

CITY OF SOMERVILLE

MASSACHUSETTS

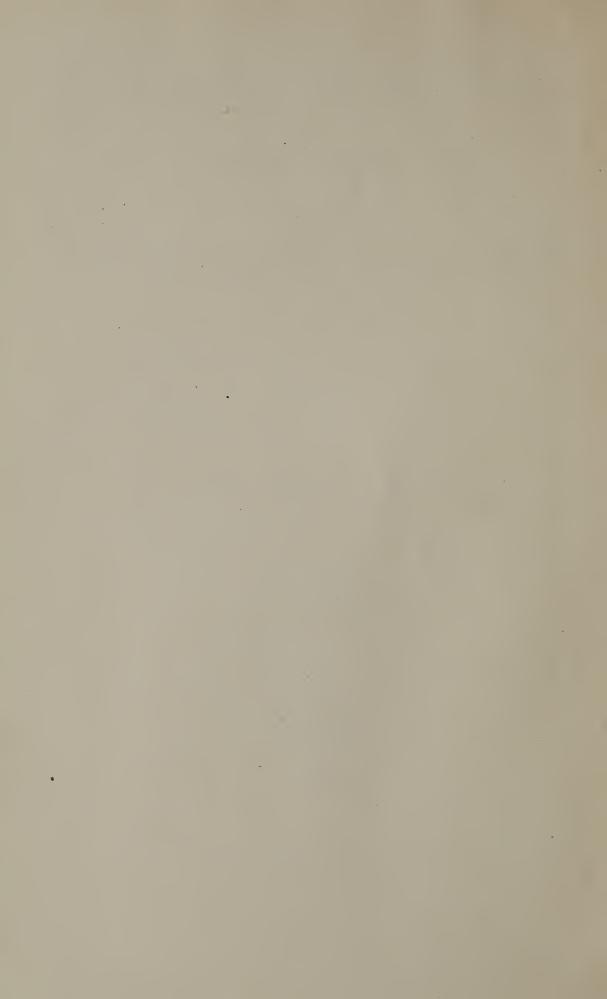

ANNUAL REPORTS

1904

With Mayor's Inaugural Address
Delivered Jan. 2, 1905

SOMERVILLE JOURNAL PRINT
1905

INAUGURAL ADDRESS

DELIVERED BY

HON. LEONARD B. CHANDLER, MAYOR,

MONDAY, JANUARY 2, 1905.

GENTLEMEN OF THE BOARD OF ALDERMEN: -

Somerville is a city of which much may well be said. Each one of our municipal departments has done and is doing work that is both interesting and profitable for us to consider. But the records of this work will be found in detail in the forthcoming annual reports.

I have decided, therefore, to condense as much as possible the story of the past year's work, and shall endeavor to give you, apart from the usual financial statement, which will be printed, but not read at this time in full, a brief summary of the chief items of interest, together with some recommendations for your consideration.

This method is a departure from my own course of one year ago, and also from that followed by my predecessors for a long time, but is in accord, I find, with that pursued by the mayors of many cities in their inaugural addresses or annual messages.

In brief, the year just closed has been another one of advancement for our honored municipality. It has grown in population, in wealth, and in beauty.

Funded Debt.

The total funded debt of the city January 1, 1904, was \$1,505,500. This debt was increased during the year \$132,500. It was decreased \$139,500, leaving the net funded debt January 1, 1905, \$1,498,500, a net decrease of \$7,000.

Taxable Property.

The total amount of taxable property is \$58,137,900, of which \$51,836,200 is real estate, and \$6,301,700 is personal estate, including non-resident bank shares. At a rate of \$17.20 on each \$1,000 of valuation, the tax is \$999,971.88. There are 19,203 polls at \$2.00, making \$38,406. We received from street watering \$20,914.68, making the total tax levy \$1,059,292.56. The total number of persons assessed, resident and non-resident, was 26,466.

Of the amount received in taxes, \$157,000 is required for the debt provisions; \$165,201.88 are state and county taxes, metropolitan sewer, etc., matters over which the city has no control; \$346,500 is used for current expenses of departments, over which the board of aldermen has no control; \$331,270 is the amount for current expenses within control of the board of aldermen. The same statement, based upon the \$17.20 per thousand, is as follows: Of each \$17.20, \$2.84 is for state, county, and metropolitan taxes; \$2.70 for debt requirements; \$5.96 for current expenses, over which the board of aldermen has no control; \$5.70, current expenses within control of the board of aldermen.

In addition to the amount received from taxes, there was available last year the sum of \$216,847.65 on water income account; we received \$27,683.77 from corporation and bank taxes; from the clerk of the courts, \$4,189.30; from the county treasurer, for dog licenses, \$4,193.50; from the state, the street railway tax, \$43,655.40; and from the Boston Elevated Railway tax, \$7,965.91; a total of \$304,535.53, making the total amount available from taxes and from other sources, \$1,363,828.09.

The estimated borrowing capacity of the city January 1, 1905, was \$141,000. By the first of October this will be increased \$120,500, making a total borrowing capacity of \$261,500.

The City's Finances.

Funded Debt.—The funded debt of the city January 1, 1904, was as follows:—

Funded Debt, City Loan .		\$1,108,500 00
Funded Debt, Sewer Loan.		203,000 00
Funded Debt, Paving Loan		45,000 00
Amount carried forward.		\$1,356,500 00

Amount brought forward		•	\$1,356,500 00
Funded Debt, Water Loan .			123,000 00
Funded Debt, Metropolitan	Park	Assess-	
ment Loan			26,000 00
			\$1,505,500 00

The debt was increased during the year by appropriations made by the board of aldermen as follows:—

Public Buildings Construction:—	
Dormitory at City Home	\$6,000 00
Engine House in Ward Two	4,000 00
Primary School Building (to relieve the	
schools in Ward Six)	30,000 00
Public Grounds:—	
Completion of Prospect Hill Park	2,000 00
Highways:—	
Construction	10,000 00
Paved Gutters and Crossings	14,000 00
Paving Broadway, Bow and Summer	
Streets	21,500 00
Sidewalks Construction	10,000 00
Sewers Construction	25,000 00
Renewal of Funded Debt	10,000 00
Amount borrowed during the year .	\$132,500 00

The debt was reduced during the year by payments as follows:—

Funded Debt, City Loan	\$107,500 00
Funded Debt, Sewer Loan	11,000 00
Funded Debt, Paving Loan	5,000 00
Funded Debt, Water Loan	15,000 00
Funded Debt, Metropolitan Park Assess-	
ment Loan	1,000 00
/	
Amount paid during the year	\$139,500 00

Leaving the funded debt of the city January 1, 1905, \$1,498,500 (a decrease of \$7,000 from the previous year), classified as follows:—

City Loan bonds bearing interest at 3½	
per cent	\$299,000 00
City Loan bonds bearing interest at 4	
per cent	809,500 00
Amount carried forward	\$1,108,500 00

Amount brought forward	\$1,108,500	00
City Loan Sewer bonds bearing interest		
at $3\frac{1}{2}$ per cent	50,000	00
City Loan Sewer bonds bearing interest		
at 4 per cent	160,000	00
City Loan Sewer bonds bearing interest		
at $4\frac{1}{2}$ per cent	7,000	00
City Loan Paving bonds bearing interest		
at 4 per cent	40,000	00
Water Loan bonds bearing interest at 4		
per cent	98,000	00
Water Loan bonds bearing interest at 5½		
per cent	10,000	00
Metropolitan Park Assessment Loan		
bonds bearing interest at 3½ per cent.,	25,000	00
Total Funded Debt January 1, 1905 .	\$1,498,500	00

The foregoing amount represents the net indebtedness of the city, the unfunded liabilities for the temporary loans, etc., being equaled by its assets, which consist of uncollected taxes, sewer and sidewalk assessments, etc.

Taxes.—The assessors' warrant for the tax levy assessed upon the polls and estates of the inhabitants, as of May 1, 1904, was duly submitted to the collector.

The total amount of taxable property was \$58,137,900, and the rate established was \$17.20 on each \$1,000 valuation, as follows:—

Real estate, valuation .					\$51,836,200	00
Personal estate, valuation					6,220,500	00
Non-resident bank shares		•		•	81,200	00
Total valuation .					\$58,137,900	00
At a rate of \$17.20 on each	h \$1	,000	valu	a-		
tion					999,971	88
Polls, 19,203 at \$2					38,406	00

Highways.

The maintenance and improvement of the highways has necessitated a vast amount of work upon the part of both the street commissioner and the city engineer and their assistants.

The chief item of work accomplished is the paving of Bow and Summer streets, from Union square to School street, with bitulithic pavement, and the consequent widening of the roadway and laying of double tracks therein.

The complete removal of the Holland-street ledge, now almost accomplished, will give opportunity for a great improvement. A sixty-foot street should be laid out through this property, to connect with Cameron and Packard avenues. A fine thoroughfare would thus be afforded between North Cambridge and Tufts college.

Arrangements will soon have to be made for a substantial supply of trap-rock or other high-grade stone for our highways.

Ten streets, a total length of over two miles, have been constructed, and twenty-nine streets, a total length of nearly four miles, have been macadamized or re-surfaced. Nearly four and one-half miles of edgestones have been set.

I recommend that Pearl street, from Cross street to Gilman square, and Medford street, from Gilman square to Magoun square, be paved with bitulithic, vitrified brick, or some permanent paving, other than granite blocks.

Bridge at Lowell Street.

One of the most needed improvements in our city is a bridge over the Boston & Lowell railroad tracks at Lowell street. Authority has already been given to the city solicitor to bring the matter before the county commissioners, and it is expected that this bridge, long anticipated by many people, will soon be a reality.

Health Department.

The mortality in our city has been about the same as in the previous year, less than 1,000 persons having died from all causes.

The number of contagious diseases, however, was largely in excess of that of 1903. I firmly believe in the necessity of a contagious disease hospital, and I recommend that a sufficient appropriation be made to properly equip the house which has already been placed in the custody of the board of health for this purpose.

This board has taken an important step in line with the warfare which is now becoming general against that terrible disease, consumption. It has issued a regulation by which it "adjudges that pulmonary tuberculosis is an infectious and contagious disease, dangerous to the public health," and which compels special precautions in every case for the protection of the public.

The great slaughtering industry in our city, which, while now carried on under United States inspection, is still subject to the oversight of our inspector of animals and provisions, shows a decided increase over 1903 in the amount of work done, the number of animals killed being considerably over one and one-half millions.

Water and Sewerage Systems.

Those of our public works which are under ground, like the water and sewerage systems, do not, of course, attract such public

attention as do the highways, the public buildings, etc. They are, however, highly important to our health and convenience.

Over one mile of new water main has been laid the past year. The installation of meters should be extended until their use becomes general, as this is the fairest method of water distribution. I believe that they should be placed in all apartment houses for more than two families this year. The rates for metered water have been reduced, so that now consumers pay only sixteen cents per thousand gallons, which is the lowest rate in the metropolitan water district.

Over two miles of sewers and storm drains have been constructed. The "separate system" sewers (for house drainage only) should be extended each year until all areas which are subject to becoming flooded are thus improved. Our storm-drain system should be added to in the near future by the construction of drains, as follows: In the North Somerville district; along the northeasterly side of Highland avenue, between Cedar and Lowell streets; and near Somerville avenue, at the East Cambridge line.

Some idea of the extent and importance of our water and sewerage systems may be had from the statement that there are ninety miles of water mains and over ninety-one miles of sewers. Our water system has cost us over \$800,000 to construct, and the sewerage system over \$1,100,000. Since the establishment of the metropolitan water system (in 1895) and the metropolitan sewerage system (in 1889), we have paid to the state for water assessments nearly \$350,000, and for sewer assessments nearly a half-million dollars.

Sealer of Weights and Measures.

The work of the sealer of weights and measures has further increased. He has sealed about 1,400 scales, varying from 5,000-pound platform scales to spring balances, nearly 4,000 weights, and about 85,000 dry and wet measures. Over 150 scales, weights, and measures have been adjusted, and about 2,000 condemned.

Poor Department.

The number of individuals and families requiring aid from the board of overseers of the poor has somewhat exceeded that of the year 1903. The total expenditures of the department, however, have been less than during that year, owing to the assuming by the state of the payment of the expenses for the care of the insane. The receipts from the sale of produce and wood and the board of certain inmates at the city home have exceeded those of 1903.

Somerville Hospital.

I recommend that the usual sum of \$5,000 be appropriated for the Somerville hospital for the care of the sick poor.

Public Library.

Our progressive librarian is much alive to the idea that a library whose books were not read would be of little value. A statement published this year by the librarian of congress shows that the Somerville library now leads all the libraries in New England in circulation, with the single exception of the great Boston public library.

The supplying of special libraries to the public schools and church Sunday schools is a means of circulation which gives many advantages and has proven very popular.

Electrical Department.

Pursuant to a recent order of the board of aldermen, the mayor has petitioned the legislature for such legislation relative to poles, wires, and other electrical appliances, apparatus, and structures as will cause the greater part of such objectionable features to be removed from our streets. This important work will, of course, require some years to complete.

Five additional miles of wire have been run for our fire alarm and police signal systems, much of the old wire has been replaced by new, and the systems have been otherwise improved.

Street Lights.

Somerville is one of the best-lighted cities in the commonwealth, but the amount expended for this service is very large. We now have 491 arc and 483 incandescent lights.

The price, per year, of an arc light is \$105, and of an incandescent, \$30. On residential streets, except where they join or intersect each other, two incandescents, instead of one arc, will fill every need, and I recommend this substitution whenever pos-

sible. The number of arc lights can be reduced from 491 to 475 without affecting the price per light.

Buildings Department.

Much important work has engaged the attention of the commissioner of public buildings. The new engine house in Union square has been completed, a large dormitory for men added to the city home, the construction of the George O. Proctor school building on Hudson street has been begun, three rooms in the English high school have been re-arranged, and the Bell and Burns schoolhouses have been thoroughly renovated.

By an order just passed, a system of fire escapes will soon be installed on the Bell schoolhouse.

Appropriations will have to be made this year for the furnishings, etc., of the new engine house in Union square and for the heating, plumbing, and furnishings of the Proctor schoolhouse.

The heating arrangement for the new dormitory at the city home is but temporary. There is a heating plant in the annex to the Knapp schoolhouse, which is not in use, that would make an excellent equipment for the entire set of city home buildings. The furnace systems in the Pope and Morse schoolhouses should be replaced by steam heating plants. I recommend that sufficient amounts be included in the appropriations for public buildings to admit of at least two of these three improvements, which would ultimately result in a financial saving.

Three hundred permits for new buildings and alterations have been issued, and, as a result of this construction work, property to the value of \$785,000 has been added to the city.

Soldiers' Relief.

The sum of \$21,000 was paid out under the soldiers' relief law for the support of Civil war veterans, their widows and families. Such is Somerville's eloquent tribute to the men who saved the nation. The city has also dispensed for the state the sum of \$14,000 for state aid, and paid out \$2,100 for military aid, one-half of which latter amount is returned by the state. Nearly \$500 has also been expended for the state for soldiers' burials. In addition, the city spent over \$700 for turkeys, which were distributed as its Thanksgiving donation to 300 needy survivors of the Civil war, or the families of such veterans.

Parks and Playgrounds.

At least the usual amount of work has been done in beautifying our parks, which are among Somerville's chief attractions.

Great attention has been paid to the matter of providing and equipping playgrounds in all parts of the city. Five fields have been maintained for baseball and football playing; also an outdoor gymnasium, bicycle track, and tennis courts. Broadway athletic field at West Somerville has been greatly improved, at the expense of the High School Athletic association, by additional seats, so that the seating capacity of the grandstands is now nearly 5,000. The Glen-street playground has been enlarged by obtaining the use of adjoining land. Permission, without expense to the city, to use private lands east of Broadway park and at the corner of Highland avenue and Cedar street has also been secured, and these have been converted into admirable playgrounds. Another portion of the city's land at the corner of Broadway and Cedar street, in front of the city's buildings, has been partly graded, and, if completed this spring, will make another fine playground, and add to the appearance of our public property there.

Shade Trees.

Eight hundred and thirty shade trees have been set out on the highways, which will soon result in greatly added beauty to our city. Hardy maples have been placed on Broadway, from the Charlestown to the Arlington line, except where shade trees already existed. Powder House boulevard has been adorned with the fast-growing Carolina poplars between Powder House square and Curtis street, and numerous trees have been set out for the owners in front of single estates. There are now 10,000 public trees in the city, and nearly 16,000 on private lands.

I recommend that shade trees be set out the entire length of Highland avenue.

The trees and shrubs throughout the city are in excellent condition, so far as the ravages of the brown-tail and gypsy moths are concerned, owing to the persistent warfare waged against these pests. The moth problem is one which is attracting great attention in the municipality, the state, and the nation. It is probable that concerted action will result in helpful legislation by both the legislature and congress.

I recommend that the city charter be so amended as to provide for the appointment of a city forester, who shall have charge of all the public trees in the city.

Fire Department.

The equipment of the fire department has been substantially increased. A splendid three-door station, begun during the administration of my immediate predecessor, now adorns Union square, and supersedes the old station at the corner of Washington and Prospect streets, which was erected by the town in 1854. A combination apparatus to carry ladders, chemical tanks, and hose for water service has been contracted for, to be placed in the station at the corner of Broadway and Cross street. Engine No. 2 has been thoroughly repaired.

About 300 alarms of fire have been sent in, the total loss being \$66,000.

There are 115 men in the department, thirty-three permanent and eighty-two call men. Early in the year the department suffered a grievous loss by the death of the assistant engineer, Nathaniel C. Barker, who had been connected with it many years.

For the past eleven months two captains in the department have acted as assistant engineers, each for a district comprising about one-half of the city. This plan has worked well, and with a financial saving. I recommend that section 1 of the ordinance relating to the fire department be so amended as to provide for two assistant engineers, instead of one, who shall also be permanent captains in the department, and that the compensation of such assistant engineers be \$100 each, per annum, in addition to the salaries received by them as permanent captains.

Police Department.

It is a gratifying fact that, while the arrests for certain offenses have exceeded those of the previous year, the total number for all offenses has been less; and there is no reason to suspect that the police officers have been less watchful than heretofore. There has not been a single case of assault or robbery of a felonious nature.

The department suffered a genuine loss by the resignation of Sergeant Arthur E. Keating, who is now a member of the district police force of the commonwealth.

Schools.

The principal item which the taxpayer has to meet in connection with our public school system is the item of expense. I am sure you will pardon this allusion to a well-worn subject when I inform you that the expenses of our schools the past year, for salaries, supplies, and care of buildings,—and not including any expenditures for new schoolhouses,—has been \$315,000, or nearly one-third of the total taxes levied for all purposes. On the other hand, when we realize that we now have approximately 12,000 pupils, cared for by over 300 teachers, it is not hard to account for this enormous expenditure.

By the acceptance of a special act of the legislature at the last state election, the voters of our city provided that the mayor and the president of the board of aldermen should become members of the school board, by virtue of their respective offices.

The High School Problem.

For a number of years, one of the gravest questions which has confronted the city government has been that of additional accommodations for the two high schools. Several plans, suggesting the erection of a new building on Central hill or elsewhere, and even involving the tearing down of the present Latin building, have been carefully considered by various committees and individuals.

The present crowded condition of the schools seems to demand an immediate settlement of the difficulty. After having considered the matter during the past year, I have concluded that the best solution of the problem is to make additions to both of the present buildings, which I believe can be done without injury to their beauty. Thus will the present and future needs of the schools be met, the sightly view from Central hill will be preserved, and the end sought for will be realized at the minimum of cost and without appealing to the legislature for authority to borrow money.

Therefore, I recommend that plans be prepared and adopted for two wings to be added to the English building, and for an extension to be added to the rear of the Latin building. Each new wing of the English building should contain six classrooms, accommodating 300 pupils, besides recitation and coat rooms, etc. The extension to the Latin building should be sixty feet

in depth, and the full width, height, and style of the present building.

The expense of this work, including a sufficient addition to the capacity of the heating plant, would be about \$110,000. However, the only portion which should be done this year is one wing on the English building, costing \$30,000. The extension to the Latin building should be done next year, and the second wing of the English building, and also the addition to the heating system, when required.

Elections.

It is the plain duty of every American citizen to record his choice of parties and men at the polls. Any man who does not exercise his rights in this matter is certainly lacking in his sense of responsibility to his country, his state, and his municipality. But the duty of voting should be made as easy as possible. Under the present law, it is necessary for the voter who does his full duty to go to the polls four times each fall—twice to the primaries and twice to the elections. This duty could be made easier, the expense to the city could be greatly reduced, and voting would become more general by the holding of but one caucus and one election.

I recommend that Somerville take the initiative in the work of securing the enactment of a general law which shall provide for one annual election for all purposes, such law to be subject to the acceptance of the voters of the various cities and towns.

Metropolitan District Affairs.

A number of the acts and resolves of the legislature of 1904 affect Somerville, as a part of the metropolitan district, more or less seriously. The most important work of our city solicitor during the year has been in connection with these matters.

By an act of the legislature (intended to supplement an act passed in 1903 authorizing Cambridge, Somerville, Arlington, and Belmont to improve Alewife brook and its tributaries), the building of a dam across the Mystic river, at or near Cradock bridge in Medford, and the formulating of a scheme for purifying said river, Alewife brook, and other waters, were authorized. This latter proposition makes the problem difficult and subject to much delay.

By a resolve of the legislature, consideration is now being given to the advisability of taking or constructing, at the expense

of the metropolitan sewerage district, certain expensive sewers in Wakefield, Lexington, Waltham, and elsewhere. Somerville's share of this expenditure would probably exceed \$30,000. I recommend that our senator and representatives in the legislature be requested to oppose this proposition. Its adoption would work a great injustice to our city.

The method of apportioning the expenses of the metropolitan water district has been changed by act of the legislature, so that, beginning next year, we shall pay one-third of our assessment upon our valuation, and two-thirds of it upon our water consumption. This change is believed to be the least expensive to Somerville of all the changes proposed, though, as estimated, it will add about \$5,000 to our annual assessment, unless our consumption is reduced. As two-thirds of our assessment for 1906 will be based upon our consumption for 1905, it is advisable that, by the further installation of meters, and by every reasonable precaution, the waste of water be reduced to the minimum.

As recommended by me last year, a special committee of the board of aldermen was appointed to act in conjunction with a citizens' committee of twenty-five selected by me, to urge upon the metropolitan park commissioners the construction of a boulevard through Somerville and Cambridge, to connect the Fells and the Fenway. A joint meeting of these committees was held, and a sub-committee appointed to seek the co-operation of the city of Cambridge. A communication was addressed to the mayor of Cambridge, which was referred by him to the city council. I trust the matter can be still further advanced the present year, and I urgently recommend that our senator and representatives in the legislature be asked to use their utmost endeavors in its favor.

I recommend that the plan of taking portions of the banks of the Mystic river in Somerville, which has been more or less seriously considered for several years, be urged upon the metropolitan park commission.

I recommend, also, that this commission be requested to take the Powder House boulevard, which should become, by a proper connection at West Medford, a part of the great metropolitan park system.

No-License.

Somerville's record on the right side of the local option matter gives great cause for congratulation. Our grand no-

license majority at the recent election was the largest in our city in ten years, and the largest but one in our history. Somerville has long been recognized as the stronghold of no-license. She is certainly entitled to the honor this year.

Gentlemen: We have been placed in these honored and honorable offices by the votes of our fellow-citizens—constituents, if you please—who have confidence in us and love for the city of their homes. Many of us have been honored for at least the second time. As frequent repetition of work gives skill to the hand and cunning to the eye, we who have been returned should profit by those duties already done.

To those of you who are with us for the first time we extend a welcome,—hoping, trusting that your stay with us will give you good cause for satisfaction.

May harmony and progress be our watchwords,—that is my New Year's greeting to you all.

REPORT OF THE CITY TREASURER AND COLLECTOR OF TAXES.

Treasurer's Office, January 12, 1905.

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen: The undersigned presents herewith the thirty-third annual report of the financial condition of the city, and a statement showing, in detail, the receipts and disbursements for the year ending December 31, 1904.

Public Property.

The value of the public property of the city December 31, 1903, was \$3,715,079.21. The property acquired during the year was as follows:—

Water Works, Land and Bui	lding	ζs,	94,500	feet				\$32,000 00
Water Works Extension		•						14,475 37
City Home, Land adjacent								100 00
Dormitory								5,789 78
Bingham School Addition				•	•	•		17,816 49
George O. Proctor School				•				5,585 20
Engine House in Ward Two					• •			28,286 68
Historical Building .								253 50
Prospect Hill Park						•		1,630 70
Rifle Range in Waltham, B					•			693 21
Furniture, School					•		•	2,390 00
School Books (Bingham)		•	•	•		•	•	1,200 00
Outdoor Gymnasium .	•	•	•	•	•		•	800 00
								
								\$111.020.93

Making the value of the public property December 31, 1904, as per Table A, \$3,826,100.14.

Funded Debt.

The funded debt December 31, 1903, as per Table B of the last annual report, was \$1,505,500.

The debt was increased during the year by appropriations as follows:—

Public Buildings Construction:—		
Dormitory at City Home	\$6,000	00
Engine House in Ward Two	4,000	00
Primary School Building (to relieve the schools in		
Ward Six)	30,000	00
Public Grounds, Completion of Prospect Hill Park	2,000	00

APPROVAL OF TREASURER'S REPORT.

In Committee on Finance, February 3, 1905.

To the Board of Aldermen of Somerville:-

The committee on finance, to which was referred the report of the treasurer and collector of taxes for the year 1904, reports that, in conjunction with the auditor, it has examined and audited the books and accounts of the treasurer and collector of taxes for the year ending December 31, 1904, and in the manner prescribed by section 7 of chapter 4 of the Revised Ordinances of 1900.

A careful comparison has been made with the books of the city auditor and with financial statements received from the several committees, boards, and officers of the city accountable for the use of the

city funds.

The cash account has been verified by actual count of the cash on hand, and the balances shown to be in the banks of deposit have been

confirmed by the officials of the banks.

The committee reports that no errors were discovered in the accounts and books of the treasurer and collector, and recommends that his report be accepted and printed in the annual reports of 1904.

Finance.

In Board of Aldermen, February 9, 1905. Accepted.

Frederic W. Cook, Assistant City Clerk.

REPORT OF THE SCHOOL COMMITTEE.

School Committee Rooms, December 23, 1904.

Ordered, that the annual report of the Superintendent be adopted as the annual report of the Board of School Committee, it being understood that such adoption does not commit the Board to the opinions or recommendations made therein; that it be incorporated in the reports of the City Officers; and that 1,000 copies be printed separately.

G. A. SOUTHWORTH,
Secretary of School Board.

SCHOOL COMMITTEE, 1904.

REPORT OF THE SUPERINTENDENT OF SCHOOLS.

To the School Committee of Somerville:—

In the preparation of the record of the thirty-third year of the school life of the city of Somerville, the general plan followed in previous years has been adopted. It is (1) the annual report of the superintendent to the school committee; (2) custom makes it the report of the school board to their fellow-citizens which the law requires that body to make annually; and (3) it is the school history of the year, and records many facts which should be permanently available for future reference. That there may be a comprehensive view of salient points, there is first given a

Existing Accommodations. The 12,000 public school pupils are at present housed in twenty-five school buildings. Of the two high schoolhouses and their 1,250 occupants, something will be said under the head of "High Schools." The elementary school pupils occupy twenty-three buildings,

One containing eighteen classrooms.
One containing sixteen classrooms.
One containing fourteen classrooms.
One containing thirteen classrooms.
Eight containing twelve classrooms each.
Two containing eight classrooms each.
Four containing six classrooms each.
Four containing four classrooms each,

making a total of 213 regular classrooms, which will accommodate 9,800 pupils as classes average throughout the city. sides these classrooms, there are at the present time six other rooms in use. Two of them are ward rooms, one in the Knapp and one in the Glines. Three originally designed for recitation rooms are in the Carr building; two of them hold twenty-four pupils each, and thirty-five are crowded into the third room. To accommodate the surplus ninth-grade pupils in the Hodgkins school, during the summer vacation a new room was made by combining a teachers' room with a portion of the corridor. Twenty-four pupils are crowded into this room. These six rooms to which reference has been made are by no means wholly unsuitable for school uses. They were not intended, however, for classrooms, and most of them are too small to accommodate the number of pupils generally assigned to a classroom, and are therefore abnormally expensive. But adding to the capacity of the legitimate classrooms the 200 seats furnished by these smaller rooms, we have a seating capacity of 10,000 for the elementary schools.

Eight of these classrooms are used by two divisions of first-grade pupils, one attending in the forenoon, and the other in the afternoon. Six additional schoolrooms are required for these half-time pupils. There are at present two rooms in the Lincoln school containing 120 pupils. A portion of these children might be sent to the ward room in the Hodgkins school, a room belonging to the same class as those just described.

The twelfth room in the Bennett school in ward one was occupied in September. This proves that the apprehension that too large a building was being constructed had really no foundation. Financial limitations have probably prevented the erection of schoolhouses large enough to supply anything but the pressing needs of the time. A wise economy foresees prospective requirements, and lessens net expenditures by building for the future.

The addition of eight rooms to the Bingham school was completed and occupied in March. This addition doubles the capacity of the building, and furnishes sixteen excellent classrooms, fully equipped and conveniently arranged. Seventy-five children were transferred to this school from the Brown, and it was found necessary in September to send forty sixth-grade pupils out of the Bingham district to the Forster, in order to make room in the former building.

The original Bingham schoolhouse was erected in 1887. Its capacity was doubled in 1893. The cost of the entire structure is as follows:—

Cost of original lot \$1,880.64 Cost of original building 13,224.36	
Total cost	\$15,105.00 14,916.87
Total cost of second enlargement	36,410.55
Total cost of the building as it now stands	\$66,432.42

In accordance with the recommendation of the board for the relief of the schools in ward six, the construction of an eight-room building on Hudson street, in the rear of the armory, was begun October 1. It will be completed and ready for occupancy in September, 1905.

Length of School Year. By an amendment to the rules, the time of opening schools in September and of closing them in June may vary from year to year, as determined by vote of the board at its February meeting. In 1904, the time of closing the schools for the summer vacation was fixed at noon of Friday, June 24, and the fall term began Wednesday, September 7. This made the length of the school year in 1904 theoretically 385 school sessions, or thirty-eight and one-half weeks. Deducting five legal holidays, four and one-half days lost on account of weather, and one and one-half days at the Thanksgiving recess, the actual number of school sessions is reduced to 363, 36.3 weeks. In other words, the schools have been in session this year 1813 days. When it is remembered that the schools have been in session on less than one-half of the full number of days in the year, that the school day is but four and three-quarters hours long, that there are two holidays every week, and three vacations of a week each, aside from the long vacation, distributed throughout the year, it must be conceded that the normal strain imposed upon children by their school life is not sufficient to occasion any alarm. In view of the necessary shortness of the school year, it is important that interruptions of every sort be reduced to the minimum, and that there should be the utmost economy of time on the part of every teacher.

The year has been unusually free from interruptions. The only loss of time that might possibly have been avoided has been occasioned by the dismissals of classes on account of cold rooms. There have been sixty-five class dismissals during the year for this reason. Besides, twelve class sessions have been lost through the use of schoolrooms as voting booths.

The statutes require that the high school year shall be forty weeks in length. It is difficult, if not impossible, to continue the

high school sessions beyond those of the elementary schools. This could only be done by omitting one week of vacation between January and July, and prolonging the high school term to the very last day of June. This, however, would produce an undesirable lack of uniformity, and would be a very unpopular measure. Nothing remains except to make the thirty-eightweek year equivalent to one of forty weeks by an intensive use of its opportunities. The table below shows the

Length	of	School	Year.
--------	----	--------	-------

Four weeks ending	Possible Sessions		Omitted Sessions.
January 29	40	34	Excessive cold, 4; storm, 2
February 26	40	37	Storm, 1; Washington's Birthday, 2
April 1	40	40	
April 29	40	37	Storm, 1; Patriots' Day, 2
June 3	40	38	Memorial Day, 2
June 24*	29	27	Bunker Hill Day, 2
September 30	36	35	Storm, 1
October 28	40	40	
November 25	40	35	Thanksgiving recess, 5
December 23	40	40	
	385	363	

^{*3} weeks.

School Population. There are two ways of ascertaining the number of children of school age in the city. The first is by the school census, authorized by statute to be taken between the first of September and the fifteenth of November of each year. The second way is by counting the children actually in school, and adding to this number the children found by census takers to be out of school for one reason or another.

We have this year a conspicuous illustration of the inaccuracy of census returns. Although, with one exception, the same enumerators were employed this year as last, the returns, as shown in the following table, indicate a decrease of 114 in the number of school children between five and fifteen years of age on the first of October, 1904. At that time there were actually in public and private schools 11,941 children, or 314 more than were present on the corresponding date in 1903:—

		1904.	1903.	Change.
Ward	1	1.866	1,780	+86
"	2	2,546	2,533	+13
"	3	975	947	+28
"	4	. 926	1,006	80
"	5	1,869	1,881	—1 2
"	<u> </u>	.1,710	1,875	—1 65
6.6	7	1,416	1,400	+16

Ţ	otal	1,308	11,422	114

According to enumerators, wards four, five, and six showed a decrease of 257 children. It is apparent to every one conversant with those wards that such cannot possibly be the case. Indeed, the numbers in the schools show the incorrectness of the returns.

The state census is not worth to the city the money it costs. It discloses the children that are out of school, now and then discovers one at work who ought to be in school, and reveals a few illiterate minors, who, under the law, are forced to attend the evening schools. Regarding the class of illiterate minors, however, it may be said that most of them are fourteen years of age or upwards, and are employed in manufacturing establishments. A thorough canvass is made in the month of September of all establishments employing illiterate minors, their names taken, and attendance upon the evening schools enforced.

Additional Accommodations. In view of the long-continued discussion regarding high school needs, it may be wondered that the subject should be mentioned in this report. The exigencies, however, are so great and the need of some immediate action so urgent that it is well that the facts should be put afresh before the public.

There are at the present time in the Latin school 422 pupils to occupy its 437 seats. Something, however, besides a requisite number of seats is demanded to make an efficient school. must be as many suitable rooms as there ought to be instructors in the teaching corps. There are thirteen teachers in the school. This number is determined by the fact that there are only thirteen rooms in which instruction can be given. Two of these are unsuitable makeshifts, used only under the strain of necessity. This limitation in the number of teachers places an average of thirty-two pupils under the instruction of one teacher. number is exceptionally large. In most schools, and in all the best schools, twenty-five is considered a suitable class unit. Taking this number as a standard, the Latin school should have sixteen teachers besides its principal, and sixteen suitable rooms for them to use. If these rooms were provided, much would be done to increase the efficiency of the school, but by no means would all the requirements of the case be met. What more is needed will be considered farther on.

In the English school there are now registered 811 pupils. Originally constructed for the accommodation of 600, it is only by utilizing every available foot of space that seating accommodations have been provided for such a large number. During the vacation one room was partitioned, thus providing an extra classroom. Many of the seats in the classrooms were taken up and placed end to end, reducing the number of aisles in the ratio of three to two. Desks were put into every available corner, and these seats, with those in the lecture hall, the physical laboratory, and the biological laboratory, have enabled us to find seat-

ing room for nearly all the pupils in attendance. At the opening of the year an overflow of a dozen pupils, more or less, were seated at the tables in the library. But, as has been already said, the number of seats in a high school building is no measure of its capacity. Provision must be made for suitable recitation rooms, as well as classrooms. With this in mind, the congested conditions become apparent. There are thirty-three teachers in the English High school corps. Including the laboratories, lecture room, and manual training rooms in the basement, twenty-six teachers are provided with rooms in which to instruct classes. To provide room for other teachers, three ends of corridors have been curtained off, three narrow dressing-rooms have been furnished with chairs, and two small, unventilated storerooms have been converted into so-called recitation rooms. Under such unfavorable conditions, it is impossible for the school to work either efficiently or economically. Larger classes, and consequently fewer of them, might be formed if these improvised recitation rooms could be replaced by suitable ones.

In the discussion of plans for the relief of our crowded high schools there should be a clear understanding not only of present conditions, but of prospective requirements. The development of high schools and the increase in their attendance is the educational marvel of the last decade. Our own high schools have

practically doubled within this time.

When the high school was divided in 1895, the example of other cities was followed. Under the name of Latin and English schools, the specific work of each division was carefully assigned. By vote of the school board, the Latin school was made distinctively the preparatory school for college. Its course of study was determined by college requirements. The English school was made a general high school, to which were assigned students preparing for technical or normal schools, together with all those whose school life was to end upon graduation from the high school. Since then, however, the requirements for admission to college have materially changed. Greek is no longer insisted upon. French, German, mathematics, science, music, etc., may be substituted instead. This change in college requirements is gradually obliterating the distinction between classical and socalled English schools. Both are fitting for college. The distinction between them will soon become effaced. nothing to prevent our English High school from fitting its students to enter any college with its present teaching force, and without materially changing its curriculum.

In the development of high schools throughout the country to meet the demands of the public, three types of school are being evolved. There is first what may be called the literary high school, in which preparation for college or education along purely literary or linguistic lines may be furnished. There is, secondly, the manual training or technical high school, in which

training for scientific or industrial pursuits is given. The third type is the commercial high school, in which training for all forms of business is furnished. These three types of school have come to stay. Manual training as applied in schools long since passed the experimental stage. It is now considered an integral part of every well-ordered school system. So, too, in every large city, at least, the commercial side of high school education is becoming more and more emphasized, in order to meet the new demands for thoroughly trained young men and young women in all kinds of business.

Already several cities have established separate schools independently housed for these three lines of work. It will not be many years before their example will be generally followed. In our own city one of our high schools is distinctively a literary school. The English school, however, combines all the three types of school here outlined. It is an industrial or technical school, a commercial or business school, and a literary or "finishing" school.

These three kinds of school have many things in common. A number of subjects must of necessity be taught in each school. The graduates of each of them must be trained in English, in history, to some extent in mathematics, in modern languages, in science. A certain degree of attainment and intelligence in all these subjects is demanded in the commercial and industrial

world, as well as elsewhere.

Here, then, is the problem before the school board and the city government of Somerville. How shall we best utilize the two small high school buildings in providing accommodations for three distinct schools or departments of unequal numbers, but aggregating at least 1,600 pupils?

Before any decision is reached regarding additional high school accommodations, the whole situation should be thoroughly canvassed, and the needs of the future, as well as the present, be determined and provided for as nearly as possible.

Among the things to be avoided are the following:—

(1) Three separate schools with different administrative heads, for unity of structure and administration secures the mini-

mum of outlay and the maximum of efficiency.

(2) There should be no unnecessary duplication of departments,—one chemical laboratory, a single physical laboratory, one biological laboratory, one reference library, one gymnasium for boys and one for girls, with their expensive equipments, will be amply sufficient.

On the positive side: (1) Strenuous efforts should be made to retain the present central location, for to each department of

the school will come students from all parts of the city.

(2) New rooms for the manual training department are absolutely necessary. The present English building was erected at about the time when manual training in high schools was made

obligatory. In planning the building, no reference was had to this department. The basement rooms were utilized for lack of anything better. They have never been and never will be satisfactory, particularly at some seasons of the year. More commodious rooms above ground, and an additional room for extensions of the work should be provided.

(3) Provision should be made for the comfortable housing of at least 1,600 students, with every convenience for physical as

well as scholastic training.

The general plan of enlargement that has met with most favor, and which is known as "Comprehensive Plan No. 3," can be made to secure all that is desirable. Another building to the east of the Latin school to match the English building may be connected with the latter by a large central structure. Here, accessible to both of the wing buildings, can be placed all laboratories, libraries, lecture halls, and assembly rooms that are to be used in common by all departments. In the central structure, also, can be placed rooms for the manual training department and gymnasiums, and whatever other rooms may be needed. Ultimately the present Latin building would be removed. As finally completed, the new plan would be harmonious in its architecture, admirably located, an honor to the city, and an inspiration to its youth. Built for the future as well as for the present, there is no reason why a portion of the expenditure should not fall upon our successors. There may be difference of opinion as to where the work of enlargement should begin. It seems natural, however, to relieve the most urgent needs at the outset.

Additional Accommodations, Elementary Schools. In what may be said on this subject, it must be understood that wards are mentioned simply as a convenient way of designating certain portions of the city. The schools of no ward can be considered independently of those of other wards. School buildings have been located without reference to ward lines, and in considering school interests, these lines should be obliterated, and the welfare of the schools and the convenience of the public chiefly considered. All our schools are city schools, not ward schools. Provision for their needs is made without discrimination, and they are under the rules and the management of the school board except in so far as that body sees fit to delegate its authority to others.

I. The interests of wards one and four in the easterly section of the city must be considered together. Here are four schools so interrelated that they cannot be separately considered. Two are primary schools, which are alike feeders of the two large grammar schools, the Prescott and the Edgerly. Ever since their establishment, there has been an interchanging of pupils among these schools whenever the numbers or the necessities of classification rendered it desirable. In the report of last year, it was recommended that the needs of this section would be best met by the addition of two rooms to the Hanscom school. There

has been no change of conditions to render this recommendation unwise. One hundred and fifty pupils are on half time in the Prescott and Edgerly schools. They would be accommodated without inconvenience in the proposed enlargement. When the Hanscom school was planned, it was distinctly understood that when necessary, it was to be enlarged by the addition of two rooms on the southeasterly corner. This change could be made

with comparatively little expense.

There are other considerations, however, that affect this question. There are some primary pupils all over the city that are obliged to travel unduly long distances to reach their schools. This is notably true of some children in the Glines school. This building was located to accommodate what at the time appeared to be a rapidly-growing section of the city lying northeast of Broadway. The district, however, has not been developed as expected. Children have been sent to this school from the extreme northwestern portion of ward five, more than half a mile away. So, too, some children living near the intersection of Walnut and Pearl streets have been obliged to travel a half-mile to reach their This distance in the case of grammar school pupils is not worth mentioning, but for children of the three lowest grades at certain seasons of the year it should be avoided, if possible. For the accommodation of this latter class, in two of my reports, the recommendation was made that a primary schoolhouse be built on Walnut street, near the corner of Veazie. I have also twice recommended the construction of a primary schoolhouse to accommodate pupils in the vicinity of Moreland street. In the straitened condition of city finances, however, it is too much to expect that new schoolhouses will be built, when there is room in existing buildings to accommodate pupils, even though they are subjected to considerable inconvenience to reach them. Hence we have continued to send children to the Glines school. The crowded condition of the Edgerly school in September compelled the transfer of more primary children from this district to the Glines school. This change furnished the basis for a petition recently presented to the school board, remonstrating against this action, and asking that a schoolhouse be built near the corner of Walnut and Pearl streets for the accommodation of primary children in the immediate vicinity. This request is a reasonable one, and the question of granting it is largely one of The enlargement of the Hanscom school would relieve crowded conditions at the Edgerly, and enable us to send most of the pupils in the not-well-accommodated district to that school. By this plan, however, the distance that some pupils would have to travel would not be materially lessened. A careful analysis of the situation shows that a four-room building containing the lowest four grades, and located as suggested, could be filled by taking all pupils living within the territory bounded by Cross, Pearl, Dana, Bonair, Walter, Marshall streets and the Boston & Maine

railroad. To do this, sixty pupils would be taken from the Edgerly, fifty from the Glines, thirty-five from the Hanscom, twenty from the Davis, and seven from the Bell school. The pupils taken from the Glines could not be replaced, and one room would probably be vacated in that building. It is probable, however, that the loss thus caused in the Edgerly and Hanscom schools could be made good by transfers from the Prescott. The Davis and Bell schools would not be materially affected by the change. A new building in this locality would, of course, be a substitute for the enlargement of the Hanscom school. The question seems to be one of public convenience versus the financial interests of the city.

To confirm what has been said about the necessity of disregarding ward lines in the assignment of pupils, it may be said that there are now 1,700 children in the city attending schools outside of the wards in which they reside. To give a specific illustration: There are 202 pupils living in ward four who now attend schools in wards one, three, or five. There are besides 104 ward-one children in the Edgerly, and 248 ward-five chil-

dren in the Glines school.

Wards two and three seem to be amply supplied with school

accommodations at present.

In ward five there will probably need to be transfers in September from the Bingham to the Forster school, and possibly a resort to the renewed use of the basement rooms in the latter building. At the Bingham school one room is emptied and two are filled each year. Naturally some pupils will be crowded out.

The immediate needs of ward six will be met by the completion of the Hudson-street schoolhouse. This building will be filled in September by the transfer of two classes from the Burns, three from the Morse, and one each from the Brown, Carr, and Forster. This will involve the reassignment of nearly 400 pupils, and will change the classification in several of the schools.

While this is being done, I recommend that the Burns school be made a ninth-grade grammar school, under the charge of a master. This school is midway between the Morse and the There are numbers of seventh, eighth, and ninth grade pupils that are now sent past the Burns school to the It will be a great convenience to them to be housed nearer their homes. Moreover, the schools of this district contain more than twice as many pupils as several of the other districts. In order to secure to them the same advantages afforded other parts of the city, there should be at least three masters employed. Some masters in the city have but thirty-five pupils in the ninth grade, while others have from fifty to a hundred. Without entering into any discussion as to the relative value of instruction by men as compared with that given by women, it will be readily admitted that those persons to whom we pay nearly three times as much as women engaged in the elementary schools receive, are capable of giving the very best instruction. It is not possible probably to give all pupils an equal amount of this expert teaching, but an attempt should be made to equalize the privileges of our ninth-grade pupils as far as feasible.

The recommendation that four rooms be added to the Brown school is renewed. This school is located in the centre of a section of the city that is being rapidly filled, the children of which

have no other school accommodations.

The schools of ward seven are all full at the present time. One of them, indeed, is crowded in such a way as seriously to interfere with the interests of the pupils. A plan of relief readily available has not yet been adopted. There must be additional schoolrooms furnished in this ward at an early day. The section in the vicinity of Clarendon Hill is being rapidly developed. The Lincoln school is centrally located, and if its capacity could be doubled, it would afford the relief needed. This is a wooden building, however, and its enlargement on that account is objec-In the Hodgkins school there is a class of part-time pupils. Room should be made in this building for primary pupils that now crowd the Lowe school. Moreover, it must be the grammar school centre for all of that part of the city lying west of College avenue for years to come. I recommend that this building be enlarged by the addition of six rooms. can be readily done, so the architect who superintended its construction informs me, by raising the present structure. This enlargement can be made for \$5,000 less than the expense involved in erecting a separate schoolhouse of six rooms. It will much improve the appearance of the present building architecturally, and will provide for present and prospective needs. Should this addition seem inexpedient, a new six-room building should be erected very near the Hodgkins school. In any event, the lot on which that building stands should be enlarged by the purchase of as much land as the city can afford, now available at the north of the building. Indeed, if all the open land to Broadway could be utilized as a park and playground, it would be a valuable improvement.

School Attendance. During 1904, 13,804 different pupils have been enrolled in the city. Not all of these pupils have been connected with the schools at one time. According to the rules of the State Department of Education, a pupil's membership is terminated (1) by death; (2) by removal; (3) by withdrawal with no intention of returning; and (4) by ten consecutive days' absence, from whatever cause. Excluding from the enrollment lists names dropped either permanently or temporarily for any of these reasons, we reach the average membership of the schools, which for 1904 is 11,094, an increase for the year of 375. This average membership is important because it furnishes the basis for estimating the per capita cost.

As showing the changes in membership that are constantly

occurring, the following facts are interesting:—

Number entering from schools outside the city	1,310
Number entering first grade	1,366
Number that were graduated	
Number of transfers from one school to another in the city,	1,952

The average attendance of the schools is determined by taking into account all absences from whatever cause during the period of membership. It shows the number of pupils who are in school, on the average, every day of the school year. The average attendance for 1904 is 10,422, an increase over last year of 366. The average attendance is 93.9 per cent. of the average membership, showing a loss of 6.1 per cent. occasioned by illness or other causes, in most cases providential or unavoidable.

During the year there have been 3,887 cases of tardiness, which shows one instance of being behind time out of 1,009 chances of being prompt. As compared with other cities, and, indeed, with our own past records, this number is not large. Nevertheless, the responsibility for tardiness rests upon parents generally, and much of it is avoidable. Teachers use all legitimate means to secure regularity of attendance, and sometimes, in their zeal, bring influences to bear that are not wholly justifiable.

In 1904 there have been 2,173 instances of parents requesting the dismissal of their children from school before the close

of the session, one case in 1,805 opportunities.

There have been 293 cases of corporal punishment in the elementary schools, a number surprisingly small, when all circumstances are taken into account. One hundred twelve of the 232 teachers in these schools have not resorted to it in a single instance. One building reports no cases, and two others but one each. We have to go back but a few years to note the difference in methods of school management which these facts indicate.

On the fifteenth of December, the number of pupils in the schools was as follows:—

In the Latin school. 422 In the English school. 811 In the elementary schools. 10,357 In the kindergartens. 197	$ \begin{array}{r} 406 \\ 751 \\ 10,000 \end{array} $	$\frac{60}{357}$
A total of	11,357	430

Adding to this number the 1,719 pupils in private schools, we have 13,506 school children in the city.

Truancy. It is a pleasure to record a decrease in this evil during the year. It is probably due to the fact that the telephones enable principals to give immediate notice to the truant officer, who loses no time in investigating the case.

The following is the year's record:—

	1903.	1904.	Decrease.
Number of visits to schools	525	429	96
Number of cases investigated	521	387	134
Number found to be truants	152	146	6
Number sent to truant school	9	5	4
Paid for board of truants\$	629.29	\$245.84	\$383.45

Teachers. There are employed at the present time 312 teachers, twenty-seven of whom are men. This is exclusive of

fifty-six now employed in the evening schools.

During the year 1904 seventeen teachers have tendered their resignations. Of these, ten have been drawn away by matrimonial allurements, three are teaching elsewhere for larger salaries, and the remaining four have relinquished teaching for other pursuits. Five of these teachers have served the city faithfully for ten years or more; the average length of service of the remaining eleven was two years, two months.

During the year twenty-nine new teachers have been elected, nineteen to fill positions made vacant by resignations, and ten to serve in new positions in high or grammar schools. All of these teachers have been professionally trained, and nearly all have had their ability to teach successfully developed and tested by years of experience along the very lines of work in which they are now engaged. One-third of these teachers are residents of Somerville and graduates of our schools. There is some advantage in a teacher's school life being spent in good schools with high standards of discipline and method. The inexperienced teacher can do nothing but reproduce the school of her own childhood. Birth, residence, and even education in Somerville, however, do not necessarily make good teachers. Academic education must be supplemented by professional training and experience. In the selection of new teachers, other things being equal, preference is given to our own residents, but the great majority of the people of Somerville demand the best teachers to be found for our relatively large salaries, irrespective of other considerations. In every community there is a small class who are interested in individual teachers and in securing them employment. A far larger class, patrons of the schools, feel that the educational interests of their children and the success of the schools transcend in importance the interests of a few individuals. In all cities the former class are the greatest menace to the public schools, for schools are ruined and money wasted when teachers are incompetent. The schools of some cities have already been safeguarded by being placed beyond the reach of unfavorable local influences by state enactments.

In teachers' agencies, teachers are "quoted at their market value." Such remarks as the following are often heard: "Miss A is a four-hundred-dollar teacher"; "Miss B is a five-hundred-dollar teacher"; "Miss C is a six-hundred-dollar teacher"; "Miss D is a seven-hundred-dollar teacher,—you can't move her with your salary." Our own salary schedule establishes a similar

monetary standard of value, based on the belief that the longer the experience the more valuable the service. We consider an inexperienced teacher, though professionally trained, worth only \$400 a year, and it is assumed that each year adds twenty-five per cent. to the worth of her instruction until she reaches a maximum value of \$650. While it is not always safe to rely implicitly

on this assumption, it is generally correct.

This principle is recognized, and guides in other professions and pursuits. No one commits a case involving important interests to an inexperienced lawyer. The best legal talent available for the money is invariably employed. When the children are ill and their bodily interests at stake, parents do not send around the corner for the young physician who has just received his diploma because "he needs practice," and "must support himself," and "charges less." On the contrary, the call is for the man whose years of experience have given him skill to do the right thing in every emergency. Experience not only develops power, but often discloses native weaknesses that cannot be outgrown or overcome, and that unfit one for the best work. High standards have been set up by the demands of modern schools. Rightly to control, to guide, to develop the intellectual life and the character of the young has grown to be a profession demanding high moral character, perfect self-control, strong personality, proficiency in methods of instruction, scholastic attainment, mature judgment, refinement of manner, sympathy with children, and the knack of doing the right thing at the right time that is acquired only by experience. Teachers possessing these qualities were never in greater demand, and never commanded the salaries that are now gladly paid for the best service.

Latin School. The Latin school now contains 422 pupils, as compared with 406 registered a year ago. These are divided among the classes as follows:—

·	1903.	1904.	Change.
Senior	84	81	3
Junior	95	93	 2
Sophomore	106	112	+6
Freshman	121	136	+15

There have been two changes in the teaching force of this school. Florence H. Paul and A. Florence Moulton have been replaced by Miriam Thayer, of Braintree, a graduate of Wellesley, and Frederick C. Hosmer, Harvard. Five of the thirteen teachers in the school are men. The school graduated seventy-

three, forty-four of whom have entered college.

The work of this school is largely that of fitting students to enter college. During its separate existence, fifty-seven and one-half per cent. of its graduates have entered college. The work of the school is circumscribed and determined by college requirements. Close and strenuous application is needed to accomplish what is demanded in the period of four years. Indeed, this time has for many years been actually extended by an addition of sev-

eral hours each week in afternoon instruction in physics. The school has an established reputation as one of the best fitting schools in New England. Its graduates enter higher institutions without conditions, maintain high rank, and reflect great credit on the efficient principal and instructors of the school.

The needs of the school in the way of improved facilities

have been set forth elsewhere.

The following shows the numbers pursuing each branch of study:—

English	422	French	100
History	232	German	159
Mathematics	422	Greek	111
Physics		Drawing	
Latin	418	Chemistry	3

Students taking the last two subjects receive their instruction in the English building. The work of the two schools might be co-ordinated in other ways if all conditions were favorable.

The pupils enter this school with a distinct and definite purpose. There is behind them the spur of necessity to stimulate attendance and continuance in the school. The following table shows that the loss in classes from year to year is relatively small:—

TABLE SHOWING LOSSES OF CLASSES IN LATIN HIGH SCHOOL EACH YEAR SINCE 1896.

English High School. This school numbers at the present time 811, as against 751 a year ago, an increase of 60. This number is divided among the classes as follows:—

<u> </u>	4004	4000	0.3
•	1904.	1903.	Change.
Post-graduate	. 18	17	+1
Senior	. 148	112	.+36
Junior		180	 22
Sophomore		190	+30
Freshman	. 267	252	+15

There has been an unusual number of changes in the teaching corps in this school during the year. Caroline H. Marsh has been granted a leave of absence for one year on account of health,

and her place taken by Ruth Tousey, Tufts, '03. The positions heretofore filled by Bertha P. Chase, Grace E. Lord, and Jonathan Leonard have been filled by the employment of H. Adelaide Hamlin, Radcliffe, '00, Nellie H. Swift, Mt. Holyoke, '96, and Anna Pushee, special student at Radcliffe, Berlin University, and Sorbonne. Blanche Bradford, Normal Art, '03, took the place left vacant by the resignation of Miss Harrington in 1903. Two additional teachers have been employed to meet urgent demands,—Jessamine D. Wolcott, a former teacher in the school, re-enforces both the commercial and the history departments, while Frederick O. Smith, of Malden, finds constant employment in the manual training department. Without reflecting in the least upon ex-teachers, it may be remarked that, in the employment of new teachers, the highest standards of excellence have been maintained.

The name "English School," if not an actual misnomer, is misleading. It creates the impression that English only is taught therein to the exclusion of other languages. On the contrary, however, as has been heretofore remarked, all subjects taught in any high school may be pursued in this school, with the solitary exception of Greek. The essential studies, English, mathematics, history, and elocution, are insisted upon in the case of all pupils. There is, besides, a broad list of elective studies meeting the demands of those who are training for either scientific and normal schools or for commercial pursuits, as well as for those who finish their school life here.

How severely the school is handicapped by lack of room has been spoken of elsewhere. The limit of expansion in its present quarters seems to have been reached. All signs, however, indicate that harmonious action of committee and city government, emphasized by the hearty approval of the citizens at large, will result in securing at least a part of what is needed in the very near future.

The school graduated 106, twenty-one of whom are pursuing their studies in higher institutions. There is a constant demand for the service of graduates of the commercial department of the school in remunerative positions of trust. The number of students pursuing the various subjects of study is as follows:—

Number Pursuing Each Study, December, 1904.

English	. 729	Mechanical drawing 212 Freehand drawing 409 Commercial:—

This school suffers somewhat from the dropping out of pupils who begin lines of work, but fail to pursue them to the end through either infirmity of purpose or the demands of service elsewhere. There is always a serious loss of membership in the entering class before the middle of the year. If some method could be devised of either excluding all these temporary students or making them permanent, there would be a marked gain not only to the pupils themselves, but also to the school. The losses from each class since the organization of the school are shown in the following table:—

TABLE SHOWING LOSSES OF CLASSES IN ENGLISH HIGH SCHOOL EACH YEAR SINCE ITS ORGANIZATION.

Membership.	Class of 1899.	Class of 1900.	Class of 1901.	Class of 1902.	Class of 1903.	Class of 1904.	Class cf 1905.	Class of 1906.	Class of 1907.	Class of 1908.

The grammar schools graduated 512, of whom 387, or nearly seventy-six per cent., entered the high schools, 124 going to the Latin, and 263 to the English. During its progress through the six grammar grades, the class dwindled from 1,036 to less than half that number, 376 dropping out between the sixth and the ninth grades, as soon as the compulsory age limit was passed. The following shows the changes:—

			Loss.
December,	1898, fourth grade	1,036	
	1899, fifth grade		12
	1900, sixth grade		104
	1901, seventh grade		94
	1902, eighth grade		139
,	1903, ninth grade		143
	graduates		32

A proposition now before the legislature to raise the compulsory school age limit from fourteen to fifteen would probably compel three-fourths of those who now drop out to remain one year longer in the schools. Primarily, education at public expense is for public protection. It is a serious question whether the greatest good to the greatest number does not demand that all children shall remain in school until they have completed their fourteenth year.

The 260 employment certificates issued during the year have been granted to children who have left the various grades as

follows:—

The unclassified certificates have been granted mainly to illiterate minors.

Kindergartens. The first kindergarten was opened in Somerville in 1892 in the Prospect Hill schoolhouse; the second in 1895 in the Bennett school; the third in 1896 in the Glines school; and the fourth in 1897 in the Hanscom school. There have been public kindergartens for periods of from one to three years in the Highland, Hodgkins, and Carr schools. They were given up, however, to make way for primary children. Four kindergartens remain, two in ward one, one in ward two, and one in ward four. In the case of the Bennett kindergarten, there never has been a question regarding the expediency of its continuance. It is of more value than all the others combined. It has never interfered with first-grade schools, and is located among children that most need its benign influences. It should not be discontinued.

Until within two years, the Hanscom kindergarten has not interfered with primary schools. For the last two years, however, ninety first-grade primary children have been forced into half-time to make way for the kindergarten. In ward two this fall an overcrowded first-grade room compelled a decision of the question whether the kindergarten should be abandoned, the children put on half-time, or a portion of them transferred to the ward room of the Knapp school. The committee decided upon the latter course. In the Glines school, the continuance of the kindergarten has been at the expense of half-time for from eighty to a hundred children for two or three years. The experience of last year with regard to the failure of half-time schools to com-

pete with full-time schools has been confirmed by that of this year. In the half-time schools, seven and one-half per cent. more children were non-promoted than in the full-time schools, and in second grades fed by half-time first grades, six and one-

half per cent. more children were left behind.

How long a school day shall be given first-grade children and what shall be taught them are mooted questions. There is a growing feeling in other cities among those best able to judge that two hours in the morning and two hours in the afternoon should make the maximum day for five-year-olds. Something may be said in favor of half-time schools, but experience has convinced me that an average of two hours and a quarter a day, even for first-grade children, is not time enough. The majority opinion among parents is decidedly in favor of the double session. Half-time sessions should be resorted to only when absolutely necessary.

Kindergartens are valuable auxiliaries of any school system. They have been incorporated as integral parts of school systems of many cities and towns that can afford them. They are not essential, however, and have been called "educational luxuries." I am of the opinion that an injustice is done whenever children five or six years of age are forced into half-time sessions, in order that children four years old may have two and one-half hours of kindergarten instruction. Under these conditions, the kindergarten should give way until there is room for it. Moreover, there should be uniformity of action throughout the city. There is no reason why certain sections should enjoy privileges which other sections have been forced to surrender under identical conditions.

The question of expense is not here considered, though in passing it may be remarked that a much larger dividend would be obtained by the expenditure of the \$4,000 for manual training in the upper grammar grades than is now realized from the kindergarten outlay.

The total cost of kindergartens in 1904 has been \$4,091, \$150.04 being for supplies. The per capita cost based upon the

average membership was \$21.76.

Evening Schools. Throughout the country, in all large cities, evening schools are becoming more and more important as an element in systems of public instruction. Thousands of immigrants land annually upon our shores. Many of them are wholly illiterate, and all are ignorant of our language and of many things which every citizen of a free government should know. They must be educated and Americanized, or remain a menace to our institutions. The children of these foreigners may be trained in our day schools, but those above fourteen years of age are ordinarily engaged in occupations that shut them out from day schools. Added to this constantly-increasing class there are in our cities numbers of young men and women who seek by attendance upon evening schools to supplement the meagre education of earlier years, or to make up what was lost to them through their own neglect or the stress of circumstances.

Evening schools are required by law, as well as by the interests of the community. If they are to be maintained, they must be made efficient and productive of results commensurate with increasing expenditures. But there are difficulties inherent in the situation that must be overcome. The first that may be mentioned is the difficulty of securing and maintaining the interest and regular attendance of students who begin the work with some enthusiasm and with good intentions, but who yield to other attractions in their unwillingness to make the denial and effort required, and drop out early in the season. Our own experience is that less than half of those who are enrolled attend to the end of even a short term. The benefit resulting to this class

is very slight.

A second difficulty, which may be related to the first as cause to effect, is that of securing the right sort of teachers. As in the day schools, so in the evening schools, everything depends upon the character and training and power of the teacher. Failures in evening schools in the past may be attributed to the employment of inexperienced teachers who had no interest in the work other than a financial one.

Attempts to maintain evening schools without the employment of day school teachers have generally failed. While it is possible now and then to secure the services of ex-teachers of the right stamp engaged in other occupations, the supply falls much short of the demand, and some teachers come to their work ordinarily no less fatigued than day-school teachers. There are students in neighboring colleges that are ready to undertake the work; they have been tried and found wanting. As a rule, those who take up teaching as a side occupation generally do poor work. The experience of other cities is like our own, and all are obliged, more or less, to draw their evening school teachers from the ranks of those who work in the day schools.

To illustrate by present conditions in our own city: We have now fifty-five teachers employed in evening schools. Of

these, twenty-one, eleven men and ten women, teach in our own day schools. Ten others, four men and six women, are employed in the day schools of neighboring cities. Twenty, three men and seventeen women, are experienced teachers now engaged in other lines of business. The most of this class do fairly good work, but are not as efficient as those of the preceding two classes. The remaining four teachers hold subordinate positions, and are comparatively without experience. To what extent regular school teachers may be employed without detriment to the day schools is an important question which has recently been fully discussed in the board, and upon the settlement of which the success of evening schools and, in a measure, that of day schools, as well, hinges.

The work of our evening schools is limited in kind to that of the day schools. In Boston, for example, the evening school work has been very much broadened in what are called "educational centres." In these centres instruction is given not only in day-school subjects, but also in dressmaking, millinery, embroidery, basketry, raffia work, carpentery, cooking, gymnastics, and music. In addition, popular lectures or informal talks are given on such topics as literature and authors, civil government, geology, steam heating, and ventilation, physiology and hygiene as applied in nursing, electricity, steam engineering, brick-laying, and salesmanship. These facts are mentioned, not to advocate the introduction of this work in our city, but to show the general trend of evening school work.

It is a satisfaction to be able to report that our evening schools for the season of 1903-1904, covering a period from October to April, showed a marked gain in attendance, interest, and results. Eight hundred and fifty-nine students from fourteen to sixty years of age were enrolled in the elementary schools. Three hundred and twenty-eight, or thirty-eight and one-fifth per cent. of this number, attended all the time. The attendance by months was as follows:—

October433 November386 December332 January284 February267 March223

The Prescott and Bell schools were open for ninety-eight sessions each, the Forster for ninety-six, and the Highland for seventy-seven. The cost of these schools was \$0.235 per pupil per evening.

In the evening drawing school 191 pupils were enrolled; seventy-four, or thirty-nine per cent., attended all the time. The attendance by months was:—

October	99	November	80	December	71
		February			

The cost of this school was \$0.388 per pupil per session. We should refuse admission to that third of the students in this school who come and remain only a month or two. Such

brief connection with the school is without gain. In some other cities a deposit of two or three dollars is required from all pupils, which is returned to those who attend for seventy per cent. of the sessions, and forfeited by all others. This plan may well be adopted here.

The total cost of evening schools for the season was

\$8,864.60.

On the tenth of October of this year, "on petition of at least fifty persons capable of attending the high school and pledging themselves so to attend," an evening high school was opened in the English building. The work of organizing and managing the school was committed to Mr. Whitcomb, head master of the English High school. The school is divided into two sets of classes, one attending Monday and Thursday evenings, and the other on Tuesdays and Fridays. Each student is required to attend at least four hours a week, and take at least two subjects. Classes were formed in the following subjects: English composition and rhetoric; English literature; Latin; French; German; algebra; geometry; commercial law; and the commercial branches,—bookkeeping, penmanship, commercial arithmetic, stenography, and typewriting.

The drawing school, which has held its sessions for several years in the Latin building, was transferred to the English building, and holds sessions on Tuesday and Thursday evenings, as heretofore. It has been incorporated, however, as a department of the evening high school, and is under the same management as the other departments. Inclusive of students in the drawing school, 743 have been registered. The average attendance of all pupils thus far during the year has been as follows: October, 387;

November, 356; December, 246.

The instructors in the drawing department are the same as last year. In the other departments of the school, only the best teachers available have been employed. They are either teachers already employed in the English High school, or such as would be acceptable teachers for that school. The enrollment of the school shows that it supplies a demand. It is apparent, however, that it is to encounter the same difficulties that beset the elementary schools. Many students begin their work enthusiastically, but soon drop out for one reason or another. Of course, experience will show us better how to treat such students, and the best way of placing the school upon a stable basis.

The expense of instruction for this school for the eleven weeks of this year has been \$2,153.50. Provided our evening schools are kept as many sessions this year as last, their aggregate cost for the season will be about \$14,000. This is a large sum to add to the expense of day-school maintenance, and the evening schools should receive the closest supervision, be provided with the best teachers, and all other possible means employed to secure the most profitable returns. If these things are

done, the outlay is sure to meet the hearty approval of our citizens.

The following table shows the principal facts concerning evening schools for 1903-1904. Details may be found in the Appendix:—

DX/D	RITALICE	SCHO	MIC
	NINU	SULL	JULS.

	Elem	entary.	Drav	wing.	Total.

^{*}Based on average attendance.

Vacation Schools. In order to place vacation school facilities nearer the homes of those most likely to attend, it was decided to open two schools, one in the Perry schoolhouse, and the other in the Bingham. This arrangement proved to be wise, for it largely increased the attendance upon the vacation schools, without adding to their expense. Both schools were placed under the supervision of Harry F. Hathaway, who has been connected with the vacation schools ever since their inception in Somerville. Half his time was given to each school. One woodworking class was opened in each building, under the charge of Mr. Jaynes, of the English High school. Eight hundred and thirty pupils were enrolled. The following-named day schools were represented:—

Baxter	22	Durell	56	Bingham218
Bennett	12	Edgerly		Brown 20
Bell		Knapp		Burns 9
Carr	92	Morse	24	Forster 50
Cummings	3	Parochial	67	Glines 52
Davis	9	Perry	56	Highland 5
Hodgkins	2	Pope	8	Lowe 2

The attendance for each of the five weeks between June 11 and August 12 was 565, 526, 471, 438, 410, an average of 482, 171 more than in 1903. One hundred ninety-four children did not lose a session.

The work of the school was along the established lines, and was exclusively manual in its nature. The teachers were drawn from our regular day school corps, and rendered efficient service.

Like evening schools, vacation schools are entering more and more largely into the public school system as permanent elements. Their work is to be extended and systematized. probable that three schools, established in suitable localities, would easily be maintained without very much increasing the present expenditure. There are features of the work that we never have undertaken that might be followed successfully if the additional expense would be justified. The cost and attendance are shown in the following:-

Appropriation	1901. .\$500.00	1902. \$500.00	1903. \$500.00	1904. \$500.00
Paid teachers		\$427.50 123.43	\$377.50 162.64	\$422.50 149.73
Total	. 317 . \$1.59	\$550.93 365 \$1.51 12	\$540.14 311 \$1.73 10	\$572.23 482 \$1.19 14

Cost of the Schools. The total amount spent for the maintenance of the schools of Somerville in 1904 is \$315,903.74. This does not include the sums spent on schoolhouse repairs and for new buildings. It does cover first the amount paid for the care of school buildings, for janitors' services, fuel and light, and telephones. With this expenditure the school board has nothing to do, it being wholly in charge of the city government.

The amount paid for janitors is	.\$22,024.21
The cost of fuel is	. 15,315.30
The cost of light is	. 1,435.70
Telephones	. 236.60
A total of	.\$39,011.81
The cost per capita	. \$3.52

The second important expenditure is wholly under the control of the board, and is covered by what is known as the "School Contingent" appropriation. The following are the chief items:

Officers' salaries	\$4,900.00
Books\$8,203.69	1 /
General supplies	
Laboratory and manual training supplies 1,043.12	
Printing 1,101.00	
Graduation exercises	
Drawing supplies	
Bookbinding 567.83	
Truant officer's horse	
Express and postage 185.40	
Board of truants 245.84	
School · census	
amounts carried forward\$19.035.61	\$4.900.00

Amounts brought forward. \$19,035.61 Telephones . 1 d6.95 Miscellaneous . 2,208.69	\$4,900.00
Total for school supplies, etc	21,411.25
Total outlay on school contingent account Estimate of the committee Appropriation Deficiency as compared with appropriation Surplus as compared with estimate of committee Received for damage to school property and tuition of non-residents Net surplus.	\$26,311.25 26,500.00 25,000.00 1,311.25 188.75 221.50 410.25

The third, and by far the largest, element of the cost of schools is the sum spent for the salaries of teachers. The following shows the monthly payments:—

January \$24,782.43 February 24,764.07 March 25,079.62 April 23,905.00 May 23,940.10 June 23,802.25 August 422.50 September 24,424.35 October 26,374.63 November 26,497.87 December 26,587.86	
Total Estimate of committee and appropriation	\$250,580.68 249,500.00
Deficiency	\$1,080.68

This deficiency is due largely to the unexpected size of the evening high school and its larger salary list.

The total outlay for all purposes in 1904 is as follows:—

Teachers' salaries Administration Care of schoolhouses School supplies	4,900.00 39,011.81
Total for school maintenance. Paid for repairs. Paid for new buildings.	18,208.97
Total for all school purposes	\$357.815.82

Each dollar of the sum spent for the support of schools has been divided in the following proportion:—

Teachers' salaries\$0.799	1901. \$0.790	1902. \$0.800	1903. \$0.781	1904. \$0.793
Administration 0.018	0.017	0.017	0.013	0.016
Janitors' salaries 0.074 Heat and light 0.048	$0.071 \\ 0.055$	$0.073 \\ 0.042$	$0.070 \\ 0.067$	$0.070 \\ 0.053$
School supplies 0.061	0.067	0.068	0.069	0.068
Total\$1.000	\$1.000	\$1.000	\$1.000	\$1.000

Per Capita Cost. The only way to compare the cost of the schools from year to year is by considering the amount spent for each pupil in their average membership. Heretofore, in comparisons of the cost of grammar and primary schools, we have included that of evening schools. This year we exclude the cost of those schools because the sum now spent for them is so large as to make material differences, and thus mislead. The following table shows the

PER	CAPITA	COST	OF	DAY	SCHOOLS	FOR	1903	AND	1904.

	Hi	High Schools.			ammar a nary Sch		All Day Schools.		
	1903.	1904.	De- crease.	1903.	1904.	De- crease.	1903.	1904.	De- crease.
Instruction Supplies Care	\$47 28 5 32 4 43	\$47 20 6 04 4 29	\$0 08 *0 72 0 14	\$19 13 1 51 3 65	\$19 24 1 29 3 31	\$0 11* 0 22 0 34	\$22 04 1 90 3 73	\$22 16 1 78 3 42	\$0 12* 0 12 0 31
Total	\$57 03	\$57 53	*\$0 50	\$24 29	\$23 84	\$0 45	\$27 67	\$27 36	\$0 31

^{*} Increase.

Including the sums paid for the maintenance of evening and vacation schools, the per capita cost for the two years is as follows:—

	1903.	1904.	Change.
Cost of instruction		\$23.03	+\$0.36
Cost of supplies		1.93	0.02
Cost of care	. 3.84	3.52	 0.32
Total	.\$28.46	\$28.48	+\$0.02

An examination of these tables shows that eight cents less has been paid per pupil for instruction in the high schools; that the care of these buildings has decreased fourteen cents; and that supplies have cost seventy-two cents more than last year. All this makes the average cost of educating a high school pupil this year just a half-dollar more than last year, \$57.53 in 1904, as against \$57.03 in 1903. This increase is attributable to expenditures for books, some text-books having been changed and many old, worn-out books replaced.

Instruction in grammar and primary schools has cost eleven cents per pupil more this year than last, while supplies and care of buildings have cost twenty-two cents and thirty-four cents less, respectively, making the net total of the per capita cost of these schools forty-five cents less than in 1903, \$23.84 in one case, and \$24.29 in the other.

Taking all the day schools together, we find that instruction costs twelve cents more, supplies twelve cents less, and care of buildings thirty-one cents less, making the net cost per pupil \$27.36 this year, as compared with \$27.67 in 1903,—a decrease of thirty-one cents.

Adding the cost of evening schools to that of day schools, we increase the cost of instruction thirty-six cents, and decrease that of supplies two cents, and that of care of buildings thirty-two cents. This makes the total cost of school maintenance for 1904 \$28.48 per capita, two cents more than in 1903, when it was \$28.46.

There were eleven cities and thirty-six towns in the commonwealth that paid a larger per capita sum than Somerville in 1902.

The cost of maintaining our schools in 1904 was \$5.44 for every \$1,000 of the city's valuation, 31.6 per cent. of the entire city tax of \$17.20 per \$1,000.

The number of children to be educated by Somerville continues to increase more rapidly than its ability to meet the expenditures which this education entails. The number of children in the schools increased 3.8 per cent. in 1904, while the valuation of

the city increased 1.9 per cent.,—only half as much.

Heavy as is the burden of school support, it will be met cheerfully, provided results and outlay are commensurate. Growth and expansion are inevitable. A wise economy, however, expends carefully, retrenches whenever possible, examines results, and throws upon the future its share of the burden. High standards cannot be maintained without proportionate outlays. The tendency everywhere is to transfer burdens and responsibility from the individual to the public. As a leader truthfully remarks:—

"If we are to have schoolhouses properly equipped for the training of the body, as well as the mind, for manual training, play, gymnastics, and athletics; if all children are to enjoy their God-given right to education; if schools are to be equipped for scientific, as well as literary studies; if salaries are to be paid to teachers that will attract men and women of breeding and refinement to the teaching profession; and if all the teachers are to be thoroughly trained so that they will be models to imitate and persons capable of arousing interest and inspiring effort; if all these things are to be accomplished, it is evident that the sums devoted to education in America, enormous as they are, must be very greatly increased."

The salaries paid at the present time are as follows:—

	*	-		
2	men	\$3,000	4 women	\$775
2	men	2,000	2 women	750
	men, 2 women		16 women	725
	men		5 women	700
	men		203 women	650
	man		7 women	600
	man, 3 women		3 women	500
	woman		5 women	425
	man, 10 women		1 woman	400
	man, 18 women		1 woman	350
	woman	~~~	1 woman	300
1	man, 1 woman	800	1 woman	275

On this basis, the total salary list at present is \$245,000.

This does not include sums paid for evening and vacation schools and substitutes. With these added, the salary requirements for 1905 will be about \$260,000.

Stamp Savings. The system of stamp savings, introduced in September, 1902, has now been in operation for two full school years. The business transacted for those years is here shown:—

	1903.	1904.
Received from sale of stamps\$15	,135.59	\$9,069.80
Deposited in Somerville Savings Bank 8		5,514.89
	,152.46	2,521.86

Sixty per cent. as many stamps were sold the second year as during the first year, a falling off to be expected as soon as the novelty had worn off. Thus far during the present year the business transacted has been about the same, and seems to have reached a normal basis.

The sale of stamps for October and November of the three years has been as follows:—

About \$8,000 is now on deposit at the savings bank as the result of two years' experience.

No reason appears for the discontinuance of the system in our schools. While it entails extra labor upon teachers and principals, the work has in general been so systematized that it is not a burden. Moreover, most teachers take great satisfaction in helping their pupils to establish and confirm habits of thrift.

Public Library. The public library and the schools continue to work together in the utmost harmony. Ready provision is made for all needs of teachers for books for classroom work. The children's room in the library is well patronized. More children are reading books than ever before. There are 110 libraries now located in as many different schoolrooms. The books are very largely selected by teachers, and of very many of them several copies are furnished. During the year 5,169 books have been delivered to the schools. It is interesting to know that the majority of these books, 2,750, are classed as "non-fiction." The thanks of both the teachers and the pupils are due to the librarian and his affable assistants for their co-operation and courtesy.

St. Louis Exposition. The schools of Somerville were represented at St. Louis by three distinct exhibits. The first was from the English High school, showing its organization, its curriculum, its general plan of work, the methods employed in every department, and representative specimens of pupils' work. The second exhibit was from the elementary schools, and showed the course in language and grammar followed in the schools, with typical papers prepared by pupils of each grade. The third exhibit showed the system of penmanship taught in the schools as represented by pictures, and papers prepared by pupils.

These exhibits received commendation, and were awarded a grand prize and two gold medals. In addition, a gold medal was awarded the head master of the English High school for his work as a collaborator.

These exhibits, along with those of the other Massachusetts cities and towns, have been sent to Portland, Ore., for the Lewis and Clark Exposition. They will, however, be returned to this city in due season.

Repairs and Decorations. During the summer, the Bell, Davis, and Cummings school buildings were thoroughly renovated, the woodwork varnished, and the walls tinted. An additional furnace for the heating of the corridors was installed in the Davis, and also in the Cummings, and in the latter building a toilet room for the use of teachers was provided. The walls of the lecture hall and of several rooms in the English High school were tinted,—a good work that is to be continued from year to The same is true, also, of the Hodgkins school. In the Bingham school the walls of the eight rooms in the old building

were tinted and everything made harmonious.

The movement for providing schoolrooms with works of art of one kind or another continues. Through the efforts of the teachers in the Bennett school, \$150 was raised, which has been expended in the purchase of pictures for the walls. Similar efforts of the Bingham school teachers resulted in the purchase of pictures and other works of art to the amount of \$125. From the funds resulting from the oratorio given by the pupils two years ago, a number of pictures, busts, and bas-reliefs have been added to the English High school. It has become the custom for graduating classes in the high and grammar schools to leave behind them some work of art as they graduate. This pleasant custom is gradually providing the principals' rooms in these buildings with valuable collections.

The schools are indebted to friends for the presentation during the year of valuable pictures, which are here gratefully ac-

knowledged in the following list:—

For the Durell school, a portrait of Rev. George W. Durell.

from his son, Dr. T. M. Durell.

Prescott school, a portrait of ex-Superintendent Joshua H. Davis, from Miss Mabel James, a former pupil of the school.

Edgerly school, a portrait of John S. Edgerly, from his daughters, Mrs. Helen M. Despeaux and Mrs. Mixer.

Lowe school, a portrait of Mrs. Martha Perry Lowe, from the Somerville Woman's Suffrage League.

Hanscom, Davis, and Bennett schools, pictures from S. Newton Cutler.

Carr school, photographs for the walls, from Miss M. A. Tufts.

Bingham school, a picture from the Anne Adams Tufts Chapter of the Daughters of the American Revolution.

We wish, also, to acknowledge the following gifts of books from S. Newton Cutler, former chairman of the school board:—

To the Latin school, "The Cambridge Shakespeare," nine

volumes.

To the English school, "The American Statesmen Series," thirty-one volumes.

To the Prescott and Edgerly schools, each, Woodrow Wil-

son's "History of the United States," five volumes.

We are indebted, also, to the Woman's Relief Corps, G. A. R., Post 113, for their kindness in providing several of the schoolrooms with United States flags.

There is abundant room still left in all the buildings for other gifts of the same generous, thoughtful nature. Schoolrooms

cannot be made too attractive.

Change in Charter. The city charter which went into operation January 1, 1900, provided for a school committee consisting of fourteen members, two elected from each ward. The legislature of 1904 amended the charter, subject to the approval of a majority of voters at the state election in November, by adding to the school committee the mayor and the president of the board of aldermen, ex-officis. The proposed amendment having been approved by a vote of 2,524 to 1,343, the two officials named, Mayor Leonard B. Chandler and President Joseph S. Pike, took their seats as members of the board at the regular meeting, November 28. Section 28 of the charter, that relates to the school committee, now reads as follows:—

Section 28. The management and control of the public schools shall be vested in a school committee, which shall exercise the powers conferred and discharge the duties imposed by law upon school committees. The committee shall consist of the mayor and the president of the board of aldermen, exofficiis, neither of whom shall serve as chairman, and fourteen other members, two from each ward, elected as follows: At the first municipal election held under this charter, two members of the school committee shall be elected by and from the qualified voters of each ward, one to serve for the term of two years and one to serve for the term of one year, beginning on the first Monday of January next ensuing, and thereafter one member from each ward shall be elected in like manner at each annual municipal election, to serve for the term of two years. Vacancies occurring in the school committee shall be filled by a joint ballot of the board of aldermen and the school committee, the member so elected to be a resident of the ward entitled to the new member, and to hold office only for the remainder of the municipal year, the vacancy for the remainder of the term, if any, to be filled by the voters of said ward at the next municipal election.

Manual Training. This subject was discussed at some length in the report of last year. At the January meeting, on recommendation of the committee on industrial education, the

board voted unanimously to request the board of aldermen to fit up a room in the Forster annex for woodworking. No action in this direction has yet been reported to the committee. This is the fourth time that the school board has gone on record as attempting to conform to the statute which requires manual training to be taught in the elementary schools in every city as large as ours.

We now have three manual training teachers in the High school, whose services are easily available for two hours each afternoon. If rooms could be equipped in three convenient localities, eighth-grade boys could be given instruction in this branch at relatively little outlay. I trust the board will persist

in its efforts.

School Hygiene. In conformity with the instructions of the board, the attention of teachers was recently called to the proper observance of all regulations that pertain in any wise to school hygiene. A copy of the following circular was sent to each teacher:—

By vote of the school board, the constant attention of all

teachers is called to what follows:—

1. Pure air, cleanliness of body, eight hours' sleep, just enough suitable food, clean clothing adapted to the season, the regular exercise of bodily functions, judicious exercise in the open air, and sufficient useful employment for body and mind are essential to health. These conditions are to be secured mainly by parents and in the home. Very often, however, teachers may courteously co-operate with parents by way of counsel, and possibly by active assistance. Some of these essentials may and must be furnished children when in school. The responsibility rests for this upon the teacher. Physical training is as much a duty and requirement as mental or moral training. Indeed, it is fundamental, for the best educational results come only from perfect physical conditions.

2. Insist on personal cleanliness in your pupils, and, as far

as possible, on clean clothing.

3. Watch vigilantly for signs of contagious disease,—diphtheria, scarlet fever, measles, whooping-cough, chicken-pox, pediculosis, scabies, etc., and see that quarantine rules are rigorously enforced. Send suspected cases home, or confer with parents, who will generally commend your solicitude. Err, if at all, on the side of safety.

4. See that schoolhouse doors are open early in cold or inclement weather. If wet feet and clothing endanger health, send

the owner home.

5. The temperature of the schoolroom should be uniform throughout the day,—sixty-eight degrees Fahrenheit, at the level of the pupils' desks, from eight-thirty until the time of dismissal. Overheated air is much too common. Do not hesitate to send for the janitor whenever it is necessary to regulate the tempera-

ture. He is good-natured, interested in his work, and will be glad to aid you. If the temperature is sixty or below at nine o'clock, with no prospect of its reaching sixty-five by nine-thirty, dismiss the children, but in all cases consult the janitor, that he may share the responsibility and, if possible, remedy the trouble.

6. In most school buildings opening the windows or doors renders the ventilating system inoperative. Your room must be

cooled off or aired by means of the ventilating apparatus.

7. In all schools, grades one to four, inclusive, must have a "basement recess" midway of each session. This recess should be as nearly simultaneous as possible in all classes, and should occupy the briefest possible time. The movements of children may be rapid, as well as orderly. "Tip-toeing" is unhuman and

pernicious at all times.

8. In every schoolroom there should be one or more brief periods of Ling gymnastic exercise. Besides this, at the end of every hour, and oftener in the lower grades, there may be a recess of two or three minutes, during which children are to leave their seats, hold intercourse with one another, and be given complete mental and physical relaxation. At this time there is no objection to opening the windows, provided no one is exposed to draughts.

9. Whenever necessary, pupils are to be allowed to leave the room,—the trusty ones without asking. If any record is kept of such leaving, it should be of the most private character, and with due regard to the feelings of sensitive pupils. No detention after school or other penalty should be imposed, excepting in case of conspicuous abuse of the privilege granted. In

doubtful cases a written parental request may be required.

10. Be careful of the eyes of your pupils. Blackboard work should be distinct and, as far as possible, in direct range of the pupils' vision. Pull up the curtains, and take advantage of all the light obtainable. Remember that light from the top of

the window reaches the farther side of the room.

11. Home study is prohibited in the six lower grades, and limited to one half-hour in the seventh, three-fourths of an hour in the eighth, and one hour in the ninth grade. Let home tasks be sensible, and adapted to those whose facilities for home study are not of the best. What you can do in a half-hour or so is no measure of what your pupils can accomplish. "Don't measure children by adult standards." It is these overtasks that make home study unpopular, and justly so.

12. Do not carry any recitation or other exercise beyond the fatigue point. For a tired, listless, inattentive class, the

teacher is wholly responsible.

13. Pupils are required to be in their seats at nine and at one-thirty. Dismissal is to be as prompt. Classes are expected to work up to eleven-forty-five and three-thirty, excepting in primary grades in large buildings.

14. Detention after school at the close of the morning session, whether voluntary or involuntary, is prohibited. Involuntary detention at the close of the afternoon session is limited to one half-hour, and this time must not be exceeded. The best teachers detain the least. "Wilful neglect of duty" is often misinterpreted, and should be given its primary signification.

15. Outside of instruction upon the evils of using tobacco and alcohol, teachers are allowed six and one-quarter minutes a week for instruction in hygiene. This instruction should be adapted to the season and to the needs of the class. It should be practical, and should affect the personal habits of the child.

16. There are many poor children in the city who will be glad to receive clothing from those more fortunate. Mr. Snow will cheerfully act as the almoner of any bounty along this line.

Finally, in this whole matter of school hygiene, try to put yourself in the place of the child, sympathetically study his peculiar needs, and minister in all things as far as possible to his

physical as well as to his mental and moral requirements.

The school board is on record as strongly favoring frequent medical inspection of the public schools. The adoption and successful working in other cities of plans for the examination of schoolrooms and school children by physicians employed at public expense is proof of its value. The community should be safeguarded against danger from contagious disease, and children in the public schools who often suffer from unrecognized, easily-remedied ills should have their physical interests promoted in every possible way.

An important step in the right direction has been taken by the board of health in requiring the immediate fumigation of schoolrooms and corridors and the destruction of books used

whenever a pupil is reported ill with contagious disease.

The rule may require several fumigations of the same room within a week, and the dismissal of a class may be frequently necessary, but this loss is amply repaid by the security afforded. The plan has one disadvantage. The fumigation cannot be conducted without the knowledge of the public, and hence serves to advertise the fact that there have been cases of contagious disease. This tends rather to increase than to allay the apprehensions of parents, and may seriously affect the attendance of children. It should be understood by the public that these preventive measures reduce danger of contagion to the minimum as far as the schools go.

The following is a copy of the instructions now posted in

every schoolroom:-

IN BOARD OF HEALTH,

Somerville, November 3, 1904. Ordered, that the following regulation be and hereby is adopted:— Immediately upon the receipt of notice that a teacher or pupil in any school in the city is sick with smallpox, scarlet fever, diphtheria, membranous croup, typhus fever, or cholera, the schoolroom in which

such teacher or pupil was accustomed to sit, and the dressing-room in which the aforesaid teacher or pupil placed his or her outer garments shall be fumigated by the Board of Health or its agent, or to their or his satisfaction.

All books, papers, and other articles, which in the opinion of the Board or its agent have been directly exposed to the contagion, and which cannot be satisfactorily fumigated, shall be burned.

WILLIAM P. MITCHELL,

There is everywhere a growing interest in physical training in the schools, a belief that the duty of caring for the body is as important as that of training the mind. In this connection attention is called to the following utterance of a distinguished edu-

"First among these present-day problems is the problem of

physical education.

"For purposes of training the body directly and the mind indirectly, four agencies are more or less employed in some schools, and should be extensively employed in all schools: play, gymnastics, athletics, and manual training. In addition to the physical qualities developed by gymnastics, athletics develops the intellectual qualities of alertness, self-knowledge, executive ability, and 'presence of mind,' or the ability to think effectively in a crisis; and the moral qualities of self-control, self-reliance, courage, endurance, humility in victory, fortitude in defeat, and lovalty to one's fellows through working together for a common end. Manual training specifically trains the hand as the executive of the mind; it gives opportunity for self-expression in material forms; it gives facility in the manipulation of the simplest and most generally used tools that have aided man in his ascent from savagery; it cultivates the mental and moral habits of accuracy and truthfulness, and it induces a realization of the dignity of labor.

"Without these four forms of physical culture, no school is doing its perfect work."

Home Study. The question has recently been raised as to whether the requirements of our schools may not be prejudicial to the health of pupils. This question recurs periodically, and is important, for whatever affects the health of school children naturally retards their progress and demands a remedy. critics often argue from insufficient data, and sometimes from the limited experience of a family circle. Besides, there is a tendency to make the schools a scapegoat for misfortunes or failures in the community. For the health of school children, the home and parents are chiefly responsible. It is an easy matter to charge ill health to the schools, when it is really attributable to natural weakness or excesses in other directions. As has already been said, the subject of physical training in schools is now at the front, and they are more and more supplying the physical demands of the young, which all homes neglect to some degree,

and many ignore entirely. It is not only because the question is now prominent, but because it is fundamental, that the subject is considered here, and the result of inquiries made more especially

with regard to high school pupils presented.

It may first be said that the normal child whose diet is suitable, who sleeps eight hours daily, and who has sufficient exercise in the open air is generally perfectly healthy. Such children constitute the great body of school pupils. They need useful occupation for body and mind as much as they need food and sleep. Our schools are somewhat neglectful in not giving manual training work,—exercise for the bodily faculties. It is probable that we do not furnish enough work of any sort for many children. For a few not naturally strong, the requirements may possibly be too severe, but for the great body of children, a careful consideration of the facts will show that no more is asked than can be given without injury.

Attention has already been called to the fact that the schools are in session on less than half the days of the year (178 days in the case of the high schools this year), that the year is broken into fourths by three vacations of a week each, that the schools are not in session on two days each week, and that there are frequent interruptions from legal holidays or stormy weather. In the case of the high schools, at least, this short year compels intensive work. If the work which necessity now compels pupils to do in 178 days could be extended over a longer period, say 200 days of the uninterrupted, normal, high school year, it would undoubtedly be better. Greater deliberation, more time for digesting knowledge and assimilating it would be a distinct advantage. The spirit of this electric age, demanding that everything be done in the shortest possible time, is having too great an influence in matters of education.

We often hear the remark by opponents of home study, "The children get five hours of brain work in school, and that is enough." Every one at all familiar with the work of the schools knows that the length of the session is no measure of the amount of the "brain work" of the child. Deducting time spent in opening and closing exercises, in gymnastics and recesses, in music and drawing, in no school do more than four hours remain for work that demands any special mental strain, and often much of the remaining work is of such a character as not to require intense application.

Inquiries of teachers and pupils in the Latin school have elicited the following information: There are twenty-six recitation periods in a week. The freshman class has ten periods in a week for study, the sophomores, eight, the juniors, from six to nine, and the seniors, five periods. In addition to this study in school, about twenty-five per cent. of the two upper classes study at home more than three hours a day for five days in a week. Forty per cent. of them study from two and a half to

three hours, and the remaining thirty-five per cent. study two hours or less. In the two lower classes, about twenty-five per cent. study three hours or more a day for five days a week; another twenty-five per cent. study about two and a half hours a day; and the remaining fifty per cent. study two hours or less. We find that thirty per cent. of the pupils in the high school carry an additional burden in the shape of music lessons, taking from one to two hours daily. In response to the question, "Do you or your parents think that this study affects your health?" about fifty answered, "Yes." These fifty pupils are among those who spend the largest number of hours in home study. Twenty of them take music lessons in addition, and in many cases their exercise in the open air is limited to the walk to and from school. In regard to the amount of open-air exercise taken by the pupils of the Latin school, in general it may be said that, aside from those who are engaged in athletics, the great majority do not take an adequate amount. There is sore need of suitable welldirected physical training in the high schools, and there is more need of free open-air exercise on the part of all high school students.

Assuming that there are fifty students out of the 425 in the Latin school whose health may be more or less jeoparded by study, the number is not abnormally large. It is probable that out of a hundred students taken anywhere at random, twelve would be found below the standard in vigor and ability to stand the more severe strain of school work. The remedy for this state of things lies in either lessening the amount of required work or in increasing the time allowed for it. The work of the Latin school is definitely prescribed by the requirements for college admission. Nothing can be omitted without a change in college requirements, and this remedy lies beyond the reach of the school authorities. In response to the question, "Do your parents think it would be better for you to take five years rather than four for your high school course?" only five per cent. answered "Yes," and only seven of the fifty who claimed that health was affected by their high school work desired any extension of the time. For years it has been possible, and is now, and it is distinctly so stated in the curriculum of the school, for any pupil to take five years instead of four to complete the work of the school. Very few, however, do it. With this opportunity of lessening the strain by taking a five-years' course, the responsibility for any injury done to health is transferred from the school authorities to the parents.

In this connection, the question of making the regular course five years in length and shorter courses of three and four years exceptional and optional is pertinent. The advisability of taking into the Latin school college-bound pupils from the eighth grade of the grammar schools, and giving them five years for college preparation, instead of four, should be very thor-

oughly discussed before plans are made for additional high school accommodations. It would make a difference of 150 pupils in the Latin school, and demand additional room, teachers, and outlay, but in the opinion of many best able to judge, this change would be decidedly to the advantage of both the students and the school.

The conditions in the English school are somewhat different, but inquiries there, to which 715 students have responded, lead to the same general conclusions. In this school there are thirty recitation periods per week. Of these, the freshmen have ten periods for study, the sophomores, twelve, and the juniors and seniors, eleven periods each. Every student is required to take fifteen periods of work that requires more or less study. Besides, all students have two or three periods of unprepared work which requires no previous preparation. English, history, and mathematics are required from each pupil, save in a few exceptional instances. The remaining studies are elective. course the range of electives is limited in the case of students preparing for the Institute of Technology or for normal schools. In general, however, each student may follow his tastes and inclinations, and select such subjects as offer the least resistance, if he chooses. The average amount of home study reported by students in this school is a little less than two hours a day for six days a week. Some who are doing special work, or more than the required amount, largely exceed this average, and very many, notably in the two lower classes, fall much below it. Thirty per cent. of the pupils spend an average of a little less than ten hours each week on music outside of school. Only four pupils in every hundred expressed a preference for an extension of the course to five years. Seventy-one pupils, or one in ten, think that their health is more or less affected by study. Among these, there are many who have weakness of the eyes. The great majority of students claim to take two hours of open-air exercise daily. As far as the observation of the teachers goes, the pupils whose health may be somewhat affected by study include many who are taking more than required work, some not naturally possessed of much physical strength, and some who spend a disproportionately large amount of time on outside pursuits. The remedy for any troubles on the score of health in this school, unlike that in the Latin school, is two-fold. The required courses are sufficiently flexible to meet the needs of all. There are already students in the school who are now taking partial courses. over-taxed student may drop one or more of his electives. other remedy lies in the extension of the course through five, or even six years. Any one who wishes may adapt the length of time spent in the school to health conditions. Of course, there is a natural aversion to dropping out of one's class, and it often happens that personal interests are sacrificed instead. sponsibility, however, does not rest upon the school.

In review, it may be said concerning the whole matter that schools must be organized and their courses shaped to accommodate the great body of students who are in good health. There should be no rigidity, however, about the schools or their curriculum, and there is none that prevents the adaptation of work or of time to the exceptional needs of the few who for one cause or another are unable to do all that the full course requires. If parents will more frequently consult teachers and make known the conditions that affect their children, they will find a willingness and even an anxiety to modify requirements to meet special demands.

Administration. In the last report, the need of an addition to the executive or supervisory force of the schools was set forth Each year increases the necessity for at considerable length. such addition. The introduction of telephones into the fourteen large buildings (at an annual expense, by the way, of \$308) has been of very great assistance in more ways than one. ability to communicate instantly with the schools is of decided advantage, and saves much traveling and considerable time. Schools cannot be supervised, however, by telephone. supervisory force should come constantly into personal contact with teachers and pupils. The special committee appointed by the board to consider the subject thought best to let the matter lie over until another year. The recommendation made to that committee I renew here to the board. It is that we follow the example of other cities of our size and employ a supervisor of primary schools. A woman trained and experienced along this line of work could be secured, and would be a re-enforcement that would result in great advantage to the schools.

Athletics. The interest in school athletics is constantly growing, not only among students, but with the public. Unregulated, they are a menace to the schools; properly controlled, they are productive of good. They must be subordinated to scholastic interests. Honors won in the classroom or at college examinations must be held superior to those gained on the ball field. The school teams must fitly represent their schools in conduct and character. They may elevate or discredit the reputation of their schools and their city. Not only should their conduct be sportsmanlike on the field, but clean and manly everywhere. Games should be absolutely free from trickery or ruffianism or baseness of any sort.

For several years the Somerville high schools have stood for what is best in athletics. The long line of victories has been honorably won by their teams. The players have reflected credit on their schools and city, not only by their prowess, but by their gentlemanly demeanor. This condition has not come about by chance, but has been developed by experiment and failure, as well as by success.

The Somerville high schools belong to the Interscholastic League, along with four other high schools.

The interests of the schools and the character of the games

are safeguarded by stringent rules. For example:—

- 1. The governing board consists of one under-graduate, two graduates, and one teacher from each school approved by the head master.
 - 2. The head masters form a board of final appeal.
- 3. The teachers on the governing board are a committee on games. Two members of this committee must attend each game, with power to settle certain questions that may arise.

4. No student can play on a team unless a bona fide mem-

ber of the school, taking a full year's work.

- 5. Nor can he play unless he is taking a course of twelve prepared recitation periods per week in a way to secure promotion.
- 6. He must also have attained a promotion standard during the previous year.

7. He can take part in no contest unless he is in good and

regular standing and maintaining honorable conduct.

8. A student once ruled out of a game for improper play is disqualified for future play until formally reinstated.

These rules ensure intelligent management and a fair

standard of scholarship in players.

The Somerville High School Athletic Association manages the athletic interests of the schools through an executive committee made up of three teachers, two graduates, three undergraduates, and the manager and the captain of each team in its playing season. One of the teachers acts as treasurer, and one is present at every league and practice game, accompanies the team on every trip, and is generally present at afternoon practice.

There has been nothing for several years to criticise unfavorably in the management. There has been no disagreement and no wrangling. The financial affairs have been admirably managed. In June, 1900, at the end of the year, there was a deficit of \$4.48. For the four following years the gross expenditure was \$5,790.71, with a cash balance on hand at the end of June, 1904, of \$1,327.88. This shows, also, the popular interest in the games.

Rules have been rigorously enforced and players frequently debarred for low scholastic standing. The head masters and the teachers generally have actively participated in the affairs of the association. More than all else, as contributors towards harmony and success have been the attitude and spirit and co-opera-

tion of the students themselves.

The most important person connected with the athletic interests of the schools is the coach. Upon him rests not only much of the responsibility for championship successes, but in a large degree is he also responsible for the morale of the teams.

In his personality and character, in manliness and power, he should be the equal of any teacher. His control should be absolute, and he should allow nothing that in the least detracts from the highest type of sportsmanlike play or gentlemanly conduct.

The leading criticism upon school athletics is that they have been left too largely to student control, and have been loosely managed. While this criticism, as has been shown, does not apply to our association at present, we have shared in the general feeling that there should be a closer affiliation between school authorities and all student activities, such as publications and athletics. Whatever legal difficulties may be in the way of a general movement in this direction in this state will soon be probably removed by legislative enactment. The conditions are propitious for such a change in our city. In the organization everything is harmonious, the treasury is full, we fly the championship banners, the management is efficient, the coaching department is strong, and both the association and the students are ready to welcome the addition to the governing body of representatives from the school board. Certainly matters so closely connected with school interests should come to some extent under the direction of the committee. It would be unwise to wait until troubles arise to compel its intervention.

While wisely-regulated field athletics furnish excellent physical training, this training is limited to the 100 students, more or less, who engage in them. The great body of students are left without physical training of any sort. Something should be done to meet their needs. Some competent physical training director should be employed to arrange and supervise some regular system of training for all high school pupils, indeed for all pupils in the public schools. If fitted for the work, he might be given the management of the athletic teams of both grammar and high schools at the proper season. He should be selected by the school authorities, be paid in whole or in part by them, and be under their direction and control. The person with all the qualifications demanded may be difficult to find, but when found, his services would certainly be of great value. The whole

subject is commended to the consideration of the board.

To recapitulate the recommendations made in this report:—
1. Immediate provision of additional high school accom-

modations.

2. An addition of two rooms to the Hanscom school, or, as an alternative, a new primary building in ward four.

3. An addition of four rooms to the Brown school.

- 4. The enlargement of the Hodgkins school by the addition of six rooms, and the extension of the schoolhouse lot.
- 5. The discontinuance of kindergartens whenever they force first-grade children to lose half their school year.

6. Frequent medical inspection of the schools.

7. The continuance of efforts on the part of the board to secure the equipment of manual training rooms.

8. The employment of additional help in the department of school supervision.

9. The establishment of a new grammar school centre,

with a master at its head, in the Burns schoolhouse.

10. A connection between the school board and the governing body of the High School Athletic Association.

11. The employment of a director of physical training and

athletics.

In closing this report, I wish gratefully to acknowledge the confidence and support of your honorable body, the hearty assistance of supervisors and principals, and the invaluable co-operation of parents and citizens in the work of the schools. Above all, we should recognize our indebtedness to the teachers of the city for the zeal, fidelity, and intelligence with which the arduous labors of the year have been discharged. To them rather than to school officials is to be credited whatever of excellence our schools have reached, and only by their efforts can our high standards be maintained.

G. A. Southworth, Superintendent.

Somerville, December 23, 1904.

AMENDMENTS TO RULES.

Since the last edition of the rules was published, the following amendments have been made:—

SECT. 3. The standing committees of the board shall be as

follows:—

(1-7.) On schools in the several districts (or wards), to consist of the two members elected from each district or ward, together with one member elected in a contiguous ward, who shall be selected by the nominating committee referred to in Section 2 and approved by the board.

(8) On additional school accommodations, (9) high schools, and (10) text-books and courses of study, each to consist of one

member from each ward.

(11) On evening schools, (12) finance, (13) industrial education, (14) music, (15) private schools, (16) repairs of school buildings, (17) rules and regulations, (18) salaries, (19) supplies, and (20) vacation schools, each to consist of three members from different wards.

The member first named on any standing or special commit-

tee shall be chairman thereof.

The mayor and the president of the board of aldermen shall be added as ex-officiis members to the committees on finance and additional school accommodations.

The chairman of each district committee for any year shall be the member residing in the district whose term expires at the end of that year. If the term of any member shall expire during the year, the board shall determine the chairmanship of the district committee.

Wherever the word "board" occurs in the rules and regu-

lations, it is understood to refer to the school committee.

SECT. 6. Nine members shall constitute a quorum for the transaction of business, but a smaller number may vote to call the roll, record the names of absentees, and adjourn to a fixed date. Nine votes shall be necessary for the election of any officer or employee of the board.

Sect. 21. The committee on evening schools shall have the general supervision of the evening schools as provided in the general regulations, and shall nominate teachers for them as

they are needed.

Sect. 31 (a). The committee on vacation schools shall have in charge the organization and conduct of vacation schools, and

the general supervision of the same.

SECT. 41. He shall, at his discretion, in very stormy or excessively hot or cold weather, strike the signal on the fire alarm bells for the omission of the next session of the schools.

SECT. 50. All teachers, supervisors, and other employees of the board shall be nominated by the standing committee having

charge of the several districts or departments.

Whenever, in the opinion of said standing committee, it is thought best not to nominate any such person for re-election, such person shall be notified by the committee in writing of their decision at least one month before the April meeting of the board. Any appeal by the aggrieved party from this decision to the full board must be claimed in writing within two weeks after receiving the aforesaid notice. Pending such appeal, no new nomination shall be made by the committee.

SECT. 51. The superintendent, teachers, supervisors, and truant officers shall be elected annually by ballot, or otherwise, as the statutes may direct, at the regular meeting in April, nine

votes being necessary to a choice.

Evening school teachers shall be elected in September, and

vacation school teachers in June.

Any vacancy occurring during the year may be filled at any meeting of the board. The secretary shall forthwith give written notice to each person elected, who shall be requested to notify the secretary of his acceptance within ten days from the date of the notice. Such election and acceptance shall be subject to the provision of the public statutes that the board may dismiss from employment any teacher whenever it may think proper.

The following has been substituted for the last sentence in the first paragraph of Section 52:—

The salaries of teachers shall be payable in ten equal installments.

SECT. 55 (a). Salaries of evening school teachers shall be fixed in accordance with the following schedule:—

HIGH SCHOOL.

Master	\$6.00	for	each	evening
Sub-master	4.00	66	. "	"
First assistant	3.00	"	"	"
Second assistant	2.00	66	66	"
Third assistant	1.50	"	66	"

ELEMENTARY SCHOOLS.

Masters of schools with an average at-				
tendance of 150 or more,	\$4.00	for	each	evening
Masters of schools with an average at-				,
tendance of less than 150,				evening
First assistant				
Second assistant				
Third assistant	1.00	66	"	"

SECT. 55 (b). Vacation school teachers shall be paid according to the following schedule:-

Principal\$	15.00	for	each	week
First assistant	10.00	66	66	66
Second assistant	7.50	66	66	66
Third assistant	5.00	"	66	66

SECT. 56 (second paragraph). The supervisor of penmanship shall receive a minimum salary of \$1,000, to be increased \$100 annually until a maximum of \$1,500 is reached.

(Eleventh paragraph.) The superintendent's clerk shall be paid \$650, to be increased \$50 annually until a maximum of \$750

is reached.

The committee on evening schools is empowered SECT. 58. to nominate teachers for these schools, to be elected by the board

at salaries fixed under the rules.

SECT. 99 (last sentence). Teachers regularly employed in the day schools shall not be eligible for employment in evening schools, except by the vote of the standing committee having their day school or department in charge.

SECT. 101. The school year shall begin and end on such dates as shall be determined annually by the school board at its

regular February meeting.

SECT. 102. Vacations.—From noon of December 24th to the day after that celebrated as New Year's day; the two weeks that separate the last twenty-four weeks of the school year into three terms of eight weeks each; from the close of the school year to the time fixed for its beginning.

SECT. 136. No school shall be open until fifty persons have pledged themselves to attend regularly. When the average number attending any school for four consecutive sessions is less

than twenty-five, the school shall be closed.

SECT. 138. Teachers in the evening schools shall be designated as masters, sub-masters, and first, second, and third assistants. Each elementary school having an average attendance for four consecutive evenings of twenty-five pupils may have a master and one first assistant; an additional first assistant may be allowed for every twenty-five pupils in excess of that number.

SECT. 140. The term of the evening schools shall begin on the first Monday of October, and continue until Christmas. The term of any school may be prolonged by the unanimous action of the evening school committee. The sessions of the evening drawing school shall be held on Tuesday and Thursday evenings; of the other schools, on each week-day evening, except Wednesday and Saturday.

SECT. 145. Vacation school teachers shall be nominated by the committee on vacation schools, and shall be designated as

principal, and first, second, and third assistants.

ORGANIZATION OF SOMERVILLE SCHOOLS.

Information concerning our schools is frequently sought by citizens or by school men in other localities. Following are the principal facts concerning them. Additional knowledge may be gained from the Rules and Regulations:—

The city supports four kindergartens, in the Kindergartens. Hanscom, Bennett, Baxter, and Glines schools. children between four and five years of age are admitted to the kindergarten nearest their residence during the months of September and April, and may remain until the July following their fifth birthday. Sessions from 9 to 12.

Head kindergartners receive \$600. One trained assistant is allowed when the number exceeds thirty, at a salary of \$275, \$350, or \$425, according to experience. Kindergarten teachers give five hours daily to their work, the afternoon being employed in

visitation, preparation, mothers' meetings, and the like.

Primary Schools. Our elementary school course covers nine years, the first three of which are spent in primary schools. We have no exclusively primary school buildings, the ninety-one primary classes being distributed among twenty-two schoolhouses.

Vaccinated children five years of age, or who will reach that age on or before the first day of October, are admitted during the month of September only, provided they have never attended school before. Children able to enter existing classes will be admitted at any time. Applications for admission should be made to the principal of the school.

Only trained or experienced teachers are employed, the salaries being \$300, \$400, \$500, \$600, or \$650, according to length of service. Normal training is equivalent to a year's experience, and experience in other places is counted in determining salary.

First-grade teachers, with classes numbering fifty, are allowed an assistant, who is paid \$200, \$275, \$350, or \$425, accord-

ing to years of service.

The grammar classes are found chiefly Grammar Schools. in twelve large buildings, of twelve rooms each. The course covers six years, and includes only those studies which the statute requires, with the addition of music, sewing, and elementary science.

The salaries of grammar school teachers are the same as those of primary teachers. Masters are paid \$1,900, and their assistants \$725. Other ninth-grade teachers are paid \$700.

Promotions. Promotions in all grades, from the first to the thirteenth, are made in June by the regular teacher and the principal, with the approval of the superintendent and district committee. They are based on the estimate of the pupil's daily work made by the teacher and recorded bi-monthly. An occasional brief, unannounced, written test is a factor in this estimate.

Where there is reasonable doubt of a student's fitness, he may be promoted on a trial of three months. In such cases the parent is notified and kept informed of his child's progress. At the end of this probationary period he may be returned to his former grade, provided it seems for his interests. In 1904 less than nine per cent. of those promoted on trial fell back.

Children capable of more rapid advancement may be promoted one or more grades at any time. One hundred twenty-six

were thus promoted in 1904.

Fitness for graduation or for admission to the high schools is determined in precisely the same way. Diplomas are given in grammar and high schools to those who have satisfactorily completed full courses.

Latin High School. In September, 1895, in the forty-third year of its existence, the Somerville High school was divided, the classical, or college preparatory, departments remaining in the old building, erected in 1872, and the English departments occupying a new building, erected in 1894-'95.

Some facts concerning the Latin school are presented in the

following table:-

School Year.	Average Number Belonging.	Number Entering.	Gradu- ates.	Cost of Instruction.	Per Capita Cost.	Teachers	Pupils to a Teacher.
1895-6	257	69	50	\$11,702	\$45.57	9	28.6
1896–7	262	81	5 1	11,840	45.19	9	29.1
1897-8	273	86	55	11,921	43.67	9	30.3
1898-9	264	78	51	11,935	45.21	9	29.3
1899-0	245	65	48	12,491	50.98	9	27.2
1900-1	271	104	5 6	12,676	46.74	9	30.0
1901–2	314	114	56	12,583	40.13	10	31.4
1902-3	358	125	46	14,170	39.58	11	32.5
1903-4	398	122	73	16,104	40.46	13	30.6

The object of the school is, primarily, to furnish a suitable preparation for those pupils who desire to pursue either a regular or a special course of study at higher institutions of learning, but the school is open to all pupils who wish to take the courses of study offered.

The regular time for completing the course is four years. Pupils, at the request of their parents, can make the work of each

year easier by taking five years for the course. Those who are capable, and have good reason for shortening the time of preparation, are allowed to complete the course in as short a time as their ability will permit.

Graduates of grammar schools are admitted to either High school on presenting a certificate of qualification signed by a master. All other pupils are admitted by an examination in grammar school studies, given usually on the Saturday preceding the opening of the schools in September.

The tuition for non-residents is the per capita cost for the year, payable in advance. The sessions of the school are from 8.30 to 1.30. The salaries paid High school teachers are given

on later pages of this report.

English High School. This school was organized in September, 1895. Information concerning it is found in the following table:—

School Year.	Average Number Belonging.	Number Entering.	Gradu- ates.	Cost of Instruction.	Per Capita Cost.	Teachers.	Pupils to a Teacher.
1895-6	456	213	67	\$20,102	\$44.13	21	21.7
1896–7	531	235	70	23,010	43.33	21	25.3
1897-8	535	224	75	24,843	46.44	22	24.3
1898-9	575	231	86	26,159	45.49	23	25.0
1899-0	669	316	83	31,322	46.82	27	24.8
1900-1	691	249	97	32,739	47.35	30	23.0
1901-2	738	294	108	35,989	48.74	34	21.7
1902-3	747	264	135	36,843	49.32	33	22.6
1903-4	728	264	106	36,426	50.04	33	22.1

The course of study covers four years. Graduates are admitted to special courses when the conditions are favorable. Candidates for technical and normal schools take specific pre-

paratory work.

The wide range of elective studies is a distinctive feature of the school. The choice of the first year may be one of the following: Latin, French, German, biology (botany and zoology), manual training, and mechanical drawing. To these physics is added for the second year, and chemistry, geology, and astronomy for the third and fourth. After the second year two or more electives may be taken. Penmanship and commercial arithmetic may be taken the second year.

During the third and fourth years the student may elect in a business course bookkeeping, commercial arithmetic, commercial law, penmanship, stenography, typewriting; in mathematics, advanced algebra, solid geometry, analytical geometry, and trigonometry; in advanced science, work in botany, zoology,

physics, chemistry, and drawing.

Of the fifteen periods of prepared work, the course prescribes ten periods the first year, eleven periods the second year, seven periods the third year, and seven periods the fourth year. The pupil has the privilege of selecting from the list of elective studies subjects whose recitation periods each week, or their equivalents, when added to the required prepared work, shall equal the necessary fifteen periods.

Concerning admission, sessions, etc., see Latin school.

A simple, healthful, inexpensive lunch is served at the recess midway of each session to pupils desiring it.

Manual Training. Three rooms are fitted and equipped in the basement of the English High school for its manual training department. The course includes carpentry, wood-turning, and carving, clay modeling, pattern making, moulding, and casting. A fourth room is devoted to mechanical drawing, with a full course. Manual training has not been extended to include grammar schools.

The sub-master in charge of the manual training department

is paid \$1,700, and his assistants \$1,700, \$1,200, and \$800.

Sewing. Sewing is taught to the girls in the fifth, sixth, seventh, and eighth grammar grades in weekly lessons of one hour each.

Three special teachers are employed at salaries of \$650.

Music. Weekly instruction in music is given exclusively in the High schools, and in part in the three upper grammar grades by a specialist, who is paid \$1,700. The books used are "The Euterpean," "The Cecilian Series of Music and Song," Nos. 2, 3, and 4, and "The Laurel Song Book."

In the six lower grades musical instruction is given by the regular grade teacher, under the supervision of a specialist, who visits each class once every thirteen days. She is paid \$900. The Normal system of music, with its books and charts, is used.

Gymnastics. In elementary grades the Ling system of Swedish gymnastics is practiced daily. No special teacher is employed.

Recesses. The Latin school has two brief recesses, breaking the daily session into thirds. The English school has a single

recess at the end of the third period.

The four lower elementary grades have a five-minute recess midway of each session. The five upper grammar grades have no recess, though no unreasonable physical restraint is placed upon any pupil.

No detention of pupils is allowed at noon, and but a half-hour's detention at the close of the afternoon session, "for wilful

neglect of duty only."

Corporal Punishment, Corporal punishment, "which includes any infliction of physical pain or application of physical force," is not prohibited. It must, however, not be administered

until twenty-four hours after the offense, the approval of the principal being first obtained. Each case must be reported in detail to the Superintendent. There were 270 cases in 1900, 284 in 1901, 328 in 1902, 299 in 1903, and 293 in 1904.

Drawing. Two teachers of drawing are employed in the English High school at salaries of \$1,000 and \$600. In that school freehand drawing is compulsory for first-year pupils, and elective for all others. Drawing is not taught in the Latin school. A few Latin school pupils are taught drawing in the English school.

In the primary grades daily lessons, and in the grammar grades semi-weekly lessons, are given by the regular teacher, under the direction of a supervisor, who visits each class once a

month, and is paid \$1,000.

The course includes pictorial drawing from nature, models, and objects; structural drawing from type solids; decorative drawing, designing, and color work, historic ornament and picture-study. No drawing books are used. Colored pencils are provided in primary grades, and water-colors and brush in grammar grades.

Penmanship. Intermedial slant writing is in use in the elementary schools, the Whitehouse system being used. The supervisor visits each class once in four weeks, and receives \$1,500.

Student Teachers. At the present time one student teacher is employed in the Latin school, and two in the English. Each serves without pay, under the direction of the head master.

The Public Library. The English school has a working library of 1,200 volumes, but it draws constantly on the public

library, located in an adjoining building.

For four years there has been a constant use of the library by school children. Circulating libraries of fresh books are in use in the smaller buildings. Books are delivered and collected each week at the large grammar schools. As far as they can, the teachers aid in the selection of books by the children, and the librarian and his assistants cheerfully render all the help in their power.

Evening Schools. An evening high school is maintained in the English High school building on four evenings a week, from 7.30 to 9.30. The principal is paid \$7, and his assistants \$4, \$3, \$2, and \$1.50. Any high school study may be pursued. An evening drawing school for freehand and mechanical work is open in the English schoolhouse from October to April, on Tuesday and Thursday evenings, from 7.30 to 9.30. The principal is paid \$6, and assistants \$3 and \$4 an evening.

Elementary evening schools are open in the Prescott, Bell, Forster, and Highland buildings from October 1 on four evenings a week, from 7.30 to 9.30. The length of the term is de-

pendent on the interest and attendance. The course of study followed is that prescribed by the statute. Principals receive \$4 or \$5, and assistants \$2.50, \$2, \$1.50, or \$1 each evening.

Truants. The city employs one active truant officer, who is paid \$1,100 and the board of his horse. Truants are sent to the county truant school at North Chelmsford. There are now five truants from Somerville in the school.

Janitors. These important officers are appointed by the commissioner of public buildings, and are under his direction and that of the school principal. Their salaries will be found on the last page of this report.

Supervision. The superintendent of schools is the executive officer of the board, and upon him devolves the general management of the schools under its direction. He serves as the secretary of the board and as supply agent. His salary is \$3,000, and he is allowed a clerk, who receives \$750. His office is in the City Hall Annex, and his hours are from 4 to 5 each school day, and from 8 to 9 on Saturday. His office is open from 8 to 12 and from 1.30 to 5 on school days, and from 8 to 10 on Saturday.

The meetings of the school board are held on the last Monday evening of each month, except July, August, and December,

at 8.15 o'clock.

CONTENTS OF APPENDIX.

Concerning Finance.

No. of Table.

- 1. Schedule of school property.
- 2. Cost of maintaining schools, 1904.
- 3. Cost per capita of maintaining schools, 1904.
- 4. Cost of maintaining schools for a series of years.
- 5. Cost per capita for maintaining schools for a series of years.
- 6. Amount spent annually for new school buildings and for repairs for a series of years.

Concerning Pupils.

- 7. Population and school census.
- 8. Attendance, etc., of the schools for 1904.
- 9. Statistics of the high schools, for school year 1903-1904.
- 10. Pupils by grades, December, 1904.
- 11. Separate statistics for grammar and primary schools, 1904.
- 12. Admissions to first grade in September.
- 13. Number of grammar school graduates, 1904.
- 14. Truant statistics.
- 15. Evening school statistics, 1903-1904.
- 16. Grammar school graduates for a series of years.
- 17. Attendance statistics of all schools for a series of years.
- 18. Statistics of the high school for a series of years.
- 19. Promotions, 1904.

Concerning Teachers.

- 20. Resignations of teachers, 1904.
- 21. Teachers elected in 1904.
- 22. Leave of absence of teachers.
- 23. Transfers of teachers.
- 24. Number of teachers employed for a series of years.

Miscellaneous.

- 25. Changes in text-books, 1904.
- 26. High school graduation exercises, 1904.
- 27. Grammar school graduation exercises, 1904.
- 28. Organization of school board for 1905.
- 29. Teachers in service January, 1905.
- 30. Officers in service January, 1905.
- 31. School janitors.

TABLE 26.—GRADUATION EXERCISES, 1904. High Schools.

The graduation exercises of the high schools occurred on Thursday, June 23, at the First Methodist Episcopal church, in the presence of a large audience of parents and friends.

The formal address to graduates was given by the Rev. W. H. P. Faunce, D. D., president of Brown University.

At the close of the address, the chairman of the committee, Frederick A. P. Fiske, presented diplomas to the 179 members of the graduating classes.

The graduation exercises were followed by a reception to the graduates and their parents, given by the school board.

Order of Exercises.

Frederick A. P. Fiske, Chairman of School Board, presiding.

Overture. "Si j'etais Roi."

Adam

Hadley's Orchestra.

1. *Singing.

Four-part Song, "Greeting to Spring" (Waltz). Strauss Solo, "Toreador's Song," with Chorus (Carmen). Bizet J. Albert Wilson.

2. Prayer.

REPORT OF THE TRUSTEES.

To His Honor, the Mayor, and Board of Aldermen of the City of Somerville:—

The trustees of the public library beg to submit herewith

their thirty-second annual report.

It has been the privilege of this board in each of their annual reports to record a steady and continuous increase in circulation, and it is with great satisfaction that the past year has been no exception. During the year the circulation has increased from 314,206 to upwards of 350,000, while the number of card holders has increased from 7,699 to over 13,000. Such figures are, indeed, gratifying, and are indisputable evidence that the library and its facilities are also appreciated by its citizens.

Your board are greatly encouraged by the support given to them by the public, and feel warranted in expending every effort in their power to the end that our citizens may be as well served as those residing in larger cities, where the funds available for library work are so much greater than our own. The appropriation available for the uses of the library, while not as large as is desired for up-to-date requirements, still with careful and watchful expenditure has in a great measure fulfilled the wants and demands of the year. If, however, the library is to keep up with the current demands of the modern institution, an increase of the annual appropriation is imperative. In our opinion, no investment which the city makes yields a more lasting or beneficial return.

The demands of our public schools continually increase from year to year, and it is with difficulty that the resources of the library are kept within these requirements. Modern education requires constantly increasing sources of information and reference which must be supplied if the library is to do the work

fully which it has now in hand.

The value of a ready reference library in conjunction with the higher education as supplied by the high and Latin schools cannot be readily estimated. The lower grades of our schools are demanding and should also be supplied with such reference works as are required for the full supplementing of their particular studies. The teacher is making fully as many requisitions as the scholars, and their demands should be fully and unhesitatingly met. During the past year 5,169 books were sent to the various schoolrooms of the city, all of which, it must be understood, are purely of an educational nature. In addition, there are at the present time 110 special libraries, each consisting of about forty books, all of which are at the service of our schools.

Five agencies for the distribution of books generally are in continuous operation. These agencies are doing a good work, but there is a growing demand for more efficient service than can be accomplished by agencies located in stores. In West Somerville the demand is particularly strong, and it is apparent that at a period not very remote something must be done to satisfy the needs of this section. Whenever a sufficient appropriation for this special work shall be available, your board stands ready to carry out the work to the extent made possible by the funds in hand for this purpose. We strongly recommend the proposition for your serious consideration.

The creation of a branch library and reading room in the vicinity of Davis square would be hailed with joy, and it is difficult to estimate the extent of the work which it would be called upon to perform. We believe that within a very short time the number of visitors would exceed that of the main library. With such conditions confronting us, we can but ask, Why should the work be longer delayed? It is the duty of the city to give to its inhabitants every possible convenience for the cultivation of their minds, and surely their demands in this instance are worthy and

should be met.

The method of supplying books to the Sunday schools continues satisfactory, and the innovation has proven popular from the start. The circulation of books in this manner will, without doubt, continue to increase.

It is again our pleasure to speak in the highest terms of commendation of the work performed by our very efficient librarian and his faithful corps of assistants.

Respectfully submitted,

CHARLES A. WEST,

President.

December 27, 1904.

REPORT OF THE LIBRARIAN.

To the Trustees of the Somerville Public Library:—

I herewith submit the librarian's thirty-second annual report. Below is a statement in detail relative to the various departments:—

The Cataloguing Department.

The cataloguing department, under the supervision of Miss Esther M. Mayhew, has had a busy year. During the past twelve months, notwithstanding the fact that we have purchased printed cards from the Library of Congress, Miss Mayhew and her assistant, Miss Hayes, have had all the work that could possibly be done, and frequently other members of the staff are detailed to assist the cataloguing department. In addition to the general catalogue, which contains author, title, and subject cards for all the books in the library, a card catalogue is now maintained in the children's room, and also in the reference room. In addition to this, author, title, and subject catalogues are now maintained in the Davis-square agency, the agency at Teele square, and a catalogue is in preparation for the agency at East It is estimated that the work of this department has been considerably more than doubled during the past five There is considerable extra work that urgently demands performance during the coming year. The frequent inventories of the library which are now imperative has created the necessity of shelf-lists for the children's room, the school librarian's room, With assistance from these departand the reference room. ments, it is hoped that these shelf-lists may be prepared before the next general inventory is attempted. An inventory without a shelf-list is a very slow, tedious, and unsatisfactory process.

Below are the statistics of books withdrawn from the library, books added to the library, and books bound by the library during the year:—

Books Withdrawn.

The School Department.

The school department met with a great loss in the death of its school librarian, Miss Mary J. Warren, who died in May. Miss Warren had been a member of the library staff for a period of seventeen years, and, with one exception, was the senior member of the staff in point of service. Her faithfulness, her patience under physical disabilities, and her loyalty to the library will be

long remembered.

Soon after her death, Miss Mary S. Woodman was appointed as her successor. The work of this department has increased rapidly from year to year, though it has been brought to such a point of development at present that a proportionate increase cannot be hoped for the future. As usual, forty books are allowed every schoolroom in the city that cares to take them as a special library; if, however, there are more than forty scholars in any room, a limit of one book to each pupil is permitted. Since the beginning of the year, 5,169 books have been sent to the schools in these libraries. Out of the 227 schoolrooms in the city, 110 are at this date supplied with special libraries. school circulation for the current year amounts to 42,586 fiction and 40,128 other works, making a total of 82,714. During the past five years it has been a rather difficult and somewhat expensive process to build up this department to its present state of efficiency. But we are now in a position to supply the demands of the schools, and generally to supply them with promptness. It is the desire of the library to become so equipped that every schoolroom in the city, if it should desire this service, might be supplied with the books it needs at short notice.

A printed list of the books of this department arranged by the author and title, with the grades indicated for which the books are suitable, would now be a great accommodation to the school librarian and to the teachers alike. The cost of such a list as this in an edition of a thousand copies would not be large,

probably about \$200, and I recommend that such a list be prepared and printed during the coming year.

Reference and Art Department.

The reference and art department, under the supervision of Miss Mabel E. Bunker, continues to be one of the more useful departments. Below is given the monthly attendance for the vear:-

During the year there have been thirteen art exhibits, as follows:---

Photographs of Salisbury cathedral.

Harper's black and white prints.

Prang platinettes. German festoons. Venice, No. 3.

The hundred most eminent persons of all time. Views of Grand Canyon of Arizona, etc.

Decorative art from South Kensington museum.

English lakes.

India, from Bombay to Calcutta.

Perugia. Sicily.

Elson prints.

Many works of importance have been purchased during the current year, among which may be mentioned:—

Watt's Dictionary of Chemistry—4v. Cassell's Popular Science—4v. Cram's Standard Railway System Atlas. Armstrong's Gainsborough and His Place in English Art.

Cruttwell's Luca and Andrea Della Robbia.

Menpes' Whistler as I Knew Him.

National Gallery—3v.

Roe's Ancient Coffers and Cupboards. Shaw's Encyclopaedia of Ornament. Shakespeare rare print collection.
Gusman's Pompei.
Menpes' Venice.

Thacher's Christopher Columbus.

Burke's Peerage, Baronetage, and Knightage.

Finckam's Artists and Engravers of British and American Book

Work of John S. Sargent, R. A.

During the year an appraisal of the Americana room has been made by the well-known specialist, George E. Littlefield, and a value has been placed by him on every book in our Americana collection. Mr. Littlefield finds the total value of this collection \$8,571.80. He speaks in high terms of the fullness and range of the department. The commercial value of this collection appreciates every year. Mr. Littlefield very generously donated to the library the amount paid him for his services in appraising the Americana room. This sum—\$25—has been used in the purchase of Americana books.

The Children's Department.

The children's department, under the supervision of Miss Anna L. Stone, has continued to supply the children of the city with a wide range of useful and inspiring books. Though this room, at certain hours of the day, is taxed to its full capacity, it is evident that a large proportion of the children of the city cannot directly share in its benefits. The distance of the library from the eastern and western extremities of the city prevents the younger children, at least, living in those localities from visiting our children's room. It is safe to say that half the children of Somerville never, or very seldom, enter the children's room of the public library. The great pleasure and benefit of those children who do visit the room, as well as the enthusiastic gratitude of many of their parents, makes it all the more a matter of regret that these advantages cannot be shared by the entire youthful population of the city. We are under the necessary injustice of treating the children of one section of the city better than the children of other sections. It is to be hoped that this injustice may be lessened in the future by the establishment either of branch libraries or much larger and better equipped agencies.

The children's room is not an ideal room, either on the score of situation, ventilation, or artistic construction, but an effort has been made the present year to beautify it as much as its natural limitations will permit. A series of picture bulletins have been displayed through the year, and such subjects have been treated pictorially as Bryant, Whittier, Washington, Lincoln, Columbus, the Seventeenth of June, Thanksgiving day, Christmas, football, etc. In addition to the pictorial treatment of these subjects, a list of the best books bearing upon them has in most instances been displayed. A few good pictures have been purchased for the permanent adornment of the walls. A few Nature charts, with illustrations of birds, flowers, animals, and fishes, some simple historical charts, and a large globe, are needed for the full equipment of the room.

The circulation of the children's room by months is herewith

appended:-

Month.								Fiction.	Other Works.	Total.
January								4,162	1,038	5,200
February								4,226	1,229	5,455
March							•	6,444	1,959	8,403
April								4,508	1,246	5,754

December	•	•	•		•	•	•	4,209	1,365	5,574
									10.500	01.005
Totals	S		•				•	51,077	13,530	64,607

Of the above total, 79.06 per cent. is fiction, and 20.94 per cent. is other works.

Agencies.

The agencies still do their usual amount of work. The We Magoun-square agency, however, has been discontinued. now in all our agencies, with one exception, allow people to select books from small collections that are kept in these agencies for public use. Of course but a few hundred books in any instance can be kept for this purpose, but the number taken from the shelves is very much greater than the number ordered through the main library. When a book is taken from the shelves in an agency, the chooser has only a few hundred books from which to select. But if he takes books on his card, the resources of the whole central library are at his disposal. But yet the freedom of selecting one's own book by coming in direct contact with it is appreciated so highly that readers much prefer to select their books personally from a very meagre collection, rather than to draw them by card from a very large collection. This is certainly a strong argument in favor of "free access."

I am a thorough believer in library agencies, but I also believe in evolution. It is the natural tendency of the successful agency to evolve into something better. This tendency ought to be encouraged. As the population of the city increases, new agencies should be established commensurate with the growth of the population. But an agency can supply a section adequately only up to a certain limit. The time is sure to come in the growth of a prosperous agency when it can no longer adequately meet the public needs. When that time comes, it should evolve into a branch library. Such a need is felt now, and has long been felt, in the West Somerville section of the city. It may be urged that if a branch library is established there, other sections sometime in the future may also demand branch libraries. true, and a fact that should not be blinked. But judging from the present growth of the agency system, it will be several years before the natural evolution of the library system will demand

another branch library in any other section of the city. When that time does arrive, then such a demand should be considered as an evidence of growth, progress, and intellectual development, and be met with gratulatory joyfulness.

Below is a table of circulation of the different agencies dur-

ing the year:-

Sunday School Libraries.

The library still continues to supply a number of the Sunday schools of the city with such books as the Sunday schools may wish to select up to the number of 100. The service has proven A Ship to the service of the

satisfactory to the Sunday schools that have applied for it. During the present year libraries have been taken out by the following Sunday schools: Bow-street Methodist, Perkins-street Baptist, Prospect-hill Congregational, Second Unitarian, West Somerville Baptist, Winter-hill Congregational, and Winter-hill Universalist. During the year we have delivered to the Sunday schools of the city and to the Y. M. C. A. 1,058 books, of which 889 are fiction and 169 are other works. The library stands in readiness to supply any or all of the Sunday schools of the city with libraries of 100 books.

Library Thefts.

During the year the library has had a disagreeable experience with a thief. A total of 828 books are missing, the value of which is estimated at above a thousand dollars. After a long search, and largely through the efforts of Lieutenant Carter, of the Somerville police, the thief was found and afterwards convicted and sentenced to a three-years' term in the house of correction. The thief admits the theft of 240 books, and there is ample evidence that he took a much larger number. Many of these stolen books have since been recovered from the secondhand dealers in Boston. Precautions have been taken to prevent a repetition of such thievery in the future. Frequent inventories have been instituted, and some department of the library will be inventoried every month; an attendant has been stationed in each of the stack-rooms during the busy hours of each day; and a perforating stamp has been purchased, and the words "Somerville Public Library" will, as soon as possible, be stamped upon every book in the library.

House-to-House Delivery of Books.

The library still continues to deliver books to the homes of people by delivery boys, who receive two cents per book for the round trip, to and from the library. The growing use of the agencies renders this service unnecessary in most of the sections of the city; but during the year 2,490 books have thus been delivered.

General Work.

The general work of the library, under the immediate supervision of Miss Adele Smith, the assistant librarian, shows a gratifying development and increase.

The general circulation figures of the year are as follows:— January 30.078 February 32,316 March 42,441 April . 33,278 May 37.885 Tune 26,567 Amount carried forward

202,565

Remarks.

It has been the aim of the library for the past few years to steadily duplicate its standard works. It has done this with the hope eventually of supplying all demands outside the domain of current fiction that may be made upon it. It would be an exaggeration to say that this hope has been fulfilled entirely. But it is no exaggeration to say that the standard works in the domains of literature, history, science, and sociology (that are not of a narrowly technical nature) may be found in the library when Current fiction cannot usually be obtained when asked for, and to supply the demand for fiction is, I presume, a problem hopeless of solution. Personally, I wish that the best fiction might be purchased in sufficient amounts to supply the demand. Many people will read fiction when they can secure it, and the conviction must be borne home to all librarians that most people will read nothing else. Very possibly this is not the most desirable condition of affairs. But the wise man will mold the present condition of affairs, however undesirable, into something better if he can. If most people will read nothing but novels, the best thing that can be done is to give them no other kind of novels but good novels. The most confirmed novel readers will read good novels when they cannot get bad ones; and here is the opportunity of the public library. Let it furnish the people with good novels, and, if possible, furnish them with enough good novels to supply the demand. Considering the universal clamor for such service, the universal tax-payer, logically, ought not to complain if a larger appropriation for such a purpose should be asked for.

The library has had a prosperous and progressive year. I wish to record my thanks for the efficient service of the staff and the kindly co-operation of your board.

Respectfully submitted,

SAM WALTER Foss,

Librarian.

December 28, 1904.

REPORT OF THE BOARD OF HEALTH.

Office of the Board of Health, CITY Hall, January 1, 1905.

To His Honor, the Mayor, and the Board of Aldermen:-

Gentlemen,—We respectfully submit the following as the twenty-seventh annual report of the board of health, in which is presented a statement, tabulated and otherwise, of the sanitary condition of the city and the business of the board for the year ending December 31, 1904:—

Nuisances.

A record of nuisances abated during the year, in compliance with notices issued by the board, or under the board's direction, is presented in the following table:—

NUISANCES ABATED IN EACH DISTRICT IN 1904.

(SEE DESCRIPTION OF DISTRICTS IN LATTER PART OF THIS REPORT.)

Total	197	80	90	82	62	103	64	61	66	59	864

Number of nuisances abated	864
Number of nuisances referred to board of 1905 .	47
Number of nuisances complained of	911
Number of complaints (many covering more than	
one nuisance)	408
Number of notices mailed	585
Number of notices served by constables	9

In addition to the above, 245 dead animals have been removed from the public streets, and many nuisances have been abated on verbal notice from the agent, without action by the board, of which no record has been made. Each spring the whole city is examined, and cellars, yards, and alleyways where rubbish and filth have collected are required to be cleaned.

Glanders.—Sixty-two cases of glanders have been reported during the year. Prompt action was taken in every case, and fifty-six of the horses were killed, six being released from quar-

antine by order of the cattle commissioners.

Permits.

The record of permits to keep cows, swine, goats, and hens, to collect grease, and to remove manure is as follows:—

Cows.—Thirty-two applications were received for permits to keep 110 cows. Twenty-nine permits to keep 102 cows were

granted, and three permits were refused.

Swine.—Seventeen applications were received for permits to keep thirty-one swine. Fifteen permits were granted to keep twenty-five swine, and two permits were refused. The fee is one dollar for each swine.

Goats.—Seven applications were received for permits to keep seven goats. All were granted. The fee is one dollar for each

goat.

Hens.—One hundred twenty-three applications for permits to keep 3,243 hens were received. One hundred nine permits to keep 2,919 hens were granted, and fourteen permits were refused.

Grease.—Fourteen applications were received for permits to collect grease, eleven of which were granted. The fee is two dollars. Two of the parties licensed reside in Somerville, two in Charlestown, four in Cambridge, two in Boston, and one in Watertown.

Manure.—Seven permits were issued during the year for the carting of manure through the streets of the city in the day-time between May 1 and November 1. All permits issued for the removal of manure from the stables in the city in the daytime, or for carting through the streets of the city, remain in force until revoked. No fee is charged for these permits.

Melting and Rendering.—Seven parties have been licensed to carry on the business of melting and rendering, under the pro-

visions of the revised laws of 1902, chapter 75, section 111.

Pedlers.

One hundred and forty-seven certificates of registration were issued to hawkers and pedlers during the year under the provisions of ordinance number 27—an increase of forty-one over the year 1903. One hundred and nineteen certificates have been renewed during the year. Each pedler is required to present a writing from the sealer of weights and measures, showing that his measures have been properly sealed, before a certificate is issued to him. Pedlers are also required to present their vehicles at the police station the first Monday of each month for inspection by the agent of the board, that he may see they are kept in a clean condition, and are properly marked with the owner's name and number.

Ashes.

For several years past the ashes have been removed by this department with teams owned and men hired by the city, under a competent superintendent, who also superintends the collection of house offal.

Twenty-six men, with sixteen horses, thirteen carts, and four wagons for the collection of waste paper, are employed in the work.

The number of loads of ashes collected each month during the year was as follows:—

~											
	January										3,980
	Februar	у									3,976
	March	•									3,723
	April					•					3,515
	May								•		3,299

This paper has been sold to the Middlesex Paper Company to April 22, when the company went out of business, at seventy-five cents a load, and the amount credited to the appropriation for this department.

The collections are made weekly, as follows:—

Monday						. in	distric	et one.
Tuesday							"	two.
Wednesday							66	three.
Thursday						•	"	four.
Friday	•	•			•		"	five.
Saturday							"	six.

MONDAY, DISTRICT NO. 1.

Comprises the entire area extending easterly to the cities of Boston and Cambridge, from a line drawn across Somerville, commencing on Mystic avenue, and extending through Cross street, Central square, Medford street; Washington street, Prospect street, Webster avenue, Tremont street to the Cambridge line and including collection on both sides of the above-named streets along the division line described.

TUESDAY, DISTRICT NO. 2.

Comprises the entire area extending westerly from the previously-described district number 1 to a line drawn across the city, commencing on Mystic avenue, and extending through Wheatland street, across Broadway, through Walnut street, and extending across Bow street and Somerville avenue, through Hawkins street, Washington street, Perry street, Wyatt street, Concord avenue, crossing Beacon street to the Cambridge line, and including collection on both sides of the abovenamed streets along the division line described.

WEDNESDAY, DISTRICT NO. 3.

Comprises the entire area extending westerly from the previously-described district number 2, to a line drawn across the city, commencing at the Medford boundary line at Main street, and extending easterly along said Main street, across Broadway, through Sycamore street, thence easterly on Highland avenue, through School street, thence westerly on Somerville avenue, through Dane street and Washington street to the Cambridge line, and including the collection on both sides of the above-named streets along the division line described.

THURSDAY, DISTRICT NO. 4.

Comprises the entire area extending westerly from the previously-described district number 3, to a line drawn across the city, commencing at the Medford line at Magoun square, and extending on Medford street to Lowell street, thence easterly on Somerville avenue and through Park street to the Cambridge line, and including the collection on both sides of the above-named streets along the division line described.

FRIDAY, DISTRICT NO. 5.

Comprises the entire area extending westerly from the previously-described district number 4, to a line drawn across the city, commencing on Broadway, and extending through Willow avenue to the Cambridge line, and including the collection on both sides of the above-named streets along the division line described.

SATURDAY, DISTRICT NO. 6.

Comprises the entire area extending westerly from Willow avenue to the Medford, Arlington, and Cambridge lines.

RULES AND REGULATIONS FOR COLLECTION OF ASHES AND OFFAL.

Ashes must be put in suitable receptacles not larger than an ordinary flour barrel, and must be kept free from all other refuse matter.

House offal or garbage must be kept free from all other refuse matter, and in suitable vessels.

All other refuse, such as paper, rags, excelsior, straw, mattresses, old clothes, pasteboard boxes, carpets, etc., must be kept free from ashes and garbage, and placed in suitable packages or barrels to prevent being scattered in handling.

All ashes and refuse matter for removal must be placed on the outer edge of the sidewalk, on or before seven o'clock in the morning of the

day when the collection is to be made.

Earth, gravel, bricks, mortar, stones, lime, plaster, cement, concrete, or refuse material from repairs or construction of buildings will not be removed by this department.

The department will remove tree trimmings, vine cuttings, and yard cleanings during the spring and summer months.

Employees of this department are not allowed to enter cellars, cellarways, bulkheads, or areas for the removal of ashes or offal.

House Offal.

The house offal has been collected by the city during the year under the same system that has been employed in the removal of ashes, and which was adopted in both departments in the year 1895. The offal collected has been sold to Hannibal S. Pond for \$1,100.

The force employed consists of twenty-four men, with twelve

horses and twelve wagons.

The following table, showing the number of loads collected each month during the year, may be of interest:—

January										520
February							•			508
March		. "					•			540
April .				•			•			520
May .		•		•				•	•	510
June .					•	•		•		612

November								•		618
December			•			•		•	•	648
	-								_	
Total		. •			•		•		•	6,892

Average weight per load, 3,000 pounds.

Stables.

Under the provisions of sections 69 and 70 of the revised laws of 1902, forty-four petitions for licenses to erect and use stables were received and disposed of as follows:—

Number	granted				29
Number					15

Board of Infants.

Eight parties, whose applications were first approved by this board, have been licensed by the state board of charity to care for sixteen children, in this city, under the provisions of chapter 83 of the revised laws of 1902.

Deaths.

There were 964 deaths and sixty-three stillbirths in the city during the year, as specified in the following table, which shows an increase of deaths over the previous year of nine:—

Deaths at Somerville hospital during the year	62
Deaths at home for aged poor (Highland avenue),	56
Deaths at City home	2

Of the parents of the stillborn, 27 fathers and 31 mothers were natives of the United States, and 36 fathers and 32 mothers were of foreign birth.

Diseases Dangerous to the Public Health.

This board has adjudged that the diseases known as small-pox, scarlet fever, diphtheria, membranous croup, typhus fever, typhoid fever, chicken-pox, pulmonary tuberculosis, and cholera are infectious, or contagious, and dangerous to the public health and safety within the meaning of the statutes. Physicians are required to report immediately to the board every case of either

of these diseases and all cases of measles coming under their care, and postal cards conveniently printed and addressed are supplied to them for the purpose. On receipt of a card from a physician, the superintendent of schools, the principal of the school in the district in which the patient resides, and the librarian of the public library are notified.

Scarlet Fever.—One hundred nineteen cases of scarlet fever have been reported during the year, three of which resulted fatally. In 1903 there were one hundred forty-six cases, ten of

which resulted fatally.

Diphtheria.—Three hundred and seventy-one cases of diphtheria have been reported during the year, fourteen of which were fatal. In 1903 there were two hundred and eight cases, nineteen of which proved fatal. Anti-toxin has been provided by the state board of health, and placed by this board in central locations for use by physicians in cases where people are unable to purchase the same. Culture tubes for diphtheria and sputum bottles for suspected tuberculosis have been obtainable at the same stations.

Warning cards are used in dealing with scarlet fever and with diphtheria, and the premises are fumigated by the use of the formaldehye gas regenerator, immediately after the termination of the case. An inspection is made by the agent of the board of the premises where diphtheria is reported, and all sanitary defects discovered are required to be remedied as soon as possible.

Typhoid Fever.—Ninety-six cases of typhoid fever have been reported during the year, eleven of which have proved fatal. In 1903 there were thirty-eight cases reported, ten of which were

fatal.

Typhus Fever, Cholera.—No cases of typhus fever or cholera have been reported the past year.

Smallpox.—No cases of smallpox have been reported during the year.

Disinfection.

It will be seen by the foregoing figures that, in addition to the 490 premises infected with scarlet fever or diphtheria, 139 other premises were disinfected. This work was done at the request of attending physicians whose patients, in nearly all cases, had been ill with consumption, typhoid fever, or cancer. It has become the general practice among physicians to ask that rooms which have been occupied by persons suffering from consumption or cancer be disinfected.

Many library books have also been disinfected, and quantities of infected bedding and other material have been burned.

TABLES.

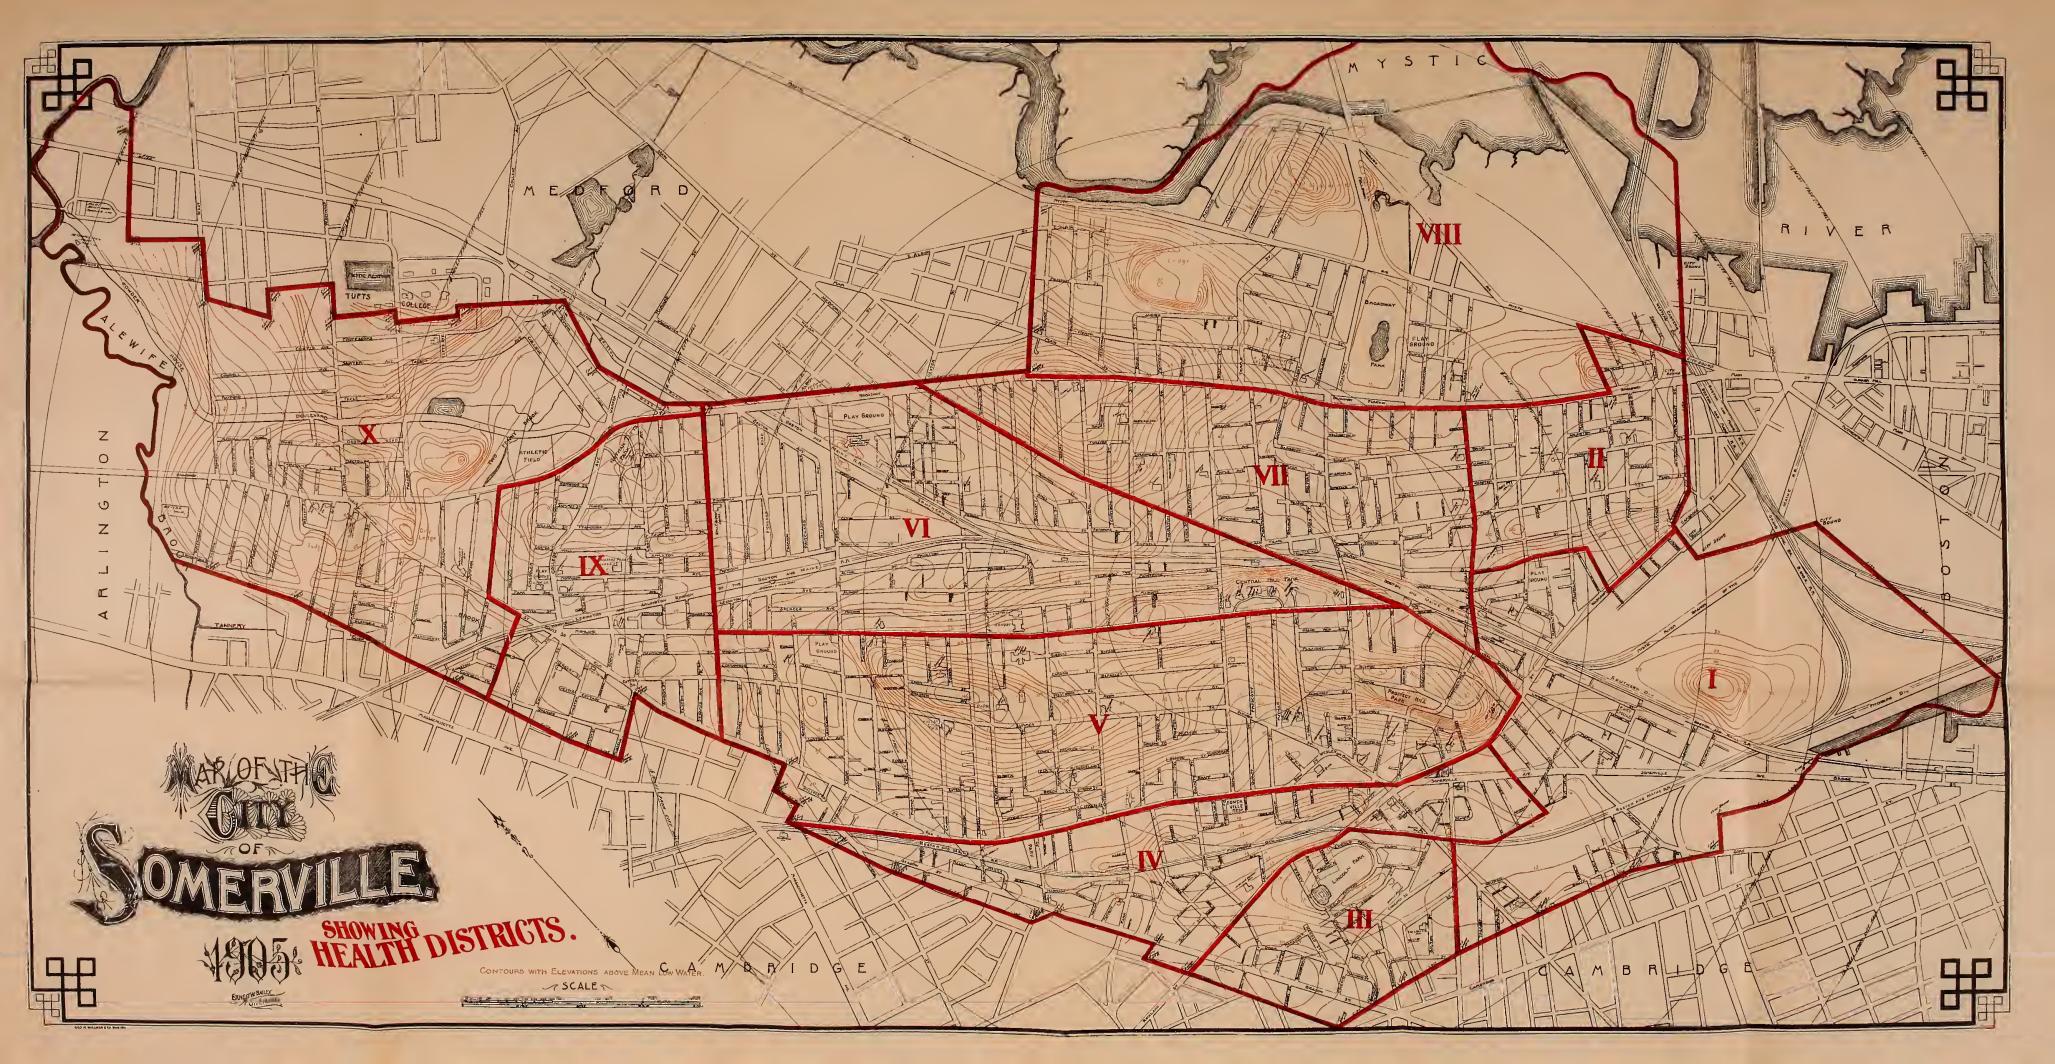

The prevalence of scarlet fever, diphtheria, and typhoid fever in the city during the several months of the year 1904 is shown by the following table, and in the table next following is given the number of deaths from these three diseases, by months, during the last ten years:—

Scarlet Fever, Diphtheria, and Typhoid Fever Reported in 1904.

Contagious Hospital.

By an order adopted by the board of aldermen October 27, 1904, the building owned by the city, and situated on Broadway, at the corner of North street, was transferred to the custody of the board of health for a contagious hospital for the treatment of contagious diseases other than smallpox.

Bacteriological Department.

The work of this department was performed by Frank L.

Morse, M. D., whose report is appended to this report:—

Specimens will be received at the laboratory at the city hall daily, including Sunday, at any time, and they will be examined and reported upon the morning following their reception.

SPECIMENS AND ANTI-TOXIN.

Outfits for specimens for tuberculosis and diphtheria, and diphtheria anti-toxin, may be obtained at the laboratory and at the following places:—

Charles H. Crane, 154 Perkins street. Will B. Fitts, 173 Washington street.

Milton H. Plummer, 25 Union square.

Fred W. Gay, 524 Somerville avenue. Hart Brothers, 263 Highland avenue.

Percy A. Hall, 2 Studio building, Davis square.

Herbert E. Bowman, 529 Medford street, Magoun square.

Eugene B. Carpenter, 10 Broadway. Julius E. Richardson, 310 Broadway.

Outfits for typhoid fever and malaria will be supplied from the laboratory only.

After the specimen is collected, it must be taken or sent directly to the laboratory at the city hall.

Districts.

The accompanying map shows the boundaries of the ten health districts into which the city was divided by the board of health of 1878.

A record has been kept from year to year, of the number of deaths, the death rate per thousand, the prevalence of dangerous diseases, and the number of nuisances abated in these several districts, and is continued in the following tables, and in the table near the beginning of this report.

The estimated population in the several districts was originally based on the number of assessed polls in each, and upon the population of the entire city; the ratio of polls to population being presumed to be the same in all the districts. Substantially the same method of estimating the population has been continued, the census of every fifth year being taken as a basis for calculation.

The number of dwellings and of assessed polls May 1, 1904, has been obtained from the assessors' books.

Undertakers.

Under the provisions of section 44 of chapter 78 of the revised laws of 1902, sixteen persons have been duly licensed as undertakers.

Examiners of Plumbers.

The public statutes provide for a board of examiners of plumbers, consisting of the chairman of the board of health, the inspector of buildings, and an expert at plumbing, to be appointed by the board of health. This board appointed Duncan C. Greene, the inspector of plumbing, to fill the place of expert. The number of licenses granted will be found in the report of the inspector of buildings.

Regulations.

The following health regulations have been adopted during the year 1904:—

> CITY OF SOMERVILLE. IN BOARD OF HEALTH, October 6, 1904.

Ordered: That the following regulation be and hereby is adopted:— Section 1. The board of health hereby adjudges that pulmonary tuberculosis is an infectious and contagious disease, dangerous to the

public health.

SECT. 2. A householder who knows that a person in his family or house is sick with pulmonary tuberculosis shall forthwith give notice thereof to the board of health. Upon the death, recovery, or removal of such person, the householder shall disinfect to the satisfaction of this board such rooms of his house and articles therein as, in the opinion of the board, have been exposed to the infection.

Sect. 3. Said rooms and articles may be fumigated and disinfected

by this board or its agent.

SECT. 4. Upon the death, removal, or recovery of a person sick with pulmonary tuberculosis, no person, except members of the immediate family of which such sick person was a member, and those whose business calls them there, shall thereafter visit or be permitted by the householder or any occupant thereof to visit the dwelling in which such person was sick as aforesaid, until such dwelling shall have been fumigated and disinfected as above provided.

SECT. 5. If a physician knows that a person whom he is called to visit is infected with pulmonary tuberculosis as aforesaid, he shall immediately give notice thereof in writing over his own signature to the board

of health.

SECT. 6. Whoever violates the provisions of Sections 2 or 4 shall be punished by a fine of not more than one hundred dollars. Whoever violates the provisions of Section 5 shall forfeit not less than fifty dollars nor more than two hundred dollars for each offense.

(Signed) WILLIAM P. MITCHELL, Clerk.

Copies of the above regulation were sent to all the physicians of the city. Thirty-eight dwellings have been fumigated since its adoption.

At the time of the adoption of the health regulation regarding tuberculosis, 15,000 of the following circular were ordered to be printed and distributed at the home of every family in the city:—

> BOARD OF HEALTH. CITY HALL, SOMERVILLE, MASS., 1904.

CIRCULAR ON CONSUMPTION.

Consumption (also called phthisis or pulmonary tuberculosis) is an infectious disease; that is, a disease which one person can catch from another person. It is caused by germs which grow in the lungs of consumptives, and the sputum or spit which is coughed up contains large numbers of them. When this spit is allowed to dry, the germs are set free and float about in the air, and if inhaled into the lungs of healthy

persons, may start the disease in them.

If the spit is destroyed while moist, there is very little danger of spreading the infection. It is therefore of the utmost importance that consumptives should spit into receptacles made for the purpose, containing a solution of carbolic acid (one part to fifteen parts of water), or into pieces of cloth. Such receptacles should be frequently cleansed with scalding water after destroying their contents, and pieces of cloth should be burned before the sputum becomes dry. Handkerchiefs which have been used from necessity should be boiled half an hour before washing.

The patient's clothing, bed-clothing, etc., should not be mixed with the general family wash, nor sent to the public laundry, but should be

boiled half an hour and then washed separately.

Under no circumstances should a consumptive spit upon the floors of rooms, public halls, street or railway cars or other vehicles, or in the street.

A healthy person should not sleep in the room with a consumptive.

The kissing of consumptives is dangerous, especially for children. Consumption can be prevented and, in many cases, cured. The patient should occupy an airy and well-lighted room containing as little furniture as possible. This room should be kept clean by wiping the floor and furniture with damp cloths, which should then be destroyed. Sweeping and dusting should be avoided. The patient should have plenty of nourishing food, fresh air, and sunlight.

After the removal of a patient from the room or house, disinfection must be performed by the board of health, or to the satisfaction of its agents, in accordance with a regulation adopted by this board October

6, 1904.

ALLEN F. CARPENTER, EDMUND S. SPARROW, WESLEY T. LEE, M. D., Board of Health.

CITY OF SOMERVILLE. IN BOARD OF HEALTH, November 3, 1904.

Ordered: That the following regulation be and hereby is adopted:— Immediately upon the receipt of notice that a teacher or pupil in any school in the city is sick with smallpox, scarlet fever, diphtheria, membranous croup, typhus fever, or cholera, the schoolroom in which such teacher or pupil was accustomed to sit, and the dressing-room in which the aforesaid teacher or pupil placed his or her outer garments, shall be fumigated by the board of health or its agent, or to their or his satisfaction.

All books, papers, and other articles which, in the opinion of the board or its agent, have been directly exposed to the contagion, and which cannot be satisfactorily fumigated, shall be burned.

(Signed)

WILLIAM P. MITCHELL, Clerk.

In compliance with the above regulation, twenty-seven schoolrooms have been fumigated.

ALLEN F. CARPENTER, Chairman, EDMUND S. SPARROW, WESLEY T. LEE, M. D.,

Board of Health.

REPORT OF BACTERIOLOGIST.

Somerville, January 26, 1905.

To the Board of Health of the City of Somerville:—

Gentlemen,—I herewith present the report of the bacteriol-

ogist for the year 1904.

During the latter part of December, 1902, in accordance with your vote, a laboratory was established at the city hall and regular bacteriological examinations were commenced upon January 1, 1903, which have been continued during the past year.

During the year 1904 1,429 examinations were made of cultures for the diphtheria organism, 124 examinations made of sputum from patients suspected of having tuberculosis, seventy-six examinations to detect the Widal reaction in typhoid fever, and no examinations for making a diagnosis of malaria in

patients showing symptoms of that disease.

With the beginning of 1903, your board established regulations, which required, in cases of diphtheria, that no patient should be released from quarantine until two consecutive negative cultures had been obtained from the patient, one by the attending physician and one by a physician representing the board, thus making the work more extensive than had been previously required. Culture stations were also established at four different parts of the city, which were later increased to six in number, to more generally accommodate the physicians of the city, at which places, in connection with the laboratory, culture outfits and sputum bottles could be obtained. The outfits for typhoid fever and malaria were to be obtained at the laboratory only. avoid delay in the examination of specimens, it was required that all specimens should be sent to the laboratory at the city hall, thus obviating any delay through the culture stations. mens left at the city hall as late as midnight are placed in the incubator immediately, making it possible for a result to be obtained early the next morning.

Diphtheria.—Fourteen hundred and twenty-nine cultures have been examined for diphtheria, 629 being in males, and 800 in females. Diphtheria being a disease of children, 537 of these examinations have been made in children under five years of age, 400 in those from five to ten years of age, 231 from ten to twenty, and 261 in adults over twenty years. In thirty-four cases the age of the patient was not stated. Four hundred and six examinations were made for the diagnosis of the case, 142 proving positive, and 264 negative. Of the positive results, seventy-two were

of cases in which the attending physician's diagnosis of diphtheria was confirmed, eleven in which the clinical diagnosis was not diphtheria, and fifty-nine in which no definite diagnosis was made. Of the 264 negative examinations, thirty-seven were obtained in which the clinical diagnosis was diphtheria, ninety-six in which the diagnosis was not diphtheria, and 131 in which no diagnosis had been made.

Nine hundred and ninety-four cultures were taken for release of patients from quarantine, 233 of which were positive, and 761 negative. The importance of taking release cultures is demonstrated by these figures, these patients showing the presence of the bacilli in the throat after the clinical evidence of the disease had disappeared. In twenty-nine examinations there was

no growth upon the serum tube.

Tuberculosis.—One hundred and twenty-four examinations have been made of sputum suspected of containing the tubercle bacillus, twenty-eight of which were positive and ninety-six negative. In forty-three cases, a definite diagnosis of this disease had been made by the attending physician, but in twenty-nine of them the organism could not be detected. In the remainder of the cases, fifty-four were stated as not showing evidence of the disease, eleven being positive, and in twenty-seven cases no statements were made giving information as to its character, three of which were positive. Fifty-four were males and seventy females. Although printed directions accompany each outfit, telling how the specimen should be obtained, it has not been unusual for specimens to be sent to the laboratory containing only saliva from the mouth, with no excretion from the lungs or bronchial tubes. Physicians should be urged to give definite instructions to each patient, relating to the collection of the sputum, for in some instances a negative report would mislead both physician and patient. Consumption, to-day, is recognized as an infectious disease, and all persons afflicted with it should be instructed in the modern methods for preventing its spread. In some cases this is not done by the attending physician, and during the past year your board has required that this disease be reported to you, as other infectious diseases are, and that printed instructions and advice be sent to each patient ill with the disease. The decrease in the death rate of consumption, and the cure of persons afflicted with it, is due to the improved and intelligent manner with which cases are treated, and the prevention of further spread of the disease is a subject which is of importance to all local boards of health.

Typhoid Fever.—Seventy-six examinations of the blood of patients suspected of having typhoid fever have been made, thirty-two of which proved positive. In eighteen cases a positive diagnosis of this disease had been made by the attending physician; and in the remainder, no statement was made relating to the diagnosis. Of the negative results, four were diagnosed as typhoid, six were said not to be typhoid, and in thirty-four no

diagnosis was made. Fifty-three were males and twenty-three females.

Malaria.—No examinations were made of the blood of patients suspected of having this disease, and the disease cannot be considered as one of prominence in this city.

REPORT OF INSPECTOR OF ANIMALS AND PROVISIONS.

Somerville, January 1, 1905.

To the Honorable, the Mayor, and the Board of Aldermen:—

Gentlemen,—I submit the following report as inspector of animals and provisions for the year ending December 31, 1904.

The following is a statement of the work performed during the year: At the five slaughtering establishments in the city, the number of animals slaughtered was as follows: John P. Squire Corporation, Medford street, 591,332 swine; North Packing and Provision Company, Medford street, 691,004 swine; New England Dressed Meat and Wool Company, 19,572 cattle, 67,616 calves, 374,938 sheep; Sturtevant & Haley, Somerville avenue, 10,204 cattle; Rachel Gunsenhiser, North street, 603 cattle, 196 calves, and 170 sheep. Total number of animals slaughtered

during the year 1904, 1,755,635.

I have inspected, condemned, and caused to be destroyed 502 pounds fowl, 671 pounds pollock, 53 pounds swordfish, 5 boxes smelts, 1,067 mackerel, 1,943 herring, 1,644 pounds cod and haddock, 480 pounds dried fish, 236 pounds halibut, 192 pounds fresh salmon, 129 pounds shad, 53 lobsters, 3 bushels clams, 1 gallon clams, 3 gallons oysters, 440 pounds squash, 29 bushels potatoes, 8 bushels sweet potatoes, 19 bushels greens, 17 bushels vegetables, 42 barrels apples, 4 boxes lemons, 7 boxes oranges, 57 dozen bananas, 675 pounds grapes, 8 bushels pears, 11 crates tomatoes, 192 quarts strawberries, 4,600 pounds fresh beef, 216 pounds corned beef, 39 calves, 192 pounds veal, 14 livers, 192 pounds fresh pork, 175 pounds mutton.

There are 133 cows, 161 swine, 6 goats, and 2 lambs kept in

the city for domestic purposes.

I have examined 1,551 horses in stables where contagious disease was reported to exist. Fifty-seven horses were killed on

account of contagious disease, and 6 were released.

I have made 832 visits to stores and markets, inspected 812 pedler carts from which fish and provisions are sold. I have also made monthly inspections of stores and bakeries throughout the city, and find them in a much improved condition.

As agent of the society for the prevention of cruelty to animals, I have investigated 186 complaints. Number of animals killed, 59. Number of animals taken from work, 47. Cattle

not properly cared for, 25.

Respected submitted,

CHARLES M. BERRY,

Inspector of Animals and Provisions.

REPORT OF INSPECTOR OF MILK AND VINEGAR.

Office of Inspector of Milk and Vinegar, 310 Broadway, Somerville, Mass., January 2, 1905.

To the Board of Health:-

Gentlemen,—I herewith submit my annual report for the

year ending December 31, 1904.

I have collected and analyzed 955 samples of milk, five samples of cream, and eighteen samples of vinegar. In addition to this, I have examined a few samples of suspected butter, and inspected butter teams as I found them on the street.

One hundred and six notices were sent that milk was below

the standard.

The following cases were prosecuted in court:—

 1 man, selling milk without a license; found not guilty. 1 storekeeper, milk below the standard; fined 1 storekeeper, selling milk without registering; fined 1 storekeeper, selling milk without registering; fined 1 milk pedler, selling milk without a license; fined 1 milk pedler, selling milk without a license; ruled a corporation and found not guilty. 1 storekeeper, selling milk below the standard; placed on 	/	\$20 00 1 00 5 00 30 00
file. 1 storekeeper, selling milk below the standard; fined		10 00
1 storekeeper, selling milk below the standard; fined		5 00
1 storekeeper, selling milk below the standard; fined		5 00
1 storekeeper, selling milk below the standard; fined		5 00
1 storekeeper, selling milk below the standard; fined		8 00
1 storekeeper, selling milk below the standard; fined		10 00
1 storekeeper, selling milk below the standard; fined		15 00
1 storekeeper, selling milk below the standard; fined		15 00
1 storekeeper, selling milk below the standard; fined		5 00
1 storekeeper, selling milk below the standard; fined		$\begin{array}{ccc} 15 & 00 \\ 10 & 00 \end{array}$
1 milk pedler, selling milk below the standard; fined 1 milk pedler, selling milk below the standard (superior		10 00
court); fined		15 00
1 storekeeper, selling milk below the standard, second		10 00
offense (superior court); fined		100 00
1 storekeeper, selling milk without registering; found not		
guilty and placed on file.		
1 storekeeper, selling milk without registering; found not guilty and placed on file.		
Total amount of fines imposed by the courts		\$274 00

I spent twenty-three days in the police court and five days in the superior court.

I issued 146 licenses to milk pedlers and 114 to stores, a total of 260.

I have paid to the city treasurer \$130 for license fees, and

\$1.02 for stamps.

The inhabitants have consumed about 21,600 quarts of milk a day for the year, and 400 quarts of heavy cream. The milk pedlers deliver daily about 5,400 gallons. About 3,000 cans are delivered from the cars, and 750 cans are brought in teams from near farms. About 125 gallons of heavy cream are delivered daily.

To have any citizen who may think his milk is not up to the standard, and desiring to submit a sample for analysis, I would ask that he be sure and mix the milk well before taking the

sample.

I shall be pleased to give to any physicians desiring to know the quality of the milk that their baby patients are being fed analyses of any samples submitted, either of mothers' or cows' milk.

My office is open all day, every day in the year, where complaints may be made and licenses procured.

Respectfully submitted,

Julius E. Richardson, Inspector of Milk and Vinegar.

REPORT OF OVERSEERS OF THE POOR.

Office of the Overseers of the Poor, Somerville, Mass., December 31, 1904.

To the Honorable, the Mayor, and Board of Aldermen of the City of Somerville:—

Gentlemen,—We beg leave to submit as follows our report

for the year 1904.

The work of this year shows a material increase over that of last. The same care has been exercised by the department in investigating and relieving all needy and deserving cases; the liberal allowance from the city has been carefully husbanded, and, so far as we know, few, if any, cases of real suffering or want have not found immediate relief.

Our city is not paying for the support of any insane persons at present, only as we are called to do so in our enlarged state taxes. We think that the feeble-minded, dipsomaniacs, and epileptics should be cared and paid for by the state, the same as the insane are at the present time. The state owns the buildings, and has the supervision of these three classes, and we do not see why a distinction should be made in the expense of support. The first of January, 1904, we asked for an appropriation of \$17,000. If this amount had been given us, it would have been ample for all our wants, and we should have a balance left.

The board tenders most hearty thanks to his honor, the mayor, and board of aldermen for the very convenient and muchneeded addition now being made to the city home, comprising, on the ground floor, the smoke room (outside, but joined to the main building); a reading room; a strong room (for police cases); and a large basement, with concrete floor, for laundry and general purposes. Above this, and running seventy feet out from the main building, is the floor, divided in the middle by a four-foot aisle, and containing bathroom, a linen room, rooms for the male help, and special rooms for sickness or emergency. Over this is the dormitory, divided into two parts. This is also fitted with closets, and furnishes ample and most excellent accommodations for our male inmates. For comfort in summer, as well as winter, for excellent ventilation and light, for open and most cheerful outlook, we feel that the city has secured most satisfactory and lasting returns for the comparatively small amount which has been expended.

We cannot speak too highly of our agent, who now for twenty years has most ably and faithfully executed the work of this department. His large experience, excellent judgment, and thorough knowledge of the laws relative to this department make his work specially valuable and necessary to this city. We commend, also, as always, the faithful secretary of our board, whose work is neatly and thoroughly done and fully appreciated.

To the warden and matron of the home we would give full credit for the faithful and conscientious work of the year. We recognize that for the warden the long hours and necessary application have made the satisfactory results of our farming especially trying. We appreciate his efforts, as we do the earnest

work and kindly acts of the matron inside the home.

Following are the tables showing the work in detail:—

This report, with tables, is respectfully submitted.

EDWARD B. WEST, ALBERT W. EDMANDS, of the HERBERT E. MERRILL, Poor.

REPORT OF THE CITY PHYSICIAN.

Office of City Physician, Somerville, December 31, 1904.

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—The following is a summary of the work I have performed during the year ending December 31, 1904:—

One thousand thirty-eight house visits have been made. Six hundred thirty-seven persons were treated at my office. Eighty-five persons were vaccinated. Twenty women were attended in child-birth. Ninety-nine persons have had teeth extracted. Twenty-seven visits have been made at the police station.

Under the rules of the board of health, 395 cultures for release have been taken in cases of diphtheria. Twenty-nine men were examined for the police force, and eight for permanent men

in the fire department.

Respectfully submitted,

ALVAH B. DEARBORN,

City Physician.

REPORT OF THE CITY ENGINEER.

Office of the City Engineer, City Hall, Somerville, January 18, 1905.

To His Honor, the Mayor, and the Board of Aldermen:-

Gentlemen,—In accordance with the provisions of the city charter, the following report of the work done and expense incurred for the year ending December 31, 1904, by the departments under my charge and supervision, including Engineering, Sewers Construction, Sewers Maintenance, Public Grounds, and other public works, is herewith presented.

books		250
Number of plans, including sewers, highways, parks,	house	
lots, etc.		6,000
Value of field instruments, tools, and office instruments		\$1,600.00

The total cost of maintaining the city engineer's department since it was established (1872-1904, both years, inclusive) has amounted to \$214,421.68.

General Work. The number of assistants employed during the year on engineering work varied from eight to twelve.

The department has made designs, plans, estimates of cost of contemplated and completed public works, etc., as required by various orders of the board of aldermen and committees. All

survey notes, records, and plans made of sewers, drains, highway work, water works, etc., have been filed and indexed for future reference.

All plans of estates in Somerville recorded at the Registry of Deeds, East Cambridge, have been copied, titles examined, and abstracts from deeds made for the purpose of assessments, and the proportional part of the cost of new work computed, and schedules of assessments made out showing the property owners.

Plans have been made and photographs taken where accidents have occurred on the city's work, or where boundaries were in dispute, for the use of the city solicitor in court cases and hearings.

A number of street names have been changed and plans made showing a re-numbering of the buildings, and all old numbering plans revised, new houses plotted, and numbers assigned; some of the old main thoroughfares should be re-numbered throughout their entire length, so as to eliminate half numbers and letters now being used.

There are many streets, avenues, courts, and places in the city of the same or very similar name, which should be changed to prevent the confusion and inconvenience now existing.

Stone monuments have been set at a number of street intersections and angles to define and preserve the true lines of public streets, and this work should be continued as much as possible each year.

Lines and grades have been given for the erection of new city buildings, and plans and sketches made for the laying out of the surrounding grounds.

About seventy-five street lines and grades have been given by the department during the year for builders and private parties applying for established grades and lines in connection with the erection of buildings and fences and grading of property.

Plans have been made showing the change of boundary lines of precincts in certain wards of the city, from which large maps have been printed for various purposes.

Accurate plans have been made by The Edison Electric Illuminating Company, of Boston, the New England Telephone and Telegraph Company, West End Street Railway Company, Charlestown Gas and Electric Company, and Cambridge Gas Light Company, and filed in this office, showing the various locations of poles, tracks, and conduits in this city which have been granted by the board of aldermen during the year.

Lines and grades have been given for laying 5,800 feet of water mains; 294 house services, twenty-five gates, and thirteen

hydrants have been located and recorded, sketches and plans made showing the same, and the large water works maps corrected to date.

During the year the department has made plans and established grades for the acceptance, under the betterment act, of fifteen new public streets, a total length of 1.55 miles; copies of these plans have been made and filed at the Middlesex Registry, as required by law.

The line of Hall street, at the Cedar-street end, has been changed and re-located northeasterly about one foot from the old line, so that a building formerly encroaching on the southwesterly side of the old street is now back of the adopted street line, an exchange of land being made with the abutting owner.

The total length of public streets in the city amounts to 69.3 miles, and private streets 24.26 miles.

Eight streets have been constructed during the year where betterment assessments have been levied, and in the laying out and constructing of Clarendon avenue as a public highway, the city is removing, by agreement, the stone from the ledge on the abutting property on the southeasterly side of the street, where the surface in places was twenty feet higher than the established grade of Clarendon avenue.

When this work is fully completed, a dangerous locality will have been made safe for public travel, and a section of land developed for building purposes.

Lines and grades have been given for setting 24,228.4 linear feet (4.59 miles) of new edgestone, and the re-setting of 11,861.6 feet (2.25 miles) of old edgestone and measurements taken for computing assessments.

4,185.3 square yards of new brick sidewalks and 1,002.9 square yards of granolithic sidewalks have been laid (about 1.54 miles in length), and 7,464.1 square yards of old brick sidewalks re-laid.

The average cost for the year of setting edgestone has been ninety cents per linear foot, and laying brick sidewalks ninety-six cents per square yard.

8,010 square yards of new paved gutters have been laid, and 706.7 square yards of new vitrified brick, concrete, and granite crossings and driveways constructed; 3,678.4 square yards of old gutters, driveways, and crossings have been re-laid, all requiring lines, grades, and measurements.

(See tables in this report for cost of new work, 1904, and total lengths of sidewalks constructed in the city to date.)

Streets Accepted as Public Highways in 1904 under the Betterment Act.

^{*}Also 29.6 miles (single track) electric railway, paved with granite, asphalt, "bitulithic."

**Includes 2.84 miles boulevard.

Lines, grades, and measurements have been given and miscellaneous work done for paving with "Warren's Bitulithic Pavement" a portion of Bow and Summer streets, extending from Union square to the westerly line of School street, a length of 1,770 linear feet. The contract price for laying this new pavement complete, including a five-years' guarantee, was \$2.25 per square yard.

In conjunction with the laying of this permanent pavement, the railroad company have double-tracked that portion of Summer street, and the city has widened the roadway by setting back the edgestone on the sidewalk eight inches on each side of this

street.

The total amount of "Bitulithic Pavement" laid, including an area of 1,824 square yards between the car tracks paid for by the railroad company, was 7,085 square yards, and the entire cost to the city of the new work was \$14,422.78, and, deducting the amount allowed for old materials removed on the line of work as a credit to the account, shows the net cost to the city \$13,-964.63 for the improvement of a portion of Bow and Summer streets.

Union square has been enlarged at its easterly end by the addition of a triangular area in front of the new fire station, which was formerly occupied by old buildings. This additional space was paved with granite blocks amounting to 614 square yards, and also necessitated the re-laying of 748 square yards of the old granite paving, to conform with the established grade in the square.

There are sections of flat-grade macadam streets in the city where, in times of storms, they become nothing but mud holes, and it is impossible, under the present conditions, to drain the water from their surfaces; in these few places it would be advisable to re-construct the road bed with a permanent pavement, and the addition of catch basins between the car tracks would put these sections of streets in first-class condition for a nominal expense. Also on some of the principal streets the edgestone should be completed and gutters paved, so that the street can be

properly drained in times of heavy storms, thereby saving a large cost in the maintenance of the city's highways.

It would be advisable to lay with some suitable permanent pavement, bitulithic, vitrified brick, or asphalt, the narrow spaces left between the car track and sidewalk on certain streets where double tracks have been laid, and where it is impossible to maintain a macadam roadway, even at a heavy expense yearly: sections of Pearl street, Medford street, Washington street, Holland street, and public squares.

The West End Street Railway Company, by its attorney, the Boston Elevated Railway Company, in addition to the double-track laying on a section of Summer street, before referred to (on account of the paving of this street), have completed the double-track laying in Concord square, and two long turnouts in Springfield street, where, on account of the narrow roadway, the railroad company laid an asphalt pavement the entire width of the street where the new tracks were constructed.

A petition is still pending before the board of aldermen for a double-track location in a portion of Mystic and Middlesex avenues, extending from the Charlestown line to the Fellsway boulevard.

A public hearing has been held on this matter, and whenever these tracks are laid, it will necessitate the widening and filling to grade of these avenues and macadamizing the roadways.

There are at present laid in Somerville streets twenty-nine and six-tenths miles of electric car track (single track location).

Bridges and Grade Crossings. All of the city's highways over the Southern division of the Boston & Maine railroad have good and substantial modern bridges, with the one exception at Lowell street, where there is great need of a highway bridge over the main line, and also the Arlington branch of the railroad, this street being one of the principal cross-town streets in the centre of the city. Negotiations with the railroad company are at present pending, but probably satisfactory arrangements will be made for the construction of these bridges in the near future.

The abolition of grade crossings in this city has been a matter of discussion for a number of years past, and while the expense to the city for changing these crossings would be large, the amount would be quite small when compared with the total cost and amount of work involved by the railroad companies.

Some feasible plan must first be agreed upon by the parties vitally interested, and this involves the steam and electric railroad companies and cities of Somerville and Cambridge working in unison; a petition has been before the courts for some time in reference to this matter.

Elevations and check levels have been taken on the Boston-avenue granite arch bridge recently constructed, and no settlement or change was found from the original construction work.

The greater part of the new construction work has been done by contract, and the remainder by the city employing day labor, where old structures were to be remodeled or replaced by some difficult construction work.

All materials have been furnished by the city, and the prices paid for drain pipe, cement, etc., for the season have been at an unusually low rate.

A number of sewers have been constructed as petitioned for in different sections of the city, and portions of the cost of construction assessed on the abutting estates under orders adopted by the board of aldermen.

Short lines of storm drains and overflows from congested sewers have been constructed during the year in the most needed districts.

The "separate system" sewers (those built for house drainage only) have been extended in a number of streets, and this system should be extended yearly until all the flooded districts in the city have two complete systems of drainage, the new

sewer to be used for house drainage, and the old existing sewer mains to be used for storm and surface water.

Wherever these new sewers are constructed, the house plumbing should be changed where necessary, and the house drains re-connected with both systems as soon as possible.

New sewers and drains were constructed during the year, varying in size from eight-inch pipe to thirty-inch pipe and fortyfour-inch brick in the following localities:-

"Separate system" sewers in:—

Beacon street,—(northeast side) Sacramento street to Stanford terrace.

Boston avenue,—Highland road to Pearson avenue. Dane avenue,—(both sides) Leland street to Dane street.

Leland street,—Washington street to Dane avenue. Porter street,—(both sides) Elm street, northeasterly. Powder-house boulevard,—(both sides) North street to near Curtis street.

Russell road,—Broadway, northeasterly. Ware street,—Powder-house boulevard, southwesterly. Webster avenue,—(westerly side) Union square, southerly.

Washington street,—(southerly side) Union square to near Fitchburg railroad.

"Combined system" sewers in:—

Boston avenue,—Morrison avenue, northeasterly. Boston street,—Walnut street, southeasterly.

Highland road,—Frederick avenue to Boston avenue.

Hillside circle,—Craigie street, westerly. Line street,—Cooney street, southeasterly.

Pearson avenue,—Frederick avenue to Boston avenue. Walnut street and private lands,—Gilman street to Boston & Maine railroad, and westerly along railroad.

Storm drains in:-

Broadway and private lands,—(southwesterly side) Bos ton & Maine railroad to Josephine avenue.

Cameron avenue,—Seven Pines avenue to Mead street. Cedar street,—Sartwell avenue, southwesterly.

Lowell street,—Albion street to Hudson street. Vine street,—Somerville avenue, southwesterly.

Yorktown street,—Seven Pines avenue to Glendale avenue.

Summary of Work. Twenty-four new sewers and drains have been constructed during the year, a total length of 11,544.2 linear feet (2.19 miles), at a cost of \$13,116.82; plans have been made showing these sewers and assessments levied on a portion of them, amounting to \$5,174.17. (See tabular statement of sewers and drains for 1904, showing itemized statement of work and cost.)

^{*}Separate system sewer.

[†]Paid Highway Dep't. for resurfacing trench.

[‡]Extra work on account of gas pipe.

Total length of sewers built by the city, January 1, 1905 418,212.5 feet.
Total length of private sewers in the city, January 1, 1905 34.627.0 feet. (1,380 feet added 1904 not shown previously).

Total length of sewers in the city, January 1, 1905 452,829.5 feet, or 85.765 miles. (18.65 miles separate system.)
Total length of storm drains in the city, January 1, 1905 26,476,8 feet, or 5.015 miles.

The total length of the city's drainage system is 90.50 miles; 18.65 miles being on the "separate system," and 5.02 miles of storm drains, and the entire cost of construction has amounted to about \$1,144,328, exclusive of the amount paid the state for the construction of the North Metropolitan sewerage system.

Forty-eight new catch basins have been constructed in the highways during the year, at an average cost of \$51.62 per basin, making a total of 1,314 catch basins in the city for street drainage purposes.

Metropolitan Sewer Connections. All of the city's ten connections with the North Metropolitan sewerage system are in good condition. No new main connections have been required, but on the northeasterly side of Mystic avenue, near Melrose street, a small temporary house connection was made with the state sewer, the city having no main sewer in Mystic avenue at this locality.

At the Somerville-avenue-Poplar-street connection with the Metropolitan sewer, records compiled from an automatic recording clock placed in the "regulator chamber" on the combined system show this outlet to have been cut off as follows:—

Year 1904, completely closed 279 hours, partly closed 922 hours. (In the 1903 report a table shows the record for the previous four years.)

The city's assessment for the Metropolitan system for the past year was \$32,172.57 on construction account and \$18,231.97 for maintenance, and the total amount paid the commonwealth of Massachusetts for this state sewer has been \$470,636.71 (1894-1904, both years inclusive). The total length of the Metropolitan sewerage system mains running through the city amounts to 3.31 miles.

New Work. The construction of a permanent storm drainage system should be commenced in the vicinity of North Somerville in the near future, where buildings and new streets are being rapidly constructed, with no good and permanent means yet provided for taking care of the storm water.

A relief sewer should be constructed along the northeasterly side of Highland avenue, between Cedar street and Lowell street, to prevent the flooding of cellars in this locality in times of storms.

In the vicinity of Lowell and Vernon streets, some arrangement should be made with the railroad company, whenever the highway bridge is constructed at Lowell street, for providing an outlet for storm water in this locality through the railroad valley, which would be beneficial to both the city and railroad.

A large storm overflow drain has been contemplated for some time at the East Cambridge line, across private lands from Somerville avenue, discharging into the head of Miller's river. In conjunction with this last proposed work, a readjustment of the present legislative act should be made on a more equitable basis, whereby the amount paid by this city to Cambridge for the maintenance of the Somerville-avenue-Bridge-street sewer would be less and in proportion to the use of the same at the present time, the prevailing conditions being far different from what existed some thirty years ago, when the division of the cost was established.

A special act of the legislature in 1903 authorized the cities of Somerville and Cambridge and the towns of Arlington and Belmont to unite in improving the sanitary condition of Alewife brook within the limits of the referred-to cities and towns, and after considerable preliminary work had been done, it was deemed advisable to suspend operations, as another act was passed by the legislature in 1904 whereby, in conjunction with the Metropolitan Park Commission, the entire length of Alewife brook, together with upper Mystic river in Medford, might be improved far more extensively than at first proposed by the cities and towns originally interested in the matter.

The Metropolitan Park Commission have recently issued a lengthy report on this proposed improvement of the brook and river.

maintenance of sewers		\$977 36

A permanent force of men and teams are kept continually at work flushing, cleaning, and repairing the city's drainage system, the expense necessarily increasing yearly as lengths of sewers, drains, and catch basins are added to the system.

Nearly 7,000 cubic yards of deposit have been removed from the catch basins and sewers during the year. Eighty-five catch basins and eighty-three manholes have been repaired, and grade or line changed.

A number of extensive repairs have been made on some of the old sewers, alterations made in the outlets, and overflows and extra manholes built for the purpose of improving the system.

Sewers have been repaired in Beacon street, Flint-street place, Harrison street, Moore street, Temple street, Webster street, and Wilton street.

Three hundred and eighteen permits have been issued to licensed drain layers for connecting buildings with the main sewers, twenty-nine being for repairs; all of the work being done under the supervision of the city's inspector. There are to date about 12,815 private drain connections with the city's drainage system.

The coming year will terminate the city's payment of rental for the use of the old water course across the marsh land between Mystic and Middlesex avenues, as a permanent right of way has been obtained and a large storm drain completed.

A number of cases of claims for damages have been settled for small amounts.

Considerable work has been done and materials furnished other departments during the year whenever requested, the sewer department being reimbursed for the same.

The armory building on Highland avenue was found to have surface and ground water flooding the basement floors after every storm, on account of faulty construction in the drainage of the building, and there being no appropriation, the sewer department spent \$112.79 in laying drains that would make the basement available for use.

A tide gate was constructed on the city home property, to prevent the back flowage from Alewife brook; a number of gate chambers have been constructed for the water department, and miscellaneous work done for the highway department.

PUBLIC GROUNDS DEPARTMENT.

At the present time there are eighteen separate parcels of land, located in all parts of Somerville, used for parks and playgrounds, amounting to sixty-four acres, and also a boulevard about one and one-third miles in length maintained by the city.

The larger areas, Broadway, Central hill, Prospect hill, Lincoln and Tufts parks, have been policed by regular officers from the police department during the spring and summer months; trees and shrubs added to the various grounds, and bulbs, plants, and flowers furnished in their seasons, and during the winter time ponds flooded for skating.

Six fields have been maintained for baseball and three for football playing, and are constantly in use by the various athletic teams, and the outdoor gymnasium, bicycle track, and tennis courts have been a source of much enjoyment.

The city maintains one of the finest enclosed athletic fields in this vicinity, located near Powder-house square, West Somerville, between Broadway and the boulevard, which, on Thanksgiving day, was the scene of a fine athletic contest between teams representing the Somerville and Cambridge high schools, about 8,000 people being in attendance.

Additional seats have been built on this field during the year at the expense of the High School Athletic Association, making a total seating capacity for nearly 5,000 people, and standing

room for three to four thousand more.

The playgrounds on Glen street, at Oliver street, have been enlarged by the city obtaining the use of the vacant land in the rear joining the city's property, which has been graded and in use during the year; also another area located east of Broadway park has been partially graded and put in condition for a playground, the owners of this vacant land agreeing to allow the city to use the same for this purpose.

At the corner of Highland avenue and Cedar street, a portion of the Gurney estate has been graded and laid out for a playground, at the solicitation of parties interested in this matter.

The remaining unimproved portion of the city's field, located at the corner of Broadway and Cedar street, has been partly graded, and will probably be completed in the early spring, so that the area in front of the city stables and on one of the principal streets of the city may be kept in a respectable condition and utilized as a playground in this vicinity.

Wyatt's clay pit in Lincoln park has been used by the board of health for the disposal of ashes, and during the coming year will be practically all filled, so that this park can be completed as originally designed to be laid out.

PROSPECT HILL TOWER,
Prospect Hill Park, Somerville, Mass.

Trees of the Carolina poplar variety have been planted on both sides of the Powder-house boulevard, extending from the square westerly to Curtis street, and the coming spring planting should be continued on the remaining length. Houses have been erected on all lots on both sides of this boulevard, between Packard avenue and Curtis street, and a number of buildings are being built west of Curtis street.

On Prospect-hill park the retaining wall along the south-westerly side has been completed, an iron fence erected on top of this wall, and a walk constructed at the base of the slope, and additional trees and shrubs planted, all at an expense of \$1,630.70.

The total amount expended in completing this park and observation tower within the last three years has been as follows:—

Land purchased Laying out and grading Observation tower . Bronze tablets erected	•	· · ·	· · ·	\$48,964 91 17,762 30 8,103 03 500 00
Total	•			\$75,330 24

The granite observation tower on this park was electrically illuminated in the evening on Decoration day, the Seventeenth of June, and Fourth of July, by arranging about 500 incandescent lights around the top of the structure.

Elevations and check levels taken on this tower show no set-

tlement since construction.

During construction work in the excavation of material from the slopes of this old hill, many ancient relics were found, such as buttons from the uniforms worn by the American and British soldiers, cannon balls, bullets, an old spade and pick, etc., also an old well was found, said to have been used by the soldiers of the Revolution encamped on Prospect hill, which has been preserved, and in which an old-time well-sweep and oaken bucket are to be placed.

APPENDED TABLE.

Following this report is a table giving names of all streets in the city, public and private, lengths, widths, and the total mileage; in the 1901 report a table was given showing the locations and names of public squares in the city, and in the 1898 report old names of certain streets as formerly known.

Respectfully submitted,

ERNEST W. BAILEY,

City Engineer.

Total length of streets in the city, 93.556 miles.

HIGHWAY DEPARTMENT STABLE.

FLUSHING DAVIS SQUARE.

REPORT OF THE STREET COMMISSIONER.

Office of the Street Commissioner, CITY HALL, January 2, 1905.

To His Honor, the Mayor, and the Board of Aldermen:-

Gentlemen,—I most respectfully submit the twenty-ninth annual report, containing a brief summary of the principal work performed by the highway department during the year 1904, with recommendations for necessary improvements and additions for

the coming year.

It is with a certain feeling of pride that I look back upon the work performed by the highway department the past year; the results obtained are very gratifying, and seem to meet the approbation of the tax-payers. There is nothing which helps to improve the looks of a city more than well-kept streets. Some streets that are not up to date, if kept clean, have a good appearance to the eye. Good streets are being demanded as time advances, and the highway department is doing its utmost to meet the requirements.

Street Cleaning.

The patrol system used in our streets was established in 1896, and has given great satisfaction to the general public. I would recommend that this system be increased, the city be divided into sections, with a patrolman for each, and the purchase of a gutter sweeper and pick-up machine would save expense in this branch of the work.

The street-cleaning force consists of four sweeping machines, one Barnard scraper, two road scrapers, one one-horse steel cart, four Menzies cleaning carts, and twelve small push carts, all in good repair.

Stone Crusher.

Many streets have been re-surfaced and macadamized, and the stone crusher has been unable to supply the demand for stone. 13,378 tons have been crushed at the plant, and 2,870 tons purchased.

City Ledge.

The city ledge between Broadway and Holland street is fast disappearing. A gang of men has been constantly at work getting out the stone, and by the end of another year the supply will be nearly exhausted. I would recommend the early considera-

tion of the advisability of purchasing a stone ledge of suitable material, if found in a favorable location, and I think great improvement at a less cost can be made in the construction and maintenance of our highways.

Wide Tires.

The legislature of 1900 passed an act to regulate the width of tires on draft wagons, as follows:—

Section 1. On and after the first day of January, in the year 1902, it shall be unlawful, except as provided in section four of this act, to or cart having tires of iron or steel, or of any substance equally hard, which are less in width than one and one-half times the diameter of the axle, measured at the shoulder thereof; but in no case shall a tire more than four inches in width be required, and wagons or carts built with wooden or hollow axles shall have tires not less in width than the diameter of the axle, measured at the shoulder thereof.

Section 2. This act shall apply to all wagons and carts the axles of which are two inches or more in diameter, measured as aforesaid, and to all stage coaches, tally-ho coaches, barges and other passenger vehicles not built to run on iron or steel rails and constructed to carry

eight or more persons. Section 3. Whoeve

Whoever violates any provision of this act shall be pun-

ished by a fine not exceeding one hundred dollars.

Section 4. This act shall take effect on the first day of January, in the year 1902, but shall not apply to wagons or other vehicles owned and used in this state on that date. (Approved May 23, 1900.)

Under the above act, the department has placed wide tires on all its carts and wagons. The old adage says, "That vehicle that draws that load should make that road, and not that rut." If wide tires will not make good roads, they will keep good roads in good repair.

Summer and Bow Streets.

Edgestones were re-set on Bow street, from Union square to Wesley park, and the roadway on Summer street, from Wesley park to School street, was widened sixteen inches. The Boston Elevated Railway Company has laid double tracks on Summer street, from Wesley park to the westerly side of School street. New rails were laid on Bow street, from Union square to Wesley park, and the railroad co-operated with the city in laying bitulithic paving the entire length, which makes a street pavement that has been guaranteed for years, at a cost to the city of A turnout has been laid in Springfield street, at Houghton street, and the existing turnout extended on Concord avenue into Springfield street, the company having paved the street at turnouts from curb to rail with asphalt.

Steam Road Rollers.

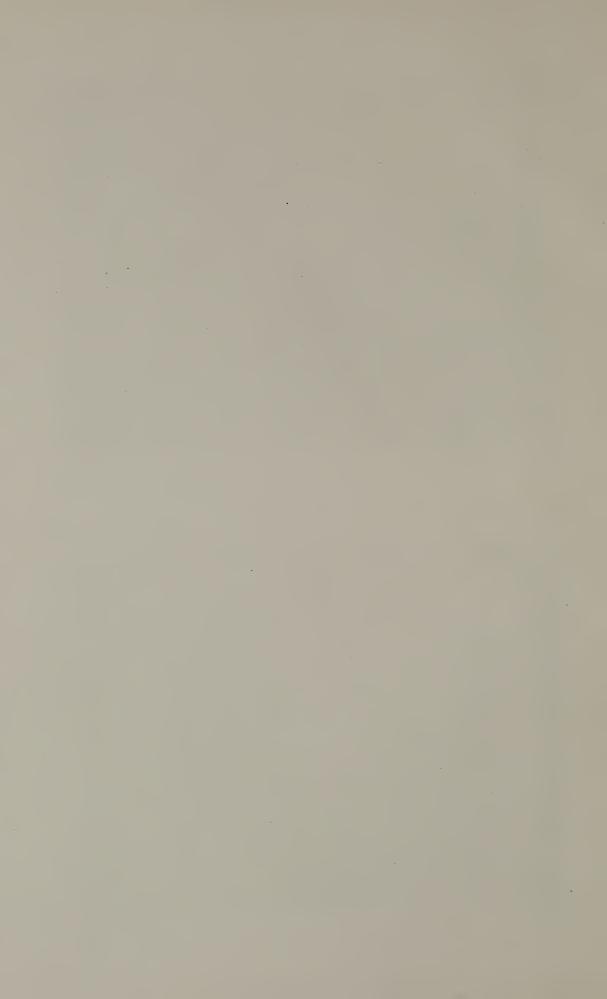

The city has three Buffalo Pitts steam rollers, one fifteenton, that has worked during the past year 214 days, one twelveton, worked 210 days, and one five-ton asphalt roller, worked

SUMMER STREET, WITH SINGLE TRACK, IN PREPARATION FOR PAVING.

SUMMER STREET, WITH DOUBLE TRACK, PAVED WITH BITULITHIC.

ninety-five days. All are in fair condition. There is such a pressing demand to have streets re-surfaced and macadamized that I would recommend the purchase of another fifteen-ton roller.

Bridges.

The bridges are in good condition. The approaches to the same are under the care of the Boston & Maine Railroad Company, and need attention. I hope to see in the near future a bridge across the tracks at Lowell street, and the abolishing of grade crossings started on some one division of the Boston & Maine Railroad.

A new bridge has been constructed over the Mystic river, at Middlesex avenue and the Fellsway boulevard, which adds to the approach to our city, and if a boulevard was constructed connecting the Fells and Fenway, it would give to pleasure seekers a drive exceeded by no other in the park system.

Shade Trees.

Shade trees are an important feature of the highways. The department has purchased and set out, under the supervision of an inspector, 469 trees, also 203 trees purchased by individuals. These trees have been well protected by a guard and wire netting, and have been watered during the dry season.

Brown-Tail and Gypsy Moths.

The department is still doing active work towards the destruction of the brown-tail and gypsy moths, and I hope the property owners will co-operate with the city in their extermination. There is reason to believe that the state, and even the United States government, will make an appropriation to exterminate these pests. The total amount expended by the department for the destruction of these pests is \$13,527.42.

Subways.

Storm shields have been erected by the department over the Kent and Thorndike-street subways, and one is being erected over the Sacramento-street subway, which will help materially in the maintenance of the same and the travel for pedestrians.

Street Watering.

Under the law providing for the assessments for street watering, only accepted streets can be watered. When residents wish private streets watered, they must pay the cost of such watering in advance. The street watering is let out by contract at \$85 per month per cart, the contractor to furnish a competent driver and a good pair of horses, and to see that his route, which comprises about two miles, is properly watered at all times, in-

cluding Sundays and holidays. This branch is under the direction of an inspector. There are thirty-two watering carts, all painted and repaired by the department. One new cart has been purchased this year, and to care for the carts during the winter an addition to the watering cart shed has been built. I would recommend the purchase of a new cart in the year 1905.

Clarendon Avenue.

An order was passed by the board of aldermen June 25, 1903, for the laying out and acceptance of Clarendon avenue, from Broadway to the Cambridge line. Work was begun at once, and will be completed by the first day of May, 1905. All the hard stone from the avenue was carted to the crushing plant to be crushed and used in the future, and all other material is to be used in the construction of said avenue.

Accepted Streets.

Fifteen streets have been accepted, comprising in length about 8,194 feet. Ten streets have been constructed, and two streets partially constructed, at a cost of \$17,591.15. The total length constructed was 8,572 feet.

Snow and Ice.

This department was very unfortunate in having to care for such a large fall of snow during the year, as the amount, \$13,171.62, which was spent could have been used to good advantage on the maintenance of our streets. There have been 10,855 loads of snow and ice removed from the streets during the year. It is also the duty of this department to care for all sidewalks as regards the removal of snow and the care of slippery sidewalks during the winter time in front of public buildings and public grounds, also,—under an ordinance passed February 12, 1904,—when the tenants suffer to remain on such sidewalks for more than six hours, between sunrise and sunset, on any day, any snow or any ice, unless such ice is made even and covered with sand or other suitable material to prevent slipping. Such owner and tenant shall remove all snow and ice from such sidewalk within the time and in the manner herein specified. Whoever fails to comply with this ordinance shall be liable to a penalty of not more than \$20 for each offense.

Miscellaneous.

Thirty-two streets have been macadamized or re-surfaced, at a cost of \$17,036.94, a total length of 31,131 feet.

There are 69.3 miles of public streets and 24.26 miles of private streets in the city, making a total length of 93.56 miles in the city.

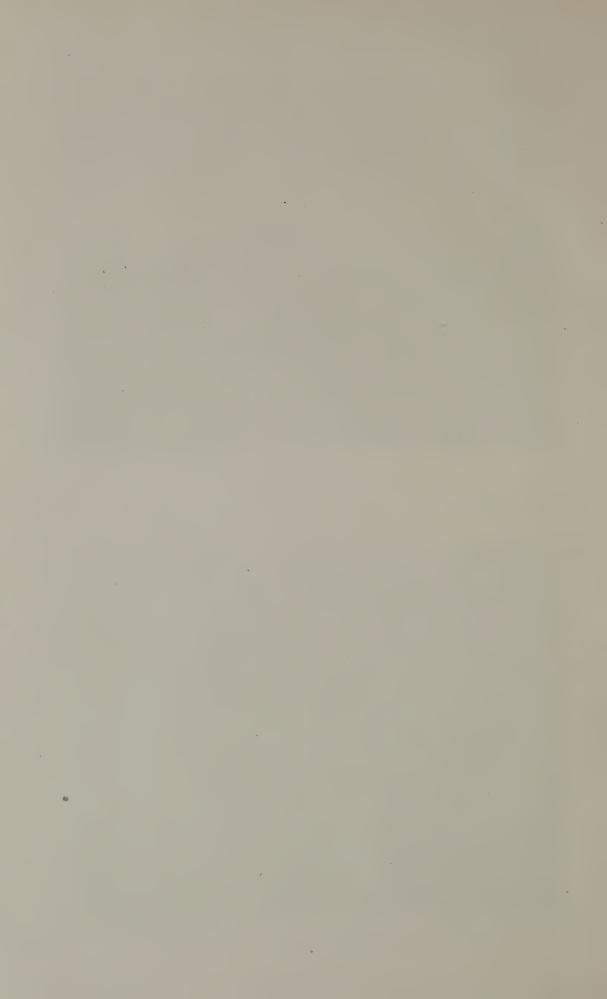

575 permits were issued for the use of streets and sidewalks,

KENT STREET SUBWAY.

KENT STREET SUBWAY, WITH STORM SHIELD.

and 619 defects in the streets and sidewalks, which were reported by the chief of police, were promptly repaired.

Ninety signs and guide posts have been painted and erected

by the department during the year. 4,007.84 square yards of brick and 107.87 square yards of granolithic sidewalks have been laid, and 24,225.4 feet, or nearly 4.588 miles, of edgestone and inside curbing were set, at a cost of \$25,702.06. 8,010 square yards of block stone gutters and 280.11 square yards of vitrified brick, granite, and concrete crossings were laid, costing \$16,392.13.

11,861.6 feet, or over 2.247 miles, of edgestone were re-set, and 7,464.1 square yards of brick sidewalks re-laid, at a cost

of \$6,581.01.

229.6 square yards of crossings and driveways have been re-

paved with granite blocks.

150 square yards of granite and concrete crossings surfaced with concrete, and 102.3 square yards of driveways paved or repaved with brick.

3,437 yards of sand and gravel have been used in this branch of the work. 3,894 loads of dirt and 10,211 loads of scrapings

were removed from the streets.

1,362 loads of old macadam and 2,395 loads of ballast were used in the repair and construction of streets, and 4,801 loads of ashes used in the repairs and construction of sidewalks and in setting and re-setting of edgestones.

This department has been called upon to furnish steam roller, teams, crushed stone, sand, gravel, and ashes to the other

departments.

This department has paved 614 square yards of block paving and re-laid 748 square yards in front of the engine house situated in Union square.

Some of the sidewalks that have been laid in the oldest parts of the city, and where sewer, water, and gas trenches have been

made, need attention.

No department or company should be allowed to open any street or sidewalk after the frost sets in, unless in a case of emergency.

The department maintains its own painter, blacksmith, horseshoer, and harness repairer, all situated at the city stables.

Transportation of Explosives and Gunpowder.

On December 23, 1904, an ordinance was passed by the board of aldermen, a portion of which relates to this department, as follows:-

Section 1. No explosive or gunpowder shall be transported through any portion of a street unless notice has first been given in writing to the chief of the police department, stating the proposed route, the time of transportation and the gunpowder or explosive intended to be transported, nor unless his approval in writing has first been obtained.

Section 3. No vehicle shall be used for the transportation of any explosive or gunpowder through any portion of a street except a ve-

hicle previously approved in writing by the chief of the police department and bearing on the outside of both sides in letters at least four inches high the words, "Explosive" and "Dangerous."

Section 4. No person shall allow a vehicle containing any explosive or gunpowder to be left without some one in charge or to move

faster than at the rate of four miles an hour.

In accordance with this ordinance, the department has fulfilled the requirements, and the vehicles used for such purpose have been accepted by the chief of police, and the law will be rigidly enforced.

Recommendations.

I would most respectfully recommend that Washington street, from Union square to the Cambridge line, Prospect street, Linwood street, Summer street, from Belmont street to Cutter square, and School street, from Broadway to Medford street, be macadamized; Washington street, east side, from Tufts street to the Boston line, and Somerville avenue, from Kent street to Oak square, be paved with blocks; that the paving blocks in Union square be removed and said square paved with bitulithic; that the narrow main streets with double car tracks be put in firstclass condition with either bitulithic, brick, asphalt, or macadam, and that Gilman square be paved with bitulithic. That edgestones be set and gutters paved with blocks on the south side of Elm street, from Mossland street to Cutter square, Holland street, from Irving street to Teele square, Beacon street, south side, from Washington street to Park street, Main street, from Broadway to the Medford line, Medford street, from the railroad bridge to Highland avenue, and College avenue, from Broadway to the Medford line. This would complete all our main thoroughfares with edgestones. I further recommend that the brick paving in Davis square be extended to Chester street.

I wish to extend my sincere thanks to his honor, the mayor, the board of aldermen, heads of departments, and all city officials with whom I am associated, and the genial public, for their able support and hearty co-operation; and I would express my appreciation of the conscientious work and efficient service of the foremen, inspectors, teamsters, laborers, and all others employed

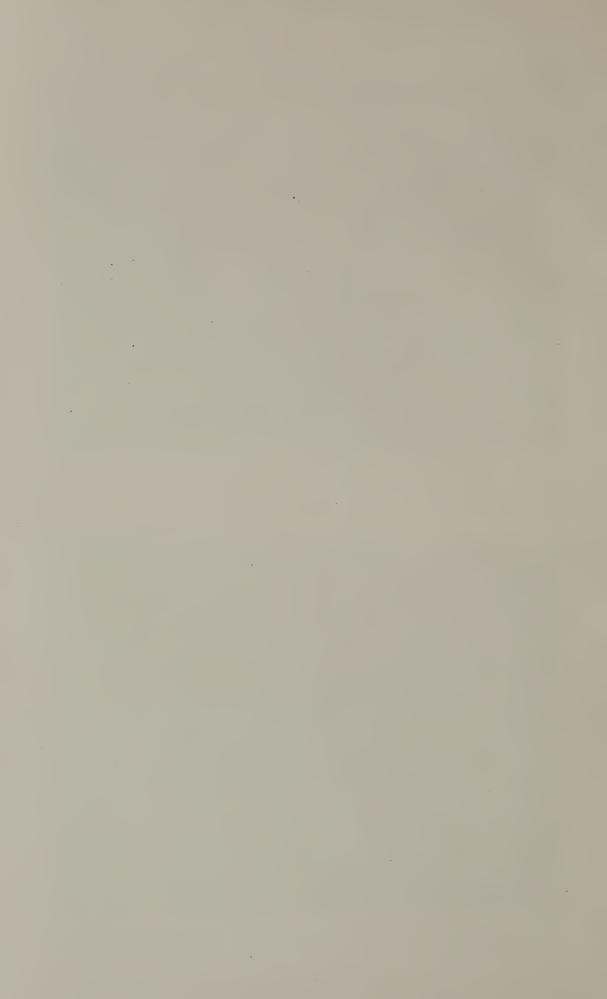

in the department.

Respectfully submitted,

Asa B. Prichard, Street Commissioner.

FIRE STATION, UNION SQUARE.

REPORT OF COMMISSIONER OF PUBLIC BUILDINGS.

Office of Commissioner of Public Buildings, CITY Hall, Somerville, January 1, 1905.

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen,—I have the honor, as commissioner of public buildings, to submit the following report of this department for the year 1904.

Section 41, article third, of the city charter, relating to this department, is as follows: "The public buildings department. This department shall be under the control of the commissioner of public buildings, who shall have charge of the construction, alteration, repair, maintenance, and care of public buildings, and

shall also be the inspector of buildings."

In addition to the regular work of this department during the year 1904, there have been several needed improvements made in some of the public buildings of the city. A description of this special work will be found fully outlined in this report. The inspection of private building construction, which has been made during the year, has been performed systematically, and, as a result, the various builders have carried on their work with very few violations of the building ordinances.

Inspection of Buildings.

There have been issued during the year 1904 permits for 303 new buildings and alterations. This number is sixty-six more than in 1903.

The total estimated cost of new buildings and alterations in 1904 was \$959,540, while the same in 1903 was \$635,259, showing an increase of \$324,281.

During the year 1904 there have been 1,043 inspections of private buildings in the course of construction. These have included the inspection of fire-stopping, chimneys, buildings damaged by fire, and foundations.

The following is a table showing the number of permits in each ward for buildings, etc., and the uses for which they were

intended:—

Buildings.			V	VARDS.				Totals.
	1	2	3	4	5	6	7	
Dwellings	12 2 2 10 0	16 1 3 5	12 2 0 5 0	9 1 4 8 0	17 3 0 6 1	69 4 1 5	89 6 0 7 1	224 19 10 46 4
Total	26	26	19	22	27	80	103	303

Inspection of Plumbing.

The number of plumbing permits issued during the year was .	332
Permits for plumbing in new buildings	161
Permits for plumbing in old buildings	171
Number of the buildings in which pipes were tested by water.	278
Number of master plumbers' licenses, 10 at \$2.00	\$20 00
Number of journeyman plumbers' licenses, 5 at \$.50	2 50
Number of master plumbers' licenses renewed, 32 at \$.50.	16 00
Number of journeyman plumbers' licenses renewed, 24 at \$.50.	12 00
One application for journeyman plumber's license was rejected	ed.
Amount received in fees	\$50 50

English High School.

The large increase of pupils entering the English High school at the opening of the school year, and the addition of the new course in drawing, made it absolutely necessary to make extensive alterations in that building. The southwest corner room on the first floor was re-arranged and re-furnished for use as a drawing room, and the northerly classroom in the rear was divided into two classrooms, and put into condition for seating pupils. The total cost of these changes, including construction, new furniture, and re-arrangement of furniture, was \$967.17.

Bell and Burns School Buildings.

The Bell and Burns school buildings were thoroughly renovated during the summer, and are at the present time in excellent condition. A basement room at the Burns school was renovated to allow for its use as a ward room. The need for a suitable ward room in this building had existed for a long time, and the new arrangement is filling the requirements in an apparently acceptable manner to the citizens of ward six.

In both of these school buildings the change in classification has made it necessary to provide new school furniture and to relocate, in some instances, the furniture already installed. The general renovation of these two buildings has been needed for a

long time, and the total amount of money expended for the work as described was \$1,540.

Engine House, Union Square.

During the year 1904, the new engine house located at the junction of Washington street, Prospect street, and Somerville avenue, and Union square, was completed and occupied by the fire department. The construction of the building was started in 1903, and the various contracts on the building were performed by the following:—

General contractor, Frederick C. Alexander, 227 Highland avenue. Contractor for heating and ventilating, Chas. H. Sanborn, 50 Walnut st. Contractor for plumbing, M. F. Naughton & Co., 486 Somerville avenue. Foundation work, W. F. McCarthy, 27 Bonair street.

Brick, W. A. Sanborn, 472 Broadway.

Plastering, John J. Kennedy, 306 Somerville avenue.

Painting, J. F. Berton, 65-A Dover street.

Interior finish, J. Rush Green, 11 Cambria street.

Lumber, F. C. Ayer, 157 Highland avenue.

Hardware, W. E. Plumer & Co., Whitney & Snow, Union square.

Stable fittings, W. A. Snow, 17 Francesca avenue.

Special fire department fitting, Charles E. Berry, 234 Washington street.

Furniture, Jackson Caldwell, Clifford & Rogers, Union square.

This building is a three-door house, and accommodations are provided for three pieces of fire apparatus, nine horses, and

ten permanent men.

On the first floor there are located the apparatus room, nine single stalls, and one box stall, harness room, toilet room, and the fuel wagon room. On the second floor is located a reading room, a recreation hall for games, etc., eight bedrooms, hay loft,

bathroom, work room, drying room, and lockers.

The building is constructed of water-struck red brick, with granite and terra cotta trimmings. The interior finish is of ash and North Carolina pine. The walls of the apparatus room are faced with white Tiffany tile and light brick. The tower of the building has been adorned with an illuminated clock, which adds greatly to the appearance of the building at night, and is a great convenience to the people who pass through Union square both during the day and at night. The total cost of this building, including the land, was \$44,997.

New Dormitory, City Home.

The new dormitory for men at the city home has been constructed during the year, and is occupied at the present time.

The building is in size seventy feet long and twenty-six feet wide, two stories in height, and has a commodious basement. The first floor is divided into single rooms, which will be used for farm help and such men as it is necessary to isolate. The second floor is divided into two dormitories for the men, which

will accommodate about twenty beds. The basement is to be used for a laundry, day room, and smoking room. The heating arrangement for this dormitory is a temporary one, and I would recommend that during the year 1905 the heating plant in the annex to the Knapp school, which is not in use, be transferred to the city home and used to heat the entire set of buildings there. I feel sure that this plant, when installed, may be run more economically and with better results than the present system of furnaces there.

George O. Proctor School.

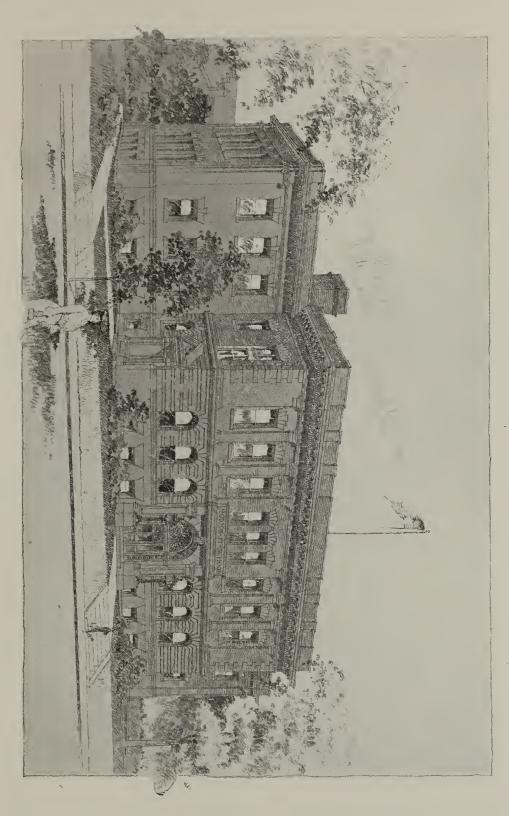

The drawings and specifications for this building were prepared by Aaron H. Gould, of Columbus avenue. The following architects were invited to submit competitive drawings:—

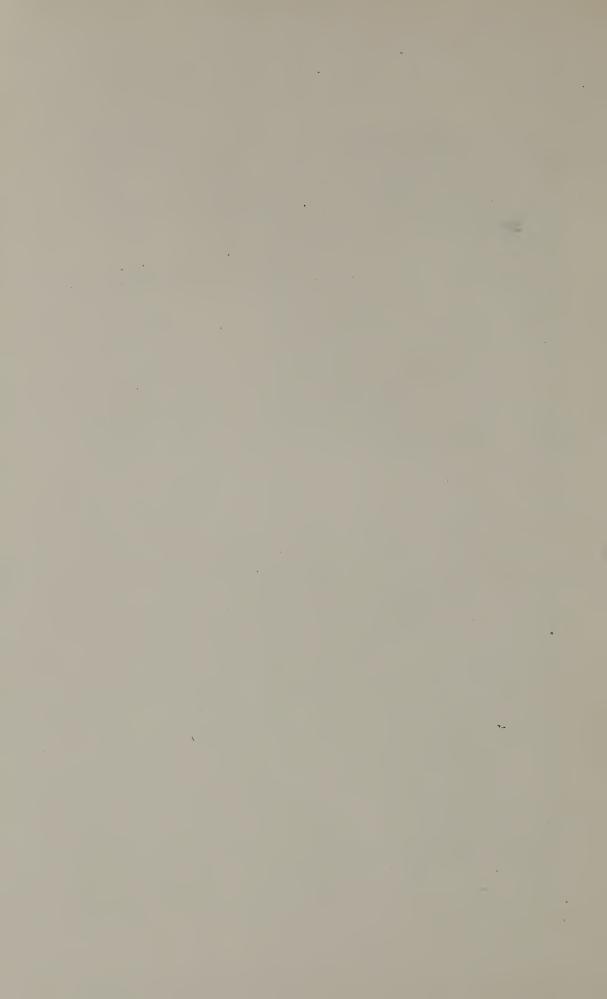

William A. Dykeman, Belmont street, Somerville. Aaron H. Gould, Columbus avenue, Somerville. Prescott & Sidebottom, Devonshire street, Boston. Loring & Phipps, Exchange building, Boston.

And after careful consideration and inspection of the same by the superintendent of schools and others interested in school matters, the commission was awarded to Mr. Gould. The plans and specifications call for an eight-room building, constructed of red water-struck brick, with granite composite and terra cotta trimmings. The construction was started in the early fall of 1904, and is progressing satisfactorily at the present time. The building will be ready for occupancy at the beginning of the fall term of this year. An appropriation of \$30,000 was made for this building, but the appropriation for the heating, plumbing, and furnishings has not as yet been made, and it will be necessary to provide the same early in the year. Estimates were received for the construction of the building as follows:—

Dodge Construction	Co.			\$45,886 00
Penniman & McGuire		, •		45,515 00
Stephen Brennan.		•		39,853 00
				39,480 00
Mack & Moore .				39,400 00
Dillon Brothers .				38,773 00
F. C. Alexander .				38,769 00
H. E. Lord				37,974 00
A. H. Hines				36,969 00
William I. Mabie .				36,280 00
Louis Cadario .				35,630 00
J. M. Andrews & Son	n.			35,283 00
G. M. Davis & Son				35,160 00
William Crane .				34,960 00
J. E. Locatelli .				34,900 00

The lowest estimate being in excess of the amount available, it was decided to revise the plans and specifications, and this having been done, the four lowest bidders were invited to submit estimates according to the revised plans and specifications. These estimates were as follows:—

G. M. Davis & Son			\$31,250 00
J. M. Andrews & Son			30,700 00
William Crane .			30,421 00
J. E. Locatelli .			29,490 00

The lowest bidder was J. E. Locatelli, of Somerville, and he was awarded the contract.

Public Buildings, Care and Repair.

The appropriation for the care and repair of the public buildings has proved inadequate for their proper maintenance during the year 1904.

The larger part of this work being impossible in term time, it was executed during the summer. In addition to this work, the usual monthly requirements were attended to. The amount of money estimated at the beginning of the year as being sufficient for this work, although carefully figured, must at times be insufficient, since it is impossible to predict what emergencies may arise during the year. To the building department is entrusted the care of forty-three buildings. The following table may prove interesting, showing, as it does, some of the various items of property which it is necessary to continually keep in repair, and which are contained in the public buildings of the city:—

Steam boilers							44
					•		32
Classrooms (scho	ols)					•	261
Sets of school fur	rnitu	re		•			12,000
Teachers' desks					•		295
Visitors' chairs							590
Electric motors		. 0					2
Motor generators							1
Sanitary systems			•	•			43

During the past year the boiler inspectors have given orders for repairs on the steam boilers of the school buildings, which caused an expenditure of \$3,318.06. This work was imperative, in order that the heating plants may be safe and secure. The amount estimated at the beginning of the year for the work was \$1,395.

There has been expended for fuel in the school buildings during the year \$15,427.89. The amount estimated at the beginning of the year was \$15,000. The amount expended for janitor service in the school buildings was \$22,033.62. The amount ap-

propriated was \$20,380.

At the beginning of the fall term in 1904, it was necessary to open new schoolrooms in the Bingham, Carr, Bennett, Hodgkins, Knapp, and English High schools, and to make changes in the Highland, Forster, Bell, Edgerly, Morse, Burns, and English High schools. These additional rooms and the changes in classification were not anticipated at the beginning of the year, and the cost of providing furniture and making changes for the same

was not provided for in the appropriation, and in order to take care of the children in these buildings, it was absolutely necessary to execute this work. The amount required to carry out these changes was \$2,756.22. The amount estimated for such purpose was \$592.

The maintenance of the plumbing work in the school buildings is an item which cannot be estimated accurately in advance, and this year the cost of such work has amounted to \$1,624.87.

The estimated cost at the beginning of the year was \$280.

The amount spent in general repairs, which includes carpenter work, glass breakage, varnishing, roofing, blackboards, fences, care of grounds, concreting, mason work, and general repairing, was \$7,566.10. The amount estimated at the beginning of the year was \$5,598.57.

This mass of work has been handled by the department as efficiently as possible, and the buildings inspected as often as possible. A new system of requisition blanks has been established, in order that the commissioner may be sure that the minor repairs are really necessary. By this system each requisition must come from the principal of the school and be approved by the superintendent of schools before consideration is given to the

same by the public buildings department.

In view of the work still to be done on the old school buildings and the rapidly-increasing number of new ones, requiring yearly repairs, for good maintenance, a large appropriation for repairs should be asked for the year 1905. The department has, however, in its recommendation for the yearly appropriation, cut, by \$5,000, its recommendation for the same purpose for the year 1904, and this notwithstanding a large overdraw for the year 1904. The increased use of the schools in the evening means not only a material increase of expenditure to equip, but also greatly increases the wear and tear, and makes a steady addition to the amount needed for repairs.

In the latter part of the report may be found tables showing how the repairs, etc., were distributed in the various schools.

Fire Escapes.

At various times during the year the matter of fire escapes has been agitated, but as yet nothing definite has been accomplished. An appropriation of \$1,500 has been made, however, for the construction of a fire escape to be erected at the Bell school. The commissioner has given this matter a good deal of careful thought, and has reached the following conclusion, viz., that an outside iron stairway makes a poor exit for a crowd of frightened school children. The only practical emergency exit is a fireproof stairway or run, broad and safe, enclosed in a fireproof wall, and approached from the various schoolrooms in as direct a manner as possible. The following suggestions are made as practical safeguards in the school buildings, viz.: fire-

proofing basement around heating apparatus; fireproof openings leading from floor to floor; a complete alarm equipment, and an equipment for extinguishing fire. With these safeguards and the present well-conducted fire drills in the schools, it seems to the commissioner almost impossible that the life of a child should be in the least endangered on account of any fire which might occur.

Conclusion.

This brief review of the work which has been accomplished during the year 1904 will, I trust, convey some idea as to the work of the department of public buildings. In some respects I feel that I have fallen short in my duty, owing to the utter impossibility of accomplishing everything needed in the line of improvement of existing conditions in the public buildings. The various items of work which have been neglected, however, are those which could be best postponed to some future date, when a sufficient appropriation will be available.

I desire to express my appreciation of the valuable help and advice which I have received from all the members of the board of aldermen, in connection with my work of caring for the public

buildings of the city.

I cannot close without a grateful acknowledgment to his honor, the mayor, for his support of everything which has helped to make the department efficient, and for the benefit of his sound and wise advice.

Respectfully submitted,

Walter T. Littlefield,

Commissioner of Public Buildings.

REPORT OF COMMISSIONER OF ELECTRIC LINES AND LIGHTS.

Office of Commissioner of Electric Lines and Lights, City Hall, January 1, 1905.

To His Honor, the Mayor, and Board of Aldermen:—

Gentlemen,—I herewith submit my ninth annual report, for the year ending December 31, 1904.

Electrical Department.

The two most important branches of this department consist of the fire alarm and police signal systems. They have received the usual careful attention during the year.

Under this department also comes the inspection of all buildings equipped with electric light service, also all poles and

wires in the city streets.

During the year 162 buildings have been inspected for electric light service, and permits issued for attachments of wires for same. Also 309 poles have been replaced by new ones, divided as follows: Somerville Electric Light Company, 69; Edison Electric Illuminating Company, 226; New England Telephone and Telegraph Company, 14.

Fire Alarm.

Four new fire alarm boxes have been added during the year, located as follows: box 123, corner of Pearl and Cross streets; box 323, Sycamore street, corner of Montrose street; box 433, Highland avenue, opposite Spring-hill terrace; box 444, Holland street, corner of Cameron avenue; making a total of 106 boxes.

There have been no large fires during the year, as all alarms have been given promptly and correctly, and the fire department

was thus enabled to respond quickly.

During the summer the automatic steam whistle in East Somerville was disconnected, but was again placed in operation in the fall, so that the residents of that section might hear the no-school signal. The boxes are being changed from four-round to two-round boxes, which will reduce the number of blows on the whistle to a great extent.

The new fire station in Union square has been completely equipped with all the latest electrical appliances, under the direct supervision of this department. Fire alarm gongs, indicators, electric lighting for night alarms, horse-pulls, and still alarm signal, all of the latest and best workmanship, have been installed.

The equipment of this department consists of the following: 106 signal boxes, one eight-circuit repeater, one eighteen-circuit fuse board, eight tower strikers, thirty-three gongs, eight indicators, twenty small tappers, forty open circuit tappers, one automatic steam whistle, 392 cells storage battery, and 130 miles of wire.

Five miles of new wire have been added, and a large portion of the old has been replaced by new, making in all fourteen miles

of new wire which have been placed in service.

I would recommend that some portion of the fire alarm and police signal wires be placed underground during the coming year, and most earnestly recommend the placing of high tension wires underground. Every year the number of these dangerous wires increases, and the menace to the safety of the electrical workmen, firemen, and the public is far greater.

During the year this department has been called upon to answer seventy-six emergency calls to pick up wires reported as

dangerous.

Nearly a thousand lights were placed in service on the Prospect-hill tower during the Grand Army encampment, the work being done by this department.

Police Signal.

This department has received its usual careful attention, and is in good working order. During the coming year some of the circuits should be re-built with special wire, to guard against the induction received from the high tension wires, which is increased every year from additional high tension wires, and which renders the telephone service imperfect to a great extent.

I would also recommend that two more boxes be added dur-

ing the coming year, to render the service more efficient.

Street Lights.

Six new arc lights and thirty new incandescent lights have been placed in service during the year, making a total of 491 arc lights and 483 incandescent lights.

Several new lights will be needed during the coming year

in the new territory in the western part of the city.

At the present time the lighting service is as good as and much better than many of the surrounding cities.

ELECTRICAL DEPARTMENT.

Respectfully submitted,

Edward Backus,

Commissioner of Electric Lines and Lights.

SOMERVILLE WATER WORKS.

SOMERVILLE, MIDDLESEX CO., MASSACHUSETTS.

Area of city, including land and water, about 4.22 square miles.

Population, estimated, 71,000.

Entire population on line of pipe and supplied with water.

Water works owned by City of Somerville.

Construction commenced in 1868.

Source of supply: Metropolitan system, taking water of the Nashua river at Clinton, Mass.

Mayor

Hon. Leonard B. Chandler.

Water Commissioner

FRANK E. MERRILL.

Office of the Water Department,

Room 10, City Hall.

Department Buildings and Yard,

Cedar street, near Broadway.

REPORT OF THE WATER COMMISSIONER.

Office of the Water Commissioner, } February 1, 1905.

To His Honor, the Mayor, and the Board of Aldermen:-

I present herewith my report for the year ending December 31, 1904, this being the thirty-first annual report made by the water department:—

Water Income.

Water bills have been issued as follows:-

water bills have been issued as follows.—		
"Annual" water charges, amounting to "Additional" water charges, amounting to "Metered" water charges, amounting to	\$157,019 5,536 60,750	41
Abatements made on the above charges	\$223,306 7,278	22 88
Leaving net amount of bills rendered	\$216,027	34
water furnished water companies, 1904, under section 3, chapter 488, Acts 1895	820	31
Total amount credited to Water Income account .	\$216,847	65
The water income was used under appropriation the board of aldermen as follows:—	orders	of
For water works purposes:—		
Water works maintenance	\$152,281	32
For other municipal purposes:—		
Sewers, maintenance		
	64,566	33
	\$216,847	65

In addition to the appropriations from water income to other municipal purposes enumerated above, water has been furnished without charge to all the city departments that have required its use. The value of this water, based on the charges of the year 1899, is about \$12,000.

Department Receipts and Disbursements.

WATER MAINTENANCE ACCOUNT.

	Dr.	Cr.
Amount appropriated by board of aldermen from water income		\$25,717 87 3,316 94 244 00
for maintenance of the water works and renewals of pipe	\$25,665 40 3,324 89 288 52	
	\$29,278 81	\$29,278 81
WATER WORKS EXTENSION	ACCOUNT.	
Amount appropriated by board of aldermen	Dr.	Cr.
from water income		\$19,282 13
Receipts from 201 water service assessments, Sundry receipts for materials sold		3,537 40 162 95
Labor and materials used in extension of the water works	\$22,819 53	
Miscellaneous accounts	162 95	
	\$22,982 48	\$22,982 48
Cost of Water Wor	ks.	
The total cost of the water works on Decer as represented by the expenditures fro tions for water works extension, was		\$815,887 42
Expended during the year 1904, on extension		22,819 53
Total expenditures, December 31, 1904		\$838,706 95

Water Debt.

Water loan bonds have been issued on funded debt account to the amount of \$1,017,000; this has been reduced by payments amounting to \$909,000, leaving the water debt on December 31, 1904, \$108,000.

The outstanding bonds mature as follows:-

YEAR. AMOUNT.		YEAR.	Amount.	
1905	\$6,000	1913	\$6,000	
1906	16,000	1914	6,000	
1907	17,000	1915	5,000	
1908	7,000	1916	5,000	
1909	6,000	1917	5,000	
1910	6,000	1918	5,000	
1911	6,000	1919	4,000	
1912	6,000	1920	2,000	
166	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,		,	

Extension of Street Mains.

The water distribution system of the city has been extended 5,826 feet by the construction of new mains in Bay State avenue, Boston avenue, Evergreen square, Hillside circle, Ibbetson street, Lincoln parkway, North street, Ossipee road, Pearson avenue, Powder-house boulevard, Russell road, and Yorktown street, and various branches, hydrant and blow-off connections, as shown in the accompanying table. The total water pipe mileage of the city is now about eighty-nine miles, 2,807 feet.

Renewals.

On account of the paving of Bow and Summer streets, from Union square to School street, all the water service pipes within those limits were replaced by new ones, and substantial brick chambers were built around the main gates. Two fire hydrants on Summer street were removed to suitable locations on side streets. Eighty-two feet of cement hydrant branches have been replaced with iron pipe. The sixteen-inch pipe in Mansfield street, laid in 1893, which has given much trouble, again burst on November 19, a piece of the pipe about ten feet long and averaging eighteen inches wide being blown completely out.

Hydrants, Gates, etc.

The fire hydrant system has been extended by the addition of thirteen new hydrants, making the total number now in the city 986. Two private fire hydrants connected with the city's mains have been set by M. W. Carr & Co. in their factory yard, making the number of private fire hydrants in the city forty-seven. Twenty-four water gates have been added to the system, making the total number in service 1,343. Three blow-offs have been constructed, the number connected with the pipe system being now 135. The street watering department called for three new waterposts, and they were set as follows: Bolton street, opposite the schoolhouse; Lowell street, opposite Crown street; Shawmut street, near Shawmut place. The post formerly on Webster avenue, near Tremont street, was injured by a team,

and was reset on Tremont street; the post on Adams street, near Broadway, was moved to Bartlett street on account of a new building. There are now seventy-two waterposts in the city. The hydrants, gates, and all other fixtures connected with the works have been renewed, repaired, packed, oiled, etc., as found necessary.

Water Services.

Two hundred and one service pipes were laid during the year, an increase of fifty-seven over the previous year; the length of service pipe laid was 7,606 feet, and the assessments therefor amounted to \$3,537.40. There is in the city approximately seventy miles, 3,705 feet of service pipe and 11,059 house connections. One hundred and eighty-nine leaks on service pipes have been repaired.

Water Meters.

The policy has been pursued of metering all new houses and of placing meters on all apartment houses of more than three tenements. Meters have also been set, whenever practicable, on all houses where application has been made therefor by the property owners.

A bill was passed by the last legislature which changed the basis of assessing the state water tax so that, under its provisions, the apportionment is hereafter to be based one-third on the valuation of the city and two-thirds on the consumption of water. It is, therefore, of importance to restrict the waste of water as much as possible, and this can be accomplished in no better or

more effective way than by the use of meters.

A large portion of the meters installed during the year were set on single and two-family houses upon application of the owner, and in most cases the revenue therefrom was less than would have been received under the "annual" rate. A considerable number has been set in the larger apartment and tenement houses, which are to commence operation on January 1, 1905; in many houses of this class, where the "annual" rates are disproportionately low, and where large wastes of water are allowed, it is thought that the charges may run in excess of the former rates. One beneficent result of the installation of meters thus far has been the detection, on the part of property owners, of many causes of waste of water and the application of the proper remedy therefor, and several flagrant cases of water waste have been stopped by setting a meter on the premises.

As is natural in a transition period of this kind, when the rate-payers are changing from a system which has given them no concern in regard to the use and waste of water to one which requires them to adopt reasonable precautions against water waste, blame and abuse are at times placed upon the meter, in-

stead of upon the defective plumbing, which is really at the bottom of the trouble. It has been the policy of this department, upon receipt of a complaint of an unusually large metered water bill, to arrange with the rate-payer to have the meter tested, and the result is uniformly that, if the meter is found to register at all outside the allowed limit of accuracy, it is in favor of the consumer, and not of the city. It is well for those having water meters to understand that a large quantity of water can be wasted through a small orifice, and that defective faucets and watercloset ball-cocks are the most prolific sources of this trouble. It is very easy to discover if the fixtures are out of order; by simply placing the ear upon a faucet or pipe, the sound made by escaping water can be distinctly heard. Another great cause of waste of water is letting the water run during the cold weather to prevent its freezing; this has been a simpler and cheaper method for the landlord to follow than to properly protect the pipes and fixtures, but it is believed that the installation of a meter on such premises will lead to better conditions in the house plumbing and a more rational method of preventing this trouble than by the waste of a valuable and costly commodity. As a result of experiments, the quantity of water that might be wasted through defective plumbing, under fifty pounds pressure, and its cost to the rate-payer has been found to be as follows:—

Size of	Stream.	Waste P	er Day.	Cost Per	Month
1-2	inch	45,600	gals.	\$22	6.18
1-4	"	12,360	- "	6	1.30
1-8	"	3,360	"	10	6.67
1-16	"	900	"	4	4.46
1-32	"	240	"		1.19
1-64	"	70	"		.35

A hole one-thirty-second of an inch in diameter is so small that an ordinary pin will completely fill it, yet in three months it will waste a quantity of water, if running constantly, that under our rate costs \$3.57. It is impossible for a water meter to operate unless the water passes through it; the flow of the water causes the piston to move and the meter to register. The registration of a water meter is generally very close to accuracy, but it is considered sufficiently correct if there is a variation not greater than two per cent.

The rate for metered water was reduced January 1, 1904, to twelve cents per 100 cubic feet, or sixteen cents per 1,000 gallons, and this city is now enjoying the lowest rate of any in the metropolitan district.

Metropolitan Water.

The annual assessments paid by this city as its proportionate part of the cost and operation of the metropolitan water works are given below:—

Year.	Sinking Fu	nd. Maintenance.	Interest.	Total.
1898	No division	made		\$14,250 19
1899	"			20,975 58
1900	"	• •		28,689 24
1901	\$12,491 73	\$12,033 79	\$32,291 24	56,816 76
1902	19,014 85	12,955 64	30,427 40	62,397 89
1903	15,748 56	12,763 10	48,776 77	77,288 43
1904	16,404 42	15,393 87	54,938 64	86,736 93
•	<i>'</i>		•	

\$347,155 02

There has been credited to the city by the commonwealth as its proportion of the amounts received from entrance fees, water supplied outside the district, and water furnished to water companies the sum of \$7,446.15.

The daily consumption of water in Somerville, as recorded by the Venturi meters, operated by the metropolitan water and sewerage board, is shown below by months for the year 1904:—

Month.	Gallons.	Month.	Gallons.
January	7,834,500	July	6,058,300
February	8,175,300	August	5,796,700
		September	
		October	
		November	
June	5,858,500	December	7,042,000

The total consumption for the year is 2,279,637,000 gallons, making an average daily consumption of 6,228,000 gallons.

The following table shows the daily per capita consumption of water in the cities and towns in the metropolitan water district for the year 1904, as registered by the state's meters:—

Jan. Feb. Mar. Apr. May June July Aug. Sept. Oct. Nov. Dec. You Boston

Nahant	ت
Total	

Of the above, Belmont and Milton are completely metered, and Malden and Watertown have metered the larger part of their

supplies.

A comparison of the per capita "total" for the months April to November, inclusive, with those of December to March, shows the excessive consumption of water during the winter season, which must be attributed to waste resulting from lack of proper protection of the water pipes in buildings supplied, while a comparison of the per capita "average" shows what may be accomplished, as in Malden, Belmont, and Milton, by the general installation of water meters.

The above table shows the average per capita consumption of water in Somerville to have been eighty-nine gallons daily. Of this quantity, it is estimated that fifteen gallons are used for manufacturing purposes and five gallons for public purposes, leaving sixty-nine gallons to be accounted for in domestic use and waste. If, as is generally regarded, twenty-five gallons per inhabitant is sufficiently large for legitimate domestic uses, there remains forty-four gallons per capita, or almost one-half of the total quantity of water furnished to this city, that is, apparently, allowed to go to waste. This large quantity may be and should be restricted, and it is expected that much will be accomplished in this direction as the installation of water meters progresses.

Operating meters have been set and removed during the

year as follows:-

	5/8″	3/4″	1"	$1\frac{1}{2}''$	2"	Total.

Totals Motor and ele- vator registers		86	55	11	17	6	5	2	1,262 10 1,272

The quantity of water passed through these meters during the year was 55,627,950 cubic feet, or 416,097,066 gallons; the amount received therefor was \$60,750.81. This gives an average of about 10.92 cents per 100 cubic feet, or about 14.56 cents per 1,000 gallons.

Summary of Pipes and Fixtures.

Following is a general summary of the pipes and fixtures of the water system, December 31, 1904:—

Feet of main pig Feet of service p			472,727 373,305

Inventory.

The annual inventory of stock on hand, tools and machinery, teams and stable equipment, pumping apparatus, and furniture, shows a valuation of \$23,946.28; the land and buildings of the department are valued at \$32,100, and the distribution system of the water works has an estimated valuation of \$865,000.

Appendix.

Further details of the department work during the year, locations of fire hydrants and other water works fixtures, are shown in the tables that follow.

Respectfully,

FRANK E. MERRILL,
Water Commissioner.

Hydrants — Construction Account.

New hydrants have been set in the following locations:—

Glendale avenue, 80 feet west from Cameron avenue, 6-inch Holyoke. Holyoke road, 185 feet south from Elm street, west entrance, 6-inch Holyoke.

Josephine avenue, 129 feet north from Frederick avenue, 6-inch Mathews. Josephine avenue, 425 feet north from Frederick avenue, 6-inch Holyoke. Lincoln parkway, 150 feet west from Joseph street, 6-inch Mathews. Lincoln parkway, 290 feet east from Wyatt street, 6-inch Mathews. Mystic avenue, 25 feet east from Melrose street, 6-inch Holyoke.

North street, 13 feet north from south line of Russell road, 6-inch

Holyoke. Pearson avenue, 309 feet north from Morrison avenue, 6-inch Mathews. Powder House boulevard, south side, 528 feet west from Curtis street,

6-inch Holyoke. Russell road, 11 feet north from Broadway, 6-inch Mathews.

Somerville avenue, 2 feet west from Abdell street, 6-inch Holyoke. Warwick place, 142 feet north from Warwick street, 4-inch Boston Machine.

Hydrants-Renewal Account.

The following changes have been made in the kind and location of hydrants:-

Buckingham street, 6-inch Holyoke hydrant, set 2 feet south from Dimick street, and 4-inch Bigelow hydrant removed from same lo-

Elm street, 6-inch Mathews hydrant. set 30 feet west from Russell street, and 6-inch Pratt & Cady hydrant removed from 25 feet west from Russell street.

Elm street, 6-inch Mathews hydrant, set 9 feet west from Cedar street, and 6-inch Holyoke hydrant removed from same location. Farragut avenue, 6-inch Holyoke hydrant, set 258 feet south from Broad-

way, and 6-inch Mathews hydrant removed from same location.

Irving street, 6-inch Mathews hydrant, set 6 ieet south from Broadway, and 6-inch Chapman hydrant removed from same location.

Perkins street, 6-inch Mathews hydrant, set opposite Myrtle street, and 6-inch Holyoke hydrant removed from same location.

Putnam street, 6-inch Mathews hydrant, set 46 feet north from Summer street, and 6-inch Mathews hydrant removed from Summer street, opposite Putnam street.

Vinal avenue, 6-inch Mathews hydrant, set 15 feet north from Summer street, and 6-inch Holyoke hydrant removed from Summer street, 6 feet west from Vinal avenue.

Gates-Construction Account.

New gates have been set in the following locations:—

Abdell street, 6-inch gate, 8 feet 4 inches east from west line, on south line of Somerville avenue.

Bolton street, 2-inch gate, 3 feet out from waterpost located opposite Baxter school.

Boston avenue, 8-inch gate, 13 feet 4 inches out from east line, on north line of Morrison avenue.

Carr's lane, off Elmwood street, 6-inch gate, 117 feet south from south

line of Harrison street, on east line of Elmwood street.

Clifton street, 6-inch gate, 13 feet 4 inches out from east line, on south line of Morrison avenue.

Dresden circle, 4-inch gate, 10 feet out from north line of Cutter avenue,

and 132 feet west from west line of Cutter avenue; for blow-off. Evergreen square, 4-inch gate, 7 feet out from north line, on east line of Porter street.

Frederick avenue, 10-inch gate, 13 feet 4 inches out from south line, on east line of Highland road.

Giles place, 2-inch gate, 12 feet out from north line, and 11 feet west from east line of house No. 11; for blow-off.

Hillside circle, 4-inch gate, 5 feet out from north line, on west line of Craigie street.

Lowell street, 2-inch gate, 4 feet out from waterpost located opposite Crown street.

Morrison avenue, 6-inch gate, 14 feet out from north line, on east line of Morrison place.

North street, 12-inch gate, 13 feet 4 inches out from east line, on south line of Raymond avenue.

North street, 6-inch gate, 13 feet 4 inches out from east line, on north line of Raymond avenue.

North street, 4-inch gate, 16 feet out from east line, and 18 feet south from north line of Raymond avenue; for blow-off.

Ossipee road, 6-inch gate, 13 feet 4 inches out from north line, on west line of Packard avenue.

Ossipee road, 6-inch gate, 13 feet 4 inches out from north line, on east line of Curtis street.

Pearson avenue, 6-inch gate, 15 feet out from east line, on north line of Frederick avenue.

Pearson avenue, 6-inch gate, 15 feet out from east line, on south line of Frederick avenue.

Russell road, 8-inch gate, 13 feet 4 inches out from west line, on north line of Broadway.

Sanborn avenue, 4-inch gate, 12 feet 8 inches out from south line, on west line of Warren avenue.

Sawyer avenue, 12-inch gate, 13 feet 4 inches out from north line, on west line of Packard avenue.

Shawmut street, 2-inch gate, 3 feet out from waterpost located 74 feet north from Shawmut place.

Somerville avenue, 12-inch gate, 23 feet out from north line, on east line of Quincy street.

Gates - Renewal Account.

The following changes have been made in the size and location of main gates:—

Bartlett street, 2-inch gate, set 3 feet out from waterpost located 26 feet south from Broadway, and 2-inch gate removed from old waterpost location on Adams street, 57 feet south from Broadway.

Tremont street, 2-inch gate, set 3 feet out from waterpost located 120 feet south from Webster avenue, and 2-inch gate on old waterpost location in Webster avenue, 63 feet north from Tremont street, abandoned.

Summary of Statistics

FOR THE YEAR ENDING DECEMBER 31, 1904.

In form recommended by the New England Water Works Association.

SOMERVILLE WATER WORKS.

SOMERVILLE, MIDDLESEX COUNTY, MASS.

GENERAL STATISTICS.

Population by census of 1900, 61,643.

Date of construction: commenced in 1868.

By whom owned: City of Somerville.

Source of supply: Metropolitan water system.

Mode of supply: water is delivered into the city's mains, under both high and low pressures, by the Metropolitan Water Works.

STATISTICS OF CONSUMPTION OF WATER.

- Estimated total population at date, 71,000.
- Estimated population on lines of pipe, 71,000.

- Estimated population supplied, 71,000. Total consumption for the year, 2,279,637,000 gallons.
- Passed through meters, 416,097,066 gallons. Percentage of consumption metered, 18.25.
- Average daily consumption, 6.228,000 gallons.

Gallons per day to each inhabitant, 89.

STATISTICS RELATING TO DISTRIBUTION SYSTEM.

MAINS.

- Kind of pipe, cast-iron. Sizes, from 4-inch to 20-inch.
- Extended 5,826 feet during year. Total now in use, 89.53 miles.
- Cost of repairs per mile, \$2.53. Number of leaks per mile, .07.
- Number of hydrants added during year (public and private), 15.

 Number of hydrants (public and private) now in use, 1,033.

 Number of stop gates added during year, 24. 9.

Number of stop gates now in use, 1,343.

- Number of blow-offs, 135. 14.
- Range of pressure on mains, 35 pounds to 100 pounds.

SERVICES.

- 16. Kind of pipe: Lead; wrought iron—lead-lined; wrought iron cement-lined.
 - 17. Sizes, one-half to six inches.

Extended 7,606 feet. 18.

- 20. Total now in use, 70.7 miles.
- Number of service taps added during the year, 201.

Number now in use, 11,059. 22.

24. Average cost of service for the year, \$19.31.

25. Number of meters added, 624. 26.

- 27.
- Number now in use, 1,262.
 Percentage of services metered, 11.41.
 Percentage of receipts from metered water, 28.03.
 Number of motors and elevators added, 1. 28.

29.

30. Number now in use, 10.

Manual Force.

The manual force of the department consists of 117 members,—thirty-five permanent men, and eighty-two callmen, distributed as follows:—

				Per- manent.	Call.	Total.
Chief engineer				1		1
Two engine companies, each				5	9	28

One hook and ladder company				2	12	14
One hook and ladder company			•	2	13	15
						
Total force						117

Equipment.

The apparatus in service consists of three steam fire engines, one chemical engine, two combination chemical engines and hose wagons, six hose wagons, and two ladder trucks. In reserve, one steam fire engine, one ladder truck, and two hose reels, all in good condition. There has been ordered a ladder truck, to be equipped with chemical tanks and large hose for water service, to be located in the fire station at the corner of Broadway and New Cross street. During the year engine No. 2 was thoroughly repaired, and is now in first-class order. There are forty horses in the department.

The several buildings of the department are all in good condition. The administration of 1903 commenced the erection of

a fire station in Union square, to take the place of the old one erected in 1854. It was completed and occupied by hook and ladder company No. 1 and hose No. 3 in December, 1904. It has accommodations for a steam fire engine, a hose wagon, and a tower ladder truck necessary to handle fires in large buildings.

Less Noise in Giving an Alarm.

I have requested the commissioner of wires to reduce one-half the number of blows struck on fire alarm bells and whistles of the fire alarm system. Twenty-one signal boxes have already been changed so as to strike two rounds, instead of four, as formerly. It is desirable that all the signal boxes be so changed as soon as possible, that unnecessary noise may be avoided.

Underground Wires.

His honor, the mayor, has applied to the state legislature for the passage of an act requiring all wires except those of the street railway and long-distance telephone systems to be placed under ground. Such an act is now pending in the legislature, and favorable action is expected, so that the work of placing wires under ground may commence early in the spring. When accomplished, the streets will be much safer and more beautiful.

Pensions.

Few cities permit men to enter the service over a certain age, as it would be unjust to tax-payers to allow those past middle age to serve a few years and then be retired on a pension to which the short service they rendered would not entitle them. The purpose of the pension act is to provide for those of old age who have rendered many years of service in the department, with all its risks and responsibilities, and those who may have become incapacitated from earning a living by accident while in the performance of their duties as firemen.

In Memoriam.

ASSISTANT CHIEF NATHANIEL C. BARKER.

Born September 28, 1836; died March 7, 1904.

Assistant Chief Nathaniel C. Barker died at his residence in Ellsworth street March 7, 1904, of a complication of diseases which had confined him to his house for three months, at the age of sixty-eight years, during thirty-three of which he had been a member of the Somerville fire department, and twenty-seven years assistant chief. He was a good fireman, and a most exemplary citizen.

LIEUTENANT HORACE P. EWELL.

Born February 28, 1858; died May 1, 1904.

Lieutenant Horace P. Ewell, of hook and ladder company No. 1, died May 1, 1904, after a long illness, the result of falling through a floor while in the performance of his duty as a fireman in a burning building in 1902. He was born at Hanover, and was a carpenter by occupation. He was a member of the department nineteen years.

In General.

By an arrangement with Ernest W. Bailey, city engineer, the regular police officers have performed police duty on the public parks, but the expense has been paid from the appropria-

tion for public grounds.

This system has been tried for the first time during the summer season of the past year, and if the service is to be continued, I would suggest that the expense be provided for and paid from the police account, and that additional patrolmen be appointed upon the force, so that the regular police officers would be relieved from doing extra duty on the parks.

The laborers' strike at the American Tube Works, which lasted six months, caused considerable extra duty on the part of the police patrolmen, which was performed in a manner that re-

flects credit upon themselves and the department.

The only changes for the year were an increase of three patrolnien, the resignation of Sergeant Arthur E. Keating, and the death of Christopher C. Cavanagh, who was drawing a salary

as a retired police officer.

In conclusion, I wish to extend my sincere thanks to the Hon. Leonard B. Chandler, mayor, and to the board of aldermen for the kind treatment received at their hands in all police matters during the year. To the members of the department I extend thanks for their strenuous efforts to perform their duty and to earn the confidence and esteem of all good citizens.

Respectfully submitted,

MELVILLE C. PARKHURST,

Chief of Police.

REPORT OF SEALER OF WEIGHTS AND MEASURES.

Office of Sealer of Weights and Measures, City Hall Annex, Somerville, January 7, 1905.

To His Honor, the Mayor, and the Board of Aldermen:—

The following report of the sealer of weights and measures for the year ending December 31, 1904, is respectfully submitted.

Section 21, chapter 62, of the Revised Laws provides that sealers of weights and measures shall annually give public notice, by advertisement or by posting in one or more public places in their respective cities and towns, notices to all inhabitants or persons having usual places of business therein who use weights, measures, or balances for the purpose of selling goods, wares, merchandise, or other commodities, or for public weighing, to bring in their weights, measures, and balances to be adjusted and sealed; such sealers shall attend in one or more convenient places, and shall adjust, seal, and record all weights, measures, and balances so brought in.

Section 34 of the same chapter provides that each sealer of weights and measures, including the county treasurer, shall receive a fee of one dollar for sealing each platform balance if 5,000 pounds or more, and fifty cents if weighing less than that amount, and three cents each for sealing all other weights, measures, scales, beams, or balances; he shall also have a reasonable compensation for all necessary repairs, alterations, and adjustments

made by him.

When weights, measures, and balances are sealed, as provided in Section 21 (that is, brought to the office), no fee is charged for sealing.

In compliance with the foregoing Section 21, the customary notice was given by advertising in the Somerville Journal in

March.

During the year the sealer visited all places in the city where goods were bought or sold, and tested and sealed all scales, weights, and measures which were found correct, and condemned all found beyond repair and useless. One hundred and fifty-seven scales, weights, and measures were adjusted before sealing, nine scales were tagged for repairs, four of which were repaired as ordered, and the remaining five put out of use.

Work done in the office during the year 1904 was as follows:—

Number of scales sealed	· · · · · · · · · · · · · · · · · · ·	. 231 . 252 . 586 . 80,447 . 3,530 . 47

John H. Dusseault, Sealer of Weights and Measures.

REPORT OF THE CITY SOLICITOR.

Somerville, January 15, 1905.

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

The following is my report as city solicitor for the year 1904:—

The most important work in my department has been, as usual, that connected with legislation affecting the city as a part

of the metropolitan district.

Under chapter 98 of the resolves of the legislature, a special committee investigated the advisability of the purchase by the metropolitan sewerage district of certain local sewers. At hearings before the committee, I appeared in opposition to such purchase, which, if made, would cause great expense to the city.

By chapter 426 of the acts of the legislature, a change was made in the method of apportioning the expenses of the metropolitan water district, whereby the share of each municipality, except Boston, was made to depend in part upon consumption. This change, according to tables prepared by the commissioners, is the least expensive to Somerville of all the changes proposed.

By chapter 445 of the acts of the legislature, the metropolitan park commission was authorized to build a dam across the Mystic river, at or near Cradock bridge, in Medford, and the state board of health was directed to report a method and plans for purifying Mystic river. Alewife brook, and the adjacent water courses, ponds, and drainage areas. This act was intended to supplement chapter 327 of the acts of 1903, under which Cambridge, Somerville, Arlington, and Belmont were authorized to make improvements in Alewife brook and its tributaries. The necessity of providing for the improvement of Mystic river and Alewife brook as a part of a general plan of improvement makes the problem a difficult one, not likely to be solved without delay and perhaps further legislation.

The city charter was amended by chapter 354 of the acts of the legislature, upon its acceptance by the voters, which provides that the mayor and the president of the board of aldermen shall

be ex-officiis members of the school committee.

Cases in court have been disposed of as follows:—

A suit for \$5,000, brought by a laborer on account of injuries received from the caving in of the side of a trench in Medford street while he was at work for the water department, was tried before a jury in the superior court, and a verdict was given in his favor for \$520, being several hundred dollars less than the sum for which a settlement could have been made.

A suit for \$5,000, brought on account of injuries claimed to have been received by the plaintiff while driving in a wagon

on Thurston street, where a trench had recently been dug by the water department, was tried before a jury in the superior court, and resulted in a disagreement. The claim was afterward settled for \$850.

A suit for \$10,000, brought in the superior court for injuries claimed to have been received by reason of a defective

sewer, was settled for \$300.

A suit brought by the city in the superior court on a drainlayer's bond, to recover \$325 paid on a judgment in a former action, was tried before a jury, and a verdict given in favor of the defendant. On motion by the city, the court set the verdict aside, and the case will be tried again.

A suit in the superior court for \$1,000, brought under chapter 210 of the acts of 1891, was disposed of without expense to

the city.

A suit in the superior court for damages on account of a change of grade in Middlesex avenue was settled for \$150, and that sum was repaid the city under an agreement previously made with the metropolitan park commission.

Two suits in the superior court for damages on account of a change of grade in Sycamore street were settled for \$48.40

and \$153.29, respectively.

A suit in equity brought by the city to recover the expense of the support of a person in the Massachusetts hospital for dipsomaniacs and inebriates was tried in the superior court, and a decision was given against the city. A petition for a change of the law will probably be presented to the legislature in consequence of the decision in this case.

Two petitions for the construction of a bridge at Lowell street, over the Boston & Maine railroad tracks, were filed in

December with the county commissioners.

A petition has been filed with the board of gas and electric light commissioners relating to the price of electricity furnished in the public buildings.

Very respectfully,
Frank W. Kaan,
City Solicitor.

REPORT OF THE CITY CLERK.

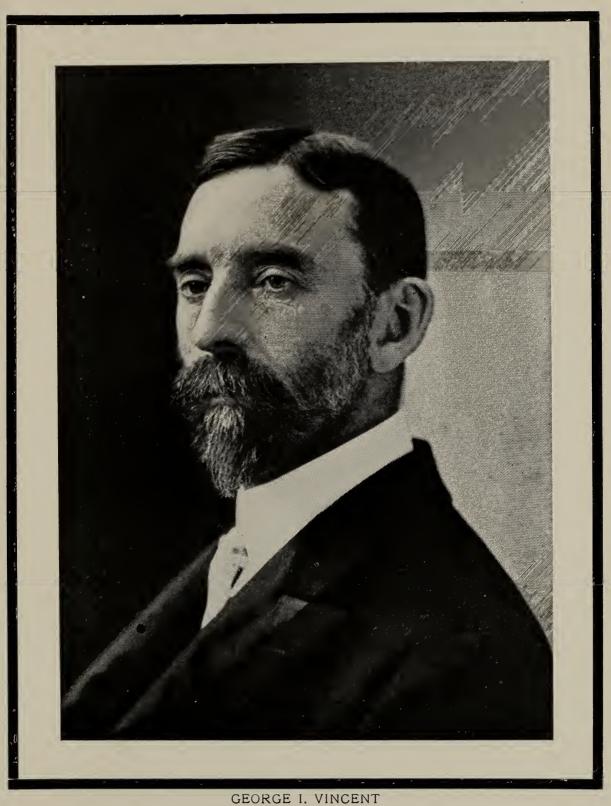

Office of the City Clerk, January 26, 1905.

To the Honorable, the Mayor, and the Board of Aldermen:— Gentlemen,—The following is respectfully submitted as the thirty-third annual report of the city clerk of the city of Somerville, and is for the year ending December 31, 1904.

The receipts and payments were as follows:-

Railway, Gas and Pole Locations.

Permission has been granted the West End Street Railway Company to lay double tracks in Summer street, from Bow street to School street, and to operate the same by means of the overhead single trolley electric system of motive power.

The Cambridge Gas Light Company and the Charlestown Gas and Electric Company have been granted permission to lay

gas mains in sundry streets.

Permission has also been given the New England Telephone and Telegraph Company of Massachusetts and the Edison Electric Illuminating Company of Boston to erect poles for the support of wires in various streets; the company last named having succeeded to the business of the Somerville Electric Light Company.

In every case of such permission to use the streets, a suitable agreement for the protection of the interests of the city must be filed with the city clerk before the order can become operative.

The number of still-births recorded during the year was sixty-three.

In addition to the above, 106 deaths which occurred elsewhere were recorded in Somerville, almost the entire number of persons deceased having been residents of this city.

The number voting at the state and city elections will be found in the foregoing tables of the men's and women's voting lists.

Liquor License Question.

The statement of the votes during the several years of its submission to the people on the question of granting licenses for the sale of intoxicating liquors in this city is continued in this report.

The power of the board of aldermen to grant licenses of the sixth and seventh classes is not affected by the vote on this question. In fact, the law provides that the board shall annually grant one or more licenses of the sixth class. These two classes are defined as follows:—

Sixth Class,—Licenses to retail druggists and apothecaries to sell liquors of any kind for medicinal, mechanical, or chemical purposes only, and to such persons only as may certify in writing for what use

they want them.

Seventh Class,—Licenses to dealers in paints or in chemicals to sell

alcohol for mechanical, manufacturing, or chemical purposes only.

The following is a statement of the votes on the question, the number of registered voters, and the estimated population in the several years:—

YEAR.	YES.	No.	BLANK.	REGISTERED VOTERS.	ESTIMATED POPULATION.

^{*} Census.

Joint Caucuses of Primaries.

The operation of the primary elections act, which was accepted by the voters at the state election held last year, has caused a large addition to the work and the expense of this de-Briefly stated, the effect of the act is to make the Boston caucus law applicable in all cities accepting the act, and to have the caucuses of all political parties held at the same time and place, and conducted the same as an election. worked as smoothly as could be expected the first year. ballots for the state primaries were of necessity somewhat complicated, and the large number of names on the ballots made the work of the election officers quite arduous; consequently, the returns from some of the wards came in late. At the city primaries the ballots were much simpler, additional facilities were provided for issuing ballots, and the work was conducted in such a manner as to leave nothing to be desired. With the benefit of this year's experience, I am satisfied that, so far as the convenience of the voters is concerned, the law can be so administered as to give general satisfaction.

Some minor changes in the law are desirable, and a committee of the Massachusetts City Clerks' Association has petitioned the legislature for amendments which have been embodied in a bill.

The cost to this department on account of the primaries, covering the pay of the primary officers, printing, advertising, stationery and other supplies, care and repair of ballot boxes, and carriage hire, was about \$2,250, and the cost to the department of the commissioner of public buildings, covering hall rentals and fitting up of polling places, was \$231.43; making the total cost about \$2,500.

Semi=Centennial and Prospect-hill Park.

During the past year the materials have been collected in this department for statements of the observance of the semicentennial of Somerville, which took place in the year 1892, and of the acquiring, laying out, construction, and dedication of Prospect-hill park. The former event was a citizens' demonstration, and an account thereof was to have been prepared by a subcommittee of the citizens' committee, but nothing having been published, it seemed advisable that the matter receive attention at the hands of the city authorities. An order has recently been adopted by the board of aldermen for the publication of these statements, which will be done as soon as the work of the office will permit.

George I. Vincent.

City Clerk.

ORDINANCES.

Somerville, March 7, 1905.

The following ordinances have been adopted since the printing of the annual reports for the year 1903.

Frederic W. Cook, City Clerk.

No. 47.

An Ordinance Concerning Explosives on Street Railway Tracks.

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. No person shall drop, place, or throw, or cause to be dropped, placed, or thrown, any explosive substance on any street railway track in any street of this city.

Section 2. Any person violating any provision of this ordinance shall be liable to a penalty of not more than twenty dollars for each offense.

Section 3. This ordinance shall take effect upon its passage.

Approved June 24, 1904.

No. 48.

An Ordinance to Amend Chapter Twenty of the Revised Ordinances of 1900, Entitled "Construction of Buildings."

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. Section one of chapter twenty of the Revised Ordinances of 1900 is hereby amended by striking out all after the words, "being complied with," so that the section shall read as follows: Section 1. The commissioner of public buildings, in his capacity as inspector of buildings, shall examine all buildings in course of erection, alteration, or repair, to ascertain if the requirements of the law and ordinances are

being complied with.

Section 2. Section five of the said chapter twenty is hereby amended by inserting after the words, "land on which it is to be placed," the words: and shall file, with such notice, plans and specifications of the building, satisfactory to said inspector; and the said section five is hereby further amended by striking out, after the said words, "land on which it is to be placed," the entire sentence beginning with the words, "Plans of every building," and ending with the words, "shall be retained by him," so that the said section as amended shall read as follows: Section 5. Every person intending to erect, alter, or add to a building shall, at least seven days before beginning work thereon, give a written notice of his intention to the inspector of buildings, stating the dimensions and materials of the proposed structure, the exact purpose for which it is intended to be used, the precise location, and the name of the owner of the land on which it is to be placed, and shall file, with such notice, plans and specifications of the buildings, satisfactory to said inspector. No building shall be erected nor shall the construction of any building be

commenced, and no work, except necessary repairs, shall be done upon any wall, structure, or building without a permit from the inspector of buildings. No permit shall be granted for the erection of a building for the storage, keeping, manufacture, or refining of crude petroleum or any of its products, unless the board of aldermen has granted a license therefor, prescribing the place where such building shall be erected, and the particular location, materials, and construction thereof, with such regulations as to the height of chimneys, dimensions of buildings, and protection against fire, as it shall deem necessary for the safety of the neighborhood. A full set of the plans and specifications of every public building hereafter erected by the city, and of every alteration in a public building, provided any plans and specifications are made of such alteration, shall be deposited in the office of the inspector of buildings.

Section 3. Section twelve of said chapter twenty is hereby amended by inserting, at the beginning thereof, the following: All masonry, whether in foundation, external or party walls, chimneys, flues, or other construction, shall be laid in a manner satisfactory to the inspector of buildings; so that the said section as amended shall read as follows: Section 12. All masonry, whether in foundation, external or party walls, chimneys, flues, or other construction, shall be laid in a manner satisfactory to the inspector of buildings. No round or bowlder stone shall be used in the construction of any foundation wall or foundation.

Section 4. Section twenty-four of said chapter twenty is hereby amended by striking out all after the words, "dividing partitions," and inserting instead thereof the following: of some suitable non-combustible material, satisfactory to the inspector of buildings; so that the said section as amended shall read as follows: Section 24. All buildings heretofore constructed, which shall be hereafter changed or altered for two families to reside on the same floor, shall have dividing partitions of some suitable non-combustible material, satisfactory to the inspector of buildings.

Approved July 1, 1904.

No. 49.

An Ordinance to Amend Chapter 15 of the Revised Ordinances of 1900, Entitled "Highways."

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. Chapter 15 of the Revised Ordinances of 1900 is hereby amended by adding thereto the following: Section 45. Whenever a street, or any part thereof, is to be re-surfaced, or a new street constructed, the street commissioner shall, at least two weeks before such work is begun, notify the head of the sewer department, the head of the water department, the gas light company, the electric light company, the street railway company, and any other person having rights under the surface of such street. The notice shall state where such work is to be done, when it is intended to begin such work, and shall request said departments, corporations, and persons to consult and arrange with the street commissioner if they have any work to be done in such street, in order that such work may be done before the surface of said street is again prepared for and opened to public travel. After such notice has been given, said departments, corporations, or persons shall not be permitted to open said street for a period of at least one year after the street has been constructed, or again opened to public travel; except in a case of actual necessity certified to and approved by the mayor.

Section 2. This ordinance shall take effect upon its passage.

Approved November 14, 1904.

No. 50.

An Ordinance Relating to the Transportation of Explosives and Gunpowder.

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:-

Section 1. No explosive or gunpowder shall be transported through any portion of a street unless notice has first been given in writing to the chief of the police department, stating the proposed route, the time of transportation, and the gunpowder or explosive intended to be transported, nor unless his approval in writing has first been obtained.

Section 2. No explosive or gunpowder shall be transported through any portion of a street unless packed in the manner previously approved in writing by the chief of the police department, nor unless each package is marked plainly on at least three sides with the name of the contents and the words "Explosive" and "Dangerous."

Section 3. No vehicle shall be used for the transportation of any

explosive or gunpowder through any portion of a street except a vehicle previously approved in writing by the chief of the police department, and bearing on the outside of both sides, in letters at least four inches high, the words "Explosive" and "Dangerous."

Section 4. No person shall allow a vehicle containing any explosive or gunpowder to be left without some one in charge, or to move faster

than at the rate of four miles an hour.

Section 5. The powers and duties given the chief of the police department by this ordinance may be exercised and performed by any member of the department designated by him in writing for that purpose.

Section 6. The word "Gunpowder" as used in this ordinance shall

be understood to mean gunpowder exceeding in quantity twenty-five

pounds.

Section 7. The word "Explosive" as used in this ordinance shall be understood to include gun cotton, nitroglycerine, or any compound thereof, and any fulminate or any substance intended to be used by exploding or igniting the same to produce a force to propel missiles or to rend apart substances, except gunpowder.

Section 8. Whoever violates any provision of this ordinance relating to any explosive shall be liable to a penalty of not more than fifty

dollars for each offense.

Section 9. Whoever violates any provision of this ordinance relating to gunpowder shall be liable to a penalty of not more than twenty dollars for each offense.

Section 10. Section 5 of chapter 33 of the Revised Ordinances of

1900 is hereby repealed.

Section 11. This ordinance shall take effect upon its passage.

Approved December 23, 1904.

No. 51.

An Ordinance to Prohibit Stealing Rides on Cars and Other Vehicles.

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. No person shall in any street ride upon the step or other portion of a street railway car or other vehicle, without legal right or the permission of the person in charge thereof.

Section 2. Any person violating any provision of this ordinance shall be liable to a penalty of not more than twenty dollars for each

offense.

Section 3. This ordinance shall take effect upon its passage.

Approved December 23, 1904.

JURY LIST OF THE CITY OF SOMERVILLE.

Prepared by the Registrars of Voters, under Chapter 176 of the Revised Laws, February 2, 1905.

Posted February 11, 1905, and accepted by the Board of Aldermen February 23, 1905.
