of contest of annexation of the twenty-mile strip were held by the Court to be utterly insufficient to constitute basis of action.

A Dodge City, Kansas, paper says: "Rev. J. W. Thompson, who has been pastor of the Presbyterian church at Dodge City for several years, and who is one of the best known ministers in that church in Kansas, will retire from the ministry and will manage a Southwest department for Spirit of the West, a horseman's paper published at Des Moines, Iowa. Rev. Thompson's work in the ministry extends over many years, and a great part of the time has been in central and western Kansas. He is a strong man, and a man of high education, and, by his retirement, the ministry loses one of its best workers. For some years he has written for the horse journals, being always a lover of fine bred driving horses, and he has become one of the leading authorities in this country. He has owned a number of exceptionally fine standard breeds that were entitled to drive with the best of them, but on account of his calling he has never allowed them to claim their place in the racing records. Spirit of the West has secured a man who will add weight to the publication, and whose services will be valuable, both to the publication and its readers."

HOW SONOMA GIRL BEAT HIGHBALL.

The telegraphic reports of the Libertyville meeting last week were very meager and many of the incidents of interest to California horsemen were overlooked. For instance, the name of Charley Belden as a starter in the \$1000 purse for 2:08 trotters was omitted entirely, although he was a contender and won third money. The dispatches gave Turley, the Geers entry, credit for being third, but fourth money was his share. Early Alice took the race in straight heats in 2:10½, 2:10½ and 2:10, the chestnut gelding being 2-2-4, and Charley Belden 4-3-2 in the summary. This is Belden's first start for 1907, and as he was second in the third and fastest heat he trotted a very good race for the first time out. Early Alice had more speed than any of the others displayed, as after making a break going away in the second heat, she trotted around all the others when the time came and finished all alone.

The defeat of Highball by Sonoma Girl furnished several sensational incidents. Besides breaking the world's record for the fastest heat ever trotted by a green mare, and the fastest three heats ever trotted by any green horse, Sonoma Girl also trotted the fastest quarter and the fastest half ever trotted in a race, doing the longer distance one heat in one minute flat, and a quarter in 29 seconds, and did this with the most perfect behavior and action. This is part of the official record of the race. Highball trotted the last half of the first heat in 59 seconds, and in the third heat he trotted from the first quarter pole to the wire in 1:31, or at the rate of 2:01-1-3 for the mile. Here is the way Henry Ten Eyck White describes the race:

In scoring for the first heat Highball showed a curious little hopping motion behind that led critics to scan him closely. He evidently was not going with his usual smoothness, but they figured he would "flatten out" when once in full stride.

To make the matter worse the starter gave the word with Highball fully a length back of Sonoma Girl, she being half that distance to the rear of Sadie Fogg, which drew the pole, with Sonoma Girl second and Highball third. The other starters were Margaret O. and Tolling Chimes. With his horse not going just to suit him, Geers was not in a hurry to make pace, figuring that when he once squared away it would not be much of a trick to pass the pair of mares ahead of him. They traveled thus to the quarter in :33, an absolutely slow rate for that class of horses.

Down the back stretch there was even a slackening of this rate, the half being reached by Sadie Fogg in 1:06½. Not until the five-eighths pole was abreast of her did Sonoma Girl begin her brush, and Geers, still a few lengths back, pulled open the throttle at the same instant. In a jiffy the fastest two trotters in training were at Sadie Fogg's throatlatch, and the way they sped past her on the crown of the upper turn was a caution.

Although they had been at full speed for only an eighth of a mile, the third quarter was trotted by Sonoma Girl in :31, her time there being 1:37½. She still was well ahead of Highball as the turn for home was made, and both horses were extended to the full.

Both came steady and true, responding all they knew how to the calls of their drivers, but although Highball gained, he was just back of the mare's sulky wheel as she went under the wire in 2:06½, the time of the final quarter being :29, and of the last half 1:00. Highball, carefully timed, did the same distance in :59. Sadie Fogg was a good third, while Tolling Chimes and Margaret O. were distanced.

Highball still ruled favorite in the betting. He sold \$25 to \$10 before the first heat, and there was not much change in the rate, it being argued that Geers had held the mare too cheap, but that in the next heat he would take her over to that half in 1:02 or better and then romp home.

In scoring for the second heat Highball broke the first time down, and this action presaged his defeat. He acted as if sore or lame, and it was necessary for Geers to take quite a hold of him to keep him on the trot. Again the starter did a bad job by giving the word when the gelding had a full length the worst of it. But perhaps that didn't matter, as before Highball had gone 100 yards he made a standstill break, was pulled to a walk, and was more than a distance back of the other horses right then.

In the meantime Sonoma Girl had gone on about her business, traveling just as fast as Sadie Fogg made her. For half a mile the brown mare forced the chestnut one to hike in lively style, the watches showing :31½ at the quarter and 1:04½ at the half. They trotted the upper turn at a 2:08 clip, the time for the three-quarters being 1:36½, with most of the spectators looking at Highball and wondering if he would save his distance. He landed inside the sixty yard flag all right, with Sonoma Girl winning on the bit in 2:08.

Separately timed, Highball had trotted from the quarter pole to the wire in 1:33, a 2:04 gait, and the experts decided that this rate of speed, sustained for such a distance, must inevitably put him out of further calculations ament the race.

But Highball fooled everybody and got most of the applause at the end of the third mile, although he did not win. As in the second heat, he broke on the first score. Then he came to the wire on fairly even terms with the others and the word was given. But he was not going flat by any means, and immediately made a break. Once more came the nerve racking time for his backers as he jumped up and

down. When finally again on a trot it was evident he was out of the race, but the crowd looked for another wonderful exhibition of speed and saw it.

So far as first position was concerned, it was Sonoma Girl all the way. Her first quarter was :32, a 2:08 clip. She came back to a 2:10 rate on the back stretch, the half being done in 1:04½. Then she went back to the 2:08 notch, trotting the third quarter in :32 and reaching the three-quarters in 1:36½.

All this time Highball was fairly flying in his desperate pursuit of the two mares. The official records, of course, tell no story of the wonderful speed fight of this giant among trotters, but the watches were held on him just the same, because, although beaten, he was the sensation of the race.

By the time the mares were at the five-eighths pole it was plain Highball was gaining on them at a great rate, and it was not long until his footfalls reached the ears of Capt. Springer, the delicate looking but resolute man who owns and drives Sonoma Girl and who loves her as he would a child. He began to urge the mare and she responded gamely with quickened action.

Down the homestretch she came at a rate of speed that would have left anything but Highball far in the rear. Geers was teaming his horse with desperation, and to the amazement of the crowd, which was already cheering the beaten horse, Highball, in his mighty rush, came to Sadie Fogg and passed her as he would a horse not in motion. For an instant it seemed as if he would overtake Sonoma Girl, but already his stride was shortening, while the mare sped along with undiminished speed. She went under the wire in 2:07, having trotted the last quarter in 30½, and the race was over.

Then the figures on what Highball had done for the last three-quarters of the mile were handed around. He did the distance in 1:31, or at the rate of 2:01½ for a mile, the performance being one never before accomplished by a trotter in a race against other horses. To the enthusiasts in such matters there was glory in his defeat, but to Geers, who knows the horse so well, and who knows that a mile in 2:04 would not have stopped him had he staid on a trot, there was no balm in the favorable report on the post-mortem exercises.

While admitting that Highball was a wonder, and possibly a champion that would hold his own all the way down the Grand Circuit line, horsemen who made a study of Sonoma Girl and her work said the gelding had nothing on her, even in the way of pure speed, and that while his manners apparently were of the best, he came of a strain of blood that had produced a lot of jumpers.

To this was added the fact that Sonoma Girl, after her mile at Los Angeles on Christmas day, has been pretty much let up for the balance of the winter and that after reaching Libertyville she had been given but one mile as good as 2:11 before starting against Highball, that was known to have had not less than a dozen miles better than 2:10, and that long before he left Memphis was asked for a repeated workout in 2:10, 2:08, the ease with which he did the second mile settling the question of his purchase by Frank G. Jones at the highest price ever paid for a green trotter.

In brief, the adherents of Sonoma Girl claimed that when the horses met after their mare was in order for a corking race they would show a trotter equal to taking the measure of Highball.

Their claims were fully made good last Wednesday, when the mare trotted three heats in 2:06½, 2:08 and 2:07, doing the last half of the first mile in 1:00 and the final quarter in :29. In this mile the mare and gelding did not start their brush until Sadie Fogg, which was in the lead, was at the five-eighths pole, the first half mile having been done by her at the comparatively slow rate of 1:06½.

Of course, in talking about the record beating half mile trotted in this heat by Sonoma Girl it should be remembered the official figures do not quite express the full merits of her performance, as the watches registered the first half mile on Sadie Fogg, which was fully a length ahead of the California mare at that point and stopped on Sonoma Girl, which came first to the wire.

After Sonoma Girl had shown unexpected speed in the last half of this mile there really was no chance for a true test of the merits of the two horses, as in each of the succeeding miles Highball broke as soon as the word was given, and while he trotted faster than the mare after regaining his stride, she won both heats, apparently at her ease, and there is no telling what she might have done had the Geers horse stayed on a trot all the way.

A mare that steps the last half of a 2:06½ mile in a minute flat, and that comes back two more miles in 2:08 and 2:07 certainly has a chance to show 2:04 in a pinch, and while the unavailing speed of Highball after he had made breaks was impressive, it may be that had he been on a trot all the way the mare would have trimmed him just the same.

Buy this one on a "spec." Three-year-old brown filly by Searchlight 2:03¼, dam by Chas. Derby, second dam Empress, the dam of King Candenza 2:15½ by Flaxtail. This filly should make a 2:10 pacer next summer. See her at the sale at Chase's August 12th.

In answer to a correspondent we will state that we do not know the owner of the horse Madison Jr. by James Madison, nor the horse's breeding on his dam's side. Perhaps some of our readers can furnish the information.

PLEASANTON PROGRAM.

First Day—Wednesday, July 31st.

2:08 Class Pace, Farmers' Stake, \$800.

W. G. Durfee's br g Kelly Briggs by Bayswater Wilkes.

S. C. Kimball's ch m Miss Idaho by Nutwood Wilkes.

I. M. Lipson's blk s Dr. W. by Robert Basler.

W. A. Clark Jr's. br m Miss Georgie by McKinney.

Henry Delaney's b m Delilah by Zolock.

W. L. Vance's b s Sir John S. by Diablo.

I. L. Borden's b s Cresco Wilkes by Nutwood Wilkes.

W. R. Meese's ch s John R. Couway by Diablo.

2:40 Class Trot, Purse \$500.

F. H. Burke's b m Yolanda by McKinney.

W. T. Montgomery's b s Alto McKinney by McKinney.

Sutherland & Eastman's b g Ben Russell by L. W. Russell.

Valencia Stock Farm's blk s Amado by Direct Heir.

J. Twohig's ch m May T. by Monterey.

N. T. McManus' br s Nazon by Nazote.

A. L. Charvo's br g Peter Pan by L. W. Russell.

W. J. Dinee's br s Ed. McGary by Zombro.

I. L. Borden's br s Barney Bernatto by Zombro.

Thos. Ronan's r s Birdson by Antrim.

C. L. Shattuck's b g Vernanta by Jules Verne.

Fred Fanning's b g Parachute by Altitude Jr.

Three-Year-Old Class Pace, Purse \$500.

J. W. Marshall's Aerolite, br s by Searchlight.

W. H. Coombs' Albert Direda, bl s by Robert Direct.

J. O. Gerrety's Beulah, ch m by Nutwood Wilkes.

L. H. Todhunter's Hymettus, b g by Zombro.

E. D. Dudley's Truth, br m by Searchlight.

Homer Rutherford's Josephine, b m by Zolock.

Second Day, Thursday, Aug. 1st.

2:14 Class Trot, Alameda County Stake, \$800.

Geo. T. Algeo's b h Bob Ingersoll by Nutwood Wilkes.

Ray Bennett's bl g Oro Belmont by Oro Wilkes.

Frank H. Burke's b m Vallejo Girl by McKinney.

G. W. Bonnell's br s R. Ambush by Zolock.

Wm. Morgan's b g Queer Knight by Knight.

Louis Stock's b m Oveta by Caution.

J. B. Iverson's b g North Star by Nutwood Wilkes.

W. G. Durfee's br s Carlok in by McKinney.

W. G. Durfee's br g Dredge by James Madison.

F. P. Ogden's bl s Mounocrat by Woodmon.

2:30 Class Pace, Purse \$500.

Geo. T. Algeo's br m Babe Madison by James Madison.

C. A. Lowery's b g Little Medium by Dictatus Medium.

John Green's b g Billy B. by Son of Alex. Button.

A. O. Gott's cb g Mephisto by Diablo.

Jas. Sutherland's cb m Opitsah by William Harold.

E. L. Hunt's b g Tobasco by Timothy.

T. J. Stanton's r m Queen Eagle by Eagle Bird.

T. J. Stanton's dn s Eagle Pilot by Eagle Bird.

W. G. Durfee's b s Copa de Oro by Nutwood Wilkes.

Jas. Thompson's ch g Santa Rita by Diablo.

Wm. Duncan's b g Morrie N. by Son of Brigadier.

S. H. Hoy's s s Der Teufel by Diablo.

C. H. Widemann's b g Fred W. by Robin.

Special, Purse \$500.

Third Day, Friday, August 2d.

2:24 Class Trot, Stake \$800.

W. C. McCully's ch s Cedric Mac by Nearest.

W. Parson's br m Berta Mac by McKinney.

W. W. Mendenhall's br s Sir John by McKinney.

J. W. Zibbell's br m Fresno Girl by Seymour Wilkes.

W. J. Fleming's b g Hunky Dory by Athadon.

Wm. Morgan's b m Era by Zombro.

E. L. Hunt's g s Jim Whitney by Wayland W.

W. L. Vance's b m Easter Bells by Diablo.

Rice & Blosser's bl m Moorita by Purissima.

Dr. E. Northcott's b g Wilmarch, Jr. by Wilmarch.

W. G. Durfee's br g Dredge by James Madison.

W. G. Durfee's b g Regals by Osito.

W. H. Williams' b s Sidonis by St. Nicholas.

2:12 Class Pace, Purse \$500.

J. W. Marshall's b m Mona Wilkes by Demonio.

F. H. Burke's s g Friday by Monroe S.

Dr. Wm. Dodge's b g Lohengrin by Charleston.

Rice & Blosser's br s Wild Nutting by Wild Nut.

C. J. Snyder's br s Jonesa Basler by Robt. Basler.

M. A. Thompson's br m Queen Pomona by Pomona.

I. C. Mosber's b g Mandolin by Alcane.

Fred Cornehl's br m Mollie Button by Alex. Button.

Fred Fauning's b g Victor Platte by Platte.

2:17 Class Trot, Purse \$500.

Mrs. H. A. Trefry's br s Kenneth C. by McKinney.

J. O. Gerrety's b m Sally Lunn by Wiggins.

W. Mastin's b s Marvin Wilkes by Dou Marvin.

W. G. Durfee's br s Carlok in by McKinney.

J. N. Anderson's bl m Della Derby by Chas. Derby.

Fourth Day, Saturday, August 3d.

2:20 Class Pace, Stake \$800.

F. E. Ward's b m Explosion by Steinway.

Geo. T. Algeo's b m Babe Madison by James Madison.

W. Griswold's cb g Diabull by Diablo.

C. H. Widemann's bl g Joe Robin by Robin.

C. H. Widemann's b g Fred W. by Robin.

BIG PURSES AT PHOENIX, ARIZONA.

The Arizona Territorial Fair, which is to be held at Phoenix, November 11th to 17th, this year, announces a splendid list of trotting and pacing stakes to close September 15th. There are twelve stakes of \$1,000 each and two of \$1,500 each. The trotters are provided for by the 2:29, 2:24, 2:19, 2:11, 2:08 and free-for-all at \$1,000 each; \$1,500 is offered for trotters of the 2:14 class. For the pacers there are the 2:25, 2:20, 2:16, 2:12, 2:08 and free-for-all at \$1,000 each, while the 2:05 class will compete for \$1,500. It is a great program for six days racing and should be very attractive to California horse-owners. Horsemen who raced at Phoenix last year all speak in the very highest terms of the treatment accorded them, and say it is one of the best places to race in America. The track is good, the climate about perfect during November, and the Arizona people are warm supporters of harness racing. Superintendent of speed, Shirley Christy, says he desires all horsemen to understand that it is the feeling of all connected with the Territorial Fair that those of the horsemen who come there shall enjoy themselves and that the officials of the organization will be glad to extend any courtesies they can that a host might show to a guest. A condition of the races that will appeal to many is that while entries close September 15th, a horse may be entered at any time prior to that date and any record he makes thereafter will not bar him from the event in which he is entered.

A NEW YORK IDEA.

New York is to have a free clinic and hospital for horses that are ill or disabled and whose owners cannot afford to give them proper treatment. A committee has been appointed to select a site and secure the necessary funds to finance the institution. A similar committee has been appointed to establish a farm upon which fire, police and draught horses, disabled in the service of the city, will be cared for when turned over to the society's care, as provided for by the law enacted by the present Legislature. The two committees will co-operate with an idea to making the farm a temporary home for convalescents from the horse hospital. Horses of cab drivers, peddlers and individual owners of the poorer classes will be entitled to treatment at the dispensary for a nominal fee, or free if circumstances warrant. Beyond the relief which the handling by expert veterinarians of hundreds of cases of brute suffering will afford, it is believed by the officers of the A. S. P. C. A., that the educational effect of this hospital for horses will prove very valuable. Instruction in the prevention of disease, the proper treatment of minor ailments and in the proper feeding, harnessing and general care of horse flesh will be given by the staff of the institution to all drivers and owners who care to attend its clinics. Ignorance rather than cruelty is the chief cause of horse suffering the society's workers maintain, and by this means it is believed much of this may be removed. Jack Curry is said to have the handsome trotting stallion Bonnie Russell 2:10 1/4 in great form and that a mile several seconds faster than his record is easy for him. Highball 2:06 1/4 and Dan S. 2:07 1/4 took their records in races for purses of \$400. Probably no other instance can be mentioned where two green ones beat 2:10 to get a part of such small purses.

NEWS FROM THE NORTH.

[Portland Rural Spirit.]

J. S. Crane will race his trotter Hank 2:23 this fall.

J. W. Bailey has placed his trotter Red Rock in John Sawyer's stable to be trained.

Hal B. 2:04 1/2 is still doing stud duty at Irvington, and has served over sixty mares this season.

Bonnie Tangent 2:23 is working miles in 2:15 over the Salem track, and begins to act like a dangerous candidate in the \$5000 trot.

C. A. Harrison, formerly of Victoria, is now located in Portland, where he will enter into the hotel business. Mr. Harrison is a lover of horses and is the possessor of some good ones. He is now training Niquee, by the great Joe Patchen, dam Oenone 2:11 1/4, by Woodford Wilkes. This is a very promising mare and has lots of speed and stamina. She will start at Salem this fall and continue on the circuit. A youngster that Mr. Harrison is particularly proud of is North Star Pointer, sired by Star Pointer, dam Maid of Del Norte, by Del Norte; second dam Little Maid, by Rockwood; third dam Pochahontas, by Hambletonian Mambrino; fourth dam Maggie B., by Black Stranger. His register number is 45261.

A few days since a Rural Spirit representative had the pleasure of seeing a beautiful colt sired by Tidal Wave and out of a mare by Coeur d'Alene; second dam by Alexis; third dam Beulah, by Altamont. It was at the home of Ed Keyt, near McCoy, Oregon, and Mr. Keyt has a right to his belief that he has a most promising prospect. He has also another richly bred mare with a young foal, now over at Woodburn to take the horse again. Both the colts are entered in Eastern Futurities and their owner expects them to make good. Mr. Keyt also has on his place five yearlings by Red Seal, all showing up well, besides a good one by the Morgan horse, Lambert Boy. He has some good young horses in training that have been mentioned in the Rural Spirit, and guess they will enter the lists with a good lot for this fall's races.

John Sawyer has in his stable a very handsome bay mare, 15.2, five years old, that promises to develop into a very fast pacer. She is an own sister to New Moon 2:21 1/4 pacing, and Starlight, trial 2:18 1/4 trotting.

VICTORIA, B. C., RACES.

June 20—3:00 mixed trot, purse \$250— The Prince, b g (Chapelle)..... 1 1 1 Cashmount, b g (Madsen)..... 2 3 2 Sister Stell, b m (McGuire)..... 3 2 3 Kittle Hart..... d Time—2:28, 2:28 1/4, 2:26.

2:15 trot and 2:20 pace, purse \$250— Elma O., blk m by Red Baron (Chapelle)..... 1 1 4 1 Dan D. (p), cb g by Illinois Chief (Easton)..... 2 2 1 3 Gebbie (Lance)..... 4 3 2 2 Starlight, b g by Dark Night (Hawk)..... 3 4 3 4 Time—2:25, 2:26 1/2, 2:29, 2:30.

June 21—2:35 trot and 2:40 pace, purse \$250— Directzone, b g (Easton)..... 1 1 1 Max Del, b g (Chapelle)..... 2 2 2 Dr. H., b g (Mitchell)..... 3 3 3 Time—2:33, 2:42, 2:27 1/2.

Trot or pace, 3:00 class— Cashmount..... 2 1 1 Winnie G..... 1 2 2 Mackie Richmond..... 3 3 3 Time—2:29, 2:30 1/2, 2:31 1/2.

Trot or pace, 2:30 class— Dan Dee..... 1 1 Prince..... 2 2 Queen Victoria..... 3 3 Time—2:29 1/2, 2:25.

The Park Driving Club will hold matinee races at the three-quarter mile track in Golden Gate Park this afternoon.

California's favorite bot weather drink is Jaskson's Napa Soda.

SALINAS MEETING OPENS.

Fresno Girl Defeats the Favorite, Dredge, for \$300 Purse.

A large crowd was in attendance on Wednesday, the opening day of the Monterey Agricultural Fair and Race Meeting at Salinas track, which was in good shape for the two harness events that made up the program for the afternoon. These were the 2:24 class trot for a purse of \$300 and the 2:16 pace for which \$300 was the amount of the purse. Ed R. Smith of Los Angeles was the starter.

In the 2:24 trot W. G. Durfee's Dredge, by James Madison, ruled the favorite on his performance at San Diego a few weeks ago, where he won his race in straight heats and stepped the last mile over a slow track in 2:14 1/4. In the pools Dredge sold for \$10 to \$5 for the other five starters in the field. He took the first heat in a jog in 2:19 1/2. The next heat, however, J. W. Zibbell turned his mare Fresno Girl loose after getting away badly, and although she was at least five lengths behind Dredge at the half in 1:07, she beat him home and forced him to a break in the stretch, the mile being nearly five seconds faster than the previous one. She took the next two heats after a desperate fight in the stretch in each in 2:15 1/4 and 2:16 1/4.

The pacing event resulted in another downfall for the favorite, Just It. T. W. Barstow's mare had worked a mile in 2:09 1/4 the week previous and was thought to have a cinch on first money. The Hambletonian Wilkes mare, Louisa A., owned by Mr. C. J. Hebert of Salinas, had the speed of the three starters, however, and won in straight heats easily, the best time being 2:15 1/4. Just It took third money. The summaries:

Trotting, 2:24 class, \$300—

Fresno Girl, br m by Seymour Wilkes (Zibbell)	5	1	1	1
Dredge, br g by James Madison (Durfee)	1	3	2	2
Parachute, b g by Altitude Jr. (Stewart)	6	2	3	3
Ollie B., ch m by Nutwood Wilkes (Gray)	2	4	5	4
Monocrat, b s by Woodmon	3	5	4	5
Amado, blk s by Direct Heir	4	6	4	6

Time—2:19 1/2, 2:15 1/4, 2:15 1/2, 2:16 1/4.

Pacing, 2:16 class, \$300—

Louisa A., h m by Hambletonian Wilkes (Whitehead)	1	1	1
Norda, b m by Mercury (Bonnell)	2	2	3
Just It, b m by Nearest (Barstow)	3	3	2

Time—2:15 1/4, 2:15 1/2, 2:21 1/4.

The second day of the Monterey Fair race meeting drew a large attendance, but the races proved rather tame, as they were won in straight heats and the winners did not have to show the limit of their speed to win. The card for Friday, however, is an excellent one and a record attendance is expected, as the local favorite, North Star, will start. Summaries:

2:10 class trot, purse \$400—

Coronado, by McKinney (Durfee)	1	1	1
Princess, by Eugeneer (Whitehead)	2	2	2

Time—2:17, 2:17 1/2, 2:17.

Pacing horses without records, purse \$300—

Opitsah, by Wm. Harold (Chadbourne)	1	1	1
Babe Madison, by James Madison (Algeo)	2	2	2
Albert Direda, by Robert Direct (Coombs)	2	2	2

Time—2:16 1/2, 2:20, 2:16 1/2.

BLUE RIBBON MEETING.

Reproachless, a black mare by Direct Hal, dam Regent's Last by Prince Regent, won the Chamber of Commerce Stake on Tuesday, the opening day of the Blue Ribbon meeting at Detroit. The race this year was on the three-heat plan and after finishing ninth in the first heat, which was won by the bay gelding Bonanza in 2:07 1/2, Reproachless won the next two in 2:06 1/4 and 2:06 1/2. The track was heavy from the rain of Monday. Geers' pacer, Dan S., was favorite for the race, but after finishing seventh in the first heat was distanced in the second.

The Horseman's \$3000 stake for 2:14 trotters went to Fedora's Athol, a chestnut stallion by Palo Alto Chimes. He won the first and second heats and was third in the final heat, which was won by Gentle H., son of Gambetta Wilkes.

In the 2:18 trot Carlo, a black gelding by Bellini, won two heats and the final was taken by Chas. DeRyder's brown gelding Wild Bell by Wildnut.

One of the spectacular features of the day was the fire that started just after the second heat of the Chamber of Commerce had been decided. For a time it threatened to wipe out the entire row of stables. The damage was about \$2000. The summaries:

2:14 trot, the Horseman stake, \$3000—

Fedora's Athol, ch h by Palo Alto Chimes (Hopkins)	1	1	3
Gentle H., br h by Gambetta Wilkes (W. McDonald)	4	2	1
Silver Band, blk g (McGuire)	7	4	2
Quintel, b h (James)	2	6	7

J. J. M. Jr., Lilly Stranger, Marechal, Dr. Charlie and Tom Moore started.

Time—2:11 3/5, 2:11 1/2, 2:11 1/4.

2:13 pace, Chamber of Commerce stakes, \$5000—

Reproachless, blk m by Direct Hal-Regent's Last (Starr)	9	1	1
Bonanza, b g by Alfonso Vincent-Nona Kirtz (Thomas)	1	10	2
Leland Onward, b h (Murphy)	2	2	4
Major Mallow, b g (Mallow and Snow)	3	4	6

Hidalgo, Tommy H., Lady Patch, Billy Seal, Shau-

ghran, Requisition, Tommy Grattan and Dan S. started.

Time by quarters: First heat—0:32, 1:04, 1:35, 2:07 1/2. Second heat—0:30, 1:03, 1:35, 2:06 1/4. Third heat—0:32, 1:04, 1:35, 2:06 1/4.

2:18 trot, purse \$1500—

Carlo, blk g by Bellini (Dickerson)	1	1	3
Wild Bell, br g by Wild Nut (DeRyder)	4	4	1
Amos, h g (McHenry)	2	2	4
Sarah Hamlin, br m (Packer)	6	7	2

Lawretta, Red Bird, Dr. Ives, Sunline and Baron Arnold started.

Time—2:11 1/4, 2:11 1/4, 2:12 1/4.

HUMBOLDT COUNTY NEWS.

Humboldt Dillon, the young stallion by Sidney Dillon, did a fine business in the stud this year. The foals which were dropped this year are all large, well shaped and are mostly all marked after the horse.

Robert Noble is at the Ferndale track working Humboldt Dillon for the 2:30 and 2:25 classes. He has not stepped any fast miles as yet, but is expected to give a good account of himself this fall.

Noble is also working his two-year-old filly by Humboldt Dillon, dam Viola by Diablo 2:09 1/4, second dam Iora 2:11 1/4 by Ira. She is a nice going pacer and is a good representative of her sire.

Also quartered at the Ferndale Fair grounds are Ernest Bartlett, who is working a four-year-old colt by Mustapha, dam by Grand Moor, and Bunkum by Dudley 2:16, dam by Ha Ha.

W. B. Alford is working his two mares, half-sisters, four and five years old, by McKinney and Monterey Jr. 2:21, dam by Gossip. They are both nice going colts. The McKinney is a trotter, the other a pacer. Mr. Alford is well pleased with them and is justified in his pleasure. Matt Zahner is working Nil Friel's mare Betsy Waldstein, by Waldstein, for the free-for-all. This mare worked a mile last fall in 2:18, and 2:15 is expected of her before she goes into winter quarters.

CONCORD RACES, July 14.

The races held at the Concord track July 14th, attracted a large crowd. People came from San Francisco and Oakland, as well as from all over the county. A strong wind was blowing, which caused much delay in starting the races, and also interfered with the time made by the horses. The races seemed to give general satisfaction. Following is the summary:

For road horses in the district, purse \$40, two moneys—\$25 and \$15—

Nellie G. (Harlan)	1	1	1
Billy Moore (Perry)	2	2	3
Ohio (Foley)	3	3	2

Rees Jones' Emancipation and Captain Durham's Dr. Loyle also started.

Time—2:41 1/2, 2:32 1/2, 2:40.

2:30 class, purse \$75, two moneys—\$50 and \$25—

Ray Wilkes (Smith)	1	1	1
Dynamite (Schottless)	2	2	2
Hunkey Dory (Galindo)	3	3	3

Time—2:32, 2:30, 2:32.

Running, half-mile, purse \$75, two moneys—\$50 and \$25—

Janet (Captain Hackett)	1
Lacarie (Foley)	2
Egyptian Princess (O'Rourke)	3
St. Fleur (Stanley)	4
Dr. Sherman (Stanley)	5
Sorrel Dan (Benson)	6

Time—49 seconds. Starter—T. G. Smith.

The pacing horse Pilot was brought out and driven an exhibition mile in 2:20. Track fast, but wind very bad.

P. J. Horgan, W. J. Fleming and Frank Hammett acted as judges and timers.—Transcript.

QUALITY OF COURAGE.

Possibly there is no single racing horse character that is so much misunderstood, both by laymen and experts, as that of courage. We have become accustomed to talking and writing about game horses and high couraged horses which are in fact wanting in courage. They do the thing we admire, and then we say they are game, are horses of grand courage.

The quality to which we refer when we speak of a game horse is a most admirable one, but it is not born of courage. It is just as valuable under its proper name as it is under the misnomer it has masqueraded in for so long a time. It may be that it is well enough for general purposes to continue to regard horses as game or high couraged when they perform as we think a game horse should. So long as we understand the thing for which the name stands, it may be said it would avail nothing to disturb the name. Still, it may be further said that it is just as well to call things by their right name, for nothing is gained by the use of a misnomer. Moreover, breeders and owners should know that their horses are not high couraged, or game when they do the thing that is inspired of some other quality.

Courage in its purest form is that absence of fear and willingness to fight back under punishment so well expressed in the gamecock or bulldog. The gamecock, unless he has been cowed, will fight back until he dies. So will the bulldog. Strike a bulldog of the fighting type and he will fight back, rather than do the thing he is ordered to do. Hit a high

gouraged, game man, and he will hit back, and continue to fight in the face of severe punishment. The high couraged child does not readily do the things he is asked to do. He has a will of his own, horn of his courage, and he is not afraid of a whipping. The timid or docile child will do what is required of him to escape punishment. Even though he does not wish to do the thing required of him, he will take the lesser punishment to escape the greater. Men who battle in the ring are usually possessed of high courage, but it is a fact well understood by promoters and trainers that some of the most reliable of pugilists are docile, timid men. Such men have a better control of themselves than those of the bulldog variety. They train better and in the final contest rely upon their judgment rather than upon bulldog courage.

Police reporters who write up a horse race for the first time are almost certain to talk about the game way in which the racing horse responded to the whip. As well might we say the game man ran with all his might when he was hit in the eye, or the timid rooster, after the spurs were buried in his breast, fought back with desperation born of his timidity.

The high couraged horse does not take the whip kindly any more than a game rooster does the spurs. If the horse is game enough he will feel more like fighting the whip than he will like trying to win a race for the man who struck him.

The moment courage is aroused in man or horse, that courage carries with it the fight feeling. Not the feeling to do what is desired, but the feeling to fight whoever is applying the punishment that aroused the courage.

Horses of exceptionally high courage may not be aggressive enough to seek a fight or indulge in one on small provocation. But the fighting spirit is there, and if pressed far enough the high couraged horse will have his way, even if he must fight. If he is game enough, he will quit when he has had enough of the sport of racing, no matter what his driver may desire.

Most of our well bred harness horses have a lot of racing enthusiasm that makes them race on even after they begin to feel the exhaustion from the hard work. If they are of a gentle, docile disposition, they will respond to the whip after they have faltered toward the end of the race.

Disposition is an important factor in a race horse. Those horses which are docile by nature may be trained into good condition more easily than those which are high couraged and have the selfishness and assertiveness that goes with courage. The highcouraged horse wants to have his own way about things in general. When he is crossed he frets or fights in one way or another. The gentle horse falls easily into the ways that are marked out for him. He does little fretting, and when called upon in a race to give up his last ounce of racing energy, he responds nobly. The tired horse which really responds gamely to the urging of his driver, asserts himself and fights to maintain his selfish desire to quit, rather than go faster.

The docile horse, the gentle horse, the kindly disposed horse which makes no show of courage or its allied characters, is the horse that will go as his driver desires him to go in any part of the race. And in the final burst will go cheerfully to the limit of his physical powers.—Chicago Horseman.

HORSES IN DRAMA.

The racing drama has taken a new lease of life. "The Futurity Winner," written by Edmund Day, who wrote "The Round Up," is succeeding better in the vaudeville theaters than it ever has succeeded before.

"In Old Kentucky," which has grown to a green old age, has just closed one of its most prosperous seasons.

Lily Langtry has added to her racing stable. Viola Allen has enlarged her stock farm in Kentucky, where she raises racing horses, and racehorses recently have been amed after Fay Templeton, "The Little Cherub," which is Hattie Williams' musical comedy, and other stage people and stage plays.

Actors and horsemen always have been friends. Players like the geegees about as well as they like anything outside of the theater, and many of them any many managers have done well in introducing racing dramas to the public.

"The Great Brooklyn Handicap" was one of the first of the racing plays. That was an American made play. "The Sporting Duchess" came from England. Dion Boucicault wrote "The Jilt" and "The Flying Scud," both of them racing dramas.

Young Mr. Wheelock, who starred in George Ade's "Just Out of College," played before that the fine part of the jockey in "Lord and Lady Algy." This was the jockey that was in training but could not resist the temptation to smell at the brandy decanters.

"Checkers" and "The Suburban" both made a lot of money when they were first produced, and both of them kept up the winning stride long after many other plays which had been produced at the same time had given up the struggle.

William Gillet it was who invented the machine which makes it possible to simulate with great accuracy the noise of a horse galloping down the road, or up the road, or across the road, as the case may be. Gillet's invention has been used in many plays with which he himself had nothing to do.

CONDUCTED BY J. X. DeWITT

THE GAME WARDEN OF TO-DAY.

(By R. W. Williams, Jr., Assistant, Biological Survey, in the Year Book of the Department of Agriculture).
(Concluded From Last Week.)

Powers.—The powers exercised by the wardens of the present day are very extensive. Indeed, were it not so, enforcement of game laws and the consequent preservation of game would be impossible. It is the exception now for a State to withhold from its game wardens the right to arrest without warrant persons found in the act of violating the law, and a number of States confer upon their wardens the right to search summarily any place where they suspect contraband game to be concealed. In New York the power of search without warrant under the game laws is granted to game protectors, but is withheld from peace officers, who otherwise exercise all the powers of protectors in the enforcement of the game laws. Several States have excepted dwellings from the general warrant of search, thus preserving the ancient and time-honored sanctity of the home. While the warden may be lawfully invested with broad powers, it behooves him to use tact and discretion in exercising them, so as to give no just grounds for complaints of oppression.

In Michigan and Wisconsin wardens are authorized to conduct prosecutions in the courts in the same manner and with the same authority as prosecuting attorneys, and in Oklahoma and West Virginia they may do so without the sanction of the prosecuting attorney. In Tennessee the State warden may compromise or discontinue cases where the violations are technical or where he believes the prosecution or fine would be oppressive. In Maine the commissioners of inland fisheries and game may entirely prohibit the taking of any kind of game in any part of the State for a series of years, not exceeding four. These are some of the extensive powers granted wardens, and they illustrate the position of the service at the present day. In this connection may well be quoted the instructions given the deputy and county wardens of Michigan by the game warden of that State:

The proper observance of the fish and game laws depends almost entirely upon the vigilance and good judgment of the county and deputy wardens. Keep your eyes and ears open for violations, but do not be too hasty in acting upon what you hear. Be careful not to let the public know your plans. Be vigilant and fearless in enforcing the laws, but try to do so without being obnoxious. Be gentlemanly at all times. Show no favoritism, and be especially careful that all persons are treated alike. It is important that the people should be awakened to the importance of respecting the laws for the preservation of fish and game. Use your influence to arouse public sentiment in this respect.

Special Equipment.—The equipment of the game warden differs very little from that of other officers who enforce criminal statutes, but on account of the character of the territory to be patrolled several States in the past few years have provided launches for wardens doing duty on water courses. Massachusetts for several years has kept in service along the coast a naphtha launch, the efficiency of which the commissioners of that State declare to be equal to that of a hundred men. The Audubon Society of North Carolina, an incorporated body, which, under the terms of its charter, administers the game laws in that state, maintains a launch for the use of its wardens along the Atlantic Coast. This boat is used in winter for patrolling the ducking grounds in the larger inlets along the Coast of North Carolina, where wildfowl resort in great numbers and are extensively shot for market; and in summer it does duty in the region about Cape Hatteras and Ocracoke and around the islands in Pamlico Sound, where large numbers of sea birds rear their young. The game commissioner of Illinois has recently provided a cabin cruising launch for the use of the wardens along the Illinois River, and early in 1906 New York authorized the purchase of a steam or electric launch for the use of the two game protectors on Jamaica Bay and adjacent waters, and appropriated \$1,500 for the purpose.

The Police Department of the District of Columbia maintains a launch for service on the Potomac River largely to enforce the game laws on the marshes along the river.

The National Association of Audubon Societies, always desirous to co-operate with game wardens, owns a launch with which its warden patrols the southern coast of Florida in the interests of the non-game birds of that State; and in Louisiana its warden, who has supervision of the Breton Island Reservation in the Gulf of Mexico, is the owner and captain of a schooner which he uses in his work of protection.

Civil Service System for Wardens.—With increasing necessity for enforcement of the game laws and the corresponding intricacy of these laws arises increased necessity for more intelligent officers to execute them. The civil service rules, which have worked so well in other departments of the State government, have recently been applied to the game departments of Massachusetts and Wisconsin, and their example will, without doubt, soon be followed by other States. The system, besides insuring a

higher grade of officers, has the advantage also of eliminating politics from the service. An examination of the questions propounded to candidates for the position of game warden in Wisconsin shows that in that State great importance is attached to ability to endure exposure and hard physical exertion. Some account is taken of the applicant's familiarity with the game laws and conditions in his territory, and enough arithmetic is required to test his ability to keep his accounts. On the other hand, in Massachusetts less importance is attached to physical endurance, but applicants for the position of deputy fish and game commissioners are required to answer exhaustive questions on their powers and jurisdiction under the game laws, and in relation to the preliminary procedure in the courts.

Applicants should be examined upon the subjects usually included in the common school course. Physical fitness and such previous experience as would be serviceable in the position sought should be given due weight. Other qualifications being equal, the applicant who is an experienced hunter should command precedence over one who is not.

In order to secure the largest measure of efficiency in the game department, civil service questions should be framed to test the applicant's qualifications to perform any and all services likely to devolve upon him in the performance of his duties. They should elicit his knowledge of the powers, duties and jurisdiction appertaining to the position of warden and the methods of procedure in case of violation of the game laws. He should have a general knowledge of the object of game laws and should show fair acquaintance with the fauna of his territory, especially with the species classed as game; he should be familiar with the limit of hunting seasons, with prohibited devices and methods, limitations on amount of game permitted to be killed, and restrictions on hunting by residents and non-residents, and on sale and transportation. If the examination is for one of the higher positions in the service, such as chief warden, the applicant should know something of the decisions of the higher courts in cases involving game, at least in his own State.

Associations of Wardens.—In the early part of December, 1892, the fish and game wardens of the two Dakotas, Minnesota, Wisconsin, Iowa and Illinois met in convention at St. Paul, Minn., for the purpose of considering a uniform game law for the States mentioned. A bill providing for such a law was agreed upon, but failed of adoption in the several States. Since this meeting similar conventions have been held in other sections of the country, with like objects in view, but no permanent association was organized until July 21, 1902, when the State wardens and commissioners of Colorado, Minnesota, Oregon, Utah and Wyoming, together with several other persons interested in game protection, met at Mammoth Hot Springs in the Yellowstone National Park, pursuant to previous agreement. A permanent organization was effected under the name of the National Association of Game and Fish Wardens and Commissioners. Papers were read and discussed on various phases of game protection, spring shooting, hunting licenses, export and sale, bag limits, and the right of search. The primary object of the association was to secure co-operation between the States. The constitution adopted made all State and Federal game officials eligible to membership, and fixed the entrance fee at \$10. The discussions at this meeting had a marked effect upon subsequent legislation and have resulted in more subsequent enforcement of the game laws. This association was re-organized on February 11, 1904, and, with dues reduced to \$5, now numbers among its members the State game officials of most of the States where such office exists.

A personal acquaintance with the deputy and county wardens in the State is always of great advantage to the State officer in the administration of his duties, and in recent years several officials have called conventions of their deputies for this end and to discuss matters pertaining to their duties. One of the first meetings of this character of which the writer has any knowledge occurred in Montana in 1901, shortly after the creation of the offices of State and district game wardens, and when, in compliance with the summons of the State game and fish warden, the eight deputies met at his office in Helena for the purpose of mutual acquaintance and instruction by him in the duties of their position.

Quite the most notable and successful of these conventions met in the Amory Building at Springfield, Ill., on January 26, 1904, pursuant to a call issued by the game and fish commissioner of that State. There were seventy-five wardens present, and after organization the commissioner stated that the object of the meeting was to become acquainted, discuss matters of general interest in game protection, study carefully the new game law in order that all might understand its provisions, and outline a general policy for its enforcement. Some very interesting and important papers touching

various phases of bird and game protection were read and discussed, and new legislation was proposed, some of which was enacted at the following session of the Legislature.

Perils of the Warden's Position.—The record of fatalities incident to the warden's official life testifies to the perils of the position. Exposure to inclement weather, with attending discomforts, may he reasonably accounted part of the chances a warden assumes when he enters upon the duties of the office; but conditions should not be such as to compel the risk of surrendering his life to the depravity of his fellow-men. Yet such is the fact. Several deputies and other officials have been killed within recent years while in the discharge of their duties. In not a few cases the culprits have received merited punishment for their crimes and have been sentenced to prison for longer or shorter periods. In other instances they have gone unpunished, as in the case of a plume hunter who killed a Florida warden while he was attempting to arrest him for shooting herons in a colony of nesting birds and who escaped through refusal of the Grand Jury to indict him. In cases of miscarriages of justice like this, however, it should be remembered that game laws and game wardens are of comparatively recent origin in the United States, and that only a short time ago the popular idea respecting fish and game was that wherever found they were almost as much the property of the individual citizen as the air we breathe. The creation of a healthy public sentiment everywhere in regard to the protection of game and the enforcement of game laws is only a matter of time, and the wonder is, not that violations of the law, followed by occasional tragedies, occur in remote districts, but that respect for the law is so widespread, co-operation so general, and that the cause of bird and game protection has advanced so far in public estimation in such a short time.

The most serious problem the warden of to-day has to contend with in some sections of the country is the control of certain classes of immigrants who in increasing numbers infest the woods and fields of some of our Northern States at all seasons intent upon the slaughter of all kinds of birds. They set at defiance the game and trespass laws, and to warnings not to hunt upon the farmer's land they sometimes respond with the use of weapons, occasionally with fatal results. The seriousness of the situation is echoed in the following paragraph from the report of the Board of Game Commissioners of Pennsylvania for 1904:

We are deeply impressed with the grave condition that surrounds the enforcement of our game laws in communities where the foreign element * * * is in any force, and recognize in this question the most serious one we are compelled to meet. This class seems possessed with the same purpose throughout the State, and is the most persistent and determined in not only violating the law, but in resisting arrest and attempting to evade punishment after they have been arrested. Hardly a week passes without an assault of some kind upon our officers from these people.

Conclusion.—It will be seen from the foregoing that game wardenship in this country has reached its present state of efficiency within a comparatively short time. Beginning with the very local moose wardenship in Maine in 1852, the service has been gradually extended in scope and purpose until now there is scarcely a locality in the United States where a game warden is not in service—scarcely a wild bird or animal which does not come under his protection.

This satisfactory condition has not been attained without a struggle. Many obstacles have been placed in the way of progress by an unwilling, because uninstructed, public and these have been overcome only by the persistence and devotion to duty of those who have occupied the office during the formative period. The game warden of to-day should recognize this obligation to his predecessors and endeavor not only to maintain but to surpass the high standard established by them.

Some of the former antagonism against game laws still persists, and in certain parts of the country the wardenship is yet in an experimental stage; but it may be safely predicted that in the near future every State in the Union will have established its game department on a footing with its other executive offices. In spite of its growing importance and power, however, the office of game warden is a difficult one to fill, and it is the duty of every good citizen to lend this important public servant every assistance and encouragement in the discharge of his duties.

Black Bass Destroyed.—A Hanford sportsman has called our attention to the fact that thousands of black bass, the delicious fish which has become plentiful in Kings River the past year, is being destroyed in large numbers by their swimming out into the irrigating ditches, where they all perish—none of them ever get back into the river. One farmer's wife stated the other day that they had plenty of black bass at her house for a while; the fish had come into the ditch, from which they get water for irrigation, and when the ground was flooded with water therefrom many fine bass floated out onto the irrigated land, and all the farmer had to do was to pick them up; many, of course, perished without being of use to any one. This waste of that splendid food-fish could be avoided if the headgates opening out from Kings River were screened. The supervisors should see to it that this is done.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

GRASS VALLEY CAMP STEW.

On July 17th, Bunker Hill Day, the Grass Valley Sportsmen's Association members and guests held one of their famous annual "camp stews" at the Dikeman ranch, in Penn Valley, twelve miles west of Grass Valley. It was the twenty-eighth annual outing of the club. If anything, the affair excelled former occasions of the kind, if that is possible; this unique and most pleasurable outing of Northern California sportsmen was brought to a close just as the sun was sinking behind the Western hills.

As early as 3 o'clock in the morning vehicles filled with jolly fellows began to leave the city for the scene of the camp stew. They had been preceded the evening before by members of the club who were responsible for the preparatory arrangements, and when the majority of the invited guests began to arrive early in the morning a tempting breakfast had been prepared and the aroma of the coffee and the rich odor of cooking meats filled the cool morning air and vied with the pine-scent from the forests. As early as 6 o'clock the grounds began filling up and breakfast was being served. That breakfast is something one seldom has an opportunity to enjoy. Even the most confirmed dyspeptic is tempted and he forgets his ailment in the enjoyment of the plenteous viands which courteous waiters bring him.

Thick, rich, juicy steaks, without number, chops and cutlets, done to a turn, crisp bacon, sweetbreads, ranch eggs, aromatic coffee, with rich cream, bread and butter and salads was the menu which tempted the appetites of the hungry epicures. After appetites had been satisfied the serving of breakfast was closed at 10:30 and the members of the club gave themselves over to enjoying the occasion. There was no set program, each person choosing to do that thing which pleased and amused himself best and afforded entertainment for others. Some went hunting, some engaged in target practice, others in games and sports, while still others listened to songs, speeches and story-telling. The Grass Valley band furnished pleasant musical numbers at intervals. So the hours of the day whiled away until the middle of the afternoon, when dinner was announced and the hungry sportsmen came trooping from all directions to participate in the enjoyment of the grand stew, served to the expectant guests from the steaming kettles over which Chef Maurice O'Connell and his efficient corps of aids had practiced their best knowledge of the culinary art. There was an abundance for all and plenty of various refreshing liquids to wash it down. And so with the conclusion of a feast which is duplicated nowhere in the world, the annual camp stew of the Sportsmen's Club of Grass Valley came to a close and those who had been fortunate enough to attend settled themselves in a pleasantly reminiscent frame of mind for the long, yet pleasant, drive homeward.

Guests were present from every section of the State, including men of prominence in business and political life. Over 300 were participants in the festivities of the day.

MARYSVILLE CAMP STEW.

The Ripario Gun Club members and invited guests had a grand time at the fifth annual "dove stew" of the club on Sunday, July 21st. The outing was held at "The Dip," seven miles east of Marysville. Many of the most prominent sportsmen of Northern California were in attendance.

This club is one of the leading sportsmen's clubs of Northern California, and ever since its organization has done much for the protection of game, both by securing proper legislation and by its vigilance over poachers. The De Koven Club of Berkeley, Cal., under the leadership of Dr. Clemens, furnished the music, and W. S. Duke of Boston enchanted all present with his grand bass voice.

The game laws of the State were reviewed and discussed by a number of speakers, and resolutions were adopted favoring future amendments to the present laws.

W. A. O'Brien was re-elected president and now enters upon his sixth term as the presiding officer of this popular organization.

CAMP LIFE IN SONOMA COUNTY.

An inking as to the possibilities of enjoyment and recreation camping out in Sonoma county (and hundreds of other places in this State, for that matter), is given in the following lively letter sent from Briggs' Rancho by County Treasurer George Weniger of Vallejo on the 15th inst.:

"Old Sport: Deer season is on this A. M. and we have been successful, for J. V. Miller has killed a fine young buck, weighing about 75 pounds. I will bring the horns home as a souvenir.

"We are living rather high in this wild country, for we have venison and sirloin steak for breakfast, venison chops for lunch and a big fat Dutch stew for supper. Jerked venison is now hanging under the trees, so you may look for a good slice of jerked meat upon our return.

"This is my first experience witnessing wild deer in the forest. They are a fine sight, I assure you, with their head thrown back and their antlers projecting.

"It is quite common to see young fawns about the premises, as they are protected by law, also the does, thus making them quite tame.

"Trout fishing is good. Out neighbors, the McManus family of Napa, caught the limit yesterday afternoon and gave our party a mess. One large trout among them was thirteen inches long. This

is nothing unusual in this vicinity, for there is not a fisherman for every trout, as it is in our county.

"Quail are very numerous, but now out of season. Doves are plentiful, so I look for good sport with my shotgun. But as we have so much venison on hand we have left the 'feathered animals' alone for a day or two.

"I wish we were near a shipping point and I would send a quarter to some of my friends, but as we are ninety-nine miles from a Wells-Fargo office the best we can do is to jerk the venison.

"We can hear the rifle shots all around us, also the hark of hounds, which are only used when the deer are wounded (?), as the law does not allow the use of dogs otherwise. These deer hunters, such as Dr. Turner, Dr. Chappelle, or Clyde Drake, can't give me any more of their deer yarns when I get through with this trip, as I shall be an expert on deer hunting. I can now shoot the right or left eye out of a mosquito at a distance of 100 yards. I guess this will hold them for a while. Good-by, as the prairie schooner is coming for the mail. My kindest to the bunch. Yours as ever,

"G. W."

HOW TO TAKE THE CAST OF A FISH.

Years ago I discovered, says a writer in The Asian, that fish stuffed and preserved lost their beautiful colors, and the shape was also materially altered. From Mr. Frank Buckland, of the Kensington Museum of Fish Culture, I learned to take casts of fish which could be colored to the exact color of the original, and which preserved the shape perfectly. Of course, it is difficult to describe the process which produces this result, but I will endeavor to do so simply and plainly, so that the amateur may find as little trouble as possible. First, take a piece of planed wood about two inches longer and two inches wider than the fish to be cast. This leaves an inch all round the fish, which might be lessened when you get more used to it. Then with a piece of cloth oil the board with olive oil, not too much, and tack on pieces of thin wood (picture backing does very well) round the planed wood, so that it projects about a quarter of an inch above the edges; this keeps the plaster from running off the board. Next take your fish and lay it in the center of the board, on its side, and with some putty thicken the fins, by placing some under them, keeping the fins and tail some quarter-inch above the board. This is done so as to give more thickness to the fins, which would be too thin of themselves and liable to break. With your oily cloth wipe the fish all over, but do not put on too much or you will discolor the cast. Having got all ready, take an old iron tray or basin, and mix enough No. 2 plaster of paris to cover the fish all over, and this has to be poured quickly over the fish, taking care it is distributed evenly all over to the thickness of a quarter of an inch. When this is done let it set for, say half an hour or so, and when properly set you can turn over the board and the plaster cast with the fish inside will come off with ease, and the fish can be taken out. The mould should then be allowed to stand some time. To get a correct model of your fish, you have only to mix enough of No. 1 plaster of paris to fill the cavity occupied by the fish, and when set, break off the outer crust and you have your plaster cast complete, which may need a little trimming with a knife. In casting a fish, especially a large one, I insert a few pieces of wire down the tail and up the fins to stiffen them, also in the outer crust when it requires it. You need not be afraid of making your plaster too thin, as it will always set. A large iron spoon is very useful for filling up any small crevices, and for smoothing over. Always have plenty of water handy for cleaning spoon and hands, for when the plaster sets it is very adhesive. It must be borne in mind that the very finest plaster of paris must be used. When the casts are completed, they can be painted the colors of life. Mr. Buckland took lessons of an Italian image-maker in making castings and painting them, and his fine artistic feeling greatly assisted him in his work. He and his assistant, Mr. Richard Edon, gave me lessons in casting and painting fish, and I have always been grateful for what I learned of these accomplished artists and fish culturists.

Wild Ducks Plentiful.—Up river sportsmen are awaiting the 15th of October with much satisfaction for the coming duck season promises a plentiful crop of webfeet. While this date is a little in the distance yet, there is a reason for the anticipation this year. The waters left on the lands by the floods over the San Joaquin country, and Yolo basin particularly, have created new marshes which have attracted the migratory members of the duck tribe, such as the teal and the widgeon, and for the first time in many seasons these birds have located in the marshes of the San Joaquin valley to make these spots their breeding ground. This brings cheer to the hunter who follows the duck branch of the sport. It is predicted that this season will be the most successful in the duck line for years—that is, provided you hit the duck.

Killed a Bear.—Oscar Gale, son of W. R. Gale of Paloma, killed a large cinnamon bear at his mountain ranch about fourteen miles above West Point, near Mokelumne Hill, one day last week. He reports hear to be very plentiful in the mountains this season.

Drink Jackson's Napa Soda. It means health.

OREGON GAME LAWS.

The season of the year when game laws are most interesting has arrived.

The following is a synopsis of the law now in force in the State of Oregon. In view of the fact that many California sportsmen make annual hunting trips to Oregon, the information here given will be of interest:

Officers.—The game warden has power to arrest or search without warrants.

License.—All hunters (except persons on their own land) must have license and carry same while hunting. Resident, \$1; non-resident, \$10.

Trespass.—It is unlawful for anyone to go upon the enclosed property of others.

Beaver.—Beaver must not be killed at any time.

Deer.—Open season for bucks from July 15th to November 1st; does from September 1st to November 1st. Dogs prohibited at all times. Spotted fawn shall not be killed at any time. Each hunter is limited to five deer in a season.

Elk.—Elk shall not be killed before September 15, 1907; open season one month.

Trout.—March 1 to November 1, and is unlawful to take them with seine, net, etc. Limit is 125 per day; all less than five inches must be returned to the water.

Pheasants, etc.—October 1 to December 1. Limit, ten birds per day. Hunting of same is prohibited in Jackson county.

Squirrels.—October 1 to January 1.

Water Fowls.—Geese, swans, ducks, etc., September 1 to February 1. Limit, fifty birds per week. No hunting one hour after sundown or half hour before sunrise.

Sale Prohibited.—It is unlawful to sell or ship out of the State for sale any of the above mentioned game.

Portland sportsmen are having their attention called to misinterpretations of the amendment to the Oregon game laws enacted at the last session of the legislature for the government of deer hunting. An impression seems to prevail throughout the State that the open season, from July 15 to October 31, applies to all counties in the State. This is erroneous, as different seasons have been provided for different sections.

Deer hunting may be engaged in in every county of the State from July 15 to October 31, except Coos, Curry, Grant, Harney, Malheur, Baker, Umatilla, Union and Wallowa. Owing to different conditions in these counties separate seasons prevail and the game laws are the same as in previous years. Following is the amendment to the game laws:

"It shall be unlawful at any time between the first of November of each year and the fifteenth day of July of the following year to hunt, pursue, take, kill, injure, destroy or have in possession any buck deer. It shall be unlawful at any time between the first day of November of each year and the first day of September of the following year to hunt, pursue, take, kill, injure, destroy, or have in possession any female deer, provided, that the foregoing part of this section shall not apply to the counties of Coos, Curry, Grant, Harney, Malheur, Baker, Umatilla, Union and Wallowa.

"It shall be unlawful at any time within the State of Oregon between one hour after sunset and one half hour before sunrise of any day of any year to hunt, pursue, take, kill, injure or destroy any deer; and it shall be unlawful for any person to take, capture, kill or destroy in any open season more than five deer. It shall be unlawful within the State of Oregon at any time to sell or offer for sale, barter or exchange any deer whatever.

"Any person killing any deer being pursued by dogs, at any time, or having in possession any deer or carcass, or part of a deer, during the season when it is unlawful to take or kill such deer, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be fined not less than \$50 nor more than \$200; * * provided, that in the counties of Coos and Curry it shall be unlawful, at any time, to hunt any deer with dog or dogs with intent to kill or injure such deer, and the owner or person having charge or control of any dog or dogs found running or pursuing any deer, shall be deemed guilty of a misdemeanor and, upon conviction thereof, shall be punished as hereinbefore provided in this act.

"It shall be unlawful at any time within the counties of Coos and Curry, to hunt, pursue, take, kill, injure, destroy or have in possession any female deer; and it shall be unlawful within the counties of Coos and Curry, at any time between the fifteenth day of October of each year and the fifteenth day of July of the following year, to hunt, pursue, take, kill, injure, destroy or have in possession any buck deer. Any justice of the peace in the county in which the offense is committed shall have concurrent jurisdiction of all prosecutions instituted under the provisions of this act."

Look Out For Your Dogs.—Dove hunters who propose enjoying the sport in the vicinity of Rocklin, Cal., should have a care in going over the property here mentioned, as the following notice published in the Rocklin Representative shows:

"Notice is hereby given that poison is out on Spring Valley Ranch for coyotes at all times, and any dogs found on the ranch will be shot on sight. Take notice that shooting on enclosed land without permission, is unlawful at all times, and violators will be prosecuted whenever caught."

EXPERIMENTS WITH SALT WATER TACKLE.

Figures and deductions of interest to every light-tackle angler have been compiled by Arthur J. Eddy, president of the Light Tackle Club of Avalon, Catalina.

Mr. Eddy has been experimenting with nine-thread lines for several seasons, and has evolved a mass of scientific data and some definite conclusions that will prove of direct value not only to the novice in light-tackle fishing, but to the expert as well.

A claim, oft-repeated by some light-tackle anglers, users of nine-thread lines, is that the "sag" or weight of 900 feet of such line will break it. This does not tally with the experience of either Mr. Eddy or the writer, E. L. Hedderly, apparently, as after testing the drag of a nine-strand line in salt water, with nothing attached, and the line fully submerged, the following table was evolved:

Table with 3 columns: Length, feet; Drag, Lbs.; Speed. Rows include 1,000, 1,000, 1,000, 1,000, 500 feet lengths.

The figures indicate, however, that the drag of the water upon the line increases out of proportion with the length of line out, and suggests a breaking strain in the event of a sudden turn of the fish at great distance and high speed, unless line is fed from the reel at once, so as to allow the line to "slide" around the arc and slip, rather than force it to cut a swath across the arc, caused by the turn of the fish, and thus suffer breaking strain.

Eddy advocates fighting fish largely with the sag of the line, using this obstacle to the fish's disadvantage. A fairly-taut line is better, but the thumb must be light and ready to release at electric notice, else the sudden turn will part the line against the resistance of the water.

Much of the parting of lines comes from the use of too stiff a tip. Rods can have plenty of backbone, or lifting power, without the heavy tip, for that part of the rod does not do the work, in any case; the lifting power comes from the grip to the fair-leader guide, as a rule.

Mr. Eddy advises 350 to 400 yards of line for tuna fishing and finds 200 to 300 yards ample for other varieties.

Tests as to rods are no less interesting. Eight rods were tested, giving a fair line of data. The lifting strength was proved by ascertaining how much each rod would lift, held horizontally, and strung, the weight attached to the line and depending at right angles. This data is not final, inasmuch as no rods were broken, but in each instance it was aimed to load the rod as far as any angler would risk it in practice. The table summarizes the results:

Table with 4 columns: Wt., Stock, Length, Style, Strain. Rows include 6 1/2, 8, 16, 8 1/2, 7, 8, 9, 12 weight rods.

The lifting power of a rod is largely a matter of its proportions, as pointed out above.

The power exerted against the line by the rod depends largely upon the angle of line to rod, and is least when the full spring of the rod is used, provided the top guide is of such construction as to permit the line to pass through freely. The greatest strain is obtained by obtusing the angle between rod and line—lowering the rod and fighting the fish from the reel. This breaks lines, but affords a ready way to save the rod when it comes to such a pass as saving all one can out of an impending wreck.

Eddy recommends a longer rod for next year, and more butt than most of the nine-ounce rods have carried, although he finds twelve inches is enough length. It is probable the Light Tackle Club will be weighing tips next year, possibly increasing the length over all, or coming at the rod problem in some other way, with a view to developing an elastic rod of seven or seven and a half feet length, which would prove a thoroughly workmanlike tool, and provided with solid enough butt and ferrule attachments to give it endurance. Split bamboo at present seems to be the best material. It will always command a premium over solid wood as long as weight is a factor.

Salmon Running.—A Communication from Game Warden W. R. Welch, dated Capitola, July 22d, states:

"The salmon run is now on in pretty good shape. Nearly every boat out here to-day took from two to six fish. The fish are of very large size. I saw several of 35 pounds weight each. Within the next few days I expect to see the sport all one could ask for. Good catches of fine trout are also being made in the stream."

AT THE TRAPS.

The complete scores of the two days' blue-rock tournament at Aberdeen, Wash., of the Southwestern Gun Club's Association, under the auspices of the Aberdeen Gun Club, were received too late for last week's issue. The high averages for the shoot were: "Steele," Seattle, 310 out of 340; Harry Ellis, Portland, 309; E. E. Ellis, Seattle, 309; Clarence A. Haight, San Francisco, 303; M. Abrahams, Portland, 296; Frank Howe, Portland, 295; A. J. Winters, Portland, 291; J. J. Law, Aberdeen, 290; H. Junker, Seattle, 289; W. A. Hillis, Portland, 288; S. J. Wray, Elma, 288; W. A. Robertson, Portland, 280; W. Caldwell, Portland, 278; J. A. Van Eaton, Grand Mound, 275; C. Pratsch, Aberdeen, 274; G. Garrison, Seattle, 269; C. Funk, Montezano, 267; J. Cooper, Tacoma, 267; T. McPherson, Portland, 260; D. W. Fleet, Montezano, 260; J. Smith, Portland, 247; J. P. Converse, Tacoma, 241.

Event No. 5 on the second day was the team shoot, 25 targets per man and did not count on general averages. This event was won by the Seattle team, Ellis, Junker and "Steele," who tied with the Grays Harbor team, 70 out of 75. The shoot-off stood 63 to 67, in favor of Seattle.

Fleet and Roberts tied for the Du Pont trophy, with 24 out of 25 each. Roberts won out on 24 birds. Harry Ellis won high professional average, and "Steele" was high amateur average. E. E. Ellis, with 25 straight, as before noted, won the individual championship medal. The scores follow:

Southwestern Gun Clubs' Association blue-rock tournament, Aberdeen, July 4, 1907—

Large table with 11 columns (Events 1-11) and rows for various shooters like Robertson, Hillis, Howe, etc.

Southwestern Gun Clubs' Association blue-rock tournament, Aberdeen, Wash., July 5, 1907—

Table with 11 columns (Events 1-11) and rows for various shooters like Robertson, Hillis, Howe, etc.

There was a good attendance at the blue rock shoot of the Union Gun Club at Ingleside last Sunday. Results in club and medal shoots follow:

Club shoot at twenty-five targets: Championship class—W. J. Iverson 23, C. C. Nauman 22, C. A. Haight 20. First class—D. W. King Jr. 24, Collier 22, D. Burfeind 19, D. Daniels 18, George Thomas 18, R. Murdock 18. Second class—F. Houpt 23, T. L. Lewis 18, C. Frankel 14. Third class—Joe Lynch 22, E. Hoelle 20, Scott Leary 17, Bert Patrick 15. Fourth class—Noonan 18, Dr. Bodkin 15, J. Dwyer and Danielson 14 each, Quigg 8.

Medal race, twenty-five targets: Championship class—M. J. Iverson at 16 yards, 22 and 18; C. C. Nauman, 18 yards, 18 and 20; C. A. Haight, 18 yards, 20. First class—D. W. King Jr., 16 yards, 18 and 25, won medal; D. Daniels, 16 yards, 22 and 21; Collier, 20 yards, 15; D. Burfeind, 16 and 14. Second class—F. Houpt, 22 and 24, won medal; T. L. Lewis, 12 and 13; C. Frankel, 11. Third class—Joseph Lynch, 18 yards, 21, won medal; Scott Leary, 18 yards, 15; E. Hoelle, 18 yards, 12 and 16; Bert Patrick, 18 yards, 18. Fourth class—Danielson, 16 yards, 20, won medal; Noonan, 16 yards, 14; Dr. Bodkin, 16 yards, 12 and 8; G. Dwyer, 18 yards, 11; Quigg, 16 yards, 8.

The handsome Du Pont trophy which has been contested for in a handicap tournament extending over several weeks at the Multnomah Rod and Gun Club traps, Portland, Ore., was won July 7th for the third time by McPherson, who will now retain it permanently. McPherson also won the 75 per cent snooters' medal.

Harry Ellis was high gun with 96 birds broken, Cullison was second with 94 and Jack Smith third with 92. The scores were:

Harry Ellis shot at 100, broke 96, Cullison 100-94, Jack Smith 100-92, Hillis 100-91, McPherson 100-87, Abraham 100-87, Caldwell 100-83, F. E. Shangle 100-80, Wagoner 50-38, Higgins 50-38, Borders 75-57, F. M. Shangle 100-74, Kiernan 75-51, Lipman 75-51, W. K. Shangle 25-18.

The final shoot for the Du Pont cup at the Seattle Gun Club's traps was held last Sunday.

The West Seattle Club shot with the Seattle organization Sunday, July 14th, several of the races were exceedingly close. "Rob" turned in the best day's record, breaking 71 out of the 75 blue-rocks he shot at.

Ellis was high man in the Class A medal shoot, with 24; Nelson, with 23, was first in Class B; Ireton and Tarrant tied in Class C, Tarrant winning the shoot-off, with a score of 15. The scores:

Table with 5 columns: Targets, Shot, Broke. Rows include Williams, Lipsky, Nehrbas, Barnett, etc.

The San Andreas Gun Club shoot on the 7th inst. drew a good attendance of shooters. The results in the club race at 30 targets were as follows:

Robert Casey 12, H. F. Zwinge 9, G. A. Stewart 26, R. W. Decker 14, M. A. Kiser 13, Oscar Wells 3, J. A. Treat 16, John Dasso 22, J. P. Snyder 13, L. Cademartori 13, J. A. Smith 20, Gil Pfortner 21, Matt Zwinge 14, R. S. Crossett 2, Chester Tiscornia 10, C. R. Perrier 7, F. C. Wells 12, Pache 13, Caster 13.

Ballard (Wash.) Gun Club members recently held an impromptu blue rock shoot with visiting members of the Seattle and West Seattle Gun Clubs. Luncheon was served during the day. The shooters arranged matches as they chose, no regular program being followed. Diller, Holcomb, Arnold and Williams of Seattle, all made good scores, while for the Ballard club, Poersel, G. G. Schram, McLachlan, Onstad, Carpenter, A. A. Schram and Sam Barthelemy did good work. Poersel led during the day, breaking twenty-two targets several times and once twenty-three out of possible twenty-five.

Will H. Price, captain of the Millwood Gun Club, a popular sportsman and well known local gunsmith, is at present visiting friends in Boston. He attended the Eastern Handicap tournament of the Interstate Association, which opened on the 17th inst.

KENNEL SUGGESTIONS.

We have often wondered at the very great amount of fuss and trouble that the inexperienced breeder, in his deep anxiety for the welfare of the coming litter, expends upon a bitch who is expecting a litter. Carefully measured exercises at certain hours, carefully prescribed meals, both as to quality and quantity, doses of various aperients, and specially prepared beds are only some of the fussy and totally unnecessary preludes to the great event. Now all these preliminaries are superfluous, and are certainly worrying to the expectant mother, and go far to bring about the very evils they are meant to obviate. As in many other matters with dogs, the bitch herself is by far the best judge at this critical moment, as a rule. We say this advisedly, for of course there are some bitches that, owing to savagery, sheer indolence, or even excessive fondness for their offspring, are quite unfit to be trusted with their newly-horn offspring for more than a few minutes at a time. Still, it is very remarkable that young bitches with their first litters are very seldom anything but the very best of mothers, and we have often had evidence that bad mothers are the direct result of injudicious meddling and interference at the time of their first whelping. However, we will dismiss this kind of bitch and her works by advising the provision of a foster mother, which is certainly a cheap and effective way out of the difficulty. Now, as to the best manner in which to treat a bitch in the advanced stages of pregnancy. Ordinary treatment and exercise should be followed till the end of the sixth week, by which time our novice will know whether or not his hopes of a litter are to be realized. Then, if an outhouse is available, the bitch should be kept loose in it, or, under favorable circumstances, even a free run about the dwelling house is advisable. As to food, as a staple there is nothing better than raw paunch, well washed and cleaned. This, in most instances, will keep the bowels open enough without giving castor oil, syrup of buckthorn, or other purges, the administration of which at this stage often does more harm than the physic itself does good. All causes of excitement should be avoided. Let the bitch alone; anything likely to upset her nerves should be kept at arm's length. But if the raw paunch does not keep her bowels open, it is more than probable some meal drop with a little dripping melted in it and given warm will have the desired effect if its administration is persisted in. If the bitch is obstinate it will be ample time to give castor oil, but great care must be taken in handling her for its administration. As the time gets nearer and nearer, the bitch, if left to herself, will find a resting place in some out of the way corner. A clean, soft sack or two—and there is nothing better than a couple of biscuit bags—put down in this particular place, and, if possible, fixed in some way to the floor, to prevent "rucking," is the next requisite. The bitch will settle down to her bed, will have her puppies thus, and in ten out of twelve cases give no trouble whatever. Again we repeat, leave her to her own devices.

In a few cases, mal-presentation, a dead puppy, or other obstetric trouble may make manipular assistance necessary. Then send for a vet. at once. Scores of bitches are ruined by inexperienced handling at such a juncture, and it is not a moment for economy or even delay, in the hope that "she will be all right in the morning" to be practiced.

With this treatment a bitch will do all right, bring her family into the world, and have all clean, dry, and cuddled up before her owner even knows that the all-important moment has arrived.

Business methods may not alone insure success, but few people ever make a success of the live stock business without them. The no-accounts kennel is apt to degenerate into the kennel of no-account, for shiftless, haphazard ways of doing things soon spoil any business. They do that!

Getting together a few good dogs and a beautifully illustrated dog book does not necessarily mean a famous kennel and heavy profits. The fact of the matter is that the dog-producing industry requires as much brains and shrewdness as any other; and it just has to be run on business lines to be a commercial success.

Good penmanship, book-keeping and spelling, though desirable, are not necessary. The great essential is to start a simple book or set of books now, and jot down everything therein so that you understand it yourself. Keep a strict account with each dog. Charge it with its keep, and credit it with all it brings in.

Then, once or twice a year take stock by totalling up the sums of the receipts and expenses, and estimating the present value of the live and dead stock on hand, so that you know just where you are, and what profit or loss has resulted from the last year or half-year of trading.

Of course, it means a certain amount of extra trouble; but it has always been the trouble taken with things that counts. "Seest thou a man diligent in his business, he shall stand before kings." That is as true to-day as it was when King Solomon wrote it.

Have a little account book, too, in which to put down the chains, leads, collars, and kennel sundries you loan to other folks. That is much better than by-and-by forgetting who had some of them—especially when the borrower suffers from an even shorter memory than your own.

Then it is an excellent plan to keep a careful record of your breeding work and of the little things you learn as you go along. This often saves one

making the same mistake twice; and, if it does take a little time, it is one of the matters for which time must be found if waste and error are to be eliminated.

A good scale for weighing purposes is a fine kennel appurtenance; and it is an excellent plan to weigh all stores on receipt, seeing that the weights correspond with the invoice. The man without a scale is always at a disadvantage. He cannot check his purchases properly, and never knows for sure that he is getting what he pays for. He is reduced to hoping that the butcher sent the right weight. While no one supposes for a moment that any decent tradesman would intentionally do otherwise, an honest man is liable to make mistakes, and thus a careless buyer may be a loser.

"Putting it down" is the one cort of kennel account every beginner should piously eschew. Buying on credit is bad enough policy, for indebtedness means worry all the world over; but selling dogs on credit is worse, because you sometimes never get the money at all.—Illustrated Kennel News.

DOINGS IN DOGDOM.

Official announcement is made by Mr. Thos. S. Griffith, president of the Spokane Kennel Club, that entries for the club's fourth annual show, in conjunction with the Spokane Interstate Fair, will close on September 16th. The show will be held September 25th to 28th inclusive. Mr. A. B. Jackson, the club's secretary, will also act as superintendent of the show. The bench show committee is composed of Messrs. Griffith, Jackson and C. D. Bond. Silver and bronze medals will be awarded to first and second winners. The classification is a rather large one and the list of specials will be numerous and valuable.

Further information, premium lists, etc., may be had by addressing Secretary A. B. Jackson, Spokane, Wash.

A bench show will, it is rumored, be held in Tacoma this fall.

TRADE NOTES.

The "Old Reliable" On Top.

Referring to some of the prominent competitors at the recent Grand American Handicap, and their guns, loads, etc., Capt. A. W. Du Bray (Gaucho) says: "Messrs. Crosby, Gilbert and Huff shoot Parker guns, Leader shells, factory loaded, Du Pont and E. C. powders, and Tatham's No. 7½ chilled shot, and what is singular to relate, all the longest runs and all medals and cups emblematic of the various styles of shooting in championship matches are held by men using Winchester factory loaded ammunition, and several are held by men who shoot Parker guns.

Gun Cleaning Preparations.

The need of efficient preparations for keeping firearms in good condition has long been felt. In response to this, the Winchester Repeating Arms Co. have just placed on the market their "Red-W" preparations, four in number, by the use of which all firearms can be kept in the best of condition. "Red-W" Gun Grease is intended to prevent rust. A light coat on any polished metal will preserve its finish and luster. It does not become rancid and will not bow off a warm barrel and leave it dry like other greases and oils. "Red-W" Rust Remover will remove rust from the bores of all firearms and from any metallic instruments. "Red-W" Gun Oil is a perfect oil for lubricating all kinds of firearms typewriters and delicate machinery. It does not gum or stick or become rancid under any conditions. "Red-W" Crystal Cleaner dissolves the copper and nickel fouling in rifles without injury to the barrel. A cleaning outfit comprised of these four preparations will enable anyone to keep his gun free from rust and metallic fouling and in easy working order. The first two are put up in collapsible tubes and the others in bottles. The Gun Grease and Gun Oil cost 15 cents and the Rust Remover and Crystal Cleaner 25 cents each.

U. M. C. Notes.

Following the "sweeping victory" at the Grand American Handicap, U. M. C. shells captured the high average as well as the amateur average at Fort Dodge, Iowa, shoot. William Hoon, shooting U. M. C. shells, was the star of the shoot, losing only 10 birds out of 400. George Maxwell, the U. M. C. one-armed expert, was only a few targets behind on 400 birds. A U. M. C. squad, composed of Messrs. Adams, Kantskey, Ford, Olmstead and Hoon, averaged 95½ per cent.

F. C. Richl has been taking a little rest since the Grand American Handicap. On July 4th he went out and shot with his old friends at the Upper Alton Gun Club, broke 90 out of 100 with U. M. C. shells. At Chicago, July 6th, he kept up the good work by breaking 69 out of 75, shooting U. M. C. shells. Mr. Lem Willard was the high amateur for that day, dropping 3 out of 50 at 21 yards, also shooting U. M. C. shells. Mr. Willard broke 23 out of 25 in Chicago on June 29th, to work off a few of the sore spots left by the Grand American, using the same shells.

At Memphis, Tenn., July 4th, Mr. Jeff J. Blanks made the highest score, breaking 93 out of a possible 100. There were forty-five shooters. Mr. Blanks was certainly a popular winner of the Grand American and amateurs are very glad to meet him and

grasp his genial hand. He has not forgotten the tools that brought him the Grand American Handicap, but continues to use the good, reliable U. M. C. shells and a modern Remington Auto-loading shotgun.

The New Jersey State championship again fell to U. M. C. shells. The winner was Mr. George Piercy, who won with a score of 47 out of 50. He used U. M. C. regular factory loaded, steel-lined shells.

Mr. A. W. Kirby won the Press Post trophy at the Ohio State shoot, Columbus, breaking 24 out of 25. He used U. M. C. steel-lined shells.

Peters Points.

At the St. Louis tournament, June 22-23, second high average was won by L. I. Wade, who scored 321 out of 350 with Peters Loaded Shells.

J. E. Vaughan, Southern California representative of The Peters Cartridge Company, won high average at San Jose, June 20-23, scoring 162 out of 170 with Peters Loaded Shells.

The Grand American Handicap, held at Chicago, June 18-21, served to call attention in a very forcible way to the unsurpassed shooting qualities of Peters Loaded Shells; and let it be understood distinctly that all the shells furnished by The Peters Cartridge Company for the Grand American Handicap were actually machine loaded, and were not in any sense hand loads. They were identical with the several carolads of shells turned out every day at the great Peters factory, and indicate very clearly that the materials and loading processes as used by The Peters Cartridge Company are the best that money can buy or science devise.

At the Grand American Handicap referred to above the following honors were won with Peters Factory Loaded Shells:

Tie for high professional average, first day, L. I. Wade, 99 ex 100. Tie for high amateur average, first day, by C. D. Linderman, 98 ex 100. Tie for second place in the Preliminary Handicap, by Messrs. T. E. and J. R. Graham, both scoring 95 ex 100. Tie for first in the Grand American Handicap by M. J. Maryott, 96 ex 100. Tie for third in the Grand American Handicap by H. E. Poston, 94 ex 100. Tie for third in the Amateur Championship by J. R. Graham, 186 ex 200. Tie for fourth in the Professional Championship by H. W. Kahler, 186 ex 200.

In addition to these, two men on the winning team in the Team Championship race, namely, Messrs. J. R. Graham and H. M. Clark, used Peters shells, from all of which it will be clearly seen that this popular ammunition was in the forefront of the fray all the time.

California Lions.—A report from San Jose is to the effect that hunters of large game who wish to try their prowess on more dangerous beasts than the inoffensive deer will find coadjutors in Morgan Hill ranchers who are mourning the loss of valuable stock killed by mountain lions. Within two weeks past a colt pastured on the Corralitos ranch has been found picked clean to the bones and C. H. Barrett, owner of the ranch, states that the anti-hunting signs on his place are down until the cougar is killed. He shot at the lion, which came within a few rods of his home, but missed. He will also contribute a few hundred coyotes to hunters with dogs who wish to exterminate them.

Madrone Springs stock herders are in despair over the loss of many fine animals, both calves and colts, that have been killed by a pair of lions.

Bert Edwards has a new cart for his good horse, Daken D.

W. L. Vance recently received a fine new speed cart, which will be used with Sir John S.

Frank Kelly, of Kelly Brothers, has just purchased from the Kinney Manufacturing Company a fine new cart for his promising Wanda colt.

The Kinney Manufacturing Company is in receipt of a carload of getaways, speed wagons, runabouts and sulkies.

"The Derby Winner" was one of the older racing dramas, but long before it was produced the stage saw the "equine drama," in which horses played as prominently as actors. "Mazeppa," in which one of the actors was lashed to a vicious charger, alleged, which dashed off the stage with him, was one of those old-time equine dramas. Joe Jefferson once appeared in one of them.

A horse was one of the most prominent actors in "Shenandoah." In that play Gen. Phil Sheridan rode from Winchester twenty miles away and checked the retreat of his troops. He rode on the heroine's horse.

Richard Mansfield never has ridden a horse in a race of the stage, but in "Henry the Fifth" he bestrode one with great grace in the big battle scene. Henry Irving, Beerbohm Tree and other well known actors produced the same play, and Tree and Irving used the same horse, although at different times.

The race track scene in "The County Fair" has been seen in this country and in England for eighteen years. The appliance of the treadmill, which makes the scene of the race so realistic, was invented by Neil Burgess, who still plays the principal part in the play. The same appliance is used in the chariot race scene in "Ben Hur." Klaw & Erlanger, who own "Ben Hur," pay Burgess a weekly royalty for the use of his invention.

AGE OF DAIRY COWS.

The age at which the dairy cow attains her highest yielding capabilities and the length of time which she will maintain her highest standard are fit subjects for interesting and sarching investigation. Important in various respects as this question is, like many others of equal significance to the farming industry, it has never been searchingly inquired into in this country. We appear to have neither the time nor the money requisite for the carrying out of such eminently important work, or, at all events, we are contented to move along on the old haphazard lines, and to allow these finer fundamental points to look after themselves. To a substantial extent the deficiencies of the United Kingdom in respect to the solution of economic problems is made up by the enterprise and industry of American scientists and agricultural leaders. Among the numerous important questions that have engaged attention at the fully equipped experimental stations in the United States, those referred to in the opening sentences, have occupied a prominent place. The particulars of the experiments are furnished in a bulletin issued from the Wisconsin station, at which institution elaborate investigations have been carried out. Probably the conclusions arrived at are in approximate accordance with the prevailing ideas of experienced farmers; but even if the trials have been productive of no new result of striking significance it is something for the farmer to know that his theory and practice are based on solid and substantial grounds.

On the evidence of the Wisconsin experiments the pronouncement is made that a cow is at her best during her fifth and sixth years, up to which time the production of milk and butter fat, if the animal is in normal condition, increases each year. Most farmers will, as a result of their own observations and practical experience, endorse the accuracy of this verdict. As to the length of time that a cow will maintain her maximum production, it is remarked that this will depend largely upon her constitutional strength and the care with which she is fed and managed, and here again general experience is in entire agreement with the verdict of searching investigation. A good average cow, properly managed, should maintain her highest standard of production almost unimpaired until after ten years of age, while it is found that a considerable number of excellent records were made by cows for some time after they had passed this age. Generally speaking, however, a cow may be said to have passed her best after she has completed her tenth year, and consequently in ordinary dairy herds where milk production is the sole or chief object it may be regarded as desirable to dispose of all animals before or immediately after they have completed their tenth year. Of course, this rule cannot be held to apply to pedigree herds where the milking performances of the animals are of inferior import to their breeding qualities. No owner of a really successful breeding pedigree cow would dream of parting with her as long as she continued to produce good calves; for it does not follow that because she may have, through old age, fallen off somewhat in her milking powers her offspring born after she is ten or twelve years old will be less valuable as milkers than those born when she was in her prime.

The dairy farmer has to study carefully every point that makes for economic production, and the weeding out of cows that have begun to fall off in their milk yields is a process that should be attended to regardless of sentiment. There are other advantages to be gained besides liberal milk production by attending strictly to the question of age limits. It may be taken as an established principle that cows that have passed their best as milkers have also entered upon a stage in their careers at which they are more susceptible to indifferent health and the other ills that afflict the bovine race. For instance, it has been found—and it is in entire accord with reasonable expectation—that the older an animal becomes the more liable she is to develop tuberculosis. It does

not necessarily follow that the milk of an animal is appreciably affected in purity and wholesomeness by advancing age, but undoubtedly there is the presumption that neither her milk nor her carcass can be so confidently relied upon after declining age has set in. Consequently, from considerations of health alone, there is sufficient inducement to keep in the herd only animals still in their prime. By this remark we do not mean it to be inferred that we are advocating the excessively wasteful system adopted in many town dairies of buying in cows of from four to six years old and selling them off at a year or eighteen months afterwards. That practice, which, unfortunately, seems to be fairly profitable, or, at all events, very convenient, is responsible for draining the country of the very best class of general purpose cows, and, apart from the pecuniary considerations of those who adopt it, possesses no redeeming qualities whatever. What we mean is that dairy farmers would be consulting their own interests if they made it a rule in their systems of management to eliminate from their herds all animals upwards of ten years old, as by so doing they would obtain a better return in milk and substantially reduce the risk of the carcasses of the discarded animals being condemned in the meat markets.—The Field.

THE SCIENTIFIC FARMER.—WHO IS HE?—WHAT IS HE?—WHERE IS HE?

Who is he? In a partial sense he is every farmer who tries to understand the laws of Nature; who keeps his eyes and ears open to discover the working of those laws. He may never have looked into a book, yet if he has read nature aright and has been obedient to what she has taught him, he is to that extent, the extent of his knowledge, a scientific farmer. There are thousands of such farmers. All there is to scientific teaching is to get men to see more, know more, and work more, in obedience with nature's laws. True science never goes beyond true knowledge and who ever has that knowledge is to that extent scientific.

What is he? He is, first, a close observer of the soil, of plant life, of animal life. He never asks anything of his land without paying for it. He is honest with the land; he will not steal from its support; he keeps strict account of what he owes it. And so he considers what he owes to the crops he grows in the way of cultivation and care; to his buildings and fences, and to the animals about him which have been committed to his keeping.

In all his contact with the soil, with plants, with animal life and the things of the farm, as well as with men, he is rigidly honest, charging himself with the full account of what he owes to all these. He will not steal from any of them, nor will he try to deceive himself by calling his ignorance knowledge. Such a man is truly scientific as far as he goes, even if he cannot read a word.

Where is he? He is to be found all about us in the presence of every farmer who strives hard to understand the working of nature's laws, for nature governs by principle not by caprice. She has a law for every thing she does. Chemistry is nothing at all but a study of the elements that compose things, and their proportion one to the other. Biology is a study of the laws that govern animal and plant life. The foundation of all pertaining to the farmer's life is the chemistry of things, the biology of life.

Then he goes one step farther and studies the force of things, the physics of the farm. Now, on all these matters, he cannot be wholly ignorant. He must know something of them. In so far as he knows the truth, he is a scientist.

One word more. He must be energetic. He must pursue and not be pursued. He must follow up what he knows, for only in this way can he know more. Said a farmer once about a neighbor: "He worked hard to wo what he thought was right."

INSECTICIDES.

One of the best insecticides is the little chick—not the size with strong legs and claws.

Coop the old hen close to the garden fence and let the chicks have the run of the garden.

Make friends with the birds. It is cheaper to feed birds than to raise hugs and worms. Birds always pay their board.

Syringe the carnations occasionally with coal-oil emulsion, following this with a dash of cold water upon all sides of the the plant to rid it of green lice.

A brass garden syringe is a good investment if you use it properly and often enough to make it pay. It won't use itself.

To keep the ants off the peony buds dust well with powdered tobacco and place tobacco stems over the soil about the roots.

Ants in the garden may be trapped by placing fresh meat bones or bacon rinds where they collect. When covered with ants dip into boiling water, dry and repeat.

Layers of lime or wood ashes around beds of plants will keep the slugs and snails out of the bed. Where they are bad, hand pick at night by the light of a lantern.

Dalmatian insect-powder is a fine remedy for black flies and green lice on plants. Give a light application after a shower or when the plant is wet with dew, once a week, on all sides.

For bark-lice on either ornamental shrubs or trees and on fruit trees make a rather strong solution of sal-soda and apply with a brush (a white-wash brush will do). Use the solution plentifully all over the bark.

A layer of lime applied to the surface when the ground is dry and the weather clear will sometimes drive ants from their villages.

A watering of hot Cayenne pepper tea, as hot as the hand will bear, will rid plants of ants and many other pests if applied at their roots.

If manure is too fresh or too green when applied to the garden, vermin are sure to breed there, and too much care cannot be taken to have only well rotted manure, if applied in the spring or summer season. Apply the fresh manure in the fall, or pile and turn it often under shelter.

To purify water in the lily ponds and to destroy insect life in it, slake fresh stone-lime in water, making a liquid as for whitewash, then stir some of this into the water until it becomes thoroughly incorporated. If not effective, add a little more. The lime must be fresh and sharp.

To do away with rose pests mix by rapid stirring a tablespoonful of coal-oil with a pint of very hot, strong soapsuds and when well mixed add this to enough hot suds to make a gallon. Mix a pint of unslaked lime with a quart of water and when settled pour the clear lime water into the coal-oil emulsion, adding to this a teaspoonful of Paris green, stirring it all rapidly and thoroughly. Keep this mixture well stirred when using and spray or syringe the leaves, under the upper side, with plenty of the mixture. It will be "good" for the bush, if not healthy for the bugs and slugs.

The best insecticide is a healthy, thrifty growth of the plant.—Helen Watts-McVey.

PRIVILEGES FOR SALE

WOODLAND RACE MEETING

SEPT. 4, 5, 6 and 7, 1907

BETTING (Auction and Mutual Pools) PROGRAMMES.

BAR AND CIGAR STAND.

C. A. SPENCER, Manager,
Woodland, Cal.

FOR SALE—SEARCHME 2:21.

By Searchlight 2:03½, dam Wanda 2:14 by Eros. A handsome seal brown gelding, six years old, 16.1 hands high, weight 1200 lbs. Good-gaited trotter, has been a mile at Pleasanton this spring in 2:16, with the last half in 1:05. Will make a high-class roadster or matinee horse. Gentle disposition and good headed and afraid of nothing on the road. Is absolutely sound, without a blemish. For full particulars address H. OLSEN, 814 E St., Haywards, Cal.

"SAVE THE HORSE" SPAVIN CURE

Registered U. S. Patent Office

Makes a Tendon Like a Rod of Steel

Makes money winners out of cripples; age of horse or age of lameness makes no difference. It will strengthen, repair and cure any broken down, weak or injured condition of the tendon; it infuses strength and acts as a permanent bandage to the parts.

It is the only remedy of its kind ever conceived, and the only one so positive and successful as to warrant selling under a signed guarantee to refund money if it fails.

"SAVE THE HORSE" Permanently Cures Spavin, Ringbone (except Low), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse works as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy, booklet and letters on every kind of lameness.

At Druggists and Dealers or Express Paid.

VETERINARY SURGEON

1155 Golden Gate Ave.

Branch Hospital, corner Webster and Chestnut Streets,

SAN FRANCISCO, CAL.

FOR SALE.

The Handsome Standard Bay Gelding, Honduras.

Nine years old, by Prince Nutwood 2:11½, dam by Strathway. Stands 16½ hands and weighs about 1225 pounds. Has worked miles in 2:24, quarters in 33 seconds with six weeks' training. He has never been trained since, but was used on the roads at Palo Alto. He is good gaited, wears no boots, does not pull a pound, absolutely sound, afraid of nothing, a lady can drive him with perfect safety. W. H. Williams had him in training and says that he looks like a 2:10 trotter. He is a remarkably good individual in every respect and a high class roadster and matinee horse.

Will also sell a good Studebaker buggy and a McKerron harness. The above will be sold on account of the owner leaving for Europe. Horse can be seen at Hans Frelsens's Stables, Twenty-fourth Avenue, near the Casino. For further particulars address this office.

COLTS AND BROODMARES FOR SALE.

Miss Horgan, winner of the Horgan Futurity Stake for yearlings last year, by Sidmoo 2:17½, out of a producing dam.

Yearlings, two and three-year-olds by Sidmoo out of producing dams, and broodmares that are producers and stunted to Sidmoo 2:17½. These mares are by Alcona, Dexter Prince and other good sires. These horses can be seen at the Concord race track. For further information address JOHN OTT or ED. WALKER, Concord, Cal.

FOR SALE AT PLEASANTON.

Five-year-old pacing Stallion. Can step a mile in 2:13 or better, and a quarter in 30 seconds. Sired by Chas. Derby, first dam Monico by McKinney, second dam by Director, third dam by Hawthorne, fourth dam by Black Hawk. This horse is sound, gentle, and can be seen any time this month at J. R. Albertson's stable at the Pleasanton race track. A. G. SHIPPÉE, 247 W. Fremont St., Stockton, Cal.

BREEDING SHIRE HORSES.

One of the most interesting points connected with the breeding of Shire horses, says The Field, is that whereas there is unanimity of opinion that the size and weight of the breed should be maintained, there is almost equal harmony of belief that the best results in breeding high-class stock are obtained from broodmares of moderate size. Prohably no one is able to furnish a sufficiently explicit reason why this should be the case, but it is indisputable that medium sized mares are often more successful in the breeding of show stock than mares 16.2 or over. The majority of breeders could testify from their own experiences to the truth of this remark, and that they believe in the superior properties of dams that would pass under the 16.1, or even the 16 hands measure, is illustrated by the popularity of such animals in the sale ring. In the show yard the bigger exhibit will usually gain some advantage on account of her weight and size, but in the sale ring, when the primary object is the breeding paddock, there is not the same readiness to differentiate between the large and the small animals. Of course, there may be some truth in the contention that breeders are not afraid to utilize the smaller animals for stud purposes for the sufficient reason that they can always correct shortness in weight and height by mating them with a sire possessing these properties. Nevertheless, it is a common saying with a real meaning that the want of size in a mare is no detriment to her qualities as a breeder. Some, indeed, openly express the conviction that moderation in size is a distinct advantage. It is doubtful if these views are entertained, or are well founded with respect to mares only. There is a considerable amount of evidence to support the theory that the compact, moderate sized stallion also is often more impressive than the sire that excels in bulk and weight. The important point in connection with this subject is that the belief in the impressive qualities of moderate, or under sized mares or stallions should not be permitted to unduly influence or mis-

direct the type of animal produced. The Shire horse, if he is to be a marketable animal, must possess both weight and hauling power, and consequently the successful sires or dams that are in any degree lacking in these characteristics should without fail have their deficiencies counterbalanced by being mated with animals of larger, if coarser, type.

HOLLISTER HAY CROP.

Manager Lathrop of the Lathrop Hay Company, after careful investigation, estimates the hay crop of the valley at 27,000 tons. This is a large increase over estimates made earlier in the season, brought about by favorable weather conditions during April and May. The hay is all of excellent quality and the prices are the highest for many years past. Three thousand tons of last year's hay crop are still in the warehouse with little prospect of immediate removal, owing to the embargo the Southern Pacific is constantly putting on shipments of hay to San Francisco.—Free Lance.

A cow requires from eight to ten gallons of water daily, if she is capable of giving an abundance of milk. Water is the largest proportion of the milk, and the cow should have a sufficient amount to use in manufacturing milk and for supplying her bodily requirements. If the cow must seek water in some low, shallow place in the pasture she will be compelled to use that which is not pure. Every farm should have a plentiful supply of water for the cows, or they cannot yield their full quota of milk.

A steady diet of corn for the sow right up to the time of farrowing often causes pigs to die in the womb.

Meal slop is good hog feed, but a little wheat middlings mixed with it makes it very much better.

After the pigs come feed the sow all she can eat of nutritious rations. A fair amount of corn will not hurt her then.

To keep the youngsters free from lice, dip them just before they are weaned. Then dip them again late in the fall.

GRAND OPENING AT PLEASANTON.

Track Record Lowered Three Times by Sir John S. a Son of Diablo.

One of the greatest races ever seen in California opened the four days harness racing program of the Pleasanton Matinee Club on Wednesday of this week. In the opening heat of the 2:08 pace, the first race on the card, W. L. Vance's great five-year-old stallion Sir John S. by Diablo 2:09 1/4, out of Elisa S 2:16 1/2, by Alcantara Jr., paced the mile in 2:08 1/2, just two seconds faster than the former race record of the track, which was set at 2:10 1/2 in 1904 by Kelley Briggs. The next heat Sir John S. again set a new mark, pacing the mile in 2:07 1/4, just equalling the best time ever made in their work on this track by Anaconda 2:01 3/4, and Searchlight 2:03 3/4, and only a quarter of a second behind the mile in 2:07 made by The Donna in her last fast work out before leaving for the Grand Circuit this year. Before the horsemen who train at Pleasanton had ceased wondering at these two marvelous performances by a pacer in his first start of the year, knowing as they do the hill the horses have to climb on the back stretch of this track, he smashed both these records by pacing the third heat in 2:06 1/4, a mile that was considered almost an impossibility over this track for anything but a two-minute horse. But Sir John S. was equal to the task and won his race handily, although driven out in the second and third heats, by the McKinney mare, Miss Georgie, owned by W. A. Clark Jr. and ably handled by J. O. Gerrety. She was at his neck in both these finishes and compelled him to pace these fast miles. She got off a length or so back in each heat and was separately time the last heat in 2:06 1/4, the same time made by the winner. She never paced so fast before and showed herself to be a great mare, and as game as they are made. She was well backed, the auctions and mutuels being liberally patronized. Pools varied considerably, but an average one before the first heat would be Miss Georgie \$10, Sir John S., \$10, Miss Idaho \$8, and the field, containing Kelly Briggs, Delilah, Cresco Wilkes and John R. Conway, \$6. Several hundred dollars worth were sold the evening before the race with Sir John S. a slight favorite. In drawing for positions Delilah had the pole, John R. Conway second, Kelly Briggs third, Sir John S. fourth, Miss Idaho fifth, Miss Georgie sixth and Cresco Wilkes seventh. In scoring not more than five could come down abreast. Miss Georgie and Cresco Wilkes being put in the second tier. There was quite a play on Miss Idaho for the heat, but after the word was given the red cap of Vance soon showed in front and he won well in hand in 2:08 1/2, with Miss Idaho a good second and John R. Conway third. In the next heat Sir John S. had the pole and after a few scores he took them away at a dizzy clip. The quarter was reached in 0:31 1/4, the half in 1:03 3/4, the three-quarters in 1:35 1/4 and the mile was in 2:07 1/4. Sir John S. led all the way, but at the last eighth Gerrety brought Miss Georgie up with a rush and nearly caught Vance napping, forcing him to use his whip in a lively manner. Sir John S. had shortened his stride, but he responded gamely to Vance's urging and won by less than a half length from the fast coming mare. In this heat, as in all three, John R. Conway was third, and in the last heat he was timed separately in 2:07 1/4 for the mile. The third heat was almost a repetition of the second, except that Vance found it best not to let up on his horse at any part of the mile, and while he won at the finish rather handily, he used his whip vigorously the last few yards to offset the rush of the Clark mare. Three better heats or nicer finishes were never seen in a race, and there was great enthusiasm over each. Miss Georgie, Miss Idaho and John R. Conway all showed themselves able to beat 2:08, and 2:06 should not stop some of them at Santa Rosa. Kelly Briggs is not the horse he was two years ago, and Delilah is off and not up to her usual form. Cresco should do better after another race or two.

The 2:40 trot went to the handsome McKinney mare Yolanda in straight heats. She was splendidly driven by Davey and looks like a very high class trotter, as she was tending to business all the time, and made no fuss, was always on a trot and did just as she was asked. Her final heat in 2:14 1/4 was not her limit by any means. She was bred by Dr.

Masoero, the popular veterinarian of San Francisco, and is owned jointly by the Doctor and Mr. Frank H. Burke of San Francisco. She is by McKinney 2:11 1/4, dam Moscovita by Guy Wilkes; second dam Moscova by Belmont 64. The bay gelding Ben Russell, owned by Mr. Eastman of Palo Alto, and well driven by Fred Chadbourne, trotted an excellent race. He is a good gaited fellow and a fine looker, and as he is improving all the time 2:12 should not bother him later on. The Monterey mare, May T., showed a great deal of speed, and when she gets a little steadier will make the winner of this race step her best to beat her. There was little betting on this race, Yolanda being a prohibitive favorite.

The pace for three-year-olds was a cake-walk for James Marshall's great colt Aerolite. Chadbourne has him in grand shape, and after winning the first two heats with him in 2:26 and 2:21, let him down the last half of the third heat in 1:04, with the last quarter in 31 1/2 seconds. The mile was in 2:14 1/4. Josephine by Zolock and Beulah by Nutwood Wilkes took second and third money respectively.

The day's sport was one of the best ever seen on a harness race track on this Coast. The management of the meeting by the members of the Pleasanton Matinee Club is most excellent. The grounds are clean and neat, the track in better shape than it ever has been and the policing could not be better. The stretch was kept absolutely clear during the heats, and no favoritism has shown anyone. The press-box, which is usually so crowded with outsiders that the newspaper men find it difficult to do their work, was kept clear of all but the reporters, who fully appreciated this foresight on the part of the club's officials.

The judges during the day were Dr. A. McLaughlin, Benjamin Cram and I. B. Dalziel. In the timers stand were W. J. Kenney, Harry Moore and Dan Misner. Ed. R. Smith acted as starter.

The summaries of the day's racing follow:

Pacing, 2:08 class, purse \$800—			
Sir John S., b s by Diablo-Elisa S. 2:16 1/2 (Vance)	1	1	1

A TRIO OF FAST PACERS.

Copa de Oro, the five year old colt that won the 2:20 pace at Salinas so impressively last week, has all the earmarks of a very high class pacer and race horse. This colt is owned by Mrs. L. G. Bonfilio of Los Angeles, and well may she be proud of this, her first horse to be raced. For a green colt to take such a mark in his first start is remarkable, and when in making the record he defeats a field of high class pacers, one of which, Inferlotta, has shown more speed than any pacer now racing in California, he must be given the stamp of approval as a great young horse. He is a beautiful bay, carries his head high, stands about 15.3, and races without hobbles and wears hardly any boots. Durfee, who trains and drives him seems able to place him anywhere, and in the Salinas race, no matter what gait Inferlotta would take, Copa de Oro seemed able to go up to her when called on, or would fall back as desired. Copa de Oro impressed me as having the greatest racing head I have seen on a young green horse for a long time. One swallow does not make a summer, but the showing of Copa de Oro in his first start was certainly most impressive. He has one fault, poor feet, but they were not naturally so Mr. Durfee tells me and do not trouble him so far. His breeding is superb. His sire is Nutwood Wilkes, a horse that all must admit gets great race horses. His dam is Atherine by Patron, second dam Athene, a producing mare by Harold, third dam by Pilot Jr., fourth dam by Manbrino Chief, fifth dam by Downing's Bay Messenger, and sixth dam by Whip Comet. There is not a cross of poor blood in his veins.

Inferlotta, the little mare owned by W. E. Valentine of Los Angeles, and trained by C. T. Hewett,

is a wonder for speed. I never saw any horse pace as fast as she. At Salinas she would get off several lengths back, then take the extreme outside on the rough ground and pace by the others as if they were tied, while they were going a 2:04 clip, as the first quarter was in 31 seconds. She pulls heavily at the start, and it is almost impossible to control her, consequently, a great deal is taken out of her at the start if there is much scoring. I saw her work a mile at Pleasanton last Wednesday in 2:07 all alone, and not even a horse at any place in the stretch to urge her on. She went to the half up that hill in 1:02, too fast for that track. The late Monroe Salisbury saw Bolivar 2:00 3/4 driven that half in 1:03 3/4 once and turning away, putting up his watch, said: "He'll never get home," and it took Bolivar a minute and twelve seconds to come the last half. Yet this little mare goes up the hill in 1:02 and comes home in 1:05. She is a wonder and they say she has paced a quarter in 28 1/2 seconds. She wears the hobbles and they are carried pretty tight. Outside of her desire to rush away she seems a good actor. It would not surprise me to see her pace the Santa Rosa track in 2:04. She is by Inferna 2:15 1/2, a pacing son of Diablo, that is out of that famous old brood mare Biscari, by Director. The dam of Inferlotta is Carlotta Wilkes, a great brood mare by Charley Wilkes, second dam a producing mare by Alcantara, third dam by Clark Chief, etc. She is seven years old and was bred by the late Henry Pierce at Santa Rosa Stock Farm. Inferna 2:15 1/2, her sire, was sold at auction by this Farm a few years ago, and purchased by Captain McNally, an army officer, who is now stationed at Fort Robinson, Nebraska.

Like Inferlotta, the pacer Sir John S., whose record of 2:06 1/4, made in the third heat at Pleasanton last Wednesday, is the talk of harness horse-doms in California, has two crosses of Alcantara blood. He gets one through his sire Diablo, that is out of Alcantara's best daughter Bertha, and another through his dam, Elisa S. 2:16 1/2, who is by Alcantara Jr. Sir John S. was bred near Marysville, came out a green horse last year and took a record of 2:10 1/4 at Woodland as a four-year-old. He is a big strong going pacer, wears loose hobbles and is steady as a clock. Like most studs he requires to be driven, but when called on shows wonderful speed and is said to have paced an eighth in 13 1/2 seconds. He is good headed and for his size finishes strong. He is game all through and will fight out a race to the last inch. Sir John S. looks like a coming two minute horse. His record of 2:10 1/4 as a four year old was easy for him, and his mile in 2:06 1/4 as a five year old, in his first race of the year, did not impress me as his limit by a good deal. He was picked last year as a horse that would pace in 2:07, and now that he has beaten that time, a mile in 2:03, would cause nearly every horseman who has seen him race to remark: "Just what I expected."

GOING SOME.

Sir John S. 2:06 1/4 by Diablo.
Copa de Oro 2:08 1/4 by Nutwood Wilkes.
Louisa A. 2:15 by Hambletonian Wilkes.
Opitsah 2:16 1/4 by William Harold.
King Athby 2:15 1/2 by Athby.
Aerolite (3) 2:14 1/4 by Searchlight.
Fresno Girl 2:15 1/4 by Seymour Wilkes.
R. Ambush 2:13 3/4 by Zolock.
Yolanda 2:14 1/4 by McKinney.

The above are new pacing records made in races at Salinas, and the first day at Pleasanton this year.

Coronado 2:09 3/4, worked a half in 1:02 1/4 at Pleasanton last Wednesday morning. He is the grandest looking son of McKiuey. He will have a walkover in most of the races in which he is entered this year.

Don't fail to pay your starting fee in the Breeders Futurity Stakes if you want to start your colt. This payment is due August 4th, which falls on Sunday, so Monday will do. But the payments must be made then.

LAST TWO DAYS AT SALINAS.

Track and Attendance Records of the Monterey Fair Both Broken.

The largest crowd ever seen at the Salinas track crowded the grandstand on Friday, the third day of the meeting, so that ingress and egress were very hard work, and occupied all the available space in front of the stand and for three or four hundred yards up and down the track near the wire. In the infield lined up alongside the rail were several hundred vehicles of all descriptions, while the space set aside for automobiles contained about two dozen of the "henzine huggies."

Probably two-thirds of this crowd had come out to cheer the favorite horse of Monterey county, Mr. J. B. Iverson's heretofore invincible North Star, but after he had given them a chance to exercise their vocal organs by winning the first heat of his race, he had to lower his colors for the first time in his life to the brown stallion R. Ambush, owned by Messrs. Bonnell and Strong of San Bernardino county.

There were but three starters in the race, North Star, R. Ambush and Boh Ingersoll, the last named being entirely outclassed by the other two. North

CORONADO 2:09 3/4.

Star was made the favorite at \$20 to \$8 for both the others, but the admirers of Ambush were slow in putting up their money, as the Salinas horse's reputation for being wonderfully fast and game was State wide, while the stallion from "San Berdo" was said to be a little crimped since leaving the warm sun of the south for the cloudy skies of the Salinas valley.

They were sent off to a good start in the first heat and North Star and Ambush sailed out in front of Boh Ingersoll, and when racing up the hack stretch Ambush stepped on the dangling end of a loose hoot, threw a shoe and went to a disastrous break, North Star winning easily in 2:16 1/2. The crowd cheered North Star all the way down the stretch and those who wanted to speculate on the race surrounded the pool box. The hackers of Ambush took heart, and when \$20 was paid for North Star they ran the short end of the tickets up to \$10 before the second heat was called.

In this heat Ambush did not lose any hoots or shoes and when the half-mile post was reached in 1:07, North Star was going easily and did not know that he was in a horse race. Entering the stretch the Nutwood Wilkes gelding in the lead, but here a struggle began. Inch by inch Ambush closed the small gap between them, and under a mildly applied whip he reached North Star at the 100-yards post and there the gelding faltered for a moment as if about to break, but Whitehead picked him up and kept him going. Ambush had the foot and the condition, however, to get his head in front of North Star and he won by that much in 2:13 3/4 amid the wildest cheering from the friends of both horses, many of whom did not know the result of the heat until it was announced by Starter Smith.

North Star money was so plentiful in spite of the loss of this heat that pools sold at \$20 on him to \$14 for the field. The third heat was driven a little differently, Whitehead believed that he would have won the second had he not been over confident, so he went out when the word was given to give Bonnell a horse race from start to finish. The two horses were side by side at the half in 1:05 1/2, and the son of Zolock was hanging on like a bulldog. Bonnell urged him a little and by the time the head of the stretch was reached he seemed to have North Star beaten and as the gelding stopped badly in the race for the wire Ambush won easily in 2:14 1/4, and it was plain to be seen that the Salinas horse was out of condition and doomed to defeat. After this heat North Star hied at the nose a little and in the fourth and final heat Whitehead drove him an easy mile and did not try to make a race at the finish. That North Star was out of condition was very apparent to those who had seen him race as a three-year-old, and take his work this spring, when he could trot miles in 2:12 and come the last quarter in 31 seconds any time he was asked. It was very disappointing to his owner and trainer for North Star to be beaten in such time at his home track, but they accepted defeat with good grace and congratulated Mr. Bonnell over his victory.

Another favorite went down in defeat when the 2:08 pace was contested. There were four starters in this race, and the talent picked the Nutwood Wilkes mare Miss Idaho as the favorite. She won two seven-heat races two years ago when owned and campaigned by Mr. Springer, now owner and driver of the great Sonoma Girl, and on this reputation, coupled with the fact that she had worked some very fast miles in the south before being shipped north, the wise ones thought she should about win. She managed to take the first heat in 2:09 1/4, which lowered the track record over a second, but there were plenty of buyers for the field pools after this heat.

In the second heat Miss Idaho looked to have the race won when entering the stretch, but here Gerrety, who was up behind Miss Georgie, began making a drive. Never did a driver make a harder effort, and amid shouts and cheers from the grandstand he simply lifted the McKinney mare the last hundred yards, and landed her first at the wire by a half length in 2:09 1/4. It was undoubtedly one of the most desperate and best driven finishes ever seen on a California track, and Mr. Gerrety was complimented on all sides for the performance. The next two heats went to Miss Georgie, with John R. Conway, well driven by Fred Chadbourne, the contending horse. This stallion will do to have a ticket on later on, and when any race in which he is a starter goes to five heats or over he is very likely to be a winner. Kelly Briggs, the old favorite, paced a very disappointing race, and was entirely out of condition, as Durfee had hard work to get him inside the flag in the last heat, which was in 2:11 3/4.

Saturday's Races.

The closing day of the Monterey Fair did not draw as large an attendance as the day previous, but the crowd was not a small one, and all the seats in the grandstand were occupied.

The 2:20 pace furnished one of the most sensational races ever seen on the California Circuit. Five horses started in this event, the little mare Inferlotta, owned by W. E. Valentine of Los Angeles, and driven by the veteran saddle and show horse trainer Mr. C. T. Hewett, being the favorite in the first few pools at \$10 to \$6 for Copa de Oro, driven by W. G. Durfee, and \$4 for the field, consisting of Diahless, driven by J. W. Zibbell, Highfly, driven by T. W. Barstow, and Bahe Madison, driven by Geo. Algeo. These odds did not last long, as Copa de Oro had strong support and was soon favorite at \$10 to \$8 for the field. In the scoring the little mare Inferlotta showed wonderful speed and was always on the pace, although she rushed away at every score and would go to the quarter pole before Hewett could pull her up. This must have taken considerable out of her, and it is not to be wondered at that a class young horse like Copa de Oro should be able to defeat her. Inferlotta would get off several lengths behind, then pace around the others and he in the lead at the quarter pole and keep this position to the half, but here Durfee would make his drive with Copa de Oro and out pace her through the stretch. The first heat was placed in 2:10 1/4, the second in 2:08 3/4 and the third in 2:09 1/2, with Copa de Oro the winner each time. In the last heat Zibbell made a great drive with Diahless and was a good second at the wire. This race was one of the best ever seen in California, and while it was won in straight heats there was a horse race in every one and the crowd was on its feet cheering the con-

OPITSAH 2:16 1/4.

testants as they came to the wire each time. Babe Madison was outclassed and caught the flag in the first heat.

All entries but one were scratched from the 2:17 trot, so a special purse of \$200 was offered for trotters and pacers. There were entered for this race the pacers King Athby, Miss Gomet and Victor Platte, and the trotters Princess and Ben Russell. King Athby had the speed of this hunch and won the first heat handily. Soon after getting the word in the second heat King Athby and Victor Platte collided, smashing both sulkies and throwing Leggett and Sampsell out, but no injuries were done to horses or drivers. Princess went on and won this heat, and the judges permitted the two pacers to start again. King Athby then won the two remaining heats as easily as he had won the first.

There were a couple of running races each day of the meeting, and an automobile race wound up the program on the last day.

Several horses were driven for records during the week and a number of new additions were made to the standard lists of both trotters and pacers. The racing was not only high class during the meeting, but was clean and well managed throughout. The Monterey Agricultural Association, and especially its efficient president and secretary, Messrs. J. B. Iverson and J. J. Kelly, deserve the highest praise for the manner in which all the details of the fair and race meeting were carried out. It was most successful in every way, and other year Salinas, which joined the regular circuit for the first time this year, will receive twice the number of entries and be one of the most important meetings of the circuit. Below will be found the official summaries of all the trotting and pacing events of the meeting:

R. AMBUSH 2:13 3/4.

WEDNESDAY, JULY 24.

Trotting, 2:24 class, purse \$800—

Fresno Girl, br m by Seymour Wilkes-Richard's Elector (Zibbell)	5	1	1	1
Dredge, br g by James Madison-Rosa Clay (Durfee)	1	3	2	2
Parachute, b g by Altitude Jr.-Babe (Sampsell)	6	2	3	3
Ollie B., ch m by Nutwood Wilkes-Baby (Gray)	2	4	5	4
Monocrat, b s by Woodmon-Altocrat (Judd)	3	5	4	5
Amado, blk s by Direct Heir-La Belle (Rutherford)	4	6	dr	
Time—2:19 1/4, 2:15 1/4, 2:15 1/4, 2:16 1/4.				

Pacing, 2:16 class, purse \$300—

Louisa, b m by Hambletonian Wilkes-Altounita (Whitehead)	1	1	1
Norda, b m by Mercury-Bessie Dale (Bonnell)	2	2	3
Just It, b m by Nearest-Babe (Barstow)	2	3	2
Time—2:15 1/4, 2:15 1/4, 2:21 1/4.			

THURSDAY, JULY 25.

Trotting, 2:10 class, purse \$400—

Coronado, br s by McKinney-Johanna Treat (Durfee)	1	1	1
Princess, b m by Eugener-Belle (Whitehead)	2	2	2
Time—2:17, 2:17 1/2, 2:17.			

Pacing, horses without records, purse \$300—

Opitsah, ch m by William Harold-Lenora (Chadbourne)	1	1	1
Babe Madison, b m by James Madison (Algeo)	2	2	2
Albert Direda, blk s by Robert Direct-Ida May (Coombs)	Dis		
Time—2:16 1/4, 2:20, 2:16 1/4.			

FRIDAY, JULY 26.

Trotting, 2:14 class, purse \$400—

R. Ambush, b s by Zolock-May McKinney (Bonnell)	2	1	1	1
North Star, b g by Nutwood Wilkes-Ivoneer (Whitehead)	1	2	2	2
Bob Ingersoll, b g by Nutwood Wilkes-Lew G. (Algeo)	3	3	3	3
Time—2:16 1/4, 2:13 3/4, 2:14 1/2, 2:18 1/4.				

Pacing, 2:08 class, purse \$400—

Miss Georgie, br m by McKinney-by Nutwood Wilkes (Gerrety)	2	1	1	1
Miss Idaho, s m by Nutwood Wilkes-by Forest Clay Jr. (Leggett)	1	2	3	3
John R. Conway, s s by Diablo-Lady Kohl (Chadbourne)	3	3	2	2
Kelly Briggs, br g by Bayswater Wilkes-Algenie (Durfee)	4	4	4	4
Time—2:09 1/4, 2:09 1/2, 2:10 1/2, 2:11 3/4.				

SATURDAY, JULY 27.

Pacing, 2:20 class, purse \$800—

Copa de Oro, b s by Nutwood Wilkes-Atherine (Durfee)	1	1	1
Inferlotta, b m by Inferno-Carlotta Wilkes (Hewett)	2	2	3
Diahless, b m by Diablo-thoroughbred (Zibbell)	4	3	2
Highfly, b g by Nearest-Miss Gordon (Barstow)	3	4	4
Babe Madison, b m by James Madison (Algeo)	Dis		
Time—2:10 1/4, 2:08 3/4, 2:09 1/2.			

Special mixed, purse \$200—

King Athby (p), b g by Athby-Alice (Leggett)	1	1	1	
Princess (t), b m by Eugener-Belle (Whitehead)	4	1	3	4
Victor Platt (p), b g by Platt-by Romie W. (Sampsell)	2	2	2	
Ben Russell (t), b g by L. W. Russell-Pacito (Chadbourne)	3	3	4	3
Miss Gomes (p), b m by Seymour Wilkes-Felita (Blosser)	5	2	dis	
Time—2:20, 2:16 3/4, 2:15 1/2, 2:17 1/4.				

*Collided; did not finish.

Sonoma Girl's victories are very popular in California, she being an idol with horsemen, and her owner, Mr. J. D. Springer, being held in the very highest esteem wherever he is known.

CLOSE OF DETROIT MEETING.

Detroit, Mich., July 26.—Driver Ed Geers, after starting five times without showing winner at the Grosse Point meeting, broke forth again in resplendent style this afternoon, when he drove the fastest mile, 2:03½, that has been shown in harness this year. It happened in the first heat of the day, when four pacers with records of better than 2:04 met in the free-for-all.

Geers was up behind Baron Grattan 2:03¼, with such good ones as Angus Pointer 2:02¾, Gratt 2:02¼ and Argot Boy 2:03¼.

Angus Pointer was the favorite, and Driver Sunderlin got him off well in a good start. He gradually drew away to a lead of half a length before they struck the first turn, but Baron Grattan was hanging on gamely, and he forced Pointer to step to the first quarter in 29½ seconds. At the half Angus Pointer was two lengths ahead, having negotiated the distance in 1:00½. The pace was too warm for Gratt, who was shut out. Argot was close up with Geers, and in this order they passed the three-quarter pole in 1:32½. As the great pair of side-wheelers straightened out for the finish, they were fighting it out neck and neck. All the way home the two struggled for supremacy, their positions varying at almost every stride, but Baron Grattan held enough in reserve to get to the front by a head in the final few yards. Argot Boy was third, a couple of lengths back.

In the 2:08 trot Charley Belden, who is getting over his lameness, won third money. Summaries:

Free-for-all pace, purse \$1,500—
 Baron Grattan, b g by Grattan (Geers)..... 1 1 1
 Angus Pointer, b g (Sunderlin) 2 2 2
 Argot Boy, b g (Cox) 3 3 3
 Gratt, blk g (Spencer) d
 Time—2:03¾, 2:04¼, 2:07.

2:15 trot, purse \$1,500—
 Lotta (formerly Lady Thistle), blk m by
 Guy Thistle (McHenry) 1 1 1
 Dewitt, b g (Smith) 2 2 2
 Tempus Fugit, ch g (Geers) 3 9 3
 McDougall, ch h (La Sell) 8 3 4
 Kem, Codero, Prince C., Cash Jr., Silver, The Pacolet, Dossie, Villiers and Charles Hubbard also started.
 Time—2:09¼, 2:09¼, 2:11¼.

2:12 pace, Chamber of Commerce Consolation, purse \$1,000—
 Shaughran, b h by Ananias (Kane) 1 1 1
 Dan S., b g (Geers) 4 2 2
 Billy Seal, b h (Cox) 2 3 d
 Tommy Grattan, b g (McGuire) 3 dr
 Lady Patch, b m (Custer) d
 Requisition, b g (Cunningham) d
 Time—2:09¼, 2:09¼, 2:08¾.

2:08 trot, purse \$1,500—
 Lillian R., b g by Letitia (McDevitt)..... 1 1 1
 Turley, hr g (Geers) 2 2 3
 Charley Belden, br g (De Ryder) 6 3 2
 Allie Jay, b m (Starr) 3 5 5
 Leonardo, rn g (J. Dickerson)..... 4 4 4
 Kid Shea, b g (Curry) 5 d
 Time—2:09¼, 2:08¾, 2:09¼.

The Blue Ribbon meeting closed Saturday with four races on the program. The first was the 2:10 pace, in which Thornway, a California bred pacer by Steinway, surprised the talent by winning in straight heats, placing all the heats inside of 2:10 and taking a record in the second heat of 2:06¾, giving Steinway his sixth 2:10 performer. In this race The Donna, Chas. De Ryder's entry, was distanced the first heat through an unfortunate break at the start.

In the 2:06 pace Custer took third money, being a close second in one heat in 2:06¼. He is not just right yet, but will do better later on. Athasham, favorite for the 2:12 trot, was beaten by Benico, but won second money.

Claty Latus won the M. and M. Consolation purse in straight heats, best time 2:09¾. The summaries:

2:10 pace, purse \$1,500—
 Thornway, b h by Steinway (Cox)..... 1 1 1
 Alleen Wilson, blk m (Wilson) 4 2 2
 Cleo S., b m (Nuckols) 2 3 3
 Rushville, b g (Cahagie) 3 5 5
 Regina, ch m (Valentine) 5 4 4
 The Donna, h m (De Ryder) d
 Time—2:07¼, 2:06¾, 2:09¾.

M. and M. Consolation, purse \$2,000—
 Claty Latus, ch m by Pilatus (Lezell) 1 1 1
 Margaret O., b m (Davis) 3 2 2
 Kenneth Mc, br h (Nuckols) 2 3 3
 Time—2:11¾, 2:10¼, 2:09¾.

2:06 pace, purse \$1,500—
 The Friend, blk h by Heir-at-Law (Cox).... 1 1 2
 Cascade, hr g by King Pilot (Davis)..... 2 3 1
 Custer, ch g (Hall) 4 2 5
 Eudora, blk m (Valentine) 3 4 4
 Vestro Boy, ch g (Murphy) 5 5 3
 Hal C., ch g (Shank) d
 Time—2:05¾, 2:06¼, 2:07¾.

2:12 trot, purse \$1,500—
 Berico, hr g by Palatka (Smith) 1 1 1
 Athasham, br g (De Ryder) 2 3 3
 Mae Heart, ch m (Colhy) 4 2 4
 Tokio, g g (Dickerson) 6 4 2
 Paul Kruger, b g (Cox) 5 5 5
 Camilla, h m (Boone) 3 6 d
 Time—2:13¾, 2:10¼, 2:11¾.

Drink Jackson's Napa Soda. It means health.

SONOMA GIRL'S GREAT RACE.

[By Henry Ten Eyck White.]

Detroit, Mich., July 25.—Sonoma Girl showed herself queen of the trotters to-day, when she beat Highball and the other M. and M. trotters in the most decisive fashion, doing the trick under circumstances not as favorable to her chances as to those of her opponents.

After finishing second to the Geers horse in the opening heat of the race, her defeat being due solely to the fact that she was obliged by her own slowness in scoring to accept the worst of the start by six lengths, she came out for the second mile a model trotter in every way, and fairly raced Highball into the ground in 2:06¼, his time for the opening heat being 2:07½. Then she came back, apparently fresh as ever, and led the weary gelding around the course in 2:09¼, he stopping so in the last eighth that three others also passed him.

That is the story of the race in brief, the contest being confined entirely to the two horses named, while Beatrice Bellini beat the rest of the field with equal ease. But before the California mare's superiority was established there were some heart breaking moments for her backers, and for a time it looked as if she would so handicap herself by bad behavior at the post as to make the race an easy one for Highball.

There were ten starters. Marjorie drew the pole, Sonoma Girl second place, Beatrice Bellini third, Tolling Chimes fourth, Johnnie fifth, Sadie Fogg sixth, Claty Latus seventh, Kenneth Mc eighth, Highball ninth and Margaret O. tenth. The judges announced that eight horses would score abreast, and that Highball would trail the pole, but when they came for the word Geers took the outside instead. Sonoma Girl evidently was excited. She shook her head, tugged at the lines and made a break or two in scoring, until finally Capt. Springer, her owner and driver, told the judges she was hitting the sulky. An intermission was ordered while the mare was re-hitched, but on coming out again she did not score with her usual speed. Finally the word was given, with Sonoma Girl six lengths back of the others, while Highball got away well on the outside and at once took the lead. Geers bore in and had the pole when the turn was reached, and it was apparent he was going to step a good mile regardless of what the others could do. He traveled it alone, making the quarter in 0:40, the half in 1:02½, the three-quarters in 1:33¾, and came home in 2:07¾. But while this was going on Sonoma Girl showed the crowd what a marvel she was by trotting through the rest of the field on the hack stretch as if they were tied, and, although Highball was too far ahead to be caught, she took second just as easily as he did first, and certainly trotted the mile faster than the gelding, being much closer to him at the finish than at the start.

This burst of speed seemed to be just what the mare needed, as in scoring for the second heat she acted like a machine. When the word was given she and Highball went away like a pair. After a terrific rush to the turn Springer took the mare back a little, but Highball kept on at his best lick. He reached the quarter in 0:30 and up the hack stretch increased his clip, his time at the half being 1:00½. He was then ten lengths ahead of the mare, but she put on steam and began to gain. At the three-quarters, which Highball passed in 1:32½, she was close behind, and as they turned into the stretch she came with a rush, the like of which never before was seen in a trotting race. In a few strides she was even with Highball, and then she swept past him and in a trice was three lengths to the good. The Geers horse trotted steadily and did all he could, but the mare, after following his pace for seven-eighths of the mile, had even more speed on tap than he had shown when going his best in the second quarter. It occurred so suddenly and unexpectedly the crowd for an instant did not comprehend the situation, but when the distance stand was reached and they saw Sonoma Girl in the lead and going at her ease the cheering began, and it swelled in volume as the mare passed under the wire in 2:06¼, lowering the record of the race for the second time to-day, Highball having first done it by his mile in 2:07½. The best previous record was 2:08¾.

Sonoma Girl had been a steady favorite in the betting, which was tremendous, and her backers went wild as they saw her now complete mistress of the situation. The defeat of Highball was too decisive to admit of any doubt. He had got away trotting his best, had the pole all the way, made his own pace, and then was tramped on in the home stretch. There was no excuse. The mare was a good deal the best. This fact was impressed in the third mile, when Sonoma Girl went out in the lead and held the position all the way. The pace was slower than in the previous miles, but fast enough for Highball, which trailed a length or so back of the mare. She was at the quarter in 0:31½, the half in 1:03¾, and the three-quarters in 1:36½. Some of the Highball partisans hoped for a Geers rush in the home stretch, but Highball had fizzled out. Instead of going faster as the wire was neared he went slower, and inside the distance stand it was plain Beatrice Bellini would beat him for the place. Geers did not punish the horse, which seemed dead on his feet, and in the last strides Marjorie and Margaret O. also passed him, Sonoma Girl winning as she liked in 2:09¼.

Then a great floral banner was brought out for the winner and Capt. Springer was photographed

standing alongside of it. The crowd cheered man and horse to the echo, and the great race was over.

Time by Quarters.

	¼	½	¾	Finish.
First heat	0:30	1:02½	1:33¾	2:07½
Second heat	0:30	1:00¼	1:32½	2:06¼
Third heat	0:31½	1:03¾	1:36½	2:09¼

BETTING ON RACES.

The Horseman and Stockman, published at Minneapolis, near which city the Minnesota State Fair is held at Hamline, where the largest crowds that are seen at any harness meetings in the United States annually congregate, discusses the betting proposition as follows:

"Heat betting is being discussed, pro and con, by writers in the turf papers, and the argument used on either side sounds like echoes from the tomb of Diogenes. Why not rise to the higher plane of 'no betting.' Let the horses race for the purses; make the purses large enough and the entrance fees low enough so that there is money in training and campaigning a stable without recourse to the pool hox and the industry will be lifted to a plane it has never before attained. 'The sport of kings,' as racing was called years ago, has degenerated until it is merely a whirlingig, little better than a roulette wheel for common gamblers. The mistake of our present system lies in our entrance fees and this can only be remedied by the promoters of trotting meetings reducing the cost of entrance fees to such a figure that horsemen can see sufficient profits without trying to make a few dollars on the side by dropping a heat or by 'fixing' some other driver to allow them to win. The situation ought to be that horsemen should race for a fair portion of the money which the public pays in at the gates. Take some of our largest stakes at present and those who make entries do not even receive in purses the amount of money that is paid in in entrance fees. There never should be more than 5 per cent, all told, deducted from the winnings of any horse. Take the early closing stakes of the State Fair, for example. They will average over fifteen nominations for each class. These each pay 3 per cent with the nomination, which means that 45 per cent of the entire amount of all the purses has been received by the association as a first payment. Five per cent is deducted from each of the winners, which means 20 per cent more, and this clause, which is general in almost all conditions throughout the country, is a delusion and a snare. An association that announces a \$1,000 stake and then deducts \$50 from each money winner might better announce \$300 and leave out the 5 per cent clause. By making the stake large on its face, however, secretaries secure the larger entrance fees from non-winners. It is a travesty upon the rights of horsemen, owners and trainers that they should pay into the treasury of an association practically all the money for which they race, and in some instances, much more. Take the 2:13 pace for a purse of \$5,000 at the State Fair, and the first payment of 3 per cent on this purse amounts to \$4,350. Assuming that ten of these horses will declare in the night preceding the race, the additional 2 per cent from each of them will mean another \$1,000. Then there will be an additional \$1,000 deductful from the money winners. Approximately, therefore, and at a low estimate at that, this stake will net the Fair association \$6,350. In other words, the horsemen will pay the association \$1,350 for the privilege of racing for their own money. Of course, this is an illustration taken from the stake having the largest list of entries of any. It is but just to acknowledge that there are some events in which the Fair association will have to make up a considerable deficiency. At that, the State Fair has more liberal conditions than almost any other association giving large purses and stakes. One country fair association in Minnesota is requiring but 5 per cent all told for entrance to its purses. We would see larger fields of starters and greater public interest if more liberal conditions were offered by the different associations. Nowhere in the country is better racing witnessed than at Hamline without a dollar being wagered on the result. It will come in time that this will be the situation throughout the country, and then the question of heat betting will be of no more interest to horsemen or to the public than the spots on the sun."

ABSORBINE FOR SWEET MARIE.

All the horse boys know the noted trainer, W. J. Andrews, East Aurora, N. Y., who has driven a host of noted horses to their records, including John R. Gentry 2:00½, Mascot 2:04, Belle Hamlin and Justina to pole, 2:13, which were world records; also Swift 2:07, Promise 2:16, and about one hundred others better than 2:30 (including Tiverton 2:04½, Grace Bond 2:09¼ in 1904). Mr. Andrews is a trainer who can condition, drive and race a horse and return him sound in the fall, ready and fit, as the saying goes. He uses quite extensively a wash made as follows: One dozen bottles ABSORBINE to one barrel Witch Hazel, stirs it well together and draws his wash from the barrel for steaming out between heats, and as a brace to do up the legs in, etc., besides using ABSORBINE full strength, as the case may require. In a recent letter he writes W. F. Young:

Dear Sir: Whenever I have a high class trotter I always use your Absorbine. Please send to me here as soon as possible one dozen bottles to use on Sweet Marie. Yours very truly, W. J. Andrews, June 9, 1907. Absorbine can be procured through your local druggist, or I will send you a bottle express prepaid upon receipt of \$2. W. F. Young, P. D. F., 54 Monmouth street, Springfield, Mass.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Salinas	July 24-27
Pleasanton	July 31-August 3
Breeders' Association (Santa Rosa)	August 14-17
Petaluma	August 26-31
Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12
Santa Maria	October 22-26

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair)	September 23-28
Spokane, Wash. (Inter-State Fair)	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

Santa Rosa next.

Breeders' big meeting opens there August 14th.

The track is said to be the fastest in the State.

How fast will the pacers step when they hit it?

Clipper stepped a first heat there in 2:06 and a third in 2:06 $\frac{1}{4}$, but was beaten in the race by Little Thorne, whose best heat was 2:08 $\frac{1}{2}$.

Dione by Eros took her trotting record of 2:07 $\frac{1}{4}$ at the Santa Rosa track the same week.

Woodland's track record for pacers is 2:06 $\frac{1}{4}$, made by Miss Logan, and her three heats were 2:07 $\frac{1}{2}$, 2:06 $\frac{3}{4}$ and 2:06 $\frac{1}{4}$, and Kelly Briggs made her do it, and she only beat him a head in the fastest heat.

Zolock stepped two heats in 2:05 $\frac{1}{4}$ in a race at Fresno. This was a two in three race, and Zolock could have gone a little faster that day.

It is rumored that Chas. De Ryder, after working his mare Perfection a mile in 2:08 $\frac{3}{4}$ last week sold her for \$10,000. This mare was bred by Capt. N. P. Batchelder of San Francisco. She is by the dead sire Meridian 2:12 $\frac{1}{2}$, and from a mare by Clarence Wilkes.

Maggie McGregor, one of the famous old mares of Oakwood Park Stock Farm, but owned for the past year or so by Mr. J. W. Pendleton of Walnut Creek, Contra Costa County, Cal., died last Saturday at twenty-eight years of age. The old mare had been in the best of health, lively and active as a colt, but was found dead in the pasture. Maggie McGregor was bred by S. W. Wheelock of Moline, Illinois, and was sired by Robert McGregor, her dam being Maggie Davis, a mare of unknown breeding. Maggie McGregor produced W. W. Foote 2:15 $\frac{1}{4}$, Alregor 2:11, Tyana 2:16 $\frac{1}{4}$, and Madcap 2:20. She is also the grandam of four standard performers.

W. A. Clark Jr. was present at Salinas when his mare Miss Georgie by McKinney won the 2:08 pace and greatly appreciated the drive made by his trainer, J. O. Gerrety, when he won the second heat.

Attend the auction sale of Oakwood Park Stock Farm horses at Chase's Pavilion, 478 Valencia street, on Monday evening, August 12th. This will be the time and place to get a good one to win a race with.

Over at the Grand Circuit races at Detroit on Saturday last the bay horse Thornway by Steinway won the 2:10 pace in straight heats, reducing his former record of 2:12 $\frac{1}{2}$ to 2:06 $\frac{3}{4}$ in the second heat. A three-year-old gelding by Chas. Derhy, out of the dam of Thornway, has been consigned to the Oakwood Park sale at Chase's Pavilion, Monday evening, August 12th. He is a fine looking youngster, full of life and a good gaited pacer. Look him over; he may be as fast as his half-brother.

The old mare Dolly by Mozart, he by Ajax, a son of Whippleton's Hambletonian, died last week at C. Z. Hebert's Loma Alta ranch, near Salinas, at the age of 24 years. Dolly's dam was Biddy by Firetail, a son of old Norfolk. Dolly was in the great broodmare stable, being the dam of Bruno 2:16 $\frac{1}{4}$ and two other trotters and two pacers.

Fresno Girl, the Seymour Wilkes mare trained by J. W. Zihhell, and with which he beat the favorite, Dredge, in the 2:24 trot on the opening day of the Salinas meeting, developed a small curb during the race, but is expected to round to in time to start in the \$2,000 stake at Santa Rosa on the opening day of the Breeders' meeting.

Carey Montgomery of Davisville is working a couple of horses at the Woodland track, one of them being Dan Logan by Chas. Derhy out of Effie Logan, dam of Sir Alhert S. 2:03 $\frac{1}{4}$.

Jack Curry is racing Tom Sharkey's trotting mare Lillie Stranger 2:15 $\frac{1}{4}$ this year.

The Donna must have made a mistake in the start of the 2:10 pace at Detroit last Saturday. The flag is a new sight for her.

Sweet Marie 2:02 worked the Indianapolis track on Thursday of last week in 2:05 1-5. The last half was trotted in 1:01 $\frac{1}{2}$.

Sonoma May, a six-year-old full sister to Sonoma Girl 2:06 $\frac{1}{4}$, is owned by Arthur Brown of Napa, who sent her East last year with Millard Sanders, who is training her at Indianapolis. Sonoma May was given a time record of 2:29 $\frac{1}{4}$ as a four-year-old, and has worked a mile in 2:13 $\frac{1}{2}$ recently for Sanders. They say she can trot three heats in 2:10 right now, and will be entered in the M. and M. next year. It would be a unique record in trotting horse history for this great race to be won in two consecutive years by full sisters. Sonoma May is not owned by Millard Sanders, as nearly all the Eastern papers state, but is the individual property of Arthur H. Brown, who pays Mr. Sanders for training her. She is said to be a fine looking mare and a beautifully gaited one.

The accompanying engraving is from a photograph taken at Salinas last week, of the Kentucky saddle horse Prince Arthur, a prize winner at the Kentucky fair last year and at the last Pasadena Horse Show. He has all the saddle horse gaits and is a fine individual. He is a beautiful bay color. Prince Arthur was trained and will be exhibited at all the California fairs this year by Mr. C. T. Hewitt of Los Angeles. The horse is owned by Mr. John E. Marhle of Pasadena.

PRINCE ARTHUR.

The full program for the San Joaquin Valley Circuit will be out next week, and will probably be as follows: 2:08 pace, \$400; 2:14 pace, \$400; 2:17 pace, \$400; 2:24 pace, \$300; free-for-all trot, \$400; 2:14 trot, \$400; 2:24 trot, \$400; 2:20 mixed, \$300. At each of these places a stake of \$1,000 for 2:20 pacers and \$1,000 for 2:20 trotters has already been closed.

A number of horsemen of Orange county have handed themselves together in an effort to revive interest in harness horse racing and have arranged to hold a meeting at Santa Ana on August 7th. They will pay all expenses and everything will be absolutely free. A good card of not less than five events will be provided and some good races are promised. Orange county is to furnish at least twenty good horses, Riverside will have at least ten, San Bernardino will be represented with five or six, while Los Angeles, Pomona and Pasadena are expected to contribute some fast steppers. The race track is considered one of the best in the State and the horsemen interested hope to bring it back to the standing it had in the good old days when Silkwood was the pride of all Southern California and always drew big crowds. Alex M. Wilson of Riverside has been selected secretary and any one wanting information should address him at Santa Ana.

Gus Andrews recently purchased for Mr. Galindo of Oakland a three-year-old pacer by Comet Wilkes that is considered a great prospect at the Concorl track. This three-year-old was owned by a Portuguese, who drove to the track with the colt hitched to a heavy cart, and it was immediately noticed that the youngster had speed to burn. He could outfoot many of the older horses in training, and when asked to speed him the Portuguese drove him a half in 1:17. Andrews advised Galindo to buy the colt, which he did for \$150. In two weeks he worked a quarter in 35 seconds, with the last eighth in 15 seconds, a two-minute clip. Mr. Galindo thinks he has a bargain even if the colt never goes any faster. When the Portuguese was asked as to the breeding of the dam he said: "I don't know her father or mother, but she go like hell."

Charley Belden has been lame, but his race at Detroit, where he won third money, shows that he is getting all right again.

Victor Marsh of Pasadena tells of an exhibition of "horse sense" which came to his attention a day or two ago. Two years ago he sold a span of handsome gray ponies to Charles King. Some months ago King sold the animals to O. E. Bowen, who put them in a pasture near San Gabriel. One night they broke out and came to Pasadena. They went straight to their old quarters at Mr. Marsh's stable, and, finding the door open, quietly walked into the stalls they had left two years ago and began to munch the hay.

Santa Maria will hold a race meeting, beginning October 21st, to last one week. A program of harness races will soon be announced.

The dam of Tempus Fugit, the cream-colored gelding, owned by Murray Howe, with which Geers won the \$2,000 stake for 2:15 trotters at Libertyville, has been bred to a jack the last three years. She is owned in Nebraska.

Watsonville will hold a big fair and horse show in October, opening on the 14th and continuing one week.

The Santa Rosa track record for pacers is now 2:06, and was made July 4, 1900, by the Diahlo pacer Clipper, driven by C. A. Durfee in the first heat of the 2:10 pace, which race was won by Little Thorne, driven by James Thompson. The trotting record of the track is 2:07 $\frac{1}{4}$, made the same day by Mr. A. B. Spreckels' mare Dione in a race against the watch. It is not likely that the trotting record of the track will be lowered this year, but the pacing record will be in danger when the 2:08 class starts on Friday, and also when the 2:20 class horses line up for the word on Saturday.

Opitsah, the William Harold mare in Sutherland and Chadbourne's string, that won the purse for pacers without records at Salinas last week, was bred and is owned by H. W. Meek of San Lorenzo. The name is Indian for sweetheart, according to Mr. Sutherland, who is authority on such subjects.

A half-brother to Agitato 2:09 $\frac{1}{4}$ is in the Oakwood Park sale, to be held in this city on the 12th of August. This is a brown gelding, three years old, and worth inquiring about.

Two mares by Lynnwood W., sire of Sonoma Girl 2:06 $\frac{1}{4}$ and Charley Belden 2:08 $\frac{1}{4}$, are offered for sale by an advertiser in this issue.

The privileges of the Woodland meeting will be sold to the highest bidders. See advertisement in this issue.

The Detroit Free Press of July 26th says: Perhaps the most pleased man in the country yesterday afternoon was J. D. Springer of Los Angeles, whose fine trotting mare Sonoma Girl, by her excellent performance, inscribed his name on the honor roll of the turf. The victory was doubly sweet, because the owner was the man who held the reins when the mare performed so well. Unlike many followers of the harness game, Mr. Springer took no measures to conceal his genuine pleasure. After he had got down from the sulky he kindly obliged a dozen photographers by conjuring up his most genuine smile of approval, posing for them in the meanwhile. Afterward he went into the members' stand and distributed a portion of the floral tokens of victory. He obligingly wrote his autograph in the programs of half a hundred enthusiasts who had bettered their financial strength by wagering on his mare, and then stood around and gossiped with everyone that happened along on his extreme pleasure at what his charge had accomplished. The stake money was not all, by any means, that the Californian had won. The victory itself was as pleasing as the stake. But the man from Los Angeles had never for a moment doubted that he would carry off the prize. He had the utmost confidence in his mare and hacked her heavily in the pools. As long as six weeks ago he wagered \$1,500 to \$7,000 that Sonoma Girl would win the M. and M. He had every reason to feel elated over the victory.

"CRAFT'S"

Readers of live stock literature of the last dozen years are quite familiar with the name of Craft's in connection with this famous Distemper & Cough Cure. This is the result of many thousands of dollars worth of advertising done by the manufacturers, the Wells Medicine Co., Chemists, Lafayette, Ind. The great reputation and merit of this cure of germ diseases has caused others to try to match it with various imitations. The explanation of this is found in the fact that this remedy is backed by the guarantee of responsible parties. When veterinarians and horsemen of national reputation give their unqualified endorsement to "Craft's" it is safe for horsemen generally to be sure that they are not imposed upon by something claimed to be "just as good." Every bottle carries the well known trade mark of the three heads on a clover leaf, which are to be seen in the advertisement in this issue. The manufacturers, The Wells Medicine Co., 13 Third street, Lafayette, Ind., are reliable, responsible chemists and if you are at all interested in live stock, you should write to them at once for a copy of their new booklet, "Dr. Craft's Advice." It is free for the asking.

GREAT RACING AT CLEVELAND.

Sonoma Girl Places Another Big Stake to Her Credit.

Cleveland, O., July 30.—Racing of the highest class marked the opening day's sport of the Grand Circuit campaigners at Glenville track this afternoon. Wilson B. Chisholm's Reproachless, the winner of the Chamber of Commerce Stake at Detroit, captured the Thistle Doune Stake, worth \$3,000, by winning the first and third heats, while Blacklock 2:07½, making his first start in Grand Circuit company, landed in front in the 2:07 pace in straight heats, lowering his record to 2:04½.

While horses failed to break the world's record in the initial day's sport, there was one record established that will stand for many years. Ed. Geers, the "silent man" of the horse world, was forced to take the flag in three races that he started in. This never occurred to the famous reinsman before in his whole career, and it was the sole topic of conversation among the horsemen. George Starr carried off honors for the day by driving two winners, the Thistle Doune trainer being in front with Reproachless and Blacklock.

The track was lightning fast. Horesmen declare that it is fully two seconds faster than that at Detroit. Summary:

2:20 class, trotting, three heats, purse \$1,500—
Carlo, blk h by Bellini (J. Dickerson)..... 1 1 2
Margaret, b m be Onward (Davis)..... 4 2 1
Cordero, rn h (A. McDonald)..... 2 3 3
Dainty Dolly, ch m (Bowerman)..... 3 5 4
Sunline, Dr. Ives, Emily B., Prince of Calcutta and Modicum started.
Time—2:11¼, 2:10¾, 2:09¼.

2:13 class, pacing, three heats, Thistle Doune Stake, purse \$3,000—
Reproachless, blk m by Direct Hal (Starr) 1 2 1
Hidalgo, b g by Warren C. (A. McDonald) .. 2 1 2
Leland Onward, h h (T. Murphy)..... 7 3 3
Whitlock, g g (Snow)..... 3 6 6
Major Mallow, Bonanza, Jerry B., Village Boy, William O., and Shaughran started.
Time—2:04½, 2:04¼, 2:06.

2:07 class, pacing, two-in-three, purse \$1,000—
Blacklock, blk h by Cuckoo (Starr)..... 1 1
Captain Derby, b g (Eldridge)..... 3 2
Wilson Addington, b h (Cox)..... 2 3
Billy Cole, br g (E. Dickerson)..... 5 4
Kruger, Cascade, Prince Hal and Bystander started.
Time—2:04½, 2:05¼.

2:13 class, trotting, two-in-three, purse \$1,000—
Lotta, blk m by Guy Thistle (McHenry)..... 1 1
Dewitt, h g (Smith)..... 2 3
Wilkes Heart, b g (Steel)..... 3 3
Imperial Allerton, br h (Snow)..... 4 10
Richie Baron, Lilly Stranger, The Pace Colt, Paul Kruger, Dossie Villiers, J. J. M., Prince C., Kim, Quintell, Dr. Charley, Lucretia, Dossis, Martin and McDougall started.
Time—2:09¼, 2:09¼.

Cleveland, O., July 31.—Sonoma Girl 2:06¾, the winner of the M. and M. \$10,000 stake, added another to her list to-day, when the daughter of Lynwood W. captured the Forest City Stake, worth \$5,000, in straight heats, and practically in a jog, although she trotted the second mile in 2:06¾.

Considerable disappointment was occasioned by the failure of Highball 2:06¼ to start, but he was hopelessly lame in his front left foot.

A record breaking crowd turned out with the expectation of seeing Highball and Sonoma Girl meet for the fourth time. It was a sad blow to his owner, Frank Jones, and Driver Ed. Geers, who were eager to see the famous gelding pitted against the California mare. With Highball out of the race it was conceded to Sonoma Girl without argument.

Ed Geers was finally able to shake off the hoodoo that has been following him since the Libertyville meeting, and won the 2:05 pace with Ardelle in straight heats, although John Caldwell failed to deliver the goods in the 2:09 trot. In this race Lillian R., Dave Shaw's mare, won in straight heats, reducing her mark to 2:07¾.

In the 2:11 pace Alice Pointer, a member of Dave Shaw's stable, won in straight heats.

Frank Jones, the owner of Highball, declared there was no truth in the story that he had opened negotiations for the purchase of Sonoma Girl.

"I wanted to buy her before she was marked," remarked Jones, "but not now." Summaries:

2:11 pace, three heats, purse \$1,500—
Alice Pointer, b m by Star Pointer (McDevitt)..... 1 1 1
Thornway, h h (Cox)..... 2 2 2
Billy W., b g (Sunderlin)..... 3 3 3
Red Bow, b m (Sweeney)..... 4 4 5
Rushville, b g (Gahagan)..... 5 5 4
Time—2:05½, 2:06, 2:07.

2:15 trot, three heats, purse \$5,000—
Sonoma Girl, b m by Lynwood W. (Springer) 1 1 1
Genteel H., br h (W. McDonald)..... 2 2 5
Clay Latus, ch m (Lasell)..... 6 5 2
Henry E. Jr., b g (F. Evans)..... 3 6 6
Marjorie, gr m (Cox)..... 7 8 3
Tolling Chimes, b g (White)..... 5 4 4
Wild Bell, br g (De Ryder)..... 4 7 7
Silver Band, blk g (Hall)..... 8 3 d
Time—2:08¼, 2:06¾, 2:07¾.

2:05 pace, two-in-three, purse \$1,000—
Ardell, br m by J. H. L. (Geers)..... 1 1
Nervolo, b h (Cox)..... 2 2
Hal C., ch g (B. Shank)..... 3 4
Vesto Boy, ch g (T. Murphy)..... 4 3
Custer, ch g (Hall)..... d
Time—2:07¼, 2:05¾.

2:09 trot, two-in-three, purse \$1,000—
Lillian R., b m by J. T. (McDevitt)..... 1 1
Allie Jay, b m (Starr)..... 3 2
Emboj, h g (W. McDonald)..... 2 6
Charley Belden, b g (De Ryder)..... 6 3
John Caldwell, b g (Geers)..... 4 4
Bi-Flora, h m (Splan)..... 5 5
Time—2:06¾, 2:07.

Cleveland, O., August 1.—With all of the races decided in straight heats and fast time made, it was up to the last event of the day, the three-year-old sweepstakes for 2:20 trotters, to create some excitement.

In the first heat General Watts and Bell Bird were having a great race to the half, going like a team, and being many lengths in the lead. After passing the half-mile, Bell Bird slowly gained on General Watts, who had the pole and on the turn to the three-quarters Bell Bird, driven by McDonald, had gained enough lead so that he could cut across and take the pole instead of going the long mile. Just then General Watts was seen to break and there were groans in the stand, and as a result Bell Bird finished with ease in 2:13½, after going to the half in 1:05, the second quarter being in 0:31¼, a 2:05 gait.

Bowerman declared that McDonald with Bell Bird had purposely cut him off from the pole and this caused his horse to go to a bad break. He protested the victory.

The other drivers declared that they did not see the foul and the heat was given to Bell Bird, who finished first. Summaries:

Pace, 2:19 class, three heats, purse \$1,500—
Judge Wilson, b g by Gigantea (Spencer) .. 1 1 1
Byron Kav, b g (Geers)..... 2 2 2
Gentry's Star, b m (McHenry)..... 4 3 3
Black Dart, gr h (P. McDonald)..... 3 4 4
Moko Tube, b h (L. Murphy)..... 5 dr
Clementine, b m (Nelson)..... d
Time—2:08½, 2:09¼, 2:10.

Trot, 2:17 class, three heats, purse \$1,500—
Beatrice Bellini, blk m by Bellini (J. Dickerson)..... 1 1 1
Tempus Fugit, ch g (Geers)..... 2 3 2
Kenneth Mac, b h (Nuckols)..... 4 2 3
Fanny P., br m (Packer)..... 3 4 4
Magic Chimes, blk h (B. White)..... 6 5 5
Loom Up, ch g (Nelson)..... 5 6 6
Time—2:09¼, 2:11¼, 2:11¾.

Trot, 2:11 class, two-in-three, purse \$7,000—
Watson, ch g by Hinder Wilkes (Loomis)..... 1 1
Beuco, b g (Smith)..... 2 2
Athasham, b h (De Ryder)..... 3 3
Mae Heart, ch m (McHenry)..... 6 4
Lady Resolute, Colonel Patrick, Jack Lyburn, Bonnie Russell and India started.
Time—2:07½, 2:08.

Pace, 2:09 class, two-in-three, purse \$1,000—
John A., ch g by Eddie Hal (Geers)..... 1 1
Judex, b g (McKinney)..... 2 3
Jennie W., b m (Sunderlin)..... 3 2
The Donna, b m (De Ryder)..... 4 5
Cleo S., b m (Nuckols)..... 5 4
Time—2:06¼, 2:06¼.

Trot, 2:20 class, three-year-olds, sweepstakes—
Bell Bird, br f by Jay Time (A. McDonald)..... 1 1
Wilkerson, b g (Evans)..... 2 3
Bonnie Way, b g (Lazen)..... 3 2
General Watts, b c (Bowerman)..... 5 4
The Count, Turtado and Prince of Delhi started.
Time—2:13¼, 2:11¼.

THE HOME OF "ROYAL DEEBY."

Santa Ana, Cal., June 3, 1907.
Dr. S. A. Tuttle—Dear Sir: Having used your Elixir for the past fifteen years, I can truly say it will do all you claim for it—it is a sure cure for curbs, splints, sprained tendons, big knees, thrush. I consider it the most valuable remedy ever put on the market and would not be without it if it cost \$5 per bottle. Family Elixir is as good in the home as Veterinary in the stable. Yours truly,
H. N. SYLVESTER.

IN TRAINING AT PORTLAND.

[Rural Spirit.]

Over at Irvington track, where some of the best and fastest trotters and pacers on the Coast have either been trained or raced, things are taking on a lively appearance. The hot water kettle is kept boiling overtime; the little red sulky has been taken from its winter quarters, swinging to the rafters and polished up and oiled with the best brand of speed elixir. Hobbies, toe weights and the dozen and one brands of bits, knee spreaders, etc., have been taken from the trunk and hung on the wall for appearance if nothing else, though some of the hobbies are being put into actual use. There are not a large number of horses being worked at Irvington, but there is a lot of quality in the few being prepared, and taking into consideration breeding, speed and individuality, we doubt if there were ever a better lot on this track. Horses and youngsters sired by such noted sires as Joe Patchen, McKinney, Cresceus Zombro, Alcone, etc., out of well bred dams, are taking their work over this track.

There are at least a half-dozen of the Brook-Nook horses being trained and they are all working well inside the list.

John Sawyer has the largest string—about a dozen or more—and they are all going satisfactory. Ben W., a big pacing gelding by Yendis, that won second money in the big stake at Salem last year, is being fitted again for the same event. He is working miles in 2:17 and is expected to pace in 2:10 or better by Fair time. Knick Knack is another candidate for the big pacing event at Salem. He is looking in the pink of condition, but has not been asked to go faster than 2:20 so far. He has the speed, however, and no doubt could step a mile fast enough to induce Bob Brady to "set 'em up." Velma Z., Sawyer's own trotter by Zombro, is developing into quite a fast mare. She is working in 2:19 and can clip several seconds off this any time. It will take a good green trotter to beat her to the wire this fall if she is raced. Topsy T., another fast mare in Mr. Sawyer's stable, is just recovering from a severe cold and has had no fast work yet. New Moon is working well and acts like a right good mare. Her matinee record of 2:22 is the fastest work she has had this year, but a mile in 2:17 perhaps, would not stop her. Mr. Sawyer is working a handsome big filly by Zombro, out of Ferena, owned by Mr. Shreve of Catblamet, and she greatly resembles her half-sister, Sophia R. 2:14½. Another promising pacer in his stable is Alt, a Brook-Nook horse that can step close to 2:15 and is improving with every workout.

Jim Misner is working C. A. Harrison's mares. Nique, by Joe Patchen, out of Oneone 2:11¼, is developing into quite a fast pacer. She was worked in 2:20, has a good way of going and is built right for a fast mare. Miss Cresceus, by the champion trotter Cresceus, out of Venus II. 2:11¼, has not developed much speed. She is showing a 2:40 gait at the trot and is not being urged much in her work.

J. B. Stetson holds the track record so far this year with his pacer Devilletta 2:15¼ by Diabolo, having worked an easy mile in 2:13¼. She is a good gaited mare and wears nothing but a light pair of quarter boots. A mile in 2:10 ought not to stop her this fall.

Harry Osman is jogging a number of youngsters, some by Hal B. that are very promising. In speaking of Hal B., horsemen seem to think he is the making of a great sire. His colts are all uniformly good and speedy. Cora Patch, by Joe Patchen, out of Altacora, is the only one being worked for speed in the Osman string. She can show a 2:20 gait and acts like a mare of great promise.

Amos Keene has quite a promising green trotter in Bonnie Norte, by Bonner N. B., out of Alta Norte 2:16¼. She is a low-headed trotter and seems to hit the ground pretty hard in front, but at that she can step miles in 2:20 and is improving. Mr. Keene has two Zombros in his stable that are receiving their initial work.

G. J. Rohse is having good success with his pacing stallion Lancero. This horse was first worked at the trot, but did not make speed enough to suit Mr. Rohse, so he put the straps on him to convert him to the pace. He fought the rigging for a long time and seemed to be determined not to pace, and the fastest miles he worked him was about 2:35. Mr. Rohse was advised to try the M. & B. spreaders, as he seemed to hit himself going around the turn. He has used them the last two workouts and the horse is stepping miles right around 2:20 and acts like a real pacer.

"Billy" Smith has one of the best green trotters on the track in Starlight, by Bonner N. B. This mare, unlike her owner, is slightly built and looks like a thoroughbred. She has a good way of going and very speedy, but like her full sister, Hazel S., is very unsteady in company. She has trotted in 2:18½ this spring.

H. Squires is working the old campaigner Hank and he gets better with age. He turned the track last week right around 2:15 and seemed to like it. Mr. Squires also has the good pacer Crocket by Gyr Falcon, that is stepping along in 2:17, which is five seconds slower than his ability right now.

H. C. Davis still has faith in his pacer Sunny Jim. He is not working so smooth as he was early in the season, which brought forth the hobbles in his last workout, which seemed to suit him, though to an outsider he seems like a horse that has had too much fast work.

E. R. Pickard is here with the great young sire Zolock 2:05¼, where he is breeding some high class mares. Zolock is by the great McKinney 2:11¼, trotting, and the greatest sire of trotters living. His dam is Gazelle 2:11½, trotting, by Gossiper 2:14¼, trotting. Gazelle is the dam of Zephyr 2:07¼, trotting. Zolock's second dam is the great broodmare Gypsy, the dam of Gazelle 2:11¼, Ed Winship 2:15, Dixie S. 2:27, all trotters. Zolock has nine in the list, six of which are trotters. So it will be seen that Zolock is strictly trotting bred and is more apt to sire trotters than pacers, though he himself has a pacing record.

"IT CURES THE WORST CASES."

Mr. A. W. Edwards of Bluff City, Tenn., writes as follows: "Enclosed find Postoffice Order for one box of QUINN'S OINTMENT. I used one bottle and it cured the worst case of Blood Spavin I ever saw." QUINN'S OINTMENT is used by leading horsemen all over the country. For curbs, splints, spavins, wind-puffs and all enlargements give it a trial. Price One Dollar per bottle, delivered. Address W. B. Eddy & Co., Whitehall, N. Y. If you cannot obtain from druggist.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

DOVES AND DEER.

For the past three weeks the double attraction for local sportsmen of doves and hucks has resulted in about the liveliest interest yet displayed by hunters over any shooting season on record. The enthusiasm is not only local, but has taken strong hold with the powder-burning fraternity throughout the State.

Reports from many sections are that the dove crop this year is a very plentiful one. In most cases, by reason of the reduced bag limit, twenty-five birds to the individual gun in one day, dove hunters do not find it necessary to make long journeys or extended trips in quest of the "coopers." The finding of "flights" is comparatively an easy task this year. Although the plentitude of feed—barley and weed seeds, etc.—and the bountiful supply of water are factors tending to scatter the birds and break up the regularity of their flights, there seems to be such an unusually good supply of doves this summer that the general run of other years' flyways and passes will prove worthy of attention. The best shooting is to be found late in the afternoon and early evening, this also affords a pleasant relief from the mid-day heat.

"There is no form of shotgun sport better adapted to the lazy man's wants or more suitable for hot weather than dove shooting," is the opinion of a well known sportsman. "Pleasantly hawking in the tonneau of an automobile with cool drinks at hand, picking off occasional birds as they whizz across the road, is one form in which the sport is practiced by motorists of the shooting fancy. Equally inviting is the German form, in which a large shade tree is pressed into service and a basket lunch of ample proportion and Teutonic odor is spread out, with a case of iced beer flanking it.

"Only boys and inexperienced marksmen of little ability ever hunt doves. The veterans seek for flights and then let the birds do the hunting."

Like most other birds, the speed of doves is greatly overestimated, and while they cannot be killed clean at seven or eight rods without liberal allowance, many young marksmen, in their anxiety to lead enough, overdo the matter and keep missing their birds. The speed at which the dove travels is variable. Upon some flights he who can average two doves for five shells spent is doing wonderful work.

Coming from canyons, the birds often are high or far off at the side, traveling at tremendous pace, and presenting difficult work. The flushed bird is a fair mark, and on a feeding ground flights, or near water, where the doves come in leisurely, hovering about before alighting, they are almost as easy to stop.

Compiled from numerous instances of flushing doves alongside a car, the average speed of the bird when "loafing" along certainly is not more than forty miles an hour. This calls for a mathematical allowance of seven and a fourth feet, based upon a shot velocity of 900 feet, which is not excessive with nitro-powder, and a distance of 120 feet, or forty yards, which is rather long range in dove shooting. The swing of the gun materially decreases this allowance in a degree that each man must learn for himself, owing to the variations with which different shooters handle their weapons, but the figures prove the contention that overleading is an easy thing to do.

The dove hunters outnumber the deer shooters more than ten to one. Good prospects are reported in the vicinity of Mayfield. Santa Clara valley hunters have had excellent sport so far this season. Watsonville hunters have secured numerous bag limits since the opening day.

The ordinance prohibiting dove shooting in Santa Cruz county, it is reported, will be repealed, which is a sensible move, for Santa Cruz county under prior conditions was practically a dove-breeding ground for the hunters of near-by counties.

In the vicinity of Martinez the birds are fairly plentiful. Antioch and Stockton hunters also have had good dove shooting. In the neighborhood of the Capital City the supply of ring-necked birds is greater than for seasons past. Roundabout Rocklin has heretofore been a favorite resort for marksmen. The Spring Valley Rancho territory, however, is to be avoided by all shooters who value the safety of their four-footed hunting companions. The whole ranch property is always baited with poisoned meat for coyotes, and furthermore the warning is posted that all dogs coming on the property will be shot on sight.

Hunting parties from Byron find plenty of doves in the Marsh Creek country and on the feeding grounds adjacent to Kellogg creek. An automobile party, composed of Roy McCahe, J. L. Fredricks, A. J. Le Grand, Walt Andrews and H. T. Hammond shot limit hags one day last week. The "West Side" country boasts of some clever lady shooters. Mrs. Bertha N. Mage of Tracy, a sister of J. L. Fredricks of Byron, is an enthusiastic hunter. Recently she secured the limit on doves, distancing several who were in the party. Mrs. Delphine Christenson of Knightsen is another hunter of note. She and

her husband have been on hunting expeditions for years. As a duck shot Mrs. Christenson has few equals. The treacherous tule lands have no terrors for her, and on many occasions she has hagged the limit. Mrs. Christenson was the first woman in Contra Costa county to apply for a license, and last week, in company with her husband, she killed eighteen doves.

Modesto sportsmen have been getting many limit hags in the wooded bottoms along the Tuolumne River. Round about Lincoln, Placer county, doves are so plentiful that limits are easy. Several hunters have been arrested in that district for shooting without a license. Nominal fines were imposed for the first offense.

In the vicinity of Yreka doves are not as numerous as in past years.

Southern California is suffering from an over abundance of water; at least that is the way dove hunters look at the situation. They all declare that too many water holes and running streams are responsible for the scarcity of limit bags. The birds are there in plentiful numbers, however. Numerous watering places enable the birds to scatter over the country and quench their thirst without resorting to any one watering place, the result being that the hunters find a difficulty in locating the game. Up above Saugus birds are very abundant. The little valleys and flats opening out of the Santa Monica Mountains are also well stocked.

Yuba City sportsmen who have been hunting doves since the season opened claim the birds are not as plentiful as was expected. Many say doves are not collected at familiar feeling grounds, as in former years, and that while there are doves to be had they are difficult to find and are few in any one locality.

This, by some, is accounted for by the pools of water drying up earlier in the season than usual. Ordinarily water does not dry up in the high pools before the latter part of August, but this year the pools have already gone dry and the birds are thought to be around places heretofore unfrequent in order to get water. Very few succeed in bringing down the bag limit.

Sportsmen who take pride in securing a fine specimen of a buck's head or who enjoy the gastronomic possibilities of venison tid-bits are almost unanimous in the opinion that the elimination of the hounds from certain defined work in the chase is a decided detriment to the sport. That is, in most of the deer-frequented districts of this State, and particularly so in the country within comparatively easy access of local huntsmen. Not only is the work laborious and exhaustive, but under existing extensive and dense cover conditions the chances of getting a huck have materially diminished. Crawling and poking through the heavy chapparal and trailing over the ridges in the heat of the day may be considered sport by some extreme enthusiasts, but the conservative sportsman looks upon this phase of hunting as hard work, with a decidedly dangerous quality attendant.

Since the opening of the season a number of fatal hunting casualties have been reported. "Something moving in the brush" has prompted an excited hunter to shoot, the result being a wounded or killed companion or fellow hunter. In the States of Maine and Wisconsin, where dogs are prohibited in deer hunting, hundreds of like "hunting accidents" are recorded every year. In Maine it is, according to the statute in force, a felony to shoot or wound a human being "by accident" in the hunting country. Many hunters and professional guides in both States wear headgear and clothes of such color as will enable a shooter to distinguish the difference between man and beast. At that, however, "something moving in the brush" and unseen is perforated by a bullet, and instead of a huck a man is found either dead or desperately wounded.

Still hunting, while it requires skill in tracking and a knowledge of woodcraft, is the method of hunting in the country adapted for it. In California practically the only results in deer hunting can be obtained only with the aid of dogs. True it is that ethics of the chase have been sadly abused in some instances by unscrupulous hunters. For instance, certain Santa Clara valley hunters last season hunted deer with relay packs of hounds, a dastardly and unsportsmanlike method of getting meat. In other sections the countryside was controlled by telephone connection, the fleeing deer, when once jumped, were kept track of and the dogs put on the trail at various points, the hounded animals never having the ghost of a chance for life. With what abuses there were, the life of one human being is worth more than all of the deer in California.

In some sections of Mendocino and Humboldt counties the natives never would tolerate the presence of dogs in their territory. This intolerance of hounds will be testified to by different hunting parties from this city and Oakland, whose dogs were given Winchester hullet testimonials in camp under the very eyes and despite the remonstrances of the exasperated hut, at the time, powerless owners.

So far but few deer have been hagged in the Marin county club ranges, although quite a number of club members have been out. From Santa Rosa, on the opening day, a number of hunters are reported to have secured forty hucks in the near-by ranges. Deer are reported very plentiful in northern Sonoma county. Around Willits and Ukiah antlered hucks are also numerous. Near Auburn three large hucks were hagged recently at Butcher Ranch. Reports received from several centers around San Jose state that while deer are plentiful in the mountains they are hard to drive from cover.

OUTING OF SOUTHERN ANGLING CLUB.

After an exhibition of nerve in advertising for a month its barbecue of fish to be caught by the members themselves, the Southern California Rod and Reel Club, reversed all known precedents in its class by going right ahead and piling in the barracuda, bass and corned mackerel, until not only the hungry multitude was fed, but half of Terminal Island was supplied besides. Previous form in angling picnics has dealt much with clam hakes as substitutes for fish fries, but the master mechanic of the rod and reel game had no excuse to offer July 21st except for slaughtering so many fish.

Prospects looked somewhat dohious about noon when Messrs. Jones, Knapp, Ahhott, Aumock, McFee, (an enthusiastic Bull Terrier fancier too) and Hedderly were fishing from the wharf with frenzied energy to save the good name of the club, but about 1 o'clock many loads of fine food fish were dumped at the headquarters of the commissary committee in Terminal Pavilion.

After that, not even the failure of the Salt Lake Road to ship the eatables and utensils as ordered could put a damper on the festivities. Arrangements were made with a pair of clever Jap cooks and lunches were pooled. For the day, the club owned Terminal and the blue fish-buttens were hobbing on coat lapels everywhere. Never was a more enthusastic gathering of anglers drawn together, and not a single hitch occured to mar the proceedings, arrangements having been made for lunches.

In advance, half adoden parties went to sea after the arrival of the first car and put in the time until noon scouring the ocean. Barracuda had been scarce all season, but for once they showed good fellowship and put in an appearance in force.

Everybody got fish. In the launch Pearl, were "Bones" Weher, Sherman Baker and Eugene Elliott. They connected strong in spite of a breakdown outside. Nine alhicoe, two barracuda, several big bass and big mackerel comprised their catch. Henry Lowenthal, Chas. V. Barton and Wm. G. Stearns in the Delight brought in six barracuda, four mackerel, an alhicoe and a honita. Stearns landed the alhicoe, a thirty-pounder, on tournament tackle, and Lowenthal's bonita was of equal size.

Herman Heichen, Henry Coomher and son were in the Marion, and came in with seven barracuda, a mackerel and a bass. Warde Heller, Charlie White and Dan McGaughey in the Eagle got five barracuda, five mackerel, two bass and an alhicoe. Meanwhile the crowd on the wharf was doing its level best, and landed a few surf fish and turbot. A. M. Morse and George Reynolds went outside after bass, and Morse caught a jack smelt trolling with a tandem pearl spoon, a rare occurrence, although these fish are known to be dead game. Emile Parker got a big sea trout, and others landed fish in such plenty that a thousand men could have been fed, with many to spare.

Of particular interest to heavy fishermen was the sighting of tuna off Point Vincent by several of the boats. They were the real big blue tuna, and not the yellow-finned imitations, either. Elliott had a tremendous strike from one, which reeled off 700 feet of his nine-thread line like a puff of smoke. The line parted while the fish was running almost free; possibly he turned suddenly, as is the habit of the tuna.

The long tables in the pavilion were filled comfortably, and Roy Shaver, Frank Knapp, E. R. Ahhott and the club officers were busy for two hours ministering to the hungry. Two kegs of refreshment were contributed by Billy Preston of the Los Angeles Wieland agency, and approved just enough.

It was after 3 o'clock before the hungry anglers' thoughts turned to the casting competition, and when they did the scores showed signs of high life. Being the first event of its kind ever given by the club, not much was to be expected in the way of casting records, and the only notable performance was Sherman Baker's cast of 197 feet 8 inches, in the single-handed 2½-ounce class. Emile Parker got in one good shy in the unlimited event at 168½ feet.

The casting was conducted from the wharf, and in the teeth of a freak wind which played havoc with intelligent calculation, and required gauging for every throw. Instead of the usual steady trade, there was wind from every direction during the day, and backlashes were frequent, most of the anglers being disqualified for failure to keep in the prescribed course at all. This was formed by setting up stakes thirty feet apart at a point 100 feet from the casting point and continuing lines from the apex over the stakes. This gave a triangular course of such size that any accuracy caster should have kept in it with ease, but the wind threw many well-aimed efforts many yards to the north and out of the race.

In the unlimited class two hands were used and

no course was called for. It was a notable fact that the anglers kept to the lines much better as a whole than when trying to do so.

In the 2½-ounce event, Baker cast 197 feet 8 inches on his first attempt, and had two backlashes in the second and third tries. W. F. Weber scored 119 feet on the second try, and was the only other one of those who cast in the class to score, the rest being out of the course.

Unlimited, both hands—Emile V. Parker, 100, 168½, 123½; W. F. Weber, 152½, 0, 140; Eugene Baker, 150, 145, 0; H. Heinchen, 142½, 0, 121½; W. G. Stearns, 146, 0, 0; H. W. Coomber, 0, 142½, 0; C. K. B. Cunnock, 136, 0, 0; A. M. Morse, 132.

The records will be better another time, when the members have done some practicing. The usual gear was used, with no special changes of any sort to facilitate the casting.

Francis T. Rahheth, the well known rifleman, was present with a casting reel of his own, fitted with an automatic brake to slow down the spool whenever it paid out line too rapidly. The device is meant to do away with the practice of thumbing the reel and is likely to attain popularity with the novices who want to learn in a day what the experts have been years in mastering.

A large proportion of the piscatorial elite was present, among those who sat at the tables being W. H. McFee, J. F. Jones, C. V. Barton, E. R. Abbott, F. E. Knapp, Ed Winfield, Ed L. Hedderly, H. C. Heinchen, William G. Stearns, J. M. Sims, H. Loewenthal, J. H. Walker, George Herriman, Henry Speake, Ben M. Forest, Henry William Coomber, A. M. Morse, Eugene Elliott, William F. Weber, Sherman Baker, C. K. B. Annock, G. A. Rigualdas, L. and George Reynolds, Roy F. B. Shaver, Charles Thompson, W. S. Skeel, H. B. McNutt, J. C. Lewis, H. A. Coomber, E. V. and J. H. Parker, W. L. Heller, Dr. Edwin P. Watkins, C. H. White, Bay Elson, E. C. Yarnell, George F. Clark and others.

The harhcue proved such an unqualified success that the club is considering holding another early in the future.

FISH OF CALIFORNIA.

The following article is by the able pen of David Starr Jordan, president of Stanford University. Any further information on this, or for that matter, any other California subject will be furnished free of charge by the California Promotion Committee, Union Square, San Francisco.

The fish fauna of a country is determined largely by conditions affecting the waters of the country. Most fishes are extremely sensitive to changes of heat and cold. Where, as is sometimes the case, the temperature of the water changes abruptly at any given point, the character of the fish will be found to change equally. A very little cold is sufficient to benumb and paralyze a fish of the tropics. I have seen in the West Indies, when the water suffers a slight chill which brings it down to perhaps 80 degrees, the cutlass fish, ordinarily very active, lying stupid and inert on the surface of the water. On the other hand, the fishes of cold regions cannot endure any heat, to which they are not accustomed and doubtless the fishes of the ocean depths would be suffocated by the temperature at the surface of the water.

With reference to the effect of the temperature a division may be made in the California fishes at Point Conception into cold and warm water fishes. Of course, the two categories are not sharply divided at Point Conception. Many of the northern species are found to the south of this point in deeper water, or among the rocks, some even extending in range far down into the waters of Mexico. On the other hand, many southern species find their way northward in summer, returning to the south with the approach of winter. Thus many, even of the properly southern species, are found regularly in the Bay of Monterey.

Arctic and Sub-Arctic Fishes.

About 165 of the 435 California species of fish may be referred to the cold water fauna. These are the fishes which live near the shore and in the cold current which sweeps along the coast, rendering its waters everywhere less warm than in corresponding regions on the Atlantic side. To the semi-tropical, or warm water fauna, about 117 of these California species may be referred. These occur to the south of Point Conception, and beyond the reach of the cold northern currents.

Of the 165 species that belong to the north of Point Conception we have two very distinct categories. One comprises the Arctic and sub-Arctic fishes, such as the halibut, sturgeon, the herring and several varieties of the flounder. With these also are a great body of peculiarly California types of fishes which are scarcely or not at all represented in other regions and which evidently had their origin on this Coast. Conspicuous among these are the various species of surf fishes, commonly and wrongly known as the perch, all of them viviparous. Various species of rock fishes—red, green and black—which go under the general name of rock cod, are also abundant. The presence of these two types, both viviparous, together with the peculiar type of Coast salmon, may be held as the most remarkable features of the fish fauna of California.

The species which belong to the south of Point Conception are all closely allied to tropical forms and their origin has evidently been through migrations from the south. They belong, as a rule, to

types which are widely diffused throughout the warm waters of the tropics, and are not distinctly Californian. Their relations are with the West Indian fauna rather than with the other Californian forms.

Almost equal in importance to the effect of temperature is the element of depth as affecting the distribution of fishes. The great majority of the marine fishes that we all know well, or that we recognize as food fishes, are shore species inhabiting depths of from one to fifteen fathoms. The great variety of oceanic is found within this range through which the light and heat of the sun readily penetrate. As we go lower down we find that the shore fauna disappears. The greenish colored shore fishes give place at 40 to 100 fathoms to other species, the prevailing color of which is red. The green and gray colors of the shallower regions match the colors of the sand and kelp. The red colors harmonize with the sea mosses, among which the red fishes live. In still greater depths, where the light and heat have disappeared, the prevailing hues are violet or black, the color of darkness.

From the depths of the ocean off the continental slope of the Coast of California, about 100 species of deep sea fishes have been obtained by the dredging of the United States Fish Commission steamer Albatross. These deep sea creatures are, as a rule, very soft in body, almost black in color, many of them covered with phosphorescent spots by means of which they light their way in the darkness. They live in the open sea at a depth of from two to five miles, and their soft bodies at this depth or rendered firm by the tremendous pressure of the water. In their native haunts the light of the sun seldom penetrates; the darkness is most absolute, and the temperature of the water at the point of freezing. These creatures constitute, for the most part, groups by themselves, not being descended from the shore species of the same region, and forms very similar to those off our Coast are found in all parts of the ocean from the poles to the equator.

The fresh waters of California contribute about forty-five species. These are about equally divided between the great basin of the Sacramento and the San Joaquin and the basin of the Colorado. Eight or ten of these are trout, the rest classed under the head of chubs and suckers.

About twenty of these fresh water fishes are considered as food fishes, and of these only seven or eight species are considered of much value as such. Of the pelagic fishes 133 species are properly to be called food fishes. They occur more or less frequently in the markets and are fit in varying degrees for table use. The remaining species, either on account of smallness in size, ill flavor or tastelessness of flesh, are not used as food at all, or else only in a salted or dried condition. Such is limited largely to the Chinese, to whose soups and chowders nothing seems to come amiss.

Of less importance, but still a determining factor in the distribution of fishes is the character of the food supply. Each species thrives best where those creatures on which it naturally feeds are most abundantly found. The herbivorous fishes live in the tide pools where they feed upon the small sea weeds. The crab-eating fish are found upon the rocks. Those which feed on the herring and silversides flourish in the open water of the ocean.

The character of the bottom has its importance also. The flounders for the most part live on a bottom of sand. The so-called rock cod abounds about sunken rocks or banks. Other species are found only where the bottom is soft and muddy. The difference between the fishes commonly found at Monterey and Santa Cruz indicates clearly the difference in the character of the bottom conditions at these two opposite points on the same bay. It was possible by a mere inspection of the fishes in a collection recently received from the harbor of Swatow, China, to determine that this harbor lies not over a rock basin, but a bottom of mud, upon which flows the water of an estuary.

Character of the Water Has its Influence.

The character of the water as to clearness or otherwise constitutes another element of importance. About the rocks of La Jolla and Santa Catalina the waters are as clear as those about a coral reef in the tropics. In these waters are found the same type of fishes that would be found about a coral bank. The species are not the same as those of the far South, but their general character is the same. On the other hand, in the more or less muddy waters of the Bay of San Francisco only those species are found to which the cloudy or muddy condition of the water is not objectionable, and the brilliant colors of the clear water fishes are totally wanting among them.

With regard to preference in the matter of surroundings, the fishes of the California Coast may again be divided. Of the pelagic species about twenty visit our Coast. These are the fishes which swim freely in the open sea, often moving over hundreds of miles of area and belonging to no one country more than another. Of species living about the rocks and feeding upon the small animals which abound in the sea weed, there are fifty species, thirty of them belonging to the group known as "rock cod." All of these are food fishes, though not all of the best quality. Of the kelp fishes there are twenty-five species. These fishes are confined chiefly to the beds of kelp which are a special characteristic of the California Coast, nothing like them existing on the Atlantic Coast. Some of the fish feed upon the sea weeds themselves, more than upon the molluscs and crabs which find their home among

the marine plants and the rocks about which they grow. Of the 145 species which frequent by preference the waters with smooth or sandy bottom, some swim near the surface of the water, often entering the bay in large shoals; others, as the flounders, lie on the bottom and in color are scarcely distinguishable from the sand. There are ten anadromous species, that is, species which ascend the rivers in the spring or fall for the purpose of spawning in fresh water, but which spend the greater part of their lives in the sea. Of these species the most important is the salmon, the largest in size the sturgeon. Four species are confined chiefly to the brackish mouths of streams, a very small portion, because California has very little estuary waters. Finally about forty species are confined exclusively to the rivers.

The fisheries of the Pacific Coast, as a whole, are relatively little developed. The Bays of San Francisco and Monterey and of San Diego, and a region about Avalon, are fully fished—over fished at times, but the great length of the Coast remains almost untouched. It has been estimated that on the 7,000 miles of coast of California, Oregon and Washington the fisheries are about equal to those on 500 miles of the Coast of New England. The value of the product is about the same in the two districts and may be roughly set down at \$15,000,000 per year. Of this amount the salmon fisheries of the Columbia represent between a fourth and a third; California's portion would be about \$4,000,000. This represents for California a catch of from thirty to forty million pounds of fish a year.

A rough estimate in pounds of the distribution of this product among the several counties of the State would be as follows: The bay counties, 15,000,000; Humboldt, 1,500,000; Monterey, 2,000,000; Sacramento River, 12,000,000; Del Norte, 1,000,000; Sonoma, 250,000; San Luis Obispo, 200,000; Mendocino, 5,000; Santa Barbara, 250,000; Los Angeles, 1,500,000; Santa Cruz, 250,000; Ventura, 2,000; Orange, 6,000; inland fishers, 500,000. Total, 36,463,000.

The salmon fisheries of the Sacramento are chiefly in the counties of Solano and Contra Costa. For a number of years these fisheries steadily declined as a result of over fishing and of the destruction of the spawning beds by the refuse from the lumbering and placer mining industries. Practically the only spawning beds left in the Sacramento basin were those in the river itself about Red Bluff. The United States Fish Commission came to the rescue, establishing hatchery stations at Baird and Battle Creek and from these re-populated the river. At present more salmon run in the Sacramento than when the stream flowed through the primeval wilderness.

The salmon of the Sacramento is the Quinnot or King salmon, the largest and finest of all the salmon tribe. It reaches in four years an average weight of sixteen pounds. When mature, at the age of three or four years, leaves the sea and runs up the streams to spawn, starting in the spring or early summer and spawning in the early fall. The salmon do not feed after leaving the sea and while on the spawning journey. After spawning both the male and female salmon die. The female lays from 4,000 to 5,000 eggs. As naturally spawned only one in a hundred or more of these hatches and escapes its enemies. The young salmon drifts downward to the sea, "tail foremost" in the old salmon fashion, to return to its native stream only as mature fish to spawn. Under artificial propagation instead of one in a hundred the hatcheries secure 95 out of every 100 eggs and are able to put the young salmon into the river in a much better condition to escape its enemies and attain maturity.

(To be Concluded Next Week.)

SAN FRANCISCO FLY-CASTING CLUB.

Sunday contest No. 9, Medal Series. Stow Lake, July 28, 1907. Wind, southwest. Weather, fair. Judges, E. A. Mocker, G. H. Foulks, T. C. Kierulff. Referee, C. R. Kenniff. Clerk, E. O. Ritter.

Good Fishing.—The Salt Spring Valley reservoir, near San Andreas, is getting to be a favorite fishing resort, several good catches are reported from there. The reservoir is well stocked with black bass, the fish in this lake being particularly good eating.

Expensive Quail.—Game Warden Welch arrested W. H. Carter and Frank McLaughlin of Mountain View for shooting quail. The game warden was up the Coast and caught them in the act. They were brought to Santa Cruz, where Justice Craghill fined them each \$25. They paid the fines, but had to pawn their rig to raise the money.

AT THE TRAPS.

The Eureka Gun Club blue-rock shoot on July 14th shows some very good scores. The only straight score was shot by Hip Justins. The results in a number of 25-target races are as follows:

H. Justins 25, W. Parker 22, D. Reed 14, G. W. Smith 20, D. W. King Jr. 22, H. Kelly 24, L. Yocom 22, J. Holmes 24, J. Sammons 19, F. Waite 14, S. Clanton 17, W. Parrot 22, Dr. Cook 16, R. Parr 16, J. Parr 13, H. Wahl 15, F. Liscomb 22, C. Layman 12.

H. Justins 21, W. Parker 20, D. Reed 20, G. W. Smith 21, D. W. King Jr. 22, H. Kelly 20, L. Yocom 22, J. Holmes 24, J. Sammons 21, F. Waite 22, S. Clanton 20, W. Parrot 19, Dr. Cook 19, R. Parr 16, J. Parr 13, H. Wahl 10, F. Liscomb 20, C. Layman 8.

H. Justins 24, W. Parker 22, D. Reed 22, G. W. Smith 22, D. W. King Jr. 23, H. Kelly 24, L. Yocom 21, J. Holmes 24, J. Sammons 24, F. Waite 18, S. Clanton 18, W. Parrot 14, F. Liscomb 19.

H. Justins 23, W. Parker 24, Dr. Reed 22, G. W. Smith 23, D. W. King Jr. 23, H. Kelly 24, L. Yocom 20, J. Holmes 22, J. Sammons 18, F. Waite 19, F. Liscomb 16.

The big prize shoot held under the auspices of the Multnomah Rod and Gun Club at the Irvington traps July 21st was one of the most successful events ever held in Portland. Twenty-eight guns entered the events in competition for cash prizes and trophies, while a large number of marksmen took flyers at the traps merely for practice.

Winters of Portland and E. E. Ellis of Seattle tied for first place in the unprofessional class, and in the shoot-off the Portland man won the trophy.

Frank Howe of the local club was high man in the shoot, and incidentally took the cash prizes offered in the professional competition. Jack Smith and M. Abrahams made splendid records at the traps and were only nosed out by a few points by Ellis and Winters. Winters also succeeded in winning the Inman medal. McPherson and Wagoner captured the money in the events in which they competed. The scores were as follows:

Howe, shot at 150, broke 139; Winters, 150-134; E. E. Ellis, 150-134; Jack Smith, 150-133; Abraham, 150-132; McPherson, 150-131; Spence, 150-130; Cullson, 150-130; Bills, 150-128; Griffin, 150-127; Brown, 150-124; Hillis, 150-124; Caldwell, 150-126; Shangle, 150-115; Wagner, 150-121; Payne, 150, 110; Bate-man, 55-48; Hudson, 60-36; Muster, 60-26; Thornton, 120-87; Tees, 60-27; Borders, 95-68; Young, 95-74; Mrs. Young, 40-29; Carter, 60-47; France, 95-70; Church, 15-8; H. Ellis, 50-47.

Blue-rock shooters, particularly the Southern contingent, are looking forward with much interest to the Southern California circuit of blue-rock shoots that will take place the latter part of September and the first week of October. It is not so much that good sport and money prizes will be offered the local experts as it is in the fact that the best wing shots in the country will probably be there again.

The big event on the Coast this year is the Pacific Coast Handicap, which is carded for Spokane, September 10th, 11th, 12th, and after that in rotation at cofes Portland, San Francisco, Western Gun Club at Los Angeles, Coronado, Los Angeles Gun Club and Douglas, Ariz. About all of the big Eastern professionals will be in attendance at Spokane, and it is to the hope of the local shooters that they can be induced to take in all the shoots on the circuit. The Eastern "pros," who will be at Spokane are W. R. Crosby, Rolla Heikes, Tof Marshall, Fred Gilbert, Bill Heer, Ralph Trimble, Charley Young and Otto Sens. Of this bunch none will be more warmly welcomed than Fred Gilbert, who is one of the best shots the country ever saw. He was out of the game last year on account of rheumatism, but is said to be in form again, and if this is so, Crosby, Marshall, Heikes and Heer will have an opponent worthy of their best work.

Such an aggregation of stars will bring out all the best on the Coast, and the local marksmen look for a record breaking crowd at the two shoots in Los Angeles.

The dates for the circuit are as follows: Spokane, September 10, 11, 12; Portland, September 15, 16, 17; San Francisco, September 20, 21, 22; Western Gun Club of Los Angeles, September 24, 25, 26; Coronado, September 27, 28, 29; Los Angeles Gun Club, October 2, 3, 4; Douglas, Ariz., October 11, 12, 13. The program will be made up of ten and twenty-bird events for money prizes.

The second Eastern Handicap started at Wellington, near Boston, on July 17th and closed on the 18th. More than 150 shooters were in attendance during the tourney, which was held under the auspices of "The Palefaces." The entire shoot was a success and everything went along, as usual, under the supervision of Manager-Secretary Elmer E. Shaner, like clock work.

Mr. Frank M. Eames of Philadelphia and Mr. O. R. Dickey of Wellington did the handicapping in a satisfactory manner. They acted in lieu of Messrs. C. M. Powers and W. D. Townsend, who were unable to be present. Mr. Chas. A. North of Cleveland looked after four sets of expert traps, Sergeant system. The total number of targets trapped during the tournament was 75,665.

On Monday, July 15th, Mayor Eugene E. Reed of Manchester, N. H., the New Hampshire and Massachusetts blue-rock champion, was high amateur gun with 84 out of 90. J. R. Taylor of Newark, O.,

was high "pro" with 87 out of 90. Sixty-seven shooters shot through six 15-target races, Neaf Appar fired the first shot, scoring 77 out of 90. During the afternoon 7,980 targets were trapped.

On Tuesday, the first day, 125 shooters, including thirty-two professionals, were in action. The program called for twelve 15-target events.

The amateurs were the attraction for the spectators, on account of the enthusiasm shown in shooting by the local experts against the Southern and Western cracks. C. H. Newcomb of Philadelphia was in great form, winning first honors over J. S. Young of Chicago, by a score of 171 to 169 for Young. Horace R. Bonser of Cincinnati was third, with 168. Horace C. Kirkwood, secretary of the Palefaces, was a tie for fourth place with D. A. Upson of Cleveland, with 167.

The contests between the professionals was very keen. The three leaders, L. S. German, Fred Gilbert and W. R. Crosby, made a fine race, only two targets being missed by German and Gilbert, who were a tie for first place with 178 each, and three by Crosby, who came next with 177. The only local expert to qualify was O. R. Dickey, for more than twenty-five years a familiar figure at every tournament. He scored 169.

During the day 22,140 targets were trapped, a record for a Boston day at the traps. The Middle West and Southern shooters "wiped the eyes" of the New Englanders. The weather was fair, a puffy east wind and slight haze bothering slow shooters a bit.

Over 1,000 spectators watched the shooters on Wednesday. Weather conditions were of the "sticky" variety—an excessive humidity increased the discomforts of a hot day. The Eastern experts were again outclassed by the cracks from the South and Middle West. Six races at 15 targets only counted on general average, the Preliminary Handicap at 100 targets taking up the rest of the day, during which 23,650 targets were trapped.

In the six regular events D. A. Upson and Harry Metcalf were a tie for first place among the amateurs with 86, P. H. Powell was in second with 85, and J. S. Young, William Hopkins and Mayor Reed were a tie for third with 84.

Among the professionals, Fred Gilbert was first with 87, W. H. Heer, A. M. Hatcher, Chris Gottlieb and H. H. Stevens were a tie for second with 85, and J. S. Fanning and J. R. Taylor were a tie for third place with 84.

The feature of the day was the Preliminary Handicap. It resulted in a tie between D. A. Upson of Cleveland, O., and G. H. Darton of Portland, Me., each scoring 94 out of the 100. In the shoot-off at 20 targets Upson was the winner, scoring 19 to Darton's 15. Upson was on the 19-yard mark and Darton on the 17-yard mark. Darton was the only Easterner who seemed able to measure up to the contestants from the West. His performance was one of the features of the day.

The purse included seventy-seven entries at \$5, three post entries at \$8, which, with the \$100 added money, amounted to \$509. Upson, \$81.45; Darton, \$71.25; Ford, \$56; Howard and Pumpelly, \$43.25 apiece; Martin, Newcomb, Springer and Funk, \$29.25 each; Kirkwood, Caviechi, Barstow, Hebbard, Vivian, Staples, \$14.40 each; Young, Hopkins and Matthews, \$3.45 apiece, on scores of 94, 92, 91, 90, 89 and 88 respectively.

While the professionals received no money or trophy in the Preliminary Handicap, they shot with great vigor for the honor of being high gun. Fred Gilbert, at 21 yards, was first with 96; W. R. Crosby, at 21 yards, was second with 95, and W. B. Darton, at 18 yards, was third with 94; J. T. Skelley of Wilmington, Del., and Mrs. Ad. Topperwein came next with 93 each.

The final day of the tournament opened with unabated interest on the part of contestants and spectators. With the exception of the excessive heat the weather conditions were excellent. The first squad was called promptly at 9 o'clock, and the six 15-target events resulted in a tie for first place among the amateurs between G. S. McCarty, J. S. Young and G. H. Piercy with 86 out of 90. O. N. Ford, J. Martin, P. H. Powell and S. M. Van Allen were a tie for second place with 83; D. A. Upson, B. F. Smith and G. W. Fernside were a tie for third place with 83.

Among the professionals, Fred Gilbert was first with 89, Crosby and German were a tie for second with 87, and Maryott and Hawkhus were a tie for third with 86.

The greatest interest in the tournament, of course, centered in the big event, the second Eastern Handicap at 100 targets. It brought out a representative field of entries, 115 contestants, amateur and professional taking part, the professionals shooting for "targets only." Of the total number of entries two amateurs and one professional forfeited their entrance money and did not compete.

Horace R. Bonser of Cincinnati and H. L. Snow of Portland, Me., were a tie for first place, each scoring 93 out of the 100. Bonser stood on the 18-yard mark, and Snow on the 16-yard mark. In the shoot-off at 20 targets Bonser broke 20 straight, while Snow broke but 18.

The purse amounted to \$807, made up of seventy-one regular entries at \$8, three penalty entries at \$13 and \$200 added money. Unless the 93's divided even, H. R. Bonser got \$129.10, H. L. Snow \$112.95, J. R. Martin and Thomas Howe \$80.65 each, W. A. Hammond and Roy Hodson \$60.50 each; the 90's \$33.40 each and the 89's \$5.35 each.

At the conclusion of the shooting the trophies, which went to Messrs. Bonser and Upson, the win-

ners of the Eastern and Preliminary Handicaps respectively, were presented by Secretary-Manager Shaner in a few well chosen words. During the day 21,985 targets were trapped.

Amateur high average was won by Jesse R. Young of Chicago, with 339 out of 360. Professional high average was annexed by Fred Gilbert, with 354 out of 360.

G. M. Clayton, it is published by the Stockton press, will judge at the Stockton show in October.

Thos J. Blight of San Francisco has been selected to act as superintendent.

Abbot Kinney of Venice has offered to furnish the traps, blue-rocks and other necessary equipment for the proposed tournament to be held in conjunction with the convention of the California State Fish and Game Protective Association, which meets in Los Angeles early in November.

Louis Herzog, secretary of the Los Angeles County Association, has already begun to raise money for prizes in various events suggested, and has thus far been successful.

DOINGS IN DOGDOM.

Valverde Kennels' Gladys May, the dam of Ch. Valverde Venus, whelped on May 25th ten puppies (six dogs) to Ch. Anfield Model.

There are a few Collie puppies, and good ones at that, now for sale by Valverde Kennels. There must be room made for coming litters.

D. P. Cresswell is very much enthused over two solid black three-months-old puppies, a dog and a bitch, by Ch. Mepals Saxon out of Lady Cresswell. Saxon has proved himself a sure producer in the past, and it is claimed has certainly surpassed himself this time.

Mr. Cresswell firmly believes, and he knows a Cocker if any one does, that he now has two of the best black puppies ever whelped on the Coast. So well pleased with his prospective champions is he that he extends an invitation to the fancy to call at his residence, 544 San Jose avenue, and make an inspection.

Mrs. M. Nunan's handsome black winning Cocker, Monti, has recently recovered from a rather serious ailment—sores and attendant sickness resulting from wild-oat heads becoming imbedded in his abdomen. Monti, we are pleased to note, is now in better shape than ever. This little black dog is one of the merriest showers in the ring, and it would have been a big loss to the fancy had he succumbed to his illness.

A Los Angeles correspondent desires an answer to the following query:

"Why did Fried Liver Jack give the druggist a For Terrier puppy, that was only fit for the bucket, in payment of important professional services that should have met with sincere appreciation instead of bunco ingratitude?"

Irving R. Smith of Los Angeles has a very promising litter in his five Boston Terrier pups by Champion Bayside Chauncey out of Ascot Alice. With these five puppies and bitch Smith is preparing to establish kennels of his own, and proposes to specialize on Bostons, which have been so popular in recent bench shows in Southern California.

The puppies are highly bred, as Ch. Bayside Chauncey has won many firsts in bench shows, and is by O'Connell's Red, out of Bayside Bess, while their dam is by Kimball's Prince out of Tiddle D. The litter was whelped June 11th, and it is claimed are as good as ever were whelped in California. There are three dogs and two bitches.

The recently organized Albuquerque Kennel Club propose to hold the initial show at the New Mexico Territorial Fair. Dr. J. H. Wroth and Col. D. K. B. Sellers are the moving spirits in the affair.

The first bench show for Everett, Wash., is now, approximately, a fixture and will be held under the auspices of the Washington State Fair Association. Much enthusiasm is manifested in regard to the innovation.

Secretary Stanley, 2711 Colby street, Everett, Wash., will gladly furnish any further information to interested fanciers.

The Bull Terrier Club of America and the Bull Terrier Breeders' Association will hold another specialty show in Philadelphia on September 7th. Mr. Claire Foster, the well known expert and prominent fancier, will judge, it is reported. A large entry is assured and the list of specials will be numerous and valuable. The show last year was a pronounced success.

The Boston lemon crop is eked out now and then with a bunch of sour grapes. As the Coast "flat catcher" is on tap in the door yard, it is so very very easy to get the "low down" on Coast dogdom, particularly so in Cockers. Our best Cockers are not Eastern culls that "win" before they are "landed," and then are lost in the ruck at subsequent shows. Some day, somebody will wake up and kick hisself—a lemon and milk diet is not good for old dogs.

The Venice of America Kennel Club has recently been organized. Mr. Fred Herr, the well known Los Angeles Boston Terrier fancier, is quoted in connection therewith as follows:

"The object of the new club is to raise the plane of the local dog shows and make social events out of them. In the East and in England the shows of the various kennel clubs are the most brilliant of society events. We intend to make them the same here in Los Angeles. I have just returned from San Francisco, where I laid my plans before the Pacific Advisory Committee of the American Kennel Club and was awarded a charter for the new club.

"Associated with me in the new enterprise are some of the most prominent people in Southern California, who never before were identified with kennel clubs. Our honorary membership list includes the following names: Epes Randolph, J. P. Brown, William A. Temple, R. A. Rowan, J. B. Vandergrift and Freeman A. Ford."

The club, it is reported, consists of eight active members: W. J. Doran, president; Mrs. M. S. Severance, vice-president; C. P. Ensign, secretary; G. F. Herr, treasurer; W. K. Peasley, Kingsley Stevens, J. W. Books and Dr. L. W. Young.

The new club will hold its first show at Venice, August 29th, 30th and 31st. Entries, which will be received at Mr. Herr's office, at 557 South Spring street, will close on August 17th.

The bench show committee that has been appointed consists of Kenneth Pruess, J. W. Brooks and Robert Cochran. Irving Ackerman of San Francisco, John P. Brown of Riverside, George L. Waring of Santa Monica and L. W. Young of Los Angeles will officiate as judges. The club will give a show every year at Venice and a special permit may be secured for one to be held at some other point in January, if this first one is a success.

One of the side attractions at the California State Fair at Sacramento next month will be whippet racing. Although the dogs engaged are practically performing circuit dogs, still it can be said this will be the pioneer whippet racing for California. The real sport of racing whippets will be intelligently demonstrated.

This pastime is very popular in England and the Colonies and to a great extent back East, and were it once to "catch on" here it would become as popular as it is elsewhere.

Some bitches are physically deformed, and consequently unable to breed, but in most cases they can be put right by means of a slight operation.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

OUR MOST DESTRUCTIVE RODENTS.

The United States Department of Agriculture will soon issue Farmers' Bulletin 297, entitled "Methods of Destroying Rats," prepared under the supervision of the Chief of the Bureau of Biological Survey, by D. E. Lantz, Assistant Biologist. The topic is of perennial interest, and an infallible method of exterminating these rodents would be worth more to the people of the United States in a single decade than the Department of Agriculture has cost since its establishment.

One rat is much like another so far as destructiveness goes, but it is of interest to note that three kinds have appeared in this country, all immigrants from the old world. The black rat was the first to reach our shores, which it did nearly 300 years ago. The common species known as the brown, or Norway rat, arrived about the year 1775 and at once proceeded to drive out its weaker rival, until almost everywhere it has supplanted it. The third species, known as the roof, or Alexandrine, rat of Egypt, is a great mariner and infests every ship; hence, naturally, it is common along our Coast, especially in the South.

All rats are dangerous foes, but the brown rat is the worst mammalian pest in existence and in the United States destroys more property than all other noxious animals combined. No statistics of the actual damage annually done by these rodents have been gathered in America. In Denmark the loss is put at \$3,000,000 a year, and in France the damage by both rats and mice has been estimated at \$40,000,000 annually. A single rat will consume about 2 ounces of wheat or corn a day, and it destroys far more of the latter than it eats, as indeed it does of most other food. The average cost to the country of feeding a rat on grain is about 50 cents a year. If for each cow, sheep and hog on the farms of the United States the farmers support one rat on grain, the toll levied on the cereals by these rodents would

reach the enormous total of \$100,000,000 a year. Even granting that half their food is waste material, the tax of feeding rats is still an enormous drain on the profits of agriculture.

But much of their food is more expensive than grain, and the actual losses due to these animals are by no means confined to food. They enter stores and warehouses and destroy dry goods—lace curtains, carpets, woollens, silks—as well as kid gloves and other leather goods. They gnaw through lead pipes, flooding buildings with water or filling them with gas. They injure furniture and the foundations and doors of buildings. They eat the insulation from electric wires, thus causing disastrous fires. The average fire loss in the United States due to defective insulation is placed at \$15,000,000 annually, a considerable part of which is said to be caused by rats.

Rats destroy eggs and young poultry, pigeons, game birds and wild song birds. They have been known to kill young rabbits, pigs and lambs, and even to attack children. Carl Hagenheck once lost three young elephants because rats gnawed their feet, inflicting incurable wounds.

In addition to the direct damage they do, rats are known to be active agents in carrying disease germs from house to house and from city to city. Bubonic plague is usually disseminated from post to port in this way.

Their prolificness is the chief obstacle to their extermination. They produce young from three to six times a year, and females breed when about three months old. The average litter is about ten, but often it numbers fourteen or more. If three litters of ten each are produced every year, a single pair, breeding without check and without losses by death, in three years would be represented by ten generations and would number 20,153,392 individuals. The eleventh generation, due at the beginning of the fourth year, would number over a hundred millions.

The world has been fighting rats for several centuries, but the warfare has

BREEDING NOTES.

As is well known, bitches as a rule come in that condition that they may be bred from for the first time when about eight or nine months of age; but this is by no means a fixed rule, for the bitches of foreign breed often come on much sooner. I have known Chows to come on when between six and seven months of age, and then, on the other hand, small English-bred bitches may not come on until ten, eleven or twelve months old. Now and then, from some unexplained cause, a bitch may not come into breeding condition until she is two years of age, and even later, and I have known a few instances when a bitch has never come on at all, and other cases when a bitch has been in that condition regularly for two or three years, and then miss for a couple of years or longer. Nothing serious seems to occur from these irregularities, except that the bitch is inclined to get fat and is rather dull. If a bitch does not come on or show signs of doing so, I know of nothing that will induce it. Stimulating food, as raw meat, during the spring months, and association with other bitches who are in breeding condition, seems sometimes to help. When there are the least signs appearing in these abnormal cases, some uterine stimulant, as permanganate of potash, should be given; the dose varies from half to two grains, according to the size of the bitch. The medicine is best given made into a pill with resin ointment; it should be repeated twice a day, and continued for about a week. There are bitches who come on every three or four months, but they are very seldom breeders. The only thing to be done in such cases is to try and improve the general health and feed on a non-stimulating food; give a biscuit diet, dry or soaked, some fish occasionally (dogs are fond of boiled fresh haddock), also plenty of exercise, except when there are signs of coming on, when the bitch should be kept quiet, and small doses of opium, from a quarter to a grain, two or three times a day, made into a pill. Sometimes the usual discharge continues for a long time, which, for many reasons, is a great nuisance, especially in house dogs, and besides, it is weakening to the bitch. So when it continues for more than a fortnight, measures should be taken to stop it. For this purpose syringe the passage out two or three times a day with hot water (about 110 degrees Fahr.) to which has been added five grains of permanganate of potash to every pint. From half a pint to a quart of fluid should be added each time. The best apparatus to use is a Higginson syringe. The short tube should be used for Toys, and the large one for other breeds, and should be inserted into the passage from two to eight inches, according to the size of the patient.

Astringent medicine should also be given as the following prescription for pills:

The Pills—Recipe:

Ergotinegrs. 4 to 24
Reduced Irongrs. 6 to 48
Excip q.s.

Mix and divide into twelve pills. One to be given two or three times a day, according to the severity of the discharge.

In writing the above prescription it is necessary to say a few words in explanation. I divide dogs into five sizes: First, small Toys, as dogs weighing about five pounds, a little more or less does not signify; second, those weighing 9 to 14 pounds, as Spaniels, Pugs, Schipperkes, etc.; third, Terriers of different kinds, except big Airedales, and they rank with Collies; fourth, Collies, Retrievers, etc.; fifth, St. Bernards, Mastiffs, etc. I may here mention that bitches, after pupping, will some times continue with a red discharge for some weeks, whereas, under normal conditions, it ought to cease in a fortnight. The above treatment, as a rule, is applicable to these cases, but in all these instances, if the discharge continues after three or four weeks, the patient should be examined by a veterinary surgeon, as there may be other causes than a relaxed condition of the parts to account for it.

There can be no doubt that the spring is the best time of year to breed. Puppies born in March or April have the whole summer before them when they can live out of doors, for of all young animals, puppies most require fresh air and exercise to thrive and develop. Of course, at times one sees good puppies that have been born in May and June, or even July, but the latter month is almost too late to rear puppies of the larger breeds well, but it is not so important with Toys, who may be brought up in the house.

Owners of stud dogs should always carefully examine the bitches sent to their dogs, as they not infrequently suffer from growths which are contagious, and a valuable dog may be ruined. The disease, as a rule, is incurable, though in the male, if treated early, it may be checked, and in some slight cases I have known a cure to be effected. Bull-bitches are the most liable to this disease.

The normal period of gestation in the bitch is sixty-three days, but few go the full time, but generally litter down about the sixty-second day. Puppies will sometimes live when born on the fifty-seventh day, but very seldom indeed if born before. Some bitches will always go over the normal time, and I remember one giving birth to a litter on the seventy-third day, and the puppies did well.—A. J. S., in Illustrated Kennel News.

been neither systematic nor persistent. The number of "infallible" devices and formulas for killing the rodents that have been put forth would fill volumes, and still the pestiferous rat survives and grows more and more cunning as the devices for its destruction gain in ingenuity.

The Biological Survey does not pretend to have worked out an infallible device for killing rats by wholesale, but the methods for their destruction given in the bulletin are those which careful experiments have shown to be the best, and the formulas for poisoning and trapping are the most approved ones. Particular emphasis is placed on the rat-proof construction of buildings and on organized co-operative efforts to destroy the animals.

The bulletin will be furnished free upon application to the United States Department of Agriculture.—Chicago Breeders' Gazette.

REMEDIES FOR BLOAT.

The season for bloat or hoven, so much dreaded because of disastrous losses, is here again and many remedies are suggested. A very simple one is to give a tablespoonful of pine tar. Repeat the dose if needful. This has been tried and found efficacious. When the bloat is the result of acute indigestion Dr. A. S. Alexander, in Rural New Yorker, gives the following treatment for prevention and cure:

Where there is a tendency to bloating upon rich pasture always feed dry hay before the cows are turned in and allow free access to a mixture of equal parts slaked lime and salt. The administration of salts and oil is correct treatment to clear irritants out of the stomachs and bowels, but the first medicine given in a case of bloating should be two ounces of turpentine in a pint of raw linseed oil. This, as a rule, will reduce the distension, but if not it may be repeated in half an hour, or give one ounce of aromatic spirits of ammonia, four ounces of hyposulphite of soda and a dram of buid extract of nux vomica

in a quart of flax seed tea. Instead of tapping first try effects of putting a stick bitwise in the mouth and holding it in place by tying a string from each end of the gag to the horn. Also walk the cow about after injecting into rectum a couple of quarts of warm water containing two ounces of glycerine. Repeat the injection every three hours. Where it is necessary to tap a cow for hloat medicine may be injected into the paunch through the cannula, a suitable mixture being a tablespoonful of chloride of lime in a quart of water or four ounces of hyposulphite of soda in a like amount of water. The physic should follow the other medicines as soon as the hloating subsides. In a chronic case give two ounces of hyposulphite of soda and a dram of fluid extract of nux vomica twice daily.

The injustice of paying one price for all milk received at a cheese factory or creamery is well illustrated by figures furnished by a large owner of creameries who, by the way, tests milk for quality whether paying for all of it by that plan or not. At one factory, the composite tests for the milk show that the dairies run from 2.6 up to 3.4 per cent fat, the average for a month being 3.2 per cent. At another factory, where the milk is paid for by the test plant, the patrons milk another class of cows and the tests for the same period as the other ran from 3.6 to 5.4 per cent, the composite average of all being 4.6 per cent. Imagine Smith getting the same price for his 5.4 per cent fat milk as Jones with his 2.6 per cent cows. One hundred pounds of the latter milk would make about seven pounds of cheese, while one hundred pounds of the other would make approximately thirteen pounds. This is a square difference of six pounds of cheese. Who gets this, Smith Jones of the factory man?

The hot sun will drive the fat out of a pig about as fast as you can lay it on. It pays to provide plenty of shade.

THE HORSE BREEDER'S PROFITS.

The following letter contributed to the London Live Stock Journal seems to have both interest and applicability on this side of the water:

The practicing of too rigid a system of economy is not calculated to benefit the breeder, and consequently if his intention is to make his stock pay he must be prepared to lay out a certain amount of money upon the premises they live in, the land they graze upon and the food they eat. No animals can be expected to thrive or to do justice to their pedigrees if they are not properly "done by," but this expression must not be taken as implying that undue extravagance in any department is being advocated. Most practical breeders have gained by experience where to draw the line, but in the case of the novice there must naturally be a difficulty in deciding where necessary expenditure ends and unnecessary extravagance commences. In many cases the narrow margin that divides the two represents the profit or loss that the breeder will show at the end of a year's business and consequently attention to details is essential to success. The cost of production, in short, is even a more important factor in the business of a breeder than the prices he receives, as animals reared economically, though they may sell cheap, are likely to show a better profit than the long-priced ones which have cost a big average to bring under the hammer.

It is, therefore, unreasonable to infer that in the case of live stock breeding, as in many other things, appearances are deceptive, and that a person must be behind the scenes if he is to form an accurate opinion regarding the success, or otherwise, of any stud. Still, one of the two main points which a breeder must study very carefully is economy in the production of his stock. It is absurd, for instance, for him to think of raising a middling medium-priced class of horse on a highly-rented land or under conditions that necessitate a large staff of servants. The best possible only can be expected to pay under such conditions; the moderate, second-class animals will only show a profit if brought up on lines that are far removed from the extravagant. A certain amount of "show" is often necessary in the case of a breeder who is producing the highest class of stock, as the kind of window dressing is calculated to attract wealthy purchasers; but it is justifiable unless the breed kept is one that, as a rule, realizes high prices—which, in fact, is fashionable, and only when the stud or herd is of the best.

Between reasonable economy, which may be described as close attention to details of expenditure and downright niggardiness, a great gulf exists, for parsimony never pays in the end, and the outlay of a little more money in the purchase of sound good forage for the horse is always preferable to feeding it second-rate stuff, which is more expensive in the end. It usually is the small expenses which mount up to large totals that help to diminish the profits of a breeder. A great mistake is made by anyone who, to save a small sum at the time, defers repairing his premises or fences the moment they require attending to. He should remember that trivial defects soon

brow into serious dilapidations, and then a large expenditure becomes necessary, whilst the stock may have suffered meanwhile, so there can be no economy in putting off the evil day.

Whatever sort of stock is kept, it is always certain that the best pays most in the long run; and consequently attention to breeding is essential to success. A well bred animal costs no more to keep than a second-rater does, and invariably is the more salable of the two. Consequently it is the most mistaken policy to breed from a stallion because he stands at a low fee. No doubt many most desirable sires are available for the public service at prices considerably below their value, and therefore it would be most unwise for a breeder to discard a horse or hulk simply because he is cheap. On the other hand, it is an equal, if not greater mistake, to run after him on the same account, as an ineligible or unsound sire is never a profitable animal to use. Of course, too, there is the question of breeding to be considered; and the advice that may be given is never to breed from a sire merely because he may happen to be a great winner, if there is another in the district whose hlood has been proved to nick well with that of the mares you possess. By adopting the former course a breeder may be successful in producing a wonder, but the attempt is wholly an experiment whereas, in the latter he will be pretty sure to get something which will be in demand if only by reason of its breeding, as there are always people about on the lookout for animals possessed of certain blood for breeding purposes.

The age at which the breeder should dispose of his stock is a subject on which opinions differ a great deal, but experienced men are unanimous in their belief that it is a fatal mistake to hold over a large number of young animals in the hope that one or two of them may develop into something sensational. Even if this happy result is obtained, it is not at all certain that the large profits obtained over the cracks will compensate for the losses, some of which would probably have sold better in their earlier days and would have saved their keep as well. Perhaps some colt or filly of very exceptional promise may be held over as

a hostage to fortune in the hope that it will develop into an exceptionally good horse or mare; but as a rule, it is profitable that it is the wisest plan for a man who breeds for the market to clear out when he holds a sale. Even if a horse or two is sold below its value the effect on future sales is sure to be good, and to the breeder who regards his stud from a merely business point of view a quick turn over of his capital, and a reduction of the chances of losses through deaths, is usually preferable.

Very possibly, when all is said and done, the man who occupies a little land at a fair rental, and who breeds from one or two mares of the right sort, is the person who makes the most out of breeding, provided that he looks after his stock and uses the best available sires. This system of breeding entails very little extra expense if a mare is kept, as the mares and foals require little attention that involves an outlay of time; and somehow it often happens that the young stock raised on a small establishment sell better than was expected, perhaps because, as a rule, they are usually made more of when young. Such results should certainly inspire the owners of old favorite mares to try their luck with a foal or two from them, as the young stock can be reared cheaply and may sell well. The fact that the mare is an old one is not a matter of much importance, as many a very old mare's first foal is an excellent one; and any little disadvantage that might exist on account of age will be compensated for by the fact that the mares, being old favorites, are generally of the right sort else they would never have been kept by their owners. In short, the breeder in a small way, should derive both pleasure and profit for his undertaking, added to which he will, according to his abilities, be assisting in supplying a national want. He can gain encouragement, too, by the reflection that, although success may be deferred by ill-luck for a time, he is practically certain in the end to derive good profits from his undertaking, if he only studies breeding and practices economy. There is no royal road to success in breeding, beyond these two, but united they invariably bring profit to the breeder.

"SAVE THE HORSE"

Registered U. S. Patent Office

SPAVIN CURE

Makes a Tendon Like a Rod of Steel

Makes money winners out of cripples; age of horse or age of lameness makes no difference. It will strengthen, repair and cure any broken down, weak or injured condition of the tendon; it infuses strength and acts as a permanent bandage to the parts.

It is the only remedy of its kind ever conceived, and the only one so positive and successful as to warrant selling under a signed guarantee to refund money if it fails.

"SAVE-THE-HORSE" Permanently Cures Spavin, Ringbone (except Low), Curb, Thoroughpin, Splint, Shoe Boli, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse works as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy, booklet and letters on every kind of lameness.

At Druggists and Dealers or Express Paid.

SAN FRANCISCO, CAL.

POE SALE.

The Handsome Standard Bay Gelding,
Kondras.

Nine years old, by Prince Nutwood 2:11½, dam by Strathway. Stands 16½ hands and weighs about 1225 pounds. Has worked miles in 2:24, quarters in 32 seconds with six weeks' training. He has never been trained since, but was used on the roads at Palo Alto. He is good gaited, wears no boots, does not pull a pound, absolutely sound, afraid of nothing, a lady can drive him with perfect safety. W. H. Williams had him in training and says that he looks like a 2:10 trotter. He is a remarkably good individual in every respect and a high class roadster and matinee horse.

Will also sell a good Studebaker buggy and a McKerron harness. The above will be sold on account of the owner leaving for Europe. Horse can be seen at Hans Frelson's Stables, Twenty-fourth Avenue, near the Casino. For further particulars address this office.

GOLTS AND BROODMARES FOR SALE.

Miss Horgan, winner of the Horgan Futurity Stake for yearlings last year, by Sidmoor 2:17½, out of a producing dam.

Yearlings, two and three-year-olds by Sidmoor out of producing dams, and broodmares that are producers and stunted to Sidmoor 2:17½. These mares are by Alcona, Dexter Prince and other good sires. These horses can be seen at the Concord race track. For further information address JOHN OTT or ED. WALKER, Concord, Cal.

FOR SALE AT PLEASANTON.

Pfive-year-old pacing Stallion. Can step a mile in 2:13 or better, and a quarter in 30 seconds.

Sired by Chas. Derby, first dam Monaco by McKinney, second dam by Director, third dam by Hawthorne, fourth dam by Black Hawk. This horse is sound, gentle, and can be seen any time this month at J. R. Albertson's stable at the Pleasanton race track. A. G. SHEPPEE, 247 W. Fremont St., Stockton, Cal.

FOR SALE—SEARCHLIGHT 2:21.

By Searchlight 2:03¼, dam Wanda 2:14 by Eros. A handsome seal brown gelding, six years old, 16.1 hands high, weight 1200 lbs. Good-gaited trotter, has been a mile at Pleasanton this spring in 2:16, with the last half in 1:05. Will make a high-class roadster or matinee horse. Gentle disposition and good headed and afraid of nothing on the road. Is absolutely sound, without a blemish. For full particulars address H. OLSEN, 814 B St., Bayward, Cal.

Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roads and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by autos or care

JUDGING A HORSE BY HIS HEAD.

According to a New York news gatherer, James R. Keene, the famous New York breeder of thoroughbreds, and Hashem Bey, sheik of the Anazeh Bedouins in Arabia, hold the same identical theory regarding the selection of a horse. Homer Davenport, the New York cartoonist, who went to Arabia last year and secured a number of Arabian stallions and mares from the desert, said recently, while in conversation with Mr. Keene that Hashem Bey asked if he knew whether the few Government buyers of horses from India and other Far Eastern countries, whom he had seen, were good horsemen, stating further that they invariably looked at a horse's feet and legs instead of his head. "I ask," said Hashem Bey, "because, if I am going to trust my life and purse with you I won't look long at your feet, but will spend half an hour looking at your head, for what your body will do your head will tell. When I mount a horse's back my life is in his keeping. No horse will ever surpass what his head indicates, and he will always do what his head denotes. If his head is ill-shaped the horse is not well made. If in his features you see noble lines the horse will have a noble character that you can trust to hear you safely out of danger, and who, if your family is starving, can go and catch the gazelle." Mr. Davenport said that the great sheik was very interesting on the point, and he went further to prove his theory, saying: "Yesterday when you were looking over the mares of our tribe those you chose as having fine heads were in every instance the distinguished war-mares, the ones fleet of foot and of perfect manners." All the time Davenport was telling this to Mr. Keene he was walking back and forth in his office in handy reach of the stock ticker, which was working overtime. As Davenport finished, Mr. Keene stopped, and with a quizzical expression asked if that was really told by the great sheik. When he told him it was, he walked a few paces more, and, turned and said: "I want to tell you something. When I go to my farm in Kentucky, after the colts are weaned, I look over their heads, and from eighty colts I pick sixty by the general appearance of their heads. The next visit, when the colts are yearlings, I go over the sixty, and by their heads choose forty. Six months later I finally decide on twenty, and they are the ones I turn over to Mr. Rowe to be trained for racing purposes." Mr. Keene also said that last season horses hearing his colors had won \$155,000 in purses and stakes, and that he had sold about \$40,000 worth of young horses. "And," he added, "my judgment of them has always been by their heads. Of course, I take it for granted that their bodies are sound." "This statement, coming from the foremost turfman of America," says the news gatherer referred to, "is worthy of notice. That Mr. Keene's theory is the correct one, the history of the horses that have borne his famous white and blue colors to so many victories proves. During Mr. Keene's connection with the turf, which extends over many years, there is hardly an important event that horses owned by him have not won. They have been victorious in Metropolitan Handicaps, Brooklyn Handicaps, Brighton Handicaps, Futurities, Saratoga Specials, Great Republics, Realizations and all the other events that go to make up the history of the American turf.—Raymond, in Horse World.

Can You Shave?
 Rub a little "3 in One" on your razor strip till leather becomes soft and pliable; draw razor blade between thumb and finger moistened with "3 in One"; then strip. The razor cuts 5 times as easy and clean; holds the edge longer. "A Razor Saver for Every Shaver" which gives the scientific reasons, and a generous trial bottle sent free. Write to-day.

Isn't He Worth Saving?

ABSOLUTELY CURES
QUINN'S OINTMENT
REMOVES
SPLINTS
SPAVINS
WIND SWAYS
JUNKS

Why trade off or sell at a haggard price a good horse just because he "goes lame," "throws a curb" or develops some other hlemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan Ind., writes: I have tried a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried. Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars. Testimonials etc.

WINCHESTER

Take-Down Repeating Shotguns

If you want a serviceable shotgun, one that a scratch or a bump won't ruin and that can be bought at a price that won't ruin you, the Winchester Repeating Shotgun will meet your requirements. A 12 or 16 gauge Winchester Take-Down, with a strong shooting, full-choke barrel, suitable for trap work, duck shooting, etc., and an extra interchangeable modified-choke or cylinder-bore barrel, complete, for field shooting, lists at \$42.00. Your dealer will sell it to you for less. This is a bargain in a gun, but not a bargain-counter gun. Think this over.

Winchester Guns and Winchester Ammunition are Sold Everywhere.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

A CHANGE OF CLASS will probably be made in the \$2,000 California Stake for trotters, by the Pacific Coast Trotting Horse Breeders' Association before it makes announcement of its program for 1908. At present this race is for 2:24 class trotters, but reasons have been advanced to change it to the 2:20 class. One is that many owners who would like to give their horses records to enable them to sell them for matinee and road purposes hesitate to do so for fear of harring them from this stake. It is argued that a record of 2:23¼ or slower does not attract much attention from buyers who are looking for good matinee prospects, but that one of 2:19¼ would. While the faster record would keep horses carrying it from being named in the \$2,000 stake as now given, it would not were the class advanced to 2:20. The subject was discussed at the meeting of the Directors held last Tuesday and a resolution was passed which affirmed that it was the opinion of the Board that the California Stake of \$2,000 for 1908 should be for 2:20 class trotters.

A GREAT SALE of trotting and pacing bred young horses and broodmares will be held Monday night, August 12th, at Chase's Pavilion. Sons and daughters of Searchlight, Chas. Derby, Steinway, Owyhee and Stam B. are in the consignment, which comprises sixty-six head. A grander lot of three and four-year-olds never left this famous farm, and there are some great prospects among them. Don't miss this sale. The California Circuit of 1908 will be the best in years, and there is an opportunity to get a good winner out of this sale.

For the first time in eight years the Nevada Agricultural Society is to give a State Fair at Reno, beginning September 16th and continuing during the remainder of the week. The money needed is being raised readily and the Fair promises to be the most successful ever held in the State. The men in charge state that they will give \$5,000 in prizes for running and trotting races during the week.

PLAN FOR A NEW FUTURITY.

The Los Angeles News of July 26th contained the following:

It is planned by the new California Breeders' Association of Los Angeles, composed of breeders and owners of trotters and pacers, to give an annual meeting in Los Angeles at which stakes of large value will be decided and which stake events will put Los Angeles and other California cities on the harness map in a manner that will permit it to rival the Grand Circuit meetings of the East.

As announced by the members of the organization, a Futurity race, with a guaranteed value of \$7,000, will be the great race of the annual meetings. In the two-year-old division there will be a purse of \$750 for pacers and one of \$1,250 for two-year-old trotters, while for the three-year-olds there will be a purse of \$1,500 for pacers and \$2,500 for trotters. For colts foaled in 1907, to be raced in 1909 and 1910, Mr. Canfield will give \$400 added money, and this will be known as the Canfield Stakes.

In addition to this the new association will give \$400 in addition to the entrance money for three-year-olds. For this the nominations will be \$5 and the entrance list will close November 1st. The cost for starters in this stake will be \$100, but the final \$50 of this starting fee will not be due until a month before the race.

This association was organized last week with C. A. Canfield, president; W. G. Durfee, vice-president; John W. Snowden, secretary, and L. J. Christopher, treasurer. The membership roll shows that the most prominent breeders and racers of harness horses are identified with the movement and they are financially and otherwise able to make the plans work out successfully.

STARTERS IN BREEDERS' FUTURITIES.

Final payments were made last Monday on the following two and three-year-olds to start in the Pacific Breeders' Futurity Stakes Nos. 4 and 5, at Santa Rosa next week:

Three-Year-Old Trotting Division Futurity Stake No. 4—\$2,353.76.

Two-Year-Old Pacing Division Futurity Stake No. 5—\$950.

Wm. G. Durfee's On Bly, blk f by On Stanley, dam Nellie Bly by Woolsey.

J. W. Marshall's Moorrix, b s by Azmoor, dam Trix by Nutwood Wilkes.

C. Whitehead's Ray O' Light, hr c by Searchlight, dam Carrie B. by Alex Button.

P. R. Sims, Capt. Gorgas, br c by Marvin Wilkes, dam Chita by a son of Sidney.

Valencia Stock Farm's Conqueror, br c by Direct Heir, dam La Belle by Sidney.

I. C. Mosher's Steve Bailey, ch c by Tidal Wave, dam Bessie L. by Montana Director.

M. M. Vincent's Vera Hal, h f by Expressive Mac, dam Carmen by Newsboy.

THE PETALUMA MEETING.

On Saturday, August 24th, the race meeting of the Petaluma Association will commence, and continue for thirteen days, during which time \$41,000 will be given away for the various events that are down on the program for decision.

For the first week of the meeting there will be two trotting events, given each day, and three running races. The remainder of the meeting will be devoted entirely to runners, and liberal purses will be given for these events, aggregating \$15,500.

H. D. Wood, who is well known as a starter on trotting tracks, will officiate, having been secured by Manager Stover. He will arrive from his home in Missouri previous to the opening of the meeting.

The hetting will be in the hands of the hookmakers, and several well known pencilers will cut in. The opening day, Saturday, August 24th, will be entirely devoted to running races. The harness races will begin Monday, the 26th.

CALIFORNIA LIVE STOCK BREEDERS.

The California Live Stock Breeders' Association will hold its fourth annual meeting in Sacramento, Wednesday evening, September 11th, at 8 o'clock. Thursday afternoon, September 12th, at 5 o'clock, will occur the annual business meeting of the association, when the following amendments to the By-Laws, which have been proposed, will be considered:

Meetings—The annual meeting of this association shall be held at such time and place as shall be decided upon by the Board of Directors.

Dues—The annual dues of this association shall be one dollar.

The committee is sparing no effort in preparing a splendid program, and there is every indication that this meeting will be the best that has yet been held. Every one interested in live stock should be present.

The good stallion Young Monterey 2:21, by Monterey 2:09¼, is offered for sale. This horse is a very handsome stallion and very fast. His record is no measure of his speed. His colts are all very promising. As his owner is in poor health he has placed the horse in the hands of Mr. Comisto of Ferndale for sale. See advertisement.

Read the advertisement of the Central California Circuit. The program for Fresno, Tulare and Bakersfield are there given. Hanford is in this circuit but has a different program than the other three, having already closed four stakes.

MR. SPRINGER AS SHERIFF.

Capt. Tom Merry of Los Angeles tells the following interesting reminiscence:

John D. Springer, slender and wiry, is about the most notable of the newer accessions to the ranks of the trotting and pacing brigade. I first became acquainted with him in November, 1881, when he was sheriff of Owyhee county in Idaho, the county seat of which is Silver City, a little village couched away up on the side of a bleak and sterile mountain. I was editing the Boise Statesman for Judge Milton Kelly, who was in poor health and obliged to lay off for a season of rest. My visit to Owyhee county was to report the execution of Henry McDonald for the murder of George Myers, a teamster, on the road from Boise City to Kelton, under circumstances of peculiar atrocity. To my surprise, on arriving at the jail I found the condemned man was a native of Fort Vancouver, Washington, who had been a deck-hand under me in the employ of the Oregon Steam Navigation Company. In a conversation with Henry he said that playing faro had led up to the crime for which he was about to be executed, and that Springer had been the kindest of friends to him during his period of incarceration.

The scene of McDonald's execution I shall never forget if I lived to the age of Methuselah himself. A scaffold had been erected near Boonville, about two miles away from Silver City, and at 2 p. m. an enormous crowd had gathered there, all work in the neighboring camps being suspended for the day. As the sheriff, his prisoner and the attendant priest reached the place of execution it began to snow. When Springer examined the uprights of the scaffold he found them too light to hold the impact of a three-foot drop of a man weighing at least 180 lbs., so a carpenter was sent for and rebuilt that portion of the work, a task occupying nearly fifty minutes. All this time McDonald sat quietly on his coffin, about twenty feet from me. I never saw such a sight—the white-haired priest praying over the doomed man, who sat in front of him; Springer, a brave and conscientious officer, with his eyes filled with tears at the idea of having to send a fellow-being into eternity; and above all the snow flying thick and fast about all of us, as though the storm in its wrath over the murder of a helpless old man, had gone totally blind. God knows, I was glad when it was all over.

EVERETT, WASH., ENTRIES.

Following are the entries for the early closing stakes at the Everett, Wash., meeting, which opens Monday, September 2d:

TIME RECORDS AT PLEASANTON.

Trotting.

Muriel P. by Nutwood Wilkes-Lew G..... 2:29¼

Pacing.

Eulala by Prince Nutwood-hy Dictator.....2:24¼
Bonner Belle by Bonner N. B.-Belle.....2:16¼
Cespus by Welcome-Cricket 2:10.....2:25¼

The people of Coalinga, which is the centre of a big oil-producing section, are talking of building a track and holding occasional race meetings. A large number of good trotting and pacing horses are owned in that locality.

A fine mare with twin colts at foot was shot by hunters on the Curtis ranch, near Sacramento, one day last week. It is said the hunters mistook the old mare for a deer, but the owner is of the opinion that the killing was the result of criminal carelessness, which is probably correct.

CLOSING DAYS AT PLEASANTON.

Good, Clean Racing Every Day of the Meeting.

Never has better racing been seen anywhere on the Pacific Coast than was furnished by the trotters and pacers at Pleasanton last week during the four days' meeting held under the auspices of the Pleasanton Matinee Club. There was real genuine horse racing every day, with split heats occasionally, and close finishes frequently, and the old track record was beaten on numerous occasions. The attendance was good, even excellent on some days, while the management was of the best. President Wells, Secretary Colestock, Clerk of the Course Neal, and the speed committee, of which F. P. Hellwig was an energetic member, worked day and night during the meeting to keep everything running smoothly. The best of feeling between horsemen prevailed throughout and while there were difference of opinion in regard to a few decisions, the protests were made in a gentlemanly and proper manner, and no ill feeling remained after the meeting ended. It was one of the highest class meetings that California has seen in years, and following after four days of the same sort at Salinas, presaged great things for the annual meeting of the Pacific Coast Trotting Horse Breeders' Association, which opens at Santa Rosa next Wednesday.

Our report last week closed with an account of the first day's races. On Thursday, the second day, three events were on the card. The opening race was the 2:14 class trot, for which a stake of \$800 was the prize. Out of the original entries there were five starters, with Mr. F. H. Burke's Vallejo Girl a slight favorite in the pools in the over-night betting. When the horses came out for the start R. Ambush was favorite, but after a heat Louis Stock's mare, Oveta by Caution, sold as first choice and maintained that place until she ended the race by winning it.

The first heat went to Oveta in 2:12½, a new record for this granddaughter of Electioneer, while Ambush took the next in 2:13½, a slight reduction from his Salinas record. Oveta took the next two heats in 2:14½ and 2:14. There was considerable wild driving in this race and the judges fined the driver of Vallejo Girl \$10 for foul driving. North Star finished in front in the second heat, only a head in front of Ambush and he the same distance ahead of Vallejo Girl, but he was set back to third position for breaking. In the third heat Ambush finished outside the flag, but this was owing to his being interfered with by Vallejo Girl, and he was permitted to start again. The battle through the stretch in the fourth heat was a great one for a mile, but Ambush left his feet at the critical moment and the race went to Oveta. North Star trotted a better race than he did at Salinas, and while not entirely right, is getting back into his old form.

Humboldt county furnished a hot one for the 2:30 class pace in Tobasco, a son of Timothy, brother to Wayland W. 2:12½, the sire of Bolivar 2:00½. Opitsah, a winner at Salinas, won the first heat of this race in 2:14½, a reduction of more than two seconds from her former record, but Tobasco took the next three and the race in still faster time. Second money went to Opitsah and third to Little Medium.

The race for 2:15 class pacers, to be driven by amateur drivers, furnished considerable sport and was ended after five heats, with each of the five starters a heat winner. Mr. A. O. Gott's Mephisto stood best in the summary and was awarded first money.

Friday's program drew a better attendance. Four races were on the card, one too many for a program, but prompt action on the part of Starter Ed R. Smith got them off on time, and the last heat was over by 5:30. But four trotters came out for the \$800 stake offered for horses of the 2:24 class. Will Durfee's Dredge, that was entirely out of condition at Salinas, had rounded to, and was made favorite with the bettors. He made good and took but three heats, all under 2:15, to win first money. He sold at \$10 to \$10 for the rest in the field before the first heat, and there was little pool selling after that. Mr. William Morgan's handsome mare Era by Zombro took second money, and the grand looking McKinney mare Berta Mac won third.

The most heavily played race of the meeting came next, when the 2:12 pacers were called. The mare Mona Wilkes, owned by James Marshall of Dixon was made favorite at \$40 to \$15 for Friday, \$8 for Lohengrin, \$6 for Mandolin and \$4 for the field comprising Queen Pomona, Jonesa Basler and Mollie Button. The field won in three heats, the handsome little mare Queen Pomona surprising everyone, even her driver, Delaney, by showing better than 2:10 speed, and her three heats were in 2:09¾, 2:08¾ and 2:10½. In the first heat the favorite, Mona Wilkes, lost all chance she had of winning before the first quarter was reached, as Jonesa Basler made a rush around the outside and immediately after getting in front of Mona Wilkes went to a wild break and swerved all over the track, compelling Chadbourn to pull his mare back so suddenly to avoid a collision that she went to a break and fell back, finishing the mile in fifth position. Mona Wilkes was second in the next two heats and won second money, third money going to Mandolin. Queen Pomona, the winner of this race is by Pomona out of Nugget, dam of The Donna 2:09¾, and should still further reduce her record before the year ends.

Four trotters started in the 2:17 class—Carlokin, Kenneth C., Marvin Wilkes and Della Derby. Carlokin sold favorite. In the first heat Della Derby made

a break soon after getting the word, and Helman could not get her back to her gait until the others were nearly a quarter of a mile away. Durfee took the lead, and approaching the wire was confident he had the race won easily, so let his horse slack up a little. Mastin brought Marvin Wilkes up with a rush and beat Durfee out by a head in 2:16¾, with Kenneth C. third. Della Derby, after getting on her stride, came fast, trotting the last half in 1:04 and the last quarter in 31 seconds, but finished behind the flag.

In the next heat Marvin Wilkes had the pole, but when the word was given was nearly two lengths behind the other two and they both were in front of him before the eighth pole was reached. The heat went to Carlokin, with Kenneth C. second and Marvin Wilkes last. The heat was faster than the previous one by more than two seconds.

The judges had heard rumors that Mastin did not want to win with his horse, and in the next heat ordered Chas. Whitehead to drive him. The heat was won by Carlokin, with Marvin Wilkes second, the latter breaking in the stretch when brought to a drive by Whitehead. After this heat the judges requested Mr. Marvin to again drive his horse and requested Starter Judge Smith to announce that in their opinion Mastin had driven honestly and tried to win. The announcement was received with applause, and Mr. Mastin was given an ovation when he mounted the sulky for the next heat. On receiving the word he took Marvin Wilkes away boiling, but although he led to the half, the horse went to a break and Carlokin won the heat and the race.

The day's sport ended with a race between three horses owned in Contra Costa county. The favorite, Anna R., driven by her owner, J. R. Palmer, was not right, and he was given permission to withdraw her after the second heat. The race went to J. Harlan's Nellie G. in straight heats; her best being 2:26½.

COPA DE ORO 2:07¼.

Much the largest crowd of the meeting was in attendance on Saturday, the last day, and enjoyed seeing the fastest five-heat race ever paced on the Coast, when Copa de Oro, after losing two heats to the little speed wonder Inferlotta, through casting shoes in both heats, led to the wire in the next three and was awarded first money for a well-earned victory. This race was an \$800 stake for 2:20 class pacers, and of the sixteen original entries six came out at the call of the bell. Explosion, with Ward driving, had the pole, Seymour M., driven by Spencer, was in second position, Pilot, with C. A. Walker in the sulky, had third, Inferlotta, driven by Hewett, was fourth, Copa de Oro, with Will Durfee as pilot, was fifth, and James Thompson held the reins behind Charley D., in sixth position. It was a grand field of pacers, and they furnished one of the greatest races ever witnessed in California.

The opening pool sold as follows: Copa de Oro, \$10; Charley D., \$5, and the field or four, \$6, but the little mare Inferlotta soon took Charley D's place as second choice and he was put in the field. After a few scores Starter Smith gave the word, when all were on their stride and close together. Inferlotta immediately shot to the front, and there was a shout of applause from the many who had backed her for the heat, as Copa de Oro was seen to go to a break on the back stretch and drop back as if he was out of the contest. He had thrown a shoe from one front foot, and Durfee began a fight to beat the flag with him. Inferlotta kept on like a running horse, and was at the half in 1:02, and was in the lead the entire mile, finishing several lengths in front, with her driver doing his best to stop her in the last eighth, the watches stopping at 2:07¼. The McKinney horse, Charley D., was second, with his mile in 2:08, and Pilot, another field horse, was third, separately timed in 2:08½. Seymour M. was fourth, and Copa de Oro, who paced fast after getting squared away, was fifth. Explosion finished last. The time, 2:07¼, is the fastest ever paced by a green pacer in California.

Probably a majority of the pool buyers did not know that Copa de Oro had thrown a shoe in the first heat, and when pools opened for the second heat Inferlotta brought \$10 to the same for the Nutwood Wilkes horse and \$4 for the field. When the word was given Inferlotta again went away with a rush and let to the half in 1:01¾. Copa de Oro lost both front shoes near the first quarter pole in this heat,

one of them striking and bruising Durfee's left hand and smashing his watch. With both front shoes off, the horse was better balanced than in the first heat, and he paced a great mile, finishing second to Inferlotta, who again paced the mile in 2:07¼, amid the cheers of the crowd at the finish. Charley D. was third in this heat, to the surprise of everyone, as he seemed high in flesh, and had not been a mile better than 2:11¾ previous to this race. The Comet Wilkes gelding, Pilot, another horse whose preparation had been short, was fourth, much to the surprise of his driver, who did not think he was up to any such racing clip. Explosion was fifth and Seymour M. caught the flag.

A full set of new shoes were put on Copa de Oro before the next heat, and the shoer remarked that he would eat any one of the four that came off during the remainder of the race. The third heat was a horse race from start to finish. Inferlotta again made her rush away, and led to the half in 1:02, but Copa de Oro was at her wheel and in the race through the stretch to the wire beat her a length in 2:07¼, amid the wildest cheering. Charley D. and Pilot had begun to feel their lack of condition for such a race and Ward took third place with Explosion. Charley D. was fourth and Pilot fifth.

The next two heats went to Copa de Oro rather easily. Inferlotta, who takes much out of herself by going to the half so fast in each heat, tired in the last half of these last heats, and while she finished second in each, was all in at the finish. But for this propensity to make the most of her speed at the start, a fault, it seems, almost impossible to prevent, she would be able to pace a mile in 2:05 or better and beat 2:07 three times, as she is game and only stops through exhaustion.

In this race Copa de Oro again demonstrated his great class. In none of his heats has Durfee been called upon to drive this colt at his greatest speed from wire to wire. When Inferlotta would rush away in the lead she would sometimes be a half dozen lengths ahead of him, but Durfee seemed able to place Copa de Oro anywhere, at any part of the mile. When in the lead he could take him back, and when behind could call on him for a supreme effort and place him in front without raising his whip or speaking a loud word. How fast a mile Copa de Oro could pace were he driven for a low record is only problematical, of course, but over a good track he should be able to shade 2:04. He could undoubtedly have beaten 2:09 in every heat that he won had it been necessary. Mrs. Bonfillo of Los Angeles, the lady who raised and still owns this grand young horse, has seen him in both his races this year, and when he had lost two heats on Saturday last, never for one moment lost confidence in his ability to win.

In the second event of the day on Saturday, Durfee drove another winning race with Carlokin, Mrs. Claude Jones' handsome McKinney stallion. This lady was also present to see her horse win his second race in two days, demonstrating his gameness and endurance, as he seemed as fresh an hour after the race as though he had not started.

The 2:20 trot was the race in which his second victory was achieved, and it was an easy race for him. There were but four starters, Yolanda, Carlokin and Buck, all by McKinney, and May T. by Monterey. In the first heat Yolanda took the lead up to the half and around the far turn, but here Durfee brought Carlokin up and the race began to be interesting. Turning into the stretch these two McKinneys were neck and neck, until the last eighth, when Carlokin got the lead and on reaching the distance was a length in front of the mare. Yolanda went to a break just inside the distance flag and crossed her front legs, or grabbed a boot, and fell, head down, then falling heavily on her right side. Her driver, Davey, went into the air and landed on his shoulder in front of the mare. He bled to one line, and many ran to his assistance. While this was all going on in less time than it takes to tell it, Gerrety was coming behind Yolanda with Buck. Seeing the accident he pulled his horse to the inside, where he had just room to come through, but Buck plunged up the inside bank into the soft dirt and fell, throwing Gerrety heavily but not hurting him. May T. came around the two fallen horses and finished second. The timers gave the mile as 2:16¾, but they were probably looking at the mixup when Carlokin crossed the wire, as nearly all the outside watches caught the mile in 2:14, and some even faster than that. The judges gave the heat to Carlokin, with May T. second. Buck was permitted to start again, as he had been interfered with, while they sent Yolanda to the barn, under their interpretation of Section 3 of Rule 35, which reads as follows:

"If for any cause other than being interfered with by a competitor in a race, a horse fails to finish inside the distance after starting in a heat, that horse shall be ruled out."

Mr. Burke, one of the owners of Yolanda, entered a protest against this decision, and it will go to the Board of Appeals. Mr. Burke claims that Yolanda finished inside the distance, while the judges held she did not, their interpretation of the rule being that the word distance refers to the entire length of mile to be trotted, and not to the place where the distance flag is held.

After this heat Carlokin had an easy time in winning the next two heats, May T. finishing second each time. Buck showed lame after the race and was probably injured in his fall.

The last race of the meeting was the only poor one of the week. It was for pacers of the 2:15 class, and several were of the bad acting variety. There

was much delay in scoring, hobbles breaking and accidents before the first heat, until Starter Smith hal to send them to the barn so that he could start the last heat in the 2:20 trot. Chas. Whitehead, driving Louisa A., was run into at the score by Norda before the start, and his mare reared and fell on him, bruising him considerably but breaking no bones. Louisa A. got away and paced around the track the reverse way, but was caught by the Marshal and was unhurt. Mr. Whitehead asked that she be scratched, and his request was granted. After four heats were paced the race was declared ended, as it was sundown, and the money was divided according to the positions in the summary. Diabless got first money, Jim Corbett second, Norda third and Uno fourth. The summaries of the entire meeting follow:

WEDNESDAY, AUGUST 31.

Pacing, 2:08 class, purse \$800— Sir John S., b s by Diablo-Elisa S. 2:16 1/2 (Vance) 1 1 1 Miss Georgie, br m by McKinney (Gerrety) 5 2 2 Miss Idaho, ch m by Nutwood Wilkes (Leggett) 2 4 4 John R. Conway, ch s by Diablo (Chadbourne) 3 3 3 Dellah, b m by Zolock (Delaney) 4 6 5 Kelly Briggs, br g by Bayswater Wilkes (Durfee) 7 5 6 Cresco Wilkes, b s by Nutwood Wilkes (Groom) 6 d

Time by Quarters.

First heat 0:32 1:05 1:37 2:08 1/2 Second heat 0:31 1/2 1:03 1:35 1/2 Third heat 0:31 1/2 1:04 1:35 1/2 2:06 1/4

Trotting, 2:40 class, purse \$500— Yolanda, b m by McKinney-by Guy Wilkes (Davey) 1 1 1 Ben Russell, b g by L. W. Russell (Chadbourne) 2 2 2 Parachute, b g by Altitude Jr. (Sampsel) 5 3 3 Alto McKinney, b s by McKinney (Phippen) 4 4 4 May T., ch m by Monterey (Twobig) 3 d

Time—2:16 1/4, 2:15 1/4, 2:14 1/4.

Pacing, three-year-olds, purse \$500— Aerolite, b s by Searchlight-by Nutwood Wilkes (Chadbourne) 1 1 1 Josephine, b f by Zolock (Rutherford) 2 2 3 Beulah, ch f by Nutwood Wilkes (Gerrety) 3 3 2 Time—2:26, 2:21, 2:14 1/4.

THURSDAY, AUGUST 1.

Trotting, 2:14 class, \$800— Oveta, b m by Caution (Ward) 1 4 1 R. Ambush, br s by Zolock (Bonnell) 2 1 5 Vallejo Girl, b m by McKinney (Davey) 3 2 2 North Star, b g by Nutwood Wilkes (Whitehead) 4 3 3 Queer Knight, b g by Knight (Williams) 5 5 4 Time—2:12 1/4, 2:13 1/4, 2:14 1/4, 2:14.

Pacing, 2:30 class, \$500— Tobasco, b g by Timothy-by Waldstein (Ben Walker) 2 1 1 Opitsah, ch m by Wm. Harold (Chadbourne) 1 2 2 Little Medium, b g by Dictatus Medium (Phippen) 3 3 3 Billy B., b g by son of Alex. Button (Green) 4 d

Time—2:14 1/4, 2:12 1/2, 2:12 1/2, 2:13.

Pacing, 2:15 class, Amateur Drivers— Mephisto, ch g by Diablo (Gott) 2 5 1 Ringrose, b g by Falrose (Hoffman) 5 5 1 Charlie J., blk g, unknown (Lezare) 4 4 2 Little Dick, ch g by Dictatus (Schwartz) 1 2 5 Lady Shamrock, b m by Grover Clay (O. Misner) 3 1 3 Time—2:18, 2:15, 2:17, 2:16 1/2, 2:17.

FRIDAY, AUGUST 2.

Trotting, 2:24 class, \$500— Dredge, ch g by Jas. Madison (Durfee) 1 1 1 Era, b m by Zombro (Williams) 2 2 3 Berta Mac, b m by McKinney (Hallman) 2 3 2 Easter Bells, b m by Diablo (Renatti) 4 4 5

Pacing, 2:12 class, \$500— Queen Pomona, b m by Pomona (Delaney) 1 1 1 Mona Wilkes, b m by Demonio (Chadbourne) 5 2 2 Mandolin, b g by Alcone (Mosher) 2 7 3 Friday, ch g by Monroe S. Trotting, 2:17 class, \$500— Carloklin, b s by McKinney (Durfee) 2 1 1 Marvin Wilkes, l s by Don Marvin (Mastin and Whitehead) 1 3 2 Kenneth C., blk s by McKinney (Chadbourne) 3 2 3 Della Derby, blk m by Chas. Derby (Hellman) dis

Time—2:16 1/4, 2:14 1/4, 2:15 1/4, 2:15.

Special, Contra Costa County roadsters, \$100— Nellie G. (p) (J. Harlan) 1 1 1 Ray Wilkes Jr. (O. Smith) 3 2 2 Anna R. (J. R. Palmer) 2 3 d

Time—2:27, 2:27 1/2, 2:28.

SATURDAY, AUGUST 3.

Pacing, 2:20 class, \$800— Copa de Oro, b s by Nutwood Wilkes (Durfee) 5 2 1 Inferlotta, b m by Inferno (Hewitt) 1 1 2 Charlie D., b h by McKinney (Thompson) 2 3 4 Explosion, b m by Steadway (Ward) 5 3 3 Pilot, ch g by Comet Wilkes (C. Walker) 3 4 4 Seymour M., br g by Diawood (Spencer) 4 d

Time—2:07 1/4, 2:07 1/4, 2:07 1/4, 2:09 1/4, 2:10 1/4.

Trotting, 2:20 class, \$500— Carloklin, b s by McKinney (Durfee) 1 1 1 May T., ch m by Monterey (Ben Walker) 2 2 2 Buck, b g by McKinney (Gerrety) 3 3 3 Yolanda, b m by McKinney (Davey) ro

Time—2:16 1/4, 2:16 1/4, 2:19 1/4.

Pacing, 2:15 class, \$500— Diabless, s m by Diablo (Zibbell) 5 1 3 Jim Corbett, b g by Seymour Wilkes (Lie-Singer) 1 4 1 Norda, b m by Mercury (Bonnell) 6 2 2 Uno, b g by Aptos Wilkes (Ben Walker) 2 3 4 King Athby, b g by Athby (Leggett) 3 5 5 Fred W., b g by Robin (Rodriguez) 4 7 d

Time—2:14 1/4, 2:13 1/4, 2:18, 2:17.

There are a half-dozen new pacers on the California Circuit that can beat 2:10, but the new 2:10 trotters are not in sight as yet. Perhaps the Breeders' meeting at Santa Rosa may develop one or two, but we doubt it.

SANTA ROSA PROGRAM.

First Day, Wednesday, Aug. 14th.

2:14 Class Trot, Purse \$800.

Geo. T. Algeo's Bob Ingersoll, b h by Nutwood Wilkes. Ray Bennett's Oro Belmont, blk g by Oro Wilkes. Geo. T. Becker's Helen Dare, br m by Zombro. J. B. Iverson's North Star, b g by Nutwood Wilkes. Gus Lindauer's Homeway, b h by Straffway. La Siesta Ranch's Vallejo Girl, br m by McKinney. Wm. Morgan's Queer Knight, b g by Knight. Walter Mastin's Marvin Wilkes, br s by Don Marvin. Montgomery Stock Farm's Little Louise, br m by Boodle. Louis Stock's Oveta, b m by Caution. Woodland Stock Farm's Princess Mamie, b m by Prince Ansel.

2:24 Class Trot, California Stakes, \$2,000.

Dr. W. H. Button's Docas D., b h by St. Whips. I. L. Borden's Barney Bernatto, br h by Zombro. O. C. Benbow's Ollie B., ch m by Nutwood Wilkes. C. B. Bigelow's Constanca, blk m by McKinney. C. F. Clancy's Freddy C. Jr., b h by Freddy C. Wm. J. Dinger's Edward McGary, br s by Zombro. F. G. Durfee's Zomont, b g by Zombro. W. E. George's Kermit, ch g by Henry Nutwood. John Green's Auger Baron, blk g by Baron Wilkes. F. Gomet's Prince McKinney, br s by McKinney. Wm. Hashagen's Kinney Rose, b s by McKinney. Dr. A. McLaughlin's Dr. O'Brien, gr g by Gossiper. W. W. Mendenhall's Sir John, br h by McKinney. Wm. Morgan's Era, b m by Zombro. W. C. McCully's Cedric Mac, ch s by Nearest. W. Parsons' Berta Mac, br m by McKinney. J. S. Phippen's El Sidelo, ch g by Owyhee. Lindsay R. Rogers' Sweet Alice, b m by Cupid. J. W. Sampsel's Parachute, b g by Altitude Jr. C. L. Shattuck's Curg Richards, s g by Oro Belmont. C. L. Shattuck's Vernanta, b g by Jules Verne. Thomas Smith's Prof. Heald, ch s by Nutwood Wilkes.

M. H. Tuttle's Ramona B., b f by Stam B. J. Twobig's May T., ch m by Monterey. Valencia Stock Farm's Amado, blk h by Direct Heir. W. L. Vance's Easter Bells, b m by Diablo. F. E. Wright's Dredge, br g by James Madison. Woodland Stock Farm's El Rio Rey, b s by Nushagak.

Woodland Stock Farm's Princess Mamie, b m by Prince Ansel. W. H. Williams' Sidonis, b s by St. Nicholas. C. Whitehead's Belle McKinney, b m by McKinney. C. Whitehead's Oro Guy, b s by Oro Wilkes. P. J. Williams' Yosemite, ch s by Monterey. Fred E. Ward's Red Lock by Zolock. J. W. Zibbell's Fresno Girl, br m by Seymour Wilkes.

2:12 Class Pace, Purse \$800.

C. J. Crabtree's Crabapple, b g by Coxcomb. Dr. Wm. Dodge's Lohengrin, b g by Charleston. S. H. Hoy's Memonia, b m by Demonio. Gus Lindauer's Mollie Button, br m by Alex. Button. La Siesta Ranch's Friday, s g by Monroe S. J. W. Marshall's Mona Wilkes, b m by Demonio. G. P. Machado's George Perry, b g by Waldstein. I. C. Mosher's Mandolin, b g by Alcone. J. W. Sampsel's Victor Platte, b g by Platte. C. J. Snyder's Jonesa Basler, br s by Robert Basler. Louis Stock's Queen Pomona, b m by Pomona. Jas. Sutherland's Babbie, b m by Welcome. W. L. Vance's Deviletta, b m by Diablo.

Second Day, Thursday, Aug. 15th.

Two-Year-Old Trotting Division Futurity Stake No. 5, \$1,450.

D. L. Bachant's Miss Dividend, b f by Athabla. Woodland Stock Farm's Nusado, br c by Nushagak. C. A. Lowery's Debutante, b f by Kinney Lou. E. A. Gammon's Cleo Dillon, b f by Sidney Dillon. J. A. Kirkman's Idolway, blk f by Stoneway. J. H. Torrey's Bessie T., b f by Zombro. J. W. Zibbell's Katalina, b f by Tom Smith.

2:16 Class Pace, Purse \$800.

Dr. W. H. Button's Waldstein Mack, b h by Washington McKinney. Frank L. Barstow's Just It, b f by Nearest. I. L. Borden's Mephisto, ch g by Diablo. Jake Brolliar's Stonelita, br m by Stoneway. Jas. Murray's Jim Corbett, b g by Seymour Wilkes. E. L. Hunt's Uno, b g by Aptos Wilkes. Homer Kendall's Irvington Boy, ch s by Nutwood Wilkes.

J. C. Kirkpatrick's Baldy, s g by Cupid. C. Nanny's King Athby, b g by Athby. Jas. Sutherland's Anna R., b m by Owyhee. C. H. Widemann's Fred W., b g by Robin. C. H. Widemann's Joe Robin, blk g by Robin. C. Whitehead's Louisa A., b m by Hambletoulain Wilkes.

Three-Year-Old Pacing Division Futurity Stake No. 4, \$1,300.

J. W. Zibbell's Diabless, b m by Diablo. J. W. Zibbell's Napa Maid, b m by Lynwood W. J. W. Marshall's Aerolite, b c by Searchlight. L. R. Todhunter's Hymettus, b c by Zombro.

Third Day, Friday, Aug. 16th.

Two-Year-Old Pacing Futurity Stake No. 5, \$950.

Wm. G. Durfee's On Bly, blk f by On Stanley. J. W. Marshall's Moortrix, b s by Azmoor. C. Whitehead's Ray O'Light, br c by Searchlight. P. R. Sim's Capt. Gorgas, br c by Marvin Wilkes. Valencia Stock Farm's Conqueror, br c by Direct Heir. I. C. Mosher's Steve Bailey, ch c by Tidal Wave. M. M. Vincent's Vera Hal, b f by Expressive Mac. Three-Year-Old Trotting Division Futurity Stake No. 4, \$2,353.76.

Thos. H. Brents' Reina del Norte, b f by Del Norte. Woodland Stock Farm's Prince Lot, br c by Prince Ansel. Wm. G. Durfee's Lady H., blk f by Coronado. Mosher and Langdon's Zolahka, b f by Zolock. Geo. L. Warlow's Nogi, b c by Athabla.

2:08 Class Pace, Purse \$1,000.

I. L. Borden's Cresco Wilkes, b h by Nutwood Wilkes. Henry Delaney's Delilah, b m by Zolock. J. O. Gerrety's Miss Georgie, br m by McKinney. S. C. Kimball's Miss Idaho, ch m by Nutwood Wilkes. I. M. Lipson's Dr. W., blk s by Robert Basler. Meese Bros' John R. Conway, ch g by Diablo. G. P. Machado's George Perry, b g by Waldstein. W. L. Vance's Sir John S., b s by Diablo. F. E. Wright's Kelly Briggs, br g by Bayswater Wilkes.

Fourth Day, Saturday, Aug. 17th.

2:17 Class Trot, Purse \$800.

Geo. T. Algeo's Chestnut Tom, ch s by Nutwood Wilkes. I. L. Borden's Barney Bernatto, br h by Zombro. C. B. Bigelow's Constanca, blk m by McKinney. W. G. Durfee's Carloklin, br s by McKinney. W. G. Durfee's General Boodle, br g by Boodle. F. Gomet's Verona, b m by Nutwood Wilkes. J. O. Gerrety's Sally Lunn, b m by Wiggins. J. O. Gerrety's Highland C., blk s by Expresso. J. N. Anderson's Della Derby, blk m by Chas. Derby. Mrs. L. J. H. Hastings' Princess Louise, b m by Coronado.

J. A. Jones' Lady Jones, blk m by Capt. McKinney. Gus Lindauer's Hattie J., b m by Nazote. La Siesta Ranch's Vallejo Girl, br m by McKinney. W. W. Mendenhall's Sir John, br h by McKinney. Wm. Morgan's Era, b m by Zombro. Wm. Morgan's Son, b m by McKinney. Elmo Montgomery's Noraine, b m by Nushagak. Walter Mastin's Marvin Wilkes, br s by Don Marvin.

Montgomery Stock Farm's Little Louise, br m by Boodle. L. H. Todhunter's Zombowette, b m by Zombro. P. J. Williams' Yosemite, ch s by Monterey.

2:20 Class Pace, Pacific Slope Stake, \$2,000.

T. W. Barstow's Highfly, b g by Nearest. D. L. Bachant's David St. Clair, blk h by Howard St. Clair. I. L. Borden's Roberta, blk m by Robert I. C. J. Crabtree's Onward F., b g by Torone. W. G. Durfee's Copa de Oro, b g by Nutwood Wilkes. O. R. Frisby's Nordwell, br s by Demonio. W. Griswold's Diabull, ch g by Diablo. O. C. Goodin's McGee, blk g by Robert Basler. John Green's Billy B., br g by son of Alex. Button. E. L. Hunt's Tobasco, b g by Timothy B. J. C. Kirkpatrick's Santa Rita, ch g by Diablo. J. C. Kirkpatrick's Charlie D., b s by McKinney. C. A. Lowery's Little Medium, b g by Dictatus Medium.

Sonoma Girl acted badly in her Buffalo race, but won the race at that, after losing two heats. Those very fast milcs generally leave soreness where they come as frequently as Sonoma Girl has trotted them, and it may be that a full week's let up would do her a lot of good. A horseman of much experience remarked the other day that if Sonoma Girl keeps on and is started in every race in which she is entered, that Highball, who is now laid up with lameness, will round to and give her a beating when they get ready to start him. It often happens that way in racing.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Breeders' Association (Santa Rosa).....	August 14-17
Petaluma	August 26-31
Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12
Santa Maria	October 22-26

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair)	September 23-28
Spokane, Wash. (Inter-State Fair)	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

Santa Rosa next week.

Breeders' meeting opens Wednesday.

The track is good and the time should be fast.

Have you picked the winners in the Futurities?

The Santa Rosa track record of 2:06, pacing, is in danger, but its trotting record of 2:07½ looks safe for this year.

An advertiser wants a carriage horse, any color but gray. Look over his advertisement in another column and see if you can suit him.

Col. J. C. Kirkpatrick is still at Carlsbad, but is expected to leave for home in a week or so. He has reduced thirty-five pounds and is feeling fine.

Copa de Oro 2:08¾ pulls one of Kenney's sulkies in his races. It is a Houghton.

Look over the list of good purses offered by the associations on the Central California Circuit, whose advertisement appears in this issue. There is a fine list of \$400 purses and a few of \$300. The racing opens September 16th at Fresno and winds up October 12th at Bakersfield.

It looks to a person at this distance as though the mare Lillian R. by J. T., that took a record of 2:06¾ in a race at the Cleveland meeting, must be quite a high class trotter. Miles below 2:07 are not trotted very often, and it takes a pretty good one even in these speedy days to do it.

Gratt 2:02½ has broken down and may never start again. This is to be regretted, as he was considered a candidate for two minute honors.

Robert Smith's mare Bellemont 2:13¾, by Zombro, has recovered from her lameness and will be able to fill some of her engagements soon. Smith expects her to get a mark below 2:10.

Fred H. Chase & Co. of this city were awarded the betting privilege for the Breeders' meeting at Santa Rosa next week—only auctions and mutual pools to be sold.

While the amount of money that passed through the pool boxes at the Pleasanton races was not large, the odds were always good, and those who backed the favorites got more than even money against them in most instances.

Tom Bannon of the Golden Gate Park Driving Club purchased from W. J. Kenney this week a Park speed wagon and a speed cart. Both are beauties.

Easter Direct, the pacing mare by Direct 2:05½, out of Cleo G. by Yosemite, is winning races on one of the New York half-mile circuits, and has taken a mark of 2:16¼. She is the mare that was credited with a workout in 2:03¾ last year.

Berta Mac, the McKinney mare in Henry Helman's string, is a grand looking mare and will be a 2:12 trotter before long. She is one of the classiest looking green trotters to be seen on the California tracks this season.

Chas. L. Monsch, president of the company which publishes that excellent journal, the Kentucky Stock Farm, is in California and attended the races at Pleasanton last week in company with Mr. W. A. Clark Jr.

The Searchlights are good goods. There are five three-year-olds by this great stallion out of some of the best mares on Oakwood Park Stock Farm to be sold at auction at Chase's Pavilion next Monday night, when sixty-six head from this famous farm are to go under the hammer.

Al McDonald, who trained at Sacramento this year, will have two or three starters in the races at Santa Rosa next week.

Mr. Frank J. Kilpatrick left this week for New York on a short visit.

Dan Pateb is breaking track records again this year. He lowered the Decatur, Ill., track record to 2:01½ last week.

About \$13,000 passed through the pool-box at Pleasanton last week, on which the total commission was less than \$900. Had the betting been done by a bookmaker not over half the \$13,000 would have remained in the bands of the bettors.

Sir John S. 2:06¼ pulled a McMurray sulky in his great race at Pleasanton. This sulky was purchased from W. J. Kenney, Coast agent, 531 Valencia street.

When Blacklock won at Cleveland in 2:04½ and 2:05¾, the California bred pacer Capt. Derby 2:06¼ by Chas. Derby was 3-2 and close up in both heats.

A match race for \$600 a side is to be decided over the three-quarter track at Golden Gate Park to-morrow. The race is between A. Hoffman's Kitty D., by Dictatus, and George Giannini's Geo. Perry, by Waldstein. Both are pacers. Luke Marisch is stake holder.

The two-year-old trotting record of Australia is 2:36¾, and was made last month by First Ribbon, a son of Ribbonwood 2:09¼, the fastest harness horse in Australia.

Schuyler Walton did not go to Pleasanton with his horses, but shipped them direct from Fresno to Santa Rosa. He has the three-year-old, Nogi, in his string, which belongs to Mr. Geo. Warlow of Fresno, and is looked upon as a likely winner of the three-year-old trotting division of the Breeders' Futurity.

It is said that Frank G. Jones has offered Sterling Holt \$10,000 for the mare Carrie Dillon, a fast Sidney Dillon, bred at Santa Rosa, that Millard Sanders has been training this summer.

Sadie Moor, seventeen years old, and with a record of 2:26, will be given a chance to reduce that record at Santa Rosa next week. She is owned by Mr. H. Brace of Santa Clara and is used as a broodmare.

Do you want to own a horse that is fast enough to prevent everybody from passing you on the speed-way? Go to Chase's Pavilion next Monday night and buy one of those good prospects from the Oakwood Park Stock Farm, of which there will be many offered that evening.

W. A. Clark Jr. has gone to Butte, Mont., for a short visit and will return in a week or so. Mr. Clark will take up his permanent residence in Los Angeles this fall, and will remove all his harness horses, including Bon Voyage 2:12¾, to the track there. The removal of such stallions as Bon Voyage and Highland C. to Southern California will be a loss to the breeders in the northern part of the State.

The old Modesto race track is to be ploughed up and the entire tract of land, comprising 100 acres, to be sown to alfalfa. It is owned by W. A. Dags and is under irrigation. The old grandstand has been torn down, and its removal marks the passing of an old landmark. The grandstand and track were built by the Stanislaus Stock Breeders' Association in 1890, but the association soon fell into decay, and the grandstand has stood useless for all these years, while the land has been given to grain farming. Seventeen years ago this land sold for \$100 an acre, and during the time since has increased in value each year. Mr. Dags purchased the farm three years ago and will soon have it entirely under irrigated production.

One of the most unfortunate occurrences since the California Circuit opened is the accident to that fine three-year-old pacing colt Albert Direda, owned by Lee Dollemayer and William Coombs of Hanford. This colt was a regular speed marvel until he went lame at Salinas, and the scratching of his entry to the Breeders' pacing Futurity at Santa Rosa has robbed that race of much interest, as he would have met the great Dixon pacer Aerolite, owned by James W. Marshall. As Albert Direda had paced a half in 1:02½, he was confidently expected to give Aerolite a race that would have been worth seeing.

Bonnie Steinway 2:06¼, looking as fine as silk, is back at Pleasanton from Eureka, Humboldt County, where the half brother to Bonnie Direct 2:05¼, made a fine season under the management of Bert Webster. He is one of the best bred and grandest looking stallions in California and it is a pleasure to know that the live breeders of Humboldt County appreciate him.

H. E. Woods of Norbourne, Missouri, who is to start the harness races at the Petaluma meeting this year, has been welding the starter's flag at the meetings held recently in Minot, North Dakota, and in Winnipeg, Manitoba. He says good racing has been held at those far northern points.

Castanada, the bay gelding by Don Derby 2:04½, out of Cyrene by Guide, lowered his record to 2:09¾ at Lansing, Mich., last Tuesday.

One can't pick up an Eastern paper that gives accounts of harness racing but California bred horses are found among the money winners.

Reproachless 2:06¼ is a granddaughter of Direct 2:05½.

Kinney Lou 2:07¾ is working miles around 2:15 at Indianapolis, with occasional eighths at a two-minute gait, and stepped one in 14½ seconds last week. He is rapidly getting into racing form and will be ready to take a whirl at his present record in the fall. His son, Diamond Mac, is following in the footsteps of his sire, and will make a high class trotter.

Three McKinneys have already entered the list of 2:15 trotters this year—Sterling McKinney 2:11¼, Yolanda 2:14¼ and Carlokin 2:14¼.

Miss Georgie 2:08¾ looks good enough to knock a couple of seconds off her record this year. She was separately timed a mile in 2:06½ when she was second to Sir John S. 2:06¼ at Pleasanton.

Chas. De Ryder has added the pacer Shaughran 2:08¾, by Ananias 2:05, to his string.

Kelly Briggs is not good this year, but he may round to later on and give the fastest of the pacers racing in California an argument.

The Utah State Fair Association will give a six days' race meeting from September 30th to October 5th inclusive, and will soon advertise the speed program. The association will give two harness races each day, twelve in all, and the same number of running races. For the harness races the purses are from \$500 to \$800, and for the runners \$150 to \$300. The association would like very much to get a carload of California horses to race at this meeting.

Oakwood Park Stock Farm has sent many record breakers to the races in California as well as to the Grand Circuit. The consignment of 66 head from this farm to be sold at Chase's Pavilion next Monday evening, August 12th, contains some future winners and record breakers, and that will be the occasion to get one at your own price.

Secretary Filcher of the State Agricultural Society believes in side attractions at the State Fair, and is planning for quite a number of them at the September show. He has got the committee on amusements to consent to put on a ten-mile relay race, and what he calls a "California mule race." The mules are driven to sulkies one mile, the first quarter they must walk, the next two quarters they must trot, and the last quarter they are allowed to go any way to get there.

Nora McKinney 2:12¼ will be trained this year with the idea of putting her in the 2:10 list. She has pulled a wagon in a matinee race in 2:09¼.

Mr. Geo. A. Estabrook of Denver is the person who purchased the green trotting mare Perfection by Meridian, from Chas. De Ryder. It is stated by a Cleveland paper that De Ryder drove her a mile in 2:06¾ over the Cleveland track for Mr. Estabrook before the latter paid over the \$10,000 for her. It is her new owner's intention to keep her over and start her in the M. and M. next year.

Sterling McKinney, a son of McKinney, dam Twenty-third, by Director, that was bred by James W. Rea and purchased by Sterling W. Holt of Indianapolis several years ago, and later sold at auction, was a starter at Decatur, Ill., in the 2:20 trot July 31st, and won the first heat in 2:11¼, the fastest heat in the race. In the second heat he was run into and his sulky smashed, but was permitted to start again and got second money. The race was finished when five heats were trotted. Sterling McKinney took the fifth heat in 2:13¾, showing him to be a game horse. He is an own brother to the trotting stallion Unimak, owned by Capt. C. H. Williams of Palo Alto.

Don't think your driver is a bad one just because he gets the flag in a race. Ed Geers saw the red banner wave in his face three times in one day at Cleveland.

Mr. C. K. G. Billings, the owner of Lou Dillon, once sent word to Budd Doble to look the mare over at Pleasanton and to give his opinion of her. Mr. Doble went to Pleasanton, examined the mare critically, drove her a fast quarter and advised Mr. Billings to buy her. For some reason Mr. Billings concluded not to make the purchase, but Doble's judgment has been vindicated, just the same.

The thoroughbred stallion El Rayo, formerly owned by the late By Holly, but in recent years the property of Mrs. Halpin (Papinta), died at Papinta Stock Farm, near Concord, Cal., last month. El Rayo was by Grinstead out of Sunlit by Monday and was bred by the late Col. Harry I. Thorntony. El Rayo won twenty races and sired several winners.

Rey del Diablo is racing on the Grand Circuit, and got second mney in the 2:06 pace at Buffalo.

Alice Pointer 2:05½, by Star Pointer, is a new and the fifth 2:10 performer for Charlie De Ryder's old "Pointer hoss."

Dr. I. B. Dalziel, who visited Sobre Vista, Mr. Rudolph Spreckels' beautiful country sea', near Glen Ellen, last week, reports that Frank Kazzard, who was formerly with W. H. Lumsden, is handling a few youngsters owned by Mr. Spreckels. A three-year-old gelding by Bonnie Direct 2:05¼, out of Annie Rooney 2:17 by Stratmore, is a nice gaited trotter and has been a mile in 2:40, with the last quarter in 38 seconds over the farm's half-mile track. A two-year-old gelding from the same mare, but sired by Sidney Dillon, has stepped an eighth at a 2:20 gait and is only just broken. A yearling filly and a suckling filly from Annie Rooney are fine lookers. They are both by Guy Dillon.

When Frank Jones, the owner of Higball saw Sonoma Girl racing in the first heat at Cleveland, he said: "There is the greatest trotting mare in the world to-day. How do I compare her with the showing of Lou Dillon? Why, she is the greatest piece of trotting machinery that was ever foaled. She is a better horse in her first year out than Lou Dillon. She is a rare mare, and can trot all the time and in company. I think that she will be one of the greatest trotting mares the light harness world ever saw, and if she remains sound will beat the record of Lou Dillon. See how she is stepping away from the field. There is nothing to it. Still, I only wish that Higball could be in the race with her. She would not have such an easy thing."

"Did you ever hear of one mare kidnapping another mare's colt?" asked a stockman who drifted into Denver last week with a carload of horses off the range, says Field and Farm. "It isn't exactly common, still scarcely a spring passes with its crop of young colts that I do not have one or two cases right in my own bunch. It is one phase of the affiliation horses feel for one another. The attachment of animals for one another and for men and places make an interesting chapter in natural history. The kidnapping of colts generally takes place after the first colt or two have come. The first colt is always an object of tremendous interest to the others of the bunch. The grownups hang around it, they watch its every movement, protect it and pet it. It is like the first baby born to a young couple with a big circle of adoring uncles and aunts and grandpas and grandmas standing around worshipping it. Sometimes this affection will run away with one of the mares, especially if she has lost her own colt. She will hang around a colt trying to enlist its affections with a view to coaxing it away from its mother and some fine day she will sneak away with it. Of course, the true mother is frantic at the loss of her kid and I have to drop everything and restore the lost colt to its rightful parent. Sometimes the colt prefers to stay with the wicked, designing mare. Sometimes it runs back to its mother with every show of joy. But, either way, it is a clear case of kidnapping."

DISARTROUS FIRE AT EMPIRE CITY FARM.

Some time past midnight on July 25th a training stable at the Empire City Farm was struck by lightning and was totally in flames before help could be obtained.

Two adjoining buildings were also totally destroyed, though there was time enough to remove several work teams from these.

The twelve horses destroyed include the promising young stallion Prince Favorite 2:15¼ and eight McKinney yearlings that were to go to the sale this fall.

As the Empire City Farm sells at auction only, it is impossible to estimate the exact loss, but including as it does from one-third to one-half of the total valuation of McKinney yearlings, the loss is a very heavy one.

Aside from the grand pedigrees of these horses, several were conceded to be of the highest type of horse flesh that have ever been produced.

There was about \$4,000 insurance on barns, but none on horses. Following is a list of the horses burned:

Prince Favorite 2:15¼ by The Beau Ideal-Princess Chimes by Chimes.

Brassey, gr g by McKinney-Culture by Axtell. Cloudless, b m by McKinney-Dustless Queen by Mambriro King.

Cloverite, blk h by Prince Favorite-Cloverene by Direct.

Macquitta, b m by McKinney-Bosquita 2:17½ by Bow Bells.

Milady Mac, b m by McKinney-Qualified by Alta Vista.

Nyson, b b by John A. McKerron-Nysa by Allerton. Princess McKinney, b m by McKinney-India Princess by South.

Royal McKinney, b h by McKinney-Princess Royal 2:20, by Cbimes.

Sombre McKinney, b h by McKinney-Acbleve by Hummer.

Starry, b m by McKinney-Bay Star 2:08 by Kentucky Star.

Storm Cloud, b m by McKinney-Binnacle by Hummer.

BUFFALO GRAND CIRCUIT RACES.

Springer Wins Another \$10,000 Stake With Sonoma Girl.

Buffalo, August 5.—The Grand Circuit meeting here opened to-day under unfavorable weather conditions, a light rain falling throughout four races. The rain did not affect the track, and fast time was made in the 2:12 pace for the Dominion of Canada purse of \$10,000.

Reproachless, the winner of the Chamber of Commerce Stake, proved a disappointment, being unplaced. Reproachless and Alice Pointer each sold for \$50 in the pools, the field going at \$20.

Alice Pointer took the race in straight heats. Reproachless just beat the distance flag in the first heat.

Beatrice Bellini, the public choice in the 2:16 trot, justified her backers, winning in straight heats.

Judex, who was fancied for the 2:09 pace, also won in straight heats, while the first race for three-year-old trotters was won handily by Bell Bird in straight heats. Summaries:

First race, three-year-olds, Preparation purse \$10,000—

Bell Bird, blk f by Jay Time-Nancy Medium (A. McDonald)	1	1
Miss Densmore (Benyon)	3	2
Bonny Way (Lazell)	2	3
Etta Worthy (Lattimer)	5	4
The Count (White)	4	d

Time—2:12½, 2:13¼.

2:12 pace, Dominion of Canada purse, \$10,000—

Alice Pointer, b m by Star Pointer (McDevitt)	1	1
Major Mallow (Hendrick)	3	2
Hidalgo (A. McDonald)	2	5
Bonanza (Thomas)	6	10
Leland Onward (Murphy)	4	9
Red Bow (Sweeney)	9	3
Dan S. (Geers)	5	6
Reproachless (Starr)	11	7
Whitelock (Snow)	8	8
Mattie Chimes (Toor)	7	4
Mary M. (Sunderlin)	10	d

Time—2:05½, 2:07½, 2:06¼.

2:16 trot, Lafayette Hotel purse, \$2,000—

Beatrice Bellini, blk m by Bellini-Trixie Nutwood (J. Dickerson)	1	1
Wild Bell (Derry)	4	3
Genteel H. (W. McDonald)	7	2
Fannie P. (Packer)	2	5
Tolling Chimes, Jack Leyburn, Axtell, Peter Balta, Lawrietta, Lillie Stranger and Marjorie also started.		

Time—2:11¼, 2:08½, 2:10.

2:06 pace, purse \$1,000—

Index, b g by Redwood-Nellie O. (McKinney)	1	1
Rey del Diablo, cb g (Lawrence)	2	4
Laura Bellini (A. McDonald)	6	2
Electric Storm (Hendrick)	3	3

John F. and Billy Foster started. Time—2:10, 2:07¼, 2:11¼.

Buffalo, August 6.—Sonoma Girl, the famous California mare and winner of the M. and M. Stake, won a sensational race in the \$10,000 Empire State Stake at Kenilworth Park to-day. After getting away nicely in the first heat she broke at the quarter, and before she regained her feet the field was far away. The game mare went after the leaders and just managed to get inside the distance flag.

Despite her heat she was held favorite, winning the second heat handily in 2:07¼. In the third heat Sonoma Girl broke at the quarter and crashed into the fence, throwing her owner and Driver, J. D. Springer, who escaped injury. With a shattered sulky at her feet the mare ran away nearly a mile. After investigating the accident the judges placed her sixth. The accident did not hurt Sonoma Girl, and with little urging she won the fourth and deciding heat.

Ed Geers, the veteran driver, handling John A., got into a mix-up while scoring for the third heat. The old man was thrown from his sulky, but recovered, winning the third and fourth heats and the race.

The 2:10 pace was captured by Aileen Wilson. Summaries:

2:07 pace, the Broezel Hotel Stake, \$2,000—		
John A., ch s by Eddie Hal-Newsboy (Geers)	1	2
Allanwood, ch s by Knott (Lewis)	2	1
Kruger, ch g (A. McDonald)	6	9
Addington, b h (Cox)	7	3
Prince Hal, Captain Derby, Geary, Dorris B., Billy W. and Bystander started.		

Time—2:05¼, 2:07, 2:06½, 2:07¼.

2:10 trot, the Empire State Stake, \$10,000—

Sonoma Girl, b m by Lynwood W.-Maud Fowler (Springer)	7	1
Watson, ch g by Hindoo Wilkes (Loomis)	1	3
Bi-Flora, br m (Sploan)	4	1
Athasbam, b m (De Ryder)	6	2
Lady Resolute, b m (La Sell)	3	6
Emboy, b g (W. McDonald)	2	5
Gray Gem, rn h (Enlock)	5	7

Time—2:09¼, 2:07¼, 2:13¼, 2:10¼.

2:10 pace, purse \$2,000—

Aileen Wilson, blk m by Arrowood-Ella C. (Wilson)	7	1
Thornway, b h by Steinway (Cox)	1	2
William O., blk g (Geers)	4	3

Jennie W., b m (Sunderlin)	5	6
Time—2:06½, 2:05¼, 2:09, 2:09¼.		

Buffalo, August 7.—Norman B. was withdrawn from the Grand Circuit races to-day, leaving only three horses to start in the Iroquois Hotel Stake, valued at \$2,000. Ed Geers' Turley ruled favorite.

The fastest mile paced this year was made this afternoon by Angus Pointer in the free-for-all pace. The track was lightning fast and Angus Pointer covered the oval in 2:03¼. Angus Pointer was made favorite, only three horses starting. Baron Grattan went to a break at the quarter, and after regaining his feet broke again and was distanced.

Carlo was fancied in the 2:20 trot, but the winner turned up in Sarah Hamlin, who won the last three beats. Carlo burst a blood-vessel in the third heat and went down. Dickerson escaped injury.

While scoring in the last heat the judges removed Coonrod, the driver of Oliver Moore, and placed Benyon in the sulky. Coonrod was fined \$50 for bad department. Summaries:

2:07 trot, the Iroquois Hotel Stake, \$2,000—

Turley, br g by French Plate-Ella Mc (Geers)	2	1
Lady Gail Hamilton, blk m by Oakland Baron (Thomas)	1	2
Kid Shea, b g by Nitrogen (Packer)	3	d

Time—2:09¼, 2:14¼, 2:14, 2:11.

Free-for-all pace, \$1,000—

Angus Pointer, b g by Sidney Pointer (Sunderlin)	1	1
Argot Boy, b g by Argot Wilkes (Cox)	2	2
Baron Grattan, b g by Grattan (Geers)	d	

Time—2:03¼, 2:06, 2:07.

2:20 trot, purse \$1,000—

Sarah Hamlin, b m by Dare Devil (Packer)	4	1
Zara, blk m by Cascade (Payne)	1	2
Codero, g c (A. McDonald)	2	3
Oliver Moore, b h (Coonrod-Benyon)	3	6
Dr. Ives, Northwest, Sunline, Queen's Daughter, Dainty Dolly, Baron May, Carlo, St. Peter and Hester Schuyler started.		

Time—2:12¼, 2:12¼, 2:12½, 2:13¼.

LAST DAY AT CLEVELAND.

Cleveland, Ohio, August 2.—Cleveland's Grand Circuit meeting came to a close to-day with the season's record being made by Angus Pointer, who paced a mile in 2:03½ in the first heat of the free-for-all. It was a wonderful performance for Angus Pointer, considering the weather conditions. Heavy rains on Thursday evening had made the track heavy, but a strong breeze and hot sun dried it out quickly, with the result that the course was quite dusty.

In the second heat it was a duel between Baron Grattan and Angus Pointer the entire mile. Geers did not let Pointer get away from him, and the two teamed it the entire distance, Angus Pointer winning by half a length, finishing strong. In this heat Angus Pointer paced the distance in 2:04¼, and easily could have made a mile in faster time. Two heats at an average of 2:04 are the fastest paced this year in any race.

Dan Patch is the only horse that has beaten this mark, and the champion accomplished the trick in exhibition miles.

There were four races on the card for get-away day, and the sport was of the highest class.

During the week forty-four heats were trotted and paced, and the grand average was close to 2:08½. Summaries:

2:19 trot, three heats, purse \$1,500—

Margaret O., b m by Onward (H. Davis)	1	3
Sarah Hamlin, br m (Packer)	2	1
Tokio, gr g (J. Dickerson)	6	2
Awretta, b m (Saunders)	3	7
Sea Sea, Marechal, Sim Benton, Oliver Moore and George Adams started.		

Time—2:11¼, 2:11¼, 2:11½, 2:15.

2:15 pace, purse \$1,500—

William O., blk g by The Director-General (Geers)	1	1
May, b m (T. Hays)	2	2
Arrow, b g (Cox)	5	2
Queen Walnut, rn m (Taylor)	3	4
Miss Winifred, blk m (B. White)	4	3
Nellie, ch m (J. Dickerson)	d	

Time—2:09¼, 2:08¾, 2:09¼.

Free-for-all pace, two-in-three, purse \$1,500—

Angus Pointer, blk g by Sidney Pointer (Sunderlin)	1	1
Baron Grattan, h g (Geers)	3	2
Argot Boy, b g (Cox)	2	4
Gratt, blk b (Spencer)	4	3

Time—2:03½, 2:04¼.

2:06 trot, two-in-three, purse \$1,000—

Oro, blk g by Little Corporal (McCarthy)	1	3
Turley, b g (Geers)	2	1
Lady Gail Hamilton, b m (Curry)	3	1
Kid Shea, b g (Packer)	d	

Time—2:09¼, 2:08, 2:10¼, 2:11¼.

The directors of the Tulare County Agricultural Association has elected the following officers: H. Whaley, president; W. E. Green, vice-president; Joe LaMarche, treasurer, and W. F. Ingwerson, secretary. The newly elected officers will hold office until January 15th, that date being fixed as the time for the annual election of officers.

Drink Jackson's Napa Soda. It means health.

AT THE TRAPS.

CONDUCTED BY J. X. DeWITT

FISH OF CALIFORNIA.

In last week's issue of the Breeder and Sportsman there appeared the first half of an article on the fish and fisheries of California by David Starr Jordan, president of Leland Stanford University. The concluding portion of the article follows:

The hatcheries have done much also to restock the trout streams of the State. Every stream in California is a trout stream and in practically all it ought to be possible to take trout in abundance. Unfortunately, however, the great enemy of the angler, the trout hog, is naturalized in California, and in many of the best streams the trout hardly gets a chance to lay its eggs.

Native to California are the following species of trout:

- 1. The steelhead, in the Coastwise streams running up from the sea. This is the largest American trout.
2. The rainbow trout, the most widely distributed of all. There are a number of local varieties—the true rainbow of the Coast streams, the Shasta rainbow of the upper Sacramento, the Gilbert rainbow of the Kern and Kings Rivers, and the golden trout of Mount Whitney.
3. The Tahoe trout, a splendid large trout of the Nevada basin, introduced into the Feather River, the Blue Lakes, and other bodies of water. From it is developed the huge silver trout of Lake Tahoe, spawning in the lake itself.
4. The cutthroat trout, the common trout of the Columbia region, found south to the Eel River in California.
5. The Dolly Varden trout of the upper Sacramento River and northward.

Besides the trout and salmon, California has a variety of game fishes. Important among these is the great tunny, or leaping tuna, which ranges from 150 pounds to half a ton in weight, and is found in great abundance about Avalon on Santa Catalina. This wonderful bay has many other roving fishes, taken with the trolling spoon—chief among them being the yellowtail, the alucore and the huge bass, called the Jew fish. These noble fishes deserve protection from the amateur angler who catches a dozen or a hundred of them and has them hung up and photographed, himself beside them, and then hires the guide to bury them while he goes away to have fun of his own fashion somewhere else. About the Santa Barbara Islands are the barracuda, or flying fishes, also of the game variety.

Some important additions have been made to the fishes of California. The Eastern brook trout have been introduced in many streams. The striped bass and the shad were both planted as early as 1878 in California rivers from the Potomac and the Schuylkill, and have been of the greatest value to California. The striped bass can be found in the market at all times and in favor these fish are as good as in their native waters. Other fishes which have been introduced are the carp, which has proved an unmitigated nuisance, two species of catfishes, which, while having value, have displaced better native fishes; the black bass, which thrives well in the ponds, and the blue-green sunfish, introduced into Clear Lake as food for the bass. The most valuable food fish yet to be introduced is the Japanese ayu, or samlet, a diminutive salmon about a foot long as delicate in flavor as a fish can be. It runs in countless numbers in all the clear streams of Japan, Corea and Formosa, and should have a place in California. The eel should also be introduced into our streams.

Fisheries of Alaska.

The fisheries of Alaska deserve mention in this connection, as they are largely tributary to California, being developed principally by California capital, and their product finding its way to the markets by way of San Francisco. The red or blue-black salmon is the chief species of the Alaskan industry. It outranks in value every other species of fish in the world. Its annual product in Alaska is worth a million dollars more than the original cost of the whole territory. It exceeds the annual mineral output of Alaska by nearly two millions annually. The pack of red salmon and other salmon for 1902 amounted to 4,651,230 cases (48 pounds in each), worth on average about \$3.50 a case, or \$9,207,520. The pack for 1904 was somewhat lighter, being valued at from \$6,000,000,000 to \$8,000,000,000. The fisheries are located chiefly in Bristol Bay and the island of Kadiak, but the species runs in some 300 different Alaskan streams.

The codfish is as abundant in the North Pacific as in the North Atlantic, but the limitations of the market have prevented the development of the industry except to a limited extent about the Saumagin Islands and in the sea of Okhotsk. The herring and halibut have also a large and growing importance in Alaska.

It may be noted in passing that the markets of California, especially those of San Francisco, fall short of what they ought to be, and many fish are served in a condition far from the best. Even our best hotels are none too particular in this respect,

for which reason our Eastern visitors often wrongly infer that our fish are not so good as those to which they are accustomed at home. The fish are just as good, but in this glorious climate they keep longer without decaying. In being thus kept, however, they grow very stale and lose their fine flavor. The difference is not in the fish, but in the care the dealer takes of them, and as to this our people will some time grow more exacting.

The following is a list of the chief food fishes of California, arranged in systematic order, beginning with those of the simplest anatomical structure. They are graded in classes A, those of high high importance; B, C and D, progressively less:

- Southern shark (D), used by the Chinese; California ray (D), by Latin people.
White sturgeon (B); green sturgeon (D).
Quinnat salmon (A); silver salmon (A).
Steelhead trout (A); Tahoe trout (A).
Rainbow trout (A); cutthroat trout (D).
Dolly Varden (D); eulachon (C).
Shad (introduced A).
Herring (A).
Sturgeon (A), anchovy (C), silver anchovy (D), Moray (D), sucker (D), squaw fish (D), chub (D), carp (introduced D).
Bullhead (introduced B), gray catfish (introduced D), needle fish (D), flying fish (C), pecece rey (blue smelt, A), small pecece rey (miscalled smelt or white bait, C), mullet (B), barracuda (A).
Sand lance (D), chub mackerel (C), Santa Cruz mackerel (D).
Tuna (A), albacore (A), Oceanic bomto (D), California bomto (B), alleterato (D), swordfish (C), yellowtail (A).
Horse mackerel (C), poppy fish (miscalled pompono, B), Mariposa (D), Sacramento perch (C).
Striped bass (introduced A), Jew fish (B), San Diego rock bass (C), banded ronco (D), croaker (C), queen fish (B).
King fish (C), sea bass (A).
Weak fish (D), California surf fishes or perch (20 varieties, C-D).
Garibaldi (D), farbead (B).
Senorita (D), headfish (D).
Rock fish (30 species), called rock cod.
Priest fish, Spanish flag, Boccaccio, red, black, green, banded or speckled (A-B).
Skiffish (C), greenling (C).
Blue, spotted greenling (sea trout, B), cultus cod (C).
Blandquillo (C), kelpfish (B).
Pollock (D), tomcod (B).
Hake (C), halibut (A).
Monterey halibut (B), flounders (30 kinds, B-C).

New Clubhouse.—The San Francisco Fly-Casting Club members can now enjoy the comforts and conveniences of the recently built clubhouse on the Truckee River fishing preserve of the club.

The building is one-story. In the center is a large dining and sitting room, with an old-fashioned fireplace. Around this large room are the sleeping quarters, fitted up in elegant style. The entire building is surrounded by a ten-foot porch. The roof is painted green and the building proper is coated with oil. All modern conveniences have been installed.

President Tom C. Kieruff visited the new home of the club last week and on his return stated that everything was in a most satisfactory condition for the reception of the club anglers this season. Needless to say the clubhouse will do a land-office business ere long.

The last fly-casting contest of the club will take place at Stow Lake on Sunday, August 25th. This final gathering of the rod-wielders at the lake side will practically determine who are the prize winners in the fly-casting contests for 1907. An appetizing lunch will be served in the lakeside clubhouse.

Another Fish Fest.—So successful was the barbecue of the Southern California Rod and Reel Club recently that the members have decided to have another one in the near future. The casting tournament was not a success because of the high wind that was blowing. The club has been asked to affiliate itself with the National Association of Scientific Angling Clubs, and to send representatives to the tournament to be given at Racine, August 15th, 16th and 17th.

Hunters' License Retaliation.—The Nevada hunters have evolved a spirit of retaliation for the passing of the California hunting law, which provides that non-residents of the State shall pay a license fee of \$10. Next year the Nevadans will come back with a license of \$25 for non-residents of that State. There are many fine fishing grounds along the Truckee in Nevada, and the resident hunters of the latter State will try to "get even."

Your Stomach is O. K. if you drink Jackson's Napa Soda.

Despite the rather raw and uninviting weather last Sunday there was a good attendance at the August live-bird shoot of the California Wing Club. High average for the day was made by Clarence A. Haight, who scored clean strings in the two club races at twelve birds each and also in an eight-bird pool. Five shooters, each with straight scores, divided the club purses, \$50 each, in both the morning and afternoon club races. Dick Reed scored straight in the afternoon match. In the pool shoot four shooters with straights divided the purse of \$25. Naumann and Schultz grassed all of their dozen birds in the second race, shooting from the 34-yard slat. Frank Turner shot a good race throughout the day, but was one bird behind a straight in each event. The scores follow:

Club race, twelve pigeons, \$50 purse, three moneys, distance handicap, high guns—

*Birds only.

The Owl Rod and Gun Club shoot, scheduled for last Sunday, has been postponed indefinitely, or until such time as a fuller decision is reached concerning the subject of shooting within the city limits.

There is an ordinance in force in Modesto which prohibits shooting within the city limits. Some rather over zealous individuals have turned loose the city law on the club members and for the time being have stopped trap shooting on the club grounds. Possibly if the boys shot on Wednesdays instead of Sundays they would not have been cinched. Such is the Gospel of intolerance.

The Goldfield bunch have started off with a rush. In anticipation of the tournament, at both live birds and blue-rocks, at which it is reported there will be \$3,000 in added money, the club members have gone into active practice and propose to "go some" with visiting shooters. The visitors will not find easy cherry picking up in Nevada, for there happens to be some seasoned shooters located there at present.

The Goldfield Chronicle of July 25th gives the following account of a recent practice shoot:

"The blue-rock shoot by about twenty members of the Goldfield Gun Club yesterday afternoon indicated that there are a number of men in the city who can handle a gun some, in fact, just about as well as anybody in the country, and in one case even better than the rest of the country has produced up to date.

"The first event yesterday was for money prizes, fifteen targets. Out of 15 birds Claude Inman shot 12, Stock got 12, Sage 14, Dyer 15 and Clayton 14. Clayton is the champion wing shot of the world, and Dyer is the man who defeated Captain Bogardus in a blue-rock match. His score yesterday is considered phenomenal in view of the fact that it had been many months since he had pointed a shotgun at anything. All of the scores were good in the match.

"In the pool shoots Sage shot 79 blue-rocks out of 95, Dyer 83 out of 105, Clayton 66 out of 75, Inman 72 out of 95, Rhodes 59 out of 80.

The feature of the day, however, was the match of forty birds each between Jerry Revere and Ole Oleson. Both men were cool and collected as they faced the traps and as they continued to shoot became cooler and cooler, in fact, the match was a frost. Jerry proudly kept the one bird he hit, while Ole attempted to horrow one to make up for missing every shot.

"The boys will hold a big shoot on the range Sunday and will supply free transportation to the grounds to all who care to witness the sport, and it will be well worth going to see.

"The Chronicle was informed this afternoon that a flock of 12x12 tents would be secured for Revere and Oleson to practice on."

The mountain scribe is a bit eulogistic in one or two statements, but from the foregoing the reader will note that the Goldfield boys can shoot. Clayton was regarded as a 94 per cent man before he left Kansas City. He shot in the Pacific Coast Handicap at Los Angeles last year and at San Diego. He was defeated in a live-bird match with Gus Knight at San Diego, but at that, he is a shooter to be well reckoned with.

The Wheatland Gun Club has elected officers as follows: President, Lawrence Sargent; secretary, Roy Brewer; treasurer, A. C. Stagner. The membership is now twenty-three. George Oakley has offered the club a shooting ground near his cottonwood grove.

The Richmond Gun Club members shot three club events at the Lang Park grounds on July 28th. The scores were:

Fifteen targets—Purdy 12, King 3, Baker 10, Beck 9.

Fifteen targets—Purdy 6, Truax 7, Baker 3, King 6, Feudner 7.

Twenty targets—Purdy 13, Truax 12, Baker 8, King 8, Feudner 10.

During the time of the shoot a strong wind was blowing, which accounts for the light scores made by the contestants.

The Channel City Gun Club of Santa Barbara recently held a meeting to discuss plans for the meet in September, and determine upon the rules to govern the competition for the trophy that has been donated by the Hunter Arms Company. It is the desire to give everyone a chance for this beautiful vase, and handicaps will accordingly be arranged so that the poorer shots may be able to compete on even terms.

The second Western Handicap of the Interstate Association, under the auspices of the Denver Gun Club, will be held at Denver, Colo., August 20th to 22d inclusive.

The Interstate Association and the Denver Trap Club will add \$3,000, of which amount \$300 will be reserved to purchase trophies—\$100 for a trophy for the winner of first money in the Western Handicap and \$50 for a trophy for the winner of first money in the Preliminary Handicap; \$100 for a trophy for the winner of high average among the amateurs who shoot in all regular events, and \$50 for a trophy for the winner of high average among the professionals who shoot in all regular events. The two handicap events are not included for high average.

Four hundred dollars (\$400) in cash will be added to the Western Handicap, and three hundred dollars (\$300) in cash will be added to the Preliminary Handicap.

One thousand dollars (\$1,000) will be added to the twenty regular events (\$50 to each) scheduled for the three days of the tournament.

The program for the first day, Tuesday, August 20th, calls for ten 20-target events, open to amateurs only, with \$50 in cash added to the purse in each event, all to shoot from the 16-yard mark.

The second day there will be five 20-target events, \$50 added to each event, open to amateurs only, and the Preliminary Handicap, 100 targets, \$7.50 entrance, handicaps 16 to 23 yards, \$300 added to the purse, high guns—not class shooting—high gun to receive first money and a trophy presented by the Interstate Association. The purses at this tournament will be divided upon the same plan as that used at the Grand American Handicap, which nearly all shooters are familiar with.

The third day there will also be five 20-target events with \$50 added to the purse in each event, open to amateurs only, and the Western Handicap, 100 targets per man, \$10 entrance, handicaps from 16 to 23 yards, high guns, with \$400 in cash added to the purse, the winner of first place to receive a handsome trophy from the Interstate Association.

Entries to the Preliminary Handicap must be made before 5 o'clock P. M. on August 20th, and entries to the Western Handicap must be made before 5 o'clock P. M. on August 21st, as penalty entries will not be received in these events.

Under the Squire money-hack system one thousand dollars will be divided pro rata among the amateurs who shoot in all regular events (the two handicaps not included) scheduled for the three days of the tournament and fail to win the amount of their entrance money in these events. In no case, however, will more than the total amount of this entrance money (less price of targets) be paid a contestant.

An extra entrance fee of \$1 per day will be charged each amateur who shoots in one or more events any day. This \$1 per man per day will be added to the \$1,000, which will be divided pro rata among the amateurs. For example, say there are 100 contestants each day who shoot in one or more regular

events. This would mean that \$100 would be added each day to the \$1,000, which would make a grand total of \$1,300 for the three days, which would be divided pro rata among the amateurs who would shoot in all regular events scheduled for the three days and fail to win the amount of their entrance money in these events. It must be remembered, though, that no contestant will be paid more than the total amount of this entrance money—less price of targets.

It is confidently believed that this purse will amount to a sum sufficient to cover the losses of those who shoot in all regular events based on an entrance fee of \$43 for the three days less the price of targets (\$10). Thus a contestant can shoot in all regular events of the tournament, and should he prove to be out of form and not shoot up to expectations his three days' sport will cost him the price of targets only.

While contestants are not guaranteed that they will receive the total amount of their entrance money, it is reasonable to believe that they will receive the full amount, as the statistical data in connection with tournaments conducted under this system shows that this purse in each instance was sufficient to cover the losses of those who shot in all scheduled events, and frequently there was quite a surplus.

In case there is a surplus after the combined losses have been paid, the surplus will be divided among the high gun amateurs who have shot in all regular events scheduled for the three days.

The grounds of the Denver Trap Club will be open for practice and sweepstake shooting on the afternoon of Monday, August 19th. Five events of 20 targets each will be shot. Optional sweeps. Squads will not be divided into sections on practice day.

The Interstate Association trap shooting rules will govern all points not otherwise provided for.

The standard bore of the gun is No. 12, and in the handicap events all contestants will be handicapped on that basis. Contestants using guns of smaller bore must stand on the mark allotted to them.

The Interstate Association reserves the right to select two cartridges from each contestant (to test the same for proper loading), the selection to be made at any time when a contestant is at the firing point.

"Shooting names" will not be used at this tournament.

Shooting "for targets only" is open to manufacturers' agents solely; all other contestants must make entry for the purses.

A contestant who takes part in the tournament any day must make entry for all events called for by the program of that day. Entries will not be taken for less than the total number of events (the handicap events included) scheduled for the day. In case a contestant, after making entry, fails to take part in any event, or events, his entrance will be forfeited for that particular event, or events, and the amount so forfeited will be added to the purse the same as if he had contested.

This rule is made necessary by the outlook for an exceptionally large entry list, and it will be impossible to keep this large tournament working smoothly unless the squads are kept intact.

Professionals who take part in the Preliminary and Western Handicaps will be handicapped the same as other contestants, and must shoot for "targets only" from handicap distances as allotted by the handicap committee.

The purses in all regular events will be divided according to the Rose system, into four moneys, at the ratio of 8-6-3-2.

The Interstate Association reserves the authority to postpone the Western Handicap at targets on account of bad weather or other important cause if, in the judgment of the management, such postponement is necessary.

The manner of shooting the Western Handicap at targets (and in fact all events scheduled for the tournament) is as follows: Five automatic traps will be used, and five different events will be commenced at the same time, one respectively at each trap. The total number of qualified contestants will be divided into five sections, as nearly equal in number as possible, and a section will be started at same time at each trap. After all members of a section have finished competing at their trap they will pass on to the next trap and compete there, and so on until they have competed at each of the five traps.

In the handicap events ties that are shot off will be at 20 targets per man, and the original distances contestants stand at will govern.

Guns, ammunition, etc., forwarded by express or freight, must be prepaid and sent to the George Tritch Hardware Company, Denver. Mark your own name on the box that goods are shipped in, and it will be delivered at the shooting grounds without charge. Please note that shipments on which charges have not been paid will positively not be received.

Further information relative to the tournament will be cheerfully furnished by A. E. McKenzie, president Denver Trap Club, 1613 Blake street, Denver, Colo., or by Elmer E. Shaner, secretary-manager of the Interstate Association, 219 Coltart Square, Pittsburg, Pa.

The San Luis Boat and Gun Club held the final shoot for this season on July 14th. There were six events, the first being for twelve blue-rocks, the second, third and fourth for twenty blue-rocks each and the fifth and sixth events for ten blue-rocks each. The third and fourth races were the finals in a series of six events for prizes.

E. Taylor scored highest and was awarded the first prize, a medal presented to the club by the Du Pont Powder Company. The second prize went to H. A. Martin. A. B. Van Scoy won the third prize, J. E. Van Schaick the fourth prize and J. C. Hill the fifth prize. The silver cup presented to the club by the William Hoogee Company was won by H. A. Martin. Mr. Martin must win three successive seasons in order to hold permanent possession of the cup. The scores in detail were as follows:

Targets—	12	20	20	20	10	10
H. A. Martin.....	11	17	17	18	8	8
W. C. De Nise.....	9	13	14
Louis Steen.....	10	14	13	13	7	7
J. C. Hill.....	6	13	10	..	7	6
Mr. Wilder.....	13	..	8	5
E. Taylor.....	10	18	20	16	9	9
Van Schaick.....	9	16	13	17	5	10
C. T. Greenfield.....	..	11	12	15
De Nise.....	..	10	14	9	6	..
J. C. Hill.....	..	11

At the last San Andreas Gun Club shoot the main events were a 25-target race and a shoot at doubles, five pairs, the results being:

Pfortner 24, Stewart 21, Casey 21, Scaroni 21, Caster* 13, Cadamartori 12, Zwinge 18, Crossett 2, Snow* 15, Pache 14, Snyder 14, Zwinge, M. 13, Malaspina* 9, Smith 15, Kiser 17, Tiscornia 16, Wells 8, Treat 5

Doubles—Pfortner 7, Casey 7, Caster* 4, Zwinge 4, Snow* 3, Pache 3, Stewart 6, Snyder 5, Zwinge, H. 4, Smith 4, Kiser 3, Decker 4, Scaroni 4.

Gil Pfortner and Boh Casey were high guns for the day. The stars indicate that the shooter was a club guest.

The dates set for the Southern California tournaments are as follows: Santa Barbara, September 23d and 24th; Los Angeles, September 27th, 28th and 29th; Corona, Riverside county, October 4th and 5th; Douglass, Ariz., October 11th, 12th and 13th.

Spokane Chamber of Commerce has contributed \$250 to the fund to be used as purse money at the big Pacific Coast Handicap shoot in Spokane, September 10th, 11th and 12th. More than \$1,500 in prizes will be distributed. At the last meeting of the Spokane Rod and Gun Club a soliciting committee, consisting of Dr. T. H. White, F. K. McBroom, J. W. Merritt, Paul Shellenbarger and I. Dornberg, was appointed. The Washington Water Power Company has donated the use of the Natatorium Park hall grounds for the shoot, and it is expected to have experts from all parts of the country.

The dates for the tournament at Goldfield, Nev., under the auspices of the Goldfield Gun Club, are September 2d, 3d and 4th. Shooters desiring programs or further information should address Secretary J. M. Fairchild, who will mail programs as soon as they are ready for distribution.

The Chihuahua Gun Club will act upon the suggestion of its enthusiastic president, Eduardo C. Cully, to form a league of all the gun clubs in the State of Chihuahua, Mex. At a recent meeting, presided over by Vice-President Lic Rafael I. Alvarez, the question was discussed. It was decided to appoint a committee to suggest a plan for such a league. The committee appointed is Eduardo C. Cully, Manuel R. de la Pena and Francisco Terrazas.

Sunday's shoot, July 27th, of the club was with pistols for the Enrique C. Creel cup. It was won by Juan M. Woodsworth, who made 40 points out of a possible 60. A. C. Nash made 31 and Francisco Antillon 37.

Hunters' License Law Defective.—Many sportsmen claim that the law is defective, in that it doesn't license the gun itself. Japanese and other foreigners go hunting, claiming that they only kill cottontails and unprotected game, and there is no one to watch and see that they do not transgress the law.

The Fish and Game Commission, it is reported, is about to institute an investigation of the reports of the abuses of the new hunting law, which became effective on the first of July. Under the provisions of this measure every hunter of protected game is required to secure a license. To citizens the price is \$1, to non-residents of this State \$10 and to aliens \$25.

Recently a resident of North Oakland made application to the County Clerk's office for a license. An inspection of the blank revealed the fact that he was a native of France and had not been naturalized. He was accordingly refused the necessary permit until he had deposited \$25. Thereupon the applicant stated that a number of his acquaintances who were not citizens had secured licenses.

It has further developed that in many instances one license is purchased in the interest of a half-dozen or more hunters. This is a very easy procedure, as the licenses take the shape of a metal tag, which is required to be produced upon demand from the proper authorities. Inasmuch as the tag does not contain a description of the owner it may be used by any number without fear of detection.

The Channel City Gun Club of Santa Barbara will probably hold the annual club tourney September 23d and 24th.

California's favorite hot weather drink is Jackson's Napa Soda.

THE NEW DOG.

[By Clipperton.]

The old dog had unhappily left us. He had been our friend for years, and when we parted it left a large hole in our lives. Towards the end he had got so old that he could only lie in the kitchen chimney corner and cry over old times with an emphasis that threatened to mar the harmony of our home. There could be no doubt that his days were numbered, but the last few numbers dragged a little, even for those who loved him most; and at last I could not repress the suspicion that my old friend had caught the infectious advertising spirit of the age, and was endeavoring to peg out with a bit of a sensation. Acting, therefore, under competent advice and humane impulse, I approached him one day recently and tendered him a scrap of food that was pleasing to the eye but deadly to the innards. It had been prepared with fatal skill by my assistant in the drug store. The poor old fellow swallowed it greedily; and then he rolled over to that better land.

My wife declared that she never would have another dog around the house; and I agreed that the vacant place in our hearts could never be filled by an alien, or words to that effect. But when the plumber came and in the course of his day's flirtation with the cook (and, by the way, I have had cause to suspect that this individual's visits were due to sundry punctures in the pipe done with the ice-pick, with malice aforethought, by the kitchen genius), observed the empty kennel in the back yard, he took an early opportunity in informing me that he had a friend who had a pretty little pup at home, which was well bred and was accustomed to polite society and which he thought he could get for me for next to nothing, as his friend was going East soon. Lured by the plumber's fascinating description of the dog, I agreed to consider the proposal and told him to send his friend, whom he called "Fried Liver Jack, a hoke as knows more about dogs and does more things with dogs than anybody else in Los Angeles," around to my drug store next day.

The following afternoon a short, pudgy, red-faced character, a fellow with the ear marks of dog and kennels in his person and manners called at my store and introduced himself as the plumber's friend. His pal, the plumber, had mentioned the matter to him, but he was sorry, the little dog spoken of he had just sold to Mr. ———, mentioning a prominent Santa Fe official and incidentally a dozen or more equally prominent ladies and gentlemen of Southern California who were under great obligations to him for being put right in doggy matters. As he started away he casually remarked that he had a Fox Terrier puppy at home that was "a better one" than the plumber's selection.

By this time Fried Liver Jack had worked me up to an interested humor, so I asked him to bring the pup around for inspection. This, he claimed, would hardly be good for the pup, as he was under treatment for worms. "All pups have worms, you know, I'll have him all right in a week or two, then if you like I'll show him to you when he is just fit."

Seeing that this struck me agreeably my visitor added: "I'll tell you what I'll do. I can get \$50 for this pup easily, but I'll let you have him for certain services you can render me—we're both professional, you know," he concluded with an inducing smile.

A short adjournment to my inner office and a few whispered words from Fried Liver Jack gave me an inkling of what was in the wind and more in sympathy than from a desire to acquire a dog I agreed to help him in his predicament, for which services I was to get a fine Fox Terrier puppy. In due course Fried Liver Jack found it incumbent to fulfill his part of the agreement, this he did by sending the pup around by a hoy who left it in the drug store for me one morning. The fat man was richer by his bargain with me and I was poorer by a dog.

I could see that there was a flaw in the animal at the start; but when my wife found that he could walk on his hind legs, and likewise beg for pieces of sugar just as dogs do in the colored supplements to the Sunday papers she said that he was a pretty little chap, and she would like to keep him.

He was a mean looking dog, to begin with—the sort of dog who would steal expensive food and then go and lay the blame on another dog. Young as he was he wore the hard worried look of a dog endeavoring, in spite of an active conscience, to live down a past career of crime. There was nothing in his appearance to inspire you with confidence, he looked as if he were constantly afraid of being reminded that he had been acquired for an equivalent twenty times his value, I hate to speak harshly of the dead (for he, too, is a goner now), but for the sake of the truth, for which each of us is living and working to-day, I am compelled to own that he was a cheap, low down, second-hand bucket mutt, given to the world in a moment of indiscretion ever to be deplored. Fried Liver Jack said that his name was "Ginger." My wife demurred to this and re-christened him "Fido" on his arrival, but it was only another proof of the creature's vulgar tastes that while he wouldn't answer to the call of "Fido" once in fifty, he came up smiling and acknowledged himself as "Ginger" every time.

Fried Liver Jack told me that the dog was a thoroughbred, but I have my doubts on this point. He was mostly Fox Terrier, but I feel almost positive that the rest of him was partly Spaniel and part Dachshund. Whenever he sat down to plead for mercy, prior to being kicked in one piece behind

the woodshed, he looked like a subtle and ingenious cross between a weasel and a Guinea-pig. He was a sort of canine Ishmael that had been specially built by Nature for a career of harsh treatment, and if there was no immediate offense to kick him for, it was an irresistible temptation to kick him for himself alone. Still, dogs are a mild weakness with me, and when my wife decided to keep him I was ready to accept the situation, and to help him as far as possible to leave off brooding over his past record of crime and association with a rascal master, in the hope that he might in time become a respectable dog.

And yet he was not even a diplomatic dog—he had not the very ordinary gift of being able to conceal his contempt for us. F. L. J. must have had a telepathic method of letting him know how nicely we were buncoed. I think myself that it shows a great want of tact in a well bred dog when, on being suddenly drafted into a new family, he tacitly announces that his good manners would be clearly wasted in such a third-rate atmosphere. That, however, is precisely how the new dog acted. We had it on the testimony of the pudgy dog handler that he was a dog accustomed to the ways of polite society; and yet, all the time he was with us he never once openly acknowledged that we were worth wasting company manners upon. We may not be shining lights of the beau monde; we may not wallow in the giddy vortex of fashion; but most of the dogs that have shared our home have always borne with our shortcomings, and have at least acknowledged us as their equals, and, as such entitled to the best behavior they knew of.

But "Ginger" was not that kind of dog. After a while I used to get a little tired of being called away from my work in order to come and lick a broken down dog for a grave breach of good manners at the expense of the stair-carpet. I do not like to mete out harsh treatment to a dog that I have undertaken to recognize as one of the family, but when you have got the delinquent down by the neck, and your wife is standing on one side of you, and the cook on the other, in order to applaud the masterly way in which you are grappling with a grave problem in the interests of justice—why, then you are bound to let yourself go a bit and to put a little extra science into every fresh backhander that you are moved to administer.

We wore with "Ginger" for as long a time as we could, though as far as I am personally concerned it soon became clear that we did not hit it off well together. He was such a change from our old dead friend that I did not feel my responsive cord stirred within me when he snarled at me on my return home from the drug store. I was, however, quite prepared to meet him on terms of social equality, in the hope that when we knew each other better a rooted friendship might grow up between us. But my advances were never received in the cordial spirit with which they were made. Sometimes I would not see "Ginger" for days together; and then when we met, his bearing towards me clearly showed that he regarded me as an interloper in the family, whereas I was nothing of the kind. I had quite so much right in the house as he had, and I don't care who-knows it.

A dog like that must have been built for a violent end; and I will not attempt to disguise the fact that he accomplished his evident destiny in a thorough and workmanlike manner. It was one afternoon during the present halmy summertime that he passed away with a rather rapid pass. I had suddenly been seized with a desire to do some gardening, and I had put on an old suit of clothes which we are to exchange at the door for a house-plant or a feather-broom the next time the Jap peddlers come by. I don't suppose for a moment that in that suit of clothes I present the appearance of a taxpayer and a man with two votes; but I indignantly deny that there is anything about me at such a time to justify my own dog in mistaking me for a mere tramp. As soon as I began to dig, this low-bred dog crept out of the house, and contemplated the spectacle with an evil leer; and then, before I was prepared for anything of the kind, it shot across the garden, attacked me from behind, forcibly removing a large patch of trouser which I had up to then found extremely useful to me. It was only by a great mercy that a portion of myself did not accompany the fragment in question, and I could see then that it was time for the friends on both sides to stand back and leave us to fight it out alone.

The fight was a brief one, as "Ginger," recognizing me when it was too late, squatted down in an apologetic attitude and humbly begged pardon for the unfortunate error. By way of reply I took a piece of string from my pocket and a large stone from the ground. Having joined the stone and the string and "Ginger" into one piece, I walked across the avenue and left the entire parcel in a neighboring pond. And candor compels me to confess that I have not seen "Ginger" since.

DOINGS IN DOGDOM.

Wonderland Kennels is the registered title of Miss Jennie A. Crocker's kennels at San Mateo.

Wonderland Kennels, it will be remembered, purchased five dog puppies whelped by one of J. I. Sparrow's imported English bitches—Charlewood Rosalie, we believe, by J. Cawkwell's Silkwood Surprise. The youngsters came on so nicely that the balance of the litter, four hitches, are now also located at San Mateo.

Geo. A. Neihorger's black Cocker hitch Winona whelped on August 1st seven puppies (four dogs) to D. P. Cresswell's Ch. Mepals Saxon.

Wm. Bay, the Irish Water Spaniel fancier, has had the name Frisco registered with the A. K. C. for his kennels.

Mr. Bay has two very promising puppies that he hanks on for next show.

Silkwood Kennels announce, in our advertising columns, the opportunity of securing some fine Bull Terriers. Among these are some grand young dog and hitch puppies by and out of producers.

Several good hood bitches are also offered for sale. Newmarket Jean, the dam of Ch. Meg Merri-lies II., in whelp to Silkwood Chader Wild, the latter recently imported from England.

Silkwood Brassie, a fine hitch, that when ten months old won special for best at Los Angeles in 1906. The English hitch Charlewood Rosalie, which has just raised a splendid looking litter of pups. Also two young hitches by C. Rosalie, one in whelp to Woodlawn Wonder (Ch. Woodcote Wonder-American Belle.)

The San Mateo Kennel Club show officials and members are working hard for a successful show on September 9th.

We are pleased to note that the responses by many fanciers to the following circular letter are both numerous and encouraging:

"Dear Sir: The San Mateo Kennel Club will hold its third hench show at the club-house and polo field of Francis S. Carolan, Esq., on September 9th. It will be a one-day open-air event, starting at 10 A. M. and continuing until the judging is completed. The official premium list is in print and will reach you in a week.

"The club is doing all in its power to make the show a big success, and hopes you will lend your co-operation to the same end. To assist the fancy in interesting and educating the general public in thoroughbred dogs, the Board of Governors has passed a resolution to abandon admission fees for 1907 and welcome all your friends on the grounds. The club is furthermore placing over fifty cups to be distributed and won outright by the various breeds.

"If you feel inclined to offer a trophy to be competed for at the coming show, your action will meet with our hearty appreciation, and if any of your friends are desirous of enlisting their services in this direction it will greatly stimulate competition. Trusting that you will help hoom the show on September 9th, I remain, very truly yours,

"WALTER W. STETTMEIER,
"Vice-President, 117 Hayes Street."

Valverde Kennels are keeping in tab with the Collie situation. Indications are from recent reports of Manager Geo. A. Cranfield that some high class, grandly bred young Collies are now on hand and more coming.

Valverde Vera (Ch. Squire of Tyton ex Southport Supreme) whelped recently to Ch. Anfield Model four dogs and two hitches.

Valverde Victor, first dog puppies, Oakland, this year, is now the property of H. P. Gaskle Jr. of Woodland, Yolo county, a well known breeder of Shorthorns, Shropshire sheep, etc.

Skylight Solitude, a tri-color hitch, recently arrived in good shape from the kennels of J. V. Cotta, Galesburg, Ill. Solitude will be served by Ch. Anfield Model.

An unshown bitch is now en route from the kennels of John Croxon, Eastbourne, England, and will be served by Model also.

Venice of America Kennel Club's first annual show is a coming fixture, premium lists and entry blanks are now ready and can be secured by addressing Secretary C. P. Ensign, 557 South Spring street, Los Angeles.

The classification is a very complete one, full classes in most breeds, among others we are pleased to note full classes for Irish Water Spaniels and also a very inducing classification for Gordons.

Three trophies and fifty-three cups (one or more for almost every breed) are offered. Entries close on Saturday, August 17th. The bench show committee is: Col. J. W. Brooks, Kenneth Preuss, Robt. T. Cochran and Zue G. Peck. G. S. Halliwell is superintendent.

Irving C. Ackerman of San Francisco will judge Bloodhounds, Mastiffs, St. Bernards, Great Danes, Russian Wolf Hounds, Poodles, Chow Chows, Dalmatians, Bulldogs, Airedale Terriers, Fox Terriers, Irish Terriers, Skye Terriers, Black and Tan Terriers, Pomeranians, English Toy Spaniels, Pugs, Japanese Spaniels, Toy Poodles, Yorkshire Terriers, Maltese Terriers, Chihuahuas.

George L. Waring of Los Angeles will judge Collies, Bull Terriers, Deerhounds, Greyhounds, Foxhounds, Scottish Terriers, miscellaneous.

John P. Brown of Riverside will judge Pointers, English Setters, Irish Setters, Irish Water Spaniels, Clumber Spaniels, Field Spaniels, Cocker Spaniels, Dachshunds.

L. W. Young of Los Angeles will judge French Bulls and Boston Terriers.

Mr. Fred Herr, treasurer of the new club, is authority for the statement that the show will not only be a grand success by reason of the number of class entries, but also as a social function.

RACING IN FRANCE.

Paris, June 18th.

It is the distinction of racing in France, whether it be a major or a minor course at Longchamps for a "classic" like the Grand Prix or at Enghien for the mere routine of the sport—that it always seems like a pastime. The crowd at an American race track, like Sheephead Bay or Belmont Park, seems bent on its bets and little else. The horses often are no more than so many incidental machines. Even at Saratoga the air of festivity out of doors is very thin and unpersuasive. At an English race track, unless it be some exceptional course and occasion, like the fashionable meeting at Ascot, there is no pervading air. Some have come for the sport, and they, as a rule, take their racing very seriously indeed. Some have come to make and win bets, and they are almost as businesslike as their brethren at the American meetings. Others have come for diversion, but in that case they usually conceal their amusement successfully.

Perhaps the pervading air is negative. Nobody seems to be having a "good time." Conversely the atmosphere of a Parisian race track is altogether positive. Everybody seems to find enjoyment. The French bet, but by far the largest part of those who go actually to the races make their wagers as an incident in the diversion of the day, and with characteristic thrift, in sums so small that to win or lose is a trivial matter. There must be "regulars," as the American phrase goes, who make their living by their bets, but there is no such crowd of sordid and hard-featured men about the betting machines as those that push and clamor around the bookmakers' stands at any of the race tracks near New York.

The French watch the races because they are amusing to watch. The familiar murmur—the voice of the race course the world over—rustles through the crowd at the start. Very hearty cheers hail the winner if the race is of any note or—still more—if the race has been hard fought. But I have yet to see a French crowd at a close finish sway back and forth, shouting, "Come on, This" and "Come on, That," in the hysterical fashion of American tracks. The race for the Grand Prix happened to end last Sunday in a well contested duel that ended only at the finishing line between two horses. The crowd watched alertly, cheered warmly, talked eagerly for a few moments, and then turned to whatever else might give it interest or amusement. At Longchamps, as at every other of the tracks in the vicinity of Paris, as on every bright day, the spectators had come for pastime—for an afternoon out of doors, an afternoon of entertainment of which six races happened to make a part. If it were amused, it went home content.

The course itself almost always bears witness to this mood in those that come to it. So long as an American course has a track upon which the horses may run, a ring in which the bettors make their wagers, and a painted scaffolding on which they may watch the gain or the loss of their bets, it suffices. Recall, for example, the sordid shabbiness of the course at Gravesend or the meanness of the minor tracks about New York. At Sheephead, the Coney Island Jockey Club does not seek neatness and comeliness. The newer Belmont Park has even sought to please the eye and to retain an occasional grace of nature. Many an English race track, except when it is in use, is a stretch of turf with fencing here and there and a few gaunt stands overlooking it.

A French race track of any sort must be pleasant to see and at the two better courses near Paris—Longchamps and Auteuil—it must even be a gracious and alluring comeliness. The Bois de Boulogne is the chief park of Paris, and by common consent one of the loveliest parks in the world. Yet two considerable and conspicuous portions of it have been set apart for those race tracks and portions that have their full share of the beauty of the place. From the course at Longchamps and from the course at Auteuil, the panorama on every side is delightful to see. The towering hill and chateau of St. Germain overlook them on one side. On another are the wooded ridges, dotted with white villas among the trees, that rose above the Seine. In all directions stretch lawns and woods in twenty different greens. Here and there the trees make a long vista or between them is a glimpse of water.

The stables at an American race track are often shanties of galvanized iron that defile what little there may be of landscape. The stables at a French race track make twin rows of low brick buildings, kept with a precise neatness and often half-hidden among the trees. At Longchamps or Auteuil in June the paddock is like a garden with its bushes of clematis and peonies, its syringas and even its roses. The stands have a comely lightness and airiness of line. The lawns before and behind them are the smoothest and softest of green. Flowering shrubs dot them. Even a little fountain has its place. Longchamps has its old windmill and its sloping "field" to complete the picture.

At Auteuil are hedges for the jumps and for pure ornament are hedges that win the eye with their ordered greenery. The ranks of little brown huts that contain the "Paris mutuels"—the legalized betting machines—are unobtrusively hidden. The huge red umbrellas under which "Le Pere Jules" or some other Pere serves his humble customers of the "field" with drinks and sandwiches only add an unoffending dash of color.

Longchamps and Auteuil, even when they are empty, have their unerring air of elegance, of places of pleasure and of refinement, of regard for the de-

light of the eye. The minor tracks, with less natural advantages, lose not an opportunity that situation, care or ingenuity may give them. The Parisian racegoer expects to be pleased when he looks about him, and he takes time to look.

Because the Parisian seeks the races for pastime, a much better quality of him, so to say, goes to them on any interesting day than goes to the tracks in England and America. Take the crowd at Sheephead Bay, which is certainly the first of American race tracks, and who compose it? A relatively small contingent of socially significant folk interested in races; an equally small contingent of those who care for racing as a sport; a far larger company from the pavements and the restaurants of upper Broadway; and the thousands of "regulars," who live in whole or in part, as so many gamblers, off the races. Add thereto the followers of racing as an industry, and the catalogue is complete except for the comparatively few who have come to the races for an afternoon of amusement.

At Longchamps or Auteuil nearly all these proportions are reversed. On "great days," even on ordinary days, the socially elect fill the reserved stands—not merely that part of society that is, or that affects to be, keen on sport, but the whole social organization of the capital from the diplomatic service, through the old aristocracy, down through the established rich to the climbing rich. There are eager owners and lovers of horses in numbers; and there are indeed women of fixed or rising note in the half-world; but nowhere may the curious observer find a swarm of denizens of the still lower world that corresponds to our region of upper Broadway. They are legion in Paris, as any night cafe will witness, but they do not go to the races.

Nowhere either may be found those that correspond to our horde of "regulars" that follow the tracks day by day. There are thousands of them (as a whole range of French acquaintances will assure you) but many of them stay in Paris and place their small bets there. They have no wish to see the races; they desire only to win money off them; they can do that quite as easily and surely, if they stay in the city and await the newsboys with their abbreviated cry of "Resultats des Courses."

To replace them are hundreds, and thousands, and on "great days," even tens of thousands of ordinary and highly respectable Parisian folk, who have come for enjoyment and nothing else. They bring their wives with them, and their sons and their daughters. They are the same people that every day go about the streets of Paris as work or pleasure bids them, who are neither rich nor poor, who live quiet, decent, happy lives, who are the bourgeoisie that makes the strength and the intelligence of France. Madam goes to the races with her husband as she might go with him to the theatre, eager for the spectacle. The son of the house may come, too, and even, if she be of the age meet for public assemblies, the daughter.

Scrutinize the ordinary stands at Longchamps or Auteuil, and they are full of such people. Cross the track into the field, to which the admission is only a franc, and there again are hundreds and thousands of poorer, but eminently respectable folk who have come, most of all, for a day of pleasure out of doors. They bring luncheons and they eat them in the field. They stretch themselves on the grass. They chatter; they idle; they play at leapfrog and other games. Hundreds of them are not even curious enough about the races to watch the horses, much less to scan the distant notice boards to discover the winner.

The thought of betting never enters their heads. The soft sky, the warm sun, the grass and the trees, a crowd to watch, the rustle of distant excitement, their own small adventures and misadventures delight them. Back they stream through the Bois, late in the afternoon, idling along the way. They have been to the races they say cheerfully; they are content and more. But how the American "regular" or the English sportsman, high or low, would despise them!

The official procedure at a French race track is copied, like that of most sports in France, from English methods, but the ingrained French instinct for rule and system has made it more rigid. Between the races at a French track you may cross the course, by certain gates, receiving a little ticket that will readmit you exactly as though you were at a theatre. Contrary, however, to the custom at many English tracks, the crowd, between whiles, may not stream up and down the turf. To the field enclosed by the course the admission is only a franc, less than half, and sometimes than a quarter, of the price charged in America. The racegoer leaves his franc at the outer gates and thereafter the whole enclosure except the ordinary covered stands (the "tribunes") and the reserved stands (the "pesage") are free to him.

To the tribunes, whither the average visitor goes, the admission is only a dollar in comparison with the American \$2.50; but for the "pesage" the price rises to \$4.00, and, as usual, there are certain privileged positions that only the members of the particular racing club and their guests enjoy. For the "pesage" and the "tribunes" the visitor receives badges much like those of the American courses, and the barriers of the different enclosures are strictly watched.

The irresistible French instinct for order again has arranged the paddock. In America the paddock is no more than an enclosed rectangle of grass, with a saddling shed, where the horses are led to and fro before their races or "cooled out" after them. Jockeys idle about, trainers, owners, whoever has bought

a badge of admission goes where he chooses. Not so the French paddock. It is like a miniature track. In a dirt circle at Longchamps, for example, the horses walk around and around. On the edges of the circle are the bystanders. No one sets foot on the dirt, much less crosses it. The jockeys move about with self-possessed dignity. There is even a capital story of two boys newly brought from England to Longchamps. They happened to have no mounts in the third and the fourth race of the day. Down in the grass of the paddock they innocently set themselves and wantonly played at "stick-knife." The bystanders watched with perturbation, until an official of the course entered, caught sight of the offending lads and promptly set them on their dignity again.

Again, as in England, the races are run on a turf course, and from left to right. The track at Longchamps has a hill much like that over which the Derby is run at Epsom. At Auteuil the only races are steeplechases, which are much more fostered by breeders and owners and liked by the public in France, than in America, and therefore the jumps and the obstacles are substantial and permanent. Neither Longchamps nor Auteuil has adopted any form of barrier, and the starts are made in the old fashion, with such "lining up" and equality of position and "send off" as the starter and his assistants can secure. Many a Parisian, who knows something of racing in other countries, will say that the starts are often careless and unfair, and Sunday at the Grand Prix, when the starter came within an ace of leaving the favorite at the post, and did practically leave two of the most promising horses, he was most generously hissed. On the other hand the crowd having come for entertaining spectacle rather than for rigid sport, is as impatient of long delays at the post.

One detail quickly impresses the spectator from American race courses. The horses run without a number on the saddle-pad. Only the colors of the jockey's cap and blouse or familiarity with the horse identifies him. The notice-boards, with their lists of horses and jockeys, and with the result of each race, are much like those at an English or an American course, but an American crowd "would die of heart disease," as the slang of the racing reporters put it, if results were hoisted at their tracks so long after the finish as they are hoisted at Longchamps or Auteuil. Hoisted also above the lists of the "Paris Mutuels" is the sum won for a bet on the winning horse or on those that are "placed." For all the public betting at a French race course is done by machinery, and the Government controls and orders the machinery.

The figures that go up are the amount won on the basis of a bet of ten francs (\$2). The bettor may have wagered more or wagered less, but the proportion remains the same. Officials, charged with the task, regulate every detail—odds and all—of the Paris Mutuels; a very minor official sells the bettor his ticket; and after the racing of the day, he may "cash" his winnings. Like most systems in France, that of the "Paris Mutuels" is to the foreigner amazingly intricate. In vain do his French acquaintances explain it. In vain does he bend his full mind to the understanding of it.

Suffice it that the system "works," certainly to the satisfaction of the State Treasury, apparently to the content of the race goers. (You may bet surreptitiously, if you will, with thinly-disguised bookmakers on the scale of a Gates, or you may wager half a franc in the petty hand-books that tempt the workmen of factories; but the average Frenchman is a very modest bettor.) Some of the revenue of the "Paris Mutuels" goes for breeding and charitable purposes, and for the cost of operation. At least 90 per cent of it passes into the treasury for general purposes, and it is a fairly considerable item in the annual revenue.

For many a Parisian race goer, however, the races themselves are the least interesting part of the day's entertainment. He and she watch them, of course. If they have commanding places on the stands, there, as a rule, they stay. Better to see and be seen than to lose such places for the mere sake of a wager. If they have no such favorable position, down to the rail they go, and oftentimes hire a chair or a campstool on which to stand. Behind the serried ranks of those so provided, the careless or unprepared spectator may tiptoe as best he may, or flee, at Longchamps, to the field or to the hill. There is a becoming, but no very keen or excited, interest in the races themselves—not nearly so alert and intense, in spite of the Gaelic temperament, as that which usually prevails, even on an "off day," at an English or an American track.

The race run, the winner cheered, and Monsieur and Madame turn to other pastimes. Would they bet? As a rule, they know not one horse from another, and "records" and "past performances" are as sealed books to them. Ah! but there are the papers. Nearly every one prints its list of probable winners. Some of them, that appear toward mid-day, summarize all the lists of the morning. There are two or three sheets that are devoted wholly to the turf. If Monsieur is provident, he has brought one with him. At least he has his morning paper. In faith and innocence he takes the choice of the racing reporter and bets his ten francs. He has had the benefit of expert advice and whether he wins or loses, the process and the uncertainty have amused him. (Again, how the American "regular" would mock!)—H. T. P., in Boston Transcript.

THE FARM

THE MORGAN TYPE.

"The Morgan type" has been mentioned so frequently of late that it is evidently considered of great value. It refers, of course, to the old-fashioned Morgan horses, but chiefly to the original Justin Morgan, his sons and grandsons, and their immediate descendants.

A novice is liable to get the idea that the great excellence of the Morgan family of horses was due to their conformation, shape or proportions, and that by reproducing a close image of the old-time Morgan, that is, an animal shaped after the same pattern, or run in the same mold so to speak, all will be accomplished that is desired, says the Horse Breeder. Practical horsemen, especially such of the old guard as have had experience with the old-time Morgans, know better, however.

The conformation of the old-time Morgan was really one of the factors that made the family famous, and was perhaps the least important of all the many factors which, combined, made him the most noble, most useful and most valuable animal of the equine species to the farmers, the business men and the professional men of the day and location in which the Morgan flourished.

There may have been other horses that filled the same exact measurements, weighed the same number of pounds and ounces, were of the same color, carried their heads and tails the same as the original Justin Morgan and yet were as unlike him as to the valuable qualities which he possessed and transmitted as the paste imitation is to the genuine diamond, or iron pyrites to pure gold dust.

It was the immense amount of nerve force which he possessed rather than his conformation, that enabled the original Justin Morgan, founder of the Morgan family, to out-pull, out-walk, out-trot and out-run any horse in the section where he was kept.

It was the quality of his brain rather than the size and shape of his head, or the length or depth of his body, that caused Justin Morgan to cheerfully obey the commands of his riders or drivers, whether they were stalwart men, invalid women or half-grown children. It was the physical and mental qualities of this wonderful horse, rather than his size, shape, style and pose, that made his stock so immensely valuable.

When horsemen speak of the "Morgan type" they have in mind the qualities, both physical and mental, which Justin Morgan possessed and transmitted, quite as much as the size and shape of the horse, and probably far more than those. It is impossible to predict with absolute certainty what qualities any untried animal will stamp upon his offspring. As a rule, however, it is most likely to be those qualities for which the family is noted of which the stallion in question is a member, especially if he is inbred to that family.

Morgan blood as it exists to-day must necessarily be greatly diluted, yet the influence of atavism is such that some animal which, according to mathematical reckoning has inherited only one 128th part of that blood may possess the marked characteristics which distinguished the genuine Morgan, more strongly than does the average of those which have inherited, according to mathematical calculations, one-eighth of the original Morgan blood. Selections of stock should be governed by the strength of the Morgan characteristics shown rather than by the apparent mathematical percentage of the Morgan blood possessed.

To restore the Morgan type, including the characteristics, so that it may be transmitted with a fair degree of certainty and uniformity will require many years of patient, persistent effort and experiment, saving only the choicest and rejecting all animals for breeding purposes that do not approximate the Morgan standard in characteristics, no matter how strongly the animals may be bred in Morgan blood.

SOMETHING ABOUT MILK VEINS AND THE UDDER.

A few years ago we thought we would see what percentage of the farmers out of one hundred believed that the large veins on the belly of the cow, which are called milk veins, were really veins for conveying milk to the udder, says Hoarl's Dairyman. So without expressing any opinion of our own on the matter we simply asked the following question of one farmer after another:

"Why are those veins called milk veins?" The answer from ninety out of the one hundred was in effect, like this: "Because they carry the milk to the udder." Of the remaining ten, five could not give any answer except to say that they did not know, while only five had the right idea, viz.: that these veins were in reality great blood veins returning blood from the udder to the heart. Afterwards we conversed with several of the original ninety on the subject, and stated to them what science really had found out as to the purpose of those veins. In almost every instance, however, we found them adhering steadfastly to their former ideas. One of them declared that he had cut into the veins on a dead cow and had seen the milk flow out.

Now, this is but one of several errors concerning the physiology of a cow which are strongly believed in by farmers. To be really intelligent and well informed, to believe in the truth and not a mass of errors, on any question concerning living beings, one must make a study of them. Can we afford as farmers to be harboring a mass of unfounded notions about so important an animal as the cow?

If we believe the truth as it really exists, that these veins return the blood to the heart, it will teach us several valuable lessons:

(1) It will show us the enormous circulation of blood that is required to produce milk in a good cow. (2) It will teach us that we must take good care of the udder, for with such a heavy influx and outpour of blood the organ is very sensitive to abrupt changes of heat and cold. This is the reason that cows are very apt to have garget by lying on cold ground late in the fall; also by lying on stone or cement floors. (3) It will teach us the folly of tying cows in the common stanchion whereby it is easy for a standing cow to stop over on to the teats or udder of the cow that is lying down next to her. We should wisely, provide a system of tying cows in the stable that will prevent such serious injuries. (4) A knowledge of the true physiology of the udder will teach us the importance of careful and gentle usage of it in milking and the great importance of attending to any derangements at once, which may take place.

There is no reason on earth why every farmer who keeps cows should not be a well informed man on the physiology and function of the dairy cow. Such knowledge would prove a very profitable guide to the wisest and best methods of handling the cow. We should always remember that the highest profit from cows can only come through the use of the best judgment and the best methods. To have good judgment we must have sound knowledge, for as said the ancient proverb: "Woe unto him who believeth a lie."

PRODUCING PURE MILK.

An Eastern New York market milk producer gives as essentials in the production of pure milk, clean stables, a healthy herd and careful, cleanly men. His cows are always fed after milking. Just before the milking they are brushed, and the floor and walls of the stable are sprayed. A man with warm water and towels then washes the sides and udders of the cattle. A second man repeats the operation, after which the cows are milked into cans covered with sterilized cheese cloth covers and the milk immediately removed from the stable to the cooling room, after which it is bottled. This dairyman gets 12 cents a quart for his milk and is thus well paid for the extra care and expense involved in its sanitary production.

TESTING PURE BRED COWS.

The Massachusetts experiment station makes the following report concerning the tests of pure bred cattle by the station:

Breeders of Jersey and Guernsey cows in Massachusetts continue to make yearly milk and butter fat tests of their stock under the rules of their respective national cattle clubs. This division of the station assists in the work by furnishing reputable parties who monthly visit each herd where tests are in progress, weigh each milking during twenty-four or forty-eight hours, and test the same by the Babcock system for the butter fat percentage. The cost of such work consists of the tester's time at \$2 to \$2.50 a day, together with his traveling expenses, board and breakage. The station receives its pay from the Jersey or Guernsey clubs. There have been completed during the year twenty-four Guernsey and thirty-eight Jersey records and at present there are eight Guernseys and thirty-two Jerseys undergoing yearly tests. Tests are likewise being conducted for the National Holstein-Friesian Association. These are mostly seven-day tests for milk and butter fat. Occasionally breeders test their animals for thirty and even ninety days. The test of the Holstein cow De Kol Creamelle No. 59158, belonging to D. W. Field, which yielded in 100 days 10,017 pounds of milk containing 284,088 pounds of fat, was made by A. D. Guil of this station. During the year seventy-two Holsteins have been tested, requiring the services of five men at different times during the year. The station does not publish the results obtained, but reports the same to the several cattle clubs, and keeps a duplicate record on file. It must be understood that the making of appointments for tests, the furnishing of apparatus, the securing of the necessary competent men and the verifying of the results require considerable time and thought, and necessarily interfere with the other work of this department.

ANOTHER WISE HORSE.

A Boston gentleman connected with the National Tube Works sends us the following, for the truth of which he vouches:

My friend was a ship-huller; his ship-yard was some miles from his house, which distance he had to come on horseback. He had a white horse that had served him long and faithfully in this capacity.

One day his horse fell, for some cause that I do not remember, and he was thrown to the ground and severely cut on the head.

He was unconscious for some time, and when he "came to," found the horse standing by him.

After a while he gathered himself up and attempted to mount the horse, but every time he tried fell back.

Finally, the horse walked to the side of a large rock which stood near. The gentleman crawled along to it and after hard work got on the horse, and then the horse walked slowly and carefully home with him, the rider being in a semi-conscious condition. The family removed him from the horse on his arrival home and put him to bed. He was a long while recovering from this accident, and one day when convalescing, the horse, being brought to the window where the gentleman sat, showed unmistakable signs of pleasure at seeing his master once more. The gentleman is still living and can corroborate this true horse story.—Our Dumb Animals.

If the coy is to freshen in early fall it is doubtful whether any better food can be furnished her than good pasture, but if she calves in the winter or spring, then she should be well fed on alfalfa or clover hay, ground oats, bran, corn-meal and oil meal.

Close attention to details is necessary in order to produce two tubs of butter exactly alike in quality. A change in the food will affect the milk and butter and so will any mistake in keeping and ripening the cream and in churning. The food also flavors the butter, as wild onions have been obstacles in that respect. Lack of cleanliness also effects the quality of butter.

FEEDING EXPERIMENTS.

Extensive experiments at the Utah experiment station show that sugar beets and beet pulp for dairy cows are nearly equal in value.

Sugar beets fed to steers with alfalfa and four pounds of grain per day, had a value of \$2.36 per ton. Beet pulp fed to sheep did not produce a weak hone.

Apples fed to pigs in two experiments with skim milk and shorts had a value from nothing to 18 cents per hundred. In one experiment apples were only equal to grass pasture.

As grazers, pure bred Tamworth swine were most superior. Berkshire, Poland China and Tamworth grades were about equal. Pure bred Yorkshires were not equal to the other breeds in feeding equalities, especially as grazers.

The successful man to-day is the one who is alive to all the little details of his business; it is not alone the breeding that is going to determine the future usefulness of the animal, but this must be combined with the daily care, feeding and careful observation. That is going to make the cow what she should be.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hook, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

POINTERS and ENGLISH SETTERS

TRAINED AND BROKEN

Broken Dogs and Well Bred Puppies for sale. Address E. VALENCIA, 212 North Brown St., Napa, Cal.

"HOWARD SHORTHORNS"-QUINTO HERD—77 Premiums, California State Fairs 1902-3-4. Registered cattle of beef and milking families for sale. Write us what you want. Howard Cattle Co., San Mateo.

LYNWOOD W. MARES FOR SALE.

Two handsome young mares by Lynwood W., dam by Shadeland W.; next dam by Hamlet. Full sisters, one four and one five years old. Good size and weigh nearly 1100 pounds each. Well broken, both single and double. The five-year-old is a bay with star and snip in the face, while the four-year-old is a dark sorrel with silver mane and tail, white stockings behind and strip in face. For price and further particulars, address B. L. MURPHY, Sebastapol, Cal.

FOR SALE CHEAP.

Gray mare, six years old, by James Madison; first dam Bessie Bell by St. Bel; second dam Belle B. by Belmont (son of Lexington); third dam Infallible by Lightning. See Bruce's American Stud Book. A very fast mare, can show now a half in 1:04 and a quarter very close to 30 seconds, trotting. Is not keyed up to a fast mile, but can convince any one she is a 2:10 trotter.

Also a bay gelding, five years old, by James Madison; first dam by Albert W., second dam by Algon; third dam Mabel by The Moor; fourth dam Minnehaha. This horse has had very little work, but can show a half in 1:06 and is one of the best prospects in this country. Can be seen at work at Agricultural Park, Los Angeles, in charge of Walter Ma-ven, or address

L. J. ROSE, Jr., Oxnard, Cal.

GOOD STALLION FOR SALE.

Young Monterey 2:21, pacing. Can show two minute speed when in condition. Is sound, bay in color, sure foal getter, eight years old. Is sire of Bay Monty, three-year-old record 2:23 on half-mile track. All his colts show speed and are good size. Young Monterey is by Monterey 2:09 1/4, first dam by Waldstein, second dam by Grand Moor, third dam by Norfolk. For price apply to S. COMISTO, Ferndale, Cal.

FOR SALE.

The Handsome Standard Bay Gelding, Honduras.

Nine years old, by Prince Nutwood 2:11 1/2, dam by Strathway. Stands 16 1/2 hands and weighs about 1225 pounds. Has worked miles in 2:24, quarters in 33 seconds with six weeks' training. He has never been trained since, but was used on the roads at Palo Alto. He is good gaited, wears no boots, does not pull a pound, absolutely sound, afraid of nothing, a lady can drive him with perfect safety. W. H. Williams had him in training and says that he looks like a 2:10 trotter. He is a remarkably good individual in every respect and a high class roadster and matinee horse.

Will also sell a good Studebaker buggy and a McKerron harness. The above will be sold on account of the owner leaving for Europe. Horse can be seen at Hans Frelsson's Stables, Twenty-fourth Avenue, near the Casino. For further particulars address this office.

COLTS AND BROODMARES FOR SALE.

Miss Horgan, winner of the Horgan Futurity Stake for yearlings last year, by Sidmoor 2:17 1/2, out of a producing dam.

Yearlings, two and three-year-olds by Sidmoor out of producing dams, and broodmares that are producers and stunted to Sidmoor 2:17 1/2. These mares are by Alcona, Dexter Prince and other good sires. These horses can be seen at the Concord race track. For further information address JOHN OTT or ED. WALKER, Concord, Cal.

FOR SALE—SEARCHME 2:21.

By Searchlight 2:03 1/4, dam Wanda 2:14 by Eros. A handsome seal brown gelding, six years old, 16.1 hands high, weight 1200 lbs. Good-gaited trotter, has been a mile at Pleasanton this spring in 2:16, with the last half in 1:05. Will make a high-class roadster or matinee horse. Gentle disposition and good headed and afraid of nothing on the road. Is absolutely sound, without a blemish. For full particulars address H. OLSEN, 814 B St., Hayward, Cal.

IMPORTED HACKNEY STALLIONS

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c. W. B. Eddy & Co., Whitehall, N. Y.

WINCHESTER
Take-Down Repeating Shotguns

If you want a serviceable shotgun, one that a scratch or a bump won't ruin and that can be bought at a price that won't ruin you, the Winchester Repeating Shotgun will meet your requirements. A 12 or 16 gauge Winchester Take-Down, with a strong shooting, full-choke barrel, suitable for trap work, duck shooting, etc., and an extra interchangeable modified-choke or cylinder-bore barrel, complete, for field shooting, lists at \$42.00. Your dealer will sell it to you for less. This is a bargain in a gun, but not a bargain-counter gun. Think this over.

Winchester Guns and Winchester Ammunition are Sold Everywhere.

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

THE BANE OF HARNESS RACING is the entrance money that must be paid by those whose horses are, through lameness or sickness, unable to start in the races in which they were entered. Entrance paid on horses that start is generally paid cheerfully, and even though no part of it is won in the race, little thought is given its loss. But when an owner has named his horse through an entire circuit and the horse goes wrong early in the season, it grinds pretty hard to be compelled to pay out several hundred dollars in entrance to avoid suspension. Suspension for a large amount of unpaid entrance has driven many a man out of the horse business who might have been a credit to it had he remained in. Many schemes have been suggested to prevent large suspension lists, but in some seasons back entrance seems to pile up at each meeting until a large proportion of owners and horses are barred from racing, and associations suffer financial loss. The Pacific Coast Trotting Horse Breeders' Association at one time wiped out an account of over \$10,000 due from horsemen of this State for unpaid entrance. The association was out of debt, and did not need the money, while many of the horsemen were unable to pay. The association therefore cancelled the entire account, much to its own credit and to the great benefit of those owing the money. This course cannot be pursued every year, but if a system could be devised whereby suspensions would be less frequent it would be much better for all concerned. Added money to stakes that will be only collected from starters seems the best way out of it. A \$500 purse costs the association giving it at least \$200 on an average. Why would it not be a good plan to make a race for which \$25 entrance would be charged starters and \$200 added to the stake money. Eight entries would amount to \$200 and \$200 added would bring the value of the purse up to \$400. It might be better to ask \$10 entrance and charge \$15 for scratching. Either way there would be no suspensions and the fewer men and horses there are suspended, the smaller will be proportion of those who at the end of the season have "soured on the game." We wish some of the California associations that intend giving meetings next year would give this subject some consideration, and see if a plan for entrance without accruing liability to suspension cannot be devised. If it can owners, trainers and associations will all be benefitted.

A **STAKE** in which pacing colts will get the big end of it has often been suggested by the breeders and owners of pacing horses, but associations and journals inaugurating these events have never seemed inclined to divide the money on such a plan. The editor of this journal has often had the suggestion made to him that pacing stakes should be advocated by the harness turf press, the argument being that as pacing races provide some of the greatest races on all circuits, the lateral gaited horse should be given a chance to earn more money. Those offering guaranteed stakes have nothing against the pacer, and would be willing to offer large sums for pacing events could they be convinced they would attract sufficient entries. While "the pacer is the racer," as Trotwood says, a vast majority of breeders are trying to breed trotters. The trotting stallions standing for public service outnumber the pacing stallions about four to one, as can be seen by a perusal of the lists as published in the turf journals. We should very much like to see some organization, journal or track offer a good rich stake, in which the pacing colts would be offered the big end of it, but we fear it would not be popular enough to attract as many entries as are given stakes in which the trotting colts are given the preference.

P. C. T. H. B. A. AT SANTA ROSA

**GOOD ATTENDANCE AND EXCELLENT RACING
ON OPENING DAY.**

Zombro Mare Era Wins California Stake for 2:24
Class Trotters—Mona Wilkes Paces Heat in
2:06¼. Oveta Wins 2:14 Trot.

What is termed a record breaking crowd has never attended an opening day of the Pacific Coast Trotting Horse Breeders' Association's annual meeting, but there was a larger first day crowd than usual when Starter Ed R. Smith went into the judges' stand at the famous Santa Rosa Stock Farm track on Wednesday afternoon of this week and rang the bell for the horses in the first race of the association's nineteenth annual program. The grandstand was comfortably filled, while there were about a hundred occupied rigs of all descriptions in the infield, and on the lawn around the pool-box was quite a crowd of speculators backing their choices in the two trotting and one pacing events that made up the day's card.

In the judges' stand Director Robert Brown of Petaluma and F. J. Kilpatrick and T. J. Crowley of San Francisco watched the races closely and rendered their decisions as to the order in which the horses finished in the different heats. In the timers' stand were Payne Shafter of Olema, W. H. Lumsden of Santa Rosa and Jos. Cuicello of Pleasanton, all experts with the watch.

President E. P. Heald and Secretary F. W. Kelley looked after the details and saw that all positions were filled. At the distance post Thos. Bonner of San Francisco officiated.

The day was perfect in temperature, the sun shining brightly, but there was a breeze that while pleasant to the occupants of the grandstand, was a little too strong for the horses to show their best form.

Frank S. Turner, manager of the Santa Rosa Stock Farm, had put his best efforts on the track, and it was like a billiard table. Not a driver found fault with it, and even those who caught the flag during the day (and there were several) did not offer as an excuse that the horses did not like the footing.

Guy Dillon, Frank Turner's grandly bred son of Sidney Dillon, was given a mark of 2:23¼ before the races began. He trotted his mile well within himself and with work will be able to lower this mark several seconds this year. His dam is By Guy by Guy Wilkes, grandam of the \$10,000 mare By By by Nutwood.

Before the first race, the 2:14 class trot, was called Louis Stock's mare Oveta by Caution, had the call in the pools, her race at Pleasanton entitling her to that honor, North Star, Vallejo Girl, Marvin Wilkes and Queer Knight being fancied in the order given. North Star drew the pole, with Vallejo Girl in second place and Oveta third. When they were given the word in the first heat Vallejo Girl and North Star went out in front and there was a race between them to the half, where the mare took the lead and led the gelding until the far turn, where she broke, and Whitehead took North Star to the front. But here Mastin brought Marvin up and he outbrushed them all to the wire, North Star hanging on well, but he could not stall off the rush of the Don Marvin stallion, who won by over a length, North Star second, Oveta third, Vallejo Girl, who made another break in the stretch, fourth and Queer Knight distanced. The time was 2:12½, a new record for Marvin Wilkes.

Oveta still remained favorite for the race. In the second heat North Star took the lead at the first turn, and as those behind him indulged in more or less breaking, he maintained the lead throughout the mile, finishing it in 2:12¼, a reduction of over a second in his record, and finishing in a manner that led many to think he would get first money. He was tired, however, and the heat, which was the fastest made by the trotters during the day, took a lot out of him. Vallejo Girl trotted a better heat this time and finished second, Marvin Wilkes third and Oveta, the favorite, last, owing to two breaks during the mile.

The backers of Oveta, banking on her gameness and speed, still put their money in the pool-box at even money, relying on her being steady after two miles, and they were not disappointed. When the word was given them Davey took Vallejo Girl to the front at the first turn. North Star following her closely in second position. As the horses rounded the far turn Ward had Oveta in third position about four lengths back of the leader. He held her there until well into the stretch, when with a well timed and masterly drive he brought his mare up at a high rate of speed, and holding her level passed the others at the distance flag and won the heat in 2:12¼.

In the fourth heat Vallejo Girl took the lead at the first turn, when Oveta made a break, and North Star, coming immediately behind her, had to be taken back. Marvin Wilkes went up to Vallejo Girl, but made a break and dropped back to last. Vallejo Girl held the lead to the stretch, but Oveta, having settled, trotted the last quarter very fast and won from Vallejo Girl in 2:13¼. Oveta was now made a prohibitive favorite and took the fifth and final heat and the race. Second money went to North Star and third to Marvin Wilkes.

The California Stake of \$2,000 for 2:24 class trot-

ters also went the full five heats before a decision was reached. Will Durfee's horse Dredge was made favorite at \$10, to \$4 for Era, \$4 for Berta Mac and four others in the field at \$4. Dredge was clearly not in condition. He made repeated breaks during the race and in scoring, and the talent soon shifted to Berta Mac as the favorite, but were wrong again, as the Zombro mare Era, owned by William Morgan of Pasadena and splendidly driven by F. Williams, won, after Berta Mac had taken two heats.

The first and second heats of this race were very much alike. Berta Mac took the lead at the start, with Era second and these two maintained these positions, Berta Mac winning both so handily that nearly every spectator conceded her the race. The first heat was in 2:14½ and the time of the second was announced as 2:13¼, but one of the timers and nearly all the outsiders caught it a full second faster. In the stretch, during the second heat, Williams made a strong effort to land Era in front. She was about two lengths behind the McKinney mare at the distance pole and came with a sudden rush that was a little too late, as Helman tapped his mare and she let out an extra link, reaching the wire half a length in front.

The third heat was a contest between Berta Mac and Era, and condition told. Berta Mac threw a curb about two months ago, and lost four weeks work, consequently she is still short and not up to a long race. She is game, however, and but for an unfortunate break in the third heat, would probably have won the stake. She and Era are very closely matched in speed, however, and whenever one makes a break in a heat the other will win. Era took the third, fourth and fifth heats, the time dropping back from 2:12½ in the third to 2:17½ in the last heat. Fresno Girl, a winner in this class at Salinas, acted badly in scoring, but showed a great deal of speed, coming from the half home in 1:05 in the second heat. She took fourth money, Dredge getting third. Yosemite, a grand looking stallion, but very short of work and not up to a race of this kind, was distanced in the second heat. With proper preparation he should trot as fast as the best time made in this race. Kinney Rose, a horse that has shown miles below 2:14 in his work, was in company for the first time in his life. He acted well, but the game was new to him and he should do better later on. He finished second in the last heat.

The last race of the day brought out a field of seven pacers in the 2:12 class, and James Marshall's little mare Mona Wilkes by Demonio set the pace so fast that more than half the starters were distanced before the three heats were over. Queen Pomona was made favorite on her Pleasanton race, when she caught Mona Wilkes a little short and led her to the wire in 2:08¾, but Mona was all right Wednesday and made all the others dizzy the first heat in 2:06½. Mandolin caught the flag in this heat. Queen Pomona was second and Jonesa Basler third.

In the second heat Mona Wilkes had plenty more of the same kind of speed to show, but it only took 2:07½ to win, with the Queen again second and Jonesa Basler distanced. The third heat was slow, 2:10½, but Queen Pomona and Friday both caught sight of the anarchistic emblem and there were but three horses to draw money, Lohengrin getting second money and Mollie Button third. First and fourth went to Mona Wilkes:

SUCCESSFUL SALE.

Oakwood Park Horses Bring Good Prices at Chase's Pavilion.

The largest crowd ever seen in the big pavilion of Fred H. Chase & Co., at 478 Valencia street, this city, filled every seat and crowded into the sales ring until there was scarcely room to show the horses on Monday night last. Ed R. Smith of Los Angeles made the announcements and W. Higginbottom acted as auctioneer, while the well known dealer, E. Stewart, who had purchased the entire consignment from Oakwood Park Farm, and paid a fair price for them, had the satisfaction of seeing the horses sold at figures that netted him a neat profit, and showed that his estimate of the horse market in this city is a correct one. Buyers were present from all parts of the Coast, and the bidding was lively. Some rare good bargains were picked up, and as is always the case, some of the animals brought all they were worth.

While the majority of the horses offered were trotting bred, there were quite a number out of Cleveland Bay mares, and some whose breeding was unknown or doubtful. The highest priced animal of the sale was a five-year-old sister to Don Derby 2:04½, and Diablo 2:09¼, being one of the family of the great broodmare Bertha. After spirited bidding she was sold to Ben Chaboya for \$1,200. Chaboya was acting for Mr. Humpbreds, manager of Oakwood Park Farm, and the mare was returned there. She is said to be very speedy and will be trained.

The market for trotting bred horses is in good shape on this Coast at the present time. Following is a summary of the sale:

Three-Year-Olds.

Chestnut gelding by Chas. Derby, dam Slight by Electioneer; Sam Watkins of Los Angeles, \$225.
Brown gelding by Searchlight, dam Celia Derby by Chas. Derby; W. Wallace, San Francisco, \$200.

Sadie, b f by Al Collins, dam Saily; F. X. Latulipe, \$175.
Brown gelding by Chas. Derby, dam Clara by Bucaneer; F. Kilpatrick, \$175.
Gadabout, ch f by Chas. Derby, dam Susie Mambrino by Mambrino Boy; Koford Bros., Oakland, \$190.
Bira, b f by Stam B., dam Eira by El Benton; A. A. Mahan, \$240.
Bay gelding by Chas. Derby, dam Caroline; C. Nonnerman, \$155.
Hiawatha, b f by Stam B., dam Haunani by Chas. Derby; A. Jose, \$200.
Brown gelding by Chas. Derby, dam Tone by Ferguson; E. Mazal, Sacramento, \$120.
Clariet, b f by Chas. Derby, dam Cleveland Bay mare; Sam Price, \$140.

Four, Five and Six-Year-Olds.

Chestnut colt (4) by Owyhee, dam Proserpina by Diablo; C. Harris, Santa Barbara, \$300.
Rhapsode, b m (5) by Chas. Derby, dam Tone by Ferguson; J. G. Taylor, Reno, Nev., \$400.
Bowy, b m (5) by Chas. Derby, dam Bertha by Alcantara; Ben Chaboya, \$1,200.
Addie, b m (6) by Chas. Derby, dam Addie Ash by Indianapolis; W. Nolan, San Francisco, \$395.

Broodmares and Roadsters.

Susie Mambrino, br m, foaled 1892, by Mambrino Boy, dam by Simmons; J. Schussler, \$95.
Nakoora, b m, foaled 1895, by Chas. Derby, dam by Simmons; J. G. Taylor, Reno, Nev., \$135.
Lydia Bright, b m, foaled 1885, by Triumver, dam by John Bright; A. Jacobs, \$70.
Babe Marion 2:17½, b m, foaled 1892, by Steinway, dam Ida Wood by Simmons; Von Soostan Bros., \$225.
Lucy E., blk m, foaled 1885, by Black Walnut, dam by Enfield; A. Jacobs, \$70.
Vinca, b m, foaled 1892, by Steinway, dam Lydia Bright; E. Richford, \$160.
May, b m, foaled 1885, by Anteo, dam by Capt. Webster; E. Levin, \$65.
Essie Farley, b m, foaled 1891, by Mountain Boy, dam Madonna by Cassius M. Clay Jr.; J. G. Taylor, \$110.
Catherine, b m, foaled 1900, by Duke, Cleveland Bay; J. Loherty, \$225.
Lily, ch m, thoroughbred by Major Ban; W. Fry, \$50.
Eira, b m, foaled 1897, by El Benton, dam Neva by Steinway; J. G. Taylor, \$225.
Miss Galety, b m, foaled 1898, by Rohab, dam Etna G. by Guy Wilkes; J. G. Taylor, \$100.
Simpson, b m, breeding not known; M. S. Congdon, \$115.
Bella Direct, b m, foaled 1901, by Direct, dam Bella II. by Nutwood; J. G. Taylor, \$400.
Lady H., b m; J. G. Frawley, \$90.
Mountain Girl, b m, foaled 1899, by Duke, Cleveland Bay; A. Jose, \$105.
Pete Chalmers, br s, foaled 1902, by Gossiper 2:14¾, dam Maple Leaf by Adrian; C. Harris, Santa Barbara, \$350.
Brown mare and gelding, team, (5); Dr. Corcoran, Presidio, \$320.
Pbaro, b g (7); R. Julian, \$240.
Brown gelding (5); Dr. Corcoran, \$150.
Pair geldings (5); N. Meek, Healdsburg, \$425.
Gray gelding (5); J. Kirk, Oakland, \$175.
Pair mares 6-9; J. Cain, \$325.

RACE MEETING AT HOLLISTER.

The race meeting at Hollister will be held October 8th to 12th inclusive. For the five days the following is the race program:

1. Mixed, trotters or pacers, for horses owned and used as driving horses in San Benito county September 1, 1907. Horses must be without records, and must positively be driven by owners. Purse \$100.
2. Trotting, 2:24 class, for horses eligible September 1, 1907. Purse \$200.
3. Pacing, 2:30 class, for horses eligible September 1, 1907. Purse \$200.
4. Trotting, 2:16 class, for horses eligible September 1, 1907. Purse \$200.
5. Pacing, 2:15 class, for horses eligible September 1, 1907. Purse \$200.
6. Free-for-all trotting, purse \$300.
7. Free-for-all pacing, purse \$300.
8. Buggy horses, mixed, for horses owned in San Benito county September 1, 1907. For horses that have never beaten 2:20. Must be driven by owners. Purse \$100.

Three or more running races each day, all distances, all conditions.

Special saddle-horse races every day.

Grand wind-up novelty race for saddle-horses, mile and a quarter; money at every quarter.

Sweepstakes for saddle-horses owned in San Benito county September 1, 1907. Quarter of a mile and repeat for an elegant vaquero saddle.

Fine buggy barnes for the horse that can be driven nearest to 4 minutes.

Entries close September 8, 1907.

Entrance, 5 per cent of purse, 5 per cent additional from winners. Four moneys.

All harness races to rules of National Trotting Association. No entry received without being accompanied by money.

Running, to rules State Agricultural Society.

TO RACE AT VALLEJO.

The San Francisco Driving Club has secured the mile track at Vallejo for races to be held on Monday, September 2d, which is Labor Day, and Monday, September 9th, Admission Day. As both are legal holidays the club members will all be able to attend, and a large crowd of Vallejo people will also be attracted. A committee consisting of M. M. Donnelly, Tom Corcoran, George Giannini, Jos. McTigue and Luke Marisch are now at work on programs for the two days. Entries closed on Thursday night of this week, and the horses will be classified two days before each meeting.

Luke Marisch, owner of Little Dick, and Chas. Le-carl, owner of Charley J., have put up forfeit for a match race on the opening day, and as their horses are closely matched in speed, a hot race is certain.

The San Francisco Driving Club is one of the most enterprising clubs in California, and while it is not strictly an amateur organization, inasmuch as the races are generally for purses, it has held many good meetings and excellent racing. There is great rivalry amongst the members, and while it is of a friendly nature, the contests are very keen.

CALIFORNIA MARE SOLD FOR \$10,000.

The engraving on our title page this week is from a photograph of the mare Perfection, taken at Pleasanton last May, a few days before she was shipped East by Chas. De Ryder. Mr. De Ryder knew then that she was a very high class mare, and with that good business sense that has made him successful, considered she was too valuable a mare for a poor man to keep, provided he could sell her for a good price. He thought she would be worth \$10,000 to some one, and stated that when he could get that figure for her he would let her go. Volunteer, of the Horse Review, in his "Seen and Heard at Cleveland" relates the story of her sale as follows:

"During the early Grand Circuit meetings the workouts are only second in interest, to the 'Circuiters,' to the racing itself. Those at Cleveland were in several instances sensational, and one was exceptionally so.

"On Tuesday morning Cbarley De Ryder brought out his green trotting mare Perfection, and, after several slow miles, set her down for a sizzling one. With a runner to prompt or she went to the quarter in 32 seconds, to the half in 1:04, to the three-quarters in 1:35 and finished in 2:06 2-5. This was the time caught by the writer, who stood directly under the wire, also that of Mr. W. B. Dickerman, the owner of Bellini 2:13¾, who stood beside him, while 'Doc' Tanner's watch showed 2:06¾. Probably a score of timers were held on the mile and none caught it slower than 2:06¾, De Ryder's own stopped at 2:06¾.

"Within a few moments later the mare had become the property of Mr. George H. Estabrook of Denver. Previous to the mile he had been given an option on her for \$10,000 by De Ryder, and he immediately tendered the latter a check for that sum. There is no doubt whatever that it cost De Ryder at least \$5,000 to keep his word. The mile created a perfect furore all about the track, and several horsemen, including M. E. McHenry, Walter Cox and others endeavored to buy her. James Farley of Plattsburg, N. Y., later offered \$14,000 for her, but was informed by Mr. Estabrook that she was not for sale at any price. To show what she had left after her great mile, Perfection was brought out a half hour later, and, with Ed Hall, the Estabrook trainer up behind her, she finished the last quarter of a slow mile in 29¾ seconds.

"Previous to this trial Perfection had never been but one mile in 2:10 or better. At Libertyville, two weeks before, she had shown 2:09¾. Mr. Estabrook intends to pursue the policy of De Ryder with her. She will be carried along by Hall the rest of the season and conservatively trained, and will not be started until next year, when she will be a candidate for the M. and M. and all the other great stakes.

"It is conceded by all who have seen her that Perfection is one of the greatest trotters ever foaled. She has never made a break in her life, and no other trotter, so far as is known, has ever shown so fast a mile with so little training. Her action is remarkable, and her stroke in front is pronounced by critics of gait to be nearer that of Lou Dillon than any other trotter's yet seen."

MATINEE RACING AT SANTA ANA.

Nearly a thousand people turned out to see the first matinee racing given under the auspices of the Orange County Driving Club at the Santa Ana track on Wednesday afternoon, August 7th. Seven races were pulled off and there were several close and exciting finishes. This was especially true of the 2:20 class mixed race. Only the judges could separate Rancho del Paso and Little Billy in one heat, the first being declared the winner by a hand breadth. The summaries:

The 2:50 pace—Flash, owned by Frank Thomas, won in 2:44 and 2:56. In the second heat Henry Belt's Maggie was first in 2:40.

The 2:35 pace—Ora Bell, W. T. Hammer, won in 2:22½, 2:21.

Mixed—Rancho Del Paso, L. J. Christopher, won in 2:19, 2:21½. Pisner's Little Billy got a first in 2:21½.

Orange Road race—Pelee, R. A. Tucker, won in 2:46 and 2:45. E. T. Parker's Owen second.

The 2:25 trot—Lucy M., Wm. Manskie, won in 2:24, 2:25.

The 2:30 trot—Tom McKenney, Peter Beaty, won in 2:42.

The 2:35 trot—Eli O., R. Fuller, won in 2:31, 2:25.

FARMERS' INSTITUTES.

Farmers' institutes will be conducted at Pacific Grove on August 20th and 21st, and at Capitola on the 23d and 24th. Professor W. T. Clarke, superintendent of University Extension in Agriculture; Professor F. T. Bioletti, Viticulturist of the Experiment Station at Berkeley; Dr. C. M. Haring of the Veterinary Department, and Mr. C. Westergaard, Expert in Farm Mechanics, will be in attendance. Mr. W. H. Volck, a former student of the University of California, and now Entomologist for Monterey and Santa Cruz counties, will co-operate with the staff from Berkeley. Far reaching results are looked for, inasmuch as the attendance will be made up largely of visitors gathered temporarily at these sea-side resorts.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

END OF BUFFALO MEETING.

Charley Belden Gets Second Money in Race Won by Lillian R.

Buffalo, August 8.—Ed Geers won two races and got third money in another race at Kenilworth Park this afternoon. The feature of the day's card was the 2:05 pace, valued at \$1,000. Blacklock did not start and Ardelle, driven by the veteran, went to the wire a hot favorite.

She rewarded her owners by winning in straight heats. The best time was made in the last heat, when Cox, driving Nervola, forced Ardelle to pace a mile in 2:05¼.

Wilkes Heart won the 2:12 trot, taking the race in straight heats, while Berico, the favorite, got second money. Byron Kay, driven by Geers, won the 2:18 pace rather easily, although Geers had to stall off Judge Wilson. Byron Kay stepped the last mile in 2:08¼.

Major Delmar 2:01¼, the fastest trotter in training, will start at the Grand Circuit meeting at Poughkeepsie next week. He is to go an exhibition mile against time.

The horse worked a mile a few days ago in 2:04¼, which is faster than any trotter has shown this season. William Bradley, who owns him, will start his bay trotter George G. 2:05½ in the 2:06 race on Monday. Summaries:

Pacing, 2:05 class, purse \$1,000—
 Ardelle, br m by J. H. L. Lady Yisser (Geers) 1 1 1
 Nervola, b h by Colbert-Nellie D. (Cox).... 4 2 2
 Cascade, br g (Davis) 2 4 4
 Hal C., ch g (Shank) 3 3 3
 Eudora, Custer and Texas Rooker started.
 Time—2:07¼, 2:05¼, 2:05¼.

Trotting, 2:12 class, purse \$1,000—
 Wilkes Heart, b g by Great Heart-Badly (Estelle) 1 1 1
 Berico, br g by Palatka-Myra (E. Smith).... 2 2 3
 Tempus Fugit, ch g (Geers) 3 3 2
 Macdougall, ch g (Lasselle) 6 4 5
 Paul Kruger, Billy B., The Pacelot, Fedora's Athol, Mary Earl, Príncipe and India started.
 Time—2:09¼, 2:09¼, 2:09¼.

Pacing, 2:18 class, purse \$1,000—
 Byron Kay, by Graystone-Mambrino (Geers) 1 1 1
 Arrow, b g by Argot Wilkes (Cox) 6 2 3
 Queen Walnut, b m (Taylor) 2 4 6
 Judge Wilson, b g (Spencer) 4 6 2
 Black Dart, Idol Star, Moise L., Clementine and John Elder started.
 Time—2:10½, 2:09½, 2:08¾.

Buffalo, August 9.—The Grand Circuit meeting closed this afternoon with hotly contested races. Big fields faced the starter in two events and it took four heats to decide the winners. In the 2:09 trot Charley Belden was second to the fast mare Lillian R. 2:06¾, the only other contestant being Col. Patrick, who was distanced the second heat, which was trotted in 2:08. Lotta (formerly Lady Thistle) won the first heat of the 2:15 trot. She was beaten by Margaret O. in a hot drive down the stretch in the second heat, but took the next two. In scoring for the second heat in this race George Ahrens, driven by Geers, broke a small bone in the foreleg and was withdrawn. Summaries:

Trotting, 2:09 class, purse \$1,000—
 Lillian R., b m by J. R. -Letitia (McDevitt) .. 1 1 1
 Charley Belden, br g by Lynwood W. (De-Ryder) 3 2 2
 Colonel Patrick, b s (Payne) 2 d
 Time—2:14½, 2:08, 2:11.

Pacing, 2:03 class, purse \$1,000—
 Tommy H., b g by Delmarch-Red Queen (Nuckols) 6 1 4 1
 Grand Elder, b g by Box Elder (Hendrick) 5 5 1 2
 Miss Jones, blk m (Valentine) 1 3 7 5
 Miss Abdel, b m (Starr) 2 3 2 3
 Village Boy, Red Jacket, Miss Winifred, Nellie and Foeman started.
 Time—2:09¼, 2:07¼, 2:08½, 2:08.

Trotting, 2:15 class, purse \$1,000—
 Lotta, blk m by Guy Thistle (McHenry) .. 1 2 1 1
 Margaret O., b m by Onward (Davis).... 9 1 8 2
 Thornfield, b h (Benyon) 2 4 2 3
 Marechal, b h (Cox) 7 5 3 4
 Henry S., Tokio, Irene's Flower, Dossie Wilks, Magic Chimes, Silver and George Ahrens started.
 Time—2:09¼, 2:08½, 2:11, 2:09¼.

STOCK BREEDING FARM AT PALO ALTO.

A report comes from Palo Alto that the famous trotting horse breeding farm established by the late Senator Stanford, and which has been put to little use since all the trotting bred stock was disposed of, is now to be devoted to the breeding of draft horses, cattle and sheep. It is said that the raising of farm stock will be gone into extensively and that an employe of the estate has been in the East for some time selecting the animals for the purpose. The estate still owns the magnificent large trotting hrd stallion McKena, that is by the great McKinney 2:11¼, from the fast trotting mare Helena 2:11¼ by Electioneer, and has been standing him for public service for the past few years.

Drink Jackson's Napa Soda. It means health.

SONOMA GIRL AT BUFFALO.

The money in the \$10,000 stake for 2:10 trotters at Buffalo is tied up, a protest having been filed against the decision of the judges in allowing Sonoma Girl to start in the fourth heat. Mr. Springer and his mare had a lot of trouble in the race. In scoring for the first heat Starter Newton seemed to have no control over the drivers, according to a Buffalo paper, and the horses scored until everybody got tired. When they finally got the word, Sonoma Girl was not going square and made a break going round the first turn, something she had never done before when at speed. Mr. Springer took her back to a standstill, and when she squared away was at least an eighth of a mile behind all the others. The mare trotted the middle half in 1:02 from this standing start and finished well inside the flag, the heat going to the chestnut gelding Watson in 2:09¼. The next heat the word was given at the first score. Sonoma Girl was in third position by the time the first turn was reached, and on entering the hack stretch went by the leaders as if they were tied and reached the half-mile pole in 1:00¼. Here Mr. Springer pulled her up and she was down to an ordinary jog at the finish in 2:07¼, with Mr. Springer looking back and seeing that all were inside the flag. In the third heat, just as she was rounding the first turn, Sonoma Girl made a break. Springer started to take her back, and Chas. De Ryder, who was directly behind him with Athasham, having been second the previous heat, struck Springer's sulky with his own and threw him out. The mare made a few plunges and then ran on around the track, but was caught at the head of the stretch and was unhurt. Springer jumped to his feet and waved his hand to his wife and daughter who were sitting in the grandstand to show he was unhurt, and went after his mare. The judges considered the accident an unavoidable one and permitted Sonoma Girl to start again. She won the fourth and final heat as she pleased in 2:10¼, after going to the half in 1:02¾ and jogging the rest of the way. The protest filed against the decision of the judges in the race is based on the claim that the mare broke and swerved into the fence before De Ryder's sulky wheel struck Springer's vehicle, and the protestants say Sonoma Girl had lost all chances of winning the heat before De Ryder's horse collided with her. In nearly all such cases, however, the Board of Appeals have generally held that the judges are in the best position to know whether the accident is unavoidable or not, and consequently are better able to decide the case than members of the Board. If the protestants follow up their case the money will be tied up until December, at least. Mr. Springer gives as the reason for Sonoma Girl's unsteadiness in this race the fact that she was short of work. He has not been giving her much work between races since she started on the Circuit, but says from this on she shall have plenty of it. If the breaks she made at Buffalo were the result of her being short, she must certainly be a glutton for work, as the number of fast heats she has gone in her races thus far should be enough to take the wire-edge off most any horse.

Mr. Springer says it is not true that his sulky collided with the fence before De Ryder ran into him, and that Mr. De Ryder will make affidavit to it. Springer is confident the Board of Appeals and Board of Review will both sustain the ruling of the judges in permitting him to start his mare in the heat following the accident, and a majority of horsemen believe with Mr. Springer.

Many Eastern horsemen are predicting that Highball will be in condition to defeat Sonoma Girl when they reach Readville, as they believe Highball can beat any trotter that breaks or makes any mistakes. Perhaps he can, but he is just as apt to make mistakes as she, and as his feet and legs are not perfect by any means, he may get off on the wrong foot at any time. Sonoma Girl is liable to be beaten, of course, but we think she outclasses Highball just a little.

Outside of Mr. Springer himself the one man who can say "I told you so" when discussing Sonoma Girl and prove it by the records is C. C. Crippen, who now has charge of Budd Doble's great horse Kinney Lou 2:07¼ at Indianapolis. In June, 1904, Mr. Crippen wrote an article for the Breeder and Sportsman, which was printed in its columns, in which he gave his opinion of Sonoma Girl, and predicted many things about her which have since come true. Mr. Crippen wrote just what he thought about the mare and we are sorry our files for that year are not accessible at present so that we might reprint the article.

Athasham must have been a pretty good horse in the second heat of this race, which Sonoma Girl won in 2:07¼, as he was second, with five others behind him, and all inside the distance. He is said to have trotted this heat in 2:08½. He was sixth the first heat in 2:09¼ and fifth the third heat in 2:13¼. In the fourth and last heat he finished third. A strange thing is that Athasham, Emboy and Lady Resolute stood exactly the same in the final summary and divided fourth money, giving each less than his entrance money back. Athasham was 6-2-5-3, Emboy 2-5-3-6, and Lady Resolute 3-6-2-5.

MONTEREY FAIR PREMIUMS.

The award of premiums for horses shown at the Monterey Agricultural Association's fair at Salinas last month was as follows:

Standard Trotters.

Best stallion two years old and over, W. Parson's Albert Mack by McKinney 2:11¼.
 Best stallion one year old, J. B. Iverson's Corona by Coronado 2:09¼.
 Best mare three years old and over, C. A. Storm's Lady S.
 Best mare two years old, C. A. Storm's Jessie.
 Best suckling colt, J. B. Iverson's Ivoneer's colt by Nutwood Wilkes.
 Best mare four years old and over with colt, J. B. Iverson's Ivoneer and colt by Nutwood Wilkes.
 Best gelding, J. B. Iverson's North Star 2:13¼.

Horses for all Purposes.

Best stallion three years old and over, Salinas Valley Coach Horse Company's Centurion.

Draft Horses, Standard Bred.

Best stallion three years old and over, J. J. McGrury's Xenophon.
 Best stallion, with five of his colts, J. H. Freese's Stephen and five colts.
 Best stallion one year old, Alex Bordges' Kid.
 Best suckling colt, J. B. Iverson's Susie's colt.
 Best mare three years old and over, J. J. Hebron's Dollie.

Graded Draft.

Best mare one year old, J. J. McGrury's Fannie.

Carriage Horses.

Best span of carriage horses owned and used by one man, J. B. Stirling's Rob Roy and Betsy Baker.
 Best buggy horse, Henry Storm's Star.
 Best saddle horse, C. T. Hewitt's Prince Arthur.

Sweepstakes.

Best stallion, with four of his colts, J. J. McGrury's Xenophon and four colts colts.
 Best mare, with four of her colts, C. A. Storm's Maggie May and four colts.
 Best stallion of any breed or age, Salinas Valley Coach Horse Company's Centurion.
 Second best stallion of any breed or age, Robert Garside's Jimmie S.
 Best mare of any breed or age, J. B. Iverson's Thelma.
 Second best mare of any breed or age, C. A. Storm's Lady S.
 Best gelding of any breed or age, J. J. McGrury's Cap.
 Best colt of any breed foaled in 1907, J. B. Iverson's Ivoneer's colt.
 The Sweepstakes Committee recommended that a special premium be given to Paul Bianchi's imported French Percheron draft stallion Caesar, a misunderstanding occurring touching the matter of his entrance.
 Also, because of creditable showing the committee recommended that special premiums be awarded (1) to C. Whitehead's Delphi, and (2) to Robert Garside's Jimmie S.

SHORTHORNS AND BERKSHIRES AT AUCTION.

The auction sale of Judge Carroll Cook's Shorthorn cattle and Berkshire swine at the California State Fair, September 14th, promises to be the stock event of the year.

Forty high class bulls, cows, heifers and calves, as well as twenty head of registered Berkshire swine (boars, sows and gilts) will be sold at public auction.

This will be the greatest offering that the breeders and farmers of the Pacific Coast have ever had the privilege of attending. A grand lot of young bulls and heifers!

Among those offered will be the get of Ramsden Lad 203772, King Spicy 129279, Non Pariel King 192871, Noble Knight 188106, Royal Scott 197639, Nominee 131262, Color Bearer 127045 and Blythe Victor 140609.

Those who attend this sale can find stock to suit all tastes, both in Shorthorns and Berkshires. Those who cannot attend the sale may write to the Secretary of the State Agricultural Society, who will see that their commissions are placed in the hands of responsible breeders, who will represent and bid for them.

This is the first annual sale to be held at the California State Fair, and is designed to create an annual market for breeders and farmers. All such should endeavor to make it a success.

There has been no culling for this sale; prize winners will be sold as well as many tried breeding animals.

The pacing mare Alice Pointer, who won at Cleveland so impressively, and again at Buffalo in the \$10,000 Dominion of Canada Stake, was bred at Two Minute Stock Farm, Cleveland, and is a well-bred mare, who should wind up the season with a faster record than she now has. She was sired by Star Pointer 1:59¼, out of Alice M., dam of Red Seal 2:10, Ballerton 2:17¼ and Allwood 2:17¼, by Mark Field 10177; second dam Bay Dell (dam of Veritas 2:16¼ and Vindex 2:29¼) by Advance 9981. Mark Field was a son of George Wilkes, out of McDonald's Mambrino, a son of Mambrino Chief. Advance was by Volunteer, out of a mare by Hector, grandam by Alexander W.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Breeders' Association (Santa Rosa).....	August 14-17
Petaluma	August 26-31
Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12
Santa Maria.....	October 22-26

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair)	September 23-28
Spokane, Wash. (Inter-State Fair).....	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

Grand Circuit Dates.

Readville	August 19-23
Providence	August 26-30
Hartford	September 2-6
Syracuse	September 9-13
Columbus	September 16-27

And still they come.

Moua Wilkes 2:06½, pacing.

She is by Demonio 2:11¼, own brother to Diablo 2:09¼.

Her dam, Trix, is bred like John A. McKerron 2:04½, as she is by Nutwood Wilkes out of a Director mare.

Trix is also the dam of Aeorlite 2:14¼, by Searchlight, for which \$7,500 has been offered, and has a weanling by Star Pointer, for which \$1,000 has been refused.

The mare and all her produce belong to James W. Marshall of Dixon.

The Santa Rosa track is in perfect condition. Frank Turner has done himself proud in its preparation for the races.

Visitors to Santa Rosa are surprised at the progress made in rebuilding the town. In a year it will be the best built town of its size on the Coast.

Five new 2:10 pacers since the California Circuit opened, and all bred in this State.

The first day at Santa Rosa furnished three new 2:15 trotters.

California has added four new names to McKinney's list of 2:15 trotters this year so far, and there's more coming.

The fine picture of Sir John S. 2:06¼, which appeared in this paper last week and also in the San Francisco Call of Thursday, was made from a small kodak picture of the horse taken by Mrs. Vance, wife of the owner of the great pacer.

Petaluma harness races open on Monday, August 26th. There will be a special train to Petaluma every day, leaving here at 11 A. M. and returning after the races.

Pilot, the pacer that started in the 2:20 pace at Pleasanton, was given in the summaries as by Comet Wilkes. He is by Abbottsford Jr., and was drawn after the fourth heat, and not distanced.

Mr. E. Stewart, the well known horse dealer of this city, has purchased the entire crop of yearlings on the Oakwood Park Stock Farm, and will have them especially prepared for sale this winter. They are a grandly bred lot of youngsters.

Mr. A. C. Stevens of Woodland will do the starting at the meeting which opens there September 4th. Mr. Stevens has often occupied this position and has done good work.

There should be fast racing every day at the Woodland meeting. The track is better than it ever has been before.

Don't forget to look over the Phoenix, Ariz., program. Entries close September 15th. There are twelve purses of \$1,000 each and two of \$1,500 each.

J. W. Brooks, manager of Ascot Park, Los Angeles, says there will be no racing there this winter.

Enter on the Central California Circuit. Entries close Monday next. See full program in this issue.

Thos. A. Carroll of 134 West Santa Clara street, San Jose, offers for sale a five-year-old McKinney mare that acts like a high class trotter. See advertisement.

Sonoma Girl was barred in the betting at Buffalo, and Watson was installed the favorite, and won for those who backed him to beat everything but the California mare.

After Custer was distanced at Cleveland, Ed. Hall put a set of hopples on him for the first time, hitched him to a cart and stepped him a mile in 2:06, the last half in 1:02. The second harness will probably be a fixture with him in the future.

The Grand Circuit horses are at Poughkeepsie this week, but the telegrapher's strike has prevented the Associated Press sending reports.

Kinney's bikes are winning the races on the California Circuit. They are money getters.

Guy Thistle, the sire of Lotta 2:09¼, is out of Lillian Wilkes 2:17¾, the daughter of Guy Wilkes, who produced Guy Axworthy 2:08¾ and Lily Strange 2:15¼. Lillian Wilkes was out of Flora Langford, a mare by Langford, son of Williamson's Belmont. Flora Langford was a pacer and paced a trial mile in 2:24. She was the dam of Joe Arthurton 2:20½. Guy Thistle's sire was Thistle, son of Sidney and Fernleaf by Flaxtail.

Speculation is desirable, but it is not an actual necessity, a fact which the public is fast becoming aware of. The attendance here promises to be up to the best figures of the past. This is because the race-loving people are beginning to realize that it is the horses and not the speculators, who make the sport.—Frank G. Trott, in the Boston Globe.

Belle Bird, the three-year-old filly that won the three-year-old trot at Cleveland and Buffalo, is by Jay Time and not Jay Time. Jay Time is a son of Jay Bird out of a daughter of Constantine. Belle Bird's dam is Naucy Medium, a great broodmare by Bayonne Prince.

Lady Jones by Capt. McKinney is winning right along in the matinee races at Pittsburg, Pa. She generally trots around 2:15, pulling a wagon in these events. Her two winning heats on August 2nd were 2:15 and 2:16½.

Wilkes Guy, a winner over the East Liverpool, Ohio, half mile track last week in 2:21¼ is by Guy Wilkes and out of Lea 2:18¼, own sister to Sidney Dillon and Cupid 2:18.

Several California horses started at the Oil City, Pa. meeting July 23rd to 27th. Irvington Boy was 7-8-9 in a field of ten pacers, the fastest heat in 2:15¼. Rey del Diablo won second money in his race, but did not get a heat, which were from 2:11¼ to 2:13¼. Alto Down was second three times in the 2:19 trot and took third money. Best time 2:16¼.

The match race for \$500 a side between A. Hoffman's mare Kitty D. by Dictatus and George Gianini's bay gelding Geo. Perry by Waldstein came off over the three-quarter-mile track in Golden Gate Park last Sunday. The race was three-quarter-mile heats, best two in three, and was won handily by Geo. Perry in straight heats. The time was 1:40 for the first heat and 1:37½ for the second. The track was in good shape and the weather fine. W. J. Kenney acted as starter, while Albert Joseph, Geo. Erlin and Jos. McTigue were the judges. Tom Corcoran and Luke Marisch held the watches.

Shortly after the State Fair of 1906, Mr. J. Campbell of San Jose, representing J. Crouch and Sons of the Lafayette Stock Farm of Lafayette, Ind., visited Livermore to see what the chances were of selling a draft stallion in that vicinity. Mr. Campbell was informed that if he could furnish a high class stallion that he might be able to sell him. Mr. Campbell returned to San Jose and shipped to Livermore the imported Belgian stallion Trappiste, a horse that weighed 2,300 pounds and that had won the first prize at the St. Louis and Portland Expositions, as well as at the California State Fair. Trappiste met with such favor among the more progressive breeders of the Livermore Valley that twelve of them formed a company and bought him for \$3,600 and placed him in the stud, where he made a good season, although his service fee was placed at a high figure, and so far as can now be determined over \$0 per cent of the mares bred to him are believed to be safe in foal. The company owning the horse were so well pleased with him that they were getting ready to place him on exhibition at the coming State Fair, but Trappiste had won his last premium, for on Monday, August 5th, he took sick and died on the following day. The owners of the horse, as well as the breeders of Livermore Valley, feel the loss keenly, as they know they will look a long time before finding another Trappiste.

Carlokin 2:14¼, trotting, and Inferlotta 2:07¼, pacing, are both from the same dam—Carlotta Wilkes by Charley Wilkes. The old mare is in pasture on the infield at Santa Rosa track, where both horses are racing this week.

Mr. Geo. L. Warlow, a leading attorney of Fresno, has been elected president of the Fresno County Agricultural Society. Mr. Warlow is engaged in farming and stock raising and is the owner and breeder of many fine trotting horses. He owns the stallion Athadon, yearling record 2:27, and also bred Athasham 2:12, and many other good ones.

The Lodi Driving Club is a new organization. L. Durfee is president and A. Eddlemore the secretary. There are many good roadsters owned in Lodi and vicinity, and as the new club grows it is expected the speed contests, which are to be held weekly on the track east of the town, will be very interesting. In the near future a meet with the Stockton Driving Club will be arranged.

The race track located at Porterville, Cal., just west of the town, has been leased for a term of five years by James Berry and Henry Conner, who will spend several thousand dollars in improvements. A club-house and grandstand will be built and the track put in first class condition for training and racing. The promoters intend to conduct a first class place where clean sports of all kinds may be held.

The conditions at Pleasanton during the recent meeting were just right for fast time. The fields were generally small, the track was in good shape and the weather could not be improved upon, being warm and without wind.

California needs more small meetings every year, where purses are from \$200 to \$300. The half-mile rings in the East are the preparatory schools for the Grand Circuits. We need something of the same kind here.

King Entertainer has reduced his record to 2:10¼.

There was considerable criticism in the Eastern press of the starting at Detroit.

Mack Mack 2:08 now has a matinee wagon record of 2:10¾.

The fastest and the second fastest M. and M. records are held by Sonoma Girl 2:06¼ and Eleata 2:08¾, both California bred mares.

Portland, Oregon, will hold a horse show in November, this year, under the auspices of the Portland Hunt Club.

Cecilian 2:22, son of Electioneer, died at Mt. Pleasant, Iowa, on July 30th from rupture of a blood-vessel. He obtained his record as a two-year-old in 1891, to a high-wheeled sulky. He has sired eighteen standard performers.

Metallas 2:11 has been sold to Edwin Switzer of Budapest, Hungary, and was shipped via Hamburg on Saturday last. He is a very handsome black stallion, with wonderful speed, but was not a good actor in his races.

It is said that Thos. W. Lawson of Frenzied Finance fame has three yearlings by McKinney at Dreamworld that are most promising. Two are colts, one out of Belles Lettres, dam of Centrifc 2:09, and the other out of Dainty Daffo 2:13¼, while the filly is out of Emily 2:11.

A. C. Ruby of Pendleton, Oregon, the well known importer of draft horses, is on his way home from Europe with ninety-eight head of Percherons and other heavy breeds, of which he will exhibit forty head at the Oregon State Fair, September 16th to 21st.

Joe McGuire, who has trained for Geo. H. Estabrook of Denver for the past five years, parted company with his employer at Detroit. After the Cleveland meeting the Estabrook horses were turned over to Ed Hall, who also has the stable of J. C. Adams of Phoenix, Ariz.

Geers got the flag in his face three times in one day at Cleveland, but he won more money than any other driver at the meeting in spite of it. You can't keep a good man down.

Mr. I. B. Mosher, one of the owners of Zolahka, owns a colt by Hal B. 2:04½ out of Juliet D. 2:13¼ by McKinney 2:11¼, that is a very handsome and promising youngster. Juliet D. is the dam of Irish 2:08½.

Two notable world's records were established by Alice Pointer and Hidalgo last week. The former's 2:05½ is the fastest first winning heat ever won by a pacing mare, while the latter's 2:04¼ is the fastest ever won by a pacing gelding.

Lillian Wilkes 2:17¾ by Guy Wilkes is now the dam of a 2:10 trotter, Guy Axworthy (4) 2:08¾, and of Guy Thistle, sire of Lotta 2:09¼. Besides this another of her produce is Lilly Stranger 2:15¼, a mare that is expected to beat 2:10 this year.

Blacklock, with his new record of 2:04¼, is one of the season's crack pacers.

Sweet Marie's workout mile in 2:05½ is the fastest ever trotted in July.

The Fresno Fair will be worth attending this year. Besides an excellent racing program there is to be a fine display of this county's products.

Inferlotta worked the Santa Rosa track in 2:06½ the other day. She starts in the 2:20 pace there this afternoon.

Here's hoping the State Fair track will be put in good shape for the races. Plenty of water and work will make it fast, as it is the best laid out track in California.

Coronado 2:09¾ trotted the Santa Rosa track one day last week in 2:07½, a great performance. This is the fastest mile ever trotted by a stallion in California. Coronado will have a walk-over to-day in the 2:10 trot, as there is not one of the seven other horses entered that is in training, except Charlie T., and he is East, in De Ryder's string.

Sonamo Girl 2:06¼ and Sweet Marie 2:02 are both to start at the October meeting at Lima, O., the former in the 2:24 class for trotters, and the latter in an exhibition mile against time. If one of those Ohio thunder storms come up that day it is liable to rain oranges.

When Clem Beachey Jr. of Lexington, Ky., sold Reproachless 2:04¼ (then a green mare) to General Chisholm, there was a difference of \$500 between them, writes Marque in the Horse Review. In order to come together Clem said: "General, I will take off the \$500 if you will give me 25 per cent of the C. of C. purse, should she win it, and 10 per cent of all money she wins thereafter in 1907." To this the General consented, and now Clem is sitting back ready to grab a few dividends from the little black mare's efforts.

In the suit of Benjamin L. Tuft against the Salem, N. Y., Horse Show and Athletic Association last Friday, says the Trotter and pacer, Justice D. Harris Smith gave judgment for the complainant in the sum of \$100 and costs. The suit was for the recovery of \$100, which was posted by Tuft for a stake race at Salem on the fourth of July last. He named Bobolink 2:17¼, and had the mare placed in Trainer Foulk's hands, and on the day of the race the mare was brought on to the track, fifth position drawn and the starters all ready for the word, when Tuft was called to the stand and informed of a claim of \$138 against the mare for entrance fee at Louisville, Ky., in 1903, although the mare took her mark in 1904, the year Tuft purchased her of The Fasig, Tipton Co.

The Stable and Carriage Owners' Association of San Francisco held a meeting and smoker at headquarters, 841 Fulton street, last week. President J. J. Fagen was in the chair, and there was a very enjoyable time. The members all reported that everything is very harmonious between employers and employes at present and all generally prosperous.

Watson 2:07¼, in a winning race this year, was a good three-year-old, winning several races, taking a record of 2:24¼, and being much faster. He utterly failed as a four-year-old, and couldn't win a race for hearse horses. As a five-year-old he was all right again and closed the season with a record of 2:10¼. As a six-year-old last year he started ten times and did not win a heat. This year he is doing well again, and acting like a sure race horse. According to the dope he should he laid up next year.

A subscriber desires some information in regard to Belle Sevenoaks, a gray mare by John Sevenoaks. All we can learn from the Year Books about her is that she won a race at Eureka, Cal., in 1903, beating Young Monterey, Dewey W., and Jack Sibald. She is given in the Year Book as a trotter, but this is doubtless an error, as she is a pacer. Her winning heats in the race were 2:28¼, 2:32 and 2:31. She is a gray mare, but we do not know her age or any further particulars.

The well known sporting man, Joe Harvey, died in this city last week from pneumonia. He had an extensive acquaintance on this Coast, and was known as a square sport. He was interested in the Sausalito pool rooms and quite wealthy. Years ago when everything went at the fairs and race meetings in California Joe Harvey ran a wheel-of-fortune that was a gorgeous affair, and for the privilege of running which he paid a large sum to the associations. Visitors to the old Bay District track well remember this wheel. Harvey owned a few runners at one time, one of which the mare Wheel of Fortune won the Burns Handicap in 1896. His colors were green jacket, with a gold wheel embroidered on the back. Harvey was a native of Ireland, aged 51 years.

"STRAINED TENDONS."

Mr. Newell Green, proprietor of Lyon Stock Farm at Brushton, N. Y., writes as follows: "I have used QUINN'S OINTMENT for strained tendons and other enlargements for the past three years and it works to perfection. I recommend it to all horsemen, as I know it is all you advertise. This is the general verdict of horsemen from Maine to California. For curbs, splints, spavins, windpuffs and all bunches there is nothing better. Price One Dollar per bottle, delivered. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain from druggist.

John Caldwell 2:08½ was separately timed in the two heats of his race, the 2:09 trot at Cleveland, in 2:08 and 2:08¾—and yet he was unplaced.

Jack Curry says old Joe Patchen was the greatest pacer that the world ever saw, and proves it by the statement that he drove the famous old stallion three races over a half-mile track on three successive days and then moved to a mile track, where he went two races in the next two days. "Where," asks Mr. Curry, "is the pacer that can do such a thing now?" And we might add, "where is the owner who would allow his horse to be treated that way?"

In the eight pacing races at the Cleveland meeting not one hopped pacer won, although horses fitted with the Indiana pantalettes started in all of them.

Bell Bird 2:11¼, the three-year-old filly by Jay Time, out of Nancy Medium, is the best of her age that has yet shown on the Grand Circuit.

Rest, absolute rest is the best medicine for bad legs on a horse. Take the pacer Thornway by Steinway, for instance. He worked miles in 2:13 as a three-year-old and acquired a set of legs that were as liberally supplied with knots and excrescences as the trunk of a gnarly pine. He was given a rest for two years and got in such good shape that he has been winning recently on the Grand Circuit. At Detroit he won in straight heats and earned a new record of 2:06¼.

Angiola 2:06, the trotting mare that gained her record at Poughkeepsie last year when she beat Mainsheet, Turley, Tuna, Aristo, Kid Shay and Leonardo three straight heats, is said to be in better form than ever this year. Oscar Ames has been training her at Iron Mountain, Missouri, and drove her a mile recently in 2:04¼, with the last quarter in 29 seconds. As she has had a small earning capacity on account of her record, it is possible she may never race again, but her owner, W. H. Smolinger, may have her pointed for a reduced record and then put her to breeding.

Lou Mativia of Dixon bred forty-one mares to his stallion Alton this year, all after May 1st, when he stepped the Dixon half-mile track in 1:05. Mativia will race him next year and will end his season early.

The absence of hlinkers have a beneficial effect on Russian horses, says Col. F. A. Wellesley, formerly British military attaché in Russia, who states that it is an notorious fact that when horses in Russia get into difficulties they are much quieter and less subject to fright than with us. He has seen as many as four or six horses down at a time after a collision in the streets and lying in an almost undistinguishable mass; yet they remained perfectly quiet, although those who are helping them to move about among them, without any fear of being kicked. Though this sensible behavior of Russian horses is sometimes attributable to the climate, which is supposed to have a quieting effect on them, he explains it by the fact that the Russian horse always sees everything that is going on, and therefore treats with indifference things and noises that would otherwise frighten him, and when he gets into a scrape, he knows perfectly well what has occurred, and keeps quiet until people come to his aid.

Reproachless 2:06½, the winner of the Chamher of Commerce Stake at Detroit, has an interesting history, says an exchange. Bred by C. J. Hamlin at Village Farm, she was sold to a Kentucky farmer when two years old for almost a song. For two years she gave little promise of developing extreme speed. Last summer, in the hands of Clem Beachy, she developed sensational speed, going a mile in 2:08½. In April this year she was purchased by Gen. Chisholm of Cleveland, and while she made good progress in her training it was not expected that she would so soon prove the wonderful pacer that she is. Her breeding is the best. Her sire, Direct Hal 2:04¼, went through the Grand Circuit in the hands of Ed Geers and never met defeat, and her dam, Regent's Last, though she never obtained a record, was a mare of great speed, but broke down early in her career, and was put to breeding. Her grandam was the great broodmare Grandmother by Almont Jr., who derived her name from a singular performance. Twenty years ago a farmer just outside of East Aurora owned a mare that he thought so little of that he never gave her a name. She had a colt that was christened Jocko. He developed into a Grand Circuit performer. Thereupon Mr. Hamlin purchased the mare. The next year she was used to haul visitors around Village Farm. She showed so much speed that it was decided to train her. Geers took her in hand, and when it came time to race her and when it was necessary to name her, Mr. Hamlin said, "I saw this morning one of her granddaughters, and it was a fine filly, so we will race the mare under the name of Grandmother." The filly just born was the last of the get of Prince Regent 2:16, and was named Regent's Last. Regent's Last is now owned by Hugh Milam, superintendent of Johnson Farm, and is in foal to Directum Miller. Trainer Jimmy Timothy has a very promising two-year-old sister of Reproachless that he purchased of J. M. Johnson last spring.

TROTTING BRED COLTS.

Frank H. Briggs, a prominent Maine horseman, tells the Lewiston, Me., Journal that it is an indisputable fact that the colts that bring the highest prices in the market are the strongly bred trotting colts, that can go out and show speed. It is equally indisputable that a very small per cent of farmers, or for that matter, any other class of people, have the knowledge and ability to breed, train and market that product successfully. So that the proposition that is up to the farmer who wants to raise horses is to select that line of breeding adapted to his conditions and consistent with his ability to manage successfully.

The production of the gentleman's roadster from well established trotting families possessing finish, action and good disposition offers, in my judgment, a safe line of breeding and at the same time has possibilities of exceptionally good profit to those who are willing to study the breeding and give careful and thoughtful attention to the matters of growth and education. I recommend the trotting families advisedly, because certain families possess size and good disposition and the easiest and best action of any horses in the world, and besides they possess the additional qualifications of speed, which added to the other qualities increase the market value of the product in a marked degree.

But right here take warning by the experience of the past, and do not put the accent on speed, and for the sake of extreme speed overlook the essential qualities of size, action and disposition. The many duties of the farmer will not allow him, even if he had the natural qualifications, to pursue the development of speed. He can breed, grow up and educate a horse that will be marketable as a gentleman's roadster. The limits of this article will not permit anything like an exhaustive discussion of the whole subject, so with the general proposition in regard to breeding, select trotting families possessing size, action and good disposition, feed and handle properly and success will be achieved.

BADLY BEHAVED HORSES.

The number of badly behaved horses on the Eastern courses is a scandal. It has been steadily increasing for several years and has now reached the culminating point when something will absolutely have to be done. We may mince and minimize so much as we like, but there comes a crisis when the long suspended, the much too long suspended, official hand must fall. When this occurs the action is supposed to wipe the thickly studded bulletin slate clean and this may be the case, but it cannot wipe away the impression the long displayed hullets have made upon the mind of the racing public.

Comparatively a few years ago it was a most rare thing to see a horse led to the post. Last year it became so common with one stable the name of the owner with the medical "itis" added to it, was used in the public print to designate the practice. The culmination was reached when an owner asked permission to send the stable mate to the post also. It was expected the next request would be for a band of music a tin-can symphony, or something of that kind. This year there has not been so much of it, but, in expectation, one association has ruled that such "leading" must cost the owner a fine of ten dollars.

If ever there was a ridiculous, unpractical idea here it is. Such bought permission is the one bright star for the man with the "dope." Scores of horses have escaped simply because of the fear of not getting them to the post after "the money was down." Now a good, kind association renders this possible and, with the best intentions in the world, smooths the way to get the quadrupal drug store to the post. Of course this was not the purpose of the ruling, but the practical racing man who knows the darker as well as the lighter side will unhesitatingly endorse the above view.—Sports of the Times.

UNIVERSITY EXTENSION IN AGRICULTURE.

Excellent reading courses for home study are now provided by the Extension Department of the University College of Agriculture. Two such courses are offered at the present time, one in Economic Entomology and the other in Irrigation practice and Institutions. These courses may be looked upon as an outward growth of the farmers' institutes, and are designed to amplify and broaden the work of such meetings. Enrollment is hedged about by no difficulties. Anyone desiring to read up on the subjects offered, in a systematic way, may enroll and literature will be furnished free of cost, save transportation from and to Berkeley. The books and publications are chosen as representative of the best thought and study and experience on the questions at issue. Students using them have the privilege of consulting on different points members of the staff of the College of Agriculture at Berkeley, who are specialists in the various lines. University Extension teaching will thus be brought directly to the students' homes. During the year just ended 165 students have been enrolled in these courses. Thirty-seven counties of this State and four States beside California are represented. An analysis of the enrollment shows that 95 per cent of the students are directly interested in some form of Agricultural work—in other words, those to whom the courses are most profitable are registered.

SAN MATEO SHOW.

.: ROD, GUN AND KENNEL .:

CONDUCTED BY J. X. DeWITT

STEADY TO SHOT.

In the whole routine of a field dog's education there is one particular point—the lesson of steadiness to wing and shot should be striven for more seriously than many others, for there is nothing in the whole dog's susceptibility to the control of man in which he shines brighter as a dog of usefulness than on this one point. Also, there is no lesson that he has thoroughly learned which he is quicker to sidestep if chance or encouragement is offered. The latter is far often the case, and it is almost rare to find an amateur who has his dog perfectly and under all conditions steady to shot. Do not judge from this that it is an attempt to judge others' modes of training, but rather a censure for not carrying out your own methods fully.

Two-thirds of the dogs that break shot are brought to this condition by the handler's over-anxiety to get game. Either he becomes excited and rushes in himself when the bird falls, or else is anxious for fear of losing it that the dog should hunt the bird immediately when it drops to earth. Also there is the over-anxiousness of the dog, either to retrieve the bird or he is impatient to hunt covies.

Nothing is more beautiful to the artistic sense of the sportsman than to see his dog steady to shot in every instance, never trying to get out and hunt until the master gives the word of command and then he grasps the opportunity with alacrity. Many are in favor of the dog dropping to wing and shot; it is then a much easier task to keep the dog under restraint if he is taught to drop at the report of a gun. Two objections to this latter accomplishment have almost made the custom obsolete. One is that the dog in the lightest cover becomes unable to work his birds promptly and the other, dogs of nervous dispositions are inclined to shrink from the gun when the custom is persisted in. But the latter depends a great deal in the sportsman's judgment of his dog, and it is not likely he would persist in exacting obedience in this manner if he found that it caused shyness to the pupil.

To teach the dog to be steady to shot is easy if the ordinary force collars are used, teaching him first to drop well to command, then gradually leading him up to the gun as the command in place of the voice of the master. But if you are really anxious to teach your pupil to drop to shot, insist that it is done every time and the dog stays down until you order him out. Don't be satisfied when he obeys two times out of three and then permit your desire to get game to forget both your own and your dog's lesson the next time, for he is quick to grasp your omissions, as well as the other parts of his studies. About the only thing to further insist on on your part is never to let the youngster out to hunt dead until you have finished shooting. Remain still yourself and demand the same of him. Then you will not have the future to bother you in curing him of this despicable habit. It is more the preventative than the cure, and if you have gone about it in the right manner the force collar or the whip will not be considered such a necessary impediment in your dog's shooting. Do not take him in company with a dog that breaks in at every flush, or shot, for the temptation to imitate the example might be more than he can resist.

PRODUCE STAKES.

It is a peculiar commentary on the spirit of emulation that Produce Stakes as a rule do not appeal to the breeder, in more elegant term—they don't catch on worth a cent. How is this? May not the solution of the difficulty be found in the red tape that usually binds up these otherwise sporty propositions. This is a pity, but we presume in the nature of things cannot be helped. Probably the real reason is found in the answer a man made to me the other day when I asked if he had entered anything in a certain stake, the name of which need not be given. "Oh (opposite to heaven)!" he said, "who the dence can keep track of those payments. I've got two entered now in another stake that comes off sometime when the dons feel like it and I ought to make some payments sometime, but I've forgotten when, and I couldn't find that prospectus anywhere. Guess I'll have to write to — and find out."

Well, maybe he will and probably he won't, if he's like the usual busy amateur who does not turn his kennel business over to someone whose duty is to watch over just these trifles. There are not many of these, consequently there are not many entries in Produce Stakes.

Then again there is the uncertainty. You enter the bitch before the pups are whelped and then name the pups with particulars, and must do this in some cases before they are fourteen days old. Pups change a lot after that in some breeds, and then one has to notify the authorities and the pups must comply with this and that, until no wonder the breeder exclaims (opposite to heaven).

Then there is the club side. The club issues a prospectus, which is in every way a credit to the secretary and his ability for thinking

up impedimenta and details to be observed. And that usually ends it. It strikes one that a good deal depends on the secretary whether these produce stakes turn out a success or not, and this can only be accomplished by a show of personal interest in the outcome of the nominations received. It would give a breeder a lot more stimulant if he were to receive a note from the secretary asking how the pups were getting along, what the prospects, and reminding him, if necessary, that he must not forget to send in whatever may be requisite on such and such a date. Then one would feel that the club was taking some interest in the welfare and advance of the breed it stands for.

Again there might be more intelligence exercised in selecting the venue or the shows where the stakes are to be decided. The primary object of these stakes is to cultivate a spirit of emulation among the members that will result in inducing them to try hard to improve the home breeds. Incidentally, the cash prizes, which are often considerable, owing generally to a more or less large initial nomination, help to pay the freight. Very often, far too often, these stakes are decided where the announcement in the catalogue is about all the club or any other interest is taken in the competition outside of the momentary attention of the judge, and sometimes two and sometimes one will turn up to battle for the great stakes. There is no more of the original intent in the affair than the launching of a toy balloon.

It strikes one on the side, that these competitions should be made club affairs; they should be judged in the presence of as large a gathering of members as it is possible to get together, and this usually

Thos. S. Griffith's Man-Trailing Bloodhounds.

happens at the New York show, and wherever a breed has one of these stakes, the judging of that breed should take place the day of the annual meeting, so that a large gathering of members would be more likely to discuss the "pros and cons" of the various aspirants. In this way and only will interest in these sort of competitions be sustained.

Mention may here be made of an instance of the propriety of this suggestion, the case of a specialty club that gave a very large amount of money in special prizes for American breeds at the last New York show. The breed had usually been judged on the day of the annual meeting and luncheon, which being numerously attended brought a representative gathering to the ring to see the specialist perform. It was a family affair. This year the breed was on the program the first day and scarcely a soul interested in the breed except those directly exhibiting, mostly handlers, were on hand to see the placing of the biggest sum ever put up by a specialty club. Next day the meeting and luncheon as advertised was held, but all anticipatory interest was over and the whole affair fell through. It was a mess all round of what ought to have been a good thing.

So it is with the usual produce stake. One that was announced last week of a popular breed has, I see, six entrants, three of whom were the secretary's and another, at least, complimentary. In another case I know of, the pups were to be born after the middle and the end of the year, for first and second divisions respectively. Those born at the middle of last year are now over a year old, but when they are to be judged has seemingly not occurred to anyone, and no one hears anything about the stakes. Is it any wonder, then, that produce stakes are mostly a nine days' interest. They should be made the occasion of club reunions in order to stimulate personal interest, and it occurs to mind that on the occasion of some centrally situated and popular ribbon show, some jolly club reunions might be brought about and any show committee would be only too delighted to arrange extra accommodations for man and beast.—Hull, in The American Stock Keeper.

A four-point show is what the San Mateo Kennel Club officials are confident of holding on the Crossways Polo Grounds at Burlingame, September 9th. San Francisco dog fanciers will give strong support to the one-day, open-air show and many entries will be made from Oakland, Stockton, San Jose, Los Angeles and other points.

The premium lists and entry blanks were sent through the mails this week and should, by this time, have had a wide circulation.

The classification is a very complete one, particularly so, in Bostons, which is a copy of the New York classification for the breed. Collies have a roster of 30 classes as told. These two breeds will, no doubt, be well represented. There is, with recent importations and eligible puppies, the opportunity of making one of the best showings of Collies and Bostons yet benched at a Coast show. Cocker have 28 classes. American Foxhounds, Pointers, English Setters, Gordon Setters, Irish Setters, Irish Water Spaniels and Field Spaniels, Airedales, Bulldogs, Bull Terriers, Irish Terriers, English Toy Spaniels, etc., all offer full classes for exhibitors. Smooth and wire Fox Terriers are accorded classes.

Entries positively close Saturday, August 31st at 5 p. m. The office of the Club is at 469 McAllister street, San Francisco, where entries will be received and mail communications will receive attention. Entry fees will be \$1.00 for each class in which a dog is entered. There will be no charge for admission to the grounds.

Electric cars from San Francisco to Burlingame afford the easiest method of reaching the show ground. Judging will commence promptly at 11 o'clock, and will continue without intermission until all class are judged. Exhibitors are notified that dogs must be ready for the ring when called for. In the case of a dog not being ready for its class, judging will proceed without it. A good rule that cuts out any chances for criticism where a class is judged over again delayed by reason of absent dogs. Exhibitors can send dogs by express to Burlingame, to arrive Monday morning before 10 o'clock, no dog or dogs will be received after that hour.

In addition to the cups for every first in winners' classes, the following specials have been offered:

The President's cup, offered by Mr. C. K. Harley, for best Collie.

Cup, by Mrs. J. P. Norman, for best Cocker Spaniel in novice classes.

Cup, by Mr. Newton H. Neustader, for the best English Setter in novice classes.

Trophy, by Bobm. Bristol Jewelry Co., for best Collie in novice classes.

Cup, by Mr. E. E. Mendenhall, for best Boston Terrier in limit classes (doner not to compete.)

Cup, by San Mateo Kennel Club, for best Pointer in novice classes.

Cup, by Mr. A. C. Blumenthal, for best Irish or Gordon Setter in novice classes.

Cup, by Mr. Norman J. Stewart, for best Pacific Coast bred Collie.

The Peerless cup by Mr. Max Rosenfeld, for best Boston Terrier in show.

Cup, by Mrs. C. R. Walter, for best Fox Terrier.

Cup, by Mr. Chas. Brandenstein, for best Bull Dog in novice or limit classes.

Cup, by Mr. Norman J. Stewart, for best Pacific Coast bred Airedale Terrier.

The Western Fox Terrier Breeders' Association offers cup for best smooth Fox Terrier. Open to members.

The Western Fox Terrier Breeders' Association offers cup for best Wire-haired Fox Terrier. Open to members.

Mr. W. W. Stetheimer offers a cup for best Boston Terrier in novice classes.

San Mateo Kennel Club cup, for best English or American Foxhound.

San Mateo Kennel Club cup, for best Toy dog or bitch.

The following additional specials have been offered since issuing the premium list:

San Francisco Kennel Club, best Bulldog in show.

Emporium trophy, best black Cocker dog in open class.

George Larson trophy, best Bull Terrier in novice class.

California Cocker Club, for members only, cup for best Cocker; cup for best of opposite sex; club medal for best Cocker puppy; club medal for best of opposite sex.

Irving C. Ackerman cup, for best Irish Water Spaniel in novice or limit classes.

American Fox Terrier Club offers for members: Cup for best American or Canadian bred smooth Fox Terrier dog; cup for best American or Canadian bred smooth Fox Terrier bitch; Cup for best American or Canadian bred wire Fox Terrier dog; Cup for best American or Canadian bred wire Fox Terrier bitch; cup for best American or Canadian bred Fox Terrier bred by exhibitor.

Additional specials are being received daily, and a full list will appear in the catalogue.

The judges selected for the various breeds are the following ladies and gentlemen:

Mrs. H. H. Carlton, Berkeley, Cal., Boston Terriers and French Bulldogs.

John Love Cunningham, Esq., San Francisco, Great Danes.

Fred P. Butler, Esq., San Francisco, Pointers and all Setters.

Chas. K. Harley, Esq., Ross Valley, Cal., Fox Terriers, Irish Terriers, Skye Terriers, Manchester Terriers, Scottish Terriers and American Fox Hounds.

Norman J. Stewart, Esq., San Jose, Cal., Airedale Terriers, Collies and Old English Sheep Dogs.

Edmund Attridge, Esq., San Francisco, Bull Terriers and Yorkshire Terriers.

Thos. J. Blight, Esq., San Francisco, Cocker, Clumber, Field and Irish Water Spaniels.

Geo. A. Cranfield, Esq., Yountville, Cal., Greyhounds, Russian Wolfhounds, Bloodhounds, Mastiffs, Chows, Newfoundland and English Foxhounds.

Irving C. Ackerman, Esq., San Francisco, St. Bernards, Bulldogs, Dachshunde, Dalmatians, Poodles, Toy Dogs and all other breeds.

The foregoing list, from what we can gather, is a very pleasing one to our fanciers, the general impression being that a big recognition will be shown by a strong entry in most breeds.

The officers and directors of the club for 1907 are: Chas. K. Harley, president; Walter W. Stettheimer, vice-president; Irving C. Ackerman, secretary-treasurer; Howard Willets, Albert Hamilton Hayes Jr., Philip C. Meyer, David Sinclair, directors.

Bench show committee: W. W. Stettheimer, C. K. Harley, I. C. Ackerman. Veterinary surgeon, Dr. Joseph A. Welsh, D. V. S.

Office, 469 McAllister street, near Van Ness avenue, San Francisco, Cal. Office hours, 10 to 12 A. M. and 1 to 5 P. M. A. L. Stewart, office manager.

Suitable accommodations have been arranged for exhibitors and dogs on the San Mateo electric cars and on the Southern Pacific Railway Company's train, the latter leaving Third and Townsend street depot at 9 A. M. Exhibitors may procure further information by applying at the San Mateo Kennel Club's office, 469 McAllister street.

DOINGS IN DOGDOM.

Entries in the Produce Stakes of the Western Bull Terrier Breeders' Association are, it is to be regretted, coming in rather slowly, but five entries having been listed so far. It is possible that this condition may be the result of a lack of, at present, suitable material or prospects, we are not ready to believe, however, that the club members and breeders are apathetic to the absolute importance of the club Produce Stakes.

In this respect we will call the attention of Bull Terrier breeders to an article in another column, which is worthy of careful perusal.

The club's first annual Produce Stakes will be open for the produce of regularly nominated bitches whelped on or before October 1, 1907. This stake is open to all comers, irrespective of membership in the association.

The fees are nominal, \$3 for each bitch nominated October 1, 1907, \$1 for each puppy nominated on or before December 1, 1907, \$2 second forfeit, payable March 1, 1908, and \$3 starting fee for each puppy in the competition, which is to take place annually at the hench shows of the San Francisco Kennel Club.

The prizes will embrace the whole amount of the fees paid in, viz.: Dog puppies—First prize, one-third of the stakes; second prize, one-sixth of the stakes. The apportionment of prizes for bitch puppies are the same. Special prizes of \$10 in gold are offered by the association for the dams of the best dog and the best bitch puppies.

All dogs competing in these stakes must be regularly entered in at least one class of the Frisco show. Mr. Charles R. Thorburn, 225 Alcatraz avenue, Oakland, is the secretary of the association and will be pleased to answer any inquiries from fanciers for further information.

W. H. McKay states that "everything looks fine for a grand show at Stockton in October. The premium list will be issued very soon, with as choice an offering of trophies and specials as a fancier would wish to look over. G. W. Clayton has been decided upon as the judge. Thos. J. Blight will act as superintendent and ring steward. Robert Groves, Chas. Owen, Chas. Heffernan, Francis Hodgkins, Harry Masters and Wm. H. McKay compose the bench show committee, and these gentlemen are working hard for a large entry, a successful and smooth running show."

Secretary A. M. Barnett, P. O. box 243, Stockton, Cal., will be pleased to furnish any and all further information, also entry blanks and premium lists to all interested fanciers, breeders and exhibitors.

The Flour City fanciers, judging from the cumulative successes of the previous two shows, should excel themselves in October if enthusiasm, co-operation and hard work are any factors in bringing off a good show.

The Kennel Club and bench show project has taken strong hold in Fresno, as will be noted from the following letter, published in the Democrat and signed by a number of sportsmen, among whom is George Stone, who is an enthusiastic breeder of Gordon Setters:

"Dear Sir: I have been requested by the directors of the Fresno County Agricultural Association to interest dog fanciers and breeders in a proposition of holding an annual kennel club bench show in connection with the annual fair.

"It seems to me, in view of the fact that there are so many citizens of Fresno who are interested in the breeding and raising of fine dogs, that a kennel club should be a great success. I find on investigation that there are a great many men in Fresno who,

at the present time, own valuable dogs. If a movement for raising good dogs is encouraged, it would have a tendency to bring into this county the very best breeds to be obtained in this State.

"San Francisco, Los Angeles, Stockton, Oakland, San Mateo and other cities have kennel clubs that give splendid exhibitions every year. Bakersfield, a much smaller town than Fresno, has an annual field trial every year, and dogs from all over the Coast are brought there in competition.

There is no reason why Fresno should not have an equally good exhibition as elsewhere, or why a field trial should not occasionally be held here. The proposed exhibition would be open to all breeds of dogs.

"A preliminary meeting will be held at the office of R. A. Powell, secretary of the Fair Association, 205 Forsyth Building, and the presence of all interested is earnestly requested in order to give this movement a proper start. Yours truly,

"HOMER KATZE,

"Manager Division H., Dog Show."

Dan Dismukes, Arthur Long, Henry Messick, Geo. Hart, W. J. Eilert, George Warlow, N. J. Ryan, A. B. Evans, George Stone, W. C. Kennedy, Henry Tupper, Jeff Hunter, George Roeding, W. Keisker, Charles Chambers, E. L' Cobb, Sam Thompson, Jack Lewald, O' Schleuter, William Wilson, W. H. Peterson, Charles Dysle, John Zapp.

Mr. Thos. S. Griffith of Spokane writes us that his trained man-trailing Bloodhound bitch has whelped a litter of fine puppies. The two dogs, whose pictures are shown on another page, have been used on several occasions successfully in running down criminals and are noted for their staying qualities on the trail and their great cleverness in finding a trail.

The Albuquerque Kennel Club was regularly organized August 6th. Dr. J. H. Wroth is president and Col. D. K. B. Sellers secretary. The membership roll is a good one for a starter. Various committees were appointed to draw up a constitution and by-laws, suggest necessary municipal ordinances covering appointment of poundmaster, punishment of dog poisoners, disposition of worthless dogs, etc.

The following are the objects for which the club of New Mexico fanciers is organized.

"To stand by all owners of good dogs.

"To prosecute any party, or parties, who place poison in their own as well as other persons' yards, thereby causing the death of dogs.

"To provide means of destroying all unlicensed dogs.

"Not to raise the dog licenses, but to employ a competent poundmaster to catch all unlicensed dogs and to protect licensed dogs from death at the hands of unscrupulous persons.

"To ask the City Council to establish a higher tax on all female dogs.

"To arrange for a bench show at the Territorial Fair."

A bench show for the coming Territorial Fair is a fair prospect, already a number of entries have been assured, as well as several cups for specials.

The Snohomish County Dog Fanciers' Association was recently organized at Everett, Wash., when the following officers were elected: Q. E. Friars of Everett, president; W. H. Illman of Hartford, first vice-president; Alex. Keay of Everett, secretary and treasurer.

The first show of the association will be given in Everett at the country fair, September 4th, 5th, 6th and 7th. Entries will close at 6 o'clock, September 3d. The prizes will be ribbons. The judge of the show will be from some other city.

Fifty dogs have already been pledged, and it is confidently expected that there will be not less than a hundred from the county at the show. Awards will be made under the American Kennel Club rules (?)—after the Snohomish County Association is well under way it will apply to the A. K. C. for admission.

The bench show committee consists of W. H. Illman of Hartford, chairman; W. D. Clark, Meyers of Marysville. The show is open to members only, anyone may become a member by paying \$1 a year dues.

There are many fine dogs in Everett and vicinity, it is stated, and the first show is bound to be notable. Mrs. Q. E. Friars of Everett, and W. H. Illman of Hartford, own Collies that have won prizes at past bench shows.

Prominently identified with the association we find Alex. Keay, M. T. Allman, W. L. Pew, H. W. Illman of Hartford, W. D. Clarke of Sultan, E. N. Taylor of Sultan, Dave Oswald, James Lashua, William Hulbert, V. H. Vollans, A. J. Westland, Dr. J. E. Stauffer, D. C. Meyers of Marysville and others.

Dr. Jas. A. Andrew, M. D., 500 Madison street, Brooklyn, N. Y., has been elected as the A. K. C. delegate of the Western Bull Terrier Association.

Stiletto Kennels' Ch. Meg Merrilies II. is due to whelp August 20th to Bloomsbury Baron.

A very good young red Cocker Spaniel dog puppy, seven months old, also a fine parti-colored bitch puppy, three months old, can be secured for a reasonable price. Particulars will be furnished on application to the Kennel Editor.

Wonderland Kennels' handsome and classy Boston Terrier bitch Little Mother is in whelp to Frisco Cinders, a winning favorite at Los Angeles, Oakland and San Francisco.

The good Bull bitch Girtford Goody met her end two weeks ago by being smothered to death in her crate while in transit, in a baggage car, to Mr. Geo. McLean's Los Angeles kennels to be served by Moston Monarch.

The loss of this most excellent bitch is another example of combined ignorance and carelessness on the part of railroad employees. The day was very warm and the party in whose charge the poor dog was given was requested and admonished, in an explanatory way, as to what might happen if the dog's crate, and the bitch herself, was not properly looked after. In spite of all the result was the loss of a valuable brood Bull bitch.

Mr. Dorian's recently imported bitch Nairod's Dona Stonax, combining the blood of Champsions Rodney Stone, Prince Albert, Primula and Dockleaf, is heavily in whelp to the great English dog Rival Stone, and something phenomenal is expected from this mating, as she is a very fine specimen and a proven producer of quality. This litter, if whelped, will be the only Rival Stone litter in America, and should be in great demand. Rival is by the great sire British Stone out of Banzia—stock that can only be bought occasionally.

GAME FISHES UNLAWFULLY TAKEN.

The following communication from Mr. Chas. P. Landresse, a prominent angler and popular member of the California Anglers' Association, gives an inkling as to the nefarious practices of net fishermen of the up-river sections, a number of whom not only violate the fishing laws, but fish with illegal nets and from boats that do not display license numbers:

Editor Breeder and Sportsman—Dear Sir: The writer has recently returned from a two weeks' fishing trip, part of which time was spent in the sloughs adjacent to Courtland, on the Sacramento River, and the balance in the district commonly called Yolo Basin. These territories are certainly the home and breeding grounds of both the striped and the black bass. Both of these varieties of game fish were plentiful while I was there, and I never had a better time angling since I became an ardent disciple of old Izaak.

The market fishermen, however, are rapidly diminishing the supply, and if allowed to continue their depredations it is only a question of a short time when both striped and black bass will be strangers to those waters.

I witnessed enough open violations of the law to convince me that there is something radically wrong. Our present Fish Commission, they and their chief deputy, are either asleep at the switch or they are in utter ignorance of the violation of the laws that they have been sworn to uphold and enforce.

On Tuesday morning, July 16th, between the hours of 4 and 5, while on our way to Cache Creek and Prospect Slough, one of its tributaries, we encountered no less than ten boats manned by Greeks and Italians who, I presume, came from Rio Vista and Collinsville, engaged in fishing for black and striped bass at Prospect Slough. These men were distributed over an area of about three miles, at intervals of as near as I can figure it, 350 or 400 yards.

From a close observance of the situation I discovered that their method of operation is as follows: Willow branches are cut and sunk into the mud on both sides of the sloughs 150 or 200 feet apart, and just at the edge of the tules. To these stakes are attached the ropes holding the net or nets, as the case may be, in zig-zag fashion across the creek from bank to bank. The nets are sunk below the surface of the water; no floats whatever being used to indicate their presence.

We never would have known that there were any nets in the slough if we had not been unfortunate enough to get our propeller entangled in one of the ropes, which, of course, we were compelled to cut in order to release it, although I must confess that I was a bit suspicious on seeing the large number of boats assembled there. After our first experience we watched carefully for the stakes, and whenever there were any in evidence we shaped our course for the center of the slough, where the water was deeper, and we had no further trouble.

Imagine a line of nets over two miles in length, stretched across a slough no wider than fifty yards; how many fish do you suppose could pass such an array of seines?

But worse than all this is the fact that these men fish with small mesh nets, cast them at night, and haul them early in the morning before decent people are on the move. Our launch surely caused the Greeks and Italians who were there some uneasiness, for the majority of them scampered off into the tules and were in hiding before our boat got within hailing distance; two of these individuals, however, were exceedingly brazen; we surprised them in the act of drawing their net for black bass at a certain point in Prospect Slough, and when we were about fifty yards distant from their boat one of them took off his coat very leisurely and covered up the fish that were then lying on the deck of their boat. The other fellow let go of the net, and it sank from sight immediately. After this performance both of them folded their arms very deliberately, and looked at us with an air of defiance and in-

difference. This boat bore the number 130, but none of the others that we saw bore any number that could be seen by us.

The boldness of these men astounded me, and I made inquiries of some of the residents up there concerning the matter, with a view to ascertaining if possible whether or not those waters were ever visited by a deputy Fish Commissioner. The replies were invariably "Oh, yes! but the fishermen get the tip just when he is coming through, and they stay out of these sloughs."

That tells the story very impressively, and accounts for the fact that the law is continually violated.

True enough, there are some United States citizens fishing up there for the market, but so far as I could see they are strict observers of the law and use rod and line in earning their daily bread. Poor fellows, they are surely to be pitied! What chance do they stand with an organized band of law breakers. Yet these men are continually at it, and seemingly it's no trick at all to catch them in the act.

As an illustration of how quick these fellows clean out a slough I want to relate an experience that we had on the trip. On Thursday morning, July 18th, four of us fished in a tributary of Cache Creek and took twenty-nine striped bass on rod and line; these fish ran in size from 6½ to 18 pounds; that evening while on our way out we met a fishing smack going in to this same slough. On Sunday, July 21st (three days later), we again fished the identical territory, and after a persistent morning's work we were rewarded with three small fish that we were compelled to throw back, for the reason that they were under size—2 pounds was the largest. That slough was alive with fish the first time that we went to it, and a few days after there wasn't a keepable fish to be caught.

Surely some one is responsible for conditions as they exist up there at the present time, and the quicker it is brought to the attention of those now in authority the better for sportsmen who love a day's sport with the rod will it be.

Organizations like the California Anglers' Association can probably do some good in this connection if they will but take the initiative and lead other kindred organizations into the conflict between the good people of the State of California and an organized band of professional law breaking foreigners.

I trust that you will accept this letter in the spirit that it is written and you are at liberty to use it for publication, over my signature, as I am writing exactly what I saw with my own eyes, and conditions as they now are in that locality.

THIRD PACIFIC COAST HANDICAP.

The Interstate Association's third Pacific Coast Handicap blue-rock tournament will take place at Spokane, Wash., under the auspices of the Spokane Rod and Gun Club, September 10th to 12th inclusive.

The first Pacific Coast Handicap was held at the Ingleside grounds, San Francisco, September, 1905, the second was held at Los Angeles, September, 1906. Geo. Sylvester of San Francisco won the Initial Pacific Coast Handicap, after shooting off a tie with Boh Bungay of Ocean View. Fred B. Mills of Long Beach won the Coast Handicap last year.

In selecting Spokane for the scene of the premier Coast smokeless powder convention this year, the Interstate Association recognizes that the great Northwest has claims that cannot in justice be ignored, and, in accordance moves the Pacific Coast Handicap to Spokane this year. Its motives will, of course, be understood by all whose ideas are sufficiently broad to understand the scope. Spokane has many attractions, in more ways than one, and attendant sportsmen will find the selection a very pleasing one.

The Spokane Rod and Gun Club is one of the best organizations of the kind in the Northwest, or, for that matter, anywhere else, barring no section. Its members have gained a reputation of being one of the most congenial lot of sportsmen that ever formed a shooting organization, and it is safe to say that they will not allow a single contestant at this tournament to leave feeling dissatisfied. The committee having the immediate management of the tournament is fully capable of handling the same, and as the tournaments held in Spokane in the past have always been well attended and greatly enjoyed, and further, as the interest in trap-shooting throughout the Northwest was never greater than this season, it is confidently expected that this will be one of the best tournaments ever held in that vicinity.

The program for the first day, open to amateurs only, no handicaps, trade representatives shooting for targets only, calls for nine 20-target events, 180 targets in all, \$2 entrance and \$50 added for each race.

The second day's card, open to amateurs only, no handicaps, professionals for targets only, provides four 15-target events, \$1.50 entrance and \$40 added to each race, two 20-target events, \$2 entrance and \$50 added to each. The concluding feature of the day being the Preliminary Handicap at 100 targets, unknown angles, \$8 entrance, targets included, handicaps 16 to 23 yards, high guns, not class shooting, \$100 added to the purse. The number of moneys to be determined by the entries (two places for each ten entries up to 250). The winner to receive a trophy, presented by the Interstate Association, in addition to first money.

Regular entries must be made at the cashier's office, on the shooting grounds, before 5 P. M., Tuesday, September 10th. Penalty entries may be made

after Tuesday, September 10th, up to the time the first gun is fired in event No. 6, by paying \$10 entrance, targets included. Entries are non-transferable, and entrance money can not be withdrawn after handicaps have been allotted. This event is open to amateurs only, trade representatives can enter for birds only.

The schedule for the third and concluding day starts with four 15-target races, \$1.50 entrance and \$40 added in each event, followed by two 20-target races, \$2 entrance and \$50 added in each race.

The Pacific Coast handicap being the final feature of the tourney. Open to amateurs only (pros shoot for birds), 100 targets, unknown angles, \$10 entrance, targets included, handicaps 16 to 23 yards, high guns, not class shooting, \$200 added to the purse. Moneys determined by the number of entries, two places for each ten shooters or fraction thereof up to 250. The Interstate Association trophy and first money to the winner.

Regular entries must be made on the shooting grounds at the cashier's office before 5 P. M., Wednesday, September 11th. Penalty entries may be made up to the time the first gun is fired in event No. 7, Thursday, September 12th, by paying \$15 entrance, targets included. Entries non-transferable, nor can entrance money be withdrawn after handicaps are allotted.

The total of added purses amounts to \$1,500, subscribed by the Interstate Association and the Spokane Rod and Gun Club.

Not more than two pros (possibly but one, to start off the squad, which innovation has been found extremely beneficial in expediting matters), will shoot in any one squad, providing the number of entries permits this arrangement.

The handicap committee will meet at the Hotel Victoria, Spokane, on the evenings of September 10th and 11th to allot handicaps for both the Preliminary and Pacific Coast Handicaps. What the handicap shooters receive for the Preliminary will not govern in the Pacific Coast Handicap, new distances will be allotted for this event. Ties will be shot off at 20 targets, and the original handicaps of contestants will be the mark. The price of targets will be three cents each, included in all entries. The grounds, Natatorium Park, will be open for practice and sweepstake shooting on the afternoon of Monday, September 9th. Six events at 20 targets each, optional pools, is the card.

Interstate Association trap-shooting rules will govern all points not otherwise provided for.

Guns larger than 12-gauge and black powder barred, weight of guns unlimited.

The standard bore of the gun is No. 12, and in the handicap events all shooters will be handicapped on that basis. Contestants using guns of smaller bore must stand on the mark allotted to them.

A full line of first-class factory loaded shells will be on sale at the grounds. The association reserves the right to select two shells from each or any contestant—to test the same for proper loading. This selection to be made at any time when the shooter is at the firing point.

"Shooting names" will not be used during the tournament. "Targets only" is open to manufacturers' agents, all other contestants must make entry for the purses.

Practice shooting before the regular scheduled events each day will not be allowed, nor will there be any "warm-up" events.

Contestants are requested to make entries for the entire program each day. Money will be refunded in all unanticipated events, except the two handicaps; contestant has but to notify cashier of withdrawal.

Of the added moneys \$230 will be reserved to purchase trophies—\$100 trophy for the Pacific Coast Handicap winner, \$50 for the Preliminary Handicap trophy, \$50 for the high average trophy and \$30 for the high average professional. The two handicaps will not count for high average. The number of targets counting for high average is: First day, 180; second day, 100, and third day, 100; total, 380 targets.

The purses in all events, except the two handicaps, will be divided according to the percentage system—50, 30 and 20 per cent in the 15-target events and 40, 30, 20 and 10 per cent in the 20-target races.

The cashier's office and official scores will be conducted on the usual up-to-date system, for which the Interstate Association meetings, under the management of Elmer E. Shaner, have become known as trap-shooting meetings without their equal in smooth running.

Guns, ammunition, etc., forwarded by express must be prepaid, and sent to Ware Bros. Co., Spokane, Wash. Mark your own name on the box that goods are shipped in and it will be delivered at the shooting grounds free of charge.

Further information relative to the tournament will be cheerfully furnished by A. F. Wieseman, secretary Spokane Rod and Gun Club, care of Ware Bros. Co., Spokane, Wash., or by Elmer E. Shaner, secretary-manager the Interstate Association, 219 Coltart Square, Pittsburg, Pa.

The officers of the Goldfield Gun Club are: President, John Reynolds; vice-president, W. M. Inman; secretary, J. M. Fairfield; treasurer, E. R. Collins; field captain, William M. Clayton; physician, Dr. O. Bertram Dunham; directors, J. V. Bradley, C. C. Inman, J. M. Fairchild, Will H. Revere, F. A. Strock.

AT THE TRAPS.

The Sunset Gun Club's regular shoot came off at the club grounds, near Nineteenth avenue and H st., on the 11th inst. C. A. Haight and Emil Holling shot through each event for targets only. A feature of the meeting was the skillful shooting of an eleven-year-old boy, Carl Holling, who shot in every event and made a number of excellent scores. Jas. H. O'Conner scored 9 in the Lewis medal race and won the trophy for C. Frankel, whose score he shot, this being, it strikes us, a rather unusual way in which to win a trophy.

The Du Pont trophy event was won by J. H. O'Conner, who lost but one bird out of 20. The money winners were: C. Holling, Reese and Taylor. The scores follow:

First event, 10 targets, "Jack Rabbit," 16 yards—Holling 9, Hoelle 8, Carl Holling 8, Danielsen 8, Haight 7, Burfiend 6, Lewis 6, White 6, Houpt 4.

Second event, 10 targets—Holling 10, Burfiend 10, Carl Holling 9, Lewis 7, Houpt 7, Danielsen 7, Haight 7, White 6, J. O'Conner 6.

Third event, Lewis Medal, distance handicap—20 yards, C. A. Haight 8; Holling 7; Burfiend 6; 18 yards, Taylor 7; Lewis 6; Reese 6; 16 yards, J. H. O'Conner 9; C. Holling 9; Danielsen 6; Houpt 5; Holm, 3.

Fourth event, 10 targets—Danielsen 10, O'Conner 9, Holling 9, Reese 8, C. Holling 8, Taylor 8, Burfiend 7, Houpt 7, Haight 7, Lewis 6, Hoelle 5, White 2, Barriclo 0.

Fifth event, Du Pont trophy race, 20 targets—J. H. O'Conner 19, E. Holling 19, "Scotty" Taylor 18, C. Holling 17, O. Reese 17, J. Danielsen 16, D. Burfiend 16, F. Houpt 12, T. L. Lewis 12, C. Holm 11, S. Kerrison 7.

Sixth event, doubles, five pairs—Taylor 8, Holling 6, Reese 6, Burfiend 5, Danielsen 3.

The San Andreas Gun Club shoot, the sixth for this season, took place on July 21st. The scores were:

Club shoot, 25 targets—B. Raggio 12, M. Zwinge 16, R. Casey 17, A. Smith 12, H. Zwinge 14, G. Stewart 18, C. Snyder* 12, C. Goodell 3, G. Pfortner 20, L. Cademartori 18, J. Reddick 12, Al Treat 3, J. Snyder 20, C. Tiscornia 13, F. Wells 14, C. Wells* 4.

Doubles, five pairs—

Raggio, B.	00	01	01	01	01—4
Zwinge, M.	00	10	00	00	10—2
Casey, R.	00	00	00	00	10—1
Smith, A.	11	01	00	10	10—5
Zwinge, H.	11	01	11	11	11—9
Stewart, G.	10	00	11	11	11—7
Snyder, C.*	01	10	11	10	00—5
Pfortner, G.	00	11	00	11	00—4
Reddick, J.	10	10	10	11	10—6
Snyder, J.	00	10	00	11	10—4
Wells, F.	00	00	10	11	01—4
Kiser, M.	00	10	10	00	11—4

*Club guests.

At the shoot held July 28th the attendance was not up to the average. One event at 25 targets was shot. The scores were:

Gil Pfortner 23, Reddick 16, Treat 7, Raggio 14, H. Zwinge, 15, Cademartori 8, J. Snyder 15, F. Wells 9, Stewart 14, M Zwinge 13, Smith 11.

The Goldfield Gun Club shoot on the 4th inst, decided the ownership of two trophies. Both prizes were won by Irwin on a close margin, Dyer running second to him in each handicap. Clayton had the highest score for the V. L. Kline trophy, but as he had previously announced his intention of not competing for the trophy it went to Irwin.

The scores for the V. L. Kline trophy were: Clayton, 23 out of 25; Irwin 22, Dyer 20, Rhodes 19, Bennett 18, Strock 16, O'Donnell 15, Hirschell 14, Bickley 13, Ludwig 12, Tingle 9, Pratt 9.

The score for the Lord-Cochran trophy was as follows: Irwin 21, Dyer 18, Briggs 18, Rhodes 17, O'Donnell 18, Allerd 13, Beckley 14, Ludwig 12.

Both races were shot under a sliding handicap.

The San Mateo Gun Club have arranged a trophy shoot, the high average in a 100 target race to win. This new club is in a very flourishing condition and holds a shoot once a week. Targets are trapped for all shooters attending for one cent. The scores shot on July 28th, in two 25 target races were:

Britt 19, Duffy 19, Gracier 13, E. M. Warn 11, H. S. Warn 8.

In Initials E. M. Warn 20, Gracier 19, Britt 19, Duffy 17, H. S. Warn 10.

The Seattle Gun Club's regular program for this season was finished on August 4th.

R. A. Steele was high gun for the Ellis cup and won permanent ownership of the trophy.

The ten shoots for the A B and C class medals resulted as follows: Dr. R. A. Steel, 89 per cent; B. L. Mahan 81 per cent and C. T. Marsh 75 per cent.

The Dupont cup was won by Dr. Steel and the Seattle Sporting Goods cup by E. E. Ellis, with 93 1-3 per cent.

While the grounds will be open for special shoots the remainder of the summer, the first big shoot will be the Southwestern State Association tournament, which will be held some time in November.

TRADE NOTES.

The Eastern Handicap Winner.

The winner of the Eastern Handicap, which was decided at Boston, Mass., July 18th, under the auspices of the Interstate Association, was won by Mr. H. R. Bonser of Cincinnati, Ohio, who broke 93 out of 100 from 18 yards. Mr. Bonser used "New E. C." (Improved), a powder that holds practically every long run or any note that has been made either in competition or in practice. The following are a few of its records:

World's record, 419 straight, made by W. R. Crosby at Canton, Ohio, June 14-15, 1905.

Longest run made in 1905, 348 straight, made by W. D. Stannard at Chicago, September 8-9, 1906.

Second longest run made in 1906, 296 straight, made by W. R. Crosby.

Longest run made in a tournament in 1906, 256 straight, made by W. H. Heer.

Three-in-One.

We are informed that the sales of that famous oil, "3 in One," have moved up at such a lively rate that the manufacturers, the G. W. Cole Company, have found it necessary to move to more commodious quarters. The New York offices have been changed from the Washington Life Building to the new 42 Broadway Building. The new offices occupy the larger part of the third floor of a wing of this building. The history of "3 in One" has been one of expansion. Starting with a one-room factory in Asbury Park eleven years ago, the business rapidly outgrew the manufacturing facilities at that location. The factory was moved to Rahway, N. J., into a fine new building. Within the past year the factory capacities have been doubled by additions to this building. "3 in One," which is said to be the original and only oil compound for lubricating, cleaning, polishing and preventing rust, was first discovered in a semi-accidental way by the G. W. Cole Company, who are and have been the sole manufacturers of the same since it was first put on the market. In writing for samples address the company at 154 New street, New York.

Du Pont Smokeless Honors.

That the Du Pont Company can point with pride to the outcome of the Grand American Handicap tournament at Chicago, June 18-21, 1907, is beyond question. The trophy and the first eight moneys in the Amateur Championship event went to men who shot their shotgun smokeless powder. A specially notable feature is the fact that in the Amateur Championship over 79 per cent of the total purse went to those who preferred to shoot Du Pont smokeless to any other powder.

At the Southern Handicap tournament, held at Richmond, Va., May 8-10, George S. McCarty of Philadelphia, shooting Du Pont smokeless, won the trophy and first money of the Southern Handicap; second and third moneys of the same event were also won by shooters who used Du Pont smokeless. In addition to the above the shooters using the same powder won first, second, third and fourth amateur averages and also first, second and third general averages.

The win of any championship is always something to be proud of, for the reason that in such events everybody stands on the same mark, and therefore the win itself is very significant. Du Pont smokeless has now to its credit eleven State championships won during the current year.

A Clean Sweep.

It was a glorious clean-up the shooters of Winchester goods made at the first tournament of the Western Washington Gun Club Association, held at Tacoma, Wash., May 29th and 30th. The cup offered by the Seattle Sporting Goods Company, and contested for on the opening day was captured by Mr. H. A. Roberts of Centralia, Wash., after shooting off a tie with Mr. James McLaughlin of Seattle. Both Mr. Roberts and Mr. McLaughlin shot the Winchester "Leader" shells, the shells that always shoot. Mr. Roberts also walked off with the Individual Championship medal and the Du Pont trophy, thus annexing all three trophies shot for at this tournament.

The high expert average of the tournament was made by Mr. Harry Ellis of Portland, Oregon, with a Winchester Pump gun and "Leader" shells.

The high amateur average was captured by Mr. Dell Cooper of Bellingham, Wash., with a Winchester Pump gun.

Peters Points.

At the Fourth of July tournament given by the Richmond, Va., Gun Club high amateur average was won by Mr. Stearns, and second amateur average by Mr. Simms, both using Peters shells. Mr. Stearns also won the Parker Gun Handicap, breaking 21 out of 25 from the 20-yard mark. The Hunter trophy was won by Mr. Hammond with Peters shells. T. H. Keller Jr. was second professional, making almost a clean sweep with this popular ammunition.

L. I. Wade, shooting Peters factory loads, won high general average at Paris, Texas, July 4th, scoring 133 ex 150.

At Memphis, Tenn., July 4th, J. L. Canale won high amateur average and Messrs. H. J. Borden and H. E. Posten won first and second professional averages respectively by using Peters factory loaded shells.

Mr. Harry N. Hall outshot all the professionals and amateurs at the Thomasville, Ga., tournament July 4th and 5th, losing only 23 out of 400, and shooting Peters shells. On the same dates at Mt. Sterling, Ky., Mr. M. J. Maryott won high professional average, breaking 393 ex 420, and Mr. Woolfolk Henderson high amateur average, breaking 396 ex 420.

At the July 4th tournament at Kansas City, Mo., Mr. William Veach won high professional average, breaking 96 ex 100 with Peters factory loaded shells.

On June 25th a team of nine men, representing the Greenville, O., Gun Club, shot a race with a like team selected from the members of the Trenton, Ohio, Gun Club, and the Greenville boys won by sixteen targets. Seven of the nine members on this team used Peters factory loaded shells, including Mr. A. W. Kirby, who broke 99 ex 100 and had a run of 73 straight.

At Roanoke, Va., July 4th, Mr. H. O. Humphreys of Bedford City, Va., won high average with 94 per cent, shooting Peters Ideal shells. Mr. Neaf Apgar won high average at Newark, N. J., July 6th, scoring 141 out of 150 with Peters shells.

THE FARM

A TRIBUTE TO THE FATTED CALF.

In all the wide world of cattle there is nothing so beautiful as a well fatted calf. No matter whether it is destined to develop into the blue ribbon queen of the show yard or the quant and bony yellow tear of the dray and dusty cactus lands of Mexico, the well nourished calf is a thing of beauty and as such should be a joy. Yet in all the broad bovine domain there is nothing so traitorously abused as the calf. Note that line of Angus beauties in the arena, all as fit as hands can make them. See that band of range-bred Shorthorn-Herford crosses ready to be shipped to the corn belt—well bred, deep in rib, broad of back, with a well finished lok about them. There you have the limits of artifice at the hands of man and of nature's work on the wind-swept plains. Between the two there is a great gulf fixed, a gulf that so far has seemed too wide for bridging, but which nevertheless must soon be bridged.

Look now on the farms of the corn belt and the older States which do not grow much corn. The fatted calf is the exception. See there below that stunted willow, that group of poor little pot-bellied calves wane of countenance, pitifully thin, prodigious of paunch, herding close together for momentary relief from the pestilent flies. Nothing to eat to speak of, nothing to drink but perchance a little muddy fluid from a green scummed puddle, nothing to live on but a bucket or two of sour clabbor, such is the daily fare of thousands upon thousands of calves born on the best land in the world, and yet we wonder why we do not breed more good native cattle, why we have to go so often to the range men for our feeders that will win ribbons in the show ring.

Turn now to the calf pens at any one of the great markets during the season when the calf crop runs. Of all the manifestations of man's inhumanity to the brute creation there you will find as fragrant an example as may be named. The perpetual plaintive cry tells of hunger and misery and suffering, of a ruthless sacrifice by man to the god of false economy. Cruelty this is, pure and simple, yet in so trite a form as almost to pass unnoticed. Yet always do we hear this question: "What would

you do? It does not pay to feed them milk. They cannot eat anything else." That is where the false economy comes in. It does not pay to feed them milk to make them marketable at a descent price. It does not pay always to banish cruelty from our farms. It pays to get the best out of anything we may have.

All hail the fatted calf, be he scrub or otherwise beef or dairy breed. He is a thing of beauty and a lesson in himself, and his lesson is the appreciation of the eternal fitness of things by the man who bred him and fattened him. The possibilities of the matured animal are all involved in the new born calf. It is not the spirit that sacrifices the bawling vealer and condemns the stock calf to hungry confinement in a prison yard that keeps and spreads the scrub abroad in this great land. The fatted calf embodies in its beautiful rounded freshness the forward stride of progress, which is founded first in real manliness, then in intelligence, an lastly in true conception of values. A change is at hand, the ranges will soon cease to yield their teeming quota year by year to pull the corn-belt farmer from the slough into which his slip-shot methods have plunged him. We must breed more and better calves, and the way lies through the pedigreed bull and proper care. All hail the fatted calf.—Breeders Gazette.

HORSE CHARACTERISTICS.

George McKerrow gives his idea of what a horse should be like to suit his taste. This is what he says:

First, he must have a good, broad, flat knee and a wide hock. I am most particular about the hock joint of any on the horse; fully as particular as about the sloping pasterns. Why? The hock joint has to stand the hardest strain of any joint in your horse when you put him at hard work. I want it wide from the rear to the front. I want it comparatively thin, flat and clean the other way through, especially free from any looseness of joint and from puffiness and meatiness. I want the tendons large both below the knee and above.

I want him well muscled on the gaskins and up over the croup, and I do especially want him well covered with muscle over the loin. To my mind the next place that receives the hardest strain after the hock is the loin. Besides there are two very vital organs over these loins, the kidneys, that need to be well covered with muscles.

I want a short back, but as you

say, how is one to get a big solid horse with lots of weight and power and have him short. No, I would have him comparatively long from the point of his shoulders to the point of his hip, but I would have him short in the back, compared with his length on the lower line, and you can get that by having a pretty long hip and having a shoulder with some slope.

Then I want a medium sized head, with a large bold eye standing well on the outside of the head, leaving a good width between the eyes, which I would have well rounded out. I would have it full from the eyes up to the ears, giving lots of room for the brain, for we want brains in the horse as well as in the man or woman. I would have medium sized ears, pretty well apart on top of the horse's head.

WOVEN WIRE NOT DOG PROOF.

Herbert Littlefield of Wells, Me., determined to make a practical test of the plan for fencing out the dogs from his flock, which is frequently recommended by those who object to having dogs kept within bounds. About one mile of first-class quality wire fence was recently put up by Mr. Littlefield, the most careful attention being given to making it dog proof, but without avail. A few nights ago dogs got through or dug under it and killed his entire flock of sixteen sheep, with the exception of one lamb. Some of the strongest sheep were found still alive, horribly torn and mangled, but died soon after being found.

Commenting upon the above news item the Maine Farmer says: This slaughter knocks the last argument flat which some have been using to prove that sheep should be protected from dogs by fencing with woven wire, but a dog out for mutton and the enjoyment of the killing will go under, over or through almost any barricade, as frequently proved by the cases where they contrive to get into paddocks and sheep pens close to farm buildings which were thought to be dog proof.

CASTRATING PIGS.

An exchange treating on this subject says:

There is only one time in a pig's life when it can be castrated without a setback. This is before it is weaned or while it is running with its mother. If the operation is rightly performed and the pigs are given clean beds they will then get along with no appreciable setback.

It is good practice to choose a

cool day for this work. The pigs should first be caught, and this is a somewhat difficult problem without running them down. This will heat up the pigs blood and then they are in no condition to operate on.

If you have a corner fenced pig tight, where you feed them, just shut them in while they eat and then you have them all. When you are ready to begin work take a panel of fence or a few boards and confine them tightly in one corner where they can not move about and then you can pick them up one by one as desired. Do not attempt to pick out the sow pigs first, but throw out as you come to them. If you have many to castrate it is best to have one man pick them out and hand them to the second man that holds them on their back between his knees while the third man does the operating.

The operator should have two good, sharp knives for the work and a man to keep them in good repair or re-sharpen while the work is going on. The idea is to have help enough so that the pigs will not be confined more than half an hour at least. They will worry and fret and be apt to get very much heated if confined too long. Four men can, in this way, with everything handy, castrate the boar pigs in a flock of a hundred in thirty minutes if they are onto their job and do their work well. A dish with a little carbolic acid and water should stand handy to dip the knife in after each operation and a weak solution of carbolic acid and water thrown into the cuts when the work is finished.

The amount of butter a cow can be made to produce during a year greatly depends upon the attention received previous to and the month following calving and in saying this we have in mind the cows that calve in the early fall. Three hundred pounds of butter yearly is a good production and this is a possibility in the alfalfa country. It makes dairying profitable. Two hundred pounds is more than the too little for a cow kept for dairying average farm cow produces but its purposes, although it might answer, very well among the range cows of the horseback farmers. If dairying at all, aim for the 300-pound mark. Over seventy-five per cent of it comes from proper care and feed. Care is required every day of the year but as we said in the beginning, the month before and the month following calving are the most important.

A WOMAN'S WAY OF FEEDING COWS.

At a meeting in the interests of dairying a successful dairy woman of Indiana said:

"We consider silage the most economical of all food stuffs, as well as the least trouble to feed. Bran we find the most expensive, and we wish for the day when a satisfactory substitute for it can be produced on our farms. But this far along anything to take the place of bran seems to be in the experimental stage in Indiana, and we find that to dispense with it, even when the cows are on pasture, generally results in a loss of butter of more value than the cost of the bran.

"We began January 4th last to keep account by weight of all the feed our ten cows ate in seven days, with these results: The average daily ration, fed in two feeds, was forty pounds silage, five pounds bran, five pounds clover hay and six pounds corn stover, or all the stover they would eat up clean; the bran was fed according to quantity of milk, six pounds being the most fed to any one cow. The cost of one week's feed for all wos: Silage, \$3.50; bran, \$2.85; clover hay, \$1.47; stover, 42 cents; total, \$8.24.

"The price of silage was estimated at \$2.50 per ton, bran, \$16; clover hay, \$6; stover, \$2. The butter sold during the seven days was fifty-eight pounds, which, at 29 cents a pound, amounted to \$16.82 for the week; and deducting the cost of production left \$3.58, or \$2.04 for each dollar expended on feed. The amount of milk produced was 1,147 pounds; food cost of 100 pounds of milk, 72 cents; for one pound of butter, 14-15 cents; estimated value of skim milk at 20 cents per 100 pounds, \$2. We are aware the amount of milk and butter is small, and only the good price received for the finished product leaves us a fair margin of profit.

"However, our herd, then numbering eleven cows, produced an average of 290 pounds butter during the last year, which sold for \$77.82 for each cow, and counting the cost of food for a year at \$38.60, left us \$39.22. Skim milkwe count worth \$10 a cow more, leaving the heifer, calves and manure against the cost of labor. Then we must remember there is a wide difference between selling the crops off the farm and in giving them to the cows at market value, to be returned to the land in the shape of manure, where-with to feed next year's corn crop. Then again by the aid of the skim milk we can, with careful feeding, put our fat hogs on the market twice each year, weighing anywhere from 200 to 240 pounds at from five to six months old, a result we could not pretend to reap without the skim milk. Also we must mention the heifer calves growing into cows at an early age to enlarge and improve our dairy herd. We have said nothing of the weekly trips through all weather to sell our produce, nor of all the trials and vexations which attend dairying, but with all these things considered, we think we are fairly well compensated by the cow, both for her food and for our trouble."

A balanced ration is simply a statement of the results of experiments and observation. No fixed standard can really be laid down for all conditions and the feeder must come down to his own good judgment.

WHAT NEXT?

The history of poultry in America since the middle of the last century is the story of the rise to prominence, followed by total or partial eclipse of many varieties of fowls, and the continued prominence of a very few varieties; but even those varieties that have obtained the strongest standing with the public have never attained even an approach to an exclusive position, and the most meritorious and best adapted to general needs can never steadily maintain a position of equal prominence economically and in the fancy.

The reasons for this are to be sought in people, not in the fowls or any natural laws governing the duration of their qualities. There is a popular impression that varieties, stocks and flocks of fowls will inevitably change

and deteriorate in time and that new breeds and varieties must come if standards of productiveness and vigor are to be maintained. This fallacy is frequently preached by those who ought to know better. New varieties generally will probably average better in many respects (uniformity in "fancy points" excepted), than old varieties. The reason for this is that a new variety is generally bred for some years by a limited number of skilled breeders who realize that to obtain a footing among others a new variety of fowls must have pronounced merit. Popular varieties of fowls are bred by thousands who know practically nothing of breeding principles, and by hundreds of good breeders who rely too much on the reputation of the variety, and upon the supposed fixedness of characters, and so become careless in selecting.

As a result of these conditions there often comes times in the life of a popular variety of fowls when average results with it are discouraging in comparison with those from fowls less widely distributed and really of no greater merit. This fact, and a general disposition to try new breeds, work together to bring new breeds into prominence.

As we glance over the long list of varieties that within a quarter of a century have enjoyed some measure of popular favor, it seems to us that this history shows no fowls so good that it could hold first position unchallenged, and none that might not make a strong bid for popularity in the absence of a more attractive novelty. And looking over the field to-day we wonder what is to follow the Rhode Island Red, which seems to have passed the crest of its wave of popularity, and the Columbian Wyandotte, which is now making considerable headway. We have quite exhausted the possibilities of color and outline suggested by recognized standards. Are we to have something wholly new in color combinations, or will someone produce and popularize fowls not of the dominant "American" type?

No other utensil in connection with dairying has received so much attention from inventors as has the churn. Most efforts along this line have been to get a churn that would annihilate time. The thirty to forty minutes spent in churning has seemed a prodigious waste to the hustling inventors and hence the one-minute churn has been the goal. In round numbers, more patents have been issued on churns than any other one thing. A careful analysis of the average dairyman will reveal one or more relics of this kind, due to the persuasive powers of an agent who had convinced him that he was foolish in spending so much time at the churn. In spite of all this activity for an improved article, the greater number of churns in use to-day are either of the old-fashioned dasher type or the equally old revolving barrel or box churn or its later modification, the combined churn and worker. Of these types the barrel churn is by far the best. Taking the barrel churn as best for the farm buttermaker, he should know how to get the most out of it. In this form of churn the concussions of the cream necessary to do the work is secured by the fall of the cream as the churn is revolved. The faster the revolution the greater the number of concussions a minute will be secured. But if the churn is whirled so fast that the centrifugal force created holds the cream from falling no churning will take place.

A writer in The Medical Writer says: "Other things being equal, the milk of a cow which gives a large quantity is preferable to that of a cow giving a small quantity. The former is sure to have a rugged constitution, good digestive power, depth of respiration and good physiological traits. A phlegmatic temperament in the animal is desirable."

The chicken crop is considered by the average poultry raiser as a small issue, hardly worthy of consideration or deserving of thoughtful attention, and, true to the law of compensation, fowls under such management yield no more profit than is commensurate with what has been accorded them.

MILKING MACHINE IS A SUCCESS.

The demonstrations of the milking machine at the farmers' congress attracted large numbers to the veterinary building, where the exhibition was given. In the words of Prof. Alvord of the college, "from the numerous attempts to construct a mechanical cow milker there has at last been evolved a machine which is practical. This machine, so simple that it would seem that almost any one could have devised it in a day, is the result of fifty years' work by inventors of America, Great Britain and Australia."

At the congress it has been possible, of course, only to show that cows can be milked by machinery. This is the first public demonstration in the State, with cows from the college herd milked in this way for the first time. The cows made no objection to the operation, not even the old dun cow whom the stable hands introduced as a "kicker."

For the result of continued use of the machines reference may be made to the experience of H. B. Gurler of Chicago and other dairymen in the north, to the Kansas Experiment Station, bulletin 140, to the Department at Washington, bulletin "The Milking Machine as a Factor in Dairying," and in Texas to Alexander Sinclair of San Antonio, who has used the machine for a year and a half, and who conducted the demonstration at the farmers' congress. The Agricultural and Mechanical College has purchased an outfit, which will shortly be installed.

It is accepted as proven, and beyond the experimental stage, that in the hands of intelligent and conscientious operators the cow milker is a practical machine, saving labor, producing clean milk and not injuring the cows, either in flow of milk or in physical harm to udder and teats.

Briefly described, a vacuum pipe extends above the cows, to which pipe a hose may be attached between each pair of cows; a machine consisting of can, pulsator and teat cup is placed and connected with the vacuum pipe, air is exhausted from the can, into which milk is drawn by intermittent suction through the teat cups, which by means of rubber mouthpieces clasp the teats firmly and impart to the teats by the suction a movement exactly like that made by the calf. Each machine milks two cows at once. One man can operate three machines, and can milk thirty to forty cows per hour.

THE CATTLE INDUSTRY.

There is no branch of farming that may be said to be of more importance to the tiller of the soil or to the public than the raising of cattle and much of the prosperity of the country at large depends upon this industry.

Recognizing this fact the Department of Agriculture has devoted every effort to discovering means and methods for preventing and curing the most prevalent diseases, and Texas fever, blackleg and other ailments which claimed their victims by thousands are no longer dreaded by the up-to-date farmer and stock raiser, who keeps himself informed of what Government experts and scientists are doing for his benefit.

Agricultural colleges in various States are conducting or have conducted experiments to determine what feeds or what combination of feeds makes the greatest gain at the least possible cost and have formulated tables of balanced rations composed of different kinds of forage and grains so that the farmer may choose what he can grow or what can be bought at the smallest price in his locality.

Other experiments have been made which have proven conclusively at what age the greatest gain may be made for the food consumed and even the least progressive farmer now should know what it pays to turn his steers into beef as soon as possible. The baby beef, which is one of our twentieth century products, is the result of this knowledge.

Yet other experiments have been conducted to show the superiority of one breed over another for making beef at the least possible cost of production and the farmer who wants to head the procession is now too wise to fill his feed lots with the scrubs and nondescripts of a genera-

tion ago; instead he selects the Angus, Shorthorns or Herefords, whether raising them himself or buying them from his neighbors. The short courses at his agricultural college and the live stock and farm journals have taught him the true beef form, and all calves that do not conform to that type find their way to market at an early age before they have an opportunity to consume much of the feed which can be put to better use in producing "prime beef," so much sought after at high prices.

Enthusiastic breeders with means at command have introduced into their herds the best blood obtainable in foreign countries, and offer at a nominal cost to diffuse this blood through the herds of the country, and the number of pure bred cattle in the country is great enough to warrant their sale at prices so reasonable that no man who is engaged in cattle raising can afford to be without a pure bred sire, at least.

With the advantages of to-day in the way of accurate knowledge regarding the business, there is no reason why cattle raising should not be as profitable on the high priced farm of the present day as it was years ago, when free range was the rule, providing the farmer and stockman study their own interests.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

The mammoth Bronze is the most popular turkey of the present time because it is hardy, handsome and capable of attaining a large size, some toms tipping the scales at fifty or more pounds live weight. The Bronze turkey retains its wandering instincts and is especially adapted to running in large alfalfa fields. Several other breeds of turkeys also have admirers. Second to the Bronze in popularity is the White Holland. This is a very handsome white fowl with black beard and red neck and head. It possesses a new trait for the turkey, that of domesticity. So tame is it and so little inclined to wander that many are the flocks kept upon small farms. The Narragansetts, Buff, Slate and Black or Norfolk are not so widely known except in certain localities where a few good flocks happen to be raised. The latest variety is known as the Bourhon Red, which is quite handsome. When young they are a light red or buff, but as they grow older, and especially after they molt, they are a darker color. The toms are a deep chestnut or a mahogany red, the females being somewhat lighter. The body feathers of the toms have a very narrow edge or fringe of black, while the feathers of the hens are commonly edged with white. Both males and females have white wings and a few specimens have white tails, but the larger number have black tails like their bodies. They are susceptible to training and may be educated to stay around the barn like chickens, if desired.

Lice are easy to raise with hogs, but they are not profitable.

LYNWOOD W. MARES FOR SALE.

Two handsome young mares by Lynwood W., dam by Shadeland Onward, next dam by Hamlet. Full sisters, one four and one five years old. Good size and weigh nearly 1100 pounds each. Well broken, both single and double. The five-year-old is a bay with star and snip in the face, while the four-year-old is a dark sorrel with silver mane and tail, white stockings behind and strip in face. For price and further particulars, address **E. L. MURPHY**, Sebastopol, Cal.

212 North Brown St., Napa, Cal.

"HOWARD SHORTHORNS"—QUINTO HERD—77 premiums, California State Fairs 1902-3-4. Registered cattle of beef and milking families for sale. Write us what you want. Howard Cattle Co., San Mateo.

FOR SALE—SEARCHME 2:21.

By Searchlight 2:03 1/4, dam Wanda 2:14 by Eros. A handsome seal brown gelding, six years old, 16.1 hands high, weight 1200 lbs. Good-gaited trotter, has been a mile at Pleasanton this spring in 2:16, with the last half in 1:05. Will make a high-class roadster or matinee horse. Gentle disposition and good headed and afraid of nothing on the road. Is absolutely sound, without a blemish. For full particulars address **H. OLSEN,** 814 E St., Hayward, Cal.

McKINNEY MARE FOR SALE.

Five-year-old, by McKinney 2:11 1/4, first dam by Baywood, he by Nutwood; second dam by Geo. M. Fatchen Jr. 23; third dam by Owendale, he by Williamson's Belmont; fourth dam Winter's mare Nellie by Gray Eagle. With six weeks' work over the Brace half-mile track, near Santa Clara, on July 31st, Mr. P. W. Hodges drove this mare a quarter in 34 seconds, a half in 1:12 and the full mile in 2:27 1/4 on a heavy track. This is a high-class mare and she has improved every week. She surely looks like a 2:10 trotter. For further particulars apply to or address, **THOS. A. CARROLL,** 184 West Santa Clara St., San Jose, Cal.

IMPORTED HACKNEY STALLIONS

The HUNTER ONE-TRIGGER

WON THE GRAND AMERICAN AMATEUR CHAMPIONSHIP. The contest was open to the world. Ask for our new Art Catalogue in colors.

THE HUNTER ARMS CO. - Fulton, N. Y.

The Old Reliable PARKER GUN

STILL WINS

At Boston, July 16-17-18, the PARKER GUN in the hands of Horace R. Bowser, of Hartwell, O., won the Eastern Handicap, and H. L. Snow, also shooting a PARKER, was second in this important event.

The PARKER GUN also won third high average for the three days in the amateur class. The high average in the professional class for the three days' shooting was won first, second and third with the PARKER GUN in the hands of Fred Gilbert, W. R. Crosby and Lester German. This is certainly a record-breaking list of winnings. Send for catalogue.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior. The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.
PRICE—25c, 50c and \$1.00

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

Jas. B. Campbell & Co., Manufacturers, 418 W. Madison St., Chicago, Illinois

Take It In Time

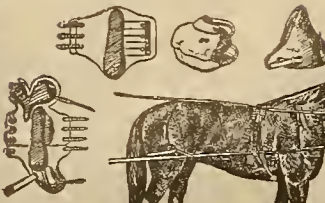

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

A PACING MARE that looks like a future two-minute performer has appeared on the California Circuit this year. Inferlotta is her name, and starting in her first race at San Diego in July she has improved at every start until in her fourth race she stepped a second heat over the Santa Rosa track in 2:04½ and could have gone faster. This is a great showing, and California having produced the first two-minute trotter and the sire of the only other trotter to get within that magic circle may also be the first State to produce a two-minute pacing mare. Inferlotta is a small mare, weighing probably 850 pounds, and can pace a half-mile in a minute any time she is turned round on a good track. She is one of the best bred pacers living. Her sire, Inferna 2:15¼, is a pacer with two-minute speed, and he is by that great pacer and four-year-old champion of his time, Diablo 2:09¼, who has sired more 2:15 pacers than any horse living. The dam of Inferlotta is Carlotta Wilkes, by Charley Wilkes 2:21¼. Carlotta Wilkes is one of the greatest broodmares on the famous Santa Rosa Stock Farm. She has produced besides Inferlotta 2:04¼, Carlokina 2:13¼, Volita 2:15¼ and Mary Dillon 2:24, a mare that has already shown Millard Sanders a mile in 2:08¼ since he took her East. The second dam of Inferlotta is Aspasia, dam of four in the list, by Alcantara 2:23, and her third dam is a great broodmare by Clark Chief 83. With such breeding as this, a faultless gait and supreme gameness, there is every reason to predict for her a two-minute record in the near future. She is six years old, sound as a newly milled coin, and with the limited training she has had, cannot have reached the limit of her speed. Her trainer, Mr. C. T. Hewitt, has handled her well so far and if anybody can fit her for a two-minute mile and drive her to that record, he can and we hope he may do it.

SONOMA GIRL has been sold for \$30,000 to Miss Lotta Crabtree, the famous actress, who delighted Californians many years ago, and who gave to this city the drinking fountain, located at the junction of Kearny and Market streets, where it has doubtless staked the thirst of millions of pedestrians since it was erected there. This is the largest price paid for a trotter in many a day, and while it is not more than the great mare is worth, it is a good sale for Mr. Springer and his partner, Mr. McLaughlin. They have won close to the same amount in purses and wagers since taking the mare East, and have now received this figure for her just as she is beginning to train off a little and lose her races. That Sonoma Girl with a little rest and care will round to and trot miles still lower than her present record in races, and a mile very close to two minutes if sent against time, we believe. Like that other marvel, Lou Dillon, she is of a highly nervous disposition, rather wilful, and is beginning to rebel a little against this continuous racing, but with a short let up she should soon be able to defeat a half-dozen Highballs and Watsons in any sort of a race. May her new owner have the best of luck with her and have the satisfaction of seeing her take a record below two minutes is the wish of every Californian.

HOW ABOUT A CIRCUIT for next year. Would it not be advisable to have the dates all selected and the early closing stakes announced by February 1st? Many entries were lost by some of the associations this year because their dates were announced too late. Let's get a move on for 1908.

THE TWO WEEKS' RACE MEETING which opens at Petaluma to-day gives every promise of being highly successful. The card includes trotting, pacing and running races, and the entries promise some high class racing. The first day of the meeting will be devoted entirely to the gallopers. During the following six days the running horses and the harness horses will divide the program, two harness races being given and four running events each day, and the last six days will be for running horses only. The entries have closed for the various harness races, and all the best trotters and pacers in the State are on the list. The purses are from \$1,500 to \$2,000 in each race, and the entries are numerous. The 2:14 pace has twenty-two nominations; three-year-old pace, ten; free-for-all pace, eight; pacers without records, eighteen; 2:10 pace, eleven; 2:17 trot, twenty-eight; three-year-old trot, eleven; two-year-old trot, fourteen; trotters without records, twenty-eight; 2:14 trot, eleven; 2:23 trot, eleven. The total entries number 172, one of the largest in California for several years. Stover has made arrangements for special trains, which will convey city people to Petaluma and back daily.

THE PUBLIC HIGHWAYS were not made for race tracks and the vast majority of horsemen realize this fact. There are a few in every community who insist on using them as speedways, but the road drivers who thus violate the law are in a very small minority. With automobilists, however, those who do not use the roads as race tracks are the exception, and county officials can hardly be blamed for framing and passing ordinances that provide severe penalties for scorching and racing on the highways. A reasonable rate of speed should be fixed for road travel and every person, be he automobilist or horseman, should be punished severely for exceeding it. Race tracks are provided in nearly every county for those who desire to see just how fast they can travel, and scorching should be confined to them.

MOTOR OMNIBUSES are proving a failure in London, and a big corporation that owned and operated a thousand of them in that great city is selling them as fast as possible and going out of business. They are expensive and unreliable, and cannot compete with horse-drawn vehicles, even on the smooth pavements of London. Hundreds of the old vehicles are to be shipped to America and foisted on corporations that are looking to establish bus lines in American cities. The motor omnibus is not a success by any means, and there will have to be many improvements made in the machines before they come into general or practical use in transporting city passengers.

A NEW WORLD'S RECORD for three-year-old stallions was made at Readville last Tuesday, when the colt General Watts by Axworthy, dam Carpet by Prodigal, won the American Horse Breeders' Futurity and trotted a heat in 2:09¼. Fantasy holds the record for trotters of any sex, with a mile in 2:08¾, and up to the time Gen. Watts made his record, Arion 2:10½ and The Abbe 2:10½ divided honors as the fastest three-year-old stallions. The fastest gelding of this age is Peter Sterling 2:11½.

ANOTHER 2:10 TROTTER for California. Athasham, son of Athadon, won the \$4,500 purse for 2:10 trotters at Readville on Thursday, trotting the second and third heats in 2:09½ and 2:09¼.

For report of the Grand Circuit meeting at Poughkeepsie, see page eleven.

A dispatch from Stockton says officials of the San Francisco Driving Club have set their hearts upon a great racing meet in Stockton at a time to be designated later. Already the San Joaquin Valley Driving Club has been asked to grant permission for a race meet during September. It is probable that the local club will invite the San Francisco club to visit Stockton and hold a two or five days' meet. Some of the fastest horses of the hay will be brought to Stockton, providing the two clubs can agree upon terms. A reply has already been sent to the San Francisco club and a meeting will be held during the week, when details concerning the meeting will be discussed. The Stockton track has been put in excellent shape and with the addition of a grandstand the club will have the best equipment in the State for big meets. Officers of the Stockton club say that it is almost a certainty that the San Francisco club will take advantage of the invitation already extended to it under the terms of its recent letter.

HIGHBALL WINS THE MASSACHUSETTS.

BOSTON, August 21.—Geers' famous racer, Highball, captured the \$9,000 Massachusetts stake, the Blue Ribbon event of the Grand Circuit meet, at Readville today in straight heats. His best time was 2:07¼ in the second heat. Sonoma Girl was the favorite and although specially prepared for this race by McHenry, she went into the air in the first heat to the intense disappointment of the great crowd. She regained her stride, but was only able to save the distance, finishing last in the field of nine. Highball lead after the first quarter and won by an open length over Axtelay. Thornfield was fifth, Genteel H. sixth, Kassona seventh, Prince C. eighth, and Sonoma Girl last. Time, 2:10¼.

In the second heat Highball was four lengths ahead of Axtelay at the quarter pole and Sonoma Girl, having broken again, had fallen to last place. At the half there was a general closing up and Sonoma Girl rushed ahead to second place. Geers warned by the crowd, sent Highball down the stretch at top speed and won by three lengths. Claty Latus was third, Genteel H. fourth, Marchal, Thornfield, Axtelay, Prince C. and Kassona finished second and Sonoma Girl fifth. Time, 2:09. Summaries:

The Massachusetts 2:14 trot, purse \$9,000.—
Highball, h g by Dr Hooker (Geers)..... 1 1 1
Thornfield, b h (Benyon)..... 5 6 2
Sonoma Girl, br m (McHenry)..... 9 2 5
Axtelay, marchel, Clathus, Gentell, Prince C. and Kassona also started. Time, 2:10¼, 2:07¼, 2:09.

ATHASHAM'S OWNER RETURNS.

D. L. Bachant and wife of Fresno returned August 11th from Cleveland, Ohio, via the Canadian Pacific, and speak enthusiastically about the grand scenery which they gazed upon on the journey. Mr. Bachant went East on June 7th to follow up the fortunes of the Fresno racing stallion, Athasham, bred by Geo. L. Warlow and purchased from him last fall by Mr. Bachant.

Athasham was in four races on the Eastern circuits, and while he won only one first prize and did not do as well as expected, yet he performed remarkably well considering that it was his first season on Eastern circuits. He came inside the money wherever started.

Mr. Bachant is more than satisfied under the adverse circumstances with the showing that the Fresno race horse made. Athasham's appearances were these up to the time Mr. Bachant left:

Libertyville, Ill., in 2:12 trotting class, won first prize in three straight heats, best time 2:11¼. This was the first race that he was entered in.

Detroit, Mich., 2:12 trot, third prize, though he did not win in any heat; best time 2:10.

Cleveland, Ohio, 2:12 trot, came in third, beaten by only half a length; best time in heats 2:07½ and 2:08¾.

Buffalo, N. Y., Empire trotting Stake, won by Sonoma Girl. Athasham was second in the fastest heat in the race, time 2:07¾.

Mr. Bachant says that Athasham has been entered with Charley De Ryder's string of fast horses down the line of the Grand Circuit races, ending with Lexington, Ky., and probably will be entered for the races at Phoenix, Ariz., and Los Angeles. He declared that Athasham had been up against some of the fastest horses on the turf, racers with records of 2:06 and 2:08.

That he did not do better, though his record for his first season is highly creditable, was due to climatic conditions, the heat especially distressing, the Fresno animal.

Mr. Bachant will remain in Fresno until after the harvest season.—Fresno Republican.

Since the above was written Athasham won a \$4,500 purse at Readville and took a record of 2:09¼.

Calvalry chargers vary from 15 to 16 hands in height, and sharp rules have been laid down about their shape, action and treatment. There are regular schools where the raw four-legged recruit is trained, and his education embraces the fearless swimming of deep and wide rivers, where possibly the enemy have destroyed the bridges. It is extremely interesting to see a thousand four-legged recruits drawn up in a vast ring around the instructor, who opens the proceedings with a sharp shot from any army revolver, writes William G. Fitzgerald, in the Circle. The animals are taught to gallop fearlessly up to a line or square of infantry who are blazing away with their rifles, of course, loaded only with blank cartridges. Lastly comes a charge upon batteries of quick-firing cannon. It is worth noting that, when smokeless powder came into general use, it was found that thousands of horses which would face without flinching the smoke of guns using black powder balked and shied at the sinister flash and roar of cordite and melinite. There appears to be as much individuality among horses as among men. Some take the flash and report very quietly, and are passed on to more severe trials, while others rear and try to bolt in abject terror.

Louisa A., the Hambletonian Wilkes mare owned by Mr. C. Z. Hebert of Salinas, reduced her record to 2:13¼ at Santa Rosa in the 2:16 class pace.

RECORD BREAKING MEETING.

BREEDERS' ASSOCIATION HAS GREATEST RACING EVER SEEN ON THIS COAST.

Large Attendance, Fast Time and Clean Sport, With Several Coast Records Lowered at Famous Santa Rosa Track.

With the Coast pacing record in a regular race lowered to 2:04½ and the Coast three-year-old race record set at 2:08½ in the pacing Futurity, and the two-year-old pacing race record at 2:13½ in another division of this stake, with a heat in 2:06½ in the 2:12 pace and one in 2:06¾ in the 2:08 pace, the side-wheel division of the harness horses was nothing short of sensational at Santa Rosa last week. The trotters of class were not quite so numerous, but a stallion trotted a mile in 2:07½ against time, and heats below 2:14 were quite frequent in the regular trotting events, and when the meeting closed on Saturday afternoon it was voted by everybody present the best ever held in California. Not only were many records broken, but the racing was keen, and

NOGI 2:17½ BY ATHABLO.
Winner Three-Year-Old Trotting Futurity.

close finishes frequent. A program of cleaner racing was never pulled off anywhere, and only one or two complaints of foul driving were made during the meeting and they were immediately considered and acted upon by the judges. There were large crowds present all through the week, and the meeting was a success financially as well as every other way.

The weather was just right for comfort, but had it been a little warmer and with less wind the wonderful records made would have been lower still. The track was in perfect condition for fast time, and Frank Turner, manager of Santa Rosa Stock Farm, under whose supervision the track was worked, came in for many compliments on its condition.

Attendance was excellent throughout. On Friday, which was a half holiday in Santa Rosa, the stores all closing during the afternoon, nearly 3,000 people were inside the gates, and on Saturday, an excursion from Ukiah and way points brought so many that the crowd was rully as large.

Absence of the gambling fraternity from the town and track was favorably commented upon by visitors. The attendance was made up of the best people, and furnished additional evidence to establish a fact which the officials of the Pacific Coast Trotting Horse Breeders' promulgated years ago, that harness racing can be successfully conducted without the presence of the crowd that has no use for sport of any kind unless gambling is made its principal feature. There wasn't a tout on the grounds during the entire meeting.

Auction and mutual pools were sold on the contests by Fred H. Chase & Co., who conducted the sales in a quiet and respectable manner. Wagering was not heavy at any time during the week, but those who enjoy the sport of having a few dollars on the result of a race were given the opportunity to indulge in this pleasure and found the odds fair in all instances. The meeting fully demonstrated the fact that gentlemen can meet and wager with one another on the result of speed contests in a friendly manner and without being pestered by a gang of hangers-on such as is always present when meetings are held in towns that are "wide open," or where a "syndicate book" is in control of the betting privilege.

The first race on the card of Thursday was the 2:16 class pace, for which there were seven starters. Mr. Zibbell's Diahlo mare Diabless was the favorite for this event. In drawing for positions Jim Corbett secured the inside, King Athby next, with Diabless, Joe Robin, Mepbisto, Uno and Louisa A. in the order named. The first two heats went to Diabless in 2:11 and 2:12, with King Athby second in the first heat and Jim Corbett second the next time. Mephisto and Joe Robin were distanced the first heat. Uno, driven by Beu Walker, finished fourth both times and did not seem to be urged very hard. In the third heat the only bad incident of the entire meeting occurred. Rounding the first turn Walker crowded Zibbell to the pole damaging the sulky and breaking the bopples of Diabless, and the mare fin-

ished behind the flag. Uno came in first, with Louisa A. second, King Athby third and Jim Corbett fourth. A dozen persons who saw Walker's rough riding tactics went to the stand and told the judges what they had seen. Walker insisted that Diabless had swerved in front of Uno and the accident was unavoidable. After hearing both sides the Judges, who were Directors Frank H. Burke, Robert S. Brown and Frank J. Kilpatrick, announced that the heat would be awarded to Louisa A., and Uno set back to last position. This placed King Athby in second place, Jim Corbett third and Diabless, who was permitted to start again, fourth. Walker was also fined \$100 for laying up the two previous heats. Great applause greeted the announcement of these decisions. Uno then won the next three heats and the race. Diabless, who should have won the event, evidently lost her chances by the foul.

Two splendid races in different divisions of the Pacific Breeders' Futurity sufficed to remove the bad taste left by the previous race, and were greatly enjoyed, although both were finished in straight heats.

The first was the two-year-old trotting division of Stake No. 5, which was for foals of 1905. Six good looking two-year-olds came out for the word and five of them were fillies, Nusado, a son of Nushagak, being the only colt. In the draw for positions Miss Dividend won the pole, and then came Idolway, Katalina, Debutante, Nusado and Bessie T. With the perversity they have shown in a majority of instances since the circuit opened those bettors comprising what is known as "the talent" made Idolway favorite for this race, but Katalina, good mannered and good gaited, well driven by her breeder and owner, Mr. J. W. Zibbell, won the race without being troubled, and trotted the second heat in 2:22½, with the first half of it in 1:09½, just to show what she could do if necessary. Idolway was second both times, and Bessie T. third. Katalina is one of but a very few two-year-olds by Prof. E. P. Heald's McKinney stallion Tom Smith 2:13¼. She is a square going trotter, with a trotting head and gives every promise of developing into a very fast one when matured. Her dam is Kate Lumry 2:20½, by Shadeland Onward, second dam C. C. L., dam of Sateen Onward 2:19¼ and Kate Lumry 2:20½, by Comhat 1038, son of Hero of Thorndale, third dam Mignonne by Mario 1359, son of Sentinel. First money in this race was \$625, and added to the \$200, which Mr. Zibbell was awarded for nominating the dam, made his net winning \$825. Mr. Zibbell won the first two-year-old trotting division of the Breeders' Futurity with Almaden. Mrs. C. A. Durfee's colt, in 1902. The victory of Katalina was no doubt very pleasing to Prof. Heald, and is an auspicious beginning for his magnificent horse Tom Smith 2:13¼ as a sire of early speed.

The three-year-old pacing division of Futurity No. 4 resulted in another upset for the wise contingent of bettors. There were but two starters, Aerolite, James W., Marshall's grand colt by Searchlight, that won the two-year-old stake of 1906, setting the record of this division at 2:15¼, and Hymettus, a bay colt by Zombro, that finished second to Aerolite in that race. Aerolite was known to be a very fast colt, and as his training had been done this year at Pleasanton, the public were aware of his abilities, while they did not know much of the speed which Hymettus had shown over the Sacramento track. Fred Chadbourne, who has trained and driven Aerolite in all his races, was up behind him in this race, while Hymettus was driven by John Quinn, who took him a few months ago for Mr. Todhunter, his owner.

The spectators were not prepared for such an exhibition of speed as the Zombro colt was ready to show. Aerolite had the pole, and when Starter Smith gave them the word Hymettus went to the front with a burst of speed that startled every one. He was at the quarter in 32½ seconds, at the half in 1:05, at the three-quarters in 1:37 and finished the mile in 2:08½, the fastest time ever made by a three-year-old in a race in California. He was in the lead all the way and while he paced the last half in 1:03½, had some speed left at the finish. Aerolite was two or three lengths back.

Cheers greeted the announcement of the time, and Quinn was congratulated on all sides for his splendid handling of the winner. Aerolite's owner and trainer were surprised, as they had expected 2:10 would win. Hymettus came out for the second heat fresh as a daisy, and again went to the quarter in 32½ seconds, where Aerolite broke, and Quinn, seeing he had a long lead, went an easy heat with his colt after passing the half in 1:05½, finishing the mile in 2:14.

The third and final heat went to Hymettus very easily in 2:13. He paced the first quarter in 32½ seconds, and the second in 31½ seconds, reaching the half in 1:04. Aerolite made a break on the back stretch, and Quinn held his colt back for another easy mile. After getting his feet Aerolite paced like a demon, and was timed the last half in 1:01¼, showing that his speed is as great as has ever been claimed for him.

Hymettus, the winner, was bred and is owned by L. H. Todhunter of Sacramento. He is by Zombro 2:11; his dam, The Silver Bell, dam of Silver Hunter 2:21¼, The Jester 2:19¼, and Zomboyette 2:16¼, by Silver Bow 2:16, second dam Maud W. W. W. 2:23¼, by Gen. Reno 4764, third dam by Bidwell's Rattler, son of Rattler 262. It will be seen that Hymettus is bred in strictly trotting lines, his sire being a trotter and his dam and grandam trotters and producers of trotters. He is a large dark bay colt,

and has two minute speed. He is the third of Zombro's get to enter the 2:10 list.

Third Day.

Friday, the third day of the meeting, brought a large crowd to the track, and before the first race was called every seat in the grandstand was filled.

The first race on the card was the two-year-old pacing division of Breeders' Futurity No. 5. There were five starters in this event, all colts but one. Again did the buyers of choice tickets pick wrong, for they made Moortrix favorite. In the draw Conqueror won the inside position and then came Ray O'Light, On Bly, Capt. Gorgas and Moortrix in the order given. The first heat went to The Conqueror, a fine looking colt, owned by the Valencia Stock Farm of Southern California. He paced the heat in 2:16, with Ray O'Light, who had made a break, second, Moortrix third. On Bly fourth and Capt. Gorgas last.

The second heat Ray O'Light won in 2:13½, the fastest mile ever paced by a two-year-old in a race in California. In this heat Moortrix was second and Conqueror third. Both the others were behind the flag. Ray O'Light took the third and final heat in 2:18 easily.

Ray O'Light was bred by Mr. Ray Mead, now of San Jose, but formerly of Hollister, where the colt was foaled. Ray O'Light's sire is Searchlight 2:03¼, has dam Carrie B. 2:18 by Alex. Button 2:26; second dam Chas. Derby's full sister, Carrie Malone, dam of Cassiar 2:22 and Carrie B. 2:18 by Steinway, third dam Katie G., dam of Klatawah 2:05½, Chas. Derby 2:20, etc., by Electioneer. He is one of the best bred young pacers in California and bids fair to be a 2:10 performer in his three-year-old form. He was trained and driven in this race by Chas. Whitehead, who seems to keep his hold on the Futurity Stakes, winning some division of it every year.

The three-year-old trotting division of Stake No. 4 was the next race, and it took but three heats to decide it. Positions were drawn by six for this event, Prince Lot getting the pole, with Reina del Norte, Zolahka, Lady H., Nogi and Carmela following. Before the start Lady H., a fine looking filly, by Coronado, showed quite lame and the judges permitted Durfee to withdraw her. The other five scored down for the word and were sent away to a good start. Nogi immediately cut out the work, Zolahka left her feet and Carmela took up her position next to Nogi, with the others changing places in the fight through the back stretch. Rounding into the home stretch Nogi kept his lead easily, and Zolahka, coming with a great burst of speed, finished second, Carmela third and Prince Lot fourth. Reina del Norte was behind the flag. Time, 2:22—very slow for this race.

The second heat was a little faster, but there was nothing steady enough to make Nogi extend himself, and he won in 2:18½. In this heat Prince Lot trotted very fast up the back stretch and made the mid-

HYMETTUS 2:08½ BY ZOMBRO.
Winner Three-Year-Old Pacing Futurity.

dle half in 1:06, but broke and finished third. Zolahka showed plenty of speed, but was rank and would not keep on a trot. Carmela showed very fast, but was entirely short of work. Nogi won the third and last heat in 2:17½. Had there been anything to make him trot, Nogi would probably have trotted three heats below 2:12. He is a grandly gaited colt, a good actor and game. He was bred and is still owned by Mr. Geo. Warlow of Fresno, a generous hearted gentleman and a true sportsman. When told that he could get all the money in the stake by distancing the others he stated that he did not desire to do that. He wanted to encourage stake racing and did not need the money, so instructed his trainer, Schuyler Walton, to win, but not to distance any more than he had to.

Nogi is by the pacer Athablo 2:24½, son of the pacer Diablo 2:09¼. His dam is Cora Wickersham, dam of the trotter Athasham 2:11¼, by the trotter Junio 2:22, son of Electioneer. Nogi won second money in the two-year-old trotting division of this stake last year.

The last race of the day was the 2:08 pace, in which six horses started. Positions were drawn as follows: Delilah, Kelly Briggs, Miss Idaho, John R. Conway, Miss Georgie and the favorite, Sir John S., on the outside. The race went to the favorite in three straight heats in 2:07, 2:06¼ and 2:06¼,

and he won easily. Miss Georgie was second in every heat and took second money, Miss Idaho third money and John R. Conway fourth. Sir John S. showed that his speed and class have not been overrated and he is beyond question one of the best actors thus far that ever campaigned in California.

Last Day.

Saturday, the closing day of the meeting, saw another crowd that taxed the capacity of the grandstand, and filled every available seat to be found elsewhere where a view of the races could be had. Over two hundred vehicles filled with people lined up along the fence in the infield, and the space on the ground in front of the stand contained a very large crowd. The day was too cool for horses to do their very best, and quite a stiff breeze was blowing. Although the track record was lowered over a second during the day, it would have had another second at least lopped off had the weather been of the sort that prevailed at Pleasanton during the meeting there.

The first race of the day was the 2:17 trot, which had five starters, with positions for the first heat as follows: Della Derhy at the pole and Verona, Carlokln, Vallejo Girl and Marvin Wilkes next in order. Carlokln was the favorite against the rest as a field, and won in straight heats in 2:13½, 2:14¼

KATALINA 2:22½ BY TOM SMITH.
Winner Two-Year-Old Trotting Futurity.

and 2:13½. In the second heat of this event Carlokln and Vallejo Girl, both McKinneys, went to the half like a double team in 1:04¼, but after this Carlokln had the most speed left and he drew away from the mare and finished the mile easily. Carlokln looks like a 2:10 trotter this year should he be compelled to go that fast when he is just right and has a good day and track.

The race the crowd had come to see was the 2:20 class pace, for which there was a stake of \$2,000 to contest for, and which had the speed marvels Inferlotta and Copa de Oro as starters, besides such good ones as Charley D., Opitsah and Tobiasco. In the first selling of pools the evening before Copa de Oro was favorite for a few pools and then Inferlotta took first place and maintained it the rest of the evening and during the next day, and did not disappoint her backers, as she won in straight heats and lowered the Santa Rosa track record from 2:06 to 2:04¼, the fastest mile ever paced in a regular race in California and the fastest mile made this year by a green pacer. Inferlotta was admirably driven by Mr. Hewitt, and her mile in 2:04¼ was not all she could have done that heat. She won the race handily. The track was lightning fast, but hard, which just suited her, and she managed to catch Copa de Oro a little off, which was also in her favor. The Nutwood Wilkes horse had received a slight injury to one of his legs on the trip over from Pleasanton, and while Durfee is certain it was not serious, the leg filled a little and surely the horse was not at his best. At that, he paced the second heat in 2:05 and went an excellent race, proving his gameness in every heat. Charley D., the McKinney stallion, also showed up well and put in three heats below 2:09 in the race, while Opitsah kept inside the flag pretty well and went two heats better than 2:10. It was a great field of green pacers, none of them ever having raced prior to this year, and the three heats are probably the fastest ever paced by horses in their first year.

Starter Smith was anxious to get them off head and head to a flying start, that fast time might be made, and refused one or two scores that seemed good enough to the crowd, but his starts were all fair and the race vindicated his judgment. For the first heat Inferlotta drew outside position, Charley D. having the pole, Opitsah second, Tobiasco third and Copa de Oro next to Inferlotta. When the word was given Ben Walker took Tobiasco to the front with a rush and got the pole from Charley D. and Opitsah. Inferlotta on the outside was in the lead by the time the first sixteenth had been covered, and then Tobiasco broke. Walker took him across the track to the outside, which compelled Durfee, Thompson and Chadbourne to take their horses back. This gave Inferlotta the opportunity to get a good lead. She was never headed. She reached the quarter in 31½ seconds, the half in 1:03½, the three-quarters in 1:36 and came the last quarter in 31½ seconds, beating Copa de Oro two lengths in 2:06½. Copa de Oro paced the last three-quarters of this mile in 1:34 or better, and was ten lengths behind

the mare going up the back stretch. Charley D. was third at the finish, Opitsah fourth and Tobiasco distanced.

The horses had now got warmed up, and with but four to take the word a faster mile was looked for. The spectators were not disappointed. Inferlotta having the pole, was protected by the starter in a few scores, in which she reached the wire a length or so back, but he soon caught them all in line and at the word they were off like a bunch of runners. Inferlotta immediately was well out in front, while Copa de Oro made a slight bobble as he struck the hard spot, where the teams entering the infield cross the track, about 100 yards from the wire. Those watching him closely thought he had thrown a shoe or a boot, but Durfee kept him to his gait, and a horse race such as was never witnessed on the California Circuit was soon on. The mare was at the quarter in 31 seconds this time and did not slacken her speed in the least going up the back stretch, as she reached the half in 1:02, with Copa de Oro about a length behind her. The next quarter was in 31½ seconds, and the Nutwood Wilkes stallion was hanging on, and rounding the turn into the home stretch looked for a minute to be gaining on Inferlotta. She seemed to have more speed left, however, and gained the slight distance he had momentarily closed. The race to the wire was a grand one. Hewitt sat motionless and the little mare seemed to strain every nerve. Durfee called on Copa de Oro and the horse pinned his ears back and tried his best. They came to the wire with the people in the grandstand on their feet cheering and waving hats and handkerchiefs. The mare's nose was at the wire in 2:04¼, and Copa de Oro was not quite two lengths back in 2:05. Nobody was noticing Charley D. and Opitsah, but they beat the flag handily and finished in third and fourth positions respectively, both beating 2:09 and having a race between themselves that would have aroused enthusiasm, but for the two horses in front. When Starter Smith announced that the track and the State racing record had both been broken, there was another round of applause.

The third heat was a good one, but as Copa de Oro made a break when he again struck that hard spot on the track, the time was slower. Inferlotta won the heat in 2:08, Durfee knowing he could not close the tremendous gap the mare had put between them when his horse left his feet. Inferlotta went an easy race to the three-quarters in 1:36¼, and here Copa de Oro had come within striking distance and Durfee let him step faster. Hewitt was not to be caught napping, however, and his little mare let out a few links and pacing the last quarter in 31¼ seconds, was at the wire in 2:08, with Charley D. second, Copa de Oro, eased up, third, and Opitsah last. It was a great race and was a fitting close of the best harness meeting ever held by the Pacific Coast Trotting Horse Breeders' Association.

During the afternoon W. G. Durfee's grand stallion Coronado by McKinney walked over for the purse for 2:10 trotters, all the other entries having been scratched, and was then sent for an exhibition mile. He started to beat 2:05. There was no runner on the track and none to be had, so Ben Walker offered to pace Coronado with the pacer Tobiasco, that when just right has two minute speed. When the word was given the handsome stallion was trotting like a machine, and rounding the first turn in 31½ seconds, increased his speed a little on the back stretch and reached the half in 1:02½, well within himself. Just before reaching the half he threw a boot, which struck Tobiasco, making him break, which put the pacer clear out of the race and from there on he was so far behind Coronado that he was of no use as a teaser. Like all the McKinneys who will not do their best alone, Coronado slackened his speed as soon as he lost sight of the pacer, but Durfee spoke to him and without using the whip or anything but voice and hand to encourage him brought the stallion under the wire in 2:07½, official time, several watches on the outside making the mile 2:07¼. Considering the weather conditions and the fact that the horse trotted the last half of the mile entirely alone, it is perfectly safe to predict that he will be able to trot a mile in 2:05 or better this year. As Coronado is sound, it is Mr. Durfee's present intention to take him East to race next year, as he considers him good enough to win in his class, his record being 2:09¼. The services of Coronado are greatly in demand with breeders, and he brought Durfee a revenue of \$3,000 this year.

Notes of the Meeting.

Sir John S. 2:06¼ did not reduce his record during the meeting. He didn't have to. But he could have done it had it been necessary. W. L. Vance, owner of this magnificent son of Diablo, says that he puts the hobbles on the big stallion in his races because he wants to be on the safe side, as he needs the money. He has driven Sir John S. quarters in better than 30 seconds without them. One would never think to see this pacer returning for another start after an unsuccessful score that he cared anything about trying to beat another horse, as he acts then like a plough horse, indifferent to everything. But once turned for the race and the front is where he wants to be. Mr. Vance says that Sir John S. can run like a quarter horse, and were it not for the hobbles he might take a notion to go away at that gait, especially if behind the others, and to keep him from doing this he hobbles the son of Diablo. After getting the word, however, if he is anywhere near in front, Sir John S. knows nothing but pace, and the hobbles could be dropped. In the final heat

of his race at Santa Rosa, Sir John S. gave an exhibition of the wonderful brush he has. He was coming back to the 100 yards mark when the others had turned and were headed for the wire. Vance turned him in front of them to take his position at the pole, and Sir John seemed to be actually loafing along, and many thought Miss Georgie would run over him before he could get into position. He got turned around, however, probably thirty yards from the start, but when under the wire was not moving at anywhere near full speed, while the others were going close to a two-minute clip. He put on steam, however, and was in the lead at the first eighth pole in just 15 seconds. His breeding shows a Morgan strain, also one of Williamson's Belmont, and is as follows: Sire Diablo 2:09¼, dam Elisa S. 2:16 by Alcantara Jr.; second dam by Friday McCracken; third dam by Signal 3327; fourth dam a daughter of Williamson's Belmont. Sweet Marie also has a Morgan and a Belmont strain on her dam's side.

The mare Era, which won the \$2,000 stake for 2:24 class trotters on the opening day of the meeting, is one of the most promising trotters that has shown up this year. Her mark of 2:12½, made in the third heat of this stake, is not the measure of her speed, and it would not surprise her owner and trainer if she should get a mark of 2:10 before the season is ended. She was bred and is still owned by Mr. William Morgan of Pasadena, and is being trained and driven by Frank Williams. She is by Zombro 2:11, and her dam is by Gen. Grant Jr. The dam of Era is also the dam of Una K. 2:14¼, and Sona 2:19, both by McKinney. A colt from her by Danube has shown a mile in 2:25, and a four-year-old by Zombro has shown better than 2:30. All these are trotters. Her only pacer is by Titus, and has shown a mile in 2:20. Nelly K. is certainly a great broodmare, as three of her get have trotting records better than 2:20, and two better than 2:15.

In all probability there was never a meeting held where a broodmare was on pasture in the infield, while two of her get won races during the same afternoon on the track. The mare entitled to this distinction is Carlotta Wilkes, whose son Carlokln won the 2:17 trot on the last day of the meeting in straight heats, taking a record of 2:13¼, and whose daughter, Inferlotta, the same day broke the State record by pacing in 2:04¼, also winning her race in straight heats. Carlotta Wilkes is one of the famous band of broodmares owned by Santa Rosa Stock Farm and has already produced besides the two above mentioned the pacer Volita 2:15½ and the trotters Carlocita 2:24¼, and Lottie Dillon 2:26¼. She is also the dam of Mary Dillon, that has worked a mile in 2:08½ at Indianapolis, and of Vallota, the sire of F. S. Turner 2:22.

Three good ones from another mare were also in evidence at this meeting. We refer to the dam

RAY O'LIGHT 2:13½ BY SEARCHLIGHT.
Winner Two-Year-Old Pacing Futurity.

of Mona Wilkes, Aerolite, and Moortrix, winner of third money in the two-year-old pacing division of the Breeders' Futurity. While Aerolite did not win he paced a mile better than 2:10 in the three-year-old stake, when he finished two or three lengths behind Hymettus, who won the heat in 2:08½. Mona Wilkes won her race easily, getting a record of 2:06½, and Moortrix showed better than 2:15 in her race. These pacers are all by different sires and out of Trix by Nutwood Wilkes. They were bred and are still owned by James W. Marshall of Dixon.

Katalina, winner of the two-year-old trotting stake, is one of the most promising two-year-olds seen in California for a long time. She could have beaten the time made (2:22¼) considerably had it been necessary. Mr. J. W. Zibbell bred and still owns Katalina. She is out of his mare Kate Lumry 2:20½ by Shadeland Onward, that he formerly raced and brought to California when he came here. The year Mr. Zibbell campaigned the McKinney stallion Tom Smith in California for Pres. E. P. Heald of the Breeders' Association, he bred Kate Lumry to him and Katalina is the result. She is the first of Tom Smith's get to start and is a great credit to him as a sire. With ordinary luck Katalina should be able to win the three-year-old

division of the stake next year. as she has shown more class than any two-year-old out so far this year.

Hymettus, winner of the three-year-old pacing stake, is the fastest pacer of his age ever seen in California excepting Directly, whose mile in 2:07 1/4 at Fresno in 1895 is among the records rejected by the American Trotting Association, consequently it can be said in truth that Hymettus holds the California three-year-old pacing record. This is the fastest mile ever made in a three-year-old pacing race. The 2:05 1/2 of Klatawah was made in a race against aged horses. The meaning of the name Hymettus has been asked by several. It is the name of a mountain in Atilla, Greece, which was the home of the famous hees that supplied honey to the gods. Hymettus is certainly "honey in the comb," and is pointed toward a two-minute record.

Mr. Mosher, the veteran driver of that very fast filly Zolahka, was unfortunate in having his mare out of condition when she started in the three-year-old stake, and hut for this she would have given the winner, Nogi, a horse race and made him trot close to 2:10. Zolahka was quite rank and would not stay on her feet, hut when squared away could show wonderful speed. Mr. Mosher informed the writer that after looking the stallion Lynwood W. over he thought him the best muscled trotting stallion he had seen in years, and nearer like old Hambletonian 10 than any horse he ever saw. It was his intention to breed Zolahka to him before his departure from Santa Rosa should she prove in season.

Mr. Charlton of Ukiah, brought his stallion Dumont S. 2:20, own brother to Sonoma Girl, to the Santa Rosa meeting and the horse was much admired. He is very much like his sire, Lynwood W., in appearance. At present he is hog fat, having been in the stud and had no road or track work. Like his sister, he has great naural speed, and if given systematic training should trot to a low record. He is buried where he is at present, there being very few mares of good breeding in that section to mate with him.

That game old campaigner Kelly Briggs 2:08 paced the second heat of his race on Friday in 2:06 1/4. He finished closer to the winner than where he got off and was separately timed by several watches in better than 2:07. Kelly Briggs is now twelve years old and has been one of the contending horses in his class ever since Sam Hoy gave him a mark of 2:10 1/2 as a four-year-old.

Delilah was shut out in the second heat of the 2:08 pace on Friday, her breaking being caused by elbow hitting. After the race Delaney put a pair of elbow hoots on her and she worked a nice mile for him in 2:07 1/4.

The handsome mare Yolande 2:14 1/4, owned by Dr. Masoero and being campaigned by Mr. F. H. Burke, was not entered at the Santa Rosa meeting, hut was given her workout there on Thursday. The daughter of McKinney stepped three heats in 2:12 1/2, 2:12 and 2:12 and could have gone faster had it been required of her.

M. Frank J. Kilpatrick of San Francisco, who is one of the directors of the Pacific Coast Trotting Horse Breeders' Association, has a string of ten young green trotters in Dick Ahles' hands at Santa Rosa track. He started four of them for records during the meeting with the following results: Lady McKinney and McKinney Belle, both by Washington McKinney out of Daly mares, trotted in 2:19 1/4 and 2:30 respectively. Dennis, by Lynwood W., took a record of 2:27 1/2, and Allen Pollak by Nutwood Wilkes one of 2:23 1/4. Mr. Kilpatrick acted as one of the judges during the regular racing in the afternoons and through the week and was the right man in the right place.

It was a great week for the Wilkes and Strathmore families. Of the eleven races, one was taken by a descendant of Electioneer through the male line, six by descendants of Geo. Wilkes and four by descendants of Strathmore. The winning sires were Caution 1, Zomhro 2, Demonio 1, Tom Smith 1, Aptos Wilkes 1, Searchlight 1, Athahlo 1, Diahlo 1, McKinney 1 and Inferna 1.

Several owners will have good claims against the railroad company if reports are true. The train that took the horses from Pleasanton to Santa Rosa ran at a very high rate of speed between Oakland and Port Costa, with the result that the horses were thrown about in the cars, and many of them badly bruised. Joe Watson's mare Explosion was one of the worst injured and could not be started in her races. She has a very hadly bruised leg and may not be able to race any more this season. Parachute was another horse that was so hadly hurt that he could not start. Mr. Zihhell's Diabless was severely hurt, hut she started, and Bessie T. by Zombro was another. We understand that several owners will file claims against the company.

Where does that pacing gait come from? Hymettus 2:08 1/2 is by Zomhro, a trotting son of the trotter McKinney 2:11 1/4, he by the trotter Aleyone 2:27, he by the trotter Geo. Wilkes 2:22 and he by Hambletonian 10, that never sired a pacer. The dam of Hymettus is a trotter that has produced three stand-

ard trotters and is by the trotter Silver Bow 2:16, son of the trotter Robert McGregor 2:17, by the trotter Major Edsall, and he by the trotter Ahdallah 15, a son of Hambletonian 10. The second dam of Hymettus is the trotter Maud W. W. 2:23, dam of the trotter Maud Patchen 2:19 1/4, by the trotter Gen. Reno 2:30 1/4 by Tyler's Black Hawk, a trotter. Now comes this intensely trotting bred three-year-old to take the Coast three-year-old pacing record and defeat the great pacer Aerolite 2:14 1/4, that is by the great pacer and race horse Searchlight 2:03 1/4, and out of a mare that throws nothing hut pacers. How do you account for it?

Della Derby 2:17, winner of last year's Breeders' Futurity and Occident Stakes, is a great disappointment so far this season to her owner, Mr. J. N. Anderson, and to her present trainer, Henry Helman, hut we think she will yet convince them and the public that she can win races. Della Derby is now in her four-year-old form, a period that is a poor one with many horses, and while having a great flight of speed, which she shows in her workouts, acts hadly when she gets into a field of horses to score down for a race. Della is one of those highly nervous mares, and were she a pacer they could put hopples on her and win, hut she is a pure gaited trotter that needs scarcely any boots, and a mile in 2:10 would be easy for her would she only keep her feet. It is not the speed at which the horses score that hothers her, hut the knowledge that a real race is on hand. There have been many high class trotters and runners like her (Sonoma Girl just at present, for instance), and we think in a year or so later she will be ready to prove she can hold her own with the best of the trotters. Della Derby is not only a good gaited mare, hut she is handsome, and looks exceedingly well in harness, as she has plenty of action and holds her head high. She was not a well mare when racing as a three-year-old, and both the high stake races won by her were hard fought, five-heat affairs. Now that she is in fine health and racing form, her highly nervous temperament is in evidence more, hut we think she will improve in another year and trot in 2:10 or better in a race. She is one of the sort it will pay to wait on. She should make one of the greatest of brood-mares.

Mr. Ira Pierce of San Francisco attended the Breeders' meeting at Santa Rosa last Saturday and saw horses of his own breeding win both races that made up the program that day. Mr. Pierce has not been in good health for some time, hut is looking better than usual, and his many friends hope to see him able to attend many more meetings. The Santa Rosa Stock Farm, of which he has been the owner for so many years, has turned out many champions, including the greatest speed marvel of all, Lou Dillon 1:58 1/4. The list of race winners, sires and great broodmares produced at Santa Rosa Stock Farm during Mr. Pierce's ownership would make a very long list. It is not often that a breeder sees horses of his breeding win every racing heat during an afternoon. Inferlotta 2:04 1/4, pacing, and Carlokin 2:13 1/4, trotting, are the horses referred to.

Berta Mac, the McKinney mare that Henry Helman is racing for Worthington Parsons of Salinas, is improving right along. She only got third money at Pleasanton, hut she moved up and took second money in the \$2,000 stake at Santa Rosa, and is capable of doing still better later on. Her record is now 2:13 1/4, and it will be below 2:10 before she retires. She is out of a mare by Altoona, and is one of the handsomest trotters that is racing in California this year. Mr. Parsons is greatly pleased with her showing so far and feels that hut for her accident a few months ago, which set her back in her training several weeks, during which time she was not speeded, she would probably have won the high stake.

Frank Williams, who trains and drives Mr. William Morgan's horses, was quite severely injured on Friday of last week by a fall from his sulky at Santa Rosa. He was working Queer Knight in the morning and the gelding grrahed a boot and fell, throwing Mr. Williams heavily. He struck on his shoulder, and while no bones were broken, he was severely bruised and did not have the use of one arm for a few days.

Sam Hoy performed quite an athletic feat at the Santa Rosa track one morning during the meeting. He was working out a pacer that stuhhed its toe and fell. Hoy made a leap and landed in front on his feet. It was a lucky jump.

Inferlotta 2:04 1/4—the fastest mile ever paced in a regular race in California. The little mare looks good for 2:00. When she made her record at Santa Rosa her owner, W. E. Valentine of Los Angeles, and her breeder, Mr. Ira Pierce of San Francisco, were present to see her do it.

There were many visitors at the stall of Lynwood W., sire of Sonoma Girl and Charley Belden, during the Breeders' meeting at Santa Rosa, and all horsemen were enthusiastic over him.

Don't forget that W. J. Kenney at 531 Valencia street is supplying the sulkies that are winning the races on the California Circuit. If you want a speed cart, one that is up to date and pleasant to ride in, see Kenney.

COMPLETE SUMMARIES, BREEDERS' MEETING.

WEDNESDAY, AUGUST 14.

Table with columns for race type, horse name, sire, dam, and time. Races include Trotting 2:15 class, purse \$800 and Trotting 2:24 class, California Stakes, \$2,000.

THURSDAY, AUGUST 15.

Table with columns for race type, horse name, sire, dam, and time. Races include Breeders' Futurity Stake No. 5, two-year-old trotters; \$625 to first, \$312.50 to second, \$187.50 to third, \$125 to fourth; and Breeders' Futurity Stake No. 4, three-year-old pacers; \$725 to first, \$361 to second.

FRIDAY, AUGUST 16.

Table with columns for race type, horse name, sire, dam, and time. Races include Breeders' Futurity No. 5, two-year-old pacers; \$560 to first, \$225 to second and \$152.50 to third; and Breeders' Futurity Stake No. 4, three-year-old trotters; \$1,351 to first, \$675.50 to second, \$405.35 to third, \$270.25 to fourth.

SATURDAY, AUGUST 17.

Table with columns for race type, horse name, sire, dam, and time. Races include Trotting, 2:17 class, \$800— and Pacing, 2:20 class, \$2,000.

TIME RECORDS DURING MEETING—TROTTING.

Table listing time records for various horses and drivers during the meeting, including Guy Dillon, Lady McKinney, McKinney Belle, Cleo Dillon, Coheck, Mogolore, Sadie Moor, Dennis, and Allan Pollak.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Petaluma	August 26-31
Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12
Santa Maria	October 22-26

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair)	September 23-28
Spokane, Wash. (Inter-State Fair)	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

Grand Circuit Dates.

Providence	August 26-30
Hartford	September 2-6
Syracuse	September 9-13
Columbus	September 16-27

Petaluma meeting opens to-day.

Special trains will be run, leaving San Francisco at 10:30 A. M. and returning after the races.

The purses for trotters and pacers at Petaluma are the largest on the circuit this year.

The Woodland folks are a little jealous of Santa Rosa track records and will fix their track so the horses can go faster if they are able.

The biggest crowd ever seen in Sacramento will be at the State Fair this year, and the exhibit is to be the best on record.

A two-year-old by John A. McKerron has paced a half in 1:08 this year back in Ohio.

Inferlotta 2:04½ was bred to Audubon Boy 1:59¾ late this year and is thought to be with foal. The produce should pace in two minutes.

Sir John S. 2:06¼ and Copa de Oro 2:07¼ are both entered in the \$5,000 stake at the Oregon State Fair. Inferlotta was not entered in this event. More's the pity.

Castanada by Don Derby 2:04½ won a five-heat race at Lansing, Mich., August 7th, his fastest heat being 2:09¾. He is out of Cyrene by Guide, a mare now owned by Mr. E. A. Howard of Oakland.

Dan Patch went his mile in 1:56¼ at Galesburg. Every quarter was faster than a two-minute clip. Will he ever quit? He is the perennial champion, and seems good for years to come, as he is sound and all right.

Crown Prince, said to be a son of Dexter Prince, entered the 2:30 list at Parksville, Long Island, August 10th, by winning the 2:30 trot, in which he took a record of 2:22¼.

A half-dozen trotters have beaten 2:08 in races on the Grand Circuit already. It takes a horse that can trot at least one mile in 2:06 to win the big trotting events on that circuit.

Jack Curry has had to refrain from driving this year because he is suspended for unpaid entrance on several horses he did not own. Drivers and trainers cannot be too careful when making entries:

George G. 2:05¼ won his first start this year at Poughkeepsie, and the fastest heat in 2:07¾. He is good and should win when heats are right at his record. He is nearly as fast a trotter as Sonoma Girl.

Sonoma Girl 2:06½, and winner of the M. and M., looked good to many, but Sonoma Girl, sold for \$30,000, looked better to many more.

Maud Fowler 2:21¾, dam of Sonoma Girl, is looking fat and fine at the farm of her owner, Mr. Sampson B. Wright, of Santa Rosa.

The Petaluma meeting opens to-day with five running and one trotting race on the card. All next week there will be two harness races and four running events.

Every inch of space in the pavilion at Sacramento is taken for exhibits at the California State Fair. The display of live stock of all kinds promises to be the best and most extensive in years, while the racing program is high class, all the best trotters and pacers in the State being entered.

The protest that was made against permitting Sonoma Girl to start in the second heat at Buffalo has been withdrawn, and the money was paid as the judges awarded it.

There will be no betting at the California State Fair, but this will not stop the trotters and pacers from racing.

Mr. L. Richardson of this city took many fine pictures of the finishes in the different races at the Breeders' meeting at Santa Rosa last week, and is supplying them to horsemen.

Three days' racing will be held at McMinnville, Oregon, on September 5th, 6th and 7th. Entrance to each race is \$25, to which \$100 is added by the proprietor for each race. The money is to be divided 60, 30 and 10 per cent.

Geo. T. Beckers of Los Angeles has sold to Mr. L. R. Ligler of Phoenix, Ariz., a handsome weanling stud colt by Zombro for \$500.

Highball won the Massachusetts \$10,000 stake at Readville after all. The let up did him good, and if Sonoma Girl had had one she would probably have beaten him.

Easter Direct, that reduced her pacing record to 2:09¼ at Poughkeepsie, is by Direct and out of Cleo G., by Yosemite. She was bred by E. A. Gammon of Courtland, Cal., and is a half-sister to his filly Cleo Dillon, that trotted to a time record of 2:38 at Santa Rosa last week.

Sheriff Montgomery and Mr. A. B. Rodman of Yolo county have sold their fast trotting stallion Tuberose 2:25¼ to Mr. H. J. Kincaid of Nevada.

Peter Saxe & Son shipped on Saturday last by steamer Enterprise to Hilo for the big ranch of Mr. Shipman a very select lot of full-blooded stock. In the consignment were five Hereford bulls, two Short-horn bulls, two Holstein bulls, twelve Angora bucks, two Poland-China boars, one draft stallion, and one trotting-bred stallion of McKinney stock.

John Caldwell 2:08½ and Lucretia 2:14¼ do not seem to be as close to the money in their races this year under the reinsmanship of Ed Geers as they were when James Thompson had them. It looks now as if Thompson would earn more with Col. Kirkpatrick's California string than Geers will with the Grand Circuit performers owned by the Colonel.

Fred H. Chase & Co. will hold a combination sale of well bred trotters and pacers at 473 Valencia street, this city, October 14th. Several owners have already arranged to consign them horses, and there are several with fast records among them. The market for good roadsters and speedway horses is excellent at the present time, and now is the time to sell. Write to Chase & Co. for particulars.

Much interest is being taken in the races to be held at the Vallejo track on September 2d, Labor Day, under auspices of the San Francisco Driving Club. Four races will be on the card for that day, with purses ranging from \$100 to \$150. The facilities for reaching Vallejo from this city are first-class. Trips can be made by boat or train at convenient hours, and return after the races.

Thornway, son of Steinway, is making good in great shape on the Grand Circuit. He won the \$3,000 2:12 pace at Readville last Wednesday in three straight heats, time 2:07¼, 2:05¼ and 2:05¼, beating such pacers as Hidalgo, William C., Major Marlow, Reproachless, Alice Pointer, Johnny Smoker, Shaugran and Bonanza. As Sonoma Girl was beaten at Readville that day Thornway considered it was up to him to keep California blood in front.

The new pacer Alice Pointer 2:05½ looks like another 2:03 pacer for her sire, the one-time champion pacer, Star Pointer 1:59¼.

In spite of the fact that no betting was permitted at Cleveland this year, the meeting was a financial success.

There seems to be no room for doubt that the horse is here to stay, says the Rural World. He has met many an alleged annihilating foe, but has survived them all. First, there was the canal, guaranteed to take all value out of horses; then came the railroad, a hauler of burdens that no horse could successfully compete with; then the electric street car put in an appearance, and from that time on horses were not to be worth raising; then followed the bicycle, everybody began to ride it, and of course the carriage, bus and saddle horse would henceforth be without value, making horse raising unprofitable to the last degree; and at last, unkindest cut of all, came the auto car, 'bus, truck, delivery wagon, run-about and the extinct horse seemed to be inevitable. But this noblest of all beasts survived every attack, repulsed every enemy, disappointed every prophet of evil, and is here today, triumphant, courted, sought after, longed for, and bringing on an average more hundred-cent dollars each, than it ever did before. Verily, the horse is here to stay!

A TIP FOR STARTERS.

[From the Goshen Independent-Republican.]

The Goshen Driving Club is very fortunate to have for its starter a practical horseman, Mr. Mills having been a breeder, trainer, race driver, and an acknowledged authority in light harness horse matters, long before he began to ring the bell and warn the reinsmen not to score down ahead of the pole horse. Mr. Mills does not permit as much scoring as most starters, and the less he lets the horses score the more he pleases the people—who come to the race track to be amused, and want short, snappy racing, and not endurance contests.

Last week at Brighton Beach was run off the Brighton Handicap, total value \$25,000, and first money \$20,000. Now, no trotter ever won \$20,000 by coming in first in a trotting race, and, mind you, the runner had only one chance at a breakaway. If he got off badly, or got left at the post, never mind; the rest went on just the same! But in a \$25,000 trotting race—if there was one—the horses would probably score from two to six times before getting the word for the first heat, and it is the tedious scoring that causes more complaint from the sport-loving followers of the turf than any other one thing.

The late John A. Goldsmith was as capable an all-round horseman as America ever produced. He only lived to be 36 years of age, yet he had won the Charter Oak \$10,000 race, with Director; the \$10,000 M. and M. with Siva; the Kentucky Futurity, with Oro Wilkes, and never drove a match race he didn't win. Frank Herdic, the pool-seller, said Goldsmith could bet more money on his horses and then get in the sulky and give them a better drive than any professional who ever went down the Grand Circuit, and the last year Goldsmith had his health he won \$52,000 during the season, and all of it with horses educated by himself. This, alone, proved his ability.

Although Goldsmith had taken a hand at almost everything else connected with life on the turf, he had never started horses, always wanted to do it, and his opportunity came to him when he was requested to start them at Goshen. His work in the starter's stand amazed every one. The first time the horses came down on the trot, he sent them away, paying great attention to the horses being on their stride, and almost no attention to their being head and head. He explained, afterwards, that in driving races himself, and for the biggest amount of money, he was always praying to get the word even if a length or more behind; that so many horses began to act badly after two or three scores who would have been all right if sent away on the first score—in other words, Goldsmith was always in favor of reducing the scoring to the minimum.

OLD TIMER.

TWO CHAMPION PACERS.

One day last week The Broncho, champion pacing mare, was hitched for the first time since she was fired and turned out last spring. The great little mare is going sound on the leg treated for spavin, and acts as if she would stand training next year after her foal by Willie Benton 2:06¾ is weaned.

There never was a pacer the equal of The Broncho as a racing machine against other horses, says H. T. White and when it came to a tilt with the watch she was equally supreme, her mile without wind shield or pacemaker being the best of that sort in the books, just as her three heats in a race against other horses.

That the daughter of Stormcliffe will throw speed is not doubted by the experts, as she has the gimp and vitality that goes with a good broodmare, nearly all the great producers of speed at the trot and pace having been pony built matrons with a lot of resolution. That in a majority of cases the dam has more to do than the sire in the making of a fast horse of any sort has been the belief of breeders for many years, and the mares that in their racing career are fidgety on the racetrack and able to look out for themselves in the stable as well are the ones that will give to the foals their greatest vitality and then see that the youngsters get all that is coming to them in the pasture.

But the champion pacing mare is not more in the public eye just now than the best pacing stallion, Dan Patch. The old horse, whose unequalled speed always is on tap, paced a mile at Galesburg last Tuesday in 1:56¾, each half alike, and the occasion was made a notable one for the family through his daughter, Donna Patch, winning two heats of the 2:18 pace in 2:08¼ and 2:06¾. It is beyond question that Dan Patch will sire his full share of speed, his representation in that line already being creditable, although on account of his high service fee he has not been mated with a great many mares aside from those of his owner during the last three years. It is worth noting that, although Dan himself is a horse of wonderful disposition, quite a percentage of his colts old enough to be trained have shown both intelligence and temper, the one that took a mark of 2:06¼ at Galesburg having decided opinions of her own about certain matters.

Ruth Dillon, daughter of Sidney Dillon, won the three-year-old trotting stake at Lebanon, Ind., August 13th, beating six others. The race was best two in three, and the Santa Rosa bred mare won in straight heats in 2:21¼ and 2:17¼. Ruth Dillon is out of Russie Russell by Bay Rose 2:20½, second dam Oakley Russell by Happy Russell.

ZOOLOGICAL GARDENS IN THE UNITED STATES

The question of what shall be done to stimulate interest in zoological gardens in the United States is being much discussed among zoologists who recognize the educative value of exhibits of wild animals. The interest of enlightened peoples of the world in animals brought from the wilderness is as old as history. More than thirty centuries ago the Chinese maintained zoological gardens, known as parks of intelligence, for the amusement and education of the people. Babylon and Thebes had their menageries. The wealthy Greek aristocrats ornamented their country places with wild animals that figured in the chase, also with ornamental song birds and waterfowl. As early as 1552, the imperial menageries of Ehersdorf were established and fights between lions were provided for the amusement of the German princes and their friends. Another use to which animals were put was that of making sacrifices to celebrate the birth of royal children.

When Cortez invaded Mexico the royal zoological garden maintained by Montezuma covered an immense area, and in the aviary alone 300 keepers were employed. The aquatic birds alone consumed 250 pounds of fish daily and birds and beasts of prey were fed upon great quantities of poultry. The Aztecs manifested not only a keen interest in collecting birds and animals, but also no little ability in attending to them properly in captivity. The Spaniards destroyed the enclosures, killing many of the animals and allowing others to escape, and from the first quarter of the sixteenth century until 1847, when Andrew Downs established a zoological garden in Halifax, Nova Scotia, no exhibition of wild animals existed in North America.

In 1860 the only zoological gardens in the United States were in Baltimore and New York. A gift of a dozen swans from the city of Hamburg to the city of New York formed the beginning of the Central Park Zoo that year, but it was not until several years afterward that keepers were employed and the collection of birds and animals materially increased. Ten years later New York made Chicago a present of a pair of swans and these two birds formed the nucleus of the Lincoln Park Zoological Gardens. About that time Davenport, Iowa, established a zoological garden and Philadelphia and Cincinnati followed suit in 1874. As late as twenty years ago there were but a dozen collections of wild animals in this country, where there are at present about sixty, aggregating about 4,000 acres of land and containing between 11,000 and 12,000 animals.

Many of the zoological gardens in this country have been established as the result of gifts. Some fifteen years ago a public spirited citizen of Atlanta presented to the city a fine collection of animals and two Atlanta newspapers added in the establishment of the "zoo" by presenting an elephant and lion. The present zoological gardens at Buffalo resulted from the donation of three half-breed lions. One of the discouraging misfortunes incident to the growth of the Buffalo zoo was the loss of two fine black elk, who fought a duel to the death. A zoological garden originated in Nashville in a peculiar manner. A wild West show was loading when a buffalo hull slipped from a chute and broke its leg. He was left to die, but the interest of a physician was enlisted and after the animal had been given a narcotic and put in a sling its leg was set. So many people rode out on the street cars to see the animal that the company realized the possibility of attracting business in this way and began the formation of a menagerie.

Although zoologists have done much to promote interest in wild animals in this country, the United States is still much behind Europe in the matter of well equipped and widely distributed exhibits of animals. It is widely asserted in this country that the fault lies somewhat with the so-called upper classes. In the larger cities of Europe zoological gardens are the chief center of attraction. The aristocracies of birth, wealth and intelligence are interested in their maintenance. The zoological societies at Amsterdam and Rotterdam number no less than 5,000 members. It is considered an honor to be on the membership rolls, and if a well to do citizen declines to become a member he is not admitted to the gardens even upon the payment of a fee. In London the King is patron of the zoological society and the Prince of Wales is vice-patron.

Many of the zoological gardens in this country are free to the public. In Europe none are free, save the Jardin des Plantes in Paris. Some of our zoological gardens are maintained by amusement parks or street railways, but a majority of them are kept up by the cities. The Bronx Park Zoo in New York and the Philadelphia Zoological Gardens are kept up by zoological societies, while the National Zoological Garden in Washington is maintained in part by the National Government, under a special act of Congress of 1890. These three gardens are the most important in this country from a scientific standpoint.

Aside from the Jardin des Plantes, the European gardens make no concession to the public except a reduction of admission fees on Saturdays and holidays. The result is that the poor are practically excluded, while in America they enjoy the benefits of the exhibitions. So great is the crush of people in the Jardin des Plantes there is often danger to the barriers which protect the cages. Generally speaking, European zoological gardens pay dividends, while those in America are an expense. An exception to the rule in this country is the Cincinnati Zoo, which has made money recently, although it has had hard times in its career. In most of the gardens of Europe the restaurant concession pays handsomely. In Berlin the restaurant privileges are leased for \$15,000 a year, and the restaurant is immensely popular as a dining place.

William T. Hornaday, director of the New York Zoological Society, and an authority upon natural history, says that the American gardens should have both high priced and low priced restaurants, concert halls, plenty of shade and flowers, immunity from political interference, and the normal support of the wealthy and intellectual classes in every city. Where it is possible, enclosures should be large enough to admit the animals being kept in something like their natural state. In the average park the enclosures are too small to admit of the animals being healthy and contented and in the great game preserves they are hidden in the forests. One of the chief reasons for the need of commodious quarters is that of economy. Where spaces are too small the death rate is high. In all of the larger institutions the animals are not only given expert attention and dieted scientifically, but well equipped hospitals are provided for their treatment when they become ill or injured. Such advantages are not enjoyed in the smaller gardens and many of them die from inattention.

Students of the habits of birds and beasts have learned how to combat in a great measure the evil effects of confinement upon creatures used to unlimited spaces and plenty of exercise. Medical hooks telling what measures should be taken to prevent tigers from having indigestion and elephants from having sore feet are upon the shelves of the larger zoological gardens. One of the animals which fares worse in small spaces is the American buffalo. Although no scientist has been able to explain it, experience shows that when a herd of buffalo is enclosed in a space which does not give them the freedom to which they have been accustomed, there results a high percentage of male calves. Another peculiarity is that the young buffaloes are frequently not hardy. Upon a large range the buffaloes breed as readily as cattle, and as they are not particularly wild or shy, zoologists can find no theory by which to account for the peculiar results experienced in breeding them.

The only zoological garden in which wild animals is now presented to sightseers in their natural state is the one recently established in Berlin by Carl Hagenbeck. By clever landscape gardening he has produced the jungle, the mountains, plains and woodlands in which the wild animals are found. Between the spaces allotted to the different varieties are no visible enclosures. Each space is bounded by a deep ditch so concealed by shrubs that it is not visible to the visitor. The sides of the ditches are concave and it is not possible for the animals to escape from one enclosure to the other, or to molest persons inspecting them. The animals of kindred species are confined together. Antelopes, zebras and buffaloes are seen grazing in a group, while the elephants and their kind are allotted another space. The polar enclosure represents a large iceberg, being made of houlders and in this "iceberg" the polar bears have their dens.

Large Cougar Killed.—Warren Stitt, the young son of Dr. J. W. Stitt of Berkeley, recently returned to Berkeley with the skin of a monster California lion which he killed after an exciting hunt in Lake county. The lion was killed in Cache Creek and is said to be the biggest of the cat tribe ever killed in Lake county. Young Stitt was out hunting for deer, when he came upon the animal in the brush. He was equal to the occasion and managed to bring the beast down with two well-aimed shots. He dragged the carcass back to camp and thence brought it to Berkeley. He will have the skin stuffed and mounted.

The initial arrests and convictions of alien hunters for violation of the bunters' license law was consummated by Game Warden Neale of Sacramento, who arrested two Greeks in Yuba county for hunting without a license. The pair were tried in Wheatland two weeks ago, convicted and fined \$20 apiece. This case, it is believed, will have a salutary effect upon their fellow-countrymen. It has been claimed that many Greek laborers in the employ of railroad companies now building lines in Superior California have been ignoring the law and have been slaughtering birds and animals indiscriminately.

FIRST TUNAS OF THE SEASON.

James Maynard Jr. and Ed N. Ayers, two popular and well known sportsmen of San Francisco, two weeks ago had the distinctive and much-sought-for honor of capturing the first leaping tunas at Catalina Island for this season. Both the Tuna Club and the Light Tackle Club offer prizes to the successful angler who lands the first specimen of this gamey variety of big sea fish each season at Catalina.

The presence of tuna in great numbers was apparent rather earlier than usual this year. During the latter part of June the fish were observed jumping from the water a few miles off shore all the way from Avalon harbor to Seal Rocks. Every boat in the harbor, and there are about fifty of these craft for the use of salt-water anglers, has at one time or another been out after the tuna, only to return with a dry fish-box so far as the big fishes were concerned. They have been tempted with all kinds of bait, from flying fish to sardines, but the tuna were indifferent and would not gladden the hearts of the many anglers and strike the baited hooks, although on most occasions the fish were seen breaking water on all sides of the angler's launch. The spectacle of the fish going through these maneuvers is an exciting one, but at the same time exasperating when they cannot be coaxed to take the lure.

Several years ago it was not such an uncommon sight to see tuna flags proudly displayed from the masts of the fishing launches when they returned to Avalon after a morning's fishing. Of late, however, the tuna have been conspicuous by their absence, only four of these fish being taken, it is reported, in the waters of Catalina during the season of 1906.

It remained, therefore, for Maynard and Ayers to break the ice, and, as it happened, they were equipped with light tackle, which fact adds greatly to the piscatorial honor of the capture.

The first tuna was taken by Mr. Maynard on the 6th inst., after a fight of 45 minutes before the fish was gaffed. The fish weighed 42¾ pounds—this weight was a mere trifle of 1¾ pounds less than the required weight of 44½ pounds to entitle the angler to one of the Catalina Light Tackle Club's gold huttons, instead of the silver hutton. A 9-ounce greenheart rod, a 9-thread cuttybunk line and a 7-0 O'Shaughnessy hook baited with a sardine was the tackle used. Mr. Maynard's second tuna weighed 36 pounds. Mr. Ayers' tuna turned the scales at 38 pounds. This fish was taken on a 9-ounce lancewood rod, with line, hook and bait the same as Maynard used. Each angler had about 900 feet of line on his reel, this quantity of line being considered necessary in tackling a tuna.

To win the club prizes the angler must bring the fish to gaff absolutely unaided, a broken rod disqualifies the catch. Club officials are always at the landing to weigh prize-winning catches and inspect tackle, thus making the catches matters of record.

The launch bired was in charge of Chappie, one of the oldest and most skillful of the Avalon boatmen. To the boatman bringing in the most prize-winning catches handsome trophies are offered by the fishing club. Thus far this season Chappie is way in the lead.

To win a gold tuna hutton the fish must weigh 44½ pounds or over. A silver hutton fish runs from 33 to 44½ pounds. This must be done with light tackle only under club rules. The grand prize, however, is the Tunt Club's blue hutton. To acquire this lapel ornament the angler must land a tuna weighing 100 pounds or more. This feat has been performed, but always in the past with 24-thread lines, at least, and beaver rods.

Besides the tunas, the two anglers landed yellowtail until they were too tired to fish further. One day these grand fighting fish were so plentiful that the two fishermen took the count and had to stop. The fish ran from 20 to 25 pounds and had their captors completely knocked out. All of this catch was brought up to the launch and was then released without being gaffed. One day's fishing the various fish were so plentiful that the anglers stopped trying for the smaller fellows and devoted the balance of the day in quest of a gold-hutton fish. The tunas taken by Maynard and Ayers were the only ones captured so far this season until last week, when another tuna was landed by a lady angler. This fish was of the yellow fin variety of tuna, however.

The best records made by the Light Tackle Club so far this year are as follows:

Black sea bass—F. C. Gay, 100 pounds.
White sea bass—F. C. Gay, 45½ pounds.
Yellowtail—F. C. Gay, 28¾ pounds.
Albacore—W. Vaughan Scott, 28¾ pounds.
Rock bass—F. C. Gay, 1 pound.
Corhina—Eugene Elliott, 61.3 pounds.
Yellowfin—A. M. Morse, 3¾ pounds.
Tuna—James Maynard Jr., 42¾ pounds.

Catalina Island is frequented every year by many seasoned anglers from all parts of the East and also by English and other European rod and reel experts, and the struggle for the fishing club prizes goes on with zealous persistence, and systematic effort all through the fishing season.

Sas Francisco Fly-Casting Club.—The finals in the medal series of fly-casting contests for 1907 will take place at Stow Lake Sunday morning, August 25th.

After the contests are over the members and guests will devote their attention to a substantial lunch, which will be spread in the club-house.

ENGLISH SHOOTING SCHOOL METHODS.

The following description of a visit to an English shooting school, which we copy from the Shooting Times and British Sportsmen, shows how they do it across the pond. Game shooting there is the rich man's pastime and the lesson costing 1£, or \$4.80 odd of our money, is inexpensive preparation for the season's sport.

Tuition in America is secured without price, but not always under the eye of a well informed, experienced teacher who can point out the errors. Practice is relied upon mostly to make skillful the apt beginner.

"It was a common report not so long ago that the various processes of trade were conducted on a principle described as 'rule of thumb.' The charge was true enough. Man relied upon experience, and despised method. The same may be said of various branches of sport, and especially of shooting. The good shot was the experienced shot, and proficiency was rather the result of years than of precise knowledge. Let us recall how the old shot, and particularly the keeper, laughed at the try-gun when it was introduced, just as the old machine fitter sneered at the micrometer gauge, the photographer at the exposure meter and the decimal system of weights and measures. What a change in a few years! Now almost everything is reduced to an exact science.

"Probably in no branch of trade has greater progress been made on these lines than in gun-fitting. Gun-fitting is a science, and the would-be shot is now spared the expenditure of time and money involved in gaining knowledge only in the actual field of sport. But the expert gun-fitter must have something more than a try-gun in order to equip his customer with a weapon that suits his individual peculiarities. He must have appliances which will enable him and his client to see and correct mistakes; and these appliances to be of any educational value, must provide conditions which conform as far as possible to the conditions which actually prevail in the field. In short, the pupil must go to school.

"It was to one of the institutions that we wended our way a few days since. Taking the train at Baker street, we found ourselves at Neasden, and in the charming and picturesque ground of Messrs. Joseph Lang & Sons, Ltd., of New Bond street. There, in a beautifully wooded and secluded spot it required no effort to imagine ourselves miles and miles away from the metropolis, but when the sport began, so realistic was it all that it did really need a great effort to believe that it was all artificial, and that, after all, it was not a bright September morning, and that we were at school taking lessons in the divine art of shooting. We took our turn at the big targets to see if the guns fitted. 'You are shooting a little to the left,' remarked the genial headmaster. 'Just let me alter the gun,' and we begin again. 'Good! Dead on, and a kill every time. Take that rising bird, will you please? Ah, on his tail. Let me straighten the stock a bit.' This done, every bird was in the center of the pattern, and killed as dead as a stone each time.

"Now we walk the covert in line, just as we walk up partridges. 'Mark!' cries the beater, and a couple of clay partridges are winging their way across the fence. The first bird escapes. 'A little too quick, sir.' The second bird is crumpled up in fine style. 'Mark! Mark! To your left, sir. Under him this time.' 'No; we think not,' we exclaim; 'seemed dead on him.' 'No, sir; a good deal under him. Try another at the same angle, and hold well up.' The correction was good; a common fault was pointed out and rectified on the spot. There were no more misses of that order, though there were others in which we declared that the fault was not as pointed out by our instructor. But his keen eye did not fail him and we accepted the necessary correction with pleasing and profitable results.

"Now for a few driven grouse! We take our place in the huts. By jove! how they whizz! We were not ready and we lost both. The next lot is, however, wiped out. But a repetition of our performance was not to be our good fortune.

"We were making mistakes, misjudging speeds and miscalculating distances. Our painstaking instructor came to the rescue, and after more corrections, the exactness of which we momentarily doubted, we plastered them in fine form, and were dismissed as fairly proficient shots, loaded with tips, which we shall put to use when August 12th comes round.

"Would you like a woodcock or two? 'What, here?' we answer. 'Why, yes.' A short walk across a field, and we enter a lovely shady grove. Just the place for cock, if it were only in some other part of the country, and the weather were not so warm. We traverse this beautiful natural avenue, and suddenly a dark object flits across the grove. Cock, sir! But it was gone. 'Look out, sir! Another.' But he, too, puts the trees between himself and the guns, and is safe. Another and another gets up, with varying results. How natural is it all, and what excellent fun! Never before have we seen such an imitation of the real thing. We are loth to leave this lovely peaceful spot; hut time is fleeting, and we have yet to account for some driven pheasants. We take a few rabbits on our way back as they gambol through the hushes, and try our aim and activity to the very utmost.

"And now for those pheasants. 'How high is that tower?' 'One hundred feet, sir.' It looks twice as much. The birds come thick and fast, but they are missed with an unpleasant regularity. 'Follow

forward and you will get them,' says the watchful master. 'More—more yet. Good!' Down they come. But who ever thought they wanted so much allowance? There is no denying it—the proof of the instruction was found in the killing which rewarded our persistent efforts and those of our instructor.

"We wind up our day having learned and unlearned a lot—discovered in a few minutes what might have taken days to find out in the field; and we make up our minds to have a few days' practice at Messrs. Lang's beautiful grounds before the opening of the shooting season; and if when that long-looked-for event arrives our percentage of kills is not considerably increased we shall be very much astonished. Too much cannot be said for the value of such schools as these. They are of as much utility to the old hand as the beginner—probably more so, since all men habitually make certain misses in shooting and get confirmed in them, and may be heard to remark that they never could take birds going this way or that. Any particular shot can be imitated at Messrs. Lang's school and the weak points of any man's shooting improved in an incredibly short time.

"Although Messrs. Lang have not had possession of the ground very long, they have made wonderful progress in imitating all that is natural in the sport, and the grounds are not only adapted to the study of shooting, but are so planned as to afford the utmost pleasure to those who want a few days' shooting out of season."

Casting Tournament.—At the coming Racine casting tournament the card for the first day is professional half-ounce accuracy bait-casting, professional accuracy and delicacy fly-casting, quarter-ounce professional accuracy bait, and amateur distance fly-casting. A professional distance salmon-casting event also will be put on.

The amateurs have the other two days to themselves. Delicacy and accuracy fly, distance and accuracy fly, and quarter-ounce accuracy bait are the second day's card; half-ounce accuracy and half-ounce distance are the third. Team events will be arranged by the committee.

For the benefit of casters the existing record for bait casting, in the 2½-ounce class, is held by John A. Roosevelt of New York, at 204 feet 3 inches, the average of five casts in a lane thirty-five feet wide, with seven and a half foot rod. R. H. Wood is credited with a single cast of 250 feet, with nine-foot rod, and no restrictions as to accuracy. Roosevelt made his record in 1884. Wood made his in 1885.

In the half-ounce game, an average of 185 5-6 feet for five casts on the lawn stands good, but 194 feet 8 inches is the longest cast on the books, although it has since been beaten by Charles U. Stepath of New York, and Reuben C. Leonard. Both cast over 200 feet in the New York sportsmen's show.

Pheasant Slaughter.—Many complaints have been received as to the ruthless slaughter of pheasants in the vicinity of Grand Island, on Cosumnes River, near the Slough House and Walnut Grove. The Japanese and Russians have been killing these beautiful birds, which were imported, and are protected by the law. The killing of the pheasants has aroused the authorities and some of the men who have broken the law are known, and if found will suffer the full penalty.

Another case of law breaking is the killing of quail near Siebeck's, on the Upper Stockton Road. Portuguese defy the law and even commenced their shooting before the open season on doves began. Two Portuguese are under suspicion.

A maximum fine of \$100 or imprisonment for 100 days, or both, may be imposed. The authorities are anxious to apprehend these violators of the law and make examples of them.

Crippled Geese Colony.—T. S. Bolt, a prominent Gridley sportman, last week discovered on the land included in the Gridley Fishing Preserve a colony of 194 wild geese, no one of which was able to fly. They had been crippled by hunters during the past hunting season, and consequently had not been able to get away, and were unable to accompany the myriads of geese which go to the Alaska and Arctic regions early in the spring. They therefore formed a band, and made the most of the splendid climate of Butte Creek during the summer. So far there is no direct evidence that geese breed during their enforced stay in this locality, and we do not care to risk incurring the charge of nature faking by stating that they do, but it seems quite likely that there may be many goslings among the flock. Mr. Bolt captured alive a number of the geese and will use them as decoys the coming winter.

Salmon Running.—For the past two weeks many local anglers have greatly enjoyed the exhilarating sport of trolling for salmon inside the Heads. The favorite fishing grounds are off the Bolinas beach. Numerous big catches have been made, one boat accounting for over fifty salmon, ranging from 3 to 40 pounds. The fish are fresh run ocean fish and in splendid condition. The quinnats are feeding on the vast schools of sardines and anchovies, hooks baited with one of these have been the best lures.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

AT THE TRAPS.

The Union Gun Club trap season will close with the shoot scheduled for Sunday, September 15th.

At the August shoot, held at Ingleside on the 18th inst., the winner of the Du Pont trophy race was Bert Patrick, who scored 22 out of 25 targets. The winners for the month in the medal race were: Clarence A. Haight, champion class, 22 out of 25 at 18 yards; Collier and Thomas tied for the first class medal, with 20 breaks each at 20 yards; Collier won on the shoot-off, 20 to 17; Hauer won the second class medal, with 12 breaks; Hoelle, who broke 18, won third class medal; Noonan, with a score of 17, won the medal for the fourth class shooters. The scores shot were the following:

Club shoot, 25 targets—Haight, 20, 18; Leary, 16; Lynch, 20; Patrick, 22; Danielsen, 20; Hoelle, 18, 20; Ehrenweith, 12, 17; Sullivan, 9; Rasmussen, 7; Murdock, 19; Collier, 20; Noonan, 18; Lewis, 9; Iverson, 23; Thomas, 20; Dwyer, 11; Fincke, 13.

Iverson won first money and Haight second money in the champion class purse. Collier and Thomas first and second and Murdock third money for the first class. Lewis won the second class purse, Patrick, Lynch and Hoelle were one-two-three for the third class purse. Danielsen, Noonan and Fincke cut up fourth class purse in the same order.

Medal shoot, 25 targets: At 20 yards—Danielsen 16, Lynch 13, Collier 20, Murdock 15, Dwyer 11. At 18 yards—Haight 22, Patrick 16, Leary 15, Hoelle 20, Danielsen 16. At 16 yards—Thomas 20, Lewis 6, Iverson 20, Ehrenweith 12, Noonan 17, Hauer 12, Fincke 15, Barber 13.

Du Pont trophy, 25 targets: At 20 yards—Lewis 15, Iverson 18, Haight 19, Hoelle 14. At 18 yards—Lynch 20, Thomas 19, Collier 16, Hauer 14. At 16 yards—Leary 18, Patrick 22, Barber 17, Danielsen 20, Hauer 21. At 14 yards—Sullivan 15, Noonan 13, J. Dwyer 16, Fincke 13.

Added money for the Western Handicap of the Interstate Association at Denver this week amounts to \$3,000.

Captain A. H. Bogardus, whose name in connection with trap-shooting is known the world over, is still in the limelight, using his shootin' iron pretty much as of yore. Years ago, in the '70's and early '80's, Bogardus was the undisputed champion of the world. Before the crowned heads of Europe he won his title in a series of matches with the foreign champions. He was Buffalo Bill's first partner. To-day he is an old man, but his sight is still keen, his nerves steady and he is a living testimonial to the benefits that may accrue as the result of the invigorating sport of trap-shooting. Even to-day he is ready, it is stated, to put up a few dollars in a saucer-smashing contest.

The records made at the traps by the members of the Seattle Gun Club in the season just closed, shows that the shotgun experts of that city are able to hold their own in almost any company. There will be no more regular club shoots until next March, but a number of special shoots will be pulled off in the fall, and it is planned to have a big tournament when the experts from the East come to the Coast. Some of the best known shots in the United States will take part in this tournament, it is reported.

In the medal events the members had to take part in six shoots in order to qualify. Some of them took part in as many as ten shoots and the records they made are very creditable. The percentage scores made by the leaders in the three classes, A, B and C, in the medal shoots are as follows:

Class A—Steele 89 1-7, Mac 85 7-9, Mottinger 85 1-3, Junker 82, Bert 80.

Class B—Fisher 79 1-9, Mahan 78 6-7, Hall 78, Fred 77 5-7, Wheeler 77 5-7, Holcomb 77 3-5. The men in Class B were very closely bunched, as less than two points separated the leader from the sixth.

Class C—Marsh 76 5-7, Hilderbrant 73½, Olie 67 1-3, Doc 66 6-7, Donald 56, Mitchell 54 4-5, Peterson 50 4-5.

For the Du Pont cup Steele, Mac and Holcomb tied, each man having won the trophy three times. In the shoot-off at 50 targets, Steele won with a score of 44, Mac was second with 43, and Holcomb was third with 42.

The Seattle Sporting Goods cup was won by E. E. Ellis. In this event the six high scores counted, and Ellis finished with an average of 93 1-3.

The E. E. Ellis cup was won by Steele. He won the cup three times during the season and it is now his property. He was tied with Junker and Parker, but beat them in the shoot-off.

The Du Pont trophy, which goes with a fifty-bird handicap event, was won by Mac, shooting from the twenty-yard mark, with a score of 44.

The Richmond Blue Rock Club held its regular weekly shoot Sunday, August 11th, and some very good scores were made. There were three matches of 25 targets each, resulting as follows: First shoot—Pieton 20, Feudner 23, Truax 17, White 15, J. Feudner 23. Second shoot—Pieton 22, Feudner 24, Truax 18, White 10, J. Feudner 22. Third shoot—Pieton 19, Feudner 20, Truax 14, White 14, J. Feudner 21.

In place of the week of trap-shooting, originally programed for this fall, there will be three days of sport, and the tournament will be conducted under the auspices of the Western Gun Club, it having appeared to the shooters that a week would be al-

together more trap-shooting than the town would be likely to stand under present conditions.

Last spring, when the Western Gun Club was contemplating a tournament, it agreed to postpone its event until fall and allow the Los Angeles Club the field in case the latter would co-operate and not compete with the Western Club's initial shoot this fall. The first part of the deal already has been performed, and the change in plans results from the Los Angeles Club's offering to go through with its agreement. It has done somewhat more, in that it has offered the Westerners the use of its Sherman grounds in case they desire to shoot there. The Li Fur grounds hardly will accommodate another set of traps, and it is quite likely that this offer will be accepted.

The dates claimed for the Western Gun Club's shoot are September 25th, 26th and 27th, and \$500 will be added to the stakes. President Sam Smith of the Los Angeles Club has tendered the assistance of that organization and it now looks as if a spirit of harmony would result.

During September the Eastern crack powder burners will be on hand to show the local experts how it is done. They will be in town a week, and as there will be but three days' shooting, there will be plenty of time for entertaining.

The Los Angeles grounds sport two Leggetts and a good tournament equipment. The Western Club is up to date so far as it goes, but hardly would care to handle 100 shooters under present conditions. Everything indicates a large force of expert shots will come down the Coast circuit in September. All the Southern California towns will contribute their crack marksmen also.

Louis Herzog, a well known and popular Southern California sportsman, ex-Marshall of Ocean Park, has interested a number of scattergun marksmen of the beach cities in a plan to form a club and hold bullet rock shoots on the rifle range at the cricket grounds near Venice. He has enlisted about fifty sportsmen in the movement and the meeting probably will be held this week to organize. Mr. Herzog also hopes to organize a club of rifle marksmen soon.

John Dale, Henry Garrison and Willard Sperry made the three highest scores at the Owl Rod and Gun Club shoot August 4th at Modesto. Out of 75 targets they broke 68, 65 and 63 respectively. D. C. Davison and W. H. Worswick also made good scores.

The shoot was the fourth of the Du Pont trophy series, and was the first to hold on the new shooting grounds. On account of its closer location to the ball grounds and to town the new grounds is found to be much more desirable than the old one. The traps and shooting boxes have been placed in the same position as on the old grounds and so far as the shooting is concerned seem much the same to the shooters.

One-half the number of targets in the Dupont race have now been shot off and the remaining events of this series will attract a livelier interest than has the first half. The final possession of the trophy promises to be hotly contested.

The Preliminary Handicap, shot at Ingleside, September 16, 1905, was won by C. D. Hagerman, the Los Angeles crack, who broke 93 out of 100. W. H. Varien, the "red shirt" sharp shooter of Pacific Grove, was runner-up with 92 breaks. Both shot from the 16-yard peg. Sylvester and Bungay finished the 100-target race the following day for the Pacific Coast Handicap, with the good scores of 97 each, from the 16-yard mark. Bungay started on his last section of 20 with a score of 77; he had to score clean to tie, he did so in sensational style. The shoot-off was at 20 targets, 16 yards; Sylvester won out on 17 to 16.

The second Pacific Coast Handicap was shot on the Los Angeles Gun Club grounds at Sherman, September 10, 1906. Fred B. Mills scored 89 out of 100 targets, shooting from the 19-yard mark. The Preliminary Handicap event was omitted from the program of this meeting.

The Santa Monica sportsmen recently organized the Crescent Bay Gun, Rifle and Revolver Club. There is a large, enthusiastic and growing membership, and regular practice will be conducted on the shooting ground established on the cricket grounds.

The officers of the organization are: Robert Bungay, president; J. G. French, vice-president; H. C. Mayer, secretary; C. B. Pettis, treasurer. C. C. Groesbeck is chief of the shotgun department; C. E. Gillon, chief of the revolver corps, and Milton Carlson at the head of the rifle practice.

The feature of the Goldfield Gun Club shoot on the 11th inst. was a live-bird match at 15 birds, \$100 a side between Dyer and Gale. Each missed the first bird and then scored straight. The tie will be shot off at the next club shoot. The Kline trophy shoot did not develop a better score than Kline's prior record, 23 out of 25; three men, however, scored 22 each. The blue-rock scores were:

Kline trophy shoot, 25 targets—Clayton 22, Hotsie 22, Rhodes 21, Strock 20, Sage 21, Inman 20, Briggs 20, Durgan 17, Ludwig 14, Pratt 19, Merriman 17, O'Daniel 13, Berkley 21, Bennett 17, Langley 7, F. A. Foster 5, W. L. Foster 16, Wayman 16, May 10, Gallie 22, Parker 12.

Ten targets—Clayton 8, Hotsie 7, Rhodes 6, Erwin 5, Bradley 5, Dyer 3, Strock 3, Hamilton 3, Duran

9, Briggs 8, Durgan 5, Ludwig 5, Krotzer 4, Merriman 3, O'Daniel 7, Pratt 4, Bennett 7, Langley 1, T. A. Foster 3, W. L. Foster 4, Parker 5, Sage 8, May 7, Gallie 5, Pratt 6.

Fifteen targets—Clayton 13, Hotsie 14, Rhodes 12, Bradley 10, Erwin 14, Rhodes 12, Bradley 10, Erwin 14, Dyer 14, Strock 9, Hamilton 4, Inman 12, Briggs 11, Durgan 12, Ludwig 7, Krotzer 8, Merriman 10, O'Daniel 10, Pratt 7, Bennett 12, W. L. Foster 6, T. A. Foster 8, Beckley 9, Parker 10, Sage 13, May 6, Gallie 9, Strock 13.

The closing shoot of the Vallejo Gun Club, held at the Floden grounds on Sunday, August 11th, was well attended, visitors from San Francisco, Napa and Suisun being in attendance and enjoyed an excellent day's sport.

The main event was the Du Pont trophy handicap, in which the shooters were handicapped as follows:

Twenty yards—Drake, O'Hara, Roney, Pierce and Harper. Eighteen yards—McPhail. Sixteen yards—Coe, Magistrini, Lynch, King and Wisecarver. Fourteen yards—Rose and Sessarego.

W. A. Roney was the winner of the trophy, and the scores for twenty-five targets were: W. A. Roney 22; C. Drake, J. V. O'Hara and R. Coe, 21; Lynch, 20; Wisecarver and Pierce, 19; Magistrini, 18; Harper, 16; Sessarego and McPhail, 15; Rose, 14, King, 13.

The ninth regular shoot of the San Andreas Gun Club at 25 targets shows the following scores: Gil Pfortner 16, J. Reddick 19, C. Goodell 11, C. Tiscornia 11, R. Casey 16, G. Stewart 10, B. Raggio 9, M. Zwinge 9, C. Perrier 4, L. Cademartori 12, M. Kiser 9, J. Snyder 10, R. Crossett 3, Al Treat 17, C. Nuland 2.

Goldfield sportsmen promise to have a great shoot if the following pithy and cordial invitation sent out broadcast over the country by the Goldfield Gun Club is any indicator:

"Dear Sir: You and your friends are cordially invited to attend our first great annual shoot, September 2d, 3d and 4th; \$3,000 in money and trophies. Two days' target and one day live birds. This will give you and your friends a chance to visit one of the greatest mining camps of its age in the world. It is our intention to show all the shooters a good time while they are here. Programs will be mailed later. Ship all guns and shells care of the Roost, shooters' headquarters, 416 Main street. There will be all kinds of shells for sale at the Roost. Come and bring your friends."

DOINGS IN DOGDOM.

San Mateo entries close one week from to-day. The support of the fancy to the one-day show of the club on September 9th is very encouraging. Up to date entries have been received steadily, with every indication of exceeding the list of entries and number of dogs at either of the club's prior shows.

There is also an increasing list of handsome and valuable specials coming in, among the latest are the following additional ones:

American Fox Terrier Club—Through Mr. Irving C. Ackerman, offers the Humberstone challenge cup, valued at \$200, for the best American bred smooth or wire-haired Fox Terrier. To be won three times by one exhibitor before permanent ownership.

Cup for best American or Canadian bred smooth dog.

Cup for best American or Canadian bred smooth bitch.

Cup for best American or Canadian bred wire-haired dog.

Cup for best American or Canadian bred wire-haired bitch.

Cup for best American or Canadian bred Fox Terrier bred by exhibitor.

These specials are for competition between members of the A. F. T. Club only.

Irving C. Ackerman cup for best Irish Water Spaniel in novice or limit class.

Miss Jennie A. Crocker cup for best California bred Boston Terrier, donor not to compete.

M. D. Robinson prize for best Boston Terrier owned and exhibited by a lady.

Stockton Kennel Club cup for best Collie in limit class.

W. H. Carmichael cup for best Bull Terrier dog.

Western Bull Terrier Breeders' Association offers \$5 in gold for best Bull Terrier dog bred by exhibitor. The same prize is also offered for the best bitch bred by exhibitor. Open to members only.

W. W. Stetheimer trophy for best Collie bred and shown by exhibitor.

The office of the club is at 469 McAllister street, San Francisco, where entries can be made, personally or by mail.

A Fox Terrier specialty club has recently been organized in Victoria, B. C. The membership list started off with over thirty names on the roster and promises for a substantial increase. The initial show of the club, it is reported, will take place in November.

Glen Tana Collie Kennels at Spokane at present have a grand lot of Collie puppies on hand. These youngsters are from some of the best bitches in the kennels and sired by such notable ones as Glen Tana Marquis (a winner of thirty-nine firsts),

Imported Lenzie Prince (winner of forty-seven firsts). Parbold Premier (believed by such judges as Messrs. Hungerford, Higginson and Gardner to be one of the best sires in America), Glen Tana Marmion (litter brother to M. Magistrate, M. Muff, M. Marshall, one of that great litter, all prize winners and sold for good prices), and Rippowam's Radiance. Surely a most desirable lot of young Collies to select from.

The litter of Bloodhounds puppies by Spokane out of G. T. Elizabeth, three dogs and three bitches, are bred in the purple, both dam and sire being blue ribbon winners and performers on the trail.

We have had several inquiries in the past for young Bloodhound stock, and now suggest to our readers this opportunity of getting something desirable.

A decided loss to the Cocker Spaniel fancy is the recent accidental killing of one of our most promising young dogs, Mrs. R. E. Nunan's handsome young black dog Monte. He was run over and killed one day last week by an automobile.

Monte was a great favorite of the show ring and bench, by reason of his intelligence and pleasing ways. As a ring shower he was second to none. He annexed ribbons at Stockton, San Francisco and Oakland. Such is the hard luck of a fancier, after getting a good and promising dog, there is no immunity from loss by accident or sickness no matter what care and precaution may be exercised. The identity of the party responsible for Monte's killing is unknown.

The San Mateo Kennel Club is to be commended in an innovation for show wards that could be followed with much profit by other show clubs. Specials will be awarded at the coming open air show that will be decided by one judge only. All mixed specials have been cut out, a move decidedly for the best. This is in keeping with the growing sentiment that, "special for best in the show," "best shown by a lady," best shown by this, that or the other conditional stumbling block, is not only a doubtful matter to decide satisfactorily, but is always a source of dissatisfaction and criticism.

Mr. Wm. Ballantyne, whose Belfast Kennels Irish Terriers were not so long ago prominent in Colorado doggy affairs, and who is now one of Goldfield's prominent business men, writes that his English Bull bitch Belfast Cricket, whelped August 10th, six puppies (five brindles, one fawn), to a son of Lord Burly—his dam was by Ch. Prince Albert, and all of which is very good Bulldog breeding. The puppies are doing well and look good to Ballantyne. They have "good heads and are low to the ground and cobby, with the finest turn-up I ever saw on young ones for that age."

He still has a leaning for his first fancy, Irish Terriers. A good bitch he kept out of his kennels recently whelped eight puppies, all of which are disposed of to Goldfield parties, saving one "that looks good enough for the fall shows."

Wm. F. Watson's Irish Water Spaniel Bess was served by Ch. Dennis C., August 13th, 14th and 15th.

Venice entries closed on the 17th with, we heard, enough dogs in for three points. Bostons were the best represented breed.

Irving C. Ackerman had the hard luck to lose a litter of six out of Endcliffe Precise by Endcliffe Prevent. Precise, it will be remembered took the yellow for best in the show at New York in 1905 under Thos. Ashton.

D. P. Cresswell's Ch. Mepals Saxon served a black Cocker bitch owned by Miss Farno, August 14th. A bitch belonging to Mr. Pollard was served on the 18th inst.

Mr. T. J. A. Tiedemann, secretary of the Pacific Field Trials Club, is expected back from his Eastern trip about September 1st.

Meanwhile Derby entries have been looked after by Henry L. Betten, Alameda, Cal. Entries for the Derby closed on the 15th inst.

A letter from Handler Coutts states that Mr. E. Courtney Ford's English Setter Tiburon, winner of the Coast Derby this year, is developing marvelous range and speed. The season has been rather late at Winnipeg, but Coutts is now working on good ground with a fair supply of birds, with a promising outlook for enough chickens to put his string in grand fettle for the Manitoba trials, beginning September 5th.

Coutts will attend the British Columbia and Pacific Northwest trials after Manitoba.

Mr. Joe E. Terry recently presented to Mr. Ford the fine young English Setter Lemonade (Ch. Killgariff-Belle Fontaine).

Mr. Ford's grand bitch Belle Fontaine is still missing, nor has a trace of her been in evidence since she disappeared.

Englewood Kennels' Bull Terrier bitch Englewood Blossom whelped a litter of five puppies recently to Silkwood Chader Wild. Blossom is the good bitch that was awarded winners at the open air show of the Western Bull Terrier Breeders' Association.

A bitch being mated with a dog of another breed does not spoil her for future breeding.

GRAND CIRCUIT AT POUGHKEEPSIE.

Poughkeepsie, N. Y., August 12.—Spirited racing in two features opened the Grand Circuit meeting to-day at the Hudson River Driving Park. The two favorites, Thornfield in the trot and Alice Pointer in the pace, were beaten.

There were thirteen starters in the Vassar Stake for 2:16 trotters. Jack Leyburn won in straight heats and entered the 2:10 class with a mark of 2:09. Genteel H. was the contender in the first heat, but in the second Thornfield made a strong bid and was only beaten off in the home stretch. This was the last of the favorite, but in the final heat Wild Bell was full of speed and pushed Jack Leyburn all the way.

The first heat of the 2:13 pace, the Poughkeepsie, seemed plain sailing for the favorite, Alice Pointer winning in 2:06. Reproachless seemed anchored. Alice Pointer led to the last 100 yards in the second heat, hotly pursued by William O., who passed the last half in 1:00½, and came home first under Geers' urging with an electric burst of speed, with Thornway getting the place. William O. finished in 2:05, the fastest heat of the race. The finish was in the same order in the third heat, but Alice Pointer was second to William O. in the last and made a strong finish. Summaries:

2:16 trot, purse \$1,500—

Jack Leyburn, ch g by Alto Leyburn-Expedition (McCarthy)	1	1	1
Thornfield, br s (Renyon)	5	2	3

Time—2:06, 2:05, 2:06¾, 2:06¾.

Poughkeepsie, August 13.—Sonoma Girl, the most famous racehorse of the year, met her defeat on the Grand Circuit in the races at the Driving Park this afternoon, when she was beaten by Watson in the Oakland Baron Stake, 2:10 class, trotting, for a purse of \$4,000. Breaks in the first and third heats cost Sonoma Girl the race. She was steady in the second heat and won that heat with comparative ease in 2:06¾, the fastest heat of the race.

Before the race Sonoma Girl was an almost prohibitive favorite, selling for \$50 to \$17 for the field, while in many of the pools she was barred in the betting. She appeared sour when scoring for the first heat, and after delaying the start for some time, finally went to a break soon after the word was given. She was such a long distance behind the field when she caught up that it was impossible for her to do anything more than save her distance that heat.

In the second heat Sonoma Girl was steady, and when Springer set sail with her down the back stretch, she overtook the leaders rapidly. Watson gave her quite a race down the home stretch, but did not have the speed to win.

In the third heat Sonoma Girl had the pole, having won the previous heat. She went to a break at the turn, just as Watson went in on the pole. Sonoma Girl ran for nearly a quarter of a mile and was hopelessly behind when she struck a trot.

After the heat Springer went to the stand and said that Loomis, the driver of Watson, had cut him off on the turn, causing his mare to break. The judges did not see it that way, as it was evident to them that Loomis had plenty of room to cut in and take the pole, he being far enough ahead of the mare not to interfere with her. Springer made no formal protest.

It was another bad day for favorites, only one first choice winning, and that was Blacklock in the 2:07 pace, and he did not win until his supporters had about given up hope and two other horses had each won a heat.

The 2:20 class trot was won easily by Zaza, a second choice, in straight heats, Tokio, the favorite, not being a contender until the last heat, when he managed to finish second.

Allen Wilson was the favorite in the 2:10 pace, but Leland Onward, driven by Tommy Murphy, won in straight heats. Summaries:

2:20 trot, purse \$1,000—

Zaza, blk m by Cascade-Preator (Payne)	1	1	1

Daphne Direct, blk m (Brady)	6	7	7

Time—2:07, 2:06¾.

Poughkeepsie, August 14.—This was favorite's day at the Grand Circuit races at the Hudson River Driving Park. The four races were all won by first choices, with the exception of the 2:28 trot, which went to Margaret O., the second choice, after Beatrice Bellini, the favorite, had won the first heat.

The weather was fine and the attendance the largest of the meeting. In the free-for-all pace Angus Pointer, the favorite, won easily in straight heats in 2:03¾ and 2:03½. Ecstatic, the second choice, went to a break in the first heat and was distanced. Baron Grattan seemed to lack his usual pace and was unable to give Angus Pointer any argument. In the pools Angus Pointer sold for \$100, Ecstatic \$32, Baron Grattan \$25, Gratt \$12 and the field \$5.

Angus Pointer drew the pole and was never headed in either of the two heats. Gratt seemed to be the only horse that could give him any kind of an argument, but he went to a break in each heat.

George G. was a red-hot favorite in the 2:06 trot, although this was his first start of the year. It was also the first appearance of the year of his driver, Alta McDonald. George G. demonstrated that the confidence in him was not misplaced, as he won both heats, pulled up, in 2:08¾ and 2:07.

The 2:28 trot was the most exciting race of the day, the finish being well fought out. Margaret O. was a little too good for the favorite, Beatrice Bellini, and after dropping the first heat, captured the next three and the race.

A new 2:10 performer was added to the list in the 2:13 trot in Bernico, the favorite, who made the second mile in 2:09¼ and won the race handily. Summaries:

2:28 class, trotting, the Hudson Valley, purse \$1,500—

Margaret O., b m by Onward-Axtell (Davis)	2	1	1
Beatrice Bellini, blk f (Dickerson)	1	2	5

Time—2:08¾, 2:07.

Poughkeepsie, August 15.—The largest attendance of the week was at the Grand Circuit races at the Hudson River Driving Park this afternoon. Major Delmar went an exhibition mile in 2:05¼ in an effort to lower the track trotting record of 2:04¼, made by Sweet Marie last year.

Ardelle, driven by Geers, in the 2:05 pace, best

two in three, was the only favorite of the day that justified the selection. The mare was never in danger and won easily.

Favorites in the two other races fared badly. Leland, an even-money favorite for the 2:12 pace, was distanced in the second heat through a bad break. Tommy H., the winner, sold for \$9 in pools of \$55. He won the first and second heats in hand finishes, but broke in the third, losing the heat to John McEwen. The fourth heat was a great race between the two horses Tommy H. winning by a neck.

Five heats were required to decide the 2:15 trot. MacDougal sold favorite at \$25 to \$30 for the field, but was never a factor. Princine won the first heat in a driving finish with Fanny P. The second and third heats went to Henry S. Jr., second choice in the betting, but the latter was beaten by Chimes Bell by a neck in the fourth. Henry S. Jr. won the fifth heat and race. Summaries:

Poughkeepsie, August 16.—Top-heavy favorites won all three races on the last day of the Grand Circuit meeting here to-day. Byron Kay, selling at \$25 to \$12 for the field, in the 2:16 pace, broke at the three-quarters in the first heat and finished tenth. Easter Direct, a one-heat horse, that had drawn the pole, won the heat, having led all the way. Geers neatly drove Byron Kay out of a pocket in the second heat and going around the bunch won the heat with comparative ease. He had the third and fourth heats all his own way.

Lillian R., an almost prohibitive favorite, won the 2:09 trot easily in straight heats. Jack Leyburn, winner of the 2:16 trot on Monday and the only horse to start twice during the meeting, won second place with about the same ease that Lillian R. won first.

The horses go from here to Readville, Mass. The meeting was a financial success. Summaries:

Time—2:10¼, 2:11¼, 2:10.

Trainer James Brady has found a three-year-old trotter of decided class in the East View Farm string which he wintered in the South and has been handling at the Empire track for the past three months. It is the black filly Flying Post, by Directum Kelly (4), 2:08¼, dam Tartara by Alcantara 2:23. Before being shipped away from the Empire track she worked a mile in 2:13. She is eligible to the Kentucky and all the other rich Futurities and would seem to have a chance against the best three-year-olds of the year.

Drink Jackson's Napa Soda. It means health.

CEMENT ON THE FARM.

Farmers are coming to use concrete quite generally for walks, foundations, stable floors, etc., and its use is quite satisfactory. Where properly put down it is proving both permanent and economical. The farmers themselves can mix and apply the concrete with entire success, after observing the process or carefully noting a few necessary rules, and thus save a large part of the expense. Mr. Fred R. Crane, who has charge of the farm mechanics department of the college of agriculture at Urbana, Illinois, gave the following directions at the annual meeting of the Illinois farmers' institute:

This is a cement age. The farmer will find concrete one of the most useful things in his construction work. The four makes of Portland cement in Illinois are giving general satisfaction. Ideal concrete is made of cement, sand and crushed rock. The sand should be coarse, clean and sharp. River bottom sand, when fine and round, should not be used where much strength is required.

As a test of sand, rub it in the hand, and if there is much dirt left on the hand, discard that sand. If, when a large handful of the same is thrown into a pailful of water it leaves the water muddy, discard it. A dirty sand makes a weak concrete. Crushed rock is much better than screened gravel because of the rougher edges.

Following are the four recognized mixtures for concrete:

1. Rich mixture—One part Portland cement, two parts of clean, coarse sand, four parts of crushed rock. This is used for floors, fence posts, etc.

2. Medium mixture—One, two and one-half, and five parts respectively of cement, sand, and crushed rock. This mixture is used for walks, thin walls, etc.

3. Ordinary mixture—One, three, six. For heavy walls, piers, abutments, etc.

4. Lean mixture—One, four, eight. For footings and in places where volume and not great strength is needed. When gravel is used the proportions are one part of cement and from six to nine parts of gravel, according to the amount of sand in the gravel.

To make one cubic yard of concrete the following respective amounts of cement are required: Rich mixture, one and one-half barrels; medium mixture, one and one-fourth barrels; ordinary mixture, one and one-eighth barrels; lean mixture, seven-eighths of a barrel.

In construction work such as floors, barns, fence posts, bridges, etc., reinforcements of iron are absolutely essential. The beginner will need the supervision of an expert in using reinforcements.

Measure exact amounts of each part. Mix thoroughly and not too long before applying the water. Cement will set in twenty to thirty minutes, and if disturbed after that loses its strength.

Spread the sand and cement on a mixing board, and mix thoroughly, adding enough water when mixed to bring the mixture to the consistency of mortar. Add the proper quantity of crushed rock and mix all together, after which it is ready for use. In this manner the sand grains are all covered with the finer particles of cement and the crushed rock when added has all the voids filled with the temperate mixture. This undoubtedly gives the great strength for material used.

A very common method, however, is to mix all three parts at one time while yet dry, and then to mix with water until the mixture will pack well and handle with a shovel.

Get the form walls rigid, and do not use lumber that is too dry, as it takes up moisture and changes its shape so as to injure the concrete in setting.

Do not allow concrete work to dry out fast, as cracks will appear. It should be protected from the sun for three to five days and sprinkled with water to insure even setting throughout the concrete.

In two weeks concrete gains strength sufficient for ordinary use, but sixty days should elapse before it is given a full load.—Wallaces'.

Plenty of clean water should be provided every day at noon time and again in the evening for the hogs.

LIGHT BRAHMAS.

Since 1874 the Light Brahma has held a permanent position before the poultry world, says W. D. Felch, in the Farmer's Voice.

Strange as it may appear, in 1847, on board an India ship, one Mr. Knox discovered six birds that have proved the ancestors of the millions of this race that have been scattered throughout this country and nearly all the countries of the old world.

I have bred them since 1856 myself in their old-time form, which was oblong in body structure, that presented an equal amount of breast and posterior weight, when divided at shanks. When the plumage adhered close to the body structure and curled close about the hock joint, the hock showing clean and clear below the body line, they and such now are prolific layers of eggs, especially the five oldest months of the year. They lay largest dark-sbell eggs, and a peculiar fact is that five of their eggs will make as much custard as seven of almost any other breed.

They are what the Shorthorns are among cattle. They give the greatest amount of poultry meat for food consumed when the breeder cares for them to find out under what conditions they do their best. There is the lowest death rate in the breed as they mould into adult stock. Hardy, beautiful and largest of fowls, and Asiatics, the fancier's favorite is among them.

Their eggs are appreciated to the extent that 50 cents per dozen is secured for them for the year round from special customers. They remain as tender roasters up to ten and eleven months old. Many of the males kept in celibacy from the time they are five months old reach twelve pounds of weight in March, and now April, my brother is disposing of the surplus males that have failed of a breeding market at 25 cents per pound, and bringing \$3 each for a purely food supply.

There is late demands for them for use as capons. Those who cater for that trade for the Philadelphia and Washington market are turning their attention to this breed, which at the present time is having quite an influence upon the trade in the breed for breeding purposes for that use.

For over fifty years I have bred them continually. They surely fill every want for profitable family use; besides in their finest estate they have enjoyed one continual reputation as breeders and exhibitors' stock to the extent that males have each year found purchasers at from \$25 to \$150 as first-class breeders and exhibitors, while females have been sold from \$10 to about \$100 each, while as breeders \$15 to \$35 a trio may be classed as the amount of sales by the majority of breeders.

All this can be said of the Light Brahma. Do you wonder that they have held an uninterrupted place in the fancier's yard? Once they are taken up, few abandon the breeding of them.

They can be said to the very fullest intent and meaning of the phrase, "That like produces like." In them they need no double mating; pure males and females come from the one mating; in fact they are completely bred. They are thoroughbreds from the time they came to my yard in 1856 to the present time. A majority of their progeny have each year scored from ninety-two to ninety-six points. Fewer specimens have been disqualified for any cause. They are a breed which, for their combined merit for both poultry and eggs, have fewer faults, and the largest merits than any breed on earth.

A smart Indian has discovered a wonderful process which he claims will revolutionize the butter business. The cream is ripened by being allowed to stand in vats six days at a given temperature. Then it is placed in churns with a perforated coil at the bottom, made from block tin, with an air-pump connection. The churning is accomplished by forcing the air through the cream. The butter is made within thirty minutes and is said to be of more even color and finer flavor than any other creamery butter.

FOR MAN WITH SMALL CAPITAL.

Let us consider briefly the advantages of hog raising for the man with small capital. With the exception of poultry, less money is required to get a start in hog raising than with any other farm animals, and to many persons there are good reasons for preferring the latter, especially on the average farm.

Let us say that the beginner starts with six grade yearling sows, bred to a good pure bred boar. At the end of the season he should have on hand the original six sows, and thirty-six pigs, half of which will be hogs, and sold on the market. They can be turned off at nine or ten months of age, weighing 250 pounds, and at present prices should bring at least \$12.50 each, a total of \$225. These pigs should not have cost the farmer more than 3½ cents per pound, or \$8.75 each, leaving a profit of \$3.75 per head, to cover the cost of carrying the breeding stock, interest, labor, etc. As a matter of fact, in nearly every part of the country a better price can be obtained than 5 cents per pound, (the amount used above), but I prefer to make an underestimate just to be reasonable. Now let our beginner start in the second year with twenty sows, and let him buy a good pure bred boar of the same breed. At the close of this year, he should have at least 120 pigs, sixty of them fat barrows, and sixty good gilts from which to select future brood sows. If he is thrifty and wants to turn over his capital twice each year, he can breed his sows as soon as possible after the spring farrowing, and get from eight to twelve pigs per year from each sow instead of six. I am perfectly aware that the farm average of pigs per sow raised each year is probably less than this, but there is no reason why such averages cannot be obtained, as they are possible with ordinary care and good management.

One can run the increase from a small herd like this into fabulous figures in a little time, and get clear away from the possible by failing to recognize the natural obstacles in the way of such an arithmetical progression. Nevertheless, as a revenue producer and a quick means of return on the investment, the American farmer has no animal to surpass the hog. The start of buying many a farm and paying many a mortgage has been made in just this way. The hog's nick-name, "the mortgage-lifter," is not a misnomer.—Live Stock Bulletin.

THE LOCO WEED.

We cannot remember a season when the loco plant has caused so much solicitude on the part of stockmen as it has this year and we are constantly in receipt of communications regarding its direful affects. conducting investigations into the mystery of the so-called loco poisoning but as yet have not determined anything particularly valuable to the livestock interests. We certainly need more information about loco for the name loco has often been used indiscriminately to indicate any marked peculiarity of habit or temperament, particularly of horses, although an animal may never have eaten the loco plants at all. The name is sometimes applied to peculiar diseases that are not understood by stockmen and lead to some confusion, but there is a disorder called loco caused by eating the plants and in some localities and seasons, serious loss to the livestock industry occurs. Animals do not ordinarily eat the loco weeds, but in the first instance are starved into eating them. This usually occurs when the range or pasture is short or after the grass has dried up in the summer or during the fall and winter, while the loco plants remain more or less green. Animals begin to eat them and once the habit is acquired they will continue to browse on loco weeds even when an abundance of other food is available, often wandering long distances and doing without water or food for days in searching for the loco weeds. As soon as animals begin to eat the loco they fall away rapidly in flesh and present a dejected appearance generally. Dependent portions of the body often present dropsical

swellings due to weak circulation and the animal finally becomes so weak that it is unable to get up when down and dies of general debility. Aside from the general emaciation, the most marked effect of loco weeds is upon the brain. The animal has a peculiar vacant stare and is often unable to comprehend what seems to be simple impressions. Locoed animals walk with a peculiar creeping gate that is recognized by those familiar with the distemper, and in general it is difficult to get locoed animals to step over a bar a few inches high. In some instances they will jump two feet high to clear a rope on the ground or even a shadow across the path. Analyses of the loco plant have failed to reveal a poisonous or injurious principal, although Dr. Marsh tells us he has been able to segregate a toxic element in the plant which he has not yet named.—Denver Field and Farm.

The man who is about to engage in the dairy business should appreciate the absolute necessity of getting started right and of giving the business the right kind of management. Success hinges upon the way the business is run, and the man who is not going to give the business the right kind of attention and study might better let it alone.

The average hatch of 60 per cent for the season is good and any one who can show such a record can feel reasonably well satisfied.

Unless checked in time chicken lice will multiply with almost incredible rapidity. A hundred will increase to a million if not eradicated before they get a good start.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for
Curb, Splint, Sweeney, Capped Hock,
Strained Tendons, Founder, Wind
Puffs, and all lamenesses from Spavin,
Ringbone and other bony tumors.
Cures all skin diseases or Parasites,
Thrush, Diphtheria. Removes all
Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism,
Sprains, Sore Throat, etc., it is invaluable.
Every bottle of Caustic Balsam sold is

PARKER GUN

STILL WINS

At Boston, July 16-17-18, the PARKER GUN in the hands of Horace R. Bowser, of Hartwell, O., won the Eastern Handicap, and H. L. Snow, also shooting a PARKER, was second in this important event.

The PARKER GUN also won third high average for the three days in the amateur class. The high average in the professional class for the three days' shooting was won first, second and third with the PARKER GUN in the hands of Fred Gilbert, W. R. Crosby and Lester German. This is certainly a record-breaking list of winnings. Send for catalogue.

NEXT WEDNESDAY the trotters and pacers that have been racing on the California Circuit will appear at the popular Woodland track, where it is pretty certain that several of the fast records made at the previous meetings will be lowered during the four days' racing, which begins that day and ends on Saturday, the 7th inst. Ever since Woodland came into the California Circuit it has been one of the most popular points with the harness horsemen. The track there is not only fast, but it is a safe one, and the warm weather of the Sacramento valley furnishes ideal conditions for fast time. The crowds that turn out to see the sport are always large, and made up of the best people in the county. The hotel accommodations are excellent, the people hospitable and the county one of the most prosperous in the State. At this season of the year the great grape crop, for which Yolo is famous, is just ripening, and the luscious Muscats, Black Hamburgs, Tokays and other varieties are to be found on every table. Melons that cannot be surpassed anywhere on earth are a large crop annually in that county, while prunes and most delicious raisins are produced to the extent of thousands of tons. Woodland has one of the best built business sections of any town in Northern California, and its residence section is filled with pretty and picturesque homes. There are too many large farms in Yolo county, but in spite of all the entreaties of real estate men, land owners there do not place their properties on the market to any extent. As an agent aptly put it: "These farmers are so prosperous that they do not want to sell." Yolo county has for many years been an extensive producer of fine stock in horses, cattle, sheep and hogs, and in recent years many fine animals of all breeds have been brought into the county. The race meeting, which opens on Wednesday next, will give those who have not visited this section of the State an opportunity to do so and to see the best and fastest harness horses in California at the same time. They should avail themselves of it.

THE FASTEST TIME made by a trotter on the Grand Circuit this year is to the credit of the California bred horse George G. 2:05¼, who has trotted a heat in 2:06.

RACING AT VALLEJO MONDAY.

The San Francisco Driving Club will hold races at Vallejo on Labor day, September 2, for which a number of substantial purses have been offered. Special rates have been made for the trip.

The entries follow:

2:10 class—Horse, Geo. Perry, owner, George Bianini; Victor Platte. William Higginbottom; Kitty D., A. Hoffman; Lady Shamrock, Joe Costello; Clara, L. A. Schwartz.

2:15 class—Horse, Charlie J., owner Charles Lecari; Walter Wilkes, L. W. Phiffer; Little Dick, Luke Marisch; Ring Rose, M. Donnelly; King V., James O'Kane

2:20 class—Horse, Martha D., owner George Ehrlin; Dan, Frank Knowles; Lady Falrose, Tom Corcoran; Sidney B., F. E. Burton; Daken D., Bert Edwards; Colonel C., W. C. Hamerton; Prince H., H. H. Helbrush; Deroll, A. Schwartz.

2:30 class—Horse, Don L., owner Richard Green; Derby, John Deschler; Lady Irene, W. R. Dease; Ed. Rea, Dan Siebert; Charley B., Chas. Becker; Babe, Wm. O'Kane; Golden Buck, R. P. Giovanni; Maggie Murphy, C. Faulkerson; Electioneer Cross, Jasper Paulson; Direct Steinway. William Higginbottom.

GENERAL WATTS (3) 2:09¼.

General Watts is now the champion three-year-old trotting stallion, having won his laurels at Readville, Tuesday, when he won the three-year-old division of the American Horse Breeder Futurity. The race was won in two heats, each heat being trotted in 2:09¼. The time reduced the championship record of 2:10½, made by The Abbe, at Columbus, O., last season. General Watts won impressively, defeating a field of exceptionally high-class three-year-olds, one of which, Belle Bird, had already earned a record of 2:11¼. General Watts is a good looking, substantially made bay colt, that is exceptionally good gaited, and has a great flight of speed. He is exceptionally well bred, being sired by Axworthy 2:15½, whose daughter, Alta Axworthy, was a conspicuous three-year-old stake and Futurity winner. Axworthy is a son of Axtell 2:12, out of Marguerite by Kentucky Prince, grandam by Stride-way. Axworthy's first and second dams are great broodmares and producers of extreme speed. He is represented in the standard list by some forty-three standard performers.

The dam of General Watts is Carpet 2:28, a record daughter of Prodigal 2:16. Carpet's record was made against time at St. Joseph, Mo., in 1905. Her second dam, Annie Wilton, is the dam of Limerick 2:14¼, Handspring 2:18½, Attire 2:19¼, Andriscus 2:21¼, Animosity 2:24¼ and Arguros 2:27¼. She was sired by Wilton 2:19¼. The third dam of General Watts is another great broodmare, Anna B. by Hambletonian Mambrino 2:21¼. Anna B. is the dam of Pamlico Chief 2:20¼, Lady Gilbert 2:25¼ and Jessie McGregor 2:28¾. The fourth dam of General Watts is the Gilbert mare (dam of Miss Wilkes 2:29 and Kitty Wilkes 2:30) by Clifton Pilot 2:26. His fifth dam is by Parks' Grey Highlander. General Watts is an exceptionally well bred stallion. On his dam's side there is early as well as extreme speed, and his blood lines are purely orthodox. Prodigal is a successful sire, being by Parcoast, out of the great mare Beatrice by Cuyler. Beatrice produced three great stallions in Patron 2:14¼, Prodigal 2:16 and Patronage. Early speed has been one of the characteristics of the family. The Wilton family is another family that has helped to make turf history. Annie Wilton produced seven with records, while two of her daughters have produced three with records. Wilton was a son of the renowned George Wilkes, out of a producing daughter of Hambletonian 10. Second dam by Flying Morgan. Anna B., the third dam of General Watts, is a producer by Hambletonian Mambrino 2:21¼, a son of Hambletonian 539, out of a mare of unknown breeding. Hambletonian 539 was by Hambletonian 10, out of a daughter of Defiance. Hambletonian Mambrino has been quite successful as a sire, at least two of his daughters having produced 2:10 performers. The fourth dam of General Watts is also a producer, the Gilbert mare by Clifton Pilot, who was a son of Pilot Jr., out of a mare by Whip Comet. General Watts through his dam has a trotting inheritance, which is in part responsible for his racing qualities. Last year at Lexington, General Watts acquired a record of 2:27½ in a trial against time. His first start in a race was at the Cleveland meeting, where he trotted the first half head and head with Belle Bird in 1:05, the second quarter being trotted in 0:31¼. He is a fast colt, with the best of manners, and is one of the most promising youngsters of the season. He has other engagements, among which is the Kentucky Futurity for colts of his age. He should be one of the principal starters in this rich stake.—American Sportsman.

TWO NEW FUTURITIES.

From the office of the American Association of Trotting Horse Breeders, in Cleveland, comes official notice of two important Futurity events which that organization proposes to open. We take pleasure in calling the immediate attention of all breeders and horsemen generally thereto.

The first of the two is to be known as "The Matron Stake." It is for foals of 1907, to trot and pace as three-year-olds in 1910. Nominations to close November 1st next and to be free to all members of the Association. A payment of \$5 to be made on yearlings, November 1st, 1908. A payment of \$10 to be made on two-year-olds, November 1st, 1909. Payments of \$25 on three-year-old trotters and \$10 three-year-old pacers, due May 1st and July 1st, 1910. A final starting payment of \$100 on trotters and \$25 on pacers, due (presumably) the night before the race. All money paid in to go to the stake, which will be divided 75 per cent for trotters and 25 per cent for pacers. Races to be mile heats, 2 in 3, and money divided into the customary four premiums. In addition a \$250 silver trophy to go to the nominator of the dam of the winner of each division.

The second is to be known as "The Championship Stallion Stake." Stallions to be nominated by members, November 1st, 1907, nomination fee to be the amount of each stallion's service fee for 1906. All foals of 1907 by nominated stallions to be eligible. The first payment on foals to be \$5, on two-year-olds, due November 1st, 1909. Two payments, on three-year-olds, of \$25 on trotters and \$10 on pacers, due May 1st and July 1st, 1910. Starting fees, \$100 on trotters and \$25 on pacers, due (presumably) the

night before the race. All starters to be owned by members of the Association. All moneys received to be paid in to the stake, which shall be divided and raced for as is the Matron Stake above, except that silver trophies of \$500 value shall be awarded the owners of the sires of the two winners. These conditions are, we should state, proposed but not yet formally adopted. They will be made to conform to the desires of the majority, and criticisms and suggestions tending to their improvement are solicited.

Secretary Harry K. Devereux, of the Breeders' Association, considers that if these two events are supported as they should be, the first has a chance to be worth \$30,000 and the second \$50,000. It is the hope that the support accorded them will be worthy of them. The Breeder's Association is a young organization, but it promises to be one of the mightiest for good in the whole trotting world. It is the object to make every man in America genuinely interested in the light-harness horse, a member. If this can be done it can be made a tremendous factor in the promotion of the industry. Membership costs but \$5, and the yearly dues are but \$2, which is within the reach of all. As above pointed out, these projected Futurities are the first steps for the benefit of members which have been taken, and they can, by united effort, be made the most valuable events of their kind in existence.—Chicago Horse Review.

INFERLOTTA'S SIRE.

Somers, Mont., August 12, 1907.

Breeder and Sportsman: In recent copies of your good paper reference has been made to the fact that Mr. W. O. Valentine's mare Inferlotta 2:04¼ in by my stallion Inferna 2:15¼, son of Diablo 2:09¼ and Biscari by Director 2:17.

Inferna was purchased by me from Capt. McNally four years ago, and has reduced his record two seasons. His record was 2:24¼ when I bought him. He was laid up last year, having wrenched an ankle at Anaconda, Mont., just after taking his record of 2:15¼ at Livingston. He took this record pulled to a walk, after going to the half in 1:05, so that he would not distance the field, comprising Gold Dust Morgan 2:13, Modicum 2:14, Sherlock Holmes 2:11¼ and two others.

Inferna has all the courage of his noble ancestry, as evidenced by his two races at Kalispell, Mont., the beautiful county seat of Flathead county, on July 4th and 6th, this year. He had done a heavy stud season, all the best bred mares in the valley coming to his court. One was bred to him on July 3d. On July 4th he went five hotly contested heats, and on the 6th had another five-beat race, in one of them coming within three-quarters of a second of the track record of 2:17¼. Two weeks prior to that he had stepped the first quarter from the wire on a half-mile soft track in 30 seconds, nose and nose with The Minister, just to see, as John Ennis, Inferna's driver, said to me, "if the chestnut had any step left." A two-year-old by him, bred by me, and now owned by J. A. Ennis of Kalispell, with very little work, stepped the last eighth of a workout in 17½ seconds and had more left. Frank Ragsdale says he is the fastest colt he ever saw, and as he hails from the Hoosier State, where there are many good ones, and is an excellent driver and competent judge of horses, his opinion should carry some weight.

Those who have seen this two-year-old gelding work, say 2:15 will not stop him next year.

A two-year-old filly by Inferna out of a McKinney mare, owned by Ragsdale Bros. and Ben Steele, the latter of Great Falls, is expected to be another "phenom" of the Diablo tribe.

I have myself bred to Inferna mares by Prodigal, Geo. Ayers 2:14¼, Argot Wilkes and other good stallions and expect some good results.

Our bunch, including Little Minister 2:12¼, Commodore Bob 2:18¼, Rag-a-long 2:27¼, Frank Patch (green), and Inferna 2:15¼, started this morning for Livingston, Mont., where our circuit opens the 19th.

Not desiring to infringe too much on your patience this time, I will close, congratulating California, all the horsemen, your journal and her owner on having such a marvel of speed as Inferlotta. Yours truly,

C. D. CRUTCHER, M. D.

HAMBLETONIAN 10.

Livermore, August 28th, 1907.

Editor Breeder and Sportsman: In the last issue of your paper I saw where the veteran horseman, I. N. Mosher, said that the stallion Lynwood W. resembled Rysdyk's Hambletonian more than any horse he ever saw. Happening to have the measurements of Hambletonian, I am sending them to you, as I never saw them in print. They were as follows:

Height 64 inches, length of head 24 inches, length of neck 32 inches, length of back 30 inches, length of body 68 inches, coupling to tail 24 inches, hip to tail 22 inches, hip to hip 24 inches, hip to stifle 20 inches, stifle to tail 30 inches, stifle to hock 24 inches, hip to hock 42 inches, hock to ankle 16 inches, center of knee to ankle 11½ inches, knee to forearm 20½ inches, around the knee 13½ inches, around the hock 17½ inches, girth 77 inches, depth of shoulder 28 inches, weight 1,200 pounds. Respectfully yours,

WM. McDONALD.

CIRCUIT HORSES AT PETALUMA.

A POOR AND HEAVY TRACK MAKES FAST TIME IMPOSSIBLE.

Aerolite Turns Tables on Hymettus in Three-Year-Old Pacing Event for \$1,500 Purse on Second Day of Meeting.

The thirteen days' meeting advertised by Harry Stover, the well known owner and breeder of thoroughbred horses, to be held on his track at Petaluma, began on Saturday, the 24th inst., with a program for the opening day devoted entirely to the runners. On Monday the harness racing began, two events of this kind being on the card for each day of this week, in addition to three running races.

As Mr. Stover has offered the largest purses for trotters and pacers ever given in California, he secured a very large list of entries, but so many horses have been sent home or laid up with one thing or another since the circuit began, the fields of starters have not been large in any of the races thus far pulled off.

The Petaluma track was once a famous meeting ground for the best trotters and pacers bred on the Coast, but has, since Mr. Stover purchased it a few years ago, been given over entirely to the runners, until this year, when the owner announced early in the season that he proposed giving a fair and race meeting that would eclipse anything ever held in the State. The fair portion of the program was afterwards abandoned, but the trotting and running programs stood as announced.

The attendance up to Wednesday had not been large any day of the meeting, the strictly harness meeting of the Breeders' Association at Santa Rosa this year drawing twice the attendance daily.

In spite of the small attendance and the long list of owners who did not start or pay entrance, Mr. Stover has hung up the purses every day as advertised.

The track during the first few days of the meeting was very bad, and on the first day was really unsafe for trotters and pacers, although, fortunately, none of the starters were injured in racing over it. It has been getting better every day since, but has been several seconds slow at its best.

During the meeting auction pools have been sold on the harness events by Fred H. Chase & Co., and several bookmakers have also posted odds on all the events. The Ward totalisator has been used in lieu of the usual mutual box for wagering on heats, but has not been largely patronized, those who wager their money this way seemingly having a preference for the bookmakers' odds.

Richard Havey and Arthur Bennett have acted as judges during the meeting, and their decisions have given perfect satisfaction. Mr. Havey is an expert in both styles of racing, having been a noted rider and also a successful driver, and has the confidence of all.

Mr. Woods, the Missouri starter, has been watched closely by the public. He starts all the races, and has certainly been very successful during the meeting thus far, getting his fields off well and having little delay with the runners at the post or in scoring the harness horses. While we cannot but feel from what we have seen of both gentlemen, that our California starter, Ed. R. Smith of Los Angeles, does not suffer in the least by comparison with Mr. Wood, we shall give the latter credit of doing good work on the days when he have witnessed his starts.

The two harness races on Monday went to the favorites in straight heats. Inferlotta, the peerless pacing mare of the circuit, sold for \$20 to \$7 for all the others in the 2:14 class pace, for which the purse was \$1,500. While it was conceded by nearly every person purchasing a field ticket that the daughter of Inferna would win, yet they said the odds were so good they were worth taking a chance on.

The mare won easily, finishing each heat in a jog, the actual race being between Pilot and Queen Pomona for second money, the latter winning under Gerrety's excellent driving. The time seemed slow, but equalled three heats below 2:10 over any decent track. One driver said the shaking up he got was like riding in a striker's wagon over the San Francisco cobble-stones, and Mr. Hewitt, driver of the winner, said that he never rode in such fear of injuring his horse as he did in this race.

The 2:17 trot, for a purse of \$2,000, was won by Carlok, a top-heavy favorite. He took the first two heats handsly from Vallejo Girl in 2:18½ and 2:16, but in the third heat Carlok went to a break soon after getting the word, and Fred Chadbourne went to the front with Kenneth C., which he had rigged a little differently, putting hock-boots on him, as he found the black horse was hitting his hocks. Kenneth C. trotted like a winner, and Carlok had to trot the last half of the mile in 1:05 to beat him to the wire, which he did by a very narrow margin. A half mile at that speed over such footing was a wonderful performance, and there is little doubt but Carlok, who is unbeaten this year so far, can trot a mile in 2:10.

Second Day.

On Tuesday there was an upset for the form players in the three-year-old pace for a \$1,500 purse, which had Hymettus, Aerolite, Josephine and Radium as starters, Hymettus being made favorite on his win over Aerolite at Santa Rosa the week previous, when he set the three-year-old pacing gelding record at 2:08½. Aerolite, the magnificent son of Searchlight, turned the tables on him Tuesday, and when the race was over Hymettus had earned but third money.

Soon after getting the word in the first heat Aerolite broke and swerved into Hymettus, whose sulky broke and threw John Quinn, driver of the latter horse. Although getting a hard bump, Quinn hung to the lines and stopped his horse, after being dragged fifty or sixty yards, and returned to the stand with his broken sulky. Josephine went out in the lead and won the heat in 2:20½, Radium finishing second and Aerolite third. The judges allowed both Aerolite and Hymettus to start again, considering the accident unavoidable. In the next three heats Aerolite was a great pacer, and won handsly in 2:12½, 2:11¼ and 2:15½, with Hymettus second each time, over a track that was fully four minutes slow. In the third heat Aerolite came the last half in 1:02. Had the track been like the one at Santa Rosa a mile in 2:08 should not have stopped him on Tuesday. Hymettus was not in as good condition as at the Breeders' meeting, and when these pacers meet at Woodland if both are right the record should be again lowered, and the race be worth going many miles to see.

The 2:23 class trot, also a \$1,500 purse, had five starters, and Will Durfee won it in three straight and easy heats with the James Madison horse. Dredge. All the heats were below 2:18, which was as good as the same number below 2:15 at Pleasanton.

Third Day.

The three-year-old trot for a purse of \$1,500, and the free-for-all pace for a \$2,000 purse were the harness racing program for Wednesday. Both races went to the favorites, but the backers of them would have all been in the hospital before the races were finished had anything been the matter with their hearts, as both favorites made breaks that were of the stand-still-and-gallop order, and came near being distanced, although in the three-year-old race distance had been waived, which a majority of the crowd had taken no notice of. There were but four starters in this event, Nogi, Prince Lot, Zolahka and Reina del Norte. Nogi was the favorite over the other three at \$20 to \$6. He won two heats easily, with Prince Lot second, each time, but in the third heat went to a break before reaching the first sixteenth pole and did not get again to a trot until he was well into the back stretch, and an eighth of a mile behind. He then trotted fast and finished third, Zolahka taking the lead and not being headed during the rest of the mile. Nogi won the fourth heat easily.

In the free-for-all pace Sir John S. was, of course, the choice for winner, and \$20 to \$5 for the field was what his backers had to pay in the auctions, there being very little field money at that.

Delilah drew the pole, and Sir John S. had fourth position. There were several scores before the word was given, and when the starter said go, Sir John S. was not pacing squarely and went to a break. Vance took him to the outside and tried to get him squared away, but the big horse kept up a canter until the quarter pole was reached, with all the others in front of him, and Miss Georgie, the leader, at least an eighth away. Sir John got into his stride just as his nose hit the quarter pole and he thereupon showed the watch holders what he could do. It took him but thirty seconds to get to the half-mile post, and he paced the next quarter in 29, and heat the flag about four lengths. Although pulled up as soon as he got to the distance, he paced the last three-quarters of his mile in 1:33, a 2:04 gait. Miss Georgie won the heat by several lengths, with Delilah second and John R. Conway third. The time was 2:11.

Sir John S. took the next three heats rather handsly, and made no more breaks. This is the first time he has made a break in any of his races, and he is anything but a handy horse in getting back to his stride.

The summaries of the three days' racing up to and including Wednesday, are here given, but they are not complete nor official. The full and complete summaries will be given next week:

Monday, August 26.

Pacing, 2:14 class, purse \$1,500—
 Inferlotta, b m by Inferna (Hewitt) 1 1 1
 Queen Pomona, b m by Pomona (Gerrety) .. 4 2 2
 Pilot, ch g by Abbottsford Jr. (C. Walker)... 2 3 3
 Mandolin, b g by Alcone (Mosher) 3 5 4
 Mollie Button, hr m by Alex. Button (Mishner) 6 4 5
 Lohengrin, b g by Charleston (Ward)..... 7 6 8
 Uno, b g by Aptos Wilkes (B. Walker)..... 5 7 7
 Time—2:13, 2:13, 2:13½.

Trotting, 2:17 class, \$2,000—
 Carlok, hlk h by McKinny (Durfee)..... 1 1 1
 Vallejo Girl, h m by McKinney (Davey) 2 2 6
 Kenneth C., hr h by McKinney (Chadbourne) 4 4 2
 Era, b m by Zombro (Williams) 3 3 3
 Berta Mac, hr m by McKinney (Helman).... 6 5 4
 Verona, b m by Nutwood Wilkes (Frellson). 5 6 5
 Anget Baron, hlk h by Baron Wilkes (Green) dis
 Dan Frazier, h h by Secretary (McGovern). dis
 Time—2:18¼, 2:16, 2:14.

Tuesday, August 27.

Pacing, three-year-olds, \$1,500—
 Aerolite, b s by Searchlight-Trix by Nutwood Wilkes (Chadbourne) 3 1 1 1
 Josephine, b m by Zolock-Lady May (Rutherford) 1 3 3 3
 Hymettus, b g by Zombro (Quinn).... 4 2 2 2
 Radium, blk c by Stoneway (Leggett)... 3 4 4 4
 Time—2:20½, 2:12½, 2:11¼, 2:15½.

Trotting, 2:23 class, \$1,500—
 Dredge, ch g by James Madison (Durfee).... 1 1 1
 Kinney Rose, b s by McKinney (Bigelow).. 3 2 2
 Fresno Girl, br m by Seymour Wilkes (Zibbell) 2 3 3
 Prince McKinney, b s by McKinney (McDonald) 4 4 4
 Ollie B., ch m by Nutwood Wilkes (Chadbourne) 5 5 5
 Time—2:16¼, 2:17¼, 2:17.

Wednesday, August 28.

Trotting, three-year-olds, \$1,500—
 Nogi, b c by Athabo 1 1 3 1
 Zolahka, b f by Zolock 3 3 1 2
 Prince Lot, b g by Prince Ansel 2 2 2 3
 Reina del Norte, b c by Del Norte... 4 4 4 4
 Time—2:20¼, 2:24¼, 2:23, 2:21.

Pacing, free-for-all, \$1,500—
 Sir John S., by Diablo 6 1 1 1
 Miss Georgie, by McKinney 1 2 2 2
 John R. Conway 3 3 3 4
 Delilah, by Zolock 2 6 5 3
 Miss Idaho 4 4 6 6
 Kelly Briggs, by Bayswater Wilkes..... 5 5 4 5
 Time—2:11, 2:12, 2:11½, 2:10½.

TWO AND THREE-YEAR-OLD RECORDS.

In reply to an inquiry, we will state that Ray O'Light's mile in 2:13½ at Santa Rosa, August 16th, in the two-year-old pacing division of the Pacific Breeders' Futurity, is the Coast race record for a two-year-old pacer. The world's race record for this age and gait is 2:10½, made by the bay filly Extasy by Baron Wilkes, at Lexington, Ky., October 15, 1898, when she defeated Matin Bells and Bride Elect in two straight heats in 2:15½ and 2:10½.

Klatawah holds the race record for three-year-olds. His mark of 2:05½ was made in the first heat of a race against aged horses. It will be a very hard mark for any three-year-old to beat for years to come. Klatawah is by Steinway, dam Katie G. by Electioneer.

Hymettus 2:08½ by Zombro is now the fastest three-year-old pacing gelding, replacing Agitato 2:09¼ and King O'Diamonds, who were tied for that honor.

The fastest two-year-old pacing race record is the 2:10½ held by Extasy, daughter of Baron Wilkes.

General Watts 2:09¼ is now the fastest three-year-old trotting stallion.

The fastest three-year-old trotting mare is Fantasy 2:08¾, whose record was made in the second heat of a \$5,000 purse for three-year-olds at Nashville, Tenn., in 1893.

Probably the greatest race ever won by a three-year-old trotter was the five-heat race in the Kentucky Futurity of 1904, when Grace Bond won the first and second heats in 2:09¼, 2:09¼, was beaten the next two in 2:11¼ and 2:13, then came back and won the fifth heat in 2:09¼.

MATINEE RACING AT STOCKTON.

Members of the Stockton Driving Club had a very pleasant little matinee on the 19th inst., the majority of the races being quarter-mile heats, best two in three.

The first event was won by Fred Johnson's pacer. There were four heats in this race, H. K. Myers' trotter winning one heat, J. Graham's pacer one and Johnson's the other two. The best time was 40 seconds.

The second event was a trot between horses driven by Mrs. Amos Shippee and Mrs. McIntosh, both of whom handled the lines very cleverly. Mrs. McIntosh won two straight heats in 41 and 45 seconds, the race being a quarter of a mile.

In the third event, a free-for-all, there were two starters, Mrs. Pope and Mrs. Sherwood driving. The latter took the heat in 32 seconds, the former coming in second in 34 seconds. Cowell and Dean, who had entered their horses, failed to show up.

The next event was a pacing race between Fritz Wille's Gilt Edge Dick and Joe Jones' Diahlo mare. Jones won the first heat in 35½ seconds, the other coming in second in 34½ seconds. Jones' horse took the third heat and the race in 35½ seconds.

The next event was a three-eighths of a mile trot between animals belonging to Joe Miller, A. L. Archambault and J. Murray. The first heat was taken by Miller's horse in 1:13, with Murray's trotter second. Murray's horse took the second heat in 1:10, with Miller's second. The third heat was won by Archambault's horse in 1:08, with Murray's second.

GRAND CIRCUIT AT READVILLE.

Readville, August 19.—Geers had splendid revenge for the defeat which Sonoma Girl administered to his star pupil, Highball, in the M. and M., for he triumphed over her to-day with a trotter who was considered a joke when he landed in high society last fall. Tempus Fugit, sometimes, in fact, nearly always, called Cream Puff, is the latest conqueror of the girl from the Golden West, and he is a trotter of the right sort, good-headed and ever willing to give his best. He is a bit off color, but he is dead game and has considerable speed to help this desirable quality out.

To-day was the first time that he has won a heat faster than 2:10, and the mare was in 2:07½. This did not take a great deal out of him, for he was down to the half the next trip in 1:02½ and the six-furlong pole in 1:34½. With Sonoma Girl out of the way his was an easy victory, for, much to the surprise of the regulars, Beatrice Bellini was not dangerous after the first heat.

Before the start first money, amounting to \$3,150, was conceded a gift to Sonoma Girl, for it was figured that with a professional behind her she would not break. McHenry made no change in her rigging, although tempted to. He was racing the mare for educational purposes, with the Massachusetts race Wednesday in view.

She scored nicely and the field was away quickly to a good start. The mare had second position, and looked to be well placed. Scarcely had they left the wire before she jumped off her stride and McHenry had a hard time in landing her back to a trot.

Just as every one thought they were in for one of her sensational brushes, off she went again, and this time she made such a muss that free-for-all pacing speed could not make up the lost ground.

All eyes were on the Girl when she finally did get straightened out, and as she flew past the quarter post hundreds of watches were snapped. With seemingly no effort she went up the back stretch at a two-minute clip.

"She will get inside," was heard on every hand. This appeared possible, for on past performances a mile in 2:08½ looked about the best that could be expected of Beatrice Bellini, and few gave any thought to the horse with the speedy name.

Dickerson's pupil was better than figured, and Tempus Fugit simply outtrotted himself, so that when the latter passed under the wire the great Sonoma Girl was two lengths away from the flag.

Later on, McHenry brought the Girl out and this time her mouth was not open, for he had a jawstrap on her and a different bit. She was schooled a lot, and when she scores with Highball Wednesday her manners are likely to be changed for the better.

The only event on the card to result as expected was the three-year-old pace of the American Horse Breeders' Futurity. Mike Bowerman, Kentucky's veteran trainer, was supposed to have the goods in Shakespeare, a big, rugged son of Jay McGregor 2:07½.

Uncle Mike delivered the package right side up, for he won handily, the first heat in 2:09¾, a capital performance. The youngsters, three of them, Eva Hal, Kavalio and the winner, were down to the three-quarters in 1:34¾, a gait which took the tuck out of them.

The second heat was close, with the Direct Hal filly under no harder drive than the winner.

The call for candidates in the two-year-old division of the Futurity brought out the sweetest going trotter that has been seen in the circuit this year, The Leading Lady. When Bob Proctor brushed her through the stretch before the start, hardened circuit followers who have never before been known to enthuse, began to sound the praises of the beautiful baby. She is beautiful in conformation, gait and manners, while for speed she is exceptionally well supplied.

She won as she liked, Proctor letting her take her time in going to the front in the first heat, which was just before reaching the half, and then in the second she went out and took the track to herself, tramping down to the three-quarters in 1:41.

The Leading Lady is owned and was bred by Benjamin Pope of Stony Meade Farm, Concord. She is by Bingen and is the second filly by Arthur Parker's great stallion to win the two-year-old Breeders' Futurity.

W. L. Snow uncovered a right good pacer in the 2:10 class, a fine looking gelding called Ethan Roberts, who won as he pleased in 2:06¾, 2:05¾, 2:08¾. Second to him twice was The Donna, and once Daphne Direct, who, by the way, is racing well for Jimmie Brady.

The \$3,000 2:06 pace was well split up, three horses winning dashes, each being second once. The time was very slow for an event of this character. The summaries:

American Horse Breeder Futurity, foals of 1904, pacing, purse \$1,000—
 Shakespeare, br h by Jay McGregor-Miss Spears by Lakewood (Bowerman) 1 1
 Eva Hal, blk f (White) 2 2
 Kavalio, g h (Young) 3 3
 Foxy Todd, b g (King) dis
 Time—2:09¾, 2:13¾.

American Horse Breeder Futurity, foals of 1905, trotting, purse \$2,000—
 The Leading Lady, b f by Bingen-Miss Pratt by Heir-at-Law (Proctor) 1 1
 Blivolo, b c (Young) 2 3

Zalem, b f (Bowerman) 4 2
 Selma, b c (McDonald) 3 5
 Hazlewood, ch f (McGrath) 5 4
 Time—2:19¾, 2:17.

The Blue Hill, 2:30 class, trotting, purse \$4,500—
 Tempus Fugit, ch g by Mark Time-dam by Almont Aberdeen (Geers) 1 1 1
 Beatrice Bellini, blk m (Dickerson) 2 2 3
 Marjorie, g m (Cox) 5 5 2
 Burma Girl, b m (Clarke) 3 3 4
 St. Peter, b g (Benyon) 4 4 5

 Laura Bellini, blk m (A. McDonald) 3 7 6
 Fred D., rn g (Fraser) 7 5 4
 Leeland, blk h (McGrath) 5 4 7
 McAuliffe, b g (Hiesrodt) 6 6 5
 Time—2:06¾, 2:05¾, 2:08¾.

Readville, August 20.—World's champion three-year-old trotting stallion 2:09¾. This title Gen. Watts earned at Readville to-day in the most sensational colt race ever trotted.

His is a crown brilliantly earned, for his right to the sovereignty was gallantly disputed by Blue Hill, and the battle that these two grand specimens of the American light harness horse fought will long be remembered by those fortunate enough to have seen it.

The record was made in the opening heat of the American Horse Breeder Futurity, and no sooner was the feat accomplished than folks were saying: "It is a performance that will not soon be equalled." False prophecy was this, because the Bingen blood had not been counted on. Gen. Watts seat on the throne was not as secure as believed, and to retain it he had to battle for his very life.

He is a bundle of grit and determination, for were he not his reign would have been of brief duration, despite his great speed. Blue Hill was after the sceptre, and he proved to be a foeman worthy to contend with a king.

Almost head and head these infant trotters raced the second mile back in the same wonderful time that the Axworthy colt had made in the first heat. At the finish Blue Hill was lapped on the General, and was officially timed in 2:09½.

The championship miles to-day were witnessed by a large crowd, which was drawn by the double attraction of the Futurity race and the fast pace. The latter was a disappointing contest, for the reason that there was nothing in the field to make Angus Pointer extend himself. Still the Canadian bred whirlwind equalled his record of 2:02¾, and reeled off six furlongs at a 2:00½ clip.

Codero, a four-year-old son of Bingen, scored a very popular victory when he brought the "all black" of Ralph Williams to the front three times in the 2:19 trot.

The track was fast, but a strong wind which swept the stretch from the eighth pole to the upper turn furnished a handicap that made fast last quarters impossible. The summaries:

American Horse Breeder Futurity, three-year-old trotters, two-in-three, purse \$7,000—
 General Watts, b c by Axworthy (Bowerman) .. 1 1
 Blue Hill, b c by Bingen (Titer) 2 2
 Bell Bird, blk f (L. McDonald) 3 3
 Flying Feet, blk f (Brady) 5 4
 Bonnie Way, b f (Lassell) 4 6
 Fantana, b f (Nolan) 6 5
 Bertini, b c (Young) dis

 Time—2:11¾, 2:10¾, 2:10¾.

Readville, August 21.—Highball won the twelfth renewal of the Massachusetts purse at Readville this afternoon in 2:10¾, 2:07¾ and 2:09, defeating his greatest rival, Sonoma Girl, before the largest crowd that has turned out to see the circuit horses this season.

The Memphis speed marvel was not put to any apparent effort, his victory being easily earned. His opponent, of whom so much was expected, continued her waywardness, and despite McHenry's master hand, she refused absolutely to trot from wire to wire a single trip.

Her failure to attend to the task in hand was very disappointing, for Geers fulfilled his promise of bringing Highball to the score in shape to give Sonoma Girl the race of her life, and the ease with which he trotted the second mile in 2:07¾ showed that it would have taken a sensational performance to have headed him.

The score between the famous rivals now stands two all. Miss Crabtree's \$26,000 mare was no match for Frank Jones' \$17,500 gelding, and no excuses can be offered for her, as her misbehavior has every appearance of being caused by a disposition not to play the game.

She showed her usual phenomenal burst of speed, which set the crowd wild and repaid the spectators for the afternoon spent at the track.

The real test of Sonoma Girl and Highball came in the last mile, and its result left no doubt in the minds of those who saw it that at present the Memphis trotter is the faster horse of the two.

Sonoma Girl went away a length ahead of Highball, and in less than 150 yards she had the pole. She was trotting at a two-minute clip, and her admirers began to hope that she had found Highball's measure. Geers recalled the Libertyville race, in which he allowed the Girl to rush away unchallenged, and yesterday he sent his charge after the flying Girl from the Golden West.

Man and horse seemed to be in accord, both boiling over with indignation at the unfair start, but each the more determined to make the victory a decisive one. Going into the turn, Highball drew up beside the mare, and Geers settled down as though he were driving a finish.

Sonoma Girl accepted the dare, and for a few strides the pair seemed to be flying. The race was a short one, for hardly had it begun before it was over, the Girl going to a break. When this happened Geers took his horse back to save him all he could, but at that he was down to the quarter in 0:30½, lengths ahead of his field.

Highball's victory was popular, for wherever the horses race the people applaud when Geers wins, even though, as yesterday, he defeats a home favorite. The Memphis trotter is a public idol, for at speed he is the most fascinating trotter on the turf, and to many his name has a very pleasing ring.

The crowd which saw Highball get revenge for his defeat in the M. and M. was up to that of the days when it was possible to lay a wager on a fancied horse, and its size and character paid a high compliment to the sport.

The weather conditions were far from ideal. The wind blew almost a gale and the air was cold, a combination which served as a heavy handicap on fast time. Dark clouds threatened rain from noon, but they did not shed water until the racing was about over.

The story of the race is easily told. In the first two miles Geers sent Highball to the front at once and won as he liked. Sonoma Girl made her mistakes each time in the second eighth. In the first mile she stepped from the half home in 1:01¾, and then finished last, so much ground did she lose by her mistake.

Her next break was not such a bad one, for she was able to finish second.

She had every chance in the third, for when the word was given it looked as though she had been presented with first place, for she was a length to the good of Highball.

Six horses won money in the event, the fight for second place being the interesting feature after Sonoma Girl made her breaks. Axtellay and Thornfield each got in a second, while Marecheal, who appears to be getting good, was twice third.

The early arrivals at the track who had never seen Highball were certain that he would not win, and several wagers were made that he would not start. The son of Dr. Hooker is a peculiar jogging horse when right, but now, with his rheumatism, he is a sight going slow.

When Geers brought him out many thought it was to let the judges see how lame he was, so that he might draw him. Turned for speed, he was a changed horse and as pleasing a gaited trotter as one often sees.

The only time that his lameness bothered him was in starting, after swinging for the score, and Geers had lots of trouble in keeping him trotting for the first few strides. Once fairly under way, the great horse never gave the least sign of doing aught but race.

A happier man than Frank Jones, the owner of Highball, would be hard to find. He had set his heart on winning the Massachusetts, and when Sonoma Girl defeated his star in the first big stake of the year, he laid plans to get revenge in the famous Readville classic. Mr. Jones passed up a lot of money which would have been rather soft picking, so that Geers could have the horse ready for his Boston engagement.

(Concluded on Page 11.)

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12
Santa Maria	October 22-26

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair) ..	September 23-28
Spokane, Wash. (Inter-State Fair) ..	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

Grand Circuit Dates.

Hartford	September 2-6
Syracuse	September 9-13
Columbus	September 16-27

Woodland races begin Wednesday, September 4th.

A fast track and perfect weather for speed are assured.

All the fastest horses on the circuit will meet at Woodland.

Inferlotta, Copa de Oro and Charley D. will start in the 2:20 pace the first day and the track record will probably be lowered.

Ed. R. Smith has been appointed starter of the races at the Fresno fair and race meeting.

If you have a roadster you want to sell, write Fred H. Chase & Co. about it. They hold a big combination sale next month.

The money in the 2:17 class trot at Petaluma is tied up by a protest made by Mr. F. H. Burke, owner of Vallejo Girl, to the effect that Carlokin, the winner, was not properly entered in the race, in so far as he was substituted for another horse after the date on which substitutions closed.

W. J. Kenney of 531 Valencia street is the one to see if you want a sulky or speed cart that runs true and rides easy. Have you seen those new speed wagons just received by him? They are all right in every way.

The San Francisco Driving Club will give an afternoon of racing at Vallejo on Monday next, September 2nd.

OVETA 2:12½.

A Winner at Pleasanton and Santa Rosa.

The new track at Bakersfield is now fenced and is in fine condition for the races this fall. The track will be fast.

Fred H. Chase & Co. will hold a combination sale of trotters and pacers in October. Now is the time to get a good price for roadsters and speed-way horses. Write to Chase & Co about the sale.

Corsican, the mare by Wildnut, dam Corsica, by Dexter Prince, is dead. She was sent to the Blue Ribbon sale last spring by Henry Dunlap of Pleasanton and was purchased by Mr. J. W. Kimhlin for \$500. On July 4th she was second to Wild Bell at Libertyville, and recently Mr. Kimhlin declined an offer of \$2,500 for her. She was bred at Palo Alto Stock Farm and was a bay mare six years old.

A. J. Welch, who owns the Charter Oak track, Hartford, Conn., uses an automobile to work the course. Some 3,000 wagonloads of clay have just been dumped on the famous old track, and Mr. Welch is going to work it down to good footing with a float drawn by an auto. Last fall the track was floated during the races at a rate of speed not attainable by horse flesh.

August 15th Major Delmar 1:59¼ attempted to lower the Poughkeepsie track record, trotting, which was set last year at 2:04½ by Sweet Marie. He failed, his time being 2:05½.

Ray O'Light 2:13½ is the fastest two-year-old pacer of the year.

The pacer Daniel J. by Winks 13869, went a great race at Marshall, Mo., two weeks ago, when he stepped three heats over that half-mile track in 2:06¾, 2:08 and 2:08¼.

Copa de Oro 2:07¼ is the fastest green pacing stallion of the year.

Ann Direct 2:12¼, winner of last year's M. and M., made her first start for this season at Poughkeepsie, and was third in 2:10.

George G. 2:05¼ is taking first money every time he starts this year. He is now nine years old and is probably a better and faster horse than ever before.

The four-heat plan, which was tried at Buffalo, seemed to work all right. It provides for a three-heat race, in any event, and if a winner is not found in three heats it does not permit the race to go beyond four heats. It is short enough, too, so that it does not permit a trainer to lay up any heats if he wishes to get a fair part of the purse.

The Petaluma track was as rough as a country road in spring time on Monday last, and many owners of trotters and pacers refused to start their horses over it.

By a mistake in spelling made by the parties making the entries, the mare Coheck by Azmoor, that took a record of 2:25¼ at Santa Rosa, August 16th, was given as out of Clarione by Dexter Prince. The dam's name is Clarionette, and she is out of Clarion by Ansel, next dam Consolation by Dictator.

J. A. Woodward has purchased the Fort Bragg race track from Len Barnard, and will make many improvements on the property.

A. F. Rooker, the well known horse and mule huyer, has just returned from the Sandwich Islands, where he took a large consignment of mules for use in the sugar plantations. He returned with orders for a large number of mules and will immediately set about gathering the animals. The sugar planters find that horses cannot stand the island climate, but that mules last there for eight or ten years. They are willing to pay fancy prices for good mules.

It is given out in the Eastern papers that the exact price paid by Lotta for Sonoma Girl was \$26,000.

Direct 2:05½ now has eleven in the 2:10 list, Easter Direct 2:09¼ being the latest addition.

Hymettus (3) 2:08½ is a gelding, and the fastest one of his age. He won second money in the Breeders' Pacing Futurity as a colt in 1906, but was gelded during the winter.

Alto Down by Iran Alto 2:12¼ win a six-heat race at Utica, N. Y., August 14th, and took a record of 2:19¼. Alto Down was second in every heat in which he was not first. The fastest heat of the race was 2:19¼, and the slowest 2:21½.

The Julien Hotel at Woodland will be headquarters for horsemen during the meeting next week.

The California State Board of Agriculture owes it to the horse owners who will race at the State Fair this year to put the track in good shape for safe racing and fast time. Plenty of water and intelligent work will make the Sacramento track fast, and it should be put in that condition. The fastest horses ever raced in California will be raced there this year and should have a good track to race on.

The State Fair management has advertised the pavilion well this year, but little or no information has been sent out in regard to the races, which will draw a very large proportion of the attendance and would draw more if given proper publicity.

Dan Patch in 1:56¼ and his daughter, Dana Patch, in 2:06¾, the same day at Galesburg, constitutes a world's record for sire and daughter in one day.

Aerolite's mark is now 2:11¼, a fast record for a three-year-old stallion, but he can heat it away off if he is right when he starts at Woodland next Friday. He will have to beat Hymettus to win, and the Zomhro gelding has already taken a record of 2:03½ this year. It will be a great race.

Athasham 2:09¼ took second money to Highhall at Providence this week. Sonoma Girl did not start in the race and will be laid up for a while.

Geo. A. Pounder of Los Angeles returned from the Grand Circuit races last week and went to Santa Rosa to arrange for shipping his weanling filly (own sister to Sonoma Girl) to Los Angeles. He states that Sonoma Girl got the upper hand of Mr. Springer, who has always been most lenient with her, and he thinks that under McHenry's handling she will not be so woful. Mr. Pounder firmly believes Sonoma Girl is a two-minute mare and will show a mile in that time whenever they get her in condition to make the trial.

Many of the horses now racing on the California Circuit will go north at the close of the Woodland meeting and will start at the Oregon State Fair at Salem.

YOLANDA 2:14¼.

A Winner at Pleasanton.

Inferlotta 2:04¼ is the fastest green pacing mare of the year.

Dave Simmons of Sacramento, the irrepressible, made another trial the other day to be permitted to sell pools on the races at the State Fair this year, but the directors have placed themselves on record as in favor of upholding the State law and would not recede from their position. Simmons offered to pay ten cents for every return check sold at the park that is, he would buy, say 1000 return checks from the management, paying \$100 for them, and sell them to those who came out to the fair grounds between races to play the pools. But when he was asked what would prevent a man from buying one of these checks for admission to the grounds, thus cheating the society out of forty cents, he found that his position was untenable and the matter was dropped. So there will be no hetting on the races at the fair this year.

Budd Doble left San Jose on Thursday of this week for Indianapolis, where his great stallion Kinney Lou 2:07¼ has been for several months past in charge of C. C. Crippen. Mr. Doble may start Kinney Lou to beat his record this fall, and as the son of McKinney is in fine shape, his record will be lowered as sure as he is started. We hope Mr. Doble will not stay in the East, as we now claim the great reinsman who drove Dexter, Goldsmith Maid and Nancy Hanks to champion records as a Californian and would hate to lose him.

It looks as if Nogi, winner of the Pacific Breeders' Futurity this year for trotting three-year-olds, also has the Occident and Stanford Stakes at his mercy. If he should indulge in such a break in either stake as he made at Petaluma this week, he might get the flag. He undoubtedly has more speed than any three-year-old trotter that has appeared in California this year, and can probably trot a mile close to 2:10.

Conqueror, who won the first heat and second money in the two-year-old pacing division of the Pacific Breeders' Futurity at Santa Rosa, took a record of 2:16, the same mark taken by his dam La Belle, at the trotting gait in her two-year-old form. Conqueror is a handsome colt and a sweet gaited one. He was only broken to harness six months before this race, and was of course short of work. In the second heat of the race Conqueror was separately timed in 2:14½, and will doubtless be a great colt in his three-year-old form. In his workouts before leaving home he paced quarters in 31¼, seconds and eights in 15 seconds. This seems truly wonderful for such a baby. Conqueror was bred by M. S. Severance at Valencia Stock Farm, San Bernardino, and is by the farm's stallion Direct Heir, son of Direct 2:05¼ and Bet Madison 2:15½ by James Madison 2:17¼. Conqueror's dam is La Belle 2:16 by Sidney 2:19¼, so he comes from a developed ancestry on both sides.

WOODLAND PROGRAM.

Wednesday, September 4.

2:27 Class, Trotting, Purse \$500.

Noraine, Barney Bernatto, Peter Pan, Prince McKinley, Wilmarch Jr., Yolande, Edward McGary, El Sidelo, Ben Russell, Prince Mack, Era, Dredge, Don B., Parachute.

2:12 Class, Pacing, Purse \$1,000.

Lettie D., Little Medium, Seymow M., Mephisto, Roberta, Der Teufel, Nordwell, Charley D., Inferlotta, Highfly, McGee, Joe Robin, Diabull, Pilot, Explosion, Opitsah, Diabless, Morrie N., Copa de Oro.

2:14 Class, Trotting, Purse \$600.

Boh Ingersoll, Vallejo Girl, Della Derby, North Star, Oveta, Kenneth C., Homeway, Queer Knight.

Thursday, September 5.

Two-Year-Old Class, Trotting, Purse \$400.

Bessie T., Nusado, Miss Dividend, Siesta, De Oro, Idolway, Katalina.

2:12 Class, Pacing, Purse \$500.

Mona Wilkes, Lohengrin, Wild Nutling, Jonesa Basler, Queen Pomona, Memonia, Friday, Byron Lace, George Perry, Mandolin, Lady Shamrock, Mollie Button, Victor Platte.

Friday, September 6.

Three-Year-Old Class, Pacing, Purse \$500.

Aerolite, Truth, Hymettus, T. D. W., Beulah, Radium, Josephine, Albert Direda.

2:08 Class, Pacing, Purse \$700.

Miss Idaho, Dr. W., John R. Conway, Delilah, Cresco Wilkes, Memonia, Daedalion, Sir John S., Kelly Briggs, Miss Georgie.

2:18 Class, Trotting, Purse \$500.

Princess Mamie, Sally Lunn, Hattie J., Carloklin, Don B., Parachute.

Saturday, September 7.

Three-Year-Old Class, Trotting, Purse \$500.

Nogi, Prince Lot, Baron Bowles, Zolahka.

2:24 Class, Trotting, Purse \$1,000.

Constancia, Moorita, Princess Mamie, El Rio Rey, Kinney Rose, Noraine, Barney Bernatto, Veranta, Berta Mac, Wilmarch Jr., Easter Bells, Sir John, Yolande, Ollie B., Fresno Girl, Sidonis, Era, Dredge, Prof. Heald.

2:16 Class, Pacing, Purse \$500.

Roberta, Billy B., Charley D., Just It, Babe Madison, Anna R., Jim Corbett, King Athby.

PARK DRIVING CLUB.

At a meeting of the executive committee of the Park Amateur Driving Club held this week it was decided to give six matinee race meetings at Golden Gate Park track on September 2d, 9th, 14th, 28th and October 5th, at which three fine cups will be competed for. W. A. Clark Jr., presents a cup to be given to the horse winning the most times in the series of six races in class A for trotters. Thos. H. Williams presents a cup to be given to the horse winning the greatest number of points in classes other than class A in the series of six races, counting as follows: Five points to winner, three points to second, one point to third, in each race.

Dr. I. B. Dalzell presents a cup to be given to the horse winning the greatest number of heats in the series of six races, either trotter or pacer.

No horse will be awarded more than one cup. These races are certain to produce keen competition, as the horses will be reclassified for each meeting. The entries for the first meeting are closed, and have been classified as follows:

Class A, trotters—F. J. Kilpatrick's Lady McKinney 2:19¼, A. Joseph's Vic Schiller 2:11¼, D. E. Hoffman's Major Cook 2:17.

Class B, trotters—George E. Erlin's Topsy, M. W. Herzog's Lady Nell, F. J. Kilpatrick's Allan Pollak, F. W. Thompson's Lady Washington.

Class C, trotters—F. W. Thompson's Rey Vera, S. Christensen's Reina Directum, F. J. Kilpatrick's Clipper W., A. P. Clayburgh's Charles II.

Class D, trotters—D. E. Hoffman's Neto, D. E. Hoffman's Kid Wilkes, A. P. Clayburgh's Major, F. J. Kilpatrick's Dennis, F. J. Kilpatrick's McKinney Belle.

Class A, pacers—T. F. Bannon's Jim Chase, F. E. Booth's Satinwood, E. Stewart's Victor Platte. A blue ribbon will be given to each winner.

Jack Curry acted as starter at a New York meeting recently, and made a success of it. He permitted little scoring and got the horses away trotting or pacing, as the case might be.

FOURTEEN YEARS WITHOUT FAILURE.

Messrs. King Bros., Albion, Nebraska, write: "Enclosed find \$1.00, for which send bottle of Quinn's ointment. We have been using it for the last fourteen years and it has never failed to do the work." For curbs, splints, spavin, windpuffs and all bunches use Quinn's Ointment. No cure, no pay. If cannot obtain from druggist, address W. B. Eddy & Co., Whitehall, N. Y.

DON'T LIKE THE SYSTEM.

As showing the utter absurdity of the "three heats race" idea, adopted this season by several grand circuit tracks, the summary of the 2:06 pace at Boston is of interest, writes H. T. White. The purse was the comfortable one of \$3,000, and, under normal conditions, the finish of the race should show which horse was the best in speed and stamina, the determination of those points being the primal object of horse racing. But under the stop-at-the-end-of-three-heats system it is possible neither will be decided, and at the finish of the so-called Boston race the people who saw it were as much in the dark as ever as to which was the best horse. The one that won the fastest heat, Hal C., stood third in the summary. The one which took the next fastest heat stood second, and the slowest horse in the race was, by operation of the new system, given first money—and this in spite of the fact that in the final heat he finished fourth, being able to beat but one other horse in what is technically termed "the deciding heat."

Showing by the Summary.

In order that the beauties of the system may be seen at a glance and in convenient form for study, the summary of the race is appended:

Prince Hal (Snow).....	2	1	4
Princess Helen (McDonald).....	1	5	2
Hal C. (Shank).....	5	2	1
Lancelot (Honey).....	3	3	3
Texas Rooker (Sunderlin).....	4	4	5
Custer (Hall).....	dis		

Time—2:07, 2:07¼, 2:06¾.

Here were six pacers with fast records, driven by six crack reinsmen, and yet at the end of three heats—when, by operation of the new rule, the race was automatically brought to a close—the track officials were obliged to figure out the winner by looking up, not the heats won, three nags being equal on that score, but the positions of those three horses in the heats they didn't win. Each of the three heat winners had a second position as well, and as Lancelot, an outside horse, was third each heat, first money had to be—and was—decided by the fact that Prince Hal came fourth to the wire one heat instead of fifth, because if he had been fifth in the third heat all three heat winners would have been tied for first money. But, by beating Texas Rooker—which stood for absolutely no money in the race and might as well finish last as anywhere else—Prince Hal is proclaimed the winner, gets the big end of the purse in the final heat, and the bets made on him are winning ones.

No other system offers half the possibilities and incentives for cheating furnished by the "stop after three heats" bunko game, and it is noticeable that in the west and at Lexington, where practical horsemen are managing the trotting tracks, they have not become foolish enough to try the scheme. Detroit is an exception, but it was a failure there.

RULES OF THE ROAD.

Every man who drives a spirited horse on the highway realizes how necessary it is that there should be some revision made in the rules of the road, so that a man would not hold the safety of himself and family by a slender thread whenever he picks up the reins to give his family a little outing.

The roads, as a rule, are big enough and good enough for heavy teams, light harness horse rigs and automobiles. And if the rights of each were properly respected by the others all could use the roads as they have a right to use them without the danger which constantly threatens.

There is such a big strain of selfishness in some people that they appear to forget that there is any one else on earth who has inherent rights, and when one of this species of Genus Homo takes the front seat in an automobile he appears to feel and act as if the whole road was made for his special benefit. The man with a spirited pair of horses who happens to be so fortunate as to meet him on the road is lucky indeed if he comes off without an accident.

Of course, this selfish man of the road has his rights, and it matters not whether he is driving an automobile or a heavy team. In either case he has no moral right to take advantage of the fact that he has the weight or speed and noise on his side, and force the lighter team into the ditch or scare the horses over the fence. This class of men who are lacking in the moral sense of right and wrong need to be curbed by a strong State law. A law that would give to the lighter team equal rights with the heavy team and the noisy, swift automobile.

To be sure, we have law on the subject, but it does not quite meet the case. People are being killed or maimed or frightened by those whose only right to do these terrible things rests on the power of might. The bad man in a swift automobile may be two hundred yards from a narrow spot in the road and yet rush right up to it and compel a light harness horse team to pass him at that dangerous point. The man with the horses might have no alternative but to go on and face the danger. It would not be so bad if the selfish man in the safe rig would stop and call off the puffing and chugging of his machine for a moment. But he does not do that. He comes right at the frightened horses, having little regard for the rights of the man driving them.

There are any number of good mannered men who search on the road with their automobiles when there

is no danger in doing so, but they are polite enough to help the man with the spirited horse to get by.

Livery men complain that they have trouble in renting their best teams because of the automobile road hog. People would sooner take a poor shabby looking horse than risk their lives behind a good team.

The people of the State are strong enough and wise enough to make and enforce a law to curb these men who make themselves masters of the road. The rights of the man with the light harness horse rig should be protected. The present laws regarding the rules of the road are not a sufficient guarantee to safety of the man who drives.—Chicago Horseman.

A SPORTSMAN, BUT NOT A GAMBLER.

"What is the enjoyment of being the owner of a successful race horse, a horse with the reputation of Peter Pan or Sysonhy or Commando?" was asked of Mr. James R. Keene of New York the other day.

"It is the gratification of possessing something that you know is a little better than that possessed by anybody else," he replied. "At least, that is the winner's way of looking at it. Beyond that, it is a matter of intense personal pride. One man is devoted to his yacht, because it is a faster yacht than that possessed by any of his friends. Perhaps it embodies some of his own ideas about construction, and for that reason he is fonder of it than he would be if it had been designed and built for him by others. Another man is attached to an automobile because he thinks that it is a little better than the automobile of any other owner or maker. The man who has the best hunting dog takes pride in that dog because it can do certain things in the field which are impossible for other dogs. So it is with a wonderful race horse. It is not the sum that the horse may earn, it is not the possibility that he may be employed for speculation that makes him desirable. Racing for gaming is not sport. It is the fact that he is a wonderful work of nature, a fine, high-spirited, perhaps gentle and intelligent animal that is a little superior to all others of his time, and whose courage is tested by the races he runs and the results which follow."

"What is the gratification that comes from winning races?"

"An exaltation of spirit that is stimulating and healthy. A man who has looked upon his horses from the time that they were foaled until they walk into the paddock after a hard race, victorious over everything which could be run against them, glows with enjoyment. How can one help it? Here is a handsome, clean-coated, sure-footed animal which you have seen perhaps from the earliest days when he shambled awkwardly after his dam, who has developed every quality that it was hoped would be produced when he was bred. It may be that the colt which was selected as a yearling to be the star of the stable will happen to be the disappointment. Some uncertain gaited youngster that did not appear at first sight to be as well advanced as another that has been foaled in the same year suddenly manifests qualities which indicate grand possibilities. It is as interesting to develop him for speed contests as it is to develop the handsomest youngster that may be bounding around the fields. If he wins in some contest which is to become a part of turf history, your blood tingles and you are proud of your results."

There are stables which are operated solely to succeed in the betting ring if it is possible to do so. Their owners breed horses, or more frequently purchase horses, with the idea of gathering a collection that shall be invincible in certain contests in which they desire to wager their money against the bookmakers. The matter of stake racing and racing for purses is seldom given consideration. They plan from week to week to bring off some successful coup by which they may heat the bookmakers, and very frequently they are not over-scrupulous as to how they do it.

Such methods are repugnant to the owner of Castleton Farm. He will have none of them. He races his horses for the enjoyment that they give him fairly and squarely to win the stakes or purses, as the case may be, and for that reason the public never hesitates to express its enthusiasm when a horse from his stable wins one of the richest prizes of the season.

In his years on the turf, both in this country and on the other side of the Atlantic, Mr. Keene has been the winner of some of the richest prizes in the turf world. Foxhall captured the Grand Prix at Paris, the Grand Duke Michael's Stake, the Ascot Gold Cup, the Cerarewitch and the Cambridgeshire, all great events of Europe.

The money maker of the stable this year is Peter Pan. Once again the blood of Domino is triumphant. Peter Pan, a son of Commando, and a grandson of Domino, at two years old was rather a clumsy colt, that looked as if he might be a fair race horse—and that was all.

To-day he is one of the most talked about horses of the year, and he is only three years old. Perhaps this is to be his best year as a race horse. His grandsire did most of his best racing as a two-year-old. He has at least surpassed Domino in his ability to produce speed at a later period in life.—New York Herald.

Drink Jackson's Napa Soda. It means health.

CONDUCTED BY J. X. DeWITT

MONTEREY BAY FISHING.

[By Walter R. Welch.]

Monterey Bay forms a portion of the western boundary of the county of Santa Cruz, Cal. In the waters of this bay, in the vicinity of the historic city of Santa Cruz, are to be found upwards of 150 different varieties of fish, principal of which are halibut, sea bass, yellowtail, tunny, barracuda, bonita, codfish, rock cod, and rock fish of many varieties, smelt, flounder, sole, mackerel, perch, sardine, pompano and many other kinds of valuable food fish, as well as the most noted of all, that royal game, as well as food fish, the "quinnat," or king salmon.

About 100 people, with an invested capital of about \$35,000, are at the present time engaged in the fishing industry in Santa Cruz county. During 1906 about 1,200,000 pounds of fish, valued at \$40,000, was exported out of the county, and of this amount about 175,000 pounds were fresh salmon. Most of the fish now being caught at Santa Cruz is shipped by rail to San Francisco in boxes and sacks, without being dressed or iced. A large portion of the catch is also used locally and shipped to adjoining towns.

A splendid opportunity offers at Santa Cruz for the investment of capital in the establishment of a fish cannery, and the proper handling and development of the salmon, as well as the other fishing industries of Monterey Bay. Not until within the past few years has the fishing industry of Santa Cruz received any particular attention. For many years it has been known that salmon entered Monterey Bay and that it was practically the limit of their southern range, as only a few scattered salmon can be seen south of Monterey Bay. Some few were taken each year by sportsmen while trolling for other fish, the professional fisherman not giving any attention to them until within the last few years, when the salmon fishing to be had in the waters of Monterey Bay began to attract widespread attention, not of the professional fisherman, but of sportsmen all over the country, and to-day the grandest kind of sport is to be had angling for the king salmon in the waters of Santa Cruz harbor. Here these fish are taken in large numbers on hook and line, from the month of May to September 17th and sometimes during January and February. They are taken by trolling with hook and line from rowboats and power launches, and catches are often made of as many as fifty fish to the boat per day. The fish average about eighteen or twenty pounds each in weight, and are often taken weighing forty or fifty pounds each. The announcement that the salmon have entered the waters of the bay is received with delight, not only by professional fishermen, but by sportsmen all over the country, and the wharves of Santa Cruz soon present scenes of activity; boats are removed from their winter quarters and made fast to the buoy-lines in the harbor; rods, lines and reels are overhauled, and everything made ready for the summer's sport. Messages by telephone and telegraph are sent to anxious sportsmen who have been eagerly awaiting the glad tidings that "the salmon run in Monterey Bay is on," and within a few days the beautiful blue waters are dotted with numberless rowboats and power launches, each of which contain from one to six ardent and enthusiastic anglers.

While trolling for salmon the angler at any moment is likely to have a "strike" from the sea bass, yellowtail, bonita, halibut, or any other of the large fish that inhabit the bay, and his tackle and skill be given a test seldom, if ever, equaled in other waters. Upon the angler's return to the wharf the catch is prepared for shipment by afternoon trains to the markets or to friends in San Francisco and other nearby cities, and the boat made ready for the next day's sport.

A very prolific rock-fishing ground was lately discovered in the waters of the bay a few miles south of Light-House Point, and large catches of rock-fish are now being made on these grounds.

The best season for fishing in Monterey Bay for sea bass, bonita, barracuda, smelt, sole and flounder is from May to September, for salmon from May to September 17th, for mackerel from July to October. Perch, rock-fish, kingfish and cultus cod are found in the waters of the bay at all seasons of the year.

The people of Santa Cruz county, appreciating the importance of perpetuating the supply of salmon in the waters of Monterey Bay and of trout in the thirty odd streams in the county, in 1905 established a fish hatchery at Brookdale, on Clear creek, a short distance north of the city of Santa Cruz. The success that has already been obtained by this hatchery has attracted the attention of fish culturists all over the country. From this hatchery during the past two years have been liberated exclusively in the waters of Monterey Bay and in the streams of the county, many millions of trout, quinnat and silver salmon fry. The silver salmon is the smallest, as well as a new species of game and food fish, on the Pacific coast, and its introduction into the waters

of Monterey Bay is an experiment that is being carried on by Mr. Frank Shebley, superintendent of the Santa Cruz County Fish Hatchery, in connection with the United States Fish Commission. At the hatchery, at the present time, are upwards of 2,000,000 trout and salmon fry. These fish will be liberated in the streams of the county and in the waters of Monterey Bay during the summer months. During the fall and winter months 5,000,000 or 6,000,000 salmon eggs will be hatched and the fry liberated in the bay. The eggs from which the trout are hatched are of the steelhead trout variety, and are all secured in the streams of the county from wild trout. No trout are spawned that weigh less than five pounds. The eggs from which the salmon are hatched are secured from the United States Fish Commission spawning station, situated at Baird, on the McCloud river.

At Santa Cruz the angler can be insured of the finest and most varied angling from sea-run fish to be had on the Pacific Coast, as well as experiencing the pleasure of trout fishing in the thirty odd streams in the county. As the Santa Cruz County Fish Hatchery will forever supply the streams and the bay, so will the city of the Holy Cross and surrounding towns be overrun with the man of the rod and reel.

LARGE STRIPED BASS.

A catch of striped bass was recently reported from Healdsburg that will make anglers open their eyes, particularly the fishermen who have been vainly trying to land bass, for some time past, in our bay waters. The Healdsburg Tribune is responsible for the statement of this big catch which was made in the Russian River:

Rare indeed is such a sight afforded of huge fish as that witnessed in the window of Gunn & Ferguson's store last week, where the unprecedented catch made by J. H. Gunn, who was assisted by J. A. McMinn, was on display. They brought home five striped bass that were monsters. The largest one weighed fifty-four pounds, the second fifty-one pounds and the others twenty, ten and six pounds. The fish were caught with a line at Markham's, near the mouth of the river. Suspended, as they were from a frame, they formed a fine sight, and the sidewalk was blocked at times with admirers of the striped beauties.

Naturally, Mr. Gunn was proud of the evidence of his abilities as a fisherman, and he received congratulations from everyone.

Bay fishing for striped bass has been rather excellent recently near San Pablo and at Rodeo. Whilst there is no record of any very large fish having been landed, the bass were found to be in excellent condition and ran from five to ten pounds.

Better Than Cuttyhunk.—A writer in the Indian Field makes a rather interesting statement for devotees of salt water fishing to ponder over. If his premises are correct, what a chance for ideal nine-strand lines is offered:

Whatever difficulties may beset the disciples of Isaac Walton in Europe and America in their search for ideal lines and traces (leaders), the Indian fisherman has a numerous assortment of threads and filatures to choose from or quite, if not far, surpassing the much vaunted silk or gut material in use among his compeers. Modern firearms are now so cheap that the bow and arrow are quickly becoming as obsolete as in the more civilized countries, yet nothing for strength, flexibility or freedom from tangle can equal the wrongly termed bow string hemp, or the half-dozen similar filatures yielding by the nettles or creepers so plentifully scattered about our jungles. Murgalie, as the Bengali call the bow string, is seldom cultivated in these days, but the most unintelligent coolie can bring in the leaves which run to four feet, producing silk-like threads throughout their entire length. In the Sonthal Pergannahs a creeper which grows luxuriantly is known under the general name of poolah, the strands of which when tested against hemp (which broke at a tension of 158 pounds), exceeded that strain by ninety pounds, proof positive that it would hold the biggest mahseer that ever gambolled in Indian rivers. These creepers or withers, known to botanists as asclepias, are found in all the forests of Northern India and most probably exist in the Sunderbunds. East of the Megna, as also in the Darjeeling terai, these producing fibres from the young shoots, are grouped together under the verancular name of Kulum. Simple steeping and rolling out on a rock or other hard substance to free the stems from the vegetable casings is all that is requisite to provide the most ambitious fishermen with a line that will hold anything. Greater durability is insured by oiling with gurjan, though if care is taken to dry the lines after use that is superfluous.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

ARTIFICIAL DUCK PONDS.

A recent decision of the Court of Appeals sitting in Los Angeles, if sustained by the Supreme Court, will be further reaching than the framers of the law originally counted on.

All the gun clubs in the State which depend upon artesian wells for their artificial duck ponds are affected by the recent decision of the District Court of Appeals in the case of J. L. Elam, a foreman for J. Ross Clark. Elam was fined in the Justice Court for allowing the waters of an artesian well to go to waste on lands near the little station of Bixby. On a writ of habeas corpus, George L. Adams, attorney for Elam, took the case before the Appellate Court. The Court sustained the lower tribunal in its infliction of a fine. The prosecution was in the nature of a test of the new law, which makes the waste of water from flowing wells a misdemeanor.

The Supreme Court will probably be asked to pass on the constitutionality of the act, which was passed at the last session of the Legislature.

The law contains a number of provisions which, it is believed, will make trouble, not only for gun clubs, but also for ranchers. The waters from artesian wells may be allowed to fill a pond, if it is to be used for breeding fish, but if the pond is to be used for ducks, the owner of it can be prosecuted for maintaining a nuisance.

A rancher with an artesian well is committing a crime, according to the statute, if he allows 10 per cent of the water to go to waste. Yet his neighbor, who has to pump water, can allow all of it to go to waste and not be guilty of a misdemeanor, according to the statute.

"I believe the Legislature will be asked to amend that section," said Attorney Adams of Los Angeles. "According to that act, Lucky Baldwin can be prosecuted for maintaining his pretty little private pond, unless it is filled with fish. An orange grower in Redlands can be arrested if he allows 10 per cent of the water used for irrigating to go to waste, if it is artesian water."

A number of gun clubs may stock their artificial ponds with fish, in order to be within the provisions of the statute.

The law was framed, it is said, for the benefit of the ranchers, who were being deprived of irrigating water by the reckless use of it by others, notably so the many gun clubs of Southern California which had built numerous duck ponds which were kept filled by water from artesian wells.

The beautiful mountain quail, so states the Porter-ville Enterprise, has nearly disappeared from the valley above the club-house. In winter we have seen hundreds there. The law came too late.

GOSSIP FOR SPORTSMEN.

For the sportsman who can take a vacation extending over a week or ten days the hunting and fishing attractions of Northern California, particularly certain parts of Shasta and Trinity counties and the easily reached Klamath Lake country, across the State line in Oregon, offers almost irresistible inducements for an outing.

A recent trip of the well known trap and revolver shot, Otto M. Feudner, to the interior of Shasta county, a district known as the Chatterdown creek country, some twenty-five miles southwest of Mt. Shasta, gave the San Francisco sportsman and his companions, Harry Treder and A. J. Brannigan, an introduction to a grand hunting country known to and visited by but few city sportsmen. Mr. Feudner states that deer were so plentiful and in such fine condition that the limit of two bucks was less a consideration than that of waiting the opportunity to secure fine head specimens for mounting. This Feudner did, securing two splendid four-pointers, one of which weighed 196 pounds. This big deer was bagged in a country so rough that the carcass had to be cut up and packed out piecemeal. Feudner states that after he had shot his limit of two bucks he saw a seven-pointer buck that was apparently as large as an elk. To give one an idea of the venison crop in that section, during an hour's ride one day thirty deer were counted, some of them being exceedingly large. The McCloud River, near which the party were, was at the time—two weeks ago—alive with thousands of salmon on the way to the spawning beds at the head waters of the river and its tributaries. This condition made fly-fishing very uncertain, the trout devoting their attention to salmon eggs instead of artificial flies. Even at that the party had plenty of fine fish for the camp larder.

Another expedition to the northern country will be that of the Floyd H. Judah-J. B. Hauer party, which will leave this week for Klamath Falls, where they will outfit and procure guides, going thence on horseback a distance of 125 miles for a hunting and fishing excursion in and about Klamath Lake and further east to Crater and Lava Lakes. Some rare duck shooting will be indulged in next week, for the party will be across the line in Oregon, where the open duck season commences on September 1st. The mallard, springtail and widgeon, bred in the Klamath Lake country and fattened on "wapato" or Indian potatoes, are noted as being gastronomic prizes in the wild game class second to none on the Coast. The party will be the guests of Mayor Bishop of Klamath Falls.

Humboldt county, in the estimation of many devotees of the rod and gun, has been voted a veritable paradise. Per square mile of land and water it is exceedingly doubtful if a greater abundance of "fish, flesh and fowl" can be found than in the confines of this territory.

In season the duck and geese congregate in flocks of countless thousands upon the waters of Humboldt Bay and in the many lagoons and lakes to be found up and down the Coast. For years past hunters have been wont to bag enormous quantities of every variety of duck and goose. Many of the local sportsmen own small boats and use them for the purpose of getting at the great flocks which naturally keep just out of good gun shot along shore. Quail, grouse, mountain quail and other birds also abound.

Deer are quite abundant in that section, as the deep valleys and vast stretches of mountain sides covered with chaparral and small undergrowth furnish abundance of pasturage and safe covert. On the opening of the season, July 15th, scores of hunters get busy in quest of venison, and he is an unlucky shot indeed who does not succeed in securing his legal quota. Added to this is all the delight of an outing in the mountains, with clear, bracing air, and sapphire skies, and mountain water that cannot be surpassed anywhere in the world for purity. Bear and panther and smaller game are also hunted in the mountain sections.

Trout fishing in Humboldt has long been famous; as one enthusiast expressed it "the trout make their headquarters there." To one who loves to whip the rod nothing can be more entrancing than to wander along the mountain streams and cast a line in the deep pools below some turbulent rapid and secure a well-filled creel of speckled beauties. Besides trout there is the deep sea fishing for sea bass and rock cod along the rocks, crabs fishing in the bay and last, but not least, clam digging with its toothsome reward.

He who loves camping life and a combination of mountain and ocean, or loves to explore Nature in her vast forests, who loves noble scenery, and thrilling, manly sport, and invigorating mountain climate, will involuntarily turn again to Humboldt, once he has been privileged to visit this clime and witness what it has to offer in the line of fish and game.

The sport of salmon trolling in many Pacific Coast waters is, each season, receiving increasing attention from many anglers. Monterey Bay has now many rivals. Puget Sound has been noted for years as a grand salmon fishing water. The splendid chances for an exhilarating day's sport in the ocean outside of the Golden Gate has now a big following of salt water anglers. Last Sunday there was a flotilla of over twenty-five launches out, each boat having two or three rods out and the take was an excellent one, some of the fish caught going over forty pounds. Other fish, including "skip-jacks," were also taken on the spoons or sardine balts. Bill Street states

from experience that a ten-pound skip-jack will put up as game a fight as an angler could desire,

The big salmon are evidently further north, if the following press dispatch is reliable:

Trolling for salmon in Alaska waters is beginning to be a sport that is gamy enough for the most fastidious fisherman. There are few who know of the fight that a big salmon can put up when he is hooked.

At Ketchikan there are a number of sportsmen who enjoy the sport, and probably foremost among them are Judge Ernest Kerberger and James Byers, both of Kake.

Judge Kerberger hooked an eighty-three-pound salmon while trolling near Ketchikan a short time ago, and it was only after a good fight that he landed the big fellow. James Byers a few days ago landed a salmon that weighed seventy-five pounds while he was trolling near Metlakatla.

Byers is also something of a hunter, and has shot ten bear this season. The Ketchikan hunters and fishermen are very proud of their prowess, but big fish and game stories have to be accompanied by the Missouri sign.

Illegal killing of wild game in the vicinity of Stockton has aroused the attention of sportsmen of that section.

Reports come in daily from the islands and marshes that dozens of young ducks, known as "flappers," are being slaughtered by men who dispose of them, presumably in San Francisco and around the bay cities. Naturally some of them are killed by farmers for their own table, but most of them are shipped out as produce. Just at present the breeding grounds are well filled with young birds and those who have made an investigation assert that if they are left alone until the open season, October 15th, there will be plenty of ducks in that part of the State.

Quite a number of Stockton sportsmen will make an appeal to the Board of Supervisors and the Fish Commissioners to appoint a game warden that will attend to duties of the office. The Supervisors some months ago named a man, but many of the prominent Stockton hunters claim that all he has done since being given authority is to draw his salary of \$85 per month while engaged in other work. The matter will probably be taken up at the next session of the Supervisors.

It has been suggested that a petition be prepared and liberally signed asking that a warden be named at once or hundreds of young birds will be killed and the others so frightened before the season opens that it will be impossible to get anywhere near them when the open season begins.

The same state of affairs prevailed before the opening of the dove season. Men in automobiles would run along the country roads and kill large bags of the birds from three to four weeks before the season opened, yet not an arrest was made nor did there appear to be any effort made to apprehend the culprits.

Sportsmen who have visited Rio Vista and vicinity to enjoy the excellent black and striped bass fishing of that section have been loud in their complaints of the flagrant violation of the law by the net fishermen and other characters frequenting the district.

That these complaints have borne fruit is shown in the recent arrests, convictions and fines imposed upon several men who were apprehended by Game Warden George Neale of Sacramento and Deputy Fish Commissioner Jack O'Connell.

One account states that August 15th three Greeks, Joe Comba, Joe Leeve and Joe Azaveda, all of Clarksburg, were caught shooting rail and had the evidence in their possession. The men also had fine meshed nets in their boat, but had no fish, and consequently no charge of illegal fishing could be brought against them. The prisoners were brought to Rio Vista and pleaded guilty before Judge Kalber, who fined them \$25 each and ordered them released from custody.

The officers express a determination to put a stop to this illegal practice and say they will show no mercy to those offenders of the fish and game laws in the future, but see that they get the maximum fine or imprisonment, or both.

Nearly every year, after the salmon season closes, and even at other times, the Greek fishermen from Black Diamond and other points make forays in the Rio Vista country, and with small meshed nets catch thousands of pounds of black bass, which is against the law. At one time Game Warden Neale of Sacramento made an important capture in Duck Slough and for a time illegal fishing stopped. It is said to be running at full blast at present and nightly boats come up the river to Duck Slough and as far north as the Glide Tract, returning at early morning loaded with fish of all kinds.

The nets used are generally the very finest made, and nothing, save the very smallest fish, escapes. The nets are run from bank to bank and one drag generally cleans a slough of all fish of any value. Of course, other fish again fill the slough and the process goes on nightly.

Fine meshed nets are used by more than those who make nightly raids, and it is believed some of the fishermen who reside on the river are also guilty of violating the law.

Residents along the Sacramento River claim the Fish Commissioners could find plenty of evidence to convict if they would visit Duck Slough any night.

What the black and striped bass fishing possibilities for sport with rod and line are can be gathered from the following paragraphs taken from the Rio Vista news of recent dates:

Last week a number of gentlemen from San Francisco and other places visited this section in search of a day's fishing, the principal fish caught being the bass.

The best catch made so far this season was made by a couple of San Francisco sportsmen who, in company with Messrs. Geo. Adcock and Claude Kagee of this place, secured a string of some thirty fish, mostly black bass, as the result of a day's outing, and returned to San Francisco well pleased. Some of the fish weighed about seven pounds, and the catch averaged three pounds, so the string was one to be proud of.

Last Saturday a number of the local fishermen visited the grounds, and although the time spent fishing was short, they secured ten large fish, averaging four pounds apiece. Geo. Adcock took the boys around in his launch, and is making a specialty of fishing parties and locating good fishing grounds.

Mr. A. Nelson, foreman of the Tule factory at Newton, and a friend, were the recipients of congratulations on every side last Sunday as they stepped from the launch to the dock, after a day's fishing in Prospect Slough. They had one of the finest strings of bass, both striped and black, we have seen for some time.

Since our little notice for the past week in regard to the bass fishing in this section many of our local anglers have been endeavoring to see who can make the best record as a fisherman. A party consisting of T. Pedro, M. C. Nunes and Sam Castro, spent an afternoon near Twitchell Island and returned with one of the largest catches of black bass ever made here. The boys claim to have caught the limit, twenty-five each, and although we did not see the string, we will take their word for it. Bass fishing has been good in this locality lately and the lover of this kind of sport can depend on making good catches if they know anything about the habits of the fish.

One day last week word was sent to the San Francisco Police headquarters that a trunk containing a dead body was at the Southern Pacific baggage room. This soon brought to the spot policemen, railroad officials, the morgue wagon and a score of others, who stood around anxious to catch a glimpse of the grewsome remains. Theories ran rampant. Murder was in the air. Villainy was abroad, mystery was thick, and Officer Webb, who was detailed to the case, felt the importance of the find and shoved the crowd around fussy.

There was no difficulty in locating the trunk, for it had an individual odor of its own.

"Get back there," said Webb, hastening toward the trunk. The railroad officials stood around breathless. The morgue wagon backed up to the sidewalk and Webb threw open the lid with a flourish. There was a craning of necks among the crowd—and then a roar of laughter, for the supposed dead person proved to be nothing worse than some dead ducks.

Webb banged down the lid of the trunk hastily and tried not to look sheepish. The railroad officials wandered away with grins. The Oakland men who gave the alarm were asked to explain the point of the joke and the talk of murder dwindled down to that of an infraction of the game law. The game warden is trying to locate the sender of the trunk.

The trunk was held until John R. Ryan went to claim it. He was arrested immediately by Policeman Webb, despite his statements to the effect that he had found the check to the trunk on the sidewalk and that he knew nothing of the matter.

According to the police this is but one case of a systematic shipping of game to wholesalers in trunks. Ryan was locked up at the Harbor Police Station, but was released later on bail furnished by H. Galon, who said he was an employe of Scatena & Co., the well known commission firm.

It was announced later by Deputy Game Warden Sedgley that the men responsible for the importation of the ducks would be prosecuted vigorously.

Word comes from Wehber Lake that the fishing is better there than it has been many seasons and anybody can catch trout this year. Boarders at the hotel are catching from thirty to a hundred fish a day and the trout are uniformly of large size. One day recently Charels J. Stovel, a San Francisco expert fisherman, made the record catch at Lake Wehber, when he landed the largest fish ever caught in that home of game fish.

The lessees of the place will this fall plant 100,000 small fish in the lake, having secured the promise of the State Fish Commission to furnish that quantity of the cut-throat species for the lake. There are five varieties of trout in Wehber Lake, the famous Loch Leven, the cut-throat, rainbow, Eastern brook and German brown. Sportsmen favor the cut-throat species, and hereafter the Wehber Lake people will plant that variety in large quantities every season.

Fishing around Tallac has resulted in some of the largest catches in the trout line yet recorded this season. One of the largest trout is that caught by Parker Whitney of Rocklin, who landed a nineteen and a half pound beauty recently. Now that the waters have gone down in the brooks, excellent fishing is reported.

The Little Truckee and its tributaries are alive with trout, and while there are few record breaking catches, all of the trout are of good size, fat and well flavored. Whitney expects to go up into the wilds of Humboldt sou and fish and hunt. He will join Frank Newbert and party.

From all sides reports come to the effect that the fishing this season is the best experienced in many years past. The receding of the waters has left all the chances open for the sportsman who delights in the art of angling.

In a recent issue of the Sportsmen's Review an article on "Sea Fishing Records," by a New York correspondent, mention was made of the record anglers of America. This brought forth the following comment from a striped bass angler:

"I take exception to record of the striped bass of fifty-two pounds caught by Capt. Bill Brumacher, Asbury Park, as being the record fish of this variety. Your correspondent can easily ascertain from published records of big fish that the record big striped bass, taken in American waters with rod and reel, is of sixty-eight and one-half pounds, dressed, caught near Newport, R. I., by Mr. Wm. M. Hughes of South Portsmouth, R. I."

This fish would have gone over seventy pounds if it had been weighed before dressing, and has stood for a number of years as the record striped bass, and so stands to-day, unless claim has been made by some one else with a larger fish.

AT THE TRAPS.

The Pacific Coast Trap Shooters' Association will hold the fourth annual blue-rock tournament at Ingleside on Sunday, September 8th. Added money purses will be \$500.

The program calls for five 20-target races, entrance \$1, \$10 added, four moneys. Side pools, \$1 entrance, optional; high guns, four moneys, 40, 30, 20, 10. The regular purses will be divided Rose system—7-5-3-2. Targets, 2½ cents.

There will also be a five-man-team shoot, entrance \$5 per team, \$25 added, high teams, 25 targets per man. A merchandise shoot, 20 targets, \$1 entrance, will wind up the shoot. This will be a distance handicap at from 14 to 20 yards.

A large attendance is anticipated, not only of local shooters, but of trap shots from various interior points.

The California Wing Club's live-bird shoot for September, and the club's final shoot for this season, is the card at Ingleside to-morrow.

With the Golden Gate Gun Club shoot, September 22d, and the Union Gun Club shoot, September 8th, the local trap shooting season will be closed for 1907.

The Golden Gate Gun Club's regular blue-rock shoot on the 25th inst. was the powder-burning feature at Ingleside. High gun for the day was shot by Clarence Nauman, who broke 94 out of 100 targets in the regular events. Emil Holling came next, with 91 out of 100.

In the club added money competition at 50 targets (two sections of 25 each), every shooter, save two lowest scores in the second class, was in the money.

The scores were: Champion class—Nauman 49 out of 50, Emil Holling 47, Ed Schultz 42, W. J. Golcher 41, Edgar Forster 35. First class—F. Feudner 45 out of 50, Iverson 42, Hip Justins 40, Murdock 35. Second class—Thomas 44 out of 50, Patrick 37, Hoelle 37, Ashcroft 35, Hauer 33, Lynch 30, Lewis 21. Third class—C. Holling 33 out of 50, Lemon 23, Sutro 23, V. Holling 12.

In the medal race at 25 targets the scores were: Champion class—Schultz 23, Nauman 22, Holling 22, Golcher 16. Winner of medal, Schultz.

First class—H. Justins 23, F. Feudner 22, M. J. Iverson 19, Murdock 15. Medal winner, Justins.

Second class—Thomas 23, Patrick 21, Hoelle 16, Ashcroft 16, Lynch 12. Medal winner, Thomas.

Third class—C. Holling 17, Lemon 11, Sutro 12. Medal winner, Holling.

Back scores in medal race were as follows: Champion class—Nauman 23 out of 25, Holling 22. Schultz 21.

First class—H. Justins 21, F. Feudner 20, M. J. Iverson 17.

Second class—Patrick 21, Ashcroft 21, Thomas 16, Hoelle 16, Lynch 12. In the shoot-off Patrick beat Ashcroft.

Third class—C. Holling 19, Sutro 16, Lemon 8.

Results of the series of medal shoots up to last Sunday are: Champion medal, won by Nauman twice and by Schultz twice. First class, won by Justins twice, Iverson once, Prior once, Sylvester once. Second class, won by Thomas, Patrick, Hoelle, Terrill and Lynch at different shoots. Third class, won by C. Holling twice, Lemon once and Sexton once.

John Dale made high score in the Owl Club's shoot for the Du Pont trophy last Sunday, and leads all competitors. He scored 64 out of 75, Johnson 64, Sperry 55, Davison 53. Dale now leads for the trophy, with a score of 253 out of 300. Henry Garrison and Sperry are tied for second place, with scores of 251. The shoot for the trophy will close next Sunday with 100 targets.

At a recent practice shoot of the Goldfield Gun Club the following scores were shot:

Dy, shot at 100, broke 82; Rhodes, 100-80; Sage,

100-76; Strock, 75-49; Durgan, 75-36; Johnson, 75-19; Bradley, 65-35; Foster, 50-32; McGown, 50-21; Comer, 25-8; Revere, 22-0; Leland, 10-3; Devere, 10-0.

Jack Fanning still has his shooting eye in proper shape, as will be seen from the following report of a shoot at Rochester, N. Y., on the 9th inst.:

Interest in out-door shooting at inanimate objects, which has languished of late in Rochester, was given an emphatic fillip by an exhibition of fancy shooting at the range of the Rochester Rod and Gun Club, at Cobb's Hill. Mr. and Mrs. Adolph Topperwein of San Antonio, Texas, were the principals in the entertainment, though they were assisted by proficient shots from nearer home.

The first exhibition was a trial of skill at breaking clay birds with the shotgun. Jack Fanning of Wilmington, Del., won first in this event, with a core of 96 out of 100. H. M. Stewart and Mrs. Topperwein were tied for second with 95. The detailed score follows:

Fanning	24	24	24	24—96
Mrs. Topperwein	23	23	25	24—95
Stewart	25	21	24	25—95
Conley	23	22	23	23—91
Skutt	22	23	22	22—89
Mitchell	19	22	23	24—88
Adkin	22	22	23	23—90
Kershner	21	25	24	23—93

Mr. Topperwein's exhibition of fancy rifle and pistol shooting followed. He performed several stunts which almost electrified the audience. Mrs. Topperwein broke a surprisingly large number of clay birds with a pistol, and then betook herself to the rifle, transfixing pieces of brick, potatoes and little marbles which were tossed up into the air by her husband.

A number of eggs, which were thrown into the air, were targets for Mrs. Topperwein's shotgun, and the performance was varied by throwing the doubtful fruit in the direction of the spectators, who ducked with a natural unanimity at the moment of projection. The woman behind the gun never failed to intercept the missiles before they had a chance to waste their sweetness on the crowd.

Horace Bonser, the Eastern handicap winner, is a live-bird shooter as well. At the sixth contest for the Gambell trophy on the grounds of the Kentucky Fishing and Shooting Club, at Ryland, Ky., August 8th, he killed thirty-six straight pigeons, defeating Arthur Gambell in a shoot-off for the cup.

W. E. Potter, with a score of 86, won the Hoegee medal at the handicap medal tournament of the Los Angeles Revolver Club, which was held August 18th at the Bishop-street police range. W. E. Smith, one of the scratch men, gave Potter a good run for his money. Smith was tied with A. B. Douglass for second place with 84 for a score. G. F. Stephenson, the other scratch man, and one who usually runs one, two, had an off day and trailed along in fifth position with 79 points to his credit. The full score of the shoot was as follows: W. E. Potter 86, W. E. Smith 84, A. B. Douglass 84, George Mallion 81, G. F. Stephenson 79, W. H. Gordon 77, C. W. Linder 74, E. C. Crossman 62, G. H. Stibbs 43.

Next Sunday at the same range the club will hold its regular weekly practice shoot, and for the following Sunday the monthly club medal shoot is scheduled.

The ordinary program will be varied on Sunday, September 22d, when a ten-man-team, selected from the club, will meet a like number of marksmen from Troop D of the Seventh Regiment Cavalry in a challenge match.

The members of the Los Angeles Revolver Club are interested in the report that a new gun club is being formed at Ocean Park, and many of them are anxious to enter into competition with the beach club at as early a date as can be arranged for.

Trap shooting seems to have a strong following across the border line, a recent report in the Cananea, Mexico, Herald.

Concession was recently granted to the Cananea Gun Club to bring in 10,000 shells for shotgun use. The shells are now at Naco and will come through the custom-house in due course.

A club meeting will shortly be held at which an active fall campaign will be mapped out. At present the out-look is good for an excellent season of shooting and enthusiasm exists among members of the club which will make much sport.

DOINGS IN DOGDOM.

Venice show entries closed on the 17th inst. with a list of over 200 entries, it is reported.

Entries for the San Mateo show will close to-day at 5 P. M. at the office, 469 McAllister street.

The outlook for a four-point show at San Mateo was very assuring by Thursday.

Advices from Stockton are that everything looks good for the coming show. The premium list will probably be out next week.

The list of trophies and specials is more than enough to go round; there will be over 100 of these, and all of them will be worth the winning.

Stirling silver medals for first in winners and neat bronze medals for firsts in all regular classes. The ribbon award in other classes, it is promised, will be a rather elaborate affair.

W. H. McKay states: "We feel that there will be a large entry and that many fanciers will take the time and come along, as it will be a nice outing, with convenient and pleasant means of transportation. If any of your friends intend coming, it will be best for them to engage hotel accommodations in advance, as our hotels are doing quite a business now. We are doing everything possible to make the coming show the banner Coast show of the year, and have everything moving along as smooth as possible without any kinks."

Captain Huron Rock's English Setter bitch Santa Barbara whelped last week six puppies to Ch. Stylish Sergeant. Captain Rock's kennels are located at Montecito, near Santa Barbara.

Mr. W. W. Thompson, a well known Bulldog fancier, formerly of Eureka, Utah, has taken up his permanent residence in Los Angeles and proposes to establish a kennel of his favorite breed.

The Pacific Advisory Committee of the American Kennel Club has jurisdiction in all matters pertaining to dogs and dog shows in the States west of the eastern boundary of Montana, Wyoming, Colorado and New Mexico. All applications for registrations, licenses for shows, memberships or dates and all other communications relating to dogs and dog shows should be addressed to the secretary of the Pacific Advisory Committee.

The Pacific Advisory Committee has granted dates for the following named Coast shows, so a communication this week from Mr. J. P. Norman, secretary of the committee, informs us:

"Venice of America, August 29th to 31st; San Mateo, September 9th; Sacramento Collie Club, State Agricultural Society, September 13th and 14th; Spokane, September 25th to 28th; Salt Lake, Utah, State Fair Association, October 1st to 4th; Stockton, October 14th to 16th."

Denver Duncan, a rattling good Scotch Terrier, as merry as a grig in the show ring, we regret to note, was killed by a rifle shot fired by an unknown miscreant while the dog was in the yard of his owner, Mrs. C. E. Maud, at Monterey, one morning recently. A reward of \$200 has been offered for information that will locate the shooter.

The Western Bull Terrier Breeders' Association money prizes offered for the San Mateo show are open to all. It is the intention of the club to offer cash prizes at each and every Coast show, something that will be a slight recognition of good judgment in breeding, rather than a prize to the fortunate owner of a good dog which has been purchased or otherwise acquired. In any competitions the club may arrange it will be with the intention that nobody is barred.

Stiletto Kennels' Ch. Meg Merrilies II, whelped this week a litter of seven fine puppies.

John Lucas and Charlie Coutts are now located up north with a string of dogs for the British Columbia and Washington trials. Lucas, in a recent letter to Mr. Victor Caglieri, states:

"We had a good trip from Frisco to Seattle and from the latter place to Vancouver the trip was grand. This was surpassed, however, by the trip up the Frazer River to Suma Landing, fifty-six miles from Westminster. The country around there is simply magnificent. A fine country to work dogs, but the very cold winter just past killed most all the 'Chinks' (pheasants), therefore, Charlie Coutts and I, will move to Cloverdale, B. C., as the grain will be all cut and there are plenty of birds there now, thanks to the farmers, who feed them through the winter's cold."

Lucas has a rather limited string in his charge this year. One of the dogs, however, is a good one, Mr. Caglieri's phenomenal 30-pound little English Setter bitch Carmen (entered in the All-Age for both the British Columbia and Washington trials). Her speed, style and ginger was the aftermath topic of discussion of the Pacific Coast trials last January. Carmen, who was acknowledged by all as the class of the stake, is going faster, wider and with more dash than ever, but under much better control, due to her increased experience after the trials. It is expected that Carmen will be heard from at both trials, as predicted by the published reports of the last Coast trials.

Valverde Kennels report the following interesting data for Collie fanciers:

Valverde Vera (Ch. Squire of Tytton ex Southport Supreme) whelped August 20th to Ch. Anfield Model eight puppies (four dogs).

Southport Caprice (Ch. Wishaw Leader ex Xantippe of Moreton), arrived on August 20th in good shape after her long trip from Mr. Mason's English kennels. She is heavy in whelp to Ch. Southport Student. Blue Cloud, a blue merle winning bitch in England, also came at the same time.

Ch. Anfield Model served August 24th a bitch from the kennels of Mr. Van Arsdale, Ridgwood, Cal.

Southport Philosopher served The Duchess last week. She is owned by Mr. Davis, Hartford, Conn.

A Reno bitch, Dalia, belonging to Mr. Bachman, was bred to Ch. Anfield Model, August 14th.

Southport Stephen, a son of Ch. Squire of Tytton, served Southport Supreme August 29th.

(Continued From Page 5.)

The race proved to be just the kind that Geers would have selected, could he have had one made to order, as it did not tax his horse at any stage. Mr. Jones, however, was anxious that the Girl should go on a trot, especially in the last mile, so that Eastern folks could see just what a wonderfully fast trotter Highball is.

Miss Crabtree was not in the least discomfited by the defeat of her trotter. She is a great admirer of Highball and spent several minutes petting him between heats. She expects Sonoma Girl to behave better later on, and she very wisely says that her manners are not likely to improve until she has a brief rest, which Miss Crabtree has advised.

As a race, The Massachusetts was the least interesting of the three events which made up the program. The 2:12 pacers and trotters both furnished exciting sport.

Walter Cox paraded the winner of the Readville, a \$3,000 purse for pacers, in Owen J. Carney's stallion, Thornway, much to the surprise of the regulars. William O., a stable mate of Highball, was the popular selection, but Geers' pupil never had a chance with Cox's Thornway.

The latter is the most consistent pacer of the year. He started in at Detroit by winning, and while he has not since won, he has been the contending horse in every heat he has started in. At Cleveland he made Alice Pointer go in 2:05 1/4; at Buffalo he forced Aileen Wilson out in the same time, and at Poughkeepsie he was beside William O. in 2:05. He is an honest going fellow and as game as they make them.

He was about all out in 2:05 1/4 the second heat, but back he came the third under a hard drive, stalling off William O. and Reproachless. The summaries:

The Massachusetts, 2:14 trot, three heats, purse \$9,000—

Highball, h g by Dr. Hooker (Geers)	1	1	1
Thornfield, h h (Benyon)	5	6	2
Sonoma Girl, hr m (McHenry)	9	2	5
Axtellay, h m (Thomas)	2	7	8
Marechal, b h (Cox)	3	5	3
Clary Latus, ch m (Lessell)	4	3	6
Genteel H., br h (W. McDonald)	6	4	4
Prince C., br h (McKenney)	8	8	7
Kassona, h m (Snedeker)	7	9	9

Time—2:10 1/4, 2:07 1/4, 2:09.

The Readville, 2:12 pace, three heats, purse \$3,000—

Thornway, b h by Steinway (Cox)	1	1	1
Hidalgo, h g (L. McDonald)	2	2	4
William O., blk g (Geers)	7	4	2
Major Marlow, b g (Marlow)	4	3	6
Reproachless, blk m (Starr)	8	7	3
Alice Pointer, h m (McDevitt)	6	8	5
Johnny Smoker, br g (Dore)	5	9	7
Shaugraun, br h (De Ryder)	9	6	8
Bonanza, b g (Thomas)	3	5	dis

Time—2:07 1/4, 2:05 1/4, 2:05 1/4.

Trotting, 2:12 class, three heats, purse \$1,200—

Wilkes Heart, b g by Great Heart (Estelle)	1	1	1
Jack Leyburn, ch g (McCarthy)	2	3	4
The Pacolet, blk g (McDevitt)	6	7	2
Mae Heart, ch m (McHenry)	8	2	9
Wild Bell, br g (De Ryder)	5	6	3
Silver, ch g (Loomis)	3	8	8
Imperial Allerton, br h (Snow)	4	10	7
Sarah Hamlin, br m (Packer)	7	5	5
Alice Edgar, h m (Benyon)	10	9	6
Chime Bells, br m (Titer)	9	4	dis
Paul Kruger, b g (Cox)	11	dis	
Ann Direct, blk m (Brady)	dis		

Time—2:09 1/4, 2:09 1/4, 2:09 1/4.

Readville, August 22.—The circuit horses that paraded at Readville to-day were shod with racing slippers, and they furnished by far the best sport of the week. This was not strange, for the program gave promises that competition would be exceptionally keen.

The sport was marred by an accident which disabled one reinsman and for a moment looked to be of a very serious nature. In scoring for the first heat of the main event Sam Rysdyk swerved into Wilson Addington, took his legs out from under him and threw him to the ground.

Miss Gay, who was trailing, went over the fallen horse. Cox and Dore were tossed into the air and struck the track with much force. Dore sprained an ankle, while Cox was fortunate enough to escape with a severe shaking up, and he drove the race out. Neither horse was harmed beyond a few scratches.

John A. set the pace when the word was given, and led up to within a few yards of the finish. He was not able to stall off Kruger, who came on fast under a hard drive. The heat was in 2:04, a new record.

The next trip Geers trailed Kruger, and when it came to the final test he shot his handsome stallion to the front a head in the lead of Kruger, who in turn nosed out Darkey Hal.

The third mile was the best of the day and week. Everyone was playing a waiting game, so John A. was first at the quarter at a 2:09 gait. Up the back side ten horses went with no daylight between them, and a fine sight it was.

Coming out of the upper turn John A., Kruger and Darkey Hal drew a bit away from the others, and through the stretch the trio of Hals raced like mad, with Geers, McDonald and Rombough driving their best.

A few lengths from the finish John A. weakened, but Kruger and Darkey Hal fought it out. McDonald lifting his horse to victory in the very last stride. The finish was so close that many thought the mare had won.

Kruger is a pacer that a man cannot but feel proud of. To begin with, he is a handsome fellow, then he has perfect manners, has a world of speed, and, best of all, he tries to use it.

Lotta, who won the first trot, is just another such creature. She does her best all the while, and if she is beaten, as has happened just once this year, it is because some horse has quite a little more speed.

Miss Crabtree was as happy as a care-free child over her namesake's win, and declared she would rather have her brother's little beauty win than her own Sonoma Girl.

Lotta was in no soft spot, for it takes a real trotter to get the money from Margaret O.

George Graves' matinee trotter, Mack Mack, is no mean competitor either. To-day was his first professional start of the season, and he served notice that he will be a dangerous member from now on. Ed. Bither has him in splendid form, and never has he looked as well or moved so much like a high-class trotter.

The Ponkapoag \$4,500 purse was supposed to lay between Early Alice, the Missouri queen, and Watson, who took the measure of Sonoma Girl at Poughkeepsie. The gelding has developed a slight lameness and did not appear for the word, while Early Alice was away off form, not being able to get within 100 yards of Emboj when he won the opening round away from Bi-Flora and Betty Brook in 2:08 1/4.

Charely de Ryder carried off the major share of the purse with the California-bred-and-owned son of Athadon, Athasham. This horse was talked of a lot last winter, but yesterday is the first time since coming east that he has looked to be a real good trotter. He now carries a record of 2:09 1/4 and is the second trotting stallion to enter the 2:10 list this season. The summaries:

The Ponkapoag, 2:10 class, trotting, purse \$4,500—

Athasham, hr h by Athadon-Cora Wickers ham by Junio (De Ryder)	4	1	1
Emboj, h g (W. McDonald)	1	2	4
Bi-Flora, b m (Splan)	2	3	3
Bonnie Russell, b h (Thomas)	5	6	2
Betty Brook, h m (Titer)	3	4	5
Lady Resolute, b m (Lassell)	6	5	6
Early Alice, b m (Taylor)	ro		

Time—2:08 1/4, 2:09 1/2, 2:09 1/4.

The Norfolk, 2:08 class, pacing, purse \$6,000—

Kruger, ch g by Mercury-Mart T. by Tennessee Wilkes (A. McDonald)	1	2	1
John A. ch h by Eddie Hal (Geers)	3	1	3
Darkey Hal, hl m (Rombough)	5	3	2
Aileen Wilson, bl m (Wilson)	2	12	8
Leland Onward, h h (Murphy)	4	4	4
Harry L., h g (Fraisier)	12	7	5
Miss Gay, h m (Heisrodt)	11	6	7
Index, h g (Farley and McKenney)	13	9	6
Bystander, h g (Hall)	7	11	10
Allenwood, b g (Lewis)	8	8	9
Wilson Addington, h h (Cox)	9	5	ro
Robert Kernan, b g (Douglass)	6	10	ro
Sam Rysdyk, b g (Tracey)	10	13	ro

Time—2:04, 2:03 1/4, 2:06.

2:08 class, trotting, purse \$1,200—

Lotta, blk m by Guy Thistle, dam by Endcliffe (McHenry)	1	1	1
Margaret O. b m (Davis)	2	5	2
Mack Mack, h g (Bither)	3	2	4
Turley, hr g (Geers)	4	3	3
Charley Belden, b g (De Ryder)	4	5	4
Tuna, b m (Kelley)	6	6	6

Time—2:10, 2:08 1/4, 2:09 1/2.

Readville, August 23.—The Grand Circuit horses closed their engagement in the Bay State to-day and have departed for new battle-fields, leaving a memory of as grand sport as the turf has ever known.

The meeting at Readville was a success away beyond expectations, and leaves no doubt as to the erection of a steel and concrete grandstand on the site of the bleachers which served so well this week.

As expected, the closing hours of the meeting were among the best and furnished a bit of racing that will not be surpassed this season. History repeated, for the Sharon gamecock, Argot Boy, triumphed over the sweet Ardelle, just as he did twelve months ago, and now, as then, he is the only horse who has ever scored a win over her.

It was in the race between these speedy rivals that the struggle mentioned took place. Argot Boy had outraced Phalla in the last strides of the first mile and had carried her to a break in the middle of the second. Geers then took up the chase, and coming out of the upper turn was at Argot Boy's side.

Two gamer pacers never lived, for they stood the test grandly, each trying with his whole heart and strength to outfoot the other. To the wire they came like a pair, with never a falter, and as they reached the finish the cry, "A dead heat!" was heard on all sides. The nose of Argot Boy caught the eye of the officials first, and for the second time in her career Ardelle had to accept defeat by her only conqueror.

The day was not one in which fast time could be expected, which was well for the Argot Boy, else he would have been forced out of the 2:04 class.

The speed honors of the meeting fell to George G. in the first mile of the 2:05 trot, which he covered

in 2:06, a remarkable performance and one leaving no doubt as to his ability to race in 2:05.

Alta McDonald has the son of Homeward in fine form, and it was not a very difficult task for him to trim the wings of the four-time winner, Lillian R.

The Pittsburg queen has had to meet no such trotter as George G. before, and she did not find his game much to her liking. She has no excuses, for she showed as much speed in the first heat, when she was second to George G., as ever before; in fact, a trifle more. The mile rather took the tuck out of her, for in the next two heats she was not able to get the place away from Oro.

The slow trot was won by Henry S. Jr., a son of Col. Kuser, who showed the racing quality of his sire. The finishes in this event were close. Princine, a member of the Crabtree stable, landed the place in the first mile; Travellesso, son of Direct Hal, in the second, and Prince C., a Massachusetts starter, in the third.

The Rubinstein gelding, Composer, made his first start of the season, going a capital race, being very close up in 2:12 1/2.

Geers won the 2:14 pace with Byron Kay in one-two-three fashion, but he had to keep busy the first heat in order to stall off Gentry's Star, Jack Crabtree's daughter of John R. Gentry. In the third heat Cox very nearly stole a march, for it was a close decision at the wire.

Geers had disposed of the seemingly dangerous horses and was taking things easily, when Cox brought Arrow out of the bunch on the outside and almost nipped the heat and a record of 2:09 1/2 for the Boston-owned son of Argot Wilkes.

The meeting from start to finish was one of the best that New England has ever had. Never was one better managed, nor has the sport ever been cleaner. The New England Breeders' Association is surely entitled to the congratulations which have been extended. The summaries:

Frotting, 2:16 class, purse \$1,200—

Henry S. Jr., br g by Col. Kuser-Nellie Gray by Ned Wilkes (Evans)	1	1	1
Prince C., br h (McKenney)	3	4	2
Travellesso, blk g (Geers)	E	4	2
Princine, b m (McHenry)	2	5	6
Composer, b g (Lassell)	5	3	4
Queen's Daughter, b m (White)	6	6	5

Time—2:11 1/4, 2:12 1/2, 2:13 1/4.

Trotting, 2:05 class, purse \$1,200—

George G., b g by Homeward-Mahel by Junio (McDonald)	1	1	1
Oro, blk g (McCarthy)	3	2	2
Lillian R., b m (McDevitt)	2	4	3
John Caldwell, br g (Geers)	4	3	4
Kid Shea, b g (Packer)	ro		

Time—2:06, 2:08, 2:09 1/4.

Pacing, 2:04 class, purse \$1,200—

Argot Boy, b g by Argot Wilkes-Anna Miller by American Boy (Cox)	1	1	1
Ardelle, br m (Geers)	4	2	2
Judge Wilson, b g (Spencer)	3	3	4
Cascade, br g (Davis)	5	4	3
Phalla, b m (Gatcomb)	2	ro	

Time—2:05 1/4, 2:05 1/4, 2:06 1/2.

Pacing, 2:14 class, purse \$1,200—

Byron Kay, h g by Greystone-dam by Mambrino (Geers)	1	1	1
Gentry's Star, b m (McHenry)	2	2	5
Arrow, h g (Cox)	5	4	2
Queen Walnut, rn m (Taylor)	3	5	3

Miss Winifred, blk m (White)	4	7	4
Margaret B., b m (Honey)	6	8	6
Red Jacket, ch g (Dennis)	8	6	ro
U. G. E., rn g (McGrath)	7	9	ro

Time—2:08 1/4, 2:10, 2:09 1/2.

—Frank G. Trott in Boston Globe.

THE GUY WILKES FAMILY REDIVIVUS.

It makes one hark back to the days of the late William Corbitt and the Goldsmith Brothers to note what the descendants of Guy Wilkes 2:15 1/4 are doing this season, and in a way it might be called a Guy Wilkes year. Sonoma Girl 2:06 1/4 heads the list of the fast performers that descend from this great son of George Wilkes, she being a granddaughter. Copa de Oro 2:07 1/4, that is racing well in California, is also but a second remove away from the fountain head, while the pacer John McEwen, that went such a good race over a half-mile track, gaining a record of 2:09 1/4, is a great-grandson. Lotta 2:09 1/4, a member of the famous actress' stable, and that has also been racing well, was by a sire whose dam was a daughter of Guy Wilkes.

Yolande 2:14 1/4, a likely trotter on the Pacific slope, is from a daughter, while last, but by no means least, is the sensational green mare Perfection, that recently sold for \$10,000, after showing a trial in 2:06 1/4, her dam being a grand-daughter of the former San Mateo stallion. So far but one of his get has taken a standard record this season, that being Wilkes Guy 2:21 1/4, and as Guy Wilkes has been dead some years, there will probably be few new ones by him get in, but there are enough sons and grand-sons, to say nothing of the daughters, etc., to keep the family name at the front.—Samuel Blampied in American Horse Breeder.

Jackson's Napa Soda is the best hot weather

NEW BREED OF DRAFT HORSES.

Ames, Iowa, August 17.—The Iowa State College is co-operating with the United States Government in a breeding experiment to establish a breed of gray draft horses. The experiment is just on the eve of starting. An importation of gray Shires and Clydesdales arrived here about two weeks ago and they are to be used as the foundation stock in this work.

The essentials of this American draft horse is size, quality, width and depth of body, plenty of bone of quality, good feet, and more than ordinary action and style. The different breeds have many of the same characteristics in common, and yet in other points are widely different. The aim of this experiment is to effect a cross that, while not too violent, will yet get the strong, essential qualities of each breed used, so that they will fuse into a distinctive breed of American draft horses.

A study of the blood-lines decided Secretary Wilson of the United States Department of Agriculture and Profs. Curtiss and Kennedy of the Iowa State College to select the Shire and Clydesdale breeds for the beginning of the experiment. A search into the pedigrees of the leading Clydesdales and Shires shows the wisdom of this choice, for many of the best stallions and mares of the Clydesdale breed trace remotely back to Shire blood. Even a cursory glance at representatives of these two breeds shows a closely related type as to form and quality. The demand at all horse markets at the present time favors the gray color and this demand controlled the color type of the new breed. This color is so desirable that many dealers prefer to buy an animal with such a coat and will pay \$50 or more for it.

The importation consists of eight animals, one stallion and two mares of the Clydesdale breed and one stallion and four mares of the Shire breed. These individuals are all heavyweights and of outstanding excellence. Prof. W. J. Kennedy and Mr. R. B. Ogilvie, superintendent of the horse department of the International station, picked them from the cream of European studs, and they are an ideal hunch to start the great experimental breed on the way to popularity. The three-year-old Dappled Tom, sired by Stroxtion Tom, a winner of more medals than any other Shire, is an individual of the ton size, and he has one of the best pedigrees known to the Shire breed. His dam is Lady Smith III., a mare of wonderful perfection. She is a full sister to Lady Smith II., who was champion of the Shire horse show of London. Her sire is Nailstone's Coeur de Lion, a twice champion of the royal agricultural show of England. Dappled Tom was bought from Thomas Forshaw & Son, the great Shire breeders of Carlton-on-the-Trent.

The leading Shire mare is Berford Mettle, a two-year-old, weighing over 1,800 pounds, bought from Jas. Gould at Lymm, England. She was sired by Lymm Lion, he by Conquering Harold. Too much cannot be said in praise of this filly. She will be shown at the next International. The other Shire mares are also good animals. Madres Field Alice and Madres Field Allen are sisters, two and three years old respectively. They were bred by Lord Beauchamp of Molson, England. These Shire fillies were sired by Iron Chancellor, who was first and champion at 1894, 1895 and 1896, Bath, West England, Essex, and Anylesea shows. Kirby Bedon Firefly is a three-year-old, well bred, a good individual, and a winner at several of the leading shows.

The Clydesdales are headed by Kuroki, a four-year-old, sired by Prince Shapely, by Cedric. He is out of Ainsell. His sire is the sire of Refiner's dam. Kuroki's dam is by Baron's Pride, by McGregor. He was bred by A. and W. Montgomery of Nether Hall, Castle Dundee, who consider Kuroki the best animal to have ever left Scotland. The two Clydesdale mares are worthy representatives of the breed. Gray Pearl is a five-year-old purchased from Major Duff at Drummond Castle, Keith, Scotland. She was sired by Pearl Oxyer, who brought \$2,000 at a public auction sale when a three-year-old.

This mare has several firsts and championships to her credit from North Scotland shows. Rose of Brownfield is the other mare of this breed. She is an eight-year-old and weighs 1,950 pounds. She was bred by John Easton, Duffrees, Scotland. The show-yard record of this mare is wonderful, as she captured forty prizes in the Scottish show arenas. Her middle and top are of show style to-day. Her feet and legs are her strongest points. But all in all, he is a good individual to select as a broodmare.

INTESTINAL PARASITES OF THE HOG.

There are a number of different kinds of worms found in the alimentary canal of the hog, but probably the one most commonly found is a large white worm, varying in length from five to ten inches. This parasite usually is found in the small intestine. Other common parasites of the intestines include the thorn-headed worm of the small intestines, the pin-worm of the rectum and the thread-worm of the large intestine. The effect of large numbers of any of these parasites is to interfere very materially with the growth of the hog. Young hogs and pigs are injured to a greater extent than adults, as they frequently become stunted to such a degree that it is difficult to get them to grow and thriving as they should.

Generally no care is taken to prevent the hogs from becoming infected. One infected hog in the lot will, under ordinary conditions, soon infect all of the hogs in the lot, as the principal means of spreading the infection is through the dirt of the feed lot and by means of surface water that is frequently used for the hogs to drink and wallow in. The treatment for most of the intestinal worms is simple and generally very effective, there being a number of remedies available. The following are among the most common and effective of the remedies, and the dose given is for each hundred pounds of live weight: Fluid extract of spigelia and senna, mixed in equal parts, in half-ounce doses twice or three times a day until purging takes place. The cedar apple may be ground up and given in thirty-grain doses three times a day for two days and then followed by a physic. A mixture of powdered wormseed and area nut in teaspoonful doses twice a day is recommended. Turpentine is probably the best general remedy in use. Give two teaspoonfuls in milk or a small amount of slop twice a day for two days. If a number of pigs are to be treated, they should be divided into lots of five or ten and then given the medicine, mixed with their feed. All of the remedies should be followed with a purgative, except where the remedy itself is a physic. For this purpose give an ounce of castor oil or linseed oil. A mixture of salt and ashes kept in the lots where the pigs can get what they will eat of it is a good remedy to use for preventing intestinal worms.—Oklahoma Experiment Station.

ALFALFA WITHOUT IRRIGATION.

A recent telegram from Byron, Contra Costa county, says: "The region about Byron is gaining prominence for production of alfalfa without irrigation. Five crops of hay are not unusual, and by getting along without irrigation the expense is reduced to the minimum. The sixty-acre farm of C. J. Preston of Eastern Contra Costa county is looked on as a representative field of alfalfa. The yield from this tract this year has been as follows: April 8th, two tons per acre, \$10 per ton; May 16th, two tons per acre, \$10 per ton; June 25th, one and a half tons per acre, \$12 per ton. The fourth crop will be gathered in about five weeks, and will average one and a half tons per acre, commanding \$12 per ton.

"The assured gross products is \$94 per acre. The expense of cutting and hauling is less than \$3 a ton. Should the autumn rains hold off a fifth crop or more, a ton to the acre will be cut. Other non-irrigated alfalfa ranches afford similar results in Contra Costa county."

Don't forget that pigs never sweat, and therefore they must be supplied with plenty of water in which they can cool themselves during the warm summer months.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

SPELLS VICTORY for Cripples and Weak Ones!

IT MAKES NO DIFFERENCE HOW OLD, SERIOUS OR AGGRAVATED THE CASE, DO NOT GIVE IT UP.

Proofs of Contract's Validity.

Oatville, Kans., June 13, 1907.

This is to certify that I have received in full the amount of \$15.00 due me on refund from the Troy Chemical Co. (Signed) MR. J. J. KETCHEL.

Rehoboth, Mass., Aug. 10, 1907.

Troy Chemical Co., Binghamton, N. Y. Dear Sirs: I thank you very much for check for \$10.00 received. It is the first time in my life I ever knew a firm to refund anything, although there are many that advertise to do so.

I shall take pleasure in recommending your remedy to friends who may need it. You deserve the greatest success for such square dealing, and I should never hesitate to use it again or speak a good word for it. Truly yours, O. H. GAY.

THE PALACE PHARMACY.

C. H. MCKINSTRY, Proprietor.

J. M. HURST, Reg. Pharmacist.

Seaton, Ill.

Troy Chemical Co., Binghamton, N. Y. Gentlemen: Mr. Burns asked me to apologize for not writing you; he sold the horse before he received your answer and check, and thought he was out the \$5.00. I told him you had always made your word and guarantee good, and he is convinced of the fact now.

We have sold several dozens "Save-the-Horse." Some of the parties have bought two and three bottles at different times and did not want the guarantee, as they knew it would cure what they intended using it on. One man cured two curbs with one bottle and ever since I sold him the first bottle has kept a bottle on hand. Respectfully, C. H. MCKINSTRY.

Our guarantee is not mere words, mind you, but a signed contract; made absolutely legally binding to protect purchasers to treat any case named in the document.

Write for proofs. Read what it has accomplished for others; it will unflinchingly do so for you.

"SAVE-THE-HORSE" permanently cures Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Shoe Bole, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle. Written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet.

At Druggists and Dealers or express paid.

TROY CHEMICAL CO., Binghamton, N. Y. Formerly Troy, N.Y.

Wanted-

AGENTS AND CORRESPONDENTS WANTED IN EVERY TOWN ON THE PACIFIC COAST FOR THE "BREEDER AND SPORTSMAN."

Proof That It Cures.

Madison, Neb., Aug. 5, 1907.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: Please send me at once one bottle of your "Save-the-Horse" spavin cure; I want to use it on a bowed tendon. I have used it and know what it is. Send it by the first express C. O. D., and I will pay the agent. Please don't delay. Yours truly, J. W. DAVIS.

Baltimore, Md.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: Kindly let us know what your "Save-the-Horse" will do for ringbone. We have used it and completely cured a thoroughpin, but in this particular case the man wants to know from you direct. Yours, J. Adolph Wagner's Highland Pharmacy, N. W. cor. 3d St. and Eastern Ave, Exld.

Oakland City, Ind., June 6, 1907.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: I have a nice black gelding, eight years old, a fine roadster, that went lame in right hind leg. He presented all symptoms of spavin, but no enlargement of the hock developed. I called in a veterinary. I blistered it six times and kept him laid up practically for ten months, but when he went out of a walk he went lame. I decided not to blister any more and in a short time I noticed a bog forming on the injured hock. Seeing your ad. in the Western Horseman, I bought a bottle of "Save-the-Horse" spavin cure and some "Save-the-Horse" ointment and followed the directions exactly. In a week after beginning treatment I began using him on the road every day, and in six weeks he was as sound as a dollar. Yours truly, C. J. GRIMSLEY.

CAMPBELL'S

EMOLLIC IODOFORM

GALL REMEDY

FOR GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.
 The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.
 PRICE—25c, 50c and \$1.00

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circular testimonials. W. B. Eddy & Co., Whitehall, N. Y.

THE WEEKLY

BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

MANY HORSES will go north from California after the California State Fair to race on the North Pacific Circuit, and it is unfortunate that so little time is allowed them in which to make the trip. The California State Fair closes Saturday, September 14th, and the Oregon Fair opens the following Monday. As it requires thirty-six hours to make the trip, horses shipped from Sacramento Saturday night will not reach Salem until Monday morning, giving them hardly time enough to rest up if they are entered in races for the first day. Exhibition animals cannot be shown with any satisfaction at both fairs. Before next year we hope there will be some reciprocal action between the two State associations by which dates can be arranged to permit a full week between the two great fairs. If this can be arranged stock of all kinds can be shown at both fairs, to the advantage of all concerned. We need a well organized Pacific Coast Fair Circuit for the States of Washington, Oregon and California. United action on the part of the different boards would bring this about to the advantage and benefit of all concerned.

CALIFORNIA should be the leading horse breeding State in the Union. We will not argue that we can breed faster or better horses than any other locality, but we certainly can breed and raise them to maturity for less money. The climate of this State permits horses to run out on pasture the year round, and where alfalfa is produced they can be kept fat enough to market without ever seeing the inside of a barn from one year's end to another. The natural grasses of this State furnish excellent feed from a few weeks after the first fall rains until they dry and cure on the ground in June and July, and will then keep stock fat and in fine condition until the rains bring the green feed again. There is no section of the United States where horses can be grown to maturity as cheaply as they can in California. Then why should it not be the leading horse breeding section?

CALIFORNIA OWNERS who have not been lucky enough to have their horses win on the home circuit this year can get consolation by reading the summaries of the races on the Grand Circuit. A perusal of these will show that the names of many horses with great reputations for speed seldom stand as good as fourth. The bill for entrance in the big purses of the "big ring" is a mighty heavy one on a person whose horses do not win, and the man who is racing a non-winner at home is much better off than the one who is racing the same sort of a horse farther away.

THE OLD THREE-IN-FIVE seems to work pretty well in California. There was no race at Salinas this year that required over four heats. At Pleasanton seven of the thirteen races were finished in three heats, four required four heats, and two went to five heats. At the Breeders' meeting at Santa Rosa eight out of eleven races were decided in straight heats, and but one required more than five. At Petaluma nearly every race was finished in three heats. Better racing has never been seen than the California Circuit is furnishing this season.

THE CIRCUIT OF 1908 should be arranged by the first of January and consist of not less than twelve meetings.

THE CALIFORNIA HORSES racing on the Grand Circuit this year do not always win, but they are getting some of the money nearly every time they start. Sonoma Girl 2:06½, George G. 2:05¾, Athasham 2:09¼, Charley Belden 2:08½ and Sterling McKinney 2:04¼ have all won good sized purses in the very best of company, and are all California bred trotters.

THE ATTENDANCE at Salinas, Pleasanton and Santa Rosa this year was far ahead of that at Petaluma. At the three places first named well managed harness racing brought out the crowds, but the week at Petaluma, in which the trotters and pacers had to play second fiddle to the runners, failed to draw the people.

HORSE SHOWS would be an interesting feature to add to the harness race meeting on the California Circuit. The classes need not be very numerous, but the prizes should be large enough to attract good displays. The Pacific Coast Trotting Horse Breeders' Association especially could make this a feature, and give premiums for the best stallion, mare, and one, two and three-year-olds, besides prizes for the best roadsters in pairs or single.

THE CALIFORNIA STATE FAIR opened last Monday with a very large attendance and the finest display of exhibits the pavilion has contained for many a year. On Monday next the program of harness racing will begin with the Occident Stake for three-year-old trotters, and there should be a very large crowd present when the starter gives the word. If the track is in good shape for fast time the record of the stake, which is 2:15½, should be lowered.

A BIG AUCTION SALE of trotters and pacers should be held in California every year in February or March. A combination sale during which two or three hundred horses would be offered would attract buyers from the East and enable owners to dispose of their horses at good prices. Such a sale, handled on the broad-gauge plan of the Old Glory and Blue Ribbon sales, should be a paying proposition and highly successful.

IF THE MANAGERS of a dozen mile tracks in California would get together and organize a harness racing circuit for 1908, making announcement of stakes early and arranging purse races for each place that would close about two weeks before the meetings at which they would be raced for, it would be a big success. There is no State in the Union where as many horses are trained each year, but the prevailing custom here of closing all purses before the circuit opens results in small fields after the first few meetings are held, as so many owners find their horses are outclassed by a few.

CIRCUIT HORSES AT WOODLAND.

Large Crowds Turn Out to See the Trotters and Pacers at Yolo County Seat.

The change from Petaluma to Woodland this week has been very pleasant to all the horsemen who are racing on the California Circuit this year. The excellent track there was a great help to the horses that had been racing on the hard and rough course at the "Chicken Town," and the absence of the runners and accompanying "touts" was a noticeable and real pleasure to those who enjoy harness racing for the sport.

The track was in superb condition, and while the scratching of Copa de Oro from the 2:20 class pace left nothing in the race that could make Inferlotta pace close to her Santa Rosa record, the time made in the two trotting events was faster than has been made at any track on the circuit this season. Manager Chas. Spencer is entitled to much praise for the good appearance of the grounds, which are neat, clean and well kept.

There was a large crowd out for an opening day, the grandstand being well filled, and the people were pleasantly entertained between the races by splendid music by the Woodland Band.

In the judge's stand Mr. A. C. Stevens presided, and did the starting, assisted in the judging by Messrs. T. S. Spaulding and H. E. Coil of Woodland. Ed R. Smith of Los Angeles acted as clerk of the course and announcer.

It was a day for the favorites, and in all three races first choice horses won in straight heats.

But three trotters came out for the word in the first event. The Zombro mare Era sold as favorite at \$10 to \$5 for Dredge and Yolanda as a field. In the absence of Will Durfee, Dredge was driven by Ben Walker. Era won the first two heats handily in 2:12½ for each heat, with Dredge second and

Yolanda third. The McKinney mare is a nice going trotter, but made a break or two in each heat, and is not very handy at recovering, always losing considerable before regaining her stride. In the third heat she was more steady, and after lying a close third to the far turn, made a break, but this time landed trotting after a few jumps and began closing up the gap coming down the stretch. Williams, who was driving Era, saw Yolanda break, but did not notice her coming so fast until he had passed the distance flag. He looked around just in time, however, and had to call sharply on Era to offstand the rush of McKinney's daughter, beating her out by not over a half a length in 2:11½, which was announced as the fastest time made in a trotting race in California this year. Dredge won second money and Yolanda third.

The 2:20 pace was robbed of its greatest interest by the scratching of Copa de Oro. Durfee was absent in Los Angeles, and as the stallion was not fully recovered from the accident on the train, which had inflicted a slight injury to one of his legs, it was not considered advisable to start the horse with a strange driver in a race where he would have to be driven to his limit. With Copa de Oro out, Inferlotta was a prohibitive favorite, and pools were sold with the mare barred, and Charley D. was choice at \$10 to \$6 for the field.

Inferlotta won three straight heats by going to the front as soon as the word was given and never being headed. She went to the half in 1:02½ in one heat and 1:02 in another, but there was nothing in the race but Charley D. that could make her step. James Thompson, the driver of Charley D., was in a rather peculiar position. He was certain he could not beat the mare unless her hobbles broke or she went to a break in the stretch—something she has never done thus far. But in case she did, he would get a heat and a low mark for his horse, which would not add to his value or his winnings. So James had to drive carefully, and he landed as close to the mare each heat as the driver of Inferlotta and his own judgment would permit. Pilot was driven a good race, and won third money by finishing third in every heat. William Duncan got fourth money with the very promising gelding Morrie N., that paced a remarkable race for a horse that has had only two months' work.

The last race of the day was for 2:14 class trotters, with North Star, Vallejo Girl, Kenneth C., Oveta and the seventeen-year-old San Francisco livery horse, Homeway, as starters. This race went to North Star in one, two-three order, and the Nutwood Wilkes gelding reduced his record a full second in the first heat. In this heat it looked to the outsiders as if Vallejo Girl should have won, Davey sitting absolutely still during the last fifty yards and his mare being only beaten a half length by North Star. In the next heat Davey drove a much better finish, but the mare could not beat the gelding. The judges called owner F. H. Burke to the stand and there was considerable talk about Davey's actions. Mr. Burke said this was Davey's second year in the sulky and he believed he was doing his best and wanted to win, as he himself did. He said if the judges desired to put up another driver he would not object, and the judges asked him to suggest one. This he hesitated on doing, but finally suggested Gerrety or Quinn, and the judges named Gerrety, who drove the mare in the final heat. Although the time was slower, Vallejo Girl could do no better than third, Kenneth C. beating her for second place. Davey doubtless knew that Vallejo Girl could not beat North Star in this race and thought it better to refrain from making a whipping finish where he had no chance. The summaries of the day's races follow:

Trotting, 2:27 class, purse \$500—		
Era, b m by Zombro (Williams)	1	1
Dredge, ch g by James Madison (B. Walker) ..	2	2
Yolanda, b m by McKinney (Davey)	3	3
Time—2:12½, 2:12½, 2:11¼.		
Pacing, 2:20 class, purse \$1,000—		
Inferlotta, b m by Inferna (Hewitt)	1	1
Charley D., b s by McKinney (Thompson) ..	2	2
Pilot, ch g by Abottsford Jr. (C. Walker) ..	3	3
Morrie N., b g by son of Brigadier (Duncan) ..	4	4
Opitsah, ch m by Wm. Harold (Chadbourne) ..	5	5
Time—2:07¼, 2:08¼, 2:10.		
Trotting, 2:14 class, purse \$600—		
North Star, b g by Nutwood Wilkes (Whitehead) ..	1	1
Vallejo Girl, br m by McKinney (Davey and Gerrety) ..	2	2
Kenneth C., br s by McKinney (Chadbourne) ..	3	3
Oveta, b m by Caution (Ward)	4	4
Homeway, b g by Strathway (Misner)	5	dis
Time—2:11¼, 2:11½, 2:13.		

The showing made by the produce of James W. Marshall's mare Trix by Nutwood Wilkes this year is remarkable. Three of her foals are on the California Circuit. The oldest, Mona Wilkes by Demonio 2:11¼, has won one race and been second in two others and reduced her record to 2:06½. Trix's three-year-old Aerolite, by Searchlight, has won two races and reduced his record to 2:11¼, and her two-year-old, Moortrix, by Azmoor, took third money in the Breeders' Futurity, finishing a good second in the fastest heat of the race, which was in 2:13½, the State record for two-year-old pacers. Trix is a great broodmare. Mr. Marshall has been offered \$1,000 for her weanling colt by Star Pointer.

FROM LONE TREE TRACK.

Fair Grounds, Salem, Ore., August 29, 1907.

Editor Breeder and Sportsman: With pleasure and pride I read the last issue of your paper, noticed the good racing on your California Circuit, and sincerely hope that the Golden State will eventually hold its proper place in the very front rank of high-class harness horse States. I always contended that the great harness horses of California should be raced at home, and that the people of California will turn out in satisfactory numbers to see and enjoy high class racing, such as you are having this season. While 1907 is your banner year, I look for 1908 to be the greatest in the history of harness racing, not only in California, but in Oregon, Washington, Idaho and British Columbia.

While waiting for the completion of a new hotel that is being built for me, I am here at the fair grounds enjoying my vacation and training my two horses, Niquee and Miss Cresceus. I am being ably assisted by one of California's bright young men, "Butch" Gunderson.

S. M. Lindsay is training Commonwealth. The way this big sturdy stallion reeled off a mile in 2:14 a few days ago indicates that he is in the pink of condition. Satin Royal is big, strong, sound and fast, and Queen B. is pacing like a Grand Circuit free-for-aller. Mr. Lindsay has a number of youngsters that are ready for the word, and doubtless the Californians that are coming up here will have reason to remember some of Mr. Lindsay's nags when the smoke of battle clears away.

Mr. Bonnell of "San Berdo" is here with R. Ambush, the mighty son of Zolock. Ambush has been a mile in 2:15 and looks good. Norda, the Tennessee pacer in Mr. Bonnell's stable, is going nicely. Mr. B. has a great stallion in Ambush, and should get a nice slice of the Oregon pie when it is cut up.

Sam Casto has a lot of good young horses, mostly by Zombro. Each and every one of his string is not only a good looker but has good manners and lots of speed.

John Pender is here with the great trotter Corellia Jones. I saw this horse trot in 2:18 at Irvington two weeks ago. Mr. Pender has a roll of greenbacks of large denominations, and offers to bet \$1,000 that Corellia Jones will win the big Salem Stake. I am reliably informed that he could not find a taker for any of his "long green" yesterday.

Perry Mauzey is training a very handsome three-year-old by Zombro. I saw this colt pace a mile in 2:20 yesterday and do it easily. He paced a mile in 2:17 1/2 before he came here. Mr. Mauzey has a few other high class youngsters, and among them is a fast two-year-old by Diablo that looks good to me.

Farmer Wallace has Bonnie Tangent that he has been a mile in 2:15 with. Bonnie is a resolute going, fast trotter, is in the big stake and will bear watching. Mr. Wallace owns a seven-weeks-old foal by Zolock that is the best gaited one I ever saw.

Dr. Young has a fast green pacer by Del Norte that has the earmarks of a great one. In the same stable is Dr. Welzal, a beautiful brown stallion of the Onward tribe, and several other good ones.

Fred Brooker of North Yakima has a beautiful bay stallion three years old by the mighty Zombro, dam Nellie Covert by Scarlet Letter, next dam full sister to Chehalis 2:04 1/2. This is not only a show horse, sired by one of the greatest of sires, but is himself a fast, reliable young trotter. His best mile to date is 2:23, and this was only a jog for him. Mr. Brooker also has Menwall, a hay pacing mare by Princemont, dam Miss Mann, a daughter of the famous old Sally. This green mare is a good one and will surely put flour in the Brooker barrel. Mr. B. has a few good youngsters also.

I forgot to mention Farmer Wallace's great green Zombro trotter Henry Gray. This gray ghost will be heard from often and early, and no Zombro ever foaled can out act him. I predict that Henry Gray will be Zombro's greatest gelding. See if I am far astray, accident considered.

Col. Steve Bailey was here yesterday and engaged stalls for Oma A. and other good ones. Oma A. is trotting this year and has been a mile in 2:16. Mr. Bailey is quite enthusiastic over his horses, among which is the beautiful and fast stallion Tidal Wave 2:09, that carries both the Nutwood Wilkes and the McKinney blood.

John Sawyer is at McMinnville with twelve head of first-class horses. His Zombro mare Bilma, three years old, is a great one, and so fast that she should take a mark of 2:10 this fall if nothing goes wrong with her.

John B. Stetson is also at McMinnville, and has the fast pacing mare Devietta by Diablo. She has been a mile for him in 2:13 and at last reports was going good. In the same stable is Mysterious Billy Smith's green trotter Starlight by Baron N. B. This is a fast mare and she can 2:15 right now quite comfortably.

Lute Lindsay, the sage of Salem, is at McMinnville with a stable of good ones, of which his special pet is Burion, a big trotting stallion owned by Albert Boyle of Tacoma. The critics say Burion is just it.

Doc Ward is another of the trainers that is making speed at the McMinnville track. He has three good ones, two of which are owned by the former San Franciscan, now a prosperous resident of Astoria, Sam Elmore. Ward has a green pacer from Montana that is a good one.

The McMinnville meeting is slated for September 23rd-6th and 7th, and after that the Oregon State Fair with its big money, and then on to Yakima. It

is safe to say that lower records will be made on the North Pacific Circuit this fall than ever before.

The North Pacific horsemen hope that a goodly number of California horses will be brought to Salem and help to make things interesting. The boys up this way are quite confident they have the real goods this year, and are aching to deliver some of them; so send on your best horses and your best men.

Hoping that every one will be satisfied and that Los Angeles will give a big fall meeting after all other places have had a "satisfy," I remain, yours truly,

C. A. HARRISON.

P. S.—Salem track is good, stalls good, water good and feed good and cheap. C. A. H.

CLOSE OF PETALUMA MEETING.

The last three days of the Petaluma meeting furnished nothing startling in the way of racing, although good contests were put up in several of the events.

On Thursday four two-year-olds started for a purse of \$1,500, offered for trotters of this age. Mr. J. W. Zibbell claimed to have an entry in this race for his good filly Katalina, but was not permitted to start. It would have been a gift for the filly had she started, as the others could not beat 2:36. Mr. Stover, manager of the meeting, held that Zibbell's entry was not received in time, although the latter holds a letter from Stover saying that his entries were received all right and his horses duly entered.

In the race for trotters without records Era won in straight heats, Berta Mac taking second money and Dredge third; 2:16 1/4 was the fastest heat in this race and was made in the final heat.

On Friday the pacing race for horses without records resulted in another duel between Inferlotta and Copa de Oro, and the mare won, after the stallion had won the first heat. There were five other starters, but they did not interfere with the duel. Charley D., the McKinney stallion, made the best showing, getting third money, as has been his custom when meeting Inferlotta and Copa de Oro. Inferlotta was not warmed up prior to the first heat of this race, and the Nutwood Wilkes stallion beat her a length in 2:10. She had on her pacing clothes after that, however, and won the next three heats pretty handily. The day was cold and raw and the track poor, which accounts for the slow time.

Carlokin, after a hard fight with North Star, won the 2:14 class trot, the race taking five heats to decide. The McKinney horse is a game trotter and when the heats are split is always in the game. The winning of Inferlotta and Carlokin on Friday is the third time these two foals of Carlotta Wilkes have won races on the same day during the California Circuit—once at Santa Rosa and twice at Petaluma.

Saturday the track was in better shape than it had been on any previous day during the week, but could not be termed fast or even good. There was but one harness race, the 2:10 class pace, and the unbeaten Sir John S. won it in three straight heats, all below 2:10. The first heat was in 2:08, the Zolock mare Delilah driving him out, and in the other two Mona Wilkes 2:06 1/2 was the contender. Sir John has them all beat a little on speed however, and in all probability Inferlotta is the only pacer on the Coast that can make the big son of Diablo stretch his neck. They will not meet, however, at any of the meetings this year.

SAN FRANCISCO DRIVING CLUB AT VALLEJO.

The largest crowd ever seen at the Vallejo mile track turned out to see an excellent program arranged by the San Francisco Driving Club on Monday last, Labor Day. Four races for club members and one for Solano county horses made up the card.

W. J. Kenney, the club's starter, was in his usual good form and got the horses away in fine style with very little scoring.

Jos. McTigue, A. H. Scofield and Frank Schmitz were the judges, and H. Schottler, Jack Pasteno and A. Benson held the watches.

The racing was sharp and keen throughout. The first race was won by A. Hoffman's Kitty D., G. Giannini's Geo. Perry second and A. Schwartz's Clara L. third. Best time, 2:14 1/4.

Mike Donnelly's King Rose took the second event in straight heats. Chas. Lecari's Charley J. was second and Luke Marisch's Little Dick third. Walter Wilkes and King V. also started. Best time, 2:14 1/4.

In the third race there were seven starters, F. Corcoran's Lady Falrose winning after four heats. Frank Knowles' Dan took a heat and W. C. Hamerton's Colonel C. one. The best time in this race was 2:16 1/4.

William Higginbottom won the fourth race in straight heats with Direct Steinway, the fastest heat being in 2:16 1/4. Chas. Becker's Charley B. was second in both heats, and C. Faulkerson's Maggie Murphy third. The other starters were Darby, Lady Irene, Don L., Ed Rea and Golden Buck.

The race for Solano county horses resulted in a tie between J. T. Strouse's Abe Lincoln and Barry Strouse's Rubin, each winning a heat and coming second in another. Dr. Farland's Tom Mac was third each time. The time was 2:24 and 2:26.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

PETALUMA SUMMARIES.

MONDAY, AUGUST 26.

Pacing, 2:14 class, purse \$1,500—
Inferlotta, b m by Inferna (Hewitt) 1 1 1
Queen Pomona, b m by Pomona (Gerrety) 4 2 2

Augst Baron, blk h by Baron Wilkes (Green), dis
Dan Frazier, b h by Secretary (McGovern) dis
Time—2:18 1/4, 2:16, 2:14.

TUESDAY, AUGUST 27.

Pacing, three-year-olds, purse \$1,500—
Aerolite, b s by Searchlight-Trix by Nutwood Wilkes (Chadbourne) 3 1 1 1
Josephine, b m by Zolock-Lady May (Rutherford) 1 3 3 3
Hymettus, b g by Zombro (Quinn) 4 2 2 2
Radium, blk c by Stoneway (Leggett) 3 4 4 4
Time—2:20 1/2, 2:12 1/2, 2:11 1/4, 2:15 1/4.

Trotting, 2:23 class, purse \$1,500—
Dredge, ch g by James Madison (Durfee) 1 1 1
Kinney Rose, b s by McKinney (Bigelow) 3 2 2
Presto Girl, br m by Seymour Wilkes (Zibbell) 2 3 3
Prince McKinney, b s by McKinney (McDonald) 4 4 4
Ollie B., ch m by Nutwood Wilkes (Chadbourne) 5 5 5
Time—2:16 1/4, 2:17 1/4, 2:17.

WEDNESDAY, AUGUST 28.

Trotting, three-year-olds, purse \$1,500—
Nogi, b c by Athabolo (Walton) 1 1 3 1
Zolahka, b f by Zolock (Mosher) 3 3 1 2
Prince Lot, b g by Prince Alcon (Spencer) 2 2 3 2
Reina del Norte, b c by Del Norte (Ward) 4 4 4 4
Time—2:20 1/4, 2:24 1/4, 2:23, 2:21.

Pacing, free-for-all, purse \$1,500—
Sir John S., b s by Diablo (Vance) 6 1 1 1
Miss Georgia, b m by McKinney (Gerrety) 1 2 2 2
John R. Conway, ch s by Diablo (Chadbourne) 3 3 3 4
Delilah, b m by Zolock (Gerrety) 2 6 5 3
Miss Idaho, ch m by Nutwood Wilkes 4 4 6 6
Kelly Briggs, br g by Bayswater Wilkes (Ben Walker) 5 5 4 5
Time—2:11, 2:12, 2:11, 2:10 1/2.

THURSDAY, AUGUST 29.

Trotting, two-year-olds, purse \$1,500—
Idolway, blk f by Stoneway (Leggett) 1 1
Siesta, b c by Iran Alo (Davey) 2 2
Bessie T., br f by Zombro 3 3
Nusado, br c by Nushagak (Spencer) 4 4
Time—2:36, 2:39.

Trotting, horses without records, purse \$1,500—
Era, b m by Zombro (Williams) 1 1 1
Berta Mac, b m by McKinney (Helman) 2 3 3
Dredge, ch g by Jas. Madison (Durfee) 4 5 2
Yolanda, b m by McKinney (Davey) 5 2 5
Kinney Rose, b s by McKinney (Bigelow) 3 4 4
Time—2:18, 2:18, 2:16 1/4.

FRIDAY, AUGUST 30.

Pacing, horses without records, purse \$1,500—
Inferlotta, b m by Inferna (Hewitt) 2 1 1 1
Copa de Oro, b s by Nutwood Wilkes (Durfee) 1 2 2 3
Charley D., b s by McKinney (Thompson) 3 3 3 2
Morrie N., b g by son of Brigadier (Duncan) 4 4 6 5
Opitsah, ch m by Wm. Harold (Chadbourne) 5 5 4 4
Tobasco, b g by Timothy B. (Ben Walker) 7 8 4 6
Fred W., b g by Robin (Rodriguez) 6 dis
Time—2:10, 2:09 1/4, 2:13, 2:14.

Trotting, 2:14 class, purse \$2,000—
Carlokin, b s by McKinney (Durfee) 1 3 2 1 1
North Star, b g by Nutwood Wilkes (Whitehead) 2 1 1 2 4
Oyeta, b m by Caution (Ward) 3 2 3 4 3
Helen Dare, b m by Zombro (Becker) 4 4 4 3 2
Queer Knight, b g by Knight (Williams) dis
Time—2:13 1/2, 2:15 1/2, 2:16, 2:15 1/2, 2:18 1/2.

SATURDAY, AUGUST 31.

Pacing, 2:10 class, purse \$1,500—
Sir John S., b s by Diablo (Vance) 1 1 1
Mona Wilkes, b m by Demonia (Chadbourne) 5 2 2
Delilah, b m by Zolock (Durfee) 2 4 3
Magladi, b m by Del Norte (Ward) 6 3 4
Miss Idaho, ch m by Nutwood Wilkes (Leggett) 3 5 5
Jonesa Basler, br s by Robert Basler (Rucker) 4 6 6
Time—2:08, 2:09, 2:09.

A GOOD THING FOR LOS ANGELES.

New York, September 2.—George Rose, one of the principal stockholders in Ascot Park, who has been optimistic heretofore concerning the prospects for racing at Los Angeles during the coming winter, admitted to-day that there was little likelihood of further racing at Ascot.

Rose said that the Los Angeles Jockey Club was trying to arrange with E. J. Baldwin for the immediate construction of the track at Arcadia, but that the negotiations were progressing slowly because Baldwin was holding out for certain terms.

It is unlikely that Southern California will have racing before the early part of 1908, according to Rose. Many horsemen who have raced at Los Angeles hitherto will go to Oakland at the close of the Eastern season.

Henry S. Jr. is another half-mile track graduate that is making good on the Grand Circuit. He has won his last two starts at Poughkeepsie and Readville.

CLUB RACES AT STADIUM.

A large crowd, the largest seen at the Stadium in Golden Gate Park since the three-quarter-mile trotting track was completed, saw four good races last Monday between horses owned and driven by members of the Park Amateur Driving Club. The track was in good shape, and as this was the first of a series of six meetings which are to decide the possession of three valuable cups, interest in the events was keen.

The first cup, given by W. A. Clark Jr., will be awarded to the horse winning the most times in the series among the class A trotters. The cup presented by T. H. Williams will be given to the horse winning the greatest number of points in classes other than A. Dr. I. B. Dalziel presents a cup to the horse winning the greatest number of heats. No horse will be awarded more than one cup.

The races were all heats of three-fourths of a mile, with one exception, the event for Class A trotters, which was mile heats. In this event Lady McKinney, Mr. Kilpatrick's mare by Washington McKinney, that took a time record of 2:19½ at Santa Rosa last month, started in this class against the veterans Vic Schiller 2:11¼, owned by Albert Joseph, and Major Cook (the latter having no mark, but a 2:15 trotter), driven by D. E. Hoffman. Vic Schiller won this race in straight heats in the excellent time of 2:15½ and 2:18½, and Lady McKinney was second.

In the race for class D trotters all the entries were scratched but McKinney Belle, and she walked over for the point in 1:59 for the three-quarters. The officers of the day were: Judges—Ed Aigeltinger, I. B. Dalziel, N. Franklin. Starter—William A. Lange. Timers—Al Joseph, A. Milletz, S. Christenson. Marshal—T. F. Bannon. Historian—H. M. Ladd. Secretary—F. W. Thompson. The summaries follow:

Class B trotters, three-quarters of a mile—
 Lady Washington, s m (F. W. Thompson) 1 1
 Lady Nell, blk m (M. W. Herzog) 2 2
 Allan Pollak, b g (F. J. Kilpatrick)..... 3 3
 Time—1:50, 1:44¾.

Class C trotters, three-quarters of a mile—
 Reina Directum, blk m (S. Christenson) 1 1
 Clipper W., blk g (F. J. Kilpatrick) 2 2
 Reyvera, blk m (F. W. Thompson) 3 3
 Charles II., s g (A. P. Clayburgh) 4 4
 Time—1:49, 1:47½.

Class A trotters, one mile—
 Vic Schiller, b g (Albert Joseph) 1 1
 Lady McKinney, b m (F. J. Kilpatrick) 2 2
 Major Cook, b g (D. E. Hoffman) 3 3
 Time—2:15½, 2:18½.

Class A pacers, three-quarters of a mile—
 Satinwood, b g (F. E. Booth) 1 1
 Jim Chase, br g (T. F. Bannon) 2 2
 Time—1:44¼, 1:42.

Class D trotters, three-quarters of a mile—
 McKinney Belle, b m (F. J. Kilpatrick) Won
 Time—1:59.

THE TWO BIG OREGON STAKES.

The largest purses to be raced for this year on the Pacific Coast are the 2:09 pace and the 2:14 trot which are on the program of the Oregon State Fair at Salem. The lists of entries to these stakes show that California will be well represented in both events. The original entries are as follows:

Greater Salem Stake, 2:09 Pace, \$5,000.

Bonnie M., Lizzie C., Ollie M., Morrie N., Ruby H., Swiftwater Bill, Birdall, Miss Georgie, Delilah, Lancero, Knick Knack, Lord Lovelace, Copa de Oro, Mandolin, Sherlock Holmes, Sir John S., Queen B., Ben W., McClosky Wainwright, Tidal Wave, Lady Brooks, Bill Dugan.

Lewis and Clark Stake, 2:14 Trot, \$5,000.

Monicrat, Berta Mac, Gebbie, Pins, Freddie C. Jr., Helen Dare, Zombowette, Auget Baron, Senator H., Oveta, The Commonwealth, Satin Royal, Crylia Jones, Lord Kitchener, Dredge, Carlokina, Zolahka, Oyama, Bonnie Tangent, Easter Bells, Oma A., North Star, R. Ambush, Judith.

GENERAL WATTS.

Fred Beachey, New York representative of the Horse Review, thus describes General Watts 2:09¼, the champion three-year-old trotting stallion:

"General Watts is small for his age, standing a little less than 15 hands in height, but is well put together and with the best of legs and feet. He is a peculiarly colored bay, with black points, and at times almost seems to be a chestnut, while his tail is streaked with light hairs. He is an impressive going fellow, and wears light shoes, the front ones weighing six ounces and his hind ones three and one-half. His forward shoes are barred with slightly squared toes and sharp side calks, while his hind foot gear has a low toe calk running around the rim of the shoe. He wears rubber bell quarter boots, knee boots, hind shin boots and scalpers, and goes without any fancy rigging. He was not all out in the first heat and, while the day was not fast, he could have certainly equaled Fantasy's mark of 2:08¾, which is technically the race record for the age, though she practically went alone and was paced the latter part of her mile by a runner.

STATE FAIR ENTRIES.

Monday, September 9.

Occident Stake, Three-Year-Old Trotters, \$2,350.

Pacing, 2:20 Class, Purse \$2,000.

Diabull, ch g by Diabolo.
 Little Medium, b g by Dictatus, dam Little One.
 Eletha R., blk m by Diawood, dam Emma R.
 McGee, blk g by Robert Basler, dam by Antevolo.
 Highfly, b g by Nearest, dam Miss Gordon.
 Pilot, ch g by Abottsford Jr., dam Belle Capels.
 Inferlotta, b m by Inferna, dam Carlotta Wilkes.
 Louisa A., b m by Hambletonian Wilkes, dam Al-tonita.
 Morrie N., b g by son of Brigadier.
 Copa de Oro, b s by Nutwood Wilkes, dam Ather-ine.
 Explosion, b m by Steinway.
 Roberta, blk m by Robert I., dam Allie Cresco.
 Nordwell, br s by Demonio, dam by Gossiper.
 Opitsah, b f by William Harold, dam Lenore.
 Charley D., b s by McKinney, dam by Memo.
 Santa Rita, ch g by Diabolo, dam St. Nicholas.
 Lettie D., b m by Boodle, dam Maud.
 Fox S., ch g by Thos. Rysdyk, dam by Arthur McGregor.
 Der Teufel, ch c by Diabolo, dam by Dawnlight.

Tuesday, September 10.

Trotting, 2:14 Class, Purse \$300.

Marvin Wilkes, b s by Don Marvin, dam Nora S.
 Vallejo Girl, br m by McKinney, dam Daisy S.
 North Star, b g by Nutwood Wilkes, dam Ivoneer.
 Oveta, b m by Caution, dam Atobe.
 Homeway, b g by Strathway, dam by Grosvenor.
 Bob Ingersoll, b h by Nutwood Wilkes, dam Lev G.

Pacing, 2:12 Class, Purse \$800.

Mona Wilkes, b m by Demonio, dam Trix.
 Friday, ch g by Monroe S., dam by Easter Wilkes.
 Mollie Button, br m by Alex. Button, dam by Cupid.
 Uuo, b g by Aptos Wilkes, dam Lauraola.
 Wild Nutting, br h by Wildnut, dam Helena.
 Queen Pomona, b m by Pomona.
 Lohengrin, b g by Charlestone, dam Gracewood.
 Lady Shamrock, b m by Grover Clay, dam by Electioneer.
 George Perry, b g by Waldstein.
 Jonesa Basler, br s by Robert Basler, dam Black Diamond.
 Mandolin, b g by Alcone, dam Minstrel.
 Victor Platte, b g by Platte, dam by Romeo W.
 Memonia, b m by Demonio, dam May Norris.

Wednesday, September 11.

Trotting, Two-year-Olds, Purse \$400.

Cleo Dillon, b f by Sidney Dillon, dam Cleo G.
 Miss Dividend, b f by Athablo, dam Vivian.
 Bay colt by Stam B., dam Swiftbird.
 De Oro, ch c by Demonio, dam Oro Wilkes.
 Siesta, b c by Iran Alto, dam Wanda.
 Bessie T., b f by Zombro, dam Manila.
 Idolway, blk f by Stoneway, dam Carrie.
 Miss Stoneway, ch f by Stoneway, dam Glory.
 Katalina, b m by Tom Smith, dam Kate Lumry.

Pacing, 2:08 Class, Purse \$1,000.

Miss Idaho, ch m by Nutwood Wilkes.
 John R. Conway, ch s by Diabolo, dam Lady Kohl.
 Miss Georgie, br m by McKinney, dam by Nut-wood Wilkes.
 Sir John S., b c by Diabolo, dam Elisa S.
 Kelly Briggs, br g by Bayswater Wilkes, dam Alginea.
 Dr. W., blk s by Robert Basler, dam Ruth Wil-liams.
 Cresco Wilkes, b h by Nutwood Wilkes, dam Allie Cresco.
 Delilah, b m by Zolock, dam Gipsy.

Thursday, September 12.

Pacing, 2:16 Class, Purse \$800.

Aerolite, b s by Searchlight, dam Trix.
 King Athby, b h by Athby, dam Alice.
 Mephisto, ch g by Diabolo, dam Nancy.
 Just It, b f by Nearest, dam Babe.
 Jim Corbett, b g by Seymour Wilkes, dam by Secretary.
 Seymour M., br g by Diawood, dam by Upstart.
 Diabliss, b m by Diabolo, dam by thoroughbred.
 Nordwell, br s by Demonio, dam by Gossiper.
 Uno, b g by Aptos Wilkes, dam Lauraola.
 Morrie N., b g by son of Brigadier.
 Copa de Oro, b s by Nutwood Wilkes, dam Ather-ine.
 Roberta, blk m by Robert I., dam Alice Cresco.
 Babe Madison, b m by James Madison.
 The Oregon, br g by Altamont, dam Alginea.

Friday, September 13.

Trotting, 2:17 Class, Purse \$300.

Marvin Wilkes, b c by Don Marvin, dam Nora S.
 Blanche T., b m by Stickle, dam by Knight.
 Little Louise, br m by Boodle, dam Azrose.
 Vallejo Girl, br m by McKinney, dam Daisy S.
 Hattie J., b m by Nazote, dam by Electioneer.

Prince McKinney, br s by McKinney, dam by Dexter Prince.

Kenneth C., br s by McKinney, dam Mountain Maid.

Burnut, b g by Neernut, dam Alcola.
 Princess Mamie, b m by Prince Ansel, dam Mamie Martin.

Dan Frazier, b h by Secretary, dam by Anteeo.
 Carlokina, br s by McKinney, dam Carlotta Wilkes.
 Barney Bernatto, br h by Zombro, dam Mineola.
 Curg Richards, ch g by Oro Belmont, dam May Norris.

Saturday, September 14.

Stanford Stake, Three-Year-Old Trotters, \$1,415.

Trotting, 2:23 Class, Purse \$2,000.

Prof. Heald, ch c by Nutwood Wilkes, dam by McDonald Chief.

Sir John, br h by McKinney, dam Altilla.
 Yolanda, b m by McKinney, dam Muscovita.
 Kermit, ch g by Henry Nutwood, dam Two Minutes.

Dredge, br g by James Madison, dam Rosa Clay.
 Berta Mac, br m by McKinney, dam Alberta.
 Hunky Dory, b g by Athadon, dam by Electioneer.
 Cedric Mac, ch s by Nearest, dam Black Swan.
 Noraine, b m by Nushagak, dam Loraine.
 Jim Whitney, g s by Wayland W., dam Ira Jr.
 Moritto, blk m by Purissima, dam Morro.
 Goldennut, ch s by Neernut, dam Florence Covey.
 El Rio Rey, b s by Nushagak, dam Piche.
 Constanca, blk m by McKinney, dam Adeline Patti.

Kinney Rose, b s by McKinney, dam Golden Rose.
 Zomont, b g by Zombro, dam by Altamont.
 Barney Bernatto, br h by Zombro, dam Mineola.
 Kelly, gr g by Gossiper, dam Alameda Maid.
 Fresno Girl, br m by Seymour Wilkes.
 Parachute, b g by Altitude Jr., dam Babe.
 Verneanta, b g by Jules Verne, dam Anta.
 Amado, blk s by Direct Heir, dam La Belle.

McHENRY'S VIEW.

Surveying the crowd of twelve thousand spectators from a corner of the big steel grandstand at the Empire track a few days ago M. E. McHenry, the new driver of Sonoma Girl 2:06¼, was asked: "How do you account for the fact that so many people in New York go to see the runners and so few to see the trotters?"

"It's all owing to the system of racing and the management," he replied. "If the managers of the trotting tracks had enterprise and ability enough to plan races that would bring horses together at different distances and in different combinations, as they do on the running tracks there would be a greater element of uncertainty about the races and more people would go to see them and play them. "The way we are racing trotters to-day is simply a joke. Entries close in the spring and the same horses race all summer in the same class at the same distance. Why should people go to see that kind of racing? I often wonder that anybody goes. They wouldn't if they weren't deeply interested in trotters. It's a sport that can't be killed. If it could be it would have been dead long ago. Nobody can name another sport that has been so badly managed."

"Do you believe that the dash system of racing is suited to the trotters?" Mr. McHenry was asked. "It's the only system—straight out dash races like the running races; some at one mile some at two and three miles and some at odd distances; anything to make the outcome certain. We ought to have races for beaten horses, too, and races for horses that never won more than a certain amount of money; in short, all the schemes the runners have for varying the program and giving all the horses a fair chance to win. Some of our people want to go back to the three-in-five system of racing, but it's like doing away with modern electric cars and going back to mules, according to my way of thinking."

"If you don't believe that the runners have struck the right system of racing, look at the purses and the entrance fees here at the Empire as compared with those on the trotting tracks. Take this Morris-ania Handicap, for example. There are sixteen horses entered, and it costs just \$10 apiece to start them. The horse that wins will get \$1,500 clear money, and he only has to go once around the track to get it. Think of it. Then think of our system of racing and our schedule of entrance fees. In a trotting race for a purse of \$2,000 every owner would have to put up an entrance fee of \$100 to start off with. Then if his horse won he would have to trot from two to ten heats, and after the race was over what would the owner get? Not \$1,500 clear money nor even \$1,000, but \$800, because the secretary would take out another hundred as an additional entrance fee from each one of the four money winners before he paid over the purse. Figure it out and you will find that the winner in a trotting race pays an entrance fee of just 20 per cent on the amount he wins."

Berta Mac, Helen Dare, Carlokina, North Star and R. Ambush are all in the \$5,000 trot at Salem, and if California horses don't get a good big slice of the pie in this race it will be because they left their gum boots at home.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Woodland	September 2-7
State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12
Santa Maria	October 22-26

North Pacific Circuit.

Everett, Washington	September 2-7
Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair)	September 23-28
Spokane, Wash. (Inter-State Fair)	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wasb.	October 14-19
Boise, Idaho	October 21-26

Grand Circuit Dates.

Hartford	September 2-6
Syracuse	September 9-13
Columbus	September 16-27

California State Fair opens Monday.

The Occident Stake is the first race on the card.

Nogi, son of Athablo, will probably be the favorite for the event.

North Star, by Nutwood Wilkes, holds the record for fastest time in this stake, and made it when he finished first in the fourth heat in 2:15½. This was in 1905.

Ed Geers started eleven horses at Readville and was inside the money in every race. His winnings during the meeting exceed \$12,000.

The famous Gen. Shafter herd of Jerseys is to be sold at the State Fair, September 13th, by Fred H. Chase & Co. The sale of Shorthorns from Judge Carroll Cook's Sonoma county farm will take place the following day.

In the Labor Day parade, and in all other parades in this State, the four-wheel banner carriers are a feature. They are made by W. J. Kenney of 531 Valencia street, this city, who furnishes nearly all the horsemen of this Coast with bikes and speed carts. These hanner carriers are beautifully constructed, being in some instances silver-plated, and when the frame is hung with a handsome banner make an imposing sight in a procession.

Peter J. Williams will sell all his horses at auction at Chase's combination sale on October 14th.

Sam Norris, manager of the well known Rose Dale Farm at Santa Rosa, will send to the combination sale at Fred H. Chase & Co's. pavilion, in this city, October 14th, a fine lot of horses by Daly 2:15, Washington McKinney and Whips Jr. This is a choice lot.

Belle W., the dam of Bolivar 2:00¾, the fastest horse ever bred in California, has a suckling at foot by Star Pointer 1:59¾, that is just about the grandest looking youngster in the State. Belle W. and foal are to be sold at auction in November, with all the other horses owned by Mr. Brace of Santa Clara.

Monterey 2:09¼, a great trotter, that has had no opportunities as a sire, will be sold at auction at Fred Chase & Co's. combination sale, which is set for October 14th. Monterey is one of the fastest horses that ever looked through a bridle. With the proper opportunities he will be a great sire. His get are grand lookers and nearly all square trotters, with fine action. Properly handled, Monterey will pay a big profit on the price he will be sold for, even though it should reach \$10,000.

A match race, mile heats, three in five, is to be paced over the Stockton track some time next month between the pacer Alta Genoa 2:14½, owned by G. Peirano of Lodi, and Cranky Thorne 2:22½, a Stockton pacer. These two horses met for a match race at the picnic at Lockeford this year, and G. Peirano lost the race on account of his pacer going lame. There has been lots of discussion as to which is the faster of these two horses, and to show that they mean business \$100 forfeit has been posted with Ambus Eddlemon, the secretary of the Lodi Driving Club. No doubt several Lodians will witness this race, as Alto Genoa has lots of supporters in the community.

Inferlotta has won very close to \$3,000 since she left Los Angeles to come north. There will be about \$7,000 to her credit by the time she gets back home in Los Angeles. Not a bad summer's work.

Geo. Fox of Clements, Cal., has two very promising and grand looking trotters on his farm in a full sister to Silver Bow Jr. and a four-year-old filly by the great Cresceus 2:02¼, dam Silpan by Silver Bow 2:16, second dam Kitty Fox by Pancoast, etc. Both are nice large mares, handsome and great prospects.

Athasham did not shy at the name Ponkapog at Readville, but won the stake handily and took a record of 2:09¼.

The American Horse Breeder says that George G. 2:05¼ is a much changed horse since passing into the hands of Alta McDonald, who has overhauled him thoroughly, and the gelding can now be rated anywhere his driver chooses. He is about as good looking a horse as one ever sees, and it would not be surprising if he would yet get a much lower mark. His mile in 2:06 at Readville is the fastest race mile by a trotter of the year and was made under conditions not of the best, and when such pacers as Argot Boy 2:03½ and Ardelle 2:04¾ could not go faster than 2:05¼, it looks all the better.

Sir John S. should win the big \$5,000 stake at the Oregon State Fair. He has the class on all the others by a margin.

If the American Breeders' Association can get up a \$50,000 Futurity for three-year-olds it will add greatly to the value of trotting bred colts, and this will help every breeder. Earning capacity brings the top price for a promising youngster.

An offer of \$5,000 was declined for Aunt Jerusha 2:10¾ before her defeat at Davenport.

Grattan Bells 2:10¾ has been sold for \$7,000 in Australia.

Sarah Hamlin, the trotting mare that is showing so well on the Grand Circuit, is a grand-daughter of the old trotting queen, Belle Hamlin 2:12¾.

Mike Bowerman came back to the races strong this year, after an absence of several seasons, with the three-year-old trotter General Watts (3) 2:09¼, and the three-year-old pacer, Shakespeare (3) 2:09½.

Lexington, Ky., parties have offered \$12,000 for Onward Silver 2:05¼. His Italian owners are holding out for \$30,000. If he is secured he will be returned to this country and placed in the stud.

Judge E. A. Colburn of Denver has purchased from J. Mayberry of Los Angeles the pacer Highball 2:08½, by Silkwood and will use him as a matinee performer.

C. R. C. Dye of Canon City, Fremont county, has purchased from F. J. Hooper of Denver the bay gelding Rexford by Galileo Rex at a long price. Rexford is an eight-year-old and without a mark, but can go both gait very fast. He has a matinee record of a half in 1:03, pacing and trotting in 1:11¼ on a half-mile track.

Codero 2:10¾, by Bingen, is the fastest four-year-old trotter of the year.

It now costs \$4 to register a trotter or pacer one year old or over. All under that age can be registered for \$2, so it behooves every breeder who has foals of this year to be registered to attend to the matter before January 1, 1908.

If there is dry weather and a good track at Salem this month on the day of the \$5,000 race for 2:09 class pacers, the Oregonians will see a horse race, and the track record will be lowered several seconds.

Berta Mac has not won a race yet, but she has placed over a thousand dollars to the credit of her owner, Washington Parsons, of Salinas, since the circuit opened.

Carlokin 2:13½ by McKinney has won every race in which he has been started this year. His first start was at Pleasanton in the 2:17 trot, which he won after dropping a heat to Marvin Wilkes. The next day he won the 2:20 trot in straight heats. At Santa Rosa the 2:17 trot was won by him in straight heats and at Petaluma he took two races, the 2:17 and the 2:14 classes. The latter was the hardest race he has had, and it took him five heats to defeat North Star. His winnings up to the close of the Petaluma meeting amounted to \$2,900, and he is still in the 2:14 class. Carlokin is one of the best bred young stallions by McKinney left in California. He is a coming 2:10 trotter and has wonderful powers. His owner, Mr. C. L. Jones, of Modesto, may race him in the East next year, and if he does Carlokin will be in Will Durfee's string.

The fact was demonstrated in the East years ago that under present conditions running and trotting races on the same day do not make an ideal program for any track. While the racing at Petaluma was good all last week, the attendance would have been far better and the racing much more satisfactory had it been confined to either harness horses or the runners. The two are like water and oil—they do not mix well.

WON WITH PREACHER'S HORSE.

No doubt the most popular figure on the trotting turf to-day is the veteran reinsman Ed Geers. His sturdy personality, his long and honorable connection with the light harness horse sport, and his brilliant career makes him extremely popular with the crowds, and no driver is given a heartier ovation when he wins, or does any have the public's sympathy to a greater extent when he is defeated than is "Honest Ed" Geers.

During his thirty odd years of active turf life there has not been a single occasion when the slightest breath of suspicion has been manifest in any way in connection with Geers, and it has been this trait of always trying to win that has earned for him his popularity and the thorough confidence he enjoys.

Geers was born on a farm near Lebanon, Tenn., January 25, 1851, and from boyhood took an ardent interest in horses. His success in breaking colts and getting along with nervous, high-strung horses when in his teens earned for him quite a local reputation.

In 1871 a neighboring clergyman, who usually owned a good horse or two, purchased a number of young animals of Morgan breed, engaging young Geers to handle them for him. Among the lot was a team of grays which their owner entered in the show class at the county fair.

When Geers took this team to the fair he also took with him a small chestnut stallion called Little Dave. Without the knowledge of his clerical owner, Geers entered the latter in the green trot, racing him to a skeleton wagon and winning in straight heats, the fastest mile being trotted in 3:04.

The following week Little Dave was also started at the Murfreesboro fair, and again won. Although Geers has driven hundreds of brilliant races since that time, and notwithstanding that scores of champions have been made and trained by him, it is plainly evident even to this day (that is, when one can find the veteran reinsman in a reminiscent mood) that the memory of the pride he experienced in winning his first two races affords him more genuine pleasure than any of the great triumphs which have marked his long and successful career.

A FREAK OF NATURE.

On the farm of John Harrigan, half a mile south of Linden, Ind., is a most wonderful freak of nature, in the personality of a cow that is suckling a mule colt that is about three weeks old. Some three weeks ago Mr. Harrigan had a fine large iron gray mare to drop a mule foal, which she has persistently refused to own or allow to approach her. Mr. Harrigan has a large number of cows on his farm, and he conceived the idea—not wishing to lose the mule colt—of trying to get the mule to suck one of the cows; he tried one of them that had not had a calf with her for over six months, and offered no objection, and ever since the mule has been running with the cow and taking the nourishment from her, as its unnatural mother. The cow evidences her love for the mule as she would for her own offspring, lowing for it when they are separated, and licking it over with her tongue when it is with her. The mule goes with her all day in the pasture and is growing fat from the abundance of good, rich Jersey milk that its foster mother provides for it. Crowds of people are visiting the farm every day to witness the freak of a mule suckling a cow, and many offers have been made to Mr. Harrigan to purchase the mule and cow, but all have been turned away. Mr. Harrigan has been strenuously solicited by a number of managers of horse fairs to bring the cow and mule to their fairs to be exhibited and act as a drawing card for their shows. We recognize the fact that the above will seem to many as too unnatural to be believed, yet the fact remains the same, and can be verified by the affidavits of hundreds who have witnessed the phenomena.—Indiana Farmer.

AN OBJECT LESSON.

The meeting which closed on Friday at Readville was one of the best ever held under the auspices of the New England Trotting Horse Breeders' Association. The attendance, from the opening to the closing day, was most gratifying, and on Wednesday, Massachusetts Day, it came close to the record, in spite of threatening weather and the lack of grandstand accommodations. Thousands went out, well knowing that they would have to stand and perhaps get a wetting. More than this, the quality of the crowd was a notable feature, and we doubt not that many who have not been in the habit of patronizing race meetings took advantage of the absence of public hetting to gratify their pleasure of seeing a contest, to testify their esteem for the horse and their love of horse racing when conducted on a high plane.

The Cleveland meeting, conducted without public hetting, was a success in point of attendance far beyond the expectations of its promoters.

These facts, no less than other considerations, convince us that it is possible to make racing sport so clean and wholesome as to appeal to all classes of the community, and to so increase the gate receipts as to offset the revenue lost from non-betting.

With good attractions, favorable weather and plenty of publicity, in the way of advertising, the crowds can be attracted.—American Horse Breeder.

PROVIDENCE GRAND CIRCUIT RACES.

Providence, August 26.—The opening day's races at Narragansett Park were full of surprises, and while nothing startling developed, no favorite won first money, and in only two events winning a heat. On account of the action of the authorities no attempt was made at pool selling. The defeat of the favorites made this popular. The track was in fine condition, and very fast time was made in all the events.

In the first race on the card, the 2:15 pace, Alice Pointer made 2:05½, but she was out of the running in the next two heats, which were taken by Williams' brown gelding Hidalgo. There were six starters in this event, the chief race of the day, with Alice Pointer the first choice. She drew the pole and won the first heat by a neck, but the next two heats went to Hidalgo in slower time, Alice Pointer finishing second and third respectively in each heat. The black mare Reproachless, of which much was expected, broke twice and finished far in the rear.

The next event, the 2:20 trot, for three-year-olds, was easy money for the gray colt Douglas, driven by McDonald, which easily outclassed his field and won in straight heats.

The third event, the 2:10 pace, was taken by Leland Onward, the third choice. Thornway, the favorite, captured the first heat by a head, but could only get third and fourth places in the other two heats. William O., driven by Ed Geers, came in third, barely nosing out the others.

The last event, the 2:25 trot, went to Tokio, driven by Dickinson. The first heat of this race looked like St. Peter, but in a sensation neck and neck finish Tokio, which was in with the ruck, drew up on the leader and succeeded in just nosing out the brown horse. The second heat went to Tokio with little trouble. Ed Geers accomplished another of his famous finishes in this heat. With Travelesso far back he succeeded in driving around the others, and finished second in the heat, just ahead of Pitty Herr. Codero, the favorite, finished fifth. The summaries follow:

Pacing, 2:15 class, purse \$2,000—

Hidalgo, b g by Warren C. (McDonald)	2	1	1
Alice Pointer, b m (McDevitt)	1	2	3

Codero, r h (McDonald)	3	5	
The Minute Man, b h (Titer)	6	6	
Time—2:12½, 2:12¼.			

Providence, August 27.—"Park Brew Day" at Narragansett Park brought out a large crowd in expectation of interesting racing. It was thought by the knowing ones that more than one record would be lowered, especially so in the Park Bred Stake, but nothing of the sort happened. The most that has accomplished by Angus Pointer, the winner of the event, was to equal the record, 2:04, made by Gallagher in 1904. The fastest field ever entered in any such event started in this race. Angus Pointer 2:02½, Audubon Boy 1:59¼, Gratt 2:02¼ and Baron Grattan 2:03¼, were all picked to do wonders, but Angus Pointer was the only one of the lot to show his mettle, capturing first money in straight heats. He showed great form, and would easily have lowered the track record for the event, as well as his own record at Readville last week, had he been extended. The summaries:

Trotting, 2:15 class, purse \$2,000—

Margaret O., b m by Onward (Davis)	1	1	
Tempus Fugit, ch g (Geers)	2	2

Gentry's Star, h m (McHenry)	4	3	
Time—2:09½, 2:11¼.			

Providence, August 28.—The third day's racing at Narragansett Park brought at least one interesting event, the third race, 2:04 class for pacers, requiring four heats, as all the starters were well matched. The event of the day, the Roger Williams Stake, of \$5,000, for 2:12 trotters, brought out a larger crowd than either of the first two days, about 7,000 being present. In this race Highball and Sonoma Girl were both entered, and the withdrawal of the latter was a great disappointment to the spectators. Just before the race it was announced that Sonoma Girl was in no condition to race. As was then expected, Highball trotted away from the field, getting both heats with very little trouble, though Geers' gelding traveled very lame. The feature of this race was the fight for second money between Athasham, Wilkes Heart and Berico, the California horse winning. The summaries:

Pacing, 2:20 class, purse \$1,000—

Laura Bellini, r m by Moquette (L. McDonald)	1	1	
Moy, b m (Hayes)	2	2	
Margaret, h m (Honey)	3	4

Lucretia, br m (Geers)	11	10	
Busy Boy, h g (Clark)	10	dis	
Time—2:11½, 2:10½.			

Providence, August 29.—Ed Geers had things almost entirely to himself in to-day's races at Narragansett Park, getting two firsts and half of a second and third money in the three races on the program. A crowd of 5,000 watched the horses work this afternoon, and though no event was featured every race had its interesting points, especially so the last one, in which a most exciting neck and neck tussle was decided at the very wire, only half a length separating the first and fourth horses in the second heat. Four races were on the program, but owing to the fact that only two horses were ready to start in the first race the event was called off.

The first race, for 2:05 trotters, was rather slow. Wentworth, Emerson McCargo's black gelding, which holds the world's gelding trotting record of 2:04¼, made at Columbus in 1905, was a starter, but broke twice in the first heat and was distanced. A hard struggle was expected between Oro, McCarthy's black gelding, and Dave Shaw's Lillian R., with Turley dangerous, but Lillian R. had little trouble in getting the lead and keeping it all the way around in both heats, Turley and Oro fighting hard for second money, which honor they divided equally.

In the third race, for 2:06 pacing class, Ed Geers and his John A. had little trouble to win out. The chestnut was headed only once in the two heats. In the first heat Hal C. led him from the three-quarters mark to the stretch, but at the stretch Geers let his horse go, doing the last quarter in 0:30¼. In the second heat Geers led all the way, with Hal C. and Custer fighting for second place. Bob Davis

and his gelding trailed along. At the stretch Davis let out, and had his horse not broken he would have landed close to the leader, but about forty yards from the wire Cascades broke badly, coming across the wire last. The summaries follow:

Trotting, 2:05 class, purse \$1,000—

Lillian R., b m by J. T. Letitia (McDevitt)	1	1	
*Oro, blk g (McCarthy)	3	2	
*Turley, h g (Geers)	2	3	
Lady Hamilton, blk m (Thomas)	4	4	
Wentworth, blk g (McGregor)	dis

*Divided second and third money.

Pacing, 2:06 class, purse \$1,000—

John A., ch s by Eddie Hal (Geers)	1	1	
Hal C., ch g (Benyon)	2	2	
*Prince Hal, b g (Snow)	3	4	
*Cascade, br g (Davis)	4	3	
Custer, cl g (Hall)	5	3	
SHRDLU ETAOIN 7890\$.890\$.lp.v9 zt C ½½			
Time—2:05½, 2:08¼.			

*Raced in hopples.

Providence, August 30.—A dreary, cold rain marred the last day's racing at Narragansett Park. The program was featureless, though some good driving and extra heats kept the crowd of fifteen hundred interested. In the last event of the day Snow's gelding, Ethan Roberts, broke almost at the very start and ran away, all but breaking his neck in his mad rush once and a half around the track. Henry S. Jr. took the first race of the day with very little trouble, though pushed somewhat by Composer.

The second race went to four heats. Judge Wilson, the favorite, fought gamely for first money, but had to give way to superior speed and better driving. In this race the fight between Judex, who had the speed, and Wilson Addington, driven by Cox, was not decided till the last heat, when Cox outpointed his rival. The summaries follow:

Trotting, 2:16 class, purse \$1,000—

Henry S. Jr., br g by Colonel Kuser (Evans)	1	1	
Composer, b g (Lassell)	2	2	
Prince C., hr s (McKenney)	3	3	
Doris Martin, b m (McCargo)	4	4	
Princine, b m (McHenry)	5	5	
Sunline, ch h (Mallett)	6	6	
Burma Girl, b m (Clark)	7	7	
Time—2:13, 2:15¼.			

Pacing, 2:08 class, purse \$1,000—

Wilson Addington, b h by Coastman (Cox)	5	4	1	1
*Judex, b g (McKenney)	1	2	5	2
Bystander, h g (Hall)	3	1	4	3
Judge Wilson, b g (Spencer)	2	3	2	d
Byron K., b g (Geers)	4	5	3	d
Time—2:06¼, 2:07¼, 2:09½, 2:11¼.				

*Raced in hopples after the second heat.

Trotting, 2:11 class, purse \$1,000—

Berico, br g by Palatka (Smith)	1	5	1
Betty Brook, h m (Titer)	2	1	3
Mae Heart, ch m (McHenry)	3	3	2

Bonnie Russell, b h (Thomas)	5	4	d
Time—2:10½, 2:11½, 2:10¾.			

Pacing, 2:16 class, purse \$1,000—

Moy, b m by Prodigal (Hayes)	1	1	
*Red Jacket, ch g (Dennis)	4	2	
*Queen Walnut, r m (Taylor)	2	4	
*Arrow, blk g (Cox)	3	3	
Ethan Roberts, blk g (Snow)	dis		
Time—2:09¼, 2:11.			

Red Jacket and Queen Walnut divided second and third money.

*Raced in hopples.

CAVALRY HORSES.

Judging cavalry horses in the show ring has always been regarded as more or less of a farce, since most of the prize winners were animals that by no possibility could be used for military purposes under existing regulations. It has remained for Captain Mark Sykes, an English veteran of the South African war and a son of the man who owned La Fleche, to inaugurate a change in conditions which should make this class not only practical but popular at the horse shows. At one of the minor shows in England a short time ago, Captain Sykes gave the prizes and laid down the conditions for an exhibition of military horses. The entries were first ridden at a walk without either saddle or bridle, but with a halter, and then were ridden on a trot without saddle and with bridle only. Next they had to jump a hurdle and remain under control while a shot was fired by the rider on the horse's hack and another shot was fired with the rider standing at the horse's head. The animals had to be handy and enduring and capable of carry three hundred pounds. Another condition was that any horse shown must be sold at \$275 if claimed. Captain Sykes said after the show that his object in giving the prize was to afford an object lesson in the kind of horses needed for the English army. In explaining why he had laid down the conditions as he did, the Captain stated that he had in mind the type of horse that was wanted, but wanting, at Bloemfontein.

CONDUCTED BY J. X. DeWITT

THE WESTERN HANDICAP.

[Special Report.]

Under the bright skies began the second Western Handicap tournament at Denver. The brightness did not last all of the time during the preliminary and regular events of the program, but it is proper and truthful to say that the tournament began under the most brilliant promises of the weather man.

When Secretary Elmer E. Shaner of the Interstate Association arrived on the ground he congratulated the officers of the Denver Trap Club on the manner in which everything had been prepared for the tournament. All he had to do was to move into his office and get things going.

To the surprise of all, 165 men presented themselves on Monday afternoon. And to the further surprise of those not knowing the effects of the clear Colorado air on the eye, the general average of marksmanship was very high. A gratifying thing to the Colorado men was the good work of George G. Pickett of Denver, who was first on the long list with 98 broken.

Tuesday, August 20.—Some of the uncertainties of the Colorado weather were shown during the first regular day of the tournament. Skies that had promised the most kindly of weather were overcast, and a wind that was fitful and annoying came up as the clouds spread over the zenith.

Among the surprises of the morning was when W. W. Ridley, claimed by the Iowa contingent, broke 99 out of his 100 targets. His one miss was in the last event of the morning. He was not without competition, for F. Howland had also made his 99, varying the program by missing his one target in the first event of the day.

Thus the day's program had to go over for completion during the early hours of the next day. John W. Garrett of Colorado Springs took first place in the first day's program by breaking every target in the two events of the next morning, breaking 196 of his 200. Denny Holland played out the remainder of his string in such excellent shape that he took second place on 195.

aged better generally than the professionals. Fred Gilbert and W. H. Heer came out with 193, and W. R. Crosby tied with Chris Gottlieb at 186.

Wednesday, August 21.—A brighter sky, with cool air, made the second day a much better one than the first, as far as comfort and good sky line for the shooters was concerned. There was also much remarkable work in spots. It was a notable day, as the professionals, who usually finish the season with grand averages, did much better than on the first day.

A laugh, though it was something serious for the shooter, was caused by the finish in a four-man squad. Up to the last target there had not been a miss, every one having been broken in the nicest way.

A performance that was hailed as a record for shooting was when one squad went through two events, missing only one target in each. This was made up of F. Arnold, H. Bonser, J. S. Boa, H. J. Borden and J. M. Hughes.

Variations of a day's work were shown in a number of instances during the day. H. D. Freeman shot well all day, as an instance, but excelled in his morning work when he broke 99 out of 100. L. I. Wade broke 92 in the morning and went so well in the afternoon that he placed 98 to his credit.

The evening was marked by a ball at the Albany Hotel, when the wives of the marksmen were given special entertainment. Of course, the men themselves were not left out of the affair, being permitted to dance with their lady friends, but it was really a sort of a reception and good time for the femininity that had journeyed to Denver.

Preliminary Handicap.—The Preliminary Handicap was contested the third day and the Western went over to the next. Both had bright days as near regulation for Colorado as could be devised, clear skies, cloudless, giving a sky line for a background that brought the targets into pretty relief.

The Preliminary developed the hottest contest of the tournament. Henry W. Anderson of Salina, Kas., and W. S. Hoon of Jewell, Ia., "ran neck and neck" a good part of the way, and finally tied for first, with 98 breaks each. Hoon did not miss until his fourth event, while Anderson lost one in his second event and both missed one in the last.

The purse in the Preliminary Handicap was divided as follows: H. W. Anderson, \$122; W. S. Hoon, \$109.80; L. P. Lawton, \$91.50; A. H. Campbell, \$91.50; M. E. Hensler, \$67.50; Wm. Ridley, \$67.10; J. Kautzky, \$28.45; W. D. Townsend, \$28.45; J. M. Hughes, \$28.45; J. S. Young, \$28.45; H. G. Taylor, \$28.45; V. B. Nethaway, \$28.45; W. Sargeant, \$28.45; Wm. Bowen, \$28.45; J. L. Forkner, \$28.45; G. Boulier, \$28.45; C. E. Younkman, \$22.50; C. E. Shaw, \$22.50; C. M. Powers, \$22.50; E. W. Arnold, \$22.50; H. R. Bonser, \$22.50; H. M. Clark, \$22.50; R. Thompson, \$22.50; D. Bray, \$22.50; D. W. Brezaale, \$22.50; E. J. Chingren, \$22.50; W. H. McCreery, \$22.50; F. Howland, \$22.50; J. S. Day, \$12.20; E. W. Renfro, \$12.20; A. J. Lawton, \$12.20; J. Rohrer, \$12.20; F. E. Rogers, \$12.20; R. Cook, \$12.20; C. H. Ditto, \$12.20; J. S. Losee, \$12.20; W. Munsterman, \$12.20, and C. A. Ferguson, \$12.20.

One hundred targets, unknown angles, \$7.50 entrance, handicaps 16 to 23 yards, high guns—not class shooting, \$300 added to the purse, open to amateurs only. In addition to first money the winner received a sterling silver tray, presented by the Interstate Association.

Tie, 20 targets—Anderson 19, Hoon 19.
Second shoot-off—Anderson 20, Hoon 19.

Western Handicap.—The three men who tied for first place in the Grand American Handicap at Chicago were entered for the Western. Jeff J. Blanks, C. M. Powers and M. J. Maryott were the three. But the first named withdrew before firing began. His work was the surprise of the tournament, as he fell far below the form shown in Chicago, missing targets in a way that almost broke his heart. Maryott and Powers tied at 97 broke, but the former was out of the contest, being a professional. The latter secured second place. First went to T. E. Graham of Chicago, a shooter who had not made much of a showing in the other days, and who was little considered. He missed one target in the second event, shooting 'em all down straight after

that. He was as much surprised as those he defeated, as he declared he had not the least idea he could perform such a feat.

Nearly all of the men who take part in these shooting tournaments go to the traps in their worst clothes, so that the gathering looks as much like an annual gathering of hohoes as of crack men in the first sport of the day. Mr. Graham was a typical man of the traps, and might have come in off the road in the very garments used on "blind haggage" or wayside freights. His success did not turn his head in the least and he spent the balance of the day in jesting with his friends. Mr. Graham broke 99 targets. C. M. Powers broke 97, and was second. There was quite a school in the next places. After figuring out the results, Marshall Sharp, in the "office," announced that those making 92 or better would be in the distribution of the money.

A peculiar thing about the handicap was the number of shooters who met their Waterloos in the second event. Many a good marksman, whose chances in the handicap were thought to be equal to those of any other of the entries, fell by the wayside here. Good marksmen missed four and five birds of the twenty.

When the tournament had closed and accounts had been cast up—and it may be mentioned here that all shooters received their money within a half hour after the last shot had been fired—Secretary Elmer E. Shaner of the Interstate Association declared that he had never attended a tournament where the shooting had been better than at Denver. "If my memory serves me right," he said, "the average here is higher than at any other I ever attended. That, together with the fine weather, and the splendid treatment accorded by the people of Denver and the officers of the Denver Trap Club have made this a most delightful affair."

For general average among the amateurs J. M. Hughes was high with 389 out of 400 shot at; H. R. Bonser was second with 386. For general average among the professionals W. H. Heer was first with 388; L. R. Barkley, H. D. Freeman and Ed O'Brien were a tie for second with 386, and Fred Gilbert was in third place with 384.

The purse in the Western Handicap was divided as follows: T. E. Graham, \$167.50; C. M. Powers, \$150.75; J. M. Hughes, \$108.85; Wm. Ridley, \$108.85; G. Boulier, \$108.85; B. S. Strunk, \$108.85; J. L. Forkner, \$43.95; R. A. King, \$43.95; C. D. Linderman, \$43.95; A. E. McKenzie, \$43.95; H. W. McCreery, \$43.95; J. J. McCandles, \$43.95; J. S. Young, \$43.95; H. S. Mills, \$43.95; H. M. Clark, \$32.35; J. W. Garrett, \$32.35; J. Rohrer, \$32.35; G. J. Roll, \$32.35; H. G. Taylor, \$32.35; A. Miller, \$32.35; L. E. Edwards, \$32.35; W. Joyner, \$32.35; G. W. Lewis, \$32.35; C. E. Wanamaker, \$32.35; C. E. Younkman, \$32.35; C. D. Baxter, \$32.35; K. L. Egan, \$32.35; C. W. Hadley, \$32.35; C. McClintock, \$32.35; W. N. Wise, \$6.45; J. S. Losee, \$6.45; J. D. Cunliff, \$6.45; V. B. Nethaway, \$6.45; J. H. Cummings, \$6.45; J. Kantsky, \$6.45; G. S. Mackie, \$6.45; N. McMillan, \$6.45; Ad Olsen \$6.45; W. D. Townsend, \$6.45; F. E. Rogers, \$6.45.

One hundred targets, unknown angles, \$10 entrance—targets included, handicaps 16 to 23 yards, high guns—not class shooting, \$400 added to the purse, open to amateurs only. In addition to first money the winner received a sterling silver loving cup, presented by the Interstate Association.

Squier Money-Back Surplus.—The Squier money-back purse amounted to \$1,545, and after all losses were made good there was a surplus of \$748.50, which was divided among the high gun amateurs as follows: J. M. Hughes, \$82.30; H. R. Bonser, \$74.85; C. M. Powers, \$67.85; J. W. Garrett, \$57.40; A. J. Lawton, \$57.40; H. W. Anderson, \$57.40; F. Howland, \$41.15; H. M. Clark, \$41.15; H. G. Taylor, \$29.90; J. S. Young, \$29.90; W. Williams, \$29.90; W. H. Joyner, \$22.45; K. L. Eagan, \$18.70; Wm. Ridley, \$18.70; G. W. Lewis, \$7.45; L. E. Edwards, \$7.45; F. Weatherhead, \$7.45; C. D. Baxter, \$7.45; E. J. Cbingren, \$7.45; W. H. McCreery, \$7.45; H. D. Mills, \$7.45; C. H. Ditto, \$7.45; N. McMillan, \$7.45; G. Boullier, \$7.45; G. K. Mackie, \$7.45; G. G. Roll, \$7.45; L. P. Lawton, \$7.45, and D. A. Upsou, \$7.45.

AT THE TRAPS.

The Pacific Coast Trap Shooters' Association fourth annual blue-rock tourney will start to-morrow morning at Ingleside at 9:30 sharp.

The program, as outlined last week, is an inducing one, with \$500 in added money.

"Dick" Reed, than whom there is no more popular or better known sportsman to Coast trap shooters, is at present, we sincerely regret to note, laid up with an attack of serious illness. Mr. Reed is getting along as well as could be wished under his unfortunate affliction. We hope soon to bave the extreme pleasure of announcing his complete recovery, a happy result that we know is anxiously awaited by a large circle of friends and acquaintances—a list of sympathizing well-wishers that reaches without the ranks of the sportsmen.

J. T. Skelly of Wilmington, Del., bobbed up serenely in Frisco last week, good natured and jolly as ever. Jim stated that he noticed quite a change in the style and complexion of the city. The old landmarks are gone, but in their stead are many new structures and hundreds of others in process of construction. He was a bit puzzled at the progress made in so short a time. He thinks we are in line for a greater city, by far, than ever dreamed of. Last Sunday he helped the boys grass pigeons at Ingleside and then followed up with some high-class blue-rock smashing, just to show what Du Pont smokeless was made for.

The California Wing Club's shoot at live birds on the 1st inst was the final club shoot for the season. The schedule for 1907 embraced seven monthly shoots, beginning in March. Two events were shot at each meeting, a 12-pigeon match in the forenoon and a 12-pigeon race in the afternoon. The high gun for the season in the club shoots won a handsome gold medal. Clarence C. Nauman was the successful shooter out of a total of 84 birds he missed but 2, a very good average. W. E. Murdock and P. J. Walsh were next with 79 out of 84 each, Frank Turner was third high average for the year with 74 birds out of 84. This showing, for a shooter who had practically but one season at live birds, ranks as one of the best made in the history of this club, the oldest wing shooting organization in the United States. W. W. Terrill scored 67 out of 72 pigeons in six shoots. Tony Prior attended five shoots and scored 54 out of 60. A. J. Webb missed one shoot, scoring 65 out of 72. Ed. Sebultz six shoots, 69 out of 72. Dr. E. G. McConnell missed but three out of sixty birds for five shoots. W. L. Nielsen Jr. scored 49 out of 60 birds. M. J. Iverson connected with 57 out of 60.

In the morning shoot Turner, Nauman, Murdock

and Walsb with straight scores divided the purse. Haight's ninth bird, a lively one, spoiled an otherwise well shot score. Nielson's bad luck came with his sixth bird.

In the afternoon, Murdock and Klevesabl 12 birds each, divided first and second moneys, the balance of the purse going to Haight, Nauman and Walsb with 11 birds each. Messrs. J. O. Cadman, Will De Fremery and E. Courtney Ford of the Claremont Country Club, E. Hoelle and Mr. McAlpine shot in the various events as guests of the club. The scores follow:

Club race, 12 pigeons, \$50 added, distance handicap, three moneys, high guns—					
	Yds.				
F. Turner	26	12112	21121	22—12

Sharpless	00000	20—1

Clarence Nauman keeps his shooting eye in good condition; he landed the high average medal of the California Wing Club in championship form.

At the Sunset Gun Club's shoot on the 1st inst. Thos L. Lewis won the Du Pont trophy shoot with 9 out of 10 targets at 18 yards; J. O'Connor scored 8. The shoot was inadvertently at 10 instead of 20 targets. The boys let it go at that, however. In the Lewis medal shoot, 10 targets, Taylor and O'Connor tied with 7 each. O'Connor won the shoot-off, 8 to 6.

The scores in the Lewis medal race, at 10 targets, were: Lewis, 20 yards, broke 6; Taylor, 18-7; J. O'Connor, 18-7; White, 16-7; Holm, 16-7; J. Reese, 16-9; Lastretto, 16-7.

The Du Pont trophy shot for at the Owl Rod and Gun Club shoots at Modesto this season was won by John Dale. Dale and Henry Garrison each broke 342 out of 400 for the season. Dale clipped 19 out of 20 to Garrison's 18 in the shoot-off and captured the handsome prize. On August 25th Sperry, who had been in the lead from the beginning of the series, broke but 85 out of the 100 targets. Dale broke 88, Garrison took 91, making him even with Dale, who had had a lead of three birds in the last shoot, and Frank Rice, the fourth contestant, broke 89.

Fred Willet, shooting for birds only, out of 125 targets broke 119. He made a straight run of 24 birds in a 25-target event, missing the last bird out. Willet has broken all the records established there last spring.

The shoot of Sunday closed the regular season, but it is likely that another series of events will soon be arranged. Over 30,000 targets were sent up from the club traps this season.

The initial shoot of the recently organized Crescent Bay Gun Club was pulled off at Venice trap grounds August 25th. The club grounds are in good working order and will be, ere long, better equipped for the contemplated weekly shoots.

The scores made were: Cbas. Van Valkenberg shot at 90, broke 66; R. Bungay, 90-72; F. Childs, 90-62; W. Penny 70-53; J. Mesner, 50-17; F. Bungay, 80-22; C. Berryman, 80-41; H. Mitchell, 80-39; S. Slocum, 70-48; M. Neison, 20-5; C. Sneaks, 50-4; Charles Gillen, 70-43; H. R. Hanna, 30-15; G. Burns, 30-11; T. Smith, 30 1.; L. Herzog, 40-21; R. Smith, 50-25.

Arrangements for the Western Gun Club's trap-shooting carnival of this month are progressing with great rapidity, and a big turnout of saucer-

smashers already have been assured by communications received at the club's office from prominent trigger knights of the North and Middle California points, as well as those distributed through the country. The little centers of shooting activity such as the Redlands Gun Club, Poma Gun Club, Ontario Gun Club, Santa Ana and San Bernardino gun clubs, Riverside Gun Club, and Pastime Gun Club of San Diego, all of which will be represented, some of them strongly enough to provide a team. The Oxnard, Hueneme, Santa Paula, Ventura and other up-coast organizations also will be on band in force late next month.

In common with all gun-club tournaments which are of passing interest to the shooters, the Western Club's shoot will be featured by liberal added money. Part of this will be raised by subscription; part by the sale of advertising in the club's official program. It is thought a total of \$500 will be given away to the visiting shooters, raised in this manner, and the officers of the club have taken upon themselves the work of raising this amount, which is no small task.

It has been decided to hold the tournament upon the well-appointed grounds of the Los Angeles Gun Club near Sherman, under the name of the Western Gun Club. Many are members of both organizations. The Los Angeles club has the grounds, and lacks the active membership. It will add \$200. The Western club has an enthusiastic membership, but incomplete grounds.

DOINGS IN DOGDOM.

San Mateo Kennel Club has the proud distinction of holding the first four-point, one-day show in the United States. There was a total entry of 340 dogs, numbering close to 400 entries or more.

A pleasing feature of the show next Monday will be the luncheon served by the Burlingame Ladies Club.

Wonderland Kennels' crack stud dog, Ch. Dick Dazzler, served August 25th Honey Girl (Tony Boy ex Bird), a fine Boston Terrier bitch, owned by Mr. Stevens.

Mr. Francis J. Carolan has been elected a member of the board of directors of the San Mateo Kennel Club, and will take an active interest in the coming show. Mr. Carolan's entries will embrace Fox Terriers, Irish Terriers and Scotch Terriers.

The show at the Interstate Fair evidently is to be a much more pretentious affair than was at first supposed. The best dogs of the Northwest are coming, and beautiful solid silver cups are being offered as prizes to the winners.

Word has been received by T. S. Griffith that Dr. Kloeber of Green River, Ore., will send his prize-winning Collie bitch, Champion Bo Peep, and Winnetka Countess.

Arthur G. Murphy of Seattle promises to exhibit his Collies, among which are Champion Gallant and Garnet O., and several other prize winners.

Dr. Sharpless of Seattle promises to send his well known kennel of Cocker Spaniels. Letters have also been received from Alberts, promising to send a string of dogs.

The directors of the dog show are greatly pleased at the donations made by the merchants. They have already received beautiful solid silver cups for the winners. The following prizes have been offered for the best of the following breeds:

Centennial Mill Co., cup for best Collie dog; Mose Oppenheimer, cup for best Collie bitch; Washington Cracker Co., cup for best Pointer; Spokane Drug Co., cup for best Setter; Kelley-Clarke, cup for best Bull Terrier; Jack Wilmot, cup for best Boston Terrier; Jones & Dillingham, cup for best Irish Setter; Phoenix Lumber Co., cup for best Cocker Spaniel.

TRADE NOTES.

Eastern Handicap Winnings.

The Du Pont Company feels well satisfied with the success obtained by shooters using Du Pont smokeless at the recent Eastern Handicap tournament, given by the Interstate Association at Boston, Mass., July 16th to 18th. Mr. D. A. Upson of Cleveland, Ohio, won the Preliminary Handicap with a score of 94 out of 100 from 19 yards. Mr. Upson used Du Pont smokeless. Mr. H. L. Snow of Portland, Me., who also used the same powder, tied for first place in the Eastern Handicap with a score of 93 out of 100. The highest score made in the Eastern Handicap was 96, which was made by Mr. W. H. Heer, who stood at 20 yards. The high score in the Preliminary Handicap was also 96, which was made by Fred Gilbert, who stood at 21 yards. Both these gentlemen used Du Pont smokeless. In addition to the above honors first, second and third general averages and the second and third amateur averages were all won by shooters who used Du Pont smokeless. During the tournament Mr. Gilbert made a run of 130 straight, Mr. W. S. Crosby a run of 126 straight, and Mr. Lester Gorman 97 straight. These three runs were made with Du Pont smokeless.

Drink Jackson's Napa Soda.

LOTTA CRABTREE.

It is some seventeen years since Lotta romped through "Musette" and brought tears to the eyes of sympathizers with plaintive "Little Nell," hut the sight of Miss Lotta M. Crabtree patting the horses at the Readville race track last week, vivacious, alert and enthusiastic, brought back recollections of one dainty little actress who has never had a successor. Nor did the admirer with his memory of the Lotta of his youthful days have to shut his eyes to conjure mental pictures of the diminutive, slender figure with the piquant face lightened by the snapping, roguish dark eyes, for the Lotta before him petting the horse who had defeated her own entry, with cheeks flushed with the excitement of racing, had she made a few changes of attire and loosened her hair might have been once more the hoiden of recollection.

So thought many a man and woman who saw little Lotta last week for the first time in years.

For Lotta has not grown old. Could she be persuaded to return to "Zip" or "Bob" for a night he who as a child had laughed and wept with her might take his offspring and show him the favorite of an older generation with perfect security that the representative of the newer period would be captivated as was the father in his youth.

But no such opportunity can be offered. Lotta, as she has evaded the marks which passing time usually stamps upon the human countenance, as she has defied the encroachment of flying years, has with equal success kept her thoughts away from the footlights. Lotta has become a business woman, with a large estate to manage, countless questions of finance to answer daily, investments to determine, and her only interest in the stage now is that of the great public. She turns to the theatre for relaxation and entertainment, and without any aspirations.

In figure, to-day she is the same Lotta, girlishly petite, and the golden brown hair has not a strand of gray. There is the same sparkle in her eyes and the activity of her dancing days. Perhaps if she wanted to she could dance quite as nimbly as of yore. But she does not want to, and never will again, she says. Lotta has settled down to the simple life, but without surrendering one whit of the spirit and enjoyment of action which always made her stage personality so alluring.

To-day, in place of public adulation she has her business affairs, her painting and music, her horses, her dogs and her friends, and those friends rejoice in having her care-dispelling companionship.

Lotta has lately entered into public attention as an owner of trotting horses, through her purchase of Sonoma Girl, one of the season's leading light harness racing mares. But he who recalls the Lotta of her stage days must not imagine that she has thus developed into a "horse woman," as typified in society novels. The horse, even if it is a \$30,000 racer, is more of a pet to her than a commercial proposition. When Lotta talks enthusiastically of Sonoma Girl, as she sits beneath a water color painting of her own execution, her first descriptive is not of the speed of her new purchase, but of the mare's gentleness, intelligence and beauty. After you have heard all the other qualities of the animal the charming owner may casually mention her faith in the winning ability of Sonoma Girl.

Miss Crabtree is spending the summer with her brother in a fine old estate on the shore front at Squantum, she having deserted her country place in New Jersey for the harbor resort.

Lotta's present domicile is the old Burkhardt estate, which was in its day a model for a luxurious seashore home. The house rests upon the crest at the shore edge of the spacious grounds, with broad piazzas overlooking Quincy Bay. If the estate itself is somewhat of a relic of past greatness, the interior of the house has been modernized and tastily furnished, among the decorations being some of Lotta's work with the brush.

Here, far removed from dust and a throng, Lotta is enjoying herself painting, automobiling and seeing the races, and attending to business as well. Business must always intrude itself in Lotta's day, whether she will or no, for with real estate rising \$1,500,000 in Boston, New York and other cities, she often has to forego the pleasures of the moment for more arduous tasks.

But, as the little woman says. "It is not for us to complain of business; we ought to be thankful we have some business to do." Which shows that she is a philosopher.

Sonoma Girl is now one of Lotta's chief interests, for she has a purely feminine affection for the mare and wants to see her win because of pure fondness for the horse. When the animal behaved badly during the two big races at Readville the past week, Lotta, like those who knew the mare, was puzzled, but the fair owner determined to find out where the trouble lay. By dint of perseverance the reason for the extraordinary conduct on the part of the heretofore steady Sonoma Girl was discerned.

"It is all on account of the horse's excellent memory and nervousness," said Miss Crabtree. "We could not understand why Sonoma Girl, so gentle, should break and become so unruly in the races at Readville. You know she is just like a kitten, you can do anything with her.

"But we solved the problem. At Poughkeepsie another horse ran into her and her driver was thrown. She was terribly frightened, and now every time she comes to the place on the track corres-

ponding to where the accident occurred she becomes alarmed and cannot keep her feet. Sonoma Girl cannot forget her experience, and as she is high-strung animal she becomes excited and it puts her out of action.

"I don't know just what we are going to do about it, for she probably will act just like that until the memory of the accident wears off. I have suggested taking her off the track and giving her time to forget the experience. Probably we shall do that unless some other way of curing her can be thought of. I am very sorry, for she is a beautiful horse, and everyone who has seen her has admitted that she has the speed. She did finely, never made any trouble on the track until that accident at Poughkeepsie."

Incidentally, the disappointment of her mare at the races was allayed by the friendly interest of the crowd in the success of the owner.

"Really, I think many of the people were more disappointed than I was," said Miss Crabtree. "Most of them wanted Sonoma Girl to win, and they were so enthusiastic for her that I felt that I was among my old friends. It pleased me very much, for I believe there were many in the grandstand who used to like me when I was on the stage and they wanted my horse to win for old times' sake. I did enjoy seeing the people so eager to have Sonoma Girl do well."

Since Sonoma Girl has brought her into prominence again, Lotta is experiencing a sensation which was denied her during her theatrical career, since the snapshot artist was not so highly developed a publicity agent then as now. With the past week Miss Lotta joined the ever-growing army of camera dodgers.

"It is a new experience for me to be snapshotted everywhere," she said. "Here I have gone my way quietly for years and suddenly I find myself the object of photographers. I had been keeping away from as many as I could, when suddenly I saw a woman approaching me with what I thought was a camera box. I started to run, when I happened to recognize my sister-in-law, who that day was wearing a gown I had not seen before. You know you can't be always ready to have your picture taken," said Miss Lotta, naively.

Miss Lotta was wont to throw the spirit of her personality into her roles, were she playing vixen, hoiden, or were tender sentiment the lines, and to-day in her home she retains the animation of a buoyant, optimistic nature. The Lotta of to-day has a charming dignity with all of the engaging manners which used to elevate her performance above the mere theatrical. Moreover, the cares of business have not subordinated the temper and soul of the artist to commercialism. Miss Lotta Crabtree in what leisure she has devotes it to art, music and painting.

For society she prefers to gather a few friends about her, congenial companions of similar interests, for she does not care for the company of purveyors of society platitudes. So when she is in New York during the winter months she confines her movements to the theatre and to the homes of her intimates.

"But, first of all," Miss Crabtree says, "I have to be a business woman. Many times I would rather do something else; in fact, most of the time I would prefer to do something else, but business has to be managed, and I have found that the only way to have things done as you want them is to do the work yourself. So I attend to everything myself. I have no secretary even, but read and answer all my correspondence. It is a good deal of work, and perhaps I do not do it as promptly as a secretary would, but I find time to answer all my letters, business and social.

"No, I am not a business woman by instinct," said Miss Lotta, as she confessed to a woman's aversion for the details of commercial life. "My mother was naturally fond of business, but I did not inherit her aptitude. I had to have it drilled into me.

"My mother did everything for me, managed all my affairs for years and made my investments. When she grew old I felt that she should be relieved of her cares. I wished to repay her in part for all she had done for me, so I made up my mind I would learn how. My mother taught me business. It was not easy for her to educate me, but she kept at it until she made me learn. Since she died I have had the full responsibility.

"I do not flatter myself that I am competent to give advice, but I have always had confidence in real estate. Real estate seems to be the safest and surest investment you can make, and in a growing community values are bound to rise. City property, located in the path which the municipality is bound to follow in expanding, I believe to be the most advisable investment. The growth of New York toward Harlem is evidence of the rapidity of the increase in real estate values, and there must be many opportunities in the cities for prudent investment with a sure appreciation.

"I have always been fond of Boston, though I live in New York, because I was born there and because I have a great many close friends in that city. But I have many interests in Boston. I hold some property here, and when I was on the stage the people of Boston were always very cordial. I have always enjoyed coming back here for a stay."

Though she did not mention it, Miss Crabtree has been a taxpayer of Boston since the late 70's, when she purchased the Park Theatre Building, later to add to her holdings the adjoining hotel property.

"Do I regulate my business affairs by rule? O, no," laughed Miss Lotta. "Unfortunately I am not methodical, and I cannot learn that accomplishment. Every business woman, I suppose, ought to give up a part of her day to her affairs and move with the clock, but I cannot do that. I am attending to business at odd hours of the day, and sometimes it is a dreadful nuisance.

"Oftentimes in the morning I have just the right mood for art, and I make up my mind that I will devote the whole day to painting. I have ideas, I am in the humor and I have the artist's passion for accomplishment strongly. But before I get fairly at work some letter comes or some business question comes up and I have to drop my art. By the time I am through with business I have lost zest for art as far as that day is concerned. You cannot mix business and art, I have found. So now I do not attempt to paint unless I have everything else out of the way for the day, so I may be sure of no distractions.

"You see I am pretty busy, though I am loafing this summer, just enjoying the companionship of my brother and sister-in-law. When I have no serious work to do and do not feel like painting I can always turn to music. I used to play the piano a great deal, but nowadays I play for my own amusement. When I want to rest I sit down at the piano, play snatches of melodies I have heard and wander off into improvisation, just idling over the keys, you know. It's very comforting to play just as your mood happens to be.

"Music came naturally to me. I have the gift of technique with a very retentive memory, and it was always play for me to study music."

"Do you ever have occasional inclinations to return to the stage?" was the natural query put to Lotta, for it does not seem quite natural to address her as Miss Crabtree. When with her there is the constant fear that you will forget and address her as Lotta, though she does not mind the slip, but accords the privilege as that of an old friend of the stage days.

"Not for a single day since I retired have I ever wished to go back even for one performance," answers the little woman. "I go to the theatre a great deal and I enjoy it. I love to go, but on the stage, never. I remember discussing that subject with Joseph Jefferson once. Mr. Jefferson told me that he could not exist without the applause of the public.

"I have never felt that yearning since I left the stage. I think it is a fine thing to have had the favor of the public, and I look back upon my stage life with gratitude to all the people who used to come to the theatre and who showed that they liked me. I like to remember the good will and the respect they have shown me, but for me the applause of the public is now only a pleasant memory. I have no desire to seek it any more.

"My happiest thoughts as I remember the years on the stage are of the fondness of women and children for me. I may say it is with a feeling of pride that I recall the popularity I enjoyed with them. I can say that no woman or child ever came to see a play of mine and was offended. My plays were always innocent, of good moral tone, and it is worth something to be able to say that you kept the respect and admiration of women and children by wholesome methods.

"Occasionally I am reminded that there is a new generation now going to the theatre, but the mothers have not forgotten me. Very often I receive a very gratifying letter from some woman who thanks me for the pleasure I gave her, and says she wishes she could take her children to see me now. To have a mother, who saw you when she was a girl, remember you, and tell you she would like to have her children see that kind of a play is quite a pretty compliment, isn't it? My unknown correspondents have always found me out, but since I bought Sonoma Girl and people were told where I was I have had letters from quite a number who remembered me in the old days. It is quite like hearing from old friends."

"I can enjoy the theatre just as much as if it were a new experience to me," said this little woman who spent nearly two score years before the footlights. "But I do hate anything artificial. There is a little quotation which I have carried in my mind for years. It runs: 'A man is doomed, not for what he believes, but for what he makes believe.' I think that very apt.

"I do insist that people shall be sincere, for an affectation is as distasteful on the stage as it is in the drawing room. If I go to the theatre and see an actor or an actress very self-conscious and straining for effect it makes me fairly jump out of my seat and rush from the house.

"When I was on the stage I used to throw myself into the part, and I never studied for effect. I always sought to feel the character I was portraying and then just act the impulses and emotions which that character must have to be consistent. Because of that custom I was not always alike in the same part. I was constantly changing my interpretation of the role.

"You know also a great deal of the success of an actor or actress depends upon the mood. Oftentimes I go to the theatre and I know some of the players are not doing their best because they are not in the right mood. That accounts for many disappointments. You admire an actor in one part and when he comes to your city again you go to see him, but come away disappointed. Nine times out of ten it

is because he was not in the proper mood to do himself credit, and actors, like other persons, cannot regulate their moods. The artistic temperament, you know, is an uncertain affair.

"What kind of plays do I like? Well, that is a hard question, I like so many kinds. All I require is that they shall be cleverly written and well acted, which is a good deal to ask, I'll admit. But I mean I like the serious drama and also the frivolous musical comedy, if the music is tuneful.

"I greatly enjoyed 'The Hypocrites' and also 'His House in Order,' and I always like to see an ingenious comedy like 'Brewster's Millions.' If it is a comedy I want it clean, and funny because of its situations and bright lines.

"Every one enjoys a play with a beautiful atmosphere, like those produced by David Belasco. You take a touching story and present it with faithful adherence to the environment, stage it well, and that appeals to one's artistic sense, you know. The poetic drama always charms me, and by that I do not mean blank verse, but I mean a play that has a fine, fanciful sentiment sustaining it.

"Do I enjoy Shakespeare? Yes, of course, there is nothing like Shakespeare, but I have had most of my enjoyment of his plays from reading them. It is rather rare to find an actor who can do justice to Shakespeare's lines, read them with all of the beauty of pronunciation and emphasis. An actor must have the soul of a poet to recite Shakespeare.

Lotta had been chatting for an hour and she had not mentioned one of her foibles or fads. As every one who comes before the public in any form must have Miss Crabtree is possessed of one devoted fancy, and it is collecting tea-pots. At her home at Mt. Arlington, N. J., she has a fortune in rare and artistic creations of this commodity, but her fondness for them is a part of her love of the artistic.

Incidentally, it is a part of her scheme of house decoration, for she is constantly on the lookout for some bit of furniture or bric-a-brac which will add to the attractiveness of her home. When abroad Miss Crabtree has picked up many a painting, and next year she is to go over again to see what there is worth bringing home.

Lotta shares her affections with horses, dogs and cats, but the canine need not be of noble birth to claim her regard. About her at her summer home are dogs of distinguished lineage, but the favorite is "David Jr." a white, and generally dirty, cross between a Terrier and a Spitz. But Dave has brains and has thus endeared himself. When he was only three months old he found his way from the north end of Boston to his home at Atlantic, and this accomplishment Miss Lotta tells as an indication of the solid matter inside David's skull.

Though Miss Crabtree has quite a stable of trotters, she does not drive herself, principally because several years ago she was thrown from her carriage and does not care to risk herself on the road behind a horse in the days of the automobile. So she goes about in a motor car to see her horses race, and owns horses just because she is fond of them as pets.

"I believe that consideration for the horses requires that trotting races be decided in two heats out of three," she says. "Three out of five is too much for a horse."

Until the Grand Circuit season in the East ends Miss Crabtree and her automobile will be seen at every race track, whether Sonoma Girl or any of her string are entered or not. For she enjoys trotting.

"Why? Because I know something about trotting, and I love horses," she says.

This is a sufficient excuse for her investment of some \$25,000 or more in Sonoma Girl.—Boston Globe.

MUST DISINFECT FOREIGN HIDES.

A ruling made by the Treasury Department at Washington last week covering the admission of foreign hide imports requires the disinfection of all foreign cattle and horse hides, except dry hides, arsenic cured, in order to prevent more fully the spread of cattle diseases. The order

reads:

"Representations having been made to this Department by the Secretary of Agriculture of the existence in various countries of diseases of cattle, particularly anthrax, the spores of which are not destroyed by means of the disinfection required under Department regulations of July 30, 1901 (T. D. 23,212), it is hereby directed that no hides of horses or cattle exported after August 1, 1907, from any of the countries of Europe, Asia, Africa, Australia and South America, except dry hides which have been arsenic cured, shall be admitted to entry at any port of the United States unless a certificate signed by the American Consul at the place from which exported be produced on entry, showing that such hides were disinfected prior to shipment by immersion in a 1 to 1,000 solution of chloride of mercury until thoroughly wet with such solution and kept immersed for not less than 30 minutes.

"Dry hides which have been arsenic cured will be accepted as having been disinfected by the process of curing, and when shown by an invoice or Consular certificate to have been arsenic cured, such hides will be admitted by the production of certificates of disinfection therefor."

DISINFECT.

When it is found that an affected animal has occupied a stable, the most thorough measures for its disinfection should be taken.

In all instances where a horse has a discharge from the nose, it is best to call in a veterinarian to determine its nature, and the animal should be rigidly quarantined until the nature of the disease is surely known. If it should be glanders, or farcy, have the animal destroyed, its stall thoroughly cleaned, and the litter burned. Disinfect the stall and all utensils which have been used in any way. Whitewash the walls of the stall, and give it a thorough airing before any other animal is allowed in it. The horse owner cannot be too exacting when cleaning up after a glandered animal has been in his stable or on the farm.

A light feed of grain may be given pigs three times a day, but twice is better, provided they have plenty of good pasture.

Gombault's Caustic Balsam

The Worlds Greatest and Surest
Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Caustery or Firing. Invaluable as a CURE for

FOUNDER,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENY,
BONY TUMORS,
LAMENESS FROM
SPAVIN,
QUARTER CRACKS,
SCRATCHES,
POLL EVIL,
PARASITES.

REMOVES

BUNCHES or
BLEMISHES,
SPLINTS,
CAPPED HOCK,
STRAINED TENDONS.

SAFE FOR ANYONE TO USE.

NOTHING BUT GOOD RESULTS.

Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the finest breeding establishment of trotting horses in the world, and was your sire's often.—W. H. FAYBOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or special mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, \$1.00 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

Proofs of Contract's Validity.

Oatville, Kans., June 13, 1907.

This is to certify that I have received in full the amount of \$15.00 due me on refund from the Troy Chemical Co.
(Signed) MR. J. J. KETCHEL.

Rehoboth, Mass., Aug. 10, 1907.

Troy Chemical Co., Binghamton, N. Y.
Dear Sirs: I thank you very much for check for \$10.00 received. It is the first time in my life I ever knew a firm to refund anything, although there are many that advertise to do so.

I shall take pleasure in recommending your remedy to friends who may need it. You deserve the greatest success for such square dealing, and I should never hesitate to use it again or speak a good word for it. Truly yours,
O. H. GAY.

THE PALACE PHARMACY.

C. H. McKINSTRY, Proprietor.
J. M. HURST, Reg. Pharmacist.

Seaton, Ill.

Troy Chemical Co., Binghamton, N. Y.
Gentlemen: Mr. Burns asked me to apologize for not writing you; he sold the horse before he received your answer and check, and thought he was out the \$5.00. I told him you had always made your word and guarantee good, and he is convinced of the fact now.

We have sold several dozens "Save-the-Horse." Some of the parties have bought two and three bottles at different times and did not want the guarantee, as they knew it would cure what they intended using it on. One man cured two curbs with one bottle and ever since I sold him the first bottle has kept a bottle on hand. Respectfully,
C. H. McKINSTRY.

Our guarantee is not mere words, mind you, but a signed contract; made absolutely legally binding to protect purchasers to treat any case named in the document.

Write for proofs. Read what it has accomplished for others; it will unflinchingly do so for you.

"SAVE-THE-HORSE" permanently cures Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Shoe Bol, Wind Puff, Injured Tendons and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 per bottle. Written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet.

At Druggists and Dealers or express paid.

TROY CHEMICAL CO., Binghamton, N. Y., Formerly Troy, N. Y.

McKINNEY MARE FOR SALE.

Five-year-old, by McKinney 2:11 1/4, first dam by Baywood, he by Nutwood; second dam by Geo. M. Patchen Jr. 33; third dam by Owendale, he by Williamson's Belmont; fourth dam Winter's mare Nellie by Gray Eagle. With six weeks' work over the Brace half-mile track, near Santa Clara, on July 31st, Mr. P. W. Hodges drove this mare a quarter in 34 seconds, a half in 1:12 and the full mile in 2:27 1/4 on a heavy track. This is a high-class mare and she has improved every week. She surely looks like a 2:10 trotter. For further particulars apply to or address, THOS. A. CARROLL, 184 West Santa Clara St., San Jose, Cal.

THE HUNTER ARMS CO.

Fulton, N. Y.

A RECORD BREAKING PERFORMANCE MADE BY FRED GILBERT AND THE

PARKER GUN

97.9 per cent

From June 25 to August 9, Mr. Gilbert shot at 2,400 targets and broke 2,351, or 97.9 per cent. Mr. Gilbert also made the following long runs without a miss: Iowa Falls, 177; Boston, Mass., 130; Worthington, Minn., 178; Audubon, Ia., 158 and 96.

An unfinished run at Audubon of 96 and the first 85 at Story City without a miss, making a run of 181.

This unquestionably demonstrates the splendid shooting qualities of the Old Reliable PARKER GUN.

Shoot one and win. Send for Catalogue.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The four leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

WINCHESTER
HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1886 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

THE WEEKLY

CALIFORNIA STATE FAIR.

BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

WITH THE CLOSE of the California State Fair at Sacramento to-day the harness horses that have been racing on the California Circuit will divide, some going north to race through the North Pacific Circuit and others going south, where Fresno, Tulare, Hanford and Bakersfield have formed a circuit of county fairs that promises to be visited by large crowds of people. The circuit has been a most successful one, the racing having been excellent, the time so fast that several records have been broken, while the attendance has been large at nearly every meeting. No particularly sensational trotters have been developed during the six weeks of racing thus far held, the only horse that has shown himself capable of beating 2:10 being Coronado 2:09 $\frac{3}{4}$, that had no races, but trotted in 2:07 $\frac{1}{2}$ and 2:07 $\frac{1}{4}$ at Santa Rosa and Woodland in an advertised effort to beat 2:05. The pacers, however, have furnished several sensations. Sir John S., a magnificent big stallion by Diablo 2:09 $\frac{1}{4}$, has won every race in which he has started and now holds a record of 2:04 $\frac{1}{2}$, the fastest time ever made in a regular purse race on the Coast. He has won five races and lost but one heat. The mare Inferlotta, a daughter of Inferna 2:15 $\frac{1}{2}$, son of Diablo, has also made a phenomenal showing. Starting at Salinas she was beaten in straight heats, taking second money; at Pleasanton she won two heats of her race, both in 2:07 $\frac{1}{4}$, and was then beaten for the race, but since then, at Santa Rosa, Petaluma, Woodland and Sacramento she has won in straight heats, and at Santa Rosa reduced her record to 2:04 $\frac{1}{4}$, and is the fastest green pacer of the year, as she never started in a race before 1907. Besides these two sensational pacers, one a son and the other a grand-daughter of Diablo, two of the get of the great Searchlight 2:05 $\frac{1}{4}$ have been very much in the limelight. Ray o'Light, winner of the two-year-old pacing division of the Breeders' Futurity, took a record of 2:13 $\frac{1}{2}$, the fastest time ever made by a two-year-old in a race on this Coast. Aerolite, a three-year-old son of Searchlight, paced to a record of 2:11 $\frac{1}{2}$ in a race, and in a public trial paced a mile in the wonderful time of 2:05 $\frac{1}{2}$. The stallion Zombro 2:11 has furnished another sensational three-year-old pacer in his unsexed son Hymettus, who won the Breeders' Futurity for pacers of his age and took a record in the race of 2:08 $\frac{1}{2}$, the world's record for his age and sex. Several new pacers have entered the 2:10 list on the circuit. In addition to Sir John S. 2:04 $\frac{1}{2}$, Inferlotta 2:04 $\frac{1}{4}$, and the three-year-old Hymettus 2:08 $\frac{1}{2}$, the California races this year have produced Jonesa Basler 2:05 $\frac{1}{4}$ by Robert Basler, Mona Wilkes 2:06 $\frac{1}{2}$ by Demonio, and Copa de Oro 2:07 $\frac{1}{4}$ by Nutwood Wilkes. Six new 2:10 pacers in six weeks' racing, all bred and foaled in California, besides Mandolin 2:10, a Montana bred horse. It is a record that cannot be excelled in any section of the Union, nor by any one State. Some of the best of these pacers will start next week in the \$5,000 race offered by the Oregon State Agricultural Society for pacers of the 2:09 class. Inferlotta is not entered in this event, but Copa de Oro 2:07 $\frac{1}{4}$ is, and if he reaches Salem in good shape he should give Sir John S. the race of his life.

THE PERFORMANCES of the get of Searchlight 2:03 $\frac{1}{4}$ in California this year have attracted much attention to that stallion, and were he brought back here for the stud season of 1908 there is no doubt but he would be liberally patronized.

Big Success Being Made of State's Annual Exposition.
Good Harness Racing and no Betting.

The California State Fair is drawing big crowds this year and will doubtless prove a success financially as well as otherwise. It opened on Monday, September 2d, the week during which the National Irrigation Congress met at Sacramento, with the finest pavilion exhibit seen at the Capitol City in years. There was a very large crowd in attendance all the first week, there being three thousand delegates to the Irrigation Congress with their families and friends present.

The regular race program began on Monday, September 9th, and the crowd was the largest seen on the track on an opening day for years. Two races were on the program, both being won with ridiculous ease in straight heats.

The first event was the Occident Stake for three-year-old trotters. Its value this year was \$2,335, of which over \$1,500 went to the winner.

There were but four starters in the race, as follows:

Ceo. Warlow's bay colt Nogi by Athablo, dam Cora Wickersham by Junio, driven by Schuyler Walton.

Mrs. L. J. Hastings' black filly Lady H., by Coronado, dam Lady Gossiper by Gossiper, driven by W. G. Durfee.

Judge Thos. H. Brents' hay filly Reina del Norte by Del Norte, dam Laurella by Caution, driven by Fred E. Ward.

Frank H. Burke's bay colt Mogolore by Iran Alto, dam Lady Bel Isle by Eros, driven by Pat Davey.

Mr. Warlow's Nogi was conceded to have the race at his mercy, and that gentleman very generously agreed not to distance any of the starters, unless it was necessary in order for Nogi to win. The race needs no description. It was the cheapest Occident ever seen, and Walton had hard work keeping his colt back so that the others would not get the flag. As Nogi can certainly trot a mile in 2:12 and only trotted the first quarter of the first heat in 39 seconds and the mile in 2:31 $\frac{1}{2}$, some idea of his class over the others can be formed. The remaining two heats were a little but not much faster than the first, and won just as easily. Durfee, with Lady H., and Ward, with Reina del Norte, had quite a contest for second money, but the former was steady in the stretch, while the latter broke in each heat and the Lady H. secured the place. Had there been anything in the race to have forced Nogi to trot at his speed a new record for the stake would doubtless have been made.

The second race on the program was the 2:20 class pace for the good purse of \$2,000. Only four horses started out of an original entry of nineteen. The four pacers were Inferlotta, Copa de Oro, Pilot and Explosion. The first named, on her races through the circuit, was picked to win, but it was thought Copa de Oro could give her a better race than he did. In the first heat Inferlotta paced the mile in 2:06 $\frac{1}{4}$, reducing the track record nearly four seconds, and she was going easy at the finish. Durfee brought Copa de Oro up in the stretch and tried to give the mare a race to the wire, but she stepped away from him and Durfee, finding it was no use, let her have it. Copa de Oro beat Pilot as easily as Inferlotta beat him, and Explosion was last. The horses finished in the same order each heat and the money went to them in that order. In the second heat, which was in 2:09 $\frac{1}{4}$, Inferlotta stepped the last half in 1:02 $\frac{1}{2}$, showing that the little mare has not gone back any in her form and has all the speed she has been credited with having.

The track is much improved over last year, and while it could not be considered as fast as the Woodland track, was in excellent shape.

A three-quarter-mile running race and an eighth dash for ponies filled out the program.

In the judges' stand President Ben Rush of the Board of Directors presided, assisted by Directors H. A. Jastro and Fred L. Martin. Ed R. Smith acted as starter and announcer, J. F. Bronner as clerk of the course and Vet Tryon and A. Lyndon were the timers. O. A. Bianchi started the running races. The summaries:

Trotting, Occident Stake, for three-year-olds, value \$2,335, of which \$1,573 to first, \$586.50 to second and \$195.50 to third—

Nogi, b c by Athablo-Cora Wickersham (Walton) 1 1 1
Lady H., blk f by Coronado (Durfee) ... 3 2 2
Reina del Norte, b f by Del Norte (Ward) ... 2 3 3
Mogolore, b c by Iran Alto (Davey)..... 4 4 4
Time—2:31 $\frac{1}{2}$, 2:27 $\frac{1}{4}$, 2:26.

Pacing, 2:20 class, purse \$2,000—
Inferlotta, b m by Inferna (Hewitt)..... 1 1 1
Copa de Oro, b s by Nutwood Wilkes (Durfee) 2 2 2
Pilot, ch g by Ahottford Jr. (B. Walker) .. 3 3 3
Explosion, b m by Steinway (Ward)..... 4 4 4
Time—2:06 $\frac{1}{4}$, 2:09 $\frac{1}{4}$, 2:12 $\frac{1}{2}$.

Second Day.

While the crowd was not as large on Tuesday, the grandstand was nearly filled, and some good racing was enjoyed. The first race was the 2:14 trot, in which four horses came to the post. In the first and second heats North Star took the pole and maintained his lead to the wire, Oveta being second the

first heat, and Vallejo Girl second the next time. In the third heat Ward caught Whitehead napping a little and beat North Star to the wire with Oveta, but in the next North Star won rather easily by six lengths.

The 2:12 pace was a renewal of the contest between this class at Woodland, the field being identical. At Woodland Jonesa Basler took the first heat and then tired, Mona Wilkes taking the next two and Mandolin the next three.

That race was the first Ben Walker had ever driven Jonesa Basler, and he said it would do the old stud good, and he would be a better horse at Sacramento, which he was, as he won in straight heats in fast time for the track, Mona Wilkes taking second money and Queen Pomona third. The first heat Basler beat Mona Wilkes three lengths, led her two lengths at the wire in the second heat and in the third, which was a duel between the two all the way, the stallion finally won by three lengths.

After a three-quarter-mile running race had been decided a comedy feature was put on in the shape of a mule race, with four starters. The conditions were that the mules were to be driven on a walk the first quarter, to be trotted the second quarter and to run the rest of the way. This race furnished a lot of fun and was won by Jake Martin's Bearcatcher. The summaries:

Trotting, 2:14 class, purse \$800—
North Star, b g by Nutwood Wilkes (Whitehead) 1 1 2 1
Oveta, b m by Caution (Ward) 2 4 1 2
Vallejo Girl, h m by McKinney (Davey). 3 2 4 ro
Marvin Wilkes, b s by Don Marvin (Mastin) 4 3 3 ro
Time—2:14, 2:13, 2:14 $\frac{1}{4}$, 2:15 $\frac{1}{4}$.

Pacing, 2:12 class, purse \$800—
Jonesa Basler, br s by Robert Basler (B. Walker) 1 1 1
Mona Wilkes, b m by Demonio (Sutherland) 2 2 2
Queen Pomona, b m by Pomona (Ward) .. 4 3 3
Mandolin, b g by Alcone (Mosher) 3 4 4
Memonia, b m by Demonio (Hoy) 5 5 5
Friday, ch g by Monroe S. (Davey)..... 6 6 dis
Time—2:09 $\frac{1}{4}$, 2:10, 2:10 $\frac{1}{4}$.

PARK DRIVING CLUB.

The second days racing of the series of six to decide the winners of three beautiful cups, took place at the stadium in Golden Gate Park on Monday afternoon last. The track was in good condition but a cold wind blew and the time was not so fast as at the previous meeting. There was a good attendance and the sport excellent throughout. The summaries:

Trotting, class D—
Emma Smalley, b m (G. E. Erlin) 1 2 1
McKinney Belle, b m (F. J. Kilpatrick).... 2 1 2
Lady Smedley, h m (W. Smedley)..... 3 3
Director B., b g (E. Stork)..... 4 4
Time—1:53, 1:52 $\frac{1}{4}$, 1:51.

Trotting, class B—
Lady Washington, ch m (F. W. Thompson) .. 1 1
Reina Directum, blk m (S. Christenson).... 2 2
Moffat D., b g (G. E. Erlin)..... 3 3
Lady McKinney, b m (F. J. Kilpatrick)..... 4 4
Time—1:47, 1:48.

Free for all; mile—
Vic Schiller, b g (Albert Joseph)..... 1 1
Major Cook, b g (D. E. Hoffman)..... 2 2
Time—2:24, 2:18.

Trotting, class C—
Clipper W., blk g (F. J. Kilpatrick)..... 1 2 1
Lady Nell, blk m (M. W. Herzog)..... 2 1 2
Time—1:56, 1:47, 1:48 $\frac{1}{2}$.

Pacing, special race—
Satinwood, b g (F. E. Booth)..... 1 1
Jim Chase, b g (T. F. Bannon)..... 2 2
Time—1:45 $\frac{1}{2}$, 1:42 $\frac{1}{4}$.

ANOTHER GOOD DAY AT VALLEJO.

The San Francisco Driving Club, whose meeting at the Vallejo track on Monday, September 2d, broke all records for attendance at that track, held another excellent meeting on Monday, September 9th, and another very large crowd turned out to see the sport, several hundred going up from San Francisco. The races were started by W. J. Kenney, who is getting quite a reputation as a wielder of the flag. He does not permit long scoring and gets his fields away well.

The events were run off in excellent style, and the races were over before 5 o'clock. The citizens of Vallejo, appreciating the efforts of the club to provide high class harness racing, presented the club with a triangle. The races resulted as follows:

2:12 class—George Perry won in straight heats, Charley J. second. Little Dick and Ring Rose tied for third place. Time, 2:13, 2:13.

2:17 class—Derroll won two straight heats, Edeuvalde second, Direct Steinway third. Time, 2:19, 2:22.

2:20 class—Sidney B. won in straight heats, Prince H. second, Charley B. third. Time, 2:17 $\frac{1}{2}$, 2:18 $\frac{1}{2}$.

2:40 class—Lady Irene won in straight heats, Golden Buck second, Darby third. Time, 2:27, 2:33.

Special race for Solano county horses—Smith won, Clenall second, Esther B. third. Time, 2:23, 2:22.

WOODLAND'S GREAT MEETING.

Sir John S. Breaks Coast Record—Hymettus Wins Three Fastest Heats by Three-Year-Old, and Aerolite Equals Klatawah's Time.

When the scratches were all in on Wednesday afternoon for the second day's program of the Woodland meeting it was seen that there was but one race left on the card, the 2:12 pace, which had six horses remaining. Manager Spencer tried to get up a couple of specials, but could only secure four pacers for one race and the card looked very "skippy" to the horsemen, as Mona Wilkes seemed to have the 2:12 pace at her mercy in her own time, and the wise bettors (who are always ready to give odds that they can pick the winner) said Henry Helman's mare Nutwood Princess could take the special in straight heats. Horsemen propose, but horses dispose, and when the races came off on Thursday afternoon both favorites met defeat, and when the sport was over those present (and there was a goodly crowd) had seen one of the best days' racing ever held anywhere.

When the 2:12 pace was called Mona Wilkes sold favorite over the field at \$10 to \$6. Ben Walker was up behind Jonesa Basler for the first time and it was noticed that the Hanford horse moved more like a race horse than ever before. Walker had taken his check off and the stud seemed to have a better way of going and more speed. A good start was made and with the horses pretty well bunched Mona Wilkes led at the head of the stretch by a length, with Jonesa Basler second. There was a hot fight to the wire and when about thirty yards from the finish Mona Wilkes broke and Chadbourne failed to pull her to her gait, as the rules prescribe. The mare was first at the wire in 2:05½, but the judges gave the heat to Jonesa Basler, whose time was 2:05¼. Queen Pomona finished third and Mandolin was fourth in 2:08½. The time given Jonesa Basler was a new record for Woodland track, and called for much applause when it was announced.

The next two heats went to Mona Wilkes pretty handsly in 2:07 and 2:08½. Jonesa Basler tiring badly, as he was in no shape for such fast time. It was thought the race would end in the fourth heat, but the heat winners were both pretty tired, and Ed Mosher, who was driving the game pacer Mandolin, found they were coming back to his gait, and he made a splendid drive with his father's horse, carrying Mona Wilkes to a break in the stretch and winning the heat in 2:10½. The fifth heat was won by Mandolin in 2:10, and the sixth and last in 2:12, making the race one of the best of the meeting. Mr. Mosher senior said he did not think Mandolin could possibly have won had Mona Wilkes taken the first heat, as she would have made it three straight. She is much faster than the Alcone gelding. Split heats, he said, was Mandolin's strong suit, however, and the horse proved it.

We have not looked up the statistics, but this is probably the fastest six heat race ever paced in California, the six heats averaging a little better than 2:07. Mandolin, the winner, was bred by Mr. C. X. Larrabee of Montana, and was driven in this race by Ed Mosher, who handled him admirably.

The next race was a special, in which four horses started. Ora Wright of Davisville had entered his handsome bay pacer Mona Rose, and secured the services of Sam Hoy to drive him. Henry Helman named his green pacing mare Nutwood Princess by Prince Nutwood, and the bettors made this mare a favorite. Cal Rodriguez entered the very handsome black horse Joe Robin, and Carey Montgomery named his Diabolo mare Chiquita. It was thought that this race would go to Nutwood Princess in straight heats with the time not better than 2:16. The race was a surprise to everyone, unless it was the owner of Mona Rose, and he did not back his mare to any extent. Hoy took Mona Rose out in front and won in straight heats. The first heat Nutwood Princess was the contender, but Joe Robin was second in the next two. Mona Rose paced the third heat in 2:13¾, and Hoy remarked that a mile in 2:10 was probably within his reach. He had never driven the horse before and was surprised at the speed he displayed. These two races made a splendid day's sport and the crowd went home highly pleased with it.

Sir John S. Takes Coast Record.

On Friday the announcement that Sir John S. would start in the 2:08 pace, and would have to go the race of his life to win, brought out a tremendous crowd, the Woodland stores all closing for the afternoon to give everyone a chance to see the event. The race proved the most sensational event of the circuit. Vance was confident he could win with Sir John S., but the track was in such perfect condition and the day so ideal that he feared too low a record. He was almost tempted to scratch his horse the night before, but finally came to the wise conclusion that the record would not injure the son of Diabolo either for racing or selling purposes, while it would only help him as a stallion.

In scoring for the word Sir John S. made several breaks in his anxiety to get away, but did not show any irritability, returning for the next score quietly and acting well when given his head. The first heat he took the lead at the first turn and was closely followed by Gerrety with Miss Georgie. The first quarter was in 31 seconds, the half in 1:02, the three-quarters in 1:34¼, and the last quarter

in 30¼ seconds, making the mile in 2:04½. The fastest mile ever paced in a regular race on the Pacific Coast, lowering the time made by Inferlotta at Santa Rosa this year a quarter of a second. Miss Georgie was beaten not over a length and paced the heat in 2:05 or better. Gerrety made a great drive with the mare, but Vance's stallion held her safe all the way and at the finish. When the time was hung out there was great cheering, and Woodland's claim to the fastest track on the circuit had been proven.

In the second heat Sir John S. again took the lead and kept it. He reached the quarter in 0:31¼, the half in 1:02½, the three-quarters in 1:35 and increasing his speed paced the last quarter in 29¾ seconds, making the mile in 2:04¾, equaling the time made by Inferlotta in her second heat at Santa Rosa. In this heat there was quite a battle for second position, Ben Walker bringing Delilah up with a rush and beating Miss Georgie a half length for the place. They made the mile in 2:06 or better, being two or three lengths behind Sir John S.

In the third heat Sir John reached the quarter in 32 seconds, the half in 1:03½, the three-quarters in 1:25¾ and then fairly flew the last quarter in 29½ seconds, reaching the wire in 2:05¼, pacing the fastest three heats that have been paced west of the Mississippi this year. He finished strong and game and could have gone faster if necessary.

The real battle of the race was between Delilah and Miss Georgie for second money. Walker and Gerrety, two of the best reinsmen in the country, drove for everything there was in their horses, and at the wire Delilah had half her head in front of the McKinney mare. They were timed in 2:06½, and this was the slowest heat Miss Georgie had gone in the race, so some idea of her speed and gameness may be had from the race she put up. Walker deserves great credit for beating her with Delilah for second money and few other drivers could have done it.

After the second heat of this race Bruce Strong drove Diabolo 2:09¼, sire of Sir John S., on the track, and the horse was introduced to the crowd by Announcer Ed Smith. Diabolo was foaled in the spring of 1889, and consequently is now in his nineteenth year. He took his record as a four-year-old over the Woodland track, when he beat W. Wood, Electric and Plunkett in the free-for-all pace for a purse of \$700. The grand old stallion is in fine condition, being round as a barrel, carries plenty of flesh, and but for a slight sway in his back would never be suspected of being more than ten years old. He walked on the track as proud as a peacock, and was received with great applause.

Another record breaking performance, although not as sensational as that of Sir John S., was furnished the large crowd by the Zombro three-year-old pacing gelding Hymettus, whose heat in 2:08½ at Santa Rosa made him the fastest pacer of his age and sex in the world. He was entered at Woodland in the same class and the horsemen all considered that James Marshall's colt Aerolite would make him reduce his Santa Rosa record to win. Mr. Marshall, who is not a man of very large fortune, desires to sell Aerolite. He is of that sterling sort of men, however, who would not be guilty of having his horse pulled under any circumstances and consequently did the right thing in scratching him, as he had been advised by some of the most astute horsemen in the country to keep Aerolite in the 2:12 class if he wanted to get the top price for him. The scratching of Aerolite was a disappointment to the people, but Hymettus gave them a performance that was of the sensational order. He won the race in straight heats as he pleased over Josephine and Beulah, but stepped his miles in 2:13¾, 2:10½ and 2:09¼, the fastest race ever made by three-year-old pacers on the Coast, and the fastest third heat ever paced by a three-year-old. John Quinn, who has trained and driven him in all his races this year, believes he could have stepped the last mile in 2:06 or 2:07 very handsly, and his opinion was shared by all who saw the gelding perform.

One of the most remarkable performances, however, was the last half of the second heat by the filly Josephine. Hymettus reached the half in this heat in 1:08¼ and then stepped the last half in 1:02. Josephine was at least three lengths behind Hymettus at the half and was less than two lengths behind him at the finish, and was separately timed the last half in 1:01¾. She is a very handsome and elegantly gaited filly and is owned by William T. Russell of San Bernardino. She took a record of 2:20¼ at Petaluma this year, and the Woodland race was the third in which she had ever started. She is by Zolock 2:05¼.

Saturday, the fourth and last day of the meeting, saw another good crowd present. Three races were on the card, all resulting in the hottest kind of contests. At a meeting where so many sensational miles were paced it was not expected that another and a greater than all would be witnessed the last day, but the three-year-old colt Aerolite furnished it. He was being worked out in the afternoon by Mr. James Sutherland, owing to the fact that Fred Chadbourne, the colt's regular trainer and driver, was sick in bed. The instructions of Mr. Marshall, the owner, were to give Aerolite a fast mile, but while no announcement was made of it, the timers and the judges, in addition to nearly every owner of a timing watch present, were ready for the trial. After warming the colt up Mr. Sutherland started him away all alone and not even having a whip in

his hand. Chadbourne had told him that if he would take the colt to the half in 1:05 he would come home in a minute. Mr. Sutherland drove him to the half a little faster than that and then spoke to him. Aerolite paced the next quarter in 30¼ seconds and the last in exactly the same time. Sutherland's watch stopped at 2:04¾, and one of the regular timers had the same figures. Mr. Marshall's watch made the mile in 2:05½, and he requested Mr. Smith to announce that time for the mile, so there would be no question about it. The writer consulted several horsemen who timed the wonderful mile, and the slowest any of them except Mr. Marshall caught it was 2:05¼. Mr. Sutherland sat motionless in the sulky the entire mile and only clucked to the colt once when nearing the wire, when he increased his speed and seemed to have much more left. Aerolite was undoubtedly capable of a mile in 2:03 that afternoon. Searchlight 2:03¼, his sire, paced a trial mile at Los Angeles in 2:06¾ when a three-year-old, and this son of the great race horse is undoubtedly a faster colt. He is a big, strong fellow and if there is a two-minute horse in this country he is one.

The first race of the day was the two-year-old trot in which there were five starters. The race was between Katalina, owned and driven by J. W. Zihbell, and the filly Idolway, driven by I. Mosher. Both heats were very closely contested by the two youngsters, and they finished under the whip, with Idolway only nosed out. In the second heat it seemed as though both swerved in the stretch from being tired, and it looked for a moment as if a collision would result, but Mr. Mosher pulled his filly out and avoided it by a hair's breadth. Katalina did not trot within a second of her Santa Rosa record, but she was ailing with pinkeye for several days after that race and was not in the best of condition.

The special pace was a two-in-three affair, and gave Cal Rodriguez the opportunity to land a winner in Fred W., a good looking pacer by Robin. After Ed Mosher had won the first heat with the black colt Radium, by Stoneway, in 2:15, Rodriguez took the next two with Fred W. in 2:14¼ and 2:15. The race was a close one, with a contest in every heat.

The 2:24 class trot for a purse of \$1,000 brought out six fine looking trotters in Era (the favorite), Fresno Girl, Yolanda, Dredge, Berta Mac and Kinney Rose. In the first heat Fresno Girl went to the front and was never headed, although Yolanda made her trot pretty fast through the stretch to win. Fresno Girl repeated the same thing in the next heat, but Era was the contender at the finish and a very close one at that. These two heats were in 2:10¼, the fastest time made in a trotting race on the Coast this year, and the fastest ever made in the 2:24 class on the Coast. Era, off fourth, trotted the heat in 2:10.

In the third heat Will Durfee, driving Dredge, cut over to take the pole on the first turn and interfered with both Berta Mac and Fresno Girl, causing both to break. Era, who had not made a break this year in any of her races, hooked up with Dredge for a horse race, and they furnished one that will long be remembered. They trotted like a double team through the stretch, being urged to their best efforts, and when the wire was reached everyone thought it was a dead heat. The judges, however, took into consideration the interference on the first turn and gave the heat to Era, and placed Dredge last. The time was 2:12½.

Era took the next heat from Dredge in 2:14¼, and when the drivers dismounted they were told by Starter Stevens that they would have to be on the track again in twenty minutes to finish the race before sundown. They came on the track at the appointed time, but before they could be given the word, the sun sank behind the horizon, and the judges declared the race ended as they stood. Era getting first money, Fresno Girl second, Yolanda third and Dredge fourth.

This ended one of the best meetings ever held on the Coast.

AUCTION DATES SET.

Fred H. Chase & Co. have the following dates for auction sales of horses:

October 14th—Combination sale of fifty head of standard bred stallions, mares and geldings.

November 2d—Standard bred horses from farm of H. Brace, Santa Clara.

December 2d—Thoroughbreds from Ormondale Stock Farm.

December 10th—Thoroughbreds from Autrim Farm (Estate of James Kerr).

The Salinas Journal says: W. H. Williams, at the Salinas race track, has received from Mr. Waters of Watsonville a handsome three-year-old colt, one of the last crop of colts by the dead sire, Booble 2:12. The colt is a trotter and showed 2:40 speed for a quarter the first time he was jogged. W. S. Train came over from Santa Cruz Sunday and took back with him Monday the champion two-year-old pacer Ray o'Light 2:13½. He will be given a couple of months' rest and then returned to Charles Whitehead to train again.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

WOODLAND SUMMARIES.

WEDNESDAY, SEPTEMBER 4.

Trotting, 2:27 class, purse \$500—			
Era, b m by Zombro (Williams).....	1	1	1
Dredge, ch g by James Madison (B. Walker)...	2	2	3
Yolanda, b m by McKinney (Davey).....	3	3	2
Time—2:12½, 2:12½, 2:11¼.			
Pacing, 2:20 class, purse \$1,000—

INFERLOTTA'S SECOND DAM.

The remarkable showing made on the Pacific Coast by the descendants of Aspasia tends to prove the contention of many horsemen that when a mare has inherited and possesses the qualities for producing a high rate of race-winning speed it is not necessary to train and race her to a record, in order to enable her to transmit and perpetuate those qualities.

The latest of Aspasia's descendants to gain track honors is Inferlotta, that won the 2:20 pace at Santa Rosa, Cal., August 17th, in straight heats, time 2:06½, 2:04¾, 2:08. Inferlotta was got by Inferna, a son of Diablo 2:09¼, by Charles Derby 2:20, son of Steinway (3) 2:25¾, by Strathmore. The dam of Inferlotta 2:04¾ is Carlotta, by Charley Wilkes 2:21¼; second dam Aspasia, by Alcantara 2:23; third dam Nep, by Sebastopol, son of Whitehall, by North American; fourth dam by the English thoroughbred imported Monarch; fifth dam by Woodpecker, thoroughbred son of Bertrand, by Sir Archy. The dam of Diablo 2:09¼ was by Alcantara, making Inferlotta 2:04¾ inbred to George Wilkes and also inbred to the great broodmare Alma Mater.

Many New England horsemen remember well both Charley Wilkes 2:21¼, and Aspasia, the sire and dam of Carlotta Wilkes. Aspasia was a powerfully-built mare, with immensely strong loin and quarters. She resembled her sire, Alcantara, very strongly at those points. Her loin and coupling were so strong that she had the appearance of being slightly roached on the back. She was owned by E. D. Wiggin, who at the same time owned the

fast trotting mare Martha Wilkes 2:08, as well as the stallions Charley Wilkes 2:21¼, by Red Wilkes, and Absolute 2:30, by Dictator.

Martha Wilkes was a born trotter. She early gave promise of extreme speed and ability and her speed was fully developed. Aspasia, though much stronger and more robust in appearance than Martha Wilkes, did not show remarkable natural speed and was not given the opportunity for development that Martha Wilkes received. Mr. Wiggin believed in using record mares for brood purposes, but he never gave Aspasia a record and evidently did not make much effort to develop her speed and the best that he claimed for her was a mile in 2:42, last half in 1:16, pacing, when she was five years old.

This undeveloped Aspasia is now the dam of Fantina 2:19½, Fleet King 2:21¼, Arrival 2:24½, and Evolution 2:25¼. Aspasia's daughter, Carlotta Wilkes, now 19 years old, that made a record in standard time, has already produced the trotters Carlok in 2:13½ and Lottie Dillon (3) 2:26¼; also the pacers Inferlotta 2:04¾, Volita 2:15¼, Carlotta 2:24¼ and Mary Dillon, trial 2:08½. As already remarked, the record of Inferlotta 2:04¾ is the fastest ever made in a race in California.

Martha Wilkes 2:08 produced several foals. The first was the stallion Dare, foaled in 1889, standard number 10866, sire Charley Wilkes 2:21¼. Dare was quite promising as a yearling and two-year-old, but never made a standard record, and is not yet credited as a standard performer. Martha Sable is a brown mare, foaled in 1899, got by Sable Wilkes (3) 2:18; dam Martha Wilkes. In 1901 Martha Wilkes produced a foal by Hand Spring 2:18½ and also produced a filly in 1904, by Red Wilkes, begotten when he was 29 years old and Martha Wilkes was 20 years old at the time of conception—a good subject for testing the old-age theory.

The sires of Martha Wilkes 2:08 and Aspasia were full brothers, and their dams were both by Clark Chief 89. It is a fact of interest to breeders and to students of the breeding problem that the trotting crosses in the dam of Martha Wilkes 2:08 rest upon a first-class pacing foundation, and those in the dam of Aspasia, on an excellent thoroughbred foundation. The second dam of Martha Wilkes 2:08 was Molly Robinson, whose sire, Pilot Walker, was by the pacer Captain Walker, by Tecumseh, and from Old Ellen, a daughter of old pacing Pilot. Martha Wilkes' third dam was Kate, by Copperhead, a son of Gibson's Tom Hal, sire of the game campaigner Hal Pointer 2:04½.

The second dam of Aspasia was Nep, by Sebastopol, a son of Whitehall, and he by North American, a son of the thoroughbred Sir Walter. The dam of Whitehall, as given in the Breeder's Trotting Stud Book, and also in Chester's Complete Trotting and Pacing Records, was Cock-of-the-Rock, a thoroughbred son of Duroc. But Mr. Wallace naturally said of her, in later years, "breeding untraced." The third dam of Aspasia was by the English thoroughbred race-horse imported Monarch. Mr. Wallace in his Register, said of her, "by Monarch, a son of Priam," which was true but who would suspect from such information that Monarch was an imported thoroughbred unless, like Mr. Wallace, he had some knowledge of thoroughbred pedigrees? The fourth dam of Aspasia was by Woodpecker, the thoroughbred son of Bertrand, that got the famous four-mile Kentucky race-horse Grey Eagle.

A comparison of what has been accomplished by the descendants of Martha Wilkes 2:08 and Aspasia does not indicate that it is any advantage, or at least that it is necessary, to develop the speed of a mare and give her a fast record in order to transmit speed ability to her descendants.

Such a comparison also strengthens the belief that a mare which traces back to first-class race-winning ancestors, such as are bred in performing and producing lines, and which have been found to be of the "plastic" sort, are more likely to become noted as producers and perpetuators of uniform and extreme light-harness speed, than mares whose maternal ancestors back of the trotting crosses were from the very best of pacing stock, like the descendants of Tom Hal and old pacing Pilot.—American Horse Breeder.

GOING SIDEWAYS AND HOPPING.

Some horses are inclined to go a little sideways, and carry one hind foot in between the front ones. When a horse does this you will find that he will trot the turns faster than he will the stretches. If he carries his right foot in, he will trot the wrong way of the track the best. This shows that the stride is shorter with that foot than it is with the other which is carried to the outside. If it is the left hind foot he carries in, put a square-toed shoe on the left front foot, bevel the shoe from the foot to the ground surface on the outer edge across the toe; put an ordinary shaped shoe full at the toe on the right front foot; on the right hind foot square the toe the same as on the left front foot; on the left hind foot shoe full at the toe, the same as on the right front foot, have this shoe a quarter of an inch longer, or more at the heel than the right hind foot, and throw the outside calk or heel out just a little more than the right foot, also put a piece of leather all around under the shoe to make this foot longer. I have been greatly benefitted by shoeing horses this way when they were inclined to hitch or go sideways.—Ed Geers.

THE SANTA MARIA PROGRAM.

The speed program of the race meeting to be held at Santa Maria, San Luis Obispo county, is as follows. Entries close October 12th:

Monday, October 21.

Mixed, trotting and pacing, for horses without records owned in Santa Barbara and San Luis Obispo counties, purse \$150.

Running, half-mile dash, purse \$100.

Running, three-quarters mile dash, purse \$100.

Tuesday, October 22.

Mixed, trotting and pacing, 2:25 class, purse \$200. Running, three-eighths mile and repeat, purse \$100. Running, five-eighths mile dash, purse \$100.

Wednesday, October 23.

Mixed, trotting and pacing, free-for-all, purse \$200. Mixed, trotting and pacing, 2:40 class, purse \$150. Running, seven-eighths mile dash, purse \$100. Running, half-mile dash, purse \$100.

Thursday, October 24.

Mixed, trotting and pacing, 2:20 class, purse \$200. Special, mixed, trotting and pacing (over-night entry), purse \$150.

Running, one mile dash, purse \$150.

Running, five-eighths mile dash, purse \$100.

Friday, October 25.

Mixed, trotting and pacing, 2:30 class, purse \$150. Special, mixed, trotting and pacing (over-night entry), purse \$150.

Running, half-mile dash, purse \$100.

Running, three-quarters mile dash, purse \$100.

Saturday, October 26.

Mixed, trotting and pacing, free-for-all, purse \$300. Mixed, trotting and pacing, 2:40 class, purse \$150. Running, eleven-sixteenths mile dash, purse \$150. Running, five-eighths mile dash, purse \$100.

All harness races for mile heats, hest three in five. There must be five to enter and three to start. The board reserves the right to hold less than five to fill by withdrawing a proportionate amount of the purse.

Entrance fee is to be 10 per cent of purse and is to accompany nominations. All harness races will be over night entries, and purses will be divided 60 and 40 per cent.

The entries close October 12th. R. L. Jones, president; E. A. Abadie, secretary.

LOS ANGELES MATINEE.

The popularity of the monthly driving matinees given by the Los Angeles Driving Club was attested Saturday, August 31st, by a large and enthusiastic crowd.

The feature was the half-mile made in 1:05 flat by Fresno Boy in the second heat of the 2:15 pace. Fresno Boy beat Silver Dick easily in straight heats. Silver Dick's owner, F. C. Payton, took the defeat much to heart and offered to re-match him with Fresno Boy for \$500 or \$1,000, the race to be run any day. The summaries follow:

Mixed, 3:00 class—

Red (L. E. McClelland).....	1	1
Gray Bess (W. A. Glasscock).....	2	2
Time—2:29, 2:28.		

Trotting, 2:40 class—

Tony (G. W. St. Pierre).....	1	2	1
Belle Mason (J. H. Gaut).....	2	1	2
Arconia (P. L. Lowe).....	3	3	3
Time—2:37, 2:34, 2:36.			

Mixed, 2:30 class—

Billy M. (C. G. Willis).....	1	2	1
Honest John (L. E. McClelland).....	2	1	2
Time—2:24, 2:27, 2:26.			

Pacing, 2:15 class—

Fresno Boy (Pounder).....	1	1
Silver Dick (F. C. Payton).....	2	2
Time—2:21, 2:26.		

Pacing, 2:25 class—

Nut Buster (McClelland).....	1	2	1
Birne Wilkes (Denker).....	2	1	2
Time—2:20, 2:20, 2:26.			

Fred H. Chase & Co., the live stock auctioneers, will sell all the horses belonging to Mr. H. Brace at his Santa Clara home November 2d. This will be the opportunity to get a high class McKinney stallion whose colts are fast and good lookers. Inquire about this sale.

The highly bred and registered stallion Potrero 19963 is offered for sale by his owner, C. A. Walker, of Concord, Cal. Potrero is one of the grandest individuals in California, is a dark bay, stands 16½ hands and weighs 1,300 pounds. Being a sure foot getter, and a sire of fine large colts, and strictly trotting bred, he always secures a good patronage and is popular with those who want to breed for carriage size as well as speed. Mr. Walker has satisfactory reasons for selling, and to make a quick sale has put the price down to such a low figure that the horse will more than pay for himself in one season. Write to Mr. Walker for price and pedigree of this grand horse.

Jackson's Napa Soda is the best hot weather drink.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

State Fair (Sacramento)	September 9-14
Fresno	September 16-21
Hanford	September 23-28
Tulare	September 30-October 5
Bakersfield	October 7-12
Hollister	October 8-12
Santa Maria	October 22-26

North Pacific Circuit.

Centralia, Washington	September 9-14
Salem, Oregon (State Fair)	September 16-21
North Yakima, Wash. (State Fair)	September 23-28
Spokane, Wash. (Inter-State Fair)	Sept. 23-Oct. 5
Lewiston, Idaho	October 7-12
Walla Walla, Wash.	October 14-19
Boise, Idaho	October 21-26

Grand Circuit Dates.

Syracuse	September 9-13
Columbus	September 16-27

It rained every day last week at Hartford, and the entire program, excepting three stakes, was declared off. The stakes were postponed until the first good day and good track.

The Donna won at Syracuse in straight heats and reduced her record to 2:07½.

Sonoma Girl is not the mare she was early in the season.

Be at the ringside when Monterey 2:09¾ is sold at Chase's pavilion, October 14th. Monterey heat all the good trotters, and should be given a chance in the stud when he can prove his worth.

Rose Dale Stock Farm, Santa Rosa, will send fifteen head to Cbase's combination sale October 14th. This will be the highest sale in years.

Here is a prospect: Filly by Stam B. 2:11¼, dam a Chas. Derby mare. Three years old, broken and can show she is a trotter. This is the kind that Chase will sell Monday evening, October 14th.

A Dexter Prince pacer out of a mare by Steinway, four years old and driven around the city by a lady. Can show fast enough to be in the race horse class. Bid on him at Chase's sale October 14th.

Dexter B., a trotter by Cbas. Derby out of an Anteeo mare, is a real gentleman's horse. He will be sold at the big combination sale at Cbase's, October 14th.

If you want a business and pleasure horse combined don't overlook Sebley B., trial 2:13½. He will be put up for the highest bidder at Cbase's, October 14th.

Sir John S. 2:04½ has won \$2,750 so far this year, winning every start and losing but one heat up to the present time. He looks to have the \$5,000 stake at Salem at his mercy. First money in this stake is \$2,500.

W. J. Kenney received a consignment of McMurray carts from the East this week that are a little scratched in places, the paint knocked off a little in spots, but the carts are all right otherwise. He is selling them at reduced rates, however, and now is the time to get one. He now has a full line of sulkies, carts, speed wagons, etc., and can deliver them to buyers direct. Run out to 531 Valencia street and look over his stock.

W. F. Ingwerson, secretary of the Tulare County Agricultural Association, was in San Francisco this week, and then visited Sacramento in the interests of the race program to be given at Tulare. He reports that the fair at Tulare will be a big success in every way.

Bystander's mark is now 2:07¼. He is by Zolock 2:05¼.

Ed Geers has won over \$40,000 in purses and stakes this year with the horses in his stable.

Robert I. Orr of Hollister recently sold to McNab & Smith of this city a four-year-old draft colt that weighed 1,800 pounds, and is one of the finest individuals ever brought to this city.

The Western Horseman says: With only Ruth Dillon and Adoo Dillon, both three-year-olds, in his racing stable, Millard Sanders is winning a first and a second or third about every week.

Bert Baker of San Diego has recently purchased from G. B. Blanchard of San Jose the stallion Villon by McKinney 2:11¼.

The live stock display at the California State Fair this year is a good one.

Great preparations are being made for the Fresno Fair and race meeting. The race program will be found in another part of this issue.

Ruth Dillon (3) 2:15¼, over a half-mile track, by Sidney Dillon, will probably be started to heat the world's record of the season. Millard Sanders declares she is the greatest trotter he ever drove—and he it was who gave Lou Dillon her record of 1:58½.

Nothing but the expense prevents James W. Marshall from arranging to send his great broodmare Trix by Nutwood Wilkes back to be bred to Dan Patch 1:59 next year. She is the dam of Mona Wilkes (5) 2:06½, and Aerolite (3) 2:11½, the latter with an exhibition mile to his credit at Woodland last week in 2:05½, with the last half in 1:00½.

Sterling McKinney won the \$5,000 purse at the Hamline fair and reduced his record to 2:09¼. Another 2:10 trotter for McKinney.

Harry Hersey, the driver of Dan Patch, owns a yearling colt by Admiral Dewey 2:04¼ out of Avena (2) 2:19½, by Palo Alto 2:08¾, that has trotted an eighth in 17 seconds.

Harry Stinson thinks he can, if he has to to win, lower the world's three-year-old trotting stallion record of 2:09¼, held by General Watts, with the great colt, Kentucky Todd.

Nora McKinney 2:12¼, who recently arrived at Lexington from Cuba, N. Y., and who is to be prepared to enter the 2:10 list this fall, has been taking her work nicely, and has worked a mile in 2:14.

Mr. Carlton of Santa Rosa, owner of Lynwood W., sire of Sonoma Girl 2:06¼, and Charley Belden 2:08½, has received several offers from Eastern parties to lease the stallion this year, but has declined them all. Two parties offered \$5,000 for the horse's service for 1908.

Several Eastern papers have published the following: Chas. De Ryder will move his horses from Pleasanton to Denver, where he will winter. He will train the horses owned by Mr. Geo. Easterbrook, the new owner of Perfection.

At the old town of Sonoma, in Sonoma county, there is a thriving driving club which has a good half-mile track. A new grandstand with a capacity of 600 people is to be erected soon, and other improvements made.

S. W. Lockett of Corona, Cal., objects to Mr. Valentine, owner of the great pacing mare Inferlotta 2:04¼, being given in the papers as a resident of Los Angeles. He claims Corona as Mr. Valentine's residence, and says Los Angeles does not have all the fast horses.

On Wednesday next, September 18th, the Eureka Fair and Racing Association will begin its race program. On Wednesday the 2:40 class will race, on Thursday the 2:25 class and the two-year-olds, on Friday the 2:35 class and a buggy horse race, on Saturday the free-for-all. These purses range from \$80 to \$300, and are mixed events for both trotters and pacers.

At Wilson's Peak, a mountain resort near Pasadena, auto trucks were put into use some time ago for hauling freight up the grades. The autos have been put to one side and mules are now doing the work, landing the freight at the resort on time and at much less expense.

IMPORTANT DECISION IN DAMAGE CASE.

A decision of great importance to horsemen has been handed down by the Supreme Court in the case of Henry Delaney and Dolon Brothers against the Southern Pacific Company. The decision was received here a few days ago by Deputy Clerk Dunlap. The Court holds that a contract between a shipper of race horses and a railroad, fixing the value of the animals at a nominal sum, is valid as against subsequent proof of the actual value of the horses.

It seems that horse owners generally place a nominal value on their stock in order to get the benefit of a low freight rate. Delaney shipped a number of valuable race horses from Salinas to Sacramento in 1902. There was a wreck and two of the horses were fatally injured. One was valued at \$1,200 and the other at \$1,500. The lower court gave a judgment for the plaintiff on the basis of the proven value of the two horses.

The Southern Pacific appealed from the judgment of the lower court on the ground that the plaintiff had signed a contract with an agent of the company, in which he fixed the value of the horses at a sum not exceeding \$200 for each horse.

The Supreme Court holds that this agreement is binding, notwithstanding that evidence was introduced to show the animals were actually worth far more than the bill of lading showed. Judgment of the lower court is reversed and the case remanded for a new trial.

A FULL BROTHER TO SONOMA GIRL.

During the Breeders' meeting at Santa Rosa last month, Thos. Charlton & Son of Ukiab, Mendocino county, brought to the track their grand looking stallion Dumont S., trotting record 2:20, by Lynwood W. 2:20, dam Maud Fowler 2:21¾, by Anteeo, therefore an own brother to the great Sonoma Girl, as well as to Sonoma May 2:29¼ (trial this year 2:13¼), and Sonoma Queen 2:25. Dumont S. is an almost exact counterpart of his sire, a horse that Mr. I. B. Mosher, the veteran trainer, says is more like Hambletonian 10 than any horse he ever saw. The record of 2:20 is no measure of the speed of Dumont S., but as he is owned by gentlemen who do not have much time to devote to racing and less to breeding, he has had but the most limited opportunities to show what he can do on the track or in the stud. He took his record at the Breeders' meeting of 1905, when he was five years old and has not been trained since. As his owners, who wish to sell him, state "he is much too good a horse to be kept up in the woods of Mendocino county, where he has access to so few mares of good breeding," Dumont S. was mated with but three or four mares in 1905, and has three yearlings. All the balance of his get were foaled this spring. But one of the yearlings is broken, but he is stepping like a trotter, and as he is entered in the Breeders' Futurity, is attracting considerable attention, as he shows fast.

DUMONT S. 2:20.

Dumont S. would do a good business in the hands of any good horseman, even though his breeding was not considered, as he is a grand individual. But his breeding is such that intelligent horsemen who are looking for sires that will produce great speed will be attracted to him if he is within their reach. His sire, Lynwood W., is a son of Guy Wilkes 2:15¼, and has already sired such trotters as Charley Belden 2:08½ and Sonoma Girl 2:06¼, the latter said by many experts to be the very fastest trotter in the world, as she has trotted three-quarters in a race at a two-minute clip. Horsemen from all over the country are looking to breed to Lynwood W. this year, and his owner has received two offers of \$5,000 each for the horse's services for one year. With Lynwood W. and Sonoma Girl so much in the limelight it is reasonable to predict that any good horseman can do an excellent business next year with Sonoma Girl's full brother, Dumont S.

On his dam's side Dumont S. has a wonderful speed inheritance. Maud Fowler 2:21¾, herself a fast colt trotter, is now the dam of four trotters in the list. She is by Anteeo 2:16½, a great producing son of Electioneer. Maud Fowler's dam is that wonderful broodmare Eveline by Nutwood 2:18¾, the greatest sire of broodmares that ever lived. Eveline is the dam of Ole 2:10½, Roblet 2:12 (dam of Bonalet 2:09¼ at three years), Tietam 2:19, Maud Fowler 2:21¾, etc., and is now reckoned as one of Nutwood's greatest daughters.

Dumont S. 2:20 is by a double 2:10 sire, his dam had a record and has produced a trotter with a record of 2:06¼, while his granddam has produced five standard trotters, and two of her daughters have produced 2:10 performers. Such breeding as this is the sort that breeders appreciate in a stallion, and Dumont S. 2:20 should not be long on the market.

Messrs. Thos. Cbarlot & Son of Ukiab, his owners, will be pleased to answer any inquiries about this horse as regards the price, terms, etc. They are gentlemen and business men and reliable in every way.

SPEED PROGRAM, FRESNO FAIR.

Tuesday, September 17—2:14 pace, \$400; 2:24 trot, \$500; running race.

Wednesday, September 18—2:20 pace for horses owned in Central California Circuit, \$200; 2:17 trot, \$300; running race.

Thursday, September 19—2:20 trot, \$1,000; 2:17 pace, \$400; Nogi will trot to beat 2:07; running race.

Friday, September 20—2:20 pace, \$1,000; free-for-all trot, \$400; running race.

Saturday, September 21—2:15 trot, \$400; 2:30 pace, \$300; running race, women riders.

GOOD RACING AT McMinnville, Oregon.

The track at McMinnville, Oregon, was built by Mr. H. L. Bewley, a citizen of that town, entirely at his own expense. The State of Oregon can well be proud of him. His track is one of the best located and fastest mile tracks in Oregon and has every facility for the accommodation of men and horses.

A meeting was held there last week that was highly satisfactory to everyone. The daily attendance was good and the racing of a high class.

On the first day the 2:30 trot was the first event, with four starters. In the first heat the Zombro horse, McDuff, driven by Lute Lindsay, won, with another Zombro, Henry Gray, driven by Brooks, second, the other two being shut out. The race then resulted in a duel between the two Zombros, and it took five heats to decide it. There were close and sensational finishes in nearly every heat. McDuff won the first and third heats in 2:20 and 2:20 1/4. Henry Gray's three heats were in 2:20 1/4, 2:20 and 2:20.

There were three starters in the second race, the 2:30 pace. After Lizzie C. had won the first heat in 2:16, the bay gelding Ben W. won the next three and the race, his best time being 2:15. The other starter was Lancero, a Brooke Nook horse, that will be heard from later on.

The free-for-all pace opened the second day's program with three starters, Deviletta by Diablo, Knick Knack by Alcone and Lord Lovelace by Prince Lovelace. The first heat went to Deviletta, going easily in 2:10 1/2, with Lord Lovelace right at her collar, Knick Knack finishing easily just inside the flag. In the second heat Deviletta led to the half, but Lord Lovelace beat her home in 2:10, the Diablo mare right up to his throatlatch and Knick Knack still trailing. In the third heat they all went away at a hot clip, but at the first quarter Deviletta took for the fence and Knick Knack got busy and won the heat in 2:12, with Lord Lovelace second and the mare a bad third. After this heat Deviletta was drawn. Knick Knack won the next two heats in 2:12 1/2 and 2:14. John Sawyer has a great pacer in Knick Knack and has trained him to perfection.

The second race was a special trot, with Lord Kitchener by Zombro, driven by Ed Lindsay, Red Rock, by Alcone, driven by Sawyer, and Dellady, driven by Lute Lindsay. The first heat Kitchener was first in 2:33, in the second heat Red Rock won in 2:20, with Dellady close up, and the same horse took the third and fourth heats in 2:22 and 2:24 1/2. Red Rock comes from Brooke Nook Ranch and is now owned by State Dairy Commissioner Bailey. He is a fast, game gelding and was well driven by John Sawyer.

On the third day the 2:25 trot was the first race, with three starters. Starlight, driven by J. B. Stetson, won the first heat from Harry Gray in a fast finish in 2:19. The next three heats went to the Zombro horse Harry Gray, driven by Fred Brooker in 2:22, 2:23 1/2 and 2:25 1/2. The other starter, Blacksmith, took third money.

There were three starters in the 2:20 pace—Lizzie C., driven by Cox, New Moon, driven by Sawyer, and Lancero, driven by Rohse. In the first heat Lizzie C. won all the way in 2:17 1/4. The second heat New Moon outfooted the others in 2:16; the third heat New Moon won again in 2:19, and the fourth heat he ended the race by coming in 2:18. New Moon is by Bonner N. B.

This finished the three days' race meeting. Mr. Bewley paid everybody off and was happy and satisfied. He deserves success, thanks and the good will of every lover of the light harness horse not only in Oregon, but in the whole country. Another man that by his ability, honesty and energy is doing more for the light harness horse business than any man now or ever on the Pacific Coast is Mr. M. D. Wisdom, editor of the Rural Spirit of Portland. Mr. Wisdom is not only a lover of horses, but is an intelligent man and is devoting his time, paper and money to bring harness racing to perfection on the North Pacific Circuit. Every race goer, every owner and every trainer in Oregon is proud of Mr. Wisdom, and in the language of Rip Van Winkle, "May he live long and prosper." Yours truly,

C. A. HARRISON.

TWO GOOD WINNERS.

The photo-engraving on our front page this week is of the mare Fresno Girl by Seymour Wilkes, that is racing on the California Circuit this year and has made up to this writing the fastest mile made by any trotter in a race on the Coast since the circuit opened. Fresno Girl was trained and is driven by Mr. J. W. Zibbell, who won with her at Salinas, got third money at Petaluma and second money at Woodland in the 2:24 class trots. Her two heats in 2:10 1/2 at Woodland are the fastest heats trotted this year on the circuit, and the record for the 2:24 class races in California. Fresno Girl can beat 2:10 and looks like a good mare to race in her class anywhere, as she has a great burst of speed. There is little doubt but she would have won the race at Woodland but for the interference in the third heat of the race.

Another good one that Mr. Zibbell has in his string this year is the two-year-old filly Katalina by the McKinney stallion Tom Smith 2:13 1/4, and out of Kate Lumby by Shadeland Onward. Katalina has started in three races this year and won them all. She now holds a record of 2:22 1/4 and looks good for 2:15 or better in her three-year-old form.

THE HORSE WHISPERER.

The Horse Whisperer might be an unknown quantity in England and Ireland to-day, but there are not a few men who exercise a wonderful control with their voices over horses which, when the dominating influence is absent, are apt to, literally, kick over the traces. In the thoroughbred stables of England and Ireland to-day there are not a few stablemen and jockeys who succeed in checking the vice in horses, which in demonstrative manner show that they cannot tolerate the presence of other grooms or attendants. "Nimrod" claimed for Count Duval a power and influence of the human voice over the brute creation, but that power was backed up by a lecture to the horse with "his clinched fist in his face." But the Horse Whisperer of to-day avoids all gesticulation, and trusts entirely to a combination of sounds or words. There is no bullying done, and the Whisperer can face a mad horse with his hands behind his back, and apparently at the mercy of the beast that has to come under the charm. One means of keeping remount horses quiet in stations during the South African war was that employed by the Yeomen, who sat in a ring of head-to-head horses singing as loudly as possible, and riveting the ears and attention of the otherwise sprawling and hungry animals. One of the first Whisperers to acquire was Con Sullivan, who migrated in his youth from Killmallock, where he could trace his genealogy through a long line of snafflers, and became almost exclusively employed by Lord Doneraile.

So unaccountable and magical was the power Sullivan instantly acquired over the most savage brute that his parish priest, who had excellent grounds for not believing him a saint, denounced him a sorcerer. The whisper of this man made an indelible impression upon any horse, bringing the pupil to a degree of docility unattainable in the ordinary course of discipline.

The racehorse, King Pepin, a famous racer, vicious, and reputed to have killed two grooms at the Curragh, once came under his charge. He was wanted to win a race at Mallow, but when saddling time came it found him in one of his unmanageable moods. He reared, plunged, and flung out fore and aft, until he completely cowed groom and jockey. It was at this crisis that some one recommended that he should be "whispered." As it was the only chance left of taming him in time for the start, his owner gladly availed himself of it, though warned that horses were sometimes thrown into a state of stupor by the process.

Sullivan was soon found and he was delighted at the opportunity of "fwhuisherin" before so much "quality" from all parts. "Show us the wild baste," said he, "and we'll soon tache him manners." When he got within the circle, and a wide one it was, in which King Pepin was playing his antics, he walked up to him, approaching the horse from behind. He mumbled some words as he walked, which, though not quite inaudible, were as unintelligible as a sermon in the unknown tongue, but they had a most magical effect on the horse, for he stood stock still. Sullivan then patted him on the neck, while he whispered a word or two in his ear, whereupon King Pepin went on his knee and incontinently lay down. The Whisperer then stretched himself on him at full length, took out a pouch containing pipe and tobacco, flint and steel, struck a light, and blew a cloud, as he lounged on the stomach of this high-mettled colt, with as much composure as if he were seated on a bench in his favorite tap-room. After two or three puffs, he got up, beckoned the nag to his legs, saddled him, and walked off to the starting post, the horse following and fawning upon him like a dog. He won the race in a canter.

Sullivan's introduction to Lord Doneraile should be told in story, as it was, by Con's son, a whipperin of some repute. His lordship was driving his coach and four from Ballygibblin, when Wildfire, the off-side wheeler, lost a fore shoe and went lame. The horse was "a born devil in regard of shoeing him," and usually had to be slung before the operation was performed. His lordship was for throwing the horse down, and the blacksmith, Shawn Gow, was against it. They were debating the point when Sullivan came upon the scene.

"God bless the work," said he, "an thim that's at it, not overlookin' your honor an' the cattle," takin' off his hat to the lord; "an may a poor boy make bould for to ax what houlty you're in?" "A hard case enough," said the lord himself, tellin' him all about it, just as I'm afther tellin' your honor. "Shure then," said Sullivan, "'tis myself is the boy can release you, if that's all that's troublin' you." "'Tis asier said than done," said the lord. "The devil a taste!—not contradictin' your honor," said my father; "jest lave the boys be afther untacklin' him out, and let myself an' myself have as much as one minit's disoorce all alone to ourselves inside in the forge there, and I'll give you my head in my hand if I don't make him stand as quiet as e'er a baste your honor ever spread your fork upon." "Any port in a storm," is a good maxim, thought Lord D., so he ordered Wildfire to be unharnessed. "Goosh a chopuleen!" (Come, little horse) said Sullivan, an' into the forge he walked, the horse follyin' him as tame as a spannil would a dog tacher. "My eye, if that 'ere chap ain't a rum un!" said coachee. But little time my father gave 'em for talkin', when he bid 'em walk in. "What's that I sees?" cried the lord, openin' his two eyes like a body would be afther seein' a ghost. "Wisha, nothin' at all, your

honor," said the Fwuisherer, "only a little advice I'm afther givin' this poor baste, in regard of the foolishness of sayin' again them that wor for his good, and he's no way fractious now, for siz he to me, afore I spoke three words to him, siz he, "What's your will is my pleasure, and I'll never no more do nothing out of the way;" an' I'll be bound he'll have Shawn Gow lift his leg as peaceable as if he was but skin and bone." When the sarvants, and the smith, and the rest of 'em, seen him houldin' up Wildfire's leg, it bein' the first time he done anything of the likes in Duhallow, faix, they had a mind to be in his wool, thinkin' him no better nor the ould boy himself."

Even when the hot shoe was clapped on to his hoof the horse failed to stir, and Sullivan had to be requisitioned again to make Wildfire straighten his leg.

Another performance of Con's was on an artillery horse, pronounced unmanageable and unserviceable by men and officers. He was put in single and double harness, as leader, and to the wheel, alternately coaxed, beaten, or dragged along, but all to no purpose; not an ounce would he draw, and he was fit for nothing else. At last he was sold by auction for a few shillings, the Whisperer being the purchaser. No sooner was the precious lot knocked down to him than he asked a carman who was passing by to lend him cart and harness. He put him to at once, then led and drove him up and down the steep hill, near the old market gate, to the utter amazement of the artillerymen, who were not long enough quartered there to have heard him. He did not strike him, and no one heard him say a word, but of course, he gave him the whisper. He sold the horse in five minutes after for as many pounds as he gave shillings.

Borrow knew a cob in Ireland which could be driven to a sense of kicking madness by a particular word used by a particular person in a particular tone. The same cob could be smoothed in a moment by another word used by the same individual in a very different kind of tone. The word was "deag-blasda."

Many notable thoroughbreds have had to be "whispered." Tristan, the winner of twenty-three races, including the Ascot gold cup, the Champion Stakes and the Hardwicke Stakes, could not tolerate a gray horse or pony. Once nobody could be found to put his head collar on. Several stable lads failed, and in one instance Tristan fancied the pattern of one lad's trouser cloth. "Ginger," who usually looked after him, was found and asked to go to the horse. He did—with a broom. He "whispered" something—to the effect, "Do you see this?"—and the savage did, for he simply lay down to be "done" for the night.—G. T. B., London Live Stock Journal.

WALTER COX IN A NEW ROLE.

The Poughkeepsie, N. Y., Daily Eagle of Monday gives the following account of the winning of a novel wager by Walter R. Cox.

Grand opera singers are not the only artists who receive handsome salaries for exercising their vocal cords. Walter R. Cox, of Manchester, New Hampshire, a noted horseman, who is a driver of the Christian Hill Stables of that place, had the distinction on Sunday night of receiving two dollars and a half a minute, for four minutes, for singing an inspiring hymn with the members of the Salvation Army. His net receipts for the four minutes amounted to ten dollars.

Mr. Cox and "Al" Thomas, the well-known trainer, of Benson, Nebraska, both of whom start horses in the Grand Circuit races this week, were sitting in front of the Nelson House Sunday evening talking over the races at Buffalo and speculating as to the showing their horses would make this week, when the Salvation Army marched up in front of the court house and began the regular evening services.

There was a big crowd around, as it was Sunday night, and also on account of the heat, many people who were out on the street stopping to listen to the music and hear what was said. As a hymn struck up and the music drifted down to the Nelson House, Cox turned around to Thomas and said, "Hear those people sing. I feel just like going right out there in the street and joining them in the hymn."

"I'll give you ten dollars if you'll go out there in the ring with them and sing," replied Thomas, who probably afterwards regretted the rash statement that he had made.

There was a dozen or more horsemen sitting around in front of the hotel at the time, and of course Thomas at once spread the report that Cox was going to join the Army in the hymn.

As Cox walked up the street the horsemen, including Thomas, fled along behind him, so that they were all there as soon as he was. Cox, without hesitation, walked into the ring and joined in with the singers. He had a rich melodious voice, which could be plainly heard above all the others. Once started he put plenty of energy in the selection, and he remained in the ring until the end of the hymn was reached, when he quietly stepped out and again joined his companions. As he did so he remarked to Thomas, "That was money easily made. If you want to hear me sing again, offer me another ten spot and I'll go back and join in the next hymn."

Thomas thought he had heard Cox sing enough, and they returned to the hotel, where Thomas made good his offer.

Now Cox is thinking of giving up the horses, cultivating his voice and joining a grand opera company.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

AT THE TRAPS.

The third Pacific Coast Handicap started at Spokane on Tuesday under the most pleasant auspices. There was a good attendance of shooters. A report of the tourney and scores made will appear in next week's issue of this paper.

The Pacific Coast Trap Shooters' Association fourth annual blue-rock tournament was held according to schedule at Ingleside on Admission Day, the 9th inst. Every preparation had been made for the accommodation of a large crowd of shooters, the attendance, however, only embraced twenty-five shooters. This limited attendance was owing probably to the many out of town attractions—the Native Sons' gathering at San Jose drew a large number of shooters from this city and nearby points.

The shoot, however, was well conducted. T. L. Lewis was general manager, Edg. Forster squad hustler, Geo. Lewis cashier, F. H. Herbert clerk, Joe Sweeney and Pete Smith referees, J. Martin and A. Mann scorers. The office work was quick and efficient, the winners receiving their divisions of the purse in full and without any loss of time.

Dan Daniels made first high average, breaking 53 out of 60 at 16 yards and 53 out of 60 at 18 yards. Ed Fissell of Davisville started off well on his first 60 targets, but the 20 yard handicap was a bit too strong for his gun in the second section of 60 birds. Billy Janssen made the only other straight of the day. Daniels won the Du Pont trophy, breaking 23 out of 25 at 20 yards. Harry Hoyt was high man in the merchandise shoot. In this latter event every man who entered received a prize—the left over prizes were disposed of in a special consolation race.

The program called for six 20 target races, entrance \$1, 4 moneys. Rose system, 7-5-3-2. Side pool optional, entrance \$1, high guns, 4 moneys. The first three events were shot at 16 yards. The second three races were shot at bandicap distances.

The light entry reduced the purses; there was \$10 added in each race. Event No. 1 paid as follows: Purse \$20.50, 2 19's \$3.75 each, 2 18's \$2.70 each, 2 17's \$1.60 each, 4 16's \$1.10 each. Side pool \$8. Daniels 19, \$3.20; Bradrick, 18, \$2.40; Iverson, F. Feudner, J. Feudner 16, 80 cents each.

Event No. 2: Purse \$21, 20 breaks \$4.70, 19 breaks \$2, 17 breaks \$1.35. Side pool \$8, 19 breaks \$3.20, 18 breaks \$2.40, 17 breaks \$1.20 each.

Event No. 3: Purse \$21, 19 breaks \$3.30 each, 18 breaks \$2.40, 17 breaks \$1.45 each, 16 breaks 95 cents each. Side pool \$8, 19 breaks \$2.80 each, 18 breaks \$1.60, 16 breaks 40 cents each.

Event No. 4: Purse \$19.50, 20 breaks \$3.10, 18 breaks \$2.20, 17 breaks \$1.30, 16 breaks 90 cents each. Side pool \$5, 18 breaks \$2, 15 breaks \$1 each.

Event No. 5: Purse \$19.50, 19 breaks \$3.30, 18 breaks \$2.35, 17 breaks \$1.40, 16 breaks 95 cents each. Side pool \$5, 17 breaks \$1.50 each, 16 breaks 50 cents each.

Event No. 6: Purse \$19.50, 19 breaks \$3.10, 18 breaks \$2.20, 17 breaks \$1.30, 16 breaks 90 cents. Side pool \$5, 19 breaks \$2, 15 breaks \$1.50 each.

The scores shot were the following:

Gill	"	11	15	17—43

Du Pont trophy, distance bandicap, 25 targets—Daniels, 20 yards, 23 breaks; Iverson, 18-22; Thomas, 18-21; Donaboe, 16-21; Janssen, 18-20; Shields, 16-20; Bradrick, 20-18; E. Holling, 20-18; Lewis, 20-17; Hoyt, 18-17.

Merchandise shoot, 20 targets, distance handicap—Hoyt, 18 yards, 19 breaks; Bradrick, 20-18; E. Holling, 20-17; Lewis, 20-11; Forster, 20-15; Daniels, 18-16; Iverson, 18-16; Janssen, 18-14; C. Holling, 16-14; Donahoe, 16-15; Murdock, 16-14; J. Feudner, 16-14; Lynch, 16-15; F. Feudner, 18-16; Gill, 16-15; Burfiend, 16-15; Shields, 16-15; O'Conner, 16-18; Danielsen, 16-16; V. Holling, 16-10; Martin, 16-2.

Carl Holling, a 14-year-old youth, the son of Emil Holling, took part in every event of the tournament. He broke 44 out of 60 at 16 yards and then smashed 51 out of 60 at 14 yards. Young Holling has a good eye and centers the targets in great style. He will make a record in the future at the traps.

Harry A. Hoyt, who for some time past has been away from San Francisco on an extended business trip for the Winchester Company, took part in the trap shoot at Ingleside on the 9th inst. He shot strong enough to win the first prize in the merchandise race at 20 targets. He scored 19 at 20 yards distance.

Though long an absentee from the trap shooting field Mr. J. M. Hughes, winner of high average at Denver, seems to have retained his wonderful knack of smashing composition targets. During 1903, when he traveled for the U. M. C. Co., he connected regularly at a 94 to 96 per cent clip and his lengthy absence from his favorite haunts seems if anything to have accentuated his skill. His work at local shoots during May and June of this year served as practice for the Grand American week at Chicago, where he scored 95 out of 100 at 16 yards; also 95 out of 100 in the Preliminary event from 19 yards. In the Grand American, same distance, he scored 91, and in the amateur championship he was third high with 186 from 18 yards. Since then he has acquired a first average near home, but it is his work during the Denver Handicap which places him in the front ranks of 1907 stars. To excel for four days in regular events and total so well in the handicap contests as to retain the lead in a field of more than 200 picked shooters is a commendable performance for either amateur or professional. Mr. Hughes scored 389 out of 400 at 16 yards rise, and 191 out of 200 at 20 yards rise, a total of 580 out of 600 during the second Western Handicap, under the auspices of the Interstate Association and the Denver Trap Club, August 22th to 23 inclusive.

We are very much pleased to announce that Dick Reed, who has been undergoing a siege of illness, is very much better and improving daily. This good news will be glad tidings to the many sportsmen and other friends of the popular trap shot.

At the recent Goldfield tournament Cban M. Powers shot first high average and Ed Schultz of San Francisco made second high average. Frank Merrill of Stockton, Fred Mills of Long Beach, J. Ed Vaughan of Santa Ana and Hip Justins of San Francisco were also present.

MOUNTAIN QUAIL.

Owing to the opening of the mountain quail season on the 1st inst, quite a number of local sportsmen have changed their plans so as to include trips after these large and delicious birds, which are reported to be very plentiful this year in many sections, and rather more accessible than usual, withal.

As a rule, the killing of mountain quail involves almost as much work as a deer hunt. The birds frequent heights above those used by the valley quail and are only to be come at by a prodigious amount of climbing, usually under very unfavorable circumstances of thick brush, steep ascent and sweaty, hard work.

This year, partly from their plenty and partly from the great amount of their favorite food lower down on the ranges, the birds in some districts have come into the foothills. There they may be had without much more effort than must be devoted to the pursuit of valley quail.

When the hunter finds such a place as this he may go ahead and take his limit with keen pleasure, in realization that the experience is exceptional. Such a spot is to be found in Placerita canon, east of Newball, Southern California, where the birds at evening and early morning come down into the wash and show around the edges of the brush quite freely. Rabbits also are plentiful and easy to bag when on such jaunts.

The persistent running habits of the mountain quail are a drawback to his recognition as a dead game bird, and involve shooting him on the run frequently. At times, by climbing a side hill and getting above a band, then working down upon them, when they offer very pretty shots, but even under such circumstances they are apt to sneak off to one side or in some other manner dodge the issue, trusting to their nimble little legs rather than to their wings. Such is the fashion of the grouse kind, but like other scratching birds, mountain quail, once awing, are strong fliers, fast and hard to bring down.

In flavor they are fully the equal of the valley bird, if not its superior, and their bodies are much larger. No more delicate dish is to be found on the hills than a broiled breast of mountain quail.

Campers now may shoot mountain quail to their pot's capacity with no compunctions. As a rule, the law is observed in spirit by only shooting enough for meat during the closed season, but to say the average camper passes up mountain quail when deer hunting without success is to put on the conscience of man in general an estimate that it hardly can be expected to warrant.

Like their cousins, the mountain quail seem to have made an excellent hatch this year. They are plentiful in places where only sparingly represented last year, if at all. Plenty of them, it is reported, can be found within a day's travel from Los Angeles, in the San Gabriel, and even in the Santa Monica Mountains.

WILD DUCKS ON MEXICAN COAST.

An Oakland sportsman who is residing temporarily on the western Coast of Mexico writes home in an enthusiastic strain regarding the vast number of wild ducks to be found in the Coast resorts of feathered aquatic game.

Were it not for the heat, the distance from towns and other decided inconveniences, that region would undoubtedly be widely and wholly known as a sportsman's paradise.

Two specimens of native ducks—the pijije and the Muscovy—are there in great numbers. In addition, for several months after the beginning of November swarms of migratory ducks are to be found. It is supposed that they come down the Coast from California—a journey of some 2,000 miles.

In these enormous flocks of late fall and winter visitors are widgeon, mallard, butterballs, teal, spoon-bill, sprig and other varieties that are found further north.

So extensive are the feeding grounds, and so secure are the ducks from attacks of hunters that it is believed many migratory birds remain in those sections to breed.

In time these may become, virtually, natives, and will flourish greatly if they learn to avoid the assaults of alligators.

Whatever the future may bring, it is thought that every year witnesses the arrival of more and more American ducks.

Perhaps some that have tried the trip south in former seasons returned and spread the news throughout the north that they had discovered an ideal feeding place where the entire winter may be spent in luxurious comfort without once being disturbed by the discharge of a gun.

The writer of the letter states that upon some of the ponds he has seen ducks so numerous that the hunter could easily secure 500 or 600 shots a day.

Such slaughter would be senseless, however, as game there will not keep longer than twelve hours. No ice is to be had.

A large Muscovy duck weighs about six pounds, and when young, furnishes a most enjoyable dish. This bird lives and nests in the trees, building its nests in a hollow, and leading the young to water as soon as they are able to navigate, for themselves.

About the size of a widgeon the pijije is thought by some to be the Mexican wood duck, but on the west coast, at any rate, they are never seen in the trees.

The countless thousands of these water fowl find plenty to eat in the numerous lakes, ponds and lagoons along the coast, and pursue the even tenor of their life unmolested. A modern breechloader has never been fired over many of these lakes.

Indians who inhabit the coast country seem to regard the ducks as too small game. At any rate, they seldom hunt them, preferring to expend their ammunition upon deer and wild hogs.

Present an Indian, with a number of ducks and he will hang them over a fire until they are half cooked. Then he will probably keep them for several days. As an epicurean delight, however, the ducks are a failure after being smoked and singed in the Indian fashion.

Drink Jackson's Napa Soda.

SAN MATEO KENNEL CLUB AWARDS.

St. Bernards (rough coats).—Limit dogs—1 P. Murray's Denver Boy, 2 Mrs. J. W. Matthews' Prince Lion. Open dogs—1 Prince Lion, 2 Mrs. L. T. Hawkins' King B. Winners dogs—1 Denver Boy, res Prince Lion.

W. H. Carmichael cup for best Bull Terrier dog—E. P. Shortall's Silkwood Ben Ali. Geo. Larsen trophy for best novice Bull Terrier—Mrs. Geo. Flexner's Lady Hazel.

THE CROSSWAYS SHOW.

The San Mateo Kennel Club's fourth annual open-air one-day show, held at Mr. Francis J. Carolan's beautiful polo grounds, Crossways, Burlingame, San Mateo county, on Admission Day, the 9th inst., can be considered a great success in more ways than one. The show was well patronized by a flattering attendance of both exhibitors and spectators. The medium sized and small breeds were benched, and the larger varieties were pegged out on the turf in front of the club-house. The judging began at 10:30 in the morning and was finished by 4:30 P. M. Three rings were arranged on the lawn in front of the club-house. The decisions of the judges were, as a rule, well received. Competition was keen in several breeds, and in a few instances there was an upset, but in the main the ribbons followed the currents of the past three shows held in San Francisco and vicinity. Cocker Spaniels, Bostons, Fox Terriers and Collies had the largest entries. Bull Terriers, Bulldogs and English Setters coming next.

The judges of the various breeds were: Mrs. H. H. Carlton, Berkeley, who made her debut in the ring on Boston Terriers and French Bulldogs.

Mr. John Love Cunningham, San Francisco—Great Danes.

Mr. Fred P. Butler, San Francisco—Pointers and all Setters. Mr. Butler, who had but recently recovered from a serious illness, received many warm congratulations from a host of friends on his reappearance.

Mr. Chas. K. Harley, Ross Valley, Cal.—Fox Terriers, Irish Terriers, Skye Terriers, Manchester Terriers, Scottish Terriers and American Foxhounds. Mr. Harley, as usual, put the ribbons in the right place, but his work was cut out for him in several hot classes of Fox Terriers.

Mr. Norman J. Stewart, San Jose, Cal.—Airedale Terriers and Collies.

Mr. Edmund Attridge, San Francisco—Bull Terriers and Yorkshire Terriers.

Mr. Thos. J. Bught, San Francisco—Cocker, Clumber, Field and Irish Water Spaniels.

Mr. Geo. A. Cranfield, Rountville, Cal.—Greyhounds, Russian Wolfhounds, Chows and English Foxhounds.

Mr. Irving C. Ackerman, San Francisco—St. Bernards, Bulldogs, Dachshunde, Dalmatians, Poodles, Toy Dogs and all other breeds.

Boston Terriers were about the best averaging entry in quality and class yet benched at a Coast show. The competition between several kennels was keen, with the result that Wonderland Kennels' Ch. Dick Dazzler was awarded first honors and four specials, and Ch. Endcliffe Tortora won out over the bitch classes. Both dogs were put down in fine condition, Dazzler making a particularly good ring

demonstration. The Wonderland entries were handled in the ring by Miss Jennie Crocker, her wins being popular and evoking rounds of applause from the spectators. Ascot Kennels put in a number of classy entries and received a generous quota of ribbons. The placing of Brownhurst Madam Vick for reserve winners over Clancy III. was one award that raised a bit of non-concurrent opinion on the part of the Boston fancy. French Bulldogs were several old familiars and all excellent.

English Setters were a pleasing lot, Sue Gladstone, a Santa Barbara entry, made good for her championship. Gordons were about the usual quality benched, a breed that should be taken up again by Coast sportsmen. Flora B. also joined the champion class. Irish Setters brought out two new importations, Phil Law, reserve winners St. Lambert's Phyllis, reserve winners bitches, both of good type and class. Noreen, a locally bred bitch and a very good looker, also made her debut, winning the special for best bitch. The Stockton dog Jerry, now Halvern Jerry, also scored a championship mark.

Mr. Harley's classes were numerous and required painstaking work in Fox Terriers. Hampshire Kennels' Ch. Wandee Knight maintained his copyright on first awards of specials, the regular awards were fought out between Hampshire, Tallac and Humberstone Kennels principally. In wires the Humberstone entries prevailed. The rest of the breeds did not develop any entries of exceptional merit.

Mr. Stewart's classes were strong enough in numbers and quality to put him down as a drawing card. Collies were a showing of class and quality. Principal honors went to Alverde Kennels entries. A new dog, Dictator, a son of Ch. Squire of Tytton, although out of conundrum, is a fine specimen. Airedales were an indication in numbers and class that the breed is picking up on the Coast.

The Bull Terrier showing was not as strong as usual. Silkwood Ben Ali and Stiletto Cold Steel ran a close race. Cold Steel is regarded as a dog nearer the sturdier desired Bull Terrier lines than Ali. Silkwood Surprise, barring a fleck of a dudley nose, could go higher than he did. Silkwood Brassie and Lady Hazel were placed one, two in limit, winners and open.

Mr. Blight had the recognition of Cocker fanciers to a degree. His work was careful and generally satisfactory. Cressella Nancy and Gipsy won their champion medals. The Cocker showing was a classy one throughout.

Irish Water Spaniels produced two good ones, well known benchers, Ch. The Gossoon and Ch. Rowdy Girl. Frisco Kennels' Frisco Bess, reserve winners, is a very promising puppy.

Bulldogs were excellent throughout. The Los Angeles dog Moston Monarch prevailed over Ch. Ivel Damon for first place, and the specials. The dog classes generally were well filled and excellent in quality. Toreador Venus won out in bitches. Nairod's Duchess of Salano, reserve winners, is a young bitch of most promising type and class.

Dachshundes were a good lot. The toy and smaller breeds were notable for many absentees. Among the small dogs were several that had the hall marks of merit, Buster, a Chow puppy, and four Italian Greyhounds. The orange and white English Toy Spaniel Ch. Dreamland Don Quixote being one of the best we have seen benched for some time.

The number of dogs and entries, as shown in the catalogue, were:

	Dogs.	Entries
Cocker Spaniels	45	59
Boston Terriers	30	60
Fox Terriers (Smooth)	30	58
Fox Terriers (Wire)	19	34
Collies	24	37
Bull Terriers	19	44
English Setters	18	22
Bulldogs	15	30
Dachshundes	9	12
Gordon Setters	8	11
Airedale Terriers	8	13
French Bulldogs	7	10
Irish Setters	6	7
Field Spaniels	6	11
Irish Terriers	5	7
Yorkshire Terriers	5	6
Great Danes	5	5
Scotch Terriers	4	4
Pomeranians	4	6
Italian Greyhounds	4	5
Dalmatians	4	5
Irish Water Spaniels	4	4
Japanese Spaniels	3	5
Chihuahuas	3	3
Pointers	3	5
Greyhounds	3	3
St. Bernards	3	4
Welsh Terriers	2	2
Skye Terriers	2	2
Black and Tan	2	2
Toy Terriers	2	2

Russian Wolfhounds	1	1
Clumber Spaniels	1	1
Miscellaneous class	3	3
Total	319	495

THE FARM

A PROFIT IN HENS.

A little flock of poultry as an apurtenance of the country home may be considered from various points of view. It is unquestionably a convenience. A perennial supply of fresh eggs, with broilers in season and a pair of cocks and an old fowl for the pot at command for the rest of the year will make a very important bearing on the problems of marketing.

With a garden the chances are enormous that the hens will be at times a source of torment; on the other hand, they will furnish an excellent compost, of high value for fruit, flowers or vegetables.

If one has a liking for feathered life, there is no little amusement and interest to be found in the poultry yard. There is also discomfort when things go wrong, and if they never go wrong the poultry yard is exempt from the general scheme of things.

Finally, and this last consideration should, perhaps, be put first, is the little flock a good investment? With its other advantages, does it pay a cash profit? With every kind of stock—horses, cows, sheep and feathered fowls, no doubt there are both sorts. There are some that are always "eating off their heads," others that earn a good living and some times over for the owner. Only exact accounts will invariably show which is which. For a profit with hens the first step is keeping exact accounts, in order to be able to compare expenditures and receipts, to know every month how much they cost and what we are getting for the money. Of course eggs and chickens used are credited the same as those sold; otherwise there is no business footing. With a flock of moderate size the eggs sold will pay for feed bought, but it is necessary to know more than that.

At the present high prices of grain, where all is bought, it is not so easy to make the flock earn through the season the feed of a good number of hungry chickens in addition to their own. In my own management that is what I expect, and it requires keeping up a good output of eggs through the late summer and early fall, when eggs are rising in price, but sure to be falling off in number. Eggs every day in the year is the standard to be reached with a small flock. Most years I have made this record, but not invariably.

August and September are important months in poultry keeping. Much depends upon care and watchfulness now in securing a good balance on the side of profit. An early molt and high condition of health and activity before going into winter confinement will bring eggs when eggs bring the most money. The pullets that are to be early layers must be liberally fed and have special attention now, and in their selection there is usually room for choice. It is the condition of the flock about the time of early frosts that chiefly decides the question of profit or loss for the next three months.

Chickens grown in freedom have doubtless an advantage in vigor over those kept in confinement, and the value of pullets as early layers depends largely upon their early development. If the cockerels can be disposed of and the best pullets left to a free range during the day, with good quarters at night, free from vermin, they are practically sure to pay in eggs the whole cost of their rearing while eggs are at winter prices.

It is really at this time that skill and good judgement are most in demand to put the flock on a paying basis. Marketing the surplus of the young stock, weeding out all oldish or unproductive hens and securing real working value in every individual hen and pullet; these are what will make the investment in a score or a hundred hens pay an annual profit of 100 per cent. Every hen can easily be made to earn a dollar in addition to her keep, but to be sure of it there must be no neglect of a single important detail.

Looking out for green food for the

winter months is one consideration now in season. Winter cabbage is one of the best of these foods, but turnips, small potatoes, waste apples, and practically all garden products are available, so that the surplus here can be directly applied to save in cash and save in health in the poultry yard. Clean and dry quarters, a variety of food supplies in such a way as to secure exercise, a constant supply of grit, shell and occasional charcoal, and pure water without stint; and, with healthy young hens and pullets, will produce eggs when eggs are most wanted and give a satisfactory sense of success and a good return for time and money.—Ex.

SMALL FARMERS BREED FASTEST HORSES.

For a good many years past the readers of turf journals have been deluged with all kinds of literature and arguments claiming to establish the fact that "the only way to produce champions is to breed to champions," and that in breeding race horses the rule that "like hegets like," is inflexible, and hence that no one who does not possess the sagacity and means of breeding to the most fashionable and high-priced sires need ever expect to be known as the breeder of sensational race horses. The records show that this contention is more plausible and forcible from a theoretical than a practical stand-point. Since Lady Suffolk achieved the distinction of trotting a mile in harness below 2:30 in 1845, many gentlemen of wealth and prominence have established good breeding plants where they have accumulated at vast expense, the best bred animals in supposedly speed producing lines that money could buy, and yet of those holding world's records on the trotting turf since the advent of Lady Suffolk to the present time a large majority were bred by those in the humble walks of life, and were by sires and out of dams who had not prior to those productions been considered as possessing the fashionable speed producing blood lines of the day.

The lessons to be drawn from the above facts constitute a most interesting chapter to those engaged in the undertaking of solving the breeding problem. That to produce race horses of the highest class, requires blood lines of superior quality is not open to doubt. The blood which will best infuse with a stallion of excellence is just as liable to flow through the vein of a well-bred family mare owned by one who has never given the subject of breeding any attention as it is through the veins of a high priced fashionably-bred, and therefore it is that a man in moderate circumstances having a well-bred mare of good quality should not hesitate about breeding her to a stallion possessing like qualities.—Judge P. M. Babcock in August Recreation.

CURING BACON FOR HOME USE.

Schuyler Marshall, Mesquite, Texas, Prepared for Farmer's Congress.

My own experience goes to show that as much or more depends on the preparation and care taken before hand and vigilance and care after the butchering than upon the method used in preserving. A good, careful man can put up good edible meat by the dray salt process if the hogs are young and fat, while no one on earth can make a gilt edged piece of meat of an old, stagg, poorly bred gob of lard, no matter what recipe he uses.

So first, get your hog; young, thrifty and saucy and feed him till he weighs about 175 pounds. Then foreclose on him for his feed bill, disregard his protest, refuse habeas corpus and hang him in the cool air over night to chill but not freeze. Do not disregard this precaution. Meat must be devoid of animal heat and drained clear of blood to preserve by any method in a clean, sanitary manner, or to make a healthful product. This was known centuries ago. It was incorporated in the sanitary laws of Leviticus. In killing, I do not shoot or stun the animal anyway, but just cut his throat and drain his blood to the last drop. To chill thoroughly I have always stripped the leaf lard

out while hot and split the carcass. After chilling till the meat is about like cheese to cut and parts from the knife like it, you can cut up the meat in the way it suits you best. Rub it very slightly with salt and pile it on a table in the smoke house for the purpose of drawing the last bit of blood from it. The salt appears to do this very thoroughly in about ten hours.

Up to this point there is no difference in handling for sugar curing or dry salting. If you wish to use the sugar cure, have ready a good water tight barrel, clean and sweet, one which has held molasses is best and those which have held coal oil, vinegar and liquors cannot be used. Into this barrel sprinkle enough salt to cover the bottom one-fourth inch thick. On this lay a piece of meat, flesh side up and throw a small handful of salt on it. Then another piece and a little more salt and so on till the barrel is full within four inches of the top. On this place six clean bricks or a stone of 25 pound weight, to prevent meat rising out of the brine.

To make the brine, measure ten gallons of rain water into a tub and place a fresh egg in it. The egg will sink like lead. Then put in salt and gently stir the water to dissolve it till you have made a brine strong enough to float the egg, till it shows about the size of a 25-cent piece above the water. Then take out the egg and put four ounces of saltpeter in a pint of hot water and dissolve it. Into this put three heaping tablespoonfuls of best cayenne pepper and stir it thoroughly. Pour this into two quarts of sorghum molasses and heat till it is thin and thoroughly incorporated by stirring; then pour it into the tub of brine and stir it very carefully till it is a good even color about like weak coffee. Dip the brine up and pour gently over the meat till the whole is covered over about four inches deep. Lay a light cover over the barrel and leave forty days. Then take out of the brine, dust the ends of the shanks with a little cayenne and hang and smoke from nine to fifteen days as you prefer it light or dark. If you aim to keep till the following Christmas, canvas and dip in whitewash, but for summer wrapping paper will answer.

HOW TO JUDGE SWINE.

When judging any class of hogs it is necessary to go about the work in as systematic a manner as possible, in order to do justice to each animal and to make sure that the essential points are not overlooked. The exact procedure may vary with different judges, but each man should have a definite method of work and follow it.

A very satisfactory plan is to approach the hog from the front. From here observe the width of the back, uniformity of width throughout, the width and smoothness of the shoulders, on top, the evenness with which the neck joins the shoulders, the width of the head, its length and the shape and set of the ears. The presence or absence of wrinkles in the face should be noticed, and in breeding classes the eyes should be observed. Next, stepping to the side, the dish of the face is easily seen, and the trimness of the jowl, and the way it carries back to the shoulder. The depth and the width of the shoulder and the depth of chest and body is also to be noted, and the strength of the top line and straightness of underline. For too often there is a droop just back of the shoulders, sometimes so noticeable as to form a crease. Viewed from the side the top line should rise gradually from the neck to the loins, then slope very slightly to the tail, thus giving a slight arched back, with great strength.

The presence of wrinkles is easily seen from the side view, and the length of the rump, the width and depth of the ham and the degree to which it falls forward into the stifle should also be carefully observed. A very common fault is a slackness at this last point, and this, combined with a cut-up flank, gives a very undesirable appearance to the hind quarters, besides reducing the

amount of meat carried in this region. The straightness and length of the pasterns and the way in which the hog stands up on his toes should be carefully observed, as broken-down pasterns are far too common in hogs that have been fitted for the show ring.

Pass to the rear, the width of the hind quarters and the fulling down between the hind legs should be looked to, and the uniformity of which should again be looked to. The hack must appear broad and nearly level, or slightly rounding. Any tendency to a roach back, coming to an edge in the middle, should be discriminated against. By stepping slightly to one side, though still keeping to the rear, the straightness with which the side carries down to the belly can be noted. The straightness of the hind legs should be observed, as the hocks are often turned in so much as to give very weak legs.

The opposite side should next be surveyed, for the same points as before, and before leaving the animal the quality as indicated by the size of the bone and fineness of the coat should be noted. In the show ring judging, it is frequently advisable to touch the hogs to determine the mellowness of flesh and condition.

The same general procedure should be followed with each animal; experience will soon enable one to reject the inferior ones after a brief inspection. The better animals, chosen for the short feet, should be brought as close together as is convenient and their points of merit carefully considered. The best one is then chosen, the one most closely approximating the ideal type the judge has in mind, and nearness to the type chosen. Fancy breed points must always receive due consideration, but should never be allowed to outweigh the more important essentials of form, constitution and quality.—Professor W. J. Kennedy, Iowa Agricultural College.

ARMY HORSES A PROBLEM.

Louisville, Ky., August 17.—Officers of Fort Thomas have recommended the site of the old Government rifle range, on the Licking River, back of Newport, as a desirable location for one of the six remount stations that will shortly be established by the War Department to furnish horses for the United States Army.

It is the intention of the War Department to raise all horses that are to be used in the future by the cavalry, artillery and infantry divisions of the Army as well as mules for the quartermaster and commissary departments.

At the present time great difficulty is encountered to supply enough good horses for the Army. Agents of the War Department scour the country regions and buy up all desirable horses.

During the recent Japanese war talk it was pointed out by Army officers that the United States could not properly mount the different branches of the service, as there are barely enough horses on the market to supply the present standing Army of 60,000. It would be a difficult problem to secure horses for additional troops.

At the present time the army buys 17,000 horses every year. The average cavalry, or artillery horse, lasts five years, while those in the infantry branch, which are used by the officers, last about seven years. Every horse used by the Army has to be replaced every five years.

It is the intention of the War Department to divide the country into geographical sections. Remount stations, where horses will be raised and trained for the service, will be established at the Newport rifle range, which is considered the best point in Kentucky to raise horses; Springfield, Ohio; Fort Riley, Kas.; the Montana ranges; in the California foothills, and Fort Reno, Okla.

The recent establishment of a remount station in Lexington, Ky., by the German Government has opened the eyes of Army officers to the advantages of the remount system. It has long been recognized that American horses are the best in the world for Army purposes, and it is the intention of the German Government

to introduce them for use in the Kaiser's army. German horses will be imported into America and sent to Lexington, where they will be crossed with American horses. It is hoped that better horses will be available for use of the German troops.

In the geographical divisions of the remount station men will tour the adjacent farming regions to buy up the best horses. A horse census will be taken by the Government, which will show how many and what kind of horses can be used by the Army in case of war.

All horses brought to the various remount stations will be trained for service. They will be put through evolutions that will make them useful as soon as they are received at an Army post. At the present time "green" horses are sent to the different posts for development.

The system of remount stations will put an end to this practice, which has been the source of considerable annoyance, as many of the horses have been found worthless after efforts to train them. Every horse that leaves a remount station will be thoroughly tested.

Farmers will be encouraged to raise horses for the Army, as the Government will purchase horses at all times without making the farmers wait, as is the present custom, until the Army needs them.

The Newport rifle range is recommended because Cincinnati is a good horse and mule market, and it is the idea of the Government to have agents watch the market for desirable steeds.

WILD TURKEYS.

The turkey is distinctively an American bird. It was found by the colonists widely distributed throughout the American continent, and was domesticated by the Indians long before Columbus sailed on his westward voyage. The most regal of our remaining game birds is the wild turkey. According to the Indiana "Farmer," there is perhaps no instance where domestication has scored so little in improvement as with the turkey. In fact, in some respects the taming and breeding has hurt instead of helped the species. No prize domestic turkey gobbler is ever so beautifully marked or so resplendent with feathers of black, shaded with rich bronze and illuminated with a lustrous finish of burnished copper, as is the typical wild turkey, while the vigor and vitality of the wild bird is such that to this day we strengthen the most verile of our bronze turkeys by an infusion of the wild blood.

Rhode Island, small as she is, stands for the best in turkey production. The last census shows less than 7 million turkeys in the United States and only about 5,000 produced annually in Rhode Island, yet according to T. F. McGraw, the turkey expert, if all the turkeys of the country were of such good quality as Rhode Island's, their total value would be doubled. According to the Department of Agriculture, the growing of turkeys has greatly improved during the past few years as a result of a determined effort on the part of producers of "standard bred" stock, to demonstrate that it is much more profitable to use pure breeding stock than the smaller and less vigorous stock of times past. The wild turkey is also being used to instill further new vigorous blood into the bronze fields. Inbreeding is the fatal defect among the practice of many turkey growers.

No other kind of live stock will return so large a profit to the successful producer of poultry, according to McGraw, and no kind of poultry is more profitable than turkeys, when properly handled. The fact that turkeys will, from the time they are six weeks old until winter, gain the greater part of their entire living from hugs, insects, grasshoppers and waste grain, assures their existence during this period at little or no cost to the grower, where there is a sufficient range for the birds.

BROODER CHICKS.

Method Employed by a Capable Poultry Woman in Raising Them.

Mrs. C. B. Walker of Brownsberg, Ind., thus explains her method of rais-

ing brooder chicks for the benefit of the readers of American Poultry Journal: The first thing after the chicks are out of the shell and dry we take them to the brooder, being sure the heat is not less than 95 degrees. We never feed until the chick is about forty-eight hours old; then we give dry breadcrumbs mixed with hard boiled egg, and a little bit of black pepper also. I dry the eggshell and pulverize this and mix in feed, which I find the chicks are very fond of. This we feed for two or three days, with plenty of water or milk. The chicks should be fed as much as they can eat clean, allowing no food to be left over, as it is better to feed three or four times a day. We cover the floor of the brooder with paper, as this can easily be removed with all filth and burned, this being done every day. After the chicks are a week old we make corn bread, as for table use, using pepper and eggshell for grit. This may be given three times a day, "or as often as chicks are hungry," with a little fresh meat ground fine. We always keep a small pan of grit in brooder so chicks can get to this at will. Now, to the brooder we attach a box for a run, the box being four feet long and one and a half feet wide. In this we have plenty of alfalfa litter on floor, with small grain, such as Kaffir corn, cracked corn or wheat thrown in, so this will give the little chicks plenty of exercise. When they are a week old, we raise the small door or brooder and let them into this run, which you will find they greatly enjoy. At three weeks we begin to give potatoes, cabbage or any convenient vegetable for green food. We also find they are very fond of onion chopped fine. We never feed sloppy foods or mashes to young chicks, as we think these are the cause of so much bowel trouble. Right here, let me say I find nothing so good for this trouble as ginger tea—a teaspoonful of ginger, with a teacupful of boiling water, after cooling. You will find the chicks are fond of this. Be sure there is no other water they can get to. We give this drink often while trouble lasts, if it appears. It will be all right to give them this drink once a week until five of six weeks old. Keep before them plenty of grit and charcoal, and as far as feeding is concerned the chicks will grow to be healthy and happy if everything connected with the brooder is kept perfectly clean. After the first week we reduce the temperature of brooder to 75 degrees and the fourth week to about 60 degrees.

WAGON TIRE QUESTION.

Whenever the subject of good roads is talked about, something ought to be emphatically said about wide tires. If every wagon carrying a ton or more could have them the roads would be a great deal better. They are especially desirable where roads have been improved, because the narrow tires under heavy loads are likely to make ruts. If wide tire laws could be rigidly enforced it would be a great step forward in highway improvement. In cities, too, there should be wide tire ordinances and there are in many of them. It is not uncommon to haul three or four ton loads over paved streets, and such wagons should have a four-inch tire. In London such wagons are required to have five and one-half-inch tires and in Berlin and Vienna five and seven-eighths. In the foreign cities mentioned the width of the tire is by ordinance made proportionate to the weight of the load. A wagon and its contents in Berlin and Vienna, which weighs over two tons, must have three and seven-eighths-inch tires, while in London, under the same conditions, a five-inch tire is required.

Chicago has been trying to enforce the wide tire ordinance, but the teamsters and truckmen have thus far been able to prevent its enforcement. They are asking that a four-ton load should be required to have only two and three-fourths-inch tires, which even on city streets is too narrow. In Providence a wagon carrying three tons or more has to have a four-inch tire. In Council Bluffs and Buffalo there is the same requirement. In Sioux City a three-ton load or more must be carried in wagons

with three-inch tires. It stands to reason that a narrow tire puts a great deal more stress and strain on an asphalt pavement than one with a wide tire, where the weight is distributed over a larger surface. The wide tire wagons are no harder to draw. The opposition comes from those who do not wish to displace the old wheels and tires for new ones, though wherever these ordinances and statutes are made, sufficient time is given so that the change can be effected without material loss. The engineers all agree that pavements will last a great deal longer if ordinances require heavy loads to be drawn in wide tired wagons.

If this is so true on city pavements, which are now altogether laid on concrete foundations, how much more applicable it is to country roads.

SPECIAL PURPOSE BREEDING.

In his address on sheep husbandry at the Eastern Farmer's Institutes, Professor G. M. Lowell of the Maine experiment station, says that for raising winter lambs the Horned Dorset is preferred. While suckling their lambs, the ewes should be fed about a pound of grain a day. The lambs should be sold when 100 days old. The ewes should be fed but half a pound of grain a day after weaning. On five and a half acres of land without grain, thirty-five ewes at the college farm were carried all summer for six years. For this time, they sheared eight and one-half pounds of wool each. Close grazing improved the pasture, making its surface smooth and velvety and undisfigured by unsightly seed stalks.

Shropshires are best for grass lambs but Southdowns will thrive on poor land. Cheviots are mountain sheep and are also good for poor farms. Sheep are very unintelligent animals and need watching. They should be kept from getting wet during cold storms. If farmers prefer sheep raising to dairying, said Professor Lowell, they want grass lambs, for the profit lies in them.

Sheep should be kept in small paddocks. Twenty to thirty is enough for each five-acre enclosure. In this way they may be closely watched. A wire fence three feet high is high enough for sheep. They do not know how high it is and they will not jump. If wished, the fences can be so arranged as to be easily shifted from section to section of the pasture.

DAIRY INSTRUCTOR APPOINTED.

E. Hagemann of Fresno, who is well known as manager of the Coast Creamery Company, the dairy department of the San Joaquin Ice Company's plant, has just been appointed instructor in dairying in the Agricultural Department of the University of California and manager of the University Farm Creamery at Davisville, Yolo county. Mr. Hagemann and his family will leave Fresno in a few days for Davisville, where he will enter at once upon his duties.

The new State dairy farm at Davisville has already been provided with a good plant, although it will be gradually increased. There is a good creamery and also a cattle testing pavilion, and in addition cottages have been erected to accommodate the regular residents at the farm. Mr. Hagemann, who has been connected with the University in an informal way for some years, has given much of his time lately in looking after the arrangements at the farm.

During October and November there will be given at Davisville the usual six weeks' dairying course, which has been a part of the University's curriculum for some years, although hitherto given at Berkeley. The rest of the year at the farm will be taken up principally with experimental work.

VALUE OF SKIM MILK.

There is hardly a dairy farm now, no matter how small, that is without a hand-cream separator. This machine has saved millions of dollars over the old method of pan skimming, which left a great deal of cream in the skim milk. The record for a cream separator for a number of con-

secutive runs is less than one one-hundredth of 1 per cent of cream left in the skim milk.

The modern cream separator is built on the principle of centrifugal motion, the milk being placed in a bowl which revolves several thousand times a minute, so that the skim milk, being heavier than the cream, flies to the outside, leaving the cream in the center.

The modern dairyman feeds his fresh, warm skim milk to his calves and pigs, which thrive on this kind of food as well as on the whole milk. Letting the young calves run around with the cows and get all the milk is a thing of the past among progressive dairymen. Skim milk, if it is utilized to the best advantage and turned into calves and hogs, is one of the most profitable products of the dairy farm.

Skim milk is also fed to chickens to good advantage.—David Brown in Spokane Spokesman-Review.

ALFALFA PAYING CROP.

Each year witnesses a larger crop of alfalfa hay marketed in Red Bluff than during the former season, and the acreage planted to this popular forage plant is being increased rapidly by the farmers throughout the county, says the Sentinel. The time is not far distant when every farm to be complete must have its alfalfa patch, if only large enough to supply green feed for the barn-yard poultry and old family cow.

The farmers at Riverside Colony, or what is known as the old Rawson Ranch, report harvesting very heavy crops of alfalfa this season, and they are now in the midst of harvesting their third crop, which has been produced without irrigation. The yield is estimated at twelve tons an acre for the three crops, and is being sold at \$10 to \$12 a ton, delivered. This gives an average of about \$60 an acre, besides the pasturage.

A number of alfalfa farmers who have plenty of water and irrigate by the flooding process, giving one flooding just before cutting and another as soon as the hay has been taken off the field, claim that they will cut six crops this season, and estimate their crop from twelve to fifteen tons an acre for the season, which is a good argument in favor of irrigation.

ONE WAY OF SKINNING A HORSE.

Hides are high now, and even a horse hide is worth taking off if done in this manner: Rip the belly and legs and skin the legs down to the body, and the belly back six to twelve inches on each side, using a common skinning or butcher knife.

Also skin out the tail bone and up along the rump or fifteen inches, then loop a chain or a strong rope around this tail rump skin, running it forward past the head of the dead brute.

Fasten the dead horse's body by rope on hind legs, then hitch two good live horses to rope on hide, and if they pull true and steady they will skin the horse "while you wait."

Now, this is no theory, nor is it anything new, but it may be new to some and applies to any large animal whose meat has no value.

In skinning any animal that has been dead long, it is a good plan to wear gloves or mittens that have been wet in a weak solution of carbolic acid, to guard as much as possible against blood poison.

If there is any possibility that a horse has died of glanders, don't skin him at all, but bury at least eight feet deep or cremate.

Overcrowding the chicks, either in the brooder or under the hen, is the source of never-ending trouble and disaster to the average poultry raiser. Just think what a howl would be set up if people were compelled to sleep in as closely packed quarters as the little birds are expected to occupy during the hours of the night. Still people have the right to do as they please and really do not have to occupy such quarters except from choice. With the birds it is different. They are compelled to stay in the foul air and in their own filth. It is no wonder that the death rate is large.

A successful Minneapolis poultry fancier who was asked by Farm, Stock and Home to give remedies for some diseases of fowls, replied that he knew nothing about disease. He had been in the poultry business a number of years, but had never had a sick chicken, and aid be never expected to have. Given clean, roomy, well ventilated quarters, wholesome food, plenty of pure water, out-door range and a dust bath his fowls always grow and thrive, and he knows nothing of disease. Here is a pointer for the poultry man that points a clear, clean, easy road to success.

The latest news in the dairy world is that at the Kansas Agricultural College a process has been invented for evaporating the fluid part of the buttermilk and reducing the solids to a powdery substance which is mixed with other ground feed or grain and fed to the dairy cows. This new feed is said to contain twice as much protein as cotton seed meal.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.
A Safe, Speedy and Positive Cure for
Curb, Splint, Sweeney, Capped Hock,
Strained Tendons, Founder, Wind
Puffs, and all lameness from Spavin,
Ringbone and other bony tumors.
Cures all skin diseases or Parasites,
Thrush, Diphtheria. Removes all
Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism,
Sprains, Sore Throat, etc. it is invaluable.
Every bottle of Caustic Balsam sold is
Warranted to give satisfaction. Price \$1.50
per bottle. Sold by druggists, or sent by ex-
press, charges paid, with full directions for
its use. Send for descriptive circulars,
testimonials, etc. Address
The Lawrence-Williams Co., Cleveland, O.

"SAVE THE HORSE"
Registered U. S. Patent Office

SPAVIN CURE

MAKES A TENDON LIKE A ROD OF STEEL

Makes money winners out of cripples; age of horse or age of lameness makes no difference. It will strengthen, repair and cure any broken-down, weak or injured condition of the tendon; it infuses strength and acts as a permanent bandage to the parts.

It is the only remedy of its kind ever conceived and the only one so positive and successful as to warrant selling under a signed contract to refund money if it fails.

"Save-the-Horse" permanently cures Spavin, Ringbone (except low Ringbone) Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

FOR SALE.
A handsome, absolutely sound, royally
bred young road mare, without record.
Can trot a mile any day in 2:15, and
can brush a two-minute clip; has
worked a mile in 2:12 1/2; afraid of nothing
on the road. Price, \$750. Address
BREEDER AND SPORTSMAN,
616 Golden Gate Ave., San Francisco.

McKINNEY MARE FOR SALE.
Five-year-old, by McKinney 2:11 1/4,
first dam by Baywood, he by Nutwood;
second dam by Geo. M. Patchen Jr. 33;
third dam by Owendale, he by William-
son's Belmont; fourth dam Winter's
mare Nellie by Gray Eagle. With six
weeks' work over the Brace half-mile
track near Santa Clara, on July 31st,
Mr. P. W. Hodges drove this mare a
quarter in 34 seconds, a half in 1:12 and
the full mile in 2:27 1/4 on a heavy track.
This is a high-class mare and she has
improved every week. She surely looks
like a 2:10 trotter. For further particu-
lars apply to or address, THOS. A. CAR-
BOLL, 184 West Santa Clara St., San
Jose, Cal.

A RECORD BREAKING PERFORMANCE MADE BY FRED GILBERT AND THE

PARKER GUN
97.9 per cent

From June 25 to August 9, Mr. Gilbert shot at 2,400 targets and broke 2,351, or 97.9 per cent. Mr. Gilbert also made the following long runs without a miss: Iowa Falls, 177; Boston, Mass., 130; Worthington, Minn., 178; Audubon, Ia., 153 and 96. An unfinished run at Audubon of 96 and the first 85 at Story City without a miss, making a run of 151.
This unquestionably demonstrates the splendid shooting qualities of the Old Reliable PARKER GUN.
Shoot one and win. Send for Catalogue.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.
The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.
PRICE—25c, 50c and \$1.00

Four more in 2:15 have already been credited this season to

"McKINNEY" 2:11¼

Making his wonderful list still more remarkable.

When writing kindly mention this journal. **The Empire City Farms, Cuba, N. Y.**

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpufts and Buneces which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpufts and all buneces it has no equal.

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

WINCHESTER

HIGH POWER BIG GAME RIFLES

When you want to drive a ten-penny nail you don't use a tack hammer. For the same reason, when you set off to hunt grizzly, elk, mountain goat, or other big game generally shot at fairly long range, don't take a medium or low-power rifle just because you happen to have one, but carry a long, strong-shooting rifle—one that hits a smashing knock-down blow. Such rifles are the Winchester Model 1886 .33 caliber and the Model 1895 .30 Army, .35 and .405 calibers, using high-power smokeless powder cartridges with metal-patched, soft-pointed bullets. The bullets used in these cartridges have a good-sized cross section, which gives them great killing power at the distance most big game is shot. The accuracy of these rifles and cartridges has been thoroughly established, and if you sight right the game is yours. Your dealer can show you these models.

Auction Sale of Trotting Bred Horses

Monday Evening, October 14th, 1907.

P. J. Williams consigns YOSEMITE, a great prospect, been a mile in 2:16 $\frac{1}{4}$, MONTEREY 2:09 $\frac{1}{4}$, and a few good ones by him out of that grand race mare, LEAP YEAR 2:26 $\frac{1}{4}$.

Ed Parker consigns a select bunch by REY DIRECT 2:10, and STAM B. 2:11 $\frac{1}{4}$. He has been selling at Eastern sales for years and has the reputation of offering good looks and nice manners.

Sam Norris of Rosedale Stock Farm will sell sixteen head by WASHINGTON McKINNEY and SIDNEY DILLON. When Sam says they are ready for sale, "Nuff Sed."

W. A. Clark Jr. consigns two trotters out of SHE 2:12 $\frac{1}{2}$ and HAZEL WILKES 2:11 $\frac{1}{4}$.

J. C. Mowry sells three racing prospects by KINNEY LOU, McKINNEY and MENDOCINO.

L. J. Rose sells two by JAMES MADISON.

Other consignments include SCHLEY B. (trial 2:13 $\frac{1}{2}$), a number of trotters that have shown fast enough to train and are elegant road horses right now, by such well known sires as BOSWELL JR. 2:19, NUTWOOD WILKES 2:16 $\frac{1}{2}$, LECCO 2:09 $\frac{3}{4}$, CHARLES DERBY 2:20 and others. This is strictly a sale of high class carriage, business and pleasure horses. Write for Catalogues now out.

16. Special, Mixed Trot and Pace (over-night entry) \$150
17. Running, $\frac{1}{4}$ -mile dash \$100
18. Running, $\frac{3}{4}$ -mile dash \$100

SATURDAY, OCTOBER 26.

19. Free-for-all, Mixed Trot and Pace \$300
20. 2:40 Class, Mixed Trot and Pace \$150
21. Running, 1 1-16 mile \$150
22. Running, $\frac{5}{8}$ -mile dash \$100

All harness races for mile heats, best three in five. There must be five to enter and three to start. The Board reserves the right to hold less than five to fill by withdrawing a proportionate amount of the purse.

Entrance fee is to be 10 per cent of purse and is to accompany nominations. All harness races will be divided 60, 30 and 10. All running races will be over night entries and purses will be divided 60 and 40.

We are members of the National Association and their rules shall govern the meet. The entries close October 12th, 1907. Address all communications to the secretary.

E. L. JONES,
President.

E. A. ABADIE,
Santa Maria, Cal., Secretary.

cisco, California.Communications must be accompanied by the writer's
name and address, not necessarily for publication, but
as a private guarantee of good faith.

A NEW COLT STAKE has been inaugurated by the recently organized California Breeders' Association, whose principal place of business is in Los Angeles, although its membership extends to all parts of the Coast. The new stake is very similar to the Futurity of the Pacific Coast Trotting Horse Breeders' Association, which has proved such a great success and is now entering upon its seventh renewal. The California Breeders' Association has named its first stake California Breeders' Futurity No. 1, and set Thursday, November 1, 1907, as the date for closing the nominations of mares bred this year. It will cost but \$2 to make a nomination, and owners may nominate as many mares as they wish. A second payment of \$5 each will be due and payable April 1, 1908, another of \$5 November 1, 1908, one of \$10 on yearlings April 1, 1909, one of \$10 on two-year-olds April 1, 1910, and another of \$10 on three-year-olds April 1, 1911. In addition to these payments there will be starting payments on two and three-year-olds as follows: For two-year-old trotters \$35, for two-year-old pacers \$25, for three-year-old trotters \$50 and for three-year-old pacers \$35. The money divisions of the stake will be as follows: \$2,500 for three-year-old trotters, \$1,250 for two-year-old trotters, \$1,500 for three-year-old pacers, \$750 for two-year-old pacers, \$200 will be given to each nominator on whose entry is named the dam of the winner of any of these four divisions; \$100 will go to the owner of stallion that sires winner of three-year-old trot or three-year-old pace. The guaranteed value of the stake is \$7,000. That colt stakes are the very life of the harness horse breeding industry is an established fact, and it is the duty of every person interested in the business to patronize these stakes and aid them in every way. It is now possible for a good three-year-old to have an earning capacity of close to \$5,000 without being raced outside California. The colt Nogi earned very near that sum this year, and did not have to trot faster than 2:17½. With an additional stake to be raced at Los Angeles every year, a three-year-old that shows class enough to be picked as a likely winner of that race, as well as the Breeders' Futurity, Occident and Stanford Stakes, could be sold for a very large price if his owner did not wish to take the chances of racing him. The new California Breeders' Association deserves the patronage of every breeder on the Coast, and we hope the entry list received on November 1st will break all records for stake entries. Remember, this stake is for the produce of mares covered in 1907, foals of 1908 to trot and pace at two and three-year-olds. All communications and entries should be sent to John W. Snowden, secretary, 526 San Pedro street, Los Angeles. Mr. C. A. Canfield of Los Angeles is president of the association, and the board of directors is made up of reliable gentlemen, well known to the people of this Coast.

That the foals of this year may have an opportunity to race at Los Angeles as two-year-olds in 1909, President Canfield has inaugurated the Canfield Stake for foals of 1907. The entrance to this stake is \$50, divided into four payments as follows: \$5 on November 1, 1907, \$10 April 1, 1908, \$10 April 1, 1909, and a starting payment of \$25, payable thirty days before the race. To these stakes President Canfield has added \$400, and the total amount will be divided among the two-year-olds, 60 per cent for

trotters and 40 per cent for pacers. This should prove a very popular and a very valuable stake. If it receives proper support from horse breeders and owners of this year's foals it should be the richest stake for two-year-olds ever offered on the Coast. We hope our readers who own foals of 1907 and who bred mares this year will enter liberally in both these stakes, and induce their friends to do likewise.

WE HOPE the report printed in the Eastern papers that Chas. De Ryder intends leaving California for Denver is not true. Mr. De Ryder has made many friends in California who would like to see him make this State his home, training here each winter and spring the horses he races during the summer on the Grand Circuit. Such men as De Ryder are worth much to any horse breeding section, as they do a great deal every year to add to horse values. Mr. De Ryder is a gentleman of good business ability and is one of the foremost American trainers. His removal from the State would be a distinct loss to our breeders and owners, and we sincerely hope the report that he intends leaving California is not true.

CLEAN, HONEST RACING has been the rule throughout the California Circuit this year, and the sport of harness racing was never in better repute or more popular than it is now. The time is now ripe for the formation of a circuit of county fairs and race meetings for 1908 that will last at least twelve weeks and take in as many counties. San Diego, San Bernardino, Los Angeles, Salinas, Pleasanton, Santa Rosa, Petaluma, Woodland, Marysville, Sacramento, Stockton and Fresno could organize a mile-track circuit of fairs that would draw horses from the whole Coast. Such a circuit would be of great value to the horse and other live stock interests of the State, and of incalculable benefit to the harness horse interests if properly managed.

P. J. WILLIAMS TO SELL OUT.

The veteran horseman, Peter J. Williams of San Lorenzo, Cal., has decided to dispose of all his trotting horses, stallions, broodmares, etc., and has consigned them to the big combination sale to be held at F. H. Chase & Co's. pavilion, 478 Market street, this city, on the 14th of next month.

Mr. Williams has long been a breeder and trainer of trotters, but in recent years has devoted the greater part of his time to fruit and truck farming, near the town of San Lorenzo, in Alameda county. He has bred and owned some high class horses, but having decided to sell, will place the few he still owns on the market to the highest bidder.

His great trotting stallion Monterey 2:09¼ will go with the rest. Here is a horse that never had the opportunity in the stud which he is entitled to. There is no use enumerating his races—they are turf history. Monterey was beyond all question one of the fastest trotting stallions ever bred, and two minute speed was easy for him. He is a grand individual, has a perfect disposition, is sound and all right every way, and one of the best foal getters on the Coast. There never was a Monterey that could not trot a good, fast road gait and a large proportion have race speed. In the hands of any rustling stallioner Monterey can more than pay for himself next spring in any locality where horses are bred. He has served between thirty and forty mares each year for the past three years, and the produce will soon be ready to show their speed, which they have in abundance.

Monterey's magnificent son, Yosemite, is also to be sold. He is (and we say it in all seriousness) one of the highest class green trotters in California. Three heats below 2:10 are within his reach, with a reasonable amount of training. If some trainers had him for the winter he would be talked of as an M. and M. candidate, and he has the speed and the class to be ranked with those that will be pointed for that great event next year. Yosemite is a chestnut and a superb individual in every way. He is out of Leap Year 2:26¾, an own sister to Iago 2:11. Yosemite is worth buying and spending money on, as he has every chance of being one of the sensational trotters of 1908 in good hands.

Mr. Williams also consigns to the sale a seven-year-old black mare, full sister to Yosemite, and a three-year-old chestnut mare, also a full sister. The seven-year-old mare is a fast, natural trotter, and the three-year-old is also a good prospect. Both are well bred enough to mate with the best stallions in the country. A four-year-old filly by the Zombro stallion Barney Bernatto is another to be consigned, and these comprise about all the horses he has except a mare or two that Mr. Williams uses in his orchard and garden. He will sell two thoroughbreds, a filly and gelding, two and three years old respectively, that are by Insulator, the Brutus horse, that ran a mile in 1:39¼, and out of the very fast mare Gussie by Hyder Ali. Gussie won the Palace Hotel Handicap at Emeryville a few years ago. All the

above horses are as well bred and as good individuals as one can find on any stock farm, and are only sold because, as Mr. Williams states, he needs the money.

Mr. Williams is known to nearly every horse owner and breeder on this Coast as one of the squarest men in the business. Write to him about any of these horses, or consult him on the night of the sale and he will give full and truthful particulars about them.

PROMOTION AND PUBLICITY DESIRABLE.

The hardworking, conscientious secretaries of harness horse race meetings are deserving of praise for the great amount of good work that they do, and this praise should come to them in liberal quantities as a part of the emoluments of the honorable office. And yet, much as is their due, the honorable secretaries have splendid opportunities to deserve more. There is so much they can do to promote the interest in the speed harness horse—so much that will bring them honorable reward of unstinted praise, we venture to suggest for their benefit a few matters of importance they appear to have overlooked.

Some of our very able secretaries do not quite understand the value of promotion and publicity. They and their immediate friends and acquaintances are familiar with all the essential facts and features of their track and meeting, and they appear to take it for granted that everyone else who should know is equally informed, or at least they might be if they took the trouble to seek the knowledge locked up in the secretary's desk and head.

Now, there is a very large number of horsemen—good sportsmen, who are interested in the affairs of which secretaries have first knowledge. These horsemen cannot get this knowledge unless the secretaries show a disposition to distribute it freely. It is not alone through the advertising column of the reputable horse paper that the tracks' or associations' interest may be promoted. There is much free advertising to be had for those who know how to get it. News items, often of trivial matters, the horse journals will gladly publish if they receive them. By sending these in, the secretary may keep his association and track before the public pretty much the year round.

In the large matters of news which is of general interest, many secretaries are most neglectful. They appear to think that at the end of the meeting the association cannot profit by a publication of news matter, forgetting apparently that the association purposes to give another meeting. That is probably the reason why secretaries of small tracks which need all the publicity they can get, fail to send for publication the summaries of their race meetings. They lose an opportunity through their neglect to secure a little free advertising, and interested horsemen are deprived of the pleasure of reading legitimate news they would like to read.

At most of the large association tracks the journals published in the interest of the harness horse have a representative. But they cannot cover every track in the country, however much they would like to do so. Most of them would gladly publish an account of such meetings if the secretaries would take the trouble to send them.

Secretaries of associations and speed harness horse journals have a mutual interest in promoting the harness horse sport and the more publicity it is given the more will harness horse racing grow in favor.

While upon this subject it may be well to remind some of the secretaries that they are often given to over looking the importance of established racing rules. It often appears sufficient for the particular occasion to depart from conventional methods and adopt some convenient rules, whereas such violation of established methods leads to greater infringement of important rules. Secretaries should familiarize themselves with all racing rules and see to it that they are lived up to on their own tracks. The general interest of the speed harness horse is promoted by following those methods which time and experienced men have proved to be the best. Secretaries should keep well within the established rules in all their various relations with the patrons of the harness horse turf.—Chicago Horseman.

Twelve years ago ordinary horses were a drug. No one wanted them. It was cheaper to let them die than to call a veterinarian. Thousands were rounded up and shot or driven to the cannery to be butchered. In the year indicated, 1895, the writer bought on the Chicago market a pair of good black mares, weighing close to 1,100 pounds each, for \$80. The same sort of a team to-day would bring \$350 or more. Horses of the quality which brought \$75 to \$120 in 1895 can not be purchased for \$125 to \$175 and therein we take it is the nub of the whole matter.

In 1895 thousands of good drafters went out of the country at around \$100 each. To-day horses of similar weight and quality would bring from \$250 to \$350 each. Going a trifle farther, the writer well remembers a draft mare sold for export at \$175—a phenomenal figure in those days. Recently he saw one not so good change hands for \$550. All of this serves to emphasize the fact that if Uncle Sam wants to get as good horses as he did twelve years ago he must do as other people do—pick from the whole general supply and go down into his pocket for the money other people are willing to pay.—Chicago Breeders Gazette.

CALIFORNIA STATE FAIR RACES.

Good Crowds Attend Every Day and Fair a Success Financially and Otherwise.

Although the harness racing at Sacramento last week did not class up with that at Woodland the week previous, it was good and was greatly enjoyed by large crowds every day. The track is a little slow when compared to those at Santa Rosa and Woodland, but fair time was made in every event. The weather was warm, but not intensely so. The big grandstand, which seats about 4,000 persons, was filled every day, and on Thursday and Saturday it was crowded. Our report of the races in last Saturday's issue ended with the Tuesday program. On Wednesday two harness races were on the card, the two-year-old trot and the 2:08 class pace. But two two-year-olds came out for the first event, and they had to start for the entrance money paid in, which was not a large sum. They were the same two fillies that trotted such a close race at Woodland the week before—Katalina and Idolway. On this occasion they did not make head-and-head finishes, as Katalina won each of the two heats by several lengths, but they were pretty evenly matched in speed and but for a break made by Idolway in each heat the finishes would have been closer and the time faster. Katalina is an unheaten filly this year, and her record is 2:22 1/4, made in the final heat of the Breeders' Futurity, which she won at Santa Rosa.

There were five starters in the 2:08 pace, and again it was a duel between Sir John S. and Miss Georgie. The McKinney mare has not been able to heat Sir John S. this year, but she has forced him to lower his record and trot the fastest heat of everyone of his races. On this occasion Sir John S. won in straight heats in 2:08 1/4, 2:07 3/4 and 2:10, fast time for the track. Miss Georgie was second in every heat.

Fourth Day.

Thursday was the fourth day of the State Fair races, and as it was Governor's Day at the fair, a crowd large enough to fill the grandstand was out.

The 2:16 pace was the first event on the card during the afternoon, and it had but four starters—Copa de Oro, Diabness, Morrie N. and Jim Corhitt. It was conceded that Copa de Oro would win in straight heats, which he did, and very easily, the fastest mile being 2:10, a mere jog for him. William Duncan's horse of obscure paternal and unknown maternal ancestry was second in every heat and confirmed the opinion formed at Woodland, that for his schooling he is one of the best green pacers that has been seen on the circuit. He has had but a very limited amount of training, but acts like a horse that will heat 2:10 next season easily. He is by a son of Brigadier and his dam is untraced.

The 2:17 trot had but four entries. Had it been a hetting race Carlokin would doubtless sold as favorite, but H. K. Trefry's McKinney stallion Kenneth C., one of the most popular trotters on the circuit, took the race in straight heats, and gave McKinney another member of his wonderful 2:15 list by trotting the second heat in 2:13 1/4 and the third in 2:14 1/4. Kenneth C. went out in the lead in every heat and maintained it throughout, winning the first heat by five lengths, the second by two lengths and the third by a length and a half. Carlokin being the contender in the first heat and Marvin Wilkes in the other two.

Fifth and Last Day.

The harness racing program ended on Friday with three races on the card, the Stanford Stake for three-year-old trotters, the 2:23 class trot and a race for roadsters owned by members of the Sacramento Driving Club. The 2:23 trot, for which the purse was \$2,000, opened the program. It had five starters, Berta Mac by McKinney, Yolanda by McKinney, Dredge by James Madison, Fresno Girl by Seymour Wilkes and Goldennut by Neerunt. When the word was given Fresno Girl took the lead and at the quarter led Berta Mac, who was second, by a length, which lead she increased slightly at the half. Berta Mac made a break on the far turn, but recovered quickly and entered the stretch two or three lengths behind Fresno Girl. Helman began driving his mare and at the distance flag caught and passed Fresno Girl, winning by a length or more in 2:13 1/4, a new record for Berta Mac. Yolanda was third.

The five horses went off in a bunch the second heat and at the quarter Goldennut looked to have his nose in front, but Berta Mac soon led, and at the half was a half length in front of Dredge, with Goldennut third. Berta Mac led this way to the wire, Dredge and Goldennut having a contest through the stretch for second place, Durfee's horse winning it by a length. The time was slower, 2:14 1/4.

In the third heat Berta Mac made a break and was in fourth position when she entered the stretch. She came very fast from that point, however, and passed the others, finally having a duel with Dredge for the heat. She led him at the wire by a short head and was awarded the heat and the race by the judges, but the horsemen are arguing yet as to which came in first, many claiming that Dredge had his nose in front at the wire.

The Stanford Stake had four starters and was a better contest than the Occident Stake on Monday, the Woodland Stock Farm colt Prince Lot being able to make Nogi trot a faster race. In each heat Prince Lot made a splendid finish and showed great speed, the Fresno colt had more speed and beat him

rather easily each time. The fastest heat, 2:19 1/2, was nowhere near Nogi's limit.

This race left Nogi winner of the California triple crown—the Breeders' Futurity, Occident and Stanford Stakes, all for three-year-olds. But one other colt, North Star by Nutwood Wilkes, ever gained this distinction. As our readers know, Nogi was bred and is still owned by Mr. Geo. L. Warlow of Fresno, and was trained and driven in all his races by Schuyler Walton.

The harness racing program ended with the race for roadsters, which was made heats, best two in three. Mr. J. Christie won it in straight heats with his horse Brierwood, John Silva's Economizer and S. Wheeler's Instructor making a tie for second place.

The racing all through the week was good, and while there was no hetting, the interest was maintained throughout and large crowds turned out to see the sport every day.

STATE FAIR SUMMARIES, SACRAMENTO.

MONDAY, SEPTEMBER 9.

Trotting, Occident Stake, for three-year-olds, value \$2,335, of which \$1,573 to first, \$586.50 to second and \$195.50 to third—

Table with 2 columns: Name and Result. Includes Nogi, Lady H., Reina del Norte, Mogolore.

Table with 2 columns: Name and Result. Includes Inferlotta, Copa de Oro, Pilot, Explosion.

TUESDAY, SEPTEMBER 10.

Table with 2 columns: Name and Result. Includes North Star, Oveta, Vallejo Girl, Marvin Wilkes.

Table with 2 columns: Name and Result. Includes Jonesa Basler, Mona Wilkes, Queen Pomona, Mandolin, Memonia, Friday.

WEDNESDAY, SEPTEMBER 11.

Table with 2 columns: Name and Result. Includes Katalina, Idolway.

Table with 2 columns: Name and Result. Includes Sir John S., Miss Georgie, Kelly Briggs, Miss Idaho.

THURSDAY, SEPTEMBER 12.

Table with 2 columns: Name and Result. Includes Copa de Oro, Morrie N., Diabness, Jim Corlett.

Table with 2 columns: Name and Result. Includes Kenneth C., Marvin Wilkes, Carlokin, Burnut.

FRIDAY, SEPTEMBER 13.

Table with 2 columns: Name and Result. Includes Berta Mac, Dredge, Fresno Girl, Goldennut, Yolanda.

Table with 2 columns: Name and Result. Includes Nogi, Prince Lot, Reina del Norte, Lady H.

Table with 2 columns: Name and Result. Includes Brierwood, Economizer, Instructor, Kruger.

Royal Rose, one of the finest stallions in Kings county, died last week at the stable of his owner, E. Erlanger, of Lemoore. He was the well known premier stallion of the Royal Rose breeding farm, named after him by E. Erlanger. He was sired by Bay Rose, dam Miss Rowland by A. W. Richmond, and weighed 1,375 pounds. He was seventeen years old at the time of his death.

AMATEURS GIVE FINE RACING.

On Saturday last the Park Amateur Driving Club gave the third meeting of its cup series of races at the three-quarter-mile oval track in Golden Gate Park, and a large crowd turned out to enjoy the sport. The new club is doing much for the sport in San Francisco and vicinity and with each meeting the interest increases, new faces being seen in the crowd at every succeeding matinee. The club's officials are becoming expert in arranging and carrying out all the details of the racing, and the public greatly appreciates this.

There was quite a long program, seven races being on the card, all being heats of three-fourths of a mile except in class A, which was mile heats. Of the seven events four were won in straight heats. The greatest contest of the day was the race between class C trotters, which required four heats to decide. This race had three starters, Mr. S. Christenson's Reina Directum, Mr. F. J. Kilpatrick's Clipper W. and Mr. M. W. Herzog's Lady Nell. The race was between the first two. After they had won a heat apiece the judges called the third a dead heat, and in the final the Directum mare won by a length, Clipper W. making her trot to her limit every foot of the way to keep in the lead.

The starting was done by Mr. T. J. Crowley, and Messrs. E. P. Heald, John A. McKerron and E. Courtney Ford occupied the judges' stand. The summaries:

Table with 2 columns: Name and Result. Includes Ringrose, Satinwood, Jim Chase, Colonel C.

Table with 2 columns: Name and Result. Includes Moffat D., Lady Washington, Lady McKinney.

Table with 2 columns: Name and Result. Includes Vic Schiller, Major Cook.

Table with 2 columns: Name and Result. Includes Allan Pollak, Charles II., Laddie G.

Table with 2 columns: Name and Result. Includes Director B., Islamite.

Table with 2 columns: Name and Result. Includes Reina Directum, Clipper W., Lady Nell.

Table with 2 columns: Name and Result. Includes Emma Smalley, McKinney Belle.

GOOD RACING AT SONOMA.

The races at Sonoma on Admission Day were decidedly attractive and drew a large number of people to the neat little half-mile track of the Sonoma Driving Club. Some good sport was witnessed and the meet declared to have been the most successful ever held in that vicinity, states a Santa Rosa paper. Kitty D. won the free-for-all event, the best time being 2:13 1/2. She is owned by C. Hoffman of San Francisco. Joe Ryan's Myrtle was second and Schwartz's Clara L. was third.

Walter C. Nolan drove his splendid animal, Lady Seymour, to victory in the 2:30 trot, making the distance in 2:25. Fred R. Matthews' Lynall was second and Mike E. third.

Joe Ryan piloted C. H. Potter's Briar Bud in the 2:40 class event, with the best time 2:27. The animal is fourteen years old. Frank Weaver's Ray McKinney, driven by Walter C. Nolan, was second and J. P. McDonnell's Bahe took third place.

There were two running races, in the first of which Fred R. Matthews' Bernell defeated J. Anderson's Coney Island. In the second race Coney Island won over four starters.

Says the Horse Review: Boh Smith has had tough luck with his mare Bellemont 2:13 1/2, the fast daughter of Zomhro 2:11, whom he brought over from California last spring. While working her at Libertyville in June she made a false step and hit her tendon and knee and had to have a let-up, then after starting in again with slow miles, he got her to 2:14, then started her at Poughkeepsie, where she was separately timed in 2:09. The next week, while working her at Readville, she stepped on a stone and bruised one of her front feet very heavily, which caused her to be laid up again. However, she is now taking her work nicely and barring any further misfortunes she will be raced at Columbus and Lexington, then at Phoenix, Ariz., on her way back to the Pacific Coast.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

CALIFORNIA CIRCUIT MONEY WINNERS.

Up to the close of the State Fair at Sacramento last Saturday, seven meetings have been given on the California Circuit, starting at San Diego in June and continuing at Salinas, Pleasanton, Santa Rosa, Petaluma, Woodland and Sacramento. From the last named point some of the horses were shipped to Salem, Oregon, where racing has been held this week, and others to Fresno, whose fair is now being held. The racing has been the best and the fastest held in California, and never in the history of the sport has it been cleaner and more free from scandals of any kind. But two or three fines were made during the entire circuit, and not one race came under suspicion. At all the meetings where harness racing was made the principal feature, the attendance was good, and only at Petaluma, where three running events were on the card each day, and book-making prevailed, was the attendance small.

A tabulation of the horses that have won over \$500 during the seven weeks of harness racing will prove interesting to our readers. Seventeen trotters and fifteen pacers are entitled to places in this tabulation.

Of the trotters, the three-year-old colt Nogi, owned by Mr. Geo. L. Warlow, of Fresno, is the largest money winner. He won all four of his starts, which were in the three California stakes for three-year-old trotters, the Pacific Breeder's Futurity, the Occident and the Stanford stakes, and a purse race at Petaluma. These four races placed \$4,529 to his owner's credit, and Nogi could have made the sum total much larger had Mr. Warlow not instructed his driver, Schuyler Walton to refrain from distancing his competitors in all the races. Nogi, as our readers doubtless all know is by Athablo 2:24 1/4, son of Diablo 2:09 1/4, and is out of Cora Wickersham dam of Athasham 2:09 1/4. Athablo is out of the dam of Athasham's sire, so Nogi and Athasham are more than half brothers.

The next trotter in the list of money winners is Carlokin 2:13 1/4, Mr. C. L. Jones' game and consistent McKinney trotting stallion that is out of Carlotta Wilkes, dam of the great pacing mare Inferlotta 2:04 1/4. He started six times in California this year and won five races, being third in the other. At Petaluma Carlokin cut his quarter very severely and was thus badly handicapped in his Sacramento race, the only one he lost. His winnings in California this year amount to more than three thousand dollars.

Dredge, the chestnut gelding by James Madison, in Will Durfee's string, ranks third in the list of money winning trotters, with \$2,950 to his credit, while Era, the handsome Zombro mare owned by William Morgan of Pasadena, and driven in all her races this year by Frank Williams, is fourth with winnings amounting to \$2,825. None of the remaining thirteen in this list won so much as \$2,000, although Berta Mac, the very handsome mare, owned by Washington Parsons of Salinas, and driven by Henry Helman, comes very close to that sum with \$1,950 to her credit.

Among the pacers, the great mare Inferlotta 2:04 1/4 by Diablo's son Inferna 2:15 1/2, heads the list with a total of \$4,440 won at six meetings. Mr. W. E. Valentine of Corona, who owns her, and C. T. Hewitt, her trainer made many friends on the circuit in this, their first racing venture in California; and no fairer gentlemen ever managed a race horse.

The unbeaten Sir John S. 2:04 1/4 by Diablo, stands second in the list of money winners, his winnings reaching \$3,250, which will be considerably increased on the North Pacific Circuit. Mr. W. L. Vance of Marysville, owner, trainer and driver of this great stallion, lost but one heat with him during the entire circuit and while he is not strictly a professional, a Geers could not have made a better record.

The Nutwood Wilkes five-year-old stallion Copa de Oro, bred and owned by Mrs. Bonfilio of Los Angeles, and trained and driven by W. G. Durfee, is third in the list of pacing money winners, with a total of \$2,455, won up to and including the State Fair meeting. Copa de Oro was injured on the train during the trip from Pleasanton to Santa Rosa, and while the injury is not a permanent one, it has undoubtedly handicapped his some. He should pace below 2:05 next season and is a very classy horse. Following are the lists of trotters and pacers that have won over \$500 during the season up to and including the California State Fair races:

Trotters.

Nogi (3) 2:17 1/2 by Athablo 2:24 1/4	\$4,529
Carlokin 2:13 1/4 by McKinney 2:11 1/4	3,020
Dredge 2:14 1/4 by James Madison 2:17 1/4	2,950
Era 2:11 1/4 by Zombro 2:11	2,825
Berta Mac 2:13 1/4 by McKinney 2:11 1/4	1,950
North Star 2:11 1/4 by Nutwood Wilkes 2:16 1/2	1,480
Oveta 2:12 1/4 by Caution 2:25 1/2	1,435
Fresno Girl 2:10 1/4 by Seymour Wilkes 2:08 1/4	1,175
Vallejo Girl 2:16 1/2 by McKinney 2:11 1/4	1,170
Idolway (2) 2:36 by Stoneway 2:23 1/4	1,165
Prince Lot (3) 2:29 by Prince Ansel 2:20	1,053
Katalina (2) 2:22 1/2 by Tom Smith 2:13 1/4	1,000
Kenneth C. 2:13 1/4 by McKinney 2:11 1/4	865
Marvin Wilkes 2:12 1/2 by Don Marvin 2:22 1/2	645
Yolanda 2:14 1/4 by McKinney 2:11 1/4	625
Lady H. (3) by Coronado 2:09 1/4	587
Kinney Rose by McKinney 2:11 1/4	575

Pacers.

Inferlotta 2:04 1/4 by Inferna 2:15 1/2	\$4,400
Sir John S. 2:04 1/4 by Diablo 2:09 1/4	3,250
Copa de Oro 2:07 1/4 by Nutwood Wilkes 2:16 1/2	2,455

Miss Georgie 2:08 1/2 by McKinney 2:11 1/4	1,380
Aerolite (3) 2:11 1/4 by Searchlight 2:05 1/4	1,361
Mona Wilkes 2:06 1/2 by Demonio 2:11 1/4	1,225
Hymettus (3) 2:08 1/2 by Zombro 2:11	1,200
Charley D. by McKinney 2:11 1/4	895
Queen Pomona 2:08 1/4 by Pomona	875
Mandolin 2:10 by Alcone	805
Deilah 2:09 1/4 by Zolock 2:05 1/4	700
Diablass 2:13 1/4 by Diablo 2:09 1/4	654
Josephine (3) 2:20 1/4 by Zolock 2:05 1/4	625
Ray o'Light (2) 2:13 1/2 by Searchlight 2:03 1/4	560
Opitsah 2:16 1/4 by William Harold 2:13 1/4	520

A feature of the above tables is the big lead that McKinney 2:11 1/4 has as a sire of money winning trotters. Of the seventeen trotters in the list, six are by McKinney and three by his sons. The six McKinney trotters won a total of \$8,205, and the get of his three sons, Zombro, Tom Smith and Coronado, won \$2,825, \$1,000 and \$587 respectively, or a total of \$4,412, making a grand total of \$12,617 to the credit of the McKinney family, out of a total of \$27,051 won by the seventeen leading money winners.

Among the fifteen pacers that have won more than \$500 there are two McKinneys, the mare Miss Georgie, winner of \$1,380, and the horse Charley D., that has \$895 to his credit but did not get a record. McKinney's son Zombro is the sire of Hymettus, that won \$1,200 and took the world's pacing gelding record of 2:08 1/2 for three-year-olds, and another son, Zolock, is the sire of Deilah 2:09 1/4 and Josephine (3) 2:20 1/4, which won \$700 and \$625 respectively, a total of \$4,800 to the credit of the McKinney family pacers, and a grand total of \$17,417 won by the family, which does not take into account any of the money won by horses that failed to win a total of \$500 each.

THE HARTFORD STAKES.

All the purse races at Charter Oak Park meeting, Hartford, had to be declared off on account of the continued rains, but it cleared off on Saturday morning and the four stakes were raced. Athasham, Bonnie Russell and Sonoma Girl all started in the \$10,000 Charter Oak, but none were in the money. The trotting division of the Hartford Futurity went to the gray colt Douglas by Todd in straight heats, both in 2:12 1/4. The pacing division was won by Sovereign Boy in 2:21 1/4, slow time for three-year-olds. Andy Welch, proprietor of Charter Oak Park, lost several thousand dollars on account of having to declare the meeting off, but with his accustomed gameness announced that the usual big purses will be given again next year. The summaries:

Trotting, 2:10 class, The Charter Oak Stake, \$10,000—

Wilkes Heart, b g by Great Heart-Mamb.	
Wilkes (Stelle)	1 1 1
Jack Leyburn, ch g by Alta Leyburn (McCarthy)	2 2 2
Marcheal, b h by Margrave (Cox)	4 3 10
Betty Brook, b m by Silent Brook (Titer)	3 7 7
Tempus Fugit, by Time (Geers)	9 8 3
Athasham, b g by Athadon (De Ryder)	7 4 8
Bonnie Russell, b h by Conifer (Thomas)	13 5 4
Daniel, b g by Highland Prince (Ernest)	11 6 5
Kassona, b m by Kavalli (Young)	5 10 11
Margaret O., b m by Onward (Davis)	10 12 6
King Entertainer, b h by Entertainer (McLaughlin)	8 9 9
Sonoma Girl, br m by Lynwood W. (McHenry)	12 11 dis
Imboy, b g by Elier (W. B. McDonald)	6 dis
Time—2:09 1/4, 2:08 3/4, 2:09 1/4.	

Pacing, 2:07 class, The Nutmeg Stake, \$5,000—

Kruger, ch g by Mercury-Tenn. Wilkes (Lon McDonald)	1 9 1
Bonanza, b g by Alph. Vincent (Thomas)	2 1 2
Allenwood, ch h by Knott Allen (Lewis)	7 2 4
Judge Wilson, b g by Giganty (Spencer)	3 8 3
John A., ch h by Eddie Hal (Geers)	5 3 8
Prince Hal, b g by Star Hal (Snow)	6 4 6
Wilson Addington, b h by Coastman (Cox)	4 6 7
Shaughran, b h by Ananias (De Ryder)	9 7 5
Miss Gay, b m by Ashland Wilkes (Ernest)	8 5 9
Time—2:09, 2:08 1/2, 2:07 3/4.	

Trotting, three-year-old class, Hartford Futurity Stake, \$9,000—

Douglas, g c by Todd-Cyclone (Lon McDonald)	1 1
Bell Bird, blk f by Jay Time (Snow)	2 2
Blue Hill, b c by Bingen (Titer)	3 4
Bonnie Way, b f by Peter the Great (Lassell)	4 3
Flying Feet, blk f by Directum Kelly (Brady)	dis
Time—2:12 1/4, 2:12 1/4.	

Pacing, three-year-old class, Hartford Futurity Stake, \$1,000—

Sovereign Boy, ch c by Red Sovereign-Abe Lincoln (Delaney)	1 1
Foxy Todd, b c by Todd (King)	2 2
Bells Early, b c by Masconomo (Titer)	dis
Time—2:21 1/4, 2:21 1/4.	

A report from Glasgow, Ky., states that weanling mule colts are selling at \$75 to \$100 each as a general price and more money forthcoming for extra good individuals. There is said to be a big demand for mules of this age and a short supply.

Lon McDonald has sent Sadie Fogg, Miss Adbell and a few others to Lexington, Ky., to be turned out. Sadie Fogg has no record and McDonald will again try for the M. and M., hoping that no Sonoma Girl or Highball will show up.

McMINNVILLE, ORE., SUMMARIES, SEPT. 5-7.

Trotting, 2:30 class, purse \$200—
 Henry Gray, gr g by Zombro-Rockwood (Brooker) 2 1 2 1 1
 Mike Duff, b h by Zombro (Lindsey) .. 1 2 1 2 2
 Starlight, b m by Bonner N. B. (Stetson) dis
 Blacksmith by Ben Johnson (Cox) .. dis
 Time—2:20, 2:20, 2:20 1/4, 2:20 1/4, 2:20.

Pacing, 2:30 class, purse \$200—
 Ben W., b g by Yendis (Sawyer) 1 1 1
 Lizzie C., b m (Cox) 2 2 3
 Lancero, b h by Alondra (Rohse) 3 3 2
 Alto Lace, b g by Lovelace (Lindsey) dis
 Time—2:15, 2:20, 2:24.

Trotting, free-for-all, purse \$200—
 Knick Knack, b g by Alcone-Kiona (Sawyer) 3 3 1 1 1
 Lord Lovelace, b h by Lovelace-Maggie (Lindsey) 2 1 2 2 2
 Red Rock, b g by Alfonso (Sawyer).... 2 1 1 1
 Time—2:10 1/2, 2:10, 2:12, 2:12, 2:18.

Trotting, special, purse \$200—
 Red Rocq, b g by Alfonso (Sawyer).... 2 1 1 1
 Lord Kitchener, blk h by Zombro (E. Lindsey) 1 2 2 2
 Alamo, br m by Alfonso (Lindsey) ... 3 3 3 3
 Time—2:33, 2:20, 2:24, 2:25.

Trotting, 2:25 class, purse \$200—
 Henry Gray, gr g by Zombro-Rockwood (Brooker) 1 2 1 1
 Starlight, b m by Bonner N. B. (Stetson) 2 1 2 3
 Blacksmith, ch h by Ben Johnson (Cox) .. 3 3 3 2
 Time—2:22 1/2, 2:17 1/2, 2:25, 2:27.

Pacing, 2:20 class, purse \$200—
 New Moon, ch m by Bonner N. B.-Moonlight (Sawyer) 2 1 1 1
 Lizzie, C., b m by Acclimation (Cox) .. 1 2 3 3
 Lancero, b h by Alondra (Rohse) 3 3 2 2
 Time—2:17, 2:16, 2:20, 2:18.

Trotting, special, against time to beat 2:31—
 Burion, b h by Alcone-Belle, by Kisbar (Lindsey) Won
 Time—2:29.

EVERETT, WASH., RACES, SEPTEMBER 6-7.

Pacing, 2:25 class, purse \$500—
 Cleopatra, b m by Alexis (Erwin).... 1 1 3 3 1
 Sunny Jim, br h by Laddie Boy (Chappell) 4 2 1 2 2
 Freely Red, b m by Red Medium (Leonard) 2 4 2 1 4

 Hank, b g by Vasto (Squires) 2 2 2
 Dr. McKinney, blk g by Capt. McKinney (Erwin) 3 3 3
 Time—2:24 1/4, 2:27, 2:26.

Snohomish County horses, purse \$200—
 Miss Simpson, b m by Bonner N. B. (Lance) 1 1 2 1
 Ella Erickson, b m by Diablo (Miller) .. 3 3 1 3
 Wilmer, blk g by Charleston (Prior) .. 2 2 3 2
 Time—2:34 1/4, 2:30 1/4, 2:27 1/4, 2:34 1/4.

ADMISSION DAY AT SANTA ANA.

Santa Ana, September 9.—The second meet of the Orange County Driving Club brought out a good Admission Day crowd and seven interesting events were pulled off.

The keenest competition was between Rancho del Paso, owned by L. J. Christopher of Los Angeles and driven by Sam Murphy, and Little Bill, owned and driven by P. Isner. Rancho del Paso got the first heat in 2:17, but Little Bill, the favorite, got the second and third in 2:19 1/4 and 2:17.

Another pretty race was in the 2:25 trot between J. Artego's Clara and William Manke's Lucy M. Both animals broke badly, and with a heat apiece Lucy M. lost the race by a head-strong gallop in the first quarter of the third heat.

The 2:45 mixed went to P. Beatty's Leap Year Wilkes in 2:40 1/2 and 2:38. R. A. Fuller's Peele having one heat to his credit. Christopher's Direct Maid won the 2:30 trot in 2:28 and 2:27, the first heat being hers through the virtue of a lost tire by Tom McKinney, driven by his owner, W. McNeil.

Flash, owned and driven by Frank Thomas, won the 2:30 pace, with a heat going to Rolet, owned by H. Wiley, in 2:24 1/2. Flash's heats were in 2:25 each. R. L. Draper's Lady took the single heat in the 2:25 trot from Glen, driven by Sam Murphy. The road horse race went to Queen, owned by E. T. Parker of Orange, in 2:58. There were no cups, and the horsemen entered for the sport.

NOTES AND NEWS

DATES CLAIMED.

California Circuit.

Fresno September 16-21
 Hanford September 23-28
 Tulare September 30-October 5
 Bakersfield October 7-12
 Hollister October 8-12
 Santa Maria October 22-26

North Pacific Circuit.

Salem, Oregon (State Fair) September 16-21
 North Yakima, Wash. (State Fair) September 23-28
 Spokane, Wash. (Inter-State Fair) Sept. 23-Oct. 5
 Lewiston, Idaho October 7-12
 Walla Walla, Wash. October 14-19
 Boise, Idaho October 21-26

Grand Circuit Dates.

Columbus September 16-27

For Syracuse and Columbus summaries see page eleven.

McKinney now has eleven 2:10 trotters to his credit.

It now costs \$4 to register a trotter or pacer one year old or over.

The Stanford and Occident Stakes were both worth less than usual this year.

Sir John S. 2:04½ has won over \$5,000 on the Pacific Coast this year.

Delliah won a heat and reduced her record to 2:08½ at Salem Thursday.

Only the four money winners in the \$5,000 pace at Salem are given in the telegraphic report of the races there. There were doubtless seven or eight starters.

Van L. Armstrong of Fortuna has purchased from Elijah Nowlin the hay stallion Quintillus by Anthem, dam Lizzie S. 2:27 by Antevolo.

Wild Bill 2:09¾, record made in third heat of 2:12 trot at Syracuse, Sept. 12th, is Wild Nut's first 2:10 trotter.

There is no betting at the Fresno fair and race meeting, but the crowds have been large every day.

Geo. W. Ford's trotter Burnut, won a good race at Fresno on the opening day of the races, and took a record of 2:13¾, a reduction from his last year's mark of seven seconds.

Fifty box stalls are to be built on the lot recently acquired by the Park Driving Club, just outside Golden Gate Park and opposite the three-quarter mile speed track. A fine club house will also be erected.

R. Ambush by Zolock 2:05¼, won the big stake at Salem and reduced his record to 2:11¾ over a slow track.

Ike Moddison has sold his fine stallion Kildare to Sherman Harding of Wheatland, Cal.

A huyer wants a good sound trotter or pacer that can show a mile in 2:25. If you have a good horse of this sort, send word to this office. No hopped horses wanted. See advertisement.

Era 2:11¼ has a clean record—she has not made a break in any of her races this year. This speaks well for her trainer and driver, Frank Williams.

The Leading Lady (2) 2:17 by Bingen, winner of the colt race at Readville, has been sold by Benjamin Pope of Boston to A. B. Cox of Paoli, Pa., for \$10,000.

I. B. Dalziel has leased the stables at the White House Tavern (formerly Dickey's), at the corner of Fulton street and Fifth avenue, and has opened a first-class training and sale stables, handling especially horses for use on the speedway and in the park. There are eighteen fine box stalls and no better place to stable fine roadsters can be found.

A new race track has been built at Gilroy, and races were held there on Admission day. Quite a crowd gathered to witness the events, and there was some of the old-time sporting blood in evidence, from the number of bets made on the grounds. Sam Bennister's Alice B. won the pacing race in two straight heats, P. D. Q. second. Henry White's pacing horse won the pacing half mile race and Fish's horse won the three eighths running dash.

Crescens 2:02¼, in the hands of Harry Hersey, is gradually rounding into form and shows a disposition to be himself again. September 11th he stepped a mile in 2:18, the half in 1:06 and last quarter in 29½ seconds.

One of the features of a banquet recently given at Charleston, W. Va., in honor of Gen. C. C. Watts, owner of the great three-year-old colt Gen. Watts 2:09¼, was the reading of a telegram from President Roosevelt, a warm personal friend of General Watts, congratulating him over the splendid victory of the colt.

On the opening day of the Minnesota State Fair, at Hamline, September 2d, Dan Patch started to lower his record of 1:55, but a high wind blew across the quarter stretch and prevented the pacer from going near his record. He paced the mile in 1:58¼. The time by quarters was 0:29½, 0:57½, 0:12½, 1:58¼.

Shakespeare 2:09¼, the crack pacing son of Jay McGregor 2:07¼ and Miss Spears 2:21¾, won the three-year-old race at Hamline, Minn., last week in straight heats over a field of four horses. Time, 2:12½, 2:15. After the race was finished he was worked a mile in 2:07¼.

Dr. Book 2:10, Will Durfee's old trotter, now owned by H. L. Cockins of Pennsylvania, trotted a mile September 6th over the Barnesville, Ohio, track, which is only one-third of a mile in circumference, in 2:17. This is a world's record for that sort of track.

Zombro has seven new standard performers to his credit this year, leading all other stallions on this Coast as he did last year. The new ones are Hymettus (3) 2:08½, Era 2:11¼, Briquette 2:15, Bessie Barnes 2:17½, Henry Gray 2:20, McDuff 2:20 and The Zoo 2:25. Hymettus and Bessie Barnes are pacers, the others all trotters.

George G. 2:05¼ is winning all his races in straight heats this year and behaves like he used to when he was in California.

Mr. F. C. Klein and C. T. Lehman of this city have purchased from M. S. Siljan of Pleasanton the three-year-old bay mare Martha, sired by Iran Alto 2:12¼, dam Ida Belle, own sister to La Belle 2:16, by Sidney 2:19¾; second dam Anna Belle 2:27½, dam of Murray M. (3) 2:14, La Belle (2) 2:16 and Robert I. 2:08¾, by Dawn 2:18¾; third dam Pacheco, thoroughbred by Hubbard. Martha is a handsome mare, a fast natural trotter and has appeared in some of the matinees of the Park Driving Club. She worked a mile in 2:23 at Pleasanton while Mr. Siljan owned her and is considered quite a prospect. Her new owners have changed her name to Vella.

A writer in the London Live Stock Journal says: "Thus Mr. Theodore A. Cook describes the troubles which confronted him when he set to work to procure certain facts for his great work, 'Eclipse and O'Kelly,' published a couple of months ago: 'Six undoubted skeletons of Eclipse claimed my bewildered attention. No fewer than nine authentic feet were apparently possessed by this extraordinary animal. The genuine hair cut off his tail would have generously filled the largest arm-chair in the Jockey Club. The certified portions of his hide would together have easily carpeted the yard at Tattersall's.'"

There has been considerable talk about a match race between Sir John S. 2:04¼ and Inferiotta 2:04¾, but as is usual in such cases, the leading parts in the talkfest were taken by parties who had no other interest in either pacer than the desire to see them come together.

The new speedway in Washington Park, Seattle, has been completed. The course is a mile in length and forty feet wide and was built with money raised by subscription from the horsemen of Seattle. Between \$10,000 and \$12,000 was expended on it.

H. S. Hogoboom of Woodland has traded a yearling colt by Iran Alto 2:12¼ to Mr. F. P. Ogden of High Grove, San Bernardino county, for the fast stallion Monocrat. The colt is a trotter and one of the best bred ones living. His dam is by Diabolo 2:09¼, second dam by Waldstein 2:22, third dam by Guy Wilkes 2:15¼, fourth dam by Del Sur, fifth dam the dam of Hazel Wilkes 2:11¼, Una Wilkes 2:15 and three others by Arthurton, sixth dam by the old thirty-mile champion, General Taylor. There is producing blood in every generation of this colt back to the fifth on both sides, and if he does not make a fast trotter there is little in breeding. The stallion Monocrat, which Mr. Hogoboom has received in the trade, is a toppy fellow with a lot of speed, and one of the nicest road horses anyone ever sat behind. He can be driven by a lady and has enough speed to win in class A in the Park Driving Club matinees. His matinee record of 2:14½ was made at San Bernardino, where he lapped R. Ambush out in 2:12. He is by Woodmon 29189 (son of Monon 4071, he by Nutwood 600), and his dam is Altocrat by Altamont. Mr. Hogoboom will probably consign this stallion to the combination sale at Chase's pavilion on the 14th of October.

Jackson's Napa Soda is the best hot weather drink.

Seven first prizes out of seven classes in which exhibits were made is the splendid record made by the Woodland Hackney Farm, owned by Messrs. Sprague and De Pue of this city. Their blue roan Hackney stallion Squire of Chester, won the blue ribbon and gold medal, and the other six prizes were won by horses sired by Woodland Hackney Farm's premier sire Manchester, one of the best formed horses of his breed ever seen on this coast, and a frequent blue ribbon winner himself in the East.

The trotter Zomont, in Will Durfee's string at Los Angeles, died on the 8th inst from lung fever. He was a five-year-old by Zombro and Durfee considered him one of the best trotters he had ever handled. In fact, Zomont was such a promising horse that he did not enter him on the California Circuit, intending to take him East next year. Zomont had trotted a mile in 2:09 in his work and a half in 1:02, and was a perfectly gaited horse, game and good headed. Mr. Durfee made the trip from Petaluma to Los Angeles in response to a telegram notifying him of Zomont's condition, and when he returned for the Woodland races the horse seemed better. On reaching Sacramento, he was informed by mail of the horse's death.

STOCKTON TRACK SAVED TO THE PEOPLE.

The old race track property at Stockton belongs to the people and not to the persons to whom it was sold at the Sheriff's sale several years ago.

The Supreme Court decided that September 4th, reversing the decision of Judge Bennett, who tried the case in the Superior Court of that county and held that the sale was legal and the title to the property vested in W. R. Russell, J. H. Budd, Louis Gerlach and Mrs. Moore and her daughters, who bought it at public sale.

The case will have to be re-tried in the Superior Court of San Joaquin county, but the decision of the Supreme Court virtually settles the case, for the ownership was the only point in question.

The San Joaquin Valley Agricultural Association formerly owned the race track and improved it. Later the association got into debt and sold the land under the hammer to satisfy claims of creditors.

Attorney August Muetner Sr., acting for a number of public-spirited citizens who desired that the track be maintained as public property for fair grounds, brought suit in the name of the people of the State to have the title of the lands revert to the public. His claim was that the old Agricultural Association was a public corporation and as such could not sell any of its property. The Supreme Court upheld that contention.

With Attorney Muetner in the prosecution of the suit and appeal were associated Attorneys Jacobs & Flack.

The Stocktonians who put up the money to prosecute the suits are largely represented in the membership of the Stockton Driving Club. They contributed nearly \$1,000 for the cause and their motives were entirely patriotic.

Now that the race track grounds have been declared public property, which means State property, the next step will be the organization of some body of public spirited citizens to handle the property for the public, collect subscriptions for the making of such improvements as a grandstand and enclosures for the holding of county fairs and promote and manage such fairs.

The grounds will probably be improved as a public play ground and park and could be made one of the show spots of the county. However, there will be time enough to commence such a movement after the case has been re-tried in the Superior Court and finally closed.—Stockton Record.

KENTUCKY TODD SETS NEW RECORD.

Indianapolis, September 12.—At the State Fair here, this afternoon, Kentucky Todd, owned by J. W. Johnson of Boston, established a new world's record of 2:09 for three-year-old trotting stallions, and won the feature event of the card, the Western Horseman Stake Purse, \$4,100, for three-year-old trotters. Kentucky Todd negotiated the mile in 2:09 in the second heat.

Columbus, September 19.—Kentucky Todd, owned by Miss Katherine Wilkes of Galt, Ont., and holder of the world's record for three-year-old trotting stallions, to-day tied the world's record for three-year-olds of all sexes when he won the first heat of the Kentucky Stock Farm Futurity in 2:08¾.

The Todd colt was a good first choice in the betting, although General Watts 2:09¼ had a liberal following. The latter colt, drawing the pole, led to the first half post in 1:02½. Kentucky Todd was fourth there, but Stinson soon began his drive, and his sensational colt moved even with the leaders in the next eighth. He was an easy leader all down the stretch and won jogging, in time one-quarter of a second faster than he made last week at Indianapolis, when he took the world's stallion record away from General Watts. The second heat was easier and slower for Kentucky Todd.

Bettie Brent won the pacing division of the Futurity, and took a record of 2:07¼. She was driven by Vance Nuckols, who won the same division last year with Brenda York in 2:08¾.

SALEM, OREGON RACES.

The Oregon State Fair opened Monday, Sept 16th with a large attendance. The first days harness races were as follows:

Trotting, 2:18 class, purse \$500—

Van Norte, h g by Del Norte-Ingraham (Phillips)	1	2	1	1
Packline, ch s by Pactolus (Kelly)	3	1	2	2
Hank, b g by Vasto (Squires)	2	3	3	3
Blacksmith, ch s by Ben Johnson (Cox)	4	5	4	dis
Red Rock, b g by Alfouso (Sawyer)	5	dis		
Dr. McKinney, blk g by Capt. McKinney (Lohse)	6	dis		

Time—2:27½, 2:27, 2:26, 2:30½.

Pacing, 2:12 class, purse \$500—

Lord Lovelace, b b by Lovelace (Lindsay) ..	1	1	1
Sherlock Holmes, ch h by Zolock (Childs) ..	2	2	3
Bonnie M., hr m by Mohegan (Prior)	3	3	2
Deville, b m by Diablo (Stetson)	4	4	dis

Time—2:18, 2:17½, 2:17½.

The account of the second days races failed to reach us.

California horses finished first, second and third in the Lewis and Clark \$5,000 stake for 2:14 class trotters at the Oregon State Fair on Wednesday. R. Ambush, son of Zolock, driven by G. W. Bonnell, took the race in straight heats in the fastest time ever made in Oregon. North Star by Nutwood Wilkes, driven by Chas. Whitehead, was second, and Berta Mac by McKinney, driven by Henry Helman, was third.

The amounts won by these horses were \$2,000, \$1,000 and \$600. Will Durfee started C. L. Jones' Carlokin and Geo. Beckers had Zombowette in the race, but both were outside the money. R. Ambush won the race very handily and was a surprise to the Oregonians, who had picked Freddie C. Jr., North Star, Carlokin and Satin Royal as the money winners.

In the 2:20 class pace, Will Hogoboom landed his Diablo horse Teddy C. a winner after five heats.

Hazel Norte by Del Norte won the three-year-old trot. In this race Vingoro fell in front of the grandstand, throwing his driver, Sam Casto, and breaking his leg. The summaries:

Trotting, 2:14 class, Lewis & Clark Stake, \$4,000—

R. Ambush, br s by Zolock (Bonnell)	1	1	1
North Star, b g by Nutwood Wilkes (Whitehead) ..	2	2	3
Berta Mac, b m by McKinney (Helman) ..	4	3	2
Freddie C. Jr., blk h by Prince Direct (Lance) ..	3	7	8
Carlokin, b s by McKinney (Durfee)	5	4	6
Satin Royal, 8-5-4; Crylia Jones, 6-6-5; Zombowette, 7-8-7, and Oyama distanced.			

Time—2:12¾, 2:11¾, 2:12.

Pacing, 2:20 class, purse \$500—

Teddy C. (Hogoboom)	2	7	1	1	1
Maud L. (Groff)	1	4	2	2	2
Oregon Baby (Barrows)	8	5	4	3	3
Zanthus (Phillips)	5	3	6	4	4
The Prince	dis				

Time—2:15, 2:16, 2:15, 2:14¾, 2:17

Trotting, Valley Stakes, three-year-olds, \$400—

Hazel Norte (Irwin)	1	1
Vingoro (Casto)	2	2

Time—2:30, 2:31½.

An enormous crowd attended the fair Thursday afternoon, and the light harness racing created unbounded enthusiasm. The \$5,000 pacing stake proved a field day for the California horses. Delilah took the first heat, but Sir John S., the crack from Marysville, took the next three. He cut the track record to 2:07¾ in the second heat. Summaries:

Pacing, 2:09 class, purse \$5,000—

Sir John S.	6	1	1	1
Delilah	1	6	4	5
Miss Georgie	4	2	2	2
Lord Lovelace	2	3	3	3

Time—2:08½, 2:07¾, 2:09, 2:09.

Trotting, 2:23 class, purse \$500—

Henry Gray	3	2	1	1	1
Irene	1	1	4	3	4
Lady W.	4	2	2	4	2
Van Norte	2	4	3	4	2

Time—2:21½, 2:20, 2:19¾, 2:18¾, 2:20.

Trotting, Oregon Stakes, two-year-olds, purse \$300—

Princess Direct	1	1
Hilgard	2	3
Lassie Tangent	3	2

Time—3:01, 2:56.

ANSWERS TO CORRESPONDENTS.

F. H. Modesto.—We do not know if the filly is registered. Write to the Jockey Club, New York. We have no record of her breeding.

J. H. Kelley, San Bernardino.—We have not the data nor the plans in this office for a kite-shape track. A surveyor should be able to get them up for you. The rules for laying out half-mile and mile regulation tracks are given in this issue.

Next year the pavilion will be inside the fair grounds at the California State Fair, and a new record for attendance should be made.

FRESNO RACES.

Fresno, September 17.—The first day's races at the Fresno County Agricultural Fair, which are to continue all week, came off to-day with three events—2:15 trot, 2:14 pace and a three-eighths of a mile running race. No specially good time was made. Many of the horses entered on the California circuit are here.

Trotting, 2:15, special—Burnut won, Queer Knight second. Best time, 2:13¾.

Pacing, 2:14 class—Mandolin won, Mabel C. second. Best time, 2:11¾.

Running, three-eighths of a mile—Hardie won. Time, 0:36½.

Fresno, September 18.—A good crowd attended the second day's racing at the Agricultural Association fair to-day, and interest was high in spite of the fact that there was no pool selling. There was a little private betting, but bookmaking is entirely forbidden by the Board of Supervisors, the races taking place upon county grounds.

George F. Warlow, president of the association, declares that the record of the first two days is conclusive proof that racing can be successfully carried on in this country without betting. An interesting race to local horsemen was the second, in which the second place was won by Danny Morris' Newport, a 19-year-old horse, which cut down its own record from 2:16½ to 2:16¾. Summary:

Pacing, 2:12 class: Lohengrin won, Josephine second. Best time, 2:16.

Pacing, 2:20 class, horses owned in Central California: David St. Clair won, Newport second. Best time, 2:16.

Running, half-mile: Buda Pesth won, Anterria second. Time, 0:48½.

Fresno, September 19.—The circus in town to-day did not apparently interfere with the attendance at the races. In fact, the crowd at the county fair grounds was even larger than usual. Results:

Trotting, 2:20 class—Era won, Kinney Rose second. Best time, 2:15.

Special trot for named horses—Sona won, Mimosa and Prince Mack divided second money. Best time, 2:16.

Running, three furlongs—Billy Taylor won, Gypsy Girl second. Time, 0:36.

NEW TROTTERS IN 2:15 LIST.

The California Circuit, while not an extensive one this year, has furnished nine new trotters to the list of 2:15 performers as follows:

Fresno Girl by Seymour Wilkes 2:08½	2:10½
Era by Zombro 2:11	2:11¼
Oveta by Caution 2:25½	2:12½
Marvin Wilkes by Don Marvin 2:22½	2:12½
Carlokin by McKinney 2:11¾	2:13¼
Berta Mac by McKinney 2:11¼	2:13¼
R. Ambush by Zolock 2:05¼	2:13¼
Dredge by James Madison 2:17¾	2:14¼
Yolanda by McKinney 2:11¼	2:14¼

New Pacers in 2:15 List.

The list of new 2:15 pacers is a longer one, there being fourteen newcomers as follows:

Inferlotta by Inferna 2:15½	2:04¾
Copa de Oro by Nutwood Wilkes 2:16½	2:07¾
Hymettus (3) by Zombro 2:11	2:08½
Diablass by Diablo 2:09¼	2:11
Aerolite (3) by Searchlight 2:03¼	2:11¼
Tobasco by Timothy B.	2:12½
Louisa A. by Hambletonian Wilkes	2:13¼
Ray o'Light (2) by Searchlight 2:03¼	2:13½
Monia Rose by Falrose 2:19	2:13¾
Uno by Aptos Wilkes	2:14
Fred W. by Robin 2:22¾	2:14¼
Opitsah by William Harold 2:13¾	2:14¾
Jim Corbitt by Seymour Wilkes 2:08¾	2:14¾
Radium by Stoneway 2:23¾	2:15

CHASE'S COMBINATION SALE.

The consignments already made to the big combination sale which Fred H. Chase & Co. will hold at the big pavilion, 478 Valencia street, on the evening of October 1st, show that it will be one of the best sales held in the city in years.

Peter J. Williams has consigned Monterey 2:09¼, the great green trotter Yosemite and two full sisters to the latter horse, besides several other trotting-bred horses, and two highly bred young thoroughbreds.

Ed. Parker, of Pleasanton, sends quite a hunch of young horses, by Rey Direct 2:10, and Stam B. 2:11¼. There are several fine prospects among them.

Sam Norris, of Rosedale Stock Farm, Santa Rosa, has catalogued sixteen head by Washington McKinney and Sidney Dillon. These are extra good lookers and some fast ones are among them.

Mr. J. C. Mowry, who bred the great trotter, Lady Mowry 2:09¼, sends three good racing prospects by Kinney Lou 2:07¾, McKinney 2:11¼, and Mendocino 2:19¾.

L. J. Rose, of Los Angeles, has consigned two fast trotters by James Madison. These are good enough to take to the races, one in particular being a very fast horse.

Send to Chase for a catalogue.

THE CHARTER OAK WINNER.

Another Charter Oak has passed into turf history. Wilkes Heart was returned the winner of this rich stake on Saturday at Hartford, defeating a large field in 2:09¾, 2:08¾ and 2:09¾. The winner was not the pick and forecast of those who select in advance winners of such rich events. Highball has been expected to start, but was drawn. Sonoma Girl started but her manners showed no improvement. The manager who drew Highball started Tempus Fugit instead, who failed to be a factor in the race. Wilkes Heart, the winner was at the wire first in each heat, although Jack Leyburn contested the finish of each heat, with him. It was a close contest and the victory of Wilkes Heart was well received for there is no trotter on the Grand Circuit that is more popular than this game son of Great Heart. As is well known, Wilkes Heart served a very thorough apprenticeship on the half-mile tracks before he was seen in the elite company of the Grand Circuit. He made one start in 1905, getting second money out of the race in which there was no fast time made. In 1906 he began racing the first of July and continued until November, starting in sixteen races against perhaps the best half-mile trotters that season. He trotted sixty-seven heats and was never back of third money in any of his starts, but two. Twice during the season he was outside the money. As an indication of how well he stood in this campaign, the best race he went was on November 2nd, at Hohokus, N. J., where he won a five-heat race. The first heat of this race was won by Libby Queen 2:15¼, by Expedition. The second heat was a dead heat between Bedelia and Wilkes Heart, the time being 2:14¾. Wilkes Heart then won the third, fourth and fifth heats in 2:13½, 2:15¼ and 2:15½. The time of his third heat remained his record for the season. He established the reputation last year of being a thoroughly game and reliable trotter.

He was wintered in the East and again started early in the season for several races over the half-mile tracks, joining the Grand Circuit at Cleveland. Here he started in the 2:13 trot, finishing third to Lotta and Dewitt in 2:09¾. At Buffalo the next week he won the 2:12 trot, in 2:09¾, 2:09¼ and 2:09¾. At Poughkeepsie he again won the 2:12 trot in 2:10¼, 2:11¼ and 2:10. He was successful at Readville, where he won in 2:09½, 2:09¼ and 2:09¾. He was defeated at Providence where in the Roger Williams he finished fourth and second to Highball in 2:07½ and 2:07¾. His three winning heats at Hartford were 2:09¾, 2:08¾ and 2:09¾. In this race he reduced his former record of 2:09¼ to 2:08¾.

Wilkes Heart was bred in Michigan by the late W. B. Fish, Coldwater, who owned his sire, Great Heart 2:12½. Great Heart is by Mambrino Russell out of the famous broodmare, Willie Wilkes 2:28 (dam of 6) by George Wilkes. Mambrino Russell was by Woodford Mambrino, out of another famous broodmare Miss Russell dam of Maud S. 2:08¾, Nutwood 2:18¾ and others. Wilkes Heart's dam was Baldy by Hambletonian Wilkes, the son of George Wilkes, out of Mag Lock by American Star 37, that recently died in California. His second dam, Allie Wilkes is by Young Jim, another son of George Wilkes, out of a mare by Lears Sir William. His third dam, Drisex by Beecher, a son of Blue Grass 382, out of a mare by Abdallah Chief. Thus it will be seen that Wilkes Heart has some foundation for his courage and ability to fight out bitter speed contests, for he carries in his blood lines, stout trotting blood, backed up by the best thoroughbred blood found in trotting pedigrees. There are few, if any, better bred trotters than this stout-hearted son of Great Heart and Baldy. Baldy is the dam of the pacer, Star Wilkes 2:24¼, while Allie Wilkes is also a producer.

Wilkes Heart is a trotter of striking appearance; one that can be called handsome, with the best racing manners. He has not shown that he can trot extremely fast but he is one of the improving kind. He will in all probability reduce his record before the season ends.—American Sportsman.

HOW TO BUILD TRACKS.

Half Mile.—For a half-mile track draw two parallel lines, 600 feet long and 452 feet and 5 inches apart. Half way between the extreme ends of the two parallel lines drive a stake; then loop a wire around the stake long enough to reach either side. Then make a true curve with the wire, putting down a stake as often as a fence post is needed. When this operation is finished at both ends of the 600-foot parallel lines the track is laid out. The inside fence will rest exactly on the line of the above driven stakes. The turns should be thrown up an inch or an inch and an eighth to the foot. The stretches may be anywhere from forty-five to sixty feet wide.

One Mile.—For a mile track draw a line through an oblong center 400 yards in length, setting a stake at each end. Then draw a line on either side of the first line, exactly parallel with and 417 feet and 2 inches from it, setting a stake at either end of them. You will then have an oblong square 410 yards long and 834 feet 4 inches wide. Now fasten a cord or wire 417 feet and 2 inches long to the center stake of your parallelogram and describe a half circle, driving stakes as often as you wish to set a fence post. When the circle is made at both ends of your parallelogram you will have two straight sides and two half circles, which, measured three feet from the fence, will be exactly a mile. The turns should be thrown up an inch or an inch and an eighth to the foot.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

THE PACIFIC COAST HANDICAP.

[Special Report.]

Spokane, Wash., September 12, 1907.—Sixty-six shooters indulged in an afternoon's practice of six 20-target events as preliminary to the opening of the third Pacific Coast Handicap tournament, held over the traps of the Spokane Rod and Gun Club at beautiful Natatorium Park, this city.

Bright, warm weather and the most favorable conditions generally surrounded the day's sport and made the opening of the tournament a most auspicious one. The Spokane Rod and Gun Club spent several hundred dollars during the summer in preparing the grounds, enlarging and equipping them for the handling of a big crowd of shooters. Secretary-Manager Elmer E. Shaner of the Interstate Association was on the ground during the week previous to the opening, advising the local club as to its plans for entertaining the contestants.

The Spokane Rod and Gun Club's grounds form a natural amphitheatre with a range of lofty pines behind the firing points, the traps facing out across the beautiful Spokane River. A high bluff background interfered more or less with the success of contestants unused to it, this appearing especially to effect the Easterners in practice.

Sport-loving citizens of the city, publicity committee of the Chamber of Commerce and business men were especially liberal in their support of the local club in handling the tournament, which, for the first time in its history came to the Pacific Northwest. They felt keen pride in the fact that the first move northwards from California pointed to Spokane as the city of the Northwest probably best suited for holding the big event.

Practice day produced a surprise in a new ground record for the local club, E. J. Chingren, one of Spokane's best shots, broke 107 straight. He was beaten, however, for high average on the day by C. M. Powers of Decatur, Ill., and Max E. Hensler, formerly a Middle-Western amateur, but of late from Prosser, Wash., who broke 116 each to Chingren's 115. P. J. Holohan of Twin Falls, Idaho, and Harry Ellis of Portland, Ore., fared best of the professionals, the former breaking 113 and the latter 112.

The scores of practice day follow: six 20-target races, 16 yards rise, sweepstakes optional—

Table with columns for shooter names and scores across 10 events. Includes names like E. C. Garrett, E. D. Farmin, W. A. Hillis, F. C. Riehl, T. S. Barclay, P. J. Holohan, F. Gilbert, Chris Gottlieb, Dr. White, J. A. Forbes, T. B. Ware, G. E. Stacey, W. B. Mahan, M. H. Trendell, S. J. Deyo, H. Scrandwold, F. Weatherhead, A. C. Cowing, Harry Ellis, E. F. Confar, O. N. Ford, C. E. Thing, M. Junker, G. H. Oliver, E. T. Hensler, J. T. Law, T. Logsdon, Max Hensler, E. J. Chingren, J. J. McLaughlin, W. F. Williams, L. S. Hawxhurst, C. M. Powers, T. Marshall, H. McElroy, R. S. Scott, H. A. Roberts, Geo. Bech, D. W. King Jr., H. A. Gayhart, H. Justins, R. T. Steinke, R. Prosser, F. Bartos, E. E. Ellis, Dr. Purdy, Geo. Shea, W. Carney, A. J. Winters, J. Van Eaton, W. A. Robertson, C. A. Jones, G. Gulst, S. R. Patterson, F. F. Smalls, W. Dryden.

Table with columns for shooter names and scores across 10 events. Includes names like J. C. Scott, W. H. Seaver, J. W. Merritt, H. McMurchy, J. T. Skelly, C. Haight, P. Cahill, A. K. Copson, W. H. Burke, Harry Eaton.

Tuesday, September 10th.—The first day's shooting was featured by the fine work of C. M. Powers and H. G. Taylor, the former breaking 174 and the latter 173 out of 180. During the day Taylor had a run of over 100 straight breaks. A cloudy sky and murky weather made good scores almost out of the question, in most cases the scores being poorer than in practice the day before.

A very large crowd of spectators turned out to watch the shooting. The sport-loving fans manifested a keen interest in the events.

Fred Gilbert did the best shooting of the professionals, breaking 170 out of the 180 shot at. Harry Ellis was in second place with 167.

The scores of the first day follow; nine 20-target races, \$2 entrance, \$50 added, 40, 30, 20 and 10 per cent, 16 yards rise—

Table with columns for shooter names and scores across 10 events. Includes names like O. N. Ford, W. S. Hoon, T. A. Marshall, E. F. Confar, F. C. Riehl, A. J. Winters, W. H. Seaver, R. S. Scott, W. Chingren, Dr. T. H. White, Chris Gottlieb, J. A. Forbes, S. R. Patterson, W. A. Robertson, F. Bartos, H. Justins, R. Prosser, J. T. Skelly, C. A. Haight, C. K. Cartwright, B. G. Pleiss, L. J. Pleiss, C. H. Ink, Geo. Miller, A. K. Copson, J. W. Merritt, E. A. Geist, J. S. Ramage, Geo. Shea, W. J. Carney, B. K. Short, M. T. Flask, A. B. Waterbury.

Table with columns for shooter names and scores across 10 events. Includes names like M. J. Maryott, A. C. Ware.

Wednesday, September 11th.—The surprisingly low score of 68 proved good enough to win the Preliminary Handicap in the second day's shooting at Natatorium Park. Frank Bartos, a Helena, Mont., amateur, captured the Preliminary Handicap trophy.

"Chan" Powers of Decatur, Ill., rated as the country's foremost amateur shot, and O. N. Ford, amateur champion of Iowa, of the Eastern delegation, had to be satisfied with second money between them, landing this with a score of 87. In all probability neither of these men ever won so large a purse division with so low a score in all their career over hundreds of trap fields in the United States.

Local talent captured third money with 86. E. J. Chingren and Hugh McElroy divided this honor between them.

Fred Gilbert led the professionals with 91, and the veteran, Tom Marshall, bore up better than the majority of the Easterners against the discouraging conditions with a score of 89.

Such good shots as Larry Taylor and Chris Gottlieb finished with only 82 breaks out of the 100 targets. M. J. Maryott, who tied with Chan Powers and Jeff Blanks for the Grand American Handicap at Chicago in June, finished with only 81.

The low scores are explained, in part, by the steep bluff rising above the Spokane River on the Fort Wright side (across from Natatorium Park), which forms the background. On a clear day, with wind and other conditions equal, this background has not apparently worked a very material disadvantage against shooters, but with clouds and an intermittent sunshine, with a disagreeable and treacherous wind blowing down the canyon of the Spokane River, the background is described as being the worst ever experienced by many men now attending the shoot in their experience with practically every gun club's field in the United States.

That members of the Spokane Rod and Gun Club appreciate this, is evidenced by the fact that a prominent member of the club, speaking, unofficially, said last night that new and better grounds would be secured by another year.

The handicapping committee, composed of E. E. Shaner, secretary of the Interstate Association of Pittsburg, Pa., who is managing the shoot; C. M. Powers, Decatur, Ill.; Fred McBroome, Spokane; Dr. P. A. Purdy, Seattle, and J. F. Smalls, Walla Walla, cannot be blamed for the low scores.

The cashier's office, in charge of F. C. Whitney, Des Moines, Iowa, and assisted by J. T. English and G. Leford of Spokane, was kept busy paying yesterday. Many shooters have managed to make more than their expenses out of the pooling of the entrance and added moneys. The new Leggett traps, which are working almost perfectly, were in charge of C. A. North of Cleveland, Ohio.

The entrance lists have fallen a little below expectations, about seventy competing yesterday. This is explained in part by a late harvest, the midst of the open season for game shooting, and the inability to secure railroad rates.

The attendance of spectators is remarkable. The sport-loving citizens of Spokane have been taking all the available space behind the ropes watching the experts.

In the forenoon the regular program of 100 birds, four 15 and two 20-bird events, was shot off. Harry Taylor of Meckling, S. D., and E. F. Confar of Livingston, Mont., both amateurs, finished with the high scores of 94. Mr. Bartos, who won the Preliminary Handicap in the afternoon, gave no indication during the morning of what he intended to do in the afternoon, only breaking 81 out of the 100 targets.

The scores of the second day follow; four 15 target events, \$1.50 entrance, \$40 added to each event, moneys 50, 30 and 20 per cent; two 20-target races, entrance \$2, \$50 added, moneys 40, 30, 20 and 10 per cent, 16 yards rise—

Table with columns for shooter names and scores across 10 events. Includes names like F. Gilbert, M. J. Maryott, C. M. Powers, H. G. Taylor, H. Ellis, L. Hawxhurst, F. C. Riehl, Chris Gottlieb, E. F. Confar, W. S. Hoon, R. Thompson, E. E. Ellis, Dr. Purdy, F. A. Dryden, Del Cooper, E. J. Chingren, O. N. Ford, M. E. Hensler, F. Weatherhead, E. D. Farmin, Geo. Miller, P. J. Holohan, W. H. Seaver, R. T. Steinke, R. Prosser, J. T. Skelly, H. McMurchy, T. B. Ware, Dr. White, J. T. Smalls.

Table of scores for various shooters, including T. A. Marshall, H. Justins, G. E. Stacey, H. A. Roberts, H. McElroy, C. A. Haight, W. A. Hillis, D. W. King Jr., J. McLachlin, J. A. Forbes, G. C. Mapes, A. C. Cowing, T. D. Barclay, T. Logsdan, W. A. Robertson, C. K. Cartwright, Ed Garratt, S. Williams, J. J. Law, J. W. Merritt, J. R. Patterson, J. C. Scott, Phil Shields, M. H. Truesdell, J. A. Van Eaton, M. B. Brownlee, G. C. Beck, F. Bartos, C. E. Thing, C. H. Ink, T. H. Oliver, H. Strandwold, B. G. Pleiss, L. J. Pleiss, F. McBroom, S. T. Cullison, W. J. Carney, A. K. Copson, B. M. Francis, I. Dorn.

Preliminary Handicap.—100 targets, unknown angles, \$8 entrance, targets included, distance handicap, 16 to 23 yards, high guns, \$100 added. First money and Interstate Association trophy to winner. Open to amateurs only—

Table of scores for the Preliminary Handicap, listing names and scores across multiple rounds.

Thursday, September 12th.—Rain fell steadily throughout the final day of the tournament, and made the competition for the feature event a question of nerve and endurance, for there was no encouragement to the contestant afflicted with hard luck at the deceptive targets. Everything pointed against good shooting, yet the scores generally were

better than those of the day before. To a certain extent the good scores made it apparent that the bad background, which was so fully criticized for the low scores yesterday, is only its worst under certain weather conditions. A baffling wind blew down the canyon of the Spokane River yesterday, which made the targets hard to locate against the high river bluff. To-day, in the drizzle, but with the wind steady, the shooting was decidedly better.

M. E. Hensler captured the blue ribbon event with a score of 93, a remarkable record under the discouraging conditions. The 93 proved three points better than the score that won second money.

Second to Hensler were three men, of whom one, E. J. Chingren, was a local man. Chingren's score was 90. This score was made jointly by Del Cooper of Tacoma, Wash., and G. C. Mapes of Boise, Idaho.

In the five regular events Fred Gilbert broke 100 straight, a performance that was positively marvelous in the face of existing conditions.

At the conclusion of the day's shooting, Secretary-Manager Shaner of the Interstate Association presented the trophies.

The close of the tournament was marked by scenes of jovialty and good sportsmanship. There were rounds of cheers for all who had helped make the tournament a success, including Manager Shaner, Cashier Whitney, Charley North, Tom Ware, the Spokane Rod and Gun Club, the leading prize winners and everybody who made himself more or less conspicuous in the tournament.

For general average among the amateurs, H. C. Taylor was in first place, with 363 out of 380 shot at; C. M. Powers was second with 359, and W. S. Hoon and E. F. Confar were a tie for third, with 348.

For general average among the professionals, Fred Gilbert was in first place with 360 out of 380 shot at; Harry Ellis was in second place with 347, and Chris Gottlieb was third with 342.

The purse in the Preliminary Handicap was divided as follows: F. Bartos, \$73.90; C. M. Powers, \$53.75; O. N. Ford, \$53.75; E. J. Chingren, \$35.25; H. McElroy, \$35.25; T. B. Ware, \$21.80; C. E. Stacey, \$21.80; M. E. Hensler, \$10.10; T. Barclay, \$10.10; S. W. Williams, \$10.10, and G. C. Beck, \$10.10.

The scores of the third day follow; four 15-target races, \$1.50 entrance, \$40 added to each; moneys 50, 30 and 20 per cent. Two 20-target races \$2 entrance, \$50 added to each; moneys 40, 30, 20 and 10 per cent, 16 yards rise—

Table of scores for the three-day tournament, listing names and scores across multiple rounds.

Pacific Coast Handicap.—100 targets, unknown angles, \$10 entrance, targets included, handicaps 16 to 23 yards, high guns, \$200 added. First money and

Interstate Association trophy to winner. Open to amateurs only—

Table of scores for the Interstate Association Handicap, listing names and scores across multiple rounds.

The purse in the Pacific Coast Handicap was divided as follows: M. E. Hensler, \$116.50; E. J. Chingren, \$72.90; G. C. Mapes, \$72.90; Del Cooper, \$72.90; F. Logsdan, \$41.90; T. Barclay, \$41.90; E. E. Ellis, \$15.50; R. Prosser, \$15.50, and Dr. T. H. White, \$15.50.

A Vallejo sportsman writes us that the duck hunters of that vicinity are oiling up their "smoke sticks," painting decoys and getting the arks fitted up for the coming season.

The Limit Gun Club, with a preserve adjoining the Alameda Club on the Sonoma marshes, have re-organized for the coming season with the following members: C. L. Wisecarver, O. L. Rose, M. A. Clark and Jack Brady. Robert Grimes, keeper.

The following Vallejo shooters have secured a ten-year lease on the Freeborn place, near Cordelia, on the Suisun marshes and have organized under the name of "Freeborn Gun Club." E. M. Wilson, Dr. J. F. Chappelle, J. V. O'Hara, J. H. Brennan, P. G. Magistrini.

Birds are more numerous in this locality than they have been for years, particularly mallard and sprig, and a successful season is anticipated.

Captain Vasquez of Santa Barbara arrived in that port one day last week in his new schooner, the Gussie M., bringing in four seals, which are to be shipped East. The boat is a fourteen-ton schooner with a twenty-five horse-power engine. She is forty-two feet long by twelve feet six inches beam. She was built two years ago at San Pedro, where she was purchased. Captain Vasquez proposes to start next week on a cruise north as far as Monterey, hunting for otter. This is the first expedition to go out after otter in four years, as the season has been closed. Captain Vasquez has a school of about twenty otter spotted. He has a new method of catching them, intending to use a net in place of shooting them. The last otter which was caught by Captain Vasquez, four years ago, brought \$400. The skeleton, which was perfect, was sold to the Smithsonian Institute, where it now is. The Captain has captured many seals and sea lions, which for years past he has sent to zoological gardens all over.

A live-bird shoot is to come off at Ingleside this afternoon. Among those who will participate will be Harvey McMurchy, Clarence Haight, Will J. Golcher, Fred Gilbert, Tom Marshall and a number of visiting shooters who attended the Coast Handicap tournament at Spokane last week.

In last week's issue we inadvertently gave the date of the Pacific Coast Trap Shooters' Association tournament as having taken place on the 9th instead of the Sunday, the 8th inst.

SAN FRANCISCO FLY-CASTING CLUB.

Tom C. Kierulff and C. R. Kenniff are the winners of the club's championship medals this year. Mr. Kenniff won on delicacy with the grand score of 99.2; and in long distance with a score of 113 feet—rather less than has been the winning record of past seasons.

Mr. Kierulff's score in accuracy was 97.8-15, a wonderful performance considering that about two seasons ago he was a novice and new beginner in the class contests at the lake—not that he was not an ardent and good angler, but he was not up in the post-graduate course that has made possibly more high class and skilled anglers in San Francisco than are to be found in any other large city in the world. Mr. Kierulff also won the championship honors in lure casting.

Both of these gentlemen anglers are to be congratulated upon a successful showing that was consummated by application, hard work and that wholesome American ambition to overcome every stumbling block in the way to skilled mastery of the rod and line. The two were tied for accuracy and decided the friendly rivalry at the re-entry meeting on Sunday.

Mr. E. A. Mocker, than whom there probably is not in this State a more skillful and sportsmanlike angler, won the second accuracy medal. The club will, in the near future, hold one of its noted meetings, where good-fellowship and congeniality are the reigning elements, upon which occasion the medals will be presented to the winners. The last re-entry scores are given below:

Saturday, class re-entry, Medal Series. Stow Lake, September 14, 1907. Wind, variable. Weather, cloudy. Judges, E. A. Mocker, C. G. Young, T. C. Kierulff. Referee, Dr. W. E. Brooks. Clerk, E. O. Ritter.

AT THE TRAPS.

The Golden Gate Gun Club's wind-up shoot for the season will take place at Ingleside to-morrow.

The Union Gun Club closed the regular monthly blue-rock season last Sunday, the 15th inst.

The winners in the medal race were: Champion class—C. C. Nauman (final winner), 23 out of 25 at 20 yards. First class—C. H. Collier (final winner), 22 out of 25, at 20 yards. Geo. Thomas, 24 out of 25, at 20 yards, winner for September. Second class—Houpt (final winner), 22 out of 25, at 20 yards. Third class—E. Hoelle, 19 out of 25, at 20 yards, tie with B. Patrick. Hoelle (final winner), won 20 to 18. Fourth class—J. Danielsen, 12 out of 25, at 20 yards, tied with J. Noonan. Danielsen (final winner), 16 to 12. J. Noonan, 15 at 18 yards, monthly winner.

The scores in the added money club shoot were: Nauman, 24 out of 25, Collier 18, Murdock 20, Thomas 19, Walsh 14, Hauer 16, Lewis 15, Frankel 13, Leary 15, Patrick 19, Hoelle 20, Shields 19, Lynch 19, Danielsen 15, Noonan 17, Dwyer 9.

Rufe Naylor of Kalgoolie, West Australia, a guest of the club, made his initial try at blue rocks, scoring 18 out of 25 at 16 yards, 17 at 18 yards and 18 at 20 yards. Messrs. Stewart and Snippen, also guests, broke 19 out of 25 at 16 yards and 17 at 18 yards, 16 at 20 yards respectively.

It will be pleasing news to every Coast sportsman to hear that Dick Reed has been recuperating at Inverness, on Tomales Bay, and has been doing so well that he proposes by the end of this week to start south, in order to attend the Southern tournaments. He states he will not, perhaps, be able to stand the strain of shooting, "but will be right there around the powder burners, and that's some little satisfaction, you know."

The tournaments begin at Santa Barbara on Sunday, under the auspices of the Channel City Gun Club, September 23d and 24th. Western Gun Club, Sherman grounds, Los Angeles, September 27th, 28th and 29th. Corona, Riverside county, October 4th and 5th. Douglas, Ariz., October 11th, 12th and 13th.

CHINESE PHEASANTS.

For a number of years the writer has been engaged in rearing game birds for re-stocking depleted game fields, the greatest demand being for the China ring-neck pheasant, no doubt the grandest game bird in existence to-day. These birds were first introduced into Oregon in 1882 from China, and so well did they adapt themselves to their new surroundings that the Department of Agriculture, Washington, D. C., is authority for the statement that this is one of the world's notable examples of game bird acclimatization. The State of Washington has been buying China pheasants as fast as the birds can be procured, a single county this season buying \$1,500 worth of birds for liberating at one time. The thought occurred to me that California sportsmen should be interested in a like movement, as your State has climatic conditions favorable for their natural propagation. After reading the lengthy article in your issue of August 3d on "Dove Shooting," I question the advisability of introducing a real game bird into California. It the "well known sportsman" quoted in this article, who calls "pleasantly basking in the tonneau of an automobile with cool drinks at hand picking off an occasional bird as they whizz across the road," or "lying under the shade of a tree with a keg of beer," should ever flush an old China cock bird he would die of heart disease. If an Oregon sportsman ever shot a dove I am sure he was ashamed to tell it. Shooting "coopers" may be "the lazy man's sport," but an idea of the real thing could not be expressed in better words than the following extract from an article in June Recreation, by my friend, E. E. Wilson:

"Have you ever hunted Chinese pheasants? If not, then some bright October morning come with me into the fields of the Willamette valley, Oregon, and let me present you to his imperial highness, with the one-eyed peacock feather and yellow jacket of the game bird kingdom. His realm is this old pasture of thick, short, tangled grass and matted weed. Ranging back and forth, your dog hunts free and easy with his head in the air. Suddenly his nose goes to the ground, the tail whips his sides rapidly, his speed is quickened but steady. Keeping within easy shooting distance, nerves tense, your follow close behind. His work becomes more intense. Now he hesitates as if to point, then on. Again he hesitates, and again forward. Next time and he will surely hold.

A few yards ahead, running swiftly, body close to the ground, never disturbing the surface of the grass to betray his presence, is the hunted quarry. Doubling back and forth, dodging from right to left to intense dismay of the keen-nosed dog, the wary bird is exercising his every instinct for escape. Then, as if in despair, he stops, crouches in a slight depression, hoping that the dog and man may pass without his detection, and but for that sharp nose he would be secure. There is but one chance left him now.

"You turn to your dog to find him 'frozen stiff,' standing as if transfixed, one foot up, nose and tail in line. With gun ready, safety forward, you stand in silent admiration of the picture before you, of which you are conscious you form a part. Leisurely you drink in the pleasure of this supreme moment, realizing that this is the very acme of the hunter's pleasure. You begin to wonder how long this delicious elysium may last, when suddenly, without warning, a streak of gorgeous color shoots into the air. Up he goes at an angle, then straight away like a streak of unleashed lightning. Automatically you fire. The trained dog breaks and retrieves the most beautiful game bird sportsmen ever sought. In childish ecstasy, almost hysterical, you are alternately petting your dog and admiring the lifeless thing he has laid at your feet. You have killed your first Chinese pheasant."

A Chinese pheasant hen in captivity will lay about sixty eggs in a season, and can be hatched and reared with a common hen, Cochon Bantams preferred, as easily as little chickens. About four hens can be mated with one cock, but when birds are desired for liberating they should be purchased in even pairs. The early fall is the best time to buy birds, in fact, that is about the only time they can be had at anything like a reasonable price, as the demand for them is rapidly increasing for re-stocking purposes from almost every State in the Union.

GENE M. SIMPSON.

Corvallis, Oregon, Sept. 15, 1907.

THE LATE PHIL C. MEYER JR.

Mr. Phil C. Meyer, a most popular and widely known fancier, passed away, we are most sorry to state, on September 6th, succumbing to a somewhat lengthy period of ill health. Mr. Meyer, about ten years ago, was a prominent and enthusiastic member of the St. Bernard Club of California and showed several good ones in those days, among others Le King and Alta Rachael, winning a number of times with these two. After the waning of interest in the big dogs Phil Meyer took up Bostons and Bulldogs, and followed the bent of his liberal fancy with several other breeds. He was always a generous exhibitor and an enthusiastic supporter of our

shows. To him and Mr. Irving C. Ackerman is to be credited the successful series of shows at Burlingame of the San Mateo Kennel Club, Mr. Meyer being, we believe, the original promoter of the one-day, open-air shows at the Crossways polo grounds.

A show here, or nearby, during the past decade without the presence of Phil Meyer and Mrs. Phil Meyer, who shared with Phil the well wishes and esteem of the fancy, did not seem properly filled out, but of late this had been, owing to the inroads upon his health, sadly noticeable. He was there in spirit, however, as the entries of Glenwood Kennels testified in the catalogue. The passing of this genial sportsman and staunch fancier was whispered by many at the recent Crossways show in words of sincere regret, hearty esteem for a departed friend and condolence for his family and relatives.

THE SPEED FOOL NUISANCE.

There was noted, several weeks ago in this journal, the killing of Mrs. Nunan's good Cocker Spaniel by a reckless automobile driver. Now our attention is called by Mr. Burnett to another inexcusable loss of a valuable dog, killed in a similar manner.

These instances are but two of many reckless acts of cruelty and damage on the part of chauffeurs. What is a frequent menace to our four-footed friends is rapidly becoming a constant danger to ourselves. There are municipal and county ordinances in force for the purpose of regulating the running of the modern car of Juggernaut, but there seems to be a connecting link missing to make these laws effective and respected. The following communication by Mr. Burnett is to the point and suggestive:

September 4, 1907.

Breeder and Sportsman—Dear Sir: If you see fit, I wish in your columns you would do what you can to crystallize a feeling which must be very prevalent among dog fanciers residing in San Francisco, so that an organization may be effected which might tend to suppress the evil I have in mind. I refer to the speeding of automobiles in the city limits, which endangers the life of every dog upon the streets. I am moved to action at this particular time because a day or two ago my Cocker Spaniel, Don Juan of Laguintas (Ch. Mepals Saxon-Laguintas Nell), a winner at the recent Oakland and San Francisco shows, was instantly killed by an automobile running at least twenty, and more likely, thirty miles an hour, at the corner of Clay and Broderick streets, in this city.

As usual, in such cases the automobile failed to stop, and inasmuch as the first thought of the person who was with my dogs was to look out for the injured one, he was unable to note the number of the machine, and as it turned off the street on the next block he had no opportunity to learn it.

I am prepared to spend time and money in perfecting an organization which will direct its efforts towards putting an end to this speeding habit, and I naturally turn first of all to all dog lovers in the city who are immediately concerned. If they will act there can be no doubt that the unorganized sentiment of the public generally can be made effective in our favor. In fact, the dog end of it is the most insignificant feature of the nuisance (except to an ardent dog lover). Practically the whole community is affirmatively averse to speeding, and why should the whole community tolerate something which is a nuisance to it for the benefit of a few inconsiderate and lawless people? That it does so is only because what is everybody's business is nobody's business, and because unorganized sentiment never counts for anything. I am satisfied that we could get one or more of the daily papers to take the matter up, as one in which the whole public is vitally concerned. I am furthermore satisfied, as a lawyer, that there is no difficulty in securing effective legislation and its enforcement.

If you will use your paper and address as a means for the bringing together of persons who feel as I do in the matter, so much the better, if not, and should you agitate it at all in your columns and anyone has any suggestions to offer in the matter, I shall be glad if they will address me at 1912 Broderick street. Yours very truly,

W. S. BURNETT.

The Fresno Kennel Club was recently organized with a large list of charter members on the roll.

The officers are Homer E. Katze, president; E. J. Boust, vice-president; R. A. Powell, secretary, and Peter Sharpen, treasurer.

Application was made for membership in the American Kennel Club and the necessary permit for a show to be held in Fresno during the present county fair, under American Kennel Club rules. For technical reasons, the time being too short for compliance with the rules, the application was denied by the Pacific Advisory Board. Although this was rather a damper on the newly organized kennel club, the fiat of Secretary Norman was accepted, but the show cult would not remain dormant, with the result that there will be held this week a dog show at the Fresno fair, an exhibit held under no rules. There is a large list of entries, the show would have been a three-pointer under American Kennel Club rules. Secretary Norman has advised the club of the disqualifying clause in the American Kennel Club rules concerning dog shows. If the Fresno club has an exhibit of dogs at the fair, under no rules whatever, the American Kennel Club is without jurisdiction in the matter.

GRAND CIRCUIT AT SYRACUSE.

Syracuse, September 9.—Although rain threatened all the afternoon, and at times a fine drizzle fell, the program of three races, beginning the Grand Circuit, in connection with the New York State Fair, was completed here this afternoon. The track was fully two seconds slow.

The Syracuse Stake, for 2:11 pacers, was won by Jennie W., after she had finished fifth in the first heat, which was won by Leland Onward. Jennie W. took the next three heats. This race being a three-money affair, under the rules all but Jennie W., Leland Onward and Thornway retired for the fourth heat, when a determined effort was made to defeat the first named. Thornway pressed her closely to the half, then weakened, and fell far back, while the driver of Leland Onward tacked on to Jennie W.'s wheel. There was a whipping finish, in which Jennie W. won by a scant head. The victory of Jennie W. was popular with the crowd. No pools were sold and such independent betting as was done was light.

Baron May had no trouble in winning the 2:19 trot in straight heats, Geers taking the second money with Dr. Ives. The 2:20 trot for three-year-olds was a procession in each heat. The summaries follow:

Trotting, 2:19 class, purse \$1,000—

Baron May, b g by Baron Wilkes (Sayles)	1	1	1
Dr. Ives, b g (Geers)	2	2	3
Fanny P., br m (Packer)	4	3	2
Tokio, gr g (Dickerson)	3	7	4
St. Peter, b g (Benyon)	5	4	7
Pitty Herr, b m (Cox)	6	6	5
Northwest, b s (Lewis)	7	5	6
Lucy Montrose, b m (McCarthy)	8	8	8
The Jester, br s (De Ryder)	9	dis	

Time—2:14½, 2:15, 2:12½.

Pacing, 2:11 class, purse \$5,000—

Jennie W., b m by Alcander (Sunderlin)	5	1	1
Leland Onward, b h (Murphy)	1	2	7
Thornway, b s (Cox)	2	5	8 dis
William O., blk g (Geers)	10	10	2 ro
Bonanza, b g (Thomas)	4	3	4 ro
Alice Pointer, b m (McDevitt)	3	9	5 ro
Aileen Wilson, blk m (Wilson)	9	4	3 ro
Mattie Chimes, b m (Toor)	7	6	9 ro
Reproachless, blk m (Starr)	6	11	11 ro
Major Mallow, b g (Mallow)	11	8	6 ro
Shaughran, b h (De Ryder)	8	7	10 ro

Time—2:05½, 2:06¼, 2:07, 2:06¼.

Trotting, 2:20 class, purse \$1,000—

Aquin, b c (King)	1	1	1
Sir Todd, br b (O'Donnell)	2	2	2
Ora Margrave, b m (Kinney)	3	3	3
Bertha Leyburn, b f (McCarthy)	4	dis	

Time—2:16¼, 2:16¼.

Syracuse, September 10.—The weather continued threatening to-day during the second day's program of the Grand Circuit races at the State Fair, but it did not rain until just before the fourth heat of the 2:12 trot. This heat was raced in semi-darkness, and the finish of the race was postponed till to-morrow.

The feature of the day was the Empire State Stake for 2:14 trotters, worth \$10,000, and it was won in commanding style by Ed Geers with Highball. Sonoma Girl was in the race, but the best she could do was to finish third in the two final heats, after capturing second position in the first. In the two later heats she was beaten by Wilkes Heart, the Hartford winner, for the place. The summaries:

Pacing, 2:05 class, two-in-three, purse \$1,000—

Ardelle, br m by J. H. L. (Geers)	1	1	1
Rudy Kip, br h (Murphy)	3	2	
Princess Helen, b m (McDonald)	2	5	
Judge Wilson, b g (Spencer)	4	3	
Nervolo, b h (Cox)	5	4	
Phalla, b m (Gatcomb)	dis		

Time—2:07, 2:05¼.

Trotting, 2:14 class, three in five, purse \$10,000—

Highball, b g by Dr. Hooker (Geers)	1	1	1
Wilkes Heart, b h by Great Heart (Estell)	3	2	2
Sonoma Girl, br m by Lynwood W. (McHenry)	2	3	3
Claty Latus, ch m by Pilatus (Dickerson)	4	5	5
Genteel H., br h (W. McDonald)	5	6	4
Thornfield, br h (Benyon)	6	4	6

Time—2:06¼, 2:06¼, 2:06¼.

Pacing, 2:09 class, two in three, purse \$1,000—

The Donna, dn m by Athadon (De Ryder)	1	1	1
Mixed Wood, blk g (Ernest)	2	3	
Schermerhorn, b g (Meeks)	3	2	
Byron Kay, b g (Geers)	4	dis	
Gambit, h g (Cox)	5	dis	

Time—2:08¼, 2:07¼.

To beat track record without wind shield—
Major Delmar (1:59¼), b g by Delmar (Alta McDonald) Lost
Fractional time—0:31¼, 1:03, 1:34, 2:06.

Syracuse, September 11.—Rain caused the races to be postponed until to-morrow.

Syracuse, September 12.—Lillian R., a Cleveland mare, driven by McDevitt, captured the \$3,000 Chamor of Commerce purse at the Grand Circuit meet here to-day. She won both heats handily and the next three horses finished in the same positions

in the second heat that they were placed in the first.

Mae Heart finally won the 2:12 trot, which was started on Tuesday, but was carried over until to-day on account of yesterday's storm. Margaret O. had an easy victory in the 2:08 trot, taking the big end of the purse in straight heats. The summaries:

Trotting, 2:12 class, three-in-five, purse \$1,200—

Mae Heart, ch m by Great Heart (McHenry)	1	3	2	3	1
Wild Bell, br g (De Ryder)	4	6	1	1	4
Zaza, blk m (Payne)	10	2	10	2	3
Gold Burr, ch g (Essery)	2	1	7	4	2
Cbime Bells, b m (Titer)	3	4	6	ro	
Alice Edger, b m (Benyon)	7	5	3	ro	
The Paiolet, blk g (McDevitt)	11	7	4	ro	
Paul Kruger, b g (Cox)	9	11	5	ro	
Billy B., b g (McCarthy)	6	9	8	ro	
Lucretia, br m (Geers)	8	10	9	ro	
Sarab Hamlin, br m (Packer)	5	8	dis		

Time—2:10¼, 2:09¾, 2:09¾, 2:12½, 2:13¼.

Trotting, 2:09 class, two-in-three, purse \$3,000—

Lillian R., b m by J. T. (McDevitt)	1	1		
Silko, b s (McCarthy)	2	2		
Athasbam, b s (De Ryder)	3	3		
Emboj, b g (McDonald)	4	4		
Tuna, b m (Kelley)	5	8		
Bonnie Russell (Thomas)	8	5		
Waters, ch g (Loomis)	6	6		
John Caldwell, b g (Geers)	6	7		

Time—2:12, 2:10½.

Pacing, 2:15 class, three-in-five, purse \$1,200—
