Lentils-----	303		

INTRODUCTION

Agricultural Statistics brings together each year the more important series of statistics concerning Agriculture and closely related subjects. For the most part, the data included herein were prepared in the U. S. Department of Agriculture, or compiled by the staff for official use. A few of the tables were prepared in other Government agencies. A particular effort has been made to meet the diverse interests and needs of the general public for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. The tables presented cover a wide variety of facts in forms suited to most common use. Persons needing daily, weekly, and monthly information are served by the current reports of the agencies which prepare the summary statistics appearing in this book and to which the tables are credited. Research workers and others will usually wish to obtain direct from the agencies the latest facts bearing on particular problems associated with data contained in the tables included here. Inquiries concerning more current or more detailed data, the statistical methodology used, past and prospective revisions, etc., should be addressed directly to the agency responsible for the table.

The historical series in this volume have been generally limited to data beginning with 1939 or 1940 or to the most recent 10 years. Agricultural Statistics, 1952, was expanded to carry a longer series of years for most of the tables and should be used as a reference by those who have need for data for the earlier years. A few of the longer time series were included in the 1953 issue because of revisions. Many of the tables in this present issue carry a reference in the source note to the page and table in Agricultural Statistics, 1952 or 1953 where comparable data for earlier years can be found.

The table of contents indicates the general layout of the book, and page headings show the subdivisions within each chapter.

CHANGES IN CONTENTS

For economy reasons, it was necessary to reduce the number of pages in this issue of Agricultural Statistics. With a reduction of 100 or more pages in mind, the Committee decided that the coverage of certain types of data would be reduced and other kinds eliminated. It is impossible to list all the individual tables dropped as a result of this process but the more important general changes are: The State details on farm disposition of field crops, farm disposition and utilization of fruits, and disposition, cash receipts, and gross income from livestock and poultry and their products were confined to the latest available year instead of carrying 2 years as in the past. Series relating to the progress of certain Departmental operations as receipts of grain graded by licensed inspectors, annual reports on cooperative extension work, etc., were dropped, as well as tables relating to trading in the futures markets. The former Chapter VIII on Foreign Trade in Agricultural Products was dropped with certain of the statistics on important commodities placed in tables in the first 7 chapters on commodities and the summary tables on Foreign

Trade moved to the last chapter, Chapter XI. Several tables on weather were dropped and in some other instances 2 or more tables were combined. Where no new information was available for a series included in last year's issue the table was usually dropped. All of these changes added up to a reduction of about 180 pages. It is hoped they will not greatly reduce the value of Agricultural Statistics to the users. If data are needed to bring to date some of the series carried in the 1952 or 1953 issues but dropped from this book, inquiries should be addressed to the agency originally responsible for the table or they may be addressed to the Chairman, Yearbook Statistical Committee.

DEPARTMENT ESTIMATES AND CENSUS DATA

Estimates of the Department of Agriculture are made primarily to give timely current State and national totals and averages. They are based on "benchmark" data supplied by the Censuses of Agriculture taken every 5 years and on sample data supplied by farmers and by people who do business with farmers, together with check data from other sources. Being estimates, they are subject to revisions as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on acreage, production, numbers, price, value, supplies, and disposition are based on official Department estimates and exclude States for which no official estimates are compiled.

Census data are the result of the most nearly complete enumeration or actual count that can be made, and are used for many other purposes than determining States and national totals and averages. For example, each census provides much detailed information about counties and minor civil divisions. It also provides data that can be organized into many frequency distributions and cross-classifications for large and small portions of the country or for different segments of the agricultural industry. The definition and manner of handling a census precludes revising census data to bring them in line with other indications, even though in practice it is difficult to obtain a complete enumeration. Any effort to make such revisions or adjustments would produce estimates.

For census years, many tables carry both census totals and this Department's estimates. Generally, where there are appreciable differences between the census totals and this Department's final estimates, the processes of checking and revising estimates have indicated that some sources provide more nearly complete information about some items than the census has been able to obtain. For example, this Department's estimates of tobacco production can be considered more precise than census totals, because the estimates are revised in line with actual production as shown independently by Internal Revenue records and State records of tobacco sales. Sugar beet and sugar cane production and acreage estimates are adjusted to quantities actually reported by sugar factories. Check information on peanuts and rice is available from processors for areas sometimes including several States. In a number of other instances allowances have been made for known incompleteness of coverage by the census.

For livestock and poultry, the Department's estimates of inventory numbers relate to January 1. Most recent censuses have not enumerated numbers on that date. The decennial censuses have

usually related to April 1, with the average date of enumeration falling somewhat later. The 1945 census was taken as of January 1, but with the trying wartime conditions, was delayed over a considerable length of time in a number of States with the result that reported inventory numbers did not always represent the actual January 1 inventory. These situations have made it necessary to adjust census totals to a January 1 equivalent basis, taking into account changes that occurred between the January 1 date and the actual date of enumeration.

DEFINITIONS

"Farm Value" as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, however, quantities not harvested because of low prices or other economic factors are excluded from the computation of farm value. The term is used in the inventory tables on livestock and poultry to mean value of the number of head on farms on January 1. It is derived by multiplying the number of head by an estimated value per head as of that date.

The word "Year" (alone) in a column heading means "calendar year." "Ton" when used in this book without qualification means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the Department of Agriculture. It does not cover all farm products nor all containers for any one product. The table this year contains a number of revisions.

The information has been assembled from various sources within the Department and from State schedules of legal weights. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume, due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights, as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weights. The table was prepared chiefly for use of workers in the Department of Agriculture who have need of conversion factors in statistical computations.

¹ Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweetpotatoes, peaches, green beans, green peas, spinach, etc.

- ² Approximate inside dimensions, 10 1/2 by 11 1/2 by 18 inches.
³ Approximate inside dimensions, 11 by 13 by 17 inches.
⁴ Approximate inside dimensions, 4 5/8 by 12 1/2 by 16 1/8 inches.
⁵ Approximate inside dimensions, 4 1/2 by 16 by 16 1/8 inches.
⁶ Approximate inside dimensions, 9 3/4 by 11 by 20 5/8 inches.
⁷ Approximate dimensions, 4 1/2 by 13 1/2 by 16 1/8 inches.
⁸ Approximate inside dimensions, 13 by 12 by 32 inches.
⁹ Approximate inside dimensions, 8 by 12 by 22 inches.
¹⁰ Inside dimensions vary. Common sizes are 13 by 13 by 22 1/8 inches, and 13 by 15 1/8 by 23 inches.
¹¹ Approximate inside dimensions, 13 by 18 by 21 5/8 inches.
¹² Approximate inside dimensions, 13 by 13 by 22 1/8 inches.
¹³ This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.
¹⁴ Approximate inside dimensions, 9 3/4 by 16 by 20 inches.
¹⁵ Approximate inside dimensions, 4 1/8 by 11 1/2 by 14 inches.
¹⁶ The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it required 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.
¹⁷ For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.
¹⁸ This is the average weight of cottonseed, although the legal weight in some states varies from this figure of 32 pounds.
¹⁹ Approximate inside dimensions, 9 1/4 by 10 1/2 by 15 inches.
²⁰ Approximate inside dimensions, 1 3/4 by 11 by 16 1/8 inches.
²¹ Approximate inside dimensions, 12 by 12 by 24 inches.
²² Approximate inside dimensions, 11 1/2 by 11 1/2 by 24 inches.
²³ Until 1942, these net weights as used in this Department (for figuring quantities and values of bulk fruit in terms of packed boxes) were 60 pounds for grapefruit, 76 pounds for lemons, and 70 pounds for oranges. Grapefruit in California areas other than the Desert Valleys, averages 68 pounds per box compared with 65 pounds in the Valleys.
²⁴ Approximate inside dimensions, 5 3/4 by 13 1/2 by 16 1/8 inches.
²⁵ Approximate inside dimensions, 4 3/4 by 16 by 16 1/8 inches.
²⁶ Approximate inside dimensions, 7 3/4 by 16 by 21 7/8 inches.
²⁷ Approximate inside dimensions, 9 7/8 by 13 by 25 inches.
²⁸ Approximate inside dimensions vary. Common size is 4 1/2 by 11 1/2 by 16 1/8 inches.
²⁹ Approximate inside dimensions, 8 1/2 by 11 1/2 by 18 inches.
³⁰ Approximate inside dimensions, 13 3/8 by 11 by 22 inches.
³¹ Approximate inside dimensions, 12 by 10 1/2 by 33 inches.
³² Inside dimensions vary. Ranges from 4 by 16 by 16 1/8 inches to 6 by 16 by 16 1/8 inches.
³³ This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying and the net weight when sold in terminal markets may be below 55 pounds.
³⁴ Approximate inside dimensions, 9 1/2 by 9 1/2 by 19 1/8 inches.
(See conversion factors on next page.)

CONVERSION FACTORS

Commodity	Unit	Approximate equivalent
Apples-----	1 pound dried-----	7 pounds fresh; beginning 1943, 8 pounds fresh
Do-----	1 pound chops-----	5 pounds fresh
Do-----	1 barrel-----	3 boxes or 3 bushel baskets
Do-----	1 case canned ³⁴ -----	1.4 bushels fresh
Applesauce-----	1 case canned ³⁴ -----	1.2 bushels fresh
Apricots-----	1 pound dried-----	5 1/2 pounds fresh
Barley flour-----	100 pounds-----	4.59 bushels barley
Beans, lima-----	1 pound shelled-----	2 pounds unshelled
Beans, snap or wax-----	1 case canned ³⁵ -----	0.010 tons fresh
Buckwheat flour-----	100 pounds-----	3.47 bushels buckwheat
Cane sirup-----	1 gallon-----	5 pounds sugar
Cherries, sour-----	1 case canned ³⁴ -----	0.023 tons fresh
Chickens-----	1 pound live weight-----	0.89 pounds New York dressed weight
Do-----	-----do-----	0.65 pounds ready-to-cook weight
Corn, shelled-----	1 bushel (56 lbs.)-----	2 bushels (70 pounds) of husked ear corn
Corn, sweet-----	1 case canned ³⁵ -----	0.038 tons fresh
Corrmeal:		
Degermed-----	100 pounds-----	3.16 bushels corn, beginning 1946
Nondegermed-----	-----do-----	2 bushels corn, beginning 1946
Cotton-----	1 pound ginned-----	2.68 pounds ungnined (with no allowance for trash)
Dairy products:		
Butter-----	1 pound-----	20.6 pounds milk
Cheese-----	-----do-----	10 pounds milk
Condensed milk, whole-----	-----do-----	2.3 pounds milk
Evaporated milk, whole-----	-----do-----	2.14 pounds milk
Ice cream ³⁶ -----	1 gallon-----	15 pounds milk
Ice cream ³⁶ (eliminating fat from butter and concen- trated milk)-----	1 gallon-----	12 pounds milk
Malted milk-----	1 pound-----	2.6 pounds milk
Powdered milk-----	-----do-----	7.6 pounds milk
Powdered cream-----	-----do-----	19 pounds milk
Eggs-----	1 case-----	45 pounds
Eggs, shell-----	1 pound-----	0.87 pounds frozen or liquid whole eggs, since 1950
Do-----	-----do-----	0.23 pounds dried whole eggs, since 1950
Figs-----	1 pound dried-----	3 pounds fresh in California; 4 pounds fresh else- where
Flaxseed-----	1 bushel-----	About 2 1/2 gallons oil
Grapefruit, Florida-----	1 case canned juice ³⁵ -----	0.83 box fresh fruit
Linseed oil-----	1 gallon-----	0.4 bushel flaxseed
Malt-----	1 bushel (34 lbs.)-----	1 bushel barley (48 lbs.)
Maple sirup-----	1 gallon-----	8 pounds maple sugar
Nuts:		
Almonds, imported-----	1 pound shelled-----	3 1/3 pounds unshelled
Almonds, California-----	-----do-----	2.22 pounds unshelled through 1949; 2 pounds there- after
Brazil-----	-----do-----	2 pounds unshelled
Cashesvs-----	-----do-----	4.55 pounds unshelled
Chestnuts-----	-----do-----	1.19 pounds unshelled
Filberts-----	-----do-----	2.22 pounds unshelled through 1949; 2.5 pounds there- after
Pecans:		
Seedling-----	-----do-----	2.78 pounds unshelled
Improved-----	-----do-----	2.50 pounds unshelled
Pignolias-----	-----do-----	1.3 pounds unshelled
Pistachios-----	-----do-----	2 pounds unshelled
Walnuts:		
Black-----	-----do-----	8 1/3 pounds unshelled
Persian (English)-----	-----do-----	2.56 pounds unshelled
Oatmeal-----	100 pounds-----	7.6 bushels oats, beginning 1943
Oranges, Florida-----	1 case canned juice ³⁵ -----	0.63 box fresh
Peaches, California, freestone-----	1 pound dried-----	5 1/2 pounds fresh through 1918; 6 pounds fresh for 1919-28; and 6 1/2 pounds fresh from 1929 to date
Peaches, California, clingstone-----	-----do-----	7 1/2 pounds fresh
Peaches, clingstone-----	1 case canned ³⁴ -----	1.0 bushels fresh
Do-----	-----do-----	0.0230 tons fresh
Peanuts-----	1 pound shelled-----	1 1/2 pounds unshelled
Pears-----	1 pound dried-----	5 1/2 pounds fresh
Pears, Bartlett-----	1 case canned ³⁴ -----	1.1 bushels fresh
Do-----	-----do-----	0.026 tons fresh
Peas, green-----	1 pound shelled-----	2 1/2 pounds unshelled
Do-----	1 case canned ³⁵ -----	0.010 tons fresh (shelled)
Prunes-----	1 pound dried-----	2 1/2 pounds fresh in California; 3 to 4 pounds fresh elsewhere

See footnotes at end of table.

CONVERSION FACTORS—Continued

Commodity	Unit	Approximate equivalent
Raisins-----	1 pound-----	4 pounds fresh grapes
Rice, milled (excluding brewers)	100 pounds-----	152 pounds rough or unhulled rice
Rye flour-----	-----dc-----	2.23 bushels rye beginning 1947
Sugar-----	1 ton raw-----	0.9346 tons refined
Tobacco-----	1 pound farm-sales weight-----	Various weights of stemmed and unstemmed, according to aging and the type of tobacco. (See circular 435, U. S. Dept. of Agr.)
Tomatoes-----	1 case canned ³⁴ -----	0.027 tons fresh
Turkeys-----	1 pound live weight--	0.90 pounds N. Y. dressed weight
Do-----	-----dc-----	0.75 pounds ready-to-cook weight
Wheat flour-----	100 pounds-----	2.33 bushels wheat ³⁷
Wool, domestic apparel shorn---	1 pound greasy-----	0.44 pounds scoured
Wool, domestic apparel pulled---	-----dc-----	0.75 pounds scoured

³⁴ Case of 24 number 2 1/2 cans.

³⁵ Case of 24 number 2 cans.

³⁶ The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

³⁷ This is equivalent to 4.56 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions beginning July 1, 1944. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790-1879, 5 bushels; 1880-1908, 4.75 bushels; 1909-17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921-44, 4.7 bushels. From Mar. 1 to Nov. 1, 1946, the milling rate averaged about 2.20 bushels wheat per 100 pounds flour.

CHAPTER I

STATISTICS OF GRAIN

This chapter deals primarily with estimates of acreage, production, farm disposition, prices, farm value, stocks, and foreign production and trade. Estimates in greater detail are published regularly by the Crop Reporting Board.

Tables on sorgo sirup, which might be expected in the sorghum group, are included with "sugar crops", and popcorn tables are placed with "minor field crops", Corn sugar and corn sirup, however, are included in the corn tables.

Certain tables formerly appearing in this chapter have been dropped because of the necessity for making a sharp reduction in the size of the publication compared with recent years. Such tables are, quotas and transactions under the International Wheat Agreement; Receipts of wheat, rye, corn, oats, barley, and sorghum grains graded by licensed inspectors; and the tables summarizing future trading information on wheat, rye, corn, oats, and feedstuffs. Tables on United States exports, by country of destination, for wheat and wheat flour, rice, corn and cornmeal, and barley and malt have been placed in this chapter. These data formerly appeared in Chapter VIII.

TABLE 1. --Wheat: Acreage, yield, production, value, and foreign trade, United States, 1939-53

Year	Acreage seeded ¹	Acreage harvested	Yield per harvested acre	Production	Season average price per bushel received by farmers	Farm value	Average price per bushel, year beginning July, at--		Foreign trade, including flour, year beginning July ⁴

1953 ⁸	78,741	67,608	17.3	1,168,536							

¹ Includes acreage seeded in preceding fall for harvest in the year shown.

² Prior to 1947 quoted as No. 2 Hard Winter, and beginning with 1947 to date, No. 2 Hard and Dark Hard Winter, computed by weighting selling prices by number of carlots sold, as reported in the Kansas City Grain Market Review.

³ No. 1 Dark Northern Spring, computed by weighting selling prices by number of carlots sold as reported in the Minneapolis Daily Market Record.

⁴ Compiled from reports of the U.S. Department of Commerce. Wheat flour converted to grain equivalent on the following basis: Through June 30, 1944, 4.7 bushels of grain to 1 barrel of flour; July 1, 1944, Feb. 28, 1946, 2.33 bushels of grain to 100 pounds of flour; the following months of 1946 as indicated, March 2.28, April 2.17, May 2.18, June 2.17, July 2.18, August 2.22, September 2.20, and October 2.23 bushels; and Nov. 1, 1946, to date, 2.33 bushels of grain to 100 pounds of flour.

⁵ Includes flour milled from imported wheat. See also table 8, which includes civilian feeding by the military abroad prior to January 1947.

⁶ Includes wheat imported for milling in bond and subsequent export.

⁷ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁸ Includes an allowance for unredemmed loan and purchase agreement deliveries at the average rate.

⁹ Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1866-1938 in Agricultural Statistics, 1952, table 1.

¹ Acreage seeded in preceding fall, for winter wheat only.

² Preliminary.

³ Minnesota, North Dakota, and South Dakota. Includes "Red Durum."

⁴ Includes small quantities of durum wheat grown in States other than the 3 which are specified in footnote 3.

⁵ Total of acreage seeded to winter wheat and all spring wheat.

⁶ Total acreage seeded less an allowance for winter wheat acreage abandoned and later reseeded to spring wheat for harvest in the same crop year. Occurs principally in the Pacific Northwest.

Agricultural Marketing Service. Winter wheat and spring wheat data for 1919-43 in Agricultural Statistics, 1952, table 2.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1953 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1953 and ended early in 1954. ² Figures refer to harvested areas as far as possible. ³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts. ⁴ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. ⁵ Data for individual years shown are not strictly comparable with averages shown, since recent estimates exclude data for farms of less than 2.5 acres. ⁶ Average of less than 5 years. ⁷ Figure for 1935 only. ⁸ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania. ⁹ Estimates for Syria and Lebanon not shown separately during this period. ¹⁰ Figures for the period shown are not strictly comparable since figures for 1951-53 include allowances for nonreporting areas, which were not included with earlier figures shown, but were included in estimated total for Asia. ¹¹ Production on European holdings only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. *Prewar estimates* for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Includes flour expressed in wheat equivalent. ² As reported by U. S. Department of Commerce. ³ Classified as "unfit for human consumption" or imported for special feeding programs. ⁴ Includes flour imported free for export in 1,000 bushels as follows: 1945, 19; 1948, 1; and 1949, 29. ⁵ Includes wheat and wheat products used for livestock and poultry feed, imported duty-free by the Commodity Credit Corporation. ⁶ Reported by the National Military Establishments; financed by the United States. ⁷ Usually all from imported wheat, although in some years small quantities of United States wheat were added. Reported by U. S. Department of Commerce. ⁸ 142,637,000 reported by U. S. Department of Commerce, plus 11,358,000 unreported January-June 1947 exports to Germany, financed by the United Kingdom. ⁹ 154,407,000 reported by the U. S. Department of Commerce, plus 11,884,000 unreported January-June 1947 exports to Germany, financed by the United Kingdom. ¹⁰ 184,324,000 reported by U. S. Department of Commerce, plus 23,038,000 unreported exports to Germany financed by the United Kingdom. ¹¹ 123,546,000 reported by U. S. Department of Commerce, plus 9,539,000 unreported exports to Germany financed by the United Kingdom. ¹² Includes 336,000 bushels of wheat exported for civilian feeding abroad which was reported in September of the following crop year but actually shipped in April of the year shown.

Agricultural Marketing Service. Data for 1929-42 in Agricultural Statistics, 1952, table 8.

FOOTNOTES FOR TABLE 7

¹ Preliminary.

² Ground at the mill for home use or exchanged for flour.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

¹ Includes flour made from United States wheat and shipments to territories.² Includes "Red Durum." ³ Preliminary.

Agricultural Marketing Service. Stocks include only old crop wheat on hand July 1 of year shown and are the total of the following stocks: On farms; in interior mills, elevators, and warehouses; in merchant mills; commercial stocks at terminals; and stocks owned by Commodity Credit Corporation in steel and wooden bins, and in transit. Estimated stocks on farms and in interior mills, elevators, and warehouses by classes, as well as production by classes, are on the basis of the quinquennial wheat-variety surveys. Commercial stocks are reported by classes, and merchant mill stocks are broken down largely on the basis of the distribution by classes of commercial stocks. Exports and shipments by classes are estimated on the basis of "inspection for export" records of the former War Food Administration and the U. S. Department of Agriculture, and export indemnifying agencies. Data for 1939-43 in Agricultural Statistics, 1952, table 10.

¹ Owned by Commodity Credit Corporation and stored in bins or other storage owned or controlled by CCC; in transit to ports and in Canadian elevators. Other Commodity Credit Corporation-owned wheat included in the estimates by positions.

² Includes full-duty wheat, wheat imported for feed, and dutiable flour and other products in terms of wheat. Excludes wheat imported for milling in bond and exported as flour.

³ Preliminary.

⁴ Includes flour and other products in terms of wheat.

⁵ Food use is computed as follows: Total grind (commercial and noncommercial) less exports and shipments of flour and other wheat products, less military procurement, plus estimated breakfast food produced outside the flour-milling industry, plus dutiable imports of flour and other wheat products.

⁶ Quantity of wheat ground into granular flour for alcohol production together with wheat grain used for that purpose.

⁷ Balancing item; roughly approximates total use as feed, including that used in commercial feed as well as that fed on farms.

⁸ Includes procurement for both military exports and for military food use; military takings for civilian feeding in occupied areas measured at time of procurement and not at time of shipment overseas.

⁹ Exports as here used, in addition to commercial exports, include USDA flour procurement as distinct from USDA deliveries for export. They exclude exports for civilian feeding by the military abroad, which are included in military procurement. Deliveries for export (actual exports, including those of civilian feeding in occupied areas) of wheat, flour, and other products, in million bushels, beginning with 1943 were as follows: 42.6; 144.4; 390.6; 397.4; 485.9; 504.0; 299.1; 366.1; 475.3; and 317.8.

¹⁰ Shipments are to Alaska, Hawaii, Puerto Rico, Guam, Samoa, Virgin Islands, and Wake Island; partly estimated. For the war years, USDA shipments for stockpiling in the territories have been added to reported census totals.

¹¹ Total disappearance plus year-end carryover accounts for total supply.

Agricultural Marketing Service. Foreign trade figures from reports of the U. S. Department of Commerce and U. S. Department of Agriculture. Military procurement figures from the National Military Establishments. Data for 1930-42 in Agricultural Statistics, 1952, Table 12.

1953-----	231	257	349	192	⁴ 227	198	261	247.2	189	-----	7.23	6.33

¹ Markets are Chicago, Minneapolis, Kansas City, St. Louis, Omaha, and Duluth.

² Export price, f.o.b. port, bulk.

³ Prior to August 1946, export price to the United States and neutral countries; August 1946-July 1949, commercial sales to countries other than the United Kingdom.

⁴ No. 2 Hard and Dark Hard Winter.

⁵ Basic export selling price of the Australian Wheat Board.

⁶ Beginning August 1949, export price for sales outside of the International Wheat Agreement. Under terms of the International Wheat Agreement the basic maximum price for No. 1 Manitoba Northern, in bulk, in store at Fort William/Port Arthur is \$1.80 per bushel. This maximum price has prevailed since beginning of Agreement in August 1949.

⁷ Beginning March 1952, changed to Spring short patents.

Agricultural Marketing Service. Compiled from following sources: Northwestern Daily Produce News; Bureau of Labor Statistics Wholesale Price Bulletins; reports of the Commodity Stabilization Service; New York Journal of Commerce; Broomhall's Yearbook and Corn Trade News; Canadian Grain Statistics; Statistical Register of New South Wales, annual; Summary of the Australian Wheat Situation; and trade papers published at various markets. Wheat prices at Minneapolis, St. Louis, Kansas City, and Chicago are weighted averages. Foreign prices are compiled in original currencies and units. Prices converted to cents per bushel of 60 pounds at current monthly rates of exchange as reported by the Federal Reserve Board. Data for 1929-43 in Agricultural Statistics, 1952, table 14.

¹ Includes rye sown in the spring of year shown.

² Averages of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.

³ Compiled from reports of the U.S. Department of Commerce. Rye flour converted to grain equivalent on the basis of 6 bushels of grain to 1 barrel of flour through 1943; beginning 1944, 4.6 bushels of grain to 1 barrel of flour. Rye malt converted to grain on the basis of 1.1 bushels of grain to 1 bushel of malt through 1942; beginning 1943, 1 bushel of grain to 1 bushel of malt.

⁴ Rye malt not separately reported. The period 1942-48 does not include rye and flour used by military services for civilian relief abroad, estimated in thousands of bushels as follows: 435; 484; 1,397; 944; 0; 406; and 0. These exports are included in table 23.

⁵ Includes rye malt.

⁶ Imports for consumption minus domestic exports with net exports shown by a minus sign.

⁷ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁸ Less than 500 bushels.

⁹ Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1909-38 in Agricultural Statistics, 1952, table 18.

¹ Estimates of seeded acreage relate to the total acreage of rye sown for all purposes, including spring-sown rye and acreage seeded in preceding fall.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

Agricultural Marketing Service.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1953 is combined with preliminary forecasts for the Southern Hemisphere harvests, which began late in 1953 and ended early in 1954.

² Figures refer to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ Data for individual years shown are not strictly comparable with averages shown, since recent estimates exclude data for farms of less than 2.5 acres.

⁵ Average of less than 5 years.

⁶ 1935 only.

⁷ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁸ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

² For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

³ A bag is equivalent to 100 pounds.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 23

¹ Crops harvested in Northern Hemisphere countries during the latter part of the year, together with those harvested in Asia principally from November-May, are combined with crops harvested in Southern Hemisphere countries during the first part of the following year.

² Preliminary.

³ Statistics of Burma and India in the prewar period are not comparable with those of postwar years.

⁴ The area formerly known as French Indochina is now comprised of the Kingdom of Laos, the Kingdom of Cambodia, and the State of Vietnam.

⁵ Planted acreage.

⁶ North and South Korea. In the 1935-39 period, production in South Korea averaged about 6,750 millions pounds annually.

⁷ Average 1936-39.

⁸ Excluding Communist China, North Korea, and U.S.S.R. Postwar totals are not strictly comparable with those of prewar years.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Compiled from reports of the U.S. Department of Commerce. Buckwheat flour converted to grain equivalent on the basis of 7 bushels of grain to 1 barrel of flour.

² Domestic exports minus imports, with net imports shown by a minus sign.

³ Less than 500 bushels.

⁴ Includes shipments under the Army Civilian Supply Program beginning January 1947, and continuing in later years.

⁵ Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1909-38 in Agricultural Statistics, 1952, table 35.

¹ Yield and production represent equivalent grain yield on total acres harvested for all purposes, i.e., grain, silage, fodder, hogged off, grazed, etc. Census yields are corn for grain.

² Prices are the average of daily prices weighted by carlot sales, No. 3 Yellow Corn, as reported in the Chicago Daily Trade Bulletin through May 1942, and the Chicago Journal of Commerce or Wall Street Journal from June 1942 to date.

³ Compiled from reports of the U.S. Department of Commerce. Corn meal converted to grain equivalent on the basis of 4 bushels of grain to 1 barrel of meal through December 1945; beginning January 1946 3.16 bushels of grain to 100 pounds of meal.

⁴ Includes corn meal. Excludes cracked corn.

⁵ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁶ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁷ Includes shipments under the Army Civilian Supply Program, beginning January 1946, and continuing in later years.

⁸ Preliminary.

⁹ October-June average.

Agricultural Marketing Service. Italic figures are census returns. Data for 1866-1938 in Agricultural Statistics, 1952, table 38.

FOOTNOTES FOR TABLE 36

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which follows; thus the crop harvested in the Northern Hemisphere in 1953 is combined with preliminary forecasts for the Southern Hemisphere harvest which begins early in 1954.

² Figures refer to harvested area as far as possible.

³ Revised estimates for Northern Hemisphere countries; for the Southern Hemisphere, revised preliminary forecasts.

⁴ Average of less than 5 years.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ Figures for the period shown are not strictly comparable, since figures for 1951-53 include estimates for nonreporting areas, which were not included with earlier figures shown, but allowances were included in estimated total for Asia.

⁷ Production on European holdings only. Allowances for native cultivation, not shown, are included in estimated total for Africa.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ In bins or other storage owned or controlled by Commodity Credit Corporation; additional Government stocks are included in reports for other positions.

² Compiled from reports of the U. S. Department of Commerce. Imports include grain equivalent of cornmeal and flour; exports are grain only.

³ Preliminary.

⁴ Estimated quantities (based on census data) used in making prepared breakfast foods.

⁵ Estimated quantities used in producing cornmeal, flour, hominy grits, and flakes for human food and for the production of fermented malt liquors. Based on reports of the Bureau of the Census and the Bureau of Internal Revenue. Does not include corn processed for livestock feed.

⁶ Starch, sirup, sugar, etc. Compiled from data of Price, Waterhouse, and Company, New York.

⁷ Compiled from data of the Bureau of Internal Revenue. Does not include corn products used in the production of fermented malt liquors.

⁸ Based on acreage planted to corn the following year.

⁹ Residual; includes small quantities for other uses and waste.

¹⁰ Includes exports for military civilian feeding abroad during the period 1945-49.

¹¹ Total disappearance, minus exports of corn and grain equivalent of cornmeal and flour.

Agricultural Marketing Service. Data for 1929-42 in Agricultural Statistics, 1952, Table 47.

¹ Estimates of seeded acreage relate to the total acreage of oats sown for all purposes, including oats sown in the preceding fall.

² Prices are the average of daily prices for No. 3 White, weighted by carlot sales, as reported in the Chicago Daily Trade Bulletin through May 1942 and the Chicago Journal of Commerce and Wall Street Journal from June 1942 to date.

³ Compiled from reports of the U.S. Department of Commerce. Oatmeal converted to grain equivalent on the basis of 1 bushel of grain to 18 pounds of meal through December 1942, and 13.17 pounds of meal thereafter.

⁴ Includes "oats, unhusked, ground."

⁵ Imports for consumption minus domestic exports. Net exports shown by a minus sign.

⁶ Includes shipments under the Army Civilian Supply Program, beginning July 1946, and continuing in later years.

⁷ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁸ Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1866-1938 in Agricultural Statistics, 1952, table 53.

¹ Preliminary.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where grown and do not include purchases by farmers from others for such purposes. Data for 1919-43 in Agricultural Statistics, 1952, table 54.

¹ Preliminary.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 48

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow: thus, the crop harvested in the Northern Hemisphere in 1953 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1953 and ended early in 1954.

² Figures refer to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ Production reported in bushels of 34 pounds.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ Data for individual years shown are not strictly comparable with averages shown, since recent estimates exclude data for farms of less than 2.5 acres.

⁷ Average of less than 5 years.

⁸ 1935 only.

⁹ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania.

¹⁰ Includes estimate for Lebanon, and is, therefore, not strictly comparable with estimates shown for later years.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Compiled from reports of the U.S. Department of Commerce. Imports include grain equivalent of oatmeal; exports are grain only.² Preliminary.³ Includes 165,000 bushels in 1951, 178,000 bushels in 1952, and 324,000 bushels in 1953, in bins owned or controlled by CCC.⁴ Used in production of oatmeal and other cereal preparations. Based on reports of the Census of Manufactures.⁵ Based on area seeded to the following crop.⁶ Residual; includes small quantities for other uses and waste.⁷ Includes exports for military relief feeding abroad during the period 1946-50.⁸ Total disappearance, minus exports of oats and grain equivalent of oatmeal.

Agricultural Marketing Service. Data for 1929-42 in Agricultural Statistics, 1952, Table 59.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.² Price of No. 3 barley, average of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.³ Compiled from reports of the U. S. Department of Commerce. Barley flour converted to grain equivalent on the basis of 9 bushels of grain to 1 barrel of flour. Barley malt converted to grain equivalent on the basis of 1.1 bushels of grain to 1 bushel of malt through 1943; beginning 1944, 1 bushel of grain to 1 bushel of malt.⁴ Domestic exports minus imports for consumption, with net imports shown by a minus sign.⁵ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.⁶ Includes shipments under the Army Civilian Supply Program, beginning July 1946 and continuing in later years.⁷ Preliminary.⁸ August-June average.

Agricultural Marketing Service. Italic figures are census returns. Data for 1909-38 in Agricultural Statistics, 1952, table 62.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

Agricultural Marketing Service.

¹ Preliminary.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 56

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1953 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1953 and ended early in 1954.

² Figures refer to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts. Estimated totals, which in the case of production, are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁴ Data for individual years shown are not strictly comparable with averages shown, since recent estimates exclude data for farms of less than 2.5 acres.

⁶ Average of less than 5 years.

⁷ 1935 only.

⁸ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania.

⁹ Estimates for Syria and Lebanon not shown separately during this period.

¹⁰ Figures for the period shown are not strictly comparable throughout, since figures for 1951-53 include allowances for nonreporting areas, which were not included for earlier periods shown, but were included in estimated total for Asia.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Previous estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Owned by the Commodity Credit Corporation in bins owned or controlled by CCC and in Canadian elevators. Additional Government-owned stocks are included in reports for other positions.
² Compiled from reports of the U. S. Department of Commerce. Both imports and exports include grain equivalent of malt.
³ Preliminary.
⁴ Compiled from reports of the Bureau of Internal Revenue. Includes small quantities of barley grain.
⁵ Estimated on basis of total malt production and quantities exported, imported, and used in alcohol and alcoholic beverages.
⁶ Based on acreage seeded to the following crop.
⁷ Residual; includes small quantities for other uses and waste.
⁸ Includes exports for military relief feeding abroad during the period 1946-52.

Agricultural Marketing Service. Data for 1934-42 in Agricultural Statistics, 1952, Table 68.

¹ Consumption data for malt grains are measured at the processing level. Total consumption is the grain equivalent of the food products processed from the grains. Excludes quantities used for alcoholic beverages.

² Includes white, whole wheat, and semolina flour.

³ Rice consumption for year beginning August previous to the year stated. Table rice used by brewers excluded.

⁴ Excludes corn and corn products used in the production of alcoholic beverages. Total corn includes an allowance for the quantity used as hominy and grits and minor food uses.

⁵ Barley consumed in food products, excluding malt beverages, expressed in terms of grain equivalent. Includes quantities used as pearl barley, flour, malt extract, and other food products.

⁶ Malt equivalent of barley grain used for food.

⁷ The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by the civilian population adjusted for underenumeration and members of the armed forces eating out of civilian supplies.

⁸ Preliminary.

Agricultural Marketing Service. All figures are estimates based on data from the Census of Manufacturers, Price, Waterhouse, and Co., the U. S. Department of Commerce, the Bureau of Internal Revenue, and other sources. Data for 1909-38 in Agricultural Statistics, 1953, table 71.

¹ Total stocks not available prior to 1947. Beginning with 1947 Oct. 1 stocks include the following positions: farms, interior mills, elevators, and warehouses, Commodity Credit Corporation grain in its own bins, and terminal elevators.

² Principally alcohol and distilled spirits. Includes an allowance for wet-processing from the middle of 1949 to date.

³ Exports grain only. Imports are very small and are not separately reported.

⁴ Since carryover stocks have been available only since 1947, production has been considered as the disappearance for each season prior to that date.

Agricultural Marketing Service. Prices of corn and oats at Kansas City, Chicago, and Minneapolis were computed by weighting selling prices by reported number of carlots sold. Prices of barley and grain sorghum at Kansas City and of barley at Chicago and Minneapolis are average of prices at the close of each day. Prices at San Francisco are the average of prices on one day each week.

¹ 1947-52, 41 percent.² 1944-46, 32 percent; 1950-52, 36 percent.³ 1943, 1948, and 1949, 34 percent.⁴ 1950-52, 44 percent.⁵ Based on the prices of the following commodities at the leading markets, weighted by average consumption: Bran, middlings and shorts, copra meal, cottonseed meal, linseed meal, peanut meal, soybean meal, gluten feed, hominy feed, brewers' dried grains, distillers' dried grains, alfalfa meal, tankage, meat scrap, and fish meal.

Agricultural Marketing Service. Data for 1929-42 in Agricultural Statistics, 1952, table 82.

CHAPTER II

STATISTICS OF COTTON, SUGAR, AND TOBACCO

In addition to tables on cotton, sugar, and tobacco, this chapter includes tables on fibers other than cotton, sorgo sirup, maple sirup and sugar, honey, and beeswax. Most cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

Much of the information on cotton lint is given in terms of "running" bales. The term "running bale," when applied to weight, is the average weight of a bale as it comes from the gin; when applied to number, it is the number of bales actually ginned.

Tables dropped from this chapter related to cotton are as follows: Percentage reduction from full yield per acre from stated causes, staple length of foreign growths in the August 1 cotton carryover, and two tables on future trading. Individual tables have been added giving export and import data on specified items which were formerly carried in Chapter VIII. These cover exports of cotton, sugar, and tobacco by country of destination; imports of cotton and linters, sugar, tobacco, and silk and vegetable fibers by country of origin; and a general table on United States imports of silk and vegetable fibers.

TABLE 74.--Cotton: Acreage, yield, production, value, and foreign trade, United States, 1939-53

Year	Cotton							Cottonseed			
	Acreage in cultivation July 1	Acreage harvested	Yield per harvested acre	Production ¹	Season average price per pound received by farmers ²	Farm value	Market price per pound, New Orleans year beginning August ³	Foreign trade, year beginning August ⁴		Production	Farm value

¹ Census of Agriculture figures for all periods are in running bales. U. S. Department of Agriculture figures are in 500-pound gross-weight bales for all years.

² Gross weight price, including bagging and ties, except that American-Egyptian cotton is included at net weight.

³ These central-market prices are for middling grades, 7/8-inch staple, through 1939; beginning August 1940, prices are for 15/16-inch staple.

⁴ Compiled from reports of the U. S. Department of Commerce. Equivalent bales of 500 pounds gross weight.

⁵ Excluding linters.

⁶ Includes an allowance for unredeemed loan cotton at season average price or average loan rate, whichever was higher.

⁷ Includes an allowance for all cotton put under loan at average loan rate.

⁸ Includes an allowance for unredeemed loan cotton at July 15, 1950 price.

⁹ Includes an allowance for unredeemed loan cotton at the average loan rate.

¹⁰ Preliminary.

¹¹ Average price to May 1, 1954, including an allowance for unredeemed loans.

¹² August-June average.

Agricultural Marketing Service. Italic figures are census returns. Production figures conform with census annual ginning enumerations. Data for 1866-1938 in Agricultural Statistics, 1952, table 84.

¹ Preliminary.

² Bales ginned, as reported by the Bureau of the Census with an allowance made for interstate movement of seed cotton for ginning, rounded to thousands, by States. Cotton produced but not ginned is not included in production.

³ Gross weight price, including bagging and ties, except that American-Egyptian cotton is included at net weight.

⁴ For the years 1942-47, 1950, and 1951, includes an allowance for unredeemed loan cotton at season average price or average loan rate, whichever was higher; for 1948,

includes an allowance for all cotton put under loan at the average loan rate and for 1949, includes an allowance for unredeemed loan cotton at July 15, 1950 price.

⁵ Includes an allowance for unredeemed loan cotton at the average loan rate.

⁶ Average price to May 1, 1954, including an allowance for unredeemed loans.

⁷ Illinois, Kansas, Kentucky, and Nevada.

⁸ Included in State and United States totals.

¹ Includes only raw cotton produced for factory consumption and does not include large quantities grown in India, China, and other countries for consumption on hand spindles or for use in other noncommercial ways.

² American in running bales; foreign in bales of approximately 500 pounds, gross weight.

³ Preliminary.

⁴ Excludes cotton destroyed.

Agricultural Marketing Service. Compiled from reports of the New York Cotton Exchange Service and estimates of the International Cotton Advisory Committee. Data for 1929-42 in Agricultural Statistics, 1952, table 88.

FOOTNOTES FOR TABLE 76

¹ These estimates represent total acreage and production in each country, including cotton consumed on hand spindles or in other ways without entering commercial channels. For this reason some of them should average somewhat larger than estimates of the "commercial crops." Years refer to crop years beginning Aug. 1 in which major portion of crop was harvested.

² Preliminary.

³ Production in bales of 478 pounds net prior to 1946 and 480 pounds thereafter.

⁴ Includes estimates for minor-producing countries not listed above and allowance for other figures not available.

⁵ Figures for 1943 to date are not comparable with prewar figures because of boundary changes.

⁶ Pakistan included with India.

⁷ South Korea only after 1941.

⁸ Less than 500.

⁹ Exports.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics, reports of United States Foreign Service officers, and results of office research.

¹ Ginnings during the 12 months, Aug. 1-July 31. Includes an allowance for "city crop" which consists of rebaled samples and pickings from cotton damaged by fire and weather.

² Total imports minus re-exports.

³ Total exports minus re-exports.

⁴ American in running bales, counting round as half bales, and foreign in equivalent bales of 500 pounds.

⁵ Supply exceeds distribution.

⁶ Preliminary.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census. Data for 1929-42 in Agricultural Statistics, 1952, table 89.

¹ Data for crop years 1944-47, inclusive, do not include added charges made in some instances for drying and conditioning seed cotton. Data for 1948-53 include added charges for drying and conditioning seed cotton, the practice of assessing such added charges being confined chiefly to California. Data for all years exclude added charges made for sterilizing cottonseed in connection with pink bollworm control measures.

² In addition to American-Egyptian cotton, small quantities of other extra long staple cotton are produced and ginned on roller gins. The production is too small, however, to affect the United States average ginning rate.

¹ Prices for Middling ^{15/16}-inch and discounts for ^{7/8}-inch are averages of the 10 designated markets. Discounts for ^{15/16}-inch are 10-market averages from 1944-46, a 4-market average for 1947, and 3 markets for 1948-51. Premiums for 1-inch and 1 ^{1/16}-inches are 10-market averages. Premiums for 1 ^{1/8}-inches and longer are those quoted at Memphis.

² Hundredths of a cent per pound.

³ Average for August 1950-July 1951, excluding the period Jan. 27-Mar. 7, when no prices were quoted.

Agricultural Marketing Service. Data for 1929-43 in Agricultural Statistics, 1952, table 102.

¹ Simple average of semi-annual and quarterly data. Quantities are annual per-family purchases of 42 cotton articles (from 1934-36 survey of families of wage earners and clerical workers).

² Computed from prices collected by the Bureau of Labor Statistics, weighted by average number of articles (clothing, furnishings, and yard goods) purchased annually (from 1934-36 survey) by families of wage earners and clerical workers. Estimates for 1943-51 based on indices of retail prices of specified items of cotton clothing and housefurnishings, prepared by the Bureau of Labor Statistics.

³ Estimated prices received by farmers for cotton of grade and staple lengths used in the manufacture of the various articles, weighted by quantities of cotton required in their manufacture.

Agricultural Marketing Service. Data for 1927-38 in Agricultural Statistics, 1952, table 106.

¹ Included in "Other countries."

Agricultural Marketing Service. Compiled from the Textile Organon. Data for 1929-43 in Agricultural Statistics, 1952, Table 109.

FOOTNOTES FOR TABLE 102

¹ Preliminary.

² Tons of 2,240 pounds.

³ Includes weights of all classes added without conversion to an equivalent fiber basis.

⁴ Includes New Zealand or phormium fiber, broomroot, rice straw and rice fiber, and "other" fiber unmanufactured.

¹ Includes bags and bagging for cotton (new and second-hand), webbing, padding, carpets and rugs, and yarns.
² In some instances import statistics have been converted from yards to pounds on the basis of average weights.

³ Prices for raw jute are for native first marks, duty-paid.

⁴ Less than 500,000 pounds.

⁵ Pakistan and India only, but includes a relatively small amount of mesta which is used as low grade jute.

⁶ Preliminary.

⁷ Prices for January-July from Daily Mill Stock Reporter.

⁸ Raw abaca and manila cordage.

⁹ Prices for raw abaca are for Davao Grade I.

¹⁰ Sisal and henequen cordage.

¹¹ Prices for raw sisal are for Haitian Grade A, compiled from New York Journal of Commerce.

¹² New York 1939. Prices for raw henequen are for Mexican Grade A.

Agricultural Marketing Service and Foreign Agricultural Service. Import data compiled from reports of the U. S. Department of Commerce; price data, except as noted, from reports of the Bureau of Labor Statistics; production data prepared or estimated on the basis of official statistics of foreign governments and reports of United States Foreign Service officers. Data for 1934-38 in Agricultural Statistics, 1952, table 112.

¹ Preliminary.

² Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$2.35 per ton in 1952 and approximately \$2.40 in 1953. (See table 109.)

³ Short-time average.

⁴ Relates to year of harvest. Beginning with 1952, California includes some acreage harvested in the beginning of the following year.

⁵ United States totals rounded to hundreds for acreage and thousands for production.

Agricultural Marketing Service.

¹ Seed is produced almost exclusively from fall plantings overwintered in the field.

² Comprises, in addition to curly-top-resistant varieties, 7,295 bags of commercial seed of "US" leaf-spot-resistant varieties, 1,188 bags of elite and stock seed for use in future production of commercial seed, and 17,403 bags of seed of improved non-curly-top-resistant varieties bred by beet sugar companies.

³ Curly-top-resistant varieties bred by the Agricultural Research Service made up 97 percent of this production.

Agricultural Research Service. Compiled from reports furnished by beet sugar companies and their subsidiaries engaged in sugar-beet seed production.

¹ Acreage estimates are for harvested areas.² Preliminary.³ Includes the following grown in Denmark and processed in Sweden: about 6,000 acres and 59,000 tons in 1951; about 7,000 acres and 64,000 tons in 1952; and about 8,000 acres and 137,000 tons in 1953.⁴ Topped beets.⁵ Harvested for sugar only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information. Estimates of countries having boundary changes have been adjusted to post war boundaries.

¹ Support payments were made under the price support programs of the U. S. Department of Agriculture and are reflected in the estimated average prices received by farmers. Program payments represent payments for sugar beets and sugarcane marketed before deducting local administrative expenses which were charged in the years 1939-44 and before making deductions which were imposed in 1940 for excess sugarcane acreage. Payments with respect to crop deficiency and acreage abandonment have not been included; see table 721 for these data. Program payments are based upon provisions of the Sugar Act.

² Includes price support payments.

³ Preliminary.

Agricultural Marketing Service. Data on support and program payments compiled from records of Sugar Division, Commodity Stabilization Service. Data for 1933-38 in Agricultural Statistics, 1952, tables 119 and 122.

¹ Louisiana and Florida.² The growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following the season of growth.³ Preliminary.⁴ Prices do not include Government payments under the Sugar Act. Price support payments for 1943-45 are included. See table 109.⁵ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.⁶ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.⁷ Sirup production not included. (See table 125).

Agricultural Marketing Service. Of the total sugar produced in Louisiana about 25 percent consists of direct consumption sugar, marketed "as made" without further refining. Data for 1909-38 in Agricultural Statistics, 1952, table 120.

TABLE 111. --Sugarcane for sugar and seed: Acreage, yield, production, season average price per ton received by farmers, and production of cane sugar and molasses, by States, average 1942-51, annual 1952 and 1953

¹ Preliminary.² The growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following the season of growth.³ Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$1.12 per ton in 1952 and approximately \$1.19 in 1953. (See table 109.)⁴ Based on data from Sugar Division, Commodity Stabilization Service.⁵ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.⁶ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.⁷ Includes high test molasses made from frozen cane.⁸ Includes 4,077,000 gallons of edible molasses in 1952 and 2,958,000 gallons in 1953.⁹ Edible molasses not produced in Florida; therefore the Florida figures are for blackstrap.

Agricultural Marketing Service.

¹ Raw value equivalent in terms of 96° raw sugar as defined by the Sugar Act of 1948.

² Data from Sugar Division, Commodity Stabilization Service.

³ 1939 includes mainland cane sugar stocks, and beginning 1940 includes raw sugar for processing held by importers other than refiners.

⁴ Includes sugar used in the manufacture of other commodities. 1939-41 exports from U. S. Department of Commerce, Foreign Commerce and Navigation; 1942-53 quantities delivered for export as compiled by Sugar Division, Commodity Stabilization Service.

⁵ Data based on allocation audits and records kept by the armed forces.

⁶ Adjusted for changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers.

⁷ Civilian per capita consumption 1941-53.

⁸ Includes exports for civilian feeding by the military abroad.

⁹ Preliminary.

Agricultural Marketing Service. Data for 1929-38 in Agricultural Statistics, 1952, table 129.

¹ Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.

² Receipts are of sugar arriving in the ports of the United States regardless of whether or not it has been imported (i.e., entered through the customs).

³ Preliminary.

Commodity Stabilization Service, Data for 1934-43 in Agricultural Statistics, 1952, table 131.

FOOTNOTES FOR TABLE 118

¹ Centrifugal sugar, as distinguished from non-centrifugal, includes cane and beet sugar produced by the centrifugal process, which is the principal kind moving in international trade.

² Years shown are for crop years; generally the harvesting season begins in the fall months of the year shown or in the early months of the following year, except in certain cane-sugar-producing countries in the Southern Hemisphere; such as Australia, Argentina, Mauritius, Union of South Africa, etc. Where the season begins in May or June of the year shown.

³ Raw value is the equivalent in terms of 96° sugar. For some countries, figures represent raw sugar, as made.

⁴ Preliminary.

⁵ 96° basis.

⁶ Production restricted because of government program.

⁷ Includes a small amount of sugar from German beets processed in Austria.

⁸ Includes a small amount of cane sugar.

⁹ Includes sugar from Danish beets processed in Sweden.

¹⁰ Mostly beet sugar.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information. Estimates of countries having boundary changes have been adjusted to postwar boundaries.

¹ Raw value is the equivalent in terms of 96° sugar. For some countries, figures represent raw sugar, as made.

² Preliminary. ³ Re-exports. ⁴ Estimated on basis of exports from certain exporting countries. ⁵ Incomplete.

⁶ Crop year. ⁷ Less than 5-year average. ⁸ 1-year only. ⁹ Estimated on basis of imports into known areas.

¹⁰ Included in India's estimate. ¹¹ Sugar and related products.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Official "Promedico" price converted to the basis of United States pounds. ² Starting with 1946 the quotations are on a cost, insurance, and freight basis; prior to 1946 they are on a cost and freight basis. (Insurance approximates 0.01 cent per pound.) ³ Includes excise tax of 0.535 cents per pound. ⁴ Averages of prices reported by urban retail dealers as of the 15th of the month. Derived from reported price for 5-pound container beginning in 1950.

Agricultural Marketing Service. Compiled from following sources: New York Journal of Commerce; U.S. Bureau of Labor Statistics retail price series; and reports of the New York Coffee and Sugar Exchange. Data for 1929-43 in Agricultural Statistics, 1952, table 133.

¹ Production of cane sirup, sorgo sirup, and edible molasses is of the fall of the preceding year.

² From 1939-42 inclusive, figures for odd years (except 1941) are from the Bureau of the Census; for even years (and 1941) quantities are estimated. Data for 1943-52 from the Sugar Division, Commodity Stabilization Service.

³ Data for 1939-53 are official figures of the Agricultural Marketing Service.

⁴ Data for 1939-53 represent molasses from which the liquid sugar has been subtracted.

⁵ Preliminary.

⁶ Assumed to be largely refiners' sirup.

Agricultural Marketing Service. Data for 1929-38 in Agricultural Statistics, 1952, table 140.

¹ Production harvested within the calendar year specified.

² Preliminary.

³ Less than a 5-year average.

⁴ Not available.

⁵ In the case of Germany, data for 1947-53 are for Western Germany only; for Korea 1949-53 data are for South Korea only; in the case of China, postwar data are for all of China except Manchuria; 1935-39 data are for Free China only.

⁶ Less than 500 acres.

⁷ Includes Albania, Bulgaria, Czechoslovakia, Hungary, Poland and Rumania.

⁸ Recent methods of estimating acreage and production have changed in an effort to improve data, therefore 1935-39 are not comparable with later data.

⁹ Partially estimated.

Foreign Agricultural Service. Official estimates of foreign countries, reports from United States Foreign Service officers, results of office research, and other information.

TABLE 143. --Tobacco: Leaf used in the manufacture of cigars, cigarettes, chewing and smoking tobacco, and snuff, United States, 1944-53¹

Year	In cigars		In cigarettes		In chewing and smoking tobacco and snuff	Total
	Large ² Weighing more than 3 pounds per 1,000	Small Weighing not more than 3 pounds per 1,000	Large Weighing more than 3 pounds per 1,000	Small ³ Weighing not more than 3 pounds per 1,000		
1944-----	1,000 pounds 131,511	1,000 pounds 483	1,000 pounds 273	1,000 pounds 920,145	1,000 pounds 204,241	1,000 pounds 1,256,653
1945-----	130,008	378	784	943,502	218,500	1,293,172
1946-----	139,683	373	9	1,000,929	168,190	1,309,184
1947-----	138,264	310	3	1,055,591	164,185	1,358,353
1948-----	142,336	357	3	1,099,173	161,092	1,402,961
1949-----	127,994	331	4	1,096,150	161,020	1,385,499

1951-----	133,201	273	4	1,184,628	150,211	1,468,317
1952-----	141,940	262	9	1,239,613	144,210	1,526,034
1953 ⁴ -----	145,000	230	3	1,220,000	138,000	1,503,233

¹ The quantities given are unstemmed equivalent of all kinds of tobacco used. Stemmed leaf and scrap, etc., used in manufacturing have been converted to unstemmed equivalent at the ratio of 3 pounds stemmed to 4 pounds unstemmed.

² Includes tobacco used in bonded manufacturing warehouses.

³ "King size" cigarettes included in this category.

⁴ Preliminary estimate of the Commodity Stabilization Service.

Commodity Stabilization Service. Compiled from annual reports of the Internal Revenue Service, Treasury Department. Data for 1929-43 in Agricultural Statistics, 1952, table 153.

¹ Stocks as here shown have been converted to a farm-sales-weight basis--the equivalent of weight at the time of sale by growers--thereby making these figures of leaf-tobacco stocks comparable with figures of leaf-tobacco production.

² Stocks on the Island of Puerto Rico are included.

³ Stocks of Cuban tobacco, type 81, are not converted to a farm-sales-weight but are shown on an unstemmed weight basis. Stemmed stocks reported have been converted to an unstemmed equivalent. A factor for converting to farm-sales-weight has not been determined.

Agricultural marketing Service.

1952 ⁵ -----	3.20	.499	2.70	1.31	1.39	15.6

¹ Farm-retail price spreads in this series are calculated from average retail prices for the year beginning July and the average farm prices for the corresponding crop year. Weights used in computing average retail cost and excise taxes for the four products are based on July-June tax-paid withdrawals in each year.

² The composite retail cost of the four products--cigarettes, cigars, pipe smoking tobacco, and plug chewing tobacco--is a weighted average of the retail cost of the four products equivalent to 1 pound of leaf tobacco (farm-sales weight). Retail prices reported by the Bureau of Labor Statistics in September, December, March, and June are averaged for comparison with corresponding crop-year farm prices.

³ The farm price is a weighted average of prices of several types of leaf tobacco combined in proportion to their estimated utilization in the four products.

⁴ Federal Internal Revenue taxes are weighted by annual percentage weights, based on tax-paid withdrawals, and inflated to allow for estimated State revenue taxes; city taxes are not included.

⁵ Preliminary.

Agricultural Marketing Service. Data for 1926-38 in Agricultural Statistics, 1952, table 157.

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OIL

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, tung nuts, margarine, and fats and oils. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

Certain export and import data have been shifted to this chapter. These cover exports of soybean oil by country of destination, exports of inedible tallow greases and oil by country of destination, United States exports of fats, oilseeds, and oils, and United States imports of oilseeds and oils.

Tables dropped include those giving futures information on cottonseed oil, soybeans, and soybean oil; receipts of flaxseed and soybeans graded; production, stocks, foreign trade, and disappearance of fats and oils; and consumption of specified fats and oils in major groups of products, together with total apparent domestic disappearance.

TABLE 154. --Cottonseed: Cotton acreage, cottonseed yield, production, farm disposition, season average price per ton received by farmers, and value, United States, 1939-53

¹ Quality information not available for cottonseed produced in Arizona and California.² These 5 basic factors are combined to form indices of quantity and quality which in turn are used to determine the official grade of cottonseed in accordance with the United States Official Standards for Grades.³ The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil and protein.⁴ The quality index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter.⁵ The average grade is the product of the quantity index times the quality index. The base grade is 100.0.⁶ Samples graded by licensed chemists under the supervision of the U. S. Department of Agriculture.

Agricultural Marketing Service.

¹ In tanks, f.o.b. southeastern mills.

² Prime summer yellow, bleachable, tank-car deliveries, New York. Beginning November 1946, nearby futures.

³ On basis of 41 percent protein, bagged, carlots, Memphis.

⁴ Bulk carlots. Atlanta through September 1944; Southeast mills, October 1944--October 1947; f. o. b. mills, Memphis, November 1947 to date.

⁵ Weighted average price of linters per pound multiplied by the quantity produced per ton of seed.

⁶ Preliminary, August-June average.

Agricultural Marketing Service. Compiled from the Oil, Paint, and Drug Reporter; reports of the Bureau of Labor Statistics; and records of the Commodity Stabilization Service. Data for 1929-43 in Agricultural Statistics, 1952, table 167.

Footnotes for table 162

¹ Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere countries in 1953 is combined with the Southern Hemisphere harvest which began late in 1953 and ended early in 1954. Estimates do not include China where annual production probably varies from 1 to 2 million bushels. ² Preliminary. ³ Acreage includes area for fiber. ⁴ Average of less than 5 years. ⁵ Flax and hemp. ⁶ Includes estimates for the above countries for which data are not available and for minor producing countries. ⁷ Sown area. ⁸ Officially reported figures plus Indian official estimates for unreported tracts for 1935-39 only. Estimates for unreported tracts for 1945-53 not available. ⁹ Prior to 1945 figures for India include Pakistan. ¹⁰ 1935 only. ¹¹ Flax grown for seed only. ¹² Less than 500 acres and 500 bushels.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Includes acreage planted in preceding fall.

² Prices are averages of daily prices weighted by carlot sales, compiled from Minneapolis Daily Market Record.

³ Compiled from reports of the U. S. Department of Commerce. Linseed oil converted to flaxseed equivalent on the basis of 1 bushel (56 lb.) of flaxseed to 2 1/2 gallons of oil, and a gallon of oil weighs approximately 7 1/2 pounds.

⁴ Imports for consumption minus domestic exports, with net exports shown by a minus sign.

⁵ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁶ Less than 500 bushels.

⁷ Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1909-38 in Agricultural Statistics, 1952, table 170.

1953 ³ -----	5,963	7,737	7,474			619						

¹ Each quarterly and annual figure is computed directly from original data stated in tons.

² In 1945 and 1947 some linseed oil was imported by the Government for reshipment under Lend-Lease. As no duty was required, this was included by Census with the imports for consumption, but when the oil was shipped out, it was included in re-exports. This amount was added to exports as reported by Census.

³ Less than 500 tons.

⁴ Less than 500,000 pounds.

⁵ Preliminary.

Agricultural Marketing Service. Production of linseed cake and meal computed by the U.S. Department of Agriculture through 1948; all other data from Bureau of the Census. Data for 1929-42 in Agricultural Statistics, 1952, table 176.

¹ Peanuts in the shell. Southern Hemisphere peanut crops, which are harvested from April-June, are combined with those of the Northern Hemisphere, harvested from September-December of the same year. ² Figures refer to harvested areas as far as possible. ³ Preliminary. ⁴ Average of less than 5 years. ⁵ Includes estimates for the above countries for which data are not available and for minor producing countries. ⁶ 1 year only. ⁷ Planted area. ⁸ China and Manchuria. ⁹ Java and Madura only. ¹⁰ Exports. ¹¹ Commercial crop. ¹² Production on European farms only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Foreign trade data from reports of the U.S. Department of Commerce.

² Stocks, converted to crude basis prior to 1948, crude plus refined 1948-52.

³ Oct. 1, 1942-45.

⁴ Holdings at producing mills only.

⁵ Beginning July 1, 1941, exports reported as peanut oil, edible, and peanut oil, crude; in this tabulation they are added without converting.

⁶ January-August; not separately reported prior to this date.

⁷ Less than 500 pounds.

⁸ Includes equivalent shelled Peanuts of Farmers' stock crushed.

Agricultural Marketing Service. Stocks of peanut oil and trade from Bureau of the Census. Data for 1938-42 in Agricultural Statistics, 1952, table 183.

¹ Crop year begins about Nov. 1 in the Virginia-North Carolina section; in September in the Southeastern States, and August in the Southwestern States.

² Prices are for "quota" stock only. A portion of crop (approximately 6.5 percent of estimated production) moved as "excess" peanuts to CCC for crushing into oil and meal at an overall average price of 7.28 cents per pound for all types in all areas. Virginia-North Carolina Virginia type peanuts were declared in short supply, and the excess of this type were sold by CCC for edible purposes at 105 percent of the applicable support price for edible peanuts plus reasonable carrying charges. Proceeds, after all costs to CCC, were prorated proportionately among all producers of Virginia type peanuts delivering these excess peanuts to CCC at oil prices.

³ Prices are for "quota" stock only. A portion of crop (approximately 10.6 percent of estimated production) moved as "excess" peanuts to CCC for crushing into oil and meal at an overall average price of 5.96 cents per pound for all types in all areas.

⁴ Preliminary.

Agricultural Marketing Service. Data for 1929-43 in Agricultural Statistics, 1952, table 186.

¹ Crop year begins about Nov. 1 in the Virginia-North Carolina area; in September in the Southeastern States, and in August in the Southwestern States. Prices are for prompt shipment.

² The Office of Price Administration on Feb. 27, 1943, established per-pound ceiling prices as follows: Virginia-North Carolina cleaned Virginias, jumbo and fancy, 15 1/4 cents; shelled Virginias extra large and medium, 16 1/4 cents; No. 1's, 14 5/8 cents; Southeastern shelled No. 1 Spanish, 14 1/4 cents; Runners, 14 cents; Southwestern shelled Spanish No. 1's, 14 1/2 cents. Price ceilings were suspended July 1-26, 1946, and lifted entirely on Sept. 1, 1946.

³ Under peanut program all No. 2's from 1944 and 1945 crops were crushed. CCC offered to purchase unworked No. 2's at following prices per pound: Spanish, east of Mississippi River, 12.4 cents; west of Mississippi River, 12.65 cents; Runners, 12.15 cents; Virginias, 12.9 cents; or to pay subsidy for No. 2's sold to crushers as follows, per pound: Spanish, east of Mississippi River, 6.75 cents; west of Mississippi River, 7.04 cents; Runners, 6.5 cents; and Virginias, 7.5 cents.

⁴ Under provisions of Price Support Program most shelled No. 2 peanuts were purchased by CCC at the following prices per pound: In 1947, Virginias, 15 1/4 cents; Runners, 14 3/8 cents; Spanish, 14 3/4 cents; in 1948, Virginias, 16 1/4 cents; Runners, 15 3/8 cents; Spanish, 15 3/4 cents; in 1949, Virginias, 16 1/4 cents; Runners, 15 1/2 cents; Spanish, 15 3/4 cents; in 1950, Virginias, 15 1/2 cents; Runners, 15 1/2 cents; Spanish 15 3/4 cents.

¹ Data on tung nuts in Georgia, Florida, Alabama, Mississippi, and Louisiana.

² U. S. Department of Commerce, The Tung Oil Monthly, June 1940.

³ Factory consumption.

⁴ Preliminary.

Agricultural Marketing Service. Data on tung oil from reports of the Bureau of the Census.

TABLE 191.--Tung nuts: Production and season average price per ton received by growers, 5 principal States, average 1942-51, annual 1952 and 1953

State	Production ¹			Price for crop of--		
	Average 1942-51	1952	1953 ²	Average 1942-51	1952	1953 ²
	Tons	Tons	Tons	Dollars	Dollars	Dollars
Georgia ³ -----	819	300	600	88.20	83.00	69.00
Alabama ³ -----	946	2,800	1,300			
Florida-----	9,990	31,000	28,400	88.30	84.00	65.00
Mississippi-----	20,686	67,800	68,000	89.50	79.00	67.00
Louisiana ⁴ -----	10,446	30,200	21,700	85.00	77.00	65.00
United States-----	42,887	132,100	120,000	88.30	79.80	66.20

¹ Production of unhusked air-dried nuts.

² Preliminary.

³ Prices for Georgia and Alabama have been combined, to avoid the possibility of disclosing individual mill operations.

⁴ Includes small quantities of tung nuts produced in Texas.

Agricultural Marketing Service. The Census of Agriculture reported 351,000 tung trees in Southern States in 1930, 12,671,000 tung trees in 1940, and 9,583,000 tung trees in 1945. In addition to the States listed above, the census shows a small production also in Texas and South Carolina. The yield of oil from tung nuts varies from year to year but is usually estimated at around 16 percent of the weight of the unhusked nuts. Production and supply of tung oil appear in table 190.

¹ Includes imports, which are negligible.

² Partly estimated. 1944-June 1945 includes U. S. Department of Agriculture shipments to United States territories not reported by Bureau of the Census. Shipments to Puerto Rico and Virgin Islands only, after March 1948.

³ Adjusted for changes in U. S. Department of Agriculture stocks.

⁴ Includes military exports for civilian feeding by the military abroad.

⁵ Includes re-exports to Canada.

⁶ Includes estimated exports through nongovernmental relief agencies.

⁷ Less than 500,000 pounds.

⁸ Preliminary.

Agricultural Marketing Service. Compiled from reports of Bureau of the Census and U. S. Department of Agriculture. Prices based on products containing from 20 to 50 percent animal fat, in 1-pound cartons. Data for 1929-43 in Agricultural Statistics, 1952, table 206.

¹ Preliminary.

² Beginning 1949 partly estimated.

³ Includes edibly hydrogenated cottonseed oil, first reported as separate item in 1949.

⁴ Includes edibly hydrogenated soybean oil, first reported as separate item in 1949.

⁵ Byproduct of winterizing cottonseed, soybean, corn, and peanut oils.

⁶ Includes peanut, corn, and linseed oils, crude and refined oils not reported separately; and, beginning 1949, some edibly hydrogenated oil not specified as to kind and decolorized and winterized oils not reported separately by kind. Part of these oils may be foreign. Also includes fish oils in the following amounts: 1944, 3 million pounds; 1945, 3 million pounds; 1946, 1 million pounds; 1947-49, 0; 1950, 8 million pounds; 1951, 2 million pounds; 1952, 0; and 1953, 5 million pounds.

⁷ Mostly coconut oil except in 1944 and 1945 when it is all sunflower oil.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census. Totals computed from unrounded numbers.

1954			2,925													

¹ Includes oil equivalent of cottonseed, soybeans, peanuts, and flaxseed exported for crushing abroad.

² Includes commercial exports, voluntary or civilian relief, re-exports, shipments to United States Territories. In 1942 and 1943, includes shipments by U. S. Department of Agriculture.

³ Excludes an estimate of oil equivalent of soap used in synthetic rubber. This use is included in the "Other industrial" category.

⁴ Includes estimated stocks of dehydrated castor oil not previously reported. (Stocks for Dec. 31, 1941 are 2,231.)

⁵ Includes a discrepancy of 6 million pounds, by which the reported factory consumption of tung and officina oils exceed their domestic disappearance.

⁶ Excludes previously reported stocks of wool grease held by other than scourers. (Dec. 31, 1948 stocks were 1,653.)

⁷ Includes Government stockpiling.

⁸ Excludes stocks of coconut, palm, castor, and sperm oils held by the Government for stockpiling of strategic materials.

Agricultural Marketing Service. Computed from reports of the Bureau of the Census, Fish and Wildlife Service, and U. S. Department of Agriculture. Totals computed from unrounded numbers.

¹ Includes butter (fat content), lard, beef fats, cottonseed, peanut, soybean, corn and olive oils, and minor oils such as sesame. Stocks and exports also include some other items such as margarine. ² Production and exports also include oil equivalent of exported soybeans, cottonseed, and peanuts for crushing abroad. ³ Chiefly coconut, babassu, palm kernel, and palm oils. ⁴ Includes shipments to United States territories. ⁵ In some years disappearance cannot be computed from data contained in this table, as adjustments have been made because additional items have been incorporated in stock data. ⁶ Preliminary.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census and U. S. Department of Agriculture. Totals and per capita estimates computed from unrounded numbers.

¹ Mainly salad and cooking oils. Includes all oils and fats (other than butter, lard, margarine, or shortening) used in mayonnaise and salad dressing, bakery goods, confectionery, commercial roasting and frying, etc.

² Includes only the fat content of butter, estimated at 80.5 percent of total weight, and of margarine for which the fat content varies slightly each year.

³ Preliminary.

⁴ Fat equivalent of soap used in synthetic rubber, is included with "Other industrial products". Prior to 1949, most of the fats and oils used in synthetic detergents is believed to have been reported as used in soap. Beginning in 1949, this use of fats and oils is entirely included in "Other industrial products".

⁵ Paints, varnishes, floor coverings, oilcloth, printing inks, core oils, synthetic resins, insulation, linings, packings, coated fabrics (other than oilcloth), caulking, and other protective coatings.

Agricultural Marketing Service. Computed from reports of the Bureau of the Census, Fish and Wildlife Service, and U. S. Department of Agriculture. Totals and per capita estimates computed from unrounded numbers.

¹ Prior to 1949, most of the fats and oils used in synthetic detergents is believed to have been reported as used in soap. Since 1949, this use of fats and oils has been entirely excluded from soap.

² Preliminary.

³ Partly estimated.

⁴ Includes hydrogenated lard used in soap and reported by Bureau of the Census as used in intermediate preparations amounting to 7 million pounds in 1944.

⁵ Less than 500,000 pounds.

⁶ Mostly babassu oil, except in 1945, 1946, and 1953, when palm-kernel oil was 32, 19, and 27 million pounds.

⁷ Inedible animal stearine, grease (lard) oil, tallow oil, foots and other soap stock, red oil, stearic acid, and other fatty acids.

Agricultural Marketing Service. Compiled as follows: Fats, oils, and tall oil, Bureau of the Census; rosin, Naval stores Report, Agricultural Marketing Service. Totals computed from unrounded numbers.

Agricultural Marketing Service. All index numbers for 1947-53 except "Other industrial uses" from reports of the Bureau of Labor Statistics.

CHAPTER IV

STATISTICS OF FRUITS, VEGETABLES, MELONS, TREE NUTS, AND BEVERAGE CROPS

These crops are arranged in two major groups within the chapter: (1) Fruits and berries; and (2) vegetables, melons, tree nuts, and beverage crops (tea, cacao beans, and coffee). Also, toward the end of the second group are included summary tables on unloads and cold-storage holdings of both fruits and vegetables.

Fruits and berries

Estimates of fruit production, in general, relate to the harvested crop although in some years quantities not harvested because of low prices or other economic factors are included. Losses from natural causes, such as windstorms, freezes, etc., are not included in production. Production relates to the total crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to the crop in commercial areas. The estimates for strawberries cover production on acreage grown primarily for sale. The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when census data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

Several tables in this country's trade in fruits have been added to this section. These include a table on exports by country of destination and imports by country of origin for fresh apples and tables on exports by country of destination for oranges, canned peaches, dried prunes, and raisins and currants. The detailed table on prices received by growers for fruits for fresh consumption and processing has been dropped in the interest of space since much of the price information included in this table also appear in the individual fruit tables.

1953 ³	32.8	5,426	234	1,901	624	14.8	60	224	16,831

¹ For some crops in certain years, production includes some quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit. Apples, peaches, pears, citrus fruit, cranberries, and strawberries, which are estimated in units other than tons, are converted to equivalent tons in this table.

² Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

³ Preliminary.

¹ Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of State.
² Differences between "Total production" and "Production having value" consists of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.
³ Compiled from reports of the U. S. Department of Commerce.
⁴ Dried and canned are converted to terms of fresh apples on following basis: 1 pound of dried is equivalent to about 7 pounds fresh through 1942 (beginning 1943, 1 pound dried is equivalent to 8 pounds fresh); 1 pound of canned is equivalent to about 2 pounds fresh; 48 pounds fresh equal 1 bushel. No re-exports reported.
⁵ Excludes apple waste.
⁶ Includes apple waste.
⁷ Domestic exports minus imports for consumption with net imports shown by a minus sign.
⁸ Census returns of total harvested production of all areas in the United States.
⁹ Preliminary.

Agricultural Marketing Service. Data for 1909-38 in Agricultural Statistics, 1952, table 220.

¹ Harvests in Northern Hemisphere countries are for the year shown and are combined with the harvest in Southern Hemisphere countries of the following year. ² Preliminary. ³ Includes Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, and Germany, Eastern. ⁴ Includes Syria. ⁵ Included with Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research and other information, and on the basis of postwar boundaries. Estimates in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates, mostly in metric tons, converted to bushels of 48 pounds except Argentina and Chile in 44-pound boxes.

1953 ⁷ -----	243,000	243,000	119.00	28,986	-----	-----	-----	-----	-----

- ¹ Production, price, and value for California, Washington, and Utah. The 1950 census reported these 3 States as having 95.5 percent of the 1949 production.
- ² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions.
- ³ Net processed weight.
- ⁴ Dried apricots are 12 1/3 percent of total dried fruit for salad.
- ⁵ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis of 5.5 tons fresh to 1 ton dried. Canned converted to fresh at ratio of 55 cases (45 pounds each) packed from 1 ton of fresh fruit through 1938; beginning 1939 at ratio of 60 cases to 1 ton.
- ⁶ Less than 1/2 ton.
- ⁷ Preliminary.

Agricultural Marketing Service. Exports compiled from records of U. S. Department of Commerce. Data for 1909-38 in Agricultural Statistics, 1952, table 229.

¹ Preliminary--Continental and world totals include office estimates for countries for which separate figures are not shown.

² All figures have been converted to count bunches of 50 pounds. The word "stem" is used to signify a bunch as harvested and varies in weight from 25 to 80 pounds according to country where produced and by year.

³ Crop years Aug. 1-July 31, 1933-34 through 1936-37; Aug. 1-June 30, 1937-38; July 1-June 30, 1939.

⁴ Year beginning October.

⁵ Less than 500 bunches.

⁶ Re-exports deducted.

⁷ Old Germany through 1938.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

FRUITS, VEGETABLES, AND TREE NUTS, 1954

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1952, such quantities were as follows (tons): Sweet—Michigan, 300; Idaho, 750; Sour—Michigan, 5,000; Utah, 400.

² Preliminary.

³ Includes excess cullage of harvested fruit (tons): Idaho Sweet, 100; Michigan Sour, 2,000.

⁴ Equivalent returns per ton for bulk fruit at the packing-house door.

⁵ Equivalent returns per ton for bulk fruit at the first delivery point.

¹ Production is from bloom of year shown and includes cherries produced for fresh consumption, drying, and processing.

² Preliminary.

³ 1935 only.

⁴ Included with Syria.

⁵ Includes Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ New York, Pennsylvania, Ohio, Michigan, Wisconsin, Montana, Idaho, Colorado, Utah, Washington, Oregon, and California.

² Differences between "Production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

³ Includes fruit used for juice, wine, and preserves. For some years quantities of cherries frozen and/or brined also are included.

⁴ Preliminary.

Agricultural Marketing Service. Data for 1929-43 in Agricultural statistics, 1952, table 240.

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year (15 months). In California picking usually extends from about Oct. 1 to Dec. 31 of the following year. In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1. Fruit ripened on the trees but destroyed by freezing, or storms prior to picking is not included. For some States in certain years, production includes some quantities donated to charity, unharvested, and/or not utilized on account of economic conditions. In 1952, estimates of such quantities were as follows (1,000 boxes): California navel and miscellaneous oranges, 138; Valencia, 305; grapefruit, Desert Valleys, 2.

² As estimated from prospects on July 1, 1954.

³ Equivalent returns per box at the intake packing-house door for all methods of sale. When sale represents fruit sold at point other than intake packing-house door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold.

⁴ Includes small quantities of tangerines.

⁵ Short-time average.

⁶ Net content of box varies. In California and Arizona the approximate average for oranges is 77 lb. and grapefruit 65 lb. in the Desert Valleys; 68 lb. for California grapefruit in other areas; in Florida and other States, oranges, including tangerines, 90 lb. and grapefruit 80 lb.; California lemons, 79 lb.; Florida limes, 80 lb.

⁷ In California and Arizona, Navels and Miscellaneous.

¹ Season average price at each auction market, weighted by total sales.

² Season beginning in an autumn month of the year shown, except California Valencia oranges, for which the season begins the following April.

³ Data represent 8 auction markets in 1943 season when Detroit and Cleveland were not included because market news service offices not operating that season.

⁴ Shipments or sales of Texas citrus fruit negligible.

Agricultural Marketing Service. Data for 1929-42 in Agricultural Statistics, 1952, table 246.

Footnotes for Table 229

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year. In California, picking usually extends from about Oct. 1-Dec. 31 of the following year (15 months). In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1.

² Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For weight of boxes see pp. VII and VIII.

³ Differences between "Total production" and "Production having value" consist of fruit unharvested, donated to charity, and/or not utilized on account of economic conditions.

⁴ Equivalent returns per box at the intake packing-house-door for all methods of sale. When sale represents fruit sold at point other than intake packing-house-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold. Prices are State averages, weighted by production rather than by sales to obtain United States average.

⁵ Includes quantities used for juice, concentrates, grapefruit segments, and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment.

⁶ Imports converted to boxes on the following basis: Oranges, 90 pounds per box; grapefruit, 80 pounds per box; lemons, 76 pounds per box; limes, 80 pounds per box.

⁷ Less than 500 boxes.

⁸ Exports reported in pounds beginning Jan. 1, 1949. Converted to boxes on the following basis: Oranges, 84 pounds per box; grapefruit, 78 pounds per box; lemons, 79 pounds per box.

⁹ Production estimated from prospects on July 1, 1954.

Agricultural Marketing Service. Trade data from official records of the U. S. Department of Commerce. Data for 1919-42 in Agricultural Statistics, 1952, table 242.

¹ Production estimates relate to the crop from bloom of year shown. Harvesting in Northern Hemisphere countries begins about November and in Southern Hemisphere countries about February of the following year. Production in foreign countries converted to boxes of the following weights: Oranges 70 pounds; grapefruit and limes 80 pounds; lemons 76 pounds.

² Preliminary. Continental and world totals include office estimates for countries for which separate figures are not shown.

³ Includes Syria.

⁴ Production in Palestine.

⁵ Included in Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Exports of juice may include small quantities of concentrated juice in recent years. In the 1947 pack year approximately 425,000 cases of concentrate were thus shipped for Army relief-feeding in occupied Germany.

² Equivalent cases of 24 No. 2 cans. Domestic export of segments converted to cases at 30 pounds per case; juice at 3.4 gallons per case.

Agricultural Marketing Service. Based on data obtained from various canners' associations and individual canners. Exports from reports of the U. S. Department of Commerce. Data for 1929-38 in Agricultural Statistics, 1952, table 247.

¹ Concentrated juices can be converted to approximate single-strength equivalent by multiplying orange and grapefruit concentrate by 7, lemon concentrate by 6, and frozen orange concentrate by 4.

² In 1947 an additional 1,440,177 gallons were packed in Florida as a result of a U. S. Department of Agriculture purchase program. It was used for Army relief-feeding in occupied Germany.

³ 1,585 gallons produced in Florida, balance in California-Arizona.

⁴ 1,303 gallons produced in Florida, balance in California-Arizona.

Agricultural Marketing Service. Based on data obtained from various canners' associations and individual canners.

¹ Includes the following quantities unharvested on account of economic conditions (1,000 tons): Other States, 1940--2; 1950--3; 1951--2.

² Equivalent returns per ton for bulk fruit at the first delivery point.

³ The production estimate for California includes 12,000 tons (fresh weight) of raisin varieties lost on the drying trays because of rain damage.

⁴ Preliminary.

⁵ Converted on the basis of country data, using the following weights per cubic foot: Argentina and Chile, 36 pounds; Belgium and Netherlands, 10 pounds; Canada, Italy, and Mexico, 40 pounds; Spain, 24 pounds; Union of South Africa, 16 pounds; and all other, 20 pounds.

⁶ Domestic exports minus imports for consumption.

⁷ Included in total production of grapes, fresh basis; 1 ton of raisins equivalent to about 4 tons of fresh grapes.

⁸ Exports and imports of raisins converted to sweetbox, or production, basis at the ratio of 1 to 1.08.

⁹ January-June 1941; first date reported. 1 pound canned equals 0.741 pound fresh.

¹⁰ Includes currants beginning January 1943.

¹¹ Less than 1/2 ton.

Agricultural Marketing Service. Foreign trade data compiled from reports of the U. S. Department of Commerce. Data for 1919-38 in Agricultural Statistics, 1952, table 255.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions.

² Preliminary.

³ Equivalent returns per ton for bulk fruit at the first delivery point.

⁴ Dried basis: 1 ton of raisins equivalent to about 4 tons of fresh grapes.

⁵ United States average includes estimated production for Massachusetts, Rhode Island, Connecticut, Wisconsin, Nebraska, Delaware, Maryland, Florida, Kentucky, Tennessee, Alabama, Oklahoma, Texas, Idaho, Colorado, New Mexico, and Utah for 1942 and 1943. Estimates of production in those States were discontinued beginning with the 1944 crop.

¹ Production, price, value, and utilization for California only. According to the 1950 census there is also some commercial production of olives in Arizona but 99.6 percent of the 1949 production was in California.

² Includes the olives used for California Spanish Green, Greek style, Sicilian style, chopped, minced, and brine.

³ Less than 500 pounds.

⁴ Preliminary.

Agricultural Marketing Service. Imports compiled from reports of U. S. Department of Commerce. About 40 gallons of oil are obtained from 1 ton of olives in California. A gallon of olive oil weighs approximately 7.5 pounds. Data for 1919-38 in Agricultural Statistics, 1952, table 201.

¹ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

² Compiled from reports of the U. S. Department of Commerce.

³ Net processed weight.

⁴ Canned peaches are 40 percent of total canned fruit for salad.

⁵ Dried peaches are 21 percent of total dried fruit for sala..

⁶ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.5 pounds fresh. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh. 48 pounds of fresh equal 1 bushel.

⁷ Less than 500 pounds.

⁸ Preliminary.

Agricultural Marketing Service. Italic figures are census returns of harvested production. Data for 1909-38 in Agricultural Statistics, 1952, table 262.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1952 and 1953, such quantities were as follows (1,000 bushels): 1952—Michigan, 100; Colorado, 108; 1953—Arkansas, 110.

² Preliminary.

³ Includes excess cullage of harvested fruit as follows (1,000 bushels): 1952—Georgia, 100; Colorado, 200; California Clingstone, 917; 1953—Colorado, 53; California Clingstone, 1,083.

⁴ Mainly for canning.

⁵ United States average includes estimated production for Iowa, Nebraska, Arizona, and Nevada for 1942 and 1943. Estimates of production in those States were discontinued beginning with the 1944 crop.

Agricultural Marketing Service.

¹ Production is from bloom of year shown and includes peaches produced for fresh consumption, drying, and processing. Estimated in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates mostly in metric tons converted to bushels of 48 pounds.

² Preliminary.

³ 1935 only.

⁴ Included in Syria.

⁵ Includes Lebanon

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Preliminary.

² Differences between "Production" and "Production having value" consist of the following quantities not harvested on account of economic conditions and/or excess cullage of harvested fruit (1,000 bushels): not harvested, Arkansas, 110; excess cullage, Colorado, 53; California clingstone, 1,083.

³ Includes fruit used for jam, preserves, brandy, etc.

⁴ New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania.

⁵ Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Georgia, and Florida.

⁶ Ohio, Indiana, Illinois, Michigan, Missouri, and Kansas.

⁷ Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas.

⁸ Idaho, Colorado, New Mexico, Utah, Washington, and Oregon.

Agricultural Marketing Service.

Footnotes for Table 257

¹ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

² Compiled from reports of the U. S. Department of Commerce.

³ Net processed weight.

⁴ Dried pears are 16 2/3 percent of total dried fruit for salad.

⁵ Canned pears are 35 percent of total canned fruit for salad.

⁶ Canned pears converted to terms of fresh on the basis that 1 pound canned equals about 1.2 pounds fresh; dried pears converted to terms of fresh on the basis that 1 pound dried equals about 5.5 pounds fresh; 50 pounds fresh equals 1 bushel, except in California, where 48 pounds equals 1 bushel.

⁷ Less than 500 pounds.

⁸ Preliminary.

Agricultural Marketing Service. Italic figures are census returns of harvested production. Data for 1919-38 in Agricultural Statistics, 1952, table 267.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions.

² Preliminary.

³ Includes excess cullage of harvested fruit as follows (1,000 bushels): 1952-Oregon Other, 150; 1953-Oregon Other, 75.

⁴ Equivalent returns per bushel for bulk fruit at the first delivery point.

⁵ United States average includes estimated production for Maine, New Hampshire, Vermont, Rhode Island, New Jersey, Iowa, Nebraska, Delaware, Maryland, New Mexico, Arizona, and Nevada for 1942 and 1943. Estimates of production in those States were discontinued beginning with the 1944 crop.

Agricultural Marketing Service.

¹ Harvests in Northern Hemisphere countries are for the year shown and are combined with the harvest in Southern Hemisphere countries of the following year.

² Preliminary.

³ Includes Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, and Germany, Eastern.

⁴ Includes Syria.

⁵ Included with Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research and other information, and on the basis of postwar boundaries. Estimates in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates, mostly in metric tons, converted to bushels of 50 pounds except Argentina and Chile in 44-pound boxes.

Western Washington	5,570	3,700	3,300			
Oregon, all	70,110	45,100	48,400	71.20	81.90	69.40
Eastern Oregon	14,450	11,600	14,400			
Western Oregon	55,660	33,500	34,000			
California ⁴	456,500	337,500	365,000	75.80	93.20	85.60
4 States	570,330	423,300	454,600	75.70	90.10	83.50

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1952 and 1953 such quantities were as follows (tons): 1952—Plums, Michigan, 390; Prunes, Idaho, 900; Western Oregon, 1,600; 1953—Prunes, Eastern Washington, 1,600; Western Washington, 550; Western Oregon, 3,400. These quantities are not included in utilization figures.² Preliminary.³ Includes excess cullage of harvested fruit as follows (tons): 1952—Prunes, Idaho, 400; 1953—Plums, California, 7,000; Prunes, Idaho, 800; Eastern Oregon, 800.⁴ The California prune crop (fresh basis) is derived by multiplying the estimate of dried prunes by 2-1/2.

Agricultural Marketing Service.

¹ Production is from bloom of year shown and includes plums and prunes produced for fresh consumption, drying, and processing.

² Preliminary.

³ Does not include wild plums which are 85 percent of total production.

⁴ Includes California dried prunes converted to a fresh basis at the ratio of 2-1/2 pounds fresh fruit to 1 pound dried.

⁵ 1935 only.

⁶ Included in Syria.

⁷ Includes Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

1953 ⁷	423,500	5,109	36,313							
1953 ⁷	454,600	37,574								

¹ Production, price, and value for Idaho, Washington, Oregon, and California. ² Differences between "total production" and "production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

³ Net processed weight. ⁴ Dried prunes in salad estimated at 43 per cent of total dried fruit for salad. ⁵ Exports of dried prunes converted to unprocessed dry weight by dividing by 1.025. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2 1/2 pounds fresh. Canned prunes converted to terms of fresh

fruit on the basis that 1 pound canned equals 0.729 pound fresh. Otherwise prepared or preserved converted to terms of fresh fruit on the basis of 1 pound equals 0.899 pound fresh. ⁶ Less than 1/2 ton. ⁷ Preliminary.

Agricultural Marketing Service. Foreign trade data compiled from records of U.S. Department of Commerce. Data for 1919-36 in Agricultural Statistics, 1952, table 279.

¹ Preliminary.

² The drying ratio in Washington and Oregon ranges from 3-4 pounds of fresh fruit to 1 pound dried; in California, the drying ratio is approximately 2 1/2 pounds fresh to 1 pound dried.

³ Excludes quantities used on farms where grown.

⁴ Includes some dried, frozen, and other.

⁵ Short-time average.

⁶ Dry basis.

¹ Figures for all commodities are on a calendar-year basis, except apples and pears which begin in June of year indicated and end the following spring. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Includes Satsumas and tangerines.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlot include boat shipments reduced to a carlot basis. Data for 1929-43 in Agricultural Statistics, 1952, table 284.

¹ Includes the commercial pack only and does not include quantities of fruit frozen by industrial users or other types of processors who use all or the largest portion of their frozen pack as raw material for the manufacture of jams, jellies, and other fruit spreads, ice cream, bakery goods, or alcoholic beverages. Also does not include custom freezing for industrial users nor quantities produced in frozen-food locker plants.

² Connecticut, Maine, Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island.

³ Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

⁴ Illinois, Indiana, Michigan, Minnesota, Nebraska, Ohio, and Wisconsin.

⁵ Arizona, California, Colorado, Idaho, Montana, Oregon, Utah, and Washington.

⁶ Includes some packed in the South.

⁷ Data by regions not available for publication.

⁸ Includes some packed in the Midwest.

⁹ Includes bananas, cantaloupes, cranberries, elderberries, melon balls, mixed fruits, nectarines, pears,

pineapple, plums, and youngberries.

¹⁰ See table 236 for packs of concentrated grapefruit and orange juices in gallons, pack-year basis.

Agricultural Marketing Service. Data on all fruits except citrus juices from National Association of Frozen Food Packers; data on citrus from Florida Canners' Association, Lemon Products Advisory Board, and survey by the U. S. Department of Agriculture.

¹ Fresh deciduous fruits, canned juices, and frozen fruits are on calendar year basis, as are fresh citrus fruits for 1939 and 1940 and canned fruits beginning in 1943. Beginning 1941 fresh citrus fruits are on a crop year basis, beginning in November of the preceding year. Canned fruits are on pack year basis for years 1939-42 and on a calendar year basis since. Dried fruits are on a pack year.

² Excludes noncommercial apples.

³ Apricots, avocados, bananas, cherries (including an estimate for noncommercial), cranberries, figs, grapes, peaches, pears, pineapples, plums and prunes (including an estimate for noncommercial), and strawberries (including an estimate for noncommercial).

⁴ Apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad, citrus segments, olives (including brined), pineapple, plums, prunes, peaches, and pears.

⁵ Grapefruit, orange, blended citrus, lemon, pineapple, apple, berry, grape, and prune juices, and fruit nectars. Includes canned concentrated citrus juices converted to a single-strength basis, but excludes all frozen juices.

⁶ Dried apples, apricots, Zante currants, dates, figs, peaches, pears, prunes, and raisins except for unmarketable figs and substandard prunes. Data are in terms of processed dried weight.

⁷ Principally cherries, apples, peaches, apricots, strawberries, other berries, and citrus juices.

⁸ The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by total population adjusted for underenumeration of children under 5 years of age, and for members of the armed forces not eating out of civilian food supplies.

Vegetables and Melons

This section contains statistics on potatoes, sweetpotatoes, vegetables for commercial processing, and commercial vegetables for fresh market (including melons).

Acreage, production, value, and disposition estimates for potatoes (except early commercial potatoes) and sweetpotatoes pertain to the total crop and include quantities produced both for sale and for use as food, feed, and seed on farms where grown. The estimates of early commercial potatoes made for certain States are for segments of the total potato crop grown primarily for sale which are marketed as soon as harvested in the winter, spring, and summer months.

Estimates of acreage, production, and value for each of the 11 important vegetables for commercial processing relate to production used by commercial canners, freezers, and other processors (except dehydrators). These estimates include raw products grown by processors themselves and those grown under contract or purchased on the open market. This production and the actual or equivalent acreage harvested are not duplicated in the fresh market estimates for the same commodities. The production of those vegetables used for processing for which regular processing estimates are not made, is included in the fresh market estimates.

The Department's regular monthly and annual program of estimates of commercial vegetables for fresh market includes 28 principal vegetable and melon crops in the major producing States. These estimates relate to crops which are grown primarily for sale and they do not include vegetables and melons produced in farm and nonfarm gardens. While the bulk of the production of the 28 principal vegetable and melon crops is for consumption in the fresh state, data for some commodities include quantities used by processors. Such crops, as broccoli, Brussels sprouts, cabbage (for dehydration), carrots, cauliflower, celery, garlic, and onions, for which separate estimates for commercial processing are not prepared, are in this category. The commercial estimates of the 28 principal crops for the years 1939 to date include local market production from areas near consuming centers as well as production from well-recognized commercial areas which specialize in producing supplies for shipment to distant markets. Estimates of commercial vegetables for fresh market prepared for years prior to 1939 are not strictly comparable with the series for 1939 and later years since the earlier series pertain largely to important commercial shipping areas and for the most part do not include local market production from areas near consuming centers. The estimates for the years prior to 1939 will be found in Agricultural Statistics, 1952.

Annual estimates of national commercial production of all vegetables are presented in table 284. For fresh market vegetables they include production for sale of (1) the 28 principal crops in the major producing States for which regular seasonal estimates are prepared, (2) the principal 28 crops in unimportant producing States, (3) greenhouse vegetables in all States and (4) minor vegetables in all States. These figures show that the regular program of releases of commercial fresh market vegetable estimates for principal crops in major producing States account for about 81 percent of the national commercial output of all fresh vegetables and melons. Production of these 28 principal crops in the less important producing States not included in the regular statistical program, together with greenhouse vegetable production in all States, account for about 6 percent of the national total. The minor vegetables for which separate estimates are not prepared make up the balance of 13 percent. The total national commercial production of each of the 28 principal vegetable and melon crops and aggregate production of minor vegetables has been published by the Agricultural Marketing Service, but production estimates by States, and comparable data on acreage and value, are not available.

The seasonal nature of the production of vegetables and melons for fresh market and their perishability created a need for information on supplies available during specific periods of the year to facilitate orderly marketing. Vegetable and melon estimates for the 28 principal crops are classified according to the season or period within the season when the bulk of each crop is usually harvested. The forecasts and estimates of acreage and production therefore provide a measure of supplies available in specified seasonal periods. The seasonal groupings used are as follows:

Seasonal Groups and Sub-Groups Used for Vegetable and Melon Crops

Dates refer to period of most active harvest

Classifications Most Commonly Used

Winter: January, February, March	Early Summer: July 1-August 15
Spring: April, May, June	Late Summer: August 16-September 30
Early Spring: April 1-May 15	Fall: October, November, December
Late Spring: May 16-June 30	Early Fall: October 1-November 15
Summer: July, August, September	Late Fall: November 16-December 31

Classifications Used for Certain Short Season Crops

Early Spring: April	Early Summer: July
Mid-Spring: May	Mid-Summer: August
Late Spring: June	Late Summer: September

In practice the beginning and ending of these seasons are not fixed dates but approximations. There is necessarily some overlapping in the marketing seasons for individual crops, and weather frequently disturbs normal harvest schedules. Consequently, the classifications employed are frequently less precise than the dates indicated.

In addition to the new table on all vegetables mentioned above, several tables on United States exports and imports have been added to this section. These include a table on exports by country of destination and imports by country of origin for potatoes and tables on imports by country of origin for tea, cacao beans, and coffee. Tables on international trade on white potatoes, potato futures data, and data on volume of fresh and processed fruits and vegetables have been dropped.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Acreage, production, and farm value of the following 28 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Of these, broccoli was included for 3 States prior to 1949, 10 States since 1949; Brussels sprouts was not included prior to 1949; sweet corn was included for 3 States prior to 1948, 4 States in 1948, and 26 States since 1949. Comparable estimates not available prior to 1939.

³ Acreage, production, and farm value of the following 11 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates.

⁴ Production for fresh market includes some quantities not marketed because of low prices or other economic factors which are excluded in computing value.

⁵ Preliminary.

¹ Production of the following 28 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Of these, broccoli was included for 3 States prior to 1949, 10 States since 1949; Brussels sprouts was not included prior to 1949; sweet corn was included for 3 States prior to 1948, 4 States in 1948 and 26 States since 1949. Comparable estimates not available prior to 1939.

² Production of the following 11 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates. Includes allowances for production of lima beans and beets 1919-28 and pimientos 1919-25 which were not included in the regular program of reports in those years.

³ Commercial production of the following fresh market vegetables: The 28 crops listed above in major producing States, 28 crops in relatively unimportant States for which seasonal estimates are not prepared, minor vegetables (those not included in the regular program of seasonal estimates) in all States and greenhouse production in all States. Production for home consumption in farm and nonfarm gardens is not included. Production by States, and acreage, and value data not available.

⁴ Preliminary.

Agricultural Marketing Service.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Acreage of the following 28 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.

³ Preliminary.

⁴ Acreage of the following 11 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates.

¹ The following quantities were unharvested and/or not marketed and have been excluded in computing price and value (1,000 bushels): 1939--1,240; 1943--440; 1950--1,235; 1951--1,093; 1953--5,120. For 1946, the 1,504,000 bushels purchased by the Government under the price support program and left in the ground have been included in computing price and value.

² Prices are of eastern potatoes weighted by unloads, seasons September-May, from records of the Production and Marketing Administration. Beginning 1951, price data are for Maine and Long Island potatoes only.

³ Compiled from reports of the U. S. Department of Commerce.

⁴ Domestic exports minus imports for consumption, with net imports shown by a minus sign.

⁵ Includes shipments under the Army Civilian Supply Program beginning January 1947.

⁶ Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1866-1938 in Agricultural Statistics, 1952, table 339.

1953 ⁴ -----	³ 373,711	31,279	12,908	31,354	18,729	310,720	120,210

¹ Consists of potatoes sold for all purposes including food, seed, processing, and livestock feed. For 1937, 1940, and 1943-50, includes potatoes removed by the Government from normal market channels under price support programs, and for which growers received payment.

² Merchantable stocks consist of potatoes held by growers, local dealers, and buyers on farms or near areas of production in the 36 late and intermediate States for sale or delivery after Dec. 31. (For crops prior to 1952, includes Arizona). They include potatoes held for sale or delivery to starch factories and other processors. Stocks for Jan. 1, 1938, 1941, 1944, and 1946-51, include merchantable potatoes which were removed by the Government from normal market channels under price support programs.

³ Includes the following quantities unharvested and/or not marketed (1,000 bu.): 1950--1,235; 1951--1,093; 1953--5,120.

⁴ Preliminary.

Agricultural Marketing Service. Data for 1929-43 in Agricultural Statistics, 1953, table 343.

FOOTNOTES FOR TABLE 339

¹ Consists of potatoes sold for all purposes including food, seed, processing, and livestock feed.

² Includes the following quantities of commercial early potatoes not marketed (1,000 bushels): North Carolina, 105; Florida, 364; Alabama, 1,288; Texas, 494; California, 2,869. In Florida, Alabama, Texas, and California, the estimates of quantities not marketed include some commercial early potatoes not harvested.

Agricultural Marketing Service.

¹ Years shown refer to year of harvest in the Northern Hemisphere and includes the harvest immediately following in the Southern Hemisphere.

² Averages are for years stated or for the nearest comparable period.

³ Preliminary.

⁴ Not comparable with later years as prewar years apparently include small farms and gardens.

⁵ Includes Albania, Bulgaria, Czechoslovakia, Germany (Eastern Zone), Hungary, Poland, and Rumania.

⁶ Includes U.S.S.R.

⁷ Jewish farming only.

⁸ Included in Syria.

⁹ Includes Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Mostly for fresh market, but includes some quantities for processing except in the States for which processing estimates are made.
² Includes the following quantities not marketed and excluded in computing value: 100,000 bushels in 1939, 38,000 in 1940, 16,000 in 1944, 16,000 in 1946, 72,000 in 1947, 86,000 in 1948, 213,000 in 1949, 172,000 in 1950, 440,000 in 1951, 125,000 in 1952, and 85,000 in 1953.
³ 9 States only: Texas, Virginia, Maryland, New Jersey, New York, Arkansas, Oklahoma, Washington, and California.
⁴ Approximately 20 pounds. ⁵ Preliminary.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 347

¹ Preliminary.
² Includes quantities used for processing except in 9 States for which processing estimates are made separately.
³ Approximately 20 pounds.
⁴ Includes some quantities not marketed.
⁵ Not published to avoid disclosure of individual operations.
⁶ Derived price per ton.

Agricultural Marketing Service.

TOMATOES

¹ Includes the following quantities not marketed and excluded in computing value: 42,000 bushels in 1940, 51,000 in 1941, 15,000 in 1942, 40,000 in 1943, 342,000 in 1945, 319,000 in 1946, 80,000 in 1948, 200,000 in 1949, and 110,000 in 1951.

² Includes "otherwise prepared", if any.

³ Approximately 53 pounds.

⁴ Includes exports for military civilian-feeding abroad beginning January 1947.

⁵ Preliminary.

Agricultural Marketing Service. Imports and exports compiled from reports of the U. S. Department of Commerce.

¹ Figures for all commodities are on a calendar-year basis, except onions which are for a 12-month period beginning in March. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Includes Casaba, Honey Ball, Honey Dew, Persian, and mixed melons. Cars of mixed melons may include cantaloupes as well as other muskmelons.

³ Not available.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers, throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1929-43 in Agricultural Statistics, 1952, table 360.

¹ Fresh vegetables include estimated total commercial production for fresh market including estimated greenhouse production. Does not include production for home use.

² Artichokes, asparagus, broccoli, Brussels sprouts, lima beans, snap beans, cabbage, carrots, kale, lettuce and escarole, green peas, green peppers, spinach, and an estimated quantity of minor vegetables.

³ Beets, cauliflower, celery, sweet corn, cucumbers, eggplant, garlic, onions, shallots, and an estimated quantity of minor vegetables.

⁴ Includes watermelons, cantaloups, Honey Ball melons, Honey Dew melons, etc.

⁵ The per capita civilian consumption obtained by dividing the total apparent civilian consumption by total population adjusted for underenumeration of children under 5 years of age and for members of the armed forces not eating out of civilian supplies.

⁶ Preliminary.

Agricultural Marketing Service. The figures in this table are given in terms of production weight, i. e., quantities available for consumption at the farm level.

¹ Total crop for processing converted to a canned basis by applying the following factors (cases of 24 No. 2 cans per ton, farm weight): Cucumbers for pickles, 68 cases; cabbage for kraut, 54 cases; and pimientos (year 1941 to date), 29 cases.

² Equivalent cases of 24 No. 2 cans.

³ Preliminary.

⁴ Data for tomato catsup, chili sauce, paste, and sauce through 1940 are either rough estimates or interpolations.

Agricultural Marketing Service. Compiled mainly from reports of the National Cannery Association. In addition to the vegetables shown in this table, considerable quantities of the following products also are canned: Baked beans, carrots and peas, corn on the cob, hominy, kidney beans, mixed vegetables, mushrooms, okra, other greens than spinach, potatoes, rhubarb, sauerkraut juice, soups, spaghetti, succotash, sweetpotatoes, and vegetable puree. Data for 1929-38 in Agricultural Statistics, 1952, table 363.

¹ The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by the total population adjusted for underenumeration of children under 5 years of age and for members of the armed forces not eating out of civilian supplies.

² Includes asparagus, lima beans, beets, carrots, Irish potatoes, pickles (including bulk stock), pimientos, pumpkin and squash, sauerkraut (including bulk stock), spinach, succotash, sweetpotatoes, tomato juice, pulp, catsup, paste, sauce, and chili sauce, other greens and mixed vegetables.

³ Excludes baked beans, soups, hominy, and minor vegetables not mentioned above.

⁴ Preliminary.

Agricultural Marketing Service. For data on a pack-year basis, 1909-51, see Agricultural Statistics, 1953, table 371.

¹ Preliminary. ² Bags of 132.276 pounds each. ³ Revised. ⁴ 12 months ending June of year shown. ⁵ Includes Cuba, British West Indies, Guadeloupe, and Puerto Rico. ⁶ Includes Peru and Surinam. ⁷ Ethiopian year ending Sept. 10 of year shown. ⁸ 3-year average. ⁹ Includes Cepe Verde, French Togoland, Liberia, Sao Thome and Principe, Sierra Leone, and Gold Coast. ¹⁰ 12 months ending Apr. 1 of year shown. ¹¹ Approximated from unofficial information. ¹² Includes Timor, Hawaii, New Caledonia, and New Hebrides.

Foreign Agricultural Service. Official publications of foreign governments, United States Foreign Service reports, and other information.

CHAPTER V

STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

The data in chapter V deal with hay, pasture, seeds, and various minor field crops. The reader will note a break in the continuity of some of the hay series; this results from a change in the method of estimating prairie or wild hay, which is explained in the footnotes of the appropriate tables. Table 400 shows the seeding rates for a number of specified crops. The State averages represent the latest information available and are based largely on surveys made annually or every few years. The United States average rates are derived by weighting the average for each State by the acreage planted to the particular crop.

New tables have been added to this chapter showing exports, by country of destination for dry beans and hops. The table on production of range and pasture grass seeds has been dropped since this series of estimates was developed under an emergency reporting program which no longer exists. Also dropped was a table on international trade in dry edible peas.

¹ Rate on equivalent solid acres (acres grown alone, plus approximately 1/2 the interplanted acres). ² Farmers stock or unshelled basis.

Agricultural Marketing Service, United States average is rate of seeding weighted by acreage planted, by States.

TABLE 401. --Beans, dry edible: Acreage, yield, production, value, and foreign trade, United States, 1939-51¹

Year	Acreage planted	Acreage harvested	Yield per harvested acre	Production		Season average price per 100 pounds received by farmers ²	Farm value ³	Wholesale price per 100 pounds of pea beans, New York, year beginning September ⁴	Farm and commercial storage stocks, Sept. 1 ⁵	Foreign trade, year beginning September ⁶

1953 ¹⁰	1,437	1,398	1,296	18,114	16,761						

¹ Table includes, besides the ordinary edible beans and beans grown for seed, blackeyes, and garbanzos in California. Soybeans and mung beans are not included. ² Price of cleaned beans. ³ Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than total production. ⁴ Compiled from New York Producers' Price Current, and beginning September 1947 from the New York Journal of Commerce. ⁵ Stocks for 1942-46 and 1950 from official reports, adjusted for U. S. Department of Agriculture holdings. Estimates for other years based on the best sources available. ⁶ Compiled from reports of U. S. Department of Commerce. ⁷ Bags of 100 pounds. ⁸ Acreage grown alone. ⁹ Includes an allowance for unredeemed loans and purchase agreement deliveries at the average rate. ¹⁰ Preliminary. ¹¹ September-June average.

Agricultural Marketing Service. Italic figures are census returns; census figures include all States; other figures, principal producing States only. Data for 1909-38 in Agricultural Statistics, 1952, table 404.

FOOTNOTES FOR TABLE 402

¹ Bags of 100 pounds.

² Table includes, besides the ordinary edible beans and beans grown for seed, blackeyes and garbanzos in California. Soybeans and mung beans are not included.

³ Preliminary.

⁴ Price of cleaned beans; for certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

Agricultural Marketing Service.

¹ Years refer to year of harvest in the Northern Hemisphere and include the harvest immediately following in the Southern Hemisphere. Averages are for years stated or for the nearest comparable period. Yields have been calculated on the basis of unrounded estimates of acreage for countries of small production.

² Preliminary.

³ Production in Mexico is about 60 percent "porquero" type garbanzos used mostly for livestock feed.

⁴ Includes large quantities of porquero-type garbanzos (see footnote 3).

⁵ Adjusted upward for areas not reported prior to 1946-47.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

FOOTNOTES FOR TABLE 403

¹ Years refer to year of harvest in the Northern Hemisphere and includes the harvest immediately following in the Southern Hemisphere.

² Averages are for years stated or for the nearest comparable period.

³ Preliminary.

⁴ Subject to adjustment by the Canadian government in line with the 1950 census.

⁵ Uncleaned basis, garbanzos excluded.

⁶ Included with Syria.

⁷ Includes Lebanon.

⁸ Calendar year production.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

HAY, SEEDS, AND MINOR FIELD CROPS, 1954

¹ Acreage, yield, and production for 1949-52 include hops harvested and salable under Marketing Agreement, hops harvested but not salable under Marketing Agreement and hops produced but not harvested. Salable allotments in 1952 totaled 39.2 million pounds. The Marketing Agreement was terminated June 30, 1953. For 1942-48 and 1953, acreage, yield, and production represent quantities actually harvested.

² Preliminary.

³ Short-time average.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 427

¹ Years refer to year of harvest in the Northern Hemisphere, and include the harvest immediately following in the Southern Hemisphere. Averages are for years stated or for the nearest comparable period. Yields have been calculated on the basis of unrounded estimates of acreage for countries of small production.

² Preliminary.

³ 1936 only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

CHAPTER VI

STATISTICS OF CATTLE, HOGS, SHEEP, HORSES, AND MULES

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter, meat production, and market statistics for meat animals.

The term "on farms" as used in this chapter includes ranches. Estimated numbers do not include livestock not on farms.

Information on the methods used in making livestock estimates may be found in Miscellaneous Publication No. 703, "The Agricultural Estimating and Reporting Services of the United States Department of Agriculture."

Differences between census inventories and January 1 estimated numbers are large in years when the census relates to a later date than January 1, for example, the 1950 census was taken as of April 1. The difference represents the disappearance of numbers between January 1 and the date of the census enumeration. In the case of hogs, this difference is especially large as marketings and slaughter are seasonally high during the first 3 months of the year. In addition to the census data relating to an April 1 date in 1950, the enumeration covered all animals on hand including young stock born after January 1, 1950. Published census totals often include these young animals which are not included in the U. S. Department of Agriculture estimates of January 1, 1950 inventories. The 1950 census inventories as shown herein do not include the spring born young stock which was enumerated for that year.

Tables dropped from this chapter include those on lard and wool top futures, imports of meat and meat food products federally inspected and passed for entry into the United States, quantities of meats and meat food products graded or certified as complying with specifications by the U. S. Department of Agriculture, incidence of sleeping sickness and mortality in horses and mules and number of cases of rabies and kinds of animals affected. Also, in the interest of saving space only the most recent year's disposition data by States are shown. Several tables on imports and exports have been moved to this chapter. Such tables are: United States exports of lard by country of destination, imports and exports of meat by type of product, imports of hides and skins for consumption, and imports of hides and skins by country of origin.

¹ Estimates include only cattle being fattened for market as a more or less distinct agricultural enterprise, and exclude small operations incidental to dairy and general farming. Cattle thus fed are presumed to produce carcasses that will grade good or better. In addition there have been a number of cattle finished on distillery slop, mostly in Kentucky, and on byproduct feeds in other States not shown, as well as large numbers being winter-fed in West Virginia, Virginia, Kentucky, and some other States, to be marketed as "grass fat" cattle in the late summer.

² Preliminary.

Agricultural Marketing Service. Data by regions and United States for 1930-51 in Agricultural Statistics, 1952, table 441 and for 1952 in 1953 book, table 445.

1 Excludes interfarm sales.

2 Includes cattle shipped in from other States and from central markets but excludes intrastate shipments.

3 Adjustments were made for cattle shipped in and changes in inventory.

4 No adjustments made for cost of cattle shipped in and changes in inventory values. Gross income is "Cash receipts from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

Agricultural Marketing Service.

¹ Calves born during the year.² Excludes interfarm sales.³ Includes cattle shipped in from other States and from central markets, but excludes intrastate shipments.⁴ Preliminary.⁵ Adjustments were made for cattle shipped in and changes in inventory.⁶ No adjustments were made for cost of cattle shipped in and changes in inventory values. Gross income is "Cash receipts from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

Agricultural Marketing Service. Data for 1924-43 in Agricultural Statistics, 1952, table 444.

FOOTNOTES FOR TABLE 445

¹ Under "Public stockyards" are included stockers and feeders which were bought at stockyards markets. Under "Direct" are included stockers and feeders coming from other States from points other than public stockyards, some of which are inspected at public stockyards while stopping for feed, water, and rest en route.

Agricultural Marketing Service.

1953-----	26.56	24.14	21.56	18.74	15.77	13.92	25.04

¹ Weighted average prices of beef steers, sold out of first hands for slaughter. These grade designations became effective Dec. 30, 1950. Grades used in Agricultural Statistics prior to 1951 compare with these grades as follows: The old Choice and Prime grades were combined as Prime, the old Good was changed to Choice, the old Medium was divided into Good and Commercial, and the old Common was changed to Utility.

² Grade name was changed to Commercial in 1951. Prices shown are approximate equivalent for present grade, estimated by Bureau of Agricultural Economics, as follows: Weighted average of Good 5, Common and Medium 1, through 1937; Good 3, Medium 1, 1938-50; reported as Commercial, 1951 to date.

³ This grade designation became effective Mar. 10, 1951. Good and Choice previously used in Agricultural Statistics is comparable to the Choice and Prime used here.

Agricultural Marketing Service. Data for 1930-43 in Agricultural Statistics, 1953, table 460

FOOTNOTES FOR TABLE 450

¹ Includes slaughter under Federal inspection and other wholesale and retail slaughter; excludes farm slaughter.

² Includes Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.

³ Includes the District of Columbia.

Agricultural Marketing Service.

¹ End of year estimates (October-December) included under following year for comparisons and totals. Thus for Canada the December 1950 estimate of 5,419,000 is shown under 1951. ² Preliminary. ³ Average for 2-4 years only. ⁴ Census or estimate for single year. ⁵ Official statistics; may be underestimates of actual numbers. ⁶ September. ⁷ June. ⁸ Includes China Proper (22 provinces), Manchuria, Jehol and Sinkiang (Turkestan). ⁹ Year 1934. ¹⁰ Number taxed only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, and other information. Data for countries having changed boundaries relate to present territory. Totals include estimates for countries for which official statistics are unavailable.

¹ Excludes interfarm sales.

² Includes hogs shipped in from other States and from central markets but excludes intrastate shipments.

³ Adjustments were made for hogs shipped in and changes in inventory.

⁴ No adjustments made for cost of hogs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of hogs, pork, and lard" plus "Value of hogs slaughtered for home consumption."

Agricultural Marketing Service. Data for 1924-43 in Agricultural Statistics, 1952, table 465.

¹ The number of stockyards reporting varies from 64 to 68.

² Total rail and truck receipts.

³ Rounded total of complete figures.

⁴ Covers receipts at 16-20 concentration yards and 10 or 11 packing plants in interior Iowa and southern Minnesota prior to 1947. Since January 1947, represents receipts at 14 packing plants and 30 concentration yards. Segregated truck receipts are not available.

Agricultural Marketing Service. Compiled from reports received from stockyard companies. Data for 1930-43 in Agricultural Statistics, 1952, table 468.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 481

¹ Excludes interfarm sales.² Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments.³ Adjustments made for cost of sheep and lambs shipped in and changes in inventory.⁴ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lambs, mutton, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

Agricultural Marketing Service.

1953 ³ -----	-----	271,343	9 2,329	348,876	617,890	99,884

¹ Includes sheep shorn at commercial feeding yards.

² Revised. Beginning with 1943 the average price is for the marketing season April-March. Prior to 1943 average prices relate to the calendar year.

³ Preliminary.

⁴ Grease basis as reported by Bureau of the Census. Includes wool stored in bonded warehouses prior to payment of duty. Excludes wool on farms for all years, and wool stored for the British Government for re-export, 1942-46.

⁵ Includes hair of the angora goat, alpacas, and other like animals.

⁶ Apparel wool for all years includes the item "not finer than 40's" both free and dutiable. Carpet wool includes only Donskoi, Smyrna, East Indian, Chinese, and similar wool without merino or English blood.

⁷ Production minus exports plus imports; stocks not taken into consideration.

⁸ Does not include 222,222,220 pounds in 1942; 275,476,308 pounds in 1943; 2,725,929 pounds in 1944; 5,372,698 pounds in 1945; and 14,840 pounds in 1946, imported free of duty as an act of international courtesy. Wool so imported consisted almost entirely of wool stored in this country for the British Government, and later re-exported. This wool was not available to domestic mills.

⁹ Clean content.

Agricultural Marketing Service. Imports and exports from Foreign Commerce and Navigation of the United States and other reports of the U.S. Department of Commerce. Data for 1909-39 in Agricultural Statistics, 1952, table 499.

¹ Includes sheep shorn at commercial feeding yards.

² For Texas and California the weight per fleece is the amount of wool shorn per sheep and lamb during the year.

³ Price per pound relates to the marketing season April-March.

⁴ Preliminary.

Agricultural Marketing Service.

CATTLE, HOGS, SHEEP, HORSES, AND MULES, 1954

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Beginning January 1942 wool was considered as consumed (1) on the woolen system when laid in mixes and (2) on the worsted system when entering scouring bowls. From August 1948 forward consumption on the worsted system is taken as the sum of top and noil production.

² 53 weeks. ³ Preliminary. ⁴ Domestic and duty-paid foreign.

⁵ Beginning 1946, excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products. ⁶ Duty-free foreign.

Agricultural Marketing Service. Compiled from reports of Bureau of Census.

FOOTNOTES FOR TABLE 495

¹ For summary purposes wool produced mostly in the spring in the Northern Hemisphere is combined with that produced in the season beginning July 1 or Oct. 1 of the same year in the Southern Hemisphere. Pulled wool is included for most countries at its greasy equivalent.

² Preliminary.

³ Includes estimates for Newfoundland, Netherland West Indies, Guatemala, and El Salvador.

⁴ Includes the Iron Curtain Countries, (Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, and Eastern Germany).

⁵ Based on present boundaries.

⁶ Includes estimates for countries producing 2 million pounds or less, namely Belgium, Denmark, Iceland, Sweden, and Switzerland.

⁷ Includes China Proper (22 provinces) Manchuria, Jehol, and Sinkiang (Turkestan).

⁸ Includes Pakistan.

⁹ Includes estimates for Afghanistan, Cyprus, Palestine, Transjordan, Outer Mongolia, Tibet, Nepal, and China.

¹⁰ Includes relatively small production in Bolivia, Colombia, Ecuador, Paraguay, and Venezuela.

¹¹ Union of South Africa, Union Protectorate, and South West Africa.

¹² Includes estimates for Kenya, French West Africa, and Togo.

¹³ Rounded to tens of millions.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information. Estimates for countries having changed boundaries have been adjusted to present boundaries except as noted.

Bacon	773,435	817,431	732,576				
Other	29,445	47,437	73,982				

¹ All figures in this table do not represent production, as a product may be inspected more than once in the course of further manufacture and some products may undergo further processing in plants not under Federal inspection. Compiled from weekly data; therefore the number of weeks added to obtain the annual totals may vary slightly. ² Includes production for the U. S. Department of Defense. ³ Excludes production for the U. S. Department of Defense July 29-Dec. 29. ⁴ Includes 59,045,000 pounds processed for the U. S. Department of Defense.

Agricultural Research Service. Data on a slightly different basis for years prior to 1950 may be found in earlier editions of Agricultural Statistics.

TABLE 505. --Canned meat products: Quantity produced, under Federal inspection, United States, 1951-53¹

Product	1951 ²	1952 ³	1953 ³	Product	1951 ²	1952 ³	1953 ³
	1,000 pounds	1,000 pounds	1,000 pounds		1,000 pounds	1,000 pounds	1,000 pounds
Luncheon meat	340,393	351,712	314,006	Bacon	13,608	3,099	2,287
Canned hams	183,234	205,442	196,079	Soups	443,732	516,732	588,949
Deviled ham	8,391	8,210	7,521	Liver product	2,588	1,933	2,149
Other potted or deviled meat food products	35,750	38,450	43,739	Tongue (other than pickled)	5,884	3,655	3,624
Viennas	51,563	46,557	51,232	Tripe	7,212	8,980	6,026
Franks, wieners in brine	30,902	8,614	8,430	Brains	4,090	4,131	3,900
Sausage in oil	6,358	6,692	8,140	All other contain- ing 20 percent or more meat and/or meat by-products	106,262	73,478	81,318
Bulk sausage	27,718	8,495	8,159	All other contain- ing less than 20 percent meat and/ or meat by- products	121,445	140,569	153,061
Corned beef hash	85,984	64,352	66,367	Total	1,842,629	1,808,840	1,971,971
Chili con carne	104,825	97,092	110,290				
Tamales	26,735	31,379	30,077				
Meatstew (all product)	76,815	71,558	70,947				
Spaghetti meat products	71,600	59,593	63,106				
Sliced dried beef	4,655	5,195	4,839				
Vingar pickled products	33,118	35,493	30,468				
Hamburger, roasted or corned beef, meat and gravy	49,767	17,429	117,257				

¹ Meats canned under Federal inspection include the largest part of the canned meat produced in the United States. Net product weight; including weight of nonmeat ingredients of products.

² Excludes production for the U. S. Department of Defense July 29-Dec. 29.

³ Excludes meat products processed for the U. S. Department of Defense.

Agricultural Marketing Service. Compiled from data of the Agricultural Research Service.

¹ All meats converted to a carcass weight equivalent--includes beef and veal, pork, mutton and lamb; goat, and horse meat; excludes live animals, edible offal, lard, rabbit, and poultry meat. ² Preliminary. ³ Averages for years 1935-39 for prewar. ⁴ Includes Newfoundland, beginning Apr. 1, 1949. ⁵ Not available. ⁶ Partially estimated. ⁷ Includes carcass meat equivalent of live cattle exports. ⁸ Western Germany, beginning Oct. 1, 1949. ⁹ January-November data. ¹⁰ 1931-35 for prewar. ¹¹ Includes edible offal. ¹² 2-4 years only. ¹³ Includes Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Rumania. ¹⁴ Present territory for postwar years. ¹⁵ Estimated--based on imports into receiving countries reporting imports by origin. ¹⁶ Estimated--based on exports from supplying countries reporting exports by destination. ¹⁷ January-September data. ¹⁸ January-July data. ¹⁹ Revised to include 45 countries instead of 44 countries included in the previous summaries. The one additional country is Northern Rhodesia.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, and other information. In postwar years some international trade, particularly imports, may have been excluded because of lack of information upon which to base estimates.

¹ Carcass weight equivalent: Dressed weight of cattle, calves, sheep, and lambs; pork excluding lard is carcass equivalent weight of hog products minus an allowance for carcass fat rendered for lard. Edible offals are excluded. Civilian consumption through 1940 is assumed to be the same as total consumption; for 1941 to date military takings are excluded.

² Includes lard entering into manufactured products.

³ Preliminary.

Agricultural Marketing Service.

CATTLE, HOGS, SHEEP, HORSES, AND MULES, 1954

TABLE 512. --Meat: United States exports and shipments to territories, and imports into the United States, carcass weight equivalent, 1940-53¹

¹ Carcass weight equivalent of all meat, including the meat content of minor meats and of mixed products. Exports exclude shipments for military-civilian feeding in United States occupied areas. Shipments to territories include shipments to all territories through 1948, from 1949-51 shipments to Puerto Rico and Virgin Islands, and for 1952 and 1953 shipments to Puerto Rico, Virgin Islands, and Guam.

² Include exports and shipments to territories by U. S. Department of Agriculture, 1941-49.

³ Less than 500,000 pounds.

⁴ Exports and shipments for 1949-53 not strictly comparable with earlier years (see footnote 1).

⁵ Apparent reduction from earlier years is due to change in reporting of data.

⁶ Preliminary. 1952 and 1953 data are computed with slightly revised conversion factors.

Agricultural Marketing Service. Data on imports and commercial exports and shipments are computed from records of Bureau of the Census; those on exports and shipments by U. S. Department of Agriculture are separately estimated from deliveries and stocks. Data for 1910-39 in Agricultural Statistics, 1952, table 516.

CHAPTER VII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks and consumption of milk and its products. The 2 distinct series of numbers of milk cows on farms included in this publication should not be confused. One series entitled "Cows and heifers 2 years old and older kept for milk, January 1 is an inventory number of this specific age-sex classification which is estimated as one of the major groups making up the total cattle population at the beginning of the year. The other series, identified as "Milk cows on farms," is an annual average number of milk cows during the year (excluding any not yet fresh) which is used in connection with determining milk production. More animals are represented in the first series than the latter because heifers 2 years of age which have not freshened are included.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or butterfat content as actually sold (above 3.91 percent), while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, and cash receipts, and gross income from chickens and eggs; poultry and egg receipts at principal markets; commercial broiler production; turkey production, disposition, cash receipts, and gross income; liquid and dried egg production; and the National Poultry Improvement Plan.

The estimates of chickens and turkeys on farms in census years differ from the census figures to the extent of the seasonal disappearance in numbers from January 1 to the average date of the enumeration. Estimates relating to inventories, production, and income exclude poultry and eggs which are produced on places not classified as farms.

Tables dropped from this chapter include; new registrations of purebred dairy cattle by breeds; tuberculin testing of herds; receipts of milk and cream, cheese, poultry, and shell eggs at principal markets by State of origin; futures trading in butter and eggs; volume of butter, cheese, poultry, and eggs graded; feed-price ratios and poultry ration cost by geographic divisions; and summary tables on participation in the National Improvement Plan for poultry and turkeys. Only 1 year's State data have been included for quantities of milk used and marketed by farmers and for farm disposition, price, and value of milk, chickens, and eggs. Export tables on dairy products by type of product and destination and import tables by type of product and country of origin have been added.

TABLE 523.--Cows, heifers, and heifer calves kept for milk purposes: Number on farms Jan. 1, value, and number eliminated during year, United States, 1940-54

¹ A sire is proved when records of 5 or more of his unselected daughters are compared with records of their dams.

² Lactation records converted to 305-day, twice-a-day milking, mature-equivalent basis.

³ Prior to 1946 data represent cows enrolled.

Agricultural Research Service.

FOOTNOTES FOR TABLE 526

¹ Averages for the October-May feeding period, as reported by about 6,000 dairy correspondents.

² In computing hay equivalents, 3 tons of silage or 2 tons of other roughage were considered equal to 1 ton of hay.

³ Seasonal average condition for Apr. 1-Oct. 1 period.

⁴ Includes citrus pulp fed.

⁵ Data insufficient for stable average.

Agricultural Marketing Service.

TABLE 529. --Cows in dairy-herd-improvement associations: Production, feed costs, and relationship of feed input to production returns for cows of different levels of butterfat production, United States, 1952

Range of butterfat production (pounds)	Cows		Average per cow						Value of product over feed cost	Return for \$1 spent for feed	Feed cost per pound of butterfat	Feed cost per 100 pounds of milk
			Production			Feed cost						
			Butterfat	Milk	Value	Roughage including pasture	Grain	Total

¹ Estimates include milk delivered to creameries, condenseries, cheese factories, and market milk receiving stations, but exclude market milk sold to other farmers for local delivery.

² Approximations based on health officers' reports of sources of fluid milk in villages, towns, and small cities, and information on sales by producer-distributors.

1 Includes an allowance for milk produced by cows not on farms. 2 Milk sherbet, ice milk, and miscellaneous minor frozen products. 3 Milk equivalent of butter and condensed milk used in ice cream. 4 Includes dry cream, malted milk, dry part skim milk, dry ice cream milk, and cottage cheese. 5 Includes net milk equivalents of butter and frozen dairy products to avoid double counting of milk from which fat was reused in making a second dairy product. 6 Includes an allowance for fluid consumption on farms not producing milk in addition to the consumption on farms where milk is produced. 7 Net movement of whole milk or cream into export or storage channels. A negative figure represents net imports or net out-of-storage movement during the year. 8 Residual, including miscellaneous minor uses and any inaccuracies of independently determined production and use items. 9 Preliminary.

¹ Includes farm uses. ² Includes for the United States and Canada, cows kept mainly for milk and for all other countries cows producing over and above the requirements of the calf. ³ Includes milk used for cream. ⁴ Includes milk used for ice cream, dried whole milk, minor products, waste, and balance. ⁵ Total production is shown. Milk production on farms: average 1946-50, 115,977 million pounds; 1952, 115,197 million pounds; 1953, 121,219 million pounds. ⁶ Includes fluid milk. ⁷ Average for 1947-50. ⁸ Includes canned milk. ⁹ Includes both hand-fed milk and milk sucked by calves. ¹⁰ Production and utilization include goats milk. ¹¹ Excludes milk fed to calves. ¹² Years ending June 30.

Foreign Agricultural Service. Prepared or estimated from official statistics, reports of United States Foreign Service officers, and other sources.

Footnote for table 533

¹ Estimates include milk delivered to creameries, condenseries, cheese factories, and market milk receiving stations, but exclude market milk sold to other farmers for local delivery. ² Approximations based on health officers' reports of sources of fluid milk in villages, towns, and small cities, and information on sales by producer-distributors. ³ Preliminary.

Agricultural Marketing Service. Similar data for 1924-43 in Agricultural Statistics, 1952, table 544, except that the milk used for farm-churned butter was separated between that consumed in the farm household and that sold. Resulting totals for farm use and for products sold are not entirely comparable.

DAIRY AND POULTRY STATISTICS, 1954

¹ Preliminary.² Data not available.³ Totals for 1951-53 do not include farm butter sold since this was not estimated separately.⁴ Milk sold at wholesale and retail plus milk skimmed for sale as cream and milk equivalent of farm butter sold.⁵ Computed from the value of milk, cream, and farm butter sold divided by the quantity of milk or milkfat used in the preparation of these products for market.⁶ For 1951-53 includes milk used for all butter churned on farms, including a small quantity which was sold but for which separate data were not available.⁷ Milk utilized for household consumption valued in each State at average returns per 100 pounds for milk utilized in dairy products sold.⁸ Value of milk, cream, and farm butter sold plus the value of these products consumed in the household on farms where produced.⁹ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

Agricultural Marketing Service. Data for 1924-43 in Agricultural Statistics, 1952, table 547.

FOOTNOTES FOR TABLE 539.

¹ Milk sold to plants and dealers and retailed by farmers, plus milk skimmed for sale as cream.² Computed from the value of milk and cream sold divided by the quantity of milk or milkfat utilized in preparation of these products for market.³ Milk used for fluid consumption and home-made butter on farms where produced valued at average per unit returns for milk utilized in all forms of sale.⁴ Value of sales of milk and cream plus value of milk used for farm consumption and farm butter churned.⁵ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

¹ Annual price is simple average of United States prices for 12 months.

² Average price for all milk sold at wholesale to plants and dealers, based on reports from milk-market administrators, cooperative milk-marketing associations, whole-milk distributors, and milk-products manufacturing plants. Annual prices, by States, weighted by estimated volume of all milk sold at wholesale to plants and dealers.

³ Based on reports of special price reporters. Annual prices, by States, weighted by estimated volume of cream sold.

⁴ Dealers' buying prices, f.o.b. local shipping point or country plant, for standard grade milk which is used for city distribution as fluid milk.

⁵ Includes milk for canned condensed milk. Prices f.o.b. factory.

⁶ Does not include Government dairy production payments, made October 1943 to June 1946.

⁷ Preliminary.

⁸ Series discontinued January 1953.

⁹ Price f.o.b. factory or local receiving station, whichever is the customary place for determining prices.

¹⁰ Monthly price and butterfat test obtained by weighting together milk for canning, milk for butter and by-products, and milk for American cheese. Annual average are simple averages of monthly prices.

Agricultural Marketing Service. Data for 1930-43 in Agricultural Statistics, 1952, table 550.

TABLE 542. --Milk markets under Federal marketing programs: Blend and Class I prices, butterfat differential and milk products utilized for fluid consumption

Market	Basic butterfat test	Average minimum prices payable to producer ¹							
		Blend				Class I			
		Price per 100 lbs. at basic butterfat test f.o.b. city plant		Butterfat differential per 0.1 percent above and below basic test		Price per 100 lbs. at basic butterfat test f.o.b. city plant		Butterfat differential per 0.1 percent above and below basic test

¹ As specified in order. ² Includes producer-handlers where they represent an appreciable portion of the market. ³ Revised for markets for which audited data were available. ⁴ Represents total volume distributed within the marketing area, except where milk sold outside the area could not be segregated. Includes sales of milk received from sources other than producers. Milk sold by handlers subject to another Federal Order not always included in data for market in which distributed. ⁵ Includes whole milk equivalent of concentrated milk sold. ⁶ Weighted average. ⁷ Includes sweet, sour, and aerated cream, eggnog, and milk and cream mixtures containing 6 percent or more butterfat. ⁸ Includes skim milk, buttermilk and cultured specialties, and flavored milk and milk drinks. ⁹ 201-210 mile zone.

¹ "Standard" refers to the grade of milk commonly sold in each market. Grades may vary from market to market because of variation of the factors which enter into grade determination.

² Changed from New Haven; prices identical at time of change in 1950.

³ Simple average.

Agricultural Marketing Service. Compiled from reports secured through the cooperation of milk distributors, producers' associations, and municipal officers.

Ice milk-----	11,722	15,296	15,572	19,362	29,526	36,870	45,804	53,163

¹ Revised. ² Preliminary. ³ No longer published. ⁴ Excluding American full skim cheese and cottage, pot, and bakers' cheese. ⁵ Comparable data prior to 1946 not available. Cottage cheese curd includes cottage, pot, and bakers' cheese with a butterfat content of less than 4 percent, made by reporting plants. Creamed cottage cheese includes cheese with a butterfat content of 4-19 percent. Cottage cheese curd and cream cottage cheese should not be added together to get a total cottage cheese figure, for, while some of the cottage cheese curd is sold direct for consumption without further processing, a considerable part is creamed within the plant or shipped to another plant for creaming prior to sale.

MANUFACTURED DAIRY PRODUCTS

1953 ⁵ -----	281,702	432,008	263,183	14,863	10,220	539,635	114

¹ Includes all kinds of cheese except cottage, pot, and bakers' cheese, and full skim American.

² Data for 1945 and following years not always comparable with data for years prior to 1945 due to inclusion of Government stocks at additional stages of distribution.

³ Case goods.

⁴ Sweetened condensed milk, unskimmed, case goods; beginning 1948 data include cold-storage holdings of bulk condensed, whole, and skimmed milk.

⁵ Preliminary.

Agricultural Marketing Service. Data for 1930-43 in Agricultural Statistics, 1952, table 564.

¹ Includes fluid milk equivalent of cream. The total apparent civilian consumption for the years 1941-53 was obtained by subtracting military takings from total fluid milk use. The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by the total population adjusted for underenumeration, and for members of the Armed Forces not eating out of civilian food supplies.

² Preliminary.

Agricultural Marketing Service. Data for 1909-38 in Agricultural Statistics, 1953, table 569.

¹ Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments, exports, and military takings from the total supply. The per capita civilian consumption for each year was obtained by dividing the total apparent civilian consumption by the total population adjusted for underenumeration, and for members of the Armed Forces not eating out of civilian food supplies.

² Includes both farm and factory-made butter.

³ Includes all kinds of cheese except cottage, pot, and bakers' cheese, and full-skim American.

⁴ The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed), unskimmed, bulk goods; and sweetened condensed milk, unskimmed, case and bulk goods.

⁵ Preliminary.

1 Does not include commercial broiler production.
 2 Total chicks hatched less death loss of chicks and young chickens during the year.
 3 Death loss during the year of mature chickens on hand Jan. 1.
 4 Chickens raised less death loss during the year of mature chickens on hand Jan. 1.
 5 Change in Jan. 1 inventory numbers during the year.
 6 Chickens consumed in households of farm producers.
 7 Value of sales plus value of those consumed in households of producers.
 Agricultural Marketing Service.

¹ For hatcheries and supply flocks, year began July 1, 1953 and ended June 30, 1954. For U. S. Record of Performance the year covers either 300 or 365 days from date of first egg of each bird. Most candidates begin laying in the late summer or early fall.

² Manufacturer's rating of the number of eggs the incubators will hold, including both incubating and hatching trays.

¹ Data on cross-mated flocks are not truly indicative of the situation since in several States birds in such flocks are reported under the respective purebred heading and in some States those flocks are cross-mated only for a portion of the year to produce broilers; for the remainder of the year they are mated as purebreds for the production of purebred chicks.

² Data not available prior to 1951.

³ To show the trend in popularity of birds during the past 5 years, data from 44 States which reported in both 1948 and 1953 are given. States not included are: Maryland, Nevada, Pennsylvania, and Vermont.

Agricultural Research Service.

¹ By commercial broiler is meant young chickens of the heavy breeds to be marketed at from 2 to 5 pounds live weight and from which no pullets are kept for egg production. These figures are not included in farm production of chickens.

² Includes value of consumption in households of producers, which is less than 1 percent of total production.

³ Preliminary.

Agricultural Marketing Service. Data for 1934-39 in Agricultural Statistics 1953, table 595.

1 Total poult hatched less death loss of poult and young turkeys during the year.

2 Death loss during the year of breeder hens on hand Jan. 1.

3 Turkeys raised less death loss during the year of breeder hens on hand Jan. 1.

4 Change in Jan. 1 inventory numbers during the year.

5 Turkeys consumed in households of farm producers.

6 Value of sales plus value of those consumed in households of producers.

7 Less than 500.

Agricultural Marketing Service.

¹ Total poults hatched less death loss of poults and young turkeys during the year.

² Death loss during the year of breeder hens on hand Jan. 1.

³ Turkeys raised less death loss during the year of breeder hens on hand Jan. 1.

⁴ Change in Jan. 1 inventory numbers during the year.

⁵ Turkeys consumed in households of farm producers.

⁶ Preliminary.

⁷ Value of cash receipts plus value of those consumed in households of producers.

Agricultural Marketing Service. Data for 1929-43 in Agricultural Statistics, 1953, table 615.

¹ Farm production, plus nonfarm production estimated at 10 percent of farm production.

² Shell-egg equivalent of eggs and egg products.

³ Shell eggs and shell equivalent of frozen and dried egg products; includes exports made from Government-owned stocks acquired for price support and other purposes.

⁴ Estimated.

⁵ Beginning 1941, consumption figures apply only to civilian population.

⁶ Preliminary.

¹ Includes stocks of turkeys and other poultry.

Agricultural Marketing Service.

CHAPTER VIII

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm practices and the financial aspects of farming. Many of the series are estimates developed in connection with the research activities of the Department. Others are primarily records of operations, such as certain data from Agricultural Credit agencies. Several of the index number series have been shifted to a 1947-49 base period and in such cases the long-time record is included.

For convenience, the tables have been arranged in general groups. These groups with the beginning table indicated are as follows: Farm property, table 605; population and employment, 622; farm production and distribution, 627; prices and income, 655; costs and expenses, 570; and credit and loan programs, table 690.

A number of tables have been dropped because no new data were available and some others because of space limitations. The group of six tables on harvesting methods appearing in this chapter of the 1953 edition have been replaced by several on spraying and dusting for control of insects, diseases, and weeds.

1870-----	2,659,985	407,735	21.4	-----	7,444
1880-----	4,008,907	536,082	28.2	166,187	10,197
1890-----	4,564,641	623,219	32.7	219,706	13,279
1900-----	5,737,372	838,592	44.1	283,218	16,615
1910-----	6,361,502	878,798	46.2	311,293	34,801
1920-----	6,448,343	955,884	50.2	348,604	66,316
1925-----	6,371,640	924,319	48.6	344,549	49,468
1930-----	6,288,648	986,771	51.8	359,242	47,880
1935-----	6,812,350	1,054,515	55.4	295,624	32,859
1940-----	6,096,799	1,060,852	55.7	321,242	33,642
1945-----	5,859,169	1,141,615	59.9	352,866	² 54,761
1950-----	5,382,162	1,158,566	60.9	344,399	³ 75,261

¹ Prior to 1924, this column shows the total acreage of crops for which figures are available, except for 1919, when 14,502,932 acres of corn cut for forage were excluded (most of this was probably duplicated in the acreage of corn harvested as grain). Beginning with 1924, the figures represent the total cropland harvested.

² Estimate derived from the Agricultural Research Service index of farm real estate values applied to 1940 and 1950 census values. 1945 census reported a total value of land and buildings of 46,389 million dollars.

³ Based on sample data from 1950 Census.

Agricultural Research Service. Compiled from reports of Census of Agriculture, Bureau of the Census.

Grand total land area ⁸ -----	1,903	1,903	1,903	1,903	1,903	1,903	1,905	1,905	1,904

¹ Compiled from census reports, publications, and records of Agricultural Research Service and public land administering and conservation agencies. ² Total farm land and total nonfarm land acreages are for the calendar year indicated. Cropland and pasture land acreage usually relates to the preceding year. ³ Land used chiefly for crops, including cropland harvested, crop failure, fallow, and idle cropland. To find land available for crops add plowable pasture to cropland. ⁴ Estimated acreages of small farm orchards and gardens not included and field crops underenumerated were added to the cropland harvested acreage reported by the Census of Agriculture in 1950 to arrive at the total cropland harvested acreage of 355 million acres. ⁵ Pasture and grazing land not in farms consists of land used chiefly for pasture and includes open or non-forested pasture, idle grassland in first decades, and woodland (pinion-juniper, chaparral), and shrub and brush pasture in all years. ⁶ Forest land outside of farms used chiefly for commercial timber excludes forested areas included in parks, wildlife refuges, military areas, recreation sites, and arid woodland and brushland used chiefly for pasture. ⁷ Other land outside farms includes urban, industrial, and residential areas, outside farms, parks, wildlife refuges, military lands, roads, railroads, ungrazed desert, rock, swamp, and other unused and waste land. ⁸ Remeasurement of the land area of the United States in connection with the 1950 census indicated an approximate total land area of 1,904 million acres. The total acres previously reported were, 1,905 million acres in 1940 and 1945 and 1,903 million acres 1900-35 inclusive.

¹ As of Mar. 1.

² Automobiles, trucks tractors, other machinery, harness, and saddlery.

³ Excludes crops under CCC loan; series discontinued after 1950.

⁴ Includes crops under CCC loans stored off farms, as well as all crops, whether under loan or not stored on farms. Includes stocks held for feed or seed.

⁵ All cattle, hogs, all sheep, horses, mules, chickens, and turkeys.

Agricultural Marketing Service. Data for 1910-38 in Agricultural Statistics, 1952, table 641.

FOOTNOTES FOR TABLE 607

¹ Because of rounding of figures, use class items do not necessarily add up to total Federal land. Includes Indian land.

² Includes Federal land used under leases and permits, Indian land used by Indians or leased out and prison and hospital farms. Does not include trespass uses. Only 4.3 million acres of Federal rural land was used for farming of which 3 million acres was Indian land.

³ Excludes woodland in park, recreational, and other areas set apart for special uses and woodland used primarily for grazing. The forest area in Federal and Indian ownership is approximately 176 million acres.

⁴ Parks, wildlife refuges, military and institutional land, etc., used principally for these purposes, and land not otherwise accounted for, including desert, rock, and land of low value for agriculture. Does not include areas used for farming, grazing, public highways, and road rights-of-way. Includes 15,000 acres not allocated by States.

⁵ Includes 7,550 acres in TVA holdings not allocated by States. Also includes 7,267 acres, primarily park lands, in District of Columbia (6,867 parks and 400 Agricultural Research Administration).

⁶ Includes land leased out for farming and grazing and land used by the States in institutional farms, experiment stations, etc.

⁷ Does not include forest and woodland used primarily for grazing or for special purposes such as parks, fish and game refuges, and institutional sites.

⁸ Does not include land used primarily for agricultural production. Includes an undetermined acreage of forest and woodland, some of which has commercial value. Also includes idle and wasteland, including State grant and tax-forfeited land not under lease and with no reported use. Some of this land may have been used in trespass for grazing.

Agricultural Research Service. Compiled from reports and records of Federal and State agencies.

¹ Indices are based on deposits of member banks of the Federal Reserve System located in places of less than 15,000 population. Annual indices are simple averages of monthly indices which are based on average amounts of daily deposits. In preparing indices for groups of States the amounts of monthly deposits for each State are weighted by the cash farm income of each State in the base period. ² Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin. ³ Michigan, Wisconsin, and Minnesota. ⁴ Ohio, Indiana, Illinois, Missouri, and Iowa. ⁵ North Carolina, South Carolina, Georgia, Alabama, Mississippi, Arkansas, Louisiana, and Oklahoma. ⁶ Mississippi, Arkansas, and Louisiana. ⁷ North Dakota, South Dakota, Nebraska, and Kansas. ⁸ Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, and Utah.

¹ Includes in 1939, 30,516 6-foot and under combines; in 1940, 41,450; in 1941, 44,001; in 1942, 36,701; in 1943, 25,362; in 1944, 33,169; in 1945, 39,257; in 1946, 38,127; in 1947, 58,965; in 1948, 68,018; in 1949, 75,351; in 1950, 89,149; in 1951, 79,726; in 1952, 55,863; and in 1953, 45,865. ² Includes in 1940, 6,140 two-wheel spreaders; in 1941, 21,032; in 1942, 17,087; in 1943, 5,729; in 1944, 12,834; in 1945, 19,982; in 1946, 26,466; in 1947, 42,516; in 1948, 88,073; in 1949, 103,652; in 1950, 78,529; in 1951, 88,500; in 1952, 85,480; and in 1953, 79,770. ³ Row cultivators, tractor-drawn or mounted; beet or field cultivators not included.

⁴ Not including rice binders. ⁵ Figures omitted to avoid disclosure of operations of individual establishments. ⁶ Figures combined with other harvesting machinery. ⁷ Includes 1,100 self-propelled combines in 1944, 3,287 in 1945, 3,110 in 1946, 5,506 in 1947, 10,198 in 1948, 13,671 in 1949, 10,772 in 1950, 14,207 in 1951, 18,575 in 1952, and 20,795 in 1953. Not called for by the Census prior to 1944. ⁸ 1941 and later figures for milking machines include only the number of vacuum-pump units for stationary and portable-milking machines. Figures for previous years combine the single and double milker units, and the vacuum-pump units.

Agricultural Research Service. Compiled from reports of the U. S. Department of Commerce. Data for 1923-38, in Agricultural Statistics, 1952, table 651.

FOOTNOTES FOR TABLE 622

¹ Estimates of the armed forces overseas were not available for 1939 and the total population for this year therefore, relate to continental United States; the numbers in the armed forces overseas during this year was fairly negligible.

Agricultural Marketing Service and Bureau of the Census.

¹ Simple averages of monthly employment during the last full calendar week ending at least 1 day before the end of the month.

² Includes farm operators doing 1 or more hours of farm work and members of their family working 15 hours or more during the survey week without cash wages.

³ Includes all persons doing 1 or more hours of farm work during the survey week for pay.

Agricultural Marketing Service.

¹ Simple averages of monthly employment during the last full calendar week ending at least 1 day before the end of the month.

² Includes farm operators doing 1 or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages.

³ Includes all persons doing 1 or more hours of farm work during the survey week for pay.

Agricultural Marketing Service.

1946-----	353,041	343,012			

¹ Includes harvested acreage of 43 crops for which separate planted estimates are not available. See footnote 6 in table 627.

² Includes all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, soybeans for beans, cowpeas for peas, peanuts picked and threshed, dry field peas, sorgo for sirup, sugarcane, sugar beets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn (all major States included only since 1943), cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons. Red clover seed, alsike clover seed, lespedeza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage. See footnote 4 in table 628.

³ Preliminary.

¹ Includes acreage planted in preceding fall for harvest in the year shown.

² Grain and sweet sorghums for all uses, including sirup.

³ Acreage seeded in preceding fall.

⁴ Preliminary.

⁵ Acreage in cultivation July 1.

⁶ Includes harvested acreage of the following crops: Rye, hay, sweetclover seed, timothy seed, soybeans for beans, cowpeas for peas, peanuts picked and threshed, tobacco, sugarcane, broomcorn, and 29 commercial vegetables (11 for processing: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes; 28 for fresh market: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts (since 1949), cabbage, cantaloups, carrots, cauliflower, celery, sweet corn (all major States included only since 1949), cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons). Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. The harvested instead of the planted acreage of rye is included because most of the rye acreage not harvested is planted to other crops or used for pasture. Excludes grains cut for hay because part of the acreage shown as planted to wheat, oats, and barley is included in grain hay.

⁷ Includes crops listed separately in this table, plus those mentioned in footnote 6. (Sorghums counted as 3 crops, grain, sorghum and forage, and sirup.)

Agricultural Marketing Service. Data for 1929-38 in Agricultural Statistics, 1952, table 665.

FOOTNOTES FOR TABLE 628--Cont.

by livestock, minor crops, and fruits and nuts. The acreages shown include some crops harvested in succession from the same land.

⁵ Commercial apples, peaches, pears, grapes, cherries, plums, prunes, apricots, figs, olives, avocados, cranberries, dates, persimmons, pomegranates, oranges (including tangerines), grapefruit, lemons, limes, walnuts, almonds, and filberts.

Agricultural Marketing Service. Data for 1929-38 in Agricultural Statistics, 1952, table 666.

¹ Preliminary.

² Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes.

³ Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts (since 1949), cabbage, cantaloups, carrots, cauliflower, celery, sweet corn (all major States included only since 1949), cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Excludes farm gardens. Acreage for harvest, including mature acreage abandoned or only partially harvested because of low prices or other economic factors.

⁴ Totals are for crops shown in preceding columns. Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. Other crops not included are hops, spelt, hemp, velvetbeans, various legumes and other crops harvested.

TABLE 629. --Principal crops: Harvested acreage (average 1942-51) and value of production, by States, annual 1952 and 1953

¹ Includes all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, dry field peas, soybeans for beans, cowpeas for peas, peanuts picked and threshed, potatoes, sweetpotatoes, tobacco, sorgho for sirup, sugarcane, sugar beets, broomcorn, artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts (since 1949), cabbage, cantaloups, carrots, cauliflower, celery, sweet corn (all major States included only since 1949), cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons. Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage. Farm value also includes apples (commercial crop), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products, and hops. ² Preliminary. ³ Unrevised. Differs from tables 626, 628, and 630, which show revisions made after December 1953.

1 Preliminary.
 2 Includes acreage planted in preceding fall.
 3 Acreage seeded in preceding fall.
 4 Acreage in cultivation July 1.
 5 Short-time average. ⁶ Bags of 100 pounds (uncleaned).
 6 Values apply to the production of cleaned beans or peas.
 7 Acres grown alone, plus 1/2 the interplanted acres.
 8 All purposes. ¹⁰ 1,000 trees tapped.
 9 Includes some quantities not harvested.
 10 Fresh basis.
 11 For breakdown between fresh market and processing, see individual crop tables.
 12 Includes fresh market production equivalent tons in the shell and processing production equivalent tons shelled.
 13 Data for "Commercial early potatoes" are included in "Potatoes" on p. 446.

16 Includes all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, soybeans for beans, cowpeas for peas, peanuts picked and threshed, dry field peas, sorgo for sirup, sugarcorn, sugar beets, potatoes, sweetpotatoes, tobacco, broccorn, artichokes, asparagus, snap beans, lima beans, beets, broccoli, Brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons. Red clover seed, alsike clover seed, lespedeza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage. Farm value also includes apples (commercial crop), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, all prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products, and hops.
 17 Total values do not include revisions made after December 1953, which are shown in this table.

¹ Acreages for producing export products and horse and mule feed include acreages used to produce the seed used to grow the crops exported and the feed used to produce export livestock products and to keep horses and mules.

² Area in crops harvested (excluding duplication) plus acreages in fruits, tree nuts, and farm gardens.

³ Acreages for crop exports for 1910-39 relate to exports for year beginning July 1, or month representing beginning of crop season. Acreages for producing livestock exports for 1910-39 relate to livestock products exported during the specified year, beginning July 1. Acreages for crop exports and lend-lease, beginning with 1940, are for calendar years as are livestock exports and lend-lease.

⁴ Feed computations for farm horses and mules assume decreasing quantities of grain per head since 1920 and decreasing quantities of hay per head since 1940. From 1931 on, the acreage required to feed all nonfarm horses and mules has rounded to 1 million acres.

⁵ Includes products used by our military forces in this country and abroad, and by our domestic civilian population.

⁶ Includes persons in our military forces in this country and abroad.

⁷ Preliminary.

¹ Production of livestock and livestock products for human use, horses and mules excluded.² Includes clipped wool, mohair, and for 1940 to date, honey and beeswax. These items are not included in the separate groups of livestock and products shown.³ Cattle and calves, sheep and lambs, and hogs.⁴ Butter, butterfat, wholesale milk, retail milk, and milk consumed on farms.⁵ Chicken eggs, commercial broilers, chickens, and turkeys.⁶ Includes production of hay seeds, pasture seeds and cover-crop seeds, and some miscellaneous crop production not included in separate groups of crops shown. Coverage of production of seed and miscellaneous crops is more complete for 1940 to date than for prior years.⁷ All corn, oats, barley, and sorghum grain.⁸ All hay, sorghum forage, and for 1940 to date, sorghum silage.⁹ All wheat, rye, buckwheat, and rice.¹⁰ Potatoes, sweetpotatoes, dry edible beans, dry field peas, truck crops for processing, truck crops for fresh market, and farm gardens.¹¹ Fruits, berries, and tree nuts.¹² Sugar beets, sugarcane for sugar and seed, sugarcane sirup, sorghum sirup, maple sugar, and maple sirup.¹³ Cotton lint and cottonseed.¹⁴ Soybeans, peanuts picked and threshed, peanuts hogged, flaxseed, and for 1940 to date, tung nuts.¹⁵ Hay and concentrates only.¹⁶ Preliminary.

¹ Total persons supplied with agricultural products from United States farm production divided by farm employment. Total persons supplied in the United States is obtained by dividing value of farm production minus value of agricultural exports by per capita level of support. Total persons supplied abroad is calculated by dividing value of United States agricultural exports by per capita level of support in the United States. Per capita level of support is derived by dividing total population into value of farm production minus value of agricultural exports plus value of agricultural imports.

² Includes persons in our military forces in this country and abroad.

³ Preliminary.

¹ Reports of associations are included either for the calendar year or for fiscal years ending between July 1 of the calendar year shown and June 30 of the following calendar year, with limited exceptions. ² Includes independent local associations, large-scale centralized associations, and federations of cooperatives. Associations are classified according to their major activity. If, for example, more than 50 percent of an association's business is derived from marketing activities, it is included as a marketing association. Prior to 1950 total dollar volume of the marketing associations was classified as marketing business even though a portion of this volume was derived from handling supplies or performing services for patrons. Similarly, the total volume of purchasing associations was classified as purchasing business even though a portion of their business originated from the sale of various farm commodities or from performing trucking and other services for patrons. In 1950, the method of reporting was revised so that associations reported sales of each major commodity marketed, the value of each major type of supply purchased, and receipts from major types of services performed for patrons. The total marketing volume for 1950, therefore, consists only of the value of products actually marketed and purchasing volume consists only of the value of individual supplies purchased. ³ In 1950 a separate category was set up for associations whose major activity is providing services related to marketing and purchasing activities. ⁴ Includes members (those entitled to vote for directors) but does not include nonvoting patrons. (Some duplication exists because some farmers belong to more than one association.) ⁵ Charges for services in which no duplication occurs. ⁶ Includes the value of farm supplies sold to or purchased for patrons and service receipts for associations rendering essential services either in marketing or purchasing. See Agricultural Statistics 1953, page 588, footnote 6, for additional information. ⁷ The estimated gross business figures for 1950-51 and 1951-52 cannot be compared with the estimated business for previous years because in previous figures not all of the supply sales at wholesale level for other cooperatives or terminal market sales for local associations were included. Estimated gross business, however, includes all business reported between cooperatives, such as the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local associations. ⁸ The estimated net business figures for 1950-51 and 1951-52 cannot be compared with the estimated business for previous years because previous figures included some supply sales at the wholesale level for other cooperatives and some terminal market sales for local associations. Estimated net business represents the value at the first level at which cooperatives transact business for farmers. It does not include the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local associations. ⁹ Revised. ¹⁰ Preliminary.

¹ Preliminary² This figure represents value at the first level at which cooperatives transact business for farmers. It does not include wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local associations.³ Includes forest products, fur pelts, hay, hops, nursery stock, tung oil, and other farm products not separately classified.⁴ Because many associations are engaged in more than one type of business, these totals are less than the number that would be obtained by adding the number of associations handling individual items or performing individual services.

Farmer Cooperative Service. Based on records from associations reporting to the Service.

FOOTNOTES FOR TABLE 649

¹ Preliminary.² These figures include associations doing business in States other than those in which their headquarters are located and cannot be totaled because of duplication.³ This figure represents value at the first level at which cooperatives transact business with farmers. It does not include wholesale business of farm supply cooperatives with other cooperatives or terminal market sales performed for local associations.

Farmers Cooperative Service.

Mutual telephone companies ¹⁵	1937-----	32,879	669,344
Rural electric cooperatives ¹⁶	June 30, 1953-	908	3,753,372
Rural health cooperatives ¹⁷	1950-----	51	18 18,000

¹ 17th Census of the United States, 1950. Estimated membership from 16th Census of the United States, 1940.

² Agricultural Research Service, U. S. Department of Agriculture.

³ Grazing Service, U. S. Department of Interior.

⁴ Office of Indian Affairs, U. S. Department of Interior.

⁵ There are 295 other Indian Corporate and Tribal Enterprises.

⁶ Farmer Cooperative Service, U. S. Department of Agriculture.

⁷ When associations marketing farm products but principally engaged in providing some other services are included, the total is 7,303.

⁸ When associations purchasing farm supplies but principally engaged in providing some other services are included, the total is 7,418.

⁹ Includes general trucking, storage, locker plants, and miscellaneous service associations.

¹⁰ When associations providing miscellaneous services but principally engaged in marketing or purchasing are included, the total is 4,127.

¹¹ Farm Credit Administration.

¹² Estimated members of associations borrowing from banks for cooperatives.

¹³ Bureau of Federal Credit Unions, U. S. Department of Health, Education, and Welfare.

¹⁴ Farm Credit Administration estimates.

¹⁵ Census of Electrical Industries, 1937, Bureau of the Census. Number of associations includes 2,067 companies with switchboards and 30,812 without switchboards. Number of participants estimated from number of telephones, assuming 1 patron per telephone.

¹⁶ Rural Electrification Administration, U. S. Department of Agriculture.

¹⁷ Public Health Service, U. S. Department of Health, Education, and Welfare.

¹⁸ Membership reports for only 27 associations were available.

1953-----	115.95	79.70	36.25	69	41.44	7.48	33.96	18

¹ These estimates are calculated in terms of a market basket of farm food products, containing quantities equivalent to 1952 average annual purchases per wage-earner and clerical-worker family. The market basket is broken down into seven commodity groups. Quantities of food valued in these series do not change from year to year.

² Retail cost of the market basket and commodity groups are calculated from retail prices published by the Bureau of Labor Statistics, with additional weight on priced items to include the value of those not priced.

³ Farm value is calculated from official series showing prices received by farmers for items priced at retail, applied to quantities of farm products equivalent to retail purchases, and is adjusted by subtracting an imputed value, at the farm level, of nonfood byproducts obtained in processing. Farm value of bakery and cereal products includes value of ingredients other than grain. No allowance is made for Government subsidy payments to producers in 1946, nor for payments to producers under provisions of the Sugar Act. Farm values including Government payments to producers in 1946 were: Market basket, \$405.48; meat products, \$128.43; dairy products, \$87.99; bakery and cereal products, \$28.20; and miscellaneous products, \$6.94. Additional payments to producers of sugar beets amounted to about 23 cents each year for sugar in the bakery and cereal products, and not more than 63 cents for sugar in the miscellaneous products group—about 86 cents for the market basket.

⁴ The marketing margin is the difference between retail cost and farm value. Marketing margins plus Government payments to processors, less Government taxes paid by sugar manufacturers in 1946 were: Market basket, \$383.32; meat products, \$56.98; dairy products, \$61.92; bakery and cereal products, \$65.15; fruits and vegetables, \$116.45; fats and oils, \$25.53; and miscellaneous products, \$27.35. Taxes paid by sugar manufacturers on the quantity of sugar in the market basket amount to 54 cents each year.

Agricultural Marketing Service. Revised estimates not comparable to data published in Agricultural Statistics, 1952 and earlier.

¹ The retail-cost estimates represent the cost at retail-store prices of all domestic farm foods that were both sold by farmers and bought by civilian consumers in this country. Farm food products sold in the form of meals are included but are valued at what the food would have cost in retail stores. Farm value is adjusted to eliminate imputed value of nonfood byproducts. The marketing bill, or total marketing margin, is equal to the difference between the farm value and retail cost except for the years 1943-46 in which the marketing bill for some groups is adjusted for Government payments to processors.

² Includes vegetable-oil products, sugar, and other miscellaneous food products in addition to the five commodity groups given in this table.

³ The estimated farm values of milk, eggs, fruits, lard, and vegetable shortening used in bakery products other than flour were deducted from the farm values of other commodity groups and added to the farm value of the bakery and cereal products group.

⁴ Preliminary.
Agricultural Marketing Service: Data for 1913-38 in Agricultural Statistics, 1952, table 691.

¹ This summary of the average prices at which the Commodity Credit Corporation has supported agricultural commodities is limited to mandatory commodities and to certain others for which price support has been in effect for several recent years.

² Average support shown is for commercial area only.

³ Other types of long staple cotton have been supported from time to time. American-Egyptian support levels for grade No. 2-1/2 inch staple Amsak and Pima 32 varieties in period 1945-52, and for average grade in 1953 and 1954.

⁴ Loan rates were not announced, even though support was mandatory, because prices were considerably above support.

⁵ Other types of tobacco have been supported for various years throughout 1946-54.

⁶ Average support price for year not available.

Commodity Stabilization Service. Data for 1933-45 in Agricultural Statistics, 1952, table 693.

FOOTNOTES FOR TABLE 657

¹ Season average prices for crops and wool and weighted calendar year averages for livestock and livestock products other than wool. Unless otherwise noted these are averages for marketing season or calendar year computed by weighting States prices by quantities sold, or by production for those commodities for which virtually all of the production is sold. ² Effective parity prices as of the 15th of the month computed in accordance with procedure and index numbers applicable currently. Parity prices shown are those used in connection with a price support determination when applicable, otherwise for the month preceding the start of the crop marketing season for crops and for Dec. 15 of the previous year for livestock and livestock products. ³ Preliminary for most commodities, based on information available through July 1954. ⁴ Season average price to May 1, 1954. ⁵ Parity price for all cotton. ⁶ Previous year. ⁷ Parity price for American-Egyptian cotton. ⁸ Based on auction sales through July 1954. ⁹ Types 42-46 and 51-56 included in base period price. ¹⁰ Weighted calendar year averages. ¹¹ State prices weighted by production to obtain United States average. ¹² Dec. 1 price. ¹³ Equivalent on-tree returns for all methods of sale. ¹⁴ Season averages relate to all methods of sale. Parity prices are primarily for fresh use. ¹⁵ Equivalent per unit returns for bulk fruit at first delivery point. ¹⁶ Washington and Oregon only; primarily for processing. ¹⁷ Oregon only. ¹⁸ Prices for fresh use for important processing States and average prices for all methods of sale for other States. ¹⁹ Equivalent packing-house door returns for fresh consumption for Pacific Coast States, average prices for fresh use for Michigan and average prices for all methods of sale for other States. ²⁰ Includes California dried prunes. ²¹ Based on prices for Louisiana, Washington, and Oregon strawberries for fresh use and prices of all strawberries in other States. ²² Based on prices for Louisiana, Washington, and Oregon only. ²³ Prices include average Government payments to farmers authorized by the Sugar Acts. ²⁴ Continental United States only. ²⁵ Dec. 1 prices for all States except Louisiana which is a season average. ²⁶ Based on prices of New Jersey, New York, and Pennsylvania. ²⁷ Shelled basis. ²⁸ Simple calendar year average. ²⁹ Sold by farmers directly to consumers.

¹ This does not replace the farmer index (1926 = 100) as the official index of primary market prices prior to January 1952. The data from January 1947 forward represent the revised sample and the 1947-49 weighting pattern. Prior to January 1947 they are based on the month-to-month movement of the various individual products price series included in the farmer index.

¹ Revised January 1954.

² Prices for all hay loose used from January 1910-December 1938, all hay baled from January 1939-December 1953.

³ Potatoes, sweetpotatoes, dry edible beans.

⁴ Wartime subsidy payments on beef cattle, sheep, and lambs, made to producers under programs designed to maintain ceiling prices as established under the Emergency Price Control Act of 1942, are included for the period July 1945-June 1946.

⁵ Milk, wholesale; milk, retail; and butterfat. Wartime subsidy payments on butterfat and milk made to producers under programs designed to maintain ceiling prices as established under the Emergency Price Control Act of 1942 are included for the period October 1943-June 1946.

⁶ Wartime subsidy payments made to producers under programs designed to maintain ceiling prices as established under the Emergency Price Control Act of 1942 are included.

⁷ Including interest, taxes, and wage rates. This ratio will not necessarily be identical to a weighted average percent of parity for all farm products.

Agricultural Marketing Service. Compiled from prices reported to the U. S. Department of Agriculture by dealers purchasing agricultural commodities in local farm markets. The price series for individual commodities are averages for all classes and grades of the commodity being sold in local farm markets on or about the 15th of each month. In computing the group indices for the period prior to January 1935, prices of individual commodities have been weighted by average quantities sold during the period 1924-29. For the period since 1935, average annual sales for the period 1937-41 have been used as weights.

TABLE 661. --Prices paid by farmers: Index numbers, by groups of commodities, United States, 1939-53¹

¹ Payments under rental and benefit, soil conservation, price adjustment, price parity, Sugar Act, and production programs.

² Value of farm products consumed directly in farm households.

³ Includes an allowance for maintenance and interest on the value of farm dwellings and for a proportionate share of taxes on farm real estate and insurance on farm buildings. In most years the rental value is 9-11 percent of the estimated value of farm dwellings.

⁴ Cash receipts from farm marketings, Government payments, value of home consumption and rental value of farm homes.

⁵ Includes Government payments. For number of farms, see table 605.

⁶ Preliminary.

Sorgo sirup-----	3,518	2,605	6,123				

¹ Amount of money received by farmers during the calendar year from the sale of farm products and from Government payments.
² Quantities of farm products consumed directly in farm households, valued at the average price received by farmers for the sale of similar commodities.
³ Cash receipts include value of home consumption, which is less than 1 percent of total production.
⁴ Ducks, geese, guineas, pigeons, quail, pheasants, turkey hatching eggs, and all other.
⁵ Value of home consumption determined by applying milk-equivalent price received for products sold to total home-consumed milk; not available for separate items.
⁶ Horses, mules, honey, beeswax, bees, goats and kids, rabbits, and fur animals and their pelts.
⁷ Turnips, okra, radishes, squash, green onions, parsley, collards, mustard greens, parsnips, turnip greens, rhubarb, hot peppers, horseradish, pumpkins, rutabagas, dandelion greens, chinese cabbage, salsify, kohlrabi, watercress, Swiss chard.
⁸ Not available for individual commodities except where shown.
⁹ Boysenberries, blackberries, dewberries, loganberries, youngberries, currants, gooseberries, and all other.
¹⁰ Persimmons, pineapples, pomegranates, nectarines, bananas, guavas, jujubes, mangoes, papayas, prickly pears, quinces, sapodillas and loquats.
¹¹ Payments under agricultural conservation and Sugar Act.

¹ The series on income of the nonfarm population and total national income are those previously developed for use in comparison with income of the farm population. They are based on U. S. Department of Commerce estimates of nonagricultural income, with appropriate adjustments to improve their comparability with farm income.

¹ The average farm in each group is the average of the most common sizes of farms of the type in the general region indicated. The averages are thus not affected by the activities of operators on farms larger or smaller than the group described, nor by production, prices, and costs of other groups of commodities than those common to the types indicated.

² Total sales plus Government payments, perquisites, and change in inventory of livestock and crops.

³ Includes all cash production expenditures plus depreciation and change in inventory of service buildings, machinery, and equipment.

⁴ Estimated average value Jan. 1 of land and buildings times average farm mortgage interest rates in the specified area plus average value Jan. 1 of livestock, machinery, and equipment, and inventory of feed grains and hay times average short-term interest rates.

Agricultural Research Service.

¹ Cash wages and value of perquisites.

² An adjustment to realized net income to deduct sales out of inventories or to add increases in inventories from current production. Computed by valuing changes during the year in numbers of livestock on farms and in quantities of crops held for sale, at year-end prices.

³ Interest charges payable during the calendar year on outstanding farm-mortgage debt.

⁴ Gross rent to nonfarm landlords minus their share of expenses.

⁵ Preliminary.

Agricultural Marketing Service. Data for 1910-38 in Agricultural Statistics, 1952, table 703.

¹ Includes bulbs, plants, and trees. ² Includes expenditures for gasoline, oil, tires, and labor for repairing tractors; and gasoline, oil, tires, replacement parts, labor for repairs, registration fees, and insurance for automobiles and trucks. Only 40 percent of the total operating costs of automobiles is included as a production expense for 1939-41 and 1946-52; 50 percent for 1942-45. ³ Estimated total amount that would need to be spent annually by farmers for labor and materials in order to maintain the condition of buildings, machinery, and equipment on farms at the beginning of the year in a constant state of repair. ⁴ Cash wages and the value of perquisites supplied to hired farm laborers. ⁵ Includes taxes levied against farm real estate and farm personal property. ⁶ Interest charges payable during the calendar year on outstanding farm-mortgage debt. ⁷ Gross rent paid to nonfarm landlords, including Government payments, minus the expenses of agricultural production charged against them. ⁸ Horses and mules, insecticides, containers, twine, ginning, miscellaneous expenditures for operation of greenhouses and nurseries, electricity for production; gasoline, oil, and repairs for operating stationary gasoline and steam engines; grazing fees, irrigation charges; fire, windstorm, hail, crop insurance; veterinary services and medicines, miscellaneous dairy supplies, blacksmithing and miscellaneous hardware supplies, short-term interest, and tolls for boiling down sugarcane sirup and sorgo sirup.

⁹ Preliminary.

Agricultural Marketing Service. Data for 1910-38 in Agricultural Statistics, 1952, table 705.

¹ Man-hours are in terms of the time used by average adult males to perform various farm tasks. As many women, children, and older workers accomplish less in an hour than an average adult male, actual hours of work by all workers are in excess of those shown.

² Preliminary.

³ Includes labor used on chickens raised, hens and pullets for egg production, broilers, and turkeys.

⁴ Includes, in addition to the livestock listed above, the labor used on minor live-stock enterprises, such as goats, bees, ducks, and geese.

⁵ Includes, in addition to the crops listed above, the labor used on minor crops, such as broomcorn, hops, and popcorn.

⁶ Includes labor used for fencing, repairs to buildings, machinery and equipment, farm woods, pastures, general land maintenance, farm business, and other miscellaneous work.

Agricultural Research Service.

TABLE 673. --Fertilizer materials: Sales of agricultural lime and phosphate rock, United States, 1950-52

Item	Quantity			Value

Sold for direct application to soil ⁷ -----	855,898	993,884	1,205,993	-----	-----	-----

¹ Lime from oystershells included with quicklime from limestone.

² Figures supplied by Fish and Wildlife Service, U. S. Department of Interior.

³ The large increase over 1949 is due in part to a more complete coverage of plants in Michigan.

⁴ Used includes manufacture of superphosphate, phosphates, phosphoric acid, phosphorous, and ferro phosphorus; for direct application to the soil; as a fertilizer filler; stock and poultry feed; undistributed exports; and other minor uses.

⁵ Includes sintered matrix.

⁶ Includes small quantity from Virginia.

⁷ Included in total phosphate rock.

Agricultural Marketing Service. Compiled from reports of the Bureau of Mines.

¹ Includes Government distribution, secondary and minor-element fertilizers, but not liming materials. ² Calculated from the quantities of each grade and kind of fertilizer shipped and the analyses published by Fertilizer Control Authorities, for the respective States. ³ Does not include gypsum, sewage sludge, other than activated sludge, soil sulphur, nor materials containing less than 5 percent total plant foods, classed by this State as "minerals." ⁴ Alaska, Hawaii, and Puerto Rico. The consumption of commercial fertilizers in other Territories is negligible.

¹ These statistics only partially cover production of pesticides, since data are not released on a great number of commodities which are reported neither to the Bureau of the Census nor the U.S. Tariff Commission.

² Not available.

³ Production of the gamma isomer content in benzene hexachloride totaled 17.1 million pounds in 1951, 12.8 million pounds in 1952, and 8.8 million pounds in 1953.

⁴ Includes aldrin, allethrin, chlordane, dieldrin, DDD, EPN, lindane, toxaphene, etc.

⁵ Sodium salt and zinc salt only.

⁶ Included with "Agricultural Insecticides, Fungicides, etc., n. e. c."

⁷ Benzene hexachloride and compositions, containing 1 percent or more gamma isomer, reported on a gamma isomer content basis.

⁸ Beginning Jan. 1, 1953, "Sulfur formulations 20% or over sulfur", and "Agricultural sulfur, not elsewhere classified", formerly included in this classification, were reported separately, and in 1953 totaled respectively, 26.9 million pounds, and 23.3 million pounds.

U. S. Department of Commerce. Compiled from data supplied by the Bureau of the Census, the U. S. Tariff Commission, and the Bureau of Mines. Data for 1939-46 in Agricultural Statistics, 1952, table 714.

1946-----	.49	237	.75				

¹ Data indicate year of levy but not necessarily year of payment.

² Index numbers computed before rounding taxes per acre to nearest cent.

³ Derived from tax-per-acre figures in Column 1 and value-per-acre figures reported by Bureau of the Census for census years and estimated by Agricultural Research Service for intercensal years. Value-per-acre figures reported by the Bureau of the Census adjusted to exclude the value of public and Indian lands included in census figures. No taxes are levied on public and Indian lands. Taxes levied in any particular year are related to values for the next succeeding year.

Agricultural Research Services. Data for 1909-38 in Agricultural Statistics, 1953, table 724.

¹ Motor-carrier fees included with registration fees prior to 1934. Segregation not available.

Bureau of Public Roads, U. S. Department of Commerce. Data for 1929-38 in Agricultural Statistics, 1952, table 718.

FOOTNOTES FOR TABLE 681

- ¹ Figures indicate year of levy but not necessarily year of payment.
- ² Taxes levied in each region were computed before rounding State figures to nearest thousand dollars.
- ³ Index numbers were computed before rounding taxes per acre to nearest cent.
- ⁴ Derived from tax-per-acre figures in column 3 and 4 and value-per-acre figures reported by Bureau of the Census for census years and estimated by Agricultural Research Service for intercensal years. Value-per-acre figures reported by the Bureau of Census adjusted by Agricultural Research Service to exclude the value of public and Indian lands included in census figures. No taxes are levied on public and Indian lands. Taxes levied in any particular year are related to values for the next succeeding year.

Agricultural Research Service.

¹ Farm Credit Administration.

² In computing rates, each Farm Credit district is given equal weight, but within each district rates are weighted by number of days in force.

³ Contract rates on loans through national farm loan associations. Reduced rate in effect from July 1, 1935-June 30, 1944 was 3.5 percent.

⁴ Weighted average face rate of bonds outstanding on Dec. 31, each year, excluding bonds owned by the issuing agency.

⁵ Average yield on representative outstanding issues.

⁶ These rates represent interest on loans (less patronage refunds) plus loan service fees, costs of record searches, filing and releasing mortgages, etc., paid by borrowers expressed as a percent of the average balance of loans outstanding during the year.

⁷ Weighted average face rate of debentures issued during the year.

⁸ Board of Governors of Federal Reserve System.

⁹ Annual averages of prevailing open-market rates in New York City.

¹⁰ Annual ranges in discount rates on advances secured by Government obligations maturing or callable beyond 1 year and discounts of and advances secured by eligible paper.

¹¹ Comparable representative data not available.

¹² A rate of 1/2 percent was effective from Oct. 30, 1942-Apr. 23, 1946, on advances secured by Government obligations maturing or callable in 1 year or less.

Agricultural Research Service. Data for 1917-38 in Agricultural Statistics, 1952, table 722.

FIRE LOSSES; HAIL AND FIRE INSURANCE

¹ For companies with more than 50 percent of their insurance on farm property.

² Number of companies for which data could be obtained. Variations from year to year may not represent real variation in number of companies operating.

³ Excess of assets over liabilities. Most farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves.

⁴ Revised. ⁵ Estimates based on sample of companies; not available by States.

Agricultural Research Service. All data compiled from published State reports, supplemented by information from State insurance officials, officers of farmers' mutuals, and others. Data for 1914-38 in Agricultural Statistics, 1952, table 724.

¹ Number of farms on which the insured crop was planted, including duplication where both the landlord and tenant are insured. Insured farms on which no insured crop was planted are not included.

² The insured's share of the planted acreage on the farm.

³ Acreage of the insured crop for the farm as included in the contract, although insurance for farm may cover interest of landlord, tenant, or both.

⁴ Preliminary.

⁵ Includes a combination of commodities varying by counties.

⁶ Less than 500 acres.

Federal Crop Insurance Corporation.

¹ Continental United States only.

² Includes regular mortgages, purchase-money mortgages, and sales contracts. Mortgages in process of foreclosure were estimated for 1951 and 1952.

³ Loans held by Federal Farm Mortgage Corporation were made on its behalf by Land Bank Commissioner. Authority to make new loans expired July 1, 1947.

⁴ Includes regular mortgages, purchase-money mortgages, and sales contracts.

⁵ Joint-stock land banks began liquidation May 12, 1933, and completed it Apr. 26, 1951. Also includes banks in receivership.

⁶ Prior to 1942, includes tenant purchase loans only. Beginning with 1942, includes farm development (special real estate) loans; beginning with 1944, includes farm enlargement loans; beginning with 1945, includes project liquidation loans; and beginning with 1951, includes farm housing loans. Loans made for these purposes from State Corporation trust funds are included. Loans insured by Farmers Home Administration are not included.

⁷ 1939-47, insured commercial banks and 1948 to date, all operating banks.

⁸ Estimates of farm-mortgage debt held by individual and miscellaneous lenders for 1951 and later years should be regarded only as general indicators of trend.

⁹ Revised.

¹⁰ Preliminary.

Agricultural Research Service. Data for 1910-38 in Agricultural Statistics, 1952, table 727.

FOOTNOTES FOR TABLE 689

¹ Data are for companies with more than 1/2 of their insurance on farm property.

² Number of companies for which data could be obtained.

³ Excess of assets over liabilities. Most farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves.

⁴ No mutual fire insurance company with more than 1/2 of its insurance on farm property.

Agricultural Research Service.

FOOTNOTES FOR TABLE 694

¹ Includes regular mortgages, purchase-money mortgages, and sales contracts. Mortgages in process of foreclosure were estimated by States. Loans held by Federal Farm Mortgage Corporation were made on its behalf by Land Bank Commissioner.

² Includes regular mortgages, purchase-money mortgages, and sales contracts.

³ Includes tenant purchase, farm enlargement, farm development, project liquidation, and farm housing loans, and loans for these purposes from State Corporation trust funds.

⁴ Includes loans held by all operating banks, individuals, and miscellaneous lenders. See table 698 for State data on loans held by all operating banks (classified by location of bank rather than by location of security).

⁵ Revised.

⁶ Preliminary.

⁷ Includes District of Columbia.

Agricultural Research Service.

¹ Continental United States only.

² Loans on regular mortgages only, excluding purchase money mortgages and sales contracts.

³ Loans by the Land Bank Commissioners are made on behalf of the Federal Farm Mortgage Corporation. Authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made by the Land Bank Commissioner.

⁴ Includes tenant purchase, farm enlargement, farm development, and project liquidation farm ownership loans and similar loans from State Corporation trust funds. Figures represent amounts advanced for project liquidation loans and amounts obligated for all other types of loans. Data for 1944 include all project liquidation loans made from inception of program through Dec. 31, 1944, no breakdown by years being available for such loans prior to that date.

⁵ Amount obligated. Data for 1950 include all loans obligated from beginning of farm housing program in November 1949-Dec. 31, 1950.

⁶ Figures are estimates of the Farm Credit Administration, based on reports from counties including 30-50 percent of the farms in the United States.

⁷ Includes National and State banks, both commercial and savings.

⁸ Revised.

Farm Credit Administration. Data for 1910-38 in Agricultural Statistics, 1952, table 728.

1 Continental United States only.
 2 All operating banks. Includes loans to individuals guaranteed by the Commodity Credit Corporation; beginning 1942, includes certificates of interest in pool of growers' notes. 1954 excludes \$483,665,000 of certificates based on loans to cooperatives which are included in table 698.
 3 Loans "made" include renewals.
 4 Excludes loans guaranteed by Commodity Credit Corporation. Beginning 1947, also excludes loans held by associations in liquidation.
 5 Excludes loans to and discounts for production credit associations, regional agricultural credit corporations and banks for cooperatives. Includes loans guaranteed by CCC.
 6 Excludes loans guaranteed by CCC.
 7 Also includes rural rehabilitation, water facility, construction, and wartime adjustment loans, and such loans from State Corporation trust funds beginning Apr. 1, 1942.
 8 Includes production and economic disaster, special livestock, flood and windstorm restoration, flood damage, fur, and orchard loans; and loans of the Regional Agricultural Credit Corporation.
 9 Also includes drought relief and orchard rehabilitation loans.
 10 Loans "outstanding" also include loans made from State Corporation trust funds. Loans "made" during 1947-53, were exclusively to water facility cooperative associations.
 11 Electrification loans only. Loans "outstanding" are cumulative net advances less principal repayments; loans "made" are net advances, after deducting returns of unused loan funds. In addition, REA on Jan. 1, 1954 had outstanding telephone loans of \$25,313,000 to cooperatives and \$18,295,000 to commercial companies. Telephone loans made during 1953 totaled \$15,269,000 to cooperatives and \$10,732,000 to commercial companies.
 12 Principally loans to municipalities, public utility districts, State authorities, and private power companies for rural electrification.
 13 Excludes pooled loans against which certificates of interest were issued and loans guaranteed by Commodity Credit Corporation held by other lending agencies.
 14 Revised.
 15 Data unavailable.
 Agricultural Research Service. Data for 1929-38 in Agricultural Statistics, 1952, table 732.

¹ Includes loans of National and State commercial, mutual savings, stock savings, and private banks. Loans are classified according to location of bank and therefore, are not strictly comparable with data for other lenders, which are classified according to location of farm.

² Also includes loans guaranteed by the Commodity Credit Corporation and certificates of interest in pool of CCC loans. \$483,665,000 of the certificates held on Jan. 1, 1954 were reported by CCC as based on pooled loans to Cooperatives.

³ Revised.

⁴ Alaska, Hawaii, Puerto Rico, and Virgin Islands.

Agricultural Research Service. Data from Federal Deposit Insurance Corporation.

¹ Includes tenant purchase, farm enlargement, farm development (special real estate), and project liquidation loans. Loans from Corporation trust funds and farm development loans from "loans, grants, and rural rehabilitation" funds are also included.

² Amount advanced for project liquidation loans and obligated for all other types of loans. Includes subsequent loans to borrowers who received an initial loan in a prior year.

³ Loan advances less principal repayments.

⁴ Includes tenant purchase, farm enlargement, and farm development loans.

⁵ Amount obligated. Includes supplemental loans to borrowers who received an initial loan in a prior year.

⁶ Amount obligated less principal repayments for Jan. 1, 1949 and 1950; loan advances less principal repayments for Jan. 1, 1951-54.

⁷ In addition to farm housing loans reported in this table, farm housing grants in the amount of \$363,674 were made.

⁸ Includes project liquidation loans advanced from beginning of program through 1944.

⁹ Loans obligated from beginning of insured program in October 1947-December 1948.

¹⁰ Loans obligated from beginning of farm housing program in November 1949-December 1950.

¹ In addition to loans reported, grants in the amount of \$96,216,000 were made from 1938-46.

² Includes water facilities, rural rehabilitation, construction, and wartime adjustment loans, and loans from Corporation trust funds.

³ In addition to production and economic emergency loans, includes fur, orchard, flood damage, and flood and windstorm restoration loans, and loans made by Farm Credit Administration prior to transfer of Regional Agricultural Credit Corporation funds to Farmers Home Administration on Apr. 16, 1949.

⁴ Includes loans to water facilities associations and loans from Corporation trust funds.

Farmers Home Administration.

¹ Includes loans made directly by Commodity Credit Corporation and loans made by banks and other lending agencies under CCC obligations to purchase. Renewals and extensions of loans previously made are excluded.

² Partly estimated.

³ Loans to the Cotton Producers Pool were second-lien advance on cotton in the pool. The 1943 advance was \$20 per 500 pound bale and the 1934 advance was additional \$10 on cotton remaining in the pool. The number of bales involved is excluded from the quantities placed under loan.

Commodity Stabilization Service. Commodity Credit Corporation data for loan programs not active in recent years may be found in Agricultural Statistics, 1952, Table 760.

CHAPTER IX

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various resources, particularly soil, water, and timber. Data on the production, supply, and distribution of Naval Stores is included because of its close association with forestry statistics. A number of tables on commercial forest land covering area, ownership, estimated board feet of saw timber, by species, and estimated annual growth as of 1945 have been dropped since no new data were available. Those interested in such data as well as State details on construction, reconstruction, and maintenance of national forest roads and trails; expenditures for protection from forest fires on State and private forest lands; accomplishments and expenditures under the Cooperative Forest Management Act of August 25, 1950; and hunting and fishing in national forests should refer to Agricultural Statistics for 1953 and earlier years.

⁴ Includes listing, pitting, chiseling, or furrowing, on the contour; emergency listing, chiseling, or furrowing, at right angles to the wind; pit cultivation; deep plowing sandy cropland; and other approved tillage operations; on cropland. Also includes contour tillage operations on noncrop pasture.

⁵ Includes 48,898 reservoirs to obtain better distribution of livestock, 6,828 erosion control reservoirs, and 1,545 reservoirs for irrigation water, new developments only. Does not include structures constructed wholly of concrete or rubble masonry.

¹ Assistance under 1952 program with respect to these practices represent about 90 percent of the total 1952 practice assistance. ² Revised. ³ Includes data for cross-slope farming. ⁴ Includes listing, pitting, chiseling, or furrowing, on the contour; basin listing; emergency listing; chiseling, or furrowing, at right angles to the wind; pit cultivation; deep plowing sandy cropland; and other approved tillage operations; on cropland. Also includes contour tillage operations on noncrop pasture. ⁵ Includes stubble mulch and leaving stalks or stubble. ⁶ Includes dams for livestock water, erosion control (storage type), and irrigation. ⁷ Includes contour stripcropping, stripcropping not on the contour, and cross-slope stripcropping. ⁸ 500 acres or less.

Agricultural Conservation Program Service. Data for years 1936-42 in Agricultural Statistics, 1952, Table 768.

¹ For specific procedure on organization of soil conservation districts, reference should be made to each of the respective State soil conservation district's laws. ² Upon request, the U. S. Department of Agriculture enters into memoranda of understanding with districts for such assistance from departmental agencies as may be available. ³ Includes 3 wind-erosion districts. ⁴ Includes 20 States cooperative grazing districts.

⁵ Includes the Imperial Irrigation District.

¹ Soil conservation surveys of the Soil Conservation Service showing kinds of soil, slope, degree of erosion, and present land use are used to determine land capabilities for conservation planning and treatment of entire farms and ranches and of group enterprises.

² In addition, about 210 million acres of reconnaissance surveys have been prepared, of which 2,488,401 acres were done in 1953.

Soil Conservation Service.

TABLE 731.--Soil conservation practices: Newly applied in soil conservation districts, with Soil Conservation Service assistance, calendar years, 1949-53¹

¹ Group enterprise plans are defined as any job involving two or more landowners or operators who agree to work together to carry on the construction, operations, and maintenance specified in the plans.

² Other types include special erosion control, water control, water spreading, and other such group enterprise jobs.

¹ Subwatershed work plans specify the works of improvement, practices, and measures to be installed for runoff and waterflow retardation, and soil erosion prevention.

² All of the listed watersheds were approved Dec. 22, 1944; however, flood control funds did not become available until 1946.

³ Includes public and private costs for the complete installation of the flood prevention measures and farm-land treatments specified in the subwatershed work plans, over a period of years, based on prevailing costs at the time of planning.

Soil Conservation Service.

TABLE 736.--Flood prevention: Works of improvement planned and completed within eleven authorized watersheds, with the assistance of the Soil Conservation Service, 1953 and cumulative to Dec. 31, 1953

Practices and measures	Unit	Planned		Completed

Gully control-----	Acres-----	20,365	103,409	10,007	32,100
Roadside erosion control-----	Miles-----	309.1	2,395.1	443.3	1,341.8

Soil Conservation Service. Subwatershed work plans serve as a basis for selecting items of accomplishments which are credited to flood control operations. The above totals are for subwatershed work plans in soil conservation districts where works of improvement have been planned and completed by cooperating farmers, as well as work done or contracted by the Service. Most of this work has been initiated since 1946.

TABLE 737.--Flood prevention: Improvement works completed in authorized watersheds with assistance of the Forest Service, year ending June 30, 1953, and cumulative to June 30, 1953¹

Practices and measures ²	Unit	Total completed or acquired	
		Year ending June 30, 1953 ¹	Cumulative to June 30, 1953
Fire protection:

¹ Total collections, less refunds during calendar year 1953, and includes revenue from sources other than those shown in this table, such as building occupancy, sales of improvements, minerals, and easements.

² Includes public domain lands administered under agreement with Grazing Service.

³ Of this amount, 25 percent is paid to counties in which Title III lands are located, to be used for schools and roads.

FOOTNOTES FOR TABLE 740

¹ Definition of units:

National forests.--Areas established as national forests by legislative or executive action. Acres shown as national forest land, and other land administered by the Forest Service include small administrative sites outside of proclaimed boundaries and those portions of land utilization projects and other areas over which the Forest Service has supervision located within the national-forest boundaries. Land utilization and other areas located outside the national forests and under Forest Service supervision are not included; such areas are listed under the classification "Land utilization and other areas."

Purchase units.--Areas established by the Secretary of Agriculture with the concurrence of the National Forest Reservation Commission but not formalized by legislative or executive action. Acreages shown as national forest land, and other land administered by the Forest Service include all administrative sites outside the established boundaries and those portions of the land utilization projects and other areas over which the Forest Service has supervision located within the established purchase unit boundaries. Land utilization and other areas located outside the boundaries and under Forest Service supervision are not included; such areas are listed under the classification "Land utilization and other areas."

Experimental areas.--Areas outside of the exterior boundaries of national forests or purchase units which have been reserved and dedicated to forest or range research and experimentation by legislative or executive action. The Massabesic Experimental Forest in Maine and the McNeill Division of the Harrison Experimental Forest in Mississippi, which have both purchase unit and experimental area status, are included only in the experimental area summaries.

Land utilization and other areas. Lands acquired by the United States in pursuance of certain national programs of land utilization and adjustment, which have been placed under the administration of the Forest Service but have not been given a national-forest status. The parts of these areas that are located within the established national forest or purchase unit boundaries are included as part of the national forest or purchase unit acreage.

² Does not include lands within certain State forests in Michigan which have been acquired by the United States with intent to exchange them for State lands within the national forests.

³ Exclusive of the area at the Beltsville Research Center of the Department of Agriculture that is used by the Forest Service as an experimental area.

⁴ Includes national forest lands under the primary jurisdiction of other Federal agencies where the national forest withdrawal has not been revoked.

⁵ Lands within the unit boundaries in private, State, county, and municipal, etc., ownership, and Federal lands over which the Forest Service has no jurisdiction.

Forest Service.

¹ Includes "B wood resin" produced in refining FF wood rosin to paler grades. Beginning Sept. 1, 1950, "B wood resin" used in making paper size is included in paper and paper size. All other "B wood resin" is included in chemicals and pharmaceuticals.

² Barrels of 50 gallons.

³ Drums of 520 pounds net weight.

⁴ Prior to 1950, turpentine used in making Beta pinene for consumption in manufacturing synthetic resins is included in ester gum and synthetic resins. For the other years this turpentine is shown in chemicals and pharmaceuticals.

Agricultural Marketing Service.

¹ Rosin, not for violins; imports for consumption, as reported by the Bureau of the Census.

² Drums of 520 pounds net weight.

³ Reports of Bureau of the Census.

⁴ Total supply less exports and Mar. 31 stocks.

⁵ Due partly to unreported industrial consumption and partly to failure of some consumers to distinguish in their reports between gum rosin, wood rosin, and modified or derived rosin.

Agricultural Marketing Service. Data for 1932-43 in Agricultural Statistics, 1952 table 810.

CHAPTER X

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities of foods available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income, tables 663-665.

Several tables have been dropped from this chapter this year because additional data on the subjects were not available. The research project which produced data on household purchases of oranges and orange products and of selected dried fruits was discontinued and the complete series of data available are shown in the 1953 edition of Agricultural Statistics. Other tables dropped are: quantities of food used and nutritive value of food available for consumption of farm families in 3 type-of-farming areas in 5 southern States, February-April 1948; farm-operator family level-of-living indices, by States, 1940, 1945, and 1950; percent of farm-operator families having selected housing facilities and equipment and characteristics of operator's house, by economic class of farm and family income, 1950; and number and percentage of farms with telephones, by States, 1950.

TABLE 756.--Population: Number of people eating out of the total domestic food supplies and number eating out of the civilian food supplies, Jan. 1 and July 1, 1909-54

Year	Jan. 1	July 1	Year	Jan. 1	July 1
Population eating out of the total domestic food supplies:					
	<i>Millions</i>	<i>Millions</i>		<i>Millions</i>	<i>Millions</i>
1909	91.8	91.8	1933	127.0	127.3

1916	102.7	103.4	1940	133.3	134.0
1917	104.2	104.9	Population eating out of civilian supplies:		
1918	105.5	106.0	1941	133.9	133.7
1919	106.3	106.5	1942	134.1	133.3
1920	107.2	108.0	1943	131.6	130.6
1921	109.1	110.1	1944	130.6	130.3
1922	110.9	111.6	1945	130.5	130.9
1923	112.6	113.5	1946	136.3	140.3
1924	114.7	115.7	1947	142.9	144.6
1925	116.7	117.5	1948	146.1	147.2
1926	118.3	119.0	1949	148.4	149.6
1927	119.9	120.7	1950	151.1	152.3
1928	121.5	122.2	1951	152.8	153.2
1929	122.9	123.5	1952	154.4	155.5
1930	124.2	124.8	1953	157.1	158.3
1931	125.4	125.8	1954	159.9	161.3
1932	126.2	126.6			

Agricultural Marketing Service. Estimates compiled from data of Federal agencies. The basic population estimates are from the Bureau of the Census, with adjustments for underenumeration. For July 1, 1940, and subsequent dates, estimates of the civilian population were supplied by the Bureau of the Census. For the period Jan. 1, 1941-Jan. 1, 1946, adjustments have been made to allow for members of the armed forces eating out of civilian supplies; the adjustments were originally estimated by OPA on the basis of data from several official sources.

PER CAPITA FOOD CONSUMPTION

1953 ⁴ -----	94	109	137	102	88	96	95	102	96	102

¹ Derived from data on per capita consumption of individual foods, using estimates of retail weights multiplied by average retail prices in 1947-49. Civilian consumption only, 1941 to date.

² Fat cuts of pork in "Meats, poultry, fish" group.

³ Includes frozen vegetables, canned soups, and canned baby foods.

⁴ Preliminary.

Agricultural Marketing Service. Data for 1909-38 in Agricultural Statistics, 1953, table 824.

¹ Estimated from per capita data by means of average loss factors with the addition of estimates of supplies from rural and urban home gardens and of minor food items. Civilian consumption only, beginning 1941.

² Fluid whole milk equivalent based primarily on mineral and protein content. One quart of fluid milk weighs 2.15 pounds.

³ Sum of approximate retail weights.

⁴ Allows for breakage from farm to retail and increasing size of eggs in recent years.

⁵ Excludes bacon and other fat pork cuts; includes edible offal, game, and small quantity of noncommercial fish; poultry on ready-to-cook basis.

⁶ Product weight except for "other edible fats and oils," which represents oils used in salad dressings, etc.

⁷ Nuts on a shelled basis.

⁸ Includes fresh and processed items and produce of rural and urban home gardens. Product weight except for concentrated citrus juices which are on a single strength basis in the citrus and tomato group.

⁹ Excludes corn sugar and sirup.

¹⁰ Excludes sugar used in condensed milk, frozen dairy products (except ice cream), and processed fruits and vegetables.

¹¹ Includes coffee on roasted basis and chocolate liquor equivalent of cocoa and chocolate products.

¹² Preliminary.

Agricultural Marketing Service. Data for 1909-38 in Agricultural Statistics, 1953, table 825.

¹ Quantities of nutrients computed on the basis of estimates of apparent per capita consumption (retail basis), including estimates of produce of rural and urban home gardens. No deduction has been made in nutrient estimates for loss or waste of food in homes, public eating places, and institutions or for destruction or loss of nutrients during the preparation of food. Civilian per capita only, 1941 to date. Data for iron, thiamine, riboflavin, and niacin include estimates of the quantity of these nutrients added to prepared cereals, white flour, and bread.

² Preliminary.

¹ Distribution without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended. Beginning in 1949, data include CCC commodities distributed pursuant to Section 416, Public Law 439, 81st Congress, approved Oct. 31, 1949. This amounted to 56,571,000 pounds valued at \$9,275,000 in 1949, 185,782,000 pounds, valued at \$21,125,000 in 1950, 2,669,000 pounds, valued at \$2,695,000 in 1951 72,530 pounds, valued at \$12,986 in 1952 and 293,900 pounds, valued at \$119,800 in 1953. In the fiscal year beginning July 1, 1949, institutions and welfare cases received 46,173,000 pounds of potatoes, at a cost to the Government of \$1,044,000, in accordance with Section 3, Public Law 471, 81st Congress, approved Mar. 31, 1950. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States.

² Total cost to the Government of the commodity as delivered to the distributing agency; includes cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of program.

³ Preliminary.

¹ Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended. Part of the distribution to school lunch programs, 105,493,000 pounds costing \$14,826,000, consisted of commodities distributed under provisions of Section 6 of the National School Lunch Act. The data also include distribution under Section 416 of the Agricultural Act of 1949, Public Law 439, 81st Congress, approved Oct. 31, 1949, for institutions and welfare cases. Section 416 distribution to these outlets was 293,900 pounds, at a cost to the Government of \$119,800. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients include school lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies.

² Total cost to the Federal Government of the commodity as delivered to the distributing agency; it includes the cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of the program.

³ Preliminary.

Agricultural Marketing Service.

1953 ⁵ -----	5,027	9,362	7,528	10,139	1,218	2,343

¹ In this tabulation, "peak participation" is the participation during the month of the year when the largest number of persons participated in the program; "average participation" is the average for the 12 months of the fiscal year.

² Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended; and under Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients include school-lunch programs, eleemosynary institutions, and household receiving public assistance from State or local welfare agencies.

³ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the Government for local purchases of food on basis of the quality and quantity of meals served. The program was started in February 1943.

¹ Provides for distribution, without charge to recipients of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 329, 74th Congress, approved Aug. 24, 1935, as amended. Beginning in 1949, data include Commodity Credit Corporation commodities distributed pursuant to Section 416, Public Law 439, 81st Congress, approved Oct. 31, 1949. In the fiscal year beginning July 1, 1949, schools received potatoes in accordance with Section 3, Public Law 471, 81st Congress, approved Mar. 31, 1950.

² Total cost to the Government of the commodity as delivered to the distributing agency; includes cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of the program.

³ Distribution of commodities acquired by the Government and distributed under provisions of Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946.

⁴ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the Government for local purchases of food on a basis of the quality and quantity of meals served. The program was started in February 1943. The figure for 1946 does not include the sum of \$9,694,703, expended under authority contained in Section 5 of the National School Lunch Act to provide nonfood assistance for the school-lunch programs. Approximately 39,000 schools purchased lunchroom equipment under this program.

⁵ Total cost in subsidy payments by the Government; does not include costs of administration of the program.

¹ The consumers' price index calculated on the base period (1935-39 = 100), has been converted to the new base (1947-49 = 100). This index reflects retail prices of goods and services commonly bought by average families with moderate income in 46 urban areas of the United States. Beginning January 1953 this index became the official index released monthly by the Bureau of Labor Statistics.

Agricultural Marketing Service. Compiled from data of the Bureau of Labor Statistics. Data for 1913-51 on 1935-39 = 100 base in Agricultural Statistics, 1952, table 827.

1946-----	1,669	3.58	4,474	1.99					

¹ These rates do not include charges for the amortization of investment in lines or charges for line extensions where such are levied by the utility.² The data on energy used for farms west of the 100th meridian vary year by year, depending on the proportion of the total consumption used for irrigation pumping. As more nonirrigation consumers are served the average consumption is reduced. Hence, the figures for the West are not strictly comparable to those for the East.

Agricultural Research Service. Compiled from reports of the Edison Electric Institute. Data for 1929-38 in Agricultural Statistics, 1952, table 834.

CHAPTER XI

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; weather data pertaining to farming; statistics on fishery products; refrigerated warehouse space; and freight rates on the transportation of agricultural products. Foreign trade summary tables are shifted to this chapter since the separate chapter on this subject has been dropped. Only 2 tables are carried on weather but more complete information can be secured from the Weather Bureau, U. S. Department of Commerce. The tables on certain Extension Service activities have been dropped.

Foreign Trade in Agricultural Products

The term "foreign trade" applies to trade between the United States, including its Territories, and foreign countries. Trade between continental United States and its Territories is referred to as "shipments." Alaska, Hawaii, Puerto Rico, and, since January 1, 1935, the Virgin Islands are Territories. Beginning January 1, 1940, trade with foreign countries through the customs district of the Virgin Islands is not included in United States trade statistics. Figures for shipments out of the Territories include small quantities to other Territories. In statistics of foreign trade, forest products, and distilled liquors are considered nonagricultural products, as distinct from strictly agricultural products.

Separate figures are not being compiled by the Bureau of the Census on exports under various special economic-aid programs but these exports are included in figures appearing in this publication. Excluded from the export figures are shipments to the United States armed forces abroad for their own use. Shipments between continental United States and the Territories and possessions, and shipments between the Territories and possessions. Effective January 1, 1950, also excluded from the dollar value is the export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities. The export subsidy programs have included the following commodities: wheat, wheat flour, raisins, prunes, apples, oranges, canned juice, honey, cotton, unshelled filberts, and fresh pears. These subsidies have applied only on exports to certain countries or under certain programs and are usually in effect for limited periods.

Imports for consumption include imports for immediate consumption plus withdrawals from bonded warehouses. In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

TABLE 771.--Foreign trade: Value of total and agricultural exports and imports, United States, 1939-52

1952 ² -----	111	113	108	92	114	258	47	68	55	332	105

¹ Based on data for 122 agricultural import classifications.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Preliminary.

⁴ 1942-45 includes wool (ordinarily dutiable) imported free as an act of international courtesy.

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census and the United States Tariff Commission. Data for 1924-38 in Agricultural Statistics, 1952, table 628.

FOOTNOTES FOR TABLE 771

¹ Beginning January 1942, the value of agricultural exports has been revised to include "food exported for relief or charity by individuals and private agencies." These figures, for which separate commodity detail is not available, include a small amount of certain foodstuffs other than agricultural. They were not included in census reports as agricultural prior to 1949.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Excess of imports.

⁴ Preliminary.

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census and of the United States Tariff Commission. Data for 1909-38 in Agricultural Statistics, 1952, table, 625.

1953-----	466,470	202,491	2 79,089	748,050

¹ 1941 data from June 16 survey; all others Oct. 1. Warehouse space is defined as all space artificially cooled to temperatures of 50° or less, in which food commodities are held for 30 days or longer.

² Reduction from earlier years is due chiefly to the elimination from reports of meat-packing establishments of the "working space" in such establishments. In 1953 space in smoking and curing rooms was excluded.

1953-----	3.02	131	130	117 ¹	126	128	124

¹ Transportation bill for all years and revised railroad freight rate indices beginning 1945 are on a calendar year basis. Earlier freight rate indices are on crop years beginning July. They differ from those previously published primarily because of changes from crop year to calendar year in the base period 1947-49. The change from crop to calendar year (1945 to date) was made to increase comparability with other BAE index series.

² Estimates of total expenditures by shippers for transportation (except local hauling) of farm products for civilian consumption by rail and truck, including private trucks. Year-to-year variations are caused by changes in rates, changes in volume shipped, length of haul, and some additional minor factors. ³ All index number series beginning with 1945, and those for livestock, meats, and fruits and vegetables prior to 1945 are of the weighted aggregative type. They are based upon averages of rates in effect during the year. Annual averages are computed by weighting the applicable monthly rates by the estimated proportion of annual shipments moved thereon, assuming an average seasonal distribution of shipments. In constructing the combined index, group indices weighted by average revenues for 1947-49. ⁴ New index series with postwar weights used for years after 1945. Linkage with original indices made in 1945.

Agricultural Marketing Service. Data for 1913-18 in Agricultural Statistics, 1953, table 844.
