### PERSONAL

Mr. Thos. P. McDonough has been appointed Engineer of Track Elevation for the city of Chicago, to suc ed Mr. Theodore Buskirk, resigned.

Mr. Jacob R. Rogers, President of the Rogers Locomotive & Machine Works, Paterson, N. J., was seriously injured on Feb. 10 by a cable car in New York city.

Mr. Nathaniel Roberts, M. Am. Soc. C. E., consulting engineer, has removed his office from 120 Liherty St. to Rooms 1430 and 1431 Bowling Green Building, 11 Broadway. New York city.

Mr. George S. Morison, Past President Am. Soc. C. E., of New York city, delivered a lecture on "Masonry" before the students of the Rensselaer Polytechnic Institute, Troy, N. Y., Feh. S.

Mr. L. S. Doten, Resident Engineer on the Rutland-Canadian R. R., has resigned to accept the appointment as Cartographic Draftsman in the Hydrographic Office of the Navy Department, Washington, D. C.

Mr. Arthur J. Rockwood, of the firm of Guthrie & Rockwood, civil engineers, 836 Ellicott Square, Buffalo, N. Y., has been appointed Division Engineer of the Western Division of the Erie Canal, to succeed Mr. W. Little, resigned.

Mr. John McGhie, who for several years has been connected with the General Electric Co. as Manager of the Advertising Department, with offices at 44 Broad St., New York, has resigned to accept the position of Western rep-resentative of the "American Machinist," with headquarters in Cleveland, O.

Mr. W. H. Truesdale, First Vice-President and General Manager of the Chicago, Rock Island & Pacific Ry., whose selection by the Nominating Committee of the Board of Directors of the Delaware, Lackawanna & Western R. R. to succeed Mr. Siosn as President of the latter road was noted in our last issue, has accepted the office, and will be formally elected by the Directors.

Mr. Desmond FitzGerald, of Boston, Mass., President of the American Society of Civil Engineers, and Mr. Rudolph Hering, M. Am. Soc. C. E., of New York city, have been appointed by Mayor Dodge, of Worcester, Mass., to set with Mr. F. A. McClure, City Engineer of Worcester, as a commission of experts in preparing a restrict of the best method of shellships the grade creatings. port of the hest method of aholishing the grade crossings in that city.

hing

Mr. William E. Baker, electrical engineer, has been appointed General Superintendent and Chief Electrical Engineer of the Manhattan Ry. in New York city. Mr. Baker is a graduate of Lafayette College, Easton, Pa., and was nnected with the engineering department of the St. Paul & Pacific Ry., the St. Paul, Minnespolis & Manitoba Ry., the Canadian Pacific Ry., and the Great Northern Ry. He installed the electrical equipment of the West End St. Ry. of Boston, Msss., and had charge of the construction of the Intermural Ry. at the World's Fsir in Chicsgo. Since then he has been General Superintendent of the Metropoli-tan West Side Elevated R. R. of Chicago.

Mr. W. H. Wells, Civil Engineer of the Southern Ry., with headquarters in Washington, D. C., has reorgan-ized the Engineering Department and announces the fol-lowing appointments: Mr. Chas. B. Clark, Assistant lowing appointments: Mr. Chas. R. Ciark, Assistant Engineer and Office Assistant, Washington; Mr. Benj. Thompson, M. Am. Soc. C. E., Resident Engineer of the Eastern Division, with headquarters in Greensboro, N. C.; Mr. W. F. H. Finke, Assistant Engineer, in charge of the Washington and Richmond Division, with headquarters in Washington; Mr. F. de P. Horne, Assistant Engineer in charge of the Norfolk and Asheville Division, with headquarters in Greensboro, N. C. Mr. W. E. Vest Assistant Engineer. headquarters in Greensboro, N. C.; Mr. W. E. Vest, Assistant Engineer, in charge of the Charlotte and Columbia Divisions, with headquarters in Charlotte, N. C.; Mr. B. C. Milner, Jr., Resident Engineer of the Western Divisions, with headquarters at Atlanta, Ga.; Mr. J. B. Newton, Assistant Engineer, in charge of the Knoxville, Memphis and Louisville Divisions, with headquarters in Knoxville, Tenn; Mr. J. C. Motley, Assistant Engineer, in charge of the Atlanta and Macon Divisions, with headquarters in Atlanta, Ga., and Mr. J. R. Pill, Assistant Engineer, in charge of the Birmingham and Anniston Divisions, with headquarters in Birmingham, Ala.

### OBITUARY.

Mr. O. S. Hortou, contractor, of Galena, Ill., died of apopiexy, Feh. 7.

Mr. Robert Falconer, civil engineer, died in the Soldiers' Home, Erie, Pa., Feb. 5, aged 58.

Mr. Herbert Lee Weston, civil engineer, of Bayonne, N. J., died Feb. 7, aged 49. He was associated with Mr. Emmett Smith, City Engineer of that place.

Mr. John Barrett, sewer contractor, of Chicago, Ill., died in that city, Feb. 6, aged 63. He was born in Cambridgeshire, England, and went to Chicago in 1860.

Mr. Hugh Ryan, railway contractor, of Toronto, Ont., died Feb. 13, aged 67. He huit the Canadian Sault Ste. Marie ship canal lock and many miles of railway in Cauada, Michigan, Illinois, Kentucky and Maine.

Mr. Jesse H. Bunnell, senior partner of the firm of J. H. Bunnell & Co., manufacturers of electrical supplies, 16 Cortlandt St., New York city, died Feb. 8, at his home iu Brooklyn, N. Y., aged 56. He was horn in Massillon, O., and learned telegraphy. During the Civil War he was a member of the United States Military Telegraph Service in which he distinguished himself and at the close of hostilities he came to New York and established the firm mentioned above.

March 30. Annual meeting, Appleton, Wis., Secy., F. J.

Harriman, Appleton, Wis.

BROOKLYN ENGINEERS' CLUB.—A regular meeting of this cluh was held on Feb. 9. Mr. Wm. P. Gerhard read a paper on "A Half Century of Sanitation."

ENGINEERS' SOCIETY OF WESTERN PENNSYLVA-NIA.—The annual banquet of this society was held at the Hotel Schenley, Pittshurg, Pa., on Feb. 9, with fully 200 members and guests present.

ENGINEERING ASSOCIATION OF THE SOUTH .-In the future meetings of this society will be held on the second Thursday of each month, at the Berry Building, Nashville, Tenn. H. M. Jones, Secy.

BOSTON SOCIETY OF CIVIL ENGINEERS .- This society held its annual dinner at the Hotel Brunswick on the evening of Feb. 7. Fully 140 were present. Discus-sion of current topics of engineering interest followed the

THE WEST VIRGINIA SOCIETY OF CIVIL ENGI-NEERS AND ARCHITECTS .- The 4th annual meeting of this society, which was to have been held at Charleston, W. Va., Jan. 19-20, was postponed owing to the small attendance.

NEW ENGLAND WATER WORKS ASSOCIATION .-NEW ENGLAND WATER WORKS ASSOCIATION.—
The February meeting of the association was held at the Parker House, Boston, on Feb. 8. The subject was "Low Land and Mechanical Filtration." An abstract of the remarks made is given in the body of this issue.

ENGINEERS' CLUB OF COLUMBUS.—The annual meeting of this club was held on Feb. 4. Routine husiness was transacted and the following officers elected for the ensuing year: Pres., Edward Orton, Jr.; First Vice-Pres., Prof. C. N. Barrow; Second Vice-Pres., H. A. Lanman; Secy., H. M. Gates; Treas., William Michel; directors, I. M. Wolverton and I. M. Bennett.

ARCHITECTUAL LEAGUE .- The annual meeting and banquet of this society was held in the galleries of the American Flue Arts Society, New York city, on Feb. 9. About 200 members were present. The dinuer was followed by a discussion of the topic "The Relation of Art to the Municipality and the Duty of a Citizen, Through Art, to the Municipality."

MASTER CAR BUILDERS' ASSOCIATION AND AMERICAN RAILWAY MASTER MECHANICS' ASSOCIATION.— The annual conventions of these associations will be held and an old Point Comfort, Va., the former beginning June 14, the latter June 19. The Hotel Chamberlain has been selected as headquarters. Further particulars may be obtained from the secretary of both associations, Mr. Jno. W. Cloud, 774 Rookery, Chicago, Ill.

CHICAGO ELECTRICAL ASSOCIATION.-The follow-CHICAGO ELECTRICAL ASSOCIATION.—The follow-ing is the spring program of this society: Feb. 17, "Po-lice and Fire-alarm Systems of Chicago" (illustrated with apparatus), Edward B. Endleott; March 3, "Patent Systems of the United States and Foreign System Com-pared," W. Clyde Jones; March 17, "Electric Street Lighting of Yesterday and To-day," Alhert Schelbie; April 7 (subject to be announced), Charles A. Brown; April 21, "The Adaptation of Electricity to Existing Steam Trunk Lines," W. D. Ray; May 5, "The Electric Protection of Safes and Vaults," Clyde J. Coleman; May annual banquet.

FRANKLIN INSTITUTE.-The February-March program of the Institute is as follows:

Feb. 17. "Latest Development with X-Rays and Their Application," Prof. Arthur W. Goodspeed; "A Process for Testing Metals," Joseph Richards; Feb. 23. "Titaniferous Iron Ores, 'Prof. J. F. Kemp; Feb 24. "Ramhies Amid the Canyons, Caverns Chaussees of France," Rev. Horace C. Hovey; Feb. 28. "Some of the Larger Transportation Problems in Cities," Edward E. Higgins; March & "Some Features in the Structural Designs of Bulldings,"

Prof. Wm. H. Burr; March 9. Discussion, "Mechanical Application of Compressed Air.

NEW ENGLAND ROADMASTERS' ASSOCIATION .--The annual meeting of this association will be held at Portland, Me., in August. The executive committee has selected the following subjects to be reported upon at that meeting: "How Shall the Right of Way he Main-tained in a Tidy Manner, with Least Labor to Trackmen?" "The Most Efficient, Durable and Economical Form for Standard Snow Fence; also Best Form of Wire Right of Way Fence, Giving Size of Wire, etc." "What is the or way Fence, Giving Size of Wire, etc." "What is the Proper Relation Between Weight of Rail and Weight of Rolling Stock? Assuming a Proper Relation Between Weight of Rail and Weight of Rolling Stock, What is the Most Economical Spacing of Ties?" "Chemical Treatment of Ties." "From a Maintenance of Way Standpoint, the Consideration of the Relative Merits for Ballett of Stock or Grand Sprinkled with Oll." last, of Stone or Gravel Sprinkled with Oll."

AMERICAN STREET RAILWAY ASSOCIATION.—At a meeting of the executive committee of this society, he'd in Chicago on Feb. 6, it was decided that the annual meeting would be held in Chicago on Oct. 17-20. The meeting will be held at Tattersall's, State and 16th Sts., where a floor space of 50,000 sq. ft. can be had for exhibition purposes. The last day of the convention has been set apart for a systematic examination of the exhibits by the delegates. Headquarters will he at the Auditorium Hotel. The following aubjects were selected for discussion at the

"Maintenance of Csr Equipment;" "Modern Street Ral!way Shopa—Their Design, Machinery and Shop Practice;" "Train Service and its Practical Application;" "Construc-"Train Service and its Fractical application;" "Construc-tion and Maintenance of Street Railway Tracks;" "Invest-ments in Street Railwaya—How Can They he Made Secure and Remunerative?" The report of the Committee on Rules for Employees will be fully discussed.

THE AMERICAN CERAMIC SOCIETY.-A meeting those interested in that branch of science included under the name of ceramics was held at the Ohio State University, Columbus, O., on Feb. 6. The outcome of the meeting was the formation of the American Ceramic Society.
The object of this organization is to promote the arts and sciences connected with cersmies, by means of meetlngs for the consideration of papers and for the publica-tion of professional literature as well as for social intertion of professional interature as we'l as for social inter-course. The following officers were elected for the ensu-ing year: Pres., H. A. Wheeler, St. Louis, Mo.; Vice-Pres., Ernest Mayer, Beacon Falls, Pa.; Secy., Edward Orton, Jr., Columbus, O.; Treas., Stanley R. Burt, Cin-cinnati, O. Papers were read at the evening session upon the following subjects: "The Use of Equivalent Weights in Ceramica," Chas. F. Binns; "The Indepenweights in Ceramica," Chas. F. Biens; "The Independence of Burned Clay as a Decorative Building Material," Herman C. Mueller; "Practical Experience With Pyrometers," Dr. Wm. H. Zimmer; "Some Mcchanical Aids to Kiln Burning," Gustav J. Holl; Discussion, "Cannot the Association Secure the Publication in English of the Works of Dr, Herman Seger."

ENGINEERS' CLUB OF ST. LOUIS .- The ENGINEERS' CLUB OF ST. LOUIS.—The regular meeting of the society was held on Feb. 1, with 35 members and visitors present. Mr. H. S. Wilson read the paper of the evening, entitled the "Production of Seamless Tuhing." The kinds and characteristics of the ore needed, and some of the requisite processes of its reduction to make the grade of atecl necessary for drawing seamless tubes were considered. The various methods of cetting the hole in the billet were explained, and the getting the hole in the hillet were explained, and the getting the hole in the fillet were explained, and the main characteristics of the more important machines used for this purpose were set forth. The annealing and pickling processes were described and the delicacy of the operation shown. The drawing benches, with their attendant drawing devices, the number of reductions necessary, the kinds of lubricants used, etc., were fully discussed, and interesting reasons for many troubles which arise were given. Mention was made of the great variety of grades and sizes of tubes and the care necessary to keep them separate in the factory. The processes for the production of lead, hrass and copper tubes were also touched upon. Sketches on the blackboard lilustrated graphically and clearly the various points, and a few samples showed how the reductions were made.

E. R. Fish, Secy.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL .- A regular meeting of this society was held on Feh. 7. A verhal report of Committee on Naval Personnel Bill was accepted.
Mr. Hogelaud read a paper on "Locomotive Coaling Stain which was illustrated by drawings and photo graphs the evolution of coal handling for locomotiv-use on the Great Northern Ry. Beginning with the primitive derrick and bucket system which was worked at an expense of 17 ets. per ton, the various improvements, such as: Shoveling Into chute pockets; dumping and chain conveying to chutes; and dumping directly into chute, the coal car being raised by a 15-HP. gasoline engine. The Great Northern moves 750,000 tons annu-ally through chute pockets of 5 or 6 tons capacity at an are through chite pockets of 3 cts. per ton by measurement. Mr. Truesdell described the improvements at the St. Paul stock yards, 172 acres in extent, bounded on the river side by 1% miles of levee. The level of the yards is several feet below high water mark and has been flooded to the depth of 3 ft., but now the 5 river outlets may be closed by gates and pump wells have been provided In case of flood; 9 artesian wells supply water. Swift & Co.'s immense packing establishment and half a dozen

minor firms are located on the site. Mr. Wilson displayed an exhibit of asphalta, erude and refined, poke briefly of the sources of asphalts and described the Trinidad, Bermudez, Kentucky, California and Utah posits. C. L. Annan, Secy.

NEW YORK ELECTRICAL SOCIETY .- A meeting NEW YORK ELECTRICAL SOCIETY.—A meeting of this society was held at the station of the Electric Vehicle Co., New York city, on the evening of Feb. 14. In the absence of Mr. G. Herbert Condict, the electrical engineer of the company, Mr. Crane described hriefly the operation of the station equipment, after which the visitors formed into small parties and were piloted through the several departments. In this plant current for charging the hatteries is taken from the street mains of the Edison Lighting Co. which are connected to a switchboard Lighting Co., which are connected to a switchboard from which the various charging circuits are controlled. The hattery hoxes, or trays, contain 48 small chloride accumulators, manufactured by the Electric Storage Bat-tery Co. They are placed upon tables which automatically connect them with the charging switchhoard, and after about three hours are charged to 2.5 volts. Four voltages are used in this charging and those are called for automatically by the batteries, that is when the electro-motive force of the battery reaches that of the first charging circult a red light is automatically awitched on. same is true of the other voltages, the highest of which is 2.5 voits. When charged the trays are picked up by an ingenious elevator arrangement mounted upon a travel-ing crane and are carried forward to a horizontal chain conveyor table, upon which they are lowered. In the meantime the cah has run in the atstion and onto a platform directly in front of this conveyor. An arrangement of horizontal and vertical hydraulic pistons center the cah and raise the hody to the level of the table. The door of the hattery compartment is opened and a claw de-vice on the end of a long piston clutches the end of the exhausted hattery and draws it from the cab onto the chain conveyor. The conveyor is then moved along the charged set is in position in front of the cah. The conveyor is then moved along until piston then advances, shoving the tray into the cah, the hydraulic adjusting pistons retreat and the cah is again ready for another run of 25 miles. The whole operation occupies a surprisingly ahort time, and the ordinary time of running in, removing the old set, placing new and running out is short of 2 minutes. When it is cousidered that the batteries weigh hetween 1,300 and 1,500 lbs., the operation of the apparatus can be hetter appreciated.

After witnessing all the operations the visitors adjourned to an upper floor where an enjoyable juncheon

AMERICAN SOCIETY OF CIVIL ENGINEERS .- A special meeting of this society was held at the Society House, New York city, on Feb. 10, to discuss the sub-ject of "Stone vs. Wood Dry Docks." The discussion was opened by Mr. Wm. L. Catheart, late chief engineer U. S. N. and now Professor of Marine Engineering at the Academy of Naval Architecture, New York city. In the course of his remarks he said:

Academy of Naval Architecture, New York city. In the course of his remarks he said:

The modern war vessel is practically helplesa without the dry dock, in which she must be placed periodically for the clerusing of the hull and, with more or less frequency, for examination and repair. Of the 11 docks which our government now controls and operates, only four are of masonry, the remainder being timber constructions, and it is proposed further, in recent legislation, to huild three more docks of wood. The practice of foreign governments differs widely from thia. In Europe, not only national graving docks but all great modern works of this type are constructed of stone or concrete masonry. Our government is the only one in the world which has constructed, directly, a timber dry dock. The governments of Europe have considered it the policy of wisdom to build these important works of the most induring materials, without regard to cost. This decision has been reached, doubtless, in view not only of the natural decay, the frequent repairs and the large expense thereof to timber dry docks, but, as well, because of the superior stability, permanence and safety of a dock which is built of stone or concrete.

In view of the fact that for 10 years past our government has been practically committed to the policy of timber docks, having within that period huilt six of this material, and of the further fact that hy recent legislation three more of these structures are authorized, the subject is presented for discussion by the members of this society. Our growth as a nation, with the results of the recent war, foreshadows an early and considerable increase in our force affoat. The defense of a coast line, extraordinary in extent, the acculrement of territory beyond the sea, which must be held—as it was won—largely by the navy, our probable entry into Asiatic politics, and the prospective revival of the merchant marine, which the fleet must lead and guard, all point to this. The full consideration of any factor, therefore, which

Commodore Geo. W. Melville, Engineer in U. S. N., and Cheef of the Bureau of Steam Engineering of the Navy Department, apoke of the great future looming up as a result of our extension, which he said

looming up as a result of our extension, which he said pointed with no uncertain hand to the nation's need in the carly future of a strong force affoat and of maintaining the efficiency of that force. Continuing he said:

A worthy system of dock construction is, in my view, a cardinal essential. I dealer to place on record my opinion—aa I have done in the past—with that of the Secretary of the Navy, with that of my colleague. Commodore Endicott, and with that of his predecessor, Admiral Matthews, as being opposed most strongly to the flimsy structures, costly in their weakness, which have been huilt as timber dry docks for the navy. As to the use of wood for the docks of private corporations I have nothing to say. It is plentiful and cheap, and the average draft of the merchant vessel is light and the structures less costly.

Commodore M. T. Endicott, Chief of the Bureau of Yards and Docks of the Navy Department, spoke briefly, supporting the views of the former speakers and advocating the atone or concrete form of dock in preference to the present timber construction, Mr. End report to Secretary Long was printed in our last issue

## NEW PUBLICATIONS.

LITERARY MAGAZINES .- The "Review of Reviews" for February has among its timely articles a character sketch of Aguinsido, which gives a clearer account of the man and of Aguinsido, which gives a clearly secount of the man and his curious life history than anything we have seen else-where. Mr. Henry McFar and tells of the work of the Army Signal Corps in the war, and atates among other things that the sending up of the halloon on the skirmish line at Santiago was done against the express advice of the officer of the Signal Corpa who was in charge. Prof. H. C.
Adams, Statistician to the Interstate Commerce Commerce sion, suggests that the preaent system or lack of system the taxstion of railway property by the states sh sholiahed and the Federal government should alone lay shoulaned and the rederal government should alone my taxes upon railway property. He presents strong arguments in favor of this plan, and thoroughly proves, we think, that the change would be largely to the advan-tage of both the railways and the people. It would require very radical changes in the Constitution, however, to hring about such a change, and we can see hardly a remote chance that it could be hrought to pass.

In "The Forum" Hon. Geo. E. Roberts, Director of the Mint, writes on "The Increasing Supply of Gold," and dis cusses the economic and financial changes as well as the political changes that are likely to result from the great increase in the world's stock of the precious metals thut is now being made. Another "Forum" paper is by Dr. Walton Wyman, Supervising Surgeon of the Marine Hospital Service, on "Quarantine and Sanitation," and we would heartily recommend it to everyone interested in the task of preventing and cheeking the spread of disease and in legis: ation looking to that end. Dr. Wyman emphatic cally atates that local sanitation should be left in local hands; that the work of atate hoards of health should be in supervising and fostering local work, and that the task of the general government should he the prevention of the entry of disease from foreign ports or its spread by inter state commerce. He explains the method of work of them. Marine Hospital Service, which is in fact, though not in name, a national public health department. "Coaling Stations for the Navy" is the subject of a paper by Commander R. B. Bradford, U. S. N., who helieves that the United States should possess a chain of coaling stations stretching clear around the globe.

In the January "North American Review" Mr. John Hyde, Statistician of the United States Department of Ag riculture, discusses Sir Wm. Crookea' paper on the coning scarcity of wheat. He reviews in detail the prospects of increased wheat production in different portions of the coutry, and reaches the final conclusion that Mr. Crooke estimate is a sound and conservative one, and that within a generation the United States will have so increased its own wheat consumption that it will have little or no margin left for export. Mr. Hiram Maxim writes on "High Explosives in Large Guna," describing the development of the modern smokeless powders. He presents an inte-esting argument to prove that with many amokeless pow-dera, including the British "cordite," there is always a possibility that free nitro-glycerine may be distilled in the cartridge and cause detonation and consequent disaster. The proposition to free merchant vessels from the liabili-ties of capture in time of war is opposed by Commander Stockton, of the Naval War College. "Tuberculosis in the United States" and how it may be cradicated, is discussed by S. A. Knopf, M. D. He favors the establishment of local anitariums for the treatment of tuberculous patients in all parts of the country, together with measures by the separate states to eradicate hovine tuherculosis. In the "Fortnightly Review" for January we find a de-

scription of the proposed Tanganika railway, which the indefatigable Ceell Rhodes proposes to hulld from Buluwayo northward to the famous Central African lake, a distance of about 900 miles. It is stated in the article that the Buluwayo Ry., although so recently opened to traffic. is already making net earnings of \$700,000 per annum. The estimated cost of the Tanganika Ry. is \$10,000,000 and it is said to be altogether likely that the scheme will

e carried through. In the February "Century." Mr. F. C. Penfield de scribes the great dam which is to he hullt across the Nile at Assure, the site of the First Cataract. The dam will he a solid masonry structure raising the water level 40 ft. and setting hack the river above for a distance of 140 miles. The total length of the dam will be nearly a mile, and a quarter. The reservoir thus formed will contain, it is estimated, 250,000,000,000 gailons of water and will increase the irrigable area of Egypt by 2,500 sq. miles. At the site of the dam a solid ledge of granite extends across the river and furnishes an ideal foundation for the dam, which is to be huilt throughout of granite ashiar masorry quarried near its aite. The contractor for the work is to receive \$800,000 a year for 30 years, the payments to hegin when the entire work is completed and turned over to the Egyptian Government. At the present time the pre:liminary engineering work upon the structure is in progress, and a single order for 3,000,000 barre's of Portland cement is in process of delivery. In the same magazine Walter Wellman writes an article dated at Franz-Josef Land, Aug. 2, 1898, where at Cape Tegetthoff, in lat. 80.06 N. the Wellman polar expedition has built the most northerly inhabited house in the wor'd. In

Franz-Josef Land, Aug. 2, 1898, where at Cape Tegetthoff, in lat. 80.66 N. the Wellman polar expedition has huilt the most northerly inhabited house in the wor'd. In "Century's" new war series this number contains Lieut. Hobson's account of his life in Morro Castle, and Gen. Shafter's story of the capture of Santiago. Other articles in the same magazine which may interest our readers are a comparison of foreign and American consular systems by Geo. McAneny, and "The United States Army Ration in the Tropics," by L. L. Seaman, Maj.-Surgeon, First Regt., U. S. Vol. Engineers.

The February "Cosmopolitan" contains a paper on "City Subways for Pipes and Wires," by Henry F. Bryant, in which the pros and cons of the question are fairly discussed. "Scrihner's" leading article is the second installment of Gov. Roosevelt's story of the Rough Riders, in the "Pall Mail Magazine" we find a description of "European Military Ballooning." The writer considers that France is in the lead in the propeiling and steering of balloons, but is far behind England and Germany in methods of transporting gas and their system in general is defective in heing too complicated. In "Appleton's Popular Science Monthly" the lahor problem in the tropics is discussed by Mr. W. A. Ireland, and gives us some idea of one of the knotty questions which we are likely to have to come with as a nation in the near future. of one of the knotty questions which we are likely to have to cope with as a nation in the near future.

SEWAGE DISPOSAL IN CONNECTICUT.—Report of the Sewage Commission to the General Assembly of the State of Connecticut, January Session of 1899. Rohert A. Cairns, C. E., Secretary, Waterbury. Paper; 6 x 9 ins.; pp. 88; four illustrations.

An extended abstract of this report is printed on another page of this issue.

PROCEEDINGS. NEW ENGLAND ROADMASTERS' AS-SOCIATION.—Published by the Association; Secy., F. C. Stowell, Ware, Mass. Paper; 6x9 ins.; pp. 107. This report contains the full text of the papers and discussions presented at the annual meeting held Aug. 17

and 18, 1898. The full list of these reports was published in Engineering News Supplement of July 28, 1898.

in Engineering News Supplement of July 28, 1898.

PROCEEDINGS, ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS.—Pub.
by the Association; Secy., S. F. Patterson, Concord, N.
H. Paper; 6:9 Ins.; pp. 282; illustrated.
This report contains in full the husiness proceedings,
papers and discussions of the convention of 1898 at Richmond, Va., which were given in abstract in Engineering
News of Oct. 27, 1898.

AlR LIFT DIAGRAM.—We have received from Mr. Geo. L. Diliman, M. Am. Soc. C. E., 722 Montgomery St., San Francisco, Cal., a diagram for use in air lift pump calculations. It is about  $11\times 8$  ins., with the depths of submergence as ordinates and the heights of lift as abscissas. There are 16 curves for as many different values of the variable, n, in the formulas given on one corner of the diagram for finding the value of different factors.

NOTES ON RAILROAD BRIDGE CONSTRUCTION.—By Henry, Goldmark, M. Am. Soc. C. E. Puhlished by the author; paper; 6 × 9 ins.; pp. 9.

This is the reprint of a lecture delivered before the en-

gineering society of the University of Michigan in February, 1898. The author traces the development of railway hridge construction and outlines present and accepted practice in the design and construction of culverts, tresties, wooden bridges and iron bridges of various sorts for railway service.

ANNUAL REPORT, NORTH CAROLINA STATE RAIL-ROAD COMMISSION.—L. C. Caidweii, John H. Pearsou, D. H. Abhott, Commissioners. Pub. Doc.; cloth;  $6\times 9$  ins.; pp. 591.

This report contains the full text of the amended "Railroad Commission Act," and also the Commissioner's

standard freight and passenger tariffs, rules governing transportation of freight, live stock, etc., and other rules and regulations which it has promulgated to govern the business of the railways and their relation to the commission and state.

THE BEHAVIOR OF RAILWAY VEHICLES IN PASSING THROUGH CURVES.—By Franz Hoffmann, Translated from the German by A. Bewley. Public Works Department, India; Madras; paper; 8 x 13 ins.; pp. 55; illustrated.

This is an elaborate mathematical discussion of the action of railway vehicles in passing curves, and should prove interesting to students of that subject who are used to reasoning in three-line equations. For the majority of American railway engineers the discussion has little practical value, since it deals almost entirely with the four-wheeled cars used in European countirea.

AMERICAN STREET RAILWAY DIRECTORY AND BUYERS' MANUAL.—B. L. Powers & Co., 150 Nassau St., New York city. Pamph.; 6 x 9½ ins.; pp. 100.

This is the November issue of the "American Street

This is the November issue of the "American Street Railway Directory," a quarterly publication containing a large amount of data of value to manufacturers and dealers in street railway apparatus and supplies. With this issue is introduced an alphahetical list of the street railway officials of the United States, and a list of tramways and light railways in countries outside of the United States and Canada, both of which are valuable additions, especially from the standpoint of the supplyman.

ANNUAL DEPORT

or the

ANNUAL REPORT, CONNECTICUT STATE RAILROAD COMMISSION.—Washington F. Wilcox, Wm. A. Seymour, A. R. Fyler, Commissioners. Puh. Doc.; cloth;  $6\times 9$  ins.; pp. 600; map. The total railway mileage of the state is 1,008.25 miles, and during the year covered by the report the earnings per mile of road was \$7,929 per passenger traffic and \$8,098 per freight traffic. This is an increase in freight

earnings, and a decrease in passenger earnings. With a large increase in gross earnings, the increase in net earnings is small on account of the heavy increase in operating expenses. Dividends were paid on about 62% of the capi-

THE SUPERINTENDENT OF BRIDGES AND BUILD-INGS.—By Onward Bates, M. Am. Soc. C. E. Published hy the University of Wisconsin, Madison, Wis.; paper; 614 x 994; ins.; pp. 26.

This is a reprint of a lecture delivered hy Mr. Onward Bates before the students of the University of Wis-

consin. Mr. Bates outlines briefly the duties of Super-intendents of Bridges and Buildings on American rail-ways, the organization of their departments, the inspection, repair and emergency rebuilding of bridges, and gives many vsluable practical hints and suggestions, which his long experience as an engineer and superintendent in charge of bridge and building work on a large railway system make especially valuable.

A NATIONAL DEPARTMENT OF SCIENCE Necessary for the Co-ordination of the Scientific Work of the United States Government. The National University a Growth; not a Creation.—By Charles W. Dahney, Jr. Two pamphlets; 74, 404; pp. 13, 12; Reprinted from "Science" of Jan. 15 and Mar. 5, 1897.

The first of these papers discusses the objections to the present lack of co-ordination among the several hureaus of the departments which have under their charge the scientific work of the government, and urges the merging into one scientific department of the work of the National Observatory, the Coast and Geodetic Survey, the Geological Survey, the Weather Bureau, the National Mu-seum, the Forestry Bureau and the Fish Commission, together with a proposed statistical sgency, which should include the Census Bureau. The second pamphlet presents an argument in favor of establishing a national

COMMERCIAL TRAVELING IN SOUTH AMERICA.—By Wm. E. Torrens. Circular of Information No. 29, of the National Association of Manufacturers of the United States of America, Philadelphia, Pa. Paper; 6×9 ins.; pp. 54.

This report embodies the observations made during hus-This report embodies the observations made during husiness trips to South America. It is intended to give points upon the qualifications required of a commercial traveler in foreign countries; methods of seiling; the transport of samples and the laws in this connection; impertant preliminaries to travel; dating and discounts; classes of huyers in various parts of South America; orders and contracts; and some details of husiness in Brazil, Uruguay, Argentine Republic, etc. The report is filled with really valuable information to the man proposing to do business in South America; and in addition to the items noted above, Mr. Torrens tream of the best routes items noted above, Mr. Torrens treats of the best routes and the cost of a five-months' trip along the East coast, from Pernamhuco to Buenos Ayres. He puts this cost hotels and traveling expenses from New York and hack again at \$843.

ANNUAL REPORT, MAINE STATE RAILROAD COMMISSION.—Joseph B. Peaks, Benj. F. Chadbourne, Frederick Danforth, Commissionera. Pub. Doc.; cloth;  $6\times 9$  lns.; pp. 412; map.

The report proper of the Commission takes up only the first 58 pages of the volume, the remainder being devoted to the statistics of operation of individual roads and decisions, petitions, certificates and other routine work. During the fiscal year covered by the report 26.53 miles of new railway were added to the mileage in the state, but aince June 30, 1898, there has been completed the Washington County R. R., 118 miles long, and several short lines, which bring the present total railway mileage of the state up to 1.872.8 miles. Passengers and freight traffic both show an increase in amount over the pre-vious year, but gross earnings have decreased. In ref-erence to this the report says: "The falling off in earnerence to this the report says: "The falling off in earnings might naturally be attributed to the carrying of passengers and freight less distancea." The number of accidenta was greater than in 1897, five passengers being killed and 100 injured. Four deaths and 82 injuries resulted from derailments.

There was an increase during the year of 25.72 miles in There was an increase during the year of 25.72 miles in the street railway mileage of the state. The earnings from street railways show an increase in both net and gross earnings. There was also an increase in the percentage of operating expenses to earnings, which during 1898 was 71%. A total of 14,651,161 passengers was carried by street railways and only one person was killed and 14

### TRADE PUBLICATIONS

THADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: \$1.2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

DROP FORGINGS.—J. H. Williams & Co., Brooklyn, N. Y. Pamph.: 4½ x 7 ins.; pp. 40; illustrated.

This is a catalogue of drop forged tools, appliances and special shapes manufactured by the firm named.

THE 20TH CENTURY MOVEMENT.—American Electric Vehicle Co., Chicago, Ill. Pamph.; 6×6 ins.
This little pamphlet calls attention to the rapid introduction of motor vehicles and illustrates several types of the company's vehicles.

CONNECTORS, TERMINALS AND SPECIALTIES.—The C. McIntire Co., Newark, N. J. Pamph.;  $6\frac{1}{2} \times 5\frac{3}{4}$  ins. This small pamphlet hriefly describes the copper electrical specialties such as connectors, splices and fuse links manufactured by this company.

AMERICAN ELECTRICAL DIRECTORY AND BUYERS'
MANUAL.—Central Lighting Stations.—E. L. Powers
& Co., Publishers, 150 Nassau St., New York city.
Pamph.; 6×9½ ins.; pp. 136.
This is number 3 of the 6th volume, dated September
30, 1898. An idea of its contents is given by the title.

TILLINGHAST'S DISINFECTANT.—The Autozone Chemical Co., 229 Front St., New York.  $3\times 5$  ins.; pp. 6. This pamphiet describes a disinfectant and deodorizer which is stated to he "a compound heavily laden with oxygen and chlorine gases held in solution."

EXCAVATING MACHINERY.—The Hayward Co., New York, N. Y. Pamph.; 9×6 ins.; pp. 59; illustrated. This psmphiet describes the application of the abovenamed company's special types of orange-peel and elamshell huckets to various forms of excavating and coal handling machinery.

MACHINE TOOLS AND SHOP EQUIPMENT—Chas. E. Billin & Co., 1543 Marquette Building, Chicago. Paper covers with loose sheets inserted.

This contains a list of second-hand machinery for sale,

and particulars of some of the tools and machines for which this firm is agent.

GAS AND GASOLINE ENGINES.—The Weber Gas & Gasoline Engine Co., Kansas City, Mo. Pamph.; 9×6 ins.; pp. 64; illustrated.

This pamphlet describes the various forms of Weber internal combustion engines constructed separately and also combined with pumps, hoists, etc., of various styics.

THE MODEL GAS AND GASOLINE ENGINE.—The Garrett Engine, Boller and Machine Works, Garrett, Ind Pamph.; 8% × 5% ins.

Famph.;  $5\% \times 5\%$  ins.

This is an illustrated pamphlet setting forth the features of a new type of gas engine which is guaranteed by the makers not to exceed 10 cu. ft. of gas per 1. HP. hour.

FOOT AND POWER PRESSES.—Ferracute Machine Co., Bridgeton, N. J. One sheet; 18 × 24 ms.

This is a large sheet, printed in colors, and evidently intended for posting on the wall of a machine shop. It contains photographic illustrations of 31 different styles of power presses.

STEAM AND ELECTRIC HOISTING ENGINES.—C. W. Hunt Co., New York city. Pamph.;  $6^{1}\!\!\!/_{2} \times 9^{1}\!\!\!/_{4}$  ins. This pamphlet is numbered 9002, and contains illustrations and descriptions of hoisting apparatus for use in connection with coal-hoisting and handling machinery and various forms of dredges and steam shovels.

ROCK CRUSHERS.—The Comet Crusher. Frazer & Chalmers, Chicago, Iii. Pamph.; 6×9 ins.; pp. 30

The "Comet" crusher is a sort of rotary Biake crusher, the crushing head heing a frustum of a cone carried on a vertical spindle and moving to and fro and around an inverted frustum with crushing liners which forms the

AN IMPROVED TRANSFORMER.—Moloney Electric Co., St. Louis, Mo. Pamph.; 6×9 ins.

This is a descriptive circular calling attention to a type of transformer, claimed by the makers to embody all the factors necessary for a perfect transformer. The pamphiet also contains a set of instructions for testing transformers which is worth preserving.

ROAD MAKING MACHINERY.—The Indiana Road Ma-chine Co., Fort Wayne, ind. Paper; 644 × 314 ins., 614 × 314 ins., and 912 × 1212 ins.; pp. 24, 56 and 4. These publications are devoted to descriptions and tes-

timonials of the company's road graders, drag and wheel scrapers, grading plows, and stone erushers, and also of a portable plant combining a stone crusher, elevator and

EIGHT-POLE MOTORS AND GENERATORS FOR DI-RECT CURRENT.—B. F. Sturtevant Co., Boston, Mass. Circular; 8×10½ ins.; hulletin No. 1. This circular briefly describes a type of electric motor designed for operating direct-connected, exhaust, blower

or other types of fans. An iliustration and dimensional table of Sturtevant automatic single upright engines and 8-pole generatora is given.

DRAWING MATERIALS AND SURVEYING INSTRU-MENTS.—The Frederick Post Co., 218 South Ciark St., Chicago, Iil. Paper; 6 × 9 ins.; pp. 105. 50 cts. This is a comprehensive catalogue and price list of drawing materials of all kinds, and mathematical sur-veying and engineering instruments. The latter include several forms of transits, Y and dumpy levels, and a huilder's level. Two forms of section liners are also shown.

DOMESTIC WATER FILTERS.—Weir Fliter Co., 63 Fifth Ave., New York. 3 × 6 ins.; pp. 16; illustrated. This pamphlet describes the Weir Aerating and Self-Cleansing Fliter. A dome above the filter forms an air chamber in which the water pressure serves to compress air. After drawing filtered water from the apparatus the compressed air causes a reverse flow through the filter cylinder. An automatic valve admits a fresh supply of

BALL PULVERIZING MILL.—Frazer & Chalmers, Chicago, Iii. Pamph.;  $6\times 9$  ins.; pp. 8. This pamphlet describes a mill for fine pulverizing which has been used with great success on gold and silver ores and other materials. It is a horizontal harrel of steel plate, with cast-iron ends, and revolving on trunnions. Within the harrel are placed hard white iron halls. The material is charged through one trunnion and dis-charged through the other.

MINING, TUNNELING AND QUARRYING MACHIN-ERY.—The Ingersoil-Sergeant Drill Co., New York. Pamph.; 6×9 ins.; pp. 104. This is a handsomely printed and illustrated catalogue of the various kinds of mining and quarrying machinery

manufactured by the above-named company. Besides the descriptions of the different machines, much information is given regarding their operation and the best methods handling and caring for them.

THE ATLANTIC CITY "FLYER."—General Passenger Department, Philadelphia & Reading R. R., Philadel-phia, Pa. Paper; 8 x 5½ ins.; pp. 16.

This little pamphiet contains illustrations and descrip-This little pampoiet contains illustrations and descriptions of the famous "Flyer," which last summer ran regularly between Camden and Atlantic City, the schedule time being 50 minutes for 55½ miles. The train despatcher's sheets for July and August are given, showing average speeds of 64 to 74 miles per hour.

SKETCH BOOK.—20th Century Sketch Book for Schools, etc. M. H. Avery, Woonsocket, R. I. 50 leaves in block form; 5½ × 8½ ins. 25 cts.

The peculiar feature of this "sketch book" is a scale of inches divided to 16ths around each edge of the sheet. One style of the book is made in which each page, in addition to the lineal scales, has a 90° protractor, 4%-in. radius, divided into balf degrees printed on each page. This is useful in sketching bevel gears.

JACKS.—A. O. Norton, 167 Oliver St., Boston, Mass. Paper; 3½×6½ ins.; pp. 32.
This is a catalogue and price list of the various forms of

the Norton ball-hearing jacks for rallway, street railway, car, hridge, track and general work, which are operated by a retchet movement with "pump handle" lever. They of 10 to 70 tons capacity, and among the specialties cone-bearing jacks, which are said to be as good as the ball-hearing type for capacities up to 15 tons.

THE DIAMOND DRILL AND ITS WORK.—American Diemond Rock Drill Co., New York, N. Y. Pamph.; 7 × 10 ins.; pp. 48; illustrated.

This is an unusually instructive descriptive pamphlet of the construction and operation of diamond drilling ma-ebinery and the work which it can do. Various forms of drilling machines for prospecting, mining, submarine and other classes of work are described and illustrated in de-We do not recall a more satisfactory trade pamphlet on this subject

BOILERS AND ENGINES.—The Murrey Iron Works Co., Burlington, Is. Paper; 6 × 9 ins.; pp. 72. This catalogue shows a great veriety of boilers, hori-

zontal and vertical, for supplying steem to engines and heating systems. There are also horizontal and vertical engines. Among the specialties is a portable engine with boiler, mounted on an iron frame with wheels and intended for saw-mills and well drilling plants. Heavy holsting engines, vertical refrigerating engines, and the Murray rocking grate are also shown.

STEAM BOILERS.—The Sederholm Boiler. Frazer & Chalmers, Chicago, Ill. Pampb.;  $6\times 9$  ins.

This pemphlet illustrates and describes the "Sederholm" boiler, which is a peculiar-looking modification of the horizontal tubuler boller, designed to overcome one of the chief objections to the latter, viz., the direct action of the flame on the thick shell of the boiler. It accomplishes this by placing transversely under the shell a number of smaller drums, with their sheets, and connecting them by curved tubes to the shell above.

ENGINEERING AND SURVEYING INSTRUMENTS.—
W. & L. F. Gurley, Troy, N. Y. Clotb; 4½ x 7 lns.;
pp. 438; illustrated. 50 cts.
This is the 31st edition of the well-known "manual" of

engineering and surveying instruments, which is published by the firm named, and it contains the usual ample descriptions of the various instruments, instructions for their care and adjustment, and tables and other data useful to surveyors and engineers. The scope and aceuracy of these various features are familier to engineers.

STEEL HIGHWAY BRIDGES.—The Hamilton Bridge Works Co., Hamilton, Ont. Pamph.; 3½ × 5¾ ins. This pamphlet is devised especially to acquaint bighway commissioners and other municipal officials not engineers with the advantages of employing metal instead of wooden bridges, giving comparative figures and rules, suggestions and general advice respecting the selection of bridges for different conditions. Illustrations of a variety of large bridges and buildings which the company has built concludes the pamphiet.

POWER PUMPING MACHINERY.—The Stillwell-Bierce & Smith-Veile Co., Dayton, O. Pamph.; 8 x 7 ins.; pp. 70.

This is a finely illustrated catalogue (of an unhandy This is a finely illustrated catalogue (of an unhandy size for filing), describing a great variety of duplex and triplex pumps, driven by belt or other gearing, by electric motors, water wheels, etc. Several new designs are shown. We notice especially an interesting combination of a horizontal triplex pump, cut gearing, and an electric motor, ell mounted on a hand car, for use in mines.

MP CARS AND TRACK APPLIANCES.—The Buda Foundry & Mfg. Co., Harvey, Ill. Paper; 4½ × 6¾ lns.; pp. 119.

This catalogue shows a variety of forms of dump cars, hand cars, push cars, etc., for railway work. Also crossing gates, switchstands and a varied line of track tools and appliances, wrecking frogs, etc. One of the specialties is a portable device for straightening angle hars that have become bent, thus enabling the track men to put up low joints without using new hars or sending old hars to the sbops to be straightened.

PUNCHING AND SHEARING MACHINERY.—The Long & Allstatter Co., Hamilton, O. Paper; 6×9 lns.; pp. 124.

great variety of machines, for light and heavy work, are illustrated by line engravings, and briefly described. Some are driven by belting, while others have steam en-ginea or electric motors mounted on the framing. Beam coping and punching machines are shown and angle-iron shears mounted on turntahles. Some of the machines are fitted with automatic feed and spacing tables. Bending and forming machines, drop and helve hammers, and a side-grinding machine for stone working, are also shown.

ROLLER BEARINGS, ROLLING, PRESSING AND STAMPING MACHINERY.—Mossberg & Granville Mfg. Co., Providence, R. I. Pampb.; 6×9 lns.; pp. 230.

This is a handsomely-printed catalogue of drop, foot and power presess, dies, rolling milis, wire machinery and special tools of the Mossberg & Granville Mfg. Co., which is the successor to the Mossberg Mtg. Co. We notice on p. 192 of the catalogue a table of the "dynamic force exerted by drop-press bammers," which is entirely new to us. It is said to give "the force produced by a solid, compact iron body, weighing 1 lb., falling freely through space." No satisfactory explanation of this table is given. CORLISS ENGINES.—The Murray Iron Works Co., Burlington, Ia. Paper; 9 × 6 ins.; pp. 64.

The company bas a large machine sbop devoted ex-

clusively to the manufacture of the Sloux Corliss engine. formerly made by the Sloux City Engine Works, and it is said that 75 % of the Corliss engines between the Mississippi River and the Rocky Mountains are of the Sioux pattern. Special advantages are claimed for certain fea-tures of the design, and the engines and their various parts are described and illustrated in detail. They are made in borizontal and vertical types, simple or compound, the compounds being either of the cross or tandem pattern.

RAILWAY EQUIPMENT. BRIDGES, ETC.—A. S. Males & Co., 413 Vine St., Cincinnati, O. Paper, 3½ × 6 ins.; pp. 74 and 8.

This firm deals in all kinds of new and accond-band

equipment, and its catalogues contain descriptions of a great variety of material now on hand, including over 100 locomotives, ranging from a 7-ton switch engine to a 60-ton twelve-wheeler, hesides various narrow-gage and geared engines. Passenger, dining and freight cars, steam shovels, turntables, hoisting engines and about 40 bridge spans are also on the list, dimensions and weights being given in each case. The smaller catalogue is a supple-

ICE AND REPRIGERATING MACHINES.—The Murray Iron Works Co., Burlington, Ia. Peper; 7 × 10 ins.;

Iron Works Co., pp. 46.
These machines are made in various sizes, with ca pacities of 1 to 100 tons, and the refrigerating is effected by ammonia or brine circulation. The machines are mainly vertical, driven by vertical or borizontal engines. The time of freezing for ice is given as 20 brs. for 50-lb. blocks to 60 brs. for blocks of 200 to 400 weight. sides the use of these machines for manufacturing and storage purposes, it is noted that one has been installed at the Cook County morgue in Chicago, in order to maintain good sanltary conditions.

THE WESTINGHOUSE STANDARD ENGINE.—A BIRD'S-EYE VIEW OF OUR BUSINESS.—The Westingbouse Machine Co., Pittsburg, Pa. Pampbs.; 9 × 6¾ ins., and 3¼ × 6 ins.; pp. 55; illustrated.

The first-mentioned of these pamphlets describes in detail the Westinghouse standard engine, pointing out its field of application, economy and the materials and workmanehip employed in its manufacture. Constructional de-tails are shown by a series of excellent balf-tones. In conclusion attention is called to "other products" of the company, such as compound engines, junior engine, en-gines of 1,000-HP. and upwards, Westingbouse gas enginea, the Roney stoker and ice-making and refrigerating machinery.

The small pamphlet contains a series of small halftone illustrations of Westinghouse apparatus

IRON AND STEEL WORKING MACHINERY.—The Niles
Tool Works Co., Hamilton, O. 8vo. cloth; pp. 571.
The shops of the Niles Tool Works, at Hamilton, have

15 acres of floor space under roof, making, it is claimed, lo acres of noor space under root, making, it is claimed, the largest works in the world devoted exclusively to the manufacture of machine tools. The present catalogue illustrates and describes the full line of tools, machines and fixtures made by the company. It is divided into 30 parts, describing the tools of as many different classes. The catalogue is one of the most satisfactory machine tool catalogues we have yet seen. It is a well bound book, of a convenient size of page, and the cuts and descriptions of the machines convey just the information that is likely to be needed by the purchaser, without any attempt at corative typography or illustrations, wide margins or tinted paper.

RAILWAYS.

ARKANSAS SOUTHERN.—C. C. Henderson, Gen. Mgr., Junction City, Ark., informs us that the Arkansas Southern R. R. Co. and the Alexandria, Junction City & Shreve-port R. R. Co. will be consolidated on Feb. 23 under the uame of the Arkansas Southern R. R. The projected length is 2%5 miles from El Dorado, Ark., to Sabine City, via Junction City, Ruston and Boyce, La., and Orange, Tex. Trains will be run between El Dorado and Ruston, La., by July 1. J. W. Brown, Pres., Camden, Ark.; M. P. Jackson, Ch. Engr., Junction City.

BARCLAY.—This company is said to propose the extension of its system from Greenwood to Canton and Cedar Ledge, Pa., about 16 miles, provided that the right of way be granted. Surveys are heing made. 1. O. Blight, Supt., Towanda, Pa.

BELLINGHAM BAY & BRITISH COLUMBIA.—J. J.

Towanda, Pa.

BELLINGHAM BAY & BRITISH COLUMBIA.—J. J.

BONOVAN, Ch. Engr., New Whatcom, Wash., Informs us
that the preliminary survey has heen completed and location is in progress for the proposed 10-mile extension of
this line iuto the timber district in Whatcom county,
Wash. No contracts have been let yet. P. B. Cornwall,

Pres., 450 Msin St., San Francisco, Cal.

Pres., 450 Msin St., San Frsncisco, Cal.

BIRMINGHAM SOUTHERN.—This company was incorporated in Alshama, Feb. 6, with a capital stock of \$600,000, to connect and extend the various coal and iron rallways owned by the Tennessee Coal, Iron & R. R. Co. The incorporators are N. Baxter, Jr., J. Bowron, A. M. Shook and G. B. McCormack, all of Birmingham, Ala.

CHICAGO, ROCK ISLAND & PACIFIC.—This company will spend about \$100,000 in Council Bluffs, Ia., during the coming season in the improvement of its yards, the erection of new steel hridges, a roundhouse and a \$30,000 station.

CLEVELAND, CANTON & SOUTHERN.—Chas. A. Pea-ody, of Boston, and H. K. Pomeroy, of New York, bought his railway at a public sale in Cleveland, O., Feb, 4, at 1 050 000.

\$1,950,000.

COLUMBUS, WESTON & JACKSON.—This company has been incorporated in Ohio with a capital stock of \$2,000,000, to build through Jackson, Vinton, Hocking, Pickaway, Fairfield and Frankin counties. The incorporators are: W. H. Stevenson, J. O. Curry, J. L. Clark, W. C. Fish. COPPER RANGE.—Surveys are said to be in progress for this proposed line from Houghton to Rockland, Mich., sbout 50 miles, in which Paine, Webber & Co., 27 State St., Boston, are said to he interested. Thomas Appleton, COTTAGE GROVE & BOHEMIA.—This company was incorporated in Oregon, Feh. 1, with \$500,000 capital stock, to build a railway to the Bohemia mines, Lane county. II. Ogieshy, Robert Clow and G. F. Skipworth are incorporators.

DAKOTA SOUTHERN.—Reports state that the Great Northern Ry. Co. will huild this line, as an extension, from Huron to Wheeler, S. Dak., via Beadle, Sanborn, Aurora, Douglas, Charles and Mix counties, about 100 miles, and thence across the Missouri River to the Black Hills. DAN RIVER.—A. H. Patton, Welch, W. Va., a promoter of this new line of railway, informs us that the rights of way have been obtained, and the capital for construction and equipment secured. Work on the grade was to have begun about Feh. 15 and continued until completed, requiring about five months. The route is from Mount Airy, N. C., to the "Pinnacles of Dan," 12 miles.

DENMARK.—Vice Consul Blom. Copenhagen. has

Ing about nive months. The route is from about Ally, N. C., to the "Pinnacles of Dan," 12 miles.

DENMARK.—Vice Consul Blom, Copenhagen, has stated that several new railways are projected in Denmark, and that he understands that it is contemplated to send some orders for American locomotives. Manufacturers should address H. C. Petersen & Co., Industribyguing, Copenhagen, Denmark. The railways in Denmark use rails weighing 45 and 75 lbs. a yard, and spikes, botts and fish plates; not the so-called "chairs." The Danish State railways are 1,725 kilometers (1,089 English miles) and the private railways 642 kilometers (309 English miles) in length. Heretofore the locomotives have all been imported from Germany.

DES MOINES, MOULTON & ALBIA.—This company was incorporated in lows, Feb. 10, with a capital stock of \$200,000, to build an extension to the Wabash R. R. from Moulton to Albia, Ia., a distance of about 27 miles. The incorporators are: O. D. Ashley and John C. Otteson, of New York; Joseph Ramsey, Jr., Bryant C. Winnison, W. S. Lincoln, Wells A. Blodgett and D. S. O'Leary, of St. Louis, Mo.

NDIANA, DECATUR & WESTERN.—The Peorla, Decatur & Evansville Ry. Co. has sold its Chicago & Ohio River branch to this company, running from Sidney to Oiney, Ill., about 86 miles. It was originally intended to connect Chicago and Henderson, Ky., and the new management, it is said, will now continue the work and extend the line to its projected terminus. M. D. Woodford, Pres., Cincinnati, O.

LITTLE ROCK & GULF.—This company was incorpo-rated in Arksnsas, Feb. 9, with a capital stock of \$1,800,-000, to construct a railway through the counties of Union,

Brinkley, Calhoun, Dallas, Cleveland, Grant, Saline and Pulaski, a distance of 120 miles. The incorporators are: A. B. Banks, J. G. Pattilo, J. E. Hampton, J. F. Krwin, G. W. Smith, E. A. Acrumen, Charles McKee, Fordyce, Ark; Oscar Davis, J. B. Jones, W. A. Bright.

MOORE COUNTY & WESTERN.—W. B. Elkhart, Supt., Aberdeen, N. C., informs us that negotiations are now in progress for huying eight miles of rails, and that eight miles of roadbed have already heen graded and tied. The length of route from Aberdeen to Concord, N. C., is 85 miles. H. L. Thurston, Ch. Engr., Southern Pines, N. C. PASADENA & MOUNT WILSON.—A bill has been referred to the committee on public lands of the U. S. Senate providing for the granting to this company of the right of way for nine miles of railway through the San Gabriel Forest Reserve, Cai.

Gabriel Forest Reserve, Cai.

PATTEN, ALLEGASH & NORTHERN.—A bill has been introduced into the legislature of Msine providing for the incorporation of this company with power to construct and operate a railway from Patten, the terminus of the Patten & Sherman R. R., north to Allegash, Me., on the St. John River. Those luterested are: A. A. Burielgh, P. Burielgh and others, of Houlton, Me., all officers of the Patten & Sherman R. R. Co.

Patten & Sherman R. R. Co.

PITTSBURG, LAKE ERIE & CHICAGO.—The officers of
this company met with the board of commerce at Oberlin,
O., Feb. S, and considered the construction of this proposed line through Sandusky, Akron, Oherlin and Alilance,
O. Sandusky has pledged \$100,000 for terminal racilities.
J. McKelvey is said to be the chief promoter.

QUEEN ANNE'S.—Wade, Burns & Co., Baltimore, Md.,
are reported to have been awarded the contract for building the proposed extension of this railway from Lewes to
Kenoboth, Md. I. W. Troxel, Gen. Mgr. and Ch. Eugr.,
Queenstown, Md.

RIVERSIDE & FAIRVIEW.—This company has been in-

Queenstown, Md.

RIVERSIDE & FAIRVIEW.—This company has been incorporated in West Virginia, with a capital stock of \$500,000, to build from Riverside to Fairview, W. Va., up Paw Paw Creek. N. B. Hair, C. E. Reed and Frank Hayden, of Fairmont, W. Va., are incorporators.

RUTLAND-CANADIAN.—We are informed that O'Brien & Sneeuan, 208 Broadway, New York, have been awarded the contract for constructing ahout 50 miles of railway trom Burlington, Vt., north, as advertised in Engineering News, at \$200,000. The tabulated bids are given under Contract Prices. John W. Burke, Ch. Engr., 45 Brosdway, New York.

ST. LOUIS & NORTHERN SHORT AND

New York.

ST. LOUIS & NORTHERN SHORT LINE.—Wm. E. Guy, Pres. of the Laclede Construction Co., Security Bidg., St. Louis, Mo., informs us that 100 miles of railway work on this line from Peoria to East Clinton, Ill., is ready to he let. This company was incorporated in illinois, Feb, 2, with a capital stock of \$25,000,000, and its said to he a branch of the St. Louis, Peoria & Northern Ry. Co., J. N. Faithron, Pres., St. Louis, Mo.

STOCKTON & TUOLUMNE COUNTY.—R. S. Clarke, Secy., Grand Hotel, San Francisco, Cal., informs us that this line has been surveyed to the Stanislaus River. Coustruction work has heen suspended for some months; fifteen miles have already heen graded, and grading work is expected to be resumed very soon. The route is from Stockton to Summerville, Cal., via Copperpolis and Sonora, 60 miles. Mrs. Annie Kline Rikert, Pres., San Francisco.

CISCO.

TEXAS, WESTERN & CIRCLE BELT.—A. B. Donaldson, Pres., Gainesville, Tex., informs us that the surveys have been made, the right of way obtained and most of the capital secured for this proposed line from Gainesville to Abllene, via Era, Decatur, Bridgeport, Graham and Albany, Tex., 210 miles. Contracts are to he let within the next 50 days. James Guinu, Ch. Engr., Gaiuesville, UNION PACLEIC, Exports state that this commany ex-

UNION PACIFIC.—Reports state that this company expects to buy the 155 miles of railway hetween Julesburg and La Salie, Colo., and that it will relay 44 miles of the same and ballast the roadhed with Sherman gravel.—This company is also reported to have contracted for about \$1,000,000 worth of new equipment to be delivered by late 1

July 1.

UTAH, NEVADA & CALIFORNIA.—This company has been incorporated in Utah, with \$5,000,000 capital stock, by C. M. Dull and A. E. Kimball, Sait Lake City, Utah; A. C. Cleveland, Cleveland, Nev., and others. It is proposed to build a line from Milford, Utah, on the Utah Short Line, to Vanderbilt, Cal., a distance of 245 miles. WHEELING & LAKE ERIE.—This railway was sold under foreciosure at Toledo, O., Feb. 7, to Ernest R. Adee and A. W. Krech, representing the reorganization committee, for \$1,000,000.

YANKTON, NORFOLK & SOUTHWESTERN.—W. W. Graham, Norwalk, O., has bought this line at auction at Pierce, Neb., for \$45,000. Mr. Graham was one of the contractors who started to huild the railway in 1897, and he will probably complete the work.

# STREET AND ELECTRIC RAILWAYS.

NASHUA, N. H.—The Nashua St. Ry. Co. has decided to extend its line this spring from the present terminus on Main St. to the state line. J. H. Fischer, Pres., 85 Kinsley St.

extend its line this spring from the present terminus on Main St. to the state line. J. H. Fischer, Pres., 85 Kinsley St.

AMESBURY, MASS.—The Amesbury & Hampton St. Ry. Co. has been organized, with a proposed capital stock of \$40,000, to build 4½ miles of street railway from Ameshury to Salisbury. The incorporators are: Wallace D. Lovell, 143 Federal St., Boston; Edward R. Briggs, Amesbury, and others.

BOSTON, MASS.—The Pencoyd Iron Works, 27 State St., Boston, was awarded the contract Feb. 8 for the construction of the elevated structure on Washington St., from Castle to Bartlett St., and on Main St., Charlestown, from City Square to Bunker Hill St., requiring ahout 5,550 tons of iron in Roxbury and 2,750 tons in Charlestown, a total distance of 13,870 ft. Bids were also received from the Edgemoor Bridge Works, King Bridge Company, New England Structural Company, Boston Bridge Works, New Jersey Steel & Iron Co., Carnegle Steel Co. and the Pennsylvania Steel Co. The contracts include the structure only, and not foundations, tracks nor stations, and amount to nearly \$500,000. With the exception of the Atlantic Ave. loop, practically the entire system is now under contract, the Dudley St. terminal having been awarded to the Pennsylvania Steel Co. The work is to be completed on or before Oct. I. Bids for the construction of the remaining portions of the system will soon be asked, and work upon all the different sections completed as rapidly as possible. Geo. A. Kimball, Ch. Engr., 101 Milk St.—J. F. Shaw, Brookline, Mass.; E. P. Shaw, State Treas.; P. W. Sprague, N. S. Myrick and others have petitioned the legislature for a charter for the International Construction & Power Co., which proposes to build and operate railways, electric light plants, etc., in this state, Porto Rico, etc.

BROCKTON, MASS.—The Brockton, Bridgewater & Taunton St. Ry. Co. is said to contemplate the building of an extension from the Raynham town line to connect with the railway in West Bridgewater. T. Ellerby, Ch. Engr., Bridgewater.

Bridgewater.

CLINTON, MASS.—The selectmen granted a franchise to the Clinton & Hudson St. Ry. Co. Feb. 6 to lay tracks to the Berlin line. Work is expected to be completed by May 1. W. R. Dame is interested.

HINGHAM, MASS.—It is reported that the selectmen will soon he formally petitioned by the Hingham St. Ry. Co. for an increased location for a double track from Broad Bridge to Hingham over North and Rockland Sts. to the Hull line. The plan also includes an extension in Hull to the heach.

LEYINGTON MASS. A fractile.

Broad Bridge to Hingham over North and Rockiand Sts. to the Huil line. The plan also includes an extension in Huil to the heach.

LEXINGTON, MASS.—A franchise has heen granted to the Lexington & Boston St. Ry. Co., for a line in this town. It is reported that the company intends to extend its lines from Arlington Heights to Billerica, where connection can be made with the electric railway for Lowell and completing a line from Boston to Lowell. The Lexington road also proposes to connect Lexington and Waltham with a line which will meet the Newton.

NEWTON, MASS.—The board of aldermen has received petitions for locations in new streets from the following companies: The West Roxbury & Newtou Co. for locations in Baker, Dedham, Parker, Boylston and Beacon Sts.; the Commonwealth Ave. Co., Cypress, Centre and Boylston Sts.; the Newton Co., from Lexington St. through Rumford Ave, Auburndaie; the Newton & Boston Co., for locations in Chestnut Hill Ave., Beacon, Cypress, Paul and other streets.

UXBRIDGE, MASS.—The selectmen of Uxbridge have granted the Bianchard Bros. Granite Co., the right to build and operate a freight railway from its granite quarry to the Consolidated Ry.

CANTON, CONN.—Senator Goodrich has introduced a resolution in the Senate incorporating the Canton, New Histiford & Northwestern Tramway Co., to have a capital stock at first of \$50,000, with power to huild from the Farmington and Avon town line northessterly to Cherry Park, thence to Canton, Collinsville, New Hartford, Burrville, Pleasant Vsiley and Riverton. The incorporators are: John A. Crilley, L. A. Davidson, George D. Curtis and A. H. Merrilli, Hartford, Conn.; Ariel Mitchelson, PUTNAM, CONN.—Surveys are being made, according to reports, for the new electric street railway to be built for the People's Tramway Co., heave a replain and A. Perrilli, Hartford, Conn.; Ariel Mitchelson, Putnam, Conn. Surveys are being made, according to reports, for the new electric street railway to be huilt for the People's Tramway Co., hetween Putnam and Prov

BROOKLYN, N. Y.—The Brooklyn Rapid Transit Co. has decided to Increase its capital stock from \$20,000,000 to \$45,000,000, to he used in part to purchase control of the Nassau Electric R. R. Co. C. L. Rossiter, Pres., 16S Montague St.

Montague St.

MASSENA. N. Y.—The Massena Electric St. Ry. Co. was incorporated, Feb. 6, with a capital stock of \$100,000, to construct eight miles of line from the Massena Springs Station, through the town of Massena to a point on the St. Lawrence River. The directors are: Thomas H. Gillespie, R. A. Johnson, E. M. Stathers, Howard Hasbrouck, Edward M. Dolan, Thomas D. Harris, Willard A. Esselstyn and James H. Jones, of New York; Robert Swan, Massena. NEW YORK, N. Y.—The Metropolitan St. Ry. Co. has heen granted permission by the State railroad commission to change its motive power on certain streets to underground electricity.

ground electricity.

SCHENECTADY, N. Y.—The Schenectady St. Ry. Co. has voted to issue \$77,000 in bonds for the improvement of its system. W. H. White, Pres.; F. Davis, Ch. Engr. SAYREVILLE, N. J.—The Sayreville Electric Light & Power Co. has petitloned the township committee for a tranchise to outid a trolley line from Sayreville to Perth Amhoy. Sayre & Fisher, Sayreville, are said to be luterested.

POTTSVILLE, PA.—It is reported that a new trolley line is now being staked out hetween Pottsville and Heckscherville Valley, via Fishbach, Mount Laffe and Mine Hill Gap.

cherville Vailey, via Fishbach, Mount Laffe and Mine Hill Gap.

SPRING CITY, PA.—Surveys have been completed for the Montgomery & Chester Electric Ry. Co.'s hranch from Phoenixville to this city, and it is said that work will soon be commenced by the Fairmount Construction Co., 723 Wainut St., Philadelphia, Pa. George F. P. Wagner, Ch. Engr., Pottstown, Pa.

WASHINGTON, D. C.—A bill has been favorably reported to the Senate authorizing, under the name of the Washington City Railway Co., the consolidation; equipment with the underground electric system in the city and overhead double trolley in the country, and an extension from Connecticut Ave. and Philadelphia St. west and north to the District line, of the following lines: Anacostia & Potomac River; Capital Ry., Brightwood Ry., Washington, Woodside & Forest Glen Ry. & Power Co. City & Suburban Ry. Co., Eckington & Soldiers' Home Ry., and the Belt line. I. T. Crosby is largely interested.

the Belt line. I. T. Crosby is largely interested.

ATLANTA, GA.—It is reported that the Atlanta Ry. Co. lis preparing to begin work on its proposed extensions, and that new rails and equipment will soon be hought. T. Woodruff, Pres. and Mgr. George R. Wehb, Baltimore, Md., is interested.

BESSEMER, ALA.—W. T. Kennedy has petitioned the council for a franchise to construct an electric street railway, the terminals of which would be at the works of the American Pipe & Foundry Co., the mines of the Sloss Iron & Steel Co. back of Bessemer, Joneshoro and Brighton.

NEW ORLEANS, LA.—The New Orleans & Carroll-ton R. R. Co. is said to contemplate the relaying and im-provement of its tracks and roadbed from Howard Ave, to Carrolton and on Napoleon Ave.; estimated cost, be-tween \$100,000 and \$200,000. J. K. Newman, Pres.

JACKSON, MISS.—F. G. Jones, Pres. of Jackson Electric Ry., Light & Power Co., Memphis, Tenn., informs us that the capital for constructing a 5-mile line of electric railway in Jackson has been secured, and that the company is doing its own work. All contracts are said to have been let and rolling stock purchased. This company has also acquired the gas and present electric plant, and is putting in a new light and power plant. It has a contract to light the city for 25 years.

CAMBRIDGE, O.—The Cambridge & Byesville Electric Ry. Co. has been incorporated with a capital stock of \$20,000, to build a line from Cambridge to Senacaville, via Byesville and Pleasant City. A. E. Townsend, Cam-bridge; L. Loeb and Henry Loeb, of Columbus, O., are the promoters.

COLLINWOOD, O,-The council has granted the Lake

View & East Cleveland St. R. R. Co. the right to construct and operate a street railway in this village. L. A. Hall, Mayor.

Hall, Mayor.

DAYTON, O.—The following contracts are said to have heen awarded by the Dayton & Xenia Traction Co.: The Carnegie Steel Co., and the Johnson Steel Co., for the rails; the Westinghouse Electric & Mfg. Co., for dynamos, motors and all electrical apparatus; the American Electric Works, of New York, for all copper; the New Castle Bridge Co., for the bridges; the Chase Construction Co., Detriot, Mich., who built the Dayton & Western, and the Craighead Engineering Co., Cincinnati, O., for the poles, overhead work, bonding and tracks; E. Pfeifer & Co., Washington C. Hi., O., for thes. The ties and rails are now being delivered at Xenia. The grading in Montgomery county has also been let.

EAST LIVERPOOL, O.—Jas. R. Zollinger, of Louis-

gomery county has also been let.

EAST LIVERPOOL, O.—Jas. R. Zollinger, of Louisville, Ky., is said to be making the surveys for the proposed electric line between this city and Lishon. The
promoters are: Timothy Dwight, Chicago; H. G. Foltz,
Herkimer, N. Y., and J. L. Francis, East Liverpool.

LORAIN, O.—Parks Foster, of Elyrla, O., is said to be interested in a project to build an electric raliway from Lorain to North Amherst.

XENIA, O.—The Xenia & Spring Valley Transit Co. has been incorporated with \$5,000 capital stock to build between these cities. The incorporators are: C. J. Ferneding, O. O. Ozier, J. M. Wilson, H. F. Terneding, Philip A. Kemper.

CAMBRIDGE CITY, IND.—The Cambridge City Inter-Urban Traction Co., is being organized by local capitalists and others, with \$50,000 capital, to connect Cambridge City with Milton, Dublin, East Germantown and Hagers-

City with Milton, Dublin, East Germantown and Hagerstown.

INDIANAPOLIS, IND.—The commissioners of Marlon county have granted autoher 50-year franchise over the National Road to D. P. Erwin, David M. Parry and D. M. Ransdeli, who contempiate the huliding of an electric railway, which will first be constructed to Bridgeport. The right of way is granted from the city limits to the west county line. Work must be commenced by Sept. 1; to be completed by September, 1901.

DETROIT, MICH.—It is announced that the Detroit, Ypsilanti & Ann Arbor Electric Ry. Co. has decided to take out a mortgage for \$1,000,000, of which \$400,000 will he used for extensions and improvements. J. D. Hawks, Pres. and Ch. Engr., Peninsula Bank Bidg.

LANSING, MICH.—The Lansing, Dexter & Ann Arbor Electric Ry. Co. is said to have awarded the contract for the construction of its proposed line to Westinghouse, Church, Kerr & Co. The route is 60 miles in length. R. J. Shank and C. A. Mapes, of Lansing, and L. C. Chase, Dansville, Mich., are directors.

PORT HURON, MICH.—The Port Huron, Lexington & Western R. R. Co. is a company which proposes to connect Port Huron with Lexington and Bay City. Edgar 1. Brennan, Toledo, O., is the promoter.

MOLINE, ILL.—The eouncil has granted a franchise to the Tri-City St. Ry Co.

MOLINE, ILL.—The council has granted a franchise to the Tri-City St. Ry. Co.

STREATOR, H.L.—The council granted a 30-year franchise to Cary C. Barr, Feb. 6, to build, equip and operate a street car line in this city. The lines will connect with the interurban road to be constructed between this city, Ottawa and La Salle.

Ottawa and La Salle.

ST. LOUIS, MO.—Contracts are about to he let for the construction of the Wellston, Creve Coeur & St. Charles Electric R. R., and it is expected to have the line completed to St. Charles within 60 days. J. D. Houseman, Jr., Gen. Mgr.

MAPLEWOOD, MO.—The Msplewood & Jefferson Barracks R. R. Co. has filed a petition with the commissioners of St. Louis county for a franchise to run a double track line between Maplewood and the Barracks. Among those interested are: J. T. Donovan, J. T. McDermott, Michael Hamwell, Joseph E. McGinnis and H. J. Webber

FORT WORTH, TEX.—Reports state that the Glenwo & Polytechnic College St. Ry. Co. has purchased the Alington Heights Ry. and will make a number of impo ant improvements. J. T. Voss, Pres. and Mgr.

LOS ANGELES, CAL.—The Los Angeles Electric Ry. Co. has been incorporated with a capital stock of \$1,000,000, to construct and operate any kind of street railway within the counties of Los Angeles, San Bernardino, Riverside and Ventura. The incorporators are: I. W. Hellman, J. Kuhrts, Charles Seyler, F. M. Nickell, Frank A. Gibson and others.

ST. CATHARINES, ONT.—A. B. Colvin, Glens Falls, N., J. A. Powers, Lansinghurgh, N. Y., and others, are aid to have applied for a franchise to build a line in this ty with an extension to Port Dalhousle.

CHIHUAHUA, MEX.—A concession for the construc-tion of an electric street rsilway at Chihushua has been granted to Federico Sismiega, Julio Meyer and Salvador Areliano. It is reported that the company will not intro-duce electric motive power at once, but will continue the line with mule service. New cars will be ordered and new rails laid.

# ELECTRIC LIGHT AND POWER.

ELECTRIC LIGHT AND POWER.

SKOWHEGAN, ME.—The Bombasee Water Power Co. is reported as considering the question of developing the water power on the Kennebec River, near this place. F. G. Danforth, Pres.; O. F. Hali, Clk.; F. W. Spaulding, of Norridgewock, Me., and W. M. Ayer, of Oakland, Me. BILLERICA, MASS.—Walter A. Drucker is reported to have been granted a franchise for lighting the town.

NEWPORT, R. I.—Blds are asked until Feh. 21 for furnishing the materials and for installing a system of wiring and gas piping in the city hali. J. D. Johnston, Arch., 69 Mill St.; L. Shanteler, Chn. Comn.

MIDDLETOWN, CONN.—The council has been asked to construct a municipal plant.

NEWARK, N. Y.—The Newark Electric Light &

NEWARK, N. Y.—The Newark Electric Light & Power Co.'s franchise will expire next year. It is stated that the company has been in the hands of a receiver and that the service has been poor. Two new companies, represented by Daniel P. Smith, Pres. First National Bank, and Wm. A. Roe, of the Wayne County Milling Co., and C. P. H. Vary and E. K. Busham, have been granted franchises.

RICHMONDVILLE, N. Y.—The people of this place will on vote on the question of putting in a plant.

CLAYTON, N. J.—The Gioucester City Electric Light Co., Gloucester, N. J., has been granted a franchise for lighting this piace.

FRANKLIN, N. J.—The Nichols Electric Light, Heat & Power Co., of Nutley, N. J., has applied for a franchise to light this place.

SEABRIGHT, N. J.—The New York & New Jersey Tele-phone Co., 15 Dey St., New York, is reported to have heen awarded the contract for laying electric light wires at

\$2,452. The only other bid was from the Standard Underground Cable Co., 18 Cortlandt St., New York, at \$2,738.

ERIE, PA.—Our correspondent informs us that the State St. electrical conduit built tast summer at an expense of \$10,000 is still unused, not a wire having been taken off State St. It is understood from councilmen that the city engineer wants an expert brought here to determine if another conduit is necessary for high tension wires. When the present conduit was built it was supposed it would do for both low and high tension wires, but now the city suthorities claim that only jow tension wires can be placed in the ducts.

In the ducts.

WAVERLY, PA.—It is stated that the Waverly Electric Light Co. will build a new plant.

DOVER, DEL.—The question of municipal electric lighting is being considered. E. L. Clarke, Pres. Council, and John Hutton may be addressed.

LONACONING, MD.—Estimates for furnishing electric supplies for the plant of the Home Electric Light Co. are wanted by John Somerville, according to reports.

EMPORIA, VA.—The citizens of this place have had surveys made of the water power on the Meherrin River at this town for the purpose of inducing capitalists to construct a plant.

LYNCHBURG, VA.—J. M. B. Lewis, Seev. Bd. Elec-

LYNCHBURG, VA.—J. M. B. Lewis, Secy. Bd. Electrics Control, writes us that applications for the position of city electriclan were wanted until Feb. 15. No new plant is proposed.

PETERSBURG, VA.—The Electric Ry. & Development Co., of Richmond, Va., has practically acquired the Petersburg street raliway property, and in addition to running that line the company will furnish power and light to private parties. R. Lancaster Williams, Richmond, may be addressed.

KANAWHA CITY, W. VA.—Press reports state that the Morgan-Gardner Electric Co., 2638 Shields Ave., Chl-RANAWHA CITY, W. VA.—Press reports state that the Morgan-Gardner Electric Co., 2638 Shields Ave., Chicago, is making preparations to erect a piant to supply power to the mines of the Beimont, Kanawha, Splint, Riverside, and Big Mountain Coal companies. A submarine cable will be laid across the Kanawha River to the mines, which are on the opposite side of the river from the new power plant.

HICKORY, N. C.—Press reports state that the J. M. Odell Mfg. Co. has purchased the water power on the Catawba River and will erect a plant, cotton mill, etc.

TARBORO, N. C.—The legislature will soon be asked to grant this place authority to issue \$50,000 in bonds for a plant, sewerage system and water works. WILMINGTON, N. C.—B. F. Kelth, Wilmington, wishes to seil or lease the Colly Mill Water Power, about 30 miles from here. A building, 200:36 ft., has already heen erected, and money is wanted to furnish the machinery.

chinery.

HICKORY, S. C.—Wm. C. Whitner, Anderson, S. C., and W. G. Wylle, Rock Hill, S. C., have applied for a charter for the Catawba Power Co. It is proposed to build a plant at Indian Hook shoals, York county, S. C. ROME, GA.—D. B. Hamilton, Jr., Chn. Com., writes us that he wishes to secure more information at once for a municipal plant.

EVERGREEN, ALA.—The legislature has been asked to grant this place authority to issue bonds for a plant and water-works.

and water-works.

WETUMPKA, ALA.—This place has asked the legislature for authority to issue \$10,000 in bonds for a plant, water-works, etc.

JACKSON, MISS.—F. G. Jones, Pres. Jackson Electric Ry., Light & Power Co., Memphis, Tenn., writes us that the company has purchased the gas and electric plants here, and is putting in a complete equipment. It has a 25-year contract to light the city.

GRAYSON, KY.—Peter Brown writes us that it is not likely that a plant will be built here for some time.

MARION, IND.—Mead & Co., it is stated, propose to increase the power of its plant by the addition of a 100-HP. engine.

HP. engine.
VINCENNES, IND.—Bids are asked until Feb. 27 for lighting the public streets and buildings for 10 years with 175 are lights and 200 gas lamps. The electric service will begin April 29, 1900. A 20-year franchise will be granted. Bryan & Humphrey, Engrs., St. Louis, Mo.; Chas. Langei, Cy. Cik.

ZEELAND, MICH.—Lewis W. Hartwick, Village Clk., writes us that the question of building a plant has been dropped.

dropped.

PEARL CITY, ILL.—J. J. Feas, Viliage Clk., writes us that the board has not yet drawn up an ordinance authorizing the construction of a plant.

PEORIA, ILL.—The people of South Peoria are considering the question of electric lights. August Kneer, Trustee.

ROCK ISLAND, ILL.—The contract for lighting this city for five years has been let to the People's Power Co. at \$15,024 a year for 202 high and low lights.

MADELIA, MINN.—The city recorder writes us that nothing has yet been done towards securing a plant.

SACRED HEART, MINN,—This place is reported as onsidering the question of building a plant.

considering the question of building a plant.

REDCLOUD, NEB.—H. T. Fisher, it is stated, has applied for a franchise for a plant.

SOUTH OMAHA, NEB.—Blds are asked until Feb. 21 for installing a system of conduits and electric wires at the post office. O. L. Spaulding, Asst. Secy. Treasury Dept., Washington.

BOULDER, COLO.—J. W. Deane, Denver, writes us that no information can he given at present in regard to the proposed plant. Further information can be secured later by addressing Mr. Deane, care of A. W. Mansur & Co., 64 Equitable Bidg., Boston. It is probable that Hollis French, 3 Hamilton Place, Boston, Mass., will be the engineer.

be the engineer.

AUBURN, CAL.—Edward D. Brown, it is stated, is arranging for the installation of a new piant of 300 HP. for the Auburn Electric Light & Power Co.

REDWOOD CITY, CAL.—Wm. R. Gilbert has been engaged to prepare pians for a piant. D. R. Stafford, Clk.

SACRAMENTO, CAL.—The Yosemite Valley Commission has asked the legislature for an appropriation with which to build a plant, according to reports.

SAN FRANCISCO, CAL.—The board of supervisors has heen asked by the Mutual Electric Light Co. for permission to erect poles and string wires outside of the fire limits. A majority of the board opposes the erection of poles but favors the laying of wires in conduits.

SOUTH PASADENA, CAL.—The Southern Cslifornia Power Co. has been granted a franchise to operate a plant.

TEMPE, ARIZ.—Plans are being prepared by the Con-solidated Canal Co. for its power plant. A line 16 miles long will be erected to Phoenix. Bowen & Ferry, Seed-men, Detroit, Mich., are interested.

LOGAN, UTAH.—Christian Garff writes us that bids are wanted at once for electrical apparatus to transmit 150 HP. 1½ mlles. The water power plant was first operated last November.

operated last November.

HULL, QUE.—Bids for plant advertised in Engineering News Jan. 26 and Feb. 2, were received Feb. 5, but the opening of same was deferred by council to Feb. 18. No bids received after the advertised date will be considered, however. R. W. Farley, Cy. Engr.

HALIFAX, N. S.—Bids are asked until March 8 for furnishing the materials and for constructing a plant, as stated in our advertising columns. Alderman Mosher, Chn. Com.; F. W. Doane, Cy. Engr.

ORILLIA, ONT.—This place on Feb. 6 decided by a vote of 399 for to 61 against to issue \$75,000 in bonds for a transmission power plant, the contract for which was let some time ago to the Central Construction Co. of Butfalo, N. Y., at \$67,000. A plant of \$00 HP, will be built at Ragged Rapids on the Severn River, about 18 miles from here.

Ragged Rapids on the Severn River, about 18 miles from here.

PICTOU, ONT.—The corporation, it is stated, proposes to improve the plant at a cost of \$10,000.

CASCADE CITY, B. C.—Press reports state that Wm. Anderson, Res. Engr. in charge of the improvement of the Cascade water power for the Dominion Mining, Development & Agency Co., has let a contract for the removal of rock at the dam site to S. F. Quiniivan, of this city, at \$10,000. As soon as this contract is completed, another will be let for the construction of the 12-12 nt flume to cost ahout \$45,000, which will be 400 ft. long and driven through solid rock, to reach the site of the power house below the fails.

ROSSLAND, B. C.—The Rossiand Air Supply Co. proposes to erect hydraulic air compressors at the junction of Beaver Creek and the Columbia River st Trail, or to erect an electric piant and operate the same by water power for the purpose of supplying compressed air or electricity and conveying it through conduit pipes to the Trail Creek mines. Capital stock, \$200,000. Work must be commenced in six months.

MELBOURNE, AUSTRALIA.—The New York "Journal Melbourne," and the conduit of the six of the conduits of the commenced of the conduit of the conduits of the commenced of the conduits of the condu

Trail Creek mines. Capital stock, \$200,000. Work must be commenced in six months.

MELBOURNE, AUSTRALIA.—The New York "Journal of Commerce" states as follows: J. G. White & Co., Contracting Engrs., 29 Broadway, New York, who recently received a contract for the installation of an electric railway at Perth, Australia, have just closed another contract to install a 1,200-HP. mining plant for the Deep Leads Transmission Co., near Melbourue. In the equipment there will be two 400-K-W. rotary field generators and three 250-HP. alternating current motors, each connected with a pump. The pumps are to be made in either England or Australia and the electrical machinery in the States. The generators are to be driven by two 600-HP. cross-compound Buckeye engines. As many Buckeyes are in use in the region where the mines are situated preference has been given to them, as the machine shop there can repair them quickly. The Wheeler Condenser & Engineering Co., 120 Liberty St., New York, is to furnish the condensers and the Geo. F. Blake Mg. Co., New York, the air and circulating pumps. Some important railway and electrical works are projected in Australia in which American manufacturers are interested. As will be receiled, representatives from various parts of Australia were in New York in the antomn investigating American steam and electric railways in such aparts of Australia were in New York in the antomn investigating American steam and electric railways in such parts of Australia were in New York in the antomn investigating American steam and electric railways in such parts of Australia were in New York in the antomn investigating American steam and electric railways in such parts of Australia were in New York in the antomn investigating American steam and electric railways in such parts of Australia were in New York in the antomn investigating American steam and electric railways in such parts of Australia were in New York in the antomn investigating American steam and electric railways in such parts of Australia were

# INDUSTRIAL NOTES.

THE MARION STEAM SHOVEL CO., Marion, O., is but a all departments, running its shops daily from 6.30 i. to 8 p. m.

THE PITTSBURG METER CO., Pittsburg. Pa., has the contract. according to report, to furnish 1,293 water meters to the city of Columbia, S. C.

plant of the old company. The directors of the new company are J. W. White, H. C. Paul, G. W. Pixley, Chas. McCuiloch, W. E. Mossman, S. M. Foster, Benj. Rothschild, J. J. Wood, Louis Fox, A. E. Hoffman and Max Wishor.

THE AMERICAN STEEL BARGE CO., West Superior, Wis., has a contract from the Bessemer Steamship Co. to build two barges of \$,000 tons capacity each, at a cost of about \$329,000 for use in the take trade. They will measure 460 ft. In length, with 50 ft. heam and 29½ ft.

depth.

WADDELL & HEDRICK, Kansaa City, Mo., consulting engineers, have been retained by the Tennessee Central Ry. Co. to prepare plans and specifications for, and to superintend the manufacture of some new bridges for its line. The forming of the above firm was noted in our isaue of Jan. 26.

line. The forming of the above firm was noted in our issue of Jan. 26.

PICKANDS, MATHER & CO., Cleveland, O., are reported to have purchased the Ella blast furnace at West Middlesex, Pa., from Boyce, Wheeler & Co., for \$35,000, and will make extensive improvements, including the building of a casting house, elevated tracks, stock bins and a new stock house.

THE AMERICAN CAR & FOUNDRY CO, is reported to have been incorporated with \$60,000,000 canital combining the following car building companies: The Michigan-Peninsular Car Co., Detroit, Mich.; Barney & Smith Co., Davton, O.; Ohio Falis Car Mig. Co., Jeffersonville, Ind., and Haskeil & Barker, Michigan City, Mich.

THE CAHALL SALES DEPARTMENT, Pittsburg, Pa., owing to the rapid increase in price of raw materials for boiler construction, has advanced the prices of its boilers 20%, to take effect March I. The company states that it delayed making this advance as long as possible, in hopes that it could go through the season without doing so.

MR. JOS. G. FALCON. Evanston, Ill., has returned from his trip to Alaska, and its sgain furnishing the Faico flexible pipe joint for water-works intakes and other pur poses. For several years he has made a apecialty of water-works intakes, and has recently completed repair on the intake pipe at Paducah, Ky., made necessary by the shifting of sand bars.

shifting of aand bars.

THE FLISH TANK CO., Aurora, lii., reports a good business at present, having, smong other orders on hand, one for Peerless stop-cock boxes for the Minneapolis Gas Engine Works, three car loads now being furnished. The company is also furnishing a large number of these boxes to the city of Chicago, and to adjacent towns, among them being Aurora and Eigin, II.

THE CALIFORNIA AUTO-TRUCK CO., is reported to

being Aurora and Eigin, 11.

THE CALIFORNIA AllTO-TRUCK CO.. is reported to have been organized with \$5,000,000 capital, and wil! be incorporated in New Jersey, to provide an omnibus system for Los Angeles, Cal., and afterwards a truck system for San Francisco, Cal. The company is promoted by the recently incorporated New York Auto-Truck Co., of which mention has been made in several last issues of our paper.

J. G. WHITE & CO., 29 Broadway, New York, 'has a contract, according to report, to install a 1,200-HP. mining plant for the Deep Lead Transmission Co. near Meibourne, Austraila. It will consist of two 400-K-W, rotary field dynames and three 250-HP, alternating current motors. The former will be driven by two 600-HP. cross-compound Buckeye engines and the contract will also include condensers and air and circulating pumps.

THE MERCHANTS' WIRE & NAIL CO. has been incorporated in New Jersey with \$590,000 common and \$500,000 preferred stock to manufacture wire and tails, and will oppose the American Steel & Wire Co. and other similar combinations. The incorporators are Clement N. Biddie, Robt. Biddie and Wm. B. Knight, all of Ph'ladelphia, in which city the main offices will be located. Mr. C. N. Biddie in President of the company.

THE MICHIGAN BRASS & IRON WORKS, Detroit, Mich., through J. W. Strackhein, General Sales Agent, has recently received an order for 600 hydrants and for valves ranging from 4 to 30 ins. for the new water works at Mobile, Ala. Mr. Strackbein advises us that work has started on the system and that the contract was awarded to M. T. Lewman & Co. Louisville, Ky. Two 8,000,000-galion Worthington pumps have also been ordered..

THE CORLISS STEAM ENGINE WORKS, Providence,

been ordered..

THE CORLISS STEAM ENGINE WORKS, Providence, It., are reported to have heen purchased by the Leiter-Hoadley-Knight syndicate which is back of the American Air Power Co., and the New York Auto-Truck Co., of which recent notices have appeared in this paper. It is said that the syndicate is contemplating forming a combination of atoam engine builders, which will have a capitalization of from \$20,000,000 to \$25,000,000. It is also said that \$1,000,000 was paid for the Providence plant. Col. D. M. Thompson, Providence, is the new President of the company.

said that \$1,600,000 was paid for the Providence plant. Coi. D. M. Thompson, Providence, is the new President of the company.

THE SCHENECTADY LOCOMOTIVE WORKS, Schenectady, N. Y., are huilding ten 160,000-lh. consolidated freight locomotives with wide fire hoxes designed for burning cuim. The eviluders are 21.265 lns. and the drivers carry 120,000 lbs. weight. The works are also building five 180,000-lh. locomotives of the same type with heavier cylinders, 22.228 lns., the drivers carrying 160,000 lbs. They are all to be used as pushers on heavy grades of the Delaware & Hudson R R. The company is reported to have shipped six 78,500-ib. locomotives to the Klushiu Ry. of Japan.

J. S. MUNDY, 22 to 24 Prospect St., Newark, N. J., has recently shipped to Cuba a complete holier plant; to Gihson, La., a 22-HP. double extension drums; to Pittshurg, Pa., a double cylinder, double drum winch, with 12-HP. engine and bolier complete, and to the Consolidated Gas Light Co. New York, a double cylinder, double drum winch engine for the removal of the wreckage caused by the recent explosion of the immense gas tank at 20th St. and Ave. A. A plant similar to the latter has also been shipped to a coal mine in central Pennsylvania.

THE LIMA LOCOMOTIVE & MACHINE CO., Lima, O., writes us that it has under construction Shay geared lowrites us that it has under construction Shay geared lo-comotives as follows: One 65-ton engine for the Alma-gorda Lumber Co.. El Paso, Tex., capable of hauling 200 tons up a 5% grade, on a line having 65° curves; a 50-ton engine for the J. J. Newman Lumber Co., Hathesburg. Tex.; also one of 28 tons; two of 17 tons, and two of 13 tons. The company has recently shipped to the St. Paul & Tacoma Lumber Co., Tacoma, Wash., a 50-ton Shay engine, designed for a road having curves of 70° and grades of 4% and 6%; it will baul 106 tons on the 6% grades. The company is also building an ordinary direct-connected locomotive.

connected locomotive.

THE SPRINGFIELD GAS ENGINE CO., Springfield, O., is busy at present, notwithstanding that it has more than tripled its facilities by moving into larger buildings, as noted in a former issue. The company states that good resuits have been secured from the engine furnished to the water-works at Gibsonburg, O., which has now been in operation for over a year. Among other contracts on band is one from the Lestershire (N. Y.), water-works, for two 40-HP, and one 10-HP, engine, direct connected to Deming triplex pumps; the engines to furnish a daily capacity of 1,000,000 gallons. The company is also building two 15-HP, engines, direct connected to Stilwell-Bierce & Smith-Valis triplex pumps to be used at Columbus, O., in connection with a hydraulic elevator system.

THE GENERAL ELECTRIC CO., Schenectady, N. Y.,

nection with a hydraulic elevator system.

THE GENERAL ELECTRIC CO., Schenectady, N. Y., has the contract to complete the equipment of the power house of the St. Anthony Fslis Power Co. at the lower dsm of the Falls of St. Anthony, at Minneapolis, Minn., for which it manufactured and installed the plant now in operation. The hydraulic work and the power house were finished iast spring, and five three-pbase alternators of 700 K-W. each, and two direct-current dynamos of the same capacity, with the necessary rotary converters and static transformers, were installed. The full equipment of this plant as originally planned contemplated the use

of eight alternators and two direct-current dynamos, with a total capacity of 10,000 HP. The present piant bas been in full operation since May, 1898, the current being used to furnish power to the Twin Cities Rapid Transit Co., which operates the electric railways of Minneapolis and St. Paul. The additional equipment will consist of three 700-K-W, three-phase revolving armature alternators, with rotary converter, step-up and step-down air blast transformers, and switchboards for the dynamos and converter. The installation of this machinery will increase the capacity to 10,000 HP.

NEW COMPANIES.—Eastern Carbon Works, Rahway, I. J.; \$200,000; to manufacture carbon and electrical sup-lies; E. A. Day, Morristown, N. J.; W. Mills, W. D.

N. J.; \$200,000; to manufacture carbon and electrical supplies; E. A. Day, Morristown, N. J.; W. Mills, W. D. Kellogg.
