1907.

PART II.—PORT TRADE STATISTICS AND REPORTS.

Vol. III.—CENTRAL PORTS

(SHANGHAI TO WENCHOW).

Published by Order of the Inspector General of Customs.

SHANGHAI:

PUBLISHED AT THE STATISTICAL DEPARTMENT OF THE INSPECTORATE GENERAL OF CUSTOMS;

AND SOLD BY

KELLY & WALSH, LIMITED: SHANGHAI, HONGKONG, YOKOHAMA, AND SINGAPORE.

MAX NOESSLER: BREMEN, SHANGHAI, AND YOKOHAMA.

NEW YORK: G. E. STECHERT & CO., 129, WEST 20TH STREET.

PARIS: PAUL GEUTHNER, 68, RUE MAZARINE.

LONDON: P. S. KING & SON, 2 AND 4, GREAT SMITH STREET, WESTMINSTER, S.W.

[Price \$2.]

1908.

NOTE.

The HAIKWAN Tael, in which the Customs Revenue and all values are stated, is equivalent—

| | | |
|--------------------|----|--------------|
| in English money, | to | 3s. 3d., |
| " American | " | Gold \$0.79, |
| " French | " | Francs 4.09, |
| " German | " | Marks 3.33, |
| " Indian | " | Rupees 2.42, |
| " Japanese | " | Yen 1.58, |
| " Mexican dollars, | " | \$1.51, |

at the average Sight Exchange on London, New York, Paris, Berlin, Calcutta, Japan, and Hongkong respectively for 1907.

TABLE OF CHINESE WEIGHTS.

| | |

SHANGHAI TRADE REPORT

1. LOCAL.—The constant expansion of the port is again the most noticeable feature of the year. During no other period were so many important architectural works commenced or completed, or so many blocks of time-honoured buildings demolished to provide space for modern structures. A bold innovation in this connexion is the construction of enormous edifices entirely in reinforced concrete. Hitherto some sinking in the foundations has been almost always experienced upon this alluvial soil whenever very heavy buildings were concerned. Much interest will be taken in observing the inherent power of the fabric to resist the effect of such settling, especially laterally. The godown accommodation, which but a few years ago was insufficient to meet the increasing demands of trade, has been largely supplemented, and is now more than ample for existing requirements. The depreciation in wharf shares affords evidence of this; while, on the other hand, house and landed property generally show steadily improving values. The one exception is seen in the northern district. Although the Municipal Council has sought to develop all this neighbourhood beyond Settlement limits by new roads and the opening of a fine park and a public swimming bath, it still fails to attract. A new company, projected to provide modern foreign houses on a large scale near the park, did not prove sufficiently attractive to investors to be successfully floated. In all other directions the limits of the town are constantly extending and new roads being opened. Distances are now so great that motor-cars, which formerly were used chiefly by doctors, are now almost indispensable in several other professions, as well as being employed very freely by residents whose houses are outside the central district. The Municipal Council has a number in constant use, and native officials of high rank have on one or two occasions availed themselves of the facility for their ceremonial visits. More than 120 of these cars—some costing over \$10,000—are now in daily use, and a proof of the excellent prospects of this industry is found in the fact that even the largest firms accept the agency for well-known makers. At the autumn regatta the popularity of motors was recognised by the inclusion of an event for motor-boats. Experiments are now being conducted in Europe with a view to extracting a suitable motor fuel from peat, etc., and there should be a good opening for any manufacturer who could succeed in producing a reliable motor fuel from the native samshu. Engines can be readily adapted to burn almost any quality of fuel—gasolene, kerosene, or alcohol,—and it would certainly appear that local industries would benefit if a cheap, reliable, native-made substitute for gasolene could be found here. The enterprise of the native trader has long since won the respect of foreign merchants. An example of such enterprise is seen in the larger Shanghai stores, which are now provided with specimens of foreign inventions so recent that they almost constitute a small exhibition in themselves. It is, consequently, not astonishing that the idea is being entertained of holding an International Exhibition at Shanghai in the near future. Another feature of the times is the increasing linguistic proficiency of the Chinese. "Pidgin" English is falling into disuse; while the native acquires French, German, and English—spoken and written—with comparative ease, and in this acquirement suffers nothing by comparison with his Japanese rival. The foreign trader must, on his part, now do more in the same direction, and the Chinese language is, in consequence, being studied by Europeans to a much greater extent than formerly. Foreign merchants now

advertise their specialities, even including the most technical detail, in an illustrated Anglo-Chinese trade journal, the merchants' names and addresses being practically the only non-Chinese words in the issue. Increasing competition must also be reckoned a factor in the expansion of the port. Employés, nowadays, on the expiry of their agreement, frequently establish an independent business, and although these new firms are not invariably successful, and sometimes disappear for lack of capital, yet their existence seriously affects the profits previously enjoyed by the old-established hongs, which show a tendency to develop into commission agencies and to avoid risking their own capital alone. In many cases this has resulted in the transformation of an old-established firm into a limited liability company—sometimes privately, with capital not shown in the Shanghai Stock Exchange quotations, and at other times with shares quoted daily, and freely dealt in. As a rule the natives still refer to the company by the original hong name, so it is not certain how far Chinese constituents grasp the alteration in the constitution of the firm they have dealt with so long. Another effect of the increasing number of firms above referred to is found in the amount of cargo that is disposed of, immediately on arrival, in the numerous auction rooms. This method of sale goes far towards putting the trade on a cash basis and towards reducing the strain upon firms trading with small capital. Various enterprises have been started or considerably increased during the year. Among these may be mentioned the China Printing Company, which produces everything, from newspapers to the latest types of colour printing; the Eastern Fibre Company, formed to exploit a new method of treating ramie grass; and the Tabong Rubber and Tapioca Company. Shipbuilding and engineering works seem, on the whole, to be flourishing. A factor which may have restricted the amount of capital available for trade is the expansion of local undertakings—banks, waterworks, etc. Much ready money was necessarily absorbed in paying up the new issues of these stocks, money which would otherwise have been employed in individual business.

2°. REVENUE.—The revenue total must be considered satisfactory, ranking as it does as the third best on record. The decrease of over a million and a half taels under import duties was to have been anticipated; but the export duties are about normal, while the coast trade duties show an increase of HK. Rs. 60,000. Succeeding the record year 1906, with its special circumstances of war conditions and exceptional stocks, it could not be reasonably anticipated that the high level would be permanent. It was, in fact, generally acknowledged that the supplies were excessive and not likely to be easily disposed of. Under these circumstances most dismal prognostications were heard on all sides that the year would be ruinous generally. At first it seemed not unlikely that these forebodings would be realised, but the fluctuations in exchange enabled importers in some instances to reship their stocks to America, and thus avoid actual loss. This action also served as a salutary lesson to native buyers, i.e., that prolonged delay in purchasing cargo did not necessarily mean that the original importer would, in the end, be forced to accept any price offered.

3°. FOREIGN TRADE.—(a.) *Imports.*—The aggregate values of the foreign imports show a heavy decrease, of over 32 million taels, as compared with the record year 1906. Cotton piece goods alone account for 30 millions of this amount, while metals cover 2½ millions of the balance. Under this heading it may be recorded that a strongly worded proclamation, safeguarding trade marks, was issued by the Shanghai Taotai during the year. Although applying specifically to soap and cigarettes only, its issue proves that the matter is receiving due attention at the hands of the native authorities. Under flag distribution it will be observed that the British flag shows a decrease in the total value of foreign and coast trade of about 25 million taels; American, of about 14 millions; Danish, 1½ millions; German, over 4 millions; Norwegian, over 7 millions; Russian,

over 2 millions; while the Japanese flag has increased by about 16 millions and the French by about 4 millions, the latter practically entirely confined to the Yangtze and Ningpo trade. In former years the figures for kerosene oil would have been of great value for gauging the state of the trade, since Shanghai was the one distributing centre. Now, however, the conditions are changed, and the oil companies have all established tanks at various ports in North China and on the Yangtze, and forward shipments to them direct. Consequently, although the total volume of this trade has increased for North China, the Shanghai figures are no longer the channel where this increase can be followed. During the early part of the year the quotation for American Devoe oil was $\text{fls. } 1.75$ - $\text{fls. } 1.80$, and for Sumatra and Langkat bulk oil, $\text{fls. } 1.30$ - $\text{fls. } 1.40$, per 10 gallons; but towards the end of the year, when exchange fell, naturally the tael price of oil went up—for Devoe oil, to $\text{fls. } 2.25$ - $\text{fls. } 2.30$, and for bulk oil, to $\text{fls. } 1.75$. The native dealers were unsuccessful in the early part of the year, but the rise in values enabled them to recoup their losses, and upon the whole the result left them with a fair profit. One feature in this connexion is the startling rise in Langkat shares, which now stand at over $\text{fls. } 400$, as against $\text{fls. } 230$ in 1906. Refined sugar from Hongkong was at very cheap prices, but the quantity was sufficient to overshadow the sales of other qualities—Japanese and German,—and the result of the year's trade was quite satisfactory to those concerned. Business in Java sugar was normal, and calls for no special remark. The total shows a decrease in value of $\text{fls. } 70,000$ as compared with the total in 1906. The violent fluctuations in exchange, the Newchwang failures, and the American panic, all reacted to make importers cautious and refrain from hazardous undertakings.

(b.) *Exports* and (c.) *Re-exports*.—It is satisfactory to note that the staples tea and silk again show considerable improvement. Green teas, of which the better kinds are known as country teas, are reported to have been excellent in quality. The American market was good from the beginning. Hysons for other markets have also done well, and the country teamen have had a remunerative season. Supplies of green teas for the American and English markets average over 10 per cent. more than in the preceding year. The market in black teas is only useful to dispose of small quantities unsold at Hankow. Prices for common teas have ruled very high, owing to the prices commanded by Ceylon and Indian leaf. A large business has been done for the London market in common tea dust, at prices little below those obtained for leaf, giving excellent results to natives. A feature of the year's business is that there has not been low grade tea enough, either in black or greens, to meet the demand caused, as noted above, by the market for Ceylons and Indias. The silk trade was satisfactory to native sellers, but calls for no special remark. The export of cotton shows an increase of about 120,000 piculs. The crop was barely normal in quantity and quality, and prices were maintained at a high level throughout the year, from $\text{fls. } 17$ per picul in October to $\text{fls. } 18.60$ in December. The bulk of the export goes to Japan, and it is significant that the Japanese shippers should have adopted testing regulations during the past season with a view to mitigating the losses caused by watered cotton, which has been a cause of frequent complaint. The success, however, of these regulations still remains to be proved. The report from the local cotton mills is that the period under review has been the worst the mills have experienced since they commenced operations in 1897. All worked "short time," more or less, to reduce stocks or to keep them as low as possible; which, again, increased the working costs, owing to smaller production. Notwithstanding this report from the mills, our export figures show very considerable increases of cotton sheetings (55,000 pieces) and cotton yarn (over 100,000 piculs).

4°. COAST TRADE.—The trade with Newchwang again shows a heavy decrease. The aggregate value of imports has increased there by about $\text{Hk. fls. } 200,000$, mainly due to

beancake and beans; but the export trade has fallen off by over 5½ million taels, on account of the decline in shipments of nankeens (value about 3 million taels), rice, Shanghai flour mill products, silk piece goods, etc.

5°. INLAND TRANSIT.—(a.) *Inwards* shows a small increase as compared with the trade during 1906, and the figures are the highest on record.

(b.) *Outwards*.—The railway to Chinkiang was completed during the year. Most of the outward transit cocoons came by this route, and a total increase of about *Hk.Tls.* 25,000 has to be recorded. Practically the whole supply of cocoons arrives in June and July. The Hangchow railway line has also been commenced during the year. No statistics are available for railway-borne freight.

6°. SHIPPING.—The year 1907 cannot be considered to have been a good one for steamer companies, and it is open to question whether any of the vessels on the river or coast have done more than pay running expenses and a very moderate rate of interest on their cost. Although there was a certain amount of cargo moving all the time—923,000 applications were passed, as compared with 965,000 in 1906,—yet the rates were low and unremunerative. On several occasions charters were in the market, but the prices quoted by charterers were so reduced that little business resulted. It will be observed that the tonnage employed under the Japanese flag has increased by over 700,000 tons, nearly covering the decrease under other important flags, viz.: British, 200,000 tons; Norwegian, nearly 250,000 tons; German, 100,000 tons; and American, 200,000 tons. French tonnage also shows an increase of about 400,000 tons, due to the river and coast lines. Chinese tonnage remains about the same.

7°. PASSENGER TRAFFIC.—Passenger traffic still continues to increase. Many of the passengers who formerly used the Soochow-Hangchow launch routes now travel by rail. For the convenience of mail passengers more especially, Customs pontoons have now been moored off the Bund, enabling baggage to be passed with the minimum of delay.

8°. TREASURE.—The recorded movements of gold for 1907 show a net import of over *Hk.Tls.* 3,870,000, while the net import of silver was about *Hk.Tls.* 8,750,000. Copper coins—cash and cents—were imported from native ports for over *Hk.Tls.* 480,000. The fluctuations between the values of these various mediums of exchange were exceedingly severe, and traders had constant cause to regret the want of a single standard, which would have enabled them in many cases to avoid the heavy losses which were sustained by natives and foreigners alike. Gold exchange, which stood at *Hk.Tls.* 1 = 3s. 1 $\frac{1}{2}$ d. in January, continued fairly steady until October, when it fell suddenly from 3s. 0 $\frac{1}{2}$ d. to 2s. 8 $\frac{1}{2}$ d. Contrary to general anticipation, it has proved that a low exchange is more favourable to trade than a high one.

9°. OPIUM.—(a.) *Foreign*.—The total importation of foreign opium remains almost the same as in 1906, and calls for no special remark. It is much to be feared that the use of morphia is becoming increasingly general. So-called "nerve tonics," compounded freely with morphia, are being daily exported by several drug stores here. A considerable number of cases of smuggling have been detected; but owing to the similarity in the appearance of morphia to that of many other medicines—even excluding quinine and drugs imported in bottles,—it would appear almost impossible to absolutely stamp out this very undesirable traffic.

(b.) *Native*.—The figures show the third highest total on record, inferior to the exceptional quantities of the previous year by only 2,655 piculs. A comparative table, showing all the importations since 1903, is appended.

IMPORT OF NATIVE OPIUM.

| | QUANTITY. | VALUE. |
|----------------|-----------|-----------|
| | Piculs. | Hk. Ts. |
| 1903 | 5,073 | 2,207,276 |
| 1904 | 10,285 | 4,678,291 |
| 1905 | 13,981 | 5,233,239 |
| 1906 | 13,068 | 6,068,355 |
| 1907 | 10,413 | 4,396,437 |

10°. MISCELLANEOUS.—Notes from the Engineer-in-Chief, the Coast Inspector, the Harbour Master, the Health Officer, and a Special Report upon Conservancy are attached.

H. ELGAR HOBSON,

Commissioner of Customs.

SHANGHAI, 28th February 1908.

APPENDIX No. 1.

WORKS CARRIED OUT BY THE ENGINEERS DEPARTMENT DURING 1907.

Tongting Lighthouse.—This station was entirely finished in March, and the light exhibited for the first time on the 23rd February.

Government Magazine for Explosives.—The buildings were completed in April, and as it was found impossible to land explosives from the creek, a timber jetty has had to be erected. A heavy concrete bunding along the creek was also erected.

Godown for Lights and Cruisers Stores.—This building was erected in the Pootung Yard at a cost of Sh. £1s. 3,277.

South-west Horn Lighthouse.—The buildings were completed in July and the working party withdrawn; but the light was not exhibited till December, owing to the late arrival of the optical apparatus, clockwork, etc., from home. A temporary light was shown from the start of the works till the exhibition of the permanent one.

Button Rock Lighthouse.—A small building containing coal store and kitchen was erected.

Gutzlaff Lighthouse.—A lookout tower with quarters for signalmen was built, and at the same time certain repairs and additions were made to existing buildings.

Woo-sung Lighthouse.—The old burner used in this light was done away with and a Chance's incandescent petroleum one substituted, the power of the light being thereby increased about nine times.

Kiutoan Lightship.—The light here was also changed to incandescent gas, with a very marked improvement.

Bonham Lighthouse.—The machine was brought in to Shanghai and completely overhauled and the spare machine substituted.

Buoys.—All the gas buoys were ballasted. A 40-feet long mild steel spar buoy with a bronze bell was made for the Yangtze Cape, but it was lost after being a little over four weeks on its station. Many repairs have been made.

Sinkers.—Four 1-ton concrete sinkers were made for stock, also one 3-ton cast iron one of special design.

Gasworks.—The retort bench was renewed. 108,270 cubic feet of gas were made during the year.

Custom House.—Exhaust fans were fitted in the General Office and a new boiler erected for the heating installation as the old one was worn out and unsafe.

Commissioner's House.—Extensive repairs were carried out, including the covering of all the roofs with galvanized corrugated iron. Wiring was done for electric fans, and the bunding at the creek was renewed.

Passenger Pontoons.—These pontoons were erected by the Municipal Council, the plans and general arrangement being approved by the Customs.

Customs Properties.—Plans were prepared of all the property leased or owned by the Customs.

Repairs.—The usual repairs to buildings in the Pootung Yard and at light-stations have been executed, and the machinery, burners, etc., have been kept up to their proper standard of efficiency.

DAVID C. DICK,

Acting Engineer-in-Chief.

SHANGHAI, 13th April 1908.

APPENDIX No. 2.

COAST INSPECTOR'S NOTES.

During the year a survey of the North Channel entrance to the Yangtze has been completed as well as minor surveys of the Langshan Crossing and parts of the South Channel.

The apprehension mentioned in the trade report for 1906 that great changes were impending in the South Channel has been allayed by the narrowing of the Tungsha Chatine.

In the North Channel the Liuchiao Lighthouse has been discontinued, and this channel is now marked entirely by floating aids to navigation, *i.e.*, by a gas light-boat and five gas-lighted buoys.

Tongting Light and South-west Horn Light (Rugged Islands) were exhibited for the first time during the year.

W. FERD. TYLER,

Coast Inspector.

SHANGHAI, 11th March 1908.

APPENDIX No. 3.

**SUMMARY OF PRINCIPAL EVENTS CONNECTED WITH THE WORKING OF THE
HARBOUR DEPARTMENT DURING 1907.**

Buoys, Wharves, and Jetties.—In July the laying down of the moorings and buoy for the ninth and last berth in the head and stern moorings in the Lower Reach was completed for the use of the Austrian Lloyd's Steamship Company's steamers. The wharf for the Mitsui Bussan Kaisha on the Pootung side of the 11th Section of the harbour, immediately below the Yangking Creek, has been completed. Permission for the erection of a wharf for the use of the Ocean Steamship Company's steamers immediately above the Yangking Creek on the Pootung side of the 10th Section of the harbour, for a wharf for the Yih Cheng Company on the Pootung side of Upper Section "C," and another for the Hanyang Iron and Steel Works on the Pootung side of Upper Section "B," has been granted. The bunding of the above-mentioned properties has been commenced, on the completion of which the erection of the wharves will be proceeded with. In September permission was granted to the Shanghai-Nanking Railway to erect a wharf 450 feet in length outside their present jetty at Woosung, but so far no work in this direction has been commenced. In December two covered-in pontoons, for the special use of passengers, were placed off the Bund, opposite the Russo-Chinese Bank, and will shortly come into use.

Bridges over the Soochow Creek.—The wooden Garden and Chekiang Road Bridges over the Soochow Creek have been replaced by steel structures, which were completed in December, and the old wooden bridges, and the coffer-dams, piling, and scaffolding erected to assist the construction of the new bridges, are now being removed, and the bridges should be open for use within a few weeks.

Removal of Opium Hulls.—The opium hulk *Wellington*, the last of the four which were moored off the Bund, was removed during January.

Amendment of Shanghai Harbour Regulations.—The harbour regulations for the port of Shanghai were amended in May, the principal alterations bearing on the discharge, loading, and storage of naphtha, benzine, mineral oil, and similar dangerous cargoes. At the same time the limits of the harbour were extended to the Kiangnan Arsenal Wharf and to the Tungkow Creek.

Steam-launches.—During the year 49 new inland waters steam navigation certificates were issued, against 75 during 1906, and on the 31st December there were 335 steam and motor launches on the register, against 314 at the end of 1906. Many of the vessels on the register are small steamers running to Tsungming, the Chusan Islands, etc., and some steps should be taken to ensure that none but capable men be permitted to take charge of their navigation and of their engine-rooms. When these vessels come forward for registration, the lowdah and engineer are examined as to their fitness by the Harbour Master and by the Customs Surveyor; but there is nothing to prevent the vessel's owners from sending along a man for examination and then appointing another, perhaps wholly incapable, to take charge of the vessel. To guard against this, it is necessary that some proper system of examination be commenced and certificates bearing the photograph of the holder issued.

Malukiao Dynamite Magazine.—The new dynamite magazine at Malukiao was completed in July, and the first lot of dynamite for storage was received in October.

Pilotage.—The pilotage service has worked satisfactorily and smoothly during the year.

River Police.—The River Police work during the year has been very satisfactory. The following is a summary of the cases coming under the notice of the police:—

| | | | |
|--|-----|--|---------|
| Breach of harbour regulations by native craft, dealt with by Harbour Master with the approval of the Commissioner of Customs . | | Receivers of stolen property charged | 16 |
| Assault | 220 | Fires attended by River Police | 6 |
| Larceny | 43 | Natives rescued from drowning by River Police | 10 |
| Reported cases of larceny from ships, wharves, etc. | 122 | " " " mandarin life-boat | 30 |
| Collisions between or accidents to native craft | 60 | Miscellaneous cases not included in above | 319 |
| " " native and foreign craft, etc. | 44 | Total number of cases coming under the notice of the River Police | 1,047 |
| Dead bodies picked up by River Police: | 69 | | |
| Natives | 145 | Deaths due to accidents afloat | 22 |
| Foreigners | 14 | Boats sunk | 18 |
| Pieces of timber picked up adrift in river | 92 | Persons charged at Consular Courts | 14 |
| Boats picked up adrift and returned to owners | 30 | Cases taken to Mixed Court | 37 |
| Attempted suicide | 6 | " Poontung Magistrate | 124 |
| Seizures of salt by River Police | 33 | Value of property reported lost or stolen | \$7,272 |
| Boats confiscated and broken up | 10 | Value of property recovered by River Police, not including stolen or lost boats or cargo recovered and returned direct to owners | \$2,410 |
| " " sold | 6 | | |
| Ships disinfected by River Police | 4 | | |

Garbage.—The system of disposing of garbage and sewage from the Settlements is still far from satisfactory, and large quantities find their way into the river and Soochow Creek.

Ashes.—The collection of ashes from steam-launches trading on inland waters, which was commenced in March 1906, is proceeding satisfactorily.

Sampans.—There are now 1,400 licensed sampans plying on the river. During the year some 50 sampans were seized and obliged to be repaired and painted before they were again permitted to ply for hire, whilst seven were broken up as unfit for further use.

Fire-float.—The machinery for the new fire-float was ordered in January 1907 and arrived in November from Messrs. Merryweather & Sons, and work was at once commenced in fitting same into the hull, which had already been contracted for and built by the New Engineering and Shipbuilding Works. Hose, branch-pipes, and other necessary gear were ordered in May and arrived in November. The fire-float should be ready for use about the end of January 1908.

Working of the Department.—The dwelling-house, signal stations, and steam-launch at Woosung, and the signal tower, River Police hulk, and steam-launches at Shanghai, are all in first-class order and condition.

W. A. CARLSON,
Harbour Master,

APPENDIX No. 4.

REPORT ON THE WORKING OF THE SANITARY STATION DURING 1907.

The station was in operation throughout the year; during this period 436 vessels were inspected and 74,359 persons were examined.

TABLE I.—Number of Vessels inspected and Persons examined by the Port Health Officer, from Infected Ports last visited.

| PORTS. | VESSELS. | CREW. | PASSENGERS. | | TOTAL. |
|-------------------------|----------|--------|-------------|---------|--------|
| | | | Foreign. | Native. | |
| Formosa..... | 16 | 1,721 | 1,337 | 693 | 3,751 |
| Manila..... | 13 | 4,302 | 1,044 | 1 | 5,347 |
| Kobe..... | 103 | 11,039 | 2,561 | 3,811 | 17,411 |
| Hongkong..... | 226 | 22,907 | 3,998 | 9,940 | 36,845 |
| Amoy..... | 27 | 1,994 | 71 | 1,021 | 3,086 |
| Foochow..... | 30 | 2,299 | 65 | 2,025 | 4,389 |
| Non-infected ports..... | 21 | 2,122 | 388 | 1,020 | 3,530 |
| TOTAL..... | 436 | 46,384 | 9,464 | 18,511 | 74,359 |

The 21 vessels from non-infected ports were presented for inspection either in error (10) or as having had infectious disease (six), suspicious deaths (four), or suspicious illness (one) on board within 10 days. 18 vessels bound direct for the Yangtze ports were inspected. 25 vessels were specially inspected out of hours. Of the 436 vessels inspected, one was placed in quarantine.

TABLE II.—Cause for which Vessel was quarantined, and the Treatment adopted.

| NUMBER OF VESSELS. | CAUSE OF QUARANTINE. | TREATMENT ADOPTED. |
|--------------------|-------------------------|--|
| 1 | Death from cholera..... | Removal of corpse and disinfection of quarters and clothing. |

The vessel quarantined was the s.s. *Chikuzen Maru*, which left Nagasaki on the 22nd September and arrived here on the 24th, with 44 foreign and 11 native passengers. The master reported the death of a Japanese second-class passenger on the voyage; that the deceased came on board at Nagasaki in apparently good health and shortly afterwards complained of cramps in the belly and loose stools, which increased in severity, till he died at 2 A.M. on the 24th, after 30 hours illness. With this history and an examination of the body the case was considered to have been one of cholera, contracted at Nagasaki. The corpse with all the clothing in the cabin (of which the deceased had been the sole occupant) were removed to the station, and the cabin and water-closet were thoroughly disinfected. Pratique was granted after 3½ hours quarantine.

Cases of infectious diseases, sudden deaths, etc., occurred on several vessels inspected; but, owing to the measures employed, the risk to the health of the ports was not considered great enough to justify quarantine. The following are examples:—

- 1.—H.B.M.S. *Flora*, which left Nanking on the 23rd January and arrived here on the 24th, with a crew of 304, no passengers. Telegraphic information having been received from Nanking of the occurrence of a case of small-pox on board and of the expected time of arrival of the vessel, she was boarded immediately on arrival; the patient, a sailor, who had been carefully isolated, was examined and the diagnosis confirmed. The sick on board (five) were also examined and found free of infectious disease. The immediate removal of the small-pox patient to the Shanghai Isolation Hospital, by boat in tow of launch under the charge of one of the ship's surgeons, was advised and acted upon. The method of disinfection of the vessel was decided on and immediate pratique was granted.
- 2.—The French mail steamer *Tourane*, which left Hongkong on the 22nd January and arrived here on the 25th, with 203 foreign and five native passengers. The surgeon reported a case of small-pox (French sailor) as having occurred after leaving Saigon. The patient was examined and found to be suffering from small-pox in a mild form. During inspection all others on board were found to be in good health. As no suitable means of conveying the patient to the Isolation Hospital at Shanghai was at hand, the patient was taken to the station for treatment. Instructions were given for the disinfection of the quarters where the patient had been isolated and immediate pratique was granted to the vessel. The patient was discharged to the same vessel on her return from Japan 21 days later.
- 3.—The s.s. *Tongo Maru*, which left Kobe on the 1st March and arrived here on the 5th, with a crew of 119 and 48 foreign and 24 native passengers. The master reported having a corpse on board, that of a Chinese passenger shipped at Seattle, who died on board at Moji. The history of the case pointed to tuberculosis as the cause of death. The body, which had been embalmed, was permitted to pass, and immediate pratique was granted.
- 4.—The s.s. *Hsinyu*, which left Tientsin on the 11th April and arrived here on the 14th, with a crew of 85 and one foreign and 90 native passengers. The master reported having had a death on the voyage. The deceased, a Chinese male passenger, had been shipped sick at Tientsin and died during the rough weather on the day previous to arrival here. Examination of the corpse revealed no sign of plague or other infectious disease. During inspection all on board were found in good health. The coffin with corpse was removed to the station and immediate pratique was granted.
- 5.—The German mail steamer *Prinz Eitel Friedrich*, which left Nagasaki on the 30th April and arrived here on the 2nd May, with a crew of 259 and 74 foreign passengers. On the 4th May the master reported the death of one of the Chinese firemen from heart disease at 6 P.M. on the 3rd, and requested permission to land the body. As the vessel was on the point of sailing and the history of the case and appearance of the body contra-indicated plague or other infectious disease, the corpse was removed to the station and immediate pratique was granted.

- 6.—The s.s. *Kaiping*, which left Chinwangtao on the 13th July and arrived here on the 16th, with a crew of 91 and two foreign and 14 native passengers. The master reported the occurrence of a case of small-pox (second officer), which was landed at Chinwangtao on the 13th. Disinfection of the quarters had been satisfactorily performed. The personal effects and bedding of the patient were removed to the station and disinfected and the quarters were ordered to be painted. Immediate pratique was granted.
- 7.—The s.s. *Lifung*, which left Hankow on the 17th July and arrived here on the 20th, with a crew of 106 and seven foreign and 245 native passengers. The master reported the finding of a Chinese second-class passenger dead in his cabin after passing Woosung, and on arrival at Shanghai informed the Harbour Master, who ordered the vessel back to the quarantine anchorage. The body on examination was found very much decomposed, so that the cause of death (which must have happened at least 12 hours before) could not be ascertained. The corpse was removed to the station and instructions were given for the disinfection and painting of the cabin. There being no reason to suspect plague as the cause of death immediate pratique was granted.
- 8.—The s.s. *Kwongsang*, which left Hongkong on the 1st August and arrived here on the 6th, with 15 foreign and 106 native passengers. During inspection one of the native passengers was found with signs somewhat suspicious of plague and was removed to the station for observation. The vessel was granted immediate pratique. After removal the condition of the patient remained unchanged for two days, but on the morning of the third day well-marked signs of plague—septicemic form—suddenly developed, and the patient died at 10.30 P.M. of the same day. As the patient had been removed from the vessel before the disease had become infectious, and the absence of infected rats on board had been ascertained, it was not deemed necessary to disinfect the vessel, then on the point of departure for Hongkong, but the latter port was notified of the occurrence by telegraph. The vessel was disinfected at Hongkong later, resulting in 30 rats being killed.
- 9.—The s.s. *Kutwo*, which left Hankow on the 22nd August and arrived here on the 25th, with seven foreign and 521 native passengers. Acting on information received by telegraph from the Kiukiang Customs, of the landing there of a native passenger suffering from cholera when the vessel was leaving, the vessel was stopped here on her way to Shanghai. The master professed ignorance of any sick man having been landed at Kiukiang. During inspection all on board were found to be in good health. Immediate pratique was granted.
- 10.—The s.s. *Koonshing*, which left Tientsin on the 22nd August and arrived here on the 25th, with 10 foreign and 69 native passengers. As two cases of cholera were known to have occurred on board within 10 days, this vessel was stopped at Woosung for inspection. The master reported that on the voyage from Shanghai to Tientsin two of his crew—third and fourth engineers—were attacked by cholera; that one (fourth engineer) died on the 15th August after 16 hours illness, and that the other recovered and was sent on shore at Taku on the 18th; that the vessel was kept in quarantine at Taku for five days; and he showed me a certificate of the disinfection of the vessel. During inspection all on board were found in good health, except one of the native

- crew, who was removed to the station for observation, and was discharged after two days. Immediate pratique was granted.
- 11.—The s.s. *Agamemnon*, which left Hongkong on the 23rd August and arrived here on the 26th, with a crew of 73, no passengers. The master reported that one of the native crew had disappeared on the voyage. The ship's surgeon had seen him in good health on the day of his disappearance. Immediate pratique was granted.
- 12.—The s.s. *America Maru*, which left Hongkong on the 24th August and arrived here on the 26th, with 55 foreign and 71 native passengers. The surgeon reported that a second-class passenger—a Swede, aged 65—had died of heat-stroke after three-quarters of an hour's illness on the day of the vessel's departure. The official log-book verified this statement. There being no reason to suspect plague or other infectious disease as the cause of death immediate pratique was granted.
- 13.—The German mail steamer *Goeben*, which left Nagasaki on the 1st October and arrived here on the 3rd, with 148 foreign and 38 native passengers. At 1.15 A.M. on the 5th the agents shipping clerk reported that one of the Chinese firemen of this vessel had died at 9 P.M. on the previous day, was unable to report the occurrence sooner owing to rough weather, and asked that the vessel should be visited before 6 A.M., as she was due to leave at that hour. On boarding the vessel the ship's surgeon reported that the man had only been ill for two hours, had no vomiting or purging, and that he died of heart failure. Examination of the body revealed no sign of plague or other infectious disease. The body (which had been isolated) and personal effects were removed to the station and the vessel was "permitted to proceed."
- 14.—The s.s. *Tumba Maru*, which left Moji on the 24th October and arrived here on the 26th, with 20 foreign and 95 native passengers. The master reported that the Japanese cook was attacked by cholera on the 21st October and was removed to the Moji quarantine station on the same day and died on the 23rd. The vessel was in quarantine at Moji for three days; though nominally placed there for five days she was permitted to leave for Shanghai after the forecastle, deck-houses, steerage quarters, personal effects of crew, and steerage passengers had been disinfected, and so put in the remaining period at sea. On inspection here all on board were found in good health and immediate pratique was granted.

TABLE III.—Number of Men-of-war, Transports, etc., presented for Inspection.

| NATIONALITY. | MEN-OF-WAR. | TRANSPORTS, ETC. | TOTAL. |
|----------------|-------------|------------------|--------|
| American | 5 | .. | 6 |
| British | 2 | .. | 2 |
| Japanese | 2 | .. | 2 |

Of the 74,359 persons examined, 32 were removed to the station as suspects and one to the Shanghai Isolation Hospital.

TABLE IV.—Number of Patients removed to the Station for Observation and Treatment, the Diseases developed, and the Mortality.

| DISEASES WHICH DEVELOPED. | NUMBER OF SUSPECTS. | | | NUMBER OF DEATHS. |
|---------------------------|---------------------|-----------|-----------|-------------------|
| | Foreign. | Native. | TOTAL. | |
| Plague..... | ... | 2 | 2 | 1 |
| Small-pox..... | 2 | ... | 2 | ... |
| Typhoid fever..... | ... | 2 | 2 | 1 |
| Beriberi..... | ... | 1 | 1 | ... |
| Parotitis..... | ... | 1 | 1 | ... |
| Keratitis..... | ... | 1 | 1 | ... |
| Abscess..... | ... | 2 | 2 | ... |
| Buboes..... | 1 | 5 | 6 | ... |
| Fever..... | 5 | 10 | 15 | ... |
| Wounds..... | ... | 1 | 1 | ... |
| TOTAL..... | 8 | 25 | 33 | 2 |

The two deaths, from plague and typhoid fever, occurred on the third and eighth day of admission respectively. The fatal plague case was of the septicaemic form and only developed on the second day after removal. The other case was of the bubonic form and was discharged cured after 42 days. Of the two cases of small-pox, one was treated at the station and was discharged after 21 days, and the other, a sailor from H.B.M.S. *Flora*, was taken direct to the Shanghai Isolation Hospital. The average detention of patients at the Station was 11 days each.

TABLE V.—Quantities of Prohibited and Dangerous Articles destroyed, disinfected, and prevented Discharge.

| NATURE OF ARTICLES. | DESTROYED | DISINFECTED. | PREVENTED DISCHARGE. |
|---------------------------|--------------|--------------|----------------------|
| Rags, etc..... | ... | ... | 1,662 bales |
| Fruit..... | 788 packages | ... | ... |
| Vegetables..... | ... | ... | ... |
| Plants with earth..... | 8 pieces | ... | ... |
| Personal effects..... | ... | 524 pieces | ... |
| Coffins with corpses..... | ... | 8 " | ... |
| Shell-fish..... | 2 packages | ... | ... |
| Sand..... | ... | ... | 60 tons |

Under the heading "Rags, etc." are included old gunny bags found to be unclean. The disinfectant was made use of on 36 occasions.

Junk Inspection.—A continuous watch was kept at the Woosung Lighthouse throughout the year, and all sea-going junks were boarded on arrival by the sanitary constable stationed

there. During the year 1,410 junks were examined, of which 138 were from Foochow, but none arrived during the period that port was declared infected and no junks arrived from any other port declared infected. No suspects were found. The only prohibited articles found were six plants in pots, which were destroyed, and two coffins with corpses from Newchwang, which were permitted to pass.

General.—Since the outbreak of the present pandemic of plague at Hongkong in 1894 the danger to Shanghai of infection by that disease has not been so great as during the past year. This enhanced danger was due to the great famine in the Yangtze Valley, rendering the population more susceptible to the disease and entailing the hitherto unknown peril from the importation of rice (a recognised harbourer of the plague germ when of inferior quality), which could only be obtained from places where that disease had already spread, chief of which was Saigon, where "some isolated cases" occurred. Fortunately, with the exception of Formosa, the annual recrudescences of plague at the different ports were of less severity than usual—in the cases of Swatow, Canton, and Newchwang not sufficient to justify their being declared infected,—and though the disease appeared at all the principal ports in Japan at some time during the year, yet the measures taken there prevented any alarming spread of the disease. While Saigon was added to the list of ports to which plague has found entry, the thorough measures employed in Manila have resulted in the apparent suppression, if not extermination, of the disease there; but its recurrence in San Francisco, notwithstanding the great fire, shows how difficult it is to eradicate.

A sharp outbreak of cholera, apparently of local origin, occurred in Shanghai during August and the beginning of September. Its short duration at Shanghai, a little over a month, was probably due to the ingenious action of the Municipal Health Officer in sending criers among the natives to preach the doctrine of food freshly fired. This disease appeared almost simultaneously at Tientsin and Moji, both of which ports were said to have been infected from Shanghai. Ningpo, Hangchow, and most of the Yangtze ports were also infected. In Japan the disease spread rapidly, and a useless five days quarantine was enforced on vessels arriving from Shanghai, which was not removed till some weeks after the cessation of the epidemic here. No ports were declared infected by Shanghai on account of cholera.

The carrying out of the Whangpoo Conservancy scheme will again necessitate the transfer of the Quarantine Station at an early date, as most of its ground is included in the lines of the new channel. It is purposed to move the station further back on Pheasant Point, so as to occupy the future water frontage there.

The only serious illness among the members of the staff was a case of carbuncle affecting one of the hospital boys.

ROBERT H. COX,
Port Health Officer.

WOOSUNG, 20th January 1908.

APPENDIX No. 5.

REPORT ON WHANGPOO RIVER CONSERVANCY WORK DURING 1907.

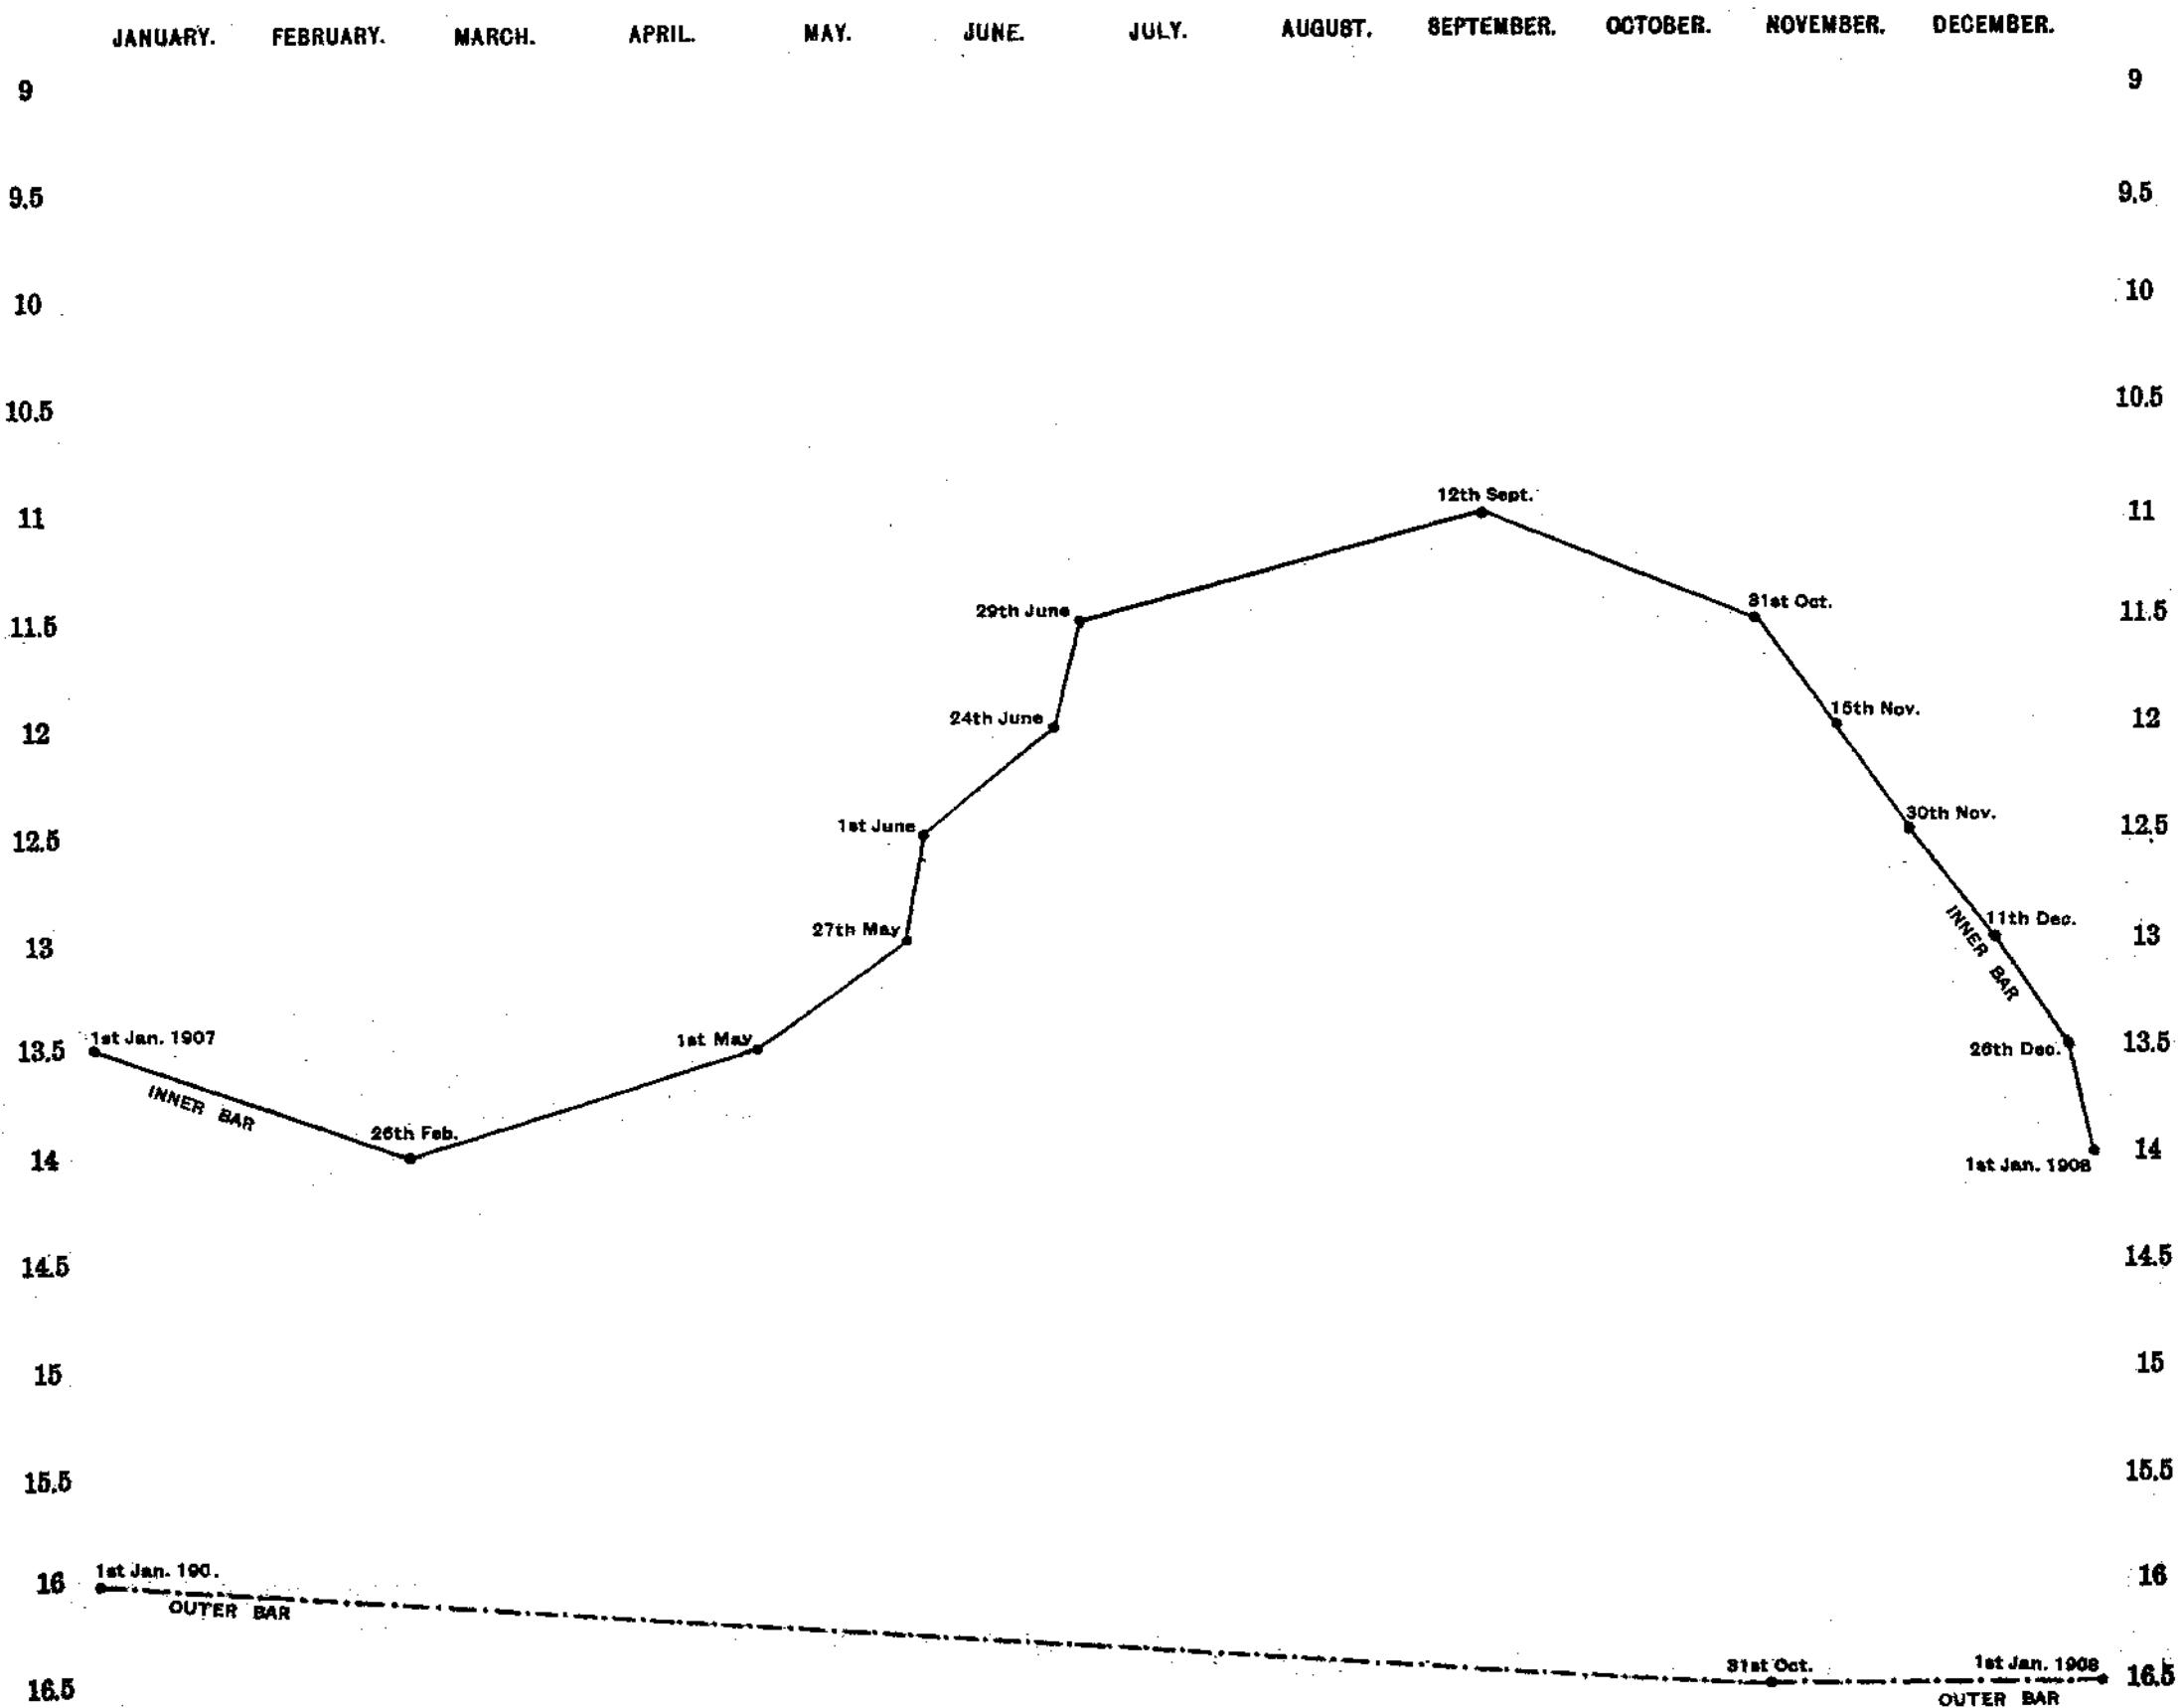

Conservancy work made steady and successful progress during the year 1907, and everything goes to indicate that the main feature of Mr. DE RIJKE's scheme—the deflecting of the river and the traffic into Junk Channel—will be effected at an earlier date than was generally anticipated. The brushwood supply, referred to in the preceding year's report as a source of difficulty, has been effectively maintained and now works smoothly and well, and as it is all of hard-wood is an excellent material for this work. Quarters have been built at Woosung and Woosung Forts to house the staff, a portion of the iron barracks brought to Shanghai for the German troops was purchased and erected at Kajow for similar purpose, and the Customs hulk *Kuashing* was lent to us and fitted up as a floating dwelling-place. The staff has been largely increased, and in addition to men taken on locally the services of 16 foreign work experts were obtained from Holland. The contracts for dredging work to an amount of 2 million taels, and for the construction of the 1-mile training jetty from Princes Pier to the Outer Bar, also costing nearly 2 million taels, were allotted, on the strong recommendation of Mr. DE RIJKE, to the Dutch contractors, Messrs. Ten Bokkel Huinink, Korthals Altes, Van Thiel de Vries, & Co. (the East Asiatic Dredging Company), who are experienced in works of this nature, and could supply, besides expert workmen, a more effective plant than the other competitors.

During the first half of the year the normal lines from the Arsenal to the Outer Bar were laid down, and plans, scale 1 : 12,000, placed on view at the Customs Harbour Department, which are now obtainable at the Conservancy Office. Over 600 *mou* of land were purchased on Gough Island for storing materials, and the Gough Island training works started in earnest in anticipation of the arrival from Europe of the dredgers. The parallel dams for deflecting the stream at the upper and lower ends of Gough Island were started and raised as far as deemed practical till dredging could commence, and it was found that the zinkstukks—mattresses of brushwood weighted with stone—once sunk in position soon solidified and maintained their place, in spite of any currents or changes in the river bottom.

During the last half of the year two bucket dredgers and one hopper-suction dredger arrived after a long and adventurous voyage from Europe (in December two more of similar capacity started on their way), and after a quick overhaul they were set to work in Junk Channel, and have worked there successfully and uninterruptedly since. Their first work is to cut a channel 15 feet below low water and about 500 feet wide from the deep water above Gough Island to the deep water above Signal Station in the Junk Channel. The increase in current as their work advances has been interesting to watch, and promises good help from the tides when the channel is through. There has been very little silting up behind the dredgers as they advanced, and, as mentioned above, everything indicates that the shipping route will be through "Junk" Channel sooner than could have been hoped.

In this connexion it is well to mention that a deep, wide channel will be left in Ship Channel until the Junk Channel route is safe and open to traffic. Both channels are carefully watched and frequently surveyed, and as anticipated the effect of the works at Lower Gough Island has been to increase the depth of the Inner Bar; but this, of course, is only temporary.

DIAGRAM SHOWING DEPTH OF THE WOOSUNG INNER AND OUTER BARS BELOW LOW-WATER DATUM, 1907.

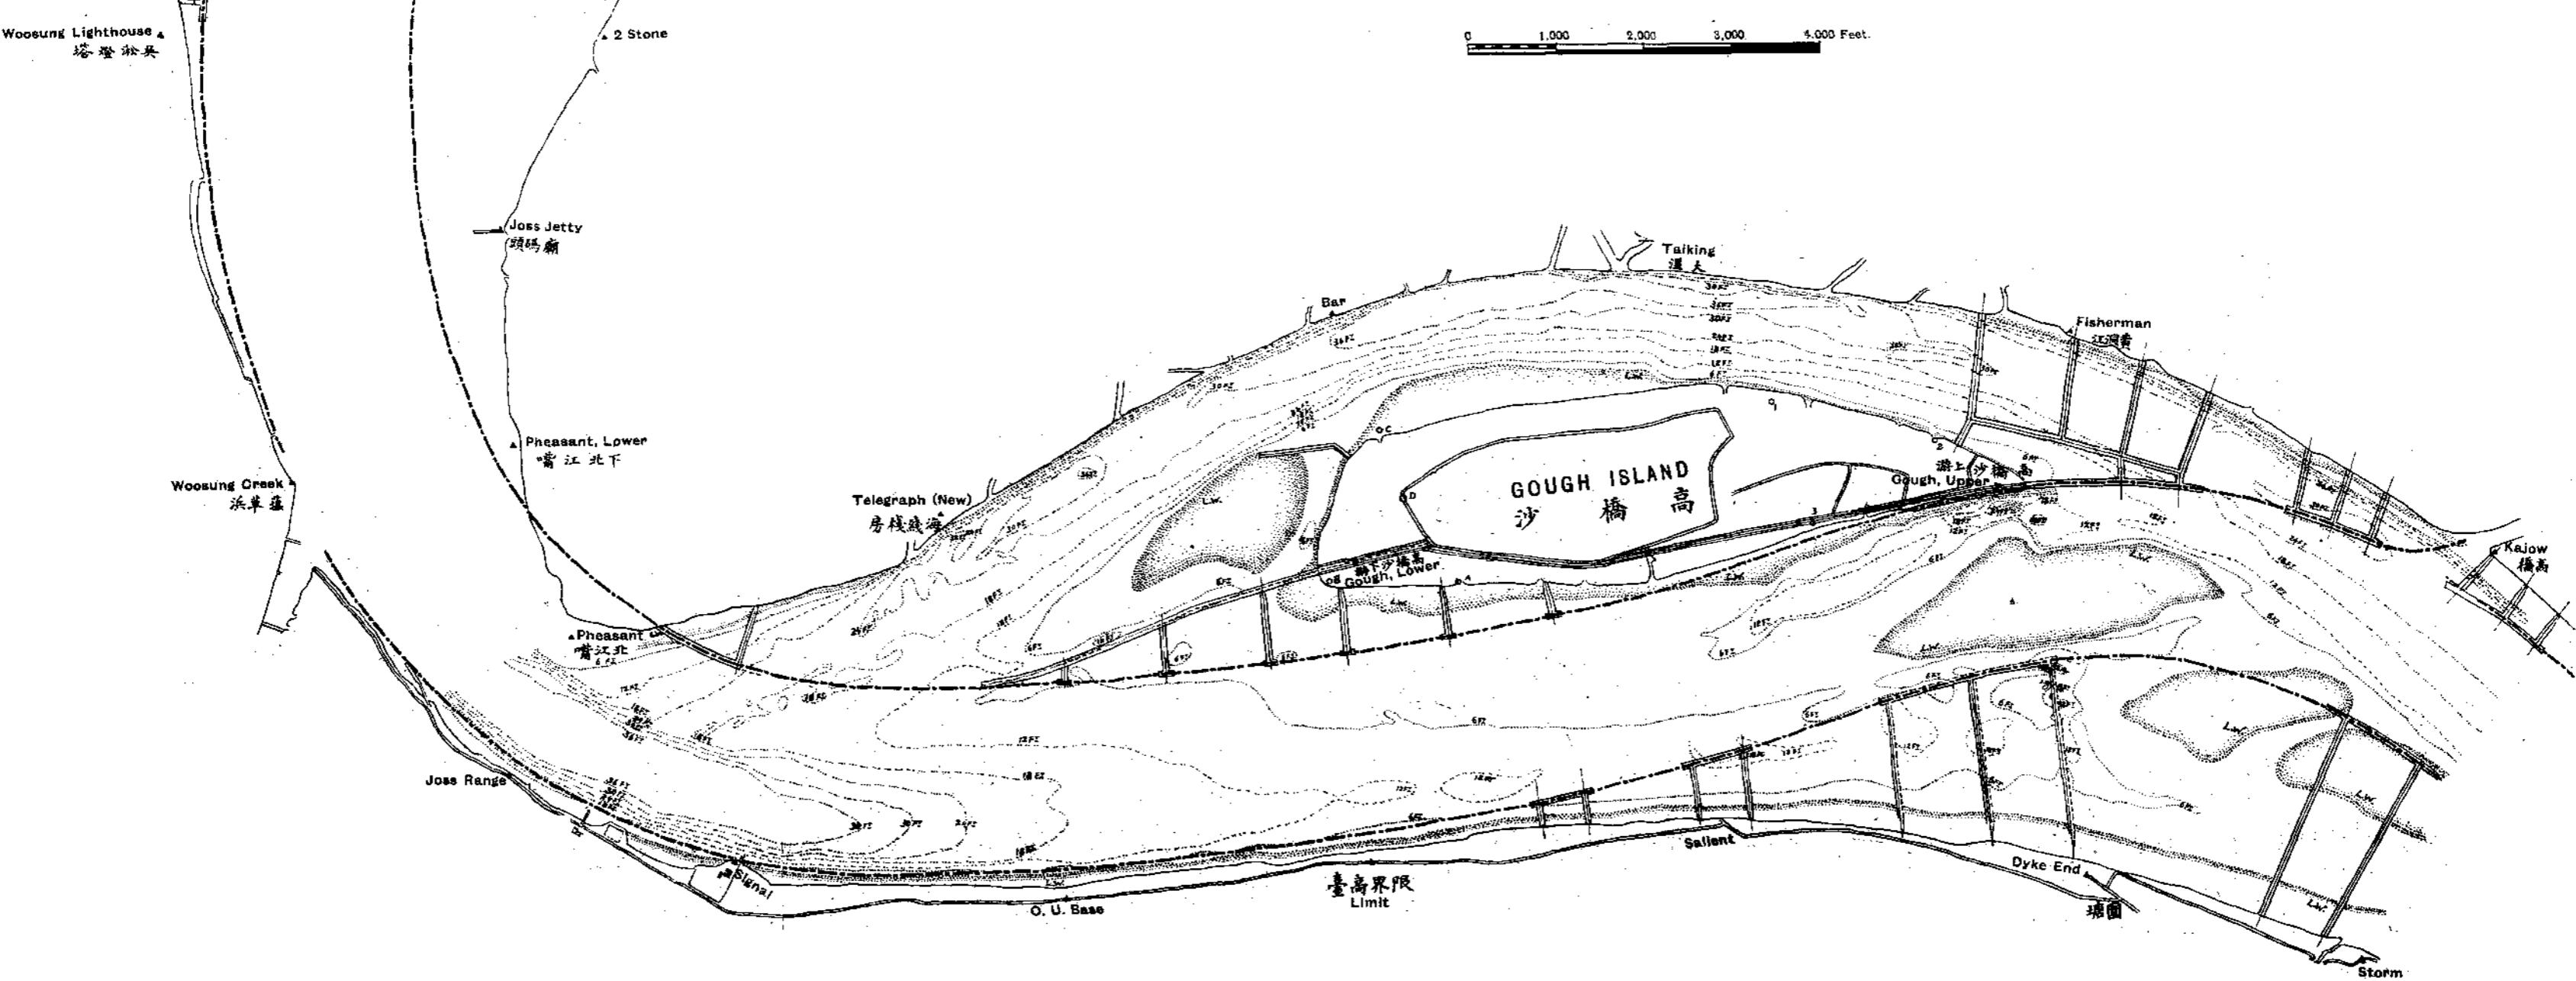

WHANGPOO RIVER CONSERVANCY.

Plan showing work in vicinity of Gough Island

Survey of 27th January–2nd March 1906

SCA

A protest was made by several German shipping firms against Mr. DE RIJKE's operations in the Gough Island neighbourhood on the grounds that the scheme was dangerous and might result in the blocking up of Ship Channel—or undue shallowing of it—before Junk Channel was open. The protest was not endorsed by shipowners of other nationalities, but at the request of the Conservancy Board Mr. DE RIJKE briefly replied to it, both documents being published in the Shanghai papers.

Work on the sea dike and fort jetty was not far advanced at the end of the year, as much preparative work had first to be done, including the laying of a light rail track for carrying stone and other materials on to the jetty, constructing houses for the staff, store places for materials, etc.; but a start had been made.

The year 1908 will probably be a more eventful one in the history of the Shanghai river; but 1907 has been a very useful if less conspicuous one, and a visit at low tide to Gough Island and its neighbourhood will well repay anyone interested in the Conservancy scheme, besides giving a better idea of the works than is possible in a written report.

A plan illustrating the progress of the work is attached to this report.

H. E. HOBSON,

A Director of the Conservancy Board.

SOOCHOW TRADE REPORT

1°. LOCAL.—Although the autumn rice crop of the previous year had seriously suffered from disastrous floods and the year opened with conditions far from favourable to trade, this was offset by a winter wheat harvest of above the average, followed in the spring by an excellent crop of rape and an abundant crop of cocoons of a good quality; and were it not for the partial failure in quality as well as quantity of the new rice crop, which, combined with the almost total loss of the previous autumn crop, still further increased the cost of living, the year would have closed more prosperously than trade indications pointed to when business was resumed after the Chinese New Year. The new rice crop, estimated as hardly more than six-tenths of a full yield, promised well but was retarded by the hot and dry August and later damaged by rains and storms, with the result that rice cut in October could not be garnered before becoming mildewed, and in some instances was left in the fields to rot. Owing to these reasons, the price, which during the spring fluctuated between \$6 and \$7, advanced at the end of the autumn to \$8 and more a shih (140 catties), or but \$1 less than in the previous calamitous flood year; and no great cheapening of price is to be expected before the next autumn crop is harvested. The quality of the cocoons was distinctly good and the crop was quite 25 per cent. larger than in the previous two seasons, which, however, were poor ones. It took 470 catties of dry cocoons to make 1 picul of silk, as against 500 to 550 catties in previous seasons. The market opened at \$46, running up to \$52, averaging \$49 to \$50, per picul of green cocoons, which works out about Tls. 660, including expenses, per picul of steam filatures. The silk market opened in February, the first lot of steams being contracted for on the basis of Tls. 860 per picul; prices advanced rapidly, touching Tls. 1,100, and fully 80 per cent. of the production was sold before October, when the full effects of the general depression were felt, and at the present moment it is difficult to say what the market value of steam filatures is: on the parity of Japans it should be about Tls. 710 to Tls. 750, and taking into consideration the fall in exchange—from 3s. 2d. to 2s. 7d.—the depreciation in the home markets must be nearly 40 to 50 per cent. On the whole, the filatures have done very well, those who sold all at the high prices exceedingly so; those who hold stocks, of course, lose a little, but not very much in proportion to their profits. In addition to the two old-standing local filatures of 450 basins, the Chino-European Company's filature, which has been idle since 1904, was leased to Chinese and commenced operations with 200 basins in September, reeling, approximately, 1 picul a day, but had to cease work at the end of the year, owing to losses caused by bad management and the dishonesty of employés. In contrast with the filatures, the local cotton mill had an unprofitable year. As far as I can gather, the output was 7,000 bales, as compared with 11,500 in 1906, the stock at the end of the year being 2,000 bales. The counts, principally 12 and 14 and a few 16, are all disposed of in the surrounding districts and in Tungchow, on the north bank of the Yangtze, a town and district of hand-weavers depending largely on the Manchurian market for the sale of their cloth, which is being rapidly displaced by Japanese machine-made cloth of the same pattern but cheaper. To this successful competition of Japanese cloth is partially put down the depressed state of the local markets for locally-made yarns. The price of cotton varied between \$25 and \$28 a picul, and as the price of cotton rose the price of yarn fell, from Tls. 90 per bale at the beginning of the year to Tls. 75 to Tls. 80 at the end; for these and other reasons connected with the management,

the mill was closed down for the last four months of the year. During the year 4,368 new spindles were added, making in all 22,568. A Chinese Electric Light Company, having obtained the concession for this city, have erected outside the Changmén a power-house for a plant consisting of three boilers and two dynamos, capable of supplying electricity for 6,000 16-candle power lamps. Owing to want of capital, the building only is completed; the machinery, poles, and wires still remain to be set up. With the coming of the railway, which passes the city on its north side, whereas the Settlement is located 5 miles away on the south side, the final death-blow has been given to any hopes that may still be entertained of a land boom in this vicinity of the port. Land outside the Panmén, quoted at *Hk.Ts.* 1,000 a *mou* in 1896, when the port was opened to foreign residence and trade and the present site of the Settlement decided upon, may now be bought for *Hk.Ts.* 100 a *mou*; and land in the Settlement acquired by speculators in 1897 at a fixed price of \$250, \$160, and \$100 a *mou* of front, middle, and back lots respectively, is practically unsaleable. A parcel of 11 *mou* at the back was, indeed, recently sold for \$50 a *mou*, but it was bought for the purpose of cultivating mulberry trees for the use of an experimental silkworm farm. On the 27th February the Maloo extension from the Changmén to the railway station, a little more than 1 mile, was formally opened to traffic by the Governor, assisted by all the high provincial officials. On both sides of this carriage road houses are rapidly springing up, and the land, which previous to the coming of the railway was valueless, is now at a premium. By order of the Ministry of Finance, the newer coining presses and other machinery were removed from the two Mints closed in 1906 to the Tientsin Mint. Copper 10-cash pieces, owing to the cessation of the local output, appreciated so much that at the commencement of the year \$1 only bought 102 pieces; but continuous importations during the year from Chin-kiang, of presumably Nanking mintage, speedily depreciated them to the old level of 112 to 114 to the dollar. August the 8th saw the closing of all opium dens inside and outside the city, without the slightest signs of any trouble. Prepared opium is now retailed by licensed shops (挑膏店), which also collect on behalf of the Government the tax of 40 cash a tael on sales. There are said to be between 700 and 800 such shops inside the city and half that number outside, principally on the Maloo. The East Asiatic Petroleum Company have erected two oil tanks, of a capacity of 50,500 gallons each, which are fed from their Shanghai installation by means of a tank-lighter driven by oil engines, specially constructed in Shanghai for the shallow waterways to be traversed. The tanks are on the banks of the Grand Canal, a little distance outside the Settlement. For the present the business is merely retail. An epidemic of cholera raged throughout August, and by the end of September the disease died out.

2°. REVENUE.—The collection of *Hk.Ts.* 105,461 compared with that for 1906 shows a falling off of *Hk.Ts.* 17,900—all in export duties—owing to lessened shipments of tea, but is nevertheless *Hk.Ts.* 6,700 more than that for 1905—entirely due to the increase in import duties. To this collection postal parcels contributed *Hk.Ts.* 23,952, or nearly 23 per cent. For the preceding five years the ratio has been as follows:—

COLLECTED ON PARCELS.

| | |
|----------------|--------------------------------------|
| 1902 | <i>Hk.Ts.</i> 3,170, or 4½ per cent. |
| 1903 | " 6,801, " 9½ " |
| 1904 | " 11,618, " 14¾ " |
| 1905 | " 20,058, " 20½ " |
| 1906 | " 18,638, " 15 " |

At the end of 1904 the levy of likin on parcels destined for inland places was inaugurated, the collections being as follows: in 1905, *Hk.Ts.* 7,375; in 1906, *Hk.Ts.* 6,473; and in 1907,

Hk.Tls. 7,894,—all on parcels containing native goods, principally silks. The levy, which is remitted to the Likin Administration, is at the rate of half the Customs tariff and is supposed to free from further charges in the delivery radius of the post office of destination. The gain to the revenue from the revision of the Import Tariff at the latter part of 1901 has been as follows:—

| | 1902. <i>Hk.Tls.</i> | 1903. <i>Hk.Tls.</i> | 1904. <i>Hk.Tls.</i> | 1905. <i>Hk.Tls.</i> | 1906. <i>Hk.Tls.</i> | 1907. <i>Hk.Tls.</i> |
|--|-----------------------------|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|
| On dutiable goods | 3,366 | 3,453 | 4,262 | 5,539 | 6,241 | 5,987 |
| On articles formerly duty free | 290 | 1,516 | 4,071 | 4,134 | 6,015 | 6,312 |
| TOTAL INCREASE | <i>Hk.Tls.</i> 3,656 | 4,969 | 8,333 | 9,673 | 12,256 | 12,299 |

3°. FOREIGN TRADE.—Direct imports show a decrease of *Hk.Tls.* 500,000 and *Hk.Tls.* 750,000 as compared with the figures for 1905 and 1906 respectively, owing to the stoppage of the Government demand for copper and spelter for the Mints; the value of such copper imported in 1905 was *Hk.Tls.* 573,644 and in 1906 *Hk.Tls.* 695,636. Direct exports are *nil*.

4°. COAST TRADE.—(a.) *Original Shipments Coastwise*.—Shipments of rape-seed cake were the largest as yet recorded, while the export of leaf tea was but little more than half that for the preceding year and, with the exception of 1904, the smallest amount since 1900, due to the overstocking of the northern market in the previous year, when shipments were exceptionally heavy. The forwarding of silk piece goods, embroideries, ribbons, etc., through the I.P.O. is growing in favour, especially of piece goods, which passed through this channel to the extent of 969 piculs. The value of postal parcels of all kinds accepted for transmission by the I.P.O. in this city during the year under review was *Hk.Tls.* 1,070,775, that is to say, 36 per cent. of the total exports of local origin; and to this total silk manufactures furnished all but *Hk.Tls.* 35,000.

(b.) *Reshipments Coastwise*.—Of no importance.

(c.) *Coastwise Arrivals*.—Under this heading the falling off was *Hk.Tls.* 299,000, and for the same reason as given under § 3°, viz., the cessation of the demand for materials for mintage purposes, to which copper alone contributed *Hk.Tls.* 227,287 in 1906. Of the two principal items of import, sugar decreased 8,000 piculs, while kerosene oil increased by 328,000 gallons, or 53 per cent. more than the figures for 1906. Bulk oil (96,520 gallons) was imported for the first time. The year's sales of cigarettes locally is estimated at 72 millions.

5°. INLAND TRANSIT.—*Nil*.

6°. SHIPPING.—This table and the next one clearly reflect the inroads made into the launch traffic by its competitor, the railway. During the last month of 1907 the passenger-boats and cargo-boats towed to and from Shanghai numbered 250, as against 550 during December 1906. Steerage and deck fares have remained unaltered throughout the year, but it is contemplated to make a further reduction. The fares at present are: to Shanghai—steerage, 50 cents, deck, 30 cents, each person; to Chinkiang—80 and 40 cents.

7°. PASSENGER TRAFFIC.—1905 was the high-water mark of the launch passenger traffic between Shanghai and Soochow, viz., 468,142 passengers passed to and from Shanghai. With the opening of the railway, in July 1906, a decrease of 81,000 passengers was noted that year; in 1907 a further falling off, of 131,000, is to be observed, or, as compared with the figures for 1905, the very marked decrease of 212,000 passengers.

8°. TREASURE.—No remarks.

9°. OPIUM.—All came from Shanghai duty-paid and labelled. The arrivals for the year were as follows:—

| | MALWA. <i>Piculs.</i> | PATNA. <i>Piculs.</i> | KIANGSU. <i>Piculs.</i> | TOTAL. <i>Piculs.</i> |
|-------------------|--------------------------|--------------------------|----------------------------|--------------------------|
| Soochow | 2.66 | 1,212.77 | 78.10 | 1,293.53 |
| Wusih | <u>325.98</u> | <u>2,145.95</u> | <u>61.40</u> | <u>2,533.33</u> |
| TOTAL | <u><u>328.64</u></u> | <u><u>3,358.72</u></u> | <u><u>139.50</u></u> | <u><u>3,826.86</u></u> |

10°. MISCELLANEOUS.—The section of the Shanghai-Nanking Railway from Wusih to Changchow (24 miles) was opened to traffic on the 15th May, and that from Changchow to Chinkiang (45½ miles) on the 15th October.—Another cotton spinning mill commenced work at Wusih in April, with 10,000 spindles. Wusih now has two cotton mills and one flour mill.—The business of the I.P.O. continues to steadily expand: mail matter received and despatched has doubled; money orders issued and cashed have increased 32 per cent.; the mileage of postal lines opened is 34 per cent. longer; and the addition to the staff has been 50 per cent. The city now has three deliveries and five collections a day, and the 25 letter pillar-boxes erected at the busiest points in the city and suburbs are in great favour. 10 new agencies were opened inland, making in all three branch offices and 25 inland agencies in this district.

ALEC. W. CROSS,

Acting Commissioner of Customs.

SOOCHOW, 31st March 1908.

HANGCHOW TRADE REPORT.

1°. LOCAL.—After two very lean years, in which a large shrinkage of the revenue under all its heads was experienced, trade revived again during 1907 and almost came up to the record year, 1904, attaining, as far as values are concerned, in the amount of *Hk.Tls.* 20,000,000, the highest figure since the port was opened. Whether our present increase is due to a lesser quantity of goods having passed through the likin offices, or whether the general trade of the port has really augmented to such an extent, is impossible to say as long as no reliable likin statistics are available. The Custom House at Hangchow is simply an opposition establishment to the likin collectorate; and while likin charges are adjustable to circumstances and Customs duties are fixed, the likin offices endeavour, for obvious reasons, to keep their charges slightly below our rates. It is therefore wellnigh impossible to give any reliable figures for the balance of trade of this port. Taking, however, only our Customs statistics into consideration, we find that a very good silk crop and a fairly good tea season were evidently chiefly responsible for the apparent prosperity and expansion of both the export and import trade. No doubt the profits realised on tea and silk must have been sufficient to cover at least the increase in imports, which nevertheless remains a surprising fact in face of the dearness of rice and other foodstuffs and the general enhanced cost of living, which can be roughly calculated now as having doubled during the last 10 years. While cost of living has gone up to such an enormous extent and taxes are as high as they can possibly be, wages have not increased in the same proportion; it follows therefore that the average labourer has barely sufficient to meet his daily wants, let alone purchase more than absolute necessities. The rice crop of 1907, which promised exceedingly well at first, was greatly spoilt by the rainy weather prevalent during harvesting time. A great part of the rice was ripe early and could have been cut and harvested before the *shuang-chiang* festival, which fell this year on the 24th October; but old custom forbade any earlier harvesting, with the result that a good deal of the crop was allowed to rot on the fields. Report, however, says that the rice harvested would have been still sufficient to ensure its sale at a reasonable price, but that great quantities were clandestinely exported by junks to Japan from unopened places on the coast, until the Governor sent a gunboat to patrol and stop this illicit traffic. Unless this secret traffic in rice is effectually stopped, the price of the staple food of China must go up to the same figure as it is sold in Japan, with the deduction of the cost of transport—and that is far too high for the ordinary Chinese labourer.

2°. REVENUE.—The total collection during the year amounted to *Hk.Tls.* 685,646, showing an increase over that for 1906 of *Hk.Tls.* 108,436 and only some *Hk.Tls.* 17,000 below that of the best year, 1904. The significance of these figures is accentuated by the fact that the duty and likin collected on opium during the year was *Hk.Tls.* 90,000 less than in 1904, while only *Hk.Tls.* 9,000 more than in 1906 was collected on the drug. Imports and exports (exclusive of opium) shared about equally in the increase over the figures for the previous year.

3°. FOREIGN TRADE.—Direct foreign imports are few, as most foreign goods come from Shanghai under drawback, being practically Shanghai re-exports. The direct foreign import trade is represented by Japanese cotton goods and umbrellas, household stores, etc., imported mostly by the foreign community, and some tin in slabs from the Straits Settlements, used for the manufacture of joss paper, etc., principally in the Shaohing district. There are no direct exports to foreign countries.

4°. COAST TRADE.—(a) *Original Shipments Coastwise*.—Fine, dry weather, without any sudden changes in the temperature during May, ensured what was probably one of the best cocoon crops on record, resulting in an average selling price of \$40 per picul for fresh cocoons. So large was the crop that mulberry leaves sold at \$3 per picul and in some further parts of the country even as high as \$6 and \$7. The export of cocoons was correspondingly large, being the highest since the port was opened, namely, 2,227 piculs—dried, of course, and representing nearly 7,000 piculs of the fresh ones. The whole of these shipments, which went through the Customs, were intended for Japan, while the Shanghai filatures, who also buy in this district, export their cocoons under transit passes issued by the Shanghai Customs or through the likin office. Of steam filature raw silk, 632 piculs were exported, the outturn of the Chinese factory at Tangsi, a place about 12 miles to the north of Hangchow on the Grand Canal. Raw and thrown silk appears with 1,728 piculs, and refuse silk, with 11,046 piculs, the latter especially showing a large increase over the figures for previous years. The tea season commenced on the 7th June, and the crop was not a particularly good one. Unfired tea alone showed a considerable increase, namely, 4,000 piculs more than in 1906. This tea goes partly direct to the north of China for local consumption, and partly first to Foochow to be there scented and then to be eventually shipped North also. Amongst the other local products showing an increase, cabbage cake deserves special mention, with an advance of 128,000 piculs over the 1906 figures; nearly all of this goes to Japan to be used for manure. The cotton crop, slightly better than that of the previous two years, was still far below the average. The particulars of the work of the Hangchow Cotton Mill, as kindly supplied by the manager, are: "The total output consisted of 7,500 bales, or 22,500 piculs, with an average sale price of Sh.Tls. 72 per bale, while the average price of raw cotton was Sh.Tls. 19 per picul. 30 per cent. of the total output remained in stock, owing to dull trade, so that the mill had to shut down, working now only eight out of the 12 months."

(b.) *Reshipments Coastwise*.—No remarks.

(c) *Coastwise Arrivals*.—The value of imports, all of which come from or via Shanghai, amounted to Hk.Tls. 9,248,611, of which amount about half represented foreign and the other half native produce. 1,683 piculs of opium were imported, mostly Malwa, constituting an insignificant increase over the figures of last year. Opium all pays duty at Kashing and contributes with the amount of Hk.Tls. 184,217 collected on the drug about half of the revenue of that station. Next in importance come kerosene oil and sugar. Of the former, 3,382,960 gallons were imported, over two-thirds being American, nearly one-third Sumatra, and 20,900 gallons Russian. Beyond stating that the amount imported equals the highest on record, in the year 1901, it is useless to make comparisons or draw conclusions, since the kerosene guilds are continually making contracts with the likin office, paying a lump sum for all importations of oil. The Asiatic Petroleum Company completed in July their installation of two tanks and filling-shed about a mile north of the Hangchow Settlement, on the opposite side of the Canal. The tanks are kept supplied from Shanghai by a tank-barge, the *Asia*, driven by an internal combustion engine using kerosene as fuel. The sugar imported amounted to 354,050 piculs, of which 95,354 piculs were brown; this is an increase of nearly 80,000 piculs over the arrivals in 1906 and the highest figure on record. Nearly all the other principal imports show an advance over the figures for 1906, but none call for special mention.

5°. INLAND TRANSIT.—(a) *Inwards*.—6,542 passes were issued during the year, against 5,653 in 1906, and the dues collected show an increase of nearly Hk.Tls. 2,000. The greater part of the increase is due to the fact that transit passes were for the first time issued by the Kashing

station, and were demanded there to carry goods *via* Haining to places on the Chientang River. Merchants found that they could by this mode of transport effect a saving over the old route through the likin office and *via* Hangchow; the likin officials, however, were not slow to reduce their charges and the issue of passes at Kashing soon stopped again.

(b.) *Outwards.*—For the first time since the port was opened outward transit passes were applied for. A Japanese camphor firm, having its head-quarters at Amoy, applied for passes to transport their camphor from Chitcho (衢州). Four passes in all were issued, but only two made use of, covering 150 piculs; and it is highly improbable that the venture will develop into business on a large scale, as the Japanese who went to collect the camphor inland soon encountered difficulties with the local officials, etc.

6°. SHIPPING.—(a.) *Under General Regulations.*—The number of steam-launches entered and cleared is practically fixed: there are three Shanghai launches daily clearing and entering, and also two daily from and to Soochow. The former all take the same route, by the Grand Canal *via* Kashing and thence to Shanghai by the Whangpoo River, while of the Soochow launches, one goes *via* Kashing and the other branches off just before reaching Tangsi (塘棲) and proceeds to Soochow *via* Nanziu. Periodically a new company makes an attempt to run an opposition, and is either bought off by the existing three-company combination or is run off by lowered rates. There is, however, some improvement visible in the launch service, as the launches now used are larger and more powerful, evidenced by the better time kept.

(b.) *Under Inland Steam Navigation Rules.*—There was a gratifying increase under this heading over the totals for 1906 and former years, namely, 96 under "cleared" and 104 under "entered." These numbers are made up by a daily service between Kashing and Siashih (硖石), and by a line running on alternate days between Hangchow and Huchow *via* Tangsi (塘棲), Sinshih (新市), Shwanglin (雙林), and connecting at Huchow with another line to and from Changchow (常州). This same route had been tried several times in former years, but always had to be given up on account of insufficient profit: another reason is that the waterways are silted up to such an extent that only a few are at all passable for launches, while the rest are reserved for the hundreds of shallow-draught hong-boats plying in all directions.

7°. PASSENGER TRAFFIC.—No remarks.

8°. TREASURE.—The movement of treasure shows an increase of *Hk.Tls.* 2,500,000 for imports and exports together over the figures for 1906, the balance being this time in favour of imports to almost *Hk.Tls.* 400,000. There was only one shipment of copper coins to Ningpo *via* Shanghai, to the amount of *Hk.Tls.* 68,000, against *Hk.Tls.* 280,000 in 1906. Towards the end of the year a great scarcity of dollars made itself felt at Hangchow, causing so much inconvenience that the local banks petitioned the Governor to temporarily prohibit the export of dollars to Shanghai, a business which, through the high sycee exchange then prevailing, offered great inducement at the time. The exchange of subsidiary coinage—silver and copper—varied little from that of previous years. The silver coinage stood at the beginning of the year at \$1:11.23, gradually falling till 11.70 in August, rising rather suddenly at the end of the year to 10.89. Copper coin, practically only 1-cent pieces, stood in January at \$1:104 and gradually fell to 111 in December.

9°. OPIUM.—The opium divans in Hangchow were officially closed on the 8th August, and on the 22nd September a bonfire was made of thousands of pipes and smoking implements stacked up in three huge pyramids in an open space within the city, to which ceremony a good many officials and representatives of the local gentry had assembled to hear or read the speeches. But there is no decrease in the importation of the drug, as the duty-paying importation amounted

to 1,683 piculs, to which must be added 402 piculs on which duty and likin were paid at Shanghai, while the import of 1906 was only 1,603 piculs, or 482 piculs below the importation during the year under review. The import of native opium passing through the Customs is insignificant, but is also increasing latterly.

10°. MISCELLANEOUS.—Rains and floods of former decades have silted up the magnificent waterways of this part of the province to such an extent that a stage has been reached when the water in them is either too low for unobstructed traffic or too high for the safety of the crops. While the former condition is particularly obnoxious in the Grand Canal at Shihmen (石門), Shihmenwan (石門灣) and Kashung, forcing the regular launches often to make long *détours*, the latter condition brings forward complaints by farmers and riparian owners that the wash from the launches propellers breaks the flimsy banks and admits the water to their low-level fields. Both difficulties could be easily remedied by dredging, and thus increasing the holding capacity of the canals, and by repairing the magnificent water reservoir at Yihang (餘杭). But beyond a little scraping at the worst places, and notwithstanding continuous protests by all concerned, the local government has made no attempt to alleviate this evil, and dispassionately allows these artificial canals, in which grandeur of conception and originality in construction are not equalled by any others in the world, gradually and surely to decay and to fall into complete ruin. Before Governor CHANG left he authorised the purchase of a dredger from local accounts, and a scheme to raise necessary running expenses was arranged by the Customs with the local officials—only to sink into oblivion again, as there were not sufficient funds available.—Without wanting to go minutely into the anti-railway loan agitation, details of which were more than sufficiently published by the various foreign and Chinese newspapers, it is necessary to mention that the agitators who indulged in all the inflammatory speeches belonged mostly to the new class of irresponsible students, who are mainly, if not wholly, to blame for the general unrest caused in the province and the anti-foreign feeling now raised, from which this part of Chekiang had so far been exceptionally free. The actual work done by the so-called Chekiang Railway Company amounts to the completion of a single line 10 miles long, connecting the Foreign Settlement with the Chientang River *via* the south gate of the city. The rails used are reported to have been previously condemned by other railways, and the cars are little better than cattle trucks, miserably fitted up locally; while the fare charged is exorbitant, namely, 40 cents for the 10 miles. Four trains run daily, with three engines of the type used on small secondary railways at home, and are the only running-stock at present. The station buildings are fairly good, and the line, bad as it is, supplies a long-felt want of communication between city and Settlement and is extensively patronised by the natives. The line Hangchow-Shanghai exists so far only on paper, with the exception of about 10 miles from Hangchow, which is nearly completed. The route has been surveyed, and presents absolutely no engineering difficulties. It is, however, still unsettled whether the line will go *via* Pinghu (平湖) or *via* Kashan (嘉善).

P. VON TANNER,

Commissioner of Customs.

HANGCHOW, 24th March 1908.

NINGPO TRADE REPORT.

1°. LOCAL.—A most prosperous year has, from a Customs standpoint, to be chronicled. The gross value of the trade of the port is a record one, being *Hk.Ts.* 25,136,605, or over $2\frac{1}{2}$ million taels more than the value reported in 1903, up to now the highest figure reached and nearly 6 million taels higher than the value of the 1906 trade. Business has been uniformly brisk but more especially so during the first half of the year, and was satisfactory on the whole, yielding fair profits to the native trading firms. Money was plentiful throughout the period and moderate rates of interest prevailed; there are no failures of note to record amongst the native banks or mercantile houses. The long-continued drought coming in the late spring and early summer acted prejudicially on the rice crop, which was reported to have been fully 40 per cent. below the average, and grain was consequently scarce and dear during the whole year; a *shih* of 140 catties selling for \$7.40, which was purchasable 10 years ago for less than \$5. The deficit had to be supplied from the producing districts in the Lower Yangtze Valley, large importations also coming here from Cochin China. The most potent influence upon our commercial history came from without—the decline in silver. Only a short time ago the white metal looked like having definitely passed the $30\text{d}.$ limit, and now it is back again to $25\text{d}.$ and less per ounce. Two causes have accidentally combined to bring about the present low price: the unfavourable harvest prospects in India, and the consequent decline in the demand for council bills, have eliminated the great consumer of silver—the Indian Government; and, on the other hand, the recent financial crisis in the United States prevents American producers from nursing their output, which is consequently being marketed without delay. In former times the fall in silver affected the trade of half the world; to-day the fall is practically confined to China, and it is of vast importance to merchants doing business with this country. The year cannot be classed as a healthy one, much sickness having occurred amongst natives and foreigners. Cholera was epidemic during the hot months, large numbers of Chinese succumbing to the infection, the disease being undoubtedly aggravated by the severe drought.

2°. REVENUE.—The year's collection—*Hk.Ts.* 686,466—shows an increase in all branches and is *Hk.Ts.* 96,119 better than that of 1906. Import duties, exclusive of opium, appreciated *Hk.Ts.* 21,349; export duties, *Hk.Ts.* 58,000; and transit dues, *Hk.Ts.* 8,120. The total collection of duty and likin on foreign opium was *Hk.Ts.* 160,842, against *Hk.Ts.* 155,210 in the previous year. In passing, it is worthy of note that the tonnage dues receipts—*Hk.Ts.* 11,437—have not before been approached.

3°. FOREIGN TRADE.—(a.) *Imports.*—The value of goods imported from foreign countries and Hongkong amounted to $5\frac{1}{4}$ million taels, exhibiting an increase over the previous year's figures of nearly 2 millions. The direct foreign trade has expanded considerably during the past few years, mainly owing to the increased sugar importations from Hongkong and the Philippines. The consignments of refined sugar, the bulk of which is destined for the large consuming districts around Shaohing, were of a total value of nearly a million taels, while the brown and white Ilo-Ilo sugars, mostly sent to the towns in the Chientang Valley, were worth about the same amount. As regards prices, importers appear on the whole satisfied with their operations, and the gains of the dealers are reported to have been substantial. A feature to be noted was the import of a few

thousand piculs of raw cotton of Japanese, Indian, and American provenance for one of the local mills. Other goods entered in our tables as imports from foreign countries were through consignments transhipped at Shanghai from vessels from foreign ports; these were not numerous, the only important item being tin.

(b.) *Exports* and (c.) *Re-exports*.—No remarks.

4°. COAST TRADE.—(a.) *Original Shipments Coastwise*.—A considerable development has taken place under this heading, the total value of exports to Chinese ports amounting to *Hk.Tls.* 8,927,893, an increase of *Hk.Tls.* 2,200,000 over the previous year's figures. The largest increases are to be found in the two principal staples—Pingsuey tea and cotton. Marked activity was characteristic of the cotton trade, which fortunately could be met owing to an abundant crop. No less than 154,748 piculs were shipped off, against 104,590 piculs in 1906. The cultivation of cotton has of late years been greatly extended in this province, and the Chekiang product is considered amongst the best grown in China. The quantity of Pingsuey tea exported was 105,836 piculs; in 1906 it was only 82,820 piculs. The business has not been to remunerative as expected, although the crop was pronounced good, sound, and useful, but lacking attractiveness in appearance. The cuttle-fish season was reported to have been a successful one, and the export figures are 25 per cent. higher than those of the previous year. A considerable quantity of the catch continues to be shipped direct from the Chusan Archipelago by junk to Shanghai and the Lower Yangtze ports. A large trade was done in rush hats for the French and American markets, nearly 6,000,000, valued at *Hk.Tls.* 70,000, having been sent to Shanghai for transhipment. Another satisfactory feature in the export trade was the marked progress in the shipments of cotton yarn—5,395 piculs, the product of the two local spinning companies. Other exports call for no special comment.

(b.) *Reshipments Coastwise*.—Foreign goods to the value of *Hk.Tls.* 81,088 and native goods valued at *Hk.Tls.* 194,189 were re-exported to Shanghai and Wenchow, and consisted principally of artificial indigo, hemp, and medicines.

(c.) *Coastwise Arrivals*.—The total net value of coastwise arrivals is *Hk.Tls.* 10,740,504, an increase of nearly 20 per cent. over the 1906 total. Of this amount, *Hk.Tls.* 7,255,575 represent the value of foreign goods, almost all from Shanghai, and *Hk.Tls.* 3,484,929 the value of native goods. There was a general increase in almost all kinds of cotton piece goods, American drills alone showing any marked decline. Woollen manufactures fell off slightly. The trade in kerosene continues its growth, the import amounted to 2,770,000 gallons, distributed as follows: American, 1,662,400 gallons, and Sumatra, 1,107,600 gallons. The ever-increasing demand for flour, probably in a measure due to droughts and short rice crops, brought the import figures from 37,173 piculs in 1906 to 91,852 piculs in 1907. The greater part of this flour is used in the manufacture of cakes and vermicelli, which are largely consumed by all classes in this district.

5°. INLAND TRANSIT.—(a.) *Inwards*.—The total value of the goods sent inland under transit privileges amounted to *Hk.Tls.* 1,744,659. Chief among them were Indian yarn, grey and white shirtings, seaweed, and sugar. The number of passes issued was 24,125, and the duty collected amounted to *Hk.Tls.* 39,088.

(b.) *Outwards*.—Only 20 passes were issued, the value of the goods covered by them being *Hk.Tls.* 2,964.

6°. SHIPPING.—The figures show a great increase both in number of vessels and in tonnage compared with those of any previous year. The number of vessels registered for entry and clearance at the Custom House reached the figure of 1,538, representing a tonnage

of 1,731,245 tons; in 1906 the entries and clearances were 1,259, aggregating 1,226,273 tons. During the year 4,298 vessels entered and cleared from and to inland waters places.

7°.—PASSENGER TRAFFIC.—The table shows a considerable increase in the movement of travellers for the year, the excess being more between the treaty than the inland ports. During the twelve-month 261,461 passengers departed, principally to Shanghai, while 246,681 arrived from the same place, and the usual cheap fares of the previous two years were maintained. Inland waters vessels took away 261,054, and brought back 274,268, travellers during the same period.

8°.—TREASURE.—The movements of treasure present no new features. The import of silver in dollars was valued at *Hk. Tls.* 2,726,656, and dollars worth *Hk. Tls.* 2,210,987 were sent away. No gold was either imported or exported. During the year the copper cents exchange varied between 106 and 112 pieces per dollar.

9°.—OPIUM.—(a.) *Foreign*.—There was an increase of about 44 piculs in all kinds. The Malwa import advanced from 1,350 to 1,390 piculs, and Patna, from 47 to 66 piculs, while Benares fell from 22 to 7 piculs. The figures for the past five years are as follows:—

| 1903. | 1904. | 1905. | 1906. | 1907. |
|----------------|----------------|----------------|----------------|----------------|
| <i>Piculs.</i> | <i>Piculs.</i> | <i>Piculs.</i> | <i>Piculs.</i> | <i>Piculs.</i> |
| 2,177 | 2,209 | 1,814 | 1,419 | 1,463 |

(b.) *Native*.—The import has been 179 piculs, as against 160 piculs in the preceding year; value *Hk. Tls.* 390 per picul.

10°.—MISCELLANEOUS.—Among new commercial enterprises, a soap and candle factory, completed during the year, is now in full working order and gives every promise of success. A match factory is also contemplated, but the shares have not yet been fully subscribed. The two cotton spinning companies report that business was unsatisfactory throughout the period; and the local flour mill continues to remain idle.—The Imperial Post Office has made further progress, and its sphere of usefulness has been extended to all places of any importance in the district. Money order transactions are steadily growing, and the system, supplying as it does a long-felt want, is becoming more and more popular with all classes. Our income has not yet quite reached the level of expenditure, but judging from present appearances, the year 1908 is likely to show a balance on the right side.—The police force, maintained for close on four decades by successive Taotais, continues to function in a satisfactory manner; but death has deprived us of the valuable services of the old controller, Major WATSON, who had been connected with the force since its first establishment.—The fires in the native city have been unusually numerous and destructive, and it is estimated that the foreign insurance companies have paid claims to the extent of some 130,000 taels. More stringent rules are now enforced in connexion with the acceptance of risks and payments of losses.

C. LENOX SIMPSON,

Commissioner of Customs.

NINGPO, 31st March 1908.

WENCHOW TRADE REPORT.

1°. LOCAL.—The year 1907 opened amid gloom and distress, the heritage of its predecessor—a condition of things from which trade at no period seemed able to recover, and a lean year, barren of results, is the only too general verdict. While the continuance of depression was in great measure attributable to the flatness of outside markets, the prevalence of penury and want at home, arising from the shortness of foodstuffs, held a leading place among contributory causes. Prolonged drought during August and September damaged the rice and yam crops to an extent in itself sufficiently disquieting, but exaggerated by the farmer and the dealer in grain to their own advantage. As a consequence, the price of rice, which had fallen to \$4 per picul when the first crop was harvested, again rose to the abnormally high figure of \$4.50, which remained the ruling price till the close of the year. The shallowness of water communications occasioned a temporary suspension of up-river and inter-canal traffic. Moreover, the season of drought brought dysentery, and cholera became epidemic, so that the country people in alarm shunned the city and its suburbs and little business was transacted. Such a congeries of untoward circumstances could not fail to have a perturbing effect on trade. Great difficulty was experienced in disposing of commodities, and stocks of the leading imports have been reduced to, and are being maintained at, a minimum.

2°. REVENUE.—The collection, which amounted to *Hk.Ts.* 50,893, is, approximately, *Hk.Ts.* 10,000 less than in 1906, a decrease ascribable to a falling off in export duty on tea and tobacco and in duty and likin on opium.

3°. FOREIGN TRADE.—(a.) *Imports*.—No remarks.

(b.) *Exports*.—Of recent years leaf tobacco destined for Formosa followed the circuitous steamer route *via* Shanghai, the immediate importation by junk, owing to the existence of a monopoly, being prohibited. Towards the end of the year direct shipment was made under the Japanese flag, a means of transport which will not unlikely be more frequently resorted to in future.

(c.) *Re-exports*.—No remarks.

4°. COAST TRADE.—(a.) *Original Shipments Coastwise*.—The slight check which the export trade has received may be safely regarded as merely temporary, nor is it altogether unsatisfactory that the shrinkage has been general in character and has been shared by almost all the principal commodities. Tea has continued to dwindle: shipments fell to 15,027 piculs, a decline as compared with 1906 of 3,044 piculs, or nearly 17 per cent. In general quality of leaf, teas were decidedly above the average of recent years and gave evidence of greater care in cultivation, picking, and firing. A few lots were of exceptional quality. One small choice chop of unfired tea, which was valued in Wenchow at *Ts.* 60 per picul, is said to have realised *Ts.* 100 in Shanghai, demonstrating that fine tea can still be produced, and that when produced it will not fail to command a high price. Only a limited quantity of leaf was picked for the market, and when later in the season inquiry set in, more leaf was no longer procurable, having been allowed to over-mature on the shrub. First crop teas excelled in quality and in fineness of flavour, and teas of the second picking were well in advance of anything of their class produced for several years past. Early shipments arrived on a rather unsympathetic market, and prices obtained were perhaps disappointing. But the market quickly rallied, prices grew firmer, and

teamen were able to recoup to a small extent their losses of recent years, from which they have, it would seem, taken such heart of grace that next season is likely to see the number of tea-firing establishments largely increased. Leaf tobacco still maintains its position among exports as second only to tea, but has declined over 58 per cent. Buying for the Formosan market was suspended for a great part of the year, and was only resumed shortly before its close. Drought affected the orange crop, and the fruit, though plentiful, was small. Financial difficulties in the North interfered with the autumn shipments to the usual marts, and consignments were made on a reduced scale. Business in timber was lucrative, and exportation attained the unprecedented dimensions of $4\frac{1}{2}$ million square feet. Large stocks of kittysols, which at the close of 1906 awaited a favourable market, were sent North; but carelessness in manufacture has brought the Wenchow kittysol into disrepute, and the successful competition of the superior Hankow-made article and the less cumbrous Japanese cotton umbrella have deprived the trade of its profit.

(b.) *Reshipments Coastwise*.—No remarks.

(c.) *Coastwise Arrivals*.—The aggregate value of foreign goods imported was, approximately, *Hk.Tts* 850,000, fully 18 per cent. less than in 1906, a decrease which clearly demonstrates the straitened circumstances of the district. The total importation of kerosene oil, 611,870 gallons, has receded slightly. Stocks were maintained on a reduced scale and dealers profited little. Sumatra oil, though still retaining the lead, has declined 300,000 gallons, and its position as the most popular illuminant has been challenged by oil from Borneo—255,900 gallons,—which made its entry on the market for the first time during the preceding year. Russian oil has completely disappeared from the port's returns. Native goods have advanced, notably cotton yarn, which rose to 6,758 piculs, and over 5,000 piculs of which were the spinnings of Ningpo factories. The good quality and low cost of Ningpo yarn have gained for it public favour at the expense of its Shanghai rival. Flour from the Shanghai mills has been very generally used as a substitute for rice, and 13,344 piculs, valued at *Hk.Tts* 48,860, were imported.

5. INLAND TRANSIT.—No remarks.

6. SHIPPING.—The greater frequency of steam communications with Shanghai, which began in 1906, has been well maintained throughout 1907. As a precautionary measure against possible competition, but not arising from any exigency of trade, the China Merchants Company kept two of their vessels on the Wenchow-Shanghai line during the greater part of the year. In December the Osaka Shosen Kaisha inaugurated a steam service to Formosa, principally for the shipment of leaf tobacco. An additional steam-launch for towing purposes under Inland Waters Regulations has been placed on the Wenchow-Juijan canal, evidence of the growing popularity of this quicker method of travelling.

7. PASSENGER TRAFFIC.—No remarks.

8. TREASURE.—No remarks.

9. OPIUM.—(a.) *Foreign*.—No remarks.

(b.) *Native*.—Little abatement, if any, is visible in the cultivation of the poppy in the outlying districts. Last season's crop gave an excellent yield. Under tungshui regulations 12.84 piculs of native opium, valued at *Hk.Tts* 6,469, and 62.75 piculs of opium juice, valued at *Hk.Tts* 31,613, were exported.

10. MISCELLANEOUS.—No remarks.

J. M. MOORHEAD,

Acting Commissioner of Customs.

WENCHOW, 28th February 1908.
