GRIFFING NURSERIES

BEAUMONT, TEXAS

THE NAME GRIFFING needs no introduction, for they have been known throughout the South for 45 years, having furnished their many friends Fruit and Ornamental Nursery Stock of the best Quality for Beautification of New Homes and remodeling others, until it has become a necessity.

Griffing Nurseries have supplied the highest grade Plants for this purpose and disseminated Valuable Information, besides introduced to the Planting Public many new varieties of Stock especially adapted to the Gulf Coast Territory.

VISITORS ALWAYS WELCOME.

DESCRIPTIVE CATALOG. We are not giving Descriptions in this List, only our Lowest Reduced Prices.

If you have preserved our former Catalogs, you may refer to them for Descriptions. If you do not find a copy, write us, and we shall be glad to supply you with another Descriptive and Illustrated Book.

LOW GROWING COST. We can produce stock quicker, better and cheaper, as we specialize in quantity production., giving you the difference in lower prices and better quality.

PRICE LIST

PRICES subject to change without notice. This list cancels all previous quotations. This List printed for the interest of Nurserymen, Florists, Landscape Men, and the Tree Planting Public.

TERMS: Accounts payable at Beaumont, Texas on the 10th of month following purchase. These terms allowed those of known responsibility only; otherwise, Cash or Security before shipment is required. Interest charged on past due accounts.

PACKING is charged for at cost in all instances, except Bulk carload. All shipments travel at the expense and risk of the Purchaser.

EXPRESS SERVICE is usually the quickest and safest transportation. We have 24 hours Service!

TRUCK SERVICE can often be given conveniently and satisfactory.

FREIGHT SERVICE: Intra-State Carload Rates figured at Class B. Carload Shipments have three unloading privileges in transit, at Carload rate plus \$6.30 per stop as Switching charge. B&B rate in Texas or Column 25; Less Carload 4th Class for 2,000 lbs. or more; Completely Boxed at 3rd Class; Crated at 2nd Class.

BOAT SERVICE is available from Port Beaumont to many ports.

1886 — 1933

PLANS and LANDSCAPING. You must have a Plan for the Proper Landscape Arrangement of the Grounds. We have connections with the best Landscape Architects in all sections, who can render the most efficient Service.

INSURANCE ON TREES. Everyone believes in Insurance. Why not insure your Trees to live the first year? We sell this kind of Insurance at 20% Advance where we contract to plant, or 25% if you plant with our Instructions.

LET'S TALK TREES

NURSERYMEN'S STANDARDIZED GRADING SYSTEM

There are Standards to go by in selling Trees and Shrubs which have been approved by the American Horticultural Associations.

STANDARDIZED PLANT NAMES

We are endeavoring to use Standardized Names, the Common Names (for the benefit of the general public) shown in CAPITALS; and the Scientific Names (for the correctness of Landscape Architects and Nurserymen) shown in Small Letters. Various synonyms used but not approved, shown in parenthesis (---)

BALLED AND BURLAPPED B&B) means a Tree dug with a ball containing all the roots that grew in the earth's area, carefully shaped out so as not to crack or crumble the soil or disturb the roots, out of tight rich soil--not sandy. Not artificial or "hand made" balls. NOT BALLED (NB) means that trees are dug with NAKED ROOTS and PUDDLED IN THICK MUD.

STANDARDIZED GRADING BY X'S

The QUALITY or GRADE as adopted by the American Association of Nurserymen in Chicago in 1923, under the head of "Horticultural Standards" Item 3, Paragraph 10, reads as follows: "Unless otherwise stated, all stock offered, advertised, or Cataloged is understood to be of first class, salable and plantable quality of each kind and grade. XXX indicates heavy perfect specimens; XX indicates very heavy; X indicates ordinary grade; L.G. (Lighter Grade) suitable only for Lining-out or Growing on.

STANDARDIZED EVERGREEN GROUPS are required to grade Evergreens by Groups, either Conifers or Broad-leaf. This grading system was adopted by the American Association of Nurserymen in 1931.

GRADE GROUP NUMBERS used in this List are indicated by Numbers shown under each variety of our bushy types of Plants to show which group the particular variety or class of Plant should be graded by. The ratios mentioned are minimums, and a plant of XX Quality should not fall below the proportions given.

Grade Group #1- (Spreading Type) Equals to the total measurements of the width taken each way, and divided by 2 to figure average. (Or 3' wide by 1' wide equals 2' wide)

Grade Group #2- (Semi-spreading type) Equals to the width being equal to the height. (Or 2' high equals 2' wide)

Grade Group #3- (Globe or Dwarf Type) Equals to the width being equal to one-half the height. (Or 2' high equals 1' wide)

Grade Group #4- (Cone Type) Equals to the width being three-fifths of height. (Or 5' high equals 3' wide)

Grade Group #5- (Pyramidal Type) Equals to the height being three times width. (Or 3' high equals 1' wide)

Grade Group #6- (Slender Type) Equals to the height being five times width. (Or 5' high equals 1' wide)

EVERGREEN & DECIDUOUS SHADE TREES

HEIGHT given in feet up to 6 ft. Over 6 ft. given in double feet.

CALIPER taken 6" above collar.

STREET TREES: Free from branches up to 7', or 1/2 the height, with a single leader; well branched, and with a reasonably straight stem. All Trees Nursery Grown.

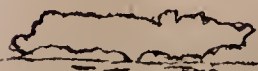

CLUMPS indicate 6 or more canes.

EVERGREEN AND DECIDUOUS SHRUBS

HEIGHT: Dwarf Types in inches usually in 3" series up to 24". Strong Growing Shrubs in 6" series up to 24"; in feet up to 6'; then, in double feet. If a shrub, well shaped and bushy, with heavy well-spaced side branches to give the weight, it equals one grown with numerous canes. All Shrubs have a well branched root system and Nursery Grown.

WHERE MEASURE STARTS AND STOPS

Measurements of height, should be where the branches start, and not at the ground where the plants are "leggy". Top measurements should stop where the main part of the top ends, and not at the tip of a thin shoot.

Group 1.

Group 2.

Group 3.

Group 4.

Group 5.

Group 6.

C O N I F E R O U S E V E R G R E E N S

Consist of Arborvitae, Cypresses, Junipers, Pines, etc. which are Cone-Bearing and Needle-leaf Foliage.

All Coniferous Evergreens are grown from Cuttings or Grafts unless otherwise stated. (Which will make them true to type).

A R B O R V I T A E (Biota)
Thuja Orientalis

There are two types of Arborvitae - Thuja. The Oriental or Chinese grows successfully in the South. The Occidentalis stands the climate in the North, and does not thrive in the South.

Our Forty Years' Experience in Pecan Growing has been condensed into
a Small Bulletin which may be had for the asking. Write for it!

CITRUS FRUITS

By Budding Trees on the Citrus Trifoliata Roots they become dormant in the Winter. For this reason, and also that the Trifoliata grows better in stiff, deep soil, the Citrus Belt is extended at least one hundred miles farther North from the Gulf of Mexico.

KUMQUAT (Fortunella japonica)

MEIWA- Round; sweetest. Thornless.	
B&B 2½- 3' ht.	\$2.30

Not Balled (NB) at ½ Price.

ROSES

For Southern Planters. Throughout the South GRIFFING'S ROSES have been the choice of thousands for many years. Our long experience has shown us that every variety has some differences, and that from twenty to thirty varieties usually include those acceptable as Standards, while many others are being tried out as to adaptability. As soon as we consider them in our Standard Group, we will include them in our List. DeBudded on Multiflora Stocks; thus eliminating troublesome sprouts from the understocks.
