INTRODUCTION

The first Annual Report of Chinese National Railways was published in 1916 and gave a summary of the working results of the previous year. Since then reports have been compiled from time to time, the latest being that for the year 1927. The reports for 1928 and 1929 have not been compiled because some of the railways have been unable to submit their reports owing to the frequent interruption of their work during the past few years. Many of the earlier reports are also out of stock and it was felt that a compilation of the more important statistics covering the period 1915-1929 for as many railways as had reported would serve a very useful purpose.

This compilation is primarily for the use of this Ministry but a few copies are available for distribution to those who are interested in Chinese railways.
