DESCRIPTIVE CATALOGUE

OF

FRUIT TREES,

GRAPE VINES,

Strawberry Plants, Etc.

CULTIVATED AND FOR SALE BY

WILLOW LAKE NURSERY,

MARSHALLVILLE, GA.

SAMUEL H. RUMPH, Proprietor.

PREFACE.

IN presenting to our customers and the public this edition of our **Descriptive Catalogue of Fruits**, we sincerely thank you for the liberal patronage that you have bestowed upon us in the past, and earnestly solicit a continuance of the same in the future.

Being a member of the "American Pomological" and the "Georgia State Horticultural" Societies, and also very largely interested in Fruit-growing for market, and having a great many choice varieties, we are now enabled to offer to the Southern Fruit-grower our stock of select varieties, such as we think cannot fail to give general satisfaction.

We do not claim to offer better Trees than can be grown elsewhere, but in growing them our object is to produce first-class stock, and such varieties as are adapted to the Southern climate.

Our terms and prices will be found as reasonable as those of any other first-class Nursery in the South, and we hope by receiving a liberal patronage from our friends to greatly further the interest of Fruit-growing. Orders should be sent in early, so as to secure the best varieties; besides, it is preferable to transplant as soon after the first killing frost as practicable, as the roots of the tree grow all during the winter months, thereby insuring greater success.

Trees will be securely packed and delivered at the Railroad Depot, in Marshallville, Georgia, free of charge, purchasers incurring all risk after such delivery.

Write your orders upon a separate list, giving plain and particular directions for marking and shipping. State whether you wish them shipped by Express or Freight.

TERMS—Cash with order, or C. O. D. by Express. Remittances may be made either by Express, Check on New York, or Macon, Ga., payable to our order, or small amounts can be sent by Registered Letter or Post-office Order.

SAMUEL H. RUMPH,

Marshallville, Georgia.

HINTS FOR TRANSPLANTING.

THE great requisite to success in this is the preparation of the soil and the pruning of the trees before planting. The ground should be thoroughly broken up by deep ploughing, and the holes dug from two to three feet wide and one and a half to two feet deep. A few shovels full of stable manure, top soil and wood ashes, well composted and thoroughly mixed with the earth in filling the holes, adds greatly to the vigor of the tree.

Care must be taken in cutting off all the broken roots from the tree with a smooth upward cut, then place it in the hole the depth that it grew in the Nursery, spreading out the roots to their natural position, and fill in the earth to a level with the surface, pressing it firmly around the roots of the tree with the foot. When this is done, the tree should be drawn up several inches, so as to give the roots a downward tendency. A sufficient quantity of earth must be thrown around the tree to allow for settling, and to prevent the water from collecting and souring around the roots of the tree.

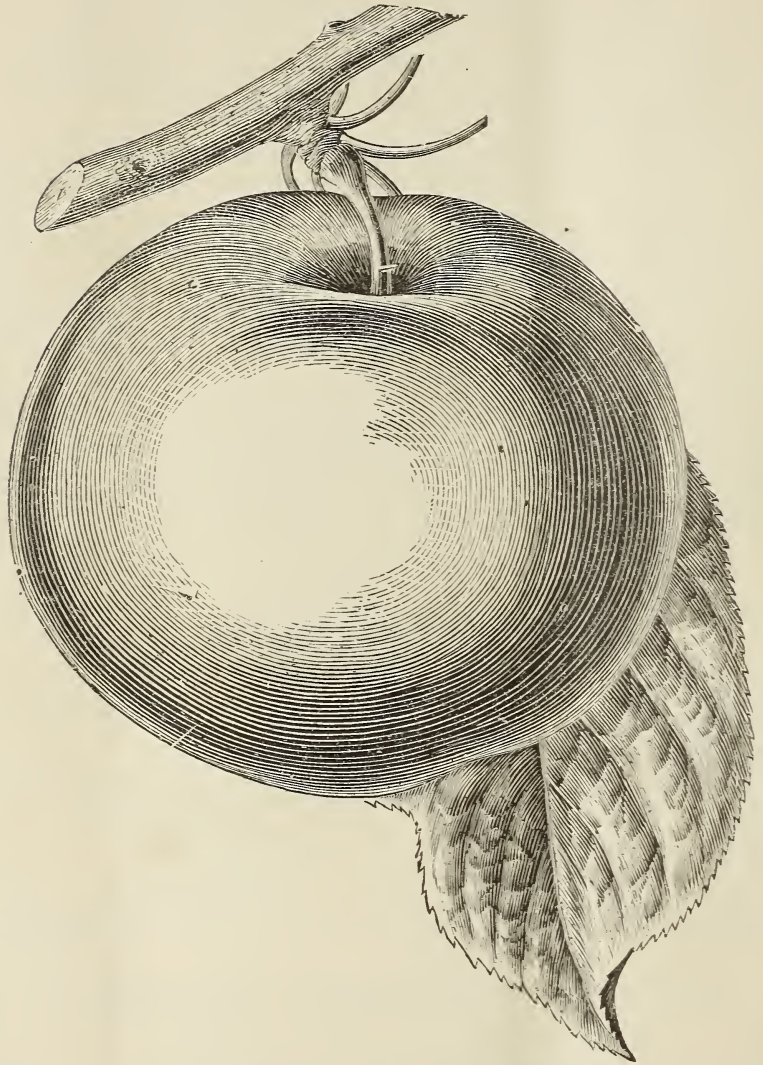

Shorten in the branches in proportion to the loss of roots caused by digging for removal. All branches, from a one-year-old Apple or Peach tree, should be taken, leaving a single stem about two feet high. Trees planted at this age succeed best, as they can be removed from the Nursery with less damage to the roots.

DISTANCES FOR PLANTING.

Apples	20 to 30 feet apart each way.
Pears, standard	15 to 20 " " " "
Pears, dwarf	10 to 15 " " " "
Peach	15 to 20 " " " "
Plums	15 to 20 " " " "
Quinces	15 to 20 " " " "
Figs	20 to 25 " " " "
Grapes	8 to 10 " " " "
Scuppernongs.	20 to 30 " " " "
Mulberries	25 to 30 " " " "
Strawberry Plants, for Garden culture	1½ x 2½ feet.
Strawberry Plants, for Field culture	1½ x 3 "

8 x 8	680				

ASTRACHAN RED APPLE.

APPLES.

The most reliable and extensively cultivated of all fruit. It produces abundant crops every alternate year, and by thinning the fruit the year of heavy bearing, a fair crop may be expected yearly. It succeeds well in most any soil, but flourishes best in a sandy loam, with clay sub-soil. Lime or wood ashes should be applied around the roots of apple trees where the land is deficient of these constituents.

All winter varieties mature here in October and November, and require delicate handling when gathered. To keep well they should be pulled from the trees with the hand and placed in a cool cellar, free from frost, and very little or no light, as those exposed to light will shrivel.

PRICES OF APPLE TREES.

Standard Trees, two and three years old, 5 to 7 feet	15 cts. each.
	\$1.50 per dozen, \$10.00 per 100, \$50.00 per 1,000.
Standard Trees, one year old, 4 to 6 feet	15 cts. each.
	\$1.50 per dozen, \$10.00 per 100, \$50.00 per 1,000.

SELECT LIST—SUMMER VARIETIES.

- ✓ **ASTRACHAN RED**—Large yellow, nearly covered with crimson, flesh tender, juicy, acid and pleasant; tree a splendid grower. This is the best very early apple, and we have had ripe specimens as early as May 15th. They sell higher in market than any other early variety.
- ✓ **EARLY HARVEST**—Above medium size, skin bright yellow; flesh juicy, crisp and well flavored; ripe June 10th to 20.
- ✓ **RED JUNE**—Medium, conical, skin dark red; flesh white, tender and pleasant; ripe June 15th to July 15th.
- ✓ **SIMMONS' RED**—Medium, roundish, oblate, skin red with stripes of darker red; flesh yellow, very juicy, aromatic, and of fine flavor; tree a thrifty, compact grower, bears young and profusely. This is one of the very best cider apples; ripe June 25th, and continues for three months, which makes it very desirable. (New.)
- ✓ **CAROLINA WATSON**—Medium, oblate, skin greenish yellow, with dull red stripes; flesh sweet, tender, and aromatic; ripe July 1st.
- ✓ **SWEET BOUGH**—Large, skin pale yellow; flesh tender and sweet; ripe July 1st.
- ✓ **FAMILY**—Medium, oblate, skin brown; striped with red; flesh white, tender and juicy; ripe July 15th.

✓ HORSE—Large, roundish, skin yellow, slightly tinged with red in the sun; flesh yellow, acid and tender; ripe July 20th.

AUTUMN VARIETIES.

✓ ELGIN PIPPIN—Large, oblate, skin bright yellow; flesh rich, sub-acid and very good; ripe August 25th.

✓ TAUNTON—Large, roundish, conical, skin yellow with red cheek; flesh yellow, crisp and of good flavor; ripe September 1st.

✓ CARTER'S BLUE—Large, roundish, oblate, skin greenish, washed and striped with dull red and covered with a blue bloom; flesh yellow, crisp, rich, aromatic, very good: ripe September 15th.

✓ EQUINETELEE—Very large, oblate, skin bright yellow, with red cheek and stripes of darker red; flesh rich, sub-acid and juicy; ripe September 25th.

✓ TUSCALOOSA SEEDLING—Medium, oblate, skin yellow with red cheek; flesh juicy, crisp and of pleasant flavor; ripe September 25th.

✓ BUNCOMBE—Large, oblong, skin yellow, shaded with red; flesh juicy, crisp and red; ripe September 25th.

✓ MAMMA—Large, oblate, skin crimson red; flesh yellowish, rich and aromatic; ripe October 1st.

WINTER VARIETIES.

✓ MANGUM—Medium, oblate, skin yellow, shaped and striped with red; flesh yellow, very tender, crisp and juicy, rich and aromatic; tree very prolific, luxuriant and a compact grower; ripe October 1st and keeps until March.

✓ MAVERICK'S SWEET—Large, roundish, oblate, skin yellow and mostly covered with red, dotted with gray; flesh, yellowish, crisp, tender and sweet; ripe in October.

✓ MOULTREE'S WINTER—Large, flat, skin greenish, striped with red; flesh juicy, crisp and sub-acid; ripe October to January.

✓ OCONEE GREENING—Large, oblate, skin greenish yellow and slightly dotted with brown; flesh yellowish, crisp, aromatic and good; ripe October to February.

✓ HOCKETT'S SWEET—Medium, roundish, oblate, skin yellow, shaded and striped with red; flesh, juicy, crisp and sweet; ripe October to February.

✓ SHOCKLEY—Medium, conical, skin yellow, overspread with bright crimson; flesh crisp, juicy, sweet and slightly vinous; tree very rapid and compact grower and early bearer, often bearing fruit the second year after transplanting; the most desirable winter variety for the South, where it not only bears regular and abundant crops, but keeps until June; a very profitable market variety; ripe October to June.

✓ ROMANITE—Medium, roundish, conical, skin yellowish white and mostly covered with red; flesh yellow, juicy and pleasantly acid, very similar to the above variety; ripe October and keeps well.

SHOCKLEY APPLE.

- CANNON PEARMAIN—Medium, roundish, skin yellow, striped with red and gray dots; flesh yellow, firm, sub-acid and rich; ripe October to February.
- CHATAHOOCHEE GREENING—Medium, flat or oblate, skin yellowish, with a faint blush of brown in the sun; flesh yellow, tender, crisp, sub-acid and pleasant; ripe November to January.
- CULLASAGA—Medium, roundish, skin yellow, highly covered with red; flesh crisp, mild and good; ripe November to January.
- HOLLY—Medium, flat or oblate, skin crimson; flesh yellowish white, juicy, mild sub-acid and very good; ripe November to February.
- HORN—Medium, roundish, skin deep red; flesh juicy, aromatic and good; ripe November to February.
- JUNALASKEE—Medium, roundish, oblate, skin greenish yellow; flesh yellow, juicy, rich and sub-acid; ripe November to February.
- KITTAGESKEE—Medium, roundish, skin yellow, speckled and tinged with brown; flesh yellow, crisp, spicy and slightly acid; ripe November to February.
- NICKAJACK—Very large, roundish, skin striped and shaded with dull red; flesh yellow, tender, sub-acid and very good; ripe October to January.
- PRIOR'S RED—Large, globular, skin yellowish red, streaked with deep red; flesh yellow, with a delightful flavor; ripe November to March.
- STEVENSON'S WINTER—Medium, roundish, oblate, skin greenish yellow, shaded and striped with red; flesh yellow, juicy, firm, sweet, aromatic and very pleasant; one of our best flavored and keeping Winter apples; bears very young and profusely; ripe November to June.
- YATES—Small, oblate, skin greenish yellow, shaded and striped with red, with many light dots; flesh white, tender, juicy and good; ripe November to March.
- BEN DAVIS—Large, roundish, conical, skin yellow with red cheek; flesh sub-acid and pleasant; ripe November to March.
- HILEY'S EUREKA—Medium, roundish, oblate, skin yellow, shaded and striped with dull red; flesh very firm, crisp and acid; a chance seedling found in the woods on place of Mr. Jacob Hiley, Macon county, Ga.; ripe November 15th; keeps until May. (New.)

ASTRACHAN RED,	SIMMONS' RED,	EQUINETEELEE,	STEVENSON'S WINTER,
EARLY HARVEST,	HORSE,	MANGUM,	YATES,
RED JUNE,	CARTER'S BLUE,	SHOCKLEY,	BEN DAVIS.

EARLY ALEXANDER PEACH.

PEACHES.

This fruit adapts itself to almost any soil, but does best in a sandy loam with red clay sub-soil, on land well drained, naturally or artificially. In selecting a site for an orchard a greater preference is shown to an elevated situation, as the fruit is less liable to be killed by Spring frosts, but where one is compelled to plant in a valley or low lands, it is advisable to select late blooming varieties. Take it in its fresh, ripe state, and there is no fruit that so delights the eye or palate, and it not only appeals to the appetite but is highly conducive to health. It is also excellent for culinary purposes, either canned or evaporated. As to its market value none exceed it.

PRICE ON TREES.

Sing'e Trees, 15 cts.

Per Dozen, \$1.50.
Per Thousand, \$50.00.

Per Hundred, \$10.00.

SELECT LIST—FREESTONES.

✓ EARLY ALEXANDER—Medium to large, skin dark red where exposed to the sun; flesh greenish white, juicy and sweet; very profitable, early variety for shipping; ripe May 15th to June 1st.

EARLY AMSDEN—Very similar to Alexander in every respect, and generally considered the same by those who have grown them.

DOWNING—Claimed by a great many of those who have fruited in Georgia to be a few days earlier than the "Early Alexander."

EARLY BEATRICE—Small, skin mottled, deepening in color on the sun side: a new variety originated by Thos. Rivers, of England; ripe May 20th to June 6th.

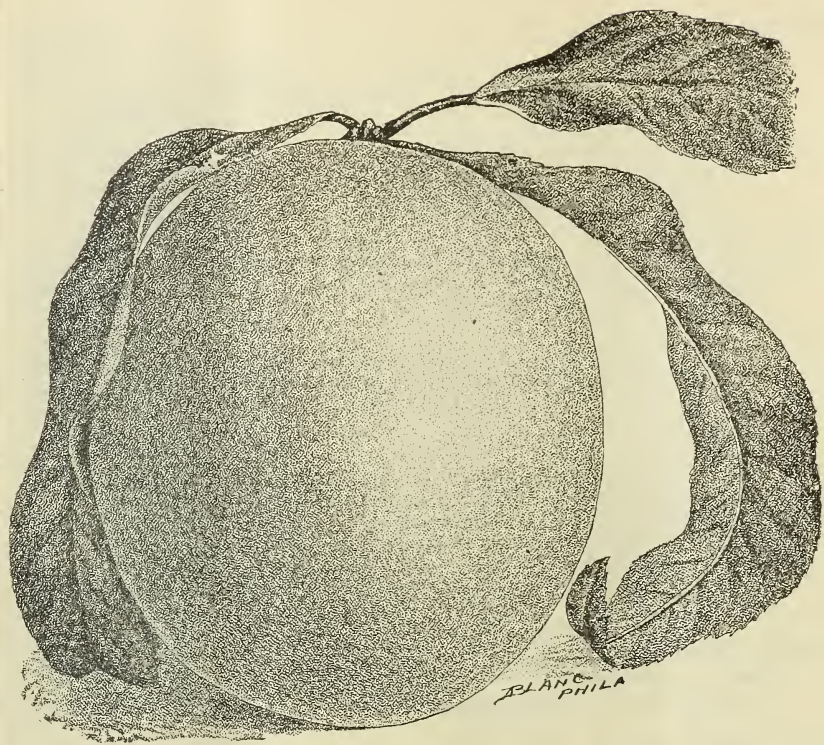

BRIGG'S MAY—Medium, deep red; flesh white, rich, juicy and well flavored; highly recommended as a market variety, and ripens May 25th to June 5th.

EARLY LOUISE—Medium, skin greenish, covered with light red in the sun; flesh very tender and juicy; ripe June 1st to 15th.

EARLY RIVERS—Very large, skin greenish white, with a very delicate pink cheek; flesh rich, melting, juicy and good; skin very thin and easily bruised; one of the finest peaches we have for home use; ripe June 5th to 15th.

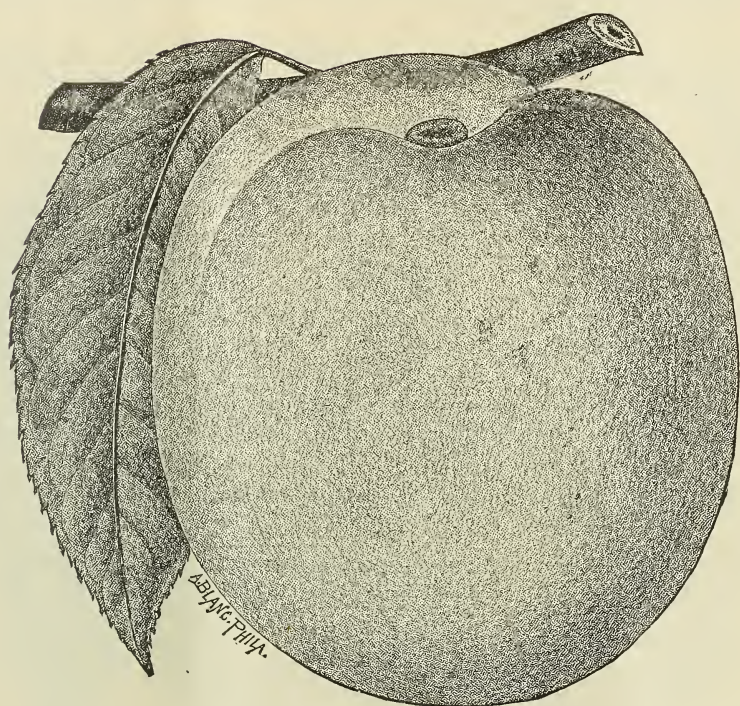

HALE'S EARLY—Fruit medium to large, skin greenish white, nearly covered with dark red; flesh white, melting, juicy and good; ripe June 5th to 25th.

EARLY TILLOTSON—Medium, skin yellowish white and nearly covered with red, darkening on the sunny side; it is a good market variety; ripe June 15th to July 1st.

BELLE PEACH.

- MOUNTAIN ROSE—Medium, skin white, clouded with red; flesh juicy, vinous; very good; ripe June 25th.
- FLEITAS OR YELLOW ST. JOHN—Large, skin yellow, with dark red cheek; flesh yellow, juicy, vinous, very good; ripe June 25th.
- AMELIA—Very large, roundish, oblong, skin white shaded with crimson; flesh white, juicy, rich and sweet; ripe July 1st to 10th.
- BELLE—Very large, skin white with red cheek; flesh white, firm and of excellent flavor; the fruit uniformly large and showy; tree a rapid grower and very prolific. A seedling of Chinese Cling, originated by Mr. Lewis A. Rumph, Marshallville, Ga. Ripe July 1st to 15th. (New.)
- THURBER—A seedling of Chinese Cling, which it resembles in size and color, but more delicate and highly flavored; originated by Mr. P. J. Berckmans, Augusta, Ga.; ripe July 5th to 15th.
- CHINESE FREE—Large, oblong, skin white, with red cheek; flesh red, firm and well flavored; free from rot, which makes it a very desirable market variety; ripe July 5th to 15th.
- CRAWFORD'S EARLY—Large, oblong, skin yellow with red cheek; flesh yellow, melting, sweet and rich; ripe July 5th to 15th. This is one of the very best Summer varieties for shipping to the Northern markets.
- ELBERTA—Very large, skin golden yellow where exposed to the sun, faintly striped with red; flesh yellow, very fine grain, juicy, rich, sweet and splendidly flavored; tree very prolific and presents a handsome appearance, and a more luxuriant growth than the "Chinese Cling," from which it is a seedling. It is a perfect freestone, and one of the most successful market varieties, selling uniformly at higher prices than any other Peach; ripens July 10th to 20th.
- CRAWFORD'S LATE—Much larger than "Crawford's Early," though it resembles it in shape, color and quality, and ripens about ten or fifteen days later; one of the leading market varieties.
- COLUMBIA—Large, skin rough and thick, dull, dingy red; flesh bright yellow, rich, juicy and well flavored; ripe July 10th to 20th.
- GREAT EASTERN—Very large, skin greenish white, dashed with red; flesh white, juicy and a little coarse; ripe July 15th to 20th.
- STUMP THE WORLD—Very large, roundish, skin creamy white with red cheek; flesh white, juicy and good; ripe July 20th to 25th.
- OLD MIXON FREE—Large, inclining to oval, skin yellowish white; flesh white, juicy, rich and vinous; ripe July 20th to 25th.
- SUSQUEHANNA—Very large, roundish, skin deep yellow, with bright red cheek; flesh yellow, rich, vinous and sweet; fine market variety; ripe July 25th.

CHINESE FREE PEACH.

PICQUET'S LATE—Very large, skin yellow, with red cheek on the sunny side; flesh yellow, rich, melting and of fine flavor; ripe August 20th to September 10th.

OSCEOLA—Medium to large, skin golden yellow and deepening in color on the sunny side; flesh yellow, streaked with red, very juicy, rich, sweet and highly flavored; ripe September 1st.

FRUITLAND SEEDLING—Very late, oblate, skin greenish white, with pale red cheek; flesh juicy, vinous, slightly reddening at the stone; ripe September 5th to 15th.

BALDWIN'S LATE—Medium, roundish, oblong, skin greenish white, with a pale red cheek; flesh firm juicy, melting and well flavored; ripe October 5th to 25th.

JULIA—Medium, skin white, washed in pale red; flesh white, juicy and vinous; ripe October 20th to November 10th.

CLINGSTONES.

GENERAL TAYLOR—Medium, skin white, tinged with red; flesh white, juicy and sweet; ripe July 1st.

DUFF YELLOW—Very large, roundish, skin yellow, mostly covered with very dark red; flesh yellow, firm, juicy and of fine flavor; ripe July 5th to 15th.

GENERAL LEE—Very large, skin creamy white, shaded with red; flesh juicy, of high flavor; good market variety; ripe July 5th to 15th.

FLEWELLEN—Large, globular, skin yellow, downy, with streaks of red; flesh yellowish white, red near the stone, very juicy and sweet ripe July 15th to 25th.

CHINESE CLING—Very large, globular, skin creamy white and shaded with red; flesh white, red at the stone, rich, vinous, very juicy and melting; an excellent variety; ripe July 20th.

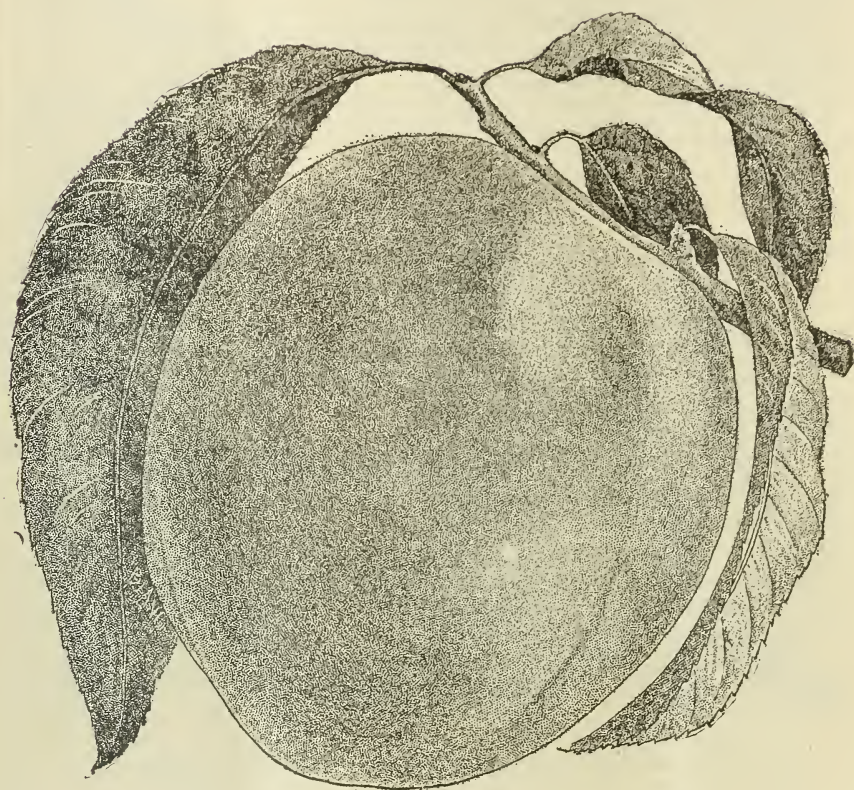

GEORGIA CLING—Medium, oval, skin white, almost covered with red; flesh white, red at stone, juicy, sweet, well flavored; ripe July 20th.

OLD MIXON CLING—Large, roundish to oval, skin yellowish white, with pale red cheek in the shade, and deepening to dark red in the sun; flesh very juicy and melting; ripe July 25th.

INDIAN BLOOD—Large, skin dark claret, downy, with deep red veins; flesh very juicy, vinous and refreshing; ripe August 1st to 15th.

LEMON CLING—Very large, oblong, having a swollen point similar to a lemon, skin yellow with red cheek; flesh yellow, firm, juicy and sweet; ripe August 1st to 15th.

HEATH'S RED—Large, oblong, skin white, almost covered with red; flesh white, juicy, vinous, good flavor; ripe August 15th to 25th.

ELBERTA PEACH.

HEATH'S LATE WHITE OR WHITE ENGLISH—Large, oblong, narrowing to both ends and point swollen, skin creamy white, with a pale tinge of red in the sun; flesh greenish white, juicy and rich; one of the most popular varieties for canning, preserves, etc.; ripe August 25th to September 10th.

EATON'S GOLDEN—Very large, round, skin golden yellow; flesh yellow, very sweet, juicy and rich; one of the best fall varieties of clingstone; ripe September 15th to 25th.

GOODE'S OCTOBER—Large, skin light claret, with red veins; flesh white, streaked with red, very juicy, acid and refreshing; ripe September 25th to October 15th.

BUSTION'S OCTOBER—Very large, oblong, skin creamy white, shaded with pale red in the sun; very similar to "White English" in size, color and flavor, but ripens about three or four weeks later, October 1st to 15th.

AUSTIN'S LATE RED—Large, oblong, skin white, almost entirely covered with red; flesh white, juicy, acid and good; ripe October 1st to 15th.

TINSLEY'S OCTOBER—Medium, oval, skin white, slightly dashed with red; flesh white, juicy, sweet, good flavor; ripe October 10th to 20th.

CRAWFORD'S LATE PEACH.

LECONTE PEAR.

Fruit large, skin greenish yellow, flesh white and melting, quality medium, excellent for evaporating and canning. It is noted for its productiveness, rapid growth, and almost freedom from blight. This fruit is being planted largely in the Southern States for market. Ripens July 10th to August 10th.

Price of Trees, 20 cts. each, \$2.00 per dozen, \$10.00 per 100, \$75.00 per 1,000.

✓ KEIFFER PEAR.

Seedling of Chinese Sand Pear; supposed to have been crossed with Bartlett; fruit large, skin yellow, with red cheek; flesh firm and well flavored, excellent for cooking, tree vigorous grower, and claimed to be entirely free from blight; ripe September 1st to October 1st.

Price of Trees, 20 cts. each, \$2.00 per dozen, \$10.00 per 100, \$75.00 per 1,000.

PEARS.

Within the last few years the cultivation of this fruit has been very considerably increased, and would succeed finely here if we could avoid the devastating influence of the blight. We give a list of varieties most valuable to this State.

PRICE OF TREES.

Standard, two years old . . . 50c. each. | Dwarf, two years old . . . 40c. each.
Standard, one year old . . . 30c. each. | Dwarf, one year old . . . 25c. each.

- ✓ BEURRE GIFFARD—Fruit medium size, skin greenish yellow; flesh melting, juicy, vinous, very good; ripe June 15th.
- DOYENNE D'ETE—Small, roundish, skin yellow; flesh white, juicy, with pleasant flavor; ripe June 15th to 25th.
- BARTLETT—Very large, skin smooth, clear yellow; flesh white, buttery, juicy and of exceedingly fine flavor; one of the best and most popular varieties in cultivation; ripe July 10th to August 1st.
- BELLE LUCRATIVE—Fruit large; flesh melting and delicious; a fine grower; ripe July to August.
- ✓ CLAPP'S FAVORITE—Large, skin pale yellow, delicately splashed with crimson in the sun; flesh fine grained, melting, rich, vinous and sweet; ripe in August.
- HOWELL—Medium, skin yellow, with shaded cheek; flesh melting, vinous and juicy; ripe in August.
- SECKLE—Small, skin yellowish brown, with red cheek; flesh very juicy, melting, rich, spicy and delicious: ripe in August.
- BEURRE SUPERFINE—Large, skin shaded with red when exposed to the sun; flesh very juicy, melting, sub-acid flavor; ripe in August.
- St. MICHAEL ARCHANGEL—Large; flesh melting and very good; ripe in August.
- DUCHESS D'ANGOULEME—Very large, skin dull greenish yellow, streaked with russet; flesh white, buttery, juicy; ripe in September.
- BEURRE DIEL—Very large, skin pale greenish yellow, rather thick; flesh yellowish white, rich, half melting, very good; ripe in September.
- BEURRE D'ANGO—Large, skin yellow, with light russet spots; flesh white, buttery, melting, rich and juicy; ripe in September.
- LAWRENCE—Very large, skin yellow, with small brown dots; flesh whitish, juicy, melting and good; ripe in October.

DELAWARE GRAPE.

NATIVE GRAPES.

LIST OF SELECT VARIETIES.

Price, unless otherwise noted, 20 cts. each, \$2.00 per dozen,
\$10.00 per 100, \$50.00 per 1,000.

HARTFORD PROLIFIC—Bunches large and rather compact; berries large, globular, skin thick black, covered with bloom; flesh sweet and moderately juicy; ripe June 25th.

IVES—Bunches above medium, compact, berries large, skin thick, and black; flesh pulpy, sweet, little too harsh for table use; ripe June 25th. Price \$20.00 per 1,000.

MARTHA—Bunches medium, rather close, berries large, skin greenish yellow with bloom; flesh juicy and sweet; ripe July 10th.

CONCORD—Bunches large, compact, berries large, almost black, with much blue bloom; skin rather thick; flesh juicy and sweet; a very popular market variety; ripe July 15th. Price \$20.00 per 1,000.

DELAWARE—Bunches medium, compact, berries small, skin thin, pale delicate red; flesh juicy, vinous and sweet; this is one of the very finest table grapes raised; ripe July 15th.

NIAGARA—Bunches large and compact, berries large, skin greenish yellow with bloom; flesh juicy and sweet, a vigorous grower and very prolific. One of the best white grapes for this section; ripe July 15th.

CATAWBA—Bunches medium, berries large, skin pale red with bloom; flesh juicy with a pleasant musky flavor; ripe July 15th.

WARREN—Bunches large, compact; berries small, skin black with blue bloom; flesh juicy, sweet, aromatic, vinous, rich; ripe August 15th.

NORTON'S VIRGINIA—Bunches medium, compact, berries small, skin black, rather thin; flesh vinous, sweet, juicy, and is very much praised as a wine grape; ripe September 1st.

MUSCADINE TYPE.

THOMAS—Berries large, skin transparent, violet color, sweet, vinous, pulp tender; superior in quality to any other type; ripe August 15th.

SCUPPERNONG—Bunches small, seldom more than eight or ten berries, very large and round, skin thick, of bronze color when fully ripe; flesh pulpy, juicy, sweet, vinous and very refreshing; free from rot, very prolific, a rapid grower and splendid wine grape; ripe September 1st.

FLOWERS—Bunches medium, of from fifteen to twenty-five berries, skin dark black; flesh vinous and sweet; ripe October 10th.

PLUMS.

We offer for sale several varieties of the improved Chickasaw type, these varieties being less liable to the attacks of the curculio, which is the greatest enemy to the Plum.

WILD GOOSE PLUM.

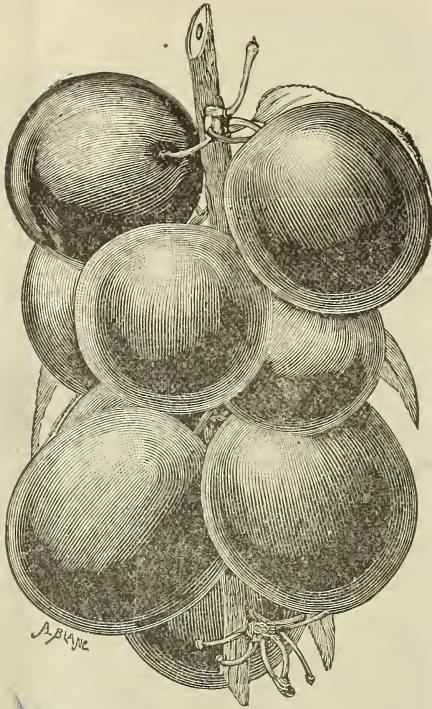

Very large, oblong, skin bright red; flesh firm, juicy and sweet; the most popular market variety, as the fruit is better if gathered before fully matured and put in house to ripen, giving time for transportation before attaining best condition; ripe June 10th to 20th.

Have an immense stock of trees in Nursery of this most profitable market fruit, both on Peach stocks and on their own roots. Those grown from cuttings are much more desirable for planting on poor hill-sides or old worn-out land where the Peach will not succeed unless heavily fertilized. Price on Peach stocks or grown from cuttings, 20 cents each, \$2.00 per dozen, \$12.00 per hundred, \$75.00 per thousand.

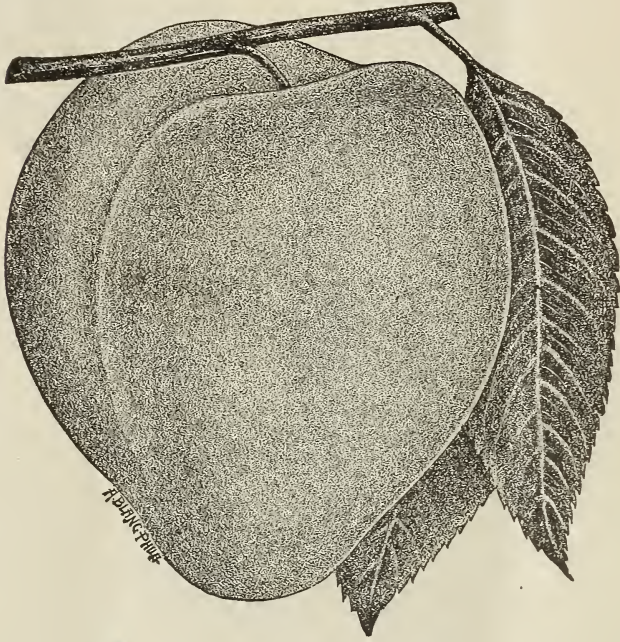

MARIANNA PLUM.

Large, round, skin crimson; flesh firm and well flavored; tree a very vigorous grower and prolific bearer. A desirable market variety; ripe June 1st to 10th. Price of Trees, 20 cts. each, \$2.00 per dozen, \$12.00 per hundred, \$75.00 per thousand.

ROBINSON PLUM.

Medium to small, skin bright red ; flesh yellow, juicy and sweet ; tree a very early and prolific bearer. It resembles the "Wild Goose" very much in color and shape, but is much smaller, and ripens about ten days later. Ripe June 20th to July 1st. Price of Trees, 20 cts. each, \$2.00 per dozen, \$12.00 per hundred, \$75.00 per thousand.

KELSEY'S JAPAN PLUM.

Fruit very large and attractive; quality good; tree a vigorous grower and early bearer; ripe August 1st to September 1st. Price of Trees, 20 cts. each, \$2.00 per dozen, \$12.00 per hundred, \$75.00 per thousand.

BOTAN PLUM—Fruit large, oblong, skin yellow, with red cheek; flesh yellow, firm and sweet; tree a very vigorous grower, early and prolific bearer. Promises to be one of the most profitable market plums for this section. Ripe June 15th to 25th. Price of Trees, 20 cts. each, \$2.00 per dozen, \$12.00 per hundred, \$75.00 per thousand.

MULBERRIES.

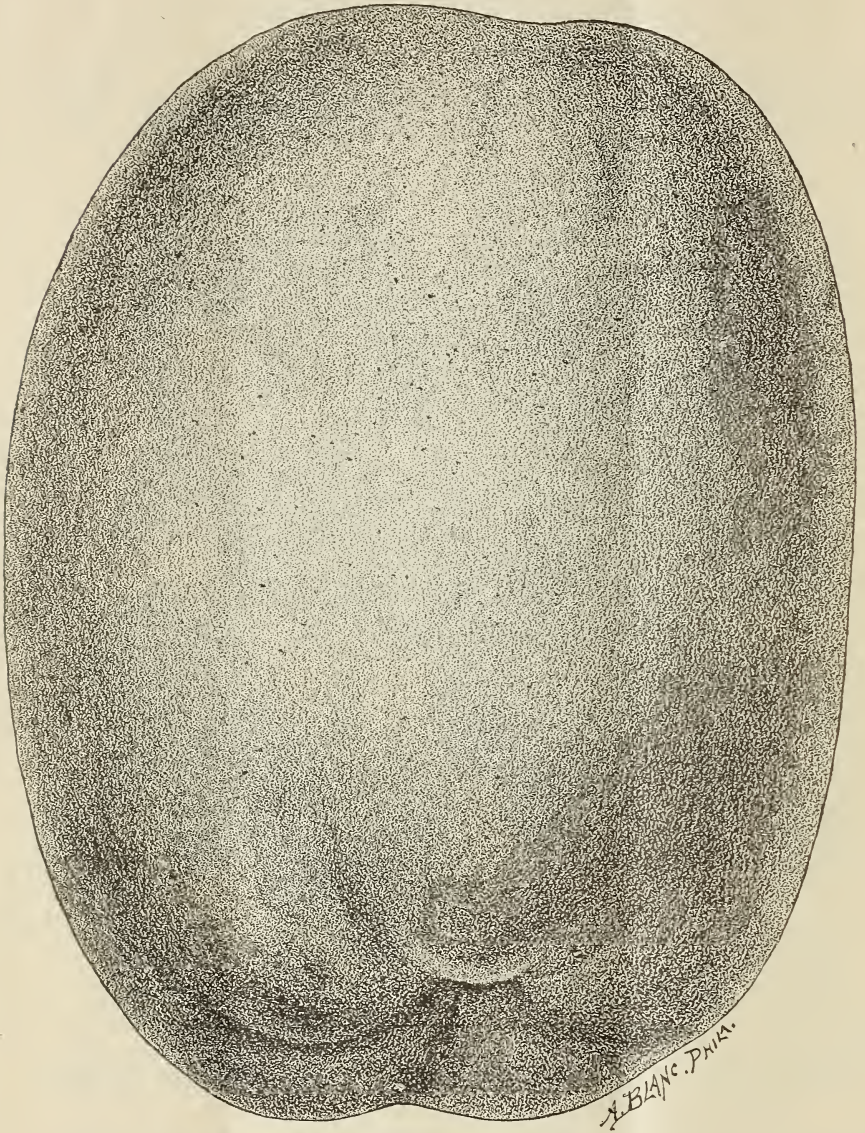

Price 25 cts. each, \$2.00 per dozen, \$15.00 per 100, \$100.00 per 1,000.

**HICK'S EVER-BEARING MULBERRY.**

DOWNING'S EVER-BEARING—Flesh rich, sub-acid; a good bearer and rapid grower; ripe May to July.

HICK'S EVER-BEARING—Flesh sweet, insipid, fine grower, bear large crops four months in the year; excellent variety for pigs and poultry.

WHITE—Medium; flesh insipid, a rapid grower and prolific bearer.

CHINESE QUINCE.

QUINCES.

ANGERS—Large, pear shaped ; flesh rather harsh ; a thrifty grower and very prolific bearer ; ripe in November. 25 cts. each.

APPLE OR ORANGE—Large, roundish, skin golden yellow ; flesh cooks quite tender ; an excellent variety ; ripe in November. 25 cts. each.

CHINESE—Very large, specimens often weighing three pounds, skin greenish yellow ; flesh tender when cooked ; much prized for baking, jellies, preserves, etc. Tree very rapid and compact grower, and often attains the height of twelve to fifteen feet at four to five years old, at which age it generally commences to bear. When grown on its own roots it has but few surface feeders, and does not seem to be affected by the most severe wind storms. So far, the most successful method of propagating it has been from seed, as it reproduces itself without the slightest variation. It does not sucker from roots like most other varieties, and up to the present has been entirely free from borers or other insects ; blooms very early in Spring, but the old bearing trees in this section have not failed to mature fruit a single year in the past ten ; ripe December 1st and keeps until March. Price of seedling trees, 25 cts. each, \$15.00 per 100, \$125.00 per 1,000.

FIGS.

Price 25 cts. each, \$2.00 per dozen, \$12.00 per 100, \$100.00 per 1,000.
