

WEATHER FORECAST

For 24 hours ending 5 p.m., Sunday:
Victoria and vicinity—Moderate to fresh southerly and westerly winds, generally fair and cool.

VOL. 65 NO. 63

ARREST IN JANET SMITH MURDER CASE EXPECTED

HON. P. C. LARKIN WILL SHORTLY BE A VISITOR HERE

Canadian High Commissioner in London in Winnipeg Last Night

Says Next Decade Will be Most Prosperous in Canada's History

Hon. P. C. Larkin, Canadian High Commissioner, will shortly pay a visit to Victoria. He was in Winnipeg last night on his way to this coast, as the following dispatch indicates:
Winnipeg, Sept. 12.—An optimistic message to people of Canada was given here last night by Hon. P. C. Larkin, Canadian High Commissioner in London, who predicted that the next ten years would be the most prosperous in Canada's history. A good feeling exists in the Old Country toward Canada and without doubt the Dominion is in a better position than any other country in the world at the present time, Mr. Larkin declared.
The High Commissioner, who is en route to Victoria, will stop off at Edmonton.

WATERSHED ROW OVER; WOODWARD SATISFIED NOW

Agrees to Accept Assurance Nothing Will be Done Until Premier's Return

Patullo Back But Has Nothing to Say; Maxwell Smith Protests Dewdney Poll

That the controversy between the Government and Vancouver members of the Legislature over the proposed sale of timber in the Capilano watershed reserve has been settled was evident today following the announcement from Vancouver that nothing would be done about the sale until the return of Premier Oliver from the East.

According to dispatches from Vancouver Charles Woodward, Liberal Member who threatened to resign unless the timber sale was called off, has received a letter from the Government assuring him that there is no immediate cause for alarm and that the whole question will await the Premier's return from the East.

Mr. Woodward said to-day that he was satisfied to accept this assurance. He explained also that his threat was not to resign as a Member of the Legislature, but only as a supporter of the Government.

When Hon. T. D. Patullo, Minister of Lands, returned to his office to-day, he pointed out that he had an opportunity yet to discuss the timber question with his colleagues. "I have not heard the latest ultimatum from the Government, but I have not had time to formulate a policy," he remarked.

The watershed controversy is the only point of interest to relieve the usual dull before the opening of the Legislature. The only other development in the political situation is the decision of Maxwell Smith, defeated Liberal candidate in Dewdney, to protest the Dewdney election.

"I consider that I have good legal grounds for this protest, and that the circumstances fully justify such action," Mr. Smith said last night. "I have no desire to be elected merely on technicalities and I do not propose to be defeated by technicalities. A number of absentee votes were not counted because they did not reach the Dewdney returning officer till after the count had begun. Technically these votes could not be counted. In reality they were perfectly good votes.

"Under all the circumstances I think the voters of Dewdney will be better satisfied if there is a new election. There are good grounds for a protest which could not be raised on a recount."

VETERAN BELGIAN JOURNALIST IS TO VISIT COAST CITIES

Winnipeg, Sept. 12.—An interesting visitor to British Columbia coast cities next week will be J. Strauss, honorary president of the Press Association of Belgium. He left for the coast Friday, traveling through Canada as the guest of President Beatty of the Canadian Pacific Railway and renewing acquaintances with the country he first visited sixty years ago. The veteran journalist is eighty-four years of age.

EARTH SHOCKS RECORDED HERE TODAY PROBABLY HAD CENTRE NEAR PHILIPPINES

A severe earthquake was recorded at Gonzales Heights Observatory this morning. The first wave commenced at 6.47 a.m. and three hours later the record was still continuing. The distance is estimated at 6,000 miles, the centre probably being in the vicinity of the Philippine Islands or at some other point in the Southwest Pacific.

MINISTER INSPECTS WORK AT ESQUIMALT DRYDOCK

Hon. J. H. King Is Warmly Welcomed Here; Will Remain in West Until Arrival of Prime Minister; Says Government Gained Strength Last Session.

Welcomed by political and official friends, Hon. J. H. King, Minister of Public Works for Canada, arrived here this morning with Mrs. King, and devoted the morning hours to a visit to the Parliament Buildings and to the Esquimalt drydock.
Dr. King was received by H. H. Shandley, president of the Victoria Liberal Association; W. M. Ivel, former president; Henry C. Hall, K.C.; R. E. Beattie, commissioner of the Vancouver Harbor Board; W. D. Balfour of Vancouver; E. E. Brydone-Jack, supervising engineer; J. P. Forde, district engineer of the department, and B. C. Nicholas. With Dr. King traveled K. M. Cameron, chief engineer of the department, who, with Mrs. Cameron, arrived in British Columbia several weeks ago to inspect harbor works.

Dr. King asked The Times to intimate that he would receive deputations on public matters between the hours of 10 and 1 o'clock on Monday at the Post Office Buildings.

MINISTER'S PLANS
The Minister arrived at Vancouver Thursday from the Okanagan Valley, where he has been engaged in looking into the situation arising from the Yale vacancy, and yesterday spent the day at the New Westminister Exhibition, which two years ago he opened. In the evening he spoke at a political gathering in Vancouver.

The visit on this occasion will be brief as he is due back in Vancouver on Tuesday to speak at the Laurier Club. He contemplates a visit to his riding, East Kootenay, at an early date.
The Minister will stay in British Columbia until the arrival of Premier Mackenzie King in the West, and expects to join him at Edmonton on October 16, and Dr. King forecasted that the public meeting will be held on the second evening of the Premier's stay, though arrangements will be announced before Dr. King leaves Victoria.

HOME BANK PAPERS ARE PHOTOGRAPHED

Exhibits at Trial of Former Officials Are Being Worn Out

Toronto Judge Agrees to Scheme of Counsel so Evidence May be Saved

Toronto, Sept. 12.—Already some of the exhibits at the Home Bank trial are becoming badly used up from the constant handling to which they have been subjected since the bank suspended, and at an informal session convened by Judge Coatsworth to-day it was suggested by the prosecuting counsel that a number of them should be photographed. To this the court offered no objection.
That was the only subject discussed at to-day's session, which lasted only a few minutes.

BRAKEMAN KILLED

Winnipeg, Sept. 12.—Charles Dowd, a Canadian Pacific Railway brakeman, was killed near Lumburg, Sask., Thursday night.

Saskatchewan Wheat Put At 126,000,000 Bushels

Winnipeg, Sept. 12.—The final estimate announced by the secretary of the Saskatchewan Co-operative Producers' Wheat Pool on the wheat crop puts it below the last Federal Government estimate of 147,000,000 bushels. The pool organization places the average yield over the entire province at ten and a half bushels to the acre and the aggregate yield at 126,000,000 bushels. Last year the Saskatchewan yield of wheat was 278,000,000 bushels.

MADE DEFENCE DAY SPEECH OVER RADIO; PRESIDENT COOLIDGE

When President Coolidge spoke by radio last night at the conclusion of Defence Day in the United States his words were heard in Victoria. In the parade demonstration throughout the republic yesterday 16,000,000 men participated.

RECOVER BODY OF MAN FROM SOOKE RIVER

Vincent Hicks, Well-known Athlete and Musician, Victim of Tragedy

Friend Made Courageous Attempt to Save Chum From Devil's Pot Hole

After a difficult task through working in an eight-foot canyon with rocks rising to a height of sixty feet on either side, the Provincial Police, with the assistance of other helpers this morning recovered from the water of the treacherous Devil's Pot Hole of the Sooke River, the body of Vincent Hicks, twenty-nine-year-old son of the Rev. J. P. Hicks, 617 Drake Avenue. The young man was drowned there yesterday between 4 and 5 o'clock and the body was at the bottom of about fifty feet of water.

Alan D. Macey, of 1003 Redfern Street, friend of the late man, made a courageous effort to save his friend but was unable to reach him in time.

The tragedy, which is the second drowning fatality in the vicinity of Victoria in two days, is particularly sad as the two friends were spending a happy vacation camping in the woods. (Continued on page 2)

FIRE INSURANCE RATES RAISED IN TERMINAL CITY

Vancouver, Sept. 12.—Nothing will prevent the ten per cent increase in fire insurance rates going into effect, John L. Noble, secretary of the British Columbia Fire Underwriters' Association, announced, following a conference between the governing body of underwriters and three members of the Vancouver City Council.
"The underwriters had nothing to offer in the way of an increase in the fire department," said Mr. Noble. "As a result the underwriters have no alternative but to carry out their announced intention of increasing the rates ten per cent on September 15."

EX BRAKEMAN IS AWARDED \$31,759 AGAINST RAILWAY

Saskatoon, Sept. 12.—Herbert W. Phillips, thirty-six, a freight conductor of Biggar, Saskatchewan, was granted \$31,759 damages and costs against the Grand Trunk Pacific Railway by a jury here yesterday for injuries received at Reford, Saskatchewan, on September 27, 1923, when he was hurled from the top of a freight car and made a hopeless invalid.

WOMAN CURES DRUG HABIT BY GOING TO PRISON

Winnipeg, Sept. 12.—A woman narcotic drug addict formerly prominent in local society applied at the provincial jail and asked to be locked up. "I want you to lock me up," she said. "I want to be put where I can get no more dope until I can get rid of the habit." So persistent was she that a charge of vagrancy finally was laid against her and she is now an inmate of the jail. The prison physician will have her under his supervision until the expiration of her sentence.

LLOYD GEORGE WOULD REBUILD WORLD LEAGUE

Says U.S., Germany and Russia Should be Among the Members

BY THE RIGHT HONORABLE DAVID LLOYD GEORGE O.M., M.P.

Former British Prime Minister

London, Sept. 12.—The great peace demonstration at Geneva, which was to be the peroration of London, has ended in emphasizing the fundamental disagreements of Britain and France. Mr. Ramsay MacDonald's pronouncement on peace and universal concord has infuriated Frenchmen of all sections and divided Europe into two rival camps. The Right and Left in France are, for the first time, in agreement. They both profess unqualified disappointment, rising into indignation, over the British speech and Mr. Ramsay MacDonald's pronouncement. The Right and Left in France are, for the first time, in agreement. They both profess unqualified disappointment, rising into indignation, over the British speech and Mr. Ramsay MacDonald's pronouncement. The Right and Left in France are, for the first time, in agreement. They both profess unqualified disappointment, rising into indignation, over the British speech and Mr. Ramsay MacDonald's pronouncement.

When it was officially announced that Mr. Herriot and Mr. Ramsay MacDonald meant to travel together to the Geneva shores, it was assumed they had a common message to deliver to the expectant nations. It is now quite clear that the two premiers had never compared notes before they left for Geneva. The Chequers mistake had been repeated. They interchanged platitudes, performed with the increase of the amplifying multitudes from the Clyde to the Saone and took it for granted that a repetition of these phrases meant agreement. But they were disappointed. Nevertheless it remains that the two premiers had never compared notes before they left for Geneva. The Chequers mistake had been repeated. They interchanged platitudes, performed with the increase of the amplifying multitudes from the Clyde to the Saone and took it for granted that a repetition of these phrases meant agreement. But they were disappointed. Nevertheless it remains that the two premiers had never compared notes before they left for Geneva. The Chequers mistake had been repeated. AT THE THEATRES

BRADY SUCCESS IS SCRYELED FOR FOX BY EMMETT FLYNN

The William A. Brady stage success by Jules Eckert Goodman, from the novel "The Man Who Came Back," comes to the screen under the banner of William Fox as one of the new special productions of unusual possibilities. The novel by John Fleming Wilson, was one of the best sellers a few years ago and the play was a merited success.

George O'Brien and Dorothy Mackall have the leading roles in the picture which comes to the Capitol Theatre next week for six days. Others in the cast are Cyril Chadwick, Ralph Lewis, Emily Fitzroy and Harvey Clark. Emmett Flynn was the director.

It will be recalled that the story narrates the tragedy of a wealthy young New Yorker who goes the pace that kills, winding up as a beach comber in the Orient. Drugs and liquor have robbed him of his manhood. His fall offers a wealth of dramatic possibilities. His rise, due to the influence of a good woman, is equally as spectacular, so that the picture promises to contain more than the usual mixture of romance and action.

AT THE THEATRES Capital—"Open All Night." Dominion—"Empty Hands." Playhouse—"Slave of Desire." Pantages—"The Law Forbids." Columbia—"The Trouble Shooter."

Hayden Stevenson BECAME LAWYER IN "THE LAW FORBIDS"

HAYDEN STEVENSON BECAME LAWYER IN "THE LAW FORBIDS"

Hayden Stevenson forgot he was a fight manager and dropped his genial role in the "Leather Pushers" serial to become a lawyer in "The Law Forbids," the latest Universal Jewel de Luxe production with Baby Peggy and an all star cast which is having its first local showing now at the Pantages Theatre. Jess Robbins directed from an original story by Bernard McConville. The cast includes such well known film players as Elinor Fair, of "Driven" and "Kismet"; Winifred Bryson, of "Thundering Dawn" and "The Hunchback of Notre Dame"; William E. Lawrence, the stage star, and many others.

WILDERNESS STAGE FOR "EMPTY HANDS" NOW AT DOMINION

"Empty Hands," at the Dominion Theatre is an Arthur Stringer story which Carey Wilson adapted to the screen. It deals with the adventures of Grimshaw, a mining engineer, and Claire Endicott, a wealthy society girl, who are lost in the wilderness and are compelled to wrest a living from Nature with their empty hands. It is hard to imagine a situation

which more intrigues the mass mind of humanity, and when the locale is set amid towering peaks, placid lakes and rushing rivers, it is warranted to give the spectators a thrill that comes but once in a life-time.

Jack Holt is given one of the best opportunities of his career in this picture and a role that eminently suits him. Needless to say he gives an excellent performance. The rest of the cast is also deserving of high praise. Norma Shearer combines loveliness with acting ability, and makes her part stand out. Charles Clark, Gertrude Olmsted, Ramsay Wallace, Ward Crane, Hank Mann and Hazel Keener are more than adequate in their respective roles.

"TROUBLE SHOOTER" WITH TOM MIX IS EXCELLENT PICTURE

In a career notable for good pictures, Tom Mix has done nothing more pleasing than his portrayal of "The Trouble-Shooter," which closes a three day showing at the Columbia Theatre to-night. The story by Frederick and Panny Mattson, deals with a western wire repairman for a big mountain power company. In the cast with the western star are Kathleen Key, Earl Fox, J. Gunnis Davis, Howard Truesdale, Frank Currier, Mike Donlin, one time big league ball player; Dolores Rousee, Charles McHugh, and Al Freeman. The picture was directed by John Conway and Mix never did better work, nor did Tony play up to better advantage.

The plucky little horse is with the cowboy actor in every thrilling scene and there are many of them.

MUSICAL COMEDY OPENS AT ROYAL ON MONDAY NIGHT

Preparations are complete for the launching of the musical comedy "To-night's the Night," at the Royal next week. The big house has been the scene of much rehearsing, scene painting and costuming for some time, but at last the finishing touches have been put to all the various departments, and in the opinion of those who have had the opportunity of seeing the arrangements, a well nigh perfect show will be the result. The Royal augmented orchestra will be in attendance and they will have some of the prettiest and catchiest of music to play. The box office is now open.

PRINCE'S PROFITS PUT BACK INTO ALBERTA RANCH

Canadian Holdings Not Yet as Profitable as Duchy of Cornwall

Wales' Financial Adviser Says British Heir at Home on the Range

New York, Sept. 13.—Sir Walter Peacock, financial secretary to the Prince of Wales for Cornwall, arrived here from England to precede the Prince to Canada.

He laughed at the suggestion that he was here to replenish the Prince's funds, saying there was no need for that; he did not think the Prince was in need of money.

Sir Walter was asked if it were true that the Prince's investments in England were so extensive as ultimately to make him the richest king in Europe. He replied by asking: "Who is the richest king in Europe?" Then he said the Prince was not so enormously wealthy.

The financial secretary was more talkative on the subject of the Prince's ranch. He said it had approximately 4,000 acres, but was not a paying proposition yet. The Prince, he said, was raising blooded short-horn cattle and fine horses. The profits now and for several years would be put back into the ranch for improvements, he said.

PRINCE RIDES RANGE

When the Prince goes to Canada he shoots, but does not engage in any particular sports, Sir Walter said. There is neither a golf course nor a polo field on the ranch. The Prince rides the range. Given time, Sir Walter said he thought His Highness would make an excellent cow puncher.

The Duchy of Cornwall, according to Sir Walter, is far more remunerative than the Prince's Canadian possessions. Most of the Prince's revenue is derived from Cornwall, he said.

NEW GUINEA NOW AUSTRALIAN PROBLEM

White Men Cannot do Manual Work in Mandated Territory, Says Commissioner

Sydney, Australia, Sept. 13.—Australia is not so sure now that New Guinea after all. Col. Answorth, formerly Chief Administrative Commissioner of Kenya Colony in Africa, has reported adversely to the Commonwealth Government regarding the administrative arrangements there. He declares it is doubtful if ever white men will be able to perform manual labor in that country. He favors Asiatic or Indian labor, as otherwise the condition of the country will be stationary or retrogressive.

THE GOVERNMENT'S FINISH

It's All Over But the Last Sad Rites, and Even They May Be Abandoned; Dirty Work at the Political Crossroads Brings Just Retribution.

If the Government had any finer feelings the developments of this week would have made it crawl up the stairs to the dome of the Parliament Buildings, clamber up the golden sides of Captain Vancouver's statue and hurl itself from this point of vantage into the inner harbor. But, as has been frequently remarked in many places, governments never have any finer feelings. Governments never hurl themselves from points of vantage into inner harbors or anywhere else. Governments are a bad lot.

And so, despite the developments of this week, the Government is going on much as usual. Despite the developments of this week, Cabinet Ministers, who have no finer feelings, still hurry to Cabinet meetings, crowned with that petstive-by-election look which developed shortly after the general election; new members of Parliament from the Great Open Spaces of the Interior, who are men and politics is still a delicate little flower and not the heavily-scented bloom which flourishes in the softer climate of the Capital, still arrive here unexpectedly to find out just what they are supposed to do now that they are Statesmen; mysterious strangers, who know all about the political situation in North Okanagan or think they do, still fit into minister's offices and fit away again like shadows. It is all very distressing to people of finer feelings.

The developments of this week, as might be suspected, were at once dramatic and inspiring, and as might also be suspected, they centered around what appeared to be very like the last and final proceedings of the Society for the Creation of a Me-

had failed to interest the Government to any considerable extent in our great work that he could not call his visit a complete success and that he had failed to see the Government at all. Mr. Wobble stated that he had waited for an hour to see a certain Cabinet Minister on the subject of our great work and that at the end of this time the Premier, and not he, was admitted to the presence of the Cabinet Minister. (Cries of Shame! Shame!) Mr. Wobble further stated that he considered this an outrage (Cries of Hear! Hear!) and that he did not, for his part, see how the country could go on if the Government continued to govern in this way.

At which point Colonel Fitzbooz, president of the Society, stated that the action of the Government was not British and not cricket, by Jove. (Groans and Hisses).

A GREAT PLAN

The minutes further relate that Mr. Froth contributed the larger part of the proceedings himself and finally proposed the plan which may even yet cause the Government to immerse

Mysterious Strangers Flit in and Flit Away Again Like Shadows

more to the Spirit of Victoria. What that notable organization did was so cruel, so devastating, so utterly humiliating that the Government even yet may be expected to clamber up to the dome of the Parliament Buildings and dive gracefully into the clear, limpid waters about the Causeway. If the corpse of the Government is found floating there one of these fine mornings we will know what has happened, and that will be a great comfort. When one looks back on this week's proceedings of the Society for the Creation of a Memorial to the Spirit of Victoria one is wroth to the conclusion that the only reason why the Government has not sought refuge in the clear limpid waters that ripple sweetly about the Causeway is that the Government has not yet heard about those proceedings.

A SAD RECORD

In brief, as set down in the minutes of Percival Froth, Secretary of the Society—who, it is true, may be guilty of some slight bias on account of the well-known and mighty Victorian spirit that surges beneath his well-starched vest front which, by the way, is well suited for surging as it is not attached to shirt or sleeves or anything at all—as set down in the minutes of Mr. Froth, the proceedings of the Society opened as follows: "Mr. David Wobble, M.P.P., reported to the Society on his interview with the Government on the subject of a grant to the Society to fund the proposed work. Mr. Wobble stated he had been unable to secure a grant of money immediately, that

THE COACH'S JOB

Something of the taskmaster, the general and the diplomat, and a lot of the doctor, must be hidden away in the man who would be the coach of a successful football or track team. Emergencies of all kinds are his daily routine. A thorough knowledge of first aid is as essential as a knowledge of the game played by his men.

Bumps, bruises, strained ligaments and muscles are every day happenings, but the coach never becomes contemptuous of them. He knows that if neglected, they may result in anything.

Trainers everywhere keep Absorbine in their lockers. They use it not only on their horses, but on their own bodies for the skin and blood protection of its disinfecting properties. In one convenient container it combines the functions of a nurse in preparation.

It is the first of all the First Aid requisites in use in all of the leading athletic clubs.

And there are just as many everyday uses for Absorbine Jr. in the homes of Canada as there are in the training camps. Always keep it in the home where you can "jump to it" in case of emergency. \$1.25 at your druggist.

and "Aw, aw," and "By Jove," nervously, many times. Mr. Froth added that he did not like to do what he was about to do, and called upon the meeting to bear witness that he did not like it and again his elevator commenced its noon-hour schedule, although this is omitted from the minutes, too. However, there were times when a man must take the law into his own hands. There were times when revolution was a sacred duty. There were times when the Worm must turn and heard the Lion of Oppression in his Den, said Mr. Froth, not bothering, however, to explain how this interesting feat could be performed.

And so Mr. Froth finally moved and it was unanimously carried: "That this Society declares that the Government has lost the confidence of the people of this Province as proved by the fact that not one member of the Society is willing to defend the actions of the said Government in regard to the said Society, and that fully realizing the awful nature of this proposal, this Society demands that the Government immediately resign."

As the meeting broke up Colonel Fitzbooz was heard to remark hoarsely: "That will fix the blighters, by gad! Haw! Haw! And serve 'em jolly well right, too!"—B.H.

Cunard CANADIAN SERVICE

The Pleasure Way to Europe

LIKE magnificent and modern hotels, with all their comforts and conveniences — are the ships of the Cunard-Canadian Line, with their luxurious lounges, dining rooms, music and writing rooms, orchestras and hosts of trained, courteous attendants.

And in addition, are open and covered promenades; ocean breezes to create an appetite and meals that satisfy it; in fact, everything that will add to your pleasure that 24 years of experience in transatlantic travel can devise.

Five Cunard-Canadian ships to serve you — the famous "Pretty Sisters," the "CARMANIA" and "CARONIA," sailing from Quebec to Queenstown and Liverpool — and the popular "A" ships, the "ANDANIA," "ANTONIA" and "ARADIA," sailing from Montreal to Liverpool, Cherbourg and London.

Cunard standard of courtesy and attention prevails — whether you decide to travel Cabin or Third Class. Let the Cunard Agent in your town plan your trip. He will give you full information as to sailing dates and rates; or you may write to

DR. KING'S VISIT

VICTORIA always appreciates the opportunity of welcoming a Cabinet Minister from Ottawa. The Government is a heavy investor in this section of the Province and there are matters associated with the nation's property which demand the personal attention of a representative of the Dominion Ministry from time to time.

On this occasion the Minister of Public Works will naturally desire to combine business with pleasure; he comes to British Columbia after a long grind in the House of Commons and a steady diet of important departmental labors; but he will no doubt follow precedents which he has already laid down and use most of his waking hours in meeting as many of the people of Victoria as may be possible in order to refresh himself in respect of local business which belongs to the Dominion Government in general and to his own branch of the public service in particular.

As the only representative from British Columbia in the Federal Cabinet, Dr. King has a large responsibility on his hands; the expanse of territory to which his important position in the inner councils of the Government has wedded him in this part of the country, quite apart from his obligation to the Dominion as a whole, requires more than ordinary attention and understanding; we take it, however, that the smoothness with which his Department has been running, the absence of complaint either in the provincial or national sense, indicates the success of his administration.

MILLIONS FOR BETS

FIGURES made public at the Parliament Buildings yesterday indicate that the amount of money wagered at the Victoria and Vancouver race meets this year will run fairly closely to \$6,500,000.

The second week's racing at each track—with one important exception—reveals an increase in the amount wagered of from \$100,000 to \$150,000. The exception is the Hastings Park fixture which has just taken place. Returns in this instance show that, while \$952,294 was the amount involved during the first meet, the second event attracted only \$844,710 of the people's money. Here is a reduction in the value of the bets of \$107,584. This is the only racing under the existing system of wagering which has taken place since public attention was called to the amount of money which is being kept out of circulation in the regular channels of trade.

Victoria's second Willows fixture—the fourth week of racing in this district—commences to-day. On the first occasion a few weeks ago the amount wagered at this track was \$429,723, which brings the season's betting here up to \$1,066,717. It will now be interesting to watch and see if Victoria follows the example of Vancouver and curtails its bets. Meanwhile representatives of various civic organizations in the Terminal City will address a mass meeting on Monday night in protest against what they describe as "the present orgy of horse race gambling."

SCARCELY LIKELY

SOME British politicians are fondly imagining that the electorate is losing considerable sleep over the Anglo-Soviet treaty. Mr. Lloyd George seems positive that an early election will be brought on with this business as the chief issue. The editor of The London Times told an interviewer on his arrival in Quebec the other day that it is proving "adverse to trade conditions and causing an increase in unemployment." By what means it has thrown more people out of work is not made clear in the dispatch which came over the wires yesterday. The visitor in question may have an explanation of his own.

Mr. Lloyd George says the treaty is a fake. It may be; it may be one of the most serious mistakes which the MacDonald Ministry has made; it will be an important election topic; but it seems inconceivable that either Liberals or Conservatives will defeat the Government and send it to the country, thereby doing Labor out of what it considers the precious accomplishment of years of progress and education, on this pretext when it has allowed Mr. MacDonald to regard House defeats on such questions as housing, unemployment, and public health, as a mere matter of expediency and not requiring his resignation.

Incidentally, did not Mr. Lloyd George permit the Krassin mission from Russia to visit Britain in the interest of trade resumption? And is it not a fact that the electorate as a whole was not seriously opposed to formal recognition of the Soviet Government as the de jure government of Russia? But a large loan, of course, is another matter—while the prospect of adequate guarantees is by no means a rosy one. At the same time it will possibly strike most people that the Welshman's speech at Penmaenmawr is another attempt to raise a

breeze upon which he might ride back to political prominence?

Certain it is that unless Conservatives and Liberals "play the game" and select an issue for a general election which goes right to the heart of the nation's affairs, an issue more simple of understanding by the masses, the workman will consider that the Government has been trifled with and turned out of office by the lowest form of political strategy—the desire for a return of power. That will mean Labor with a working majority—just what Conservatives and Liberals do not wish.

THE RIGHT SPIRIT

"If Canadians would appreciate what they have got, and praise on every occasion the wonders and advantages that they possess, they could expect more confidence and faith from the people south of the border."

THIS is a remark which one of the Winnipeg-to-Victoria automobile trail blazers made at the Canadian Club luncheon yesterday. It embodies a sentiment which should appeal to every individual who believes that community progress depends to a very large extent upon personal effort and personal example. It should be taken to heart by the individual who has sufficient of this world's goods to enable him to live his life in an atmosphere of complete indifference as to how other people get along.

The sort of advertising which Captain Evans, the speaker referred to, recommends to Canadians costs nothing beyond a little personal effort and requires nothing more than an honest belief in the country's manifold advantages. The optimist can employ it at once and the better times which its use will insure will soon engulf the pessimist and convert him into a more useful member to the community before he has had time to decide otherwise.

IMPORTING ONTARIO FRUIT

IN a recent issue of The Toronto Globe there was an account of a train wreck at Lefraux which contained these words: "In the fruit express car there were 2,000 baskets of fruit on their way to the Pacific Coast—to Vancouver."

A Georgian Bay reader of our Toronto contemporary wonders "why the people of British Columbia have to pay express charges on fruit clear across this continent when, according to reports, the Okanagan Valley is an Eldorado for the fruit men—and fruit goes to waste every year." This same authority also informs The Globe that a Georgian Bay town this year had shipped one car of canned strawberries and that the car had passed through the hands of no fewer than three brokers.

There seems to be no reason to doubt the accuracy of the information which has been supplied to The Globe by one of its readers in the Georgian Bay section of Ontario. Small wonder that he should be puzzled at this coast's need to import fruit from Ontario when the orchardists of the Okanagan Valley never seem to weary of telling the Government how impossible it is for them to market their products and make a decent living.

Strawberry production in a matter of very considerable interest to Vancouver Island. The fact that a car load of the canned variety was shipped to this Province from Ontario once more suggests that the local crop could be doubled and easily disposed of if an adequate water supply could be assured at the right time. In any case it ought not to be necessary for British Columbia to depend to the slightest extent upon Ontario berries.

The politician who goes about preaching ruin is hardly likely to win votes.

During the last five years Prussia has paid the ex-Kaiser \$8,000,000. Napoleon would have liked half William's fortune and freedom.

Captain Evans told the Canadian Club yesterday that it should be the duty of Canadians to praise Canada. Of course it should; but the trouble is easy to find; tastes are getting more expensive and most people overlook the all important item of personal service which may be rendered with little trouble and without cost.

The editor of the Farm and Ranch Review of Calgary has just returned from the other side of the Atlantic and declares that free trade is ruining England. Mr. Meighen is saying similar things about Canada; but his own party is beginning to wonder if it would not be better to get a leader with a less doleful outlook on things in general.

SAFETY FIRST

From Sara Gene (Paris)
"What precautions do you take against microbes?"

"First, I boil the water—"
"Then I sterilize it—"
"Then I drink it—"
"Then I drink nothing but beer."

SLIGHT MISTAKE

From The Caledonian Record of St. Johnsbury, Vt.
Speaking of railroads, here is this one.

A highbrow traveler at the St. Johnsbury station approached the Portland express, which was made up and already to start.
"Is this train ready for occupancy?" he asked.
Trainman—"No sir. This train goes to Concord, Whitefield and Portland."

EARLY MORNING AT BARGIS

Clear air and grassy lawn—
Stream song and cattle-bell—
Dear man, what fools are we
In prison-walls to dwell!

To live our days apart
From green things and wide skies,
And let the vital life
Be cut and crushed with lead!

Bright peaks—and suddenly
Light floods the placid dell,
The green tops burst any day,
A good crop it will be.

So, all is well!
A man, what fools are we
In prison-walls to dwell!
—Hermann Hagedorn.

Dr. Frank Crane
On "Science and Crime"

(Copyright)

MR. BURDETTE G. LEWIS, the Commissioner of Institutions and Agencies in New Jersey, and in charge of the prisons and hospitals of that State, writes:
"Society can wipe out a great proportion of crimes of violence, and indeed of all crimes, whenever it wants to."
His plan is to detect dangerous abnormalities in childhood and correct them. He thinks, however, that criminals of certain groups are beyond cure at birth. Among these are moral imbeciles, persons who have no power of distinguishing right from wrong. Even in these cases, he contends that medical treatment given to the mothers before birth might result in the subject's coming into the world normal.

"It is chiefly through the schools, public and private," says Mr. Lewis, "that the ideal community of the future will do its work of detecting the possible trouble makers. The search will not necessarily be for 'bad boys,' so-called. The net may let them slip, but its meshes as being perfectly normal boys and it may catch him who never gives the teacher a minute's worry."
"Such a net was spread, recently, in a State university west of the Alleghenies. The haul showed that among the undergraduates of that institution there were forty-five moral idiots. You see how little the old-fashioned pedagogical tests really tell about character and personality. "The child ought first to be treated by the family physician, just as if he had the measles and, if the trouble is too deeply rooted, the parents should surrender him, as a public duty, to live in an environment where he will be happy and, at the same time, not be a menace to his fellow men."

One group of thinkers believes that most insanity is the result of cerebral poisoning growing out of infections within the body. "We do not let a leper contaminate the community before we isolate him, yet we keep our future slayer in our midst until he slays, then, too late, we lock him up."

Emphasis is given to these opinions of Mr. Lewis because of their bearing upon the Frank case and because of the indications that, in the future, a different line of conduct will be pursued in regard to criminals.

Montcalm's Greatest Surprise

AT 5 o'clock in the morning of September 12, 1759, Montcalm, in his Beauport trenches, which all night long he had been watching Admiral Saunders' threatened attack, heard the sound of cannon above Quebec, a sound which had no right to come from there. He spurred to a gallop in the direction of the city and drew rein at the bridge of boats across the St. Charles River. There he found the Governor, the Marquis de Vaudreuil, in a sad mixture of panic and self-importance, writing a foolish, pompous order to Bougainville, from a position from which the British could be clearly seen moving along the Plains toward the walls of Quebec.

When Montcalm had surveyed the situation he ordered up to the heights all his regulars and most of the militia from Beauport, but Vaudreuil exercised his authority to deprive him of one whole battalion of the regulars, most of the militia, and of twenty-two out of the twenty-five guns he needed. Out on the Plains the English line of red, two deep across the plateau, was not yet quite complete; the sailors were landing the artillery and entrenching material, and boat after boat could be seen rowing over from the southern shore of the St. Lawrence to the cove where Wolfe had brought his army up, each plainly filled with sailors, soldiers, marines, guns and siege equipment. His own forces had just formed their line six deep, and Montcalm had no alternative but to seize this moment for advance.

Meanwhile Wolfe, wearing a brand new uniform for this his great occasion, with a black brassard, for he was in mourning, took up his station on Wolfe's Hill, where the Quebec jail now stands. From here he saw and superintended all arrangements, giving personal orders for reconnaissance and the erection of the earthworks, and from here he hardly moved until he put himself in command of the Grenadiers to lead the advance, when a French Canadian sniper picked him off, and, mortally wounded, he was borne a few yards back to die.

THE French came marching on in slow time and in good order, halting to fire and then advancing. Some confusion resulted when the Canadian militia fired without orders and then threw themselves flat on the ground to reload. But the regulars closed up as best they could and continued their advance. The line, British line stood grimly still and waited. One British field gun was firing grape at point blank range, mowing down long lanes of men in the left of the oncoming French. A quarter of a mile, two hundred paces, one hundred paces, seventy paces—still that red line sternly waited. As men fell others stepped up to fill the gaps. Fifty paces, forty paces—Crash! came the British volley, and all the French front rank went down. When the smoke began to drift away the British were twenty paces nearer, and as fast as muskets could be emptied and reloaded the steady, deadly fire went on at twenty paces range. The French line crumbled down before that fire. Officers, generals gone, and Montcalm wounded. Suddenly the right gave way. Then the centre broke and last, outflanked, almost surrounded, moved down like grass before the scythe, the lion-hearted Royal Roussillon regiment on the left along the river cliffs retreated in confusion. Montcalm had galloped here, and as he strove to rally the fleeing men to stand against the British rush received his second, fatal, wound. Supported by a grenadier on either side, he was borne on his great, black mount, slowly down the road, then as now the Grande Allee, and through the St. Louis Gate. As the next dawn broke his spirit passed.

The rout was over and complete. Wolfe lived to hear that the French were breaking up, but died before he knew the whole glorious event. His last orders were that Colonel Burton should cut off the French retreat at the bridge of boats over the St. Charles. The French-Canadian militia, however, made so desperate a stand at the Cote d'Abraham, that they foiled this attempt.

LAI D to rest in a rough wooden box in a shell hole in the floor of the chapel of the Grey Friars, Montcalm found a soldier's English and borne ashore with all due ceremony and honor from the Fleet and from the funeral cortege passed out on its solemn way across the south of England to the town of Greenwich. There, in the family vault beneath the Parish Church, one of the two most brilliant British generals of the age was laid to rest, victorious and dead at thirty-two. Parliament voted him a monument in Westminster Abbey, but the Government refused a thousand pounds or two to carry out the wishes of the will which he had made in the mistaken belief that he had been left some

THE ROAD TO BUTCHART

To the Editors—Your timely editorial regarding the disgraceful condition of the road from the West Saanich Road (now paved to the corner) is deserving of the thanks of all owners of automobiles who have to travel to Butchart's Gardens or Brentwood Park.

Mr. Butchart has expended thousands of dollars, giving the City of Victoria a unique attraction, and the least he can reasonably expect is that the Government, the City of Victoria and the Municipality of Saanich will combine to do away with this blot on the reputations of these bodies for up-to-dateness and foresight.

We are spending over \$30,000 for publicity in the successful endeavor to attract tourists, and Butchart's Gardens is featured in all our pamphlets, etc., as the one which must be seen, and over ninety-five per cent. of the tourists visit it; yet, in the face of this we allow them to travel over a mile of the worst road between here and Mexico.

"Doubtless if the 'powers that be' could hear the remarks that are passed relative to the existing condition of the road prompt action would be taken.

This is a matter which could well be taken up by the Chamber of Commerce, Publicity Bureau and other public bodies and something done this Winter to make the road, if not a paved highway, at least not a menace to pursuing how a matter of this kind is allowed to continue when we are spending thousands on things not half as important.

"ONE WHO HAS SUFFERED."

SHAREHOLDERS in any limited liability company should see to it that their chief executive is insured in favor of the company. Reorganization, if the chief's death occurred, might otherwise be expensive or well nigh impossible. A fund of ready cash would be required by which redistribution of the stock held by the widow or other heirs might be facilitated.

The most economical business insurance is a policy in the Mutual Life of Canada. A Mutual Life policy provides insurance at net cost in a company ranking among the soundest of Canada's institutions.

For particulars call our nearest agent or write direct to Head Office.

FLORSHEIM THE SHOES FOR WELL DRESSED MEN
Modern Shoe Co. 1300 Government St. Phone 1856

Hospital W.A. Resumes—Yesterday afternoon the Womens Auxiliary of St. Joseph's Hospital held the first of their regular monthly meetings after the Summer holidays. The meeting, which was well attended, was presided over by Mrs. F. J. Sell. The sewing, which has been done during the Summer, amounted to 2,300 pieces. It was decided to hold the bazaar on November 13 at St. Joseph's Hospital.

A great deal of truth in this old saying. And how well it applies to you and your home surroundings! You get tired of seeing the same colours and patterns on your walls, Winter and Summer. The monotony affects your personality and temperament. Change your wallpaper, and change it often! Your home will be a healthier and happier place to live in. Your disposition will be benefited—your efficiency increased. Staunton designs, chosen in the greatest art centres of the world—London, Paris, and New York—lend new beauty and charm to any room. Staunton Semi-Trimming largely eliminates the muss and trouble usually connected with repapering, and effects a substantial saving in money and time.

Your dealer will show you this famous line.

Our Fall Millinery Opening

Monday, Tuesday and Wednesday

A Grand Display of the Season's Popular Styles

We are commencing the Fall Millinery Season with a display of hats that includes every style and popularity that has won fashion's approval this Autumn.

In this display are English, French and American models as well as the most exclusive French productions. All the new shapes are here, trimmed in various styles that are now in Vogue in the greater fashion centres. Hats suitable for every type of beauty and all beautiful in their individuality. Among the favorite colorings are black and gold, crushed strawberry, cactus, green and toast; and other colorings as desired.

We have a full range of fashionably trimmed hats, in velvet, bengaline silk, embroidered duvetyn, wing and floral trimmings, large and small fittings. Prices range from **\$3.50** to **\$10.50**

There is a wonderful selection of clipped beavers, and Austrian velours; large and small shapes in all prevailing colorings and styles, **\$5.95** to **\$9.75**

A large variety of Misses' Felt Hats, in dainty and useful colorings; smart little shapes **\$1.95** to **\$5.50**

A full selection of Children's Hats for dress or school wear at moderate prices.

You are cordially invited to visit the Millinery Department Monday, Tuesday and Wednesday to view this first display of the prevailing styles for Fall.

CHINESE WEDDING A UNIQUE EVENT

Three Hundred Guests Saw Marriage of Frank Ho Lem and Miss Low of Victoria

Calgary, Sept. 12.—For the first time in the history of Calgary a large Chinese wedding was solemnized in a Christian church. At Knox Church Monday evening at 7.30 o'clock the marriage of Nellie Low, daughter of Low Wual Dong of Victoria to Frank Ho Lem of Calgary took place.

At the appointed time the bride entered the church with her brother, Boo Low, who gave her in marriage. Her gown was of simple white Chinese figured silk and was finished with a wide band of feathery trimming on hem and sleeve line.

SIDNEY

The court whist drive and dance held under the auspices of the Sidney Tennis Club at Beach House on Thursday evening was a very enjoyable and successful one. Six tables were occupied for cards.

SEES INDICATIONS OF REVIVAL OF TRADE IN JAPANESE SQUARES

First Big Shipload of This Out of Lumber From Local Mills to Japanese Ports Leaves on Steamer City of Vancouver at Midnight, and Mill Officials Believe Victoria Will Benefit in Future.

The freighter City of Vancouver, owned and operated by the Coughland interests of British Columbia, is sailing at midnight to-night on the first leg of her journey to Japan with the first big consignment of Japanese squares to leave this port for almost a year. The Canadian Puget Sound Lumber Company has been loading the vessel here for the past few days and is putting 500,000 feet into her holds. The order was for 550,000 feet, but the steamer will not wait until the company loading her can get the remaining 50,000 feet into her holds. It would only be by sawing at topmost speed that the shippers could get the remainder of the order into the ship by Monday evening, but the steamer cannot remain here as she has to fill an order at Port Alice loading pulp.

"In the order which we have just been placing aboard the City of Vancouver," said W. Johnston, of the Canadian Puget Sound Lumber and Timber Company this morning, "we see a revival of the trade in Japanese squares with the Orient. Previously, more than a year ago, this trade was a source of great revenue for Vancouver Island mills, but there came a slump, and big orders were given us. The mainland benefited through the smaller orders, for we could not get ships to call here for anything less than half a million feet. Consequently we had to ship to Vancouver by barge if we wished to take an order. The result was that the Vancouver or other mainland mills could outbid us and we were unable to successfully compete with any profit to ourselves. Thus the trade has been slipping past."

CHANCE OF FUTURE TRADE

Mr. Johnston, however, has been working hard to obtain orders from the Orient and reports that at last the Victoria mills are in a fair way to obtain their share of the Oriental trade.

"The Japanese business generally is very quiet," continued Mr. Johnston, "and prices are low. But if we could get orders for the business would be profitable. At the present time Japan wants to buy cedar logs more than anything else, and will not buy fir, except in the squares. They re-saw all these squares to suit their own convenience, and we do not have any orders for smaller stuff."

Mr. Johnston has pointed out a serious situation, but the revival of the Japanese square trade seems to indicate that the Victoria and Island mills generally would gain some satisfaction from this source.

PARROT IS GUARDIAN

Captain J. R. Elfert commands the City of Vancouver and his wife is traveling with him at the present time. Mrs. Elfert has a small green parrot which proves a great source of merriment to the captain, Mrs. Elfert and their friends, for not even the most intimate acquaintance of the two can go near enough to shake Mrs. Elfert by the hand.

Captain Elfert has announced his intention of clearing from this port at midnight. The ship is at present at the Puget Sound Lumber Company's wharves.

Build up the constitution of your children by giving them Virol regularly.

VICTORIA STOCKHOLDERS LEARN PATENT ADOPTED BY BRITAIN'S LEADING SHIPBUILDING FIRM

Victoria Men Hold Ninety per Cent. of Stock On World Rights of Latest Invention for Bolting-up in Marine and General Steel Work, and Machine is Proved a Great Success.

Word from the shipyards of Harland & Wolff at Belfast and Clyde reports that the new bolting-up machine, invented by an old Seattle shipbuilder, and the world rights of the great machine are controlled by Victorians, has met with the most astounding success in Old Country yards, and that officials of the great shipbuilding concern have stated that they are ready to adopt the machine for use in their building. It saves time and money in an unbelievable manner, and does ten times the work of the old-fashioned hand bolting-up method.

R. E. A. Diespecker of the firm of Mason and Diespecker of Victoria, who is secretary-treasurer of the Amalgamated Appliance Corporation (Inc.) of Seattle, Washington, has received word from London manager G. Stillewell, the company's agent in England, that the actual construction tests of this new machine have been made, and were thought highly satisfactory.

The machine is designed to do away with bolting-up by hand, which has been the practice in all structural steel work throughout the world, prior to final riveting of the plates. The machine gathers together the plates and rivets them successfully as tightly as possible before riveting, and in doing so is essential to the trade as pneumatic riveting hammer, and proven even a greater time and labor saver than the hammer, and from now on it is a matter of short time only before becoming as generally used.

HOW IT WORKS

In all shipbuilding and structural steel work it is necessary to draw the plates together as tightly as possible before riveting, as it is obvious to any man that a red hot rivet cannot do the work. This process of getting the plates together is what is known in the trade as bolting-up. The bolting-up precedes the riveting in all structural work, placing threaded bolts in every second hole, and then the upper and lower plates are drawn together by means of large spanners drawing the plates together to the tightest extent possible. The riveters follow up by placing white hot rivets in the odd holes, and the pneumatic hammer permanently secures the plates or steel in place. Bolters follow to unscrew the bolts when rivets are inserted in their place and the job completed.

The pneumatic bolting machine operated by air draws steel to steel in a fraction of the time used under the hand method, and much more satisfactorily and efficiently. It is designed to operate by means of two opposed pistons, traveling in pressed steel cylinders. To the upper toggle seat is attached the lower toggle seat. Attached to the lower toggle seat is the food-piece, which in turn rests on the plate while the pull is being made.

TREMENDOUS PRESSURE

The chuck and pistons are actuated by the compressed air, and as the pistons advance the toggles move simultaneously to a straight line, and are moved further apart. When the toggles approach the straight position the power the combination is extremely great, as much as 30,000 pounds pressure being obtained. Machines are made in all sizes from the 12-lb. machine for use in lighter work, exerting a pull of 10,000 pounds, with a pull of over 30,000 pounds. In fact machines up to any size can be made.

TESTS PROVE WORTH

In the recent tests Arthur Pirott of this city has been advised by the company's distributors, The Pneumatic Plate Tightener Sales Company, Limited, of London, as follows: "Among the tests in which the machine was applied with complete success was the heavy work of drawing the keel plates 1 1/2 in. in; also on the turn of the bill of varying thickness of 1/2 to 3/4 in. and all straight line work. In our catalogue and leaflets which we tried to word as conservatively as possible, we claimed that from 225 to 400 bolts could be bolted up at an eight-hour shift, but an ordinary workman at this demonstration, casually selected in the yard, actually bolted up the eighty in an hour on the turn of the bilge. On straight line work it was found that with the help of an assistant placing washer and driving cotter, six to eight bolts per minute were placed.

"There can be no doubt it is one of those inventions one is surprised has not been invented before, and there can also be no doubt that those shipbuilders who use it will effect a most important saving in cost, which we estimate roughly, according to varying conditions, at 2 per cent. on a 5,000-ton steamer, a saving of £5,000."

Mr. Stillewell reports on the Harland and Wolff Clyde tests: "The general managers, engineers, foremen, riveters, platers, estimators and accounting department were present during the first day's test and the following day the office staff were busy estimating what cut could be made to the riveters, saving on bolts, etc., and they are still busy when we left. I took up 500 bolts and eight bolts a minute with a man driving the cotter, also placed without rushing 187 an hour on the turn of the bilge. I had been in the yard two days I had the starboard riveters squabbling with the port as to which side the bolts were to be placed, and the men were unwilling to see the machines taken out of the yard. The riveters did their work quicker with less trouble, and were tickled to death when came to knocking out the cotter as against unscrewing the nut. After being there a week, the yard management, set me a man that used to work there, and I worked with him for two days, till he got on to the handling of the machine and adjustment. On the third day he placed

Tilden Advises Tennis Players On "Temperament"

Says They Should Learn to Play Game Under All Conditions and Be Ready

Too Many Players Bothered By Small Things; Used to Worry Himself

BY WILLIAM TILDEN. One hears much about temperamental people. Usually the term is used in connection with some mental person, when in the case of the average man the word used would be "peevish" or some equally descriptive and intelligent term.

Let me attempt to offer some advice to "temperamental" tennis players, since I am always supposed to be "temperamental" in the "peevish" sense of the word. Probably I am, but as the years go on and I mellow with age I grow less peevish, doubtless due to that senile complacency which befalls the aged.

EVEN BLAME THE WEATHER

Weather conditions are a favorite excuse for temperamental displays of the pyrotechnics of tennis. For some reason every player by sea and by land blames the weather for his defeat.

TEMPERAMENT AN ASSET

Temperament should always be a player's asset. It is the keynote of success in the careers of many great people. Some notable examples are Theodore Roosevelt, Mary Garden, John Barrymore, Ty Cobb, Bobby Jones and Miss Anne Morgan.

WILLS TO REST

New York, Sept. 12.—Harry Wills, victor over Luis Firpo in twelve rounds at Boyle's Thirty Acres on Thursday night, leaves to-day with his wife to rest three weeks on a farm with relatives near Petersburg, Virginia.

QUOTING NOTES

A large turnout of spectators attended the final for the silver cup donated to the club three years ago by T. Withers, between D. McMillan and J. Leiper. The game was fifty-one shots and good play was seen. Leiper showed good form the first half, getting a lead of twelve shots, but seemed to lose the throw, giving McMillan a chance to pull up. The final score being McMillan 41, Leiper 21.

SLICES AND HOOKS By W. Heath Robinson

Garden City, N.Y., Sept. 12.—The United States Walker Cup teams scored decisively over the invading British golfers yesterday afternoon, winning three of the four two ball foursome matches on the first day's programme.

Many Star Women Golfers to Seek Canadian Laurels

Toronto, Sept. 12.—Seventy-one women already have entered for the Canadian ladies' open golf championship, which commences on Monday morning. They were paired yesterday for the qualifying round, out of which will be selected sixteen players who will contest with Miss Glenna Collett, Providence, R. I., former United States champion, her right to the Canadian title, which she won last Fall from Mrs. Gavit of Huntercombe, England.

Helen Jacobs, Said To be Second Helen Wills, Wins Honors

Philadelphia, Sept. 12.—Fifteen-year-old Helen Jacobs of Berkeley, California, reputed to be the second Helen Wills, won the national girls' title by defeating yesterday at the University of Pennsylvania the titleholder, Miss Alice Francis of Orange, N.J., in straight sets, 6-2, 6-1, dominating the situation much the manner of Helen Wills at the same tender age.

W. G. Stone is Again Elected President of Vet. Soccer Club

A large and enthusiastic meeting of the Veterans Football Club was held this week for the purpose of entering all competitions again this season and it is expected that the team will again make a good showing. With last year's team practically intact and with the new players who have signed the Vets, no doubt will have one of the strongest aggregations in the city.

"Happy Jack" Fine Indian Lacrosse Star of Old Dies

Brantford, Sept. 12.—Brantford's older residents who were among the lacrosse players and fans of thirty or forty years ago heard with regret of the passing at his home on the Six Nations Reserve of Chief David Jack, who was one of the stars of the game in those earlier days.

Epinaud May Race At Tijuana Track In Big Handicap

Tijuana, Mexico, Sept. 12.—Following on the heels of press reports that President James Wood Coffroth, of the Tijuana Jockey Club, has a fine chance of interesting Pierre Wertheimer, owner, and Eugene Leigh, trainer of the mighty Epinaud, French champion, in the rich Tijuana racing this winter, comes the announcement from the jockey club that Trainer Leigh has just asked for stake blanks. He desires to know what there will be in the way of stakes should Epinaud be shipped to the Mexican coast.

Famous French Horse May Run in Coffroth Handicap Which is Worth \$58,000

That the noted trainer is interested in the winter long meeting of 190 days, which will be opened Thanksgiving Day, is disclosed by his inquiries, and many declare that the \$1,000,000 to be distributed among horsemen at Tijuana may induce him to ship the fancy French galloper to the Mexican oval. It is pointed out that by Fall Epinaud will be ready, though running increased distances in his international match races, to give a good account of himself in a long gallop such as the Coffroth handicap.

VALUABLE STAKE

This has \$50,000 added money and is at 1 1/4 miles, its value increasing so much each year that it is now known as the classic of winter racing. Turf analysts relate that this kind of money is now being gotten in the big stakes of the world. Then there would be the additional fame for Epinaud should he win the Coffroth.

Jockey Paden is Leading Rider in Racing This Year

Vancouver, Sept. 12.—Frederick led the jockeys in the week's racing activities at Hastings Park, bringing home six winners in thirty-one visits to Jim Donovan's starting gate. He was closely pressed by Willie Motter, Tiner and Hooper, who rode five winners each.

Colwood Ladies to Play For Laurels of Club Sept. 29

The annual competition for the ladies' championship of the Colwood Golf Club will be held on September 29, and following days. The entries will close on Friday, September 26. There will be no qualifying round. The draw will take place the day after the entries close.

Bullock-Webster Puts Champ Down in California Golf

Del Monte, Cal., Sept. 12.—J. J. McHugh, San Francisco, California, champion amateur golfer for 1923, lost his title yesterday in the third round of match play when he was defeated 3 and 2 by Captain A. Bullock-Webster, formerly of the Sunningdale Club, England.

Verdict of Jury Robs Colonist of Brilliance of Win

Discovery Made That Clash Between Paper Teams Last Night Was "Framed"

Verdict of Jury Robs Colonist of Brilliance of Win

Discovery Made That Clash Between Paper Teams Last Night Was "Framed"

Frame-up

Yes, that's the jury's verdict on last night's horrid picnic at the Royal Athletic Park, which was attended by The Colonist and The Times baseball teams, and a number of people who hoped to gain as much fun out of watching the affair as they do out of reading the funny papers.

Wanted to Know

When cross-examined by the printer's devil, the managers fessed up and said that they had framed the game in the best interests of the semi-centennial meetings between the two papers. The Colonist had become weary of taking defeat after defeat, and if they had lost yesterday, they announced it would be the loganberries for the series, as far as they were concerned in order to get a life-saver it was decided that The Times should lose, but that they should give a good exhibition, and make it close.

Wanted to Know

But they refused to stay there because they in fact didn't know what to do with the ball when it was hit to them. However, by the time the last half of the fifth inning came around The Times was so far out in front that it was as wild as a March wind, could not be kept under wraps all the time, and frequently burst into a barrage of hits that produced runs with great rapidity. In order to save the Times was so far out in front The Colonist had to send its batboy to the top of the grandstand to get a line on them.

Wanted to Know

There were chucks of gloom in The Colonist dugout as the Times men were warned to go away again and The Colonist was allowed to get ahead.

Wanted to Know

But they refused to stay there because they in fact didn't know what to do with the ball when it was hit to them. However, by the time the last half of the fifth inning came around The Times was so far out in front that it was as wild as a March wind, could not be kept under wraps all the time, and frequently burst into a barrage of hits that produced runs with great rapidity. In order to save the Times was so far out in front The Colonist had to send its batboy to the top of the grandstand to get a line on them.

MILLWOOD Delivered in the City Phone 693 The Moore-Whittington Lumber Co.

SEALED TENDERS addressed to the undersigned and submitted to the Public Works at St. John's, B.C., will be received at this office until 11 o'clock on the morning of the 13th day of September 1924, for the construction of protection work at St. John's, Fraser River, B.C.

WHITE & MARTIN, Solicitors for Mortgages, 421, Central Building, Victoria, B.C.

NEWS OF THE ARCHES

WILL HOLD LAST OPEN AIR SERVICE

"Modernizing Our Medical Methods" Evening Subject of Dr. Davies

Sunday afternoon at 3 o'clock the City Temple will conduct the final out of doors service of the season under its auspices at Little Cordova Bay. Dr. Davies will preach and the same arrangements as were made for the similar service recently held at Cadboro Bay Beach will be made for Sunday.

In the evening at the City Temple Dr. Davies will speak on "Modernizing Our Medical Methods." Dr. Davies stated this morning that contrary to the opinion of many, this address will not be in any sense an attack on the medical profession. Dr. Davies stated clearly that he had always during his ministry counted the physicians and surgeons among his warmest friends and that he would not under any circumstances make a public arraignment of them, and that any comment he might make in the pulpit would be entirely constructive. The address for Sunday evening is founded upon extensive investigations made with the help of a number of doctors of Victoria and other Coast cities, and medical men here who have been apprised of the content of it have expressed themselves as being in full accord with it. The Temple pastor will point out that while in the healing of the manifold diseases of the human body the medical profession has achieved great proficiency in the employment of the aids of medicine and operative surgery they have possibly left unused

HIBBERT ON SONS OF MILLIONAIRES

Various Types Will be Dealt With by Pastor at Centennial Church Sunday

Tomorrow evening at Centennial, Rev. Mr. Hibbert will take as his subject, "The Sons of Millionaires."

The sons of millionaires, says Mr. Hibbert, are those who are the pride of their parents. They are the possessors of untold wealth who have in his boy, developing into manhood an unlimited treasury of satisfaction. Though his bank account be nil and his station in society be unpretentious yet "this is the world and everything that's in it" when his boy is responding to the standards of honor, clean life and high ambition.

The recent disclosure from Chicago picture another type of millionaire who is the object of the world's pity, as he sits with head bowed in shame and shame. Millions of money can never compensate for the disaster to those homes.

The type of boyhood and girlhood proceeding from our homes and schools is increasingly being regarded as the basis of wealth and happiness and it is fortunate, says Mr. Hibbert, that attention is being thus directed. Church programmes, educational policies and community work in general is under severe scrutiny, one probing question being, "What provision is being made in behalf of the young people?" In response to the inquiry, the programme and curricula and activities are being remodelled to meet the pressing need of the new viewpoint.

There has for a long time been the recognition and conviction that unlimited wealth is no asset to a young man; and of recent years much attention is being given to our educational policies. Millions wonder whether the end desired by education is being attained. It is being recognized, says Mr. Hibbert, that there is something to be learned from the Fourth R. Religion. We are intent on sharpening the wits of our boys and girls, but our own wits are not keen enough to perceive that along with knowledge of letters is required the possession of an enlightened conscience and a sensitized moral nature.

The church, and school and community in general is thus finding with the homes to enable every father to be a millionaire in the best sense of the term, when not only will he be able to support his family with pride, but will be privileged to share that wealth with his community and nation.

Times Sunday School Lesson

By REV. GEO. C. PIDGEON, D.D.

It admits and bore our disease, (Isa. 53:4). Evidently His miracles were no mere exercise of might; He did not heal with a mere wave of the hand; He exercised the same estimate of each who came to Him and gave a sympathetic response. These appeals and answers were a drain on His nature and involved the expenditure of vital energy. Hence the thought of His sympathy with all who come to Him in every age is one of the most comforting in our religion.

Next, He sought to make the physical cure a means to a higher spiritual benefit. When the four friends lowered the paralytic through the roof to Jesus' feet, He first probed the man's mind, the man's sin. Then, when challenged on this point, He cured him and made the bodily healing an outward proof of the inward spiritual change. (Mark 16:7-9). He required the man with the issue to confess the faith that had brought her healing; He deplored the ingratitude of the nine lepers who failed to return to give thanks to God; and in many other ways He showed that His chief aim was always the restoration of the soul. In one of his sermons the Rev. John McNeill comments thus on the leper's plea: "If Thou wilt Thou canst make me clean"; "It is easier to believe in miraculous power than in 'miraculous love.' In Jesus the love was greater than the power." Particular attention is drawn in our lesson to the missionary tour which Jesus took through the synagogues of Galilee. With the miracles there He sought to establish the message of the kingdom with its new relation with God and the marvelous grace it promised, was the chief feature in the Saviour's ministry. "What did He do? He showed the man made right with God, the centre of his difficulty was removed.

These miracles are the embodiments of a doctrine. Their faith is that wholeness is the right of man and the will of God. Christ is the Apostle of health and soundness in body and soul; He heals to qualify men for the Kingdom of God. Disease is His enemy; He is the enemy of disease. There is no doubt that Jesus believed that power came into the world with Him to meet the whole need of men. The only limit to what God would do for them was their faith. Again and again He marveled at the unbelief that refused to take what God wanted to bestow, and which would not believe in His power. He welcomed it with enthusiasm. The ministry of love and pity had therefore a necessary place in His programme. There are two passages which set this forth. The first is Christ's quotation of Isaiah 49:1-2 as the text of His sermon in Nazareth (Luke 4:17-19). His miracles in Nazareth were not for a message, and this is His reply. As the prophet had foretold, He was anointed with the Spirit of God to do this work among men. The second is the parable of the messengers of John the Baptist when He pointed to His miracles of healing as the answer to John's doubt (Matthew 11:2-6). This was His first answer to the question, "What art thou doing?" and it was a symbol of the far higher and deeper work which He had undertaken for the world.

Jesus the Great Physician

Mark 1:21-45

In looking over the story before us we note the variety of Jesus' miracles. People came to Him suffering from all manner of diseases and found in Him power sufficient to heal them all. The demonized, the lame and the blind and deaf are found among those who seek and secure relief. His sympathy and readiness to help are as limitless as His might. One is impressed with the spontaneity of Jesus' works of healing; they express the response of His heart to the needs of the people. The miracles are all works of grace, there are no mere displays of power and no miracles of vengeance; Jesus' aim is to help men and all the resources of His command are available for that purpose.

Christ's works of mercy are the first method He chose to give effect to His consecration. In His baptism He identified Himself with men and their desire for righteousness and put His life into realizing it for them. As one with men He accepted its attainment for others as His first responsibility. But response to this act of self-surrender the Holy Spirit came upon Him and light and power from God broke into His soul. This made necessary a complete renewal of His nature; everything had to be thought out anew in the light of the new facts. He was now conscious of power sufficient to fulfill all the needs of the people, of His leadership, and, in the wilderness, these historic ideals passed before His mind. He put them all aside as contrary to the will of God. Then, we ask, what was His first response to the inquiry, "What art thou doing?" He said, "I have been sent to preach the Gospel to the poor." He said, "I have been sent to preach the Gospel to the poor." He said, "I have been sent to preach the Gospel to the poor."

Hold Debate On Education At Centennial

A public discussion on education will be held in the Centennial Methodist Church on Sunday afternoon at 2.30 o'clock.

The programme will be as follows: Councillor Francis Simpson of Saanich: "What a parent may expect education to do for his family." B. C. Nicholas: "What the business world expects the rising generation to know." Commander Charles T. Beard: Educational requirements for the navy." Canon J. Hinchliffe, M.P.P.: "For what part of the ideal education should the state assume responsibility?" The chair will be occupied by Rev. Thomas Menzies, ex-M.P.P. The music will be in charge of Frank Tupman.

Parents, students, citizens, let us consider what we are doing for the future. Come and bring your friends with you. The chair will be occupied by Rev. Thomas Menzies, ex-M.P.P. The music will be in charge of Frank Tupman.

"WILL SATAN BE DAMNED?"
"DOES THE GRAVE END ALL?"
Don't fail to hear the answers to these important questions.
SERVICES EVERY WEEK NIGHT AT 8 O'CLOCK
All heartily invited to attend.

Dr. Sippell is Invited to Attend Brussels Meeting

Rev. Dr. Sippell has been called to attend the meeting of the World's Brotherhood Federation which meets in Brussels, Belgium, in October. Dr. Sippell is a member of the executive of this association and the present meeting is called to consider grave and important matters concerning the welfare of the world. Dr. Sippell has not decided whether he can avail himself of this opportunity or not, as important duties in the missionary programme of the church call for his attention at the Mission Board in Toronto about the same time.

Musical Notes

By George J. Dyke
Egypt, "the cradle of civilization," the land of sphinxes and yellow sandstone hills, the land of beautiful people and dazzling splendor of the tombs of kings, and watered by the historic Nile, has been the exclusive home of a singing people; music abounds everywhere. It is a part of the daily life of its people. The workmen sing at their tasks, the fishermen as they push out from the shore, the water carriers, the baker, the butcher, the carriers of water, the fakir, all have their special tunes. The capital, Cairo, retains the ancient atmosphere of a splendid modern atmosphere is strongly marked not only with the music of the past civilizations, but with the more up-to-date influences of European music methods, all combining in a most fascinating and attractive manner in the lure of the musician, the composer. The native music in its many surroundings, played on the stringed instruments of the zither or on its weird pipes and soft-beating drums, has that plaintive minor quality which is remarkably rich and colorful. It is tremendously sensuous in beauty; yet with all this there is no written music on record, all its music has been handed down by word of mouth through the centuries of time.

Hold Debate On Education At Centennial

The programme will be as follows: Councillor Francis Simpson of Saanich: "What a parent may expect education to do for his family." B. C. New Rodin Work Found in Brussels

Paris, Sept. 12.—A hitherto unknown work of Auguste Rodin is reported to have been discovered in Brussels. It is called "The Child With the Terrestrial Globe."

It is a beautiful bas-relief decorating the wall between the Academy Palace and the royal stables in the Rue Ducale. An old stone mason who knew Rodin well during the period of the great French master worked in the Belgian capital asserts that the group is the authentic handiwork of Rodin.

Edward Ellsworth Hipsher, for the last four years assistant of the American Museum of Natural History, has been named an associate of the London Royal Academy of Music. His election to this, the oldest English music institution, is said to be the first bestowed upon a Native-born American.

All are invited.

THEY'RE 3,600 YEARS OLD—Here are some of the dishes they used back around 1700 B.C. An expedition sent out by the University of Pennsylvania Museum has just unearthed them near Beisan, ten miles from Nazareth. Excavations by the party have borne out the conclusion of some historians that the shepherd kings of Egypt, after the expulsion from the Nile valley, sought refuge in this section of Bible lands.

TRY THIS ON THE BABY—And make it strong, suggests F. B. Magee of Atlanta, Ga. He brought his daughter up that way, and now is strengthening his four-month-old grandchild the same way.

PRINCE CHARMING—This has been sent out for publication as the "Prince Charming" photograph of the Prince of Wales. It has been selected by many as their favorite picture of His Royal Highness.

AND HE CAME UP SMILING!—Every dot on the dotted line leading from diver to river represents a distance of more than two and a half feet and marks the direct route taken by Keith Cousens when he made his spectacular leap from the top of a tree to the river at Amoskeagledge, N.H. The distance is 193 feet.

HAS SOMETHING TO CROW ABOUT—Meet the fowl hatched at Sewell, N.J., in 1922 that laid eggs during its pullet year, suddenly developed rooster characteristics, stopped laying and grew a comb, and then began laying eggs again. Rooster or hen? Science is trying to find out.

HE CASTS A MEAN LINE—Fred C. Berger of the Long Island Casting Club, is the new world's champion surf-caster. He won the title by making a cast of 721 feet 2 inches at the annual casting meet held at Margate City, N.J. Among those he defeated was a man who once out-cast Babe Ruth's longest home run.

First Hunter: "Well, old dear, what sort of luck did you have to-day?" Second Hunter: "Rotten. Didn't kill a thing. Wish I'd gone motoring instead."

FRENCH FLYER'S TRIUMPHANT RETURN—Captain Pelleflier D'Oisy, French flyer who put India within six days of Paris, received a rousing reception on his arrival home. Sharing in the triumph was Mechanic Besin (right).

DRAWING CARD—A monkey shared the pulpit with Rev. Z. Colon O'Farrell, pastor of the First Baptist church in Butte, Mont., when the minister delivered a sermon on evolution. Three hundred persons had to be turned away at the doors. The monkey tried to bite the minister during the service and jumped all around the pulpit at the end of its chain.

ATHLETIC ESTELLE—Jack Dempsey's fiancée, Estelle Taylor, movie actress, is an athletic girl. Why, she even goes out for a little road work—with Mr. Dempsey, of course—long, before most screen folk have had their morning coffee and grapefruit. Just the same, though, she doesn't like to see Jack fight. He might get his new nose bent up a bit. But, oh, well—she's willing for him to stage one or two more parties in the ring. And then they'll be married. Even Jack admits that now.

TWO PEOPLE EVERY RADIO FAN SHOULD KNOW—Left is J. W. Arlin, world's pioneer announcer, at the Westinghouse World Pioneer Broadcasting Station, KDKA, talking things over with Victor Studek, director of the KDKA Little Symphony Orchestra. The photo was taken from a special costume concert radio-cast by Westinghouse Station KDKA recently.

WHO? ME? GOSH, NO! WANTCHA SPOZE I WANTA SET DOWN FOR? THINK I'M A NINNY? YOU NAME ME SICK! WHY DON'TCHA CHUCK ON A CHUNK O' WOOD? WANTCHA EATIN'? BAKED POTATERS? GIMME A BITE? GO ON, YOU KNOW ME. DONT BE SO GOSH DURND STINGY—

"I'm in luck. On 200 metres somebody is giving a lecture on the subject of the essay we have to write."—Passing Show, London.

WHITBY NOW BEER EXPORT PORT—Above are shown cars of beers on a waterfront spur at Whitby. The full or partially full cars are locked by Canadian Customs officials and are opened under supervision while launch loads are taken out of them for the trip on the lake.

A STORY WITHOUT WORDS

KING SAFE HERE—One place from which the King of Spain need fear no threats of revolution is the Valley of Aran in the Spanish Pyrenees, to which he makes an annual visit which is like a triumphal procession. The valley is probably the richest section of the Spanish domains as well as the most picturesque. In the photo King Alfonso is patting a mule of the train in which he made the excursion through the valley and about Lake Estarzes.

VICTORIA, B.C., SATURDAY, SEPTEMBER 13, 1924

NANAIMO IS BUSY SCENE OF INDUSTRIAL LIFE

Unrivalled Situation as Distributing Centre for Large Part of Island

Nanaimo Possesses All Attributes Which Make For Important City

Distributing Centre for Heart of Island; Admirably Placed for Business Development in all Directions; Becoming Free From Industrial Fluctuation.

Cities where one industry dominates have often a chequered career, but Nanaimo in its long history has been signally free from the fluctuations incidental to the varying conditions of business.

But Nanaimo is something more than a coal mining community, as recent progress has shown.

PICTURESQUE SETTING. Situate on undulating ground, its position is much more picturesque than the usual colliery community.

The natural bisecting of the city by the ravine has occasioned much discussion as to the nature of its future, but in view of the fine stand of maples which mark its part.

Nanaimo is fortunate in its public services, for in addition to being the headquarters for the administration in the northern part of the island.

DISTRIBUTING CENTRE. Not only is the situation of the city admirable, but its transportation services by rail, steamer, and motor stages is exceptional.

The climate of Nanaimo is tempered by its protecting hills, sloping to the landlocked harbor, under which the countless mine workings extend.

THE NEW HOSPITAL. One of the community efforts which is occupying a great deal of attention in Nanaimo at the present time is the provision of a new general hospital.

THREE SEAMS IN NANAIMO FIELD

There are at present three productive coal seams in the Nanaimo area, the Wellington, the Newcastle and the Douglas.

POINTS ABOUT ISLAND COAL

(From Remarks by Charles Graham, District Superintendent of the Comox Collieries)

"The lump coal from Vancouver Island mines, as supplied to the domestic market, does not as a whole exceed fifty per cent. of the production of the mines.

"Of the coal actually mined, a very considerable percentage is lost in preparation for the market. This percentage of loss varies with different mines, even in the same area."

"Scores of cubic miles of sediments, including an incalculable large number of tons of coal have been irretrievably lost by being swept away, and they now lie finely distributed over the bottom of the Gulf of Georgia."

TAKING POSSESSION FOR HUDSON'S BAY

On August 24, 1922, James Douglas, then chief factor of the Hudson's Bay Company, and later governor of Vancouver Island, instructed Joseph McKay to proceed to Wenthuysen Inlet, or Nanaimo Bay, and formally take possession of the coal beds lately discovered there for and in behalf of the Hudson's Bay Company.

He was instructed to see that no persons should mine coal without the permission of the Hudson's Bay Company. Operations were carried on by the company until the sale of the holdings in 1911 to the Vancouver Coal Mining and Land Company.

Industries of Nanaimo Steadily Develop With Growth of Community

Coal Mining Industry Employs Large Payroll; Lumber Industry of Increasing Importance; Minor Activities Show Interest of Community.

Apart from the outlying mines at Cassidy, South Wellington and Nanoose, the coal-mining industry in and around Nanaimo is centred in the Western Fuel Corporation of Canada and several independent operators.

The Western Fuel Company produces about 650,000 tons of coal a year from all its properties, so that with the Canadian Collieries in other parts of Vancouver Island it represents the largest production by far of the coal output of the Island.

LUMBER INDUSTRY. Next to coal, the chief industry of the Nanaimo neighborhood is that of lumber, and the chief industry being the employes, apart from the executive and clerical staffs, there is one foundry, and there are several other industries of a promising character.

Across the harbor is the well-known Newcastle Island, from which stone was quarried for some of the notable buildings of the Coast, as for instance the handsome United States mint at San Francisco.

As water and power is closely bound up with industrial progress it is appropriate to remark that the city water supply is secured from the south fork of the Nanaimo River, and the Millstone River supplies the hydro-electric energy, which is controlled by a proprietary company.

In considering the future of the town from a coal-producing standpoint, the discussion always widens now into the general relation of the industry throughout the island to the competition of fuel oil, and how the steamers being rapidly converted into oil burners.

There is also now an undiminished optimism with regard to the coal resources of the Island. At one time it was the custom to talk in general terms of the illimitable resources of the Island, and to speak as if the coal measures were inexhaustible.

Charles H. Clapp says: "The future of the coal industry is very promising, although thinner and deeper coals will have to be mined in the near future. Owing to the great variability of the seams and to the lack of public information on figures can be given for the actual coal reserves at Nanaimo.

The Newcastle seam is more regular than the Wellington or Douglas, but is thinner, ranging from twenty to sixty inches where mined, and contains more numerous and regular partings. It is also less extensive in area than the other two seams.

Just been completed is the new automobile park on the Comox Road, which should be appreciated by the increasing number of motor tourists.

That Nanaimo is not indifferent to the liberal arts is shown by the recent decision to join the public library movement, the new institution having been formally inaugurated by the mayor last week.

No reference could possibly be made to the city without alluding to its supremacy in some forms of athletics, particularly association football. Almost all kinds of athletics are carried on, and the community is fully alive to the value of these accessories to good health.

CITY'S STATISTICS

The total assessment, land and improvements, of Nanaimo is placed at \$5,979,877. The area of the city is 720 acres.

TECHNICAL NATURE OF NANAIMO COAL

The coals of the various seams are, as a whole, much alike and furnish a coking bituminous coal of fair grade.

The above views show: Upper left—Esplanade Mine of Western Fuel Corporation at Nanaimo. Upper right—The Depot of the Esquimalt & Nanaimo Railway, one of the finest in the system.

FIRE POLITICAL BATTLE Looms In Britain

U.S. TOURISTS GIANT BRITISH AIR BATTLESHIP, BRITISH LABOR TURNS BACK ON MOSCOW REPRESENTS

Greatest Invasion of British Isles Has Marked Season Now Ending

Popular Misconceptions of England Are Erased as Result of Travel Hosts

London, Sept. 13.—America's greatest invasion of the British Isles is rapidly drawing to a close. Straw hats, as well as tortoiseshell glasses, are disappearing from London streets, and the Strand once more is getting to be a British thoroughfare.

The year 1924 undoubtedly will live long in the memory of Londoners because of the vast influx of the Americans here. In addition to the hordes of tourists who annually come to these shores, the conventions of the Advertising Association and the American Bar Association brought thousands of Americans and Americans who otherwise probably would never visit Great Britain in all their lives.

UBIQUITOUS SURPRISES

No matter where one journeyed in Great Britain this summer, the American accent was to be heard. Every hotel, every restaurant, every part of the country, bore the familiar scrawl, "From U.S.A." or "Canada."

BRITISH LIGHTHOUSES TO BE EQUIPPED WITH WIRELESS APPARATUS

London, Sept. 13.—Within the next few months all the lighthouses on the coast of Great Britain—and there are many—will be equipped with wireless transmitting sets, with skilled operators in charge, in addition to the usual men operating the beacons.

Cambridge Gets Rockefeller Grant

London, Sept. 13.—Cambridge University is now able to claim from the Rockefeller Foundation, \$23,000 for the endowment of a school of pathology. The Foundation, which has been building the university \$100,000 for building the school, has promised \$23,000 more as the beginning of an endowment fund, provided Cambridge could raise a similar sum.

Barber Leaves £5,000 to Peer

London, Sept. 13.—Lord Buckmaster, the Lord Chancellor, during the World War, has been made heir to an estate valued at nearly £5,000 left by the retired hair-dresser, Richard Clark, a popular barber at Cambridge, who died after many years of successful

GIANT BRITISH AIR BATTLESHIP, MOST POWERFUL ONE-ENGINE CRAFT, STARTLES THE WORLD'S AIR EXPERTS

This is the First Photograph of Britain's Monster Mystery Plane

LONDON, Sept. 13.—Aeronautical experts from the four corners of the world have been gathered under the giant wings of Britain's new "mystery plane," latest wonder of the air. The marvel which brings wrinkles to the brows of the ingested visitors is that this aerial behemoth can work its wonder with a single engine.

LOSES HER HOME TO SPORTY DUKE

This is the Duchess of Westminster who recently divorced her husband, the Duke of Westminster, an England's sporty duke, but who has now received a slap on the face from the Duke of Devonshire, who has been found to have defamed her in London for an intention to prevent the duke from ousting her from her house in Berkeley Square.

London Seeks Motto; Suggestions Pour in

London, Sept. 13.—English or Latin mottoes are being asked for by the L.C.C. These days, due to the fact that London is without a motto.

Society Girls Retire To Let Hair Grow

London, Sept. 13.—Many society girls have announced their intention of cutting out the Goodwood racing and the "Coves" gatta week and are refusing invitations for Autumn country-house parties. They say they are going in for rest cures. But it is going round that the real reason for the temporary retirement is to undergo the "hair cure."

LABOR TURNS BACK ON MOSCOW REPRESENTS

Failure and Rebuke Greet Attempt to Link up With Internationale

English Bolshevik Incapable of Being Bolshevik, Says London Morning Post

London, Sept. 13.—It may come as a surprise to Canadians to learn that after congratulating Premier MacDonald on the signing of the Anglo-Russian Treaty the British Trades Union Congress has refused flatly to consider the question of linking the British labor movement with the Moscow Internationale.

HOUSE OF COMMONS MEMBERS NOW ON TREASURE HUNT FOR HISTORICAL IVORY STATUE SET

Late London Gossip

LONDON.—The British House of Commons is engaged in a treasure quest. It is believed that somewhere there are to be found, perhaps on the Continent or in America, if not in this country, three ivory statues of the 17th century which open and display beautifully carved scenes of the life of Oliver Cromwell.

ANT WAR IN LONDON ZOO MOVES S.P.C.A. TO PUZZLED PROTEST

London, Sept. 13.—The Royal Society for the Prevention of Cruelty to Animals, whose intervention and legal proceedings gave the rodeo at Wembley its final publicity, is known as wondering whether it ought to intervene to end cruelty to animals.

TESTING A BRIDGE

Within the next few days Westminster Bridge (the handsome bridge that spans the Thames from the Houses of Parliament to the Courthouse) is to be tested for signs of strain due to the passage of heavy traffic.

CHARM OF DOWNING STREET

"Number 10," the Prime Minister's house in Downing Street, has a powerful attraction for the visitors from all parts of England, Scotland and Wales who have been flocking to London this summer at the rate of 250,000 a week.

ZOO'S RECORD-BREAKING

The Zoological Gardens—undoubtedly London's favorite pleasure resort—have been breaking all their "gate" records this August. In the first sixteen days of the month they had 28,785 visitors, an increase of 23 per cent over the corresponding period in 1923.

INNS OF COURT

Canadian lawyers and their families who took part in the recent London gathering of the English, Canadian and American Bar associations, will be interested in a recently-published book, "The Story of the Inns of Court" by Sir D. Finlton Barton, K. C. and Charles Benham and Francis West.

WOMEN SHYLOCK'S WORST

Out of 138 money-lenders on Mersey-side over 1,000 are women who concentrate on the poor and uneducated, states the Industrial Reform Committee of the Women Citizens Association.

Kent Ghost Recalls Black Prince Story

London, Sept. 13.—Strange manifestations, associated by some with the unseen world, are reported from Hall Place, the beautiful old house down in Kent where, tradition says, the Black Prince was laid out. For centuries stories have been told of the appearance from time to time of the armor of the Black Prince, whose ghostly visitation, say the Kentish people, always are made at times when England is in peril.

MAN OUT-RUNS HORSE

Here is a man who out-ran a horse. He is an English athlete, C. W. Hart. It was a six-day endurance affair. Both contestants ran an average of ten hours a day. But Hart finished first.

FALL ELECTION ENSURES TEST OF MACDONALD

Labor Party Invites Ballot And Sees Chance to Win Majority in Commons

Risks All on Foreign Policies; Russian Treaty to be Big Issue

London, Sept. 13.—Although Parliament does not reassemble for some weeks and Prime Minister Ramsay MacDonald has been at Geneva attending the League of Nations conference, Great Britain is becoming more and more interested in the question of a general election just at about the time when the United States is preparing to make its choice from among the Presidential candidates.

MACDONALD WON'T REDEEM

The MacDonald party will not recede from the position it has taken regarding Russia, and unless the Liberal retreat, which is within the range of possibilities, the Cabinet is bound to suffer a Parliamentary reverse from which there is no escape.

WELCOME A FIGHT

The truth is they are rather taken with the idea of holding a general election sooner, because the Russian treaty will do them more good than harm. They cannot see the loss of any votes for having negotiated the pact, and largely in generalities they can count on some new votes from the Communists, not many, but enough to bring victory in some triangular contests.

PRESENT STRONG FRONT

The only thing remaining in doubt the degree of vitality. Sooner or later Germany and Russia will both join its membership; Germany probably will join at an early date. Consequently it can make a strong appeal to the country on the record of its accomplishments in the foreign field. No party dare challenge it on this score. If it has failed in some affairs the party can argue that domestic improvement depends on international relations.

WOMEN SHYLOCK'S WORST

Out of 138 money-lenders on Mersey-side over 1,000 are women who concentrate on the poor and uneducated, states the Industrial Reform Committee of the Women Citizens Association.

Palace of the Sacred Tooth
Kandyan Chiefs and no Second Honors
Flowers at Buddha's Shrine
Too Sacred to Be Touched by Human Hands
The Story of the Tooth After Buddha's Death
More Devotees Than Any Other Relic on Earth
King George V. Also Much Interested in It
How a Woman Caused Schism Among the Monks
The Oldest Race Known
Stories About the Veddahs' Powers

By WILLIAM KRANT

Noted International Journalist of the Last Half of Last Century, Who Retired From European Affairs, and Made His Home in Victoria for Several Years Before He Died on Sept. 4, last

The late Mr. Trant's story of his experiences in India, when he made the trip as special correspondent for a group of English newspapers with the Prince of Wales in 1877 is continued here. His story so far has brought the party from Colombo up into the Kandyan Hills on their journey to see the sacred tooth of Buddha.

KANDYAN CHIEFS COME

The floor of the hall was carpeted in crimson, and at one end, on which was a seat for the Prince of Wales, was covered with a deep red carpet. This was not accidental, but is a point of Kandyan etiquette, as the greater the honor intended the deeper the crimson should be. Among the crowd that thronged the hall were about fifty Ratemahameyas (literally, "country gentlemen") or Kandyan chiefs. These were peculiarly, though magnificently dressed. On the head was a huge four-cornered hat or turban—for I really do not know by what name to call a head-covering resembling a large pin-cushion more than anything else. Some were of scarlet cloth, others of green, others of white, and all were richly embroidered with gold, and from the centre of each rose a plume surmounted with precious stones.

DRESSED LIKE WOMEN SMUGGLERS

The jacket, is very short, and has short plaited sleeves, very full at the shoulder and fastened with buttons of jewels. On the lower part of the body are white trousers, which are tight at the ankle and terminated by a frill, a vast number of white muslin and gold figured cloths are wrapped in cumbersome folds around the waist, and supported by a broad gold belt, profusely set with gems.

The Dewa Nilme, or principal chief (who is also head trustee of the property attached to the Tooth Temple) told me in excellent English that he had no less than three pieces of cloth wrapped around him, each piece being twenty-four yards long. He could give me no explanation or reason for this, but he said that he had seen a picture of a man in a similar costume in a book, and that he had seen a picture of a man in a similar costume in a book, and that he had seen a picture of a man in a similar costume in a book.

The Dewa Nilme gave me portraits of himself and some of his companions, from which it is seen that their sartorial encumbrances give them an appearance of corpulence that does not naturally belong to them. All the chiefs wore in profusion long gold chains round their necks, and most of them had on the third finger of the right hand a ring which had a circle of precious stones attached to it, so large that it extended across three fingers.

THE TOOTH TEMPLE

In conversing with these chiefs, the Prince's good nature had to give way to a peculiar point of Kandyan etiquette. His Royal Highness had presented the Dewa Nilme with a diamond ring (specially esteemed, as the diamond is the one jewel not found in the island of gems) and a gold medal, and was anxious to show similar marks of favor to the next in rank, when it was stated that there was no second chief, and after the Dewa Nilme, none was before or after another. It was therefore necessary to select one to honor without arousing the jealousy of others.

I found the "Palace of the Sacred Tooth" a meagre erection to have such a dignified and important relic as small, had no pretensions to architecture, and was no dilapidated that the rain came through the roof. The Wihara, or chamber in which the relic is kept is a small room about twelve feet square. At the entrance are two sentry-box like constructions with glass windows. There are lamps kept perpetually lighted, the flame not having been allowed to die out for many years.

The sanctum is very splendid, the roof and walls being lined with gold brocade, and the frames of the door inlaid with carved ivory. When I was there the sun was oppressive with the perfume of flowers and spices. Flowers especially are favorite offerings at Buddha's shrine, and are always present in great profusion. On one occasion no fewer than 6,480,329 flowers were counted at the shrine, and it is recorded that in the fifteenth century a royal devotee sent 100,000 flowers a day for a considerable time, and each day the flowers were of a different kind.

TOO PRECIOUS FOR HUMAN HANDS

The Karundua, or vessel containing the tooth, is covered with a table of massive silver, richly chased, in the midst of a profusion of valuable jewelry, which are either relics or offerings. The most beautiful in which the tooth is held, but because it is regarded as a Palladium—a relic that still exists, and which recalls the Kandyan to British rule, because the Queen's Government possessed one of the three keys to the Palace of the Tooth (the other two being held respectively by the Buddhist priests and the Dewa Nilme) it is believed that justice and equity should be done to the relic which had been in his hair, and they safely reached Ceylon in the reign of Kirti-Sri-Meghawarma, in 311 A. D.

For a long time the precious tooth had various adventures, was often the cause of wars, and was concealed in various places, until at last it settled down in Kandy.

CAUSE OF MANY TROUBLES

The wonderful miracles seemed to satisfy the emperor that the relic was genuine, and it was therefore taken back to Dantapora, and placed in the great temple there. Afterwards, in 309 A. D., a neighboring monarch determined to possess the tooth, and he sent a messenger to the king and queen (Princess Kalinga) of that place, offering him a large sum of money to possess the tooth, and they safely reached Ceylon in the reign of Kirti-Sri-Meghawarma, in 311 A. D.

SACRED RELIC'S HISTORY

There can be no doubt, that, as a matter of history—apart from the religious and fabled—the relic, if it really was genuine, was utterly destroyed. History is very precise on the subject, and informs us that the Kandians offered 400,000 cruzadoes, as well as an alliance and services, and a promise to provision the Fort of Malacca, whenever required, if only the relic were restored to them. This offer was made, not only on account of the veneration in which the tooth was held, but because it was regarded as a Palladium—a relic that still exists, and which recalls the Kandyan to British rule, because the Queen's Government possessed one of the three keys to the Palace of the Tooth (the other two being held respectively by the Buddhist priests and the Dewa Nilme) it is believed that justice and equity should be done to the relic which had been in his hair, and they safely reached Ceylon in the reign of Kirti-Sri-Meghawarma, in 311 A. D.

VERY OLD RACE

The Dewa Nilme, or principal chief (who is also head trustee of the property attached to the Tooth Temple) told me in excellent English that he had no less than three pieces of cloth wrapped around him, each piece being twenty-four yards long. He could give me no explanation or reason for this, but he said that he had seen a picture of a man in a similar costume in a book, and that he had seen a picture of a man in a similar costume in a book, and that he had seen a picture of a man in a similar costume in a book.

This is the most sacred spot in the Oriental world. It is the shrine of the sacred tooth of Buddha at Kandy, Ceylon. The sketch of it was made by Mr. Trant when he visited the place with the late King Edward, when Prince of Wales. Priests guard it and lift the covers on rare occasions to show the revered tooth underneath.

MONK'S GARB

There were many Buddhist monks about the temple at Kandy. They were of various orders, and some were of the highest rank. They were all dressed in simple, plain robes, and some were wearing a turban. They were all very devout, and some were very learned. They were all very kind, and some were very generous.

MYTHS ABOUT STRANGE RACE

Many wonderful qualities are attributed to them which so far as I could judge are wild stories by imaginative travelers. According to report their skill with the bow and arrow throws William Tell in the shade. We were assured they could shoot very near to their feet, instead of their hands, with such precision that they could split an arrow previously shot. This is rubbish. I obtained a leaf, almost as large as an ordinary arrow, target, and securing it to the branch of a tree, fifty yards from where we stood, I asked them to shoot at it. They all confessed they were unable to do so by their feet, and seemed surprised at the ordinary way, they seldom hit the mark, though the arrow generally fell very near to their feet. Some girls amusing themselves on the archery grounds of the Crystal Palace shoot better than these Veddahs. The erroneous notion that the Veddahs are such expert marksmen with the bow and arrow has given rise to a great number of stories, mostly fabulous.

VEDDAH'S PRIMITIVE BUT HARMLESS

Before leaving Kandy we had brought to us a batch of Veddahs (i.e., hunters). They are the aborigines of the island and are the remnants of a very ancient race on the face of the earth. They are certainly pre-aryan-Dravidian and were inhabitants of Ceylon in pre-historic times. The men are slim of frame, dwarfish with faces that would be passably good-looking but for that flat nose. In manners they are simple, very shy and show every sign of being timid and uneducated. They are barbarians but are uncivilized, have "foreign laws despised, and kept unacquainted."

CRUDE, BUT CONTENT WITH ONE WIFE

Perhaps the chief advance they have made during the last few years is that they have learned the value of the rupee. This information has, in a way, been forced upon them. The little trade they do is by barter, and hitherto this was carried on through "headmen"—as those Kandians are called to whom is paid the tribute to the Chief Veddah, formerly the Kandian kings, now the British Government. This change of authority has introduced the rupee among the Ved-

SHRINE OF SHRINES

There are three guardians of the tooth. The sanctity associated with the relic became extremely extenuated in the eyes of all but Buddhists when its history and its traditions are so irreconcilable. Whether the relic at any time was Buddha's tooth is extremely doubtful. An old writer described it as like "the tusk of a boar," while the Portuguese say of the one destroyed by them that it was the tooth of an ape. The present relic, in my opinion is not a tooth at all, but a piece of ivory yellow with age, rudely shaped to represent a tooth. It is about the size of a man's finger, fully ten times as big as any natural tooth. I am convinced of this; that if the bone I saw was Buddha's tooth, then Buddha as a man never lived, and if he ever lived then it is not his tooth.

MONK'S GARB

There were many Buddhist monks about the temple at Kandy. They were of various orders, and some were of the highest rank. They were all dressed in simple, plain robes, and some were wearing a turban. They were all very devout, and some were very learned. They were all very kind, and some were very generous.

MYTHS ABOUT STRANGE RACE

Many wonderful qualities are attributed to them which so far as I could judge are wild stories by imaginative travelers. This change of authority has introduced the rupee among the Ved-

BACK TO THE FLEET

Having seen the sights of Kandy we returned to Colombo to sail across the Gulf of Manar to reach the mainland at Trincomalee. It was a long journey when we set forth, and when darkness set in I saw a sight that for liveliness and beauty I had never seen nor have seen since. We had not proceeded far when a brilliant light appeared in the darkness around us, as if by magic; and our attention had hardly been arrested by the phenomenon when a jet of fire suddenly burst upwards and onwards burst into existence, and it was the Serapis illuminated all over, nothing visible but the lights, and looking like a phantom ship of glittering suns. The Osborne quickly followed suit, as did also the rest of the squadron. The sight was of magnificence and splendor, enhanced by a concerted movement by which the colors of the lights were instantaneously changed. The Serapis became a ship of bright rubies, the Undaunted of glittering emeralds, another of deep blue sapphires. These colors were continually and suddenly changed and varied, until the effect was not only pleasing but exciting. The splendor was increased by the appearance of a long line of bright lights, which seemed to be a real Prince's ship and the East Indian Squadron.

TO BE CONTINUED.

HIGH POSITION

This is the Dewa Nilme, or the principal Kandian chief and his attendants. He is the guardian of the sacred tooth of Buddha at Kandy, is regarded as a very exalted and sacred post.

ASCENDING SKINNER BLUFF

In the perfect glory of a Vancouver Island August morning we crossed the placid bay. Only here and there was the smoke rising from the row of chimneys, and the water was as blue as the sky. The only sounds that broke the stillness were the cries of gulls or the hoarse calls of startled herons. The water was so placid that it seemed so much a part of things that these only accentuated the quiet. Every now and then the silvery form of a salmon rose into the air and with a little turn re-entered and enlarged the ripples. As we neared the further shore the shoulder of Skinner Bluff seemed to gain in steepness and the woods grew in density. Straight ahead of us was a low cliff of dark shale-like rock, hardened muds of erosion and broken trees. It was a very interesting sight, and we were all very much interested in it.

WHERE TWO AGES MEET

A Day Among the Igneous Rocks of Mount Tzouhalem
By ROBERT CONNELL
The invitation of the hills. To me there is an irresistible charm in hills. From my earliest days to which remembrance extends I have never seen one without feeling an implicit invitation to ascent. Not always has acceptance been possible in the form of accomplished fact, but intention has been there. I feel a deep sympathy with the old Hebrew writer "I will lift up mine eyes unto the hills," apart from my ordinary religious interpretation I have felt among and upon them the influx of something which, sets upon the mind as the clear fresh upland air upon the bodily senses. The physical exercise required is in itself part of the process, for more than half the delightful enjoyment of a summit would be gone if one came there by easy ways. Mount Tzouhalem as seen from any point, but especially from across the waters of Cowichan Bay, has all the elements of attraction. The long sweeping crest, the bare smoothly eroded cliffs of sandstone along the northern part, the steep slopes of granite in the middle, the irregularly steeped and terraced shoulder at the south, and finally the commingling of woods, clumps and isolated trees of arbutus, maple and oak and open grassy stretches; all combine to please the eye and to stir up the climbing appetites. I had already ascended it by the easy northern slope and had seen that great thickness of coarse conglomerate and sandstone which there tell the tale of the old Cretaceous sea. But I was still

SACRED TO MILLIONS

This is a sketch of the sacred tooth of Buddha made by Mr. Trant himself at Kandy, in Ceylon, when he visited the place with the Prince of Wales, later King Edward. The tooth is so sacred that it is not exposed to the view of even the most faithful except on rare occasions years apart. Every day lavish offerings of flowers are sent to the shrine by the faithful. Mr. Trant's drawing is the exact size of the tooth. As he himself remarked, it seems at least a little too big for a human tooth.

STEPHEN LEACOCK

BRINGING THE MESSAGE TO THE CONSUMER

Applying the Principles of Modern Punch to Poetry and Public Instruction

I suppose it is no exaggeration to say that salesmanship and advertising are the two most important things in the world. One of the biggest advertising men in the country is really big, saying the other way in his big way, "Where would the world be without advertising?" The more you think of this expression (which only a big man could have expressed) the more you are struck with the truth of it. Indeed, it has just exactly that pith, that pep, that punch, which all good advertising ought to have. It sets you wondering right away as to what constitutes really is, as to what constitutes good and bad advertising.

For instance, Christopher Columbus, we are told, spent eighteen years vainly trying to persuade the sovereigns of Europe to discover America. Under present conditions all he would have needed to do would have been to circulate among the Kings a "form-letter" with the heading "Do You Want a Continent?" or put a picture of himself on the bill-boards showing the American Marines at Target Practice in the Matamoros Bay, Mexico.

If Columbus had only put a picture of himself on the billboards with the legend: "This Man Discovers Continents."

"What would you do if your wife ran away?" and so forth.
HOW TO GAIN EMPHASIS
When once the general principles of advertising language are grasped it is not difficult to convert ordinary common English into first-class advertising prose. I give a few examples which will show at once the enormous gain in emphasis, force and directness which is imparted by a passage of literature when it is turned into advertising. Take first a few stanzas from Longfellow's poem, presumably, with a view to stir

In a way this is not half bad. There is a certain lift and lift to it. But it fails to bring out the idea of need for immediate effort with sufficient prominence. Compare the advertising counterpart:

Young Man, This is You! Do you want to remain all your life on a low salary? If not why not try our course? Our curriculum includes engineering, poultry, mind reading, ornamental penmanship, and religion. Don't wait. Start achieving now!

AN APPEAL TO TOURISTS

"This is the forest primeval, the murmuring pines and the hemlocks Stand like Druids of old with beards that rest on their bosoms, etc., etc."

This poem, which was not without merit in its original form, is now immensely improved when used as material for the tourists' advertisements as follows:

Mr. Forest Man! Do you ever take a vacation? What about the Adirondack Valley for this year's outing? Why not visit the "forest primeval" where you may stand buried in reverie under the "murmuring pines and the hemlocks" or emerging, enjoy as fine a meal for a dollar as you will get anywhere? Why not dream yourself back into the days of the couraurs des bois and the belted and plumed seigneurs with easy reach of a garage and with first-class plumbing all through the house? Why not bring along the wife and take her into the heart of the primeval forest and leave her to her own devices? Don't miss this chance. Start achieving now!

know that "Calcul", taken as one pill a day, will restore tone and vigor to the system, effecting an immediate restoration of the tissues and rebuilding the bones. Remember the name, "Calcul!"

My readers will long since have suspected—if the poor sinner has sharp enough eyes to suspect any thing—that advertising is a very peculiar business. It is a business that is not to be seen and again, is superior to reality.

NEXT WEEK:

The Perfect Lover's Guide.

Where Two Ages Meet

A Day Among the Igneous Rocks of Mount Tzouhalem

By ROBERT CONNELL

THE INVITATION OF THE HILLS

To me there is an irresistible charm in hills. From my earliest days to which remembrance extends I have never seen one without feeling an implicit invitation to ascent. AUTOMOBILE NEWS

WEST ROAD PAVING READY FOR USE

Extension North to Keating Cross Road Has Been Completed

To-morrow will be the first Sunday that motorists will be able to use the new paving on the West Saanich Road to its full length. Gradually for the past eight years paving has been extended from Black Hill, Royal Oak towards Brentwood, and with contributions from the Government, the last section, that between the Observatory and the Keating Cross Road has been paved this year.

The section between the Observatory road and Heals station, through Prospect, has been open for some time, but the long grade of the Maple Hill and beyond has occupied a greater time, and it was only on Thursday that Alderman Andros was able to guide his car through the wheelbarrows of the men who are engaged in the concluding stages, and to come through to the city.

The paving of this road, not only

In connection with the access to Brentwood and the Butchart Gardens, but also to the observatory, the excessive use of the East Road, will be appreciated very much by the public and by the municipality, as the maintenance cost has been heavy. Its completion comes at a most opportune time for the increase in motor stage service which is contemplated by the early abandonment of the Saanich Interurban line, because at least as far as Brentwood the roads will be called upon to stand a greatly increased traffic.

Alderman Andros yesterday began his campaign again with the city and Saanich authorities, motorists, and others to agitate for the improvement of the road to Butchart's Gardens, which has been used most extensively in the past few months, the heavy motor stages having worn off the surface, and it is now in bad condition. Owing to the thousands of visitors to this piece of road is of such a nature that local interest, and the hope is renewed that the department of public works will aid in the cost.

Los Angeles, Cal., Sept. 13.—Special features will be arranged in connection with the Hawaiian Territorial Exposition, in honor of the arrival of the Chamber of Commerce excursion party, which will leave this city October 11 for Hawaii, according to advices received here.

How to Prepare it for Camping Tour

By E. N. Scott

Carry a Good Tool Kit and Select Compact Camping Equipment

If you have gone over your car and carried out the suggestions given last week and the week before, you can be fairly certain that you will have no mechanical troubles during your trip. The equipment you will need is the next thing to consider. This includes the spares you should carry for the car as well as such things as tent, bed, etc.

A good kit of tools should be taken with a set of wrenches that will fit every nut and bolt on the car and a special box spanner to fit the spark plugs. In addition to these you should have the special tools and spanners supplied with your car. You should also have a screw driver, cold chisel, hammer, pair of cutting pliers, a medium sized flat, half round and round file. Make sure that you have a tire pump that is in good order, for you will probably be a long way from free air stations during your tour. It is also a good idea to carry a piece of wood about 12" long by 4" wide and 2" thick to rest the jack on. If you are unfortunate enough to have tire trouble or have to jack up the car on soft ground, you will find this piece of wood very useful.

Over spares for the car should include in addition to a spare tire and two extra tubes, two or three good spark plugs, a spare fan belt and hose connection, a set of lighting bulbs, small box of split pins, washers, bolts and nuts—and 100 ft. of window cord. If you watch the level of the gasoline in the tank and the oil in the crankcase it is not necessary to carry along extra gasoline or oil as you are never very far from a filling station.

Wrap the tools and spares that will not fit into the tool roll in clean rags or cloth and pack them under the front seat, if possible, so that you can get at them easily when you want them.

The next thing to consider is the tent. There are a number of special tents on the market, some good and some not so good. Choose one that is guaranteed waterproof and that can be easily erected by one person if necessary. The khaki or tan colored tents are usually more waterproof than the white tents, and are not so susceptible to mildew. See that your tent has plenty of head room and that there is room for your bed and table without crowding. If possible buy one with a sewed in floor and mosquito-proof doors and windows. This last is very important.

Nearly all good tents have an awning that can be extended over the top of the car or held in front with two poles. This enables you to keep the inside of the tent clear and gives you more room to move about for most of the luggage can then be left in the car. One way to bring inside the tent and the meals cooked and served without any trouble.

You have a number of folding beds to choose from. The main thing is to select one that is strong and compact when folded up. Whatever you leave behind, don't let it be the bed you are using. It is worth all the space it takes up in the car. If you pocket will stand it, buy an air mattress. You will find this will make a comfortable bed as any you ever slept in and you will not require more than three blankets to cover you. If you do not have an air mattress, be sure to carry several pairs of blankets and sleep with as many blankets UNDER you as over you. You will find that the cold has a way of creeping up and freezing you when the weather is very cold. A number of blankets underneath you will keep you warm and you will find it helps to keep the cold out.

For cooking purposes on a camping tour there is only one kind of stove to use and that is the gasoline variety. If there are only two in the party, a two-burner will do nicely, but for three or four persons take a three-burner. With this kind of stove you do not need to worry about the wind or wet days. Then again, with a gasoline stove, you can have a meal on the fire five minutes after you stop. If the weather is very cold a gasoline stove will heat the tent very nicely, although you must be careful not to close up all openings or the fumes may cause trouble.

If your tour is only going to be a short one, then you may be able to make up your own meals, but if you are cooking the meals from the family kitchen, you will find they take up quite a lot of space. It is better to buy one of the aluminum outfits that has utensils that nest into each other and takes up very little space.

I am not going to give you a list of foods for that will depend on your own particular fancy, but I would like to advise you not to load up with a lot of canned goods. You can buy fresh vegetables and meat as you go, and you will find you will enjoy your meals much better if you use fresh food than you will if you use a lot of canned stuff.

Victoria sign routing could be the means of securing useful publicity, if handled efficiently. The Canadian Highway Association will probably take the matter in hand at once, and considering how the financing of such an effort could be made before next season's motoring activities.

From High River to Calgary is forty miles of purgatory. The road is a narrow strip of asphalt, only thirty miles of the same material. Shortly after leaving Windermere, coming South, we strike another good road, but this is not a continuous one for many a mile. The so-called road between Moyie Lake and Yakh is narrow, rough and dangerous, and yet publishes a sign that says that these roads are really excellent!

"I might say a word regarding the grading of the Canadian prairie roads, and am not however, making any criticism of the Departments of Highways in any of the Western provinces. How the roads are graded in their extent, no consideration is given to motor travel. They are crowned so much that it is very difficult, even in dry weather, to get a leading into the road. Why it is necessary to raise the roads so high in the centre, I do not know. I know, however, that such is not done in Nebraska, where soil conditions are similar."

"We left Manitoba and entered Saskatchewan. Publicity literature told us not to expect as good roads as there were in Manitoba. We found that they were better signified. There were a few—a very few—short stretches of good road. In the main they were stretches of mud. We came across a huge sign which told us that the road we were about to travel had been entered in the Saskatchewan racing competition, and we were expected of it. We looked forward to something really good. Yes, it was—good to get over! There are long stretches between Brandon and Regina where ten miles an hour is the limit of speed. The same is practically true until the western border of Saskatchewan is reached.

"Arriving in Medicine Hat we were furnished with more publicity literature extolling the beauties of the Canadian Rockies and the excellence of the roads leading to them. No one can say too much of the wonders of our Rockies, but why should Alberta be so much more highly advertised than the other provinces? It could be done at the cost of about \$1,000, perhaps a little more. The only way to do work of this kind, Mr. Todd said, is to have the sign placement in hand personally, having everything ready beforehand, and make arrangements for adequate publicity. He says the Winnipeg

Such is Estimate of Winnipeg to Victoria Road Signs

One of the recommendations of the Lincoln Highway Association, which was mentioned in the interview published in The Times on Thursday, is the subject of comment by Alderman A. E. Todd in regard to its early realization.

It will be recalled that they strongly urge the local associations to adopt a standard sign, Canadian Highway or some similar term, to be placed along the road wherever opened, to link the existing sections to the Transcanadian Highway.

Alderman Todd points out that if the same generosity from truck owners and other voluntary assistance were forthcoming as that which has been shown by the Highway Association's work on the Pacific Highway from Vancouver, across the line, through Washington and Oregon to Redding, California, it could be done from Vancouver to Winnipeg at the cost of about \$1,000, perhaps a little more. The only way to do work of this kind, Mr. Todd said, is to have the sign placement in hand personally, having everything ready beforehand, and make arrangements for adequate publicity. He says the Winnipeg

FIRM FOUNDATION BEHIND TURNING LOCAL BUSINESS

S. E. Wallis Believes in Victoria's Future in Automobile Trade

Stanley E. Wallis, manager of the Consolidated Motors here, whose garage is on Yates Street, and is one of the newest and most up-to-date in the city, has been in this city for the past four years, and is confident that Victoria has a bright future as a city so far as the automobile business is concerned.

Having handled the popular Huppmobile and Reo cars for years, Mr. Wallis believes that the opportunity for victrola dealers in the line he follows in Victoria is a great one. Wide experience elsewhere in the same business has taught Mr. Wallis where to look for trade, and in Victoria there is ample, he says.

Early in 1918 Mr. Wallis entered the automobile trade in Winnipeg, in the service of Consolidated Motors, Limited. He gave valuable service to the company and after several successful seasons was removed to a

Winnipeg, Sept. 13.—Something new in the way of entertainment for the tired business men of New York, Chicago, Pittsburgh and other large centres of the United States has been developed in Canada by Donald (Curley) Phillips, noted guide and outfitter of the Canadian Rockies. The plan, which has already been matured and which will be established as an actual fact, is the creation of a "du" trap line where rich men who yearn for the sojourn and adventure of the North may take their emotions without experiencing any of the hardships or discomfort. Details of the plan as it has been developed, and the traps were supplied to-day by Osborne Scott, General Passenger Agent of the Canadian National Railways in Winnipeg.

150 MILE IN LENGTH
Mr. Phillips has established a trap line 150 miles long near Obed, just east of Jasper, Alberta, in the Rockies, and at about every ten miles has built a shanty. It is his intention to take three businessmen or writers with money and ambition to scribble something about the Canadian wilds on trips along the trap line, so they may learn the methods followed by trappers in securing furs and at the same time get a few thrills.

The trap line will be opened with the coming of the first snow and it will be kept up all winter. Visitors who do not know how to snowshoe will be taught to learn how to ride from trap to trap on sleighs pulled by teams of dogs.

The traps will be set for martens, minks, fisher, ermine, wolf, fox, wolverine and bear. The adventures will be shown how to set the traps, how to bait for each animal, and they will be shown how the animals are skinned and the fur prepared for the markets.

That the plan is one which carries an undoubted appeal is evident from the fact that Mr. Phillips has already booked reservations for forty people. Most of whom are from Chicago and Cleveland. There are also several applications from New York and one from New Orleans.

Mr. Phillips, whose headquarters are at Jasper, in the Northwest, is one of the noted guides in the Canadian Rockies. This year he handled all the outfitting, feeding and transportation arrangements for the Alpine Club of Canada, which held its annual camp at Mount Robson.

Having a reliable stock of cars, both for business and pleasure, for the Reo trucks and White delivery wagons, stages and busses have long been recognized as leaders in their line. Mr. Wallis built up a strong foundation for a vast motor business here. Steady progress has marked his career in Victoria, and he has purchased from Mr. Wallis, in their up-land stage service, from Victoria to Nanaimo. The terrific strain which these machines undergo, and the big cars bear up wonderfully under the burden.

The Huppmobile, as a pleasure and general utility car, is also becoming a vastly popular motor with the general public. It has appearance, style and performance, for better or for worse, and its owners can testify to its performance, and its sales here and elsewhere are on the increase. Mr. Wallis is satisfied with the attainments of this car and has great hopes for its future.

BATTALION ORDERS

(By Captain J. Gordon Smith, commanding 1st Battalion (8th Bn. C.E.F.), the Canadian Scottish Regiment, Victoria, B.C., September 10.)

1. Course of Instruction (Visual Telegraphy)—A provisional school of instruction, visual telegraphy, is being conducted by the Royal Corps of Signals, Inst. Cadre, at the Drill Hall, Bay Street, commencing on Monday, September 15.

The course of instruction will be of six weeks' duration, and the hours of attendance will be from 8 p.m. to 10 p.m. on three nights weekly—nights to be selected with the candidates' consent. Now that the examination, candidates will be entitled to a bonus and certificate according to their proficiency.

Candidates already holding "B" or "C" certificates may attend this course in order to qualify in a higher standing, also any signaller in the branch of military education.

2. Annual Inspection, Arms, Clothing, Etc.—The annual inspection of rack stores will commence on Thursday, September 25. All rifles, pull-throughs, oil-bottles and slings in possession of members of the unit will be returned to the quarter-master's stores by Monday, September 22.

3. Visit of Troops to Points Outside of Canada.—The following extract from District Order No. 171, August 7, 1924, is published for information of all concerned:

"Attention is directed to the provisions of D.O. No. 107, July 10, 1924, with particular reference to the necessity of submitting applications for units or details to visit points outside of Canada, in sufficient time to reach National Defence Headquarters, Ottawa, not later than thirty days prior to the date of the proposed visit.

All applications have to be submitted by the Canadian Government through proper channels to the Government of the country concerned, and in the case of the United States, the U. S. State Department has to

communicate with the Governor of the State into which an entry is desired. It is, therefore, physically impossible to deal properly with applications which do not conform to the requirements of District Order No. 107, July 10, 1924, and it will be necessary, in future, to refuse applications where sufficient time is not available in which to carry out the required procedure.

W. MERSTON,
Captain and Adjutant 1st Battalion (8th Bn. C.E.F.), the Canadian Scottish Regiment.

TRIP-TRAPPERS SOON IN ROCKIES

Unique Form of Sport in the Wilds Organized by Guide

Winnipeg, Sept. 13.—Something new in the way of entertainment for the tired business men of New York, Chicago, Pittsburgh and other large centres of the United States has been developed in Canada by Donald (Curley) Phillips, noted guide and outfitter of the Canadian Rockies. The plan, which has already been matured and which will be established as an actual fact, is the creation of a "du" trap line where rich men who yearn for the sojourn and adventure of the North may take their emotions without experiencing any of the hardships or discomfort. LLOYD GEORGE WOULD REBUILD WORLD LEAGUE

(Continued from page 1)

But from the point of view of the League, the outstanding fact is that, in the working out of the London settlement, for better or for worse, it was completely ignored. Many a time have I heard the Coalition Government denounced by Socialist orators for all sorts of reasons, but there is only talking to be done, they lie off to Geneva to pour out platitudes about peace arbitration and disarmament into the blue waters of the Rhone.

Radiola

What every one has been waiting for

Everyone has been interested in radio but few own radio sets. Many have been waiting for the set of the future—the perfected set—simple; quick to pick up any station, near or distant; quality built, yet moderate in price.

New Designs

Now, the combined resources of the Canadian Westinghouse Company and the Radio Corporation of America unite to fulfil the prophecy of radio achievement.

Remarkable Improvements

Radiolas made by Canadian Westinghouse represent new and remarkable radio achievements. They are super-selective—you can tune any station in or out at your pleasure. They are unusually sensitive so that stations 1500 to 3000 miles distant can be easily heard. They are non-radiating—you are not the bane of every other radio owner in your neighborhood. And the tone reproduction of these sets is clear and melodious in its portrayal of voice or music.

Popular Prices

Best of all, these important improvements are now obtainable at a popular price. You owe it to yourself and to your family to know what opportunities for education, information and pleasure these new Radiolas bring to your home. Any Westinghouse dealer will be glad to give you a demonstration or you can write us for our fully illustrated booklet.

SPEECH BY COOLIDGE IN WASHINGTON HEARD OVER RADIO HERE

COOLIDGE AND PERSHING HEARD LAST NIGHT OVER RADIO BY VICTORIA FANS

Defence Day Test Carries Speeches From Washington, D.C., to All Pacific Coast Cities

Victoria last night was in on what is declared to be the most remarkable radio demonstration that this continent has ever had. It was held in connection with National Defence Day in the United States.

President Coolidge, Secretary of War Weeks, General Pershing and other high officials of the United States Army spoke into a microphone in the War Department Building in Washington. Their speeches were heard by Victoria radio as clearly as if they had been speaking from Seattle. Generals of the various army divisions from San Francisco to Boston and New York also spoke and they were heard just as distinctly.

The speeches were put out over the country by the broadcasting station at Washington and New York and by sixteen other stations which were synchronized with them. Altogether 13,000 miles of telephone wire were used while the speeches were being made. The telephone wire carried the speeches from the microphone in the War Department Building at Washington to the various broadcasting stations which put them on the air.

Not only did millions across the continent hear the leaders speak in Washington, to the generals in the various districts, but they heard them hold instantaneous conversation over thousands of miles of space. General Pershing and others spoke to General Mercer in San Francisco and the radio listeners here heard them answer one another through the air just as readily as if they had been holding a local telephone conversation.

The demonstration was held to show the possibilities of the use of radio in case the nation were called to war.

Aubrey Jones, Michigan Street, was one of the first to pick up the Washington demonstration with his powerful receiving set. He picked it up just after dinner and had it strong right up until the end at eight o'clock, Victoria time. The Western Canada Radio suspended its local broadcasting when it learned through Mr. Jones that the Washington speeches were coming through so clearly to Victoria.

LATEST RADIOLA ATTAINS POPULAR PLACE ON MARKET

Dealers Report That it Has Given Unprecedented Satisfaction

Probably the most popular, but at least the most satisfactory of radio broadcast receivers, is the new Radiola Super VIII. This is a six-Radiola non-radiating broadcast receiver employing the super-heterodyne-second harmonic principle, in a more sensitive and greatly simplified design. The beautiful cabinet contains the operating mechanism, a newly developed loud speaker, a concealed loop which may be rotated by a panel control knob and space for all the necessary batteries. It has a loop control, a battery and volume control. New inventions make the six radiotrons employed deliver results equal to sets having eight or nine tubes.

The Radiola Super VIII is the peer of all radiolas, dealers say. It can be purchased through almost any of the local dealers. It is particularly designed for use in cities and areas local to broadcast stations where the erection of an antenna is often impracticable, and where an extremely high degree of selectivity is absolutely imperative. The super-heterodyne principle, improved beyond any comparison to previously existing designs, provides super-selectivity, enabling one to tune distant stations under the shadow of a local broadcast station.

Although this new piece of receiving mechanism offers advantages to the purchaser, it is particularly adapted to use in apartment houses and thickly populated districts where often there is not sufficient room to erect a multiplicity of antennas. Indeed, in some such locations it is difficult to erect an antenna that is not shielded from the broadcasting station by steel buildings, wires and metal roofs.

It was not sufficient to produce a set for installation in such places which would enable reception from local broadcast stations only. The real problem facing the research engineers was the development of a receiver using a self-concealed loop which would give universal performance under the limitations thus imposed.

Having decided upon the super-heterodyne principle, the engineers set about to improve this circuit to the very limit of technical knowledge of the times. The circuit has undergone some radical changes and improvement with the result that there is now a combination of marvelous sensitivity, selectivity and quality of reproduction, known as Radiola Super VIII.

The cabinet and panel work of the new achievement in radio receiving sets is particularly handsome. It is really a beautiful piece of furniture and will contribute to the charm of any room. For this reason it is vastly popular with those persons who have a pride in the appearance of their homes. That appeal, from all this, it gives the highest satisfaction of any radiola yet brought upon the market critics say, and the public demand seems to have given undeniable proof of such a statement.

Lighthouse has its own characteristic signal by which it is identified.

EQUIPMENT

The radio compass is generally installed over the chart room or pilot house of the ship, where it is convenient for use by the navigator. The device consists of a rotatable coil directly exposed to the radio waves and rotated by the wave by varying degrees of intensity as the coil is rotated about its vertical axis. When the plane of the coil is at right angles to the direction in which the transmitting source lies, the signal intensity becomes zero. This position of silence is critical or sharply defined, and therefore indicates with great accuracy the direction or bearing of the signaling station. The bearing is read directly from the ship's magnetic or gyro compass as attached, and therefore immediately gives the bearing with respect to magnetic north, or true north, depending upon whether a magnetic or gyro compass is used.

Personal experience in the development and practical application of the radio compass will assuredly have a revolutionary effect upon navigation. Every important lighthouse and every light vessel will, in the near future, become a radio beacon.

RADIO COMPASS IS GREAT HELP TO NAVIGATION

Waves Are Not Affected by Unfavorable Weather Conditions

While public interest in radio lies chiefly and most naturally in broadcast reception, radio finds its most important and its most essential application as a means of communication with ships at sea. Here, it serves to safeguard life and property. More recently, radio, through the development of the radio compass, has become of still greater importance in navigation, and particularly in promoting safety of life and property at sea.

The U.S. Government Lighthouse Service operates and maintains an extensive system of navigational aids, including lighthouse and light vessels, which are equipped with powerful lights and sound signaling devices, and everyone who has sailed on the seas is familiar with the welcome sight of the flashing light or with the assuring sound of the foghorn.

Unfortunately, however, during fog or thick weather, these navigational aids do not serve their purpose adequately because light does not penetrate fog and sound signals are extremely unreliable and can not be depended upon to indicate direction or distance. Even under favorable weather conditions, the most modern devices for visual or sound signaling are limited to comparatively short distances.

FOG NO HINDRANCE

Radio waves are unaffected by fog or thick weather and they can be transmitted over much greater distances than either light or sound waves. Any lighthouse or light vessel equipped with a radio transmitter therefore, becomes an effective, radio fog signalling station whose characteristic signal may be readily received by all ships within range, irrespective of weather conditions.

The radio compass is a nautical instrument which not only receives the radio fog signaling wave sent out by the lighthouse or lightship, but enables the navigator to determine immediately the direction or bearing of this signaling station. In other words, the radio compass is a device which is used to take the bearing of invisible radio beacons whose locations are shown on navigational charts. From such bearings the navigator is immediately informed as to his position.

One can fully appreciate this new and simple aid to navigation unless he is somewhat familiar with the science of navigation. Since the days of the earliest mariners, navigation has depended upon astronomical observations, that is to say, upon observations of the sun and stars. When it is most important for the navigator to know his bearings, such as in foggy and stormy weather, the sun and stars are obscured and invisible, so that he is temporarily lost and must resort to dead reckoning and await clear weather before his position can be checked. The science of navigation has depended, since its earliest days, upon visibility, but now, with the aid of the radio compass, it is possible for the navigator to know his position at all times regardless of weather conditions.

The equipment used for fog signaling consists of a simple radio transmitter automatically operated. The wave length used for this purpose is 1000 meters and each light vessel or

NEWS BY RADIO FOR PRINCE OF WALES

Service During Trip West on C.N.R. Train and at His Ranch

Montreal, Sept. 13.—During his trip across Canada and his visit to his ranch at High River, Alberta, the Prince of Wales will be kept in touch twice daily with the news of the world. Morning and evening a complete digest of all the important news events by radio will be broadcast, arrangements to this effect having been completed by the radio department of the Canadian National Railway.

LONDON TIMES EDITION

The morning broadcast of news will take place about 10 o'clock daily while the train is traveling across Canada, and at about 3 o'clock during the visit of the Prince to his ranch. This service will be in reality a miniature edition of The London Times, the official newspaper of the Royal family, and the service is made possible by the co-operation of The London Times and The New York Times and The Montreal Gazette, which control the progress of the train will be CNRM (Montreal), the Ontario Government stations at Sudbury, CRNW (Winnipeg) and CNRC (Calgary).

The radio edition will be prepared by a special editorial staff of The Times after the news circulated throughout Great Britain is sent to press about 3 a.m. London time. This radio edition will then be dispatched by cable to the Montreal offices of the radio department of the Canadian National Railway, and thence forwarded over the land wires of the Canadian National Telegraphers to the radio stations scheduled to do the broadcasting. Stations which will broadcast during the progress of the train will be CNRM (Montreal), the Ontario Government stations at Sudbury, CRNW (Winnipeg) and CNRC (Calgary).

type of your "B" battery, which in turn is connected to a good ground connection. This sheet copper makes a good shield, as tin foil is too easily damaged. If you are transmitting as well as receiving apparatus, this shield is almost essential, as the presence of power transformers and wiring in the vicinity of the vacuum tube apparatus will surely introduce noise into the receiving system if care is not taken to shield the latter.

If you have a great amount of trouble of this nature, particularly from nearby power apparatus, such as motors, elevator machinery and the like, the installation of a small counterpoise, as near under the antenna as possible, will without doubt be a great aid in eliminating the disturbances. Many regard the counterpoise as useful only in transmitting, but on the contrary, a counterpoise is as good if not better, than the ordinary water-pipe ground, both for receiving and for noise elimination.

A good receiving counterpoise can be made of eight wires insulated if desired, about forty feet long, with about two feet separation, and six to ten feet above the ground. The wires may be insulated from the ground by porcelain cleats or antenna insulators. If it is impossible to erect the counterpoise outside of the house, a network of wires in the cellar, provided that they are not too close to the house lighting system, will answer the purpose.

LIGHTING SYSTEM

Another source of noise coming from without is the street lighting system with a series of direct current lights. Occasionally one of these lights becomes defective, and arcing occurs between parts of the automatic carbon-feeding mechanism, with the result that high frequency oscillations over a broad band of wave lengths are generated and a sharp hissing sound in the receiving set is the result. Often the use of a ground connection to a water pipe common to neighboring power apparatus will introduce serious difficulties in the way of noise, in a sensitive receiving set.

Another source of trouble, which is very intermittent, however, is the charging of the lightning arresters at large power substations. This will produce a harsh, grating sound that lasts for a few seconds and usually occurs twice a day. It is caused by a large, high voltage arc at the switch contacts when the sub-station attendant breaks the charging circuit to the arresters. This trouble is not serious, as a rule, but is mentioned to aid in identifying the various noises you may hear.

CURRENT HUM

The last, but the most troublesome noise is alternating current hum, as it is often called, distinguished from other noises by its steadiness and musical tone. Unless your set is shielded against a high voltage line, the noise is coming from your house wiring, and the easiest way to rid yourself of the trouble is to thoroughly shield the cabinet of your set, and ground this shield to the negative

A PAGE OF INTEREST TO CHILDREN

CHILD'S STORY OF THE HUMAN RACE By Uncle Ray

THE DEFEAT OF THE GAULS

To the north of Greece was a country called Macedonia. Its most famous ruler was named Alexander. He became ruler of part of Greece. Then he led an army into Asia Minor. There he beat the Persians. Egypt and part of far-away India fell before his sword.

This man is known in history as "Alexander the Great." After his death, his generals quarreled about the way his empire should be divided. It was finally split into three parts—Macedonia, Persia and Egypt.

The man who got Macedonia was killed before he could take charge of the country. His grandson filled his place, but had a very hard time. At that time tribes of fierce people from Western Europe were sweeping eastward, burning and killing.

These tribes were called "Gauls." They overran Macedonia, and a part of Northern Greece. People everywhere feared them. In time, they spread their way into Asia Minor, spreading terror there.

It happened that there was a city in Asia Minor whose people were mostly Greeks. This city was called Pergamum. Its soldiers fought the Gauls and drove them back.

After the defeat of the fierce invaders, several splendid statues were

made by the sculptors of Pergamum. One of these shows a Gallic chief killing his wife and himself to prevent their capture. Another shows a Gallic trumpeter falling dead as the result of a wound.

This is a photograph of a coin used for trade at Alexandria. It pictures the light-house and an approaching ship.

king one day came to him as a pupil. Soon the king grew tired of trying to work out the hard problems.

"Euclid," he exclaimed, "this is too

Here we see a photograph of the statue of a dying Gallic trumpeter.

hard for me to fool with, can't you show a king an easier way?"

"No," replied Euclid. "There is no royal road to learning geometry."

I think most high-school boys and girls agree with Euclid.

Alexandria was the world's greatest centre of sea commerce. Metal money was now widely used for trade. A lighthouse was built near the harbor of the city to protect ships going in and out. This lighthouse was considered one of the "seven wonders of the world."

RAMA AND SITA

Among the people of India many years ago, stories were sometimes written down. Much more often they were spoken from person to person by sacred words. Parents spent hours and hours telling their children about the gods who ruled over the world and the great heroes of the race. Many wondrous things they were supposed to have done.

There were so many of these tales that a dozen good-sized books would not contain them all. I have picked out one of the most interesting—the story of Rama and Sita—which I shall tell you now:

"When Prince Rama, the son of a powerful king, became a young man, his father decided to pick out a bride for him. Before this could be done, a hermit came to the court and said: 'Oh great ruler, a terrible monster is carrying away the offerings left at my hermitage. I pray you let Rama come and kill it.'

"Rama went with the hermit to the region in which the monster dwelt. He twanged his bow-string, and the monster came from its den, hurling boulders at the prince.

"Rama dodged the stones and sent an arrow at the monster which caused its death. The hermit was overjoyed. Next day he took Rama to the palace of a certain ruler to see a huge bow which neither gods nor men could bend.

"The bow was brought before Rama in an eight-wheeled chariot. 'Bend it if you can,' said the king.

"Rama grasped the bow and bent it as if it were a bow-string. The ruler was amazed. He was credited with 'giving the air of life to men.' He stood for the thing which makes man and bird and beast able to walk, fly or spring—for the spark of life.

Twins to Indra was Agni, the fire god. He was credited with 'giving the air of life to men.' He stood for the thing which makes man and bird and beast able to walk, fly or spring—for the spark of life.

native. Soon after the conquest of India by the lighter-skinned tribes, there grew up in India many stories about gods and goddesses.

The early people of India had gods who were supposed to command thunder, lightning, fire and wind. The chief god was called Indra. Sometimes he was called the "hammer god" because he was said to rule over the thunder. Indra, it was declared, used his hammer to make the stars and sun and earth.

Alexander had a general named Ptolemy. He got control of Egypt and set himself up as king. Many bright-minded Greeks then called over to Egypt and settled down. Most of them settled in a city called Alexandria, near the mouth of the Nile.

A splendid school was started at Alexandria. It was in fact a university. There were several buildings, and students were taught sciences, literature and how to be doctors.

You will be surprised when I tell you how many students went to this university. At one time there were 14,000. They were gathered not only from Egypt and Greece, but also from Macedonia, the Land of Two Rivers, and even from India.

The university library was half a million books made of paper, with words written in

Now you can have my beloved daughter for thy wife. Of great beauty was Sita and no end of charm and sweetness. She was married to Rama, and joy filled the hearts of both.

During their honeymoon, they went one evening to a woody spot outside the city. Here they found a pond of crystal water, upon which the moon's rays brightly danced. They bathed in the pond and played hide-and-seek.

"At one time Sita became alarmed because her prince stayed under the water for too long a time. After much searching, she beheld his face just at the surface of the water, amid lotus leaves and blossoms."

AN ANCIENT MAP
This story is about a map made a great many years ago. The man who made it lived in Egypt, at the great city of Alexandria (shown on the map).

Let us study this map. First of all, you will notice that the names are written in English letters. This is done to make it easier for you. It would be a mighty hard job to read the names the way they were set down by that scientist (whose name was Eratosthenes).

Three continents are shown—Europe, Asia and Libya. The last is the same as Africa. It was then

This is a map of the world as it was believed to look by a great geographer many years ago.

called "Libya." The Greeks gave it that name because they had been in the habit of trading with tribes of Libyans.

The name Europa or Europe came from the word for 'darkness,' used by the people of the Land of Two Rivers. The sun set in the direction in which Europe lay, so it was called the "land of darkness." The

name Asia comes from the word "sun," which meant "sunrise" or "land of the sunrise."

You will notice that the continents have queer shapes, while rivers and seas are somewhat out of place. The map was a very good piece of work, however, when we think of how hard it then was for people to learn about the world. The same man who made the map was sure the earth was round. He used a certain method of geometry to tell the distance clear around. His result was 25,000 miles, which is nearly correct.

INDIA'S STORIES OF CREATION
The stories told in ancient India changed from time to time. In the first tales the "hammer god" Indra was called the "chief of the gods." But later on Brahma was said to be "lord of all." One of the favorite subjects of the story-tellers was "how the world got started." Here is a tale in which Brahma is the first god:

"At first the world did not exist. There was neither sky nor earth nor air; but the world wanted to be. Smoke came. It was hot and fire was started. Rays from the smoking fire came together as clouds and made the sea.

"Out of the sea the god Brahma arose. He looked around and saw

there was nothing to stand on. This made him weep.

"Part of his tears fell into the water and became the earth. Other

Brahma is seen here coming from a lotus which grows out of the body of Vishnu.

tears he wiped to the side, and these became air. Still other tears he wiped upwards, and they were turned into sky." To show how long Brahma had lived, it was said that his "day" lasted more than 4,000,000 years. "It was said.

Other stories made Vishnu the first and greatest of all the gods. He was spoken of as "the god of mercy and goodness."

"His arms were four in number," says a certain tale. "He slept on a many-headed snake. The snake rested on a turtle. When the turtle moved there was an earthquake. Out of the body of Vishnu grew a lotus plant, and from the blossom Brahma was born."

You can get a lot of fun out of this toy, and you will also find it a very much appreciated gift by some of the younger boys and girls.

A MONKEY-UP-A-STICK
This is a very interesting little toy, and can be made without much work. First cut out the monkey according to the design shown in the drawing. You can either cut this out of cardboard or wood. Cut the arms and legs out separately and fasten them to the body with paper fasteners or rivets. Make sure that they

turn freely, however. Paint the monkey grey or brown.

Make small holes in the feet and hands. Then get two lengths of stripwood, one one-quarter inch, the other almost twice as long. Drill a hole near one end of each of these sticks. Pass a pin or piece of wire through the holes in the monkey's feet and the hole in the shorter stick and then bend it over so that it cannot slip loose. In the same manner fasten the monkey's hands to the longer piece. The two pieces of stick may be kept together with an elastic band, but it is much better to join them

PURE GRIT
A man bought six pounds of sugar and found it adulterated with sand. The next day he had inserted in the local paper a notice reading thus:

"Notice—I bought six pounds of sugar from a grocer in this village. From it I have taken one pound of sand. If the grocer will send me six pounds of sugar I will not expose him."

Next day five six-pound packages of sugar were left at the man's house, there being just five grocers in the village.

Last Week's Who

THE WHO ZOO
Who is the bird that catches fish. With pouch beneath his bill as dish? Who stands so still and looks so wise, Yet darts like lightning when he tries?

To make sure of your guess, cut and arrange the puzzle pieces before you paste onto card board. You will always find a narrow line for the outside of the "WHO" which makes it easier, and by cutting along that line after mounted, you can have a new animal for your "ZOO" every week. The verse will tip you off to the secret.

WATER CURTAIN FOR FIRE
An important new invention of great value in putting out fires at oil works is now in use at Los Angeles. Large tanks containing oil enough to fill 2,000 barrels sometimes catch fire with disastrous results. The invention consists of a water apparatus placed inside the oil tank, just above the level of the oil, by the touch of a lever, it can be made to throw a thin circular curtain of water right over the tank.

The air is thus excluded from the burning oil, and as nothing can burn without oxygen the flames are quickly put out.

Pouring water on burning oil is not only useless; it usually spreads the fire. The new apparatus which is a sort of water screen over the fire, which quickly produces a smothering layer of steam in addition, and when the flames die out the water will have settled to the bottom of the tank and can be drawn off by a tap.

FEATURES FOR SMALLER FOLKS

The Nursery Rhyme Quiltie

NUMBER 4
For in her hand she carried a broom.
"Old woman, old woman, old woman," quoth I,
"Oh, whither, oh whither, oh whither so high?"
"To sweep the cobwebs off the sky."
"May I go with you?" "Aye, bye and bye."

This must be the kind of aeroplanes they have in Mother Goose land. Some altitude record they make with their high jumping cows and flying baskets. I think this old woman will be safer when you get her firmly stitched down onto the upper right hand corner of that new quilt.

VAULTING APPARATUS

You can buy iron standards or bases, and of course the whole apparatus, for high jumping and pole vaulting, but it is a simple matter to make a pair of uprights that will answer the purpose satisfactorily.

Take two straight sticks, ten or twelve feet long, and about two and a half inches square. If you want to you can taper each piece off to about one and a half inches at the one end. This is not necessary, however, if you are not over-particular. Make each base of two pieces of board about four inches wide and perhaps three feet long as shown in the drawing. Mortise the larger ends of the two posts into the exact centre of these bases. They should be carefully braced as shown.

To lay off the holes in the posts, lay off a line down the centre of each post and mark off the feet and inches. Bore a quarter-inch hole through each mark, except those near the ground, to contain the pins which are to hold the bars.

The vaulting pole should be round, very straight-grained from a well-seasoned stock of light, strong wood, as spruce, free from knots or any cross-grained weak spots. The thick-

High Life For Mountain Spiders

That animal life ascends the mountains far beyond plant growth is one of the discoveries of the Mount Everest expedition.

"The highest growing plant observed was blue vetch at 18,000 feet," writes Lieut.-Col. E. F. Norton, leader of the expedition. "Yet animals possess permanent habitations as high as 22,000 feet. A minute and inconspicuous black spider hops about on the rocky cliffs and hides beneath stones in those bare places which happen to be swept clear of snow by the wind. I cannot think on what it lives at such a height.

"In these altitudes there is no other living thing—nothing but rock and ice. This little spider is worthy of note, being the highest permanent inhabitant of the earth. We therefore find life on the highest mountains far above the permanent snowline."

Little Folks Lament

A hopeful young angler named Gail.

Gail, the Fisher

Knew Simon had fished in a pail.

When Gail went for fishes.

He chose other dishes.

He chose other dishes.

Uncle Wiggily and Betty's Bob

"I can't bob hair!" gasped Uncle Wiggily.

BEDTIME STORY

Uncle Wiggily and Betty's Bob

Copyright, 1924, by McClure Newspaper Syndicate
(By Howard R. Garis)

Betty Ringtail was a little girl raccoon. The reason she was named Ringtail was because she had rings of light-colored fur on her tail, which, in other places, on either side of the rings, was rather dark. And the reason the little girl's other name was Betty was because she was Elizabeth. And, as you know, any one who is named Elizabeth is almost always called Betty.

One day Betty, having washed a piece of fish in the brook before she ate it for breakfast—I mean before she ate the fish, not the brook one morning Betty started for Uncle Wiggily's hollow stump bungalow. Betty, as do all raccoons, always washed in clean water every bit of food before she ate it. Green corn is about the only thing raccoons don't wash before they eat.

"Hello, Uncle Wiggily!" said Betty politely, as she waved her paw, which was almost like a baby's hand, at the rabbit gentleman. "I have brought the scissors with me," finished Betty.

"Scissors?" exclaimed the old rabbit gentleman with an extra fine twinkle of his pink nose. "Why the scissors?"

"Because I want you to bob my

"I can't bob hair!" gasped Uncle Wiggily.

hair—that is, cut it off short," explained Betty. "All the girl animals are having their hair bobbed, and I want mine. That's why I brought you the scissors."

"Oh, but, Betty! I can't bob hair!" gasped Uncle Wiggily. "You should go to the barber pig, who takes four and twenty hairs to make a wig. I can't bob your hair."

"Oh, yes you can," laughed Betty, slyly tickling the old rabbit gentleman in the ribs with the handle of the scissors. "I asked my mother if I could have my hair bobbed, and she said I could if you would do it. Now please do."

Betty handed Mr. Longears the scissors. The old rabbit gentleman gave a weary sigh and told the little girl raccoon to sit down on a flat stump.

"We shall pretend that is a barber's chair," he said. "But I fear I shall make a very poor task of bobbing your hair, Betty."

"Oh, I don't mind," laughed the little raccoon, so the rabbit gentleman began to start. He clipped off some of the ends of Betty's fur around the back of her head. Then he took off some more, and a bit additional. There was a puddle of water near the stump, and Uncle Wiggily said Betty had better get up and look in it before he cut any more of her hair.

"The water is like a mirror—see if you like the way you look," said the bunny.

Betty looked and clapped her paws.

"Oh, that's just fine!" she cried. "I look wonderful. Uncle Wiggily! You are a good barber for bobbing!"

"And I am a good Bob Cat for nibbling!" suddenly cried a savage voice, and over the spring Uncle Wiggily saw Betty had better get up and look in it before he cut any more of her hair.

Uncle Wiggily didn't know what to do, but Betty cried:

"Bob the Bob Cat, Uncle Wiggily! Take the scissors and snip off his foolish little tail. Bob the Bob Cat!"

But when the bad chap heard this he jumped back across the spring, gave a howl and cried:

"Don't snip off my tail! Please don't! It's only a short one now, and if you snip any off, all the other animals will laugh at me! And he animals will laugh at me! And he animals will laugh at me! And he animals will laugh at me!"

And fearing Uncle Wiggily might snip and bob it, the Bob Cat ran away off through the woods as fast as he could go. So he didn't nibble the bunny's ears after all.

And if the fountain pen doesn't splash red ink on the face of the clock, to make it look like a fireman, I'll tell you next about Uncle Wiggily and the late firefy.

REAL ESTATE HOUSES, LOTS, ACREAGE, DAIRY, FRUIT, and CHICKEN RANGES FOR SALE

BARGAINS IN ACREAGE

MAKES INSPECTION OF ROAD WORK IN SAYWARD DISTRICT
 Special to The Times
 Sayward, Sept. 12.—D. Sutherland, bridge inspector of the Department of Public Works, Victoria, has a crew of men at work on the structure of the new bridge at the third crossing of the Salmon River. The bridge will replace the present bridge, which was built some seventeen years ago by the Hastings Mills Company, when they were engaged in extensive logging operations in this district.

WAS VERY KEEN, THE JUDGE REMARKING THAT HE WAS ONE OF THE BEST EXHIBITORS OF BREAD HE HAD EVER HAD THE PLEASURE OF JUDGING.
FRUIT CLASSES
 The fruit division was very well represented and Salt Spring Island should be proud of the variety, size and quality it displayed in this section. The Salt Spring Island Creamery had a fine exhibit of butter, which is now well known and liked throughout the entire province. The jam factory had a nice stand showing its products. There was also an instructive postal-exhibit, the Department kindly lending many interesting articles. One that was of great interest was a letter from Germany, the postage on which amounted to 3,000,000,000 marks. Post Office Inspector E. M. Haynes has the supervision of the postal exhibits in this part of British Columbia at the various fall fairs.

OAK BAY HOME
 NIGHT large, square rooms, all well lighted; 10 bedrooms; with lawn, swimming pool, tennis court, basketball court, two fireplaces, laundry tubs and every other modern feature you wish in a good home. The owner is now living in the interior of B.C. and will sell for \$4,500, with \$150 cash.
A. A. MEHREY
 608-9 Sayward Bldg., 1297 Douglas Street

COUNTRY HOME
ALL CITY CONVENIENCES
 12 ROOM BRICK COUNTRY HOME, modern bath, furnace, garage, acre of land in lawn and garden. Property is four miles out of city. Will sell for \$12,000.
J. GREENWOOD
 1236 Government Street

GOOD INVESTMENT
 Being an exceptionally good corner 65x100 with two-story brick building producing revenue.
OFFERED FOR \$11,000
 The price asked unquestionably stamps this property as the best business investment in the city to-day.

HAPPY VALLEY CREEK CLEANED

Make Arrangement for Visit of Lieutenant-Governor to Metchosin

Luxton, Sept. 12.—The Luxton and Happy Valley Women's Institute held their regular monthly meeting on Tuesday last in the Luxton Hall. There was an excellent attendance. Mrs. R. Brown presiding. Community improvements were discussed, and considerable satisfaction was expressed by the members that their appeal for the clearing out of the creek which runs through the Happy Valley district has brought results, and the work is now in progress. Hitherto, the district has suffered considerably during the wet seasons through the flooding of the roads and low-lying lands, and it is hoped that the cleaning of the creek will to a

large extent correct this damaging nuisance, as it will carry off the water. Arrangements were made for a children's fancy dress party to be held on All Hallows' Eve from 7 to 10 o'clock, to be followed by a dance for adults. Prizes will be given for the best comic costume—boy and girl, and for the best character costume—boy and girl; the grand prize will take place at 9 p.m. An interesting demonstration on rug-making was given by Mrs. M. G. McLeod, which was greatly appreciated by the members, who accorded the demonstrator a very hearty vote of thanks. Arnoon tea, served by the hostesses for the afternoon, Mrs. Madge and Mrs. Masters, brought a very pleasant and interesting meeting to a close.

Metchosin, Sept. 12.—Lieutenant-Governor Nichol, H. J. S. Muskett, Hon. E. D. Barrow, Minister of Agriculture, Dr. D. W. Warnock, Deputy Minister, and R. H. Pooley, will take lunch with the directors of the Metchosin Farmers' Institute prior to the opening of the district Fall Fair at Colwood Hall on Wednesday. The luncheon will be served by Mesdames

WHERE TWO AGES MEET

(Continued from page 15)

lines along which grew tiny strips of grass, now yellowed by the Summer heat. Its face was impossible, so we worked our way round the southern side, only to find ourselves confronted by a stair-like profile in which each individual step sloped downward at a just impracticable angle. We tried it but were compelled to desist. So we retraced our way and, as I expected, on the other side the steps sloped inward and gave us an easy passage upward.

ROCK CLEAVAGE AND CLIMBING

The rocks so far met with were porphyries of the Slicker series which were intruded in vertical dykes and horizontal sheets into the andesitic lavas, tufts and slates of the Jurassic age. They are greenish in color and speckled with white. The chief form of the latter is filament which is very clearly distinguished under the microscope by its alteration to a mineral known as talc. The talc is in color and marked by straight lines triangularly arranged. A very regular system of cleavage is found throughout them; on one plane sloping to the southeast and these in turn cut by vertical joints, so that in places there is a resemblance to the columns of basalt. Indeed, from the west shore of Cowichan Bay, this cleavage can be quite distinctly made out, marking out the crystalline rocks from the overlying sediments. It was this which gave us both our difficulties and our opportunity of surmounting them. Trivial as all this may seem to the alpinist who has taken him to the cliffs and peaks of the Rockies, Selkirk or Alps, yet the principles involved are the same and the knowledge and observation indispensable part of the mental outfit of climbers of both high and low degree. On Tzouhalem the smooth, little broken sandstone and conglomerate cliffs, the steep angled slopes of the slaty strata and the defined jointing of the porphyries.

WILL FETE AGENTS

Los Angeles, Cal., Sept. 12.—Arrangements have been completed here for the reception of 150 members of the Two Hundred Thousand Club, agents of the Penn Mutual Life Insurance Company, who will meet in the western states, who will meet in the city from September 30 to October 2, inclusive. Members of the Malaspina Chapter, Daughters of the Empire, at the home of Mr. and Mrs. Peterson, Finlayson Street, tendered a miscellaneous shower to Miss Dorothy Weeks, who is shortly to be married. The rooms were prettily decorated in pink and white colors, with a profusion of flowers. Master Robert Hindmarsh and Dorothy Peterson, dressed in harmony with the decorations, drew a hearty gift laden tea wagon

MAKING INSPECTION OF ROAD WORK IN SAYWARD DISTRICT

The members of the Sayward Progressive Agricultural Development Society have been busy with their teams during the past week hauling logs to the sawmill and taking lumber sawed from these logs back to the new agricultural hall site. It is expected to have all the lumber cut this week. The Department of Agriculture, Victoria, that the postment of the Sayward and district official agricultural fair to September 30 meets with the department's approval. The fair was to have been held on September 9, but for various reasons it has been thought advisable to set the date back to September 30. The society is making every effort to make the coming fair a greater success than the very successful fair held last year. The Department of Agriculture are supplying two judges.

ISLANDS FAIR WAS SUCCESSFUL EVENT

Many Flower Exhibits; Fruit on Display; Fine Jersey Cattle Seen
 (Special to The Times)
 Ganges, B.C.—The Twenty-eighth Annual Islands Fall Fair was held here on Wednesday. In opening the event, Lieutenant-Governor Nichol remarked that it was his first visit to this beautiful island. He was particularly struck by the prosperous look of the farms and farmers and the very beautiful scenery of the hills and ocean. He laid stress on his pleasurable surprise at the large number and good quality of the exhibits. Lieut.-Col. C. W. Peck, V.C., was also present and gave a short address at the luncheon which was served in the Motor Hall by the ladies of the Tennis Club. The judges for the various divisions were: Division 1—Horses, W. N. Jones; Division 2—Cattle, W. N. Jones; Division 3—4—Sheep, goats and swine, W. N. Jones; Division 5—Poultry, J. R. Terry; Division 6—Orchard produce, J. L. Hilborn; Division 7—Garden produce, J. L. Hilborn and F. W. Savory; Division 8—Field produce, E. R. Hiborn; Division 9—Miscellaneous, 1, E. R. Bewell; 2, Mrs. C. W. Kipp; 3, Mrs. C. W. Kipp; 4, Mrs. C. W. Kipp; 5, Mrs. C. W. Kipp; 6, Mrs. C. W. Kipp; 7, Mrs. C. W. Kipp; 8, Mrs. C. W. Kipp; 9, Mrs. C. W. Kipp; 10, Mrs. C. W. SAANICH TO SEEK COUNSEL'S ADVICE

Resolution From Central Ratepayers' Condemning Dempster Tabled

The Saanich Council last night had before it a resolution from the Central Ratepayers' Association condemning Police Commissioner Dempster for having performed services for pay, and the Finance Committee of the Council of 1923 for spending public funds upon replacement of Chief Brogan's car, without necessary authority or vouchers.

On the first paragraph, which asked the Council to secure the resignation of Mr. Dempster, the Council decided to take legal advice as to whether any technical mistake had been made by Mr. Dempster, and if the Council had any interest in the matter in any event.

On the second paragraph, which asked the Council to secure the resignation of Mr. Dempster, the Council decided to take legal advice as to whether any technical mistake had been made by Mr. Dempster, and if the Council had any interest in the matter in any event.

PROPOSE PLACING SIDEWALK ALONG SAANICH HIGHWAY

Quadra Street Motor Traffic Imperils Pedestrians

Spurred to action by the number of accidents to pedestrians on Quadra Street, the Saanich Council last night decided to call for tenders for sidewalks between North Dairy School and Tolmie Avenue. Alternative bids for wooden, gravel or cinder walk will be invited. The Council considered that placing sidewalks will absolve Saanich from liability if pedestrians continue using the roadway and suffer injuries.

ADVICE IGNORED

Councillor Vantreight commented adversely upon the handling of the fire fighting campaign against the blaze on Mr. Tolmie. He declared that he knew the terrain well, and that the advice which was ignored, but was confident his method would have been successful in stamping out the fire. Clerk Sewell declared the fire to be still smouldering, but not dangerous. Mr. Macnicol urged the councillor again to offer his knowledge of firefighting to the municipal officials.

SLIGHTLY ANNOYED

"Mr. Hastings does not appear to have any objection to the Saanich Council," commented Reeve Macnicol, after Clerk Sewell had read a letter of protest against sidewalk, sewer and road shortcomings. Mr. Hastings concluded his epistle by dubbing the municipal fathers "an irresponsible body who imagine themselves to be little czars." The council will have the sidewalk complaint of ex-councillor Reeve Macnicol.

TO MAKE CAMPS SAFE

Councillor Vantreight gave notice of motion to amend the Tent By-Law governing camping sites. Convinced that many camps are dangerous to the public health, he proposed that tents be not allowed closer than twenty feet apart. At present the limit is ten feet.

LAKE HILL WILL HOLD CELEBRATION ON MONDAY NIGHT

Formal Opening of Fine Community Centre Takes Place

The Lake Hill Community Centre will be formally opened on Monday evening with a concert and dance, with Hon. T. G. Coventry, member for Saanich, and Reeve Robert Macnicol as chief speakers at the ceremonies.

The completed structure comprises a fine auditorium and dancing hall, 32x68 feet, a smaller room 20x30 feet, a spacious banquet room, a kitchen, a supper room, and necessary cloakrooms.

The first steps in the organization of the Lake Hill Community Centre took place three years ago, when a small gathering of residents, at the home of W. E. Peirce, arranged for the co-operation of an enthusiastic committee with the Lake Hill Women's Institute and the various nearby Parent-Teacher Associations.

OFFICIALS TO MAKE FURTHER REPORT

After the city officials have completed a report on the dilapidated buildings, aggregating them between those which can be repaired, and those which ought to be removed, the report will be presented to the council. It was resolved at a meeting of the City Council yesterday afternoon.

ATLETIC PARK

The future of the Royal Athletic Park came up in the meeting, but no action was taken pending a report from the city solicitor.

TWO SCHEDULES

It was decided to prepare two lists, one for absolute condemnation and the other for option of repair to prevent condemnation.

WILL PROTECT PROPERTY INTEREST

Cummings' House Will Come Back Apparently to City

To the City Council yesterday afternoon the City Solicitor advised that the city could not resist the mechanics lien taken out for Thomas Thirkell on 1096 Yates Street, purchased from the city on agreement of last December. Mr. Thirkell did repair work on the house to the value of about \$182. The city was faced with a mechanics lien of that amount, plus the costs, amounting to \$197.75, otherwise the property was threatened with forced sale.

DOMINION EXPRESS MONEY ORDER

BAND CONCERT AT PARK TO-MORROW

The concert to-morrow being the last of the season has had special attention by Bandmaster Miller of the Sixteenth Scottish Band. The programmes selected by Bandmaster Miller are always greatly appreciated and to-morrow will be no exception. The overture selected is by Gomez, specially arranged for band by Herbert L. Clarke. Selections include "The Chocolate Soldier," which is always a great favorite; "Czarlas" from the opera "Ghost in the Woods" ever always be relied upon to please all listeners. A beautiful selection from the works of Moszkowski is a new one to park listeners as this is the first time played at an open-air concert.

SCOUT NEWS

The annual land sports for boy scouts will be held at the Willows track on Saturday, September 27 at 2 o'clock.

The cub events, held for the first time on a separate date, will take place on October 11 at the Horse Show Building, Willows.

All arrangements for Scout sports are entirely in the hands of the executive, no active scouters taking any part in the programme, and the usual ban-fee being given by the ladies of the executive.

The programme is as follows:
100 yards—12 years and under.
100 yards—Open.
220 yards—Under 14.
220 yards—Open.
440 yards—Open.
880 yards—Open.
1 mile—Open.

Relay Race, team of four, 220 yards, 440 yards, 220 yards, 440 yards.
Tug-of-War—Open.
Points 5-3-1.
Scoutcraft events:
Friction fire lighting.
First Aid Race—Broken thigh and jaw-bone.
Water boiling.
Lashing—4 spars square lashed.
Points 7-5-2.

Meetings of the local executive and Scouters' Council were held this week the chief topic of discussion being the land sports. The local executive has been strengthened by the addition of Lieutenant-Colonel Lorne Ross to their number.

St. Mary's Wolf Sub Pack is camping at Telegraph Bay this week-end under the leadership of Cubmasters Hilliard and Tolson, assisted by Cub-instructor and Patrol Leader Arthur Stark.

Fairfield Troop (S.M. Cecil Frampton) of out-door Scouts hope to have at least another two months of week-end camping before completing their records.

Very gratifying to all interested in the Scout movement must be the record made by our two Victoria Scouts, Patrol Leader Miller of 3rd Mary's Troop, and McMeeking of 3rd Troop, while guests at Camp Parsons, the district camp for Seattle Scouts, the district camp for Seattle Scouts, the district camp for Seattle Scouts.

McMeeking won the 50 yards running race, and the wrestling competition, Miller the 50 yards swimming race. The tent they were billeted in was judged the best in camp, emitting them to have an extra feed of ice cream and pie before the camp broke up, and they were two of ten boys presented with honor pins.

Provincial Secretary J. A. Anthony is enjoying a well-earned two weeks' rest at Cowichan Bay and Vancouver.

GUN PRACTICE

Notification is hereby given that gun practice will be carried out from the Esquimalt defences on Tuesday, September 16, Range, 10,000 yards, at 10 a.m. Macaulay Point to William Head.

Notice to Breeders of Livestock

Mr. Erick Boyman, the discoverer of The Bowman Remedy, claims that in treating 70,000 cattle in the United States the results have been successful in 98% of the cases treated.

Are your dairy cows and heifers causing you trouble? Are you obtaining results in calves and milk that satisfy you?

Do your cows (according to your knowledge of their capacity) produce as much milk as they should—or are you marking time and feeding a number of boarders that should be sent to the butcher?

These are matters that can be put right. Delays are fatal. Why not consult

Be Sure of Children's Health

ARE your children healthy? Are they strong and vigorous? Or, are they frail and delicate—pale, under-developed? These latter signs are indications of malnutrition—a condition that exists in one out of every three children in the schools of our nation.

Such children are starving for want of elements necessary for health—elements found in greater proportion in good bread—in SHELLY'S Bread—than in any other single food. Truly, good bread is a wonderful food, yet few eat enough of it.

But, there are many grades of bread, and to best serve your family's health you should select a bread containing the health-giving properties in the right proportions. You will find them in SHELLY'S—a loaf of unsurpassable quality. Select your bread wisely for "There's a difference in bread."

Don't say "bread," say SHELLY'S.

SAANICH RESIDENTS APPEAL TO COUNCIL

Impending Closing of Interurban Railway Brings Demand For More Stages

There is no hope of continued operation after October 31 of the Interurban Railway of the British Columbia Electric Company, Reeve Macnicol last night reported to the Saanich Council, after having met Vice-President A. T. Goward yesterday afternoon, in company with Councillor Robertshaw and E. Mellor of Ward Four.

The Council received from Mr. Goward a detailed statement of the continued losses which have been suffered by the company in the course of the ten years of effort to feel the line to pay.

The Reeve reported that the committee which met Mr. Goward had asked for special consideration for the few miles of line serving the district near the city limits, and were assured that inquiry would be made into the suggestion.

PUBLIC DISCUSSIONS

The council was informed by the company that services would end on October 31, and a committee composed of the Reeve and councillors Robertshaw and Goward, of Ward Five and Hagan of Ward Six was appointed to call public meetings to arrange substitute transportation.

Councillor Robertshaw supported the Reeve in his assertion that no change in decision would be made by the railway company, adding that the abolition of all stage and jitney lines would be essential to gain a re-opening of the matter, "and even then, there are lots of private car owners who carry passengers to and from the city and so reduce the earnings otherwise accruing to the railway company."

Eye tax and stage companies submitted applications for running rights on the West Road, these being lighted pending the proposed public discussions.

A strong deputation from Ward Six appealed to the council to secure continuance of operation of the railway, and a number of numerous party urged that jitney services be arranged for Glandford Avenue.

Insist on Payment of Business Tax

Used by Dennis Hoare and thirty other petitioners to abolish the business tax in Saanich, the Municipal Council last night refused to take any action so late in the season.

By the greater proportion of Saanich business men having paid their license fees. Names of Chinese merchants being noted upon the petition, members of the Council commented upon the late hours observed by such stores as being unfair to competing white merchants.

Eye tax and stage companies submitted applications for running rights on the West Road, these being lighted pending the proposed public discussions.

A strong deputation from Ward Six appealed to the council to secure continuance of operation of the railway, and a number of numerous party urged that jitney services be arranged for Glandford Avenue.

Insist on Payment of Business Tax

Used by Dennis Hoare and thirty other petitioners to abolish the business tax in Saanich, the Municipal Council last night refused to take any action so late in the season.

By the greater proportion of Saanich business men having paid their license fees. Names of Chinese merchants being noted upon the petition, members of the Council commented upon the late hours observed by such stores as being unfair to competing white merchants.

WILL PROTECT PROPERTY INTEREST

Cummings' House Will Come Back Apparently to City

To the City Council yesterday afternoon the City Solicitor advised that the city could not resist the mechanics lien taken out for Thomas Thirkell on 1096 Yates Street, purchased from the city on agreement of last December. Mr. Thirkell did repair work on the house to the value of about \$182. The city was faced with a mechanics lien of that amount, plus the costs, amounting to \$197.75, otherwise the property was threatened with forced sale.

The amount will be paid into court, it was decided.

Mr. and Mrs. - By Briggs

VI I DON'T MIND GOING TO A SHOW BUT IT'S THE DOGGONE LONG TRIP HOME AFTERWARDS - IT'S TERRIBLE!

WELL ARE WE GOING TO STAY HOME ALL WINTER SIMPLY FOR THAT REASON? IT'S NO WORSE FOR YOU THAN ANYBODY ELSE -

LISTEN VI - HOW ABOUT GOING TO THE THEATER SOME NIGHT THIS WEEK?

HUH?

- AND A SUPPER AND DANCE AFTERWARD?

OH MY DEAR! THIS IS TOO MUCH - I FEEL FAINT

WHAT THUH - - - WHAT'S THE MATTER WITH YOU - - CRAZY?

OF COURSE I'LL GO - - COME TO MY ARMS

YOU ACT AS THO' YOU'D NEVER BEEN TO A SHOW

IT ISN'T THAT JOE I'M SIMPLY OVER - COME THAT YOU ASKED ME

WHAT ARE YOU TALKING ABOUT ANYWAY?

DO YOU REALIZE IT'S BEEN AGES SINCE YOU'VE TAKEN ME TO A REAL SHOW.

WHY ONLY LAST WEEK -

AH-AH-AH - NAUGHTY! NAUGHTY! THAT WAS A MOVIE AND THAT DOESN'T COUNT

WHAT ARE YOU TALKING ABOUT - HOW ABOUT MRS. FISKE -

NOW I'VE GOT YOU - THAT WAS OVER A YEAR AGO

COME IN HERE I WANT TO SHOW YOU SOMETHING

IT DOESN'T MEAN ANYTHING BUT I'LL GO

THERE'S THE PROGRAM - THE DATE 'NEVERYTHING.

WELL WHAT OF IT - IT DOESN'T PROVE A THING TO ME -

THAT WAS THE VERY LAST SHOW YOU TOOK ME TO -

I KNOW I'VE TAKEN YOU SINCE -

MY GOODNESS DON'T TAKE IT SO SERIOUSLY - I JUST WANTED TO PROVE TO YOU THAT YOU WERE WRONG

WRONG NOTHING - IF I SAVED UP PROGRAMS I'D PROVE IT TO YOU TOO - I KNOW I'VE TAKEN YOU SINCE THEN

I CAN'T JUST RECALL THE NAMES OF THE SHOWS BUT I KNOW WE'VE BEEN SINCE THE MRS. FISKE SHOW - - I DON'T SAVE UP PROGRAMS! WHY DON'T YOU SAVE THEM ALL - THEN I COULD PROVE IT TO YOU - - BUT I'LL THINK OF IT YET - - DON'T YOU WORRY 'BOUT THAT!

JUST NAME ONE SHOW YOU'VE TAKEN ME TO - NO! YOU CAN'T DO IT AND YOU KNOW IT -

AND SO - FAR INTO THE NIGHT

BRIGGS

THE GUMPS

AFTER A WONDERFUL WEEK SPENT WITH HIS RICH UNCLE BIM SEEING THE SIGHTS OF THE BEAUTIFUL CITY OF SYDNEY LITTLE CHESTER HAS ARRIVED AT ONE OF HIS UNCLE'S ESTATES -

OH BOY! WHAT A BUNCH OF SWELL CLOTHES UNCLE BOUGHT ME -

GOOD MORNING, SIR - BREAKFAST IS SERVED SIR -

I GUESS THIS IS THE FINEST CASTLE IN THE WHOLE WORLD -

I'M SO HUNGRY I CAN'T WAIT TO LOOK AT ALL THE NICE PICTURES -

YOU WILL SEE THAT MY FAVORITE LITTLE NEPHEW WANTS FOR NOTHING -

YES SIR - THANK YOU SIR -

HAVE ALL OF THE HOUSEHOLD SERVANTS MEET IN THE GOLD ROOM IMMEDIATELY -

AT ONCE, SIR, THANK YOU SIR -

LADIES AND GENTLEMEN OF THE HOUSEHOLD - I WISH TO INTRODUCE YOUR LITTLE MASTER, CHESTER GUMP - REMEMBER HIS WORD IS LAW AT ALL TIMES -

ISN'T HE SWEET?

HE LOOKS LIKE A PERFECT LITTLE GENTLEMAN -

THIS IS THE LIBRARY - I HAVE STOCKED IT WITH EVERY BOOK A LITTLE BOY COULD EVER WISH TO READ -

I LOVE TO READ STORY BOOKS -

AND THIS IS YOUR MUSIC ROOM - I SHALL HAVE A CORPS OF MUSIC TEACHERS ALWAYS AT YOUR COMMAND IF YOU CARE TO LEARN TO PLAY ANY INSTRUMENT -

I'D LIKE TO PLAY THE BASS DRUM -

YOU WILL FIND THIS GYMNASIUM COMPLETE IN EVERY DETAIL - I WANT YOU TO BE STRONG AND HEALTHY -

MY PAPA CAN SWING CLUBS AND EVERYTHING -

THIS IS YOUR SWIMMING POOL FULL OF DISTILLED, FILTERED WATER - SWIMMING AND DIVING INSTRUCTORS WILL BE IN CONSTANT ATTENDANCE -

IT LOOKS NICE -

REMEMBER EVERYTHING IN THIS HOUSE IS YOURS TO COMMAND - TOMORROW YOU WILL SEE YOUR STABLE OF PONIES, ALL YOUR DOGS AND THE LITTLE TRAINED KANGAROO I HAVE FOR YOU -

OH, I WANT TO SEE HIM - I'LL CALL HIM ALEXANDER -

DEAR PAPA AND MAMA - I ARRIVED SAFE AND SOUND IN AUSTRALIA AND AM STOPPING AT ONE OF UNCLE BIM'S CASTLES - UNCLE BIM TREATS ME SO NICE - HE GIVES ME EVERYTHING I WANT - HE TOLD ME THAT I WAS A LUCKY BOY TO HAVE SUCH A NICE PAPA AND MAMA AND THAT I SHOULD LOVE YOU WITH ALL MY HEART AND I DO - UNCLE BIM IS GIVE ME A KANGAROO GOING TO CALL HIM P. S. THE KANGAROO CAN DO TRICKS.

SAID I GOING TO AND I AM ALEXANDER YOUR LOVING - CHESTER
