foreign agriculture circular

coffee

FCOF 3-84
September 1984

COFFEE SUPPLY AND DISTRIBUTION IN PRODUCING COUNTRIES, 1960/61-1984/85

This circular updates Foreign Agricultural Circular FCOF 3-83 published in September 1983.

Data on area, tree population, production by type, trade, consumption, and stocks cover the 25-year period 1960/61-1984/85 on a marketing year basis. Data for 1983/84 are preliminary and subject to revision, data for 1984/85 are forecasts.

On June 6, 1984, the Foreign Production Estimates Division, FAS, released its first estimate on world coffee production for 1984. Since then the output estimates for several major producing countries have been updated. These updates are included in this circular. The estimates for exports and carryover stocks which appeared in FCOF 2-84 in July 1984, have also been revised for some countries, mainly because rising coffee prices have resulted in increased ICO quotas being authorized for coffee year (October/September) 1983/84 for the larger producing members.

Because starting dates for marketing years vary, annual regional and world totals are sums of the data for each producer's marketing year rather than world levels at a particular time. Totals for stocks, for example, are the sum of stocks in individual producing countries at the beginning or end of their specified marketing years (normally when stocks are at or near their lowest annual level).

Some coffee moves unofficially between neighboring producing countries. Because it is virtually impossible to determine the magnitude of these movements, such coffee is listed as production for the country from which it is officially exported.

Information in this circular was prepared by C. Milton Anderson, Horticultural and Tropical Products Division, FAS/USDA, Washington, D.C. 20250. Telephone (202) 447-2252.

In a few countries, domestic use data include coffee used for nonbeverage purposes or stocks that have deteriorated or been destroyed. Because data are not complete on area, tree numbers, and average yields, world and regional totals are not shown.

The data series were prepared or estimated on the basis of official statistics of foreign governments, reports of U.S. Agricultural Counselors and Attaches, reports of Foreign Service Officers, results of office research, and related information. These data series will be updated on a regular basis and published in FAS circulars. Area statistics are in hectares (2.471 acres), and supply and distribution data are in 1,000 bags of coffee, green bean equivalent (GBE) of 60 kilograms (132.276 lb.) each.

FOREIGN AGRICULTURE CIRCULARS

USDA's Foreign Agricultural Service issues regular reports on the supply and demand situation for commodities around the world.

HOW TO ORDER: Check the title of each circular you wish to order. Remit a check for the total amount payable to the Foreign Agricultural Service. Only checks on U.S. banks, cashier's checks, or international money orders will be accepted in payment. **NO REFUNDS CAN BE MADE.** Mail this form to:

Foreign Agricultural Service
Information Division
Room 4644-South Building
U.S. Department of Agriculture
Washington, D.C. 20250
