*Wholesale Prices on Pages 20 and 21*

JANUARY 1927

## LEGRON FLORAL CO.

R 4, GLENDALE AVENUE

TOLEDO, OHIO

TOLEDO, OHIO, January 1st, 1927.

Once again we extend to you a Happy New Year's Greeting with our our best wishes for a prosperous and happy 1927 for all.

This new catalogue lists 469 varieties with an average reduction of one-third in prices. All who have sent in orders from old catalogue during November and December will get additional bulbs to make good differences in prices.

Please note our **SPECIAL OFFERS** on  
**LUTHER BURBANK'S LATEST ORIGINALS.**

**AUSTIN'S 1927 TRIO.**

**GOLDEN RUFFLES.**

**LE GRON'S MIXTURE and  
TEST PLOT COLLECTIONS.**

We sell at wholesale to any one whether you are a commercial grower or not providing you take in quantities as listed in wholesale price list.

In this retail list we give after the name of each bulb the name of the originator. The descriptions given are mostly taken from the originator's catalogue.

**SIZE AND QUANTITIES.** All bulbs sent out will be one and one-fourth inches up in diameter. Six will be sold at dozen rate. Bulblets are only sold in packages as listed as these are put up at time of cleaning.

**PREPAID POSTAGE.** We pay postage anywhere in United States, Canada, or Australia.

**R. F. D.** customers should not ask for shipment during zero weather. Post Office will not insure against freezing. We take all risk if you let us start them out from here when we have weather around 20 degrees above zero, which we generally have at some time during every month of the winter season.

**TERMS.** We can not afford to fill orders of less than \$1.00. Please send cash with order from \$1.00 to \$5.00. On \$5.00 and over we will accept 25 per cent deposit and balance when you are ready for the bulbs.

**POSTAGE STAMPS.** We can only use 1c and 2c stamps and then only for the fractional part of a dollar. It is just as safe to put a dollar bill in the mail as postage stamps. Either money or stamps are sent at customer's risk. Drafts, checks, and money orders are at our risk and are perfectly safe.

**SECOND CHOICE.** As the season advances certain varieties are sold out. To the amateur we would suggest that they make a list of second choice or allow us to do so as we can always please you. To the old grower we dare not substitute as we might give him something he already has.

**AMERICAN GLADIOLUS SOCIETY.** This society now has a membership of around 4,000 from all over the world. The society gets out a monthly Bulletin devoted exclusively to Gladioli growing. You have the privilege of asking any question you wish through its columns and it will be answered. The Bulletin one year and membership costs \$2.00. Send money to John C. Davis, Secretary, 77 South Avenue, Rochester, N. Y.

**CULTURE.** The culture of gladioli is quite simple. Ordinary fertile soil is all that is required. Sandy soil is best and clay is poorest. Cultivation and water are the main helps in growing good glads.

**TIME OF PLANTING.** Plant in spring as soon as frost is out of ground. The large bulbs will come in bloom first and the smaller sizes later, so the bloom of a single variety extends over quite a period. Then we have the early and late varieties which also prolong the blooming period. We also plant some bulbs about every two weeks up to July first and in this way have blooms to sell from July first until killed by frost.

**SIZES.** No. 1 is 1½ inch up; No. 2, 1¼ inch to 1½ inch; No. 3, 1 inch to 1¼ inch; No. 4, ¾ inch to 1 inch; No. 5, ½ inch to ¾ inch; No. 6, ½ inch and less. Bulblets are the small bulbs that form around the base of the larger bulbs. These always come true to name with the parent bulb.

**PLANTING.** We dig trenches six inches wide for all sizes. Nos. 1, 2 and 3 are planted four to six inches deep, putting two rows in a trench in zig-zag shape. These are placed by hand with right side of bulb placed up. Nos. 4, 5 and 6 we sow in trenches about 2 to 3 inches deep regardless of position of bulbs. Bulblets are planted one inch deep and bottom of trench is covered with bulblets so that they entirely cover same.

The deep planting of large bulbs keeps wind from blowing them over after spikes have formed and also helps to hold moisture in dry seasons.

For field culture with the horse we have our rows 30 inches apart. This allows cultivator to cultivate the entire space by going once through. The rows must be straight. We always use lines in digging trenches.

**CUTTING FLOWERS.** Always cut flowers in morning when spikes are full of moisture. Spikes should be cut as soon as one or two flowers are open. Fill your vase with fresh water each day and cut one inch off the stems and you will have a nice bouquet for a week. The bottom flowers should be pulled off as they wilt. Always leave at least four leaves on plant in cutting. The main growth of the bulb and production of bulblets is after the spike is cut. Cultivation should not be neglected at this time.

**DIGGING.** We dig bulblets about September 1. They can be dug when still quite green. We cut the tops off close to the ground with a sickle and then use a long handle round pointed shovel and shovel dirt and all into a sieve. The dirt is then rubbed or shook through the sieve. The large bulbs are first loosened with a potato fork and then pulled up by hand and the tops broken off next to the bulb and the bulb and roots thrown into a tray six inches deep. Trays are then taken to cellar but windows are left open to give plenty of air.

**STORAGE.** After about two to three weeks from digging the roots and bulblets can be taken from the bulbs easily. After the bulbs are cleaned they can be put back in the trays but not over **FOUR INCHES** deep. Never store bulbs in same basement room with a furnace fire. If you have only up to a dozen bulbs of a kind you can use a 5-pound sugar sack nicely. Leave the top open. Temperature for winter should be between 35 and 40 degrees.

**VISITORS.** To reach our place take South Street car line and get off at State Hospital gate. Our greenhouse is one quarter mile south and about two city blocks west. Not open Sundays.

Each, \$1.00. One inch, 75c.

# GOLDEN RUFFLES

Originated by Mrs. A. H. Austin

We claim it is the largest, pure yellow, heavily ruffled Gladiolus in the world.

In January 1926, Mrs. Austin had just four bulbs of this variety, one inch up, with a few planting stock and bulblets. We were three months negotiating this purchase, and will say now we think Mrs. Austin made a mistake when she let this variety go. Under date of December 14th, '25, she writes as follows:

"It is just as good, if not BETTER than Gold Eagle, but not a bit like it. It is larger, of different form, more ruffled and blooms later. It is a splendid yellow and admired by many."

Our introductory price will be \$25.00 each and only one bulb to a customer.

Will not be offered for sale until January, 1928.

All correspondence regarding above should be addressed to

LeGron Floral Co.,  
R. 4, Toledo, Ohio.

**GALLANT LEADER** (Austin). A new LEADER among the Glads and one of Mrs. Austin's best productions. "In the field the majestic spikes, with many massive bloom open at one time, presents an almost startling effect of beauty. The opening buds are peach-red blending into geranium red in upper petals, while the lower ones show a blotch of white slightly dotted Begonia Rose deep in throat The spike is slender, straight, measures 64 inches in height, blooms 5 inches in diameter". Above measurements taken from stock grown on clay soil. Very prolific and a good seed bearer. Use this to impart vigor in your seedlings. Each, \$5.00. No bulblets for sale. Only one bulb to a customer.

**TROSSEAU PINK** (Austin). Tall, graceful spike with well placed blooms of pleasing color difficult to describe. Tips touched Strawberry Pink blending to LaFrance Pink, deeper in throat with white blotch on lower petals, tinted maize yellow. A beautiful variety. Each, \$2.00. No bulblets for sale.

**RAVENNA CREAM** (Austin). Tips of bloom are clear maize yellow shading almost to white in upper petals, while lower ones are overlaid buff yellow, beautifully flushed Tyrian pink. A lovely combination of color, and a bloom of good size, and open form. Each, \$1.50. No bulblets for sale.

Dear Friends:

I wish to commend you for the manner in which you are introducing the varieties purchased from us, in that you are pricing them reasonably according to the quality and quantity, thus placing them within the reach of the average grower.

Reasonable prices lowered gradually mean service and profit to your customers and to yourselves. GALLANT LEADER would compare favorably with those in the \$100.00 row but glad you are making it only \$5.00.

Yours very truly,  
MRS. A. H. AUSTIN.

We have purchased the entire stock of the above three varieties from the A. H. Austin Co. Send all orders to

## LUTHER BURBANK'S NEWEST HYBRIDS IN MIXTURE.

Read what he says in his January, 1926, Catalogue. "One hundred thousand absolutely new varieties of about every form and color ever produced from this wonderfully variable plant, including scarlet, crimson, yellow, blue purple, lavender, orange, salmon, and pink, with infinitely varied combinations of rainbow shades. Such a mass of various brilliant colors cannot be produced at many times the cost of these in any other flower. Every gladiolus bulb which I here offer originated on my grounds. For over forty years the Gladioli have been one of my specialties, and the foundation of some of the most popular strains originated with me decades ago. During the past few years wonderful new combinations of colors and shades never before seen in any flower except the tropical orchids have appeared in bewildering variety and abundance so that it is hardly possible to give them names, for the tender transparent orchid shades blend in endless poems of color."

"When you plant Gladiolus get the very newest and best if you desire to see what can be accomplished by forty years' rigid selection. Among these some really wonderful prizes will be drawn."

We have the above MIXTURE absolutely pure. Nothing but Burbank varieties in it. Purchased from him in 1926.

**BURBANK'S MIXTURE.** Size one inch up, \$1.00 per doz. Size ½ inch up, 50c per doz. Bulblets, 50c per 100.

**BURBANK'S NAMED VARIETIES.** Under date of January 1st, 1926, Luther Burbank says: "I have probably grown as large a number of hybrid seedling Gladioli as any one ever has, and most of the best European and American strains now show the results of this very extensive work. This season I offer for the first time a limited number of bulbs and bulblets of **EIGHT NEW VARIETIES** which have proved to be quite unusual. These have the unbounded praise of all who have seen them."

On opposite page we list these eight varieties with the introductory price on each variety. Think what it means when LUTHER BURBANK picks out eight, his choice from over 100,000 varieties. We bought a big lot of these in January, 1926, and will make you an offer we don't think you can resist.

## BURBANK'S NEW INTRODUCTIONS FOR 1926

**DEL ORO** (Burbank). Large, handsome flowers of striking appearance. Main color pure salmon, lower petals feathered primrose-yellow with narrow border of crimson; height three and one-half feet. Multiplier.  
Each, \$1.50. Bulblets, 15c each.

**DORO** (Burbank). Vigorous grower. Three and one-half feet. Wide foliage, medium late. Large flower feathered and shaded cherry red on white ground. Stands hot sun and winds.  
Each, \$2.00. Bulblets, 20c each.

**ELENA** (Burbank). A new seedling of the beautiful and popular florists' flower "Elora" and may well be called Elora Superba. Height four feet, extra early and abundant bloomer. The very large white flowers have open flat wide petals, the lower two faintly shaded with beautiful crimson feathering on pale primrose ground, and are born on tall, clean, straight stalks. Rapid multiplier like Elora.  
Each, \$3.00. Bulblets, 30c each.

**KIVA** (Burbank). Flower very large, rare shade of yellow pink, one lower petal slightly striped and feathered cherry-crimson with one pure gold stripe. Close set flowers on double truss, twenty-one to a truss, eight to ten open at once. Extremely vigorous. Height three and one-half feet.  
Each, \$3.00. Bulblets, 30c each.

**PERLA** (Burbank). Very large wide petals. Open flat flowers of richest cherry crimson with a faint undertone of salmon. Lower petals feathered deep crimson with one pale yellow line. Unusually vigorous and healthy. Flowers five and one-half inches across. Height three feet.  
Each, \$3.00. Bulblets, 30c each.

**SCARLET** (Burbank). Large pure rich glowing salmon-scarlet flowers which last a long time. Vigorous five-foot plant, dark green foliage. Bulbs always clean, bright and ready to grow. Multiplies fast both by division and bulblets. A superior gladioli.  
Each, \$3.00. Bulblets, 30c each.

**SUMMIT** (Burbank). Height four feet. Abundant healthy dark green foliage. Very large flowers twenty-two to a truss. Clear cherry red flaked crimson. Blooms nearly all summer. Beautiful for cut flower effects and especially striking in masses.  
Each, \$3.00. Bulblets, 30c.

**TIGER FACE** (Burbank). Compact growing, dwarf. Height two feet. Flowers large, open like Elora, with faintly flushed rose. Three lower petals feathered deep crimson. Vigorous, easily grown. Abundant seeder and multiplier.  
Each, \$1.00. Bulblets, 10c each.
