This day is Published No. 4 Vol, III., New Series, Price 8d; by post, 81d,

THE INVESTOR'S MONTHLY MANUAL. The INVESTOR'S MONTHLY MANUAL for April gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to April 23.

Advertisements for the next Number, to be published on May 31, must be sent, to insure insertion, on or before May 29.

THE ALABAMA INDEMNITY AND THE MONEY MARKET.

THE debate on the Budget presents no features for remark. It is understood that the proposals of the Government shall be accepted, and therefore there was no real spirit in the criticism upon them. But one point deserves attention. Some one said that the payment of the Alabama penalty was spread over two years, which Mr Lowe at once, and very properly, denied. The money must be paid before next October, and in what way we find the money for the pay-

assessed taxes, though very little of either, are paid by the non-banking classes in coin or Bank notes, and the amount so paid in the end swells the ultimate reserve of the country the reserve in the Banking Department of the Bank of England. But omitting this very small sum, the effect of the new mode of collecting the revenue is not to affect the reserve at all; it affects the public deposits, the private deposits, and the private securities, but it does not affect the reserve; it neither brings nor takes away bullion or coin, or Bank notes, the only agents which act on the Bank reserve; and the real ease or difficulty of the Money Market, at the time of the payment, will depend on the amount of the reserve of the Bank of England.

If that is enough to bear satisfactorily a payment of 3,200,000l, no one will hear any more of the matter ; if it is not enough, we may all be in great difficulty. But. in matter of fact, we may reasonably expect that all will go on quietly, and without a disturbance from such a cause as this. The Government will of course inform the Bank of England when they are likely to require this large sum in gold, and the Bank of England will keep in readiness an extra amount to meet that extra demand.

THE TAXATION OF LAND AND ITS CLAIMS ON THE EXCHEQUER.

THE motion of Mr W. H. Smith, that it is impossible to decide upon the financial proposals of the Government before we know what are their proposals as to local taxation, raises a great question in its clearest form-Is the land of the country (for it is the country members who will support Mr Smith) unduly and excessively taxed in comparison with other property ? and has it a pressing claim for redress out of the Exchequer before all other claimants for a reduction of

have elapsed since his researches have in no material respect changed the facts into which he inquired. Let us, then, see what is the claim of land on the Exchequer; is it pressing or not pressing ?

At the very threshold of the subject of Mr Goschen's report there was something new. No one, till he published his investigations, had any exact notion of the local expenditure of the country,—though this is plainly the real local burden—of the aggregate of capital thus diverted from productive uses and directed to political uses. This primary fact we now know to be as follows :—

	de	
Expenditure on general objects directed by Parlia- ment for England and Wales New works Interest on debt	22,117,000 4,247,000 2,109,000	
Total	28,473,000	

This was the entire cost of our Local Government and of the advantages which it procures to us, and the charge was thus defrayed :---

Rates	16,223,000
Dues, Tolls, fees, &c	
Grants from Imperial Government	
Receipts from property, whether by rent or sale	
Loans, after deducting repayments of debt	3,689,000
Miscellaneous receipts	

-the slight difference between that and the expenditure being defrayed out of balances in the hands of the various expenders. These figures look simple as they stand, and ought to have been easily obtainable, but an infinite deal of labour was really necessary to compute them. The number of spending bodies in the country is immense; they make up their accounts under different heads, on discordant principles, and very often not for the same period of time. In consequence of the difficulty of putting the accounts together, they never were put together before.

Now that we have the real figures, we see that a considerable part of the local revenues is not derived from direct taxation on real property. The 4,300,000/ derived from dues, tolls, and fees, are a kind of indirect taxation on the miscellaneous public; the receipts from property and the miscellaneous receipts do not come out of the pockets of the ratepayer; and as a considerable part of the loans are for purposes which will directly augment local income, they will increase the means of the local taxpayer, and themselves provide a fund out of which they will be repaid. Local taxation is only one of the elements of local income, and one among the modes of providing for local expenditure, and not, as is often believed, the sole and only mode.

Only a little more than 16,000,000l, as we see, of local revenue is raised by direct local taxation, and before going into the details it will in the end save time if we pull ourselves up and ask why there should be any such local taxation. The Imperial Government, as we see, already makes large grants for local purposes ; why should it not grant all that is wanted? why, in his Budget, should not Mr Lowe have to provide for the "Home Department Estimates" as well as for the Naval and Military Estimates? The reply is that, though he has the wealth of the nation at his disposal, he would scarcely be able to provide for them. The case would be this: A large number of scattered administrators all through the country would be pressed on to benefit the district in which they live. At every Board of Guardians, at every Quarter Sessions, there would be a demand for expenditure which would make the applicant happy and grateful, and the demand would be made on the applicant's neighbours, who would like his happiness, and who would enjoy his gratitude. Unless there is a counteracting motive, the administrative body will have an invincible inclination to make things pleasant, and the way to make things pleasant is to spend money. At present there is a most powerful counteracting motive; for they and their district will have to find the money which they grant. But if the local administrators had only to draw a cheque on London, they would soon draw large cheques with great rapidity. The only possible restraint would be to abolish Local Government, and to make some kind of despotic prefet determine in each district what should be done, and what should be spent. But no evil would be so great in Englishmen's eyes as this: they

value the privilege of settling as they please the local affairs which concern themselves so much, and which concern others so little. They would submit to anything rather than have county and parish business settled by a "Jack in office" from London, to whom it would be constantly necessary to bow and cringe. And unpleasant as would be the remedy of administrative despotism, it would likewise be ineffectual too. We should soon hear from country gentlemen that the Home Office expenditure was as great a "muddle" as that of the War Office, and that it augmented as rapidly and as unintelligibly.

And this inevitable local taxation-this taxation which must be local if it is not to be intolerable-is of three kinds, which are most strongly contrasted. There is, first, that which is levied for national purposes—that is, from considerations of national policy; and, second, that which is levied for really local purposes, and for which, sooner or later, if they manage well, local bodies may expect to see their money's worth. Of the first kind is the Poor-rate : obviously the relief of the poor is a duty undertaken by the country for the sake of the poor, and not for the sake of the district in which they live ; in many cases it does not benefit that district perceptibly, in others perhaps it injures it. Of the second kind are the Drainage rates and the rates levied in all large towns for local improvements. These represent outlay which, if it be well chosen and well executed, is sure to augment the value of local property. And there is besides an intermediate class of rates, such as the Police rate, the charges under the Vaccination Act and the Assessment Acts, which are applied to expenditure that benefits the locality and the nation too. These we may call mixed rates, because they are levied to defray expenditure which has been decided on for reasons both local and Imperial. If we adopt this division of rates, throwing into the mixed class everything dubious, the result is this :---

PURELY NATIONAL RATE- Poor Law Relief		£ 7,500,000
MIXED RATES- Expenses incurred under Vaccination Acts - Registration Acts - Assessment Acts	£ 300,000 3,000,000	
LOCAL RATES— Highway rate Lighting and Watching rate Improvement Commissioners General District rates General and Lighting rates in the Metropolis Sewers, including Enbankment rates Other rates, such as Burial Boards and Fire Brigades	1,500,000 100,000 1,700,000 1,700,000 1,000,000 700,000 400,000	3,300,000 5,800,000
		16,600,000

* Much of the County rate if analysed is local, but for simplicity we class it as mixed.

-showing that the national burden of the Poor rate is almost one-half of the whole, the mixed rates about one-fifth, and the purely local rates the remainder.

And the course historically of these burdens has been that the purely local rates have greatly increased; in fact, they belong almost exclusively to the "age of great cities," and to the modern disposition to miscellaneous improvement. Nor is there much record of the comparatively small sum which was thus collected in time past. It was collected under local Acts, of which the passing was little regarded except by the affected locality, and no one can now make any statistical history of them. We know generally that they are mainly the creation of recent times, and we cannot really be said to know any more : any minute figures would be entirely conjectural, might be erroneous, and would, in a main aspect, be delusive, because they would convey an impression that accurate knowledge existed, when in fact it is wholly absent.

We need not indeed much regret this ignorance. As to purely local matters, we may fairly hope that localities gain by what they spend on themselves and assess from themselves; at any rate it is scarcely for any one else to have to meddle much with it. But as to the main matter, the two really interesting classes of rates—the national and the mixed—we have ample and most satisfactory information. It is as certain as figures can make it that the great national burden of the Poor rate is diminishing rapidly—diminishing, that is, proportionately and in comparison with our means of meeting

THE ECONOMIST.

and paying it. The rate in the £ for Poer Law relief only was in the following years respectively :--

e last weich Me Smith is come to more.		· d
1803	3	44
1813-15	2	41
1827	2	51
1841	1	61
1856	1	8
1866	1	43
1868	1	6

-being a diminution of more than 50 per cent. since the beginning of the century. And as this is by far the greatest single burden—and in one respect by far the most remarkable and peculiar burden, because it is that which the Imperial Parliament imposes on the locality for exclusively national reasons—its rapid and continuous decline is a singular benefit and a sure ground of abundant congratulation to the localities.

As to the next group, which we have called the "mixed rates," there is not the same precise information. The way in which our local taxation has been imposed and collected is anything but favourable to scientific classification. But for practical purposes the returns give us ample information. There is a great group of rates commonly, though not always, collected with the Poor rate, and comprising the County rate, the Borough, and Highway rate, of which we can have the precise history. And it is this—

Rate per Pound of Total Poor RATES, including COUNTY, BOROUGH, and POLACE RATES, levied both separately and with the Poor RATE and also CHURCH and HIGHWAY RATES

	Rateable		Amount	Rate	e per
	Value.		Levied.	Po	und.
	2		£	8	d
1803			5,348,000	 4	51
Average of 1813-14-15			8,164,497	 3	14
1817		******	10,107,000		104
1827			9,489,687	 3	8
1841	62,540,000		8,026,828	 2	7
1852	67,700,000			 2	7
1868	100,668,698		12,689,000		61

—and this might be roughly described as the diminution in national and mixed rates, though in reality it is much more, because Highways—a very growing item—are local objects if anything is. And some of the augmenting parts of the County rate are local too. But even weighting the "national "and mixed" rates with these inappropriate and disadvantageous accompaniments, their diminution has been steady. And we are able to say, on the best and most perfect evidence, in respect of all expenditure save that which in the most narrow sense is local, and which is expended by local authorities for exclusively local purposes, that the diminution in the pressure has been remarkably great, steady, and continuous.

It is true that if we take all the rates, new and old, into the reckoning, the contrast is not so favourable. The immense new expenditure for the improvement of the Metropolis and of the great towns greatly augments the present burden ; and, as we have said, we have no reliable account of the old miscellaneous improvements, small as they were. But the average total for all rates over the entire country is only 3s 4d, and we have just seen that at the beginning of the century the average of the recorded rates only was 4s 5¹/₄d, and at that time these new improvement rates hardly existed. Partly the necessity did not exist; the great towns were then few; the now almost urban counties of Middlesex and Lancaster and the West Riding of Yorkshire were then in comparison agricultural; the immense expense caused by the close collo-cation of great numbers of human beings had scarcely then begun. And even when that collocation existed people were far less than now disposed to spend money on it. At the beginning of this century philanthropy was still weak; national sympathy was not much directed to urban suffering, and in consequence evils and vices were then endured easily and silently which would now excite the loudest and gravest indignation. Nothing can be better than to find that though we have great local evils to cure which our grandfathers had not-though we are infinitely more sensitive than we were to those sort of evils-though we spend immense sums in curing them which they certainly did not spend, and which perhaps they would not have thought it necessary to spend, yet, on the whole, aggregate local taxation is far less oppressive now than it was sixty or seventy years ago in their time.

But it will be said, granting that this is satisfactory, granting that the burdens on landed property have rateably diminished, yet still a great burden exists, and monied pro-

ly perty does not bear that burden. Should this contrast exist? and how can such a difference be fair?

The first answer is, that such a difference is involved in the idea of local taxation. Of course, for the local improvement rates it is quite right that local property should pay, and money has no locality; sovereigns, bank-notes, and interestbearing securities-the most important part of monied property-are in one place to-day and miles off the next. It would be unjust to tax them to improve the locality at which they happened to be found on the collecting day or the assessment day. And as to stock in trade, which used to be assessed to the relief of the poor, nothing could be more monstrous than to assess it equally with property. The attempt had to be given up, not because the assessors were particularly favourable to commercial wealth-on the contrary, rural assessors have always, like every one in English counties, had a partiality the other way, and set an undue value on agricultural property-but because the thing was unjust. Take the commonest case-that of a small shopkeeper in a country town; if you rate him on the goods in his shop, what do you do? You tax him on an amount mapy times greater than his real property. He owee, he has acceptances running to pay, for probably five-sixths of those goods. He has bought them on credit of the wholesale dealer, but he has not paid cash for them, and could not pay it ; he carries on his trade by what Americans would call a chronic indebtedness. If you neglect a small trader's debts and tax him on his stock, you will, in these days of great credit, impose the most oppressive tax ever known, and you will risk the ruin of a large percentage of the class. If, on the other hand, you deduct a man's debts, and tax only the sum to his credit in his balance-sheet, you would have what is equivalent to a local income tax; and no country has ever yet borne such an institution. In America it has been tried, but it has been largely evaded, and rendered nugatory by false swearing. No body of small truders will ever let their competitor over the way know how much they are making; and yet secresy is impossible if local rates are assessed on local profits. In a small town the amount of no man's income could be concealed. And to be fair would involve an almost ludicrous result-ludicrous at least to those who are conversant with our rural districts. The farmers would have to be assessed on their farming profits, and it would be known by what each man paid to the poor rate exactly what each man made. The English farmers have in our day had many things forced on them which they did not like, and some by their professed friends, but they never yet had anything so disagreeable as the logical consequence of what some of their advocates now ask-the notoriety of their yearly profits at the Boards of Guardians and the Church vestry.

But if even these really insuperable objections to a local income tax could be overcome, another even more insuperable would still remain. A local income tax cannot be made fair. In what parish are Baron Bothschild and Lord Overstone to be charged on their great monied wealth? They have houses and estates, suppose, each in ten parishes. In which of those ten are they to pay? Is it to be where the rates are highest or where their estates are largest? Their And the effect would be money is in none of them. that capitalists would never hold more land than they required, since, if they did, they would be exposed to a rate not only on that land but on all the rest of their wealth. If an astute enemy of the landed interest wanted to lower the value of land, he could propose nothing so effectual as to enact that a millionaire who bought 5,000l of land should pay rates not only on that 5,000l but on 995,000l he keeps in money. It would be a differential duty on rich buyers, and a bounty on a pauper propris-

But an objector may rejoin, "These arguments of yours only "prove that a local tax on personal property is impracticable. "Not that it would not be just. Granted that upon "grounds of necessity landed property must pay the local "charges, it ought to be exempted from some other charges. "Personal property ought to be exclusively charged with "some other burden; an equivalent ought to be given us." The reply is, that landed property is, and has always been,

held to be in this country of a different nature from other property. On principle, and as a scientific economist views it, the ownership of land is a monopoly given by the State for

[April 26, 1873.

the purposes of cultivation, just as the concession of a railway is a monopoly given for the purpose of locomotion. In both cases a privileged opportunity is given by the State which one person enjoys and other persons do not-which is the source of profit and enjoyment to the possessor, a profit and an enjoyment from which all others are excluded. As a principle of political philosophy, no monopoly ought ever to be conceded by the State except upon the condition for services to be performed, and with a right of supervision reserved. Mankind in general have not been philosophers, but they have in most cases rudely recognised the most obvious truths of philosophy. They have done so here. Almost everywhere in the world the monopoly of land-ownership has been burdened with some conditions; hardly anywhere, if anywhere, is there a "separate ownership" of land such as we now naturally think of it (though historically the very idea is recent and of yesterday) to be found, except subject to certain duties, charged with certain responsibilities. In England least of all has it ever been so. In the middle ages, when the beginnings of our real property law were laid, the land was subject to very formidable burdens. It was the basis and foundation of our entire military system ; it paid the "army estimates," as we should now speak. Gradually this condition of the privilege was evaded by the possessors of the privilege. The land now pays no more for our army than the funds; a long history has taken it from them. But the same history has brought other duties. For nearly three centuries the land has been liable for the relief of the poor. The owners of land have been burdened with that duty to the nation, and all land has been inherited and bought subject to it and with notice of it. It has also, in forms more or less modified, been subject to what we have called the mixed charges, which are partly for the benefit of the locality, and partly for the benefit of the nation ; and, naturally, it was always subject to improvement charges, which were spent on its improve-ment, and which increased its rent. The owners of the land must not therefore complain of bearing national burdens; they have always borne national burdens, and the predecessors under whom they claim took the land on the condition of bearing them.

On the contrary, the real reason of complaint is that the silent progress of events is lessening the incidence of ancient obligations upon land, and lightening the burden which it ought to bear.

We have seen that the Pool-law charge on real property has been reduced since 1803 from 3s 4d to 1s 6d in the pound, and the "mixed charges" from 4s 5d to 2s 7d, which would of itself be a great boon to the landowner. But this is not all his gain. Not only is the aggregate poundage reduced, but he does not pay the same proportion of that poundage, other kinds of real property bearing constantly a greater and greater share of that poundage, and so relieving him.

The following table of the relative values of different classes of real property shows how great that relief has been :---

	100-00	100-00		100-00	
Other Property	2.88	 6.64	******	8.42	
Railways		 2.82		11.11	
Houses	27.84	 41.44		47.27	
Lands	69.28	 49.10		33.20	
	1814.	1843.		1868.	

-so that land which was rated to bear more than two-thirds of the local burdens, now is rated for one-third. Its owners are liable to pay, as time goes on, a burden in two ways less grievous; they pay a diminishing fraction of a diminishing poundage.

The most important new kinds of personal property which have thus relieved the land are of course "houses," and the increase on them is as remarkable as the increase on the land. First of what we call the "mixed" charges, houses bore the following proportions in the respective years :—

1000	-	-
1826	***************************************	26
1833	***************************************	31
1841	******	37
1852	***************************************	47
1868	***************************************	47

And they bore almost the *whole* of the purely local charges, which now amount to 5,000,000*l*, which are almost one-third of the whole rates. Of course, houses are greatly benefited by their new rates, but still they have greatly to pay for them.

We consider, therefore, that the claim of land on the Exchequer is not a pressing claim; that it may be well postponed to others; that it is above all a claim which should be

calmly weighed and deliberately decided upon; that it is not one which ought to be decided on an interposed and sudden proposition like that which Mr Smith is going to move.

THE PARIS ELECTION.

WE shall know before forty-eight hours are passed the issue of by far the most important electoral contest which has taken place in France since the conclusion of the peace. For it will practically determine whether Paris has self-restraint enough and moderation enough to strengthen the hands of the Moderate Republicans, at a moment when the stability of any Republic depends upon strengthening the hands of the Moderates. The contest is one in which all the electors of Paris take part-since there is but a single vacancy in the Department of the Seine-and the Moderate Republicans have declared with singular unanimity for the candidate of the Government, M. de Rémusat, the Minister of Foreign Affairs ; while the Extreme Republicans support the Ex-Mayor of Lyons, M. Barodet. The ablest and most thoroughly tried Republican. of the whole party, M. Grévy, who has just resigned the Speaker's chair in order to take his place amongst the Republican ranks, and guard, as he himself said, against the Repub-lic being "juggled away" by the Right, has declared for M. de Rémusat, and explained how serious a mistake he thinks M. Barodet's candidature is in the policy of the Republican party. As he justly says, what the Government needs is to have its hands strengthened against the strategy of the Right, not to have warnings from the Left. Nor is M. Grévy, though he is a host in himself, the only eminent and thorough-going Republican chief who has declared for M. de Rémusat. One of M. Gambetta's own colleagues in the Government of Tours, M. Crémieux, has declared himself in the same sense as M. Grévy, so has General Chanzy; and a great number of the most sturdy Republicans of the Left, MM. Carnot, Henri Martin, and others of the same stamp, have been exerting themselves very actively in his support. M. Gambetta and his friends who support the Ex-Mayor of Lyons have done whatever in them lies to convince the country that M. Barodet's success would not be meant as a blow at the Government, but rather as a protest in favour of a speedy dissolution of the Assembly, and of the principles of the advanced as distinguished from the over-cautious Republicans. But there cannot be two opinions as to the actual result of the defeat of M. Thiers' Foreign Minister so soon after his negotiation of the Treaty for the liberation of the territory. It would mean that M. Thiers could not count on any sufficient body of moderate Republican opinion to support him in a moderate policy, and that therefore, if he is to stay in power at all, it must be by throwing himself on the Right Centre, who are not generally sincere Republicans at all, but who are cautious politicians, and perhaps less disinclined to act with the Left Centre than the extreme Radicals. In other words, it would mean that M. Thiers would either have to oppose for the present all the more liberal measures, or would be defeated and compelled to resign,-neither of them a course which it can be for the interests of Republicans to promote. The success of M. de Rémusat's candidature would commit the Government of which he is so conspicuous a member to a thoroughly Liberal and Republican policy ; it would give the sanction of the great city which is so powerful and so much feared by the Conservatives, to a quiet and safe line of legislation; and therefore it would make many converts from among the party of timidity and dread. The success of M. Barodet would strengthen the Right by gravely weakening M. Thiers; it would frighten the innumerable political alarmists throughout France as to the tendency of the Republic, and induce them to think even an unpopular throne safer; and it would utterly dishearten that most important section of the Republican party which holds, with M. Grévy, that the Republic should be the most tolerant of opposition and the most catholic-minded, of all the parties into which France is divided.

And, indeed, this is the most important point of all. France is only just beginning to believe that there is a really moderate, a really unrevolutionary Republican party, and nothing is more necessary than to give visible proof that there is such a party, and that it is strong. M. Thiers has done much to produce that belief. From the time when he publicly declared that the Republic was the form of government which divides France the least, he has been asteady adherent of the same view, and yet he has never yielded anything to the intolerant and propagandist Radicals; he has steadily withstood all

socialistic tendencies ; he has steadily refused to ostracise even the Royalists, and to refuse them their fair share in directing the policy of the State. By thus acting he has sown a cautious and dubious belief in the possible moderation of Republicanism, a belief not as yet of very deep root, a belief which might any day be startled to death, but which also may be fostered till it attains a healthy life. M. Gambetta, who is not near so Radical as he seems, has nevertheless done a good deal to hinder the growth of this belief by his unhappy phrase about the necessity of bringing a new social stratum (couche sociale) to the surface of political power, and now again unfortunately he is stimulating the same scare by his advocacy of M. Barodet. M. Barodet is said to have passed through several political phases, and his partisans now tell you that M. Barodet the chief member of the Lyons Committee of Public Safety in 1871, was a very different man from M. Barodet the Mayor of Lyons in 1872. Very possibly that may be so. But public opinion in France will not believe in the distinc-tion, and will hardly understand it. M. Barodet was at one time the leader of the Lyons Reds,-i.e., of the most intolerant and propagandist of the Lyons Republicans. The choice of such a man by Paris therefore, whatever it may really mean, will appear to half France to mean the adhesion of Paris to the theories of the Commune, and no impression could be more alarming. M. Paul de Cassagnac, the Bonapartist agent, said the other day, in addressing the reactionary audience at the Salle Herz, that if the Republic, to use M. Thiers' phrase, "divides us the least," "it must be because it disgusts us the most." That expressed the true Bonapartist feeling, but it expressed something more; it expressed the old feeling about French Republicanism, not at all as Republicanism, but as a violent, imperious and exacting creed, in the mind of half the small land-owners in the country. They felt no disgust of the form of government, but they did of the violence with which that form of government was till very lately associated in their minds. If M. de Rémusat is now elected, and elected by the most populous, and the most radical, and, for the towns at least, far the most influential of all French constituencies, the constituency of Paris, the fears which have been so often and so dangerously excited against Republicanism will be in a great measure calmed down. A form of government which M. de Rémusat supports cannot be very formidable to quiet people, and if Paris, therefore, gives her voice for that form of government, it will be generally felt that Paris has no terrors in reserve for France, if France will only honestly accept the Republic. But if it should prove that M. Barodet is returned, we fear the election will redouble all the terrors that have been excited as to the alleged understanding amongst the great cities of France to co-operate with each other on behalf of a form of Radicalism of which the peasantry of France stand in the deepest dread. The election of M. de Rémusat would be a sedative to the fears of the peasantry, and a new and powerful impulse to M. Thiers' Government; the election of M. Barodet would be a stimulus to the fears of the peasantry, and a stroke of paralysis to M. Thiers' Government. On Sunday's election a good deal of the hope of a permanent Republic in France undoubtedly hangs.

THE DUTCH IN SUMATRA..

THE tidings of the reverses experienced by the Dutch forces in the expedition against the Mohammedan kingdom of Atchin, in the northern part of the Island of Sumatra, have excited much popular emotion in the Netherlands, and the position of the Liberal Ministry has been seriously endangered. The Opposition, which represents to a considerable extent the views that in France would be called Chauvinist, has attacked the Government and its Eastern policy with a vehemence of which the proverbially cool-blooded Hollanders appear to be peculiarly susceptible in political affairs. What is more surprising than this attempt to snatch an advantage for a party from a national disaster, is the unreasoning and impertinent imputations cast upon the conduct of England towards Holland in the East. We can pardon the irritation of a people which meets, in the full tide of conquest, with a check so severe and abrupt ; we can make allowance for the intemperate language of faction; but it surely passes bounds to level at a friendly nation a charge so gross as that which is being propagated by the Opposition at the Hague. It is notorious that in effecting the recent arrangement by virtue of which, in exchange for the Dutch possessions on the West Coast of Africa, we surrendered the restrictions imposed by Treaty on the conquests of Holland

in Sumatra, we did so at the express and urgent instance of the Dutch diplomatists themselves. Yet this transaction, in which there was no English interest to be served, and which indeed somewhat increased our already onerous responsibilities on the West African Coast, is made the basis of an accusation against us of treachery, double-dealing, and conspiracy against "the prestige of the Dutch in India." Although the tone of the Dutch opposition papers is aggravating enough, we can afford to smile at the sensitive self-conceit which appears in this phrase. We should say there are immense numbers of Englishmen who are not even aware that there is, or was, such a thing as "the prestige of the Dutch in India," and even our diplomatists have been distinguished generally by a placid ignorance of our European competitors in the Eastern seas. If apathy and incompetence had not ruled in high places two generations ago, when the great re-settlement of the old world was making after the downfall of Napoleon, we should now be the masters of Java, and possibly have on our hands the conquest of Sumatra. But we may truthfully assert that this nation has never repented the concessions she then made to her dependent ally, never sighed for the splendid possibilities of Colonial Em-pire which she then parted with. It is not worth while repudiating the insinuations of the Opposition at the Hague that we are now scheming to win back, in an underhand way, the advantages we parted with so lightly at the Congress of Vienna. Certainly, the means attributed, in the present case, to English perfidy, are singularly out of measure with the ends we are supposed to have in view. We stipulated, it is said, on surrendering the treaty restrictions upon Dutch conquest in Sumatra, that the foreign trade with Atchin should be protected, and we used this protectorate to pour arms into the latter State to stir up the quarrel between the Dutch and the Atchinese ;-and, in fact, thus to deal the abovementioned "blow" at Dutch prestige in the East. It is asserted that the Atchinese were armed during the late operations with European breech-loaders, presumably of English manufacture, and it is concluded, most recklessly and unwarrantably, that the gunners who served the large guns of the Atchinese forts during the recent attack of the citadel, were imported from Penang and Singapore. On the other hand, the official statement of the Colonial Minister upon the Atchin war, which was laid before the Second Chamber at the Hague this week, accuses the Sultan of Atchin of intriguing with foreign powers, notably with France and Italy, to obtain assistance against the Dutch. Whether the French or Italians entertained such irregular applications we know not, though it is most improbable that they did so. But we can emphatically declare, for our own part, not only our abstention from intrigues of the kind, but our single-minded wish to see Dutch civilisation growing in strength and usefulness in the Eastern Archipelago.

The real history of the Dutch relations with Atchin is probably carefully disguised in the official statement referred to; but it may be guessed at readily enough, and explained by comparison with our own conquests in India. The Atchinese have had differences with their Datch neighbours for half a century ; and as the Europeans have gradually worked their way from their earliest settlements at Padang and Palembang up the coast and into the heart of Sumatra, the Atchinese have become more and more jealous and suspicious, and not without reason. Though described as a semi-barbarous race, the people of Atchin are certainly not unintelligent, and they have had ample opportunities of perceiving the danger to native states of close contact with European settlements. The English in India, the French in Cochin-China, and the Dutch in the south of Sumatra, have all run the same course of conquest; their presence seems to paralyse native force, to act as a solvent on native institutions, and when the work of demoralisation has gone far enough, pretexts for interference, leading up to annexation, are always easily to be found. It may be that vague apprehensions of these consequences, combined with the universal awakening of the Mohammedan fanaticism in these days, have given a keener edge to the hostility of the Atchinese against the Dutch. It may be that the pretexts put forward in the Colonial Minister's Report had some foundation in fact, and that the Sultan of Atchin was casting about for allies-especially European allies-to aid him in the inevitable struggle. At any rate, the casus belli was sufficiently established to justify technically the invasion

THE ECONOMIST.

[April 26, 1873.

of Atchin by the Dutch. But the Dutch Colonial Government appear to have wholly miscalculated the strength of the opposition thus challenged, and to have blundered into some incredible hazards. Atchin was by no means in the condition of demoralised weakness that the invaders had counted upon. Whatever we may think of the stories of heavy-rifled guns and trained gunners by which the Dutch strive to excuse the disaster to their arms, it is clear that there was no lack of men or money or munitions of war in the Mohammedan kingdom. The Dutch, however, entered upon their invasion as if they were certain of marching resistlessly and rapidly to victory. With inexplicable imprudence war was declared on the 30th of March—only a few weeks before the bad weather, during which field operations are impossible and after some successes they found, in the first place, that they had not men enough for the work, and next had the rashness, with such insufficient forces as they possessed, to attack the citadel of Atchin. The place was bravely defended, and the assailants were harassed in flank and rear during the fight by the irregalar forces of the Atchinese. The soldiery were evidently discouraged, and it is supposed that, in attempting to hearten them by his personal example, General Kohler, the Commander-in-chief, lost his life early in the fight. Finally the besiegers were repulsed, and a council of war decided on raising the siege and withdrawing from the expedition until the return of the cold season. The coming monsoon, it is feared, may isolate the invading army from its real base of operations, the sea, and lead possibly to a worse disaster. The Atchinese enjoy all the fruits of victory, and though the Dutch fleet blockades their ports, they will probably find means to strengthen their position before the autumn.

It is commonly assumed that when the Dutch have once measured the difficulties of the task they have taken in hand and resolved to carry it through at any cost, they will crush their semi-civilised enemies without much trouble; nor do we dispute the probability of this result. There are a few considerations, however, to be taken into account on the other side, which should prevent us from dogmatically affirming the certainty of Dutch victory in the long run. The Atchinese are evidently no contemptible foes. The climate and the natural characteristics of the country fight for them and fight against their European antagonists. Besides, religious fanaticism is concerned in the resistance of Atchin, and the flame may spread widely. But the most serious matter of all is, that Holland is bitterly hated by her subject races in Java as well as in Sumatra, and that the iron cruelty of her rule, as revealed some years ago in that remarkable work, " Max Havelaar," amply justifies the hate with which she is regarded.

BUSINESS NOTES.

THE EXCHEQUER BALANCES.—A Parliamentary return has just been issued which ought to throw some light—but fails to do so from a defect to be presently mentioned—on the effect of the changes in the period of collecting the direct taxes which Mr. Lowe made some years ago. The return shows the amount of the Government exchequer balance at the end of each month for the last ten years. During the whole period the balances have been much higher in the spring months than in the autumn; but since the new arrangements came into force the difference has been increased. The following statement, which we compile from the return, shows this:—

DECREASE OF THE EXCHEQUER BALANCE AT THE BANK OF ENGLAND BETWEEN MARCH AND SEPTEMBER IN EACH YEAR SINCE 1864.

THEY AN WORKED A PARTY TE STATE	PORTE A. P. WEAR PRESE	1.5	TRACE I DAIL	DING	TOOX.
	March.		Sept.		Decrease.
	£		£		æ
1864	6,188,000		3,995,000		2,193,000
1865	6,509,000		3,666,000	***	2,843,000
1866	4,729,000		2,981,600		1,748,000
1867	5,894,000		3,362,000		2,532,000
1868	3,724,000		2,806,000		918,000
1869	3,776,000		1,390,000		2,386,000
1870	7,634,000		3,041,000		4,598,000
1871	5,679,000		2,009,000		3,679,000
1872	7,707,000		5,140,000		2,567,000
Rat these firmres reall		- 43	1		1

Bat these figures really prove nothing because they do not show at the same time the amount borrowed on deficiency bills at each date. If the balance is replenished from such borrowings at any period, then the real balance of the Government at that period would not be so great as shown in the above return, but the amount of the borrowing should be deducted from it. The object being to show the balance arising from revenue and expenditure, all capital operations

such as borrowing ought to be excluded. A more exact return would be very interesting.

THE COINAGE OF THE JAPANESE MINT .- An elaborate report, in the English language, by the Master of the Mint in Japan to the Japanese Minister of Finance, has just reached us. Many people will be surprised to learn that the Japanese are introducing a new gold coinage, with the latest improvements and under European (or American ?) superintendence ; but the fact is so, and the amount of the coinage in the first year, ending 31st July, 1872, is by no means a small one. During that year the imperial mint of Japan imported no less than 858,226 oz of gold for coinage, or about 3,000,0001; besides 4,767,175 oz of silver, or about 1,192,000%. The total number of gold pieces struck was 2,190,256, valued at 14,488,981 dols; and silver pieces 13,313,722, valued at 5,689,685 dols — total, 15,503,978 pieces, valued at 20,178,666 dols. After such an account, one of the objects of the recent Japanese loan, with the consequent export of gold from England to Japan, becomes apparent. Japan, in fact, is one of the various competitors with Germany for a new gold coinage, and helps to swell a demand which is probably already in excess of the annual supply of gold throughout the world.

THE SUEZ CANAL TRAFFIC .- The statistics of the Suez Canal Traffic confirm, in a very striking way, the calculation we ventured to make before the canal was opened, and which brought upon us some vituperation from the promoters of the canal at the time. The sbareholders were assured that a traffic of from 3,000,000 to 6,000,000 tons annually was to be depended on, but after a careful computation of the shipping in the trade to be accommodated, we came to the conclusion that the canal "would do very well" if the traffic at first amounted to about a million tons a year. Every one knows that the canal has done very well. The promoters tried to make a great deal at first of the interruption of trade caused by the Franco-German war, but it is well known how favoured the Company really was by the activity of English shipowners in providing a special class of screw-steamers to navigate the canal. At any rate, we have now statistics posterior to the war; and this is how the account of traffic for the last three years stands

THE TOT FIND TOPPE	-	a nor	ius .			
	First Six		Second Six	E.		
	Months.		Months.		Total.	
	Tons.		Tons.		Tons.	
1870	171,584		237,728		409,312	
1871	326,859		376,343		703.202	
1872	566,065		516,026		1.082.091	

Thus in the third year of complete working, the traffic barely exceeds the million tons which we allowed. It is stated that but for the company's change in the mode of computing the tonnage, by which the rates have been largely raised, the increase in the second half of 1872 would have been greater, but it would still have been far from being so great as to bring the total for the year very much above a million tons. If the Canal Company therefore pays no dividends, the reason simply is that the calculation of traffic was a mistake. The tonnage-charge at first levied was in fact based upon a calculation that the shipping annually using the Canal at first would be three million tons and upwards, although it was quite certain, from the evidence which we printed, and which has since been corroborated by the event, that the traffic would not for a long time reach anything like the total which the promoters persuaded their too-confiding shareholders to believe. The present attempt to raise the dues is simply an effort on the part of the promoters to escape the disgrace of their original miscalculations, and should be strenuously opposed by every Government in Europe.

UNPAID SHARES AS SECURITY TO BANKERS.—The Lord Justices of Appeal—in re the Land Credit Company of Ireland (Limited), Weikersheim's case—have just given a decision which illustrates the unsuitability of shares, on which there is a further liability, as a security to bankers. Messrs Weikersheim and Co. are bankers at Vienna, and in 1864 one of the members of the firm lent Mr David Leopold Lewis 7,000%, taking an assignment of 1,400 shares of the above company as a security. The result is that, when the company went into liquidation, the fact of the name of the firm having been registered under the transfer was made use of by the liquidator to put their names on the B list of contributories, and the Lord

Justices have now held that he was right in so doing. There was much dispute of detail in the present case, as to whether the firm had ever really authorised the registration of the transfer in their names, and whether, on other grounds, the registration was valid, but the important fact for general purposes is that where registration has taken place, the parties so registering are liable. The security of unpaid shares may thus turn out to be no security at all. The banker or other lender, instead of having some guarantee for what he lends, may only have more to pay, and even where the loan has been repaid, the circumstance of a tranfer having been registered may have awkward after-consequences. The law on the point has never been doubtful, but the effects are so important that a case like the present is useful, as reminding the banking world of the peculiar dangers of lending on un-paid shares. They should take care, perhaps, to confine such loans not merely to shares registered as fully paid-up, but to shares on which money has been really paid, and not simply equivalents or supposed equivalents given.

IRISH AGRICULTURE.—From the Abstract of the Agricul-tural Statistics of Ireland, lately issued, it appears that there has been a decrease during last year of 135,000 acres in the area under crops. The largest share of this decrease is in the potato crop, which has fallen 66,000 acres. Flax also appears to be rapidly declining ; the crop of last year being less in extent by 34,000 acres than in 1871, making a decrease of 131,000 acres since 1867, when it reached its highest point, -this too in spite of the fostering efforts of the Government. Over 32,000 acres less were cropped in cereals; this also but a step in a continuous decline of some years. These figures seem startling, but a little examination proves them to be due to causes the opposite of a decline in the actual prosperity of the country. The more valuable sorts of live stock have largely increased during last year, and the wealth of Ireland in this respect alone has grown in the twelve months at least 300,0002. These changes are due in fact to the rapid development of grazing farms. Such roots and cereals as were formerly used as food by the poor or as fodder for their pigs, are being less universally cultivated, while all kinds of grass crops, turnips, and such green crops as cattle thrive best upon are on the increase. The security of tenure now enjoyed is apparently tending to extinguish the minute farms held of middlemen, and to transform the land into grazing tracts of greater or less extent.

THE ECONOMIST.

Joreign Correspondence.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

BERLIN, April 23. The ECONOMIST being no place for mere financial gossip, I stopped writing almost at the same time that political business became dull, at the Easter term. On Monday, the 21st inst, the *Reichstag* resumed business. The poetry of royal nuptial ceremonies, reminding one of the scrupulous etiquette of the Spanish monarchy, and the last festivals which ended on Monday, have given way to very serious debates on the coinage bill. The President of the *Reichskanzleramt*, Mr Delbrück, who had on Saturday to act as a dancer and torchbearer in the bridal Fackelzug, has now to fight a host of amendments which have been framed to destroy the harmony of his bill. Some of the amendments, proposed by a few semidisciplined monetary volunteers, may be acknowledged to be of minor importance, affecting only questions of expediency. Thus, on Mr Bamberger's motion, the legal term, preliminary to the definitive repeal of the present state currency, has been reduced to three months, to be fixed by Imperial Order. Another amendment, moreover, may be said to belong to a similar order of expediency. The Reichstag has voted in favour of the coinage of a five-mark gold piece, together with a five-mark silver piece. The question appears to have been be-tween the ladies' champions, who found it more delicate to use small gold coins, and the workman's advocates, who pleaded against a piece apparently too small to be safely kept between fingers unaccustomed to piano-playing. Finally, the trial, "lady versus workman," was terminated by a compromise with a view to reconciling the wants of both.

Such an amendment means little more than a slight skirmishing between combatants preparing for serious battle. And sarely a very serious battle will be fought on two points, viz., whether or not some intermediate token should be coined between five-mark pieces and one-mark pieces to fill up a blank in the Government draft, and, in consequence, whether such intermediate piece should be of two-mark or of two-and-a-half-mark value. The more prominent monetary authorities, Mr Bamberger, Mr Braun, and the official representatives of the Bunderath, Mr Delbrück and Mr Michaelis, were successful in showing that coining two-mark pieces would of necessity eradicate the principle of a gold currency in favour of a double currency, formerly rejected by the coinage law, and that the competition to be expected from the influx of Austrian silver florins, nominally but not really equivalent, would become productive of considerable disturbance in a system of gold currency. These explanations were the more conclusive as Mr Bamberger, although originally advocating the South German gulden against the adoption of the mark, was able to show how much German currency would be damaged by the monetary speculation of Austrian bankers, as well as by confusion amongst the lower classes, ignorant and unaware of the distinction existing between foreign legal tenders like Austrian florins and the nominal contrefait of twomark pieces. Contrary to all expectation, the opponents, adopting the two-mark piece, were triumphant in a vote of 98 to 94. The reason to be given in explanation of so strange a majority is a combination of Southern predilection for a system apparently approaching the present silver gulden. with a sentimental fear that Austria might be offended by any opposition to the circulation of her silver coins on the German money market. Hence the Ultramontanes and the Southerners turned out to be strong enough to defeat the Government. The issue of this division has raised a considerable degree of excitement in financial circles. It is, however, almost certain that the last reading of the Coinage Bill will lead to other results. If there remains any serious controversy between the advocates of different intermediate tokens, then it is probable that the original text of the Government draft will be restored in the way of a negative compromise.

The Exchange has, during the whole time since my last letter, remained unusually dull, and the reduction in the value of stocks—Government Bonds, however, excepted—begins to extend to paper, which, till recently, had been supposed to be pretty well warranted against fluctuations of the money market. It is superfluous to enlarge upon the reasons lying at the root of this fact. At the beginning of the year, and during the month of January, it was the rather physiological view of *plenus venter* that was held responsible; next eame the occurrence of the Khiva complication, afterwards M. Grévy's abdication, and finally the Pope's illness. At present there is not the slightest doubt whatever that the Berlin money market is entirely dependent, and will for a long time remain so, on the French war money instalments. Therefore, the state of the Exchange is not likely to change its aspect before the reflux of capital, to be expected at the end of this year, will have diminished the congestive symptoms in the organs of the Imperial Treasury department. In a minor degree, the

THE ECONOMIST.

[April 26, 1873.

scarcity of capital may be attributed to the warning given by Mr Lasker's speech, of which the immediate effect has been to reduce the demand for banking and industrial papers amongst the greater number of that class of speculators who may be termed the "casual offenders" at the Bourse, a class too numerous to be overlooked in the appreciation of the general facts. A short time before the Reichstag separated to enjoy the Easter vacation, Mr Lasker will be remembered to have, in a speech of the 4th April, renewed his attacks against the Berlin Bourse.

The incriminations were, in the absence of any contradic-tion, received with a good deal of credulity amongst the public, willing to attribute their financial losses and the general reduction in the quotation of bonds to malpractice rather than to their own improvidence. There is every ground to believe that Mr Lasker's description of the Berlin Bourse is by no means exempt from the reproach of a bona fide exaggeration. His strong feeling against the immoral side of "Founding" has unfortunately led him to underrate the true amount of legitimate business, and the exact proportion it bears to unsound speculation. The Board of the Merchant Aldermen, presiding over the Berlin Exchange, have sought to paralyse Mr Lasker's speech and its effects, unfavourable to the commercial public, by forwarding a formal protest to the Reichstag. Both parties are now awaiting their trial before the public. So long as the quotations continue to follow their course towards reduction the verdict will be " guilty " against the Bourse. It requires, however, no degree of sagacity to foretell that this verdict will finally be overruled and turned against Mr Lasker himself, if a change of circumstances should turn the scale of quotations towards an advance.

DECREASE.	francs.
Circulation	12,977,500
Private deposits	6,141,983
Cash	235,965
Trade discounts	2,383,245

The payment of the quarterly coupon of rente being now terminated, the Treasury account has commenced to accumu-late. On the other hand, most of the railway and finance companies are now distributing the balance of their dividends for 1872, which has had the effect of decreasing their deposits at the Bank. The trade discounts in Paris have risen by nine millions, but the repayments of the 15th in the branches, which only appear in the return of this week, have been more than a set-off against that increase. The advances on bullion rente shares, &c., also show an aggregate decrease of over a million, and 1,200,000f have been paid off the old City of Paris debt. The effect of those changes combined has been to reduce the circulation by nearly 13 millions, after providing for an increase of four millions in the Creditor Sundries.

The money market has remained in a state of expectancy during the week, buyers holding aloof until after the elections of Sunday next. The result is impossible to foretell; but, at the commencement of the week, the Government stocks were fractionally better, the chances of M. de Rémusat appearing to improve. The recovery has, however, been lost during the last two days, and last Thursday's sales have been barely maintained.

Italian rente continues to decline; the depreciation in the paper now amounts to 14 per cent., and the practice of sending the titles to Paris to obtain payment in gold has entailed such a heavy charge on the Government, that it is feared that the gold payment of the coupons abroad may be discontinued. Spanish is a trifle firmer, the loan of 1872 being quoted at 22 1-16, and the Exterior at 221.

Bank of France and Banque de Paris have each lost 10f, and the only variations in finance and railway companies' shares are downwards. Suez Canal shares are almost alone in showing a buoyancy. The highest rates of the week have not, however, been maintained. Subjoined are to-day's prices, for the account :-

The Minister of Finance has just issued a return of the revenue for the first quarter of 1873. The general results of the indirect taxes are most favourable, the 428,952,000f received being a surplus of 101 millions on the estimates for the three months, and an increase of 55 millions on the corresponding quarter of 1872. The improvement has been obtained in both old and new taxes. The former, estimated to produce 3101 millions, have realised nearly 318; and the latter have amounted to 111 millions instead of the 108 counted on. The surplus of indirect revenue is in reality greater than the 10¹/₂ millions above mentioned, as the new tax of three per cent. on income from stocks and shares is made a special entry apart from the ordinary indirect revenue, and it produced in the quarter 7,689,000f, or 1,689,000f more than one-fourth of the estimated yield for the year. The produce of this tax in the second quarter will probably be less favourable; the amount of dividends and interests on which it is charged being less than in the first, but even with a diminution no doubt can subsist that this new tax will fully realise the sum it was calculated to produce. The ease with which it has been collected may perhaps reconcile the Government to a more extended application of the principle of an income tax, when it shall have become definitively convinced that its duties on raw material are impracticable. I should have before mentioned

that in the comparison between the revenue and the estimates, no account is taken of the 93 millions from those duties, set down pour memoire in [the provisions of receipts for 1873. A note to the present return also remarks that a deficit of 2[‡] millions in the quarter's estimate of the produce of the tax on railway passenger receipts, is only apparent, as there is always a decrease of travelling in the winter quarter, and that this insufficiency will be more than compensated for in the subsequent quarters; consequently, if that sum is omitted from the items which show a deficit, and the surplus in the partial income tax be added to those which show an increase, the gross excess of revenue from indirect taxes over the estimates will be 14,993,000f. To appreciate the rapid reco-very in the finances of France, and the immense expansion of her resources of taxation, it must be remembered that the first quarter of 1872 had left a deficit of nearly 40 millions, which has now been converted into a considerable surplus. If the various chapters of receipts are compared with the estimates, we find that the registration and succession dues gave a surplus of 63 millions, stamps 7 millions, Customs duties, not including sugar, 4 millions; colonial and foreign sugar show a deficit of 51 millions, which is, however, more than compensated for by a surplus of 84 millions in native sugar; tobacco has also yielded a surplus of nearly 4 millions. On the other hand, potable liquors, although yielding in the quarter over 74 millions, or nearly 13 millions more than in 1872, are still nearly 7 millions below the provisions. The match tax leaves a deficit of 1,694,000f; gunpowder, 1,498,000f; and the Post Office, 2,542,000f.

The principal items of increase, compared with the same quarter of 1872, are stamps, 4½ millions; customs duties, 16 millions; foreign and colonial sugars, 2½ millions; native sugar, 12¾ millions; potable liquors, as already mentioned, 13 millions; and tobacco, 8½ millions. The passenger duty on railways diminished by 4 millions; salt and registration dues each show a decrease of over a million.

The direct taxes have also come in more freely, a sum of 114 millions having been received in the quarter, against 18 millions only in the first three months of 1872.

Next to the coming elections, the great subject of pre-occupation with the Government at this moment is the question of the treaties of Commerce, a solution which is now being pressed for on all sides. At no time since the prospects of abrogating the old treaties and imposing duties on raw materials were first broached, has the matter been more seriously agitated than at this moment, and petitions and deputations are being daily received by the President and the Ministers. A deputation of manufacturers of articles of furniture, which is one of the chief branches of trade in Paris, occupying a numerous working population in the Faubourg St ing a numerous working population in the randourg St Antoine, has this week had an interview with M. Thiers to complain that, with the duty on foreign woods, they are unable to compete with Germany, where labour is also cheaper. Other trades protest against the proposed treaties as being too liberal; the refiners of petroleum at Marseilles protest that the proposed duties on that article from Belgium are insufficient for their protection, makers from Belgium are insufficient for their protection; makers of stearine at Lyons find the same grievance in the rates of duty on importation from England, and the wine-growers of Savey have petitioned the Minister of Agriculture against the importation across the Italian frontier of wines at the nominal duty inserted in the treaty of 1866 with Portugal, but which Italy also enjoys under the favoured nation clause. The cotton manufacturers have relaxed nothing in their demands for further protection, and a fresh memorial from M. Pouyer-Quertier has been received by M. Thiers. In fact, the embarrassments the President has drawn on himself at home are not less great than the difficulties he meets with when he attempts to negotiate abroad. M. Ozenne's mission to Italy has been a complete failure, and the negotiations there have been suspended for six months, which is equivalent to an abandonment of all hope of obtain-ing any concessions in that direction; an attempt will now be made to open them at Vienna, but there also a certain check awaits the French travelling agent. Count d'Harcourt also writes from London that the English Government are growing impatient at the delay in the settle-ment of the English treaty. The commercial question will be one of the first subjects brought before the Assembly after the vacation. M. Thiers is already in possession of the reports on the English and Belgian treaties he had demanded from the Department of Commerce, and which are believed to refer chiefly to mineral oils, timber, and textiles. The President has also obtained from the same source a summary of the complaints received at the Ministry of Commerce under the Empire with reference to the treaty of 1860, a list of the adhesions to the treaties and the protests against them, and a note on the propositions of the Chambers of Commerce of Man-chester and Rouen. The Parliamentary Committee on the treaties has on its side invited the Chambers of Commerce to send in observations on the treaties before the 5th May. It is, however, doubtful whether this will be of any assistance in

helping the Committee to arrive at a conclusion; the Chambers of Commerce have already made declarations of their preferences, and if they have since modified their opinions, it is certainly not in the sense of an accord between the rival interests they represent. The reopening of the question of tariffs has only served to encourage complaints and demands which would have never been heard had the former arrangement not been disturbed.

The first number of the Economiste Francais has appeared, and the announcement, that the plan of the new journal would be copied on that of the ECONOMIST, has been closely adhered to, the size, contents, and arrangement of matter being the same; from which it may be inferred that the founders have not discovered any part of your paper susceptible of improvement. This first issue contains among its leading articles one by the editor, M. Paul Leroy Beaulieu, on Industry and the Customs Duties; and one by M. Michael Chevalier on the Necessity for a Postal Convention with the United States, the old treaty, which expired in 1867, not having been yet renewed, in consequence of the exhorbitant pretensions of the French Government, to which the Government of Washington refuses to submit. It is, indeed, scarcely credible that a letter to the United States still costs a shilling, that no through rates exist for newspapers or small parcels, and that letters between the two countries cannot be registered. To facilitate a comparison between the English and Belgian treaties of commerce, the new journal publishes them in parallel columns, exhibiting the clauses which differ, or which in each of those treaties, supposed to be identical, are not to be found in the other. It is seen that the two treaties are in disaccord on many points; the Belgian is for a period of ten years, while the other is for an unlimited time; certain Belgian productions enjoy favours not contained in the English treaty; the tariffs are not always the same; marble and stone are more heavily taxed in the English treaty than in the Belgian; while slates, which are taxed in the former, are exempt in the latter. In various measures of detail, such as the arbitration in case of dispute between the importer and the customs, the imposition of a trade licence on Belgian commercial travellers in France, certificates of origin, &c., the two treaties differ. England, however, enjoys all the advantages accorded to Belgium, under the favoured nation clause, which is not contained in the Bel-gian treaty. An article in the Belgian treaty, not contained in the English, has given rise to complaints from Marseilles referred to above. It stipulates that the duty on refined petroleum or essence from Belgium shall not exceed, by five francs per 100 kilos, the duty on crude petroleum imported direct from the country of production under the French flag. The present duties in France are : crude petroleum, per 100 kilos, 20f; refined, 32f; essence, 40f. As the refined or essence imported from Belgium would pay only 25f, the article thus constitutes a differential duty in favour of 7f in the refined and 15f in the essence in favour of that country, and the result would be to divert the importation from Havre and other French ports to Antwerp. The tariff of July, 1872, is still more favourable to Belgium, for by it the duty on the crude oil is fixed at 32f, and on the refined and the essence at 52f, or a difference of 15f in both in favour of Belgium. If the petroleum is refined in France, the native refiner is still placed under a disadvantage, as 133 kilos of the crude is required to produce 100 kilos of the refined, the duty paid would be 42f 56c, while the same quantity from Belgium would pay only 37f, or a difference of 5f 56c. The complaints of the Marseilles refiners are therefore not without foundation.

The Belgian Chamber of Representatives has adopted the bill for a loan of 230 millions at 3 per cent. for the purchase of the Luxembourg railways. Only 60 millions will be offered for public subscription, the remainder being taken by bankers. MM. de Rothschild and Bleichroder, the Belgian Societe Generale, the National Bank, and the Bank of Belgium each take 25 millions; and a union of four other establishments, including the Banque de Paris et des Pays Bas, have obtained 45 millions among them. The nominal rate of issue is 81f; but the payment of interest from the 1st June, and the faculty of discounting the instalments, which are spread over a period of three years, reduces the actual price to 77f 20c. The public only enjoy those advantages, the bankers having to pay up one-third of the loan on the 10th of June next; they, however, receive a commission of a quarter per cent. The effective rate of interest is 3f 89c per cent.

The latest financial disaster is that of the French company for constructing quays and warehouses in the Port of Cadiz. The Director, M. Collet Meygret, is in prison, and seals have been placed on the offices.

The Tribunal of Correctional Police also condemned this week the chief of a financial agency, named Klotz, and two of his confederates to from two to five years' imprisonment, for appropriating moneys and securities, to the amount of 500,000f, intrusted to them for investment, sale, or deposit.

The delegates for the revision of the Sugar Convention

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1863, a deficiency of 3,294,2411; in 1870, a deficiency of 1,499,2271; in 1871, a deficiency of 249,5311; and in 1872, a deficiency of 3.064,4111. In 1873, there is a deficiency of 6,045,7642.

In 1863, the money market continued easy, and the Bank lowered its rate to $3\frac{1}{2}$ per cent., while open market rates tended to go below that figure. The subscription to the new Turkish loan was very large, particularly in Paris.

In 1870, owing to the unusually heavy settlement at the end of the month, there was a temporary tightness in the money market. The rates, except for short commercial bills, remained unchanged. A new loan, called the Daira loan, and amounting to 7,142,860l nominal, was announced for Egypt. Except this there was no feature of note on the Stock Exchange, which was generally firm.

In 1871, the previous ease gave place early in the week to greater firmness in the money market; but the supply of money was still very plentiful. Foreign Stocks were going up; but English Government securities and railways were inclined to fall. As the Communist struggle drew near its end, and the chances of money being largely wanted on the continent increased, there was danger in the high price to which abundance had recently raised many home stocks.

In 1872, the quietness which had characterised the money market for some weeks continued, and consequently the buoyancy in the stock markets, where both old and new ventures were in strong demand. English railways were recently rising, in spite of the serious growth in the price of raw materials.

The account of the Bank of France for the week ending April 24 shows the following changes :---

Assers.	April 24.	April 17.		Increase	le	Decrease
Cash	32,356,000	 32.365,000				9,000

DISCOUNT AND MONEY MARKET BATE .- The week has been one of great suspense in the Money Market. Early in the week the brokers were reluctant to do any discounts under Bank rate, although money at short dates was very abundant; but as it became apparent that the expectation of an early advance of the Bank rate, upon which the brokers were calculating, was not likely to be fulfilled this week, the market became rather easier, and the best Bank bills under three months have been freely taken at 37, with some exceptional transactions under. The rates for long bills have also declined. The market has been at its easiest to-day. and the demand at the Bank has also been moderate, although in the early part of week the demand at the Bank was such as to balance the large repayments now being made. A rather firmer market is expected next week however, when a little time has been given to use up the funds accumulating in the hands of the brokers, owing to their reserve in taking bills.

On the Stock Exchange, there is almost an unprecedented ease of money on English Government Securities at call, the nominal rate being as low as $1\frac{1}{2}$ per cent. The relative abundance of money is increased by the unusual scarcity of stock in the market, owing to the Government purchases for the sinking fund.

The changes in the Bank return for the week have not been very great; but although the reserve has increased 130,300l, and the proportion of reserve to liabilities is rather more than it was a week ago-an increase of 277,000l in the public deposits, and a decrease of 61,000l in the private deposits, making the aggregate only 216,000l more-the situation since last week has not really improved. The bullion has diminished 123,000l, the withdrawal for export being on balance 141,000l, and this constant leakage is sure to tell in the end, possibly before the usual return of money from the country after the middle of May begins to strengthen the Bank. As compared with the same time last year, the Bank is plainly weaker. The reserve was about the same amount, being 11,262,000l a year ago, against 11,110,000l now; but the public and private deposits a year ago were 28,987,000l, whereas now they are 33,167,000l, or an increase of 4,180,000l. The Bank is thus keeping the same reserve against very much larger liabilities, although last year a very sharp movement upwards of the Bank rate was necessary immediately after this date to protect the reserve. It is believed in Lombard street that the bankers' balances at the Bank of England are now unusually large, from which the inference would be that the Bank is employing these balances in making advances to a larger extent than we should judge expedient, instead of lying out of the market and letting the reserve accumulate. Since the Bank return, 100,000l in sovereigns from Aus-

Since the Bank return, 100,0007 in sovereigns from Australia has been sent into the Bank, and probably a further amount in sovereigns may go in; but the balance of the present Australian arrival being all in bar gold, has at once been taken up for export. Shipments are now shortly expected from America, owing to the sudden collapse of the gold ring there, and the consequent ease of the market and rise of the gold premium.

THE STOCK MARKETS .- The fluctuations of an unusually quiet week in nearly all departments of Stock Exchange business remain to be recorded. Various circumstances have contributed to cause a reduction in speculative business. The "Account" commenced to-day and, to be completed next Taesday, will have consisted of only twelve days, and, coming as it does between the Easter holidays and the 1st May, another Stock Exchange holiday, has made it of a very light character. Then, again, until within the last few days, the condition of the Money Markets has caused uneasiness; and, altogether, the dealers in Stock Exchange securities have had but a dull time of it. From the remarks hereafter, it will be seen that British Government Securities have again exceptionally risen in price; but that Foreign Stocks and English Railways have remained inanimate, with movements of a generally trifling description. Turning to the Colonial Bailway securities, Indian. Guarantees have been pretty well sustained, but Canadian have receded, Great Western shares more especially so on some heavy sales. The Grand Trunk Bill has passed the Canadian House of Commons. The American market has not benefited much by an easier state of the New York money market. The Government Stocks have varied but slightly, but the Railroad Securities have ruled decidedly heavy; and Atlantic and Great Western and Erie investments fell heavily on Thursday, owing to a telegram which appeared in a morning paper to the effect that a lease of one to the other would probably be prevented, a statement which has since received an official contradiction. Telegraph undertakings have mostly ruled heavy in price, and the Atlantic lines more especially so, owing to the notification that the French Cable has been interrupted some 200 miles from Brest, in, however, shallow water. There is thus only one of the three Atlantic cables in operation, and an advance in the tariff has consequently been announced. The Mining Market has exhibited considerable depression, partly owing to the fall in the value of tin; and the Emma Mine has suffered heavily upon the expectation of an unfavourable report. Dock Companies appear, however, to command higher prices. These are the only marked features of the week. To-day business was curtailed by reason of the settlement, this being appointed by the Stock Exchange Committee to be "first continuation day." The markets were generally dull. Monday will be the ticket day ; and Tuesday, the settling day.

ENGLISH GOVERNMENT SECURITIES.—One of the few instances of noteworthy improvement this week has occurred in the market value of the British Funds. An easy money market, in the face of fears expressed to the contrary, and a scarcity of stock, clearly shown by the enhanced prices given by the Government broker, have caused a decided advance in quotations; and these causes, and the cheapness of "short" money, have combined to raise the money price of Consols almost to a level with that for the account. Indian Government Securities have likewise exhibited a moderate degree of firmness. To-day, however, a slight relapse has taken place.

6 per cent., 2; New South Wales, 1888, 1; Tasmanian, 1 Victoria, 1883, has fallen 1. FOREIGN GOVEENMENT SECURITIES.—The feature of the

week in this department has been the fall in the Egyptian and Turkish Stocks. Both those countries, it appears, are in need of money; and both are negotiating for the issue of heavy loans, fifty millions of stock being mentioned as the probable application for Turkey, and thirty millions for Egypt. Both are large sums; and though, doubtless, much will be required to cover indebtedness already incurred in the shape of deficits and the like, and perhaps a portion for public works, yet it may well be demanded as a right that a clearer insight into the finances of those countries should be permitted before subscriptions are sought. Those who lend without being satisfied in this essential particular will have only themselves to blame should they suffer in con-sequence. Turkey has, it is true, from time to time, published estimates of revenue, which it is feared the actual figures have but little resembled; but what the investing public want is results as well as estimates, and the assurance that the Government will be steadily and economically conducted, an assurance which the incessant changes of Ministers by the Sultan and the difficulty of comprehending his intentions generally are in no way calculated to give. Egypt, it will be remembered, will, by the terms of the 1868 loan, be at liberty to place a fresh Government loan after the 11th July next, and as it is understood that she has obtained considerable advances from private sources since 1868, she will doubtless require funds to pay them off. At any rate, the week now closing has witnessed a considerable excitement in the securities of these two countries, those of Egypt falling decidedly. Mexican stock has also further de-clined. On the other hand, Spanish securities were slightly more in favour at one period, though recent disturbances at Madrid and the mutinous state of the army have again produced reaction. Still, Spanish stocks are already so low that nothing less than an actual suspension of dividends will be likely to make them fall much lower. French, Austrian, and Italian rentes have varied slightly, with in the end little result. From this record it will be understood that business has not been generally active, and that, as a whole, the Foreign Stock market has shown some depression. Spanish Egyptian Stocks receded to-day.

THE ECONOMIST.

ENGLISH RAILWAYS .- The curtailment of speculation has produced an inanimate Railway Market, with a less than On Saturday last there was ordinary amount of fluctuations. some improvement to record, Metropolitan Stock rising 2 on a report that the surplus lands were meeting with a more ready sale, while on Monday, Manchester and Sheffield Stocks were in some request, the increase in the traffic at last beginning to draw up to that shown in the published returns of current working expenditure. But Tuesday's market was dull, and the Scotch Companies were flat, the opinion being expressed that any arrangements between them which did not substantially curtail the enormous new capital outlay, for which powers are sought in this Session of Parliament, would not be so satisfactory as the public had expected from the efforts of the committees recently appointed. Thursday was again a heavy day, with little or no inquiry either for investment or speculation. The principal instance of a rise in prices during the week has occurred in Metropolitan and Metropolitan District; while, on the other hand, Great Northern Company's Stocks continue out of favour. The further movements have been seldom of more than a fractional character. The traffic returns, including the holiday receipts during Easter week, have shown fairly satisfactory results. It is probable that, with the fortnightly settlement extending to Tuesday next, and Thursday being a Stock Exchange holiday, speculation will be confined to within narrow limits during the greater part of next week. To-day's operations have been chiefly confined to "carrying over" from the next account. The rates of continuation have been light, and the settlement by no means a heavy one. Market prices have ruled fractionally lower; but the chief instances of a decline have only amounted to 1/2 in Brighton, and § in Sheffield stocks,

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :---

JOINT STOCK BANKS.-A good many shares have altered for the better in this department, although most of the changes are of a slight kind. Only two, the Central of London and the Imperial Ottoman, have decreased $\frac{1}{4}$. Amongst the London banks, the London and Westminster has risen $\frac{1}{2}$; the National Provincial, 1 (on old stock, 42 paid) 1 (on stock, 10 paid) and the New Union shares, are also up $\frac{1}{2}$, and Scrip 1; London Joint Stock, $\frac{1}{2}$, and London Bank of Commerce, $1\frac{1}{2}$. Of Eastern and Colonial Bank shares, the following are each up 12:-Anglo-Hungarian, British Columbia, Chartered of India, English, Scottish, and Australian, Franco-Egyptian, London and South African and Bank of South Australia have risen 1; Land Mortgage of India debentures, 1; and English Bank of Rio, each 1.

-The circumstances which have occurred TELEGRAPHSduring the week to affect this market have been general in their character, though the Atlantic lines have particularly suffered on account of the interruption in the French cable, leaving only one now in working order. The following have receded: Anglo-American, 7: French Atlantic, 21; West India and Panama, $\frac{5}{8}$; British Australian, $\frac{1}{4}$; British Indian, $\frac{1}{4}$; China Submarine, $\frac{1}{4}$; Brazilian, $\frac{1}{4}$; Mediterranean, $\frac{1}{4}$; Western Union of United States Mortgage, 1. Submarine Cables Trust have fallen 2.

MINES .- Cornish tin mines are much depressed in value, and, though the price of coal has tended downwards, the im-mediate effect of the late heavy fa'ls in tin standards has been to depress shares strongly and generally. The following have fallen during the week:—North Roskear, 5; East Bassett, 4; Tin Croft, 3; Herod's Foot, 2; South Wheal Frances, 2½; East Lovell, 1; Devon Great Consols, 11; West Bassett, 1; West Seton, 1; South Condurrow, 2; East Caradon, 4. In the foreign market, General Mining have advanced 1; Russia Copper, $\frac{1}{2}$; Last Chance, $\frac{1}{4}$; Eberhardt and Aurora, 1; Flag-staff, $\frac{1}{2}$; Colorado Terrible, $\frac{1}{4}$; Bichmond Consolidated $\frac{1}{4}$; Port Phillip, 1. Emma shares close at 65 1, a fall of 21 for the week.

THE ECONOMIST.

MISCELLANEOUS .- The market has not been very lively in these this week, and the changes to record are consequently small for the most part, in any individual stock, if pretty widely distributed. Two land companies' shares have risen-Peel River 2, and Scottish Australian 3, but with these exceptions, and that of the Ceylon company, up 2, there are no other prominent advances on the week. United States Mortgage, New York City, Boston City, and Foreign and Colonial Government Trust, 5 per cent., 1873, have each gone up 1. The commercial and financial companies show the following changes :- City Offices, Credit Foncier of Mauritius, each up 1; Fore Street Warehouse, International Financial, and Trust and Loan of Canada, each up 1. While Pawson and Co. are down 1, and the General Credit and Discount Company 1. The National Steam Navigation have again gone up 1. One tramway stock is up 1—the London; and one down 1—the Lisbon. The London General Omnibus shares are up 1; Young's Paraffin Light 1. The following have variously declined :- Phosphate Sewage, 1; Native Guano, $\frac{1}{2}$; Italian Irrigation, $\frac{1}{4}$; Van Diemen's Land, $\frac{1}{2}$; and Natal Land, 1; Huntingdon Copper Mine, 1; Share Investment Trust Preferred, and Foreign and Colonial Trust, Fives, are each down 1.

BULLION .- The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :-

Gold.—With the exception of about 40,000/, received by the Edin-burgh Castle from the Brazils, there have been no arrivals of gold, consequently about 141,000/ has been withdrawn from the Bank, 100,000/ of which was sent to New York, and the balance to the Cape and Brazils. The P. and O. Steamer is due to-morrow, with 690,000/, from A untralka , about 150,000 of this recent here in a more in a more in a more in a more sent to be the sent to be the sent to be the sent to be a more sent to be the sent to be a more sent to be a mo from Australia; about 150,000 of this amount, being in sovereigns, will probably be sent into the bank ; the remainder has been already sold for export.

Silver is firm at the price of 59³/₄d per oz standard, the demand being chiefly for the continent. The amounts to hand during the week have been received chiefly in Doré silver from New York, the total being about 273,000L

Mexican Dollars .- Those lately arrived here have been sold for the East at 594d for the new, and 624d per or for the old coinages. The Weser brought 20,000l from New York, and the Pekin has taken about 110,000l to China and the Straits.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10rd per Tupes.

Quotations for Bullion.-Gold-Bar gold, 77s 93d per oz std, last price; ditto fine, 77s 93d per oz std, ditto; ditto refinable, 77s 113d per oz std, ditto; South American doubloons, 73s 9d to 74s per oz. Silver-Bar silver, fine, 4s 113d per os std, last price; ditto, containing 5 grains gold, 5s 04d per oz std, last price. Mexican dollars, new, 4s 11d; old, 5s 25d per oz std, last prices.

According to the Gazette return of this evening, the movement in the precious metals during the week ended April 23, has been as follows :-Gold-import, 104,037l; export, 524,784l. Silver - import, 243,040l; export, 36,699l. About 100,000 sovereigns from 'Sydney have been sent into the Bank to-day.

NOTICES AND REPORTS.

RAILWAY COMPANIES.

Atlantic and Great Western-Erie. - The Daily Telegraph has published the following despatch from New York :-

The committee employed in investigating the matters connected with the Erie railway have issued their report, and condemn the conduct of Watson, the president of the road. It is now probable that a bill will be introduced to prohibit the payment of uncarned dividends or any arrange-ment, for lease or sale, between the Erie and the Atlantic and Great Western Companies.

Messrs Bischoffsheim and Goldschmidt deny the trath of Report probably in ten days, expected completely and con-clusively favourable."

Caledonian.-At an extraordinary meeting, held at Glasgow on the 18th of April, it was resolved :--" That this meeting receive the report now submitted, and hereby appoint Messrs George Smith, John M'Gavin, Henry Bruce, Henry Grierson, William Thomson, and Richard Wilson, as a committee to assist the directors in the negotiations now pending, with the view of bringing about an amicable adjustment of the differences existing between the several companies, and to report to a future meeting of the shareholders.'

Somerse! and Dorset (Extension) 5 Per Cent. Debenture Stock .-The directors are prepared to receive subscriptions for 120,000*l* of Perpetual Five Per Cent. Debenture Stock in sums of 100*l* and upwards. This debenture stock is secured upon the extension to the Midland Railway at Bath.

Highland.-The revenue for the half-year ended 28th Feb-ruary amounted to 122,834l, from which was deducted 2,500l, tollage to the Caledonian, leaving 120,334/. To this was added 427l tollage from the Great North of Scotland, 1,546l rents, &c., and 2,486l from the preceding half-year, making 124,793l. From this was deducted working expenses, leaving 66,202/ net revenue. From this was deducted interest on debentures and Preference Stocks, and 24,414l proposed dividend on the Ordinary Stock at the rate of 44 per cent. per annum, leaving 285/. The failure of the potato and grain crops had a bad effect. Capital expended 3,046,063.

BANKS.

Anglo-Austrian.—The report presented to the shareholders in Vienna on the 19th April, shows a profit for 1872 equal to 410,000/, out of which 2/ per share, amounting with the ad interim dividend to 24 per cent. upon the paid-up capital of 1,600,000/, was declared. It has also been resolved upon to issue 50,000 new shares at a premium of 80fl paper money.

Anglo-Hungarian.-The report presented at Pesth on the 8th inst, announced a mal dividend for 1872 of 8fl, Austrian currency, in addition to the interim dividend of 4fl, Austrian currency already paid, making a total distribution of 12fl per share, or equal to 13¹/₂ per cent. The London coupon will be 14s 6d per share, free of tax.

Bank of Constantinople .- A dividend of 11s per share is payable on the 1st May.

Commercial of the River Plate .- After writing off the preliminary expenses, 5,000l from the purchase-money of the busi-ness of Messrs Wanklyn and Co., and after meeting all charges, the directors recommend ahalf-year's dividend at the rate of 10 per cent. per annum, leaving 4,040l 16s to be carried to the current year. The existence at Montevideo of an establishment of somewhat similar name has delayed the official registration in that city. In order to terminate this inconve-nience, and to enable the bank to proceed to an issue of bank notes in Montevideo, the directors recommend that the name of the bank be changed to "Mercantile Bank of the River Plate, Limited."

Manchester and Liverpool District Banking .- The directors are issuing 8,268 new shares, upon which 101 will be called up, at 12l per share premium.

National of India.—At the meeting a dividend at the rate of 4 per cent. per annum was declared, making 34 per cent. for the year.

THE ECONOMIST.

[CONTINUED FROM PAGE 502.]

ASSURANCE COMPANIES.

Realm Marine .- At the adjourned meeting, the shareholders adopted the report, and it was stated that negotiations were in progress for increasing the capital of the company by placing the remainder of the shares. MISCELLANEOUS COMPANIES.

Brill's Brighton Baths .- A call of 1/ 10s per share is due on the 1st June.

British Patent Tanning, Limited.—Capital, 120,000l, in 2l shares. The object is to purchase and work Mr C. Herveux's

patent tanning process for the United Kingdom. Callas Dock.—Dividend, \$96 per share, less cost of remitting. Inns of Court Hotel, Limited.—Capital, 100,000l in 20l shares. The object is to purchase the Inns of Court Hotel, Holborn, and, if thought desirable, the unfinished building adjoining, and in proximity to the new Palace of Justice. For 30,000/ and a rent of 1,535l the lease for 99 years will be acquired. *Montevideo Gas.*—The accounts of the first half-year's opera-tions ended December show a balance of 27,589l. Out of this

the directors recommend the payment of a dividend at the rate of 8 per cent. per annum, free of income tax. This will leave 7,5891, out of which the directors propose to place 7,0001 for the establishment of an insurance and contingency fund. Royal Mail Packet.—The following is extracted from the

annual report :-

A comparison of the "working account" with that for the preceding twelve months shows the excess of the "disbursements" in the year 1872 to be in the aggregate 21,603/, spread very generally over various heads. On the other side of the "working account," the "receipts" show the large increase of 71,417/, part of which, of course, arises from the addi-tional services. In the result, the "surplus" of the "working account" exceeds that of the year 1871 by 49,814/. The continued success with which the company's officers have navigated the fleet enables the directors to present an insurance account in which there is no debit for accident, and which shows a balance of 231,0791 in favour of the company. Making a sufficient reserve for claims, the directors recommend the payment for the half-year ended 31st December, 1872, of 3*l* 15s per share from the "profit and loss account," and a bonus of 2*l* per share from the "insurance account," making in all 5*l* 15s per share, free of income tax.

Société du Cable Transatlantique Français .- The French Atlantic Cable has been interrupted about 200 miles from Brest m shallow water.

Swedish Iron Rolling Stock and Implement Works, Limited.— Capital, 120,000l, in 20l shares. For about 130,000l, partly in mortgages and shares, and partly in cash, some "important and well-known" works at Ofverum, in Sweedn, will be acquired. The property covers 14,400 acres, and the works are in operation.

MINING COMPANIES.

Flagstaff Silver .- A. monthly dividend of 5s per share is payable on the 1st May.

Last Chance Silver.--Fourth monthly dividend 2s per share. Native Iron Ore, Limited.-Capital, 50,000l in 10l shares; 3,500 shares bearing 121 per cent. preferred dividends offered for This company is formed to acquire and public subscription. carry on the red hematite iron ore mines of Pawton, the brown hematite and magnetic iron ore mines of Smallacombe, and the Atlas tin mine adjoining the latter property. The purchase price is 40,000l, of which 15,000l is to be in fully paid deferred shares, and the remainder in cash.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

On the 1st of May next and thenceforward, money orders may be obtained at any Money Order Office in the United Kingdom, payable at the General Post Office in Paris. The commission chargeable will be uniform with that charged on money orders issued on Belgium, Switzer-land, and the Netherlands, viz. :--On sums not exceeding 2l, 9d; above 2l and not exceeding 5l, 1s 6d; above 5l and not exceeding 7l, 2s 3d; above 7l and not exceeding 10l, 3s. No single money order will be issued for a higher sum than 10l. The issue of money orders in Paris, payable at Money Offices un this country will also commence payable at Money Order Offices in this country, will also commence on the 1st of May next.

COMMERCIAL EPITOME. FRIDAY NIGHT.

The reports from Liverpool speak of a quiet market as characteristic of the week, but taking into account the season and the fluctuating way in which supplies reach American ports, the business may be held to have been fairly good. The daily sales have averaged upwards of 10,000 bales for the week, and prices have fluctuated somewhat, closing, however, at about last week's figures. On the other hand, the fall in receipts at American ports has been as great as the previous sudden rise—barely averaging 7,000 bales a day—and this has again induced a rise, so that middling Upland is now 19%c. Prices here are slow to respond to this advance, and should it be maintained, the market may probably rule duller. The Manchester market has not been very active, its tone being dependent to a large degree on Liverpool, partly because the cost of production, still so great, has made it keenly sensitive to the slightest variation in the cost of the raw material. Still the shipments for the East, and particularly for China, have been good, if in some cases more restricted than they would otherwise be, from the unfavourable state of the Eastern markets. Home yarns have been quiet, and the trade in piece goods moderate at a slight decline in quotations. Business has been a little better in London, and prices generally well maintained.

Waiting for the note to be struck by the London wool sales which began vesterday, buyers have abstained from doing much this week. The markets have been very firm, however, the necessities of consumers compelling them to buy to some extent at holders' prices. The first night of the sales passed without showing any fall in prices, but whether the quotations now ruling be maintained or not, it is probable that trade will now be less restricted than it has lately been, for there is a good inquiry from foreign merchants for yarns and pieces. In the former some check has been temporarily given to the demand for certain descriptions by the advanced quotations of spinners, but generally the trade is good both for home and abroad. In the piece department America continues to buy well, and the home trade is also good. Makers of all wool goods are taking good contracts, and not a few merchants wait simply to see the effect of the sales now current before placing their orders. Should prices at these fall in any degree, makers will hardly be able to stand out for the advances many of them now ask.

The weather, although much colder, has continued favourable for the most part, and the corn sowing may now be con-sidered over. The spring crops are thus laid down under more favourable conditions than the autumn, and the prospect for them is good. This has had considerable influence on the market in restraining speculative business and in keeping prices down, which otherwise show a decided disposition to go up. Reports from several country districts, in fact, and in spite of this, speak of an advance on the best descriptions of English and Foreign grain of from 6d to 2s per quarter; but this is not yet general. In no case, however, have good samples been sold at a decline on last week's prices. The home supply of wheat has been larger this week. Californian, too, continues to arrive in large quantities, and is sold at more moderate prices than almost any other kind, which also has some effect in keeping prices down. But much of this supply is now likely to be bought for the continent, a demand arising for it in Lower Germany, the Netherlands, and even in France. A good deal of what is afloat may now go to these places, hence, even should the weather continue fine and everything prove favourable to the crops, a lower range of prices than the present is hardly to be anticipated. On the other hand, should the spring be bad, and as our Europeon supply appears to be about exhausted, it is probable that, notwithstanding the large stores of Australia and California, the fact of foreign merchants coming to our markets to buy may materially

quicken the upward tendency which all sorts of grain are then, in any case, sure to show. There is no quotable change in the prices of flour for the week.

There is a decided pause, which appears to precede a turn in the general condition of the iron trade. The main causes of this reduction in demand are two, viz., the absence of good supporting orders in the finished branches, such falling off occurring markedly in foreign requirements; and, secondly, the falling state of coal markets, which, though principally confined to household descriptions, must have an indirect effect on that used in iron manufacture. From the "heavy" district of the North of England comes the following report :--Little business has been done, though the market is firm, inquiry for any sort of iron being but small. Shipments of pig iron continue good, but this manufacture, though likely to be active for some time, depends upon the demand for finished iron, and the latter does not appear to be so good as was expected. Limestone quarrymen have struck work, and the dispute with ironstone miners is not yet settled, though a Board of Conciliation is resolved on. As regards the South Board of Conclusion is resolved on. As regards the South Staffordshire district, the report from Wolverhampton is as follows:—The trade is strong, but orders are held back, as buyers are looking for a fall in prices. Some makers are well employed, but complaints are made of the email amount of American and Australian orders now coming to hand. Makers prefer the prospect of working short time rather than lose by underselling. From Birming-ham much the same accounts was given of the trade Buyers ham much the same accounts are given of the trade. Buyers are ordering very sparingly whether for home or foreign con-sumption, especially is there a dearth of orders from America. The Lancashire iron trade is quiet and coal is falling in price, but in the meanwhile iron production is proceeding rapidly. The following is expressive of the state of the coal trade : "At present there appears to be a disposition on the part of colliery owners to stock rather than sell at reduced prices, but stocking is a matter upon which very strong views are held by the miners, and at one colliery the output, directly coal began to accumulate on the pit bank, was reduced from about 1,100 to less than 400 tons per day." It would seem, from the evidence of a witness before the Parliamentary Coal Committee, that the Wigan colliers, since their demand for weekly wages, have not fulfilled the conditions on which it was granted, viz., working six days a week; and he also considers that the Government rules tended to reduce the output amongst other ways by limiting a week's work to 54 hours, which the miner's irregular habits prevented him doing within the legal time. High prices in Belgium have had the effect of bringing new orders for iron to a minimum, and prices are drooping ; as to coal, supplies are better, and it is reported that colliers are returning disappointed from Westphalia.

EXTRACTS FROM TRADE CIRCULARS.

(From Messrs Sir Charles Forbes and Co.'s Cotton Circular, dated Bombay, March 31.)—The transactions during the past fortnight have been on a fair scale for the season, aggregating about 11,600 candies of new, and about 200 candies of old, cotton for immediate delivery, and about 3,500 candies of new cotton for future delivery. Inquiry has been confined almost entirely to the better descriptions of cotton, both for immediate and future delivery. Inferior qualities of both old and new cotton are totally neglected. Supplies are now coming forward more freely, but, notwithstanding the arrivals by latest returns since 1st January last, are still about 109,000 bales of 3½ cwts short of those to a corresponding period last year. The parcels of Akote, Surat-ginned, and Labracore now arriving would generally class "good fair;" but other descriptions would, with a few exceptions, barely class "fair." (From Messrs A. C. Stewart and Co.'s Wool Circular, dated

(From Messrs A. C. Stewart and Co.'s Wool Circular, dated Port Elizabeth, March 20.)—Our last advices from Europe were of a discouraging nature as to the future prospects of wool, and there is an entire absence of speculation; the few orders that are in force are limited very low; and the small stocks that are in town, having cost dear, are not parted with by holders at the prices buyers are willing to pay. Our advices from the country do not lead us to expect any quantity of the new clip for another month at least. Long, bright Uitenhage scoured is wanted, but, owing to the scarcity of water there, every lot that comes in is poorly washed, and utterly deficient in brightness. Until we have copious rains we cannot look for any improvement in this respect, and we fear that the well-earned reputation of Uitenhage snow whites will suffer in consequence. Country scoured and inferior Uitenhage are neglected.

(From Messrs Willans, Overbury, and Co.'s Wool Circular, dated April 24th.)—The sale room presented that crowded appearance which has now become familiar on the opening might of the auctions, buyers, both home and foreign, having imustered in full strength. Although the arrivals, owing to recent prevalence of easterly winds, are somewhat smaller than was at one time anticipated, and much animation marked the biddings, prices for medium washed Australian fleeces

and scoured Cape wools ruled rather in favour of the buyer, other descriptions remaining without quotable alteration. The arrivals to date are 210,422 bales, of which about 7,500 bales have been forwarded direct from ship to the manufacturing districts and the continent.

(From Messrs Mohr Brothers and Co.'s Rice Circular, dated Akyab, March 25.)—Soon after departure of last mails supplies on our market began to show a considerable falling off, owing, it is reported from the interior, to the reluctance on the part of growers to sell any more of their produce at present prices, which has caused a rather firmer feeling here. There has besides arrived a large fleet of coasters, for which the native shippers are paying about 3 rs higher than market rates, securing thereby the bulk of the limited supplies that are coming in at present. However, the tonnage arriving but slowly, there exists no pressing demand for produce, and the market remains therefore quite steady at our last quotations, 40 rs to 41 rs per 100 baskets for good shipping quality, weighing 28 lbs per basket, at present rates of exchange, equal to 4s 6dd to 4s 7dd per cwt free on board.

ing 28 los per basket, at present rates of exchange, equal to 4s 6¹/₂d to 4s 7¹/₂d per cwt free on board. (From Mr W. Moran and Co.'s Indigo Report, dated Calcutta, March 26.)—The sale is reported in the bazaar of 30 chests C. V. H. Boribaree, Rungpore, at 140 rs per maund all round, besides which, a few small lots of native odds and ends have been placed. We have no change to report in the nature of our advices from Tirhoot and Chuprah. No rain has fallen in any of the districts of Lower Bengal, and the want of it is beginning to be felt in some places.

(From Messrs J. Berger Spence and Co.'s Weekly Chemical Report, dated April 19.)—The improvement noticed in our last report has been followed by a week of inactivity in the chemical market. For home consumption there is still a fair demand, but buyers are evidently becoming less anxious as to their supplies. Reductions have been very general during the past week, and further concessions may yet be made, but it is not to be expected that prices will recede to a low level. Canadian shipments are already being despatched in considerable quantity, and the re-opening of communication with the Baltic and other northern ports will no doubt impart a stimulus to the trade. The uncertainty regarding what export duty Peru may impose on nitrate of soda continues to weaken the position of holders in this country for the moment.

The following statement shows the landings, deliveries for home consumption, and the stocks of the chief articles of colonial and foreign produce in London for the week ended April 19:---

	Landed.	Home Consumption.	Stock, 1873.	Stock, 1872

THE COTTON TRADE.

LIVERPOOL -APRIL 23.

The cotton market was rather firmer in the early part of the week, but has since become dull, and the quotations of most descriptions show a decline. For Sea Island the demand has been more general at previous rates. American of all qualities continues to be plentifully offered, and prices have given way ¹/₅d to ¹/₄d per lb. New York advices to the 24th inst. quote middling Upland, 19²/₅ cents, costing to sell in Liverpool 9²/₅d per lb by steamer. In Brazil the business has been moderate, and prices are unchanged for all descriptions except Maranham, which are raised ¹/₅d per lb. For Egyptian the demand has been sluggish, and the quotations in some instances are ¹/₅d per lb lower. West Indian has been in fair request at last week's rates. Peruvian continues in moderate demand, and rough stapled

THE ECONOMIST.

kinds are rather lower. East Indian has been dull, and difficult of sale. The recent arrivals of new cotton have been very freely offered, and prices irregular at fully ½d decline. The medium and lower grades are ½d per lb lower. In cotton "to arrive" and for future delivery, the transac-tions have been to a fair extent, with hittle change in price,

tions have been to a fair extent, with little change in price, but the latest quotations are rather higher than those of last **Thursday** :—American, basis of middling, from any port, not below low middling, delivery April, $9_{1^{1_{s}}d}$; June-July, $9_{1^{s}_{s}}d$; ahipment May-June, $9_{1^{d}}d$; not below good ordinary, shipment March, $9_{1^{d}}d$; April, $9_{1^{s}_{s}}d$; April-May, $9_{1^{s}}d$; October-Novem-ber (new crop), $8_{1^{d}}d$; delivery June-July, $9_{1^{s}_{s}}d$; New Orleans, not below good ordinary, shipment March, $9_{1^{s}_{s}}d$; March-April, $9_{1^{d}}d$; April-May, $9_{1^{d}}d$; Broach, Cape, machine-ginned, good fair new merchants, not below $\frac{1}{4}d$ off good fair, old terms, shipment April-May, 8d per lb. shipment April-May, 8d per lb. The sales of the week, including forwarded, amount to

69,810 bales, of which 3,940 are on speculation, and 7,170 de-clared for export, leaving 58,700 bales to the trade. FRIDAY, April 25.—The sales to-day will probably amount to about 10,000 bales; the market without change. PRICES CURRENT.

In speculation there is a decrease of 303,670 bales. The imports this week have amounted to 64,153 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to date) is 541,000 bales, against 650,000 bales at the corresponding period last year. The actual exports have been 7,773 bales this week.

LONDON.-APRIL 24.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :--

been quiet throughout the week, with only hag moderate sales on the spot, at prices rather in favour of

buyers. For arrival, prices are barely supported. Sales to arrive-1,200 bales Tinnivelly, at 7¹/₁₅d to 7¹/₁₄, December to February, for good fair; 100 Western Madras, 7d, February sailing, for good fair; 2,100 Dhollerah, 6¹/₂d to 6[§]d, April-May, Cape, old terms, for fair new; 6¹/₁[§]d, for good fair dew; 400 Oomrawuttee, at 6⁷/₁[§]d, March-April, Canal, old terms, for fair new; 200 Scinde, 5[§]d, April-May, for good fair,

NEW YORK.

From Messrs Neill Brothers and Co.'s cable despatch, dated Friday, April 18:-

AMERICAN MARKETS .- All the markets have had a downward tendency this week, and the quotations at the close are lower all round. Middling at New Orleans opened at $9\frac{1}{16}$ d, but gradually declined until $9\frac{1}{16}$ d was touched, from which there has been a slight recovery to $9\frac{1}{16}$ d laid down. Mobile has given way almost daily, and $9\frac{1}{16}$ d is now the closing quotation. Good ordinary at Galveston is id lower on the week. At Charleston and Savannah 91d and 91d were the respective quotations at the beginning of the week, but yesterday they were quoted 9_{16}^{5} d and 9_{16}^{4} . At New York prices have declined 3-d during the week. Compared with the prices of a fortnight ago (the date of our last circular), prices at Gulf Ports have given way about $\frac{3}{2}d$, and at the Atlantic markets $\frac{1}{16}d$. The market opened heavily this week for "future" deliveries at about $\frac{1}{2}d$ decline from the rates reported at the close of the

previous week. Prices continued against sellers until yesterday, when a recovery of $\frac{1}{16}$ d occurred. The following are the latest quotations :-Apr. May. June. July.

	and the state of t		dis owners now

CEIPTS AND CROPOur cabl				
ioned that the tributary rivers h	ad aga	in rise	n, which	was

menti increasing the volume of receipts. Little positive increase, however, resulted till yesterday, when 11,000 bales reached the Gulf, against 2,000 on the same day last week. This has swollen the week's figures to 59,000, against 47,000 last week and 37,000 last year. This renewed increase in the receipts will doubtless cause a renewed tendency to increase crop estimates. But there is nothing in it very different from what has been anticipated. It would not have been safe to build any conclusions on last week's small figures (47,000 bales), nor is it so to reckon from this week taken by itself. But even doing so the total to be deduced is not beyond what we have often prepared our friends for ; 59,000 is just 60 per cent. over receipts of the corresponding week last year, viz., 37,000.

We understand that some people now even believe in a commercial crop of 3,800,000, or a total growth of over 3,900,000 ! This would involve future receipts of 503,000 bales, or 191 per

THE ECONOMIST.

cent. over those cf last year; and we ought at this rate to have received this week 107,000 bales instead of only 59,000. Unless those who anticipate such a total as that referred to can give some reasonable explanation as to why present receipts are so totally inconsistent with their theory we do not think much weight should be attached to it.

The annexed is from Messrs Neill Brothers and Co.'s Cotton Circular, dated Thursday, April 24 :---PRICES to Liverpool, per sailing vessel, cost, freight, insurance, and six per cent.

MARKETS IN THE MANUFACTURING DISTRICTS

MANCHESTER, April 24.—We have very little change to report respecting this market during the past week. The demand all round has been sluggish, and the production of few things has been cleared off. There is still a fair demand for shirtings at old rates, preference being given to better qualities suitable for China, but in most other varieties of goods the inquiry is small. In the lighter class of goods, such as mulls, cambrics, and Dhooties, manufacturers are well sold, and do not as yet press sales; but in heavy goods, viz., domestics and T' cloths, there is little doing and values are very irregular. Yarns for export more slowly, though large offers have been made at prices slightly under to-day's quotations. Notably in 30's water and 40's mule for China. In the home trade there is little doing, consumers still buying as sparingly as possible. COMPARATIVE STATEMENT OF THE COTTON TRADE.

LEEDS.—There has been a very confident feeling as to the future on the part of both manufacturers and merchants. Several London buyers have been coming to and fro making purchases, the reason assigned for this sudden animation being that they are quite satisfied the price of wool will in a few days be higher.

DUNDEE.—Business, somewhat interrupted by holidays, continues active. The market for flax and tow yarns has been quiet. There is still a fair demand for linens, but for jute fabrics rather weak, compared with what it was a short time ago.

NOTTINGHAM.—The improvement noticed in the lace trade last week continues, and manufacturers generally are pretty well employed in finishing cotton goods. In the hosiery trade no change has occured since last week, and business is, on the whole, in a healthy state.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK—April 11. Flour ruled dull and weak until Wednesday. Receipts by

rail showed considerable increase, and the tendency was down-ward. The general demand fell off, and buyers would not purchase, except to supply immediate wants. The little export demand that was noted was from London and the West Indies. demand that was noted was from hondon and the west indies. Under this state of affairs prices experienced a slight and somewhat irregular decline. On Wednesday the local trade bought much more freely, and there was a general shipping demand from the British provinces, from Great Britain, and the West Indies, but business was checked by the firmer views of holders. For good lines of extra State \$7.25 was bid, and \$7.40 to \$7.50 asked. Wheat has been dull and heavy; No. 2 Milwaukee has been sold to a limited extent at \$1.62 to \$1.65 in store and afloat; but the principal business has been in car lots of rejected and No. 3 spring, mostly at \$1.40 to \$1.50. An advance in ocean freights and depression in exchange have counteracted the effect of small stocks, and more favourable advices by cable. On Wednesday there was a steadier tone, but very little done. Yesterday the demand somewhat im-proved, and the sales embraced a boat load of No. 3 spring at \$1.53 afloat, and another of No. 2 Chicago at \$1.59 in store; No. 2 Milwaukee held at \$1.65 to \$1.66 affoat, but offered for delivery in May and June by canal at \$1.58. Corn has also declined. The demand has been limited, and the desire to realise has been more urgent; prime old mixed declined, consequently, and sold at 63c to 63tc in store, and 65tc afloat; while new sold at 63c to 64c afloat for Western mixed, and 64c to 65c for Southern and Western yellow. The market has seemed to be wholly without spirit. The large stock in store, and the limited local trade, leaves prices almost entirely to the views of shippers, and they have been embarrassed by an advance in ocean freights and other circumstances. Yesterday there was a good business in old mixed at 63c in store, and 654c to 654c afloat, with prime new mixed at 63kc afloat, and old Western yellow at 644c in store. Prime mixed to arrive by course of offered at 652 with 61c bid. to arrive by canal is offered at 62c, with 61c bid. Of rye we notice the sale of a boat load of Canada, in bond for export, at 87c. Barley is again quite unsettled; current receipts by rail all closed out at prices much below those demanded for lots in store. Oats have been without important variation. The demand has been good and pretty freely met, closing with sales of prime Western mixed 53c for old in store, and 52½c to 53c for new afloat.

The visible supply of grain, including stocks in store at the principal points of accumulation, at lake and seaboard ports, in transit by rail, and frozen in New York canals, April 5, 1873 :--

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING. The weather during the week has been mostly dry and favourable for field work, but cold with frost at night, and unfavourable for vegetation. Its effect upon the trade has been to increase the firm tendency noticed last week, and with diminished supplies of English grain offering, prices generally throughout the principal markets of the kingdom hardened, whilst for wheat an occasional advance of 1s to 2s per qr upon good qualities has taken place. From Continental shipping ports quotations come almost without exception very firm or higher, whilst at New York rates have advanced, and, so far, indications are against any rapid addition to the quantity of grain on passage, but that is still larger, and arrivals at ports of call have increased. The upward movement in es has not therefore been very de-

[April 26, 1873.

THE ECONOMIST.

Im

cided. From California the reports mention that rain had set in, and the prospects of production improved. At Mark lane the receipts of English grain continue very small, but owing to the indifferent quality are almost unsaleable. For anything good, full prices are, however, readily obtained. Foreign wheats generally are well held. Russian have met with a fair demand for consumption at very stiff rates, fine Saxonka selling at 63s to 64s, and other grades at 56s to 60s per quarter. There is a good inquiry for spring American, but very little offering, and for which high prices are required. Californian wheats are still dull, and in some cases have been pressed for sale on rather lower terms. A parcel of 800 quarters Australian new wheat, the first arrival (by steamer) was sold this week. The quality was very fine, and 66s per 496 lbs was realised. Flour is unchanged in value, and in moderate demand. Barley of all kinds is very firm, grinding sorts tending against buyers. Beans and peas move off rather slowly, but fully uphold their value. Arrivals of oats have rather increased, but stocks are very light, and the market very firm; good stout qualities are again rather dearer, and medium grades firmer than recently. Sweet American mixed maize sells steadily at 28s 6d.

The annexed statement shows the imports of grain into and exports from the United Kingdom, during the week ended April 19, and since the beginning of the season (Sept. 1):—

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 98 grain and seed-laden vessels have arrived at ports of call, viz.— 30 wheat, 11 maize, 18 barley, 4 beans, 1 peas, 1 linseed, 19 cottonseed, 1 milletseed, 1 locust beans, 4 Dari, 7 Valonea. The floating grain trade has, on the whole, been very firm in tone. At the close of the week, however, a quieter feeling was apparent. The choice of cargoes of wheat offering on sale has considerably improved, and the tone was, in the first part of the week, very firm, with an upward tendency in value. At the close of the week, however, less disposition was shown for business, and concessions would have had to be made to meet buyers' views. Several cargoes of barley have this week been offering on sale, and a steady demand has been experienced at full prices. Several arrived cargoes of beans have changed hands at full prices. Linseed—spot quiet, but more inquiry for shipment. Rapeseed inactive and nothing offering. Cottonseed steady at late rates, 7l 5s to 7l 10s.

COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE POSTSCRIPT.

509

MINCING LANE, FEIDAY MORNING. SUGAR,—The market has been rather firmer with a partial revival demand, which is at present chiefly confined to the lower qualities.

of demand, which is at present chiefly confined to the lower qualities. Holders are less desirous to sell than last week, pending the new duties coming into operation, yet no improvement i prices can be quoted. A few floating cargoes have sold for the United Kingdom, including one of St Vincent's of the new crop at 22s 6d. At auction 249 casks Barbadees. The first import of this occasion went at 26s 6d to 30s 6d for soft, and 32s to 34s for crystalised. Total sales of West India 699 casks. 1,160 bags fine grainy Demerara in public sale realised 35s 6d to 36s 6d, and syrups at 25s to 28s 6d. Arrivals are light owing to the adverse winds. The landings in London last week were 5,360 tons; the total deliveries 2,150 tons, consequently the stock shows some increase. For the United Kingdom it is in excess of last year's by 46,000 tons. The deliveries during the past week were limited on account of the holidays.

Penana -500 baskets at	19s 6d					

Madras.-By private contract, 3,000 bags Jaggery have sold at 18s 3d. Natal.-750 bags withdrawn, and since part sold at 23s for soft brown.

China.-400 tons brown are reported at 20s.

Java.-4,000 bags syrups sold at 18s 6d to 19s.

Other Foreign.-1,800 bags brown Bahia at 20s, and 200 casks Surinam at 27s.

Cargoes.—One of St Vincent's new crop at 22s 6d for the United Kingdom, one of 3,100 baskets Java, No 14, at 28s.

Refined.—The market is devoid of activity for dry goods, and prices remain as before. Clyde crushed has been steady. Pieces meet with a demand, and some few export orders have been executed. Foreign loaves quiet.

MoLASSES.---60 puncheons West India have sold at 13s 6d to 13s 9d. 719 casks Sydney treacle by auction found buyers at 14s to 16s 6d per cwt.

Rum.—A steady demand from the recent arrivals, and the latest sales of Demerara have been at firmer prices, viz., 1s 10d to 2s, according to quality; fine, including small packages, 2s 1d to 2s 3d. Berbice has brought 1s 9¹/₂d proof. Sales are reported in Jamaica at 3s 11d to 4s 6d per gallon.

Cocoa.—At the large public sales held this week, the buyers have supplied their wants freely, and prices do not show any important change except for low Trinidad, which went cheaper. 2,442 bags about two-thirds sold. Low grey, 50s to 56s; greyish mixed to fair qualities, 58s to 75s; good to fine, 78s 6d to 105s. 3,749 bags Grenada of the new crop all found buyers. Some of the very inferior qualities ranged from 41s to 45s 6d; ordinary to fair sold at 46s to 50s; middling to fine, 50s 6d to 63s. 628 bags Foreign only partly found buyers. Bahia, 46s to 50s; Surinam, 55s 6d to 56s 6d per cwt. 682 bags Guayaqua withdrawn. Privately small sales of good.

COFFEE.—The market continues firm, late enhanced rates being srpported as stocks are still at a very low point by comparison with other years. Owing to the small supply with protracted arrivals, the deliveries have fallen off sensibly during the past fortnight. The public sales of Plantation Ceylon have comprised 287 casks, 98 barrels, and 316 bags, which sold, the latest quotations being as follows: palish and low middling to middling colory, 96s to 99s; bold, 98s 6d to 100s 6d, according to quality, and small berry 94s to 96s 6d. 272 bags Native : good ordinary at 86s 6d. 487 bags Courtallum : middling to bold, 98s 6d to 101s 6d; 56 cases 7 bags East India. Wynnad, 93s 6d to 100s. 682 bags Native East India were withdrawn above the value. 61 barrels 86 bags Jamaica sold at 87s 6d to 91s for good to fine ordinary greenisb, and 93s 6d to 97s for small greenish to low middling. 33 bags washed Rio at 35s to 95s 6d. 1,335 bags low and ordinary Rio at 74s 6d to 81s 6d. 1,469 bags other foreign: Costa Rica, 96s to 97s; Central American, 88s 6d to 98s 6d. Privately on the spot business has been done in Native Ceylon and Mocha from second hands. To arrive, a few sales of Plantation Ceylon have been effected at 97s to 99s and 96s to 96s 6d for crops. 7 tons native Ceylon sold at 86s to 86s 6d. 100 tons Manila at 86s to 86s 6d, and some East India Plantation prices not given. A floating eargo of Rio sold at 76s per cwt.

SAGO. -295 bags by auction, part sold : dull small grain, 15s ; bold, 20s to 21s 6d; medium, 18s 6d.

Sago FLOUR .- At yesterday's sales 1,561 bags Singapore were taken in at 16s per cwt.

BLACK PEPPER.-Speculative operations have led to an advance of ad to id. By private contract Singapore, on the spot, has sold at 7 d to 7 d; Penang, at 6 d to 7 d; the latter, to arrive, at 6 d to 7 d; and Singapore, at 71d. At auction, yesterday, 721 bags Batavia were withdrawn ; also the bulk of 479 bags Singapore, at 7 d, a small quantity of very low obtaining 64d. 60 bags very superior bright brown Tellicherry realised 84d; one lot 75d. WHITE PEPPER.—The market is firmer with a better demand and

business by private contract. 372 bags Singapore by auction sold at

1s to 1s 1d per lb for low to fine bold quality, being rather higher. OTHER SPICES.—37 cases 41 boxes Penang nutmegs sold at steady rates. Brown, 78 to 70's, 3s to 3s 4d; 73's, 3s 3d; 80's, 2s 11d; 121's low mixed, 2s 4d; wormy and defective, 1s 5d to 1s 11d; ditto limed, 1s 5d to 1s 8d. 18 cases Penang mace chiefly sold as follows:--mid-dling to good reddish and pale, 3s 9d to 4s 3d; low and out of condi-tion, 3s 1d to 3s 2d. 73 packages Java were chiefly bought in, a few lots selling at 3s to 3s 3d per lb for chips and low quality. A further advance has been paid for Zauzibar cloves, viz., 8¹/₂d to 8²/₃d, by private centract. 109 pockets Bourbon by auction were withdrawn at 9d. Of 71 cases Penang, about one-third part realised 1s 1d to 1s 1d per lb for good quality, being 2d lower. 80 boxes China cinnamon in bundles sold at 10d per lb. 1,000 boxes cassia lignia part sold at 78s for un-worked. 180 cases Cochin ginger of old import brought 60s to 68s per cwt.

SALTETRE.—Further reduced rates have been accepted for Bengal to arrive; 100 tons sold at 27s 14d. Yesterday, 200 tons March and April, at 26s 6d. A few parcels on the spot, refraction 44, 29s 6d; 64 to 6, at 28s to 28s 3d per ewt, being steady rates.

SHELLAC.—A better demand prevails. 126 chests by auction part sold; fine second orange, 9/ 5s to 9/ 7s 6d. By private contract, fine orange at 9/ 10s. For arrival 300 chests, particulars not given. INDIGO.—At the periodical sales, which commenced on Monday, there has been a general want of animation perceptible with irregular prices. The shirpers having bought

The shippers having bought sparingly, and the good to fine qualities of Bengal show a fall of 2d to 4d. Good consuming sorts met a steady demand at par to 3d advance, but low went cheaper. Madras and Kurpahs steady, at last sales prices to 3d per 1b recovery thereon, but low went at par to 3d per lb discount. Of 8,261 chests in the cata-logue, 4,000 chests have sold. The sales of Guatemala, &c., indigo will commence on Tuesday the 6th proximo.

OTHER DRYSALTERY GOODS .- Business has been done in Bengal safflower by private contract: 111 bales by auction part sold at 4l 5s to 7l 10s. Gambia firm, and again rather dearer for arrival; sales at 25s 10td to 26s 6d, according to dates of shipment. 160 bales block by auction part sold at 26s to 27s 3d. 575 bales pressed cubes at 33s 9d to 35s 6d. 1,618 boxes Pegue Catch were bought in, and partly disposed of at 22s for good; 1,014 bags also partly realised the same price. 380 cases China galls at 52s 6d to 54s 6d per cwt. Myrabolanes are in demand.

HERP.—Manila is quiet, with limited transactions: 56 tons Russian, &c., by auction, partly sold. Rhine, 35/ 10s to 36/ 10s. Konigsberg, 34/; half clear, 30/ per ton.
 HIDES.—East Indian kips in yesterday's sales went at easier rates for some descriptions. Of 72,000 brought forward about 50,000 sold.

6,500 Buffalo hides, about half sold at previous rates to a trifling reduction.

JUTE. The public sales have been the chief feature of the week, but 19,228 bales brought forward on Wednesday went flatly, about onethird part being sold at irregular prices, the decline in some cases reaching 10s: low and ordinary, 10/ 10s to 12/ 10s; middling to fine, 18/ to 21/ 10s per ton. A limited business has transpired by private contract, as the large supplies here and afloat tend to damp speculation. The Dundee market is inactive.

METALS .- Prices have in several instances shown weakness. Straits tin at one time declined considerably, touching 137/ to 138/ cash, but subsequently recovered, and the market is now firmer. Latest sales at 139/ to 140/; to arrive, 140/. For delivery, contracts have been

made at 135/ to 139/. Copper is rather lower for imported descripmade at 135/ to 139/. Copper is rather lower for imported descrip-tions. Chili, 89/ 10s to 91/; Walaroo, 96/ 10s to 97/; English, unsettled. Spelter has been rather quiet, but the small stock of Foreign prevents any desided change in quotations. Selisian sold at 27/ 5s per ton. British very firm and still in good demand. A steady business has been done in Scotch pig iron at fluctuating prices from 122s to 118s cash. This morning 119s 9d is the value. TALLOW.—The market has been unsettled, but during the last two days it is much firmer in tone. Let at quotations: Petersburg rese

days it is much firmer in tone. Latest quotations: Petersburg, new, 43s 9d to 44s; June, 44s 3d to 44s.6d; last three months, 46s; De

cember only, 46s 6d; old, 43s 3d per ewt. LINSEED.—Sales of Culcutta at 61s 9d, April shipment, and via the

LINSEED.—Sales of Culentia at 618 9d, April shipment, and the Cape at 61s. On the spot, 64s 3d per qr. OILS.—No change in seal oil, although advices from the Greenland fishery are favourable. Pale quoted, 41l. Cod has advanced to 42l. Sperm steady, at 95l per tun, the stock being in few hands. Olive dull. Mogadore has sold at 38l, and Malaga by auction, without reserve, at 40l to 40l 5s. Gallipoli quoted 44l per tun. Linseed oil has been quiet, at 33l 5s to 33l 7s 6d; to Angust, 33l 15s. English brown rape, after some advance is now assist for delivery, viz., 38l last four months. On some advance, is now easier for delivery, viz., 38/ last four months. On the spot firm, at 36/ 10s. Refined, 38/ 10s. Cocca-nut remains in-active for current qualities, but firm for fine. Palm, 33/ to 39/ per ten for low to fine quality.

PETROLEUM.-American refined, 1s 23d to 1s 3d per gallon, with a moderate demand.

SPIRITS TURPENTINE .- American quiet, at 40s to 40s 6d. French, 6d to 1s per cwt less.

POSTSCRIPT. FRIDAI EVENING.

SUGAR .- The market is firm at the close : 471 casks West India sold, including crystalised Demerara, by auction at 33s 6d to 37s 6d, being rather dearer, making the week's business 1,195 casks. No business reported by private contract. COFFEE By auction, 357

-By auction, 357 casks, 222 barrels and bags Plantation Ceylon sold at full prices. 631 bags native : good ordinary at 86s 6d; rather bold at 87s. 245 cases 83 bags East India at full valuations. 67 half bales of Mocha withdrawn. 793 bags Guatemala realised 96s 6d to 99s 6d per cwt.

RICE.-At auction, 7,100 bags broken Bassein, 1,000 bags Bengal. TEA.-2,066 packages Indian were brought to auction this day. China tea unaltered for green descriptions.

SHELLAC.—312 chests by auction about half sold. Liver, 8/15s to 8/17s 6d; livery orange, 9/ to 9/7s 6d; button, 9/10s to 9/12s 6d. Other kinds, including ordinary native, at 7/2s 6d to 7/17s 6d. METALS.—Tin steady. Copper quiet. Scotch pig iron, 119s 6d to

120s 6d per ton.

TALLOW. - The public sales to-day were very small. 497 casks Australian by auction about two-thirds sold at easier rates. Mutton, 43s; beef, 41s to 41s 6d; inferior in proportion. Town advanced to 46s 6d. per cwt. Petersburg firmer.

ADDITIONAL NOTICES.

GREEN FRUIT .- The report of Messrs Keeling and Hunt states that the market is bare of oranges, arrivals from Spain daily expected, prices firm. The stock of Messina and Palermo lemons being increased, are offering at easier rates. Barcelona nuts advanced in value; black Spanish solling freely. Cocca-nuts in good demand. ENGLISH WOOL-A fair demand for deep-grown wools.

Downs neglected.

neglected. COLONIAL WOOL.—The public sales opened to-day. Very large at-tendance of home and foreign buyers. Competition brisk. Prices for greasy Port Philip and Adelaide, ¹/₂d to 1d dearer; washed fleece un-changed; scoured, ¹/₂d to 1d down; Sydney and half-bred wool, 1¹/₂d to 1d down; Sydney and half-bred wool, 1¹/₂d to 1d down; Sydney and half-bred wool, 1¹/₂d to 2d lower. Cape fieece about same as last sales. Snow-white, 1d cheaper; greasy, 1d higher. Arrivals to date, 210,000 bales. FLAX.—Market very quiet. HEMP.—Market dull at the quotations.

SILK.-Market unchanged; very little doing. TOBACCO.-There has been a little more doing in United States tobacco, but the sales have been only of a trifling character; in fact, the stock now in the market would not permit of large transactions, being very limited in extent, prices continue firm, and holders show no inclination to submit to the slightest reduction. A fair business has been done in substitutes and segar tobacco, of which there is a fair supply offering.

SEEDS .- No alteration in the seed trade.

LEATHER .- There has been an improved demand for most descriptions of leather during the week; and at Leadenhall on Tuesday, although the attendance was small, a moderate amount of business was transacted at about late prices. There was a larger supply of fresh goods; but prime light shaved hides, light English shoulders, prime calfskins of middle and light weights, and English horse hides were scarce and in request.

METALS .- The amount of business done this week has not been heavy. Copper has been slow of sale, and prices of the leading kinds of foreign are easier by 20s to 30s per ton. Iron is strong in quotations, without great demand. Tin has been sold to some considerable extent, but at materially lower prices. Lead is in good demand. Tin plates quiet.

METROPOLITAN CATTLE MARKET.

MONDAY, April 21 .- The total imports of foreign stock into London last week consisted of 15,768 head. In the corresponding week

Influenced by the large supplies offering and the warmer weather, the cattle trade has been unsettled to-day, and a reduction has been necessary in order to conclude sales. The show of beasts has been more extensive. On the foreign trade of the market there have been about 370 Gothenburgs, 84 Dutch, 111 Spanish, and 22 Danish. The supply being in excess of the demand, prices have given way quite 2d per 8 lbs. A similar reduction is noticeable in the value of English breeds, the extension of which is larger and the quality mostly good. For the hest Sects number of which is larger and the quality mostly good. For the best So and crosses 5s 10d, and occasionally 6s, per 8 lbs is paid. From Norfe and crosses 55 10d, and occasionally os, per 8 155 is paid. From Norio Suffolk, Essex, and Cambridgeshire we received about 1,800; from L colnshire, 70; other parts of England, about 200; Scotland and Irelan about 100. The sheep market has been more freely supplied, the impo from abroad being larger. The trade throughout has been dull, at per 8 lbs less money. The best Downs and half-breds have been dul posed of at 6s to 6s 2d per 8 lbs. Lambs have changed hands quie at from 8s to 9s per 8 lbs. Calves have sold at late rates. At Depth there have been 303 beats frm Geestemunde and Hamburg. Supplies of Sale.

THE STATURES-BY ROYAL LETTERS PATENT. WHITE'S MOC-MAIN LEVER TRUSS is a'lowed by upwards of 500 Medical Gentlemen 1- be the most affective invention in the cura-tive treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be warn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer. ME JOHN WHITE, 232 Piecadilly, London.

MR JOHN WHITE, 228 Piecadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d, postage free. Double ditto, 31s 6d, 42s, and 52s 6d, postage free. Post Office orders to be made payable to John White, Post Office, Piccadilly.

NEW PATENT.

NEW PATENT. ELASTIC STOCKINGS, KNEE CAPS. &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price & 6d, 7s 6d, 10s, and 16s each, post free. WHITE, MARUPACTURE, 258 Piccadilly, London.

PULMONIC DR, LOCOCK'S WAFERS.-Mr Haylard, Chemist, 20 High Ouse-gate, York, writes:--* March 24, 1873. I have sold the wafers for more than 25 years, and my own relatives and customers give testimony to the good they have de-rived from them.* They give instant relief to e. uzbs, colds, throat affections, and all bronchial diorders. Sold by all druggists at 18 14d per box.

HOLLOWAY'S OINTMENT AND PILLS .- Counsel for the Delicate .- These to a the Winter is a pro racted period of trial, should whom the Winter is a pro racted period of trial, should seek the variest opportunity of removing all obstacles to good health on the return of Spring. This cooling ointment, terseveringly rubbed upon the skin, is tree most reliable remedy for overcoming all diseases of the Throat and Chest. Diphtheris, relaxed Tonsils, sore Throat and Chest, swolen Glands, ordinary Catarrh ard Brasching, see the second second second second In out and Coest, sworten Grands, ordinary Chattrin and Broachitis, usually trevailing it his season, may be arrested as soon as discovered, and every symptom banished by Holloway's simple and effective treatment. The ointment and pitls are highly commended for the faellity with which they successfully contend with Influenza; they allay, in an incredible short time, the distressing fever and tensing cough.

THE ECONOMIST.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmo-sphere of large towns, and by their process, which is patented, is cheaper than White Lead. It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zine Paint adulterated with Sulphate of Barytes, in proportions varying from ton to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zine Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zine is stamped

"HUBBUCK'S, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET. "For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in hest it. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHF BULL, September 14, 1850.

Extracted from the minutes

R. O. SAWERS, Chief Manager. National Bank of India, (Limited), 80 King William street, London, 22nd April, 1873.

ANGLO-AUSTRIAN BANK.

Notice is hereby given that at the Ninth Ordinary General Meeting of the Shareholders of this Bank, held in Vienna, on the 19th April, the following resolutions were adopted :--

1. The payment of a dividend of 224 Austrian paper currency per share.

2. The increase of the capital of the Bank by the issue of 50,000 new shares of 200fl Austrian paper cur-rency, with 120fl Aust ian paper currency paid thereon, with the right to participate in all profits arising from the bu-incess of the Bank during the year 1873.

Mr L. M. Rate and Mr B. W. Currie, of the English Committee, and Mr Rafael von Mayer and Count Ea-gene Kinaky, of the Austrian Committee, were re-elected Directors. The election of Mr Julius Schloss and Mr Rudolf Schlesinger as Directors was confirmed.

With reference to resolution No. 1, it is hereby not fied that the dividend coupon due on 1st July next, in respect of the profits of 1872, will be paid forthwith, either in Vienna or London, in the latter place at the short exchange on Vienna, free of income tax.

The coupons must be left at this office (between the hours of 11 and 2) for examination three clear days previous to payment.

Respecting the issue of 50,000 new shares, notice is hereby given that shareholders have the right of taking between the 30th April and 31st May (after which date no application can be received) one new share for every three old shares held by them, upon payment of 120d Austrian paper currency, with interest thereon at the rate of 5 per cent. per annum, from the 1st January, 1873, and in addition a premium of Soff Austrian paper currency, without interest. currency, without interest

Payments in London must be made in sterling at the short exchange on Vienna. The amount of the premium will be placed, in accordance with a resolution of the General Meeting, to the credit of the resolution.

General Meeting, to the credit of the reserve fund. Shareholde's applying for new shares must make ap-plications in the forms to be obtained at the London office of the Bank, with a depo-it of the amount of the shares applied for. Shareholders who become entitled to fractions of a new share will receive fractional certificates which will be exchanged for certificates of eutire shares on b ing presented in sufficient num-bers, three fractional certificates being equivalent to one new share. These fractional certificates until will not give the right to any dividend or interest until will not give the right to any dividend or interest until they are exchanged for shares.—By order of the General

they are Council Nos. 31 and 32 Lombard street, London, E.C., April 23rd, 1873.

THE BAY OF HAVANA AND MATANZAS BAILWAY. CUBA-GUAMACARO EXTENSION LOAN FOR £36.000.

The Helf-yearly Interest on the above Bonds, due on the Lat May next, will be PAID on that day, and any succeeding day at the Counting-house of Measurs J. Henry Schröder and Co., 145 Leadenhall street, between the hours of 10 and 2 o'clock.

The Coupons must be left for examination two clear days before applying for payment. London, April 19, 1873.

NGLO-AMERICAN AND

A FRENCH ATLANTIC TELEGRAPH COM-PANIES (Limited). ABRIDGED PROSPECTUS.

This Company is formed for the purpose of acquiring, working, stores, stock, and plant, at a valuation estimated to bring the total and extending the important and well-known iron and implement purchase-money up to £130,000. works of Ofverum, in Sweden, which are disposed of in consequence of the death of Count Stackleberg, the late owner.

The works are in active and profitable operation. In addition to the works the property comprises 14,400 acres of freehold land.

The iron manufactured at Ofverum is of the highest quality; the selling price is £16 per ton, the cost of production on an average of the last nine years being £6 6s 9d per ton.

The works and estates were surveyed in the month of September last, by James C. Amos, Esq., C.E. (late Easton, Amos, and Sons), whose exhaustive report may be seen at the Offices of the Company. After a careful computation, Mr Amos estimates the value of the property to be considerably in excess of the amount to be paid to the

By utilising the present buildings and plant, and with the com-paratively small expenditure of, say £10,000, a rolling stock depart-ment can be provided sufficient for the construction of one thousand waggons per annum, the profits upon which, it is estimated, would be equivalent to not less than 15 per cent, upon the capital now offered for subscription. This is in addition to the vary satisfactory profits now being derived from the manufacture of agricultural implements.

A contract has been entered into for the purchase of the whole of the works, estates, and mines, for the sum of £111,669; and the

The terms of payment are exceedingly favourable, and are as follows :-

4 time being 26,000

Cash payments by four equal half-yearly instaiments, commencing 1st July, 1873. 35,886 1873..... Cash, on completion of purchase..... 23,446 130.000

The vendor pays all expenses of the formation of the Company up to the allotment of shares.

Copies of the above contract, dated 4th April, 1873, and made between H. A. Milne and A. P. Hobson, and of the memorandum and articles of association, and Mr Amos's report, may be seen by any intending subscriber, at the Offices of the Solicitors of the Company.

Applications for shares must be made on the accompanying form, which must be forwarded, together with a deposit of £2 per share, to the Bankers of the Company, Messrs Fuller, Banbury, Nix, and Mathieson, 77 Lombard street, E.C., London; to the Brokers; or to the Secretary, at the Offices of the Company, 19 Change alley, Lombard street, London, where prospectuses and forms of application can be obtained.

PROSPECTUS.

This Company is formed to purchase the important property known as the Inns of Court Hotel, Holborn, with the option of acquiring the unfinished building connected therewith in Lincoln's Inn fields, in close proximity to the new Palace of Justice, now in course of erection.

The hotel has recently undergone extensive alterations, under the superintendence of the architects. Messrs Lockwood and Mawson, and is now in the highest state of efficiency. The furniture and fittings have also been thoroughly restored and renewed. The property, which is built upon the fireproof system, contains lifts, one hundred and thirty bed rooms, coffee, billiard, and smoking rooms, suites of private apartments, rooms for arbitration meetings, and a grand interior court, which is not equalled in this country. This great hotel now compares most favourably with any first-class hotel in London.

It is well known that superior hotel accommodation is deficient in London, more especially in this district. The leading hotels are constantly being extended and still fail to meet the growing demand, in consequence of the rapid development of railway traffic, of which London is the great centre.

It is a matter of public notoriety that, by the order of the Court of Chancery, the entire property was sold last year for less than one-third its cost. The Midland Land Corporation were the purchasers, and in their hands, by a large and judi-cious expenditure of capital, the aspect of the hotel has been entirely changed.

A post office has been recently established inside the hotel. In conjunction therewith, direct telegraphic communication with all parts of the world has been promised by the authorities.

Preliminary arrangements have been entered into to acquire, for the sum of £30,000, a lease of the hotel for a term of 99 years, at a ground rent of £1,535 per annum. The furniture, fixtures, fittings, and other effects, upon which about £20,000 has been expended, are to be taken upon payment of the sum of £10,000, or at a valuation at the Company's option. The Company will also have the right of acquiring the unfinished building, fronting Lincoln's Inn, communicating with the hotel, upon terms equally advantageous.

Looking to the improvements now going on in the immediate neighbourhood, and especially the erection of the new Law Courts, and the extension of the London, Chatham, and Dover Railway to the Holborn Viaduct, it is reasonably believed that the properties now acquired by this Company will rapidly increase in value.

It will be remembered that the Langham Hotel was purchased by a joint stock company for about half its original cost, under circumstances somewhat similar to those above stated. The last dividend paid to the proprietors in that undertaking was at the rate of fifteen per cent., besides handsome additions to the reserved funds.

The high reputation acquired by the Inns of Court Hotel for the character of its wines, has led to an important trade, which is capable of considerable expansion.

The Directors invite careful consideration and investigation of this undertaking, believing as they do, that, with prudent and vigilant management, a sound and profitable investment is offered, based upon substantial and improving property.

A contract has been entered into, dated 24th April, 1873, between the Midland Land and Investment Corporation (Limited), of the one part, and John Rossall, as Trustee for and on behalf of this Company, of the other part. This, with copies of the memorandum and articles of association, and of the certificates as to value of Messrs Lockwood and Mawson, and Mr Herbert Thos. Steward, of the firm of Hunt and Steward, may be seen at the Offices of the Solicitor.

No promotion money will be paid, and the terms of purchase include the necessary costs of establishing and regis-tering the Company.

Applications may be sent to the Manager, Mr Rossall, at the Hotel; to the Directors, Solicitor, or to Bankers.
