PHARYNGOTOME, *Pharyngotomus*, from *φάρυξ*, 'the pharynx,' and *τέμνω*, 'I cut.' An instrument, invented by J. L. Petit, used to scarify inflamed tonsils, and to open abscesses, which form in the parietes of the pharynx. It is composed of a long, narrow blade with a lancet point, enclosed in a sheath or canula of silver slightly curved. This instrument is carried to the part to be cut, and the point of the blade is made to pass out of the sheath, by pressing on a button at the end of the pharyngotome. A spring causes the blade to re-enter as soon as the pressure is removed.

PHARYNGOTOMY, *Pharyngotomia*; same etymon. Some authors have used this word synonymously with œsophagotomy. It means, also, scarification of the tonsils, or an incision, made for opening abscesses there, &c.

PHARYNX, *Pharyx*, *Pharus*, *Gula*, *Læmos*, *Fauces*, *Pharygæthrum*, *Pharyngæthron*, *Pharyngæthros*, *Pharyngæthron*, *Isthmos*, *Isth'mion*, *Inglu'ties*, *Principium Gulæ*, *Os posterum*, (F.) *Arrière-bouche*, *Gosier*. A species of musculo-membranous, symmetrical canal, on the median line, irregularly funnel-shaped, and situate between the base of the cranium and the œsophagus, in front of the vertebral column. It is very narrow above; but dilates in the middle, and again contracts below, at its junction with the œsophagus. Into the anterior paries of the pharynx open, successively, from above to below,—the posterior orifices of the nasal fossæ; the Eustachian tubes; the posterior aperture of the mouth, and the top of the larynx. The pharynx is formed, externally, of a muscular coat, and, internally, of a mucous membrane, which is continuous, above, with the Schneiderian membrane; and in the middle, with that of the mouth; below, with that of the œsophagus; and, at the sides, with that of the Eustachian tubes. This membrane has no villi, and presents only a few inequalities, which are owing to the presence of muciparous follicles. The muscular coat of the pharynx is composed of the constrictor muscles, stylopharyngei, and pharyngostaphylini. The vessels and nerves are called *pharyngeal*. The pharynx serves as a common origin for the digestive and respiratory passages. It gives passage to the air, during respiration; and to the food at the time of deglutition.

PHARYNX, FOLLICULAR INFLAMMATION OF THE, Pharyngitis, follicular.

PHARYX, Pharynx.

PHASELUS, Phaseolus.

PHASEOLUS, *P. Vulgaris*, *Phasiolus*, *Phaseolus*, *Faseolus*, *Faseolus*, *Bona*, *Boona*, *Faba*; the *Kidney Bean*; the *French Bean*. (F.) *Haricot*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. When young and well boiled, this is easy of digestion, and delicately flavoured. It is less flatulent than the pea.

PHASEOLUS CRETICUS, *Cajan*, *Cayan*. A decoction of the leaves, according to Ray, restrains the hemorrhoidal flux when excessive.

PHASEOLUS VULGARIS, Phaseolus.

PHASIANUS GALLUS, so called from the river *φασίς*, in Colchis, near the Black Sea: (F.) *Coq*. The parts of generation of the cock, dried and pulverized, were formerly regarded as proper for increasing the quantity of semen. The fat was used as emollient and resolvent; the brain, in diarrhœa; the gall, in freckles and diseases of the eyes. These phantasies are now abandoned.

PHASIOLUS, Phaseolus.

PHASMA, Phantasm.

PHATNE, Alveolus.

PHATNION, Alveolus.

PHATNORRHAG'IA, *Stomatorrhag'ia alveolorum*, from *φάρυξ*, 'an alveolus,' and *ρηννυμι*, 'I break forth.' Hemorrhage from the alveoli.

PHAUSIN'GES, *φασίγγες*, plural of *φασίγγις*, from *φασίω*, 'I roast.' Spots or blisters on the legs, produced by heat; and, in a more extensive signification, by any other cause. Also, a pustule.—Fœsius.

PELLANDRE, *Phellandrium aquaticum*.

PELLANDRIUM AQUATICUM, *Phellandrium*, *Ænan'thè phellandrium* seu *aquat'ica*, *Ligusticum phellandrium*, *Fœniculum aquaticum*, *Cicuta'ria aquatica*, *Water Fennel*, *Fine-leaved Water Hemlock*, (F.) *Phellandre*, *Fenouil d'eau*, *Ciguè d'eau*. Family, Umbellifere. *Sex. Syst.* Pentandria Digynia. This plant is stimulant and narcotic. It has been used in intermittents and dyspepsia. It has, also, been given in phthisis pulmonalis, and in cases of serofulous atonic ulcers.

PHENIG'MUS, *Phœnig'mus*, *Phœnig'mus*, from *φαινίς*, 'red.' *Red Jaundice*. A cutaneous affection, consisting of redness diffused over the skin, without fever. Sauvages makes it a genus of his order *Icteritiæ*. Also, the act of irritating a part by a stimulating application.

PHÉNOMÈNE, Phenomenon.

PHENOM'ENON, *Phœnom'enon*, (F.) *Phénomène*, from *φαινομαι*, 'I appear.' An extraordinary and unexpected event. In *Medicine*, it means any change, appreciable by our senses, which supervenes in an organ or function:—as the *phenomena* of the circulation, respiration, &c. It is used in pathology, synonymously with symptom.

PHEUGOPHOBIA, Hydrophobia.

PHEUGYDRON, Hydrophobia.

PHIALA, A *Phial* or *Vial*, (F.) *Fiole*. A small bottle, in which apothecaries are in the habit of sending out their mixtures, draughts, &c.: hence called *Med'icine Vials*, (F.) *Fioles à Médecine*. They are usually sold in grosses, and assorted into vials of oz. 8; oz. 4; oz. 3; oz. 2; oz. 1½; oz. 1; and oz. ½.

PHILADYNAMICA, Debilitans.

PHILANTHROPUS, Galium aparine.

PHILETRON, Philter.

PHILETRUM, *Lacuna labii superioris*.

PHILIATROS, *φιλιατρος*, from *φιλεω*, 'I love,' and *ιατρικη*, 'medicine.' An amateur of medicine. One who studies medicine; *Studiosus medic'inae*.

PHILOBOSIS, (F.) *Philobiosis*: from *φιλεω*, 'I love,' and *βιος*, 'life.' The love of life.

PHILO'GNIA, from *φιλεω*, 'I love,' and *οινος*, 'wine.' Love of wine. Addiction to wine.

PHILOGYNIA, Muliebrositas.

PHILONUM LONDINENSE, *Confectio opii*.

PHILOPATRIDALGIA, Nostalgia.

PHILOPATRIDOMANIA, Nostalgia.

PHILOSOPHER'S STONE, see Alchymy.

PHILOSOPHIA CORPORIS VIVI, Physiology—p. *Hermetica*, Alchymy—p. per Ignem, Chymistry.

PHILTER, from *φιλεω*, 'I love.' *Philtrum*, *Philt'etron*, *Phar'macum* vel *Poc'ulum amato'rium*, *Amato'rium venefic'ium*, (F.) *Philtre*. A medicine or drink considered capable of causing love.

PHILTRUM, *Lacuna labii superioris*.

PHILYRA, Tilia.

PHIMA, Phyma.

PHIMOS, Capistrum.

PHIMOS'ICUS. Relating to Phimosis.

Sauvages calls *Ischuria phimosica*, *Ischuria urethralis à phimosi*, the retention of urine which depends upon phimosis.

PHIMOSIS, *Phymosis*, *Capistra'tio*, *Epagogium*, *Ligatu'ra glandis*, *Strictu'ra præputii*,

*Reductio præputii impedita*, from φρωω, 'I bind up.' A disease which consists in a preternatural narrowness of the opening of the prepuce, so that it cannot be carried behind the corona glandis. This affection is most commonly congenital. Sometimes it is accidental, and dependent upon tumefaction of the glans, or of the prepuce, as occurs in syphilis. To remedy this state, the prepuce may be divided by means of a bistoury and director; or circumcision may be practised.

PHIMOSIS ADNATA seu CONGENITA seu PŒRILIS. Congenital phimosis—p. Circumligata, Paraphimosis—p. Congenita, P. adnata.

PHIMOSIS ŒDEMATO'DES, *Hydrophimosis*. Phimosis with œdematous swelling of the prepuce.

PHIMOSIS PŒRILIS, Ph. adnata.

PHLASMA, Contusion.

PHLEBARTERIODIALYSIS, see Aneurism.

PHLEBECTASIA, *Phlebectasis*, from φλεψ, 'a vein,' and εκτασις, 'dilatation.' Dilatation of a vein, or of a portion of a vein.—Alibert.

PHLEBECTIARCTIE. A mongrel term, from φλεψ, 'a vein,' and αρκτο, 'I contract.' Contraction of a vein.

PHLEBES, (Arteries.) See Artery.

PHLEBEURYSMA, Varix.

PHLEBITON, diminutive of φλεψ, 'a vein.' A vein.—Hippocrates. A small vein,—*Ve'nula*.

PHLEBIS'MUS; from φλεψ, φλεβις, 'a vein.' A term employed by Dr. Marshall Hall for the turgescence of veins, produced by impeded return of the blood. See Trachelismus.

PHLEBITIS, *Inflammati'o venarum*, (F.) *Inflammation des veines*, from φλεψ, 'a vein,' and ιτις, the termination for inflammation. Inflammation of the inner membrane of a vein, which sometimes follows blood-letting, and extends from the small wound made in that operation to the neighbouring parts of the venous system. The symptoms are, first, inflammation in the punctured part; and, afterwards, a knotty, tense, painful cord, following the direction of the vessel, and accompanied with more or less fever, according to the extent of the inflammation, the nervous symptoms, &c. Phlebitis, also, sometimes supervenes on the ligature or excision of varices; after amputation, gun-shot wounds, delivery (*Uterine Phlebitis*, *Metro-phlebitis puerperalis*, *Phlebitis uterina*, *Metri'tis venosa*), the ligature of the umbilical cord, &c. It may terminate by resolution, suppuration, ulceration, or gangrene.

PHLEBITIS, CRURAL, *Phlegmatia dolens*—p. Uterina, see Peritonitis, and Phlebitis.

PHLEBOG'RAPHY, *Phlebographia*, from φλεψ, 'a vein,' and γραφη, 'a description.' A description of the veins.

PHLEB'OLITE, *Phlebolithus*, *Vein stone*, from φλεψ, 'a vein,' and λιθος, 'a stone.' A loose concretion, varying in size from that of a errant to that of a pea, occasionally found in the veins. It would seem to be formed in the blood.

PHLEBOLITHUS, Phlebolite.

PHLEBOL'OGY, *Phlebology'ia*, from φλεψ, 'a vein,' and λογος, 'a discourse.' The part of anatomy which treats of the veins.

PHLEBOPALIA, from φλεψ, 'a vein,' and παλλω, 'I palpitate.' With the ancients, *pulsation*, which they conceived to be produced by the veins. See Pulsus venarum.

PHLEBOPHTHALMOTOMIA, *Ophthalmoplebotomy'ia*, from φλεψ, 'a vein,' οφθαλμος, 'the eye,' and τεινω, 'I cut.' Blood-letting in the eye.

PHLEBOPLEOR'SIS ECPHRACTICA, Inflammation.

PHLEBORRHAG'IA, from φλεψ, 'a vein,' and ρηγνυμι, 'I break out.' Rupture of the veins;

and, in a more extensive sense, venous hæmorrhage.

PHLEBORRHEX'IS, from φλεψ, 'a vein,' and ρηξις, 'rupture.' Rupture of a vein. Also, hæmorrhage from a vein. *Phleborrhag'ia*.

PHLEBOSTENO'SIS; from φλεψ, 'a vein,' and στενωσις, 'contraction.' Constriction or contraction of a vein.

PHLEBOT'OMIST, from φλεψ, 'a vein,' and τεινω, 'I cut.' A bleeder. One who practises particularly the art of phlebotomy. See Blood-letting.

PHLEBOTOMUM, Fleam.

PHLEBOTOMY, see Blood-letting.

PHLEBS, Vein.

PHLEDONIA, Delirium.

PHLEGM, *Phlegma*, *Pituita*, *Pituite*, *Mucus*, (F.) *Pituite*. One of the four natural humours of the ancients, which, according to them, was cold and moist, as atrablis was cold and dry. It predominated, especially, in winter.

*Pituita* was afterwards applied to every aqueous or excrementitious humour, such as the saliva, nasal and intestinal mucus, serum, &c. The terms *phlegm* and *pituita* are no longer used in physiology,—the different humours having received particular names; but the vulgar still use *phlegm* to designate a stringy mucus, expectorated, or rejected by vomiting. The ancient chymists gave the name 'phlegm' to aqueous, insipid, and inodorous products obtained by subjecting moist vegetable matters to the action of heat.

PHLEGMA NARIUM CRASSUM, Nasal mucus—p. Vitrioli, Sulphuric acid (very dilute.)

PHLEGMAGOGUE, *Phlegmagogus*; from φλεγμα, 'phlegm,' and αγω, 'I expel.' A medicine, formerly believed capable of 'cutting' or removing phlegm.

PHLEGMAPYRA, Fever adeno-meningeal.

PHLEGMASIA, Inflammation, Phlegmon—p. Adenosa, Adenitis—p. Alba dolens puerperarum, Ph. dolens—p. Cellularis, Induration of the cellular tissue—p. Glandulosa, Adenitis—p. Myoica, Myositis—p. of the Peritoneum, Peritonitis.

PHLEGMA'TIA, from φλεγμα, 'phlegm. Œdema, Anasarca, Hydrops.

PHLEGMA'TIA DOLENS, *P. lactea*, *P. dolens puerperarum*, *P. alba dolens puerperarum*, *Leucophlegmasia dolens puerperarum*, *Sccl'on'cus*, *Sccl'al'gia puerperarum*, *Anasar'ca serosa*, *Echphy'ma œdemat'icum*, *Sparganosis puerperarum*, *Echymoma lymphat'icum*, *Is'chias a sparganosi*, *Œdema puerperarum*, *Œd. lacteum*, *Injarc'cus lac'tei extremitat'um*, *Metas'tasis lactis*, *Hyster'al'gia galact'ica*, *Hydrophlegmasia text'is cellulosi*, *Crural Phlebitis*, *White leg*, *Swelled leg*, *Milk leg*, *White swelling of lying in women*, (F.) *Œdème des nouvelles accouchées*, *Œdème douloureux des femmes en couche*, *Dépot lacteux sur la cuisse*, *Œdème actif des nouvelles accouchées*, *Enflure ou Engorgement des jambes et des cuisses de la femme accouchée*, *E. lacteux des membres abdominaux*. It occurs, for the most part, in the second or third week after delivery:—is limited to the lower extremity, and chiefly to one side; exhibiting to the touch a feeling of numerous irregular prominences under the skin. It is hot, white, and unyielding; and is accompanied, sooner or later, with febrile excitement. After a few days, the heat, hardness, and sensibility diminish, and the limb remains œdematous for a longer or shorter period. The disease frequently, if not generally, consists in the obstruction of the iliac or other veins. Owing to the pressure of the gravid uterus—the flow of blood being obstructed—the serous part of it is thrown out into

the cellular membrane of the limb. Sometimes the vein is found completely obliterated.

The treatment consists in the use of antiphlogistics:—the application of leeches or cupping-glasses near the groin: fomentations to the limb, &c.; and, when the active state has subsided, the use of a roller, applied gently at first, but, afterwards, gradually tightened.

PHLEGMATIA LACTEA, P. dolens.

PHLEGMATLE, see *Empresma*—p. *Membranose* et *parenchymatosæ*, *Empresma*.

PHLEGMATOPYRA, Fever, adeno-meningeal.

PHLEGMATORRHAG'IA, *Phlegmatorrhœa*, *Catarrh*, from *φλεγω*, 'phlegm,' and *ρῆα*, 'I flow.' Stahl and his partisans gave this name to a copious secretion, by the nostrils, of a limpid and thin mucus, without inflammation. It is the *Coryza Phlegmatorrhag'ia* of Sauvages. See *Coryza*.

PHLEGMHYMENITIS, Phlegmymenitis.

PHLEGMON, from *φλεγω*, 'I burn.' *Phlogosis phleg'monē*, *Phleg'monē*, *Phlegma'stia*, *Incedium*, *Inflamma'tio*. Inflammation of the areolar texture accompanied with redness, circumscribed swelling, increased heat and pain; which is, at first, tensive and lancinating; afterwards, pulsatory and heavy. It is apt to terminate in suppuration. It requires the antiphlogistic treatment, until suppuration seems inevitable, when the suppuration must be encouraged as the next favourable termination to resolution.

PHLEGMON PÉRINÉPHRÉTIQUE, Periphrenitis.

PHLEGMONE, Inflammation—p. *Mammæ*, *Mastodynia apostematosa*—p. *Mastodynia*, *Mastodynia apostematosa*—p. *Parotidæa*, *Parotis*—p. *Peritonæi*, *Peritonitis*—p. *Parulis*, *Parulis*—p. *Musculorum*, *Myositis*—p. *Ventriculi*, *Gastritis*.

PHLEGMONODES, Phlegmonous.

PHLEGMONOID, Phlegmonous.

PHLEGMONOUS, *Phlegmono'des*, *Phleg'monoid*, from *φλεγμονη*, 'a phlegmon,' and *εἶδος*, 'resemblance.' That which relates or belongs to or resembles phlegmon.

PHLEGMONOUS INFLAMMATION is the active inflammation of the areolar membrane; in contradistinction to erysipelatous inflammation, or that of the skin.

PHLEGMOPYRA, Fever, adeno-meningeal.

PHLEGMORRHAGIA, Blennorrhœa.

PHLEGMORRHAGIE PULMONAIRE, Bronchorrhœa.

PHLEGMORRHŒA, Blennorrhœa.

PHLEGMYENITIS, *Phlegmymenitis*, from *φλεγμα*, 'phlegm,' *ὑμην*, 'a membrane,' and *itis*, the termination for inflammation. Inflammation of a mucous membrane.

PHLEGMYENITIS ENTERICA, see *Enteritis*.

PHLEPS, Vetr.

PHLOGIA, Inflammation.

PHLOGICUS, Inflammatory.

PHLOGISTIC, Inflammatory.

PHLOGISTICI, *Empresma*.

PHLOGISTON, Hydrogen.

PHLOGMUS, *Verbasum thapsus*.

PHLOGO'DES, from *φλοξ*, 'flame,' and *εἶδος*, 'resemblance.' *Infla'med*, *Inflamma'tus*, *Inflammat'orius*, Inflammatory. An epithet employed particularly to express the red colour of the face.

PHLOGOPYRUS, Synocha.

PHLOGOSED, Inflamed.

PHLOGO'SIS, *Incedium*, *Inflamma'tion*. Some writers use this word exclusively for external inflammation—phlegmon; others, for that which is superficial or erysipelatous.

PHLOGOT'ICA, *Inflammations*. The second order in the class *Hæmatica* of Good.

PHILOOS, Cortex.

PHLOMUS, *Verbasum thapsus*.

PHLOOS, Cortex.

PHLOR'IDZINE, *Phloridzi'na*, *Phloridzin*, from *φλοος*, 'inner bark,' and *ρίζα*, 'root.' The bitter or active principle of the root and trunk of the apple, pear, cherry, and plum tree. It is deposited from the decoction on cooling; crystallizes in silky spicula of a dead white colour, when in masses, or in long slender prisms or tables, when crystallized with care. 1000 parts of water, at a temperature of from 32° to 71°, only dissolve about one part; but at from 70° to 212°, it is dissolved in all proportions. It is very soluble in pure alcohol, but only slightly so in ether; s. g. 1.429. It has been administered successfully in intermittents,—10 to 20 grains being generally required to arrest the paroxysm. It may be given either in the form of pill or powder.

PHLOUS, Cortex.

PHLOX, *Verbasum thapsus*.

PHLYCTÆ'NA, *Phlyctæ'nis*, *Phlyctis*, *Phlyza'cion*, *Ampullæ*, *Holophlyctides*, *Phlyctides*, *Phlysis*, from *φλυζω*, 'I boil.' Tumours formed by the accumulation of a serous fluid under the epidermis.

PHLYCTÆNULA, see *Hydatid*.

PHLYCTENOID, *Phlyctenoi'des*. Resembling phlyctænæ. An epithet for a variety of herpes.

PHLYCTEN'ULAR, same etymon as *Phlyctæna*. Of or belonging to phlyctænula,—as *phlyctenular ophthalmia*, inflammation of the eye, accompanied with phlyctænulæ on the cornea.

PHLYCTIDES, Phlyctæna.

PHLYCTID'IUM, same etymon. A circular or annular spot of inflammation of the corium, encircled by a red ring or zone, within which suppuration takes place. The genuine small-pox pustule, and that produced by the application of tartar emetic ointment, are examples of it.

PHLYCTIS, Phlyctæna.

PHLYSIS, from *φλυζω*, 'I am hot,' 'I boil.' A cutaneous eruption. An ulcerative, subcutaneous tumour: flat, tensive, glabrous; diffused, hot, throbbing; at length fluctuating, with an acrid ichor.—Good.

PHLYSIS, Phlyctæna—p. *Ecthyma*, *Ecthyma*—p. *Impetigo*, *Impetigo*—p. *Porriigo*, *Porriigo*—p. *Scabies*, *Psora*.

PHLYZACIA, Ecthyma.

PHLYZACION, Phlyctæna.

PHOBODIPSON, Hydrophobia.

PHOCOM'ELES, from *φωκη*, 'a seal,' and *μελος*, 'a limb.' A genus of monsters, in which the limbs are shortened; the hands and feet appearing to exist alone, and to be inserted immediately on the trunk, as in the seals and the herbivorous cetacea.—J. G. St. Hilaire.

PHGENICISMUS, Rubeola.

PHENIGMUS, Phenigmus—p. *Petechialis*, *Purpura simplex*.

PHENIX DACTYLIFERA, Date tree—p. *Excelsa*, *Date tree*.

PHONA'TION, *Phona'tio*, from *φωνη*, 'voice.' The physiology of the voice.

PHONE, Voice.

PHO'NICA, *φωνικα*, from *φωνη*, 'voice.' The first order of the class *Pneumatica*, in Good's Nosology. Defined: diseases affecting the vocal avenues:—the passage of the voice impeded, or its power suppressed or depraved.

PHONON'OSI, *Phonon'osi*, from *φωνη*, 'the voice,' and *νοσος*, 'a disease.' *Phonopathi'æ*, *Morbi vocis*. Diseases of the voice.

PHONOPATHIA, Phononosi.

PHORA, Gestation.

PHORBE, Pabulum.

PHORONOM'IA, from *φορομαι*, or *φερομαι*, 'I put myself in motion,' and *νομος*, 'law.' The doctrine of muscular motion.

PHOROUS, from *φωω*, 'I carry.' A suffix denoting conveyance. Hence, *Galactophorous*, &c.

PHOS, Light.

PHOSPHAS CALCICUM STIBIATUM, Antimonial powder—p. *Calcis stibiatus*, Antimonial powder—p. *Natrium*, Soda, phosphate of.

PHOSPHAT'IC, *Phosphat'icus*, from *Phosphorus*. Relating to the phosphates; hence the *Phosphat'ic Diath'esis* is the habit of body which favours the deposition of the phosphates from the urine.

PHOSPHÈNE, Photopsia.

PHOSPHORE, Phosphorus.

PHOSPHORÈNÈSES. M. Baumes unites, under this generic name, diseases which he attributes to disordered phosphorization; i. e. to excess or deficiency of calcareous phosphate or its decomposition. Amongst these affections he ranks rachitis, osteo-malacia, and gout.

PHOSPHORES'CENTE, *Phosphorescent'ia*. The properties possessed by certain bodies of being luminous in obscurity, or under particular circumstances.

PHOS'PHORIC ACID, *Ac'idum phosphor'icum*, (F.) *Acide phosphorique*. A solid, colourless compound; highly sapid; very soluble in water, and vitrifiable by fire. It exists in bones combined with lime. It has been employed in medicine in the form of lemonade, in passive hemorrhage, typhus, phthisis, marasmus, &c., and in injection in cases of cancer of the uterus. It does not seem preferable to other acéids.

PHOSPHORURIA, Urine, phosphorescent.

PHOS'PHORUS, *Phosphorum*, *Autophosphorus*, *Ignis philosoph'icus*, *Lumen constans*, from *φωω*, 'light,' and *φωω*, 'I carry.' (F.) *Phosphore*. 'A light carrier.' An elementary or undecomposed substance; not metallic; solid; transparent or semitransparent; colourless; brilliant; flexible; of a sensible garlic odour; very inflammable, and susceptible of combining with the oxygen of the atmosphere, at even the ordinary temperature. It does not exist pure in nature, but is found frequently united to other bodies. Its fumes in the manufacture of lucifer and congreve matches have caused, it is said, necrosis of the lower jaw—'*phosphorus jaw disease*.'

Phosphorus has been used in medicine, dissolved in ether or suspended in the yolk of egg, as a stimulant; but the greatest precautions are necessary in its administration: hence it is rarely employed.

PHOSPHORUS JAW DISEASE, see Phosphorus.

PHOSPHURIA, Urine, phosphorescent. See Urine.

PHOTODAMPNIS, Refraction.

PHOTOM'ANIA, from *φωω*, 'light,' and *mania*. Insane delirium induced by light.

PHOTOPHO'BIA, from *φωω*, *φωω*, 'light,' and *φοβος*, 'fear.' Aversion to light:—intolerance of light. Nyctalopia.

PHOTOPHO'BICUS, Lucifugus.

PHOTOPHO'BICUS, Lucifugus.

PHOTOPHO'BICUS, Lucifugus.

PHOTOP'SIA, *Vitis lucidus*, from *φωω*, 'light,' and *ωλ*, 'the eye.' (F.) *Phosphène*. A false perception of light, as of sparks, flashes of fire, &c., occasioned by certain conditions of the retina and brain, and by pressure on the eyeball. When pressure does not induce the luminous appear-

ance, the existence of amaurosis may be inferred. See Metamorphopsia.

PHOTU'RIA, from *φωω*, 'light,' and *ουρον*, urine.' A luminous condition of the urine.

PHRAGMOS, *φραγμος*, from *φρασσαω*, 'I enclose.' A row of teeth.

PHRASIS, Voice, articulated.

PHRASUM, Marrubium.

PHREN, *φρην*, 'the mind.' Also, the diaphragm and serobiculus cordis.

PHRENAUX'È, *Hypertroph'ia cer'ebri*; from *φρην*, 'the mind, the organ of mind,' and *αυξη*, 'increase.' Hypertrophy of the brain.

PHRENATROPH'IA, *Atroph'ia cer'ebri*; from *φρην*, 'the mind, the organ of mind,' a, priv., and *τροφη*, 'nourishment.' Wasting or atrophy of the brain.

PHRENES, Diaphragm.

PHRENESIA, Phrenitis.

PHRÈNÈSIE, Phrenitis.

PHRENESIS, Delirium, Phrenitis.

PHRENETIASIS, Delirium, Phrenitis.

PHRENETISMUS, Phrenitis.

PHRENIC, Diaphragmatic.

PHRE'NICA, from *φρην*, 'the mind.' Diseases affecting the intellect; characterized by error, perversion, or debility of one or more of the mental faculties, (*Phrenopath'ia*.) The first order of the class *Neurotica* of Good. Also, remedies that affect the mental faculties—*Phrenics*. Pereira.

PHRENICS, see Phrenica.

PHRENICULA HYDROCEPHALICA, Hydrocephalus internus.

PHRENISMUS, Phrenitis.

PHRENITIS, *Phren'esis*, *Phren'esia*, *Phreneti'asis*, *Phrenis'mus*, *Phreneti'nus*, *Cephalit'is*, *Cephalalg'ia inflammato'ria*, *Karabitus* (Arab.), *Sibare*, *Sphaecelis'mus cer'ebri*, *Empres'ma cephalit'is*, *Siri'asis*, *Seiri'asis*, *Siderat'io*, *Inflammatio phrenit'is*, *Encephalit'is*, *Causa phrenit'is*, *Phrens*, *Delirium*, *Brain Fever*, (F.) *Phrénésie*, *Inflammation du cerveau et du cervelet*, from *φρην*, 'the mind,' and *itis*, denoting inflammation. A disease characterized by violent pyrexia, pain in the head, redness of the face and eyes, intolerance of light and sound, watchfulness, and delirium, either furious or muttering. Its causes are the same as those of other inflammations: sometimes, however, it is induced by a *Coup de soleil*; by inebriation; violent mental emotions, &c. Some authors have given the name *Phrenitis* and *Meningitis* to inflammation of the membranes of the brain; and that of *Cephalitis*, *Encephalitis*, or *Cerebritis* to inflammation of the substance of the brain; but there are no pathognomic symptoms, which can lead us to refer the seat of the disease to either of those parts exclusively. Phrenitis is, of course, a very dangerous affection, from the importance of the organ concerned. The most active treatment must necessarily be pursued. Repeated bleeding; purging; the application of ice to the shaved head; a position in which the head is raised; and the avoiding of irritation of every kind;—form the remedial means during the violent stage. After this has yielded, counter-irritants to the nape of the neck or to other parts of the body will be useful adjuvants. When the brain and meninges were affected only symptomatically, as in inflammation of the diaphragm, the disease was formerly called *Paraphrenitis*.

*Hydrocephalus acutus* is a variety of phrenitis.

PHRENITIS CALENTURA, *Coup-de-soleil*—p. *Latars*, *Hydrophobia*—p. *Potatorum*, *Delirium tremens*—p. *Verninosa*, *Vercoquin*.

PHRENOL'OGY, Craniology.

PHRENO-MAG'NETISM, *Phreno-mesmer-*

*ism.* A term applied to the condition of a meserized person, in which, when any cerebral or phrenological organ—so called—is touched, the functions of the organ are manifested. It has been established, that no such phenomena can be elicited in children, or in those who have never seen a phrenological cast or picture.

PHRENOPARALYSIS, see Paralysis.

PHRENOPATHIA, see Phrenica.

PHRENOPATHIA ÆTHÆREA. The aggregate of encephalic phenomena induced by the inhalation of ether.

PHRENSY, Phrenitis.

PHRICASMUS, Horripilation.

PHRICE, Horripilation.

PHRICIA, Horripilation.

PHRICIASIS, Horripilation.

PHRICO'DES (FEBRIS), from φρικν, 'a shivering'; *Horri'fica*. A fever in which the chill is very intense and prolonged.

PHRYAGMA, Shuddering.

PHRYCTE, Colophonia.

PHRYG'LIUS (LAPIS.) An earthy matter, found in Phrygia and Cappadocia, and formerly employed as an astringent.—Gorræus.

PHTHARMA CALIGO, Caligo—p. Cataracta, Cataract—p. Glaucoma, Glaucoma.

PHTHEIR, Pediculus.

PHTHEIRE'MIA; from φθειρω, 'I corrupt,' and 'αἷμα, 'blood. A state in which the plastic powers of the blood are deteriorated.

PHTHEIRI'ASIS, *Phthiriasis*, from φθειρω, 'a louse'; *Morbus pediculus, M. pedicula'ris, Pru'ri'go pedicula'ris, Pedicula'tio, Malis pediculi, Peta'le, Lousiness, Lousy disease, (F.) Maladie pédiculaire, Phthiriasis.* A disease which consists in the excessive multiplication of lice on the human body, under conditions in which it does not ordinarily take place, and in spite of cleanliness. It has been asserted that the affection has often caused death. Simple and medicated baths have been recommended for its removal; lotions of the decoction or infusion of tobacco and stavesacre, mercurial frictions, &c.

PHTHEIRIUM, Delphinium staphisagria.

PHTHEIROCTONUM, Delphinium staphisagria.

PHTHINAS, Phthisis.

PHTHINO'DES, Phthisicus.

PHTHIRIASE, Phtheiriasis.

PHTHIRIASIS, Malis, Phtheiriasis.

PHTHIRIUM SCABEI, see Psora.

PHTHIRIUS, Antiparasitic—p. Inguinalis, see Pediculus.

PHTHIROCTONUS, Abortive.

PHTHIROPORON, Autumn.

PHTHISES: same etymon as Phthisis. In the classification of Fuchs, diseases attended with ulceration, hectic fever, and emaciation.

PHTHISIC, Phthisis.

PHTHISICAL, Phthisicus.

PHTHIS'ICUS, *Phthi'us, Phthis'ical, Tis'ical, (F.) Poit'inaire*; same etymon as phthisis. Belonging to phthisis. Also, one labouring under phthisis.

PHTHISIE, Phthisis pulmonalis—p. *Calculense, Calculi, pulmonary, see Lithiasis pulmonum—p. Caccinonateuse, Phthisis, cancerous—p. avec Mélanose, Anthracosis pulmonum—p. Mésenterique, Tabes mesenterica.*

PHTHISIOLOG'OGY, *Phthisiolog'ia*, from φθειρω, and λογος. A treatise on phthisis.

PHTHISIOSIS, Tubercular consumption.

PHTHISI-PNEUMONIA, Phthisis pulmonalis.

PHTHISIS, *Phthoë, Phthinas, Tabes, Te'cedon, Consumption, Decline, Phthis'ic, Tis'ic*; from

φθίω, 'I dry, I fade.' This word, taken in a general sense, means progressive emaciation of every part of the body. It is usually, however, restricted to phthisis pulmonalis.

PHTHISIS, BLACK, see Anthracosis.

PHTHISIS, BRON'CHIAL, *Phthisis bronchia'lis*. Phthisis occasioned by the pressure of enlarged tuberculous bronchial glands, which, not unfrequently, communicate with caverns in the lungs, or with the bronchia.

PHTHISIS CALCULOSA, Lithiasis pulmonum.

PHTHISIS, CAN'CEROUS, *Scirchus, Carcinoma et Fungus Pulmonum, Med'ullary or Enceph'aloïd Tumour of the Lung, (F.) Cancer du Poumon.* Cancer of the lung, which gives rise to carcinomatous phthisis, (F.) *Phthisie carcinomateuse*, of Bayle.

PHTHISIS CONSUMMATA, see Ph. pulmonalis—p. Dorsalis, Tabes Dorsalis—p. Dyspeptic, see Phthisis—p. Exulcerata, Ph. pulmonalis—p. Hepatica, Hepato-phthisis—p. Ischiadica, Ischio-phthisis.

PHTHISIS LARYNGE'A, *Chronic Laryngit'is, Laryngit'is et Tracheit'is chronica, Tuberculo'sis laryng'is et trache'æ, Laryng'o et Tracheophthisis, Laryngophthisis, Ulcera seu Helco'sis Laryng'is, (F.) Phthisie laryngée, Ulcère du larynx, Laryngite avec sécrétion de Pus*, is a species of consumption analogous to phthisis pulmonalis, produced by inflammation and ulceration of the interior of the larynx, and sometimes by caries of the cartilages. *Phthisis trachea'lis, Tracheophthis'is*, is a similar affection, seated in the trachea. Chronic inflammation of the larynx and trachea may exist, however, without tubercles or phthisis.

PHTHISIS MESERICA, Tabes mesenterica—p. Nodosa, Ph. pulmonalis—p. Notias, Tabes dorsalis.

PHTHISIS PULMONA' LIS, *Ph. pulmo'num, Ph. puluona'lis vera seu tuberculo'sa seu scrophulo'sa seu tuberculo-ulcera'ta seu parula'ta exulcera'ta seu exulcera'ta, Maras'mus phthisis, Hectica phthisis, Hæmopt'ysis phthisis, Ph. Puluona'ris seu nodosa, Passio vocico'lna, Phthisis-pneumo'nia, Tabes puluona'lis seu pulmo'num, Ulcus puluonum, Helco'sis puluona'lis, Pneumophthis'is, Pneumophthoë, Phthisis scrophulo'sa, Pneumophthoë, Pulmo'nia, Phthisis tuberculo'sa, Tuberculo'sis Pulmo'num, Gongrophth'is, Tuberculous disease of the lungs, Pulmonary consumption, Consumption, Decline, Phthisic, Tisic, (F.) Phthisie, P. puluona'ie, Crachement de pus.* Occasionally, this formidable disease occurs accidentally: but, usually, it is caused by a conformation obtained from progenitors. This, at least, predisposes to it; and but a slight exciting cause may be required to rouse the predisposition into action. It is less a disease of the torrid zone; and, in the temperate regions of the globe, its pathology is often intimately allied with that of scrofula. It consists in the formation of tubercles in the lungs, which sooner or later inflame and break down. In such a constitution, ulcerations of the lungs do not readily heal; and hectic fever—the universal attendant upon irritability and debility—is established. This persists, and gradually wears down the patient, till he ultimately expires, exhausted by the irritable fever. The chief symptoms are the following. The patient feels a sense of uneasiness in the chest, with severe fits of coughing, or a short and dry cough with dyspnoea. This may be considered the incipient stage. The cough then becomes extremely troublesome, especially in the morning; and dyspnoea is increased on the slightest exertion. The expectoration is evidently purulent, with fever in the evening, and circumscribed redness of the cheeks; wasting and colliquative sweats early in the morning. This must

be considered the confirmed stage.—*Phthisis consummata*, *Pneumophthisis*. In the third, or last stage, the hectic is constant, with small pulse, pungent heat, colliquative sweats, and diarrhoea. The weakness becomes extreme, and the patient exhausted. *Physical Signs*.—1. In the first stage, whilst there are yet scattered miliary tubercles,—the only appreciable change at the exterior of the chest, and this is not constant, is a want of freedom in the movements under one or both clavicles. Percussion will generally discover a slight diminution of sound corresponding to the summit of one lung. In the same situation, auscultation shows that the inspiratory murmur is either weaker, rougher, or confused. The sound of expiration is more distinct. The voice and cough are rather more resonant, and wheezing or mucous râles are occasionally heard in the same region. 2. When the tubercular deposition has become more abundant, the motion of the chest is more markedly diminished under one or both clavicles. The loss of sound on percussion is more distinct, the inspiration, on auscultation, is bronchial, the expiration louder and more superficial, and the resonance of the voice and cough is increased. The rest of the lung is perhaps healthy, or the respiration may be puerile. 3. When the tubercles are undergoing softening,—in addition to the preceding signs, auscultation exhibits a subcrepitant râle around the apex of the lung, decreasing from above downwards. It is most distinct during or after the cough, and at the close of a deep inspiration. As the disease proceeds, the bubbling becomes successively larger, and ultimately *gargouillement* is heard. The inspiration and expiration are cavernous or tracheal. The voice and cough indicate unusual resonance and pectoriloquy. The intercostal spaces are often depressed locally, and percussion may become gradually clearer and even tympanitic as the cavern increases.

It is only in the incipient state of this formidable disease, that advantage can be expected from any plan of treatment; and of all means that can be devised, that of removing to a climate in which air and exercise can be daily enjoyed during the autumnal, winter, and spring months is the best. See Climate. If this be impracticable, the patient must be kept in a regulated temperature, taking care that the chamber be duly ventilated; and gestation in the open air be used, whenever the atmosphere, although cold, is dry. The other indications will be: 1. To moderate inflammatory action; 2. To support the strength; and, 3. To palliate urgent symptoms. The whole treatment indeed is palliative. Counter-irritants relieve pain: demulcents and mild opiates alleviate the cough: the mineral acids, united with opium, relieve the colliquative sweats; and chalk and opium the diarrhoea.

Dr. Wilson Philip has pointed out a particular species of phthisis, which is characterized, in the early stage, by a deranged state of the digestive organs: flatulent, irregular bowels; furred tongue; impaired appetite; unnatural fæces; and the epigastric region more or less full and tender on pressure. The affection of the lungs is here secondary. He calls it *Dyspeptic phthisis*.

**PHTHISIS PULMONALIS PURULENTA EXULCERATA**, Phthisis pulmonalis — p. Pulmonalis scrofulosa, Phthisis pulmonalis — p. Pulmonalis tuberculosa, Phthisis pulmonalis — p. Pulmonalis tuberculosa-ulcerata, Phthisis pulmonalis — p. Pulmonalis vera, Phthisis pulmonalis — p. Pupillæ. Synechisis — p. Pupillaris, Myosis — p. Scrophulosa, Phthisis pulmonalis — p. Sicca, Tabes dorsalis — p. Tuberculosa, Phthisis pulmonalis — p. Uterina, Metrophthisis — p. Vesicalis, Cystophthisis.

**PHTHISURIA**, Diabetes.

**PHTHISURIE**, Diabetes — p. *Sucrée*, Diabetes mellitus.

**PHTHIOË**, Phthisis.

**PHTHIOÏS**, Pastil, Trochiscus.

**PHTHIOÏSCOS**, Pastil, Trochiscus.

**PHTHONGODYSPHORIA**, Hyperæcacia.

**PHTHORA**, Abortion, Corruption, Plague.

**PHTHORIOUS**, Abortive.

**PHTHOROSTONUS**, Abortive.

**PHUCAGROSTIS MINOR**, Pila marina.

**PHUSCA**, Oxycrate.

**PHYGANTHROPIA**, Misanthropia.

**PHYGETH'LOX**, *Pavus*, *Phyella*, from *φωσ*, 'I grow.' Inflammation of the superficial lymphatic glands, not ending in suppuration.

**PHYLACTERION**, Amuletum.

**PHYLACTERIUM**, from *φυλασσω*, 'I preserve.' A *Phylactery*. An amulet:—a prophylactic.

**PHYLAXIS**, Conservation.

**PHYLLAN'THUS URINA'RIA**, *Biukohumba*. A plant employed in Ceylon, in decoction, as a diuretic.

**PHYLLITIS**, *Asplenium scolopendrium* — p. Muraria, *Asplenium ruta muraria* — p. *Rotundifolia*, *Asplenium trichomanes*.

**PHYMA**, *Phima*, from *φωμαι*, 'I spring up.' With the ancients, this word was used with great latitude: sometimes, in the sense of phlegmon, for tumours larger than a boil, and perfectly suppurative. In the nosology of Sauvages, *Phymata* is an order of diseases, to which he refers erysipelas, œdema, phlegmon, emphysema, scirrhus, &c. In that of Dr. Good it is a genus, including hordeolum, furunculus, sycosis, and anthrax.

**PHYMA ANTHRAX**, Anthrax — p. Anthrax terminthos, Terminthos — p. Sycosis, Sycosis.

**PHYMATO'SES**, from *φυμα*, 'a hard tumour. Tuberculous diseases. — Fuchs.

**PHYMATOSIS**, Excrescence — p. Cerebri, Encephalophymata — p. Elephantiasis, Elephantiasis — p. Lupus, Lupus — p. Verrucosa, Verruca.

**PHYMOSIS**, Phimosus.

**PHYPELLA**, Phygethlon.

**PHYSA**, Crepitation.

**PHYSAGOGA**, Carminatives.

**PHYSALIS**, *P. Alkekengi* *sen halicac'abum*, *Sol'annum vesic'arium*, *Albachen'gê*, *Alkekengi*, *Halicac'abum*, *Winter Cherry*, (F.) *Alkekenge*, *Coqueret*. Family, Solanææ. *Sec. Syst.* Pentandria Monogynia. The berries are recommended as a diuretic, from 6 to 12 for a dose, in dropsical and calculous cases.

**PHYSALIS ALKEKengi**, Physalis — p. *Halicac'abum*, Physalis — p. *Stramonium*, *Anisodus luridus*.

**PHYSCIA ISLANDICA**, Lichen islandicus — p. Nivalis, Lichen caninus.

**PHYSO'NIA**, from *φυσκη*, 'a bladder.' *Ventros'itas*, *Eephy'ma physco'nia*, *Hyposar'ea*, *Emp'hrae'tica*, *Visco'nia*, *Hyperarchid'ios*, *Potbelly*, *Pendulous abdo'men*, *Scagbilly*. A generic term, under which Sauvages has comprised every large tumour developed in the abdomen, that is neither fluctuating nor sonorous. Linnæus calls it *Hyposar'ea*.

**PHYSO'NIA ADIPO'SA**, *Obes'itas sen Polysar'cia vis'cerum*. Accumulation of fat in the intestines.

**PHYSCONIA BILIOSA**, *Turgescencia vesiculæ fellæ*.

**PHYSCONIA EMPHYSEMA'TICA**. Accumulation of air in the areolar tissue, or between the coats of particular viscera.

**PHYSCONIA LIENS**, Splenoncus — p. *Mesenterica*, *Tabes mesenterica* — p. *Splenica*, *Ague cake*.

**PHYSCONIA STRUMO'SA**, *Scrofula abdomin'alis*

*inter'na*. Tumid abdomen from serophulous enlargement of the glands.

**PHYSCONIE MÉSENTÉRIQUE**, *Tabes mesenterica*.

**PHYSEMA**, *Tympanites*, *Physemis*.

**PHYSE'SIS**, *Physe'ma*, from  $\phi\upsilon\sigma\alpha\omega$ , 'I inflate.' An emphysematous tumour. *Tympanites*.

**PHYSETER MACROCEPHALUS**, see *Ceta-cæum*.

**PHYSIATRICE**, *Vis medicatrix naturæ*.

**PHYSIAUTOCRATIA**, *Vis medicatrix naturæ*.

**PHYSIC**, Medicament, *Medicina* — p. Indian, *Euphorbia corollata*, *Gillenia trifoliata* — p. Root, *Leptandria purpurea*.

**PHYSICAL**, Medical.

**PHYSIC'IAN**, *Med'icus*, *Iatros*, *Aces'tor*, *Aces'ter*, *Althæus*; from  $\phi\upsilon\sigma\alpha\iota\varsigma$ , 'nature.' (F.) *Médecin*. One who has received his degree from an incorporated Institution, as Doctor of Medicine. The French formerly used the word *physicien* in the same sense. It is now appropriated to the natural philosopher.

**PHYSICIAN, FAMILY**. One regarded as the regular attendant on a family.

**PHYSICIAN, LEARNED**, *Iatrosophista* — p. Practical, *Iatrotechna* — p. Priest, see *Asclepiadæ*.

**PHYSICIEN**, *Physician*.

**PHYSICS, MED'ICAL**, *Iatrophys'ics*. *Phys'ics* directly applied to medicine, — either to the explanation of the vital phenomena, the preservation of individuals, or the treatment of disease.

**PHYSIOAUTOCRATIA**, *Vis medicatrix naturæ*.

**PHYSIOG'NOMY**, *Physiognom'ia*, *Physiognom'ica*, *Physiognom'ice*, *Physionom'ia*, *Physiognomon'ia*, *Physiognomon'ônê*, *Physiognomos'yuiê*, *Physiognomosia*, *Anthroposcop'ia*, *Prosopomanti'a*, *Prosopolog'ia*, *Semiot'icê fa'ciei*, *Physiognomon'ica*, *Physiognomy*, *Metoposcopy*, *Prosoposis*, from  $\phi\upsilon\sigma\alpha\iota\varsigma$ , 'nature,' and  $\gamma\omega\mu\eta$ , 'knowledge.' The art of knowing the dispositions of men from their external appearance; especially from the features. Every inference of this kind must necessarily be extremely fallacious, and cannot be reduced to rule, as was attempted by Lavater and others. In infantile diseases, numerous shades of expression are evident, which experience teaches how to appreciate; and which afford useful guides in understanding the pathology of that period of existence.

**PHYSIOLOGIA PATHOGENETICA**, see *Pathogenetic*.

**PHYSIOLOGICAL ANATOMY**, see *Anatomy* — p. Doctrine, *Broussaism*.

**PHYSIOLOGICE**, *Physiology*.

**PHYSIOLOGY**, *Physiolog'ia*, *Biol'ogy*, *Bion'omy*, *Biol'ics*, *Biophænomolog'ia*, *Physiolog'icê*, *Æconom'ia animalis*, *Anatom'ia viva*, *Anat'omê animal'a*, *Anthropolog'ia*, *Microcosmograph'ia*, *Microscop'ica scient'ia*, *Cognit'io physiolog'ica*, *Part' naturalis medic'ina*, *Philosoph'ia corporis vivi*; from  $\phi\upsilon\sigma\alpha\iota\varsigma$ , 'nature,' and  $\lambda\omicron\gamma\omicron\varsigma$ , 'a description.' Formerly, *Physiology* meant the same as *Physics*, in its extensive signification, now does. At the present day, it includes the science which treats of the functions of animals or vegetables; an acquaintance with the phenomena the aggregate of which constitute life. It is the *science of life*. It is divided into *animal* — *Zoôphysiologia*, and *vegetable* — *Phytophysiolog'ia*, according as it considers the life of animals or of vegetables singly. *Comparative physiology* comprises both. *Physiology* is, also, *general* or *special*, according as it treats of life in the abstract or in some particular species. To the latter belongs the *Physiology of Man*, — called also, *Hygienic Phy-*

*siology* to distinguish it from *Pathological Physiology* or *Pathology*.

**PHYSIOLOGY, PATHOGENETIC**, see *Pathogenetic*.

**PHYSIONOMIA**, *Physiognomy*.

**PHYSIONOMIE ÉGARÉE**, see *Wild*.

**PHYSIS**, *Natura*, *Sex*.

**PHYSOCE'LE**, *Pneumatocele*, *Hernia ventosa*; *Oschocce'le flatulenta*, *Emphyse'ma Scroti*, from  $\phi\upsilon\sigma\alpha\omega$ , 'I insufflate,' and  $\kappa\eta\lambda\eta$ , 'a tumour.' An emphysematous tumour of the scrotum; probably a case of intestinal hernia, containing much flatus.

**PHYSOCEPH'ALUS**, from  $\phi\upsilon\sigma\alpha\omega$ , 'I inflate,' and  $\kappa\epsilon\phi\alpha\lambda\eta$ , 'the head.' *Physoceph'alus*. Emphysematous tumefaction of the head.

**PHYSOCÆLIA**, *Tympanites*.

**PHYSO'DES**; from  $\phi\upsilon\sigma\alpha\omega$ , 'I inflate,' and  $\epsilon\iota\delta\omicron\varsigma$ , 'resemblance.' Full of air; apparently full of air — applied to tumours, &c.

**PHYSOME'TRA**, *Emphyse'ma Uteri*, *Hystero-physê*, *Hystero-soph'ia*, *Hystere-mphyse'ma*, *Hystere-mphyse'ma*, *Metre-mphyse'ma*, *Ædæo-soph'ia uteri'na*, *Emphyse'ma uteri'num*, *Inflatio Uteri*, *Tym'pany of the Womb*, *Uterine tympanites*, from  $\phi\upsilon\sigma\alpha\omega$ , 'I inflate,' and  $\mu\eta\tau\epsilon\alpha$ , 'the womb.' A light, tense, circumscribed protuberance in the hypogastrium, obscurely sonorous, with wind occasionally discharged through the os uteri.

**PHYSON**, *Flatulence*.

**PHYSONCUS**, *Emphysema*.

**PHYSOPSOPH'IA**; from  $\phi\upsilon\sigma\alpha\omega$ , 'I inflate,' and  $\psi\omicron\phi\omicron\varsigma$ , 'a noise.' A discharge of air with noise.

**PHYSOSPASMUS**, *Colica flatulenta*.

**PHYSOTHORAX**, *Pneumothorax*.

**PHYTIVOROUS**, *Phytophagous*.

**PHYTOALOPECIA**, *Porrigo decalvans*.

**PHYTO-CHEMISTRY**, see *Chemistry*.

**PHYTOLAC'CA DECAN'DRA**, *P. vulgaris*, *Poke Weed*, *American Night Shade*, *Cancer root*, *Poke*, *Skoke*, *Jucato Caleloe*, (?) *Jalup*, *Pigeon Berries*, *Jalop cancer root*, *Sola'num racemosum America'num*, *S. magnum Virginia'num rubrum*, *Blitum America'num*, *Garget*, (F.) *Raisin d'Amérique*, *Phytolaque à dix étamines*, *Morrelle en grappes*, *Mechoacan du Canada*. Family, *Chenopodææ*. *Scr. Syst.* *Decandria Decagynia*. The leaves, berries, and roots are employed. The young stems, when boiled, are sometimes eaten at table; but when old, they must be cautiously used, as the plant is emetic and cathartic. It is most celebrated as a remedy in chronic rheumatism; and is given in the form of tincture of the ripe berries. It is, also, used in cutaneous eruptions; tinea capitis, itch, cancerous ulcers, &c.

The root is gathered and dried in the fall.

**PHYTOLAQUE À DIX ÉTAMINES**, *Phytolacca decandra*.

**PHYTOLOGIA MEDICA**, *Botany*, medical.

**PHYTOPI'AGOUS**, *Phytoph'agus*; *Phyttivorous*, *Phytiv'orus*; from  $\phi\upsilon\tau\omicron\upsilon\varsigma$ , 'a plant,' and  $\phi\alpha\gamma\omega$ , 'I eat.' Feeding or subsisting on vegetables.

**PHYTOPHYSIOLOGIA**, see *Physiology*.

**PHYTOSPERM'A**, (F.) *Phytosperme*; from  $\phi\upsilon\tau\omicron\upsilon\varsigma$ , 'a vegetable,' and  $\sigma\pi\epsilon\tau\epsilon\alpha$ , 'sperm.' Particles similar to the spermatozooids of animals, observed in vegetables, and presumed to possess a similar agency in reproduction.

**PHYTOTOMY**, see *Anatomy*, (vegetable.)

**PHYTOZÖON**, *Zoophyte*.

**PIA MATER**, *Pia seu mollis seu ten'nis Mater*, *Pia meninx*, *Meninx inter'ior*, *Meninx choroid'es*, *Inner lam'ina of the Meninge*. (Ch.) *Membra'na vasculo'sa Cer'ebri*, *Membra'na Cer'ebri ten'nis seu mollis seu pru'pria*, (F.) *Pia mère*, *Méningette*. The pia mater is a very deli-

cate membrane, which covers the brain immediately, penetrates into its anfractuosités, and envelops, also, the cerebellum and the spinal prolongation, &c. Bichat does not regard it as a membrane, properly so called, but as a network of blood-vessels, united by a lax areolar tissue. The *Pia Mater exterior* is the portion of membrane which covers the exterior of the encephalon, and faces the arachnoid externally. The *Pia Mater interior* is that which lines the cerebral fosse, into which it penetrates by a cleft situate between the posterior part of the corpus callosum and the fornix; and by two other fissures, situate between the corpora fimbriata and thalami nervorum opticorum. The pia mater contains a great number of granulations similar to the *Glandulæ Paechioni*.

PIA MATER TESTIS, Tunica vasculosa—p. Meninx, P. Mater.

PIAN, Fraumbesia.

PIANS, MOTHER OF, Mama-pian.

PIAR, Fat.

PIARHÉ/MIA; from *πιαρ*, 'fat,' and *'αιμα*, 'blood.' Fat in the blood.—Simon.

PICA, Malacia—p. Africanorum, Chthonophagia.

PICAC, Euphorbia corollata.

PICACISM'US, *Pica'tio*, from *pix*, 'pitch.' Depilation by means of a pitch plaster. Also, Malacia.

PICATIO, Malacia, Picaeismus.

PICEA, Pinus abies.

PICERION, Butter.

PICHURIM BEANS. The seed of a tree, supposed to be *Persea pichurim*, *Ocotea pichurim*, which grows in Brazil, Guiana, Venezuela, and other parts of South America. They are of an elliptical shape; flat on one side, convex on the other; of an aromatic odour between that of nutmegs and sassafras, and of a spicy, pungent taste. The medical properties are the same as those of other aromatics. For the bark, see *Pechurin cortex*.

PICKERELWEED, SHOVEL, *Unisema deltofolia*.

PICOTE, Variola.

PICOTEMENT, Pricking.

PICRENA EXCELSA, Quassia.

PICRIA, Bitterness.

PICRIUM SPICATUM, *Contoubea alba*.

PICROCHOLOS, Bilious.

PICROMEL, *Bilini*; from *πιρος*, 'bitter,' and *μελι*, 'honey.' A name given by Thénard to a colourless, soft substance, of an acrid, bitter, saccharine taste, nauseous smell, and very soluble in water.

It forms part of the bile, and is classed amongst the animal immediate principles.

PICROPE'G.E. from *πιρος*, 'bitter,' and *πηγη*, 'a spring.' Mineral waters; bitter from the presence of chloride of magnesium.

PICROS, Amarus.

PICROTOX'INE, *Picrotox'ina*, *Picrotox'in*, from *πιρος*, 'bitter,' and *ροξιον*, 'poison.' A vegetable alkali, discovered by M. Boullay in the *Menispermum Cocculus*. It crystallizes in quadrangular, white, brilliant, semitransparent prisms; which are excessively bitter, soluble in three parts of alcohol, and in fifteen of boiling water.

The *Cocculus Indicus* owes its poisonous properties to this principle.

PIE MÈRE, *Pia mater*.

PIE-MÉRITÉ, *Inflamma'tio piæ matris*. A miserably compounded term, employed by M. Grisolle, to express inflammation of the pia mater:—from (F.) *pie mère*, 'the pia mater,' and *ite, itis*; a termination denoting inflammation.

PIÈCE, Hepatitis.

PIÈCES D'ANATOMIE ARTIFICIELLES, see Artificial.

PIED, Pes—p. *d'Alexandre*, *Anthemis pyrethrum*—p. *d'Alouette des champs*, *Delphinium consolida*—p. *Bot*, see *Kyllosis*—p. *de Chat*, *Antennaria dioica*—p. *de Cheval marin*, *Cornu ammonis*—p. *de Griffon*, *Gryphius pes*, *Helleborus foetidus*—p. *de Lion*, *Alechmilla*—p. *de Lit*, *Originum*—p. *d'Ours*, *Acanthus mollis*—p. *Plot*, see *Kyllosis*—p. *de Veau*, *Arum maculatum*—p. *de Veau Triphyll*, *Arum triphyllum*.

PIEIRON, Fat.

PIERRES CRAYEUSES, Calculi, arthritic—p. *au Fiel*, *Calculi, biliary*—p. *Stercorales*, *Calculus of the Stomach and Intestines*—p. *Urinaires*, *Calculi, urinary*.

PIESTER, Press.

PIESTERION, Press.

PIESTRON, from *πιεζω*, 'I press.' An instrument recommended by Hippocrates for breaking the bones of the foetal head when too large to be extracted otherwise.

PIGAMON JAUNÂTRE, *Thalietron*.

PIGEON BERRIES, *Phytolacca decandra*—p. *Breasted*, see *Lordosis*—p. *Tree*, *Aralia spinosa*.

PIGMENT CELLS, see *Cell, pigment*.

PIGMEN'TAL, from *pigmentum*, 'paint.' Having relation to pigment or colouring matter.

PIGMENTAL APPARATUS, (F.) *Appareil pigmental*. The apparatus concerned in the coloration of the skin of the coloured varieties of man.—*Flourens*.

PIGMENTARIUS, Apothecary, Unguentarius.

PIGMENTUM, Paint—p. *Indicum*, *Indigo*—p. *Nigrum*, see *Choroid*—p. *Uracu*, *Terra Orleana*.

PIGMY, Pygmy.

PIGNERÔLE, *Centaurea calcitrapa*.

PIGNON DE BARBARIE, *Jatropha euras*—p. *d'Inde*, *Jatropha curcas*.

PIGNUT, *Earthnut*, *Groundnut*. The bulbous root of *Bu'nium Bulboscatannum*. Called *pignuts*, from the fondness of the pig for them. They have been considered to possess a styptic quality; and are deemed serviceable in atonic affections of the kidney.—*Hooper*.

PIGUT, *Bunium bulbocastanum*.

PIG'S FLARE, *Adeps suillus*.

PILA, *Sphæra, Ball*. A gymnastic exercise, much used by the ancients as well as moderns.—*Galen*. Also, a mortar and a pestle—*Ac'onè*.

PILA, Mortar, Pillar—p. *Damarum*, *Ægagropila*—p. *Rupicaprarum*, *Ægagropila*.

PILA MARI'NA, *Sphæra Marina*, *Sphæra Thalassia*, *Holeyonium rotundum*, (F.) *Pelote de Mer*. Certain light, round, depressed, or oblong masses—inodorous and insipid—in which rushes, hairs, and the debris of shells are met with. These are found on the sea-shores, and have been regarded by Spielmann as consisting chiefly of the roots of the *Zostera Mari'na* sen *Mari'ima*. *Alga Mari'na*, *Phucagrostis minor*. Iodine is detected in the ashes, which accounts for their service in goitre. They have, also, been given as a vermifuge.

PILARE MALUM, Trichosis.

PILATIO, from *pilus*, 'a hair.' Fracture of the cranium in which the fissure is narrow, and has the appearance of a hair—a *capillary fissure*, (F.) *Fente capillaire*.

## PILE, Hair.

PILEA PUMILA, *Richweed, Clearweed, Coolweed*; indigenous; *Order, Urticaceæ*; flowering from July to September; has been used as a wash in poisoning by *Rhus*. It has a strong, grateful smell.

PILEOLUM, *Calotte*.PILEOLUS, *Caul, Pileus*.

PILEOUS, *Pilo'sus, Pilose, Pilous, (F.) Pilous*. That which relates to the hair. Hairy.

PILEOUS SYSTEM of Bichat is that formed by the hair. It comprises the different species of hair of the human body.

PILES, BLIND, *Cæcæ hæmorrhoides*, see *Hæmorrhoids*.

PILEUS, 'a hat, cap, or bonnet for the head.' *Pile'olus*. A shield. A nipple-like instrument, formed of various materials, and used by females for protecting the nipple during the child's sucking, when the part is painful. Also, a caul.

PILEUS, *Cucupha*—p. *Hippocraticus, Bonnet d'Hippocrate*.

PILEUX, *Pileous*.

PILIFORM, *Ranunculus acris*, and *R. ficaria*.

PIL CAPITIS, see *Capillus*—p. *Cutis, Lagno*—p. *Palpebrarum, Cilia*—p. *Pudendorum, Pubes*.

PILIER, *Pillar*.

PILIMICTIO, see *Trichiasis*.

PILL, *Pilula*—p. *Abernethy's*, see *Pilulæ hydrargyri*—p. *Aloes and Camboge, Pilulæ aloes et cambogię*—p. *Aloes and cinchona, Pilulæ aloes et kinæ kinæ*—p. *Aloes and colocynth, Pilulæ aloes et colocynthidis*—p. *Aloes and fetid gums, Pilulæ de aloes et foetidis*—p. *Aloes and ginger, Pilulæ aloes et zingiberis*—p. *Aloes and myrrh, Pilulæ aloes et myrrhæ*—p. *Aloetic, Pilulæ aloeticę*—p. *Aloetic and assafœtida, Pilulæ aloes et assafœtidę*—p. *Aloetic, compound, Pilulæ aloes compositę*—p. *Ammoniuret of copper, Pilulæ ammoniuret cupri*—p. *Analeptic, James's, see Analœptica*—p. *Anderson's, see Pilulæ aloes et jalapę*—p. *Anodyne, Pilulæ opiatę*—p. *Antibilious, Barclay's, Pilulæ antibiliosę*—p. *Antibilious, Dixon's, Pilulæ antibiliosę*—p. *Asiatic, Pilulæ Asiaticę*—p. *Assafœtida, Pilulæ Assafœtidę*—p. *Bacher's, Pilulæ ex helleboro et myrrhâ*—p. *Barbarossa's, Barbarossę pilulę*—p. *Barthez, see Pilulæ aloes et myrrhæ*.

PILL, BLAIR'S. An empirical preparation of colchicum, much used in England in cases of gout.

PILL, BLAUD'S. These pills, proposed by M. Blaud as antichlorotic, are formed as follows:—Take of *gum tragacanth*, in powder, six grains; *water*, one drachm. Macerate in a glass or porcelain mortar, until a thick mucilage is formed, and if it be desired to prevent the formation of peroxide of iron, and to make the pill similar to those of Vallet, substitute a drachm of powdered sugar for the mucilage. Add afterwards of *sulphate of iron*, in powder, half an ounce. Beat well until the mixture is homogeneous, and add *subcarbonate of potass*, half an ounce. Beat until the mass becomes of a deep-green colour, and of a soft consistence. Divide into 43 (?) pills. Dose, one a day; gradually increasing to two, and afterwards to three.

PILL, BLUE, *Pilulæ hydrargyri*—p. *Brandreth's, Pilulæ aloes et cambogię*—p. *Calomel, Pilulæ hydrargyri chloridi mitis*—p. *Camboge, Pilulæ cambogię compos.*—p. *Camboge, compound, Pilulæ cambogię compositę*—p. *Carbonate of iron, Pilulæ ferri carbonatis*—p. *Cathartic, compound, Pilulæ catharticę compositę*—p. *Common, Pilulæ aloes et myrrhæ*—p. *Dinner, see Pilulæ aloes et kinæ kinę*.

PILL, DINNER, OF MR. MAYO. This is composed of *P. Rhej*, gr. iv; *Sodę Carb.* gr. j.

PILL, EVERLAST'ING. A pill once in vogue, and said to be composed of metallic antimony. It was believed to have the property of purging as often as it was swallowed. A lady having swallowed one of these pills, became seriously alarmed at its not passing. "Madam," said her physician, "fear not; it has already passed through a hundred patients without any difficulty."—Paris.

PILL, FEMALE, *Pilulæ de aloes et foetidis*—p. *Ferruginous, of Vallet, see Ferri protocarbonas*—p. *Fothergill's, see Pilulæ aloes et colocynthidis*—p. *Frank's see Pilulæ aloes et kinæ kinę*—p. *Fuller's, see Pilulæ de aloes et foetidis*—p. *Galbanum, compound, Pilulæ galbani compositę*—p. *Griffitt's, see Pilulæ rhej compositę*—p. *Gum, Pilulæ galbani compositę*—p. *of Hellebore and myrrh, Pilulæ ex helleboro et myrrhâ*—p. *Hooper's, see Pilulæ aloes et myrrhæ*—p. *of Iodide of Iron, Pilulæ ferri iodidi*—p. *James's Analœptic, see Analœptica*—p. *Keysler's, see Hydrargyrum acetatus*—p. *Lady Crespigny's, Pilulæ aloes et kinæ kinę*—p. *Lady Hesketh's, see Pilulæ aloes et kinæ kinę*—p. *Lady Webster's, Pilulæ aloes et kinæ kinę*.

PILL, LARTIGUES', *Pil'ula Col'chici et Digitalis*. (*Ext. Coloc. c. ʒss; Ext. Sem. Colchic. alcoholic., Extract. Digital. alcohol. ʒā gr. iss; f. massa in pilul. x dividend.*) Dose, two, three, or more, in the 24 hours, in gout.

PILL MACHINE, *Pilulier*—p. *Matthews's, see Pilulæ ex helleboro et myrrhâ*—p. *Mercurial, Pilulæ hydrargyri*—p. *of mild chloride of Mercury, Pilulæ hydrargyri chloridi mitis*—p. *Moffat's, Pilulæ aloes et cambogię*—p. *Morrison's, Pilulæ aloes et cambogię, see Pilulæ cambogię compositę*—p. *Moseley's, Pilulæ rhej compositę*—p. *Night, common, Pilulæ opiatę*—p. *Opiate, Pilulæ opiatę*—p. *Peter's, see Pilulæ aloes et cambogię*—p. *Plummer's, Pilulæ hydrargyri submuriatis compositę*—p. *of Sulphate of Quinia, Pilulæ quinię sulphatis*—p. *Red, Pilulæ hydrargyri submuriatis compositę*—p. *Red, Boerhaave's, see Hydrargyri sulphuretum rubrum*—p. *of Rhubarb, Pilulæ rhej*—p. *of Rhubarb, compound, Pilulæ rhei compositę*—p. *Rufus's, Pilulæ aloes et myrrhæ*—p. *Rush's, see Pilulæ aloes et cambogię*—p. *Scotch, Pilulæ de aloes et foetidis*—p. *of Soap and opium, Pilulæ saponis cum opio*—p. *Speediman's, see Pilulæ aloes et myrrhæ*—p. *Squill, compound, Pilulæ scillę compositę*—p. *Starkey's, see Pilulæ ex helleboro et myrrhâ*—p. *Storax, Pilulæ e styrace*—p. *of Strychnia, Pilulæ strychnię*—p. *of Submuriate of mercury, compound, Pilulæ hydrargyri submuriatis compositę*—p. *Tanjore, Pilulæ Asiaticę*—p. *Turpentine, Pilulæ de terebinthinâ*—p. *Vallet's, see Ferri protocarbonas, and Pilulæ ferri carbonatis*—p. *Webster's, Pilulæ aloes et kinæ kinę*—p. *Whytt's, see Pilulæ de aloes et foetidis*.

PILLAR, *Pi'la, Colum'na, Colu'nel'la, (F.) Pilier*. A name given to several parts; as the *pillars of the velum palati, diaphragm, &c.*

PILON, *Pilum*.

PILOSELLA, *Hieracium pilosella*—p. *Alpina, Hieracium pilosella*.

PILOSUS, *Pileous*.PILOUS, *Pileous*.

PIL'ULA, plural *Pilul'ę*. Diminutive of *pila*, 'a ball.' *Sphærid'ion, Catap'ot'ion, Catop'atum, Sphæ'rion, Gongyl'ion, Gon'gylis, Gongylid'ium*. A pill. (*F.*) *Pilule*. A simple or compound medicine, weighing from one to five grains, of a firm consistence and spherical form; intended to be swallowed at once, without chewing. The *Pill* differs from the *Bolus*, the latter being softer and larger.

Medicines are often given in the form of pill,

on account of their disagreeable taste and odour.

*Pilula*, also, means a *Pilular mass*.

PILULÆ EX ALOE, *P. aloes compositæ*—*p. de Aloe et cambogiâ*, *P. aloes et cambogiæ*.

PILULÆ ALOES, *P. Aloeticæ*, *Pilula ex Aloë et Saponi*, *Aloetic Pill*, (*P.*) *Pilules d'aloës ou aloëtiques*. (*Aloës in pulv.*; *saponis*, sing.  $\mathfrak{J}$ j; *styr.* q. s. to form 240 pills.—*Ph. U. S.*) Dose, gr. x to xx, in habitual costiveness.

PILULÆ ALOES ET ASSAFÆTIDÆ, *Aloetic and Assafœtida Pills*. (*Aloës, assafœtida, saponis*, sing.  $\mathfrak{J}$ ss; *aq. q. s.* to form 180 pills.—*Ph. U. S.*) Purgative and stomachic. Dose, gr. x.

PILULÆ ALOES ET CAMBOGIE, *P. de Aloë et Cambogiæ*, *P. Hydrargogæ Bonivii*, *Pill of Aloes and Camboja*. (*Aloës, cambog.*, gum. ammoniat.,  $\mathfrak{a}\mathfrak{a}$  p.  $\mathfrak{a}$ . Make into a powder. Dissolve in vinegar; pass through a cloth; express the residuum strongly; and afterwards evaporate, in a water-bath, to a pillular consistence.—*Ph. P.*) Purgative; used in dropsy. Dose, gr. xij to xxx.

*Peter's Pills*—a nostrum—are formed of *aloës, jalap, scammony*, and *camboja*, of each equal parts.

The basis of *Morrison's Pills*, often called *Hygiëne Pills*, of *Brandreth's Pills*, and *Moffat's Pills*, is said to be *aloës*, with *camboja*, *scammony*, &c.

*Rush's Pills* were formed of *calomel, aloës*, and *camboja*, with *oil of mint*.

PILULÆ ALOES ET COLOCYNTHIDIS, *P. ex Colocynthidë cum aloë*, *P. Aloës cum Colocynthidë*, *P. coccinæ*, *P. cochii*, *P. colocynthidis compositæ*, *P. coccinæ minores*, *Pill of Aloës and Colocynth*. (*Pulp. coloc.*  $\mathfrak{J}$ ss; *aloës hepat.*, *scammon.*,  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{J}$ j; *sapon.*  $\mathfrak{J}$ j; *ol. caryoph.*  $\mathfrak{J}$ j; *styrup.* q. s.—*Ph. D.*) Cathartic. Dose, gr. v to x or more.

*Fothergill's Pills* consist of *aloës, scammony*, *colocynth*, and *oxide of antimony*.

PILULÆ ALOES COMPOSITÆ, *Pilulæ ex Aloë, Compound Aloetic Pills*. (*Aloës spic. extract. cont.*  $\mathfrak{J}$ j; *ext. gentianæ*,  $\mathfrak{J}$ ss; *olei carni*, gtt. xl; *styr.* q. s.—*Ph. L.*) These are sometimes, also, called *Family pills*, *Antibilious pills*, &c.

PILULÆ DE ALOE ET FOETIDIS, *P. Benedicte Fullerii*, *Pill of aloës and fetid gums*, *Pilulæ ephrasticæ*, *Female pills*, *Pilula aloës martiales*, (*F.*) *Pilules bénites de Fuller*. (*Aloës socotr.*, *senæ,* *assafœtida, galbani*,  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{J}$ j; *myrrh.*  $\mathfrak{J}$ iv; *croci, macis*,  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{J}$ j; *ferri sulphat.*  $\mathfrak{J}$ ss. Reduce to powder separately, and add *ol. succin.* gtt. viij; *styr. artemisiæ*, q. s.—*Ph. P.*) Purgative, and given in hysteria. Dose, gr. xv to xx.

*Whytt's Pills*, given in similar cases, consisted of *chloride of iron, aloës*, *extract of horehound*, and *assafœtida*.

PILULÆ ALOES ET JALAPÆ, commonly called *Anderson's pills*, *Anderson's Scots' pills*, *Scotch pills*. (*Aloës Barbud.*  $\mathfrak{h}$ j; *rad. helleb. nigr.*, *rad. jalapæ, potassæ subcarb.*  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{J}$ j; *ol. anisi*,  $\mathfrak{J}$ iv; *styrup. simpl.* q. s.—*Gray.*) Dose, gr. x to xxx.

A committee of the Philadelphia College of Pharmacy recommend the following: *Aloës Barbudens.*  $\mathfrak{J}$ xxiv; *saponis*,  $\mathfrak{J}$ iv; *colocynthid.*  $\mathfrak{J}$ j; *cambogiæ*,  $\mathfrak{J}$ j; *ol. anis.* f $\mathfrak{J}$ ss.

PILULÆ ALOES ET KINÆ KINÆ, *P. stomachicæ* *P. ante cibum*, *Pill of aloës and cinchona*, (*F.*) *Pilules gourmandes*. (*Aloës socotr.*  $\mathfrak{J}$ vj; *ext. cinchon.*  $\mathfrak{J}$ ij; *cinnam.*  $\mathfrak{J}$ j; *styrup. absinth.* q. s.—*Ph. P.*) Stomachic and laxative. Dose, gr. x to xx.

*Lady Crepigny's pills*, *Lady Webster's pills*, *Lady Hesketh's pills*, and the *Pilulæ stomachicæ Meanes* (*Ph. L.* 1635), resemble these.

*Frank's pills*, much employed, also, as '*dinner pills*,' or,—to use the language of the eccentric Kitchener—as '*peptic persuaders*,' are said to

be much used, under the name *Graines de santé*, in various parts of Europe. They consist of *aloës, jalap*, and *rhubarb*, with *styrup of wormwood* as an excipient.

PILULÆ ALOES MARTIALES, *P. de aloë et foetidis*.

PILULÆ ALOES ET MYRRHÆ, *P. aloës cum myrrhâ*, *P. de aloë et myrrhâ*, *Rufus's* or *Ruffus's pills*, *Common pills*, *Pilulæ Rufi* seu *Ruffi*. *P. communes*, *Pills of aloës and myrrh.* (*Aloës*,  $\mathfrak{J}$ ij; *croci*, in pulv.  $\mathfrak{J}$ ss; *myrrh.*  $\mathfrak{J}$ j; *styr.* q. s. to form 480 pills.—*Ph. U. S.*) Cathartic and emmenagogue. Dose, gr. x to xx.

*Hooper's pills*—possessed of similar properties—according to one of Gray's formulæ, are made as follows; *Ferri sulph.*, *aq. q. s.*  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{J}$ vij. Dissolve. Add *aloës Barbud.*  $\mathfrak{h}$ j and  $\mathfrak{J}$ vij; *cauellæ albæ*,  $\mathfrak{J}$ vj; *gum myrrh.*  $\mathfrak{J}$ ij; *oppanacis*,  $\mathfrak{J}$ iv. The committee of the Philadelphia College of Pharmacy recommend the following form: *Aloës Barbudensis*,  $\mathfrak{J}$ vij; *ferri sulphatis exsicc.*  $\mathfrak{J}$ ij,  $\mathfrak{J}$ iss, vel *ferri sulph. crystall.*  $\mathfrak{J}$ iv; *ext. helleb. nigr.*  $\mathfrak{J}$ ij; *myrrh.*  $\mathfrak{J}$ ij; *saponis*,  $\mathfrak{J}$ ij; *cauellæ*, in pulv. tritæ,  $\mathfrak{J}$ j; *zingib.* in pulv. tritæ,  $\mathfrak{J}$ j.

*Speedman's pills* consist of *aloës, myrrh, rhubarb, extract of chamomile*, and *essential oil of chamomile*; and the *Pills of Barthez*, of *aloës, myrrh, musk, camphor*, and *balsam of Peru*.

PILULÆ DE ALOE ET SAPONIS, *P. aloeticæ*.

PILULÆ ALOES CUM ZINGIBERË, *Pill of aloës and ginger*. (*Aloës hepat.*  $\mathfrak{J}$ j; *rad. zingib.* in pulv.  $\mathfrak{J}$ j; *sapon. Hispan.*  $\mathfrak{J}$ ss; *ol. ess. menthæ pip.*  $\mathfrak{J}$ ss.—*Ph. D.*) In habitual costiveness. Dose, gr. x to xx.

PILULÆ AMMONIURETI CUPRI, *Pills of Ammonuret of copper*, *Pilulæ cupri*, (*F.*) *Pilules d'ammonure de cuivre*. (*Ammonur. cupri*, in pulv. ten. trit. gr. xvj; *micæ panis*,  $\mathfrak{J}$ iv; *aq. carbonatis ammoniæ*, q. s. Beat into a mass, and divide into xxxij pills.—*Ph. E.*) Tonic and antispasmodic, in epilepsy, &c. Dose, one pill twice daily; gradually increasing the dose.

PILULÆ ANTE CIBUM, *P. aloës et kinæ kinæ*.

PILULÆ ANTIBILIO'SÆ, *Barclay's Antibilious pills*. (*Extract de colocynth.*  $\mathfrak{J}$ ij; *resin of jalap.*  $\mathfrak{J}$ j; *almond soap*,  $\mathfrak{J}$ iss; *guaiac.*  $\mathfrak{J}$ ij; *emetic tart.* gr. viij; *oils of juniper, carraway*, and *rosemary*,  $\mathfrak{a}\mathfrak{a}$  iv drops; *styrup of buckthorn*, q. s. to form 64 pills.) Dose, two or three.

*Dixon's Antibilious pills* are formed of *aloës, scammony, rhubarb*, and *tartarized antimony*.

PILULÆ ANTIHERPETICÆ, *Pilulæ hydrargyri subnuariatis comp.*—*p. Anthystericæ*, *P. galbani compositæ*.

PILULÆ ANTISCROPHULO'SÆ, *P. ex oxido stibii et hydrargyri sulphureto nigro compositæ*. (*P. scammon.*, *hydrarg. sulphur. nigr.*  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{J}$ ij; *antimonii oxidi albi, milleped.*, *sapon. amygdalin.*  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{J}$ ij; *extract. glycyrrh.*  $\mathfrak{J}$ v. Make into a mass.—*Ph. P.*) Dose, gr. iv to xx.

PILULÆ ANTISPASTICÆ, *P. galbani compositæ*—*p. Assafœtidæ compositæ*, *P. galbani compositæ*.

PILULÆ ASIATICÆ, *Asiatic pills*, *Tanjore pills*. (*Acid. arsenios.* gr. lv; *piper. nigr. pulv.*  $\mathfrak{J}$ ix; *caeciæ*, q. s. ut fiant pil. 800. Each pill contains about one-fiftieth of a grain of arsenious acid. These pills are employed in India for the cure of syphilis and elephantiasis.

PILULÆ ASSAFÆTIDÆ, *Assafœtida pills*. (*Assafœtid.*  $\mathfrak{J}$ iss; *saponis*,  $\mathfrak{J}$ ss. Beat with water so as to form a mass to be divided into 240 pills.—*Ph. U. S.*)

PILULÆ BALSAMICÆ, *P. Doctois Morton.* (*Milleped.*, *pulverisat.*  $\mathfrak{J}$ vij; *gum. ammon.*  $\mathfrak{J}$ xj; *acid. benzoic.*  $\mathfrak{J}$ vj; *croci, balsam. Peru.*  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{J}$ j; *balsam. sulph. anisat.*  $\mathfrak{J}$ vj. Mix.—*Ph. P.*) Tonic, expectorant, and balsamic.

**PILULÆ BENEDICTÆ FULLERI**, P. de aloë et foetid.

**PILULÆ CAMBOGIE COMPOSITÆ**, P. de guttâ gaman'drâ, P. hydrag'ogæ, Gamboge pills, *Pilulæ gummi guttæ aloeticæ*, Compound camboge pills, (F.) *Pilules de gomme gutte composées*. (Cambogię contritæ, aloes spicat. extrat. contriti., pulv. cinnam. comp. sing. ʒj; saponis, ʒij. — Ph. L.) Cathartic. Dose, gr. x to xx.

*Morrison's pills* are said by Dr. Paris to be nothing more than the above, with the addition of a small portion of cream of tartar.

**PILULÆ CATHARTICÆ COMPOSITÆ**, Compound cathartic pills. (Ext. colocynth. comp. in pulv. ʒss; ext. jalapæ, in pulv., hydrarg. chlorid. mit. āā ʒij; gambog. in pulv. ʒij. M. Form into a mass with water, and make into 180 pills. — Ph. U. S.) Three for a dose.

**PILULÆ COCCII**, P. aloes et colocynthidis — p. Cocciæ minores, P. aloes et colocynthidis — p. Cocciæ, P. aloes et colocynthidis — p. Colchici et digitalis, P. Lartigues' — p. Colocynthidis compositæ, P. aloes et colocynthidis — p. ex Colocynthidis cum aloë, P. aloes et colocynthidis — p. Communes, P. aloes et myrrhæ — p. Cupri, P. ammoniuretii cupri.

**PILULÆ COPAIBÆ**, Pills of copaiba. (Copaib. ʒij; magnesiæ, recentē præpar. ʒj. Mix, and set aside till it concretes into a pilular mass, to be divided into 200 pills. — Ph. U. S.) Each pill contains nearly five grains of copaiba. Two to six for a dose.

**PILULÆ DE CYNOGLOSSO**, P. de extracto o'pii. (Pulv. rad. cynogloss., semin. hyoscyam. alb., extract. opii vinos. āā ʒiv; pulv. myrrh. ʒvj; oliban. ʒv; croci., castor., āā ʒiss; syrup opii, q. s. — Ph. P.) Anodyne. In cough, &c. Dose, gr. iv to gr. viij.

**PILULÆ DEPURANTES**, P. hydrargyri submuriatis compos. — p. Eepracticæ, P. de aloë et foetid.

**PILULÆ FERRI CARBONATIS**, Pills of carbonate of iron, Vallet's pills, Vallet's ferruginous pills. (Ferro sulph. ʒviij; sodæ carbonat. ʒx; Mel. despumat. ʒiij; sacchar. ʒij; aquæ bullientis, Oij; syrup. q. s. Dissolve the sulphate of iron and carbonate of soda, each in a pint of the water, and to each solution add a fluidounce of syrup; then mix the two solutions in a bottle just large enough to contain them; close it accurately with a stopper, and set it by, that the carbonate of iron may subside. Pour off the liquid, and having washed the precipitate with warm water, sweetened with syrup in the proportion of fʒj of the latter to Oj of the former, until the washings no longer have a saline taste, place it upon a flannel cloth, and express as much water as possible; then mix it with the honey and sugar. Lastly, heat the mixture in a water-bath, until it attains a pilular consistence. — Ph. U. S.)

**PILULÆ FERRI COMPOSITÆ**, Compound pills of iron, *Pilulæ ferri cum myrrhâ*, (F.) *Pilules de fer composées*. (Myrrh. in pulv. ʒij; sodæ subcarb., ferri sulph. āā ʒj; syrup, q. s. Mix, to form 80 pills. — Ph. U. S.) Tonic. Dose, gr. x to xx.

**PILULÆ FERRI IODIDI**, Pills of iodide of iron. (Ferro sulphat. ʒj; Potass. iodid. ʒiv; tragacanth. pulv. gr. x; sacchar. pulv. ʒss. Beat with syrup into a mass, to form 40 pills. — Ph. U. S.) Dose, one to three, where a tonic and eutrophic is indicated.

**PILULÆ FERRI CUM MYRRHÂ**, P. Ferri compositæ — p. Fœtidæ, P. galbani compositæ.

**PILULÆ GAL'BANI COMPOSITÆ**, P. assafetidæ compositæ, P. fœtidæ, P. gummi'æ, P. e gummi, Compound galbanum pill, *Pilulæ antispas'ticæ*, P. antihystericæ, P. myrrhæ compositæ, Gum

pill. (Galban., myrrhæ, āā ʒvj; assafetidæ, ʒij; syrup. q. s. to form 240 pills. — Ph. U. S.) Antispasmodic and emmenagogue. Dose, gr. x to xx.

**PILULÆ GUMMI**, P. galbani compositæ — p. Gummi guttæ aloeticæ, P. cambogiæ compositæ — p. Gummosæ, P. galbani compositæ — p. de Guttâ gamandrâ, P. cambogiæ compositæ.

**PILULÆ EX HELLEBORO ET MYRRHÂ**, P. ton'icæ, *Bacher's pills*, Tonic pills of *Bucher*, Pills of hellebore and myrrh. (Ext. helleb. nig., myrrh. āā ʒj; fol. cardui benedict. in pulv. ʒiij. M. — Ph. P.) Tonic and emmenagogue. In dropsical, cutaneous, and verminous affections. Dose, gr. iv to gr. viij.

*Mattheus's pills*, — *Starkey's pills*, are formed of rad. helleb. nigr., rad. glycyrrh., sapon. Castell., rad. curcumæ, opii purif., syrup. croci, āā ʒiv; ol. tereb. q. s. ut fiat massa. — Gray.

**PILULÆ HYDRAGOGÆ**, P. cambogiæ compositæ — p. Hydragogæ Bontii, *Pilulæ aloes et cambogiæ*.

**PILULÆ HYDRAR'GYRI**, P. mercurial'es, *Mercurial pill*, *Blue pill*, (F.) *Pilules de Mercure*. (Hydrarg. purif. ʒj; conf. rosæ, ʒiss; glycyrrh. pulv. ʒss. Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass, to be divided into 480 pills. — Ph. U. S.) Antisyphilitic; mercurial; — in large doses, purgative.

A purgative pill, much prescribed by Mr. Abernethy, and called *Abernethy's pill*, consisted of pil. hydrarg. gr. x; jalap, pulv. gr. xx; syrup rhamni, q. s. ut fiat pil. vj. Two were given at night, and the next morning a wineglassful of infusum sennæ.

**PILULÆ HYDRAR'GYRI CHLO'RIDI MITIS**, Pills of mild chloride of mercury, *Culomel pills*. (Hydrarg. chlorid. mit. ʒss; acaciæ, in pulv. ʒj; syrup. q. s. ut fiat pil. 240. — Ph. U. S.) Each pill contains one grain.

**PILULÆ DE HYDRARGYRO, SCAMMO'NIO ET ALOE**, vulgo *MERCURIALES*, (F.) *Pilules Mercurielles* ou de *Mercur*, *Scammonée* et *Aloes*. (Hydrarg. purif. ʒj; mellis, ʒxj. Rub until the globules disappear; then add aloes Socot., scammon. āā ʒij; macis, cinnam. āā ʒj. Make into a mass. — Ph. P.) Uses, same as the last, but they are more purgative. Dose, gr. viij to xxx. These pills are nearly the same as the *Pastilles de Renaudot*.

**PILULÆ EX HYDRARGYRO MURIATICO MITI CUM SULPHURE STIBIATO AURIANTIACO**, *Pilulæ hydrargyri submuriatis compositæ*.

**PILULÆ HYDRARGYRI SUBMURIATIS COMPOSITÆ**, *Pilulæ ex stib'io et hydrar'gyro*, P. antihypericæ, P. ex hydrargyro muriat'ico miti cum sulphure stibiato auriantiaco, P. resolvabletes cum mercurio, P. depurantes, P. hydrargyri submuriatis, Compound pills of submuriate of mercury, *Culomel pills*, *Plummer's pills*, *Red pill*. (Hydrarg. submur., antimon. sulphur. precipitat. sing. ʒij; guaiac. gum resin. contrit. ʒiv; spirit rect. ʒss. Beat together. — Ph. L.) Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

*Leake's pilula salutar'ia* resembles these. It is used in syphilis.

**PILULÆ MERCURIALES**, P. hydrargyri, P. de hydrargyro scammonio et aloë — p. Doctoris Morton, P. balsamicæ — p. Myrrhæ compositæ, P. Galbani compositæ.

**PILULÆ OPIATÆ**, P. Theb'icæ, *Opiate pills*, *Common night pills*, *Anodyne pills*, *Nepen'thes opiatum*, (F.) *Pilules opiacées*. (Opii, p. 1; ext. glycyrrh. p. 7; fruct. myrt. piment. p. 2. Mix. — Ph. E.) Five grains contain gr. ss of opium.

**PILULÆ OPII**, P. saponis cum opio—p. de Extracto opii, P. de cynoglossa—p. ex Oxido stibii et hydrargyri sulphureto nigro compositæ, Pilulæ antiscrophulosæ—p. Resolventes cum mercurio, P. hydrargyri submuriatis compos. —p. de Rhabbarbaro, Pilulæ rhei compositæ.

The stomachic nostrum, sold under the name of *Moseley's pills*, consists merely of rhabarb and ginger.

**PILULÆ QUINÆ SULPHATIS**, *Pills of sulphate of quinia*. (Quin. sulph. ʒj; acaciæ, in pulv. ʒij; mel. q. s. ut fiat pilulæ 480.—Ph. U. S.) Each pill contains a grain of the sulphate of quinia.

**PILULÆ RHEJ**, *Pills of rhabarb*. (Rhej, pulv. ʒvj; saponis, ʒj. M. et fiat pil. 120.—Ph. U. S.) Each pill contains three grains of rhabarb.

**PILULÆ RHEI COMPOSITÆ**, P. de Rhabbarbaro, *Compound rhabarb pills*. (Rhei, pulv. ʒj; aloes, pulv. ʒij; myrrh. pulv. ʒiv; ol. mentha pip. fʒss. Beat into a mass, with syrup of orange-peel, to form 240 pills.—Ph. U. S.) Laxative and stomachic. Dose, gr. x to xx.

*Griffith's pills*, so called after Dr. S. P. Griffiths, of Philadelphia, who prescribed them as a tonic aperient, were formed as follows:—Rhej, pulv. ʒiss; ferri sulph. ʒss; saponis, ʒij; aquæ, q. s. ut fiat massa in pil. xl dividenda. Dose, three or four at bedtime.

**PILULÆ RHEI**, P. aloes et myrrhæ—p. Salutaris, Leake's, see Pilulæ hydrargyri submuriatis compositæ—p. Saponis, P. saponis cum opio—p. Saponis compositæ, P. saponis cum opio.

**PILULÆ SAPONIS CUM OPIO**, P. saponis cæcæ, *Pills of soap and opium*, P. saponis compositæ, (F.) *Pilules de savon et d'opium*. (Opii, ʒss; sapon. ʒij. M.—Ph. U. S.) Five grains contain one of opium.

The Pharmacopœia of the United States has a form for the *Pilulæ opii*, *Opium Pills*, as well as for the *Pilulæ saponis compositæ*; the only difference between them being in the proportion of the ingredients. The following is the formula for the *Pilulæ opii*:—Opii, pulv. ʒj; saponis, gr. xij. Beat with water into a mass to form 60 pills.

**PILULÆ E SCILLÂ**, P. scillæ compositæ.

**PILULÆ SCILLÆ COMPOSITÆ**, P. scillitica, P. scillæ cum zinzibere, P. e scillâ, *Compound squill pill*. (Scillæ, pulv. ʒj; zingib. pulv., ammoniac. pulv. aa ʒij; saponis, ʒij; syrup. q. s. ut fiat pil. 120.—Ph. U. S.) Dose, two pills. Expecto- rant and diuretic. Dose, gr. x to xx.

**PILULÆ SCILLÆ CUM ZINGIBERE**, P. scillæ compositæ—p. Scillitica, P. scillæ compositæ—p. ex Stibio et hydrargyro, P. hydrargyri submur. compos.—p. Stomachica, P. aloes et kinæ kinæ.

**PILULÆ STRYCHNÆ**, *Pills of Strychnia*. (Very pure strychnine, 2 gr.; conserve of roses, ʒss. Make into 24 pills.) One or two for a dose.

**PILULÆ STYRACIS**, *Storax Pills*. (Styracis pur. ʒij, opii purif., mellis, croci, sing. ʒj. Ph. D.) Six grains contain one of opium.

**PILULÆ SUBLINGUALES**, *Hypoglossides*.

**PILULÆ DE TEREBINTHINÂ**, *Turpentine Pills*. Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water, it forms a soft paste, which has the properties of turpentine, and has been administered in gleet, &c.

**PILULÆ THEBAICÆ**, P. opiatæ—p. Tonica, P. ex Helleboro et myrrhâ.

**PILULAR**, *Pilularis*; from *pilula*, 'a pill.' Relating to pills,—as 'a pilular mass,' 'pilular form,' &c.

**PILULES**, *Pilulæ*—p. *Aggregatives*, see *Aggregatæ*—p. *Aloes* or *aloëtiques*, *Pilulæ aloëtica*—p. *Ammoniac de cuire*, *Pilulæ ammoniacuretæ cupri*—p. *Bénites de Fuller*, *Pilulæ de aloë et fa tidis*—p. *de Fer composées*, *Pilulæ ferri compo-*

*sitæ*—p. *Ferrugineusæ de Vallet*, see *Ferri proto-carbons*—p. *Gonrmaides*, *Pilulæ aloes et kinæ kinæ*—p. *de Mercure*, *Pilulæ hydrargyri*—p. *de Mercure*, &c., *Pilulæ de hydrargyro*, et *scammonio et aloë*—p. *Mercurielles*, *Pilulæ de hydrargyro*, *scammonio et aloë*—p. *Opiacées*, *Pilulæ opiatæ*—p. *de Savon et d'Opium*, *Pilulæ saponis cum opio*.

**PILULIER** (F.) *Pill Machine*. An instrument invented by the Germaus for rolling and dividing pills. Also, the earthen pot in which pills are preserved.

**PILUM**, *Pistillum*, *Pistillum*, *Hypæros*, *Cer-cis*, (F.) *Pilon*. A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

A *spring pestle* is one attached above to a spring, so as to take off the weight, and thus lessen the labour of pounding.

**PILUS**, *Capillus*, *Caul*, *Hair*.

**PIMELE**, *Fat*.

**PIMELECCHYSIS**, *Pimelorrhœa*.

**PIMELICUS**, *Fatty*.

**PIMELITIS**, from *πυμῆλη*, 'fat,' and *itis*, denoting inflammation. Inflammation of the adipous tissue.

**PIMELODES**, *Fatty*.

**PIMELO'MA**, from *πυμῆλη*, 'fat.' A fatty swelling.

**PIMELORRHŒA**, *Pimelecc'hysis*, from *πυμῆλη*, 'fat,' and *ρῶα*, 'I flow.' A morbid discharge or disappearance of fat.

**PIMELORTHOPNŒA**, *Piorthopnœa*; from *πυμῆλη*, 'fat,' *ορθος*, 'upright,' and *πνεῖν*, 'to breathe.' Dyspnœa, practicable only in the erect attitude, owing to fat.

**PIMELO'SIS**, *Obesitas nim'ia*, from *πυμῆλη*, 'fat.' Conversion into, or formation of, fat,—as *Pimelosis hepatica*, 'fatty degeneration of the liver.'

**PIMELOSIS HEPATICA**, *Adiposis hepatica*—p. *Nimia*, see *Polysarcia*.

**PIMENT**, *Capsicum annum*—p. *Royal*, *Myrica gale*.

**PIMENTA**, see *Myrtus pimenta*.

**PIMENTE BACCÆ**, see *Myrtus pimenta*.

**PIMENTO**, see *Myrtus pimenta*.

**PIMIACULA**, *Labia pudendi*.

**PIMPERNEL**, *BLUE*, *Scutellaria lateriflora*—p. *Red*, *Anagallis*—p. *Scarlet*, *Anagallis arvensis*—p. *Water*, *Veronica beccabunga*.

**PIMPILIM**, *Piper longum*.

**PIMPINEL**, see *Pimpinella*—p. *Italian*, *Sanguisorba officinalis*.

**PIMPINELLA ALBA**, P. saxifraga—p. *Angelicæ-folia*, *Ligusticum podagraria*.

**PIMPINELLA ANISEM**, *Anise plant*, *Anisum*, *A. officina'le* seu *vulgo'rè*, *Sison anisum*, *A'pium anisum*, *Sola'men intestino'rum*, *Anesum*, (F.) *Anis*. *Family*, Umbellifera. *Sex. Syst.* Pentandria Digynia. A native of Egypt. The seeds, *Anisum*, (Ph. U. S.) *Sem'ina Anisi*, *Aniseed*, have an aromatic odour: and a sweetish, warm, grateful taste. They are carminative, and used in dyspepsia and in tormina of infants. Dose, gr. xv to ʒj, bruised. The oil,—**OLEUM ANISI**, (F.) *Huile d'anis*—is officinal. Dose, gtt. v to xv. Most of the oil used in this country under the name of *Oil of Anise* is said to be obtained from *Illicium Anisatum*.

**PIMPINELLA**, *GREATER*, P. magna—p. *Hircina*, P. saxifraga—p. *Laterifolia*, *Sison annui*.

**PIMPINELLA MAGNA** seu *nigra* seu *major* seu *rubra*; *Greater Pimpinella*; *Trojanellium magnum* seu *majus*, *Daucus*, *Cyan'opus*, (F.) *Boncage majeur*. The root has been extolled as δι'αρετο

and resolvent, as well as in erysipelatous ulcerations, tinea capitis, rheumatism, &c.

PIMPINELLA MAJOR, *P. magna*—*p. nigra*, *P. magna*—*p. nostras*, *P. saxifraga*—*p. officinalis*, *Sanguisorba officinalis*—*p. rubra*, *P. magna*.

PIMPINELLA SAXIFRAGA, *Saxifraga*, *Burnet saxifrage*, *Poterium sanguisorba*, *Sorbastrel'la*, *Tragoselinum*, *T. saxifraga*, *Pimpinella hircina* seu *umbellifera* seu *alba* seu *nostras*, (*F. Boucage mineur*, *Petit B.*, *Pimprenelle*). The root has an unpleasant smell, and hot, pungent, bitterish taste. It has been recommended as a stomachic; and as a stimulating gargle in paralysis of the tongue.

PIMPINELLA UMBELLIFERA, *P. saxifraga*.

PIMPLE, Papula.

PIMPLED, Papulose.

PIMPRENELLE, *Pimpinella saxifraga*—*p. noire*, *Sanguisorba officinalis*.

PIN. Perhaps from *pennum*, low Latin; or from *spina*; *Spina ferrea*, *Acus capita'ta*, (*F. Épinglé*). An iron or brass instrument, generally of a small size, pointed at one extremity, and having a head at the other. It is used, in Surgery, to fix rollers and dressings; and occasionally in sutures.

PIN À PIGNON, see *Pinus picea*.

PINASTELLUM, *Peucedanum*.

PINASTER, *Pinus sylvestris*.

PINCÉ, Pinched.

PINCE LITHODRASSIQUE, see *Lithodrasse*.

PINCÉE, Pugillus.

PINCERS, Forceps.

PINCETTES, Forceps.

PINCHED, *Contractus*, (*F.*) *Pincé*, *Grippé*.

An epithet applied to the face, when the features are contracted or shrunken; as in violent abdominal affections, or during intense pain.

PINCKNE'YA PUBENS, *P. Pubescens*, *Georgia Bark*, *Bitter Bark*, *Florida Bark*, *Fever tree*. This bark has been used in Georgia in the cure of intermittents, and successfully. It is a powerful bitter. Dose of the powder,  $\mathfrak{z}\mathfrak{i}$ .

PINDARS, *Arachis Hypogea*.

PINE APPLE, *Bromelia ananas*—*p. Apherousii*, *Pinus cembra*—*p. Ground*, *Lycopodium complanatum*—*p. Ground*, stinking, *Camphorosma Monspeliana*—*p. Mountain*, see *Pinus mughos*—*p. Mugho*, see *Pinus mughos*—*p. Sap. American*, *Hypopitys lanuginosa*—*p. Stone*, *Pinus pinea*—*p. Sugar*, see *Arow Root*.

PINEA, *Pinus pinea*.

PINE'AL, *Pinea'lis*, from *pinus*, 'a pine.' That which resembles a pine-apple.

PINEAL GLAND, *Glandula pinea'lis*, *Cerebral epiph'ysis*, *Cona'rium*, *Conoïdes corpus*, *Penis cer'ebr'i*, *Corpus turbina'tum*, *Virga* seu *Turbo cer'ebr'i*, is a small body, of a conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles, *Sabulum cona'rii*: when these are grouped together over the base of the gland, they form the *Acer'vulus Cer'ebr'i* of Sömmerring, *A. seu Lapi'li glandula pinea'lis*. From its anterior part arise two medullary striæ, which proceed over the posterior commissure; coast along the optic chalam; and unite at the anterior pillar of the fornix,—the *habenæ* or reins of the pineal gland.

The uses of the pineal gland are unknown. Descartes supposed it to be the seat of the soul!

PINEI, see *Pinus pinea*.

PINEOLI, see *Pinus pinea*.

PINEUS PURGANS, *Jatropha curcas*.

PINGUEC'ULA, *Pteryg'ium pingue* seu lar-

*da'cum*, from *pinguis*, 'fat.' 'fatty.' A small, whitish-yellow tumour in the sclerotic conjunctiva and subjacent areolar tissue, close to the margin of the cornea on its nasal or temporal side; so called from its being supposed, but erroneously, to be of a fatty nature.

PINGUE'DO, Fat—*p. Renalis*, *Nephridion*.

PINGUEC'ULA VULGARIS, *P. alpi'na*, *Sanic'ula montana*, *S. Eboracensis*, *Viola palustris*, *Dodecath'eon Plin'ii*, *Butter-wort*, *Yorkshire San'icle*. Family, *Personneæ*. Sex. Syst. *Dianthria Monogynia*. The unctuousity of this plant has caused it to be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves, in broths, are used by the common people in Wales as a cathartic.

PINGUID, Fatty.

PINGUIDINOUS, Fatty.

PINGUIN, *Bromelia pinguin*.

PINGUITUDO, *Polysarcia adiposa*.

PINHOLE PUPIL, see *Pupil*, pinhole.

PINHONES INDICI, *Jatropha curcas*.

PINK, CAROLINA, *Spigelia Marilandica*.

PINK DYE. *Stripped safflower*,  $\mathfrak{z}\mathfrak{i}$ , *subcarb. of potass.* gr. xvij, *spirit of wine*  $\mathfrak{z}\mathfrak{v}\mathfrak{i}\mathfrak{j}$ ; digest for two hours; add *distilled water*  $\mathfrak{z}\mathfrak{i}\mathfrak{j}$ ; digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rose-colour. Used as a cosmetic.

PINK, GROUND, *Silene Virginica*—*p. Indian*, *Spigelia Marilandica*—*p. Wild*, *Silene Virginica*.

PINNA, Ala, Pavilion of the ear—*p. Marina*, see *Bissus*.

PINNACULUM FORNICIS GUTTURALIS, Uvula.

PINNÆ HEPATIS, Lobes of the liver—*p. Naris*, see *Nasus*.

PINNULA, *Aileron*.

PINNULÆ HEPATIS, Lobes of the liver.

PINO'LI. (*S.*) A preparation used for subsistence on long journeys in the West. It is parched corn, beaten or ground very fine, and sweetened with sugar, to be used with water, and drunk on the march. It is the *cold flour* of the Indians, and early Western pioneers.

PINONCILLO TREE, *Castilignia lobata*.

PINUS A'BIES, *P. excelsa* seu *picea*, *A'bies*, *Abies rubra* seu *excelsa* seu *picea*, *Élaté thelé'a*, *Pice'a*, *Norway Spruce Fir*, *Yew-leaved Fir*. *Nat. Ord.* *Coniferæ*. Sex. Syst. *Monœcia Monadelphia*. The tops are used in making *Spruce Beer*.

*Essence of Spruce*, *Essentia Abietis*, is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made *Spruce Beer*.

This fir affords the Burgundy pitch and common frankincense. 1. *Burgundy Pitch*, *White pitch*, *Pix Burgundica*, *Pix alba*, *Resi'na abietis humida*, *Resi'na alba humida*, *Pini abietis resina sponte concre'ta*, *Pix ar'ida*, *Pix abietina*, *P. abietis* (*Ph. U. S.*) (*F.*) *Poix blanche*, *Poix grasse*, *P. jaune*, *P. de Bourgoigne*. This prepared concrete juice is of a close consistence, rather soft, of a reddish-brown colour, and not unpleasant smell. It is very adhesive to the skin; and, consequently, forms excellent plasters for remaining upon the part for some time:—as in cases of affections of the chest. 2. *Abietis Resi'na*, (*Ph. L.* since 1809.) *Thus*, *Common Frankincense*, *Perrosin*, *Thus fœmininum*, *T. vulgare*, *Olib'anum vulgare* seu *sylvestre*, *Resina abietis secca*, *Resin of the Spruce Fir*. It is solid, dry, brittle; externally, brownish-yellow; internally, whitish. Used in plasters like the last.

PINUS ABIES, see *P. picea*—*p. Alba*, *P. picea*.

PINUS BALSAME'A, *A'bies balsame'a* seu *bal-*

*samifera*, *Pen'cea balsamea*. The tree which affords the *Canada Balsam*, *Balsamum Canadense* seu *de Can'ada*, *Resina strobil'ina*, *Terebinth'ina Canadensis*, *Pini balsame'a*, *Canada Turpentine* or *Balsam of Fir*, (F.) *Baume de Canada*, is one of the purest turpentines. It has the common properties of those substances.

PINUS CANADENSIS, *Abies Canadensis*, *Hemlock Spruce*. A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and is found in the elevated and mountainous regions of the Middle States. The pitch—*Pice Canadensis*, *Canada Pitch*, *Hemlock Pitch*—obtained from it is commonly known under the name *Hemlock Gum*.

PINUS CANDICANS, P. Picea.

PINUS CEMBRA, P. *Mont'na*, *Aphernon's li Pine*. It yields an agreeably scented turpentine:—the *Carpathian Balsam*, *Balsamum Carpathicum*, B. *Lib'ani*, *Carpathicum*, *Briaçon Turpentine*. The nuts, *Cembro nuts*, *Nu'dei Cembra*, have an eatable kernel, and yield oil. The shoots yield *Riga Balsam* by distillation.

PINUS DAMARRA, *Agathis Damarra*, grows in the East India Islands. The juice speedily concretes into a very hard resin,—the *Damarra turpentine*.

PINUS EXCELSA, P. *abies*—p. *Gallia*, P. *picea*.

PINUS LARIX *Abies larix*, *Larix*, L. *communis* seu *decid'na* seu *Europæ'a* seu *pyramida'lis*. The *Larch*, (F.) *Mélèze*. From this tree exudes *Oremberg gum*, *Briaçon manna*, *Gummi laricis* seu *Oremburg'se* seu *Uralen'se*, *Manna Briqant'ina* seu *laric'e'a*. It also yields, by boring, *Common Venice Turpentine*, *Resina Laricis*, *Terebinthina Ven'eta* seu *laric'ina*, *Pini Laricis resina liquida*, (F.) *Térébenthine de Venise*, M. de *Mélèze*. It is usually thinner than the other sorts of turpentine.

PINUS MUGHOS. The *Mountain* or *Mugho Pine*, *Pinus Pumilio*. From the extremities of the branches exudes the *Resina Strobil'ina*, of the Germans, or *Hungarian Balsam*. It is also obtained, by expression, from the cones. By distillation, the Hungarian balsam affords the *Krumholz oil*, *Oleum Templinum*.

PINUS PALUSTRIS, see *Pinus sylvestris*.

PINUS PICEA, P. *Abies*, *Abies*, A. *pice'a* seu *pectina'ta* seu *Gall'ica* seu *alba* seu *can'dicans* seu *vulgar'is* seu *taxifol'ina*, *European Silver Fir Tree*, *El'ate*, (F.) *Sapin commun*. By piercing the tubercles of the bark of this fir, the *Stroburg Turpentine* is obtained:—the *Resi'na Abie'tis*. (Ph. L. before 1809.) *Oleum Abietis*, *Terebinth'ina Argentoratensis*.

PINUS PINASTER, see P. *sylvestris*.

PINUS PINEA, *Stone Pine*, *Pinea*, *Pinus*, P. *uber'rima* seu *sati'va*. The nuts, *Zirbel nuts*, *Pine nuts*, *Nu'clei Pi'neæ*, *Pinei*, *Pine'oli*, (F.) *Pin à pignons*, are eaten raw, or preserved like almonds. They are, also, used in emulsions.

PINUS PUMILIO, see *Pinus Mughos*—p. *Sativa*, P. *pinea*.

PINUS SYLVESTRIS, *Pinas'ter*, *Pen'cè*, *Scotch Fir*. This pine, as well as P. *marit'ima*, (P. *Pinaster*) and other species of *Pinus*, affords common turpentine and its oil, resin, tar, and pitch. 1. *Common Turpentine of Europe*, *Terebinth'ina*, T. *vulgar'is*, T. *commun'is*, *Resina pini*, *Bijon*, *Horse Turpentine*, *Bordeaux Turpentine*, (F.) *Térébenthine de Bordeaux*, *Térébenthine commun*, is obtained by wounding the tree in hot weather. It is used, chiefly, as a dressing for wounds, &c., in horses, and for the distillation of the oil, (see *Oleum Terebinthine*.) The *white Turpentine*, or *common Turpentine of America*—*Terebinth'ina*, Ph. U. S.—is produced chiefly from *Pinus palustris* and P. *tada*, and perhaps

from other species inhabiting the Southern States. When the oil is distilled with water, yellow resin, or *Rosin*, (*Resi'na*, Ph. U. S.)—*Resina flava*—is left, which is only used in the formation of ointments and plasters: if without the addition of water, the residuum is common resin or Colophony. 2. When the cold begins to check the exudation of the common turpentine, part of it concretes in the wounds. This is called, in France, *Gallipot*, *Barras*; and *White Rosin*, *Resina alba*, when hardened after long exposure to the air. 3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained—*Hygropissus*, *Pissa*, *Pice ce'dria*, *Resi'na pini empyreumatica liquida*, *Terebinth'ina empyreumatica*, *Alchitram*, *Alchit'ura*, *Cedria*, *Pice liquida*, (F.) *Goudron*, *Brai liquide*. Tar water, *Aqua Picca*, A. *Piceis*, *Infusum Piceis liquida* seu *Piceis empyreumaticæ liquida*, *Po'tio picca*, (F.) *Eau de Goudron*, was, at one time, a fashionable remedy in numerous eouphints, and its use has been revived, since its virtues have been presumed to be owing to creasote. It is employed chiefly in pulmonary affections, and the vapour has been recommended in phthisis and other diseases of the lungs. It is used externally as a detergent. 4. *Common Pitch*, *Pice nigra*, *Black Pitch*, *Burnea*, *Burnia*, *Stone Pitch*, *Pice sicca*, P. *atra*, P. *navo'lis*, *Topissis*, *Palinpi'ssa*, P. *ar'ida* (Ph. L. before 1809), (F.) *Poiz navale*, P. *noire*, is obtained by inspissating tar. It is used only as a resolvent in plasters.

PINUS TÆDA, see P. *sylvestris*—p. *Taxifolia*, P. *picea*—p. *Uber'rima*, *Pinus pinea*—p. *Vulgaris*, P. *picea*.

PIONE, *Pæonia*.

PIONY, *Pæonia*.

PIORTHOPNÆA, *Pimelorthopnœa*.

PIOULQUES. (F.) A kind of sucking-pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning. A useless instrument.

PIPE-PLANT, *Monotropa uniflora*.

PIPER, see *Piper nigrum*.

PIPER ALBUM *Leucopiper*, *White Pepper*, is black pepper freed from its cuticle.

PIPER AUGUSTIFOLIUM, *Matico*—p. *Aromaticum*, P. *nigrum*—p. *Betel*, *Betel*—p. *Brazilianum*, *Capsicum annuum*—p. *Calecuticum*, *Capsicum annuum*.

PIPER CAPENSE, a South African species, has all the properties of the peppers, and, in appearance and taste, greatly resembles cubeb. It possesses, too, similar virtues.

PIPER CARYOPHYLLATUM, see *Myrtus pimenta*—p. *Caudatum*, P. *cubeba*—p. *Chiapæ*, see *Myrtus pimenta*.

PIPER CUBEBA, *Per'sea cubeba*, *Laurus cubeba*, *Litsea cubeba* seu *piper'ita*. A native of Java and Guinea. The odour of these berries—*Cubeba*, *Com'peper*, *Compebo*, *Cubal sini*, *Piper caudatum*, *Baccæ Piperis globri*, *Cubeb Pepper*, *Tailed Pepper*, *Cuma'mus*, (F.) *Poirre-à-queue*, *Quabebe*—is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil—*Oleum Cubeba*, oil of cubeb—which is officinal in the Pharmac. U. S. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhœa. Dose, from ℥j to ʒj, in powder, three or four times a day; of the volatile oil, 10 or 12 drops.

'Turkey yellow berries,'—the dried fruit of the *Rhamnus Catharticus*—are often substituted for cubeb.

PIPER GUINEENSE, *Capsicum annuum*—p. *Hispanicum*, *Capsicum*—p. *Indicum*, *Capsicum annuum*—p. *Jamaicense*, see *Myrtus pimenta*.

PIPER LONGUM, *Macropiper*, *Acapul'ti*, *Catu-trip'ali*, *Pim'pilim*, *Long Pepper*, (F.) *Poirre*

*long.* As we receive the berries, they consist of the unripe fruit dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative, and tonic, like the other peppers. Dose, gr. v to ℥j.

PIPER LUSITANICUM, *Capsicum annuum*—p. Murale, Sedum.

PIPER METHISTICUM, see Ava.

PIPER NIGRUM, *Melanopyper*, *Molagoco'di*, *Lula*, *Piper aromati'cum*, *Piper* (Ph. U. S.), *Black Pepper*, (F.) *Poivre noir*. Black pepper is the unripe fruit dried in the sun. *Virtues*, same as those of the other peppers.

PIPER ODORATUM JAMAICENSE, see *Myrtus pimenta*—p. *Tabascum*, see *Myrtus pimenta*—p. *Turcium*, *Capsicum annuum*.

RIPERINA, *Piperinum*, *Piperine*, *Piperin*. A resinoid substance, obtained from the piper nigrum by M. Erstadt, in which a part of the virtues of the pepper resides. It has been employed, like the quina, in intermittents, and successfully.

PIPEROID, *Piperoidum*, *Zingiberin*. A yellow syrupy mass obtained by exhausting ginger root by ether. It is soluble in ether, alcohol, and oils, and may be given in tincture, sugar, lozenge, or syrup, in cases where ginger is indicated.

PIPEROPASTUS; from *πεπερι*, 'pepper,' and *πασσειν*, 'to strew.' Strewed with pepper,—socks, for example, where it is desirable to excite the surface of the feet.

PIPETTE. 'A small pipe.' In Pharmacy, a small tube terminating in a perforated point, which is passed into a liquid to be removed, from the surface of a precipitate, for example. The liquid is drawn into the tube by applying the mouth to the free extremity.

PIPINNA, *Mentula parva*. A small penis.

PIPPERIDGE BUSH, see *Oxycantha Galeni*.

PIPSISSEWA, *Pyrola umbellata*—p. Spotted, *Pyrola maculata*—p. White, *Pyrola maculata*.

PIPTYNCHIA, *Onychoptosis*.

PIQUETÉ, see *Sablé*.

PIQURE, Puncture, Wound, punctured.

PISA, (CLIMATE OF.) Pisa has long been celebrated as one of the most favourable climates in Italy for the consumptive. It is genial, but somewhat oppressive and damp. It is softer than that of Nice, but not so warm; less soft, but less oppressive than that of Rome.

PISCIARELLI, MINERAL WATERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fahr.), sulphureous, and carbonated, and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

PISCIDIA ERYTHRINA, *Jamaica Dogwood*. A small branching tree, common in most of the West India Islands;—*Diadelphia Decandria* of Linnaeus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic, and has been used in the form of a tincture of the bark of the root in toothach.

PISCINA, *Baignoire*.

PISCIVOROUS, *Piscivorus*, *Ichthyoph'agous*, *Ichthyoph'agus*, from *pisces*, 'a fish,' and *voro*, 'I eat.' Feeding or subsisting on fish.

PISIFORM, *Pisiformis*, from *pisum*, 'a pea,' and *forma*, 'shape.'

PISIFORMÉ, OS, *Os lenticula'rè*, *Os orbiculat'rè*, *Os extra ord'inem carpi*, (F.) *Os hors du rang*, is the fourth bone of the first row of the carpus. It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the os cuneiforme.

PISO, Mortar.

PISSA, see *Pinus sylvestris*.

PISSASPHALTUS, *Pissaspphaltum*, *Mineral Pitch*, from *πισσα*, 'pitch,' and *ασφαλτος*, 'bitumen.' (F.) *Pois minérale*. A thicker kind of *Petroleum* or *Rock oil*; formerly employed as a vulnerary. It is synonymous with *Glutinous bitumen*, *Malta bitumen*, and *Mineral tar*.

PISELÆUM, *Oleum Picinum*, from *πισσα*, 'pitch,' and *ελαιον*, 'oil.' An oily matter obtained from boiling pitch, and used for the same purposes as tar.

PISELÆUM INDICUM, *Petroleum*.

PISSEMENT DE SANG, *Hæmaturia*.

PISSENLIT, *Leontodon taraxacum*.

PISSEROS, from *πισσα*, 'pitch.' Ancient name of a cerate, prepared of *olive oil*, *oil of roses*, and *dried pitch*. It was, also, called *Cera'tum picatum*, and *C. tetraphar'macum*.—*Hippocrates*.

PISSITES, *Vinum picatum*. Same etymon. A wine prepared from tar and the must of the grape. It was regarded to be stomachic.

PISSOSIS, *Malacia*.

PISSWEED, *Anthemis cotula*.

PISTACHIO NUTS, see *Arachis hypogea*, *Pistacia vera*.

PISTACIA CHIA, *P. lentiscus*.

PISTACIA LENTISCUS, *P. Chia*, *Terebinthus lentiscus*, *Lentiscus vulgaris*; the *Mastich Tree*. Family, *Terebinthaceae*. The wood of this tree abounds with the resinous principles of mastich; and a tincture made from it has been used in the cure of dyspeptic affections, gout, and dysentery. It yields, by incision, the resin *Mastich*, *Resina Lentiscina*, *Menfrigè*, *Mastichè*, *Mastix*, *Pistacia Lentisci Resina*. This resin has an agreeable smell when heated: is almost insipid; in globular, irregular, yellowish, semi-transparent masses; soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed, to stop holes in carious teeth.

PISTACIA NARBONENSIS, *P. lentiscus*—p. *Reticulata*, *P. lentiscus*.

PISTACIA TEREBINTHUS, *P. Narbonensis seu reticulata seu vera*, *Turpentine Tree*, *Hab-el-Kalimbat*, *Terebinthus vulgaris*, *Terminthos*. The tree which affords the *Cyprus Turpentine*, *Resina Terebinthi*, *Terebinthina vera*, *T. Chia*, *T. Cypria*, (F.) *Térébinthine de Chio*. This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles in virtues the other turpentines.

PISTACIA VERA. Name of the tree which affords the *Nux Pistacia*. *Pistachio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these, they afford an oil, and may be formed into an emulsion.

PISTILLUM, *Pilum*.

PISTOLOCHIA, *Aristolochia pistolochia*.

PISTORIENSIS GLADIUS, *Bistouri*.

PISUM, *Pisum sativum*, *Pea*, *Garden pea*, (F.) *Pois*, *P. cultivé*. The seeds of the pea, Fam. *Leguminosæ*, *Sex. Syst.* *Diadelphia decandria*, are much employed as an aliment, both in the fresh and dried state. They are farinaceous, and, when dried, not easy of digestion.

PIT, Pock mark—p. of the Stomach, *Fossette de cœur*.

**PITAY'A BARK.** This bark is preferred in Colombia to any other. It contains a new vegetable alkali, to which the name *Pitoyine* has been given.

**PITAYINE,** see Pitaya bark.

**PITCAITHLEY, MINERAL WATERS OF.** These saline springs, at Pitcaithley, about four miles from Perth, Scotland, contain chlorides of sodium and calcium.

**PITCH, Colophonia**—p. Black, see *Pinus sylvestris*—p. Burgundy, see *Pinus abies*—p. Canada, see *Pinus Canadensis*.

**PITCH CAP,** see Depilatory.

**PITCH, COMMON, Pinus sylvestris**—p. Hemlock, see *Pinus Canadensis*—p. Jew's, Asphaltum—p. Mineral, Pissasphaltum.

**PITCH PLASTER,** see Depilatory, Emplastrum picis.

**PITCH, STONE,** see *Pinus sylvestris*—p. White, see *Pinus abies*.

**PITHYRIASIS, Pityriasis.**

**PITHYRINUS, Acerosus, Furfuraceus.**

**PITTA'CIUM.** A pitch plaster, from *πῖττα*, 'pitch.'

**PITTING, Pock mark.**

**PITTIOSIS, Malacia.**

**PITTO'TA.** Medicines in which pitch is the chief ingredient.

**PITTSBURG, MINERAL WATERS OF.** A chalybeate mineral spring, situate about four miles south-west of Pittsburg, in Pennsylvania. It contains chloride of sodium, chloride of magnesium, oxide of iron, sulphate of lime, and carbonic acid.

**PITUITA, Mucus, Phlegm**—p. Narium, Nasal mucus.

**PITU'ITARY, Pituitarius, from pituita, 'phlegm.'** Concerned in the secretion of mucus or phlegm. A name given to several parts.

**PITUITARY BODY, P. Gland.**

**PITUITARY FOSSA, Fossa Pituitaria.** A depression on the cerebral surface of the sphenoid bone, which lodges the pituitary gland. It is called, on account of its shape, *Sella Turcica, Ephippium*. Chaussier calls it *Fossa supra-sphenoidalis*, from its situation.

**PITU'ITARY GLAND, Glan'dula Pituitosa vel pituitaria, Glan'dula basilaris, Lacina vel Appendicula cerebri, Hypophysis seu Appendic cerebri, Pituitary body, Corpus pituitarè;—Appendice sus-sphenoidale du cerveau, (Ch.)** A small, round body; the anterior portion of which is of a cineritious yellow hue, and the posterior, which is smaller, is whitish and pulpy. Its functions are unknown.

**PITUITARY MEMBRANE, Schneide'rian Membrane, Membrana pituitaria, M. olfactoria.** The mucous membrane which lines the nasal fossae, and extends to the different cavities communicating with the nose. In the nasal fossae, the membrane appears formed of two layers, intimately united;—the one in contact with the bone is fibrous;—the other is free at one surface. The latter is a mucous membrane, on which papillae are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer. The pituitary membrane receives the impression of odours, by means of the expansion of the olfactory nerves upon it. It is the seat of smell.

**PITU'ITOUS, Pituitosus; from pituita, mucus or phlegm.** Consisting of, or resembling, or full of mucus or phlegm.

**PITYRI'ASIS, from πῖτυρον, 'bran; Lepidosis Pityriasis, Pityri'sma, Pityri'asis, Herpes**

*furfuraceus, H. furinosus, Porri'go (of some), Tin'ea furfuracea, T. porriginosa, Furfuratio, Furfuris'ca, Dandruff, Dandruff, (F.) Teigne, Dartre, Dartre furfuracée volante;—a very superficial affection; characterized by irregular patches of thin scales, which repeatedly exfoliate and recur; but which never form crusts, or are accompanied with excoriations. It is not contagious. It occurs under three or four varieties of form.*

**PITYRIASIS, Porrigo**—p. Nigra, Melasma—p. Versicolor, Chloasma.

**PITYRISMA, Pityriasis.**

**PITYROIDES, Furfuraceus.**

**PITYRON, Furfur.**

**PIVOLINE, Paeonia.**

**PIV'OTING.** In dentistry, an operation, which consists in fastening in a new crown upon the root of a tooth by means of a piece of gold wire, called 'a pivot.'

**PIX, Sperm**—p. Abietina see *Pinus abies*—p. Abietis, see *Pinus abies*—p. Alba, see *Pinus abies*—p. Arida see *Pinus abies*, and *Pinus sylvestris*—p. Atra, see *Pinus sylvestris*—p. Brutia, Brutia—p. Burgundica, see *Pinus abies*—p. Canadensis, see *Pinus Canadensis*—p. Cedria, see *Pinus sylvestris*—p. Græca, Colophonia—p. Liquida, see *Pinus sylvestris*—p. Navalis, see *Pinus sylvestris*—p. Nigra, see *Pinus sylvestris*—p. Sicca, see *Pinus sylvestris*.

**PLACE'BO, 'I will please.'** A medicine, prescribed rather to satisfy the patient than with any expectation of its effecting a cure.

**PLACEN'TA.** A Latin word, signifying a *Cake*. *P. uteri seu uterina* seu *uteri car'nea, Hepar seu Jecur uterinum, Caro seu Affusio orbicularis, Maza. A soft, spongy, vascular body, adherent to the uterus, and connected with the fœtus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences perhaps with the arrival of the embryo in the uterus. It is generally considered to have two portions, one *fœtal*, and the other *maternal*. The fœtal consists of highly vascular villi and tufts, which contain the inosculating loops of the umbilical arteries and umbilical vein of the fœtus. The maternal portion is considered by Dr. Reid to consist, essentially, of a large sac formed by the inner coat of the vascular system of the mother, into which the maternal blood is poured by the curling arteries of the uterus, and from which it is returned by the utero-placental veins. The tufts and villi of the fœtal placenta are ensheathed by this inner coat of the maternal vascular system; and, according to Prof. Goodsir, two distinct sets of nucleated cells—one maternal and the other fœtal—separate the maternal and fœtal portions where they come in contact, one set of which are probably, he thinks, concerned in the separation of nutritive matter from the maternal blood, and the other destined to convey it into the vessels of the fœtus. The placenta is formed of several *lobes* or *cotyledons*, which can be readily distinguished from each other on the uterine surface; but towards the fœtal surface are confounded into one mass. It is composed of the umbilical vessels, areolar tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fœtus.*

The main function of the placenta appears to be like that of the lungs in the adult. It admits of the blood of the fœtus being *shewn* to that of the mother, and undergoing requisite changes. It may, also, be an organ for nutritive absorption, as observed above.

**PLACEN'TA CRUORIS,** see Blood—p. Febrilis.

Ague cake — p. Oblata, P. prævia — p. Obvia, P. prævia.

PLACEN'TA PRÆ'VIA, (from præ, 'before,' and via, 'way,') P. ob'via, P. obla'ta. Presentation of the placenta; a condition which gives rise to un-avoidable hemorrhage from the uterus. The safety of the female depends upon speedy delivery.

PLACENTA SANGUINIS, see Blood — p. Uteri Succenturiata, Decidua.

PLACENTAL, *Placenta'lis*. Relating, or appertaining to, the placenta.

PLACENTI'TIS, *Placenti'tis*, *Placo'i'tis*, *Inflamma'tio placen'tæ*. A hybrid word — from *placenta*, and *itis*, a suffix denoting inflammation. Inflammation of the placenta.

PLACENT'ULA, 'a little cake.' A rudimental placenta. The placenta of an abortion.

PLACOITIS, Placentitis.

PLACUNTITIS, Placentitis.

PLADAROMA, Pladarosis.

PLADARO'SIS, *Pladaro'ma*, *Pladaro'otes*, from *πλαδάρως*, 'soft.' A soft tumour on the eyelid, unaccompanied with redness or pain.

PLADAROTES, Pladarosis.

PLAFOND DES VENTRICULES DU CERVEAU, Corpus callosum.

PLAGA, Ictus, Wound.

PLAGIOL'IA, *Planobol'ia*, from *πλαγιος*, 'to one side,' and *βαλλειν*, 'to throw.' Imperfect emission of sperm into the vagina. Emission to one side; sometimes practised to render impregnation less probable.

PLAGUE, from *πληγη*, *plaga*, 'a stroke.' *Pestis*, P. orientalis, P. bubona'ria orientalis seu inguina'ria, P. contagio'sa, P. acutiss'ima, P. septic'a, P. glandulo'sa, P. Ade'no-septica, P. inguina'ria, Pestil'itas, Ephem'era pestilential'is, E. mortif'era, Lues inguina'ria, Clades glandula'ria, Phthora, Pestilen'tia, Lues, Loïmos, Febris ade'no-nervo'sa, Læmos, Læmē, Læ'mia, Læmop'gra, Chaosda, Anthra'cia Pestis, Anthracotyphus, Febris pestilens, Syn'ochus pestilential'is, Typhus pestis, T. pestilential'is, T. gravis'simus, T. anthrac'icus, T. Bubon'cus, Ecxanthe'ma pestis, the Pest, Levant plague, Septic or glandular pestilence, (F.) Peste, Typhus d' Orient, Fièvre du Lévant. An eminently malignant disease; endemic in the Levant; frequently epidemic, and destroying at least two-thirds of those it attacks. It is a fever of the most aggravated kind, with affection of the lymphatic glands of the groin or axillæ, and carbuncles. Its miasmata — it has been conceived — adhere to different organic textures, to woollen goods, clothing and furniture; and may thus be transported to a considerable distance; but this is not certain. The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological anatomy has afforded little light with respect to it. Various means have been used for arresting it, but none have seemed to be pre-eminently distinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the suppuration of the buboes should be aided as far as practicable. For preventing the importation and spread of the plague, the Quar'antine Laws have been instituted; and when the disease has actually appeared, a cordon sanitaire has been drawn round the infected district, so as to prevent all communication.

PLAGUE, COLD. A severe form of congestive fever, seen in the Southern States. Bilious pneumonia, in which there is no reaction, has been, also, so called.

PLAGUE MARK, Plague token.

PLAGUE, PALL. A malignant fever, greatly resembling Plague, which prevailed in Rajpootana after July, 1836.

PLAGUE SPOT, Plague token.

PLAGUE TOKEN, *Plague mark*, *Plague spot*. A mark by which one struck with the plague was known. Perhaps the early stage of carbuncle in unfavourable cases. It is described as a small tubercle — *Bossa* — somewhat resembling a wart, callous and more or less deficient in sensibility, varying in size from that of a millet-seed to that of a bean.

PLAGULA, Compress, Pledget, Splint.

PLAIE, Wound — p. d'Arme à feu, Wound, gunshot — p. d'Arquebusade, Wound, gunshot — p. Contuse, Wound, contused — p. Evénimée, Wound, poisoned — p. par Arrachement, Wound, lacerated — p. à Lambeaux, see Flap.

PLANANTHUS FASTIGATUS, Lycopodium selago — p. Selago, Lycopodium selago.

PLANARIA LATIUSCULA, Distoma hepaticum.

PLANCHER (F.), 'floor.' In anatomy, the inferior wall or boundary of a cavity.

PLANCHER DU CERVEAU, Tentorium.

PLANCUS, Leiopus.

PLANE, Plexus — p. Mesial, see Mesial.

PLANET-STRUCK, see Sideratio.

PLANE'TES, *Plane'ticus*, *Plan'icus*, *Errabundus*, *Errat'ic*. An epithet given to diseases, whose returns are irregular — especially to intermittent fever; *Planetes Febris*, *F. Errat'ica*, *F. Erronea*, *F. Vaga*.

PLANETICA ARTHRITIS, Gout, wandering.

PLANICUS, Planetes.

PLANIPEDES, Steganopodes.

PLANIPITES PEDIS, Sole.

PLANOBOLIA, Plagiobolia.

PLANTA NOCTIS, Hydroa, Sudamina — p. Pedis, Sole — p. Prima pedis, Tarsus.

PLANTA'GO, P. Major, *Centiur'via*, *Arnoglossum*, *Septiner'via*, *Polynetrion*, *Heptaplen'ron*, *Planta'go latifo'lia* seu *major* seu *vulgar'is*, (F.) *Plantain commun.* Family, Plantagineæ. *Sec. Syst.* Tetrandria Monogynia. The leaves have been said to be refrigerant, attenuant, sub-styptic, and diuretic.

PLANTAGO AQUATICA, *Alisma plantago*.

PLANTAGO CORON'OPUS, *Coronopo'dium*, *Cornucervi'num*, *Stella terra*, *Plantago*, *Buckshorn Plantain*. Properties like the last.

PLANTAGO NITIDA, P. psyllium.

PLANTAGO PSYL'LIUM, P. nit'ida, *Psyllium*, P. erectum, *Pulicaris herba*, *Crystal'lion*, *Cynmoi'a*, *Branching Plantain*, *Fleawort*, (F.) *Herbe aux puces commune*. The seeds have a nauseous, mucilaginous taste, and no remarkable smell. The decoction of the seeds is recommended in hoarseness and roughness of the fauces.

PLANTAGO VULGARIS, *Plantago*.

PLANTAIN, BRANCHING, *Plantago psyllium* — p. Buckshorn, *Plantago coronopus* — p. *Commun*, *Plantago* — p. d'Eau, *Alisma plantago* — p. Rattlesnake, *Goodyera pubescens* — p. Robin's, *Erigeron bellidifolium* — p. Tree, *Musa paradisiaca* — p. Water, *Alisma plantago*, *Unisema deltofolia*.

PLANTAIRE, *Plantar muscle* — p. Grêle, *Plantar muscle*.

PLANTAR, *Planta'ris*, from *planta*, 'the sole of the foot.' That which relates or belongs to the sole of the foot. This name has been given to several parts.

PLANTAR APONEURO'SIS, P. fas'cia. A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies

the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the medium of septa, which it sends between them.

PLANTAR ARCH, see Plantar arteries.

PLANTAR ARTERIES. These are two in number, and arise from the extremity of the posterior tibial artery. They are distinguished into:—The *internal plantar artery*, situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe. The *external plantar artery* is larger than the preceding, and ought to be considered as the termination of the posterior or tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extremity of the first metatarsal bone, and anastomoses with the perforating branch of the *dorsalis tarsi*. In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plantar Arch* or *Cross*. It gives branches in all directions. The inferior and posterior have received no name. The superior—three in number—are the *posterior perforating arteries*. The anterior branches are larger, and there are commonly four. They furnish the *anterior perforating*, and the *collaterals* of the last four toes.

PLANTAR CROSS, see Plantar arteries—p. Fascia, P. aponeurosis.

PLANTAR LIGAMENTS. A name given to the inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

PLANTAR MUSCLE, *Plantaris*, *P. gracilis*, *Tibialis gracilis*, *Extensor tarsi minor*, (F.) *Plantaire*, *P. Grêle*, *Jambier grêle*, *Petit fémoro-calcaneien*, (Ch.) A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the os femoris: below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and conversely. It can, also, assist in the flexion of the leg on the thigh.

PLANTAR NERVES. These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into—1. The *internal plantar nerve*, which extends from the inferior part of the tibial nerve to both sides of the first three toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c. 2. The *external plantar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches;—the one—*profunda*—is distributed to the short flexor of the great toe: the interosseus and abductor pollicis pedis: the other—*superficialis*—sends filaments to the short flexor of the little toe, the two sides of that toe, the outer side of the 4th, and the last lumbricalis.

PLANTAR REGIONS OR SURFACES are different regions or surfaces of the sole of the foot. Three are generally reckoned,—the *internal*, *middle*, and *external*.

PLANTAR VEINS follow a similar arrangement.

PLANTARIA, Dengue.

PLANTARIS, Plantar, P. muscle—p. *Superficies pedis*, Sole—p. *Vernis*, see *Flexor longus digitorum pedis profundus perforans* (accessorius.)

PLANTARIUM, Pubes.

PLANTE DU PIED, Sole.

PLANTI-SOUS-PHALANGIENS, Lumbricales pedis—p. *Tendino-phalangiens*, Lumbricales pedis.

PLANUM AFONEURATICUM DIAPHRAGMATICIS. The tendinous expansion of the diaphragm.

PLANUM OS, from *planus*, 'soft, smooth.' The papyraceous or orbital plate of the ethmoid bone was formerly so called.

PLANUM PÉDIS, Sole.

PLANUM SUPERMUS LINGUÆ. The upper surface of the tongue.

PLANURIA, from *πλανος*, 'wandering, false,' and *ουρον*, 'urine.' Discharge of urine through unwonted ways.

PLAQUEMINIER D'EUROPE, Diospyros lotus.

PLAQUES GAUFREES, Peyeri glandulæ—p. *Laitenses*, see *Taches laitenses*.

PLASMA, Liquor sanguinis.

PLASMEXHIDROSIS, from *plasma*, the *liquor sanguinis*; *εξ*, 'out of,' and *ἰδρωσις*, 'perspiration.' Exudation of the plasma of the blood from the vessels.

PLASTER, Emplastrum—p. Adhesive, Emplastrum resinæ, Sparadrapum adhesivum—p. Adhesive, Baynton's, see Emplastrum resinæ—p. Adhesive, of pitch and resins, Emplastrum de pice et resinis glutinans—p. Strengthening, Emplastrum ferri, Emplastrum oxidi ferri rubri—p. Warm, Emplastrum calcificiens—p. Wax, Emplastrum cere.

PLASTIC, *Plasticus*, *Formativus*, *Formative*, from *πλάσσω*, 'I form.' That which forms, or serves to form.

PLASTIC ELEMENT. One which bears within it the germs of a higher form.—Gerber.

**PLASTIC FORCE.** The generative or formative power in organized bodies. It is also called *Nisus formativus*, *Vis seu Virtus plastica* seu *formativa*, *Vis essentialis* seu *reproductiva*, *Facultas formatric* seu *nutric* seu *antric* seu *vegetativa*; *Blas alterativum*, *Motus assimilationis*, *Anima vegetativa*, *Plasticismus*, *Virtus formatric*, *Plasticitas*, *Plasticity*, *Force of Nutrition*, *F. of assimilation*, *Force of Formation*, *Force of vegetation*, *Puissance du monde intérieur* (Buffon), *Bildungstrieb*, *Germ-force* of the Germans.

**PLASTIC LYMPH**, *Liquor Sanguinis*—p. Surgery, *Morioplasticæ*.

**PLASTICIMUS**, *Plastic Force*.

**PLASTICITAS**, *Plastic Force*.

**PLASTICITY**, *Plastic Force*.

**PLASTILYTIC**, *Antiplastic*.

**PLASTILYTICUM (HEMATOLYTICUM)**, *Spanæmic*.

**PLATA**, *Scapula*.

**PLATANO**, *Musa Sapientum*.

**PLATANTHERA ORBICULATA**, *Large round-leaved Orchis*; indigenous. *Order Orchidaceæ*; flowering in July. The leaves are large, soft and fleshy, and are used, in certain places, for dressing blisters.

**PLATANUS**, *Musa paradisiaca*.

**PLATEA**, *Bothriocephalus latus*.

**PLATES**, *MANSFORD'S*, see *Galvanism*.

**PLATIASMUS**, from *πλατυς*, 'broad.' Excessive development of the lips, causing the articulation to be imperfect.

**PLATINA**, *Platinum*.

**PLATINUM**, *Platina*, from (S.) *plata*, 'silver.' The preparations of platinum resemble in their therapeutical properties those of gold. The *BICHLORIDE*, *Platini Bichloridum*, made by dissolving platinum in *aqua regia*, and the *DOUBLE CHLORIDE OF PLATINUM AND SODIUM*, *Sodii chloroplatinus*, *Chloroplatinatæ of Sodii*, prepared by dissolving bichloride of platinum and pure chloride of sodium, in proper proportions, in water, evaporating and crystallizing, — are the preparations used. They are not much prescribed.

**PLATULA**, see *Pediculus*.

**PLATYBREGMATE**, see *Cranium*.

**PLATYCORIA**, *Mydriasis*.

**PLATYCORIASIS**, *Platyocoria*.

**PLATYNO'SIS**, from *πλατυς*, 'broad.' *Amplificatio*. Morbid extension of parts.

**PLATYOPHTHALMON**, *Antimonium*.

**PLATYPOLIA**, see *Kyllosis*.

**PLATYPUS**, see *Kyllosis*.

**PLATYS'MA**, from *πλατυς*, 'broad.' Anything broadly extended. A spread plaster.

**PLATYS'MA MYOIDES**. *P. Myoides*, *Musculus cutaneus*, *M. subcutaneus* (Winslow), *Quadratus genæ vel latissimus colli*, *Expan'sio musculo'sa*, *Tetragonus*, *Stomomaton*, (F.) *Thoraco-maxillo-facial*, *Thoraco-facial* (Ch.), *Peaucier*. A muscle situate superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely downwards, and from without inwards. They arise from the areolar tissue, which covers the anterior and superior part of the chest; pass before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Musculus Risorius Santorini*. The platysma myoides depresses the commissure of the lips, and carries it outwards. It contributes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

**PLATYSTER'NOS**, from *πλατυς*, 'broad,' and *στερον*, 'the sternum.' One who has a broad well developed chest.—D. Pechlin.

**PLATYS'TOMUS**; from *πλατυς*, 'broad,' and *στομα*, 'mouth.' One who has a broad mouth.

**PLAUTUS**, *Leipom*.

**PLECHAS**, *Perinæum*.

**PLECTANÆ**, *Cornua uteri*.

**PLECT'ANE**, *Plica*, *Plegma*, *Plexus*. A fold; a plexus. Also, a cornu of the uterus.

**PLECT'RUM**. The styloid process of the temporal bone. Also, the uvula, and the tongue.—Castelli.

**PLEDGET**, (D.) *Plagghe*, *Plumaceolus*, *Lintæmen*, *Plag'ula*, (F.) *Plumacean*, *Plumasean*. A small compress or gâteau of lint — (the filaments arranged parallel to each other) — flattened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings *in situ*, and to absorb the discharges.

**PLEGE**, *Blow*, *Ictus*.

**PLEGMA**, *Plectane*, *Plexus*.

**PLEGOMETER**, *Pleximeter*.

**PLEIN**, (F.) 'Full.' The middle part of a roller.

**PLEIOMASTHUS**, *Polymasthus*.

**PLEIOMAZIA**, see *Polymasthus*.

**PLENA MULIER**, *Pregnant*.

**PLENITUDE**, *Fulness*.

**PLENITUDO**, *Plethora*.

**PLENCK'S DEPILATORY**, see *Depilatory*, *Colley's*.

**PLEONEC'TICA ATHYM'IA SEU MELANCHO'LIA**. A form of insanity characterized by a desire for gain or by covetousness.

**PLEONEC'TICUS**, from *πλεον*, 'more,' and *εχειν*, 'to have.' Covetous. Desirous to acquire: hence *mania pleonectica*.

**PLERO'SIS**, from *πληρης*, 'full,' also *Repletio*, *Refectio*, *Repletio*. Restoration of flesh after sickness. *Plethora*.

**PLEROTICUS**, *Incurans*.

**PLES'MONÈ**, *Plenitudo*, *Satietas*, *Satiety*. Intemperance. A condition the opposite to that of hunger.

**PLESSER**, *Plexor*.

**PLESSIMETER**, *Pleximeter*.

**PLETHOMER'IA**, from *πληθος*, 'many,' and *μερος*, 'a part.' Superabundance of parts, as in the case of six fingers to one hand.

**PLETHO'RA**, from *πληρω*, 'I fill.' *Polyæmia*, *Polyhyperhæmia*, *Panhypæmia*, *Polychymia sanguinea*, *Angiopleuro'sis*, *Angiopleuro'sis*, *Erythro'mia*, *Erythro'sis*, *Hæmatopletho'ra*, *Hæmatopletho'ra*, *Plenitudo*, *Multitudo*, *Redundantia*, *Repletio*, *Enchyma*, *Completio*, *Pleth'ory*, *Repletio*, *Sanguineus*, *Fulness*, (F.) *Abundance*, *Rédondance*. The word *plethora*, which means repletion, *Plero'sis*, expresses a superabundance of blood in the system, or in some part of it: — hence the division of *plethora* into *general* and *local*; the latter being called, according to its seat, *cerebral*, *pulmonary*, *nerine*, &c. The principal symptoms of *plethora* exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c. The blood of plethoric persons differs from healthy blood in the smaller ratio of water which it contains, and especially in the augmentation of the red corpuscles.

The tendency to *plethora*, or its actual existence, must be obviated by purgatives, proper diet,

exercise, &c.; and, if the danger from it be pressing, by blood-letting. This is, however, a doubtful remedy for general plethora, as it increases hæmatisis.

PLETHORA, LOCAL, Hyperæmia.

PLETHORIC, *Plethoricus*, *Polyæ'mic*, *Polyæ'micus*, *Sanguine*, *Sanguineus*, (F.) *Pléthorique*. Same etymon. Full of blood. Relating to or affected with plethora.

PLETHORICUS, Plethoric.

PLETHORY, Plethora.

PLETHOS, Satiety.

PLEUMON, Pulmo.

PLEUMONIA, Pneumonia.

PLEURA, *Pleurum*, *Pleuro'ma*, 'the side, a rib.' *Membrana pleurit'ica succin'gens seu costus succin'gens*, *Membrana seu Tu'nica costalis seu subcostalis*, *Hypopleur'is*, (F.) *Plèvre* ou *Pleure*. The pleura are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like all serous membranes—to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed. That portion of the pleura which lines the parietes of the chest is called *Pleura Costalis*; the portion that covers the lungs, *Pleura Pulmonalis*. The arteries of the pleuræ are from the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

*Pleura* is also used for *Cavity of the Pleura*, *Saccus Pleuræ*.

PLEURÆ. The sides of the chest.

PLEURAL, *Pleural'is*, *Pleur'icus*, *Pleur'ites*. That which concerns the pleura;—as a pleural fistula:—*pleural cavity*, *pleural hemorrhage*, &c.

PLEURALGIA, Pleurodynæ.

PLEURAPOHYSES, *Costæ veræ*, see *Costa*.

PLEURAPOSTEMA, Empyema.

PLEURARTHROACÆ, from *πλευρα*, 'a rib,' *αρθρον*, 'a joint,' and *κακος*, 'bad.' Caries of the ribs.

PLEURE, Pleura.

PLEURESIA, Pleuritis.

PLEURÉSIE, Pleurisy.

PLEURENIS, Pleuritis.

PLEURÉTIQUE, Pleuritic.

PLEURICUS, Pleural.

PLEURIS, Pleuritis.

PLEURISY, Pleuritis.

PLEURISY, BILIOUS, *Pleurit'is bilio'sa*. Pleurisy accompanied with bilious symptoms;—the effect of duodenitis or duodeno-hepatitis.

PLEURISY, FALSE, Pleurodynia.

PLEURISY, HEAD. A ridiculous term, occasionally used by the vulgar, in the Southern States especially, for bilious pneumonia before the pneumonic phenomena are developed, and whilst the head is prominently affected.

PLEURISY, HEMORRHAGIC, Hæmatothorax—p. Rheumatic, Pleurodynia—p. Root, *Asclepias tuberosa*.

PLEURISY, TYPHOID, *Pleurit'is typhoi'des* seu *typhoi'des* seu *typho'sa*. Pleurisy accompanied by adynamic symptoms.

PLEURITES, Pleural.

PLEURITIC, *Pleuriticus*, *Pleurit'ical*, (F.) *Pleurétique*; same etymon as *pleuritis*. Relating or appertaining to pleuritis—us 'pleuritic pain.'

PLEURITIS, from *πλευρα*, 'the pleura;' *Morbus lateralis*, *M. pleurit'icus*, *M. Costalis*, *Empyema Pleurit'is*, *Pleuris*, *Pleuræ'sis*, *Pleuræ'sia*, *Pleuritis costalis* seu *vera*, *Pleurit'ica Febris*, *Causa Pleurit'is*, *Passio pleurit'ica*, *Inflammat'io Pleuræ*, *Pleurisy*, *Inflammat'io of the Pleura*,

(F.) *Pleurésie*, *Fièvre pleurétique*, *Inflammat'io de la Plèvre*, may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure: dyspnoea, the inspirations short and frequent; cough dry, or with little expectoration; and difficulty of lying on the affected side. Symptoms attending the phlegmasiæ in general, strongly marked.

*Physical Signs*. There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand. There is more or less dullness of sound on percussion, the dullness diminishing or disappearing by change of position. On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it. Egophony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum. Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura: a *mediastinal pleurisy*, one situated in the anterior mediastinum; and *false pleurisy* or *rheumatismal pleurisy*, that which occupies the intercostal muscles. The last has received the name *Pleurodyn'ia*; that of *pleurisy* being exclusively appropriated to inflammation of the pleura. Pleurisy has also been distinguished into *dry* and *humid*, according as it is or is not accompanied by expectoration. *Humid* or *moist pleurisy* is now properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *catarrhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammations. It may terminate by resolution, effusion, or suppuration.

CHRONIC PLEURISY, which has been particularly described by Bayle, Broussais, and Laënnec, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

*Physical Signs*. The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes cedematous, and fluctuation may be occasionally felt between the ribs. On percussion the sound is dull, or if clear, only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds. There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, as recom-

mended by Dr. Thomas Davies, would of course settle the question.

On dissection of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes it seems cartilaginous and ossified. Its cavity frequently contains serous or sero-purulent effusions.

The acute form of the disease requires the most active treatment. General blood-letting, to such an extent as to make a very decided impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counter-irritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

Sauvages has given the name *PLEURITIS VENTOSA*, and Pringle that of *PLEURODYNIA VENTOSA*, to a pain behind the false ribs, attributed to the presence of air in the intestines.

*PLEURITIS BRONCHIALIS*, Bronchitis—p. Costalis, Pleuritis—p. Diaphragmatica, Diaphragmitis—p. Humida, Bronchitis—p. Muscularis, Pleurodynia—p. Notha, Pleurodynia—p. Pericardii, Pericarditis—p. Pulmonis, Pleuropneumonia—p. Rheumatica, Pleurodynia—p. Spuria, Pleurodynia—p. Spuria simulata, Pleurodynia—p. Typhoides, see Pleuritis, (biliosa)—p. Vera, Pleuritis.

*PLEUROCELE*, from *πλευρα*, 'the pleura,' and *κηλη*, 'a tumour.' *Hernia of the pleura*, *Hernia pleurica et pulmonalis*. This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

*PLEUROCOLLEISIS*, from *πλευρα*, 'the pleura,' and *κόλλα*, 'I glue.' An adhesion between the pleura costalis and pleura pulmonalis.

*PLEURODYNE*, Pleurodynia.

*PLEURODYNIA*, *Pleuralgia*, *Pseudo-pleuritis*, *Pseudo-pleurisy*, *Pleurodynē*, *Autalgia dolorosa*, A stitch, Pain in the side, *Stitch in the side*, *Parapleuritis*; *Stethorrhœmia*, *Rheumatismus pectoris*, *Pleuritis rheumatica*, *P. muscularis*, *P. spuria*, *False Pleurisy*, *Rheumatic or rheumatismal pleurisy*, *Pleuritis notha seu spuria* seu *spuria simulata*, *Pneumonia cæterna*, *Lagomorphosis*, *Thoracodynie*, *Dolor Pectoris cæternus*, (F.) *Point de côté*, *Douleur de côté*; from *πλευρα*, 'the side or pleura,' and *ὄδυνη*, 'pain.' A spasmodic or rheumatic affection, generally seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes even the corresponding arm. It is unaccompanied by fever, cough, or dyspnoea, excepting under the form of a *stitch*, when dyspnoea exists. It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resist, a blister will, almost always, remove it.

*PLEURODYNIA VENTOSA*, Pleuritis ventosa.

*PLEUROMA*, Costa, Pleura.

*PLEUROPATHIA*, from *πλευρα*, 'the pleura,' and *παθος*, 'a disease.' A disease of the pleura.

*PLEUROPERIPNEUMONY*, *Pleuroperipneumonia*, *Pleuropneumonia*, *Pneumopleuritis*, *Pneumopleuritis*, *Pleuritis pulmonis*, *Pneumonia pleuritis*. Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously. *Physical signs*. A dull sound is yielded by percussion for a variable extent over the more depen-

dent portions of the affected side. The loss of sound is partially modified by change of position. The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up, the crepitation or bronchial respiration of pneumonia may be detected; round the root of the lung, and near the inferior angle of the scapula, egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

*PLEUROPNEUMA*, Pneumothorax.

*PLEUROPNEUMONIA*, Pleuroperipneumony.

*PLEUROPNEUMONITIS*, Pleuroperipneumony.

*PLEUROPYESIS*, Empyema.

*PLEUORRHŒA*, from *πλευρα*, 'the side,' and *ρῆω*, 'I flow.' Accumulation of fluid in the pleura.

*PLEURRHŒA CHYLOSA*, Chylothorax—p. Lymphatica, Hydrothorax—p. Purulenta, Empyema—p. Sanguinea, Hæmatothorax—p. Serosa, Hydrothorax.

*PLEURORTHOPNŒA*, from *πλευρα*, 'the side,' *ὄρθος*, 'erect,' and *πνεω*, 'I respire.' Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

*PLEUROSO'MUS*, from *πλευρα*, 'side,' and *σωμα*, 'body.' A malformation in which the fissure is somewhat lateral, with eventration extending chiefly upon the upper part of the abdomen and upon the chest; the upper extremity of the fissured side being more or less atrophied.—Vogel.

*PLEUROSTOSIS*, from *πλευρα*, 'the pleura,' and *σσω*, 'a bone.' Ossification of the pleura, or in the cavity of the pleura. *Osteopleuria*.

*PLEUROTETANUS*, Pleurothotonos.

*PLEUROTHOTONOS*, *Pleurothotonos*, *Pleurotetanus*, *Tetanus lateralis*, from *πλευροθῶν*, 'laterally,' and *τονος*, 'tension.' A variety of tetanus, in which the body is curved laterally by the stronger contraction of the muscles of one side of the body.

*PLEUROTONOS*, Pleurothotonos.

*PLEURUM*, Costa, Pleura.

*PLÈVRE*, Pleura.

*PLEXIM'ETER*, *Plexometer*, *Plegometer*, *Plessimeter*, from *πλησσω*, 'I strike,' and *μετρον*, 'measure,' 'a measure of percussion.' An ivory plate of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one-sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage.—See Percussion, mediate.

*PLEXOMETER*, Pleximeter.

*PLEXOR*, from *πλησσω*, 'I strike.' *Plessor*. Any instrument employed in percussion. The ends of the fingers of the right hand brought together are the best *plexor*; as the finger of the left is, perhaps, the best *pleximeter*.

*PLEXUS*, *Plegma*, *Plectanē*, *Planē*, *Retē*, from *plecto*, 'I interlace,' 'I entwine.' (F.) *Lacis*. A network of blood vessels or of nerves. The nervous plexuses, *Implicatio'nes reticula'res* seu *Texus nervorum* belong—some to the system of encephalic nerves—others to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less

loose meshes, formed by the numerous and diversified anastomoses of the nervous filaments; from which proceed other branches, that are distributed to organs, or to other plexuses.

PLEXUS, CARDIAC, Cardiac plexus—p. Carotid, see Carotid nerve—p. Choroides, see Choroid—p. Ciliaris, Ciliary ligament—p. *Coliæque*, Cœliac plexus—p. Coronarius ventriculi, Gastric plexus—p. Coronary, see Cardiac plexus, and Coronary plexus—p. Gangliiformis semilunaris, Cœliac plexus—p. Gangliiformes, Ganglions, nervous—p. Glandiformes, Ganglions, nervous—p. Glandulosi Peyerii, Peyerii glandulæ—p. Hederaceus, Corpus pampiniforme—p. Hepaticus, Hepatic plexus—p. Infra-thyroidealis, see Thyroidealis veins—p. *Lombo-abdominal*, Lumbar plexus—p. Median, Cœlic plexus—p. Mesenterii proprius et maximus, Cœliac plexus—p. Nervorum anserinus, Facial nerve—p. *Opiatogastricæ*, Cœliac plexus—p. Pampiniformis, Corpus pampiniforme—p. Pharyngealis, see Pharyngeal nerve—p. Pneumogastricus, see Pneumogastric nerves—p. Retiformis, Corpus cavernosum vaginæ—p. Reticularis, Nihilus vestibuli, Choroides plexus—p. Solar, Cœliac plexus—p. *Sons-mésentérique*, Hypogastric plexus—p. *Testiculaire*, Spermatic plexus—p. *Trachélo-sous-cutané*, Cervical plexus—p. Vasculosus funiculi spermatici pampiniformis, Corpus pampiniforme.

PLICA, from *plicari*, 'to be knit together.' *Tricho'sis plica*, *Tricho'ma*, *Tricæ*, *T. Incuborum*, *T. Scrofo'rum*, *Plica Polonica*, *P. Polon'ica Juda'ica*, *P. Cachect'ica*, *P. Saxon'ica*, *Affectio Sarmat'ica*, *Matted hair*, *Plaited hair*, *Trichomatose hair*, *Lues Sarmat'ica*, *L. Polon'ica*, *L. Trichomat'ica*, *Helo'sis*, *Helo'tis*, *Cir'ragra*, *Cir'rha-gra*, *C. Polono'rum*, *Ecphy'ma tricho'ma*, *Morbis Cirrho'rum*, *Plica caput Medusæ*, *Plica longicauda lateralis*, *Coma Cæsæ'rea*, *Kolto*, *Rhopal'ois*, *Plicat'io*, *Plicat'ura*, (F.) *Plique*, *P. Polonaise*. A disease endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some it has been regarded as a disease; by others, as the want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but sometimes in that of other parts, as the beard, the hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. *Plica multiform'is* or *Plica caput Medusæ*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. lacinia'ta*, (F.) *Plique en lamères*) or much twisted (F.) *P. en vrilles*.) 2. *Plica longicauda*, (F.) *Plique solitaire* ou à queue; when the hair is united into a single long mass, and 3. *Plica cæspit'osa*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Cutaneous phlegmasiæ*; but it is far from demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection—*sui generis*—of the dermoid system. The idea that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable.

PLICA, Plectane—p. Cachectica, Plica—p. Caput Medusæ, Plica—p. Longicauda lateralis, Plica—p. Lunata, Valvula semilunaris—p. Polonica Judaica, Plica—p. Saxonica, Plica—p. Semilunaris, Valvula semilunaris.

PLICATIO, Plica.

PLICATURA, Plica.

PLICATURÆ CEREBRI, Gyri cerebri.

PLICIOS, Perinæum.

PLINTHIUM, πλινθιον. A machine invented by one Nilus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armamentarium Chirurgicum*.

PLIQUE, Plica—p. *Polonaise*, Plica.

PLOCARIA CANDIDA, Fucus amylaceus.

PLOMB, Plumbum.

PLOMB, (F.) The sulphuretted gas disengaged from privies, which proves fatal at times to the nightmen, (F.) *Vidangeurs*, engaged in emptying them.

PLOMB, ACÉTATE ACIDE DE, Plumbi superacetates—p. *Blanc*, Plumbi subcarbonas—p. *Blanc de*, Plumbi subcarbonas—p. *Carbonate de*, Plumbi subcarbonas—p. *Chlorure de*, Plumbi chloridum—p. *Iodure de*, Plumbi iodidum—p. *Nitrate de*, Plumbi nitras—p. *Oxide de*, *fonsdu*, Plumbi oxydum semivitreum—p. *Oxide rouge de*, Plumbi oxydum rubrum—p. *Oxide semi-vitreux de*, Plumbi oxydum semivitreum.

PLOMBAGINE, Graphites.

PLOMBIÈRES, MINERAL WATERS OF, *Fontes medicati Plumbærii*, *Thermæ Plumboriæ*. Plombières is a town in the department of the Vosges, 17 leagues from Nancy, and two from Remiremont. Here are several sources of thermal water. That which is called *Saponaceus* (F.) *Savouneuse*, is formed of the subcarbonate and sulphate of soda, chloride of sodium, silica, carbonate of lime, and much vegeto-animal water. This last component, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous character. This is the origin of its name. The waters of Plombières are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin.

PLORATIO, Lachrymatio.

PLORATUS, Lachrymatio.

PLOTUS, Leiopus.

PLUGGING (Sw.) *Plugg*, (F.) *Tamponnement*.

The act of stopping a hole. The introduction of a plug of lint or rag into a wound or natural cavity—as the uterus or vagina—to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache.

PLUM, Prunum, Prunus domestica—p. Assyria, Sebestina.

PLUMA, Lanugo.

PLUMACEAU, Pledget.

PLUMACEOLUS, Pad, Pledget.

PLUMASSEAU, Pledget.

PLUMBAGO, Graphites, Persicaria.

PLUMBA'GO EUROPE'Æ, *P. lapathifolia* seu *undulata*, *Dentaria*, *Crepanella*, *Synanthera*, *Dentelaria*, *Leadwort*, (F.) *Dentelaire*, *Herbe au Cancer*. Family, Plumbaginæ. Scr. Syst. Pentandria Monogynia. The root was formerly much esteemed as a cure for the toothache, like the *Pellitory of Spain*, which is also called *Dentaria*.

PLUMBI ACETAS, P. superacetates—p. *Acetas dilutum* alcoholicum, Liqueur plumbi subacetatis dilutus—p. *Acidulus siccus*, Plumbi superacetates—p. *Carbonas*, P. Subcarbonas.

PLUMBI CHLORIDUM, *Chloride of Lead*, (F.) *Chlorure de Plomb*. This salt of lead has been used in the form of lotion and ointment in cancerous ulcerations.

PLUMBI DEUTOXYDUM RUBRUM, P. oxydum rubrum—p. *Hydriodas*, P. Iodidum—p. *Iodhydriodas*, P. Iodidum.

PLUMBI IODIDUM, *Plumbi Iodure'tum* seu *Hydriodas* seu *Hydro'iodas* seu *Iodhydriodas*, *Plumbum iodatum* seu *Hydro'iodium*, *Iodide* or *Iodure't of Lead*, (F.) *Iodure de Plomb*, *Iodure plombique*. This salt is formed by the double decomposition of *iodide of potassium* and *nitrate*

of lead. It is used in scrofulous affections internally and externally. Dose, three or four or more grains. It is official in the Pharmacopœia U. S. for 1851.

PLUMBI IODURETUM, P. Iodidum.

PLUMBI NITRAS, *Plumbum nitricum, Nitras plumbicus, Nitrum saturninum, Nitrate of lead, (F.) Nitrate de Plomb.* A salt formed by the action of diluted nitric acid on litharge. Nitrate of lead has the same medical action as the other soluble salts of lead, and is a valuable antibrucine. It has been used, also, as an excitant antiseptic to wounds, ulcers, &c., and is the basis of Ledyen's disinfecting liquid.

PLUMBI NITROSACCHARAS, *Nitrosaccharate of lead.* (Sacchar. p. j; Acid. nitric. p. ij; Aquæ p. x.) Beat together in a porcelain dish as long as chemical action continues: dilute the liquor with water, neutralize with chalk, and to the filtered solution add acetate of lead so long as a precipitate is formed. Collect, wash, and dry the precipitate, which is saccharate of lead. Dissolve in dilute nitric acid, (one part acid to nineteen of water,) filter and evaporate to form crystals, which are transparent, of an amber colour, and in regular hexagonal plates or prisms.

Advised as a solvent of phosphatic calculi.

PLUMBI OXYDUM ALBUM, *Plumbi subcarbonas* — p. Oxydum carbonatum per acidum acetosum, *Plumbi subcarbonas* — p. Oxydum fusum, *Pl. oxydum semivitreum.*

PLUMBI OXYDUM RUBRUM, *Minium, Miltus, Deutoxydum plumbi rubrum, Superoxydum Plumbosum, Plumbum oxydatum rubrum, Sandix, Sandyz, Red lead, (F.) Oxide de plomb rouge.* It is sometimes used to kill vermin.

PLUMBI OXYDUM SEMIVITREUM, *Lithargyrum, Lithargyrum, Lithargyrium, Oxydum plumbi fusum, Spuma argenti, Semi-vitrified oxyd of lead or litharge, Calciteosa, Cathmia, (F.) Oxide de plomb fondu, Oxide de plomb semivitreux,* (a yellow protoxyd of lead, prepared by heat, combined with carbonic acid.) It occurs in scales of a whitish-red colour, and semi-vitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis, Emplastrum plumbi, &c.* Formerly, the *Litharge of gold, Chrysis, Mas-sicot, and Litharge of silver, Almaria,* were distinguished in commerce. These were merely ordinary litharge, resembling gold or silver in colour.

PLUMBI SUBCARBONAS, *Carbonas plumbi, Plumbi Carbonas* (Ph. U. S.), *Plumbum carbonicum, Magisterium plumbi, Oxydum plumbi album, Cerussa, Aergo plumbi, Peimmythion, Peimnython, Simmitium, Flake white, Blanca, Gersa, Ifjides, Subcarbonate of lead, Cerusse, White lead, (F.) Carbonate de plomb, Blanc de plomb, Plomb blanc,* (prepared by exposing spiral rolls of lead to the fumes of vinegar, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, scaly texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is also used in the formation of ointments and plasters.

PLUMBI SUPERACE'TAS, *Cerussa acetata, Plumbi acidulus siccus, Plumbi acetas* (Ph. U. S.), *Sal vel saccharum Saturni, Superacetate of lead, Plumbum aceticum, Dulcedo Saturne, Acetas plumbicum crystallisatum, Sal plumbi, Sugar of lead, Protoacetate of lead, (F.) Acétate acide de plomb, Sel ou sucre de Saturne. (Plumb. carb. ̄bj, Acid acetic. cong. 1½.* Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pellicle, that crystals may be formed. Wash the crystals and dry on

blotting-paper. *Ph. L.*) The acetate of lead has a sweet, styptic taste; a very white colour, and silky lustre. It is astringent; and, in weak solution, cooling and sedative; in strong, stimulant. It is given internally, in visceral and other hemorrhages, combined with opium, and is used externally, in solution, in inflammation, burns, bruises, gonorrhœa, &c. Dose, gr. ss to iss.

PLUMBI TANNAS, see Tannin.

PLUMBIUM ACETAS CRYSTALLISATUM, *Plumbi superacetas.*

PLUMBOSUM SUPEROXYDUM, *Plumbi oxydum rubrum.*

PLUMBUM, *Molybdos, Molibdus, Saturnus, Capricornus, (F.) Plomb.* Lead. A solid metal of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxydizable, when heated in the air, and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. S. g. 11.352.

Its use is to form oxides and salts. In its metallic state, it has no action upon the body; but when oxydized or united with an acid, it acts, in large doses, as a powerfully astringent poison.

PLUMBUM ACETICUM, *Plumbi superacetas* — p. Album, Tin — p. Candidum, Tin — p. Carbonicum, *Plumbi subcarbonas* — p. Cinereum, Bismuth, subnitrate of — p. Hydroiodicum, *Plumbi Iodidum* — p. Iodatium, *Plumbi Iodidum* — p. Nitricum, *Plumbi nitras* — p. Oxydatum rubrum, *Plumbi oxydum rubrum.*

PLUMS, SEDED, see *Diospyros Virginiana* — p. Winter, see *Diospyros Virginiana* — p. Yellow, see *Diospyros Virginiana.*

PLUNGE BATH, see Bath.

PLUNGING SIPHON, see Siphon.

PLUNKETT'S CAUSTIC FOR CANCERS, *Plunkett's Ointment.*

PLUNKETT'S OINTMENT, *Plunkett's Caustic for Cancers.* This empirical cancer remedy consists of *Arsenios acid, Sulphur,* and the powdered flowers of the *Ranunculus flammula* and *Cotula fetida*; — levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

PLURAL BIRTH, see Multiparous.

PLUTEA. Avicenna gives this name to duplicatures of the dura mater, such as the *Falx cerebri.*

PLUTONIUM, Barium.

PNEOBIDIOMANTIA, *Docimasia pulmonum.*

PNEOBIDIOMANTICA, *Docimasia pulmonum.*

PNEUMA, Air, Life. See *Pneumatic Physicians.*

PNEUMAPOSTEMA, *Pneumapostema, Abscessus pulmonum;* from *πνευμων,* 'the lung'; and *αποστημα,* 'abscess.' Abscess of the lung.

PNEUMATELECTASIS, *Atelectasis pulmonum.*

PNEUMATHORAX, *Pneumothorax.*

PNEUMATIC, *Pneumaticus, Pneumatical,* from *πνευμα,* 'life, air.' Relating to pneuma, air or health.

PNEUMATIC PHYSICIANS, *Pneumatici.* Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease to consist in the different proportions of an element — which they called *Pneuma, πνευμα* — to those of the other elementary principles. This *πνευμα* was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire; — the sole elementary principles previously admitted.

PNEUMATICA, from *πνευμα,* 'air.' Appertaining to the breathing. Diseases of the respiratory function; — the second class in Good's

system of nosology. Agents that act on the respiratory organs.—Pereira.

PNEUMATICAL, Pneumatic.

PNEUMATOCELE, Physocœle.

PNEUMATODES, from *πνευμα*, 'wind,' and *εἶδος*, 'resemblance.' One distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.

PNEUMATOMETER, Spirometer.

PNEUMATOMPHALOCELE, Pneumatomphalus.

PNEUMATOMPHALUS, *Pneumatomphalocœle*, from *πνευμα*, 'flatus,' and *ομφαλος*, 'the umbilicus.' Umbilical intestinal hernia, containing a considerable quantity of flatus.

PNEUMATOSE, Pneumatosis—*p. Péritonéale*, Tympanites.

PNEUMATOSIS, *Aëro'sis*, from *πνευμα*, 'air.' *Flatus*, (F.) *Maladie ventense*, *Pneumatose*. Flatulence. Flatulent distention of the stomach or bowels, or both. Sauvages uses the word synonymously with emphysema. It is now generally employed for every abnormal collection of gaseous matters in any part of the body.

PNEUMATOSIS, Emphysema—*p. Abdominis*, Tympanites—*p. Enterica*, *Colica flatulenta*—*p. Pulmonum*, Emphysema of the lungs—*p. Ventriculi*, et *Pneumatosis enterica*, Flatulencia.

PNEUMATOTHORAX, Pneumothorax.

PNEUMECTASIS, Emphysema of the Lungs.

PNEUMOCACE, Neeropneumonia.

PNEUMOCHELOSIS, Pneumonia (bilious).

PNEUMOCHYSIS, Œdema of the lungs.

PNEUMOECTASIE, Emphysema of the lungs.

PNEUMOGASTRIC, *Pneumogastriens*, from *πνευμων*, 'the lung,' and *γαστρη*, 'the stomach.' Belonging to the lungs and stomach.

PNEUMOGASTRIC NERVES, *Eighth pair of nerves* (*Tenth pair* of some), *Par vagum*, *Pars vago*, *Nervus vagus seu ambulatrix seu pneumogastrius seu dec'imus seu sympathicus medius*, *Middle sympathetic*; because it is distributed especially to the organs contained in the chest and abdomen. This nerve arises from behind the eminentia olivariae and near the corpora testiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen laeereum posterius; behind the glossopharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus—*Plexus gangliiformis*, *Ganglion of the superior laryngeal branch*, of Sir Astley Cooper. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck, it enters the chest, gliding behind the subclavian vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchia to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach. In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypo-glossal, and great sympathetic nerves; and furnishes, 1, a *pharyngeal branch*, 2, a *superior laryngeal*, 3, *cardiac branches*. In the chest, it gives off, 1, the *inferior laryngeal* or *recurrent*, 2, the *pulmonary plexus*, and, 3, the *œsophageal branches*. On entering the abdomen, the œsophageal branches, which terminate the pneumogastric, are distributed upon the stomach, and give numerous filaments to that viscus, to the hepatic, œliacæ, gastro-epiploicæ, and solar plexuses.

Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

PNEUMOGRAPHY, *Pneumographia*, from *πνευμων*, 'the lung,' and *γραφη*, 'a description.' The part of anatomy that describes the lungs.

PNEUMOLOGY, *Pneumolog'ia*, from *πνευμων*, 'the lung,' and *λογος*, 'a discourse.' An anatomical treatise on the lungs. An anatomical description of the lungs.

PNEUMOMETER, Spirometer.

PNEUMOMETRY, *Pneumomet'ria*, from *πνευμων*, 'the lung,' and *μετρον*, 'measure.' Measurement of the capacity of the lungs for air. See Spirometer.

PNEUMON, Pulmo.

PNEUMONALGIA, Angina pectoris.

PNEUMONATELECTASIS, Atelectasis pulmonum.

PNEUMONECTASIS, Emphysema pulmonum.

PNEUMONEMPHRAXIS, from *πνευμων*, 'the lung,' and *εμφραξις*, 'obstruction.' Congestion and infarction of the lungs.

PNEUMONIA, *Empres'ma pneumoni'tis*, *Plenonia*, *Peripneumonia*, *Pneumonia peripneumonia*, *Pneumoni'tis*, *Pulmononia*, *Pulmonaria*, *Inflammatio pneumonica*, *I. pectoris acuta*, *I. pulmonum*, *Pneumosis*, *Pneumony*, *Peripneumony*, *Inflammation of the lungs*, *Lung-fever* (vulgarly), *Febria pneumonica*, (F.) *Inflammation des pommens*, *Fièvre pneumonique*, *F. peripneumonique*, *Fluxion de poitrine*, *Inflammation du parenchyme pulmonaire*. The chief symptoms of pneumonia are:—pyrexia, accompanied by pain, sometimes obtuse, at others pungent,—in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain, aggravated by the cough, which, with dyspnoea, exists throughout the disease. At first, the expectoration is difficult and painful; but, in the course of a few days, it becomes free, and the oppression of breathing is mitigated. When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed, but less painful, and a sense of weight is felt on one of the pleuræ. Pneumonia may, also, terminate by gangrene—but this rarely happens,—by induration and by hepatization.

*Physical Signs*. **FIRST STAGE**, (F.) *Engouement*. Diminution of the sound is generally observed over the affected part on percussion; auscultation exhibits an equal, dry, crepitating *râle*, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant *râle*, or it may be absent. In the neighbourhood of the affected parts it is natural or purile. The voice and cough are rather more resonant than usual. **SECOND STAGE**, (F.) *Hépatisation rouge*. When hepatization has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more resonant, and the heart's action is more distinct. **THIRD STAGE**, (F.) *Hépatisation grise*. When suppuration supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse, mucous *râle* is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs.

The prognosis must be guarded. It is not a

disease which we can always subdue. Great extent of inflammation; very considerable oppression; orthopnoea, and difficult expectoration are unfavourable symptoms. The most active treatment is of course necessary. General bleeding forms the sheet-anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local blood-letting; nauseating doses of antimonials; purgatives; and when the violence of the inflammation has been got under,—counter-irritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counter-irritants of all kinds are indicated.

**PNEUMONIA BILIOSA**, P. bilious.

**PNEUMONIA, BILIOUS**, *Pneumo'nia bilio'sa*, *Pneumocholo'sis*. Inflammation of the lungs, accompanied by gastric fever, and not uncommonly by typhoid symptoms;—*Pneumotypus*, *Pneumo'nia typho'idēs* seu *typho'idēs* seu *typho'sa*, Putrid, typhoid, adynamic, or erysipelatous *pneumo'nia*.

**PNEUMONIA, ERSIPELATOUS**, P. bilious—p. Gangrænosæ, Necropneumonia—p. Hypostatica, Pneumonopostasis—p. Intermittens, Pneumotyposis—p. Lobular, see Lobular—p. Notha, Pneumonia notha—p. Pleuritis, Pleuropneumonia—p. Putrid, P. bilious—p. Typhodes, P. bilious—p. Typhoid, P. bilious—p. Typhosa, P. bilious, Necropneumonia—p. Vesicular, Bronchitis, vesicular.

**PNEUMONIC, Pulmonic.**

**PNEUMON'ICA**. Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration. The second order of the class Pneumatica of Good.

**PNEUMONIC'ULA**, diminutive of pneumonia. A slight inflammation of the lung.

**PNEUMONICUS**, Pulmonic.

**PNEUMONIE**, Pneumonia—p. *Disséminée*, see Lobular—p. *Lobulaire*, see Lobular—p. *Mamelonnée*, see Lobular.

**PNEUMONIE DES AGONISANTS**, *Pneumonie hypostatique*. The hyperæmic engorgement, which takes place in the lungs during the last moments of life, has been so termed. It would seem to be hyperæmia rather than inflammation.

**PNEUMONIT'IC**, *Pneumonit'icus*. Of, or belonging to pneumonitis, or inflammation of the lungs.

**PNEUMONITIS**, Pneumonia.

**PNEUMONOCARCINO'MA**, from *πνευμων*, 'the lung,' and *καρκίνωμα*, 'cancer.' Cancer of the lungs.

**PNEUMONOCE'LE**, from *πνευμων*, 'the lung,' and *κηλη*, 'rupture.' Hernia of the lung.

**PNEUMONOCE'LE DIAPHRAGMAT'ICA INTER'NA**. Hernia of the lung through the diaphragm.

**PNEUMONOCELE EXTER'NA** seu **THORAC'ICA**, Hernia through the parietes of the chest.

**PNEUMONOCELE THORACICA**, Pn. externa.

**PNEUMONOCEDEMA**, Œdema of the lungs.

**PNEUMONOMELANOSIS**, see Melanosis.

**PNEUMONOPHTHISIS**, Phthisis pulmonalis.

**PNEUMONOPHTHOE**, Phthisis pulmonalis.

**PNEUMONOPLEURESIS**, Pleuroperipneumony.

**PNEUMONOPLEURITIS**, Pleuroperipneumony.

**PNEUMONORRHAGIA**, Hæmoptysis.

**PNEUMONORRHŒA**, Hæmoptysis.

**PNEUMONOSCIR'RHUS**, from *πνευμων*, 'the lung,' and *σκιρρος*, 'induration.' Induration of the lungs.

**PNEUMONOSES**, *Pneumoses*.

**PNEUMONY**, Pneumonia.

**PNEUMONYPOS'TASIS**, *Pneumo'nia hypostat'ica*. Pneumonia in a depending portion of the lung, caused by lying on the back.

**PNEUMOPÉRICARDE**, Pneumo-pericardium.

**PNEUMO-PERICARD'IUM**, *Pneumo-pericarditis*, (F.) *Pneumo-péricarde*, from *πνευμα*, 'air,' and *περικαρδῖον*, 'pericardium.' Laënnec designates, under this name, the effusion of air into the cavity of the pericardium.

**PNEUMOPHTHISIS**, Phthisis pulmonalis.

**PNEUMOPHYMATA**, Tubercles of the lungs.

**PNEUMOPLEURESIS**, Pleuroperipneumony.

**PNEUMOPHTHOE**, Phthisis pulmonalis.

**PNEUMORRHAGIA**, Hæmoptysis—p. Interna, Hæmatothorax.

**PNEUMOSEPSIS**, Necropneumonia.

**PNEUMOSEPS**, from *πνευμων*, 'the lung.' A term under which Alibert comprises every morbid affection of the lungs.

**PNEUMOTHOR'AX**, *Pneumatho'rax*, *Pneumatotho'rax*, *Emphyse'ma pectoris*, *Asthma æri-um*, *A. emphysemat'icum*, *Dyspnœ'a pneumat'ica*, *D. physothorac'ica*, *Physothorax*, *Ærothorax*, *Æropleurie* (Piorry), from *πνευμα*, 'air,' and *θωραξ*, 'the thorax.' An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air, a liquid is effused,—*Hydropneumothorax*. The disease may be spontaneous and simple, but in a large proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow, tympanic sound, even where the thickness of the parietes of the thorax is great. When the effusion is considerable, the affected side is dilated, but there is no rôle of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound will be varied. When the gaseous effusion is owing to a fistulous communication between the pleura and bronchia, the metallic respiration and resonance are heard; and if there be both gaseous and liquid effusion, with a fistulous communication, in addition to these signs there is the *tintement métallique*. The presence of liquid can always be ascertained by succussion. See Emphysema of the lungs.

**PNEUMOT'OMY**, *Pneumotom'ia*, from *πνευμων*, 'the lung,' and *τεμνω*, 'I cut.' Dissection of the lungs.

**PNEUMOTYPHUS**, Pneumonia, typhoid.

**PNEUMOTYPO'SIS**, *Pneumo'nia intermit'tens*, from *πνευμων*, 'the lung,' and *τυπος*, 'a stamp, a type.' Pneumonia characterized by periodicity.

**PNEUOBIOMANTIA**, Docimasia pulmonum.

**PNEUSIOBIOGNOSIS**, Docimasia pulmonum.

**PNEUSIOBIOSCOPE**, Docimasia pulmonum.

**PNEUSIS**, Respiration—p. Pertussis, Pertussis—p. Singultus, Singultus—p. Tussis, Tussis.

**PNEUSOMETER**, Spirometer.

**PNIGALION**, Incubus.

**PNIGMOS**, Orthopnoea, Strangulation.

**PNIGOPHOBIA**, Angina pectoris, Suffocation.

**PNIX**, Orthopnoea, Strangulation.

**PNOE**, Aura.

**PNEUM**. A nostrum of Dr. Samuel Hahnemann, the founder of the 'Homœopathic System,' which consisted—it is said—of borax only!

PNOCOLYTICUS, Asthmatic.

POCHE DES EAUX, see Liquor Amnii, and Parturition.

POCK, from Teut. *poea*, 'pock or little pouch.' A pustule of smallpox.

POCK, KINE, Vaccina.

POCKFRETTE, see Poekmark.

POCKHOLE, Poekmark.

POCKMARK, *Pockhole*, *Scrobic'ulus Vari'olæ*, *Cica'tric Vari'olæ*. The mark or pit or pitting left from a smallpox pustule. One pitted with smallpox is said to be *pockfretten*.

POCKY. Infected with, or appertaining to, or resembling, smallpox or syphilis.

POC'ULUM ABSINTHIA'TUM. This was regarded, in remote ages, as a wholesome beverage; the *absinthium*, or 'wormwood,' being supposed to act as an antidote to drunkenness.

POCULUM AMATORICUM, Philter — p. Diogenis, Palm — p. Emeticum, Gobellet, emetic.

POD'AGRA, *Podarthri'tis*, *Podorrhœu'ma*, *Podal'gia*, from *πους*, 'the foot,' and *αγρα*, 'seizure.' Pain which attacks the feet. Gout, situate in the articulations of the foot. It has, also, been used in a more extensive signification synonymously with *gout*.

PODAGRA ABERRANS, Gout, (wandering) — p. Arthritis, Gout — p. Retrograda, Gout, (retrograde.)

PODAGRARIA, Ligusticum podagraria — p. Ægopodium, Ligusticum podagraria.

PODAGRIC, *Podag'rical*, *Podag'ricus*, *Arthrit'icus*, *Arthrit'ic*, *Gouty*, (F.) *Goutteux*. Relating or belonging to gout. Affected with gout.

PODALGIA, Gout, Podagra.

PODALYRIA TINCTORIA, Sophora tinctoria.

PODANENCEPHALIA, see Podencephalus.

PODARTHITIS, Podagra.

PODARTHROC'ACÉ, from *πους*, 'the foot,' *αρθρον*, 'an articulation,' and *κακος*, 'bad.' Caries of the articulation of the foot.

PODENCEPHALIA, see Podencephalus.

PODENCEPH'ALUS, *Podanenceph'alus*, from *πους*, 'the foot,' and *κεφαλη*, 'the head.' A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull. This state of monstrosity is termed *Podanenceph'alia*, or more properly, *Podenceph'alia*. — G. St. Hilaire.

PODEX, Anus.

PODE'MA; from *πους*, 'foot,' and *οιδημα*, 'a swelling.' Œdema of the foot.

PODOL'OGY, *Podolog'ia*, from *πους*, 'the foot,' and *λογος*, 'a discourse.' A description of the foot. A treatise on the foot.

PODOPHYLLUM PELTA'TUM, *Podophyll'ulum*, *Anapodophyll'um Canadensē*, *May-apple*, *Mandrake*. Family, Podophylleæ. Ser. Syst. Polyandria Monogynia. A common plant throughout North America. The fruit is eatable, and esteemed by many. The leaves are said to be poisonous. The root or rhizoma, *Podophyllum* (Ph. U. S.), is purgative in the dose of 20 grains. It has also been used as an anthelmintic.

PODOPHYLLUM MONTA'NUM, *Mountain May-apple*, *Mandrake*, *Wild Lemon*, *Ducksfoot*, *Raccoon Berry*, *Yellow Berry*, *Ground Lemon*, has the same properties.

PODORRHŒUMA, Podagra.

PODOTH'E'CA, from *πους*, 'a foot,' and *θηκη*, 'a receptacle, a sheath.' The cuticle of the foot. An anatomical preparation. *Chiroth'e'ca*, has been used for the cuticle of the hand.

POÉLETTE, Cup.

POÉ'PHAGUS; from *πον*, or *ποις*, 'a plant, an herb,' and *φαγω*, 'I eat.' One who subsists on herbs or vegetables. The act of subsisting or

feeding on herbs or vegetables is called *Πο'ρφαγ'ia*. Hence Strabo calls the Irish *πορφαγοι*.

POGON, Beard.

POGONIASIS, *Pogo'nia*, from *πωγων*, 'the beard.' A female beard. Also, great strength or quantity of beard. A female having a beard — *Vira'go*.

POGONIUM, diminutive of *πωγων*, 'beard.' A weak or small beard.

POHON ANTIAR, Upas.

POI. A favourite aliment in the Sandwich Islands. It is a sort of paste made from the root of the Kalo — *Arum esculen'tum*.

POIDS ET MÉSURE, Weights and measures.

POIGNÉE, Manipulus.

POIGNET, Carpus.

POIL, Hair.

POILETTE, Cup.

POILS, see Typha latifolia.

POING, Fist.

POINT, Stitch.

POINT, BLISTERING. A name given by Dr. Rush to an indeterminate period in the course of a continued fever, intermediate between the stages of high excitement and collapse, in which blisters will — he thought — usually produce unequivocally good effects.

POINT DE CÔTÉ, Pleurodynia.

POINTS LACRYMAUX, Lachrymalia puncta.

POIRE, see Pyrus communis.

POIREAU, Allium porrum.

POIRIER, Pyrus communis.

POIS, Pisum — p. à *Centère*, see Fonticulus — p. *Chiche*, Cicier arietinum — p. *Cultivé*, Pisum — p. à *Gratter*, Dolichos pruriens — p. *Patate*, Dolichos tuberosus.

POISON, *Phar'macon*, *Phar'macium*, *Tox'icum*, *Vene'num*, *Virus*, *Delete'rium*, *Venenat'ion*, (F.) *Poison*. A generic name for all substances which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the vital properties or the texture of organs. Hence we speak of *fever poison*, *cholera poison*, &c. Poisons exist in the three kingdoms of nature: but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c.; whilst those that are the products of disease have the name *virus*. In common parlance, therefore, *poison* is restricted to deleterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes. 1. ACRID, IR'RITATING, CORRO'SIVE, or ESCHAROT'IC, such as the concentrated acids and alkalies; mercurial, arsenical, cupreous, and antimonial compounds, cantharides, &c. 2. NARCOT'IC; those that act particularly upon the brain; as hyoseyamus, opium, &c., but without inflaming the organ with which they come in contact. 3. NARCOTICO-ACRID or ACRO-NARCOT'IC; — those that act on the brain, but, at the same time, irritate the parts to which they are applied; as aconite, belladonna, &c. 4. SEPTIC or PUTRES'CENT; — those furnished by the animal kingdom. See Venou and Virus. Various classifications, of a similar character, have been recommended by different toxicologists; but they are liable to the objection, that they throw substances together whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them, in all such arrangements.

The following table, which exhibits a *coup d'œil* of the chief poisons, with most of the circumstances of importance connected with them, is not free from these objections.

TABLE, EXHIBITING THE SYMPTOMS, TREATMENT, AND MODE OF DETECTING THE VARIOUS POISONS, MINERAL, VEGETABLE AND ANIMAL.

N. B. In all cases the Stomach-Pump should be used as soon as possible.

I. INORGANIC POISONS.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
ACIDS. — <i>Acetic Acid.</i> — <i>Citric Acid.</i> — <i>Muriatic Acid.</i> — <i>Nitric Acid.</i> — <i>Sulphuric Acid.</i> — <i>Tartaric Acid.</i> — <i>Oxalic Acid.</i>	The acids, generally, are strong corrosive poisons. Sour, acrid taste, burning in the throat, which is increased by pressure, swallowing, or coughing; eructation, and excruciating pain in the stomach; more or less corrugation of the lining membranes of the mouth and <i>primæ viæ</i> ; excoriation about the mouth or such other parts of the skin as the acid may have touched. The matter vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black.	The carbonates of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions: for the acetic, citric, muriatic, sulphuric, and tartaric acids, they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk, on account of the great heat which is produced by their mixture. Subsequent inflammation to be treated by ordinary means.	<i>Sulphuric acid</i> is known by a white precipitate with any salt of baryta, insoluble in nitric acid. <i>Muriatic acid</i> is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light. <i>Nitric acid</i> gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid. <i>Acetic acid</i> exhales the odour of vinegar. <i>Citric acid</i> blackens when heated. <i>Tartaric acid</i> precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water. <i>Oxalic acid</i> gives a white precipitate with lime-water, which, when heated, is converted into carbonate of lime.
<i>Prussic Acid.</i> — <i>Oil of Bitter Almonds.</i> — <i>Laurel Water.</i>	Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contractile pupil; convulsions, death.	The carbonates of the alkalies and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach. Ammonia is an antidote; but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold <i>douche</i> to the head has been recommended.	<i>Prussic acid</i> exhales the odour of peach-kernels; forms a white precipitate with nitrate of silver neutralized with an alkali, gives a blue precipitate with the persalts of iron.
ALKALIES and their SALTS. — AMMONIA, <i>Strong Liquor or Water of.</i> — <i>Muriate of Ammonia or Sal Ammoniac.</i> — POTASSA. <i>Caustic Potassa, and Liquor Potassa.</i> — <i>Carbonate of Potassa, or Pearl Ash, and Salt of Tartar.</i> — <i>Nitrate of Potassa or Saltpetre.</i> — <i>Sulphuret of Potassium or Liver of Sulphur.</i> — SODA.	Violent, caustic, acrid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hicough; violent colic pains, with purging of bloody stools and membranous flakes; death.	The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalies and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalies, and therefore destroy their caustic effects.	The alkalies are known by their action on turmeric paper: restoring the colour of litmus, which has been reddened by an acid.  Carbonates are known by their effervescence with an acid; some of them affect the turmeric paper. Sal ammoniac gives out the pungent odour of ammonia, when mixed with quicklime.
EARTHS and COMPOUNDS. — BARYTA. <i>Carbonate of Baryta.</i> — <i>Chloride of Baryum.</i> — <i>Nitrate of Baryta.</i> — LIME.	Analogous to those of the corrosive metals. Violent burning in the stomach, vomiting, gripes, diarrhœa; excessive muscular debility, headache, convulsions death. Lime differs from baryta in being a pure irritant.	Poisoning by nitrate of potassa to be treated on general antiphlogistic principles; mucilaginous drinks. Liver of sulphur is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it.	Nitrate of potassa decrepitates and deflagrates when thrown on hot coals. Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid.
		The sulphates of soda and magnesia are prompt and effective antidotes to all the poisonous salts of baryta. Phosphate of soda will also counteract their effects. Lime may be neutralized by dilute acids. Carbonic acid, in soda-water, effervescing draught or yeast, it is supposed, would answer a good purpose. The fixed oils may be employed either for baryta or lime, when not in a compound state.	Baryta and its salts invariably give a white precipitate, insoluble in acid, with a soluble sulphate,  Lime, when dissolved, gives a white precipitate with oxalic acid. Also with carbonic acid, or a soluble carbonate. The same of baryta.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p><b>ALCOHOL.</b> — <i>Brandy, Wines, and all Spirituous Liquors.</i> —</p>	<p>Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy.</p>	<p>A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water; and large and active glysters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances be not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body be hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.</p>	
<p><b>VOLATILE OILS.</b> — <i>Creosote.</i> — <i>Dippel's Animal Oil.</i> — <i>Oil of Tar.</i> — <i>Oil of Tobacco.</i> — <i>Oil of Turpentine.</i> — <i>Fusel Oil.</i></p>	<p>General action, that of irritant poisons. Burning pain, vomiting, pungent taste, purging, &amp;c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited.</p>	<p>Creosote is immediately coagulated by albumen Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles.</p>	<p>No better mode of recognizing these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; creosote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known; and fusel oil has a peculiar, offensive, suffocating odour.</p>
<p><b>GASES.</b> — <i>Carbonic Acid, or Fixed Air.</i> — <i>Carbonic Oxide.</i> — <i>Fumes of Burning Charcoal.</i> — <i>Chlorine.</i> — <i>Sulphuretted Hydrogen.</i></p>	<p>Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons, in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy, or narcotic poisoning.</p>	<p>The antidotes to chlorine are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold affusions to the head, blood-letting, artificial respiration.</p>	<p>Chlorine is recognized by its peculiar odour and bleaching properties. Sulphuretted hydrogen, by its fetid smell, and the rapid blackening of lead. Carbonic acid, by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame.</p>
<p><b>IODINE.</b> — <i>Iodide of Potassium.</i></p>	<p>Irritant symptoms; burning pain in the throat, lacerating pain in the stomach, and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium.</p>	<p>Iodine combines with starch, and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation be subdued by general treatment.</p>	<p>Iodine is known by its odour, and the formation of a blue precipitate, when brought in contact with a cold solution of starch. Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch.</p>
<p><b>METALS.</b> — <b>ANTIMONY.</b> — <i>Tartar Emetic.</i> — <i>Chloride, or Butter of Antimony.</i> — <i>Oxide of Antimony.</i></p>	<p>Vomiting. If vomiting do not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; Purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting.</p>	<p>If vomiting have not been produced, it should be brought about by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly; powdered yellow bark may be used, until the infusion is prepared.</p>	<p>Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalis produce white precipitates. The muriate is known by a white precipitate, when it is poured into water. In its solid forms, it may be known by the formation of white fumes, when heated, which redlen litmus. It may also be converted into chloride, and then precipitated by adding water.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p><b>ARSENIC.</b>  <i>Arsenious Acid, or White Arsenic.</i>  <i>Orpiment, or Yellow Sulphuret of Arsenic.</i>  <i>King's Yellow.</i>  <i>Realgar, or Red Sulphuret of Arsenic.</i>  <i>Fly Powder.</i>  <i>Fowler's Solution.</i>  <i>Arsenical Paste.</i>  <i>Arsenical Soap.</i>  <i>Arsenite of Copper,</i>  <i>Scheele's Green.</i></p>	<p>Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching: vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited, greenish or yellowish, sometimes streaked with blood; diarrhœa; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; clammy sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death.</p>	<p>The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the <i>white arsenic</i> has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water, in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &amp;c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated.</p>	<p>If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering, and testing with, 1st. Ammoniacal sulphate of copper. 2d. Ammoniacal-nitrate of silver. (<i>Hume's Test</i>) 3d. Sulphuretted hydrogen gas. The first will produce a <i>green</i> precipitate; second, a <i>pale yellow</i> precipitate; third, a <i>bright yellow</i> precipitate, if arsenic be present. A portion of the powder, or one of these precipitates, carefully and thoroughly dried, is then to be mixed with charcoal and excited carbonate of soda, to be placed in a small glass tube, closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube, forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre.</p>
<p><b>BISMUTH.</b>  <i>Nitrate of Bismuth.</i>  <i>Pearl Powder.</i>  <i>Ozide of Bismuth.</i>  <b>COPPER.</b>  <i>Sulphate of Copper</i>  <i>Blue Vitriol.</i>  <i>Acetate of Copper,</i>  <i>Verdigris.</i>  <i>Carbonate of Copper,</i>  <i>Blue Verditer.</i>  <i>Arsenite of Copper</i>  <i>Scheele's Green.</i>  <i>Food cooked in dirty copper vessels, or pickles made green by copper.</i></p>	<p>Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hiccup, disagreeable metallic taste; vomiting; cramps; delirium: death.</p>	<p>Milk, and sweet mucilaginous drinks are recommended. Leeches, general bleeding; glisters; fomentations to be employed on the general principles of treatment for inflammatory symptoms.</p> <p>Albumen to be administered in either of its forms which can be most readily obtained, as milk or whites of eggs. Vinegar should not be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous.</p>	<p>If organic matter be present, it must be entirely destroyed, by heating the substance with nitromuriatic acid. After this has been done, and a clear, transparent solution in distilled water has been obtained, the subsequent process is as above indicated. If arsenious acid be submitted to the action of nascent hydrogen, it is deoxidized, and the metallic arsenic, thereby obtained, combining with hydrogen, forms arsenuretted hydrogen gas. (<i>Marsh's Test.</i>)</p> <p>Add to a suspected solution a few drops of pure chlorohydric acid, and place in it a slip of bright copper; no change occurs until the liquid is brought to the boiling point, when, if arsenic be present, even in small quantity, the copper acquires an iron-gray coating, from the deposit of that metal. Remove the slip of copper; wash it in water, dry it and gradually heat it in a reduction tube, when arsenious acid will be sublimed in minute octohedral crystals. The test succeeds with powdered arsenic, the arsenites, arsenic acid, the arseniates, and orpiment. It will even separate the arsenic from arsenite of copper, and from common lead-shot. <i>Reinsch's Test.</i></p>
			<p>Bismuth is known by the formation of a white precipitate, when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution.</p> <p>The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form, which deposits itself upon the iron.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p><b>GOLD.</b> <i>Chloride of Gold.</i> — <i>Fulminating Gold.</i></p>	<p>Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth.</p>	<p>The salts of gold are decomposed by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles.</p>	<p>Chloride of gold is very readily decomposed, and the gold separated in a metallic state. Proto-sulphate of iron, nitrate of silver and protochloride of tin, all answer this purpose. The precipitated powder will be found insoluble, except in nitro-muriatic acid.</p>
<p><b>IRON.</b> <i>Sulphate of Iron,</i> <i>Copperas,</i> <i>Green Vitriol.</i> — <i>Chloride of Iron.</i></p>	<p>Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin, and feebleness of the pulse.</p>	<p>Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment.</p>	<p>Iron is recognised by a bluish-black precipitate, with tincture of galls; rich blue, with prussiate of potassa; and a greenish or reddish precipitate, with the free alkalies or their carbonates.</p>
<p><b>LEAD.</b> <i>Acetate of Lead,</i> <i>Sugar of Lead,</i> <i>Carbonate of Lead,</i> <i>White Lead,</i> <i>Red Oxide, or Red Lead,</i> <i>Litharge.</i> — <i>Wines sweetened by Lead.</i> <i>Water which has been kept in Lead vessels.</i> <i>Acid food, cooked, or left standing in vessels glazed with Lead.</i></p>	<p>Irritation of the alimentary canal; spasms; nervous symptoms; paralysis, either partial or complete. When taken for some time, in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remission of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief be not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities.</p>	<p>Sulphate of magnesia and phosphate of Soda are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form, or colica pictonum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnia is recommended for the paralysis.</p>	<p>Soluble salts of lead yield a white precipitate with sulphates and carbonates in solution. Salts of chromic acid and iodide of potassium occasion a yellow precipitate. Sulphuretted hydrogen, a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid, and the dilute solution be tested as above.</p>
<p><b>MERCURY.</b> <i>Corrosive Sublimate.</i> — <i>Cyanide of Mercury.</i> — <i>Nitrate of Mercury.</i> — <i>White Precipitate.</i> — <i>Red Oxide, or Red Precipitate.</i> — <i>Sulphate, or Turbith Mineral.</i> — <i>Vermilion, or Red Sulphuret.</i></p>	<p>Violent symptoms of irritant poisoning; harsh metallic astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs, and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze; stupor, convulsions and death.</p>	<p>Albumen, in some form, must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means. Gold, finely mixed in dust, with fine iron filings. (?)</p>	<p>The free alkalies differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimate, a yellowish one; ammonia, a white; lime-water, an orange; and sulphuretted hydrogen, a black. If a drop of the solution be placed on a piece of gold, and touched with a knife or key, the mercury will be reduced, which amalgamates with the gold, producing a white spot. The nitrate of mercury gives a black precipitate with the free alkalies. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda, when the metallic mercury will sublime, and may be collected in a globe.</p>
<p><b>SILVER.</b> <i>Nitrate of Silver,</i> <i>or Lunar Caustic.</i></p>	<p>Those of other irritant poisons.</p>	<p>Chloride of sodium, or common salt, immediately decomposes this substance, and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms.</p>	<p>Nitrate of silver is distinguished by the formation of a white precipitate, insoluble in nitric acid, with chloride of sodium; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding muriate of soda to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc.</p>
<p><b>TIN.</b> <i>Chloride of Tin,</i> <i>Solution of Tin,</i> <i>used by Dyers,</i> <i>Oxide of Tin, or Putty Powder.</i></p>	<p>The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach.</p>	<p>Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms.</p>	<p>The chloride precipitates vegetable colouring matter; also albumen and gelatin. The white oxide is precipitated from its solution by free alkalies; with sulphuretted hydrogen gas, a brown precipitate.</p>
<p><b>ZINC.</b> <i>Oxide of Zinc.</i> — <i>Sulphate of Zinc,</i> <i>White Vitriol.</i> — <i>Acetate of Zinc.</i></p>	<p>Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects.</p>	<p>The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment.</p>	<p>A white precipitate is thrown down by the free alkalies from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
PHOSPHORUS.	Symptoms of irritant poisoning; pain in the stomach and bowels; vomiting, diarrhoea, tenderness and tension of the abdomen.	An emetic to be promptly administered; copious draughts containing magnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms.	Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliaceous odour.
GLASS, or ENAMEL.	If taken in very coarse powder, it produces irritation and inflammation of the bowels.	Large quantities of crumb of lead should be eaten, to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks.	

## II. ORGANIC POISONS.

## I. VEGETABLE POISONS.

IRRITANT POISONS.	SYMPTOMS.	TREATMENT.
<p><i>Anemone pulsatilla</i>. Wind Flower.  <i>Arum maculatum</i>. Wake Robin.  <i>Bryonia dioica</i>. Bryony.  <i>Caladium seguinum</i>. Dumbcane.  <i>Calla palustris</i>. Water Arum.  <i>Caltha palustris</i>. Marsh Marigold.  <i>Chelidonium majus</i>. Celandine.  <i>Clematis vitalba</i>. Virgin Bower.  <i>Convolvulus jalapa</i>. Jalap.  <i>Convolvulus scammonia</i>. Scammony.  <i>Croton tiglium</i>. Purging Croton.  <i>Cucumis colocynthis</i>. Colocynth.  <i>Cyclamen Europæum</i>. Sow Bread.  <i>Daphne gnidium</i>. Spurge Flax.  <i>Daphne mezereum</i>. Mezereon.  <i>Delphinium staphisagria</i>. Stavesacre.  <i>Dioica palustris</i>. Swamp leather-wood.  <i>Equisetum hyemale</i>. Scourgrass.  <i>Euphorbia officinarum</i>. Euphorbium.      Spurge.  <i>Gratiola officinalis</i>. Hedge Hyssop.  <i>Hippomane mancinella</i>. Manchineel.  <i>Hura crepitans</i>. Sand Box.  <i>Hydrocotyle vulgaris</i>. Marsh Pennywort.  <i>Jatropha curcas</i>. Indian Nut.  <i>Jatropha manihot</i>. Cassada.  <i>Juniperus sabina</i>. Savin (oil of).  <i>Juniperus Virginiana</i>. Bed Cedar (oil of).  <i>Momordica elaterium</i>. Squirting Cucumber.  <i>Narcissus pseudo-narcissus</i>. Daffodil.  <i>Pastinax sativa</i>. Common Parsnep.  <i>Pedicularis palustris</i>. Marsh Lousewort.  <i>Phytolacca decandra</i>. Poke.  <i>Piper cubeba</i>. Cubebs.  <i>Plumbago Europæa</i>. Toothwort.  <i>Ranunculus acris</i>, and other species.      Crowfoot.  <i>Rhododendron chrysanthemum</i>. Oleander.  <i>Ricinus communis</i>. Castor Oil Plant.  <i>Sambucus cbulus</i>. Elder.  <i>Sedum acre</i>. Stone Crop.  <i>Stalagmitis cambogioides</i>. Gamboge.  <i>Tanacetum vulgare</i>. Tansy (oil of).</p>	<p>The general effects of this class of vegetable poisons are;—an acrid pungent taste, with more or less of bitterness, excessive heat, great dryness of the mouth and throat, with sense of tightness there; violent vomiting, the efforts being continued even after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and regular; breathing often quick and difficult; appearances of intoxication; the pupil of the eye frequently dilated, insensibility resembling death; the pulse becomes slow and loses its force, and death closes the scene.</p> <p>If applied externally, many of them produce violent inflammation of the skin, with vesications or eruptions of pustules.</p>	<p>If vomiting have been occasioned by the poison, and the efforts are still continued, they may be rendered easier by large draughts of warm water, or thin gruel; but if symptoms of insensibility have come on without vomiting, it ought to be immediately excited by the sulphate of zinc, or some other active emetic substance, and after its operation a sharp purgative should be given. After as much as possible of the poison is got rid of, a very strong infusion of coffee, or vinegar diluted with water, may be given with advantage. Camphor mixture with ether may be taken frequently, and if insensibility be considerable, warmth, frictions, and blisters, may be employed. If inflammation or other dangerous consequences have been induced, they are to be treated under general principles.</p> <p>The fruit of <i>Feuillea Cordifolia</i> has been recommended as a powerful antidote against vegetable poisons; it is to be used in as recent a state as possible. (?)</p> <p>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloïds generally.</p>
<p>ACRO-NARCOTIC.</p> <p><i>Ethusa cynapium</i>. Common Fool's Parsley.  <i>Aconitum napellus</i>. Monkshood.      Agaricus, five species. Mushrooms (poisonous).  <i>Amanita muscaria</i>. Truffles (poisonous).  <i>Anagallis arvensis</i>. Meadow Pimpernel.  <i>Anda Gomesii</i>.  <i>Apocynum androsæmifolium</i>. Dogsbane.  <i>Aristolochia clematitis</i>. Birthwort.  <i>Arnica montana</i>. Leopard's bane.  <i>Asclepias Syriaca</i>. Swallowwort.  <i>Atropa belladonna</i>. Deadly Night Shade.  <i>Æsculus Ohioensis</i>. Buckeye.  <i>Brucea antidysenterica</i>. False Angustura Bark.      Cerbera, three species. Cerbera.  <i>Chærophyllum sylvestre</i>. Bastard Hemlock.</p>		

IRRITANT POISONS.	SYMPTOMS.	TREATMENT.
<p><i>Chauliopia toxicana</i>. Rathane.  <i>Chenopodium murale</i>. Wormseed.  <i>Cicuta maculata</i>. American Hemlock.  <i>Cicuta virosa</i>. Water Hemlock.  <i>Cissus</i>. Cissus.  <i>Cocculus Indicus</i>. Fish berries.  <i>Colchicum autumnale</i>. Meadow saffron.  <i>Conium maculatum</i>. Hemlock.  <i>Coriaria myrtifolia</i>. Myrtle-leaved Sumach.  <i>Curare</i>. Indian War Poison.  <i>Cynanchum erectum</i>. Cynanchum.  <i>Cytisus laburnum</i>. Laburnum.  <i>Datura stramonium</i>. Thorn Apple.  <i>Digitalis purpurea</i>. Foxglove.  <i>Ergot</i>. See <i>Secale</i>.  <i>Eryum teruilia</i>. Bitter Vetch.  <i>Gaultheria procumbens</i>. Wintergreen (oil of).  <i>Hæmanthus toxicarius</i>.  <i>Helleborus niger</i>. Black Hellebore.  <i>Hypophyllum sanguinaria</i>. Paddock Stool.  <i>Ipecacuanha</i>. Ipecacuanha.  <i>Lathyrus cicera</i>. Lathyrus.  <i>Laurus camphora</i>. Camphor.  <i>Lobelia inflata</i>. Indian Tobacco.  <i>Lolium temulentum</i>. Darnel.  <i>Melia azederach</i>. Pride of China.  <i>Mercurialis perennis</i>. Mountain Mercury.  <i>Nerium oleander</i>. Common Oleander.  <i>Nicotiana tabacum</i>. Tobacco.  <i>Onanthe crocata</i>. Hemlock Dropwort.  <i>Passiflora quadrangularis</i>. Barbadoe.  <i>Fiscidia erythrina</i>. Jamaica Dogwood.  <i>Polygala venenosa</i> (of Java).  <i>Rhus radicans</i>. Poison Vine.  <i>Rhus toxicodendron</i>. Poison oak, or Sumach.  <i>Robinia pseudo-acacia</i>. Locust Tree.  <i>Ruta graveolens</i>. Rue.  <i>Sanguinaria Canadensis</i>. Blood Root.  <i>Scilla maritima</i>. Squill. Sea Onion.  <i>Secale cornutum</i>. Ergot. Spurred Rye.  <i>Sium latifolium</i>. Procrumbent Water Parsnep.  <i>Soigelia Marilandica</i>. Pink Root.  <i>Strychnos Ignatii</i>. St. Ignatius's Bean.  <i>Strychnos nux vomica</i>. Nux vomica.  <i>Scnyplocarpus foetida</i>. Skunk Cabbage.  <i>Tiomas</i>. Extract of various plants—South America.  <i>Tienté</i>. <i>Upas Tienté</i>. Tree of Java.  <i>Triticum Hybernum</i>. Wheat (diseased).  <i>Upas antiar</i>. Tree in Java.  <i>Veratrum album</i>. White Hellebore.  <i>Veratrum viride</i>. American Hellebore.  <i>Woorara</i>. War Poison of Guiana.  <i>Zea mays</i>. Maize (diseased).</p>	<p>The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication, stupid air, pupil of the eye dilated; furious or lively delirium, sometimes pain; convulsions of different parts of the body, or palsy of the limbs. The pulse is variable, but at first generally strong and full; the breathing is quick, and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death.</p>	<p>The stomach to be effectually evacuated, by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glysters of soap dissolved in water, or of salt and gruel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison; and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee, and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means, blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given before the poison is expelled, and it is desirable that but little fluid of any kind should be administered.</p> <p>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally</p>
<p><b>NARCOTIC.</b>  <i>Actæa spicata</i>. Baneberry.  <i>Amygdalus communis</i>. Bitter Almond.  <i>Amygdalus Persica</i>. Peach.  <i>Gelsemium nitidum</i>. Yellow Jessamine.  <i>Helonias erythrosperma</i>. Fly Poison.  <i>Hyoscyamus albus</i>. White Henbane.  <i>Hyoscyamus niger</i>. Black Henbane.  <i>Kalmia latifolia</i>. Mountain Ivy.  <i>Lactuca virosa</i>. Strong-scented Lettuce.  <i>Opium</i>, and its proximate principles.  <i>Papaver somniferum</i>. Poppy.  <i>Paris quadrifolia</i>. Herb Paris.  <i>Prunus Caroliniana</i>. Wild Orange.  <i>Prunus lauro-cerasus</i>. Cherry Laurel.  <i>Prunus nigra</i>. Black Cherry.  <i>Prunus padus</i>. Cluster Cherry.  <i>Prunus Virginiana</i>. Wild Cherry.  <i>Solanum dulcamara</i>. Bitter-sweet.  <i>Sorbus acuparia</i>. Mountain Ash.  <i>Taxus baccata</i>. Yew.</p>	<p>Nausea, heat, and pain in the stomach and bowels, with vomiting and purging, thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated</p>	<p>The stomach and bowels to be cleared by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large, stimulating glysters. After the poison is evacuated, ether may be administered, with small</p>
<p><b>POISONOUS MUSHROOMS.</b>  <i>Agaricus muscarius</i>. Fly Agaric.  <i>Agaricus piperatus</i>. Pepper Agaric.  <i>Agaricus necator</i>. Deadly Agaric.  <i>Agaricus bulbosus</i>. Bulbous Agaric.  <i>Agaricus chantarella</i>. Champignon.</p>	<p>Nausea, heat, and pain in the stomach and bowels, with vomiting and purging, thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated</p>	<p>The stomach and bowels to be cleared by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large, stimulating glysters. After the poison is evacuated, ether may be administered, with small</p>

POISONS.	SYMPTOMS.	TREATMENT.
	pupil, and stupor; cold sweats, and death. Poisonous mushrooms may be distinguished from the edible by their botanical characters, and by the following criteria. The former grow in wet, shady places, have a nauseous odour; are softer, more open, and porous; have a dirty-looking surface, sometimes a gaudy colour, or many very distinct hues, particularly if they have been covered with an envelope; they have soft, bulbous stalks, grow rapidly, and corrupt very quickly.	quantities of brandy and water; but if inflammatory symptoms manifest themselves, such stimuli should be omitted, and other appropriate means be had recourse to.

## 2. ANIMAL POISONS.

POISONS.	SYMPTOMS.	TREATMENT.
<p><b>POISONOUS FISH.</b>  <i>Balistes monoceros.</i> Old wife.  <i>Cancer astacus.</i> Crawfish.  <i>Cancer ruricolus.</i> Land Crab.  <i>Clupea thrissa.</i> Yellow-billed Sprat.  <i>Coracinus fuscus major.</i> Gray Snapper.  <i>Coracinus minor.</i> Hyne.  <i>Coryphæna splendens.</i> Dolphin.  <i>Mormyra.</i> Blue Parrot Fish.  <i>Muræna major.</i> Conger Eel.  <i>Mytilus edulis.</i> Mussel.  <i>Ostracion globellum.</i> Smooth Bottle Fish.  <i>Perca major.</i> Barracuda.  <i>Perca venenosa.</i> Grooper.  <i>Perca venenata.</i> Rock Fish.  <i>Physalia.</i> Portuguese Man of War.  <i>Scomber caruleus.</i> Spanish Mackerel.  <i>Scomber maximus.</i> King Fish.  <i>Scomber thynnus.</i> Bonetta.  <i>Sparus chrysops.</i> Porgee.  <i>Tetrodon scleratus.</i> Tunny.  <i>Tetrodon ocellatus.</i> Blower.</p>	<p>In an hour or two, or often in a much shorter time, after the fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria), and in many cases death.</p>	<p>An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasm ensue; after evacuations, laudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed.</p>
<p><b>POISONOUS SERPENTS.</b>  <i>Boa crotaloides.</i> Copperhead.  <i>Cenchrus mockeson.</i> Mockeson.  <i>Cerastes nasicornis.</i> Horned Viper of Western Africa.  <i>Coluber berus.</i> Viper.  <i>Coluber prester.</i> Black Viper.  <i>Crotalus.</i> (5 species) Rattle Snake  <i>Scytale piscivorus.</i> Water Viper.</p>	<p>A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance; faintness, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are degraded. Inflammation, and often extensive suppuration and gangrene, followed by death.</p>	<p>A cupping-glass to be applied over the wound, or a moderately tight ligature above the bites, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn, to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tansore Pill, has been strongly recommended.</p>
<p><b>CANTHARIS VESICATORIA.</b>  Spanish, or Blistering Fly.  <i>Lytta vittata.</i> Potato Fly.</p>	<p>Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody, with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and strangury or retention of urine; frightful convulsions, delirium and death.</p>	<p>Vomiting to be excited by drinking sweet oil, sugar and water, milk, or linseed tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment. Camphor dissolved in oil may be rubbed over the belly and the thighs.</p>
<p><b>VENOMOUS INSECTS.</b>  <i>Tarantula.</i>  Scorpion.  <i>Vespa crabro.</i> Hornet.  <i>Vespa vulgaris.</i> Wasp.  <i>Apis mellifica.</i> Bee.  <i>Culex pipiens.</i> Gnat.  <i>Cæstrus bovis.</i> Gad-fly.</p>	<p>In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain.</p>	<p>Hartshorn and oil may be rubbed on the affected part, and a piece of rag, moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressure around it with the barrel of a small watch-key.</p>

	SYMPTOMS.	TREATMENT.
SALIVA OF THE RABID DOG.	At an uncertain interval after the bite, generally, however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death.	Hydrophobia is more easily prevented than cured; indeed, it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success. The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or be washed with it as long as it will bleed, and, after the most persevering ablution, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulation. No milder discipline can ensure safety.

The most energetic poisons are used therapeutically, and often with considerable advantage. They have, of course, to be administered in extremely small doses; to avoid producing poisoning.

POISON, ARROW, see Arrow poison—p. Sausage, Allantotoxiuum.

POISON-BERRY TREE, *Melia azedarach*—p. Italian, *Liquor arsenicalis*—p. Morbid, *Virus*—p. Oak, *Rhus toxicodendron*—p. Root, *Cicuta maculata*—p. Vegetable, *Upas*—p. Vine, *Rhus radicans*.

POISONING, *Venefic'ium, Toxicatio, Intoxicatio, Entozis'mus, Entoxicis'mus, Pharmace'ia, Malefic'ium, Veneu'ation, (F.) Empoisonement, Intoxication.* The art of applying a poisonous substance to any of the textures in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employs a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned. The term is, however, generally restricted to poisoning by design.

'Poisoning has also been used, by a few, to designate the series of symptoms resembling those produced by certain poisons, which occasionally follow the use of substances that are generally innocuous. Overloading the stomach with indigestible food, has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed poisoning.

Secret poisoning was, at one time, practised as an art. It consisted in administering medicines, which should act as slow poisons, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

POISONOUS, *Toxical, Noxius*; having the qualities of a poison.

POISONS, ACRO-NARCOTIC, P. narcotico-acrid—p. Corrosive, P. acrid—p. Escharotic, P. acrid—p. Irritating, P. acrid—p. Putrescent, P. septic.

POITRINAIRR, Phtthisicus.

POITRINE, Thorax.

POIVRE D'EAU, *Polygonum hydropiper*—p. de Guinée, *Capsicum annuum*—p. d'Inde, *Capsicum annuum*—p. de Jamaïque, see *Myrtus pi-*

menta—p. Long, *Piper longum*—p. Noir, *Piper nigrum*—p. Petit, *Vitex*—p. à Queue, *Piper cubeba*—p. Sauvage, *Vitex*.

POIX BLANCHE, see *Pinus abies*—p. de Bourgogne, see *Pinus abies*—p. Grasse, see *Pinus abies*—p. Jaune, see *Pinus abies*—p. Minérale, *Pissasphaltum*—p. Navale, see *Pinus sylvestris*—p. Noire, see *Pinus sylvestris*.

POKE, *Phytolacca decandra*—p. Indian, *Veratrum viride*—p. Stink, *Dracontium foetidum*—p. Weed, *Phytolacca decandra, Veratrum viride*.

POLANIS'IA GRA'VEOLENS, *Clammyweed, Stiakweed, Wormweed, Clammy Mustard, False mustard.* An indigenous plant, *Nat. Ord. Capripidae; Sex. Syst. Dodecandria Monogynia*—which blossoms in summer, and is found in every part of North America. To the whole plant have been ascribed anthelmintic properties.

POLECAT WEEED, *Dracontium foetidum*.

POLEMONIUM REPTANS, *False Jacob's Ladder, Greek Valerian, Sweet-root. Order, Polemoniaceae; indigenous, flowering in May; has been used as a diaphoretic and expectorant.*

POLENTA, Alphiton.

POLES, Chalazae.

POLEY MOUNTAIN, OF CANDY, *Teucrium Creticum*—p. Mountain of Montpellier, *Teucrium capitatum*.

POLIATER, from *πολις*, 'a town,' and *ιατρος*, 'a physician.' A physician exercising his profession in a town, by the appointment of the government.—Castelli.

POLICE', MEDICAL, *Politi'a med'ica, Politobiotherapi'a, Medici'ua polit'ica, State medicine, Polit'ical med'icine.* Hygienic rules established, or to be established, for the prevention of disease, and to contribute to the progress of medicine. The salubrity of districts, especially during the existence of spreading disease, is greatly ensured by an efficient medical police.

POLICLIN'ICA, from *πολις*, 'a town,' and *κλινη*, 'a bed.' Treatment of diseases in a town.

POLIO'SIS, *Tricho'sis polio'sis, Spilo'sis polio'sis, Canit'ies.* Hair prematurely gray or hoary. The state of becoming gray.

POLITIA MEDICA, Police, medical.

POLITOBIOThERAPIA, Police, medical.

POLIUM CAPITATUM, *Teucrium capitatum*.

**POLIUM CRETICUM**, Teucrium Creticum—*p.* Montanum, Teucrium capitatum.

**POLLEN**, (L.) *Pollen*, *Pollis*, *παλη*, 'dust.' The fecundating dust contained in the anthers of flowers, which is dispersed on the stigma.

**POLLEX**, *An'ticheir*, *Prom'anus*, *Dig'itus primus* seu *maignus*, from *pollere*, 'to have much strength.' (F.) *Ponce*. The first of the fingers in size and strength. It is asserted that the term *polltro* is derived from *Poll'licē trunca'to*;—the Romans who were desirous of being exempted from military service being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

**POLLEX**, see *Digitus*.

**POLLEX PEDIS**, *Hallus*, *Hallux*. The great toe.

**POLLINCTOR**, *Pollin'cter*, (L.) In antiquity, an anointer, dresser, or embalmer of the dead.

**POLLINCTURA**, Embalming.

**POLLIS**, Pollen.

**POLLOD'IC**, *Pollod'icus*; from *πολυς*, 'many,' and *ὁδος*, 'a way.' An epithet proposed by Dr. Marshall Hall for a course of nervous action proceeding from one point in many directions to every other.

**POLLUM**, LITTLE, *Polygala paucifolia*.

**POLLUTION**, *Pollu'tio*, from *polluo*, 'I profane.' The excretion of the seminal liquor or sperm at other times than during coition. When occasioned by a voluntary act, it is called simply *Pollution* or *Masturbation*; when excited during sleep, by lascivious dreams, it takes the name *Nocturnal pollution*, *Exoneiro'sis*, *Oneirog'mos*, *Oneirog'onos*, *Oneirogonorrhœ'a*, *Exoneirog'mus*, *Spermatoclem'ma*, *Spermatoclep'sis*, *Spermatolep'sis*, *Spermatolip'sis*, *Gonorrhœa dormientium*, *G. oneirog'onos*, *G. vera*, *G. libidino'sa*, *Proflu'rium sem'inis*, *Spermatorrhœ'a*, *Paronir'ia salax*, *Night pollution*, (F.) *Pollution involontaire*.

**POLLUTION INVOLONTAIRE**, *Pollution*—*p.* Nocturnal, *Pollution*—*p.* Self, *Masturbation*—*p.* Voluntary, *Masturbation*.

**POLY**, *Polys*, *πολυς*, 'many, full.' Hence:

**POLYACTIUM TRISTE**, *Pelargonium triste*.

**POLYÆMIA**, *Plethora*.

**POLYÆMIC**, *Plethoric*.

**POLYÆMICUS**, *Plethoric*.

**POLYANHÆMIA**, *Anæmia*.

**POLYANHÆMIE**, *Anæmia*.

**POLYANTHES TUBEROSA**, *Amaruacahu*. The root is cut into slips and laid upon the bites of serpents by the Peruvian Indians.

**POLYBLEN'NIA**, from *πολυς*, 'much,' and *βλενα*, 'mucus.' Excessive secretion of mucus.

**POLYBREP'HA**, *Pregnancy*, complex.

**POLYCARP'Æ**, from *πολυς*, 'many,' and *καρπος*, 'fruit.' A division of cutaneous diseases of the family *Eczematosen*, of Fuchs, including *Psoriasis*, *Lichen*, *Herpes*, and *Impetigo*.

**POLY'CERAS**, from *πολυς*, 'many,' and *κερας*, 'horn.' A monstrous animal having many horns.—*Gurt*.

**POLYCHO'LIA**, *Pericho'lia*, *Hypercho'lia*, from *πολυς*, 'much,' and *χολη*, 'bile.' Superabundance of bile; such as is supposed to exist in bilious fevers.

**POLYCHREST'US**, from *πολυς*, 'much,' and *χρηστος*, 'useful.' Having many virtues. An ancient name for certain medicines considered to be useful in many diseases.

**POLYCHRONIUS**, *Chronic*.

**POLYCHY'LIA**, from *πολυς*, 'much,' and *χυλος*, 'juice.' *Polychy'mia*. Fulness of juices.

**POLYCHYMIA**, *Polychylia*—*p.* *Sanguinea*, *Plethora*.

**POLYCLIN'ICA**; from *πολυς*, 'much,' and

*κλινη*, 'bed.' Provided with many beds;—as an hospital.

**POLYCOR'IA**, from *πολυς*, and *κορη*, 'the pupil.' The state in which there is more than one pupil.—*Von Ammon*.

**POLYCYE'SIA**, *Polycye'sis*, from *πολυς*, 'many,' and *κυσσις*, 'pregnancy.' Frequent or quickly recurring pregnancies: also, compound pregnancy.

**POLYDAC'TYLUS**, *Perissodac'tylus*, from *πολυς*, 'many,' and *δακτυλος*, 'a finger.' One who has a supernumerary finger or fingers, or toes.

**POLYDIP'SIA**, from *πολυς*, 'much,' and *ειψη*, 'thirst;' *Sitis morbo'sa seu inten'sa*, *Polydip'sia*, *Dipso'sis avens*, *Excessive thirst*, (F.) *Soif excessive*. A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c., and is so much a part of diabetes, that it has been called *Polydipsia*.

**POLYG'ALA**, from *πολυς*, 'much,' and *γαλα*, 'milk;' *P. vulga'ris*, *Common Milkwort*. *Family*, *Rhinanthoideæ*. *Sex. Syst.* *Diadelphia Octandria*. The leaves are bitter, and are used in the same cases as the *polygala amara*.

**POLYGALA AMA'RA**, *P. amare'la* seu *vulga'ris*, *Bitter Milkwort*. A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant. The *Polygala rubella*, or *Bitter Polygala* of the United States, has the same virtues.

**POLYGALA AMARELLA**, *P. amara*—*p.* *Bitter*, see *P. amara*—*p.* *Grandiflora*, *P. senega*.

**POLYG'ALA PAUCIFO'LIA**, *Triclisper'ma grandiflo'ra*, *Dwarf Milkwort*, *Little Pollom*, *Evergreen Snakeroot*, (F.) *Polygale naine*, possesses the same properties as *P. Senega*.

**POLYG'ALA SEN'EGA**, *P. Virginia'na* seu *grandiflo'ra*, *Sen'eka*, *Rattlesnake Milkwort*, *Senega* or *Rattlesnake root*, (F.) *Polygale de Virginie* ou *de Seneka*. The bark is the active part of the root. Its taste is at first acrid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake and in pleurisy, pneumonia, &c., after the inflammatory action had been got under. It has been given also in humoral asthma, chronic rheumatism, dropsy, croup, amenorrhœa, &c. According to Peschier, it contains three particular principles, *Polyg'aline* or *Sen'egine*, *Isol'usine*, and *Polyg'alic Acid*. Dose, gr. 30 to 40 of the powder.

**POLYGALA SERPENTARIA**. A shrub of Caffraria, the root of which is considered by the natives as a sure antidote against the bites of venomous serpents.

**POLYGALA VIRGINIANA**, *P. senega*—*p.* *Vulgaris*, *P. amara*.

**POLYGALAC'TIA**, *Polygala'lia*, from *πολυς*, 'much,' and *γαλα*, 'milk.' Superabundant secretion of milk; galactia.

**POLYGALE NAINÉ**, *Polygala paucifolia*—*p. de Virginie*, *Polygala Virginiana*.

**POLYGALIA**, *Polygalactia*.

**POLYGALINE**, see *Polygala senega*.

**POLYGONATUM**, *Convallaria polygonatum*—*p.* *Anceps*, *Convallaria polygonatum*—*p.* *Multiflorum*, *Convallaria multiflora*—*p.* *Uniflorum*, *Convallaria polygonatum*—*p.* *Vulgare*, *Convallaria polygonatum*.

**POLYGO'NUM**, *P. avicula'ræ*, from *πολυς*, 'much,' and *γωνη*, 'seed.' *P. centino'dium* seu *erec'tum*, *Centino'dia*, *Centumno'dia*, *Bindweed*, *Sanguina'lis Corrig'iolia*, *Sanguina'ria*, *Knot-grass*, *Knotweed*, (F.) *Renouée*, *Trainasse*, *Centinode*. *Family*, *Polygonææ*. *Sex. Syst.* *Octandria Trigynia*. This grass is said to be a feeble astringent.

**POLYGONUM ACRE**, *P. hydropiper*.

**POLYGONUM BISTORTA**, *P. bistortoides*, *Bistorta*, *Colubrina*, *Officinal Bistort*, *Great Bistort* or *Snakeweed*. The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhoea, ague, &c. Dose, gr. xv to ʒj.

**POLYGONUM BISTORTOIDES**, *P. bistorta*—*p. Centinodium*, *P. aviculare*.

**POLYGONUM DIVARICATUM**; *Eastern Buckwheat plant*. The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

**POLYGONUM ERECTUM**, *P. aviculare*.

**POLYGONUM FAGOPYRUM**, *Fagopyrum*, *F. esculentum*, *Triticum Fugivium*, *Buckwheat*, (*F.*) *Sarrasin*, *Blé noir*. The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

**POLYGONUM HYDROPIPER**, *P. acris*, *Hydropiper*, *Persicaria urens*, *Mercurius terrestis*, *Poor Man's Pepper*, *Biting Arse-smart*, *Lakweed*, *Water-pepper*, (*F.*) *Poivre d'eau*. The leaves of this plant have an acrid, burning taste, and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally as a stimulating cataplasm.

**POLYGONUM HYDROPIPEROIDES**, *P. punctatum*.

**POLYGONUM PERSICARIA**, *Persicaria*, *P. minor seu mitis*, *Plumbago*, *Arse-smart*, (*F.*) *Persicaire douce*. This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

**POLYGONUM PUNCTATUM**, *P. hydropipeoides*, *Water pepper* of America, *Smartweed*, possesses similar properties to *Polygonum hydropper*, and is occasionally used internally in gravel, and externally in chronic ulcers. A fluidextract of the saturated tincture has been extolled in amenorrhœa.

**POLYGONUM VIRGINIANUM**, *Wand-spiked Persicaria Virginia Bistort*; indigenous; is astringent, diuretic, and tonic.

**POLYGROMA** *Staphyloma*.

**POLYHYDRIA**, *Polydria*, *Polydroisia*, from *πολυς*, 'much,' and *ἰδρωσ*, 'sweat.' Excessive sweating.

**POLYHYDRIA**, *Hydrops*.

**POLYHYPERHEMIA**, *Plethora*.

**POLYIDRIA**, *Polyhidria*.

**POLYIDROSIS**, *Polyhidria*.

**POLYLYMPHIA**, *Anasæra*.

**POLYMASTHUS**, *Pleiomasthus*, from *πολυς*, 'many,' and *μασθος*, 'breast.' A monster having several breasts.—*Gurlt*. The condition has been called *Polymastia*, and *Pleiomastia*.

**POLYMAZIA**, see *Polymasthus*.

**POLYMERIA**, *Polymerismus*—*p. Promiseua translative*, *Transposition of the viscera*.

**POLYMERISMUS**, *Polymerisia*, from *πολυς*, 'much,' and *μερος*, 'a part.' A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

**POLYNEURON**, *Plantago*.

**POLYOP'SIA**, *Polypopy*, from *πολυς*, 'much,' and *οψις*, 'sight.' Vision is so called, when multiple.

**POLYOPY**, *Polyopsia*.

**POLYOREX'IA**, from *πολυς*, 'much,' and *ορεξις*, 'appetite.' Excessive appetite or hunger. A genus in the gastrœs of *M. Alibert*.

**POLYPER'IA**, from *πολυς*, 'much,' and *πρως*, 'mutilated.' Congenital misconstruction of various parts or organs.—*Good*.

**POLYPHAG'IA**, *Multivorantia*, from *πολυς*, 'much,' and *φαγω*, 'I eat.' Voracity. Faculty

of eating or subsisting on many kinds of food. See *Boulimia*.

**POLYPH'AGOUS**. Relating or appertaining to polyphagia.

**POLYPHARMAC'IA**, *Polypharmacy*; from *πολυς*, 'much,' and *φαρμακον*, 'a medicine.' The prescribing of too many medicines. A prescription, consisting of a number of medicines; hence the name *Polypharmacus*, given to one who is in the habit of prescribing a number of medicines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

**POLYPHYS'IA**, *Flatulence*.

**POLYPIFORM CONCRETIONS**, see *Polypus*.

**POLYPION'IA**, see *Polysarcia*—*p. Infantum*, see *Polysarcia*.

**POLYPLAS'TIC**, *Polyplasticus*, from *πολυς*, 'much,' and *πλασσω*, 'I form.' That which has many shapes.

**POLYPLASTIC ELEMENT**, in histology, is one which does not retain its primary shape; but undergoes transformation into others.—*Gerber*.

**POLYPOD'ITES**. Wine impregnated with polypody.

**POLYPO'DIUM**, *P. Vulgaris*, *P. Virginia num seu pinnatifidum*, *Filix'ula dulcis*, *Common Polypody*, *Fern root*, *Rock Brake*, *Brake root*. This fern grows in the clefts of rocks, walls, &c., in both hemispheres. It was formerly regarded as a cholagogue, and was given in head diseases. It is not used now.

**POLYPODIUM ADIANTIFORME**, see *Calagualæ radix*—*p. Ammifolium*, see *Calagualæ radix*—*p. Argenteum*, see *Calagualæ radix*—*p. Calaguala*, *Calagualæ radix*—*p. Coriaceum*, see *Calagualæ radix*—*p. Dentatum*, *Asplenium filix femina*—*p. Filix femina*, *Asplenium filix femina*.

**POLYPO'DIUM FILIX MAS**, *Aspidium Filix Mas*, *A. depasitum seu erosum*, *Filix pinnata*, *Pteris*, *Athyrium Filix Mas*, *Blechnon*, *Polyrrhizon*, *Blanenon Oribasis*, *Lonchitis*, *Filix'ula*, *Male Polypody* or *Fern*, *Filix mas*, *F. non ramosa dentata*, *Nephrodium crenatum*, *N. Filix mas*, *Polysticum callipteris*, *P. filix mas*, (*F.*) *Fougère mâle*. *Nat. Ord.* Filiceæ. *See: Syst.* *Cryptogamia Filiceæ*. The rhizoma of this plant has been much extolled as an anthelmintic, and in cases of tœnia. It was the basis of a once celebrated remedy—*Madame Nouffer's*, but, perhaps, more of the efficacy was to be attributed to the active purgatives by which it was followed than to the fern. Dose, ʒij to ʒiij of the powdered solid part of the root; followed in the morning by a strong cathartic of camboe or jalap. An ethereal extract has been proposed by *Dr. Peschier*, of Geneva.

**POLYPO'DIUM INCA'NUM**, *Polypody*, *Rock Brake*; indigenous; has been considered demulcent, cathartic and anthelmintic.

**POLYPO'DIUM INCISUM**, *Asplenium filix femina*—*p. Molle*, *Asplenium filix femina*—*p. Pennatifidum*, *P. vulgare*—*p. Politum*, see *Calagualæ radix*—*p. Trifidum*, *Asplenium filix femina*—*p. Virginianum*, *P. vulgare*—*p. Vulgare*, *Polypodium*.

**POLYPODY**, *Polypodium ineanum*—*p. Common*, *Polypodium vulgare*—*p. Male*, *Polypodium filix mas*.

**POLYPOID**, *Polypooides*; from *πολυπος*, and *ειδος*, 'form.' Having the shape of, or resembling, a polypus.

**POLYPORUS IGNIARIUS**, *Boletus igniarius*—*p. Officinalis*, *Boletus laticis*.

**POLYPOS'IA**, *πολυποσια*, from *πολυς*, 'much,' and *ποσις*, 'drink.' Great thirst—desire for drink. *Polydipsia*.

**POLYPOUS**, *Polyposus*: same etymon as the next. Relating, or belonging to, or resembling polypus.

**POL'YPUS**, *Pseudometamorphosis polyp'osa*, from *πολυς*, 'many,' and *πους*, 'a foot.' A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes. Polypi may form on every mucous membrane. They are most commonly observed in the nasal fosse, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous*, *soft*, *vesicular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard*; and these have been distinguished into *fibrous* or *fleshy*, and into *scirrhous* or *cancerous*. *Fibrous* polypi, *Pol'yp'i fibro'si*, *Inopol'yp'i*, are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scirrhous* or *carcinomatous* are true cancerous tumours, painful and bleeding. They present all the pathological changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character. The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Canterization* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Extirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put round them so as to prevent their nutrition. A seton has, also, been sometimes used to gradually destroy the pedicle.

The term **POLYPI**, *Pseudopol'yp'i*, *Cardi'tis pol'ypo'sa*, *Pol'yp'iform Concre'tions*, (F.) *Concre'tions polypeuses* ou *polypiformes* ou *sanguines* du *Cœur*, *Hémocardioplastics*, (Piorry,) has likewise been applied to collections of blood—fibrinous concretions—found in the heart or great vessels after dissolution. These were once, erroneously, regarded as morbid. The presence of these concretions may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general—especially those of the lungs—the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

**POL'YPUS BRONCHIA'LIS**, *Bronchlemm'itis*, *Brouchi'tis membrana'cea*, *B. plastic*, *Bronchial Croup*, *Chronic Croup* (?) *Pseudo-mem'branous Bronchitis*. A membraniform secretion in the bronchial tubes of a diphtheritic character, having the shape, when unexpected, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

**POLYPUS CARNOSUS**, *Sarcoma*—p. *Fibrosus*, see **POLYPUS**—p. *Uteri*, *Metropolypus*.

**POLYRRHIZON**, *Polypodium filix mas*.

**POLYRRHŒA**, *Profluvium*.

**POLYSAR'CIA**, *Polysarco'sis*, from *πολυς*, 'much,' and *σαρξ*, 'flesh.' *Carnos'itus*, *Polysar'ma'tia*, *Adelipa'ria*, *Corpulen'tia*, *Steat'ites*. Excessive corpulency. — have distinguished two varieties of this: — **POLYSARCIA CARNO'SA**, *Cor'pulence*, and **P. ADIPO'SA**, *Polypio'nia*, *Pimelo'sis nim'ia*, *Pachys'mus*, *Pachyn'sis*, *Obes'itas*, *Hyperrim'elē*, *Lipa'ria*, *Adipo'sis*, *Polysar'cia fagino'sa*, *Empy'melium polysar'cia*, *Barys'mia*, *Barysomat'ica*, *Lipo'sis*, *Lipar'otes*, *Lipas'ma*, *Pingu'itudo*, *Pin'guitude*, *Obes'ity*, (F.) *Obésité*, *Embonpoint excessif*. A severe regimen and ex-

ercise are the best preventives. Children are occasionally met with of unusual fatness, in spite of every care. This morbid deposition has been termed *Polypio'nia infantum*, and *Chloro'sis gigante'a*.

**POLYSARCIA VISCERUM**, *Physconia adiposa*.

**POLYSARCOSIS**, *Polysarcia*.

**POLYSIA'LIA**; from *πολυς*, 'much,' and *σάλιου*, 'saliva.' Excessive discharge of saliva.

**POLYSOMATIA**, *Polysarcia*.

**POLYSPAS'TON**, from *πολυς*, 'much,' and *σπασσω*, 'I draw.' A powerful instrument for reducing luxations.—Gorræus.

**POLYSPER'MIA**; from *πολυς*, 'much,' and *σπέρμα*, 'sperm.' Richness or fulness of sperm.

**POLYSTICUM CALLIPTERIS**, *Polypodium filix mas*—p. *Felix Mas*, *Polypodium filix mas*.

**POLYSTOMA PINGUICOLA**, see **Worms**—p. *Venarum*, see **Worms**.

**POLYTRIC**, *Asplenium trichomanoides*.

**POLYTRICHUM**, from *πολυς*, 'much,' and *τριχίον*, 'hair.' *Polytr'ichon*, *Polytr'ichum vulgare*, *Adiantum aureum*, *Golden Maiden-hair*, (F.) *Perce-mousse*. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

**POLYTRICHUM COMMUNE**, *Asplenium trichomanoides*.

**POLYTROPH'IA**, from *πολυς*, 'much,' and *τρέφω*, 'I nourish.' Abundant or excessive nutrition.

**POLYURESIS**, *Diabetes*.

**POLYURIA**, *Diabetes*.

**POLYU'RICUS**, from *πολυς*, 'much,' and *ουρον*, 'urine.' Sauvages calls—*Ischu'ria polyu'rica*—a kind of ischuria, caused by accumulation of urine in the bladder.

**POMA**, Drink—p. *Chinensia*, see **Citrus aurantium**.

**POMACEUM**, *Cider*.

**POMA'TUM**, *Pomma'tum*, (F.) *Pommade*, *Liparolé*. A pharmaceutical preparation, employed only externally; which differs but little from an ointment, except in having generally less consistence. It is usually made aromatic, and coloured to render it more agreeable.

*Common Pomatum* is made of *lard*, 12lbs; *suet*, 4lbs; *essence*, ℥viiij.

**POMATUM AD LABIA DEMULCENDA**, *Cerate* for the lips—p. *Epispasticum flavum*, *Unguentum lyttæ medicatum aliud*—p. *Epispasticum viride*, &c., *Unguentum lyttæ medicatum*—p. for the Lips, *Cerate* for the lips—p. *Nitricum vel oxygenatum*, *Unguentum acidi nitrosi*—p. *Saturni*, *Unguentum plumbi superacetatis*.

**POMBALEA IPECACUANHA**, see **Ipecacuanha**.

**POMEGRANATE**, *Punica granatum*.

**POMILIUS**, see **Nanus**.

**POMMADE**, *Pomatum*—p. *d'Alyon*, *Unguentum acidi nitrosi*—p. *Antipsorique de Jasser*, *Unguentum sulphuris compositum*—p. *d'Autenrieth*, *Unguentum antimonii tartarizati*—p. *de Cyrillo*, *Unguentum muriatis hydrargyri oxygenato medicatum*—p. *Épispastique jaune*, *Unguentum lyttæ medicatum aliud*—p. *Épispastique verte*, *Unguentum lyttæ medicatum*—p. *de Garou*, *Unguentum epispasticum de daphne gnidio*.

**POMMADE DE GONDRET**, *P. ammoniacale de Gondret* (F.), *Gondret's Counterirritant*, *Gondret's ammoniacal Caustic*. *Liq. ammon.* p. ij; *Sevi*, p. j; *Ol. amygdal.* p. j; *M.* Used to excite a speedy revulsion in cases of chronic affections of the brain, incipient cataract, amaurosis, &c., as well as to cauterize the integuments deeply.

The above formula, is that of the French Codex, but, according to M. Trousseau, it is much too hard for use, unless the weather is warm.

He proposes *two formulæ*, one for summer, the other for winter. In the former he directs three parts of lard, one of suet, and four of liquor ammoniac; in the latter, equal parts of lard and liquor ammoniac.

**POMMADE POUR LES LÈVRES.** Cerate for the lips—*p. Ophthalmique* (Regent's.) Unguentum ophthalmicum—*p. Oxygénée*, Unguentum acidi nitrosi—*p. Stibiée*, Unguentum antimoni tartarizati.

**POMME**, see *Pyrus malus*—*p. d'Adam*, *Pomum Adami*—*p. d'Amour*, *Solanum lycopersicum*—*p. Épineuse*, *Datura stramonium*—*p. de Merveille*, *Momordica balsamica*—*p. Mousseuse*, *Bedegar*—*p. de Terre*, *Solanum tuberosum*.

**POMMES HÉMORRHOÏDALES**, see *Viscum album*.

**POMMETTE**, see *Malæ os*.

**POMMIER**, *Pyrus malus*.

**POMPII'OLYX**, from *πυφός*, 'a bladder.' A small vesicle on the skin. An eruption of *bullæ* or *blebs*, appearing without any inflammation around them, and without fever. It is the *Echphylis Pompholyx* of Good. See *Pemphigus*.

**POMPHOLYX**, *Turtia*, *Zinci oxydum*.

**POMPION**, *Cucurbita pepo*.

**POMUM ADA'MI**, (F.) *Pomme d'Adam*, *Adam's Apple*. The projection formed by the thyroid cartilage in the neck—of males particularly. It is so called from a notion that it was caused by the apple sticking in the throat of our first parent.

**POMUM AMORIS**, *Testicle*—*p. Hierosolymitanum*, *Momordica balsamina*—*p. Melongenæ*, see *Solanum melongena*—*p. Mirabile*, *Momordica Balsamina*—*p. Spinosum*, *Datura stramonium*.

**PONCTION**, *Puncturing*.

**POND SHOVEL**, *Unisema deltofolia*.

**PONDERA ET MENSURÆ**, *Weights and measures*.

**PONDUS**, *Pudibilia*—*p. Pharmaceuticum*, see *Weights and Measures*.

**PONGITIF**, *Pungent*.

**PONS CEREBELLI**, *Pons Varolii*—*p. Hepatis*, see *Lobulus anonymus*—*p. Sylvii*, *Quadrigenina Tubercula*—*p. Tarini*, *Tarini pons*.

**PONS VAROLII**, *Pons Cerebelli*, *Corpus annulad'ré*, *Processus annularis*, *Prominen'tia annularis cer'ebri*, *Emineu'tia annularis*, *Varo'li's bridge*, *Nodus enceph'ali vel Cer'ebri*, *Cerebral protuberance*, *Protuberan'tia annularis Willisii*, (F.) *Protuberance cérébrale*, *P. annulaire*, *Méencéphale*, *Méocéphale*, *Pont de Varole*, *Annular protuberance*. An eminence at the upper part of the medulla oblongata, first described by *Varolius*. It is formed by the union of the crura cerebri and crura cerebelli.

**PONS ZYGOMATICUS**, *Zygomatic arch*.

**PONTE**, see *Parturition*—*p. Périodique*, see *Parturition*.

**PONTERERIA CORDATA**, *Unisema deltofolia*.

**PONTICUM ABSINTHIUM**, *Artemisia Pontica*.

**POPLAR**, **AMERICAN**, *Liriodendron*—*p. Balm of Gilead*, *Populus Candicans*—*p. Black*, *Populus*—*p. Tree*, *Liriodendron*—*p. Tulip-bearing*, *Liriodendron*.

**POPLES**, *Gare'tum*, *Garretum*, *Ignys*, *Ig'nyè*, *Suffra'go*, *Fossa genu*, *Fossa poplite'a*, the *Ham*, the *Hough*, *Hock*, (F.) *Jarret*, from *post*, and *plico*, 'I fold.' The posterior part of the knee joint. The ham forms what is called the *popliteal region* or *space*.

**POPLITEUS**, *Popliteal muscle*.

**POPLITÉ**, *Popliteus muscle*.

**POPLITEAD**, see *Popliteal aspect*.

**POPLITE'AL**, *Poplitæ'us*, *Poplit'ic*, from *poples*,

'the ham.' That which relates to the ham. A name given to various parts.

**POPLITEAL ARTERY**—*Popliteal portion of the crural*,—(Ch.) is really a continuation of the femoral, which changes its name on passing through the adductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the *posterior tibial* and *peroneal* arteries. In the ham, it gives off the three *superior articular arteries*; and, at the top of the leg, the arteries of the gemini muscles or *gemini branches*, (F.) *branches jumelles*, the *two inferior articular arteries*, and the *tibiialis antica*.

**POPLITEAL ASPECT**. An aspect towards the side on which the *poples* or ham is situated. *Barclay*. *Poplite'ad* is used by the same writer adverbially, and signifies 'towards the popliteal aspect.'

**POPLITEAL FOSSA**, *Poples*.

**POPLITE'AL GLANDS**, *Glan'dulæ poplitææ*. Lymphatic glands, four in number, seated in the popliteal region or space.

**POPLITEAL MUSCLE**, *Poplitæus Muscle*, *Muscle Jarretier*, *Fémoro-poplititibial*, (Ch.) *Subpoplitæus*, (F.) *Muscle poplité*, is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

**POPLITEAL NERVES**. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The *external popliteal*, *Peroneal nerve*, *Branche péronière*, (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculo-cutaneous branch*, *nerf pré-tibio-digital*, (Ch.) and the *anterior tibial*, *nerf pré-tibio-susphalangé-taire*, (Ch.) 2. The *internal popliteal nerve*, *Branche tibiale*, (Ch.) which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name *tibial nerve*. It furnishes the *external saphena nerve*, and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plantar nerves*.

**POPLITEAL REGION**, *Poples*—*p. Space*, *Poples*.

**POPLITEAL VEIN** has the same arrangement as the artery behind which it is situate.

**POPLITIC**, *Popliteal*.

**POPONAX**, see *Pastinaca opoponax*.

**POPPY**, **CELANDINE**, *Stylophorum diphyllum*—*p. Corn*, red, *Papaver rhœas*—*p. Heads*, see *Papaver*—*p. Horn*, *Stylophorum diphyllum*—*p. Juice*, *Meconium*—*p. Prickly*, *Argemone Mexicana*—*p. Spotting*, *Cucurbalus Behen*—*p. Thorn*, *Argemone Mexicana*—*p. White*, *Papaver*—*p. White*, capsule, see *Papaver*.

**POPULUS**, *Populus nigra*, *Egei'ros*, *Ache-ro'is*, *Black poplar*, (F.) *Peuplier noir*. The young *buds*, *oculi* or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an official ointment—the *unquen'tum populæ'um*. It was, also, recommended in chronic affections of the lungs.

The bark of *Populus Tremuloides*, *American aspen*, of *P. Trem'ula seu pen'dula*, *European aspen*, and of *Populus Candicans*, *Balm of Gilead*

*Poplar*, is antiperiodic, and furnishes *salicin* and *populin*, in which the properties probably reside.

POPULUS BALSAMIFERA, see *Fagara octandra*—*p. Candicans*, see *Populus*—*p. Pendula*, *P. tremula*—*p. Tacamahaca*, see *Fagara octandra*—*p. Tremula*, see *Populus*—*p. Tremuloides*, see *Populus*.

PORCELAINÉ, *Essera*, *Urticaria*.

PORCELLIO, *Oniscus*.

PORCELLUS, *Oniscus*.

PORCULUS, *Oniscus*.

PORCUPINE DISEASE, *Ichthyosis*.

PORCUPINE MEN, *Echinoder'mi*. Persons have been so called in whom the cuticle is produced in the form of pointed prolongations, as if it had been moulded on the papillæ, like the shorter and blunter quills of the porcupine.

PORCUS, *Vulva*.

PORDE, *Crepitation*.

PORE, *Porus*, *In'terstice*, *παρος*, 'a passage.'

Anatomists have given this name to the openings at the extremities of vessels at the surface of different membranes. EXHALANT PORES have been supposed to exist in the exhalants, to transmit the fluids exhaled.—ABSORBENT PORES are employed in taking up parts that have to enter the circulation. Pores exist in the cuticle; yet Humboldt, with a powerful magnifying-glass, was unable to observe them. The pores of the skin have also been called *spira'cula*.

POREBLIND, *Myopia*.

PORI BILIA'RII, *Ductus biliar'ii*, *Sur'culi fell'e'i*. Ducts which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

PORI CUTA'NEI, *P. Exhalan'tes* seu *Sudorif'eri* seu *Resorben'tes*. The pores of the skin.

PORI EXHALANTES, *P. cutanei*—*p. Pulmonum*, *Cellules*, *bronchicæ*—*p. Resorbentes*, *P. cutanei*—*p. Sudoriferi*, *P. cutanei*.

POROCE'LE, from *παρος*, *callus*, and *κληη*, 'a tumour.' A hard tumour of the testicle or its envelopes.

POROMA, *Induration*.

POROMPHALOCÉLE, *Poromphalon*.

POROMPHALON, *Poromph'alus*, *Porompha-loe'l'e'i*, from *παρος*, 'hard,' and *ομφαλος*, 'the navel.' Umbilical hernia with hard and thickened parietes.

POROS, *Canal*.

POROSIS, *Chalaza*, *Induration*.

POROT'IC, *Porot'icus*, from *παρος*, 'callus.' A remedy believed to be capable of assisting the formation of callus.

PORPHYRA, *Purpura*—*p. Græcorum*, *Petechiæ*—*p. Hæmorrhagica*, *Purpura hæmorrhagica*.

PORPHYRISMA, *Scarlatina*.

PORPHYRISMUS, *Scarlatina*.

PORPHYRIZATION, *Levigation*.

PORPHYRO-TYPHUS, see *Typhus*.

PORPHYRU'RIA, *Porphyu'ria*; from *πορφυρα*, 'purple,' and *ουρον*, 'urine.' A state of the urine—*pur'puric urine*—in which it deposits the remarkable colouring matter—*pur'purine*—in association with urate of ammonia.

POR'PHYRY, *Porphyri'tes*, from *πορφυρα*, 'purple.' A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

PORPHYRY, BLACK, *Ophites*.

PORPHYURIA, *Porphyuria*.

PORRACÉ, *Porraceus*.

PORRA'CEOUS, *Porra'ceus*, *Pra'sinus*, from *porrum*, 'a leek.' (F.) *Porracé*. Having the green colour of the leek. An epithet given to

certain excreted matters,—the sputa, bile and fæces particularly.

PORREAU, *Allium porrum*.

PORRECTUM, *Lever*.

PORRET, *Allium porrum*.

PORRIGINE, *Porrigio favosa*.

PORRIGINEUX, *Porriginous*.

PORRIGINOSUS, *Porriginous*.

PORRIG'INOUS, *Porrigino'sus*, (F.) *Porri-gineux*. Appertaining to porrigo.

PORRIGO (L.), 'scurf or scall in the head.' *Tin'ea Favus*, *Furfura'tio*, *Furfures*, *Ecpye'sis porrigo*, *Phlysis porrigo*, from *porrigere*, 'to spread.' (F.) *Teigne*, *Rache*. Some of the varieties are contagious. It is principally characterized by an eruption of the pustules, called *favi* and *achores*, unaccompanied by fever.

PORRIGO DECAL'VANS, *Tricho'sis a'rea*, *Area*, *Alope'cia areal'ta*, *A. partial'is*, *A. circumscrip'ta*, *Phytoalope'cia*, *Tyr'ia*, *Tyro'ma*, *Oph'iasis*, *Tin'ea tonsdens*, *Herpens tonsu'rans*, *Limited* or *partial Baldness*, consists of patches of baldness without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive. To a vegetable growth found at the roots of the hair in *Tinea tonsdens*, Malmstén of Stockholm has given the name *Trichoph'yton tonsu'rans*. The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

PORRIGO FAVO'SA, *Ce'rion*, *Favus*, *Ecpye'sis porrigo favosa*, *Tinea favosa*, *Scu'bies cap'itis favosa*, *Melice'ra*, *Melice'rum*, *Melice'ria*, *Mel-lif'arium*, *Porrigophyte*, *Honey-comb Scall* or *Tetter*, (F.) *Teigne fauseuse*, *Porrigine*. This consists in an eruption of pustules common to the head, trunk, and extremities, pea-sized, flattened at the top, in clusters, often uniting; discharge, fetid; scabs, honey-combed; the cells filled with fluid. It occurs both in early and adult life. Modern researches have satisfied some observers, that the crusts of favus are of vegetable nature, and formed of a parasitic plant, belonging to the genus *mycoderm'a*, for which Remak has proposed the name *Achorion Schœnleini*. The point is not, however, settled. The treatment of this variety must consist in the exhibition of laxatives and the mildest stimulating ointments, such as the *Ung. zinei*, *Ung. hydrargyri præcipitat. alb.*, &c. Eczema of the hairy scalp is often confounded with Porrigo.

PORRIGO FUR'FURANS, *Ecpye'sis porrigo fur-fura'cea*, *Tinea furfuracea*, *Tinea porrigino'sa*, *Pityri'asis Tricho'sis furfura'cea*, *Teigne fur-fura'cée* (Alibert), commences with an eruption of small achores, the fluid of which soon concretes and separates in innumerable, thin, laminated scabs, or scale-like exfoliations. It is attended with a good deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults. In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. *Zinc ointment*;—one made with the *Cocculus indicus*;—the *Sulphur ointment*;—*Citrine ointment* and *Ung. hydrargyri nitrico-oxydi*; *Tar ointment* and *Nitric acid ointment* have all been found useful. Should inflammation or discharge arise, these applications must of course be intermitted.

PORRIGO LARVALIS, *P. lupinosa*.

PORRIGO LARVA'LIS, *Crusta lac'tea*, *Ecpye'sis*

*Porrijo crusta'cea*, *Ment'i'go*, *Achor*, *Tin'ea lac'tea*, *T. Fa'ciei*, *Milky scall* or *Tetter*, *Lactu'men*, *Lacti'go*, (F.) *Croûte de lait*, *Croûte laitense*, *Feux volages*, *La Graine*. This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish aches on a red surface. These break and discharge a viscid fluid, which becomes incrustated in thin, yellowish, or greenish scabs. The patches spread, until the whole face becomes, as it were, enveloped in a mask; hence the epithet *larvalis*. The disease is rather a variety of *Eczeema*. Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation. The treatment consists in mild, tepid ablation, and the application of gently stimulating ointments, as of the oxydum zinci. The bowels must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

**PORRIGO LUPINO'SA**, *Tin'ea lupi'na*, *Scabies cap'itis*, *Ecpy'esis porrijo lupino'sa*, *Porri'go larva'lis*, *Impeti'go figura'ta*, *Tin'ea granula'ta*, *T. muc'osa*, *Crusta lactea* (of some), *Ment'agra infantum*, (F.) *Teigne*, *Dartre crustacée flavescence*, consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminate in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish, and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

**PORRIGO SCUTULA'TA**, *Tin'ea granula'ta*, *Ecpy'esis porrijo galea'ta*, *Tinea fici'sa*, *Acho'res seu Sca'bies cap'itis*, *Ringworm of the Scalp*, *Scalled head*, (F.) *Teigne annulaire*, *T. en anneau*, *T. nummulaire*. It commences with clusters of small, light, yellow pustules, which soon scab off; and, if neglected, become hard by accumulation. If the scabs be removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head. It occurs in children three or four years of age, and is very unmanageable. The rules laid down under *Porrijo furfurans* must be here still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad Scabiem*, of Baner, sometimes cures, when others fail.

**PORRIGOPHYTE**, *Porrijo favosa*.

**PORRUM**, *Allium porrum*, *Thymion*.

**PORRUS**, *Sarcocina*, *Thymion*.

**PORTA**, πύλη, *Pylē*, 'a gate.' The part of the liver where its vessels enter as by a gate. Also, the *Vulva*.

**PORTA JECORIS**, *Porta vena*.

**PORTA VENA**, *Vena porta*, *V. porta'rum seu porta'lis*, *Roma'lis vena*, *Jan'itrix*, *Vena magna seu quæ ad portas est stelechia'a seu lac'tea seu omti'a'ria*, *Porta Jec'oris*, *Porta*, *Vena arterio'sa seu arteria'lis*, *Manus Jec'oris seu he'patia*, *Vena ad portas*. The System of the *vena porta* or the *Abdom'inal venous system*, (F.) *Veine porte*, *Porte veine*, is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk. 1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdomina'lis*, because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and in the female, the uterus. The *Abdom'inal vena porta* has two principal roots, the *splenic vein*

and the *superior mesenteric*, which have their ramifications in all the digestive organs. 2. The other trunk, destined solely to the liver, has been called the *Hepatic vena porta*. It appears to be a continuation of the abdominal *vena porta*, and proceeds towards the inferior surface of the liver. Opposite to the transverse fissure of that organ, it divides, like an artery, into two branches, which, by their union, seem to form a canal or duct, called by some the *Sinus of the vena porta*. These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ, — the capsule of Glisson. The different branches of the *vena porta* are devoid of valves. See *Liver*.

**PORTAL**, from *porta*, 'a gate.' Relating to the *porta* of the liver, — as the *portal system*, or system of the *vena porta*. By extension, the term has been applied to an analogous system of vessels in the kidney. See *Kidney*.

**PORTAL FISSURE**, see *Liver* — p. System of the *Kidney*, see *Kidney* — p. *Veins of the Kidney*, see *Kidney*.

**PORTE-AGUILLE**, *Acutenaculum*, *Needle-carrier*, *Needle-bearer*, from (F.) *porter*, 'to carry,' and *aiguille*, 'a needle.' An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument was devised by Dr. Physick for taking up deep-seated arteries beyond the reach of a tenaculum or common needle. It consists of a forceps so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out, leaving the ligature behind, which can be tied without difficulty.

**PORTE-BOUGIE**, (F.) A silver canula similar to that of a trochar, except that it is longer. It is used for conducting bougies into the urethra.

**PORTE-CAUSTIQUE**, *Porte-pierre* — p. *Feuille*, *Subscapularis*.

**PORTE-LIGATURE**, from *porter*, 'to carry,' and *ligature*. An instrument for conveying a ligature to deep-seated parts.

**PORTE-MÈCHE** (F.), from *porter*, 'to carry,' and *mèche*, 'a tent.' An instrument for carrying tents or *mèches* deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

**PORTE-MOXA**, (F.) A small instrument for keeping the moxa applied to a part to be cauterized. It consists of a metallic ring — separated from the skin by three supports of ebony — to which a handle is adapted.

**PORTE-NŒUD** (F.), from *porter*, 'to carry,' and *nœud*, 'a knot.' An instrument for carrying a ligature round the base or pedicle of a tumour.

**PORTE-PIERRE** (F.), *Porte-caustique*, *Caustic bearer*. An instrument similar to a *porte-crayon* for carrying lunar caustic.

**PORTE-SONDE**, (F.) An instrument resembling a *porte-crayon*, employed for holding the style or *sonde*, and inserting it more readily into the nasal duct, during the operation for fistula lachrymalis.

**PORTE-VEINE**, *Porta Vena*.

PORTER, Cerevisia.

PORTIO DURA, Facial nerve — p. Inter duram et mollem, Portio Wisbergii — p. Intermedia Wisbergii, Portio Wisbergii — p. Media inter portionem duram et portionem mollem, Portio Wisbergii.

PORTIO MOLLIS, Auditory nerve.

PORTIO WRISBERGII, *Portio intermedia Wisbergii*, *Portio media inter portionem duram et portionem mollem*, *Portio inter duram et mollem*, (F.) *Faisceau intermédiaire de Wisberg*, *Intermédiaire de Wisberg*. A small, white fasciculus, intermediate between the portio mollis and portio dura of the seventh pair of nerves, which was first described by Wisberg. The Chorda Tympani is supposed by some to emanate from this nerve.

PORTION COSTO-TRACHÉLIENNE, DU SACRO-SPINAL, Longissimus dorsi — p. *Écailléux ou squameux du temporal*, Squamous portion of the temporal — p. *Lombaire du plexus crural*, Lumbar plexus.

PORTION GODRONNÉE DE LA CORNE D'AMMON. A name given by Vicq d'Azyr to a small, denticulated cord, of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

PORTONARIUM, Pylorus, Duodenum.

PORTULA'CA, *Andrach'nē*, *Allium Gallicum*, *Portula'ca olera'cea*, Purslane, (F.) *Pourpier cultivé*. This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as anti-septic and aperient.

POROUS, Callus, Meatus — p. Acusticus, Auditory canal, internal.

PORUS OPTICUS. An opening in the centre of the cribriform lamella of the sclerotic, through which the central artery of the retina enters the eyeball.

POSCA, Oxycrate.

POSE, Coryza.

POSITUM, Potable.

POSITION, FALSE, False position.

POSOL'OGY, *Posolog'ia*, *Dosiolog'ia*, from *ποσος*, 'quantity,' and *λογος*, 'a discourse.' Indication of the doses in which the different articles of the materia medica ought to be exhibited.

POSSET, *Posse'tum*, from (L.) *posca*, 'sour wine and water.' Milk curdled with wine, or any acid, or treacle. A preparation of beer and milk; *Zythog'ala*.

POSSET, SACK, see Sack — p. Sago, see Sago.

POSSETING, Regurgitation (of Infants).

POSTBRACHIALE, Metacarpus.

POSTCARPIUM, Metacarpus.

POSTERIOR ANNULARIS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ring-finger and little finger, and is inserted into the inside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger inwards.

POSTERIOR AURIS, Retrahens auris.

POSTERIOR INDICIS MANŪS. An internal, interosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the fore-finger, and is inserted into the inside of the tendon on the back of the fore-finger. Its use is to draw the fore-finger inwards.

POSTERIOR INDICIS PEDIS, *Abduc'tor Indicis Pedis*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore-toe, and second of the small toes, and is inserted into the outside of the root

of the first bone of the fore-toe. Its use is to pull the fore-toe outwards.

POSTERIOR MEDII DIG'ITI MANŪS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ring-fingers; and is inserted into the inside of the tendon on the back of the middle finger. Its use is to draw the middle finger inwards.

POSTERIOR MEDII DIG'ITI PEDIS, *Abduc'tor medii digiti pedis*. An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the second of the second of the small toes. Its use is to pull the toe outwards.

POSTERIOR TER'TII DIG'ITI, *Adduc'tor tertii digiti*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the third and fourth of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its use is to pull the toe outwards.

POSTHE, Penis, Prepuce.

POSTHET'OMIST, *Posthet'omus*, from *ποσθη*, 'prepuce,' and *τομη*, 'incision.' One who performs the operation of circumcision.

POSTHETOMY, Circumcision.

POSTHIA, Hordeolum.

POSTHIOPLASTIC, *Posthioplas'ticus*, from *ποσθιον*, 'the prepuce,' and *πλασσω*, 'I form.' An epithet applied to the operation for restoring the prepuce.

POSTHIV'TIS, from *ποσθη*, 'the prepuce, the penis,' and *itis*, the termination for inflammation. Inflammation of the prepuce or penis.

POSTHIUM, Prepuce.

POSTHON'CUS, from *ποσθη*, 'the prepuce or penis,' and *ογκος*, 'a tumour.' Swelling of the prepuce or penis.

POSTHOPLAS'TICA, from *ποσθη*, 'prepuce,' and *πλαστικός*, 'formative.' The art of making a new prepuce.

POSTHUMOUS, from *post*, 'after,' and *humus*, 'the ground.' Occurring after death.

POSTHUMOUS CHILD. One born after the death of its father, or taken from the dead body of its mother, as by the Cæsarean section.

POST-MORTEM. 'After death;' as 'a *post mortem* or necroscopic examination.'

POST-NATUS. In the old law writers, the second son.

POST-PARTUM. 'After delivery.' As '*post partum* hemorrhage.'

POSTPOSIT'IO. Delay in the return of a paroxysm. It is opposed to *anticipatio*, which means the return of a paroxysm earlier than its accustomed hour.

In this sense, we speak of an *anticipating*, and a *postponing* (*Febris hysteret'ica*) intermittent.

POSTREMA, Uterus.

POTABLE, *Potab'ilis*, from *potare*, 'to drink.' *Pot'imos*, *Potos*, *Pos'imos*, 'drinkable.' Water is said to be potable, when it contains atmospheric air; is not brackish; and has no mineral impregnation of consequence.

POTASH. So called from the pots or vessels in which it was made; — *Vegetable alkali*, *Gastrium*. Also, *Potass*.

POTASH OF COMMERCE, *Potassa impu'ra*, *Impure potassa*, *Alu'men catinum*, *Cin'eres Rus'sici*, *Subcar'bonus potas'sæ impu'rus*, *Potas'sæ car'bonus impu'rus*, — the *Pearlash* of commerce, is prepared from the ashes of land-plants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potassa,

sulphate of potassa, chloride of potassium, silex, oxide of iron, &c.

From the ashes of lees of wine, and from vine-twigs, a much purer alkali is obtained. It is called *Cinis infecto'rius*, *C. fæcum*, *Cin'eres clavellati*, *Alu'men fæcum*, *Cin'eres clavellati*, (F.) *Cendres gravêlées*, *Cendres de sarment*.

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering, and evaporating. It is called *Salt of Tartar*, *Sal Tar'tari*, *Kali præparatum e tar'taro*, *Kali e tartaro*, *Subcar'bonas potassæ puris'simus*, *Potassæ subcar'bonas e tar'taro*. Lastly, when wormwood is burnt to ashes, dissolved in water, filtered, and evaporated to dryness, it affords another variety of vegetable alkali, the *Sal absinthii* or *Salt of wormwood*.

Impure potash is used for preparing the subcarbonate for medical use.

POTASS, Potassa, Potassa fusa, Potash. The protoxide of potassium.

POTASSA, ACETATE OF, Potassæ acetas — p. Bichromate of, Potassæ bichromas — p. Bisulphate of, Potassæ supersulphas — p. Bitartrate of, Potassæ supertartras — p. Carbonate of, Potassæ carbonas — p. Carbonate of, pure, see Potassæ subcarbonas — p. Chlorate of, Potassæ murias hyperoxygenatus — p. Chromate of, Potassæ chromas — p. Chromate of, neutral, Potassæ chromas — p. Chromate of, yellow, Potassæ chromas.

POTASSA CUM CALCE, Potassæ with lime, *Calx cum cali puro*, *Caus'ticum commu'nè fortius*, *Lapis infernalis sive sep'ticus*, *Kali caus'ticum cum calce*, *Potassæ opè calcis parata et ignè fusa*, *Lapis caus'ticus*, (F.) *Potasse préparée avec la chaux*, *P. à la Chaux*, *Pierre à cautère*. (Potassæ, Calcis añ ʒj. Rub together, and keep in a well-stopped bottle. Ph. U. S.) Used for the same purposes as the next, but more manageable; being less deliquescent.

POTASSA, EUCHLORATE OF, Potassæ murias ferroxxygenatus — p. Ferrocyanate of, Potassii ferrocyanuretum — p. Ferropussiate of, Potassæ cyanuretum.

POTASSA FUSA, Potassa, Kali caus'ticum, Fused potass, *Caus'ticum commu'nè acer'rius*, *Kali purum*, *Al'kali vegetab'ilè fixum caus'ticum*, *Caus'ticum alkali'num*, *C. commu'nè*, *C. Potentillè*, *C. Sali'num*, *Hydras ka'licum*, *Hydras potassæ puræ fusæ*, *Potassæ hydras*, *Lapis caus'ticus*, *Lapis caus'ticus chirurg'rum*, *Lapis infernalis alcali'nis*, *L. sep'ticus*, *Rupto'rium commu'nè*, *Fixed veg'table alkali*, *Hydrate of Potassa*, (F.) *Potasse caustique*. (Prepared by evaporating solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in well-corked vessels. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

POTASSA, FUSED, Potassa fusa — p. Hydriodate of, Potassæ hydriodas — p. Hydrobromate of, see Bromine — p. Hydrocyanate of, Potassii cyanuretum — p. Hyperoxalates, Potassæ oxalate of — p. Hypertartras, P. supertartras — p. Impura, Potash of commerce — p. and Iron, tartrate of, Ferrum tartarizatum — p. with Lime, Potassa cum calce — p. Liquida, Liqueur potassæ — p. Mephite of, Potassæ subcarbonas — p. Monoehromate of, Potassæ chromas — p. Muriate of, Potassæ murias — p. Nitrate of, Potassæ nitras — p. Ope calcis parata et ignè fusa, Potassa cum calce — p. Oxymuriate of, Potassæ murias hyperoxygenatus — p. Prussiate of, Potassii ferrocyanuretum — p. and Soda, Tartrate of, Soda, tartrate of — p. Subcarbonate of, Potassæ subcarbonas — p. Sulphate of, Potassæ sulphas — p. Sulphate of, acid, Potassæ supersulphas — p. Sulphuret of, Potassæ sulphuretum — p.

Supercarbonate of, Potassæ carbonas — p. Super-sulphate of, Potassæ supersulphas — p. Supertartrate of, Potassæ supertartras — p. Tartrate of, Potassæ tartras.

POTASSÆ ACETAS, *Acetas kali*, *Oxytar'tarus*, *Acetas licir'isæ seu ka'licum*, *Al'kali tar'tari acèto saturatum*, *Alcali vegetab'ilè cum aceto*, *Magiste'rium tartari purgans*, *Terra foliata Tartari*, *Kali acetatum*, *Sal diuret'cus*, *Sal Semer'ti*, *Ac'etate of potassæ*, *Arca'num tartari*, (F.) *Acetate de potasse*. (Acid. acetic. Oj, Potassæ carbon, q. s. Mix and add, by degrees, enough acetic acid to saturate the alkali. Then filter and evaporate till a pellicle is formed, which is to be dried upon bibulous paper; evaporate again in a water-bath, and, removing the pellicles, dry. — Ph. U. S.)

It is cathartic and diuretic. Dose, ʒj to ʒij, or more.

POTASSÆ ET ALUMINÆ SULPHAS, Alumen — p. Biantimonias, Antimonium diaphoreticum — p. Bicarbonas, Potassæ carbonas.

POTASSÆ BICHROMAS, *Kali chromicum rubrum seu ac'idum seu bichro'micum*, *Bichro'mate of potassæ*. Procured by adding sulphuric, nitric, or acetic acid to a solution of the neutral chromate, and setting it aside to crystallize. It is a violent irritant poison; and has been used as a caustic in cases of morbid growths, in the proportion of from half a drachm to a drachm of the salt to from an ounce to an ounce and a half of water.

POTASSÆ BISULPHAS, P. supersulphas — p. Bitartras, P. supertartras.

POTASSÆ CARBONAS, *Kali aëratum*, *Bicar'bonas potassæ*, *Potassæ bicar'bonas* (Ph. U. S.) *Dentocarbonas potassii*, *Carbonate*, *bicar'bonate*, or *supercar'bonate of potassa*. This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (Potassæ carbon. Div, Aquæ destillat. Ox. Pass carbonic acid through the solution until it is saturated, and filter. Evaporate at a heat not exceeding 160°, and dry the crystals on bibulous paper. Carbonic acid is obtained from marble by the addition of dilute sulphuric acid. — Ph. U. S.) Dose, gr. x to ʒss. It is used in forming the soda powders, as well as for its antacid properties.

POTASSÆ CARBONAS, P. subcarbonas — p. Carbonas impurus, P. subcarbonas — p. Carbonas purus, see P. subcarbonas — p. Chloras, P. murias hyperoxygenatus — p. Chloruretum oxydatum, P. murias hyperoxygenatus.

POTASSÆ CHROMAS, *Kali chromicum flavum seu neutra'le*, *Neutral yellow Chromate*, or *Mono-chromate of potassa*. Prepared by igniting a mixture of four parts of native chromite of iron (chrome-iron ore) and one part of nitre; dissolving out the chromate of potassa by water, and crystallizing. It has been used as an emetic, expectorant and diaphoretic. Dose, as an emetic, from two to four grains; as an expectorant, from ʒth to ½ grain. In the proportion of one drachm to 32 ounces of water, it has been used as an antiseptic wash — called by Jacobson, *Liquor conservatrix*.

POTASSÆ CITRAS, *Citrate of potassa*. (Acid. citric. ʒx, Potassæ bicarb. ʒxiv, Ag. q. s. Dissolve the acid in the water; and after effervescence has ceased, strain and evaporate to dryness. The salt is deliquescent, and must be kept in well-stopped bottles. Ph. U. S.) It possesses the refrigerant properties of the neutral salts, and may be given in fever, when to do little or nothing is the most advisable course. Dose, gr. x to ʒss.

POTASSÆ ET FERRI TARTRAS, Ferri tartarizatum — p. Hydras, Potassa fusa.

POTASSÆ HYDRIOBAS, Potassæ Protohydri'o-

*das, Potas'sii protoxi'di hydri'odas, Kali Hydriodini'cum, K. Hydriod'icum, Hydriodas Kal'licus, Hydri'odate of potass, (F.) Hydriodate de potasse.* If a solution of potass be poured on iodine, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate, or rather the *Podide of Potas'sium, Kalium Iodid'tum, Potassii Ioduretum seu Io'didum, (F.) Iodure de potassium,* may be obtained by evaporation. When the *Iodide of potassium* is dissolved in water, it becomes the *Hydriodate of Potassa.* The following is the formula in the Ph. U. S. *Potass. ʒvj; Iodin. in pulv. ʒxvj; Carbon. ligni in pulv. subtiliss. ʒij; Aq. bullient. Oij.* Dissolve the potassa in the water; add the iodine gradually, stirring until the solution becomes colourless, and continue the additions until the liquid remains slightly coloured from excess of iodine. Evaporate to dryness, stirring in the charcoal towards the close. Rub to powder, and heat to dull redness in an iron crucible, keeping up the temperature for 15 minutes. When cool, dissolve out the saline matter with pure water, filter the solution, evaporate and set aside to crystallize. By evaporating and crystallizing as before, an additional quantity of crystals may be obtained. Virtues, — those of iodine.

*POTASSÆ MURIAS, Sal Digestivus vel Sal febrifugus Syll'vii, Muriate of Potass, Spir'itus salis mari'ni coagulatus.* Bitter and refrigerant.

*POTASSÆ MURIAS HYPEROXYGENATUS, Potassæ Chloras, P. oxyymurias, Oxyymuriate or hyperoxyymuriate of potass, Chlorate of potass, Euehlo'rate of potass, Alcali vegetabil'e salitodephlogistica'tum, Chlorure'tum potas'sæ oxyda'tum, Halö'dium oxygena'tum, Oxyge'no-Chlorure'tum potas'sii, Protochlo'rate of potas'sium, Kali chlo'ricum, Chloras Kal'licus depuratus, (F.) Chlorate de potasse.* It has been regarded as anti-neuropathic, and as an alterative purifier of the blood and humours. It is of doubtful efficacy. Dose, 3 to 6 grains or more.

*POTASSÆ NITRAS, Nitrate of Potass, Nitrum, Sal nitrum, Nitre, Saltpetre, Sal petræ, Salse'do mcurum, Sanguin'ea, Berenic'ium, Halini'trum, Protouitrate of Potas'sium, Nitrate of protox'ide of Potassium, Kali ni'tricum, Nitras kal'licum, Nitras lixiv'ia, (F.) Nitrate de potasse.* Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixiviation; adding, if necessary, wood-ashes to supply the alkaline basis. It is formed, in an impure state, by nature, in warm climates.

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ʒss. In large doses it is an acrid poison.

*POTASSÆ NITRAS FUSUS SULPHATIS PAUCILO MIXTUS, Sal prunellæ, Crystal'lus minera'lis, Nitras potas'sæ cum sulphur'e fusus, Nitrum tabulat'um, Lapis Prunellæ, Sore-throat salt, Miner'al crystal, Anod'ynum minera'le.* Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

*POTASSÆ OXALAS, Superox'iate of Protox'ide of Potas'sium, Ox'elas Acid'ulum Potas'sæ seu Potas'sæ acid'ulus seu ba'sicus, Superox'alus kal'licum, S. Potassæ, Hyperoxal'as Potassæ, Sal Acetobell'æ, Oxa'l'ium, Kali oxa'l'icium acid'ulum, Ox'elas subpotas'sicus, Oxalate of Potass, Salt of Sorrel.* Prepared from the juice of wood sorrel. It is refrigerant, and is used to make lemonade, &c.

*POTASSÆ OXALAS ACIDULUM, Potass, oxalate of—p. Oxyurias, P. murias hyperoxygenatus—p. Protohydriodas, P. hydriodas—p. Puræ fusæ*

*hydras, Potassa fusa—p. et Sodæ tartras, Soda, tartrate of.*

*POTASSÆ SUBCAR'BNAS, P. Car'bonas (Ph. U. S.), Subcar'bonas Kali, Car'bonas Potassæ, Kali præparatum, Sal Herba'rum, Calca'reous Tartar, Sal Planta'rum, Subcarbonate of Potass, Sal Tartari, Sal Absin'thii, Mephite of Potass, &c. (See Potash.)* A filtered solution of the impure subcarbonate, *Potas'sæ car'bonas impu'rus (Ph. U. S.) Pearl-ash* (see Potash,) evaporated to dryness. This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian codex has a *Subcar'bonas Potas'sæ ex tar'taro combusto, vulgo Sal Tartari or Salt of Tartar*—it is the *Potassæ carbonas purus, Pure Carbonate of Potassa, Ph. U. S.;* and a *Subcarbonas Potassæ ex deflagran'tibus simul tar'tratè acid'ulo et Nitrate Potassæ paratus, vulgo Nitrum ex tartaro fixum;* and a *Subcarbonas potassæ ex deflagran'tè cum Carbo'nibus Nitratè Potassæ paratus, vulgo Nitrum fixum.* They are all used like the preceding.

*POTASSÆ SUBCARBONAS IMPURUS, Potash of commerce.*

*POTASSÆ SULPHAS, Kali vitriola'tum, Sulphas Kali, Kali sulphur'icum, Lixiv'ia vitriola'ta, Nitrum vitriolatum Schroederi, Sal Sapient'ia, Sal Tartari Sulphuratum, Specificum Paracelsi, Spir'itus vitrioli coagulatus Mynsichti, Protosulphate of Potas'sium, Alkali vegetabil'e vitriolatum, Sal de duobus, Arca'nium duplicatum, Nitrum vitriola'tum, Tartarum vitriolatum, Panacea Ducis Holsat'ia, Panacea duplicata, Sal Polychrestus, Sulphate of Potass, (F.) Sulfate de potasse.* (The salt, that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallized.) Purgative and diuretic. Dose, ʒss to ʒj as a laxative. In a large dose it has proved an irritant poison.

*POTASSÆ SULPHAS CUM SULPHURË; Sal Polychrestus Glaseri, Lixiv'ia Vitriola'ta Sulphurea.* (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

*POTASSÆ SULPHURETUM, Potas'sii Sulphuretum, P. tersulphuretum, Kali sulphuretum, Hepar Sulphuris sal'num, H. sulphuris vulgare, Sulphure'tum lixiv'ia, S. kal'licum, Hepar Sulphuris, Liver of Sulphur, Sulphuret of Potass, (F.) Sulfure de potasse, Sulfure de potassium sulfatè, Foie de Soufre. (Sulphur. ʒj, Potassæ carb. ʒij.* Rub them together, and place the mixture in a covered crucible upon the fire until they unite.) It has been employed in affections of the chest, as an expectorant, in the dose of from ʒss to ʒj, largely diluted; but it is chiefly used as a bath or wash in cases of itch, tinea capitis, and other cutaneous affections.

*POTASSÆ SUPEROXALAS, Potassæ oxalal.*

*POTASSÆ SUPERSULPHAS, P. Bisulphas, Sal enix'un, Supersulphate of Potass, Sal febrifugus of Lemery, Acid Sulphate of Potass, Bisulphate of Potass, Super-protosulphate of Potas'sium, (F.) Bisulfate, de Potasse.* (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose, ʒss to ʒij.

*POTASSÆ SUPERTARTRAS IMPURUS, Tartarus crudus, Tartarum, Lapis vini, Maguetinus, Pedagra, Tartar, (F.) Tartre cru, T. brut.* It is called, also, *Tartarum rubrum* and *Red Argol*, when obtained from red wines; *Tartarum album* or *White Argol*, when from white wines. Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles in which they are kept. It

consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumen, oxyd of iron, manganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

POTASSÆ SUPERTARTRAS, *Crystal'li Tartari, Tartras Acid'ulus Potassæ purus, Supertartate of Protox'ide of Potass'ium, Potassæ Bitar'tras* (Ph. U. S.), *P. tartras ac'ida, Bitartrate or Supertartrate of Potass, Hypertartras Potassæ, Tartras superpotass'icus, T. subpotass'icus, Crystals of Tartar, Cremor Tartari, Cream of Tartar* (when in powder,) *Supertartate of Potass, (F.) Tartrate acide de potasse, Crème de Tartre.* (The tartar of wine purified.) It requires 120 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon-peel, it forms an agreeable beverage in febrile diseases, under the name of *imperial*. Dose, as a diuretic, ℞j to ℞ij; as a purgative, ℞ss to ℞j.

POTASSÆ TARTRAS, *Kali tartarizatum, Al'cali fixum tartarizatum, Tart'orum solib'ile, Tartaras tartarizatus, Lixiv'ia Tartaria'ta, Sal Panchro'satum, Tartras Kalinus, T. Lixiv'ia, Sal vegetabil'is, Alkali vegetabil'ile tartarizatum, Tartrate of Potass, Soluble Tartar, (F.) Tartrate de Potasse. (Potassæ carbon. ℞xvj; Potassæ Bitartrate in pulv. subtiliss. ℞ij, vel q. s., aquæ bullientis, cong.* Dissolve the carbonate of potassa in the water, add the bitartrate to saturation, and boil; filter, evaporate till a pellicle forms, and set aside to crystallize. Pour off the liquid; dry the crystals on bibulous paper, and keep in closely-stopped bottles.—Ph. U. S.) A saline cathartic in the dose of ℞ij to ℞j.

POTASSÆ TARTRAS ACIDA, *P. supertartras*—p. *Tartras acidulus purus, P. supertartras*—p. *Tartras stibialis seu stibiosus, Antimonium tartarizatum.*

POTASSE, ACETATE DE, *Potassæ acetas*—p. *Bisulphate de, Potassæ supersulphas*—p. *Caustique, Potassa fusa*—p. *à la Chaux, Potassa cum calce*—p. *Chlorate de, Potassæ murias hyperoxygenatus*—p. *Hydriodate de, Potassæ hydriodas*—p. *Liquide, Liquor potassæ*—p. *Nitrate de, Potassæ nitras*—p. *Préparée avec la chaux, Potassa cum calce*—p. *et de Soude, tartrate de, Soda, tartrate of*—p. *Sulfate de, Potassæ sulphas, p. Sulfure de, Potassæ sulphuretum*—p. *Tartrate de, Potassæ tartras*—p. *Tartrate, acide de, Potassæ supertartras.*

POTASSII BROMIDUM, *Potass'æ hydrobromas, (F.) Bromure de Potassium, Bromide of potassium. (Bromin, ℞ij; Ferri filii, ℞j; Potass. carbon. ℞ij and ℞i, vel q. s.; Aq. dentillat., Oiv.* Add the iron filings and bromine to a pint and a half of the water; stirring for half an hour. Apply a gentle heat, and when the liquor assumes a greenish colour, add gradually the carbonate of potassa, dissolved in Oiss of the water, until it ceases to cause a precipitate. Continue the heat for half an hour, and filter. Wash the precipitate with the remaining water, boiling hot, and filter. Mix the liquors and crystallize by evaporation. Ph. U. S.) Virtues:—those of iodide of iron.

POTASSII CYANIDUM, *P. Cyanuretum.*

POTASSII CYANURETUM, *P. Cyan'idum, Cyanuret of Potassium, Hydrocyanate of Potassa, (Potassii Ferrocyanus, in pulv. ℞viij; Potass. Carbonat., ex siccat., ℞ij.* Mix intimately and throw into a deep iron crucible, heated to redness; keep up the heat till effervescence ceases, and the fused mass concretes, of a pure white colour, upon a warm glass rod dipped into it; then pour out the liquid carefully into a shallow

dish, to solidify, stopping before the salt becomes contaminated with the precipitated iron. Break up the mass whilst warm, and preserve in well-stopped bottles. Ph. U. S.) Used in the same cases as the hydrocyanic acid. Dose, a quarter of a grain.

POTASSII DEUTO-CARBONAS, *Potassæ carbonas.*

POTASSII FERROCYANURETUM, *P. Ferrocyan'idum, Ferrocy'anide or Ferrocyan'uret of Potassium, Ferrocy'anate of Potassa, Ferrocyanate of Potassa, Prussiate of Potassa, (F.) Protocyanure jaune de fer et de potassium, Cyanure de fer et de potassium.* The yellow double cyanuret of potassium and iron, the salt from which the cyanuret of potassium is obtained by calcination. It is not much used in medicine. It has been advised as an astringent in the colliquative sweats of phthisis, in leucorrhœa, &c.; but it does not seem to be possessed of much activity. Dose, 10 or 15 grains every four or five hours.

POTASSII HYDRARGYRO-IODIDUM, *Potassæ Iodohydrargyras, Hydrargyrum biiodatum cum kalio iodato, Kalium iodatum hydrargyrum, Iodhydrargyrate of Potassium, Hydrargyro-iodide of Potassium.* This salt is made by the combination of iodide of potassium with red iodide of mercury. Its properties are similar to those of the iodides of mercury, but in a less degree.

POTASSII IODIDUM, *Potassæ hydriodas*—p. *Ioduretum, Potassæ hydriodas*—p. *Oxygeno-chloruretum, Potassæ murias hyperoxygenatus*—p. *Protoxidi hydriodas, Potassæ hydriodas*—p. *Sulphuretum, Potassæ sulphuretum*—p. *Tersulphuretum, Potassæ sulphuretum.*

POTASSIUM. Same etymon as potash. The metallic base of potassa.

POTASSIUM, BROMURE DE, see Bromine—p. *Cyanuret of, Potassii cyanuretum*—p. *Ferrocyanide of, Potassii ferrocyaneuretum*—p. *Ferrocyanuret of, Potassii ferrocyaneuretum*—p. *Iodide of, Potassæ hydriodas*—p. *Iodohydrargyrate of, Potassii hydrargyro-iodidum*—p. *Iodure de, Potassæ hydriodas*—p. *Oxide of, Potass*—p. *Protoarsenite of, Arsenite of protoxide of potassium*—p. *Protochlorate of, Potassæ murias hyperoxygenatus*—p. *Protonitrate of, Potassæ nitras*—p. *Protoxide of, Potass*—p. *Protoxide of, nitrate of, Potassæ nitras*—p. *Protoxide of, superoxalate of, Potass, oxalate of*—p. *Protoxide of, supertartrate of, Potassæ supertartras*—p. *Protosulphate of, Potassæ sulphas*—p. *Sulfure de, sulfaté, Potassæ sulphuretum*—p. *Sulphuret of, Potassæ sulphuretum*—p. *Superprotosulphate of, Potassæ supersulphas.*

POTATO, *Solanum tuberosum*—p. *Fly, Lytta vittata*—p. *Hog, Convolvulus panduratus*—p. *Spanish, Convolvulus batatas*—p. *Sweet, Convolvulus batatas*—p. *Vine, wild, Convolvulus panduratus*—p. *Wild, Convolvulus panduratus.*

POTBELLY, *Physconia.*

POTELÉE, *Hyoscyamus.*

POTENTIA, *Force.*

POTENTIA seu POTES'TAS COE'NDI, *Capability of copulation.*

POTENTIA GERAN'DI. *The power of procreation.*

POTENTIA IRRITANS, *Stimulus.*

POTENTIAL, *Potentia'tis; from potens, 'able.'* An epithet for remedies which, although energetic, do not act till some time after their application. The caustic alkalies, for instance, are called *Potential cauteries* in contradistinction to the hot iron, which is termed *actual*.

POTENTILLA, *P. reptans.*

POTENTILLA ANSERI'NA, *P. argenti'na seu impollita seu neglecta, Argenti'na vulgaris, Fragaria anseri'na, Ar'gentine, Chenobol'can, Argenti'ria, Anseri'na, Silver Weed, Wild Tansy,*

(F.) *Argentine, Potentilla*. The leaves are mildly astringent and tonic.

POTENTILLA ARGENTINA, P. anserina — p. Im-polita, P. anserina — p. Neglecta, P. anserina.

POTENTILLA NORVEG'ICA, *Norway Cinque-foil*, an indigenous plant, is possessed of similar properties.

POTENTILLA PALUSTRIS, *Comarum palustre*.

POTENTILLA REPTANS, *Pentaphyl'ium, Fragaria pentaphyl'ium, Potentil'la, Quinquesfolium, Q. majus, Common cinquefoil, (F.) Quintefeuille*. The roots are possessed of astringent properties.

POTENTILLA TORMENTILLA, *Tormentilla*.

POTERIUM SANGUISORBA, *Pimpinella saxifraga*.

POTESTAS COEUNDI, *Potentia coeundi* — p. Generandi, *Potentia generandi*.

POTEX, *Anus*.

POTHOS FETIDA, *Dracontium foetidum* — p. Putorii, *Dracontium foetidum*.

POTIMOS, *Potable*.

POTIO, *Drink, Haustus, Potion* — p. Calcis carbonatis, *Mistura cretæ* — p. Effervescentis anti-emetica, *Potion of Riverius* — p. Leniens, *Looch ex ovo* — p. Oleosa, *Looch ex ovo* — p. Picea, see *Pinus sylvestris*.

POTION (F.), *Potio*; from *poto*, 'I drink.' A liquid medicine, from 4 to 8 ounces or more in quantity, the composition of which varies, and which is administered in divided doses. It corresponds to the English *mixture*.

POTION PECTORALE, *Looch ex ovo*.

POTION OF RIVERIUS, A mixture of *Lemon Juice* and *Subcarbonate of Potass*, — generally given in a state of effervescence. It is the *Potio efferves-cens anti-emet'ica dicta Rive'rii*, of the Parisian codex. The name in the codex indicates its use.

POTIONIS DESIDERIUM, *Thirst*.

POTIRON, *Cucurbita pepo*.

POTIUNCULA, *Haustus*.

POTOPARANÆA, *Delirium tremens*.

POTOS, *Potable*.

POTOTROPOPARANÆA, *Delirium tremens*.

POTT'S DISEASE, *Vertebral disease*.

POTUS, *Drink* — p. *Hippocraticus, Claret*.

POU, *Pediculus*.

POUCE, *Pollex, see Digitus*.

POUCHED, *Eneysted*.

POUDRE, *Powder, Pulvis* — p. *Absorbante et anti-acide*, p. *Pulvis de magnesiâ compositus* — p. *d'Alun composée*, *Pulvis sulphatis aluminæ compositus* — p. *Antiarthritique amère*, *Pulvis de amaris compositus* — p. *Antiasthmatique*, *Pulvis de sulphure et scillâ* — p. *Antimonialte composée ou de James*, *Antimonial powder* — p. *Aromatique*, *Pulvis cinnamomi compositus* — p. *d'Asarum composée dite sternutatoire*, *Pulvis asari compositus* — p. *Balsamique*, *Pulvis myrrhæ compositus* — p. *de Birckmann*, *Pulvis de aro compositus* — p. *de Blanchement*, *Calcis chloridum* — p. *de Cannelle composée*, *Pulvis cinnamomi compositus* — p. *Cathartique*, *Pulvis scammonæ compositus* — p. *de Chypre*, see *Cladonia rangiferina* — p. *du Comte de Palme*, *Magnesiæ carbonas* — p. *Cornachine*, *Pulvis cornachini* — p. *de Corne brûlée avec opium*, *Pulvis cornu usui cum opio* — p. *de Craie composée avec opium*, see *Pulvis cretæ compositus cum opio* — p. *de Dover*, *Pulvis ipecacuanhæ compositus* — p. *de Dupuytren*, *Powder of Dupuytren* — p. *Gazifère lazative*, *Powders, Seidlitz* — p. *Gazifère simple*, *Powders, soda* — p. *de Gomme adragant composée*, *Pulvis tragacanthæ compositus* — p. *de Gomme gutte*, *Pulvis e gummi guttâ* — p. *Hydragogue*, *Pulvis e gummi guttâ* — p. *Incisive*, *Pulvis de sulphure et scillâ* — p. *d'Ipecacuanha et opium*, *Pulvis ipecacuanhæ compositus* — p. *de Jalap composée*, *Pulvis jalapæ compositus*

— p. *de Kino composée*, *Pulvis kino compositus* — p. *de Pérard*, *Pulvis de sennâ, scammonio et lignis* — p. *de Quercetanus*, *Pulvis e gummi guttâ* — p. *de Saint Ange*, *Pulvis asari compositus* — p. *de Savon végétale*, *Pulvis gummosus alkalinus* — p. *de Scammonée composée*, *Pulvis scammonæ compositus* — p. *de Seidlitz*, *Powders, Seidlitz* — p. *de Séné composée*, *Pulvis sennæ comp.* — p. *de Sentinelli*, *Magnesiæ carbonas* — p. *Styptique*, *Pulvis sulphatis aluminæ compositus*.

POUDRE SUBTIL DE DELCROIX. A fashionable depilatory "for removing superfluous hair in less than ten minutes." It is said to consist of *Quicklime* and *Sulphuret of Arsenic*, with some vegetable powder. — Paris.

POUDRE TEMPÉRANTE DE STAHL, *Pulvis de Sulphate potassæ compositus* — p. *de Tennant*, *Calcis chloridum* — p. *de Valentini*, *Magnesiæ carbonas* — p. *Vermifuge mercurielle*, *Pulvis e sulphureto hydrargyro nigro et scammonio* — p. *Vermifuge sans mercure*, *Pulvis ex helminthocorto compositus*.

POUGUES, MINERAL WATERS OF. These alkaline waters are in the department of Nièvre, France. They contain carbonic acid, carbonates of soda, lime, and magnesia; chloride of sodium; alumina, and silica, with protoxide of iron.

POULAIN, *Bubo*.

POULET, VIN DE (F.), *Pullet Wine*. A disgusting preparation, made by infusing the excrement of the pullet in white wine. According to Nysten, it is employed by the vulgar in France in a number of diseases, and especially in falls, contusions, &c.

POULIOT, *Mentha pulegium*.

POULS, *Pulse* — p. *Abdominal*, *Pulsus inferior* — p. *des Adultes*, *Pulse, natural* — p. *Agité*, *Pulsus fortis* — p. *Bas*, *Pulse, low* — p. *Capital*, *Pulse, nasal* — p. *Combiné*, *Pulse, complex* — p. *Compliqué*, *Pulse, complex* — p. *Composé*, *Pulse, complex* — p. *Concentré*, *Pulse, contracted* — p. *Défaillant*, *Pulsus deficiens* — p. *Déprimé*, *Pulse, depressed* — p. *de la Diarrhée*, *Pulse, intestinal* — p. *Dur*, *Pulse, hard* — p. *Élévé*, *Pulse, ardent* — p. *Embarassé*, *Pulsus intricatus* — p. *de l'Estomac*, *Pulse, stomachal* — p. *Étroit*, *Pulsus strictus* — p. *de l'Expectoration*, *Pulse, pectoral* — p. *Faible*, *Pulse, feeble* — p. *du Foie*, *Pulse, hepatic* — p. *Grand*, *Pulse, large* — p. *Invisible*, *Pulsus deficiens* — p. *Intercadent*, *Pulse, intermittent* — p. *des Intestins*, *Pulse, intestinal* — p. *Languissant*, *Pulse, languid* — p. *Lent*, *Pulse, slow* — p. *de la Matrice*, *Pulsus uterinus* — p. *Modéré*, *Pulse, natural* — p. *Mou*, *Pulse, soft* — p. *de Nez*, *Pulse, nasal* — p. *Ondoyant*, *Pulse, undulating* — p. *Ondulant*, *Pulse, undulating* — p. *Palpitant*, *Pulse, tremulous* — p. *Parfait*, *Pulse, natural* — p. *Petit*, *Pulse, small* — p. *Plein*, *Pulse, full* — p. *Précipité*, *Pulse, frequent* — p. *Profond*, *Pulse, deep* — p. *Prompt*, *Pulse, sharp* — p. *Rare*, *Pulse, slow* — p. *Rebondissant*, *Pulsus dicrotus* — p. *Redoublé*, *Pulsus dicrotus* — p. *des Règles*, *Pulsus uterinus* — p. *Roide*, *Pulse, tense* — p. *Serratile*, *Pulsus serrinus* — p. *Serré*, *Pulse, contracted* — p. *de la Sueur*, *Pulsus sudorialis* — p. *Tardif*, *Pulse, slow* — p. *Tendu*, *Pulse, tense* — p. *Tremblant*, *Pulse, tremulous* — p. *de l'Urine*, *Pulsus urinalis* — p. *Véhément*, *Pulsus fortis* — p. *Ventral*, *Pulsus inferior* — p. *Vide*, *Pulsus vacuus* — p. *Vif*, *Pulse, sharp* — p. *Vite*, *Pulse, sharp*.

POULTICE, see *Cataplasm*.

POUNCE, *Sandarac*.

POUND, *Libra, Litra, λιβρα*, Lat. *Pondo, Bage'dia* (of twelve oz.), *Barda'dia*, (F.) *Livre*, from *pondere*, 'to weigh.' A weight, consisting of twelve ounces Troy, — sixteen ounces avoirdupoise. See *Weights and Measures*.

POURPIER CULTIVÉ, *Portulaca*.

**POURPRE BLANC**, Miliary fever.

**POURRITURE**, Putrefaction—*p. d'Hôpital*, Hospital gangrene.

**POUS**, Pes.

**POUSSE**, Pursiness.

**POUSSÉE**, Lichen.

**POUSSIÈRE TUBERCULEUSE** (F.), 'Tuberculous Dust.' A name given by MM. Rilliet and Barthelz to fine white or yellow minute points of tuberculous matter occurring in myriads, so as to be likened to dust.

**POWDER**, Pulvis.

**POWDER OF ÆTHIOPIA**, GUY'S. A once celebrated anthelmintic, which consisted of pure *rasped tin, mercury, and sulphur*, triturated together.

**POWDER OF ALOES**, COMPOUND, Pulvis aloes compositus, Pulvis sulphatis aluminae compositus—*p. of Aloes with canella*, Pulvis aloes cum canellâ—*p. Antimonial*, Chenevix's, Antimonial powder—*p. Aromatic*, Pulvis aromaticus.

**POWDER, ARSENICAL**, OF CÔME, *Côme's powder*—*a caustic*—is formed of *arsenious acid*, gr. x; *red sulphuret of mercury*, gr. xl; powdered *animal charcoal*, gr. x. It is made into a paste with mucilage.

**POWDER OF ARUM**, compound, Pulvis de aro compositus—*p. of Asarabacca*, compound, Pulvis asari compositus—*p. of Bladder-wrack*, yellow, Pulvis quercus marinae—*p. Bleaching*, Calcis chloridum—*p. Camboge*, Pulvis e gummi guttâ—*p. Cardinal del Lugo's*, Cinchona—*p. of Chalk*, compound, Pulvis cretæ compositus—*p. of Chalk with opium*, compound, Pulvis cretæ compositus eum opio—*p. of Cinnamon*, compound, Pulvis cinnamomi compositus—*p. Côme's*, Powder arsenical of Côme—*p. of Contrayerva*, compound, Pulvis contrayervæ compositus—*p. Countess's*, Cinchona—*p. Countess of Kent's*, Cantianus pulvis—*p. Cyprus*, Hibiscus abelmoschus—*p. Dover's*, Pulvis ipecacuanhæ compositus.

**POWDER OF DUPUYTREN** (CAUSTIC); (F.) *Poudre de Dupuytren*, formed of 1 part of arsenious acid and 200 parts of mild chloride of mercury. A mild and manageable caustic for causing an eschar on exposed surfaces, and in lupus, &c.

**POWDER, EARL OF WARWICK'S**, Pulvis cornachini—*p. of Ethiopia*, Powder of Æthiopia.

**POWDER OF FAYNARD**. A celebrated powder for arresting hemorrhage, said to be nothing more than the charcoal of beech wood finely pulverized.

**POWDER, FEVER, SCHWANBERG'S**, Antimonial powder.

**POWDER-FOLDER**. In Pharmacy, an apparatus by which papers containing powders are folded of the desired length.

**POWDER, GINGER-BEER**, see *Amomum zingiber*—*p. Gout*, Duke of Portland's, Pulvis Ducis Portlandiæ—*p. of Burnt hartshorn with opium*, Pulvis cornu cervi cum opio—*p. Ipecacuanha* compound, Pulvis ipecacuanhæ compositus—*p. of Jalap*, compound, Pulvis jalapæ compositus—*p. James's*, fæctitious, Antimonial powder—*p. Jesuit's*, Cinchona—*p. of Kino*, compound, Pulvis kino compositus—*p. of Lemonade*, see *Lemonade*—*p. of Magnesia*, compound, Pulvis de magnesiâ compositus—*p. of the Marquis*, Marchionis pulvis—*p. Mead's*, against the bite of a Mad dog, Pulvis antilyssus—*p. Myrrh*, compound, Pulvis myrrhæ compositus—*p. Porland*, Pulvis Ducis Portlandiæ—*p. of the three Sanders*, see *Diatrium*—*p. Scammony and aloes*, Pulvis scammoni cum aloë—*p. Scammony* compound, Pulvis scammonie compositus—*p. of Senna*, compound, Pulvis senne compositus—*p. Sneezing*, see *Verratum album*—*p. Spruce beer*, see *Spruce beer*—

*p. Tennant's*, Calcis chloridum—*p. Tooth*, Dentifricium—*p. Tragacanth*, compound, Pulvis tragacanthæ compositus.

**POWDER, VIENNA'S**, is composed of equal parts of quicklime and potassa cum calce. In using it, it is made into a paste—*Vienna paste*, (F.) *Caustique de Vienne*—with spirits of wine, and is applied on the disensed part, previously circumscribed by a hole cut in a sticking plaster.

To be left on from 10 to 20 minutes, according to the depth of the eschar required. Used in cases of lupous ulceration.

By fusing the potass and lime, and raising the heat so as to cause ebullition, the caustic may be run into cylinders:—when it is called *Caustique-Filhos*, *Causticum Viennense fusum Filhos*, from the name of the author of the process.

**POWDERS, CASTILLON**, so called from the name of the physician who first proposed them. They are formed of *sago*, in powder; *salap*, in powder; *tragacanth*, in powder, each, four parts; *prepared oyster-shells*, one part, *cochineal*, half a part, divided into powders of one drachm each; one of which is given three or four times a day as a demulcent in diarrhœa and dysentery.

**POWDERS, SODA**, *Pulveres effervescentes*, (F.) *Poudres gazifères simples*. (*Sodæ carb. ʒss*, in each *blue paper*; *tartaric acid*, gr. xxv in each *white paper*; for half a pint of water.) A pleasant, cooling drink; taken during the effervescence.

*Seidlitz Powders*, (F.) *Poudres gazifères lacutives* ou *Poudres de Seidlitz*, contain one or two drachms of tartrate of potassa and soda, added to the alkali in the blue paper.

**POWER**, Faculty—*p. Inherent*, Irritability—*p. Tonic*, Irritability.

**POX**, Syphilis, Variola—*p. Chicken*, Variella—*p. Doctor*, Syphilitiater—*p. French*, Syphilis—*p. Grease*, see *Grease*—*p. Noddl*, Syphilomania—*p. Small*, Variola—*p. Swine*, see *Variella*—*p. Water*, see *Variella*.

**POZZUOLI, MINERAL WATERS OF**. Pozzuoli is in the neighbourhood of Naples. The springs are, 1. *Acqua della pietra*, Temp. 91° Fah. 2. *Acqua di Caracanti*, Temp. 100°. *A. di subveni homini*, Temp. 102°; *A. del cartello*, Temp. 86 to 89°; and that of the Temple of Scarpis in Pozzuoli, Temp. 102 to 107°. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, chloride of sodium, sulphate of lime, and silica.

**PRACTICE OF PHYSIC**, Therapeutics.

**PRACTITIONER, GENERAL**, Surgeon apothecary—*p. Irregular*, see *Irregular*—*p. Regular*, see *Regular*—*p. Routine*, Routinist.

**PRÆBIUM**, Dose.

**PRÆCAUTIO**, Prophylaxis.

**PRÆCIPITANS MAGNUM**, Sepia.

**PRÆCIPITATUM ALBUM**, Hydrargyrum præcipitatum.

**PRÆCIPITATUS RUBER**, Hydrargyri nitrico-oxydum.

**PRÆCISIO PRÆPUTII**, Circumcision.

**PRÆCOCIA**, Prunus Armeniaea.

**PRÆCOCITY**, Præotia.

**PRÆCOGNITIO**, Prognosis.

**PRÆCORD'IA**, from *præ*, 'before,' and *cor*, 'the heart.' The diaphragm; also, the thoracic viscera, and the epigastrium.

**PRÆCORDIAL or PRÆCORDIAL REGION**, *Regio præcordiaca* seu *præcordialis*, is the epigastric region. Also, and more properly, the region of the heart. A line drawn from the inferior margins of the third ribs across the sternum, passes over the valves of the pulmonary artery a little to the left of the mesial line, and those of the aorta are behind them, but about half an inch lower down. A vertical line, coinciding with the

left margin of the sternum, has about one-third of the heart, comprising the upper portion of the right ventricle, on the right, — and two-thirds, comprising the lower portion of the right ventricle and the whole of the left, on the left. This is the præcordial region.

PRÆCORDIUM, *Fossette du cœur*—p. Pedis, Metatarsus.

PRÆCOX MATURETAS, Præcœtia.

PRÆCUSTODIA, Prophylaxis.

PRÆDICTIO, Prognosis.

PRÆDISPOSITIO, Predisposition.

PRÆDIVINATIO, Mantia.

PRÆDOMIN'IUM; from *præ*, 'before,' and *dominus*, 'a lord.' Predominance of one thing over another.

PRÆDOMIN'IUM AQUÆ. A predominance of watery fluid,—*Tenuitas aquosa*.

PRÆDOMINIUM SAN'GUINIS ARTERIO'SI. A predominance of arterial blood, *Arteriositas sanguinis*.

PRÆDOMIN'IUM SAN'GUINIS VENO'SI, *Venositas Sanguinis*. Predominance of venous blood.

PRÆFOCATIO, Orthopnoea, Suffocation—p. Faucium, Angone—p. Matricis, Angone—p. Uterina, Angone.

PRÆFOCATION, Strangulatio uterina.

PRÆGNANS, Pregnant.

PRÆGNAS, Pregnant.

PRÆGNATIO, Fecundation, Pregnancy.

PRÆGNATUS, Fecundation, Pregnancy.

PRÆGNAX, Pregnant.

PRÆGUSTATIO, *Avant-gout*.

PRÆHENSIO, Prehensio.

PRÆLING'UA. The anterior part or tip of the tongue.

PRÆLIUM, Coition, Press, Tourniquet—p. Arteriale, Tourniquet.

PRÆLUMBARIS, Prelumbar.

PRÆNOTIO, Prognosis.

PRÆNUNTIATIO, Prognosis.

PRÆPARATIO, Preparation—p. Chyli, Chylification.

PRÆPARATUM, Preparation.

PRÆPOTEN'TIA, from *præ*, 'before,' and *potens*, 'powerful.' Great power or strength.

PRÆPOTEN'TIA VIRI'LIS. Great, or too great procreative power on the part of the male.

PRÆPOTIO, Propotismos.

PRÆPUTIALIS, Preputial.

PRÆPUTIUM, Prepuce.

PRÆSAGIUM, Mantia.

PRÆSCIENTIA, Prognosis.

PRÆSCITIO, Prognosis.

PRÆSCRIPTIO, Prescription.

PRÆSEPIOLUM, Alveolus.

PRÆSEPIUM, Alveolus.

PRÆSERVATIO, Prophylaxis.

PRÆSERVATIVUM, Amuletum.

PRÆSERVATO'RIA INDICA'TIO. A preservative indication; one proper for preventing the development of disease.

PRÆSERVATORIUS, Prophylactic.

PRÆSPINALIS, Prespinal.

PRÆTIBIALIS, Pretibial.

PRAIRIE BUSH, STINKING, *Petela trifoliata*—p. Pines, Liatrie.

PRASINUM VIRIDE, Cupri subacetat.

PRASINUS, Porraceous.

PRASI'TES, from *prasium*, 'horehound.' Wine in which the leaves of horehound have been infused.

PRASIUM, Marrubium.

PRASUM, Allium Prasum.

PRAXIS, Action.

PRAXIS MED'ICA. The practical exercise of the healing art.

PRECIPITATE, RED, Hydrargyri nitrico-

oxydum—p. White, Hydrargyrum præcipitatum.

PRECIPITATION, *Præcipitatio*, (F.) *Præcipité*, from *præcipitare*, (*præ*, 'before,' and *caput*, 'the head,') 'to throw headlong.' The action by which a body abandons a liquid in which it is dissolved, and becomes deposited at the bottom of the vessel. The matter, so thrown down or precipitated, is called a *precipitate*.

PRÆCIPITATION DE LA MATRICE, Procidencia uteri.

PRÆCIPITÉ BLANC, Hydrargyrum præcipitatum.

PRÆCORDIAL, Præcordial.

PRÆCUR'SORY, *Præcurso'rius*; from *præ*, 'before,' and *curro*, *cursum*, 'I run.' That which precedes.

PRÆCUR'SORY or PRÆMON'ITORY SIGNS or SYMPTOMS, (F.) *Signes précurseurs*, *S. avant couruers*, are those which indicate an approaching disease.

PREDISPONENT CAUSES, see Causes, predisponent.

PREDISPOSIT'ION, *Prædisposit'io*, *Semin'ia morbo'rum* (Gaubius); from *præ*, 'before,' and *disponere*, 'to dispose.' (F.) *Imminence morbide*. That constitution or condition of the body, which disposes it to the action of disease under the application of an exciting cause. Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them. When the disease arises solely from the predisposition, or under the additional influence of an extremely slight exciting cause, it is, by some, termed a *disposition*.

PREDOR'SAL, *Prædorsalis*, from *præ*, 'before,' and *dorsum*, 'the back.'

PREDORSAL REGION of the vertebral column is the anterior surface of the dorsal region.

PRÉ-DORSO-ATLOÏDIEN, Longus colli.

PRÉ-DORSO-CERVICAL, Longus colli.

PREGNANCY, *Prægnatio*, *Prægnatus*, *Imprægnatio*, *Ingravidatio*, *Ingravidation*, from *præ*, 'before,' and *genere*, 'to beget.' *Hysteroeyesis*, *Graviditas*, *G. uteri'na*, *En'cymon*, *Cye'sis*, *Encye'sis*, *En'cycsis*, *Encymo'sia*, *Cyopho'ria*, *Gestatio*, *Fœtatio*, *Utero-gestatio*; (F.) *Grossesse*. The state of a female who has within her a fecundated germ, which gradually becomes developed in or out of the uterus. When placed in the cavity of the uterus,—by virtue of the vital principle which animates it, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment necessary for its gradual development, during the space of ten lunar months or two hundred and eighty days—the ordinary term or duration of gestation, although the period may be protracted to 300 days or upwards,—at the expiration of which parturition occurs. Pregnancy is commonly limited to a single fœtus: at times, the uterus contains two or three.—See Reproduction. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus:—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovary, or is arrested in the Fallopian tube. Pregnancy has, accordingly, been distinguished into, 1. *Natural* or *uterine*, when the fœtus is carried in the cavity of the womb: and, 2. *Preternatural* or *extra-uterine*, *Exfœtatio*, *Conceptio vitio'sa*, *Paracye'sis* seu *Ecye'sis*, *Echthysteroeye'sis*, *Echthysteroeye'sis*, *Dysto'cia*, *Dyseye'sis* seu *Graviditas extra-uteri'na*, (F.) *Grossesse contre-nature*,—when it occurs in the ovary, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs

of this indigenous plant, whose root and milky juice are very bitter. They are used in popular practice in dysentery; and in the form of cataplasm to bites of serpents.

PRENANthes SERPENTARIA, *Nabalus albus*.

PRENDRE INSCRIPTION, see *Matriculate*.

PREPARATION, *Præparatio*, from *præ*, 'before,' and *parare*, *paratum*, 'to get ready.' The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmaceutical operation;—*Præparatum*.

Any part of the human body, preserved for the uses of the anatomist, is so called.

PREPUCE, *Præputium*, perhaps from *πρως*, and *ποθη*, 'the foreskin.' *Epagogium*, *Posthæ*, *Pella*, *Posthium*, *Putium*, *Foreskin*. The prolongation of the integuments of the penis, which covers the glans. The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by areolar membrane. The mucous membrane lines the inner surface of the cutaneous layer till beyond the glans, when it is reflected over the latter; forming, behind the corona, a small *cul-de-sac* above the corpora cavernosa, which is interrupted by a triangular duplicature of the mucous membrane, called the *frænum*, fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called *Præputium clitoridis*.

PREPUTIAL, *Præputialis*; same etymon. Belonging or relating to the prepuce;—as the 'preputial secretion,'—or that which takes place from the lining of the prepuce covering the glans.

PRESBYODOCHIUM, *Gerocomium*.

PRESBYONOSI; from *πρεσβως*, 'old,' and *νοσος*, 'disease.' Diseases of old age.

PRESBYOPIA, *Presbytia*.

PRESBYSPHACELUS, *Gangrene* of old people.

PRESBYTIA, *Presbyopia*, *Amblyopia proximorum*, *Visus senilis*, *Presbyopia*, (F.) *Vue laugue*; from *πρεσβως*, 'an old person.' A very high degree is termed *Hyperpresbytia*. A condition of vision, common in old persons, which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergency of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays. It is, also, called *Long-sightedness*, *Paropsis longinqua*, *Dysopia proximorum*.

PRESCRIPTION, *Præscriptio*, *Anagraphe*, from *præ*, 'before,' and *scribere*, 'to write.' *Formula medica*, *Præscriptio medica*, *Receptum*, (F.) *Formule*, *Ordonnance*. The formula which the physician writes for the composition of medicine adapted to any case of disease. A prescription should be as simple as possible, and should bear upon its face the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose. A compound prescription has been divided into four parts:—the *basis* or principal ingredient of the prescription; the *adjuvans*, or that which is designed to promote the action of the former; the *corrigens*, or that intended to correct its operation, or obviate any unpleasant symptom which it may be apt to produce; and the *constituens*, *receptient*, or substance which gives to the other

ingredients consistence or form. All these are seen in the following formula for cathartic pills:

Aloes.....ʒj ..... *Basis*.  
Hyd. Chlorid. mit. gr. x..... *Adjuvans*.  
Olei Carui .....ʒtt. v ..... *Corrigens*.  
Syrupi.....q. s..... *Constituens*.  
M. et fiant. Pilulæ xx. See *Symbol*.

It is obvious, however, that most prescriptions are more simple than this. The basis, for example, may require neither adjuvant, corrigent, nor constituent.

Dr. Paris has given the following synopsis of the principles of medicinal combination, *Iamatoxiologia*, *Iamatosyntaxiologia*, which may serve as an instructive guide to the prescriber:—

#### OBJECT I.

TO PROMOTE THE ACTION OF THE BASIS.

A. By combining the several different forms or preparations of the same substance. B. By combining the basis with substances which are of the same nature; i. e., which are individually capable of producing the same effects, with less energy than when in combination with each other. C. By combining the basis with substances of a different nature, and which do not exert any chemical influence upon it, but are found by experience, or inferred by analogy, to be capable of rendering the stomach or system more susceptible of its action.

#### OBJECT II.

TO CORRECT THE OPERATION OF THE BASIS BY OBTAINING ANY UNPLEASANT EFFECTS IT MIGHT BE LIKELY TO OCCASION, AND WHICH WOULD PERVERT ITS INTENDED ACTION, AND DEFEAT THE OBJECT OF ITS EXHIBITION.

A. By chymically neutralizing or mechanically separating the offending ingredient. B. By adding some substance calculated to guard the stomach or system against its deleterious effects.

#### OBJECT III.

TO OBTAIN THE JOINT OPERATION OF TWO OR MORE MEDICINES.

A. By uniting those medicines which are calculated to produce the same ultimate results, but by modes of operation totally different. B. By combining medicines which have entirely different powers; and which are required to obviate different symptoms, or to answer different indications.

#### OBJECT IV.

TO OBTAIN A NEW AND ACTIVE REMEDY, NOT AFFORDED BY ANY SINGLE SUBSTANCE.

A. By combining medicines which excite different actions in the stomach and system, in consequence of which new or modified results are produced. B. By combining substances which have the property of acting chymically upon each other; the results of which are:—a. The formation of new compounds; b. The decomposition of the original ingredients, and the development of the more active elements. C. By combining substances, between which no other change is induced than a diminution or increase in the solubility of the principles in which their medicinal virtues reside. a. By the intervention of substances that act chymically. b. By the addition of ingredients whose operation is entirely mechanical.

#### OBJECT V.

TO AFFORD AN ELIGIBLE FORM.

a. By which the efficacy of the remedy is enhanced. b. By which its aspect or flavour is

rendered more agreeable, or its mode of administration more convenient. *c.* By which it is preserved from the spontaneous decomposition to which it is liable.

[The vocabulary in the author's "Medical Student," Philad. 1844, will aid the student, not only in translating, but in writing his prescriptions more solilo.]

**PRESENTATION**, from (Lat.) *præsentis*, (*præ*, 'before,' and *ens*, 'being.') The part of a fœtus which is felt *presenting*, on examination *per virginam*. When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural*: when any other part, *preternatural*, and the labour is styled *perverse* or *preternatural*, *Purodyn'ia perver'sa*, *Dystoc'ia perver'sa*, *Cross-birth*, (F.) *Accouchement contre nature*. When any part besides the head, feet, knees, or breech presents, the operation of turning becomes necessary. See Parturition.

**PRESIS**, Swelling.

**PRËSLE**, *Hippuris vulgaris*.

**PRESMA**, Swelling.

**PRESPI'NAL**, *Præspinal'is*, from *præ*, 'before,' and *spina*, 'the spine.' That which is situate before the spine. The prespinal surface of the vertebral column is the anterior surface.

**PRESS**, *Præ'lium*, *Præ'lium*, *Presso'rium*, *Pi-ëster*, *Piest'ri'on*, (F.) *Pressoir*, *Presse*. An instrument for subjecting matters to considerable pressure, for the purpose of separating the liquid from the solid portion.

**PRESS OF HEROPHILUS**, Torcular Herophili.

**PRESSE-ARTÈRE**. An instrument invented by Deschamps for the immediate compression of arteries. It is composed of a plate six or seven lines long, and three broad, and of a rod or stem two inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse-artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn. It is an unnecessary instrument.

**PRESSE-URÈTHRE**, *Jugum Penis*. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure sufficient to bring the parietes of the canal in contact. This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

**PRESSIO**, Pressure.

**PRESSION ABDOMINALE**, Pressure, abdominal.

**PRESSOIR**, *Press*—*p. d'Hérophile*, Torcular Herophili.

**PRESSORIUM**, *Press*.

**PRESSURE**, *Press'io*, from *premo*, *pressum*, 'I press.' The action of pressing.

**PRESSURE, ABDOM'INAL**, (F.) *Pression abdominale*. A mode of examinations by means of which the sensibility, size, suppleness, or hardness of any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Bichat proposed, with the view of exploring the state of the thoracic organs, to exert a pressure from below upwards on the abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was

affected by this action. No great information can of course be derived from it.

**PRETENDED DISEASES**, Feigned diseases.

**PRETIB'IAL**, *Prætib'ialis*, from *præ*, 'before,' and *tibia*, 'the tibia.' That which is situate before the tibia; as the *ilio-pretibial* and *ischio-pretibial* muscles.

**PREVENTIVE, ROYAL**, from *prævenire*, (*præ*, and *venire*,) 'to come before.' An empirical preparation, used as a prophylactic against the venereal virus. It is a solution of *acetate of lead*,—the *Liquor Plumbi Subacetatis dilutus*.

**PREVERTEBRAL APONEURO'SIS**. The aponeurosis which covers the muscles of the prevertebral region.

**PREVERTEBRAL ARTERY**. A ramus of the meningeal branch, and sometimes even of the trunk, of the pharyngeal artery, which is distributed to the prevertebral region.

**PREVERTEBRAL MUSCLES**, see Cervical region, anterior—*p.* Region, Cervical region, anterior.

**PRIAPEIA**, *Nicotiana rustica*.

**PRIAPIS'COS**. Same etymon as the next. Name of a piece of wood which forms part of the *scannum Hippocraticum*. Paulus of Ægina calls thus a tent of linen shaped like a penis.

**PRIAPIS'MUS**, *Tent'igo*, *T. Penis*, *Pri'opism*, *Horn-colic* (vulg.), *Ent'd'sia Priapis'mus*, *Rhopal'is'mus*, *Satyri'asis*, *Styma*, *Sty'sis*, from Πριαπός, Priapus, 'the male organ.' Constant and distressing erection, without any voluptuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbid causes,—of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor, are the means usually had recourse to for its removal.

**PRIAPITIS**, Phallitis.

**PRIA'PUS**, *Mutan'nus*. In ancient mythology the deity who presided over gardens and the parts of generation, so called *propter deformitatem et membri virilis magnitudinem*.

**PRIAPUS**, Penis—*p.* Cervi, see Cervus—*p.* Ceti, Leviathan penis.

**PRICKING**, Sax. *prickean*, (D.) *pricken*, (F.) *Picotement*. A variety of pain, compared to that which pointed bodies would occasion.

**PRIDE OF CHINA**, *Melia azedarach*—*p.* of India, *Melia azedarach*—*p.* Tree, *Melia azedarach*.

**PRIEST-PHYSICIANS**, see Asclepiadæ.

**PRIEST'S PINTLE**, *Arum maculatum*.

**PRIMA CELLA COLI**, *Cæcum*.

**PRIME VÆ**. The *first passages*. The stomach and intestinal canal:—the lacteals being the *secundæ viæ* or *second passages*. See Ways, digestive.

**PRIMARY CELL**, see Cell.

**PRIMEVÈRE**, *Primula veris*.

**PRIMIP'ARA**, *Primiparturiens*, from *primus*, 'first,' and *parere*, 'to bring forth.' A name given to a female who brings forth for the first time.

**PRIMPARTURIENS**, *Primipara*.

**PRIMI-STERNAL**, *Primi-sternal'is*, from *primus*, 'the first,' and *sternum*, 'the sternum.' M. Bèlard has called *os primi-sternal* or *clavi-sternal*, the bony portion of the sternum.

**PRIMIT'LE**. The *first waters*, or the *waters* discharged before the extrusion of the fœtus.

**PRIMITIVE BAND**, see Nerve fibres—*p.* Streak, Groove, primitive.

**PRIMORDIAL CELL**, see Cell.

**PRIMORDIUM**, *Arche*.

**PRIMROSE, EVENING**, *Oenothera biennis*—*p.* Tree, *Oenothera biennis*.

**PRIMULA OFFICINALIS**, *P. veris*—*p.* *Variabilis*, *P. veris*.

**PRIM'ULA VERIS**, *P. officinalis* seu *variabilis*, from *prim'ulus*, 'the beginning.' So called, because it flowers in the beginning of the spring. *Verbasculum*, *Paralysis*, *Herba paralyt'cos* seu *paralytica*, the *Coccolip*, *Paigil* or *Peagle*, (F.) *Primevère*. Family, Primulacæ. *Ser. Syst.* Pentandria Monogynia. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

**PRIMULA VULGARIS**. The leaves and roots of this plant have been used as sternutatories.

**PRINCEPS**, Rectum.

**PRINCEPS CERVICIS** (*Artery*), *Cervical Artery*. A branch of the occipital artery, which descends between the splenius and complexus muscles, and may be followed down to the lower part of the neck.

**PRINCEPS POL'ICIS** (*Arteria*), *Arteria magna pollicis*. When the two collateral arteries of the thumb take origin from a common trunk—the trunk is the *Princeps pollicis*.

**PRINCIPE CRYSTALLIZABLE DE DÉROSNE**, Narcotine.

**PRINCIPES IMMEDIATS**, Principles, immediate.

**PRINCIPIUM**, Arche, Element—p. Acidificans, Oxygen—p. Adstringens, Tannin—p. Byrsodepsicum, Tannin—p. Coriaceum, Tannin—p. Hydrogeneticum, Hydrogen—p. Hydroticum, Hydrogen—p. Oxygenans, Oxygen—p. Salivale, see Saliva—p. Scytodepsicum, Tannin—p. Urinum, Urea.

**PRIN'CIPIE**, COL'OURING, OF THE BLOOD. A name, given to the immediate principle in animals, to which the blood owes its red colour. It is solid, inodorous, and insipid. When recently separated from blood, it has a purple-red colour. When distilled, it furnishes, amongst other products, a purple oil. It is insoluble in water; but, if diluted with that liquid, acquires a vinous-red hue. It communicates a red colour to the albumen of the blood, and affords, on analysis, iron, to which the colour has been ascribed. See *Hæmaphæin*, and *Hæmatin*.

**PRINCIPLE**, DIGESTIVE, Pepsin—p. Vital, see Vital principle.

**PRINCIPLES**, IMMEDIATE, (F.) *Principes immédiats*, *Matériaux immédiats*. A name given to a considerable number of substances, composed of at least three elements, and which are obtained from animals and vegetables without alteration, by simple processes, and, in some measure, immediately.

**PRINCIPLES**, IMMEDIATE, OF ANIMALS, *Proximate principles*, *Organic Elements*, *Compounds of Organization*. These are divided into acid principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric*, *rosacic*, *purpuric*, *allantoic*, *caseic*, *butyric*, &c. The fatty principles are:—*stearin*, *elain*, *cholesterin*, &c.; and the last division includes the most important compounds of organization:—*fibrin*, *gelatin*, *albumen*, *casein*, *osmazome*, &c.

**PRINCIPLES**, PROXIMATE, P. immediate.

**PRINOS**, *P. verticillatus*, *Alcan'na major* latifolia *denta'ta*, *Aquifolium fo'liis decid'nis*, *Prinos Gronovii*, *Prinos padifolius*, *Black Alder*, *Virginia Winterberry*, *Whorled Winterberry*, *Fererbush*, (F.) *Apalachine à feuilles de Prunier*. *Ord.* Aquifoliacæ. *Ser. Syst.* Hexandria Monogynia. The bark of this common shrub of the United States is astringent, bitter, and pungent. The berries are, likewise, bitter. The bark has been used as a substitute for the cinchona, in intermittents, and as a tonic.

**PRINOS GRONOVII**, *Prinos*.

**PRINOS LÆVIGATUS**, *Smooth Winterberry*. Indigenous; has the same properties as

**PRINOS PADIFOLIUS**, *Prinos*.

**PRION**, Saw.

**PRIONODES**, from *πριων*, 'a saw,' and *ειδος*, 'shape.' *Serra'ted*. Applied to the sutures of the head.

**PRIOR ANNULARIS**, *Interos'seus quartus* of Winslow. An internal interosseous muscle, which arises from the outside of the metacarpal bone of the ring-finger, and is inserted into the outside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger outwards.

**PRIOR INDICIS**, *Extensor tertii internodii indicis*, (F.) *Sous-métacarpo-latéri-phalangien*. It arises from the outer or radial side of the metacarpal bone of the fore-finger, and is inserted into the outside of the tendon on the back of the fore-finger. *Action*:—to draw the finger outwards, towards the thumb.

**PRIOR INDICIS PEDIS**, *Adductor Indicis pedis*. An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the fore-toe. *Action*:—to pull the fore-toe inwards.

**PRIOR MEDII**, *Prior medii digiti*.

**PRIOR MEDII DIGITI**, *Prior Medii*, *Second interos'seus* of Douglas. An external, interosseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action*:—to draw the middle finger outwards.

**PRIOR MEDII DIGITI PEDIS**, *Adductor medii digiti pedis*. An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use*:—to pull the middle toe inwards, or towards the inner side of the foot.

**PRIOR MINIMI DIGITI**, *Adductor minimi digiti*. An internal, interosseous muscle of the foot, which originates from the inside of the metatarsal bone of the little toe, and is inserted into the inside of the root of the first bone of the little toe. *Action*:—to pull the little toe inwards.

**PRIOR TERTII DIGITI PEDIS**, *Adductor tertii digiti pedis*. An internal, interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the inside of the root of the first bone of the third of the small toes. *Action*:—to pull the third of the small toes inwards.

**PRISIS**, *Brygmus*, *Trepanning*.

**PRISMA**, *Scobs*.

**PRISMUS**, *Brygmus*, *Trepanning*.

**PRIVATE PARTS**, Genital organs.

**PRIVET**, *Ligustrum vulgare*.

**PRIVITIES**, Genital organs.

**PRIVY**, *Ligustrum vulgare*—p. Members, Genital organs—p. Parts, Genital organs.

**PRO**, *πρo*, 'before.' A common prefix to words, as in *Procatartec*, *Prostate*, &c.

**PROAGOREUSIS**, *Prognosis*.

**PROBANG**, *Detrusorium ex bale'na*. A long slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Repossoir d'arêtes*.

**PROBARIUM**, *Geneias*.

**PROBASCANTIUM**, *Amuletum*.

**PROBASCANTIUM**, *Amuletum*.

PROBE, Catheterize, Specillum—p. Eyed, see Specillum.

PROBING, see Melosis.

PROBOLE, Processus.

PROCARDIUM, Scrobiculus cordis.

PROCÉDÉ, Process.

PROCEDURE, Procédée.

PROCEPHALI, Capitones.

PRO CERUS NASI, Pyramidalis nasi.

PROCESS CILIAIRES, Ciliary processes.

PROCESS, Apophysis, Processus.

PROCES'S, Ratio, (F.) *Procédé*, from *procedere*, to march forwards. Procedure,—method of performing any operation, chemical, pharmaceutical, or surgical.

PROCESS, CUNEIFORM, Basillary process—p. Modelling, see Modelling Process—p. of Rau, see Malleus—p. Vertical superior longitudinal, Falx cerebri.

PROCES'SUS. A process; same etymon; *Projectura*, *Prob'ole*. An apophysis or eminence of a bone; see Apophysis. Also, any part which seems prolonged beyond others with which it is in connexion; as the *Ciliary processes*.

PROCESSUS ANCONÆUS, Olecranon—p. Annularis, Pons Varolii—p. Belenoides, see Belenoid—p. Caudatus, Lobulus caudatus—p. à Cerebello ad medullam oblongatam, Corpora testiformia—p. Cerebelli ad pontem, Peduncles of the cerebellum—p. Cerebelli ad testes, Peduncles of the cerebellum—p. Cerebri lateralis, Cornu ammonis—p. Ciliares, Ciliary processes—p. Clavatus, see Funiculi graciles—p. Cochleariformis, see Tympanum—p. Cuneiformis ossis occipitis, Basillary process—p. Enteroides cerebri, Convolutions (cerebral)—p. Falciformis cerebelli, Falx cerebelli—p. Falciformis duræ matris, Falx cerebri—p. Gracilis of Rau, see Malleus—p. Lateralis uteri, Tubæ Fallopiæ—p. Mamillares, Papillæ of the kidney, Olfactory nerves—p. Mamillares cerebri, Mamillary tubercles—p. Olivaris, Olivary Process—p. Orbicularis cerebri, Infundibulum of the brain—p. Papillares, Olfactory nerves—p. Papillarum, Olfactory nerves—p. Rachidianus, Medulla spinalis—p. Sterni xiphoideus, Xiphoid.

PROCES'SUS TER'ETES, *Eminentia* seu *Fasciculi ter'etes*. Two slightly convex bodies forming the anterior wall or floor of the fourth ventricle of the brain. They are separated by a longitudinal groove, which is continuous, inferiorly, with the sulcus longitudinalis posterior of the spinal cord. They are crossed transversely by several white and gray fasciculi—*lineæ tranversæ*, *strisæ medullares*—the origin of the auditory nerves.

PROCESSUS AD TESTES, see Valvula Vieusseni—p. Transversus duræ matris, Tentorium—p. Uvifer, Uvula—p. Ventriculi, Duodenum—p. Xiphoideus, Xiphoid cartilage—p. Xiphosternalis, Xiphoid cartilage—p. Zygomaticus, Zygomatic process.

PROCHEILA, Antelabia.

PROCHEILIDION, Procheilon.

PROCHEILON, *Procheilid'ion*, *Prolab'ium*, *Antilab'ium*. The extreme projecting part or margin of the lips.

PROCHEUMA, Parenchyma.

PROCIDENCE DE L'ŒIL, Exophthalmia.

PROCIDENTIA, Prolapsus—p. Ani, Proctocæle—p. Intestini recti, Proctocæle—p. Iridis, Staphyloma of the Iris—p. Oculi, Exophthalmia—p. Sedis, Proctocæle—p. Uteri, Prolapsus uteri.

PROCNEME, Tibia.

PROCNEMIUM, Tibia.

PROCELIUS, *Procel'us*, from *pro*, 'before,' and *κοιλια*, 'belly.' One who has a large pendulous abdomen.

PROCELUS, Procælius.

PROCON'DYLUS, *προκονδύλος*, from *προ*, 'before,' and *κονδύλος*, 'a knot.' The first joint of the fingers; the second being called *κονδύλος*; and the third *μετακονδύλος*.

PROCREATIO, Generation—p. Sanguinis, Hæmatisis.

PROCREATION, Fecundation, Generation.

PROCTAGRA, from *πρωκτος*, 'anus,' and *αγρα*, 'seizure.' Gout in the rectum. Proctalgia.

PROCTAL'GIA, *Proct'ica simplex*, *Proct'agra*, *Dolor ani*, *Proctodyn'ia*, from *πρωκτος*, 'the anus,' and *αλγος*, 'pain.' Pain in the anus: generally symptomatic of disease, as of hemorrhoids, scirrhus, &c.

PROCTALGIA, Clunesia—p. Hæmorrhoidalis, Hæmorrhoids—p. Inflammatoria, Rectitis—p. Intertriginosa, Chafing—p. Rheumatica, Proctorrhœma.

PROCTATRE'SIA, *Imperforatio ani*, from *πρωκτος*, 'the anus,' and *ατρασια*, 'imperforation.' Imperforate state of the anus.

PROCTICA. Pain or derangement about the anus, without primary inflammation. A genus in the class *Cæliaca*, order *Enterica*, of Good.

PROCTICA EXANIA, Proctocæle—p. Marisca, Hæmorrhoids—p. Simplex, Proctalgia—p. Tenesmus, Tenesmus.

PROCTISIS, Proctitis.

PROCTITIS, *Proct'itis*, *Archit'is*, *Clun'esia*, *Cyano'tis*, from *πρωκτος*, 'the anus.' Inflammation of the anus and rectum. Rectitis.

PROCTITIS GANGRÆNOSA, Proctocæce.

PROCTOC'ACÆ, *Proct'itis gangræno'sa*, from *πρωκτος*, 'the anus,' and *κακος*, 'evil.' A disease of the rectum, so called by Fuchs, which, according to him, is common in Peru, in the neighbourhood of Quito and Lima, on the Honduras and Mosquito coasts, in Brazil, and on the Gold coast, &c. It is called by the Portuguese, *Bicho*, and *Bicho di Culo*; by the people of Quito, *Mal dei Valle*, from its prevalence in the valleys; and in Africa, *Bitios de Kis*. It is an adynamic, inflammatory condition, frequently ending in gangrene. It has been attributed to bad food, and the use of spices.

PROCTOC'E'LĒ, from *πρωκτος*, 'the anus,' and *κλη*, 'hernia.' *Prolap'sus Ani*, *Proctopt'ma*, *Proctopto'sis*, *Procto'sis*, *Hædroc'e'le*, *Archeopto'ma*, *Archeopto'ma*, *Archopto'ma*, *Archzoce'le*, *Archopto'sis*, *Eca'nia*, *Hæmor'rhois proce'dens*, *Hæmor'rhois ab eca'niâ*, *Procidenti'ia Ani*, *P. intestini recti*, *P. sedis*, *Eto'pia Ani*, *Sedes proci'd'na*, *Falling down of the Fundament*, *Coming down of the Body*, (F.) *Chute du rectum*, *C. du Fondement*, *Reversencut du rectum*. Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter with more or less swelling. In the treatment, the application of cold water and astringent lotions must be recommended: and if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

PROCTOCYSTOTOMIA, see Lithotomy.

PROCTODYNIA, Proctalgia.

PROCTON'CUS, from *πρωκτος*, 'anus,' and *ογκος*, 'swelling.' Swelling of the anus.

PROCTOPARALYSIS, *Proctople'gia*, *Paral'yxis Intestini Recti*. Paralysis of the muscles of the rectum.

PROCTOPLEGIA, Proctoparalysis.

PROCTOPTOMA, Proctocæle.

PROCTOPTOSIS, Proctocæle.

PROCTORRHAGIA, Hæmorrhoidal flux.

PROCTORRHEU'MA, from *πρωκτος*, 'anus,' and *ρρευμα*, 'defluxion.' Rheumatism of the anus.

PROCTORRHEU'EA, from *πρωκτος*, 'the anus,' and *ρρω*, 'I flow.' A discharge of blood or slime from the anus. See Hæmorrhoids.

PROCTOS, Anus.

PROCTOSIS, Proctocœle.

PROCTOSPASMUS, Tenesmus.

PROCTOSTENOSIS ORGANICA, Stricture of the rectum.

PROCTOTOREU'SIS, from *πρωκτος*, 'anus,' and *τορειν*, 'to perforate.' Perforation of a closed anus.

PROCTUS, Anus.

PROCURATIO ABORTÛS. The promotion of abortion.

PROD'ROMUS, from *προ*, 'before,' and *δρομος*, 'course.' *Stadium opportunitatis seu prodromorum*; in contagious diseases, *Stadium latentis contagii*. The period immediately preceding an attack of disease; in which the *precursory signs* occur.

PROD'UCT, from *produco*, 'I produce.' (F.) *Prodit*. The result sought to be attained by any pharmaceutical operation.

PRODUCTIO, Prolapsus—p. Uvulæ à pituitâ, Staphylœdema.

PRODUCTION, *Productio*; same etymon. This word is used, especially by the French, synonymously with *prolongation*. The mesentery is, in this sense, a production of the peritoneum.

PRODUCTION ACCIDENTELLE. An accidental or adventitious structure.

PRODUCTIVITAS, Fecundity.

PRODUI, Product.

PROEGUMENÆ CAUSÆ, Causes, predisponent.

PRELIUM, Press, Tourniquet.

PROEMINENT, *Proem'icens*, from *pro*, 'forwards,' and *eminere*, 'to project.' Some anatomists call the 7th cervical vertebra the *proeminent vertebra*, on account of the length of its spinous process, which passes the level of that of the neighbouring vertebrae.

PREO'TIA, *Pro'otes*, *πρωιότης*, or *πρωιότης*, from *πρωι*, 'early.' 'Precocity.' *Præcox maturitas*, *Præcocious maturity*. Premature development of sexual organization or power.—Good.

PROFLUVII CÔRTEX, Nerium antidysentericum.

PROFLU'VIUM, *Discharge*, *Fluxus*, *Polyrrhoea*, *Flux*; from *profluo*, 'I run down.' A term under which some nosologists have comprised all morbid discharges or fluxes:—others, increased excretions attended by fever.

PROFLUVIUM ALVI, Diarrhœa—p. Genitale mulieb're, Menses—p. Mucosum urethræ, Gonorrhœa—p. Mulieb're, Leucorrhœa, Menses—p. Sanguinis, Hæmorrhagia—p. Sanguinis à Renibus, Nephorrhagia—p. Sanguinis ex Ore, Stomatorrhagia—p. Sanguinis ex Utero, Metrorrhagia—p. Seminis, Pollution—p. Ventris, Diarrhœa.

PROFUN'DUS, (*pro*, and *fundus*, 'base.') *Altus*, 'having a deep base.' A name given to different parts, which are seated profoundly as regards others.

PROFUNDA ARTE'RIA FEM'ORIS, *A. vasta posterior seu muscularis fem'oris*, *Artère-grande musculaire de la cuisse*. (Ch.) This large branch arises commonly from the posterior part of the crural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral; and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflex*; 2. The *internal circumflex*; and, 3. The three *perforantes*.

PROFUNDA ARTE'RIA HU'MERI, *P. superior*, *Artèria spiralis*, (F.) *Artère humérale profonde*, *A. collatérale externe*, *Grand musculaire du bras*, (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

PROFUNDA ARTERIA INFERIOR vel MINOR is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c., about the inner side of the os humeri. It is, also, called *large communicating ulnar* or *profundo-ulnar*.

PROFUNDA ARTERIA PENIS. Chaussier has given this name to the *cavernous artery*, which arises from the artery of the penis, furnished by the internal pudic.

PROFUNDA ARTERIA SUPERIOR, Profunda humeri.

Certain muscles are distinguished by the names *profund* or *deep-seated*, and *superficial*. Thus, we speak of the *superficial* and *deep-seated* muscles of the neck, &c.; the *Flexor profundus perforans*, &c.

PROFUSIO, Hæmorrhagia.

PROFUSIO AQUÆ. The discharge or breaking of the waters at birth.

PROFUSIO SANGUINIS, Hæmorrhagia—p. Seminis, Ejaculation—p. Subcutanea, Purpura simplex.

PROGAS'TOR, from *προ*, 'before,' and *γαστηρ*, 'belly.' One who has a pendulous belly.

PROGENIES, Epigone.

PROGENY, Epigone.

PROGLOS'SIS, from *προ*, 'before,' and *γλωσσα*, 'the tongue;' *Apex linguæ*. The extremity or tip of the tongue.

PROG'NATHOUS, from *προ*, 'before,' and *γναθος*, 'the jaw.' Having a projecting jaw. A term applied to the form of the head in which there is a prolongation or forward extension of the jaws, as in the negro.

PROGNO'SIS, *Pro'ogoresis*, *Prorrhæsis*, *Præcognit'io*, *Prognosticæ*, *Prænot'io*, *Prænum'it'io*, *Præscientia*, *Præscit'io*, *Prono'a*, *Proph'asis*, *Prædict'io*, (F.) *Prognostic*, *Pronostic*, from *προ*, 'before,' and *γνωσις*, 'knowledge.' A judgment formed by the physician regarding the future progress and termination of any disease.

PROGNOSIS, GENERAL. The opinion formed of a disease in the abstract. Thus, we say, the *General prognosis of Cyanche tonsillarisis* is favourable;—of *Phthisis pulmonalis*, unfavourable, &c.

PROGNOSIS, PARTICULAR. The opinion formed of any particular case of disease. The *particular prognosis* of one case of typhus, for example, may be favourable, whilst that of another may be unfavourable.

PROGNOSIS EX LINGUÂ, Glossomania.

PROGNOSTIC, Prognosis.

PROGNOSTICE, Prognosis.

PROGRESSIO, Augmentation.

PROGRESSUS, Augmentation.

PROIOTES, Præotia.

PROJECTURA, Proceion.

PROLABIUM, Procheillon.

PROLAP'SUS, from *prolabor*, *prolapsus*, (*pro*, and *labor*, *lapsus*, 'to slide,') 'I slip down.' *Pro-cident'ria*, *Delap'sio*, *Delap'sio*, *Hypor'rhysis*, *Propto'ma*, *Propto'sis*, *Product'io*, *Propendent'ia*,

**Prominentia, Ptosis, Casus, (F.) Chute; a protrusion; a falling down.** A genus of diseases in the class *Locales* and order *Ectopiæ* of Cullen, distinguished by the falling down of a part through the orifice with which it is naturally connected.

**PROLAPSUS ANI, Proctocele** — p. *Bulbi oculi, Exophthalmia* — p. *Corneæ, Staphyloina* of the cornea — p. *Iridis, Ptosis iridis* — p. *Linguae, Glossocele, Paraglossa* — p. *Œsophagi, Pharyngocele* — p. *Palpebræ, Blepharoptosis* — p. *Pharyngis, Pharyngocele* — p. *Umbilici, Exomphalus*.

**PROLAPSUS UTERI, Ecome'tra, Metroptosis, Metroproptosis, Orthysteroptosis, Orthysteroptoma, Falling down of the womb, Ædoptosis uteri, Hysteroptosis, Hysteroce'lē uida, Procidētia uteri, (F.) Abaissement de la matrice, Chute de la matrice, Descente de la matrice, Précipitation de la matrice.** Some use the term, 'Procidētia Uteri' for a minor degree of the affection than prolapsus; — *Relaxatio uteri* expressing the slightest state of all. A falling down of the uterus, owing to relaxation of the parts about the uterovaginal region. In the treatment, the horizontal posture must be insisted upon; the injection of astringent substances *per vaginam* be advised; and if the affection be not remedied by these means, a pessary may be employed as a palliative, or the operation of *Episioraphy* be performed.

**PROLAPSUS UVULÆ, Staphylœdema.**

**PROLAPSUS VAGINÆ, Hysteroptosis Vaginæ, Prolapsus Ædoptosis Vaginæ, Coleoptosis, Colpopoptosis, Elythroptosis** — Protrusion of the upper part of the vagina into the lower. This, like the descent of the uterus, may be *relaxation, procidētia, prolapsus*, or complete *inversion*.

**PROLAPSUS VESICÆ, Exocyste.**

**PROLECTATIO; from pro, and legere, lectum, 'to gather.'** Action of separating the finer parts of a body from the grosser.

**PROLEPTICS, Prolep'ticē, from προ, 'before,' and λαμβανω, 'I seize hold of.'** A term proposed by Dr. Laycock to signify the art and science of predicting in medicine.

**PROLEPTICUS, Anticipating.**

**PROLES, Epigone.**

**PROLICIDE, Prolicid'ium; from proles, 'offspring,' and cædere, 'to kill.'** Destruction of offspring; a term, which includes fœticide as well as infanticide.

**PROLIF'IC, Prolif'icus; from proles, 'offspring,' and facio, 'I make.'** That which has the faculty of engendering. Applied to man, and animals, and to their sperm or seed; as well as to remedies, which, by strengthening the genital organs, increase the secretion of sperm.

**PROLIG'EROUS, Pro'liger, Prølig'erus, from proles, 'offspring,' and gero, 'I carry.'** That which is connected with carrying the offspring.

**PROLIGEROUS DISC OR LAYER, Discus prolig'erus, Discus vitellinus, Stratum prolig'erum, Gonostroma, (F.) Disque proligère.** A granular layer, situate generally towards the most prominent part of the ovarian vesicle, in the centre of which the true ovum or ovule exists. — Von Baer.

**PROLONGEMENT RACHIDIEN, Medulla spinalis** — p. *Sons-occipital, Basillary process*.

**PROMLACTE'R'IUM, from προ, 'before,' and μαλασσω, 'I soften.'** The room, in the ancient gymnasium, in which the body was softened and anointed. One of the operations in bathing.

**PROMANUS, see Digitus, Pollex.**

**PROMETOPIDIA, Frontal bandages.**

**PROMETOP'IS, Prometopid'ion, from προ, 'before,' and μετωπον, 'the forehead.'** The skin of the forehead.

**PROMINENTIA, Prolapsus, Protuberance** — p. *Annularis Cerebri, Pons Varolii* — p. *Corneæ, Ceratocœle* — p. *Ossis Continua, Apophysis*.

**PROMINENTIE ALBICANTES, Mammillary tubercles** — p. *Semiōtales Medullæ Oblongatæ, Corpora olivaria*.

**PROMONTORIUM, Promontory** — p. *Faciei, Nasus* — p. *Ossis Sacri, see Sacrum*.

**PROMONTORY, Promontorium, (from pro and mons, montis, 'a mountain,') seu Tuberositas Tympani.** A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external sealæ of the cochlea, and especially to the outer side of the vestibule.

**PROMONTORY OF THE SACRUM, see Sacrum.**

**PRONATEUR CARRÉ, Pronator radii quadratus** — p. *Grand ou road, Pronator radii teres* — p. *Petit, Pronator radii quadratus*.

**PRONATION, Pronat'io, from pronns, 'inclined forwards.'** Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

**PRONATOR.** That which produces the motion of pronation. This name has been given to two of the museles of the forearm.

**PRONATOR OBLIQUUS, P. radii teres** — p. *Quadratus, P. radii quadratus*.

**PRONATOR RA'DII QUADRA'TUS, P. quadratus, Quadratus ra'dii, P. quadratus seu transversus (Winslow), Pronator radii brevis seu quadratus (Cowper), (F.) Cubito-radial (Ch.), Petit ou carré pronateur.** This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna; and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

**PRONATOR RADII TERES, P. teres sive obli'quus (Winslow), (F.) Épitrochlo-radial (Ch.), Grand ou rond pronateur.** A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It is attached, above, to the inner tuberosity of the humerus and to the coronoid process of the ulna. From thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm, and conversely.

**PRONATOR TERES, P. radii teres.**

**PRONAUS, Vestibulum.**

**PRONERVATIO, Aponurosis, Tendon.**

**PRONŒA, Prognosis.**

**PRONOSTIC, Prognosis.**

**PROPENDENTIA, Prolapsus.**

**PROPERTIES, PHYSICAL OF THE TISSUES.** These are *flexibility, extensibility and elasticity, racognitionement and imbibition*.

**PROPERTIES, VITAL.** Those which depend upon organization, as *contractility*.

**PROPHASIS, Prognosis.**

**PROPHYLACTIC, Prophylact'icus, Diaphylact'ic, Diacon'tic, Synteret'icus, Præservat'orius, from προ, and φυλασσω, 'I defend.'** A preservative.

**PROPHYLAXIS, Prophylacē, Prophylact'icē, Synteret'is.** Same etymon. *Præservat'io, Præcaut'io, Præcaut'odia.* Preservative or preventive treatment.

**PROP'OLIS, from προ, 'before,' and πολι, 'city,' literally, 'that which is before the city,' *Ceranthemus, Commo'sis, Bee-bread.* A red, resinous matter, with which the bees cover the bot-**

tom of the hive. Its fume has been esteemed antiasthmatic.

PROP'OMA, from *προ*, 'before,' and *πομα*, 'a drink.' Ancient name of a medicine, composed of seven parts of *honey* and four of *wine*. It was drunk before a meal.—Paulus of Ægina.

PROPORTIO, Symmetry.

PROPOSITUM, Intention.

PROPOSITI'MOS. Same etymon. *Præpotio*. An ancient name for medicines which were given to the patients before purging them, and, in some sort, to prepare them.

PROPRIUS AURIS EXTERNÆ, Retrahens auris.

PROPTOMA, Prolapsus.

PROPTOMA AURICULARUM, *Paræsthesis auditus flacca*, Flap Ear. Lobe of the ear broad, loose, and pendent from birth.—Good.

PROPTOMA SCROTI, Rachosis.

PROPTOSIS, Prolapsus—p. Palpebræ, Blepharoptosis—p. Uvulæ, Staphylœdema.

PROPTYSIS, Expectoration.

PRORA, Occiput.

PRORRHESIS, Prognosis.

PRORUPTIO SANGUINIS, Hæmorrhagia.

PROS, *προς*. In composition, this prefix generally signifies 'in addition to,' 'over and above,' 'besides.'

PROSARTHROSIS, Diarthrosis.

PROSOLE, Impression.

PROSCHYSIS, Effusion.

PROSCOLLESIS, Adherence, Agglutination.

PROSECTEUR, Dissector.

PROSECTIO, Anatomy.

PROSECTOR, Dissector.

PROSLEPSIS, Prehension.

PROSODOS, Aditus.

PROSOPALGIA, Neuralgia, facial.

PROSOPANTRA, Frontal sinuses.

PROSOPANTRI'TIS, from *prosopantra*, the frontal sinuses, and *itis*, denoting inflammation. Inflammation of the frontal sinuses.

PROSOPARALYSIS, Palsy, Bell's.

PROSOP'PIS DULCIS. A tree of rather large size, native of Peru. The fruit—*Pacay*—is a pod, from 20 to 24 inches long, containing black seeds imbedded in a white, soft, flaky substance; which last is eaten by the Limeños with pleasure.—Tschudi.

PROSOPODYNIA, Neuralgia, facial.

PROSOPDYSMOR'PHIA, from *προσωπον*, 'the face,' *δυσ*, 'with difficulty,' and *μορφη*, 'shape.' Malformation or atrophy of the face,—as where the process of nutrition suffers from diminished nervous influence.

PROSOPOLOGIA, Physiognomy.

PROSOPOMANTIA, Physiognomy.

PROSOPON, Face.

PROSOPORRHEU'MA, *Rheumatis' mus faciei*, from *προσωπον*, 'face,' and *ρευμα*, 'defluxion,' 'rheumatism.' Rheumatism affecting the face.

PROSOPOSIS, Physiognomy.

PROSOPSPASMUS, Canine Laugh.

PROSOPOSTERNODYMIA, see Cephalosomatodymia.

PROSPERITAS VALETUDINIS, Sanitas.

PROSPHORA, Prehension.

PROSPHYSIS, *Adnascentia*, *Coalit'io*, 'adhesion, adherence, connexion,' from *προς*, and *φωσ*, 'I grow.' In a more limited sense, this word means morbid adhesion of the eyelids, either between themselves, or with the globe of the eye; *Akyklobleph'aron*.

PROS'TASIS, *προστας*, (*προ*, and *στας*, 'station,') 'superiority, preponderance;' same etymon as *Prostate*. A predominance or abundance of excrementitious humour.—Hippoc.

PROSTATA, Prostate—p. Bartholini, Cowper's glands in the female—p. Muliebris, Cowper's glands in the female.

PROSTATÆ, Prostate.

PROSTATAL, Prostatic.

PROSTATAL'GIA, from *προστατα*, 'the prostate,' and *αλγος*, 'pain.' Pain in the prostate.

PROSTATAUXĒ, Prostatoparectasis.

PROSTATE, *προστατα*, from *προ*, 'before,' and *ιστημι*, 'I stand.'—*Pros'tata*, *P. gland'ula*, *Pros'tata*, *P. glandulo'sa*, *Paras'tata adenoïdes* seu *glandulo'sa*, *Adstans*, *Paras'tata*, *P. gland'ula*, *Pros'tata adenoïdes*, *Testis minor*, *Corpus glandulo'sum* seu *glando'sum*, *C. adeniforme*, *C. glandiforme*, *C. glandulo'sum*, *C. adenoïdes*, *Assistent'es glandulæ*, *Adstites glandulosi*; the *Prostate gland*. A glandular, cordiform body, of the size of a chestnut, situate before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish viscid humour, intended to lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

PROSTATELCO'SIS, from *προστατα*, 'prostate,' and *ελκος*, 'an ulcer.' Ulceration of the prostate.

PROSTATES INFÉRIEURES, Cowper's glands—p. *Petites*, Cowper's glands.

PROSTAT'IC, *Prostat'icus*, *Pros'tatal*. That which relates to the prostate. Winslow has named—*Superior Prostatic Muscles*—ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls—*Inferior prostatic muscles*—the fleshy fibres, which, from the lateral parts of the urethra, near its membranous portion, pass to be inserted into the pubis.

PROSTATIC BISECTOR. An instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, with cutting edges at the sides parallel to its longest axis, and with a straight handle.

PROSTATIC LIQUOR, *Liquor prostat'icus*. The fluid secreted by the prostate, which mixes with sperm during emission.

PROSTATIC PORTION OF THE URETHRA. The part of the canal of the urethra included by the prostate: it is about 15 lines long.

PROSTATIC SINUS, see Sinus, prostatic.

PROSTATICUS SUPERIOR, Compressor prostate.

PROSTATI'TIS, *Inflammat'io Pros'tatæ*, from *προστατα*, 'the prostate,' and *itis*, denoting inflammation. Inflammation of the prostate.

PROSTATOCELE, Prostatoncus.

PROSTATON'CUS, *Prostatocel'e*, *Tumor pros'tatæ*, from *προστατα*, 'the prostate,' and *ογκος*, 'a tumour.' Swelling of the prostate.

PROSTATOPARECTASIS, from *προστατα*, 'prostate,' and *παρεκτειναι*, 'to extend.' Enlargement of the prostate; also, induration of the same, *Prostatocir'rhus*, *Prostatanc'e*.

PROSTATOSCIRRHUS, see Prostatoparectasis.

PROSTERNID'IUM, from *προ*, 'before,' and *στερνον*, 'the sternum.' Any agent applied to the anterior part of the chest; a plaster to the breast.

PROSTHESIS, Prothesis.

PROSTHETA, Subdita.

PROSTHIUM, Penis.

PROSTOM'IA, *Commissu'ra labio'rum*; (F.) *προς*, 'before,' and *στομα*, 'mouth.' The commissure of the lips.

PROSTRAT'ION, *Prostrat'io vi'rium*, (F.) *Prostration des forces*, *Abatement*. Great de-

pression of strength. Almost total loss of power over the muscles of locomotion.

**PROTEA MELIFERA.** A South African plant. *Nat. Ord.* Protenceæ, whose involucre and flowers, at the time of inflorescence, are filled with a sweet watery liquid, which contains a great deal of honey. By inspissation it forms a delicious syrup—*Syrupus Proteæ*, which is much used in pulmonary affections.

**PROTEA LEPIDOCARPON,** and some other Proteæ, supply the same kind of juice.

**PROTEAN,** *Proteiform, Proteiform'is*, from *Proteus*, who could assume various shapes. Assuming different shapes.

**PROTEIFORMIS,** Protean.

**PROTEIFORM'IS MORBUS.** A disease which assumes various characters.

**PROTEIN,** *Proteine, Proteïna*: from *πρωτεινω*, 'I take first rank.' A product of the decomposition of albumen, &c., by potassa. When animal albumen, fibrin or casein is dissolved in a moderately strong solution of caustic potassa, and the solution is exposed for some time to a high temperature, these substances are decomposed. The addition of acetic acid causes, in all three, the separation of a gelatinous translucent precipitate which has exactly the same characters and composition. This is protein. — Mulder.

Protein is the basis of animal and vegetable fibrin, albumen, and casein, and of gluten, which have been, consequently, classed under the "proteinaceous alimentary principle," by Dr. Percira.

**PROTEINACEOUS,** Proteinous.

**PROTEINOUS,** *Proteïna'ceous, Proteïno'sus*, (F.) *Protéique*. Of, or belonging to protein; — as "a proteinous alimentary principle."

**PROTÉIQUE,** Proteinous.

**PROTENSIONES GLANDULARES,** Mammillary eminences.

**PROTHESIS,** *Pros'thesis, Adjunctio, Adjectio, Appositio*, 'addition, application;' from *προς*, 'in addition to,' and *τιθημι*, 'I put.' That part of surgery whose object is to add to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c.

**PROTMESIS,** Umbilicus, Kidney.

**PROTOGALA,** Colostrum.

**PROTOIATROS,** Archiater.

**PROTOMEDICUS,** Archiater.

**PROTOMUS,** Dissector.

**PROTOPATHIA,** Idiopathia.

**PROTOPHYTE,** *Protophy'ton*, from *πρωτος*, 'first,' and *φυτον*, 'a plant.' A vegetable production at the foot of the scale; as a cryptogamous plant. — a fungus.

**PROTOSPOROS,** Os uteri.

**PROTOZÖ'ON,** from *πρωτος*, 'first,' and *ζωον*, 'an animal.' An animal low in the scale; — as a monad.

**PROTRUSION,** Prolapsus.

**PROTUBERANCE,** *Protuberan'tia, Ertuberantio, Prominentia, Ercrecentia, Ectuberantia*, from *πρω*, 'before,' and *tuber*, 'a projection.' (F.) *Bosse*. A name given to rough, unequal protuberances, seen at the surface of certain organs: the *parietal protuberances, occipital protuberances, annular protuberances, &c.*

**PROTUBERANCE, ANNULAR,** Pons Varolii — p. Cerebral, Medulla oblongata, Pons Varolii — p. *Cylindroides*, Cornu ammonis.

**PROTUBERANTIA,** Eminence — p. Annularis Willisii, Pons Varolii — p. Cylindrica, Cornu ammonis.

**PROTRUSOR,** Detrusor urinæ.

**PROULIMATE'SIS.** A word employed by Forestus for hernia of the stomach.

**PROUNE,** *Prunus domestica*.

**PROVENTRICULUS,** *Bulbus glandulosus, Infundibulum, Second stomach*; from *πρω*, 'before,' and *ventriculus*, 'the stomach.' A bulbous expansion at the termination of the œsophagus, immediately above the gizzard of birds, the walls of which are thickly studded with a layer of glands or follicles which secrete a digestive fluid.

**PROVERBS, MEDICAL.** A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the School of Salerno*, composed in the 11th century, by John of Milan. Yet, although good sense is often inculcated, we frequently meet with the reverse.

Most of the proverbs are hygienic. The following are a few.

1. *Qu' après la soupe un coupe d'excellent vin  
Tire un écu de la poche du médecin.*
2. *Surge quintâ, praude nonâ, cæna quintâ, dormi nonâ, nec est morti vita prona.*
3. *Nunquam rectè corpus exerceri sine animo, neque animum sine corpore posse.*
4. *Viande bien machée est à demi digérée.*
5. *Optimum condimentum fames.*  
Appetite is the best sauce.
6. *Plures occidit gula quam gladius.*
7. Early to bed and early to rise,  
Makes a man healthy, wealthy, and wise.
8. One man's meat's another man's poison.
9. An ounce of prevention is better than a pound of cure.

**PROVERSIO,** Anteversion.

**PROVINS, MINERAL WATERS OF.** Chalybeate springs in the department of Seine et Marne, France, which contain carbonic acid and iron.

**PROVOCATORIUS,** Intercalary.

**PROXIMAD,** see Proximal aspect.

**PROXIMAL,** from *proximus*, 'next.' Proximate; nearest; next.

**PROXIMAL ASPECT.** An aspect towards the trunk, in the course of an extremity. — Barclay. *Proximad* is used by the same writer adverbially to signify 'towards the trunk.'

**PRUNA,** Anthrax.

**PRUNE,** Prunum.

**PRUNE JUICE EXPECTORATION OR SPUTA.** The sputa resembling prune juice, which occur in the third or purulent stage of pneumonia.

**PRUNELLA,** Angina pectoris, Aphthæ, Cyananche, Pupil.

**PRUNELLA, P. vulg'aris seu officinalis, Brunella, Consolida minor, Symphytum minus, Self-heal, Heal-all, Bugle,** (F.) *Prunelle, Brunelle*; Family, Labiata. *Ser. Syst.* Didynamia Gynnospermia. This plant has been recommended as an astringent, in hemorrhages and fluxes; and, also, in gargles against aphthæ, and in inflammation of the fauces.

**PRUNELLÆ SAL,** Potassæ nitras fusus sulphatis pancelli mixtus.

**PRUNELLE,** Prunella, Pupil.

**PRUNELLIER,** Prunus spinosa.

**PRUNELLOE,** Prunum Brignolense.

**PRUNEOLA SYLVESTRIS,** Prunus spinosa.

**PRUNES,** see Prunum — p. Pulp of, Pruni Pulpa.

**PRUNI PULPA,** *Pulp of prunes.* Take of prunes a sufficient quantity, soften them in the vapour of boiling water, and having separated the stones, beat the remainder in a marble mortar and press through a hair-sieve. — Ph. U. S.

**PRUNIER,** Prunus domestica — p. *Souage*, Prunus spinosa.

**PRUNUM.** A Plum, a Prune. Three sorts

of plums have been usually ranked amongst the articles of the materia medica. 1. The *Prunum Brignolea*'sē; the *Brignole plum* or *Prunelloe*; from Brignole in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2. The *Prunum Gallicum*, *Prunum* (Ph. U. S.), the *French Plum*; and 3. The *Prunum Damascenum* or *Damson*, *Brab'ylon*. All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

PRUNUM STELLATUM, Averrhoa carambola.

PRUNUS ACACIA, Prunus padus.

PRUNUS ARMENIACA, *Armeni'aca vulg'aris* seu *epiroti'ca*. The *A'pricot*, *Apricock*, *Bericoc'e*, *βερικοκκν*, *Præcoc'ia*, (F.) *Abricot*. Family, Rosaceæ. *Sex. Syst.* Icosandria Monogynia. The apricot, *Melum Armeniacum*, when ripe, is easily digested, and considered as a great delicacy.

PRUNUS AVIUM, *P. cer'asus* seu *sylvest'ris* seu *macrophy'lla*, *Black Cherry Tree*, *Cer'asus Avium* seu *nigra* seu *dulcis*, (F.) *Mérisier*. The fruit is eaten; and a gum exudes from the tree, the properties of which are similar to those of gum Arabic.

PRUNUS CAPULIN, (S.) *Capulies*, grows in the open fields of Peru; and is cultivated in gardens in the towns. The fruit is acid, and not often eaten; but on account of its agreeable odour it is used in making *Pucheros de flores*; or with odoriferous flowers to perfume linen. — Tschudi.

PRUNUS CER'ASUS, *Cer'asus ac'ida* seu *horten'sis* seu *vulg'aris* seu *rubra*. The *Red Cherry Tree*; (F.) *Cérisier*. The fruit *Cer'asum*, *Cera'sion*, has a pleasant, acidulous sweet flavour. It is wholesome. See Prunus avium.

PRUNUS DOMESTICA. The *Plum* or *Damson tree*, *Coccyne'lea*, *Proune*, (F.) *Prunier ordinaire*. The damson, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See Prunus.

PRUNUS HORTENSIS, P. cerasus.

PRUNUS INSITIA. The *Bullace Plum Tree*. The fruit of this tree is used like the damson.

PRUNUS LAURO-CER'ASUS, *Cer'asus lauro-cerasus*, *Padus lauro-cerasus*, *Poison Laurel*, *Cherry Laurel*, *Common Laurel*, *Lauro-cer'asus*, (F.) *Laurier-cérisse*, *L. amandier*. The leaves have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in tarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the prussic acid. The distilled water, called *Laurel-water*, is poisonous. (See Poisons, Table of.)

PRUNUS MACROPHYLLA, P. avium.

PRUNUS PADUS, *Padus*, *P. avium*, *Cer'asus Padus*, *Cer'asus racemo'sus sylvest'ris*, *Wild cluster* or *Bird Cherry Tree*, (F.) *Cérisier à grappes*, *Bois puant*. The bark of the tree has a fragrant smell, and a bitter sub-astringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c. in the form of decoction. The berries have been used in dysentery.

PRUNUS SEBASTINA, Sebastina.

PRUNUS SPINOSA. The *Stoe Tree*, *P. sylvest'ris* seu *Aca'cia*, *Agriococcime'lea*, *Agru'la*, *Agru'ne'la*, (F.) *Prunellier*, *Prunier sauvage*. The fruit—the *stoe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to its astringent properties. The *Aca'cia nostras* seu *German'ica* seu *vulg'aris*, *Prun'ola sylvest'ris*, *Succus acaciæ nostrat'is*, *S. Acaciæ Germanicæ inspissat'us* is obtained from this.

PRUNUS SYLVESTRIS, P. Avium, P. Spinosa.

PRUNUS VIRGINIANA, *Cer'asus sero'tina*, C.

*Virginiana*, *Wild Cherry Tree*, (F.) *Cérisier de Virginie*. The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and, likewise, a narcotic quality. It is stimulant and tonic. The leaves contain prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almond. A strong decoction of the bark is anthelmintic.

PRUNUS VULGARIS, P. Padus.

PRURIG'INOUS, *Prurigin'o'sus*; same etymon as the next. Relating, or belonging to, or resembling prurigo.

PRURIGO, *Pruri'tus*, *Chris'ma*; from *prurio*, 'I itch.' The word is often used synonymously with *itching*. Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are a severe itching, accompanied by an eruption of papulæ of nearly the same colour as the adjoining cuticle; *Cnesmos*, *Scabies papuliform'is*, *Ecor'mia pruri'go*. It affects the whole surface of the skin, under three varieties of form;—the *P. mitis*, *P. formi'cans*, *P. seni'lis*, &c. as well as some parts of the body, as the *P. pod'icis*, and *P. puden'di mulie'bris* seu *Puden'dagra pru'ricans*.

PRURIGO, Heat—p. Pedicularis, Phtheiriasis.

PRURIT, Itching.

PRURITUS, Gargle, Itching, Prurigo.

PRUSSIAN BLUE, *Ferrum Zoët'icum*, *F. Borus'sicum*, *F. Cyanogena'tum*, *F. oxydula'tum hydrocyan'icum*, *Ferri Ferrocy'anas*, *F. Ferrocy'anuretum*, *Borus'sias Ferri*, *Cæru'leum Borus'sicum*, *C. Berolinen'sē*, *Prussias Ferri*, *Hydrocy'anas Ferri*, *Ferri Cyanuretum*, *Ferri percyan'i'dum*, *Trito-hydro-ferrocy'anate of iron*, *Ferrocy'anuret of iron*, *Ferro-prus'siate of iron*, (F.) *Bleu de Prusse*. In the Pharmacopœia of the United States, the pure salt—*Ferri ferrocy'anuretum*—is directed to be made as follows: *Ferri Sulph.* ℥iv, *acid sulph.* f℥iiss, *acid nitric.* f℥vj or q. s., *potassii ferrocy'anuret.* ℥ivss, *aquæ*, Oij. Dissolve the sulphate in a pint of water, and having added the sulphuric acid, boil the solution. Pour into it the nitric acid, in small portions, boiling the liquid for a minute or two after each addition, until it no longer produces a dark colour; then allow the liquid to cool. Dissolve the ferrocy'anuret of potassium in the remainder of the water, and add this solution gradually to the first liquid, agitating the mixture after each addition; then pour it upon a filter. Wash the precipitate with boiling water until the washings pass tasteless. Lastly, dry and rub into powder. This salt is chiefly used in the preparation of the hydrocyanic acid and the cyanuret of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (℥j to ℥j, of cerate.) Dose, four to six grains.

PSALIDIUM, Fornix.

PSALIS, Fornix, Scissors.

PSALTERIUM, Lyra.

PSAMMA, see Gravel.

PSAMMIS 'MUS, *Ammis'mus*, *Gammis'mus*, from *σαμμος*, 'sand.' *Arend'tio*. The application of sand to any part of the body for the cure of disease. — Paulus.

PSAMMODES, Sabulous.

PSAMMUS, see Gravel.

PSELLIS'MUS, *ψελλισμος*, from *ψελλίζω*, 'I stutter.' Imperfect or depraved state of the articulation. A genus in the class *Pneumatica*, order *Phonica*, of Good.

PSELLISMUS NASITAS, Rhinophonia — p. Rhotacismus, Rotacism.

PSELLOTES, Balbuties.

PSEUDACACIA ODORATA, Robinia pseudacacia.

PSEUDAC'OE, *Pseudacō'ia, Pseudecō'ia*, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\alpha\kappa\omicron\upsilon\varsigma$ , 'audition.' *Pseudacō'ia*. False hearing.

PSEUDACORUS, Iris pseudacorus.

PSEUD.ENTHE'SIA, *Sensas perversans*, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\epsilon\iota\sigma\theta\alpha\nu\omicron\mu\alpha\iota$ , 'I feel.' *Parapsia illusoria, Pseudophē, Pseudaph'ia*. Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered amputation; and in hypochondriacs and the insane.

PSEDALEI MORBI, Feigned diseases.

PSEUDANGUSTURINUM, Bruceine.

PSEUDAPHE, Pseudæsthesia.

PSEUDARTHO'SIAS, *Pseudarticula'tio, Pseudarticulus, Articula'tio notha seu artificia'lis*, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\alpha\rho\theta\rho\nu$ , 'a joint.' A false joint or articulation.

PSEUDARTICULATIO, Pseudarthrosis.

PSEUDECOIA, Pseudacoe.

PSEUDENCEPHALUS, *Paraceph'alus*, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\epsilon\gamma\kappa\epsilon\phi\alpha\lambda\omicron\nu$ , 'the encephalon.' A monster, whose cranium is open in its whole extent, from before to behind, its base supporting a vascular tumour. — G. St. Hilaire.

PSEUDO, False — p. Asthma, Dyspnœa.

PSEUDOBLEP'SIA, *Pseudoblepsis, Pseudora'ia, Suffusio oculi*, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\beta\lambda\epsilon\psi\iota\varsigma$ , 'sight.' *Pseudops'ia, Parops'ia illusoria, Suffusio, Phantas'ma, False sight*. A generic name, used by Cullen for perversion of vision. See Metamorphopsia.

PSEUDOBLEPSIS, Paropsis.

PSEUDOCARCINOMA LABII, Cancer aquatilis.

PSEUDOCROUP, Asthma thymicum.

PSEUDOCYESIS, Pregnancy, false — p. Cyesis molaris, Mole.

PSEUDOENCEPHALITIS, Hydrencephaloid disease.

PSEUDO-FEVER, Irritation, morbid.

PSEUDOGEU'SIA, *Pseudogeus'ia, Pseudogeus'tia*, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\gamma\epsilon\upsilon\sigma\iota\varsigma$ , 'taste.' *Hallucina'tio gustiva*. False taste.

PSEUDOGEUSTIA, Pseudogeusia.

PSEUDOHELMINTHES, Ectozoa.

PSEUDOLI'EN, *Pseudopsen*. Glands situate in the neighbourhood of the spleen; probably, lymphatic glands.

PSEUDOMECHIOACANA, Convolvulus panduratus.

PSEUDOMEDICUS, Charlatan.

PSEUDOMELANOTIC FORMATIONS, see Anthracosis — p. Membrane, Membrane, false.

PSEUDOMELANOTIC MENIX, Membrane, false — p. Metamorphosis polyposa, Polypus.

PSEUDOMEMBRANA, Membrane, false.

PSEUDONARCISSUS, Narcissus pseudonarcissus.

PSEUDOPERIPNEUMONIA, Peripneumonia notha.

PSEUDOPHLOGOSIS VENTRICULI RESOLUTIVA ET COLLIQUATIVA, Gastromalacia.

PSEUDOPHTH'SIS, False phthisis. Emaciation occasioned by other cause than organic lesion of the lungs.

PSEUDOPLAS'MATA, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\pi\lambda\alpha\sigma\omega$ , 'I form.' A term applied to malignant heterologous tumours. — Vogel.

PSEUDOPLEURITIS, Pleurodynia — p. Po-

lypi, see Polypi — p. Pyrethrum, Achillea ptarmica — p. Spleen, Pseudolien.

PSEUDOPNEUMONIA, Peripneumonia notha.

PSEUDOPNEUMONITIS, Peripneumonia notha.

PSEUDOPSIA, Pseudoblepsia.

PSEUDORAS'IA, Pseudoblepsia.

PSEUDOREX'IA, *Pseudorea'ia*, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\alpha\rho\epsilon\tau\iota\varsigma$ , 'appetite.' False appetite.

PSEUDO-RHONCHUS, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\rho\omicron\chi\chi\omicron\varsigma$ , 'rattle.' A sound heard during respiration, which appears to be produced, like the ordinary rhonchi, in the air-tubes, but is exterior to them—as in the case of *pleural pseudorhonchi*. See Rattle, and Râle.

PSEUDOS'MIA, *Pseudosphre'sia, Pseudosphre'sis*, from  $\psi\epsilon\upsilon\delta\eta\varsigma$ , 'false,' and  $\sigma\omicron\mu\eta$ , 'smell.' False sense of smell.

PSEUDOPHRESIA, Pseudosmia.

PSEUDOSYPHILIS, Syphilis pseudosyphilis.

PSEUDOTHANATOS, Asphyxia.

PSEUDOVARIOLÆ, Variella.

PSEUDYMEN, Membrane, false.

PSIDIUM POMIF'ERUM. The *Apple Guava, Guava, Guayara*. This plant and *P. Pyrif'erum* bear fruits; those of the former like apples, — of the latter like pears. The apple kind has an acid flavour, the other is sweet. Of the inner pulp of either, the natives of the Indies make jellies; and, of the outer rind, tarts, marmalades, &c. They are somewhat astringent; this quality, indeed, exists in every part of the tree, and abundantly in the leaf-buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhœa. A simple decoction of the leaves is said to be useful in the itch, and most cutaneous eruptions.

PSILOSIS, Depilation.

PSILOTHRUM, Bryonia alba, Depilatory.

PSIMMYTHON, Plumbi subearbonas.

PSOA, Dysodia.

PSOÆ, *Psœia, Psœa, Lumbi, 'the loins,' Alop'eces, Nephrome'træ, Nephrome'tres*. The psœæ muscles.

PSOAS MAGNUS, *Psœas seu lumb'aris inter'nus, Pré-lombo-trochantin, Pré-lombo-trochantinien* (Ch.), *Femur moreu'tium scrtus*. A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long, fusiform, and attached, above, to the body and transverse processes of the first four lumbar vertebrae, and last dorsal. Below, it terminates, by a very thick tendon, common to it and the iliacus muscle, — which is inserted into the top of the lesser trochanter. This muscle bends the thigh upon the pelvis, and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

PSOAS PARVUS, *Pré-lombo-pubien*, (Ch.) A muscle situate anteriorly to the last. It is long, thin, flat, and narrow; and is attached, above, to the body of the last dorsal vertebra, and below, to the linea ileo-pectinea, by means of a slender tendon, which furnishes two expansions — one to the *Iliac aponeurosis*, and the other to the *pelvis*. This muscle bends the vertebral column on the pelvis; and, reciprocally, the pelvis on the vertebral column.

PSODYMUS, Gastrodidymus.

PSOÏÆ, Psœæ.

PSOÏTE, Psœitis.

PSOÏTIS, *Inflamma'tio mus'culi Psœas, Lumb'ago inflamma'tia spasmod'ica*, (F.) *Psœite, In-*

*Inflammation du muscle Psoas.* From ψοαι, 'the loins,' and itis, denoting inflammation. Inflammation of the psoas muscles and of the parts situate before the lumbar vertebræ: accompanied, from its commencement, by considerable fever, violent pains in the part affected and in the thigh of the same side, which remains commonly half bent. Psoritis may terminate by suppuration, and form lumbar abscess.

PSOLĒ, ψωλη, 'the male organ.' Also, the glans when uncovered.

PSOLON, Membrosus.

PSOLON'CUS, from ψωλη, and ογκος, 'a tumour.' Swelling of the glans, or of the penis generally.

PSOLUS, from ψωλη. One who has the glans uncovered. One who has been circumcised.

PSOPHOMETER, Stethoscope.

PSOPHOS, ψοφος, 'a noise.' A loud noise; a hollow sound.

PSORA, from ψωω, 'I touch, I feel.' *Scabies, Phlysis Scabies, Ecpye'sis Scabies, Scabiola, Itch, Scratch, Scotch fiddle, (F.) Gale, Mal Saint-Main, Rogne.* A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed, and alternating, itching intolerably and terminating in scabs. It seems to be connected with an insect of the genus *Acarus*;—the *Ac'arus* seu *Sarcop'tes* seu *Sarcop'tus* seu *Phthi'rium* seu *Cheyle'tus Scabiei*, *Ac'arus Ciro*, *Itch-insect, (F.) Ciron.* The itch occupies, particularly, the spaces between the fingers, the back of the hands, wrists, elbows, axillæ, groins, hams, &c., and rarely affects the face. The best applications, for its cure, are,—the *Unguentum Sulphuris* or *Ung. Sulph. comp.* night and morning; but the unpleasant smell of the sulphur has given occasion to the use of other means;—as the *White Hellebore, Potass in deliquescence, Muriate of Ammonia, Sulphuric Acid, &c.* The repugnance to the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

PSORA AGRIA, Psoriasis inveterata—p. Leprosa, Psoriasis—p. Squamosa, Psoriasis.

PSORA'LEA GLANDULO'SA, *Alvaquill'a.* Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A shrub, used in Chili as a vulnerary.

PSORA'LEA PENTAPHYL'LA, *Psora'tia, Contrayer'va nova, Mex'ican Contrayer'va.* The root is little, if at all, inferior to the contrayerva in its medical properties; which, by the by, are unimportant.

PSORALIA, Psoralea pentaphylla.

PSORENTERIA, Cholera.

PSORI'ASIS, formerly, the state of being affected with ψωρα. *Lepido'sis psori'asis, Serpe'do, Serpi'go, Impeti'go* (of some), *Scab'ies sic'ca, S. feri'na, Psora lepro'sa, P. squamo'sa, Scaly Tetter, Dry Scald, Dry Scall, (F.) Dartre squameuse lichenoid'e, D. écaill'euse, Gratelle, Gale miliare, G. canine ou sèche.* A cutaneous affection, consisting of patches of rough, armorphous scales; continuous, or of indeterminate outline; skin often chappy. Psoriasis occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in lepra, which psoriasis, in some respects, resembles. Dr. Willan has given names to eleven varieties of psoriasis: the chief of which are the *Psoriasis gutta'ta, P. diffu'sa* (one form of which is the *Baker's Itch* and *Grocer's Itch*, and another, the *Washerwoman's Scall*), the *P. pyra'ta*, and *P. invetera'ta* seu *Psora d'gr'ia.* The treatment of psoriasis must be antiphlogistic, with the internal use of the fixed alkalies, sulphur, &c. The irri-

table kinds do better without any local application. The more local and less inflammatory are ameliorated by emollient and soothing applications; or by slightly stimulating means, sea-bathing, the *Ung. hydrarg. nitrico-oxyd., Ung. oxidi zinci, &c.*

PSO'RICUS. That which has the nature of itch. A medicine for curing the itch.

PSOROPHTHALMIA, Ophthalmia tarsi—p. Neonatorum, see Ophthalmia (purulenta infantum).

PSYÆ, Psoæ.

PSYCHAGOGA, Psychagogica.

PSYCHAGO'GICA, *Psychago'ga*, from ψυχη, 'life,' 'soul,' and αγω, 'I lead.' Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

PSYCHE, Anima.

PSYCHIATRIA, from ψυχη, 'mind,' and ιατρεία, 'healing.' Treatment of diseases of the mind.

PSY'CHICAL, *Psy'chicus*, from ψυχη, 'mind.' That which relates to the mind or mental endowments. *Psychological* is not infrequently used with the like signification.

PSYCHOLOGICAL, see Psychical.

PSYCHOL'OGY, *Psycholog'ia*, from ψυχη, 'mind,' and λογος, 'discourse.' A treatise on the intellectual and moral faculties. Also, the intellectual and moral faculties or sphere.

PSYCHONOSOL'OGY, *Psychonosolog'ia*, from ψυχη, 'mind,' νοσος, 'disease,' and λογος, 'a description.' The doctrine of, or a treatise on, diseases of the mind.

PSYCHOPATHIES, Psychoses.

PSYCHOR'AGES, *Agoni'zans, Moribun'dus, Mor'ibund*, from ψυχη, 'mind,' and ραγη, 'rupture.' Dying. *In Articulo Mortis.* *Moribund* means, also, one who is dying.

PSYCHORAGIA, Agony, Death.

PSYCHORRHAGIA, Agony, Death.

PSYCHOS, Cold.

PSYCHO'SES, from ψυχη, 'mind.' Neuroses of the intellect. Diseases of the mind. *Psychop'athies.*

PSYCHOTICA, Analeptica.

PSYCHOTRIA, Analeptica—p. Emetica, Ipecacuanha.

PSYCHOTROPHUM, *Betonica officinalis.*

PSYCHROLU'SIA, *Psychrolu'tron*, from ψυχος, 'cold,' and λουω, 'I wash.' A cold bath.

PSYCHROPHOB'IA, from ψυχος, 'cold,' and φοβος, 'fear.' Dread of cold, especially of cold water. Impresibility to cold.

PSYCHTICA, Refrigerants.

PSYDRA'CIA, *quasi, ψυκρα 'υδρακια, 'cold drops.'* The ancients sometimes used this term for *pimples*; at others, for *vesicles.* Willan and Bateman define *Psychradicum* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the psychradia usually appear together, and become confluent; and, after the discharge of pus, they pour out a thin, watery humour; which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from itch in not originating from an insect, and is not contagious;—perhaps the lichen. Authors have differed regarding its acceptance.

PSYDRACIA ACNE, Acne.

PSYLLIUM, *Plantago psyllium*—p. *Erectum*, *Plantago psyllium.*

**PTARMICA**, *Achillea ptarmica*—p. Montana, *Arnica montana*.

**PTARMICUM**, Eerrhinc, Sternutatory.

**PTARMOS**, Sneezing.

**PTELEA**, Ulmus.

**PTERIS**, *Polypodium filix mas*.

**PTERIS AQUILINA**, 'Eagles' Wings,' so called from its leaves. *Pteris*, *Thelypteris*, *Filix Nymphæa* seu *fœmina*, *Asplenium aquilinum*, *Common Brake* or *Female Fern*; *Eagle Fern*, *Bracken*, (F.) *Fougère femelle*, *La grande Fougère*. *Nat. Ord.* Filices. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tapeworm.

**PTERIS PALUSTRIS**, *Asplenium filix fœmina*.

**PTERNA**, *Calcanemum*.

**PTERNIUM**, *Calcanemum*.

**PTERNOBATES**, *Calcigradus*.

**PTEROCARPUS ERINACEA**, see *Kino*—p. *Marsupium*, see *Kino*—p. *Sandalinus*, *P. Santalinus*.

**PTEROCARPUS SANTALINUS**, *P. Sandalinus*, *Santalum* seu *Sandalum Rubrum*, *Red Sanders* or *Sauanders Tree*, (F.) *Santal rouge*. *Family*, *Leguminosæ*. *Sex. Syst.* *Diadelphia Decandria*. *Red Sanders wood*, *Santalum* (Ph. U. S.,) *Lignum sandalinum* is used only as a colouring matter: it gives to rectified spirit a fine deep red. The juice of this tree, like that of *P. Draco*, affords a species of *Dragon's Blood*.

**PTEROS'PORA ANDROMEDEA**, *Scaly Dragon claw*, *Dragon root*, *Fever root*, *Albany beech-drop*. An indigenous plant, *Nat. Ord.* *Monotropeæ*, *Sex. Syst.* *Decandria Monogynia*:—found in the state of New York, which blossoms in July. The root has been regarded as an anthelmintic, diuretic, emmenagogue, &c.: but it is not used.

**PTERYG'ION**, *Pterygium*, *Ala*, from *πτερόν*, 'a wing.' A small wing. *Onyx*, *Py'osis*, *Unguis*, (F.) *Drapeau*, *Onglet*. A varicose excrescence of the conjunctiva, of a triangular shape, and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. According to *Scarpa*, the ancients gave the name *Panniculus* to this last complication. If the pterygion cannot be dispelled by means of discutient collyria, it must be removed by the scissors.

**PTERYGIUM**, *Pterygion*, *Scapula*—p. *Digiti*, *Paronychia*—p. *Lardaceum*, *Pinguecula*—p. *Pinguecula*.

**PTERYGO-ANGULI-MAXILLARE**, *Pterygoideus internus*—p. *Colli-maxillare*, *Pterygoideus externus*—p. *Maxillare, grand*, *Pterygoideus internus*—p. *Maxillare, petit*, *Pterygoideus externus*—p. *Palatine canal*, *Pterygoid canal*—p. *Pharyngæus*, *Constrictor pharyngis*—p. *Staphylinus*, *Circumflexus*.

**PTERYGO-PALATINE**, *Pterygo-Palati'nis*. That which belongs to the pterygoid process and palate.

**PTERYGO-PALATINE ARTERY** or *Superior pharyngeal* is a very small artery, and is given off by the internal maxillary at the bottom of the zygomatic fossa: after having passed through the pterygo-palatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

**PTERYGO-PALATINE CANAL**. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

**PTERYGO-STAPHYLINUS INTERNUS**, *Levator palati*—p. *Syndesmo-ataphyli-pharyngicæ*, *Constrictor pharyngis*.

**PTERYGOIDES**, *Alatus*.

**PTERYGOID**, *Pterygoï'des*, *Pterygoï'deus*, *Alifor'mis*; from *πτερόν*, 'a wing,' and *εἶδος*, 'form.' A name given to two processes at the inferior surface of the sphenoid bone; the two laminae which form them having been compared to wings. These *ala* or *wings* or *processes*,—*Processus aliformes*,—have been distinguished, according to their position, into *internal* and *external*.

**PTERYGOID ARTERY**, *Vid'ian Artery*, *Ramulus Ductus Pterygoidei*, *Arteria pharyngæa super'na*, arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati. The name, *pterygoid arteries*, is likewise given to the branches, which the internal maxillary and some of its divisions, as the *mceninge media*, and *posterior temporalis profunda*, furnish to the pterygoid muscles, behind the neck of the lower jaw.

**PTERYGOID BONE**, *Sphenoid*.

**PTERYGOID CANAL**, *Vid'ian canal*, *Ductus pterygoideus*, *Canalis Vidianus*, (F.) *Conduit pterygoidien ou Vidien*, *Pterygo-palatine canal*, is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The *foramina* of the sphenoid, which terminate the canals, have the same epithets applied to them.

**PTERYGOID FOSSA**, *Fossa Pterygoï'dea*, (F.) *Fosse pterygoidienne* ou *pterygoï'de*, is the depression which separates the two laminae or ala of the pterygoid process.

**PTERYGOID MUS'LES**, *Ala'res musculi*, *Aliform'es musculi*, are two in number. 1. The *Pterygoideus externus*, *P. minor*, (F.) *Pterygocoll-maxillaire*, *Petit Pterygo-maxillaire* (Ch.) *Petit pterygoidien*, *Pterygoidien externe*, is a thick, short muscle, which arises, by short aponeuroses, from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone; and is inserted at the anterior part of the neck of the lower jaw-bone, and the corresponding part of the inter-articular fibro-cartilage. This muscle draws the condyle of the lower jaw and the inter-articular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards. 2. The *Pterygoideus internus*, *P. major*, *Masse'ter internus*, *Latens in Ore*, (F.) *Grand Pterygo-maxillaire*, *Pterygoanguli-maxillaire*, *Grand Pterygoidien* ou *Pterygoidien interne*. A thick, quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

**PTERYGOID NERVES**. These are two in number. 1. The *Pterygoid* or *Vid'ian Nerve*. It arises from the posterior part of the sphenopalatine ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A *superior* or *cranial*, *Nervus superficialis* sive *petrosus*, which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An *inferior* or *carotid*, *Nervus profundus* sive *major*, which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the trisplanchnic. 2. The *Pterygoid Nerve*, properly so called, *Nervus musculi pterygoidei*, is given off by the inferior maxillary branch of the 5th pair.

**PTERYGOÏDIEN GRAND** ou **INTERNE**, Pterygoideus internus—*p. Externe*, Pterygoideus externus—*p. Petit*, Pterygoideus externus.

**PTERYGOÏMA**. Same etymon. A wing; a projecting or pendulous body. A swelling of the vulva, which prevents coition.—M. A. Severinus.

**PTERYX**, Ala.

**PTILOSIS**, Deplumatio, Madarosis.

**PTISANA**, Tisane—*p. Communis*, Decoctum hordei compositum—*p. Hippocratica*, Decoctum hordei.

**PTISSANA**, Tisane.

**PTOCHIA'TER**, *Ptochia'trus*, same etymon as the next. A physician to the poor, or to an establishment for the poor.

**PTOCHIATRIA**, from *πτωχος*, 'poor,' and *ιατρεια*, 'healing.' Practice amongst the poor. Also, an institution for the treatment of the diseases of the poor.

**PTOCHOCOMI'UM**, from *πτωχος*, 'a poor person,' and *κομω*, 'I take care of;' *Ptochodochi'um*, *Ptochoproph'eum*. An almshouse.

**PTOCHODOCHIUM**, Ptochococium.

**PTOCHOTROPHEUM**, Ptochococminn.

**PTOMA**, Cadaver.

**PTOSIS**, Prolapsus—*p. Bulbi oculi*, Exophthalmia.

**PTOSIS IR'IDIS**, *Iridocce'le*, *Her'nia Ir'idis*, *Iridopto'sis*, *Prolap'sus Iridis*, from *πτωσις*, 'a falling.' A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms.

**PTOSIS PALPEBRE**, Blepharoptosis.

**PTYALAGOGUE**, Sialogogue.

**PTYALIN**, see Saliva.

**PTYALISM**, Salivation.

**PTYALISME MERCURIEL**, Salivation, mercurial.

**PTYALISMUS**, Salivation—*p. Acutus mellitus*, see Salivation—*p. Acutus sympatheticus*, see Salivation—*p. Hydrargyratus*, Salivation, mercurial—*p. Iners*, Slavering—*p. Mercurialis*, Salivation, mercurial—*p. Pyrosicus*, Pyrosis.

**PTYALOGOGUE**, Sialogogue.

**PTYALON**, Saliva.

**PTYASMAGOGUE**, Expectoant, Sialogogue.

**PTYELON**, Saliva, Sputum.

**PTYSIS**, Exspuition.

**PTYSMA**, Saliva.

**PTYSMAGOGUE**, Sialogogue.

**PTYSMATIS'CHESIS**, *Ptysmatos'chesis*, from *πτυσμα*, 'spntum,' and *ισχειν*, 'to retain.' Suppression of pulmonary expectoration.

**PTYSMATOSCHESIS**, Ptysmatischesis.

**PUANTEUR**, Dysodia.

**PUBENS**, Ephebus.

**PUBER**, Ephebus.

**PUB'ERAL**; same etymon as Puberty. Relating or appertaining to the age of puberty—as 'a puberal disease.'

**PUBÈRE**, Ephebus.

**PUBERTAS**, Ephebia.

**PUBERTY**, *Pubertas*, *Hebè*, *Pubes*, *Aphrodis'ia*, *Ephebi'a*, *Ephe'bia*, *Ephe'botes*, *Ephebo'synè*, *Pubes'cence*, from *pubescere*, 'to begin to have hair on the chin and sexual organs.' The period of life at which young people of both sexes are *pubes'cent* or *nubile*. According to the civil law, puberty occurs at 12 years in females, and 14 in males. The period varies somewhat in different climates, and in different individuals of the same climate.

**PUBES**, *Epis'chion*, *Epicten'ion*, *Cteis*, *Pecten*; the *Pubic region*. Same etymon. The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the

period of puberty. The hair is also called *Pubes*, *Lani'go* seu *Pili*, *Pudendo'rum Planta'rium*; and, of old, *pubertas* signified the same.

**PUBES**, Puberty.

**PUBESCENCE**, Puberty.

**PUBESCENT**, see Puberty.

**PUBIÆUS**, Pubic.

**PUBIC**, *Pa'bion*, *Pa'bicus*, *Pubia'us*, (F.) *Pubien*. That which belongs to or concerns the pubis.

**PUBIC ARCH** or *Arch of the Pubis*, (F.) *Arcade pubienne*. The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male; to correspond with the additional functions which she has to execute.

**PUBIC ARTICULA'TION**, or *Sym'physis Pubis*, results from the junction of the ossa pubis. The medium of union is cartilage.

**PUBIC LIG'AMENTS** are two very solid, fibrous fasciæ, situate before and beneath the symphysis pubis, which they strengthen. The one is called the *anterior pubic ligament*; the other the *inferior or subpubic*.

**PUBIC REGION**, *Re'gio Pubis*. The region of the pubes.

**PUBIEN**, Pubic.

**PUBIO-COCCYGIEN-ANNULAIRE**, *Pubio-coecyge'us annula'ris*. Dumas gave this name to the levator ani and ischio-coecygeus, which he considers a single muscle.

**PUBIO-COCCYGIEN-ANNULAIRE**, *Levator Ani*—*p. Femoral*, *Pectinalis*—*p. Femoralis*, *Adductor longus femoris*—*p. Ombilical*, *Pyramidalis abdominis*—*p. Prostaticus*, *Compressor prostate*—*p. Sous-ombilical*, *Pyramidalis abdominis*—*p. Sternal*, *Rectus abdominis*—*p. Urethral*, see *Compressor Urethra*.

**PUBIS**, *OS*, *Episei'on*, *Episi'on*, *Epis'chion*, *Share Bone*, *Bar-bone*, *Os Pec'tinis*. The anterior part of the os innominatum; so called because it corresponds to the genital organs and pubic region. The *angle of the pubis* is formed by the union of the body and rami of each side.

**PUB'LICÆ PARTES**. Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

**PUCOON**, *Sanguinaria Canadensis*—*p. Red*, *Sanguinaria Canadensis*—*p. Yellow*, *Hydrastis Canadensis*.

**PUCE**, *Pnlex irritans*—*p. Maligne*, see *Anthrax*—*p. Pénérante*, *Chique*.

**PUCELAGE**, Virginity.

**PUCELLE**, Virgin.

**PUDDING-GRASS**, *Mentha pulegium*.

**PUDENDA**, Genital organs.

**PUDENDA VIRORUM**, Pudibilia.

**PUDEND'AGRA**. A hybrid word; from *pudenda*, (*pudere*, 'to be ashamed,') 'the genital organs,' and the Greek *αγρα*, 'a seizure.' According to some, this term means pain in the genital parts: *Dolor pudendo'rum*, *Men'tulagra*, *Ædæo'dyn'ia*; according to others, it is synonymous with syphilis.

**PUDENDAGRA PRURIENS**, *Prurigo pudendi muliebri*s.

**PUDEND'AL HERNIA**. Hernia, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis, as far as the os uteri.

**PUDENDALIS LONGUS INFERIOR**, see *Sciatic nerve*, lesser.

**PUDENDUM, FEMALE**, *Vulva*—*p. Muliebre*, *Vulva*.

**PUDENDUS**, Pudic.

**PUDIBIL'IA**; from *pudere*, 'to be ashamed.'

The male genital organs; *Genitalia Viri*, *Virilia*, *Pennis*, *Instrumenta*, *Pudenda virorum*, *Pennis*.

**PUDIC**, *Pudicus*, *Pudendus*, (F.) *Honteux*. Same etymon. That which causes shame. A name given to the genital organs as well as to different other parts.

**PUDIC ARTERIES** are distributed to the organs of generation. They are,—1. The *internal Pudic*, *Arteria Pudica*, *A. pudenda communis*, (F.) *Artère honteuse interne*, *A. Sous-pubienne* (Ch.), *Genital Artery*. It is furnished by the hypogastric, and divides into two branches; the one—the *inferior* or *perineal*—which gives off the inferior hemorrhoidal and the artery of the septum; and the other—the *superior*, (F.) *Ischiopéniennne*—which furnishes the transverse perineal artery, and divides into two branches; the *artery of the corpus carnosum*, and the *dorsalis penis*. This latter, in the female, has the name *Dorsalis Clitorialis*. 2. The *external Pudic Arteries*, (F.) *Artères scrotales ou vulvaires* (Ch.), *A. honteuses externes*, which are two in number. The one is *superficial* or *subcutaneous*, and the other *deep-seated* or *subaponeurotic*. They are given off from the femoral artery, or some one of its branches; and are distributed to the external parts of generation.

**PUDIC NERVE**, (F.) *Nerv honteux*, *Nerv ischiopéniennne* or *Ischio-clitorien* (Ch.), is a branch furnished by the sacral plexus, which is distributed to the genital organs; and especially, to the penis in man, and the clitoris in the female.

**PUERILE**, *Puerilis*, from *puer*, 'a child,' (F.) *Respiration puérile*, *R. exagérée*, *R. supplémentaire*, *R. hypervésiculaire*. A term applied to the respiration when it is heard loud through the stethoscope, as in healthy children.

**PUERILITAS**, Dementia of the aged.

**PUERITIA**, see Age.

**PUERPERA**, from *puer*, 'a child,' and *parere*, 'to bring forth.' *Tokas*, *Lochos*, *Eux'a*, *Lecho*, a lying-in woman, (F.) *Femme en Couche*, *Accouchée*. A female in child-bed. One recently delivered.

**PUERPERAL**, *Puerperalis*; from *puerpera*. Relating to parturition and its consequences.

**PUERPERAL CONVULSIONS**, *Eclampsia gravidarum* and *parturientium*.

**PUERPERAL FEVER**. Any fever occurring during the puerperal state—*Febris puerperarum*, *Lechopyra*, *Lochiocolitis*, *Lochiopyra*, *Child-bed fever*. Most commonly restricted to a malignant variety of peritonitis.

**PUERPERIUM**, Child-bed state.

**PUERPEROUS**, Parturient.

**PUFF**, **VEILED**, see Cavernous respiration.

**PUFF-BALL**, *Lycoperdon*, *Leontodon taraxacum*.

**PUFFINESS**, from (D.) *poffen*, 'to blow.' *Inflatio*, *Sufflatio*; *Tumefactio mollis*, (F.) *Bouffissure*, *Boursouffure*. A soft intumescence, without redness, which may be partial or general, and be produced by accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous areolar tissue, &c. Puffiness is most frequently seen in the face and legs; and sometimes appears around a wound.

**PUGIL'LUS**, *Drax*, *Drachion*, from *pugnus*, 'the fist.' *Dragma*, *Dragmis*, (F.) *Pincée*. The quantity of any substance, which may be taken with the end of two or three fingers. The eighth part of a handful.

**PUISSANCE DU MOULE INTÉRIEUR**, Plastic force.

**PUKE**, *Emetic*.

**PUKEWEED**, *Lobelia inflata*.

**PUKING**, Vomiting, Regurgitation.

**PULEGIUM**, *Mentha pulegium*—p. *Cervinum*, *Mentha cervina*.

**PULEX IRRITANS**. The *common flea*, (F.) *Puce*. A parasitic insect found on the bodies of man and animals.

**PULEX PENETRANS**, *Chique*.

**PULICARIA DYSENTERICA**, *Inula dysenterica*.

**PULICARIS**, *Pulicaris*, from *puler*, 'a gnat.' An epithet given to cutaneous eruptions resembling gnat-bites;—and, also, to diseases in which such eruptions occur.

**PULICARIA HERBA**, *Plantago psyllium*.

**PULNA**, MINERAL WATERS OF. These Bohemian springs contain sulphates of soda and magnesia, and chloride of magnesia.

**PULMO**, *Pulmones*, by transposition of the letter *l* from *pleumon*, *πλευμων*; *Pneumon*, *Pleumon*, *Spicameduntum an'ima*, *Ergast'cion spir'itis*, *Flabellum et ventila'brum cordis*, the *Lung*. The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatible structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes, *Lobi seu Alæ pulmonum*. The left has only two lobes, and consequently only one fissure. At the internal surface of those organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the *root of the lungs*, (F.) *Racine des Poumons*. Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, areolar tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opaque septa. These vesicles are called *Air-cells*, *Spiramenta* seu *Spiracula* seu *Cellulæ Pulmonum*. Along the partitions or septa is deposited, in greater or less quantity, *black pulmonary matter*, (F.) *Matière pulmonaire noire*, as it has been called, which seems to be natural. Sometimes it is seen in points; at others, in spots. The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood, which requires oxygenation, is conveyed to them from the heart, by the pulmonary artery; and when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels inservient to the nutrition of the lungs are the *bronchial* arteries and veins. The pulmonary lymphatics are very numerous. Some are superficial; others, deep-seated. They pass, for the most part, into the *bronchial ganglions* or *glands*. The nerves are furnished by the pulmonary plexus.

**PULMONAIRE DES FRANÇAIS**, *Hieracium murorum*.

**PULMONARIA**, *P. officinalis*, *P. Maculata*, *P. Maculosa*, *Lungwort*, *Spotted Lungwort*, *Jerusalem Cowslip*, *Jerusalem Sage*, *Spotted Comfrey*, (F.) *Sauge de Jerusalem*. Family, *Boraginacæ*. *Sex. Syst.* Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs,

and, partly, because they have a slightly mucilaginous taste. The plant is not worthy of notice.

**PULMONARIA**, *Pneumonia*—*p.* Arborea, *Lichen pulmonarius*—*p.* Gallica, *Hieracium murorum*—*p.* Officialis, *Pulmonaria*.

**PULMONARY**, *Pulmonaris*, *Pulmona'lis*. That which relates or belongs to the lungs. A name given to various parts.

**PULMONARY ARTERY**, *Arte'ria pulmona'ris*, *Vena arterio'sa*, arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra—one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

**PULMONARY MATTER**, BLACK, see *Pulmo*.

**PULMONARY PLEXUS**, *Plexus pulmona'ris*. A considerable nervous network, situate behind the bronchia, which is formed by the filaments of the pneumogastric nerve or *par vagum*, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much areolar tissue. This plexus sends filaments to the bronchia, which they accompany to their extremities.

**PULMONARY VEINS**, *Vena pulmona'res*, *Arte'ria veno'sa*. These arise in the lungs from the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in containing arterial blood, as the pulmonary artery differs from the others in conveying venous blood. They carry the blood back to the heart after aeration.

**PULMONES TARTARIZATI**, *Lithiasis pulmonum*.

**PULMONIA**, *Phtthisis pulmonalis*, *Pneumonia*.

**PULMONIC**, *Pulmon'icus*, *Pneumon'icus*, *Pulmona'rius*, *Pneumon'ic*. One affected with phtthisis—one labouring under diseases of the lungs. Any thing relating or belonging to the lungs. A medicine for the lungs.

**PULP**, *Pulpa*, *Pulpa'men*, *Sarc*. The soft and parenchymatous parts of vegetables reduced to a paste by the operation of pulping.

**PULP OF THE TOOTH**, *Dental pulp*.

**PULPA CASSIÆ**, see *Cassia fistula*—*p.* *Dentis*, *Dental pulp*—*p.* *Pruni*, see *Pruni pulpa*—*p.* *Prunorum sylvestrium condita*, *Conserva pruni sylvestris*—*p.* *Tamarindi*, see *Tamarindi pulpa*.

**PULPA TESTIS**, *Parenchyma testis*. The parenchyma of the testis.

**PULPAMEN**, *Pulp*.

**PULPE DENTAIRE**, *Dental pulp*.

**PULPEZIA**, *Apoplexy*.

**PULPING**, *Pulpa'tion*, *Pulpa'tio*. An operation—the object of which is to reduce certain vegetable substances to a pulp. For this purpose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulper*, (*F.*) *Pulpoire*.

**PULPOIRE**, see *Pulping*.

**PULQUE**, see *Agave Americana*.

**PULS EX OVIS** and **LACTE**, *Oogala*.

**PULSATILLA NIGRICANS**, *Anemone pratensis*—*p.* *Pratensis*, *Anemone pratensis*—*p.* *Vulgaris*, *Anemone pulsatilla*.

**PULSATILLE NOIRE**, *Anemone pratensis*—*p.* *des Prés*, *Anemone pratensis*.

**PULSATIO**, *Pulsation*—*p.* *Cordis*, *Palpitation*.

**PULSA'TION**, *Pulsa'tio*, *Sphygmos*, *Sphyxia*, *Pede'sis*, *Pedeth'mos*, (*F.*) *Battement*. The beating of the heart and arteries. Also, the beating felt in an inflamed part.

**PULSATIVUS**, *Throbbing*.

**PULSATORY**, *Throbbing*.

**PULSE**, from *pulso*, 'I beat;' *Pulsus*, *Pulsa'tio*, *Pulsus cordis et arteria'rum*, *Ictus cordis et arteria'rum*, *Incur'sus arteria'rum*, *Sphygmos*, *Sphygma*, *Diasphyxia*, (*F.*) *Pouls*. Beating of the arteries, produced by the afflux of the blood propelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a given time; to their degrees of quickness; hardness and strength; to the equality or inequality either of the pulsations themselves or of their intervals; to the development or fulness of the artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages:

Ages.	Number of Beats per minute, according to		
	HEBERDEN.	SÖMMERING.	MÜLLER.
In the embryo .....			150
At birth .....	130 to 140		Do.
One month .....	120		
One year .....	120 to 108	120	115 to 120
Two years .....	108 to 90	110	100 to 115
Three years .....	90 to 80	90	90 to 100
Seven years .....	72		85 to 90
Twelve years .....	70		
Puberty .....		80	80 to 85
Adult age .....		70	70 to 75
Old age .....		60	50 to 65

It does not appear that the pulse of the aged is less frequent, but the contrary. In general it is more frequent in females and in irritable persons, than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals. In diseases it wanders, more or less,

from these physiological conditions. The different characters of the pulse that have been recorded, are remarkably numerous. In a dictionary, it is necessary to detail them, although many of them are not now regarded, and some are ridiculous.

**PULSE**, **ARDENT**, *Pulsus ardens*, (*F.*) *Pouls ardent*, *Pouls élevé*. One which seems to raise itself to a point in order to strike the finger.

**PULSE**, **CAP'RIZANT**, *Pulsus Capri'zans*, *P. dor-*

*cadis'sans*, *P. gazell'ans*, *P. fusa'lis*, *Goatleap pulse*, (F.) *Pouls caprisant*. One which seems to leap, as it were; an imperfect dilatation of the artery being succeeded by a fuller and a stronger one.

**PULSE, COMPLEX**, (F.) *Pouls combiné ou composé*, *P. compliqué*. A pulse which has the character of several critical pulses united.

**PULSE, CONTRACT'ED**, (F.) *Pouls serré*, *P. contracté*. One whose pulsations are narrow, deep, and slightly hard.

**PULSE, CONVULSIVE**, *Pulsus convulsivus*, (F.) *Pouls convulsif*. That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsations of a muscular fibre in a state of convulsion.

**PULSE, CRIT'ICAL**, *Pulsus criticus*. A pulse which, after having possessed the characters of irritation, becomes free, open, soft, &c.

**PULSE, DECURTATE**, *Pulsus myurus*: see, also, *Myurus*.

**PULSE, DEEP**, *Pulsus profundus*, (F.) *Pouls profond*. One which cannot be felt without difficulty, and without strong pressure by the finger.

**PULSE, DEFIC'IENT**, *Pulsus deficiens*, *P. Flickering*, *Pulsus an'nuens et circum'nuens*, (F.) *Pouls défaillant*, *P. insensible*. One which seems, every instant, about to cease.

**PULSE, DEPRESSED**, *Pulsus depressus*, (F.) *Pouls déprimé*. That which is deep and weak.

**PULSE, DEVELOP'ED**, (F.) *Pouls développé*. That which is broad, full, strong, and frequent.

**PULSE, DICROT'IC**, *Pulsus Di'crotus*, *P. bi'crotus*, *P. intestina'lis*, *P. bife'riens*, *P. mallea'ris*, *P. interc'ius*, (F.) *P. dicrote*, *P. rebondissant*, *P. redoublé*. That in which the finger is struck twice at each pulsation; once lightly, the other time more strongly.

**PULSE, EQUAL**, *Pulsus æqualis*. That in which the pulsations resemble each other, and return at equal intervals.

**PULSE, FEBRILE**, *Pulsus febrilis*. One very frequent.

**PULSE, FEEBLE, WEAK**, *Pulsus debilis*, (F.) *Pouls faible*. One which strikes the finger feebly.

**PULSE, FIL'IFORM**, *P. thready*. One which resembles a thread slightly vibrating.

**PULSE, FLICKERING**, *Pulse, deficient*.

**PULSE, FORM'ICANT**, *Pulsus formicans*, (F.) *Pouls formicant*. One which resembles, by being small and scarcely perceptible, the motion of an ant.

**PULSE, FREQUENT**, (F.) *P. agité*, *P. précipité*. One which strikes more frequently than usual in a given time.

**PULSE, FULL**, *Pulsus plenus*, (F.) *Pouls plein*. One which gives the notion of great repletion in the vessel.

**PULSE, GOAT-LEAP**, *P. Caprizant*.

**PULSE, GUT'TURAL**, *Pulsus gutturalis*, (F.) *Pouls guttural*. A pulse which has been supposed to indicate the termination of affections of the throat.

**PULSE, HARD**, *Pulsus durus*, (F.) *Pouls dur*. That in which the pulp of the finger seems to yield to the pulsation.

**PULSE, HECTIC**, *Pulsus hec'ticus*. The weak, frequent pulse observed in hectic fever.

**PULSE, HEMORRHOID'AL**, (F.) *Pouls des Hé-morrhoides*. A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal;—the pulsations not being alike in force, and still less the intervals.

**PULSE, HEPAT'IC**, (F.) *Pouls du Foie*. A pulse imagined to indicate affections of the liver. It is not worthy of description.

**PULSE, INFERIOR**, (F.) *Pouls inférieur*, *P. abdominal*, *P. ventral*. One supposed to announce evacuations below the diaphragm.

**PULSE, INTERCUR'RENT**, *Pulsus intercur'rens seu inter'eidens*. One in which a superfluous pulsation seems to occur from time to time.

**PULSE, INTERMITTENT**, (F.) *Pouls inter'eidant*. One in which the pulsations fail from time to time.

**PULSE, INTES'TINAL**, (F.) *Pouls des intestins*, *P. de la diarrhée*. A critical pulse, presumed to announce an evacuation by the intestines.

**PULSE, IN'TRICATE**, *Pulsus intricatus*, (F.) *Pouls embarrassée*. That which is but little developed and unequally slow.

**PULSE, IRREG'ULAR**, *Pulsus anorma'lis*. One whose pulsations are unequal, and return at unequal intervals.

**PULSE OF IRRITATION**, *Pulsus ab irritatio'nē seu nervi'us seu acrit'icus*. One which is frequent, hard, and contracted.

**PULSE, JARRING**, *P. vibrating*—*p. Jerking*, *Pulse, sharp*.

**PULSE, LANGUID**, (F.) *Pouls languissant*. A slow and feeble pulse.

**PULSE, LARGE**, *Pulsus crassus*, *P. magnus*, (F.) *Pouls grand*, *P. large*. That which is large and full.

**PULSE, LONG**. One which strikes the finger to a great extent in length.

**PULSE, LOW**, *Pulsus hu'milis*, (F.) *Pouls bas*. One in which the pulsations are scarcely perceptible.

**PULSE, NASAL**, (F.) *Pouls nasal*, *P. capital*, *P. du Nez*. One supposed to announce the end of an irritation in the nasal fossæ.

**PULSE, NAT'URAL**, (F.) *Pouls naturel des adultes*, *P. parfait*, *P. des adultes*, *P. modéré*. One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

**PULSE, ORGANIC**, (F.) *Pouls organique*. One which indicates the affected organ, or the organ by which an evacuation will take place.

**PULSE, PEC'TORAL**, (F.) *Pouls de l'expectoration*. A critical pulse, announcing the termination of some pulmonary irritation.

**PULSE, QUICK**. One which strikes sharply, but not forcibly, against the finger.

**PULSE, REG'ULAR**, *Pulsus norma'lis aut regula'ris*. One whose pulsations are equal, and succeed each other at equal intervals.

**PULSE, RESIST'ING**, (F.) *Pouls résistant*. One a little tense, a little hard.

**PULSE, SHARP**, (F.) *Pouls prompt*, *P. vite*, *P. vif*. One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerking pulse*.

**PULSE, SHARP-TAILED**, *Pulsus myurus*: see *Myurus*.

**PULSE, SIMPLE**, *Pulsus simplex*. A critical pulse, indicating an evacuation by one organ only.

**PULSE, SLOW**, *Pulsus tardus*, *P. rarus*, (F.) *Pouls lent*, *P. tardif*, *P. rare*. One which strikes the finger slowly.

**PULSE, SMALL**, *Pulsus parvus*, (F.) *Pouls petit*. One whose pulsations are slender and weak.

**PULSE, SOFT**, *Pulsus mollis*, (F.) *Pouls mou*. One which yields under the finger.

**PULSE, STOM'ACHAL**, (F.) *Pouls stomacal*, *P. de l'estomac*. One supposed to announce an evacuation by the stomach.

**PULSE, STRONG**, *Pulsus fortis*, (F.) *Pouls fort*, *P. véhément*. One which strikes the finger strongly.

**PULSE, SUP'ERIOR**, *Pulsus Superior*, (F.) *Pouls supérieur*. A critical pulse, supervening on irritation of organs situate above the diaphragm.

**PULSE, SUP'PLE**, *Pulsus elasticus*, (F.) *Pouls souple*. One in which the pulsations have strength without hardness.

**PULSE OF SWEAT**, *Pulsus Sudora'lis*, (F.) *Pouls*

*Sudoral*, *P. de la sueur*. A critical pulse, indicating an approaching perspiration.

PULSE, TENSE, *P. Cordy*, *Pulsus tensus*, (F.) *Pouls tendu*, *P. roide*. One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry*.

PULSE, TREADY, *P. filiform*.

PULSE, TREM'ULOUS, *Pulsus tremulus*, (F.) *Pouls tremblant*, *P. palpitant*. One in which each pulsation oscillates.

PULSE, UN'DULATING, *Pulsus fluctuosus*, *P. fluens*, *P. in'cidens Sold'ni*, (F.) *Pouls ondulant*, *P. ondoyant*. One which resembles, in its movements, those of the waves.

PULSE, UNE'QUAL, *Pulsus inæqualis*, (F.) *Pouls inégal*. One whose pulsations are not alike, or return at unequal intervals.

PULSE, U'RINAL, *Pulsus urinalis*, (F.) *Pouls de l'Urine*. A critical pulse, fancied to denote an approaching evacuation of urine.

PULSE, U'TERINE, *Pulsus uterinus*, (F.) *Pouls Utérine*, *P. de la Matrice*, *P. des Règles*. One which indicates the flow of the menses, or the occurrence of metrorrhagia.

PULSE, VENOUS, *Pulsus venarum*.

PULSE, VERMIC'ULAR. That which imitates the movement of a worm.

PULSE, VI'BRATING, *Jarring Pulse*. One in which the artery seems to vibrate like a musical string.

PULSE, WIRY, see *Pulse, tense*.

PULSELESS, *Asphyctos*, Devoid of pulsation.

PULSELESSNESS, *Asphyxia*.

PULSEIF'IC, *Pulsif'icus*; from *pulsus*, 'pulse.' That which causes or excites pulsation.

PULSILE'GIUM, *Pulsilo'gium*, *Pulsim'eter*, from *pulsus*, 'the pulse,' and *lego*, 'I tell.' *Sphygmom'eter*, *Sphygmoscop'ium*. Any instrument for measuring the quickness or force of the pulse.

PULSIMANTI'A; from *pulsus* and *μαντεία*, 'divination.' The art of predicting or prognosticating by the pulse.

PULSIMETER, *Pulsilegium*.

PULSUS, *Pulse*—*p. Acriticus*, *Pulse of irritation*—*p. Æqualis*, *Pulse, equal*—*p. Annuens* et *circumnens*, *Pulse, deficient*—*p. Anormalis*, *Pulse, irregular*—*p. Biorotus*, *Pulse, dierotic*—*p. Biferiens*, *P. dierotic*—*p. Caprizans*, *Pulse, caprizant*—*p. Crassus*, *Pulse, large*—*p. Debilis*, *Pulse, feeble*—*p. Deficiens*, *Pulse, deficient*—*p. Dierotus*, *Pulse, dierotic*—*p. Doreadissans*, *Pulse, caprizant*—*p. Durus*, *Pulse, hard*—*p. Elasticus*, *Pulse, supple*—*p. Fluetuosus*, *Pulse, undulating*—*p. Fluens*, *Pulse, undulating*—*p. Formicans*, *Formicant*, and *Pulse, formicant*—*p. Fortis*, *Pulse, strong*—*p. Fusalis*, *Pulse, caprizant*—*p. Gazellans*, *Pulse, caprizant*—*p. Heterochronicus*, see *Heterochronicus*—*p. Humilis*, *Pulse, Low*—*p. Incidens Solani*, *Pulse, undulating*—*p. Intercidens*, *Pulse, intercurrent*—*p. Mallearis*, *Pulse, dierotic*—*p. Intercisus*, *Pulse, dierotic*—*p. Intercurrens*, *Pulse, intercurrent*—*p. Intestinalis*, *Pulse, dierotic*—*p. Intricatus*, *Pulse, intricate*—*p. Magnus*, *Pulse, large*—*p. Mollis*, *Pulse, soft*.

PULSUS MY'RUS, *Pulse, decurtate*; *P. sharp-tailed*, (F.) *Pouls myure*. One which goes on diminishing. See *Myurus*.

PULSUS NERVINUS, *Pulse of irritation*—*p. Normalis*, *Pulse, regular*—*p. Parvus*, *Pulse, small*—*p. Plenus*, *Pulse, full*—*p. Rarus*, *Pulse, slow*.

PUL'SUS SERRI'NUS, (F.) *Pouls serrin*, *P. serratile*. One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

PULSUS STRIATUS, (F.) *Pouls étroit*. One that strikes the finger to a small extent in breadth.

PULSUS SUDORALIS, *Pulse of sweat*—*p. Tardus*,

*Pulse, slow*—*p. Urinalis*, *Pulse, urinal*—*p. Uterinus*, *Pulse, uterine*.

PULSUS VAC'UUS, (F.) *Pouls vide*. One which gives the idea of emptiness of the artery.

PULSUS VENA'RUM, *Venous Pulse*, *Phlebop'alia*.

A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle, and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

PULTATIO, *Atheroma*.

PULTICE, *Cataplasm*.

PULTICULA, *Bonillie*.

PULVERES EFFERVESCENTES, *Powders, soda*.

PULVERIZ'ABLE, *Pul'verable*. Capable of being reduced to powder.

PULVERIZA'TION, *Pulverisa'tio*, *Pulvera'tio*, (F.) *Pulvérisation*, from *pulvis*, 'dust,' *Coni-osto'sis*. The operation of dividing substances, so as to reduce them to powder.

Most drugs are reduced to powder by persons who make it a special business, and who are called *drug-grinders*. This is done on a large scale in *drug mills*; and the implements used are the *grinding mill* and the *stamping mill*. In the shop of the apothecary, pulverization is effected by the *pestle and mortar*, and the *sieve*.

Where substances require the addition of other bodies to facilitate their reduction to powder,—as where camphor needs a few drops of alcohol—the process is called *pulverization by mediation*.

PULVILLUS, *Pad*, *Bourdonnet*—*p. e Linamentis confectus*, *Bourdonnet*—*p. Rotundus*, *Bourdonnet*.

PULVIN'AR, *Pulvinarium*. A pillow.

PULVINAR HUMULI, see *Humulus lupulus*.

PULVINAR MEDICA'TUM seu MEDICINA'LE, *Sacculus medicinalis*. A medicated pillow; as of hops.

PULVINAR PARVUM, *Pad*—*p. Ventriculi*, *Pancreas*.

PULVINULUS, *Pad*.

PULVIS, *Conis*, (F.) *Poudre*. A substance, reduced into small particles by pulverization. *Simple powders* are those of a single substance; *compound*, those which result from a mixture of several different powders. An *impalpable powder* is one which is so fine that it can scarcely be felt under the finger. A *compound powder* was, formerly, called *Spe'cies*, (F.) *Espèce*.

PULVIS ABSORBENS, *P. de magnesiâ compos.*—*p. Adspersorius*, *Cataplasma*—*p. Alexiterius*, *P. contrayervæ comp.*—*p. Alexiterius*, *P. ipecacuanhæ compositus*—*p. Algarothi*, *Algaroth*.

PULVIS ALOES COMPOS'ITUS, *Compound powder of Aloes*, *Pulvis Aloës cum Guai'aco*, *P. aloëticus cum Guai'aco*. (*Aloës spicat. ext. ℥iiss, guaiac. gum. res. ℥j, pulv. cinnam. comp. ℥ss*. Rub the aloes and guaiacum separately, then mix the whole. *Ph. L.*) Cathartic, stomachic, and sudorific. Dose, gr. x to ℥j.

PULVIS ALOES CUM CANEL'LA, *Pulvis aloës et canellæ*, (*Ph. U. S.*) *Powder of Aloes with Canella*, *Species Hi'eræ pieræ, Hiera piera, Pulvis Aloët'icæ*. (*Aloës ℔j, canell. ℥iij*. Rub separately into a powder, and mix. *Ph. U. S.*) A warm cathartic. Dose, gr. x to ℥j.

PULVIS ALOES CUM GUA'IAO, *P. A. compositus*—*p. Aloeticus*, *P. aloes cum canellâ*—*p. Aloeticus, Hiera piera*—*p. Aluminosus*, *P. sulphatis aluminæ compositus*—*p. Aluminis compositus*, *P. sulphatis aluminæ compositus*—*p. Aluminis kinosatus*, see *P. sulphatis aluminæ compositus*.

PULVIS DE AMA'RIS COMPOS'ITUS, *Pulvis anti-arthritis amarus*, (F.) *Poudre antiarthritique*

*amère.* (*Rad. gentian., aristoloch. rotund.,* ã p. 3, *flor. centaur. min. p. 4, fol. chamædr., chamæpitiâ,* manipul.—f. pulvis, *Ph. P.*) In gouty affections, dyspepsia, &c. Dose, gr. xx.

**PULVIS ANGELICUS,** Algaroth—p. Anodynus, P. ipeacuanhæ comp.—p. Antiacidus, P. cretæ compositus—p. Antiacidus, P. de magnesiâ compos.—p. Antiarthriticus amarus, P. de amaris compositus—p. Antiarthriticus purgans, P. de sennâ, scammonæ et lignis—p. Antiasthmaticus, P. de sulphure et scillâ.

**PULVIS ANTILYS'SUS,** *Mead's Powder against the bite of a mad dog.* It consisted of ash-coloured *Everwort* in powder, with an equal quantity of *black pepper*; a drachm and a half of the two forming a dose for an adult.

**PULVIS ANTIMONIALIS,** Antimonial powder.

**PULVIS DE ARO COMPOSITUS,** *Compound Powder of Arum,* (F.) *Poudre de Birkmann,* (*Rad. ari, acori veri, pimpinell. saxifrag. ãã 40 p. ocul. cancer. ppt. 12 p., cinnam. 7 p., potassæ sulph. 6 p., ammoniæ mariat. 2 p.*—f. pulv. *Ph. P.*) Sternutatory.

**PULVIS AROMATICUS,** P. cinnamomi compositus.

**PULVIS ASARI COMPOSITUS,** P. sternutato'rius, P. errh'nis, P. capit'is Sancti An'geli, P. cephal'icus, Cephalic snuff; *Compound powder of Asarabac'ca,* (F.) *Poudre d'asarum composée dite sternutatoire, P. de Saint-Ange.* (*Folior. asar. Europ. p. tres., fol. origan. majoranæ, flor. larand. spic., sing. p. l.* Rub into powder. *Ph. L.*) Sternutatory.

**PULVIS AURI,** see Gold—p. e. Bolo compositus cum opio, P. cretæ compositus cum opio—p. e. Bolo compositus sine opio, see P. cretæ compositus—p. Cambogiæ compositus, P. e. gummi guttâ—p. Capitalis Sancti Angeli, Pulvis asari compositus—p. Carbonatis calcis compositus, P. cretæ compositus—p. Cardiacus, P. contrayervæ comp.—p. Carthusianorum, Antimonii sulphuretum rubrum—p. Catharticus, P. scammonæ comp.—p. Cephalicus, P. asari compositus.

**PULVIS CINNAMOMI COMPOSITUS,** *Compound Powder of Cin'namon,* Pulvis seu *Species Imperato'ris, P. vitæ Imperato'ris, P. Diaro'maton, Species diacinnamomi, S. latifoliantes Rhazis, Tra'gea aromati'ca, Species Diam'bræ sine odorati'is, Species aromati'cæ, Pulvis aromaticus* (Ph. U. S.), *Aromatic powder,* (F.) *Poudre de canelle composée ou aromatique.* (*Cinnam., zingib. ãã 3ij, cardam., myrist. ãã 3j.* Rub to a fine powder. *Ph. U. S.*) Stimulant and carminative. Dose, gr. x to ʒj.

**PULVIS COBBI** seu **TUNQUINENSIS.** The famous Tonquin powder, introduced into England by a Mr. Cobb. It was composed of 16 grains of *musk*, and 48 grains of *cinnabar*; and was mixed in a gill of *arrack*. It was formerly regarded as a specific in hydrophobia.

**PULVIS COMITIS WARWICENSIS,** P. Cornachini—p. Comitissæ, Cinchona.

**PULVIS CONTRAYERVÆ COMPOSITUS,** *Lapis contrayervæ, Contrayeræ balls, Compound Powder of Contrayer'væ, Pulvis card'æus, P. alexic'rius, P. Mantua'nis.* (*Contrayer. rad. contrit. 3v, test. præp. Biss. Mix. Ph. L.*) Stimulant and astringent. Dose, gr. xv to ʒss.

**PULVIS CORNACHI'NI,** *Diaceltates' son Paracelsi, Earl of Warwick's Powder, Pulvis Oz'ydi Stil'ii compos'itus, Pulvis Comit'is Warwicensis, Pulvis de Tribus, Cer'berus Triceps, Pulvis Scammonii antimonii'lis,* (F.) *Poudre Cornachine.* (*Scammon. Alep. potass. supertart., antim. diaph. ãã p. æ. f. pulvis. Ph. P.*) Cathartic. Used chiefly in cutaneous diseases. Dose, ʒss to ʒi.

**PULVIS CORNU USTI CUM OPIO,** *Pulvis opiat'us, Powder of Burnt Hartshorn with opium,* (F.) *Poudre de corne brûlée avec l'opium.* (*Opii duri*

cont. ʒj, *corn. ust. præp. 3j, coccor. cont. 3j. Mix. Ph. L.*) Ten grains contain one of opium. Anodyne.

**PULVIS CRETACEUS,** P. cretæ compositus.

**PULVIS CRETÆ COMPOSITUS,** P. *Carbonatis Calcis compositus, Compound Powder of chalk, P. cret'æus, Species e Scorpio sine opio, Diacori'dium, Pulvis antic'idus, P. terrest'ris, Species Diacre'tæ,* (with Bole Armeniac in place of chalk—the *Pulvis e Bolo compositus sine opio,*) (F.) *Poudre de craie composée.* (*Cretæ ppt. Biss, cinnam. cort. 3iv, tormentill. rad., acacia gum., sing 3iij, pip. long. fruct. 3iv.* Reduce separately to a fine powder, and mix. *Ph. L.*) Antacid, stomachic, absorbent. Dose, gr. xx to ʒij.

**PULVIS CRETÆ COMPOSITUS CUM OPIO,** *Compound Powder of Chalk with opium, Pulvis e Cretâ compositus cum opio* (with Bole Armeniac instead of chalk—*Pulvis e Bolo compositus cum opio,*) *Species e Scordio cum opio,* (F.) *Poudre de craie composée avec l'opium.* (*Pulv. cret. c. 3vjss, opii duri cont. ʒiv. Mix. Ph. L.*) Contains one grain of opium in 40. Anodyne and absorbent. Dose, ʒj to ʒij.

**PULVIS DIAPHORETICUS,** P. ipeacuanhæ comp.—p. Diapnoicus, P. ipeacuanhæ comp.—p. Diaromaton, P. cinnamomi compositus—p. Diascenæ P. sennæ compos.—p. Diaturpethi compositus, P. jalapæ compositus.

**PULVIS DUCIS PORTLANDIÆ,** *Duke of Portland's Gout Powder.* (*Rad. aristoloch., gentianæ, summit. chamædr., centaur. min. ãã p. æ.*) Dose, ʒss to ʒj.

**PULVIS EMMENAGOGUS,** P. myrrhæ compositus—p. Epilepticus Marchionum, P. de magnesiâ compositus—p. Errhinus, P. asari compositus—p. Galactopæus, P. de magnesiâ compos.

**PULVIS E GUMMI GUTTÂ,** P. *Cambo'giæ compositus, P. hydragogus, Camboge Powder,* (F.) *Poudre hydragogue ou de gomme gutte, P. de Querceta'nis.* (*Rad. jalap. 24 p., rad. mechoacan. 12 p., cinnam., rhei. ãã 8 p., gum. cambog. 3. p., fol. soldanellæ sicc. 6 p., semin. anisi 12 p., fiat pulvis. Ph. P.*) A drastic cathartic. In anasarca and in worms. Dose, gr. xv to xxx.

**PULVIS GUMMOSUS ALKALINUS,** *Sapo vegetabilis,* (F.) *Poudre de savon végétal.* (*Guaiac. pulv. 32. p., potass. carb. 4 p.* Make into a powder. *Ph. P.*) Antacid.

**PULVIS EX HELMINTHOCORTO COMPOSITUS,** P. *vermif'ugus absque mercurio,* (F.) *Poudre vermifuge sans mercure.* (*Fuc. helminthocort., sem. contra., summitat. abynth., tanacet. fol. scordii, sennæ, rhei. ãã p. æ, fiat pulvis. Ph. P.*) Dose, ʒj to ʒj.

**PULVIS HYDRAGOGUS,** P. e gummi guttâ—p. Hydrargyri cinereus, see Hydrargyri oxydum cinereum—p. Hypnoticus, Hydrargyri sulphuretum nigrum—p. Imperatoris, P. cinnamomi compositus—p. Incisivus, P. de sulphure et scillâ—p. Pro infantibus, P. de magnesiâ compos.—p. Infantum, P. de magnesiâ compos.—p. Infantum antacidus, P. de magnesiâ compositus.

**PULVIS IPEACUANHÆ COMPOSITUS,** P. alexic'rius, P. anodynus, P. diaphoreticus, P. diapnoicus, P. sudorif'icus Doveri, *Compound powder of Ipeacuanhæ, P. Ipeacuanhæ et Opii* (Ph. U. S.), *Dover's Powder,* (F.) *Poudre de Dover ou d'ipeacuanha et d'opium, P. de Dover.* (*Ipeacuanh. pulv., opii pulv., sing ʒj, potassæ sulphat. ʒj. Mix.*) Diaphoretic. Dose, gr. v to gr. xij.

**PULVIS IPEACUANHÆ ET OPII,** P. ipeacuanhæ compos.

**PULVIS JALAPÆ COMPOSITUS,** P. Diaturpethi compositus, *Compound powder of Jalap, Pulvis laxans, P. Purgans, P. laxativus vegetabilis, P. laxans cum salte, P. Julap'æ kali'nis, P. j. tartar'icus, Species Diajalapæ,* (F.) *Poudre de jalap*

*composée.* (Pulv. jalap. ʒij, potass. bitart. ʒij. Mix.) Cathartic. Dose, ʒj to ʒij.

PULVIS JALAPÆ SALINUS, P. jalapæ compositus—p. Jalapæ tartaricus, P. jalapæ compositus—p. de Jalapâ et scammonio compositus, P. scammonæ comp.—p. Jamesii, Antimonial powder—p. Jesuiticus, Cinchona—p. Joannis de Vigo, Hydrargyri nitrico-oxydum.

PULVIS KINO COMPOSITUS, *Compound Powder of kino*, (F.) *Poudre de kino composée.* (Kino ʒxv, cort. cinnam. ʒiv, opi duri ʒj. Rub each to powder, and mix. Ph. L.) Astringent. Dose, gr. v to xx.

PULVIS LAXANS, P. jalapæ compositus—p. Laxans cum sale, P. jalapæ compositus—p. Laxativus vegetabilis, P. jalapæ compositus.

PULVIS DE MAGNE'SIÆ COMPOSITUS, *P. Galactopœus*, *P. Nutri'cum*, *P. Infantum*, *P. Infantum antic'idus*, *P. pro Infantibus*, *P. antic'idus*, *P. absorbens*, *P. epilepticus Marchionum*, *Compound powder of Magnesia*, (F.) *Poudre absorbante et anti-acide.* (Magnesiæ, sacchar. aa ʒ. æ. Mix. Ph. P.)

PULVIS MANTUANUS, P. contrayervæ comp.—p. Marchionis, Marchionis Pulvis—p. Mercurialis cinereus, Hydrargyri oxidum cinereum—p. ad Mucum pulmonalem liberius ciendum, P. de sulphure et scillâ.

PULVIS MYRRHÆ COMPOSITUS, *P. e Myrrhâ compositus*, *Compound Myrrh Powder*, *Pulvis ad ul'cera tend'inum*, *P. Emmenago'gus*, (F.) *Poudre Balsamique.* (Myrrhæ, sabinæ, rutæ, castor. Russ. aa ʒj.) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to xl.

PULVIS NUTRITUM, P. de magnesiâ compositus—p. Opiatus, P. cornu uesti cum opio—p. Oxydi stibii compositus, P. cornachini—p. Parturiens, Ergot—p. de Phosphate calcis et stibii compositus, Antimonial powder—p. Principis, Hydrargyri nitrico-oxydum—p. Purgans, P. jalapæ compositus—p. Quercetanus, Hydrargyri submurias.

PULVIS QUERCUS MARI'NÆ, *Powder of Yellow Bladder-Wrack.* (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible, with a perforated lid, and then reduced to powder. Ph. D.) Virtues dependent on iodine: used, consequently, in bronchocele, &c. Dose, gr. x to xl. See *Fucus vesiculosus*.

PULVIS SCAMMO'NÆ COMPOSITUS, *Compound Powder of Scammony*, *Pulvis e Scammonio compositus*, *Pulvis Scammonii*, *Pulvis de Jalapâ et Scammonio compositus dictus Catharticus*, (F.) *Poudre cathartique ou Poudre de Scammonée composée.* (Scammon., ext. jalap. drr., sing., ʒij, zingib. rad. ʒss. Rub separately to powder and mix. Ph. L.) Cathartic. Dose, gr. viij to gr. xv.

PULVIS SCAMMO'NII CUM ALOË, *P. e Scammonio cum Aloë*, *Scammony and Aloes Powder.* (Scammon. ʒvj, ext. jalap. drr., aloës Socotr. aa ʒiss, zing. ʒss.) Cathartic. Dose, gr. x to xv.

PULVIS SCAMMONII ANTIMONIALIS, P. cornachini.

PULVIS SENNÆ COMPOSITUS, *Compound powder of Senna*, *Pulvis e Senâ compositus*, *P. e Sennâ compositus*, *Pulvis Diase'næ*, (F.) *Poudre de séné composée.* (Sennæ folior., potass. supertart. sing. ʒij, scammon. ʒss, rad. zingib. ʒij. Ph. L.) Cathartic, hydragogue. Dose, ʒj to ʒj.

PULVIS DE SENNÂ, SCAMMO'NIO ET LIGNIS COMPOSITUS *dictus ANTIARTHRITICUS PURGANS*, (F.) *Poudre de Pérad.* (Gum Arab., potass. supertart., fol. sennæ, chinæ, aa 4 p., scammon., rad. sarsapar., chinæ, quaiac. lign. aa 2 p., fiat pulvis. Ph. P.) Purgative. Used to obviate gout. Dose, ʒj.

PULVIS STANNI, see Tin—p. Sternutatorius, P. asari compositus—p. Stibiatus, Antimonial pow-

der—p. Stypticus, P. Sulphatis aluminæ compositus—p. Sudorificus, P. ipeacacuanhæ comp.—p. Sudorificus Doveri, P. Ipeacacuanhæ compositus.

PULVIS SULPHA'TIS ALU'MINÆ COMPOS'ITUS, *P. aluminosus*, *P. aluminis kinosotus*, *Pulvis stypticus*, *Pulvis aluminis compositus*, *Alumen kinosotum*, *Compound Alum Powder*, (F.) *Poudre styptique ou d'alun composée.* (Sulphatis aluminæ, p. iv, kino, p. l. Ph. E.) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

PULVIS DE SUL'PHURË ET SCILLÂ, *P. Antiasthmaticus*, *P. Incis'icus*, *P. ad mucum pulmonalem liberius cien'dum*, (F.) *Poudre incisive ou anti-asthmaticque.* (Sacchar. alb. p. ʒ, sulphur. lot. p. 2, scillæ. siccata. p. j. Ph. P.) Dose, gr. v to ʒss.

PULVIS DE SULPHA'TË POTASS'Æ COMPOS'ITUS, *P. temperans Stahl'ii*, (F.) *Poudre tempérante de Stahl.* (Potass. sulph., P. nitrat. aa 9 p., hydrarg. sulph. rubr. 2 p. Mix. Ph. P.) As an antiphlogistic, and in acidity of the first passages. Dose, ʒj to ʒij.

PULVIS E SULPHURE'TO HYDRAR'GYRI NIGRO ET SCAMMO'NIO, *dictus VERMIFUGUS MERCURIALIS*, (F.) *Poudre vermifuge mercurielle.* (Pulv. cornachin., hydrarg. sulphuret. nigr. recent. præp., aa p. æ. Mix. Ph. P.) Dose, ʒj to ʒss.

PULVIS SYMPHATICUS, Sympathetic powder—p. Temperans Stablii, P. de sulphate potassæ compositus—p. Terrestris, P. cretæ compositus.

PULVIS TRAGACANTHÆ COMPOSITUS, *Species Diatragacanthæ frig'idæ*, *Pulvis e Tragacanthâ compositus*, *Compound Powder of Tragacanth*, (F.) *Poudre de gomme adragant composée.* (Tragacanth. contus., acaciæ gummi cont., amyli, sing. ʒiss, sacch. purif. ʒij. Ph. L.) Demulcent. In coughs, &c. Dose, ʒss to ʒij.

PULVIS DE TRIBUS, P. cornachini—p. Tunquienensis, P. Cobbii—p. ad Ulcera tendinum, P. myrrhæ compositus—p. Vermifugus absque mercurio, Pulvis ex helminthocorto comp.—p. Vermifugus mercurialis, P. e sulphureto hydrargyri nigro et scammonio—p. Vitæ Imperatoris, P. cinnamomi compositus.

PUMEX, *Lapis pu'vicis*, *Pumice*, (F.) *Pierre Ponce.* This was formerly employed as a desiccative and dentifrice.

PUMICE, Pumex.

PUMILIO, Nanus.

PUMILUS, see Nanus.

PUMP, BREAST, Antlia lactea—p. Stomach, Antlia gastrica.

PUNA, Veta, Sorocco, Soroche, Mareo, (S.) A sickness common in the elevated districts of South America and elsewhere, which attacks those unaccustomed to breathe the rarefied atmosphere. It strongly resembles sea-sickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration considerably.

PUNAISE, Cimex.

PUNAISIE, Ozæna.

PUNCH, *Rhi'zagra*, from *pungere*, 'to prick.' *Repulso'rium*, (F.) *Repoussoir.* A surgical instrument used for extracting the stumps of teeth. See Lever.

Also, an agreeable alcoholic drink, made of spirit, wine, sugar, lemon-juice, and water. Milk is sometimes substituted in part for the water: it then forms *Milk Punch*.

PUNCTA OSSIFICATIONIS, Ossification, points of.

PUNCTÆ MUCOSÆ, see Acne.

PUNCTICULA, Pectchie.

PUNCTIO, Paracentesis, Puncture—p. Nervi, Neuronygue.

## PUNCTUM, Stitch.

PUNCTUM AUREUM, *Punctura aurea*. Formerly, when an intestinal hernia was reduced by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of any thing down the tunica vaginalis. Hence the term.

PUNCTUM SALIENS, *P. sanguin'cum saliens*, *Globulus sanguin'eus*, *Punctus ruber saliens*. The first moving point which makes its appearance after the fecundation of the germ. It has been generally, but erroneously, applied to the heart of the embryo.

PUNCTURA, Paracentesis — p. Aurea, Punctum aureum.

PUNCTURE, *Punctura*, *Punctio*, *Cente'sis*, *Paracente'sis*, *Nyxis*, from *pungere*, 'to prick;' *Tresis Punctura*, (F.) *Piqure*. A wound made by a pointed instrument, as a sword, bayonet, needle, thorn, &c. A puncture is, generally, of trifling consequence; but, sometimes, it becomes important from the parts implicated, and the after consequences.

PUNCTURING. Same etymon. *Compunctio*, *Paracente'sis*, (F.) *Ponction*. The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity, with the view of evacuating any fluid, effused or accumulated therein. *Paracente'sis* is a sort of puncturing.

PUNCTUS RUBER SALIENS, Punctum saliens.

PUNGENT, (F.) *Pongitif*. Pain is said to be pungent, when it seems as if a pointed instrument were forced into the suffering part.

PUNICA GRANA'TUM. The Pomegranate, *Rhoa*, *Rhea*, *Grana'tum*, *Malogrand'tum*, (F.) *Grenadier*: *Family*, Myrtoideæ. *Ser. Syst.* Icosandria Monogynia. The rind of the fruit, called *Malichorinum*, *Malacorium*, or *Malicorium*; and the flowers—called *Balaustine flowers*—are used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Cocco'nes*, *κοκκωνες*. The portion, however, of the plant, that has attained most celebrity, is the bark of the root, *Grana'ti Radicis Cortex*, which appears to be very efficacious in tænia. It is given in decoction, (*Grana't. rad. ext.* ʒij; *Aqua' Oij*, boiled to Oiss.) Dose, fʒij, every half hour. Three or four doses are usually sufficient to expel the worm.

The bark contains a peculiar matter called *Grenadin*.

PUNK, *Boletus igniarius*.

PUOGENIA, *Pyogenia*.

PUPIL, *Pupilla*, *Pu'pula*, *Pupill'io*, *Vis'io*, *Ops'is*, *Corè*, *Cora*, *Rhor*, *Fenes'tra* seu *Nigrum* seu *Fora'men Oculi*, *Prunella*, *Lumen*; *Gleuè*, *Sight of the eye*, (F.) *Pupille*, *Pruncelle*. The aperture of the iris, through which the rays of light pass that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fœtus, during the first six months of gestation, it is closed by the pupillary membrane.

PUPIL, CLOSURE OF THE, *Synezisis*.

PUPIL, PINHOLE. A condition of the pupil in typhus, in which it is so contracted as to resemble a pinhole. It indicates a dangerous form of brain affection.

PUPILLÆ VELUM, Pupillary membrane.

PUPILLARIS HERBA, *Lapsana*.

PUPILLARY, *Pupilla'ris*. That which belongs to the pupil.

PUPILLARY MEMBRANE, *Membrana Pupilla'ris*, *Pupill'æ velum*, *Membra'na Wachendorfin'na*. The central aperture of the iris is closed, in the fœtus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

PUPPET ROOT, *Veratrum viride*.

PUPPIS OS, Frontal bone.

PUPULA, Pupil.

PUPULÆ, *A'pices digitorum*. The pulps or extremities of the fingers.

PURBLIND, Myopic.

PURBLINDNESS, Myopia.

PURGAMENT, Purgative.

PURGAMENTA, Excrement — p. Alba, Leucorrhœa—p. Infantis, Meconium — p. Puerperii, Lochia—p. Uteri, Lochia.

PURGANS MEDICAMENTUM, Cathartic.

PURGATIO, Catharsis — p. Alvi, Catharsis—p. Muliebris alba, Leucorrhœa — p. Puerperii, Lochia.

PURGATION, Catharsis.

PURGATIONES, Menses — p. Menstruæ, Menses.

PURGATIONS, Menses.

PUR'GATIVE, *Purgat'ivus*, *Purgans*, *Moch'licus*, *Catoret'icus*, *Catoret'icus*, *Cathart'ic*, *Pur'gament*, *Purge*, (F.) *Purgatif*, from *purgare*, 'to cleanse. A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular coat, and exciting increased secretion from the mucous coat.

PURGE, Purgative—p. Root, *Euphorbia corollata*.

PURGING, Diarrhœa.

PURIFICANS, *Purif'ic'us*, from *purificare*, 'to make pure or clean.' Purifying: hence:—

PURIFICANTIA; Medicines that cleanse or purify the blood.

PURIFICUS, Purificans.

PURIFORM, *Puriform'is*; from *pus*, and *forma*. Having the appearance of pus.

PURL. A medicated malt liquor, in which wormwood and aromatics are infused.

PURO-HEPATITIS, see Hepatitis.

PURO-MUCOUS, *Puro-muc'ous*, from *pus*, *puris*, and *mucus*. Having the character or appearance of pus and mucus.

PURPLES, *Purpura hæmorrhagica*.

PURPURA, *Por'phyra*, 'a purple colour.' This word has been employed in many senses. It generally means, livid spots on the skin from extravasated blood, with languor and loss of muscular strength, pains in the limbs.—(F.) *Pourpre*.

In PURPURA SIMPLEX, *Porphyra simplex*, *Petechia sine febrè*, *Pelios'is*, *Phenigmus Petechial'is*, *Profus'io subcutanea*, *Pete'chial Scurry*, the spots are numerous, but small and flea-bite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance. At times, the affection is accompanied by severe pains in the extremities, constituting *Pelios'is rheumat'ica*.

In PURPURA HÆMORRHAG'ICA, *Porphyra hæmorrhagica*, *Stomac'ace universalis*, *Hæmorrhagia univ'ersalis*, *Petechiano'is*, *Morbus maculosus hæmorrhag'icus Werthof'ii*, *Pelios'is hæmorrhag'ica*, *Scorb'utus*, *Schorbutus*, *Hæmorrh'ia petechial'is*, *Hæmatospill'ia*, *Laud Scurry*, *Purples*, (F.) *Scorb'ut*, *S. de Torre*, *Muladie de Werthof*, *Hæmacelinose*, *Peliose hæmorrhagique*—the spots are circular, and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In PURPURA NAUTICA, *Porphyra nautica*, *Scorb'utus*, *Pechtyrbè*, *Gingibra'ckium*, *Giugipe'*.

*dium*, *Scelotyr'bē*, *Stomac'acē*, *Scorbutus nau'ticus* or *Sea scurvy*, (F.) *Scorbut*, there are spots of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme. This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of one kind of food and of stagnant water.

All these varieties of purpura resemble each other considerably. In the first two, however, there seems, at times, to be some excitement, which has led to the employment of purgatives, and even of bleeding, with advantage. They are dependent upon a peculiar diathesis, which has been termed *Scorbutic Cachex'ia*, *Lines Scorbutica*, and *Cocochym'ia Scorbutica*. Generally speaking, the use of the mineral acids will be indicated; and, in sea scurvy, vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be united with Peruvian bark or turpentine. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedy is change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry climate, with change of food, and especially the use of green vegetables.

The general principles of management are the same in sea, as in land scurvy.

PURPURA, Scarlatina—p. Alba benigna et maligna, Miliary fever—p. Maligna, Petechiæ—p. Miliaris, Miliary fever—p. Puerperarum, Miliary fever—p. Urticata, Urticaria.

PURPURIC URINE, see Porphyria.

PURPURINE, see Porphyria.

PURPURISSUM, Hydrargyri sulphuretum rubrum.

PURRING TREMOR, *Frémissement cataire*.

PURSE, Scrotum—p. Shepherd's, Thlaspi bursa.

PUR'SINESS, *Dyspnœa pinguedino'sa*, (F.) *Pousse*. Dyspnœa accompanied with oppressive fatness. The word is, also, applied to dyspnœa of every kind. One so affected is said to be *pursy* or *short-winded*.

PURSLAIN, Portulaca—p. Milk, Euphorbia corollata—p. Speedwell, Veronica peregrina—p. Water, Veronica beccabunga.

PURSY, see Pursiness.

PURULENCE, Pus, Suppuration.

PURULENCY, Pus, Suppuration.

PURULENT, *Purulentus*, *Em'pyos*, *Pyo'des*, *Py'zeus*. That which has the character of pus or consists of pus; as *purulent matter*, a *purulent collection*, &c.

PURULENT DEPOSIT, Pus.

PURULENTIA, Suppuration.

PURVAIN, Verberna officinalis.

PUS, *Humor purulentus*, *Pyon*, *Pyono'ma*, *Matter*, *Pu'rlent depos'it*, *Pu'rlence*, *Pu'rlency*. A secretion from inflamed textures, and especially from the areolar membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality,—*laudable pus*, *Pus bonum seu laudab'ilē* seu *nriti'rum seu verum*, (F.) *Pus laudable*,—is of a yellowish-white colour, opaque, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts. Normal pus consists essentially of two distinct parts, *pus corpuscles* or *pus globules*, and a colourless, aqueous fluid, *Liquor puris*, in which the corpuscles are suspended. A variety

of the pus corpuscles is described by M. Lebert under the name *pyo'it*.

PUS BONUM, see Pus—p. Corpuscles, see Pus—p. Corrosivum, Sanies—p. Globules, see Pus—p. Laudabile, see Pus—p. Lovable, see Pus—p. Malignum, Ichor—p. Malignum, Sanies—p. Nutritivum, see Pus—p. Verum, see Pus.

PUSILLA'TUM, *Pusilla'tum*, from *pusillus*, 'small.' A coarse powder.

PUSILLUS, Nanus.

PUSTULA, Pustule—p. Ardens, Eczema—p. Oris, Aphthæ—p. Gangrenosa, see Anthrax—p. Livida Esthonia, see Anthrax.

PUSTULÆ STICÆ, Lichen.

PUSTULAR, *Pustulous*, *Pustula'ris*, *Pustulo'sus*. Of or belonging to pustules. Affected with pustules.

PUSTULATION, *Pustula'tio*, from *pustula*, 'a pustule.' The formation of pustules.

PUSTULE, *Pus'tula*, from *pus*. *Ecypse'is*, *Ethy'ma*, *Beath*, *Bubē*, *Epanas'tosis*. An elevation of the cuticle, with an inflamed base, containing pus. Willan and Bateman reckon four varieties of pustules: *Phlyza'cium*, *Psydra'cium*, *Achor*, and *Favus*. The variolous pustule is often called, by the French, *Grain*; by us, *Pock*.

PUSTULE MALIGNÆ, see Anthrax.

PUSTULOUS, Pustular.

PUSULATUM, Pusillatum.

PUTIUM, Prepuce.

PUTREDO, Hospital Gangrene, Putrefaction.

PUTREFACT'ION, *Putrefact'io*, *Putrescent'ia*, *Sepsis*, *Sap'rotēs*, *Putrid fermentation*, *Putrefactive fermentation*, from *putris*, *putre*, 'rotten,' and *facere*, 'to make.' A decomposition, experienced by animal substances, when deprived of life, and placed under particular circumstances. The presence of water is indispensable. The temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are, water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized, and has an infected odour. It has been supposed that something like putrefaction may occur in the living body, as in case of putrid fever. To this condition, Piorry has given the name *Typho'hœ'mia*, conceiving it to be owing to alteration of the blood by putrid animal matters. *Putrefaction* signifies the state of becoming putrid: whilst *Putridity*, *Putredo*, *Putrid'itas*, *Putridness*, (F.) *Pou'riture*, is the state of rottenness.

PUTRESCENT, Hyposaprus—p. Poison, see Poison.

PUTRESCENTIA, Putrefaction—p. Uteri gravidi, Hystero-malacia.

PUTRID, *Pu'tridus*, *Sapros*, (F.) *Putride*, from *putrere*, 'to rot.' An epithet for some affections, in which the matters excreted and the transpiration itself exhale a smell of putridity. It is particularly applied to typhus.

PUTRIDITAS, see Putrefaction.

PUTRIDITY, see Putrefaction.

PUTRILA'GO, *Putror*, (F.) *Putrilage*. Same etymon. The pulaceous matter or *slough*, which forms in certain gangrenous and other ulcers, and is thrown off.

PUTROR, Putrilage.

PUTZUCHILL, see Myroxylon Peruiferum.

PYÆMIA, Pyohæmia.

PYARTH'RUM, from *pyon*, 'pus,' and *arthron*, 'joint.' A suppurated joint.

PYCNANTHEMUM INCA'NUM, *Common Mountain Mint*, *Wild Basil*. An indigenous plant of the mint family—Labiata—which flowers in August. It has the aromatic properties of the mints.

PYCNAN'THEMUM LINIFOLIUM, *Virginia Thyme*, has like virtues.

PYCNICMASTICA, *Incrassantia*.

PYCNOSIS, *Inspissatio*.

PYCNOTICA, *Incrassantia*.

PYEC'CHYSIS, from πύον, 'pus,' and εκχέσις, 'effusion.' An effusion of pus.

PYELITIS, from πυελος, 'pelvis,' and itis, denoting inflammation. Inflammation of the pelvis and calices of the kidney.

PYELOMETER, *Pelvimeter*.

PYELONEPHRITIS, from πυελος, 'pelvis,' νεφρος, 'kidney,' and itis, denoting inflammation. Inflammation of the kidney, and of the pelvis and calices.

PYELOS, *Pelvis*.

PYEMESIS, *Pyoemesis*.

PYESIS, *Suppuration*.

PYETIA, *Colostrum*.

PYGE, *Nates*.

PYGMÆUS, *Pygmy*.

PYGMÆ, *Fist, Forearm*.

ΠΥΓΜÆΕ, *Pygmy*.

PYGMY, *Pigmy, Pygmæus*, (F.) *Pygmée*, from πυγμα, 'the fist; as big as the fist.' A dwarf. The Pygmæi were a fabulous nation of dwarfs in the extreme parts of India; or, according to others, in Ethiopia.

PYGODIDYMUS, *Didymus symphyoperinaeus*, *Pygopages*, from πυγη, 'the nates,' and δίδυμος, 'a twin.' A monstrosity, in which twins are united by the sacrum and coceyx.

PYGOPAGES, *Pygodidymus*.

PYICUS, *Purulent*.

PYLE, *Porta*.

PYLEMPHRAXIS, from πύλη, 'porta,' 'a gate,' and εμπραξις, 'obstruction.' Obstruction of the vena portæ.

PYLORIC, *Pyloricus*. Same etymon as pylorus. That which relates to the pylorus. An epithet given to different parts.

PYLORIC ARTERY, *Arteria Coronaria dextra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach, anastomosing, particularly, with the A. coronaria ventriculi and A. gastro-epiploica dextra.

PYLORIC VEIN follows the same distribution as the artery.

PYLO'RUS, *Janitor, Portonarium*, from πύλη, 'a gate,' and ουρος, 'a guardian.' *Ostium ventriculi duodena'le seu pyloricum seu dextrum seu inferius, Orificium dextrum seu inferius seu Egressus seu Os inferius seu Anulus seu Sphincter ventriculi, Ostia'rius, Hostia'rius*, (F.) *Pylorus*. The lower or right orifice of the stomach—*Orifice intestinal* (Ch.)—is called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during digestion in that organ. This ring has been called the *Valve of the Pylorus, Sphincter Pylori, Pylorus propriè sic dictus*, (F.) *Valvule du pylore*. It is a fold of the mucous and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

PYOBLENNICUS, *Mucopurulent*.

PYOBLENNORRHŒA, from πύον, 'pus,' βλεννα, 'mucus,' and ρεω, 'I flow.' A discharge of puriform mucus.

PYOCENOSIS, from πύον, 'pus,' and κενωσις, 'evacuation.' Evacuation of pus.

PYOCHEZIA, *Diarrhœa purulenta*, from πύον, 'pus,' and χεζω, 'I go to stool.' Discharge of pus by stool. *Purulent diarrhœa*.

PYOCŒLIA, *Ascites purulenta*, from πύον,

'pus, and κοιλια, 'the belly.' Pus in the abdominal cavity.

PYOCYSTIS, *Vomicæ*.

PYODES, *Purulent*.

PYŒDE'MA, from πύον, 'pus,' and οίδημα, 'swelling.' Tumefaction of the surface owing to effusion of pus.

PYŒM'ESIS, *Pyœm'esis, Vomitus purulentus*, from πύον, 'pus,' and εμεις, 'the act of vomiting.' Vomiting of pus.

PYŒGENESIS, *Pyogenia*.

PYŒGEN'IA, *Puogen'ia, Pyogen'esis, Pyogœn'esis*, from πύον, 'pus,' and γενεσις, 'generation.' Generation of pus. The theory or mechanism of the formation of pus. Some have believed that pus is formed by the arterial system, and is deposited, by way of excretion, in the inflamed parts; others, that it is formed by the destruction of solid parts. These opinions are, however, inadmissible; and pus is now regarded as mainly the product of a particular secretion in the diseased part.

PYŒGENIA CORROSIVA, *Ulceration*—p. *Simplex, Suppuration*.

PYŒGEN'IC, *Pyogen'icus*. Same etymon. Having relation to the formation of pus.

PYŒHŒMIA, *Pyœmia*, from πύον, 'pus,' and αἷμα, 'blood.' Alteration of the blood by pus.

PYOID CORPUSCLES or GLOBULES, see Pus.

PYOME'TRA, *P. purulenta*, from πύον, 'pus,' and μητρα, 'womb.' A collection of pus in the uterus.

PYOMETRA PURULENTA, *Pyometra*.

PYON, *Pus*.

PYONÉPHRITE, see Nephritis.

PYONOMA, *Pus*.

PYŒOTORRHŒA, *Otorrhœa*.

PYOPERICARDIA, *Pyopericardium*, from πύον, 'pus,' περι, 'about,' and καρδια, 'the heart.' A collection of pus in the pericardium.

PYOPHTHALMIA, *Hypopyon*—p. *Neonatorum*, see Ophthalmia (purulenta infantum).

PYOPLEURITE, *Empyema*.

PYŒŒESIS, *Pyogenia*.

PYOP'TYSIS, from πύον, 'pus,' and πτωω, 'I spit.' Spitting of pus.

PYORRHAG'IA, from πύον, 'pus,' and ραγη, 'violent rupture.' A sudden discharge of a large collection of matter.

PYORRHŒA, from πύον, 'pus,' and ρεω, 'I flow.' A discharge of pus.

PYORRHŒA ALVINA, *Pyochezia*—p. *Aurium, Otorrhœa*—p. *Nasalis, Ozœna*—p. *Palpebræ, Blepharopyorrhœa*—p. *Urnalis, Pyuria*—p. *Viarum lacrymalium, Daeryopyorrhœa*.

PYOSIS, *Hypopyon, Pterygion, Suppuration*—p. *Pectoris, Empyema*.

PYOTHORAX VERUS, *Empyema*.

PYOTORRHŒE, *Otorrhœa*.

PYOTURIA, *Pyuria*.

PYR, *Fever*.

PYRA, *Anthrax*—p. *Crustumina, Crustumina-tum*—p. *Crustumina, Crustumina-tum*.

PYR'AMID, *Pyramis, Eminentia pyramidalis tyn'pani*, from πυρ, 'flame,' which has a conical appearance. (?) A small bony projection in the cavity of the tympanum, which is excavated, to lodge the muscle of the stapes. Also, the *Centre-pin* of the trephine. Also, a small, obtusely pointed eminence of the inferior vermiciform process of the cerebellum.

PYRAMID, see Calumba—p. of Malacarne, Vermiform process, inferior.

**PYRAMIDAL DE L'ABDOMEN**, Pyramidalis abdominis — *p. de la Cuisse*, Pyramidalis — *p. du Nez*, Pyramidalis nasi — *p. Stopédien*, Stapedius.

**PYRAMIDALE**, (OS.) Cuneiform, (bone.)

**PYRAMIDA'LIS ABDOMINIS**, *Musculus Fallopii vel succenturiatus vel auxiliarius*, (F.) *Pubio-ombilical*, *Pubio-sous-umbilical*, (Ch.) *Pyramidal de l'abdomen*. A small, fleshy, pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts, it stretches the linea alba.

**PYRAMIDA'LIS**, *P. Femoris*, *Il'acus exter'nis*, *Pyriform'is*, *Piriformis*, *Primus et superior quadrigen'ius*, (F.) *Sacro-trochantérien* (Ch.) *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the sacrum; to the corresponding surface of the great sacro-sciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh upwards, or of the pelvis in an opposite direction.

**PYRAMIDALIS FEMORIS**, Pyramidalis.

**PYRAMIDA'LIS NASI**, *Proc'erus nasi*, *Nasum dilatans*, (F.) *Fronto nasal* (Ch.) *Pyramidal du nez*. A thin, triangular muscle, which has its summit upwards. Above, it is continuous with the occipito-frontalis. It descends vertically before the root of the nose, on which it terminates; becoming confounded with the transversalis. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

**PYRAMIDES**, Corpora pyramidalia.

**PYRAMIDES ANTERIEURES**, Corpora pyramidalia — *p. Ferreini*, Ferreini, pyramids of — *p. Malpighianæ*, Papillæ of the kidney — *p. Postérieures du cervelet*, Corpora restiformia.

**PYRAMIDS OF MALPIGHI**, Papillæ of the kidney — *p. Posterior*, Corpora restiformia — *p. of Wistar*, Sphenoidal cornua.

**PYRAMIS**, Penis, Pyramid — *p. Cochleæ*, Modioli — *p. Trigona*, see Temporal bone.

**PYRCÆA**, Incendium.

**PYREC'TICA**, 'febrile;' from πυρετος, 'fever.' Fevers: the first order in the class *Hæmatica* of Good.

**PYRENOIDES**, Odontoid.

**PYRÈTHRE**, Anthemis pyrethrum.

**PYRETHRUM**, Anthemis pyrethrum, Urtica — *p. Parthenium*, Matricaria parthenium — *p. Sylvestre*, Achillea ptarmica.

**PYRETICO'SIS**, from πυρ, 'fire,' πυρετος, 'fever;' *Morbus febrilis*. A febrile affection.

**PYRETICUS**, Febrifuge.

**PYRETOGRAPH'IA**, from πυρετος, 'fever,' and γραφή, 'a description.' A description of fever.

**PYRETOL'OGY**, *Pyretology'ia*, from πυρετος, 'fever,' and λογος, 'a discourse.' *Pyrol'ogy*. A treatise on fevers. A title sometimes given to a monograph on fever.

**PYRETOS**, Fever.

**PYRETOTYPOSIS**, Intermittent.

**PYREX'IA**, *Pyrex'is*. Same etymon as the next. Fever. The febrile condition. Also, a paroxysm of fever — *Paroxysmus febrilis*.

**PYREX'IAE**, from πυρ, 'fire.' *Febrile diseases*. The first class of Cullen's Nosology.

**PYRI MARTIALES**, Ferrum tartarizatum.

**PYRIA**, Fomentation, Vaporarium.

**PYRIATERIUM**, Vaporarium.

**PYRICAUSTUM**, Burn.

**PYRIFORMIS**, Pyramidalis.

**PYRIPH'LEGES**, πυριφλεγης, from πυρ, 'fire,' and φλεγω, 'I burn.' One who has a burning fever.

**PYRITES**, IRON, Ferri sulphuretum.

**PYRMONT**, MINERAL WATERS OF. A celebrated mineral spring, on the Weser, in Westphalia, four leagues from Hamelet. The waters are tonic, and contain chlorides of sodium and magnesium, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous principles. It is a highly carbonated chalybeate.

**ARTIFIC'IAL PYRMONT WATER** may be formed of *Epsom salt*, gr. xv; *common salt*, gr. v; *magnesia*, gr. x; *iron filings*, gr. v; *water*, Oij. Impregnated with the gas from *marble-powder* and *sulphuric acid*, Æ ℥vij.

**PYRÆNUS**, Spiritus rectificatus.

**PYR'OLA**, *P. rotundifolia*, *Round-leaved Wintergreen*. Order, *Pyrolaceæ*. This plant was once used as a gentle astringent and tonic.

**PYR'OLA MACULA'TA**, *Spotted Pipsissewa*, *Spotted Wintergreen*, *Whiteleaf*, *White Pipsissewa*, *King cure*, *Ground holly*, *Rheumatism weed*, &c., has similar properties.

**PYROLA UMBELLA'TA**, *Chimaph'ila* vel *Chimaph'ila umbellata*, *C. Corymb'osa*, *Ground-holly*, *Pipsissewa*, *Wintergreen*, *Rheumatism weed*, *Herbe a pissier* (Canada). This common American plant is allied to the *uva ursi*, in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin. From the decoction or infusion an agreeable beverage may be formed by adding sugar, ginger to flavour it, and yeast to produce fermentation. Under the name *Pipsissewa Beer* it has been used in scrofulous affections.

**PYROLEUM OSSIUM RECTIFICATUM**, Oleum animale Dippelii.

**PYROLIG'NEOUS ACID**, *Ac'idum pyroaceticum*, *A. pyroligno'sum* seu *pyroxyl'icum*, *A. ligni pyro-oleo'sum*, *A. aceticum empyreumaticum*, *A. lign'eum*, *Pyrolig'nic acid*, (F.) *Acide pyroligneux*, *Vinaigre de bois*. An acid, obtained by distillation, from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for *Acetum distillatum*. It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has also been used as an antiseptic in gangrene and sphacelus, and to foul ulcers; wherever indeed creasote is indicated. — The dose of the impure pyroligneous acid internally is from five to thirty drops, three or four times a day.

**PYROMA'NIA**, *Incen'diary monoma'nia*, from πυρ, 'fire,' and mania. Insanity, with an irresistible desire to destroy by fire.

**PYROPH'AGUS**, *Igniv'orus*, from πυρ, 'fire,' and φάγω, 'I eat.' One who eats fire. A juggler, who eats bodies in a state of ignition.

**PYROS**, Triticum.

**PYRO'SIS**, from πυρ, 'fire,' 'the act of burning.' *Ptyalis mus pyros'icus*, *Limo'sis cardial'gia sputato'ria*, *Ardor stom'achi*, *A. ventric'uli*, *Cardial'gia sputatoria*, *Pyrosis Suce'ica*, *Apoceno'sis vom'itus pyrosis*, *Dyspepsia pyrosis*, *Cnismureg'mia*, *Ebullit'io stom'achi*, *Oreæ'is* (of some), *Waterbrash*, *Waterqualm*, *Black-water*, (F.) *Ardeur de l'estomac*, *Fer chaud*, *Cremason*, *Soda*, *Gargosset*. This affection consists of a hot sensation in the stomach, with eructations of an acrid, burning liquid, that causes a distressing sensa-

tion in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it is symptomatic of organic disease of the stomach.

Pyrosis also signified, of old, inflammation, gangrene, and a burn.

PYROSIS SÆCICA, Pyrosis.

PYROSOPHIA, Chymistry.

PYROTECHNIA, Chymistry.

PYROTECHNY, *Pyrotechnē*, from *πυρ*, 'fire,' and *τεχνη*, 'art.' Art of making fire-works, &c. Also, chymistry. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in surgery.

PYROTHONIDE, from *πυρ*, 'fire,' and *θωνη*, 'linen.' *Liquor pyro-oleosus e lin'teo parat'us*. A kind of pyrogenous or empyreumatic oil, produced by the combustion of textures of hemp, linen, or cotton in a copper vessel. The brown product is acid. Its medical properties probably resemble those of creasote. Diluted with three or four times its weight of water, it has been used as a gargle in cyanche tonsillaris, but is not now employed.

It is said, also, to be a popular remedy for toothach and skin diseases. When prepared from rags, it is called *Rag oil*; when from paper, *Paper oil*.

PYROTICUS, Caustic.

PYRUS CYDONIA, *Cydonia malifor'mis* seu *vulgar'is*, *Sorbus Cydonia*, *Cydonia*, *Coto'nia*, *Quince Tree*, (F.) *Cotignassier*. Family, Rosaceæ. *Ser. Syst.* Ieosandria Pentagynia. The fruit is termed *Cydonium malum*, *Malum canum*, *Malum coto'neum*, *Melum cydonium*, *Quince*, (F.) *Cotign.*

Quince-seeds—*Cydonium* (Ph. U. S. 1851)—are sometimes used in decoction as a demulcent. The fruit makes a pleasant preserve.

PYRUS DOMESTICA, *Sorbus domestica*.

PYRUS MALUS, *Malus*, *M. dasyphyll'a* seu *commun'is* seu *sylvest'ris*, *Sorbus malus*, *Melea*, the *Apple Tree*, (F.) *Pommier*. The apple—(F.) *Pomme*—is an agreeable fruit when ripe. When unripe, it disagrees, especially with those of weak digestive powers. The same may be said of the pear, (F.) *Poire*; the fruit of the *Pyrus commun'is*, *Apios*, *P. Sorbus*, *P. Sati'va*, (F.) *Poirier*.

Apple Brandy is a spirituous liquor obtained from the juice of the apple, and much used in the United States.

PYTIA, Colostrum.

PYTISMA, Sputum, Sperm.

PYUL'CON, from *πυον*, 'pus,' and *ε'κω*, 'I extract.' (F.) *Tire-pus*. A surgical instrument for extracting pus from any cavity. Many pyulca have been employed, all of which act as exhausting syringes.

PYU'RIA, *Pyotu'ria*, *Pyorrhœa urin'al'is*, from *πυον*, 'pus,' and *ουρον*, 'urine.' Discharge of purulent urine: a symptom which occurs in many diseases; particularly in cases of renal calculi, and in organic affections of the bladder. It receives various epithets, according to the part whence the pus proceeds:—as *Pyuria urethral'is*, *P. renal'is*, and *P. vesical'is*.

PYURIA CHYLOSA, Chyluria—p. Laetea, Chyluria—p. Mucosa, Cystirrhœa—p. Serosa, Cystirrhœa—p. Viscida, Cystirrhœa.

PYXIS, *πυξίς*. A box; a pill-box. Also, an emollient ointment.—Aëtius, and Paulus.

PYXIS, *Boîte*, see Cotylloid.

## Q.

Q., see Abbreviation.

QUABEBE, Piper cubeba.

QUACK, Charlatan.

QUACK-MEDICINE, Arcanum.

QUACKSALVER, Charlatan.

QUADRANS, *Quarta pars libræ*. A quarter of a pound. Three ounces (Troy).

QUADRANTAL, Amphora.

QUADRATUS, Depressor labii inferioris—q. Dorsi, Q. lumborum.

QUADRATUS FEM'ORIS, *Quadratus*, from *quadra*, 'a square.' *Quartus quadrigem'ims quadratus*, (F.) *Tuber'ischio-trochantérien* (Ch.), *Ischio-sous-trochantérien*, *Carré de la Cuisse*. A muscle situate at the posterior and upper part of the thigh. It is thin, flat, and quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whence it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

QUADRATUS GENÆ, *Platysma myoides*—q. Radii. Pronator radii quadratus.

QUADRATUS LUMBO'RUM, *Quadratus* seu *Lumbal'is externus*, *Flectens par lumborum*, *Quadratus dorsi*, (F.) *Ilio-costal*, (Ch.) *Ilio-lombi-costal*, *Carré des lombes*. A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista ilii and ilio-lumbar ligament; and above, to the inferior margin of the last rib; and besides, to the base of the trans-

verse processes of the last four lumbar vertebræ. This muscle inclines the loins to its side; depresses the last rib, and is thus a muscle of respiration. It can also raise the hip.

QUADRIGEM'INA TUBER'ICULA, *Eminentiæ Quadrigem'inæ* seu *Bigem'inæ*, *Optic Lobes*, *Optic Ganglia*, *Pons Syl'vii*, *Cor'pora quadrigem'ina*, *Nates et Testes*, *Cor'pora bigem'ina*, (F.) *Tubercles quadrijumeans*, *Eminences bigem'inées*. Four medullary tubercles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded; connected by pairs, and separated by two grooves, which divide them erucially. Of these tubercles—the superior, called *nates*, *Tuber'cula anteriora*, *Glu'tia*, are larger and more prominent than the lower, called *testes*, *Tuber'cula posteriora*. The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

QUADRIGEMINUS PRIMUS ET SUPERIOR, *Pyramidalis*—q. *Quadratus quartus*, *Quadratus femoris*—q. *Secundus et tertius*, *Ischio-trochanterianus*.

QUADROON, see Mulatto—q. Black, see Mulatto.

QUAFADIL, *Melanthium Virginicum*.

QUAHOIL, *Caeno*.

QUAIL, *Tetrao coturnix*.

QUAMASH, EASTERN, *Scilla esculenta*.

QUANDROS. Ancient name for a precious stone, believed to exist in the brain of the vul-

ture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

**QUARANTINE**, *Quar'entine, Quarentaine*, from (L.) *Quarant'na*, itself from *quaranta*, 'forty.' (F.) *Quarantaine*. The time during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said 'to perform quarantine.' Quarantine is sometimes extended beyond forty days, whilst its duration is frequently much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires*, and when persons are desirous of leaving infected districts. During quarantine, no communication is allowed between the travellers and the inhabitants of the country. Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced when there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce legislators to maintain these laws in perhaps an unnecessary degree of rigour.

**QUARTAN**, 'of or belonging to the fourth.' *Quarta'na Febris, An'etus Quartanus, Tetart'us, Quartan Ague*, (F.) *Quarte*. An intermittent, the paroxysms of which recur every fourth day, leaving between them two days' interval. We speak also of the *Quartan Type*. A *Double Quartan* is one in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession; — the paroxysms of every fourth day resembling each other. A *Triple Quartan* is one in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *redoub'ling or repeating quartan*, (F.) *Fièvre quarte doublée*, is one in which there are two paroxysms every fourth day. See Intermittent.

**QUARTANUS REMITTENS**, Tetartophia.  
**QUARTA'RIUS**. An ancient measure, equal to one-fourth of the sextarius. See Weights and Measures.

**QUARTE**, Quartan.

**QUARTERON**, see Mulatto — q. Black, see Mulatto.

**QUARTIO**, Astragalus.

**QUARTI-STERNAL**, *Quadristernalis*. The fourth osseous portion of the sternum, corresponding to the fourth intercostal space. — BÉCLARD.

**QUASSATIO**, Conquassation.

**QUASSATURA**, Conquassation.

**QUAS'SIA**, *Quassia amara, Quassy, Quassia excel'sa, Picra'na excel'sa, Febrif'ugum lignum, Lofly Bitterwood Tree, Bitter-ash*, (F.) *Quassie*. A West India tree, from which is obtained the *Lignum Quassia, Quassia*, (Ph. U. S.) It is an intensely durable bitter, without astringency; and has been employed as a tonic and stomachic. It is generally given in the form of infusion. The bitter principle is called *Quassin*.

**QUASSIA SIMAROU'BA**, *Simarouba, Simarouba, S. officinalis, Evon'yms, Bitter Simarouba, Mountain Damson*. The bark of the Simarouba is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited wherever a simple tonic is required.

**QUASSIN**, see Quassia.

**QUATERNIO**, Astragalus.

**QUATRE ÉPICES**, see Myrtus pimenta.

**QUATRIO**, Astragalus.

**QUEASINESS**, Nausea.

**QUEEN'S DELIGHT**, *Stillingia* — q. of the Meadows, *Spiræa ulmaria* — q. Root, *Stillingia*.

**QUERCINI HERBA**, *Lichen plicatus*.

**QUERCULA MINOR**, *Teucrium chamaedrys*.

**QUERCUS ALBA**, the *White Oak*; **QUERCUS ROBUR**, the *Common Oak*; **Q. TINCTORIA**, the *Black Oak*; **Q. RUBRA MONTANA**, the *Red Oak* or *Spanish Oak*; *Family*, Amentaceæ; *Ser. Syst.* Monœcia Polyandria; (F.) *Chêne*. The bark of all these varieties is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used internally in intermittents, and externally in decoction, as an astringent wash, where such is indicated.

*Acorns, Ceces, Nuces Quercus*, (F.) *Glands*, were at one time much used as food; and a decoction of them was once recommended in dysentery and diarrhœa, in glandular obstructions, &c. A pessary made of them has been advised in immoderate flow of the menses. They are not now used.

**QUERCUS INFECTO'RIA**. A tree of Asia Minor, which affords *Turkey Galls, Nut Galls, Gallæ Turcicæ, G. Quercif'æ, G. Tinctoriæ, Nur Gallæ, Gallæ max'ima orbiculata, Cicis, Cassenoles, Gallæ, Galls, Gall-nut*, (F.) *Noix de Galle*. The *wut-gall* — *Golla* (Ph. U. S.) — is a morbid protuberance or tubercle, produced by the puncture of the *Diplolepis Gallæ Tinctoriæ* or *Cynips Quercus folii*. It is powerfully astringent and tonic, and has been employed in diarrhœa, intestinal hemorrhage, and intermittents: but is chiefly used, externally, in gargles and injections. The powder, made into an ointment with lard, is used in piles.

**QUERCUS COCCIFERA**, see *Kermes* — q. *Marina*, *Fucus vesiculosus* — q. *Suber*, see *Suber*.

**QUEUE DE CHEVAL**, *Cauda equina*, see *Medulla spinalis* — q. *de la Moëlle épinière, Cauda equina* — q. *de Pourceau, Peucedanum*.

**QUICK-IN-THE-HAND**, *Impatiens*.

**QUICKEN TREE**, *Sorbus acuparia*.

**QUICK'ENING**, from Sax. *eprean*. 'to make alive.' The period of gestation when the motion of the fetus first becomes perceptible. This usually occurs about the eighteenth week, and was at one time erroneously believed to mark the time at which the fetus becomes alive — *Animatio factus*. It need scarcely be said, that it possesses the principle of life from the moment of the union of the materials furnished by the sexes at a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

**QUICKENS**, *Triticum repens*.

**QUICKLIME**, *Calx viva*.

**QUICKSILVER**, *Hydrargyrum*.

**QUIES**, *Acnesia*.

**QUINA**, *Quinine* — q. *Sulpha*, *Cinchona*.

**QUINÆ ACETAS, SULPHAS**, &c., see *Quinine Acetas*, &c.

**QUINCE**, see *Pyrus cydonia* — q. *Tree, Pyrus cydonia*.

**QUINIA**, *Quinine* — q. *Acetate of, Quiniæ acetas* — q. *Amorphous*, see *Quinia*, extract of — q. *Arseniate of, Quiniæ arsenias* — q. and *Cinchonia*, tannate of, *Quiniæ et Cinchoninæ tannas* — q. *Arsenite of, Quiniæ arsenis* — q. *Citrate of, Quiniæ citras*.

**QUINIA, EXTRACT OF, Quiniæ sulphas impur'us**. A preparation which consists in evaporating the liquor poured off the crystals of sulphate of quinia, to the consistence of a pilular mass.

It has the properties of sulphate of quinia, and its active principle appears to be *amorphous quinia*. Twenty-four grains will generally arrest ague.

**QUINIA, FERROCYANATE OF, Quiniæ ferrocyanas** — q. *Hydriodate of, Quiniæ hydriodas* — q. *Impure sulphate of, Quinia*, extract of — q. *Iodhy-*

drate of, Quiniæ hydriodas—q. Iodide of, Quiniæ hydriodas—q. Iodide of, Iodhydrate of, see Quiniæ hydriodas—q. Ioduret of, Quiniæ hydriodas—q. and Iron, Hydriodate of, see Quinia, Iodide of, Iodhydrate of—q. Lactate of, Quiniæ lactas—q. and Mercury, protochloride of, Hydrargyri et Quiniæ Protochloridum—q. Muriate of, Quiniæ murias—q. Nitrate of, Quiniæ nitras—q. Phosphate of, Quiniæ phosphas—q. Sulphate of, Quinine, sulphate of.

QUINLE ACETAS, *Chini'num acetienm*, *Acetas Chini'i* seu *Chini'ni* seu *Chini'nicus* seu *Quini'æ* seu *Quini'æ* seu *Quini'ni* seu *Kini'ni*, *Quina acetica*, *Acetate of Quinia* or of *Quinine*. Prepared by saturating *Quinia* with diluted *acetic acid*. Has the properties of the other salts of *Quinia*.

QUINLE ARSENIAS, *Quini'æ* seu *Quini'æ* *Arsenias*, *Chini'num Arsenico'num* seu *Arsenic'ienm*, *Arseniate of Quinia* or of *Quina* or of *Quinine*. Formed by the union of *arsenic acid* and *quinia*. Employed as an antiperiodic in the dose of from three quarters of a grain to a grain and a half in the twenty-four hours.

QUINLE ARSÊNIS, *Q. Diar'senis*, *Ar'senite of Quinia*. A salt resulting from the double decomposition of *arsenite of potassa* and *sulphate of quinia*. It has been used in chronic cutaneous diseases; and as an antiperiodic in ague, neuralgia, &c. Dose, one-third of a grain, three times a day.

QUINLE CITRAS, *Quini'æ* seu *Chini'ni citras*, *Citras chini'neus* seu *quini'cus*, *Chini'num* seu *Chini'num Citricum*, *Citrate of Quinia*, of *Quina*, or of *Quinine*. Formed from the union of *citric acid* and *quinia*. It has the same properties as the sulphate.

QUINLE ET CINCHONLE TANNAS, *Chini'num* seu *Chini'num tan'nicum*, *Tannate of Quinia* and *Cinchonia*. This salt has the same properties as the salts of *quinia* in general.

QUINLE DIARSENIS, *Quiniæ Arsenis*.

QUINLE FERROCYANAS, *Chini'num ferrocyanogen'ium* seu *ferrohydrocyan'icium*, *Ferrocyanate* or *hydrocyanoferrate of Quinia* or of *Quinine*. This salt is obtained by the decomposition of *sulphate of quinia* by means of a solution of *ferrocyanuret of potassium*. It has all the properties of sulphate of *quinia*, and, according to some, in a superior degree.

QUINLE HYDRIODAS, *Chini'num hydriod'icium*, *Hydriodate* or *Iodhydrate of Quinia*; called, also, *Ioduretum* seu *Iod'idum Quini'æ*, *Iod'uret* or *Poxide of Quinia*, (F.) *Hydriodate* or *Iodhydrate de Quinine*, *Iodure de Quinine*. This is formed by precipitating *sulphate of quinia* by means of *iodide of potassium*. Given in scrofulous affections; half a grain to a grain, three times a day, to a child.

An *iodide* and a *biniodide* have been formed; the latter made by mixing double the quantity of the *iodide of potassium* with the sulphate of *quinia*.

An **IODIDE OF IODHYDRATE OF QUINIA**, (F.) *Iodure d'Iodhydrate de Quinine*, is prepared by pouring into an acid solution of *quinia* a solution of *iodide of iron*, containing a slight excess of iodine. The precipitate is treated with boiling alcohol: the liquor filtered, and crystals suffered to form. The salt possesses all the properties of the other salts of *quinia*. Under the name, *Hydriodate of Iron and Quinia*, a preparation has been introduced by Mr. Battley. It is possessed of tonic and antiperiodic virtues.

QUINLE IODIDUM, *Quiniæ hydriodas*—q. *Ioduretum*, *Quiniæ hydriodas*.

QUINLE LACTAS, *Quiniæ lactas*, *Chini'num lact'icium*, *Lactate of Quinia* or of *Quinine*. Made by the action of *lactic acid* on *quinia*. Used in the same cases as the other salts of *quinia*.

QUINLE MURIAS, *Chini'num muriat'icium* seu *sali'tum* seu *hydrochlor'icium*, *Murias chini'cus*, *Muriate of Quinia* or of *Quinine*. May be prepared by dissolving *quinia* in dilute *muriatic acid*. Given as an antiperiodic. Dose, half a grain to a grain.

QUINLE NITRAS, *Chini'num* seu *Chini'num nitricum*, *Nitrate of Quinia* or of *Quinine*. May be formed by the addition of *nitric acid* to *quinia*. Its properties are those of the sulphate of *quinia*.

QUINLE PHOSPHAS, *Chini'num* seu *Chini'num phosphoricum*, *Phosphate of Quinia* or of *Quinine*; may be prepared by the addition of dilute *phosphoric acid* to *quinia*. It is thought by many to be next to the sulphate of *quinia* in its remedial powers.

QUINLE SULPHAS, *Quinine*, sulphate of.

QUINLE VALERIA'NAS, *Chini'num* seu *Chini'num Valerian'icium*, *Valerianate of Quinia*, of *Quina*, or of *Quinine*; may be formed by the union of *valerianic acid* with *quinia*. It has the properties of the salts of *quinia*.

QUININE, *Qui'nia*, *Quina*, *Kini'num*, *Chini'num*, *Quinino*. An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

QUININE, ACETATE OF, *Quiniæ acetas*—q. *Arseniate of, Quiniæ arsenias*—q. *Arsenite of, Quiniæ arsenis*—q. *Citrate of, Quiniæ citras*—q. *Ferrocyanate of, Quiniæ ferrocyanas*—q. *Hydriodate de, Quiniæ hydriodas*—q. *Iodhydrate de, Quiniæ hydriodas*—q. *Iodure de, Quiniæ hydriodas*—q. *Iodure d'Iodhydrate de, Quinia, iodide of iodhydrate of*—q. *Lactate of, Quiniæ lactas*—q. *Muriate of, Quiniæ murias*—q. *Nitrate of, Quiniæ nitras*—q. *Phosphate of, Quiniæ phosphas*.

QUININE, QUINA OR QUINIA, SULPHATE OF, QUINIA seu *Quini'æ* seu *Quini'æ Sulphas*, *Quinæ Disulphas*, *Chini'num* seu *Chini'num Sulphuricum*, (F.) *Sulfate de Quinine*—the salt usually employed in medicine—occurs in needles of a pearly and satiny appearance. It is employed with great success in the treatment of intermitents: and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, as a tonic from 3 to 10 grains in the 24 hours. As an antiperiodic it may be carried much farther. Its action, in a large dose, is decidedly sedative. It is obtained, by treating the yellow bark with sulphuric acid. The following form is adopted in the Pharmacopœia of the United States.—*Cinchon. flav.* in pulv. crass. ℥ij; *Acid. muriat.* ℥iij; *Culeis*, in pulv. ℥v; *Aquæ*, cong. v; *Acid. Sulphur.*, Alcohol; *Carbon. animal.* aa q. s. Boil the bark in one-third of the water mixed with the one-third of the muriatic acid, and strain through linen. Boil the residue twice successively with the same quantity of acid and water as before, and strain. Mix the decoctions, and, while the liquor is hot, gradually add the lime, previously mixed with two pints of water, stirring constantly, until the *quinia* is completely precipitated. Wash the precipitate with distilled water, and having pressed and dried it, digest it in boiling alcohol. Pour off the liquor and repeat the digestion several times, until the alcohol is no longer rendered bitter. Mix the liquors, and distil off the alcohol, until a brown viscid mass remains. Upon this substance, removed from the vessel, pour about half a gallon of distilled water, and having beaten the mixture to the boiling point, add as much sulphuric acid as may be necessary to dissolve the impure alkali.

Then add an ounce and a half of animal charcoal; boil for two minutes; filter the liquor while hot, and set it aside to crystallize. Should the liquor, before filtration, be entirely neutral, acidulate it very slightly with sulphuric acid. Should it, on the contrary, change the colour of litmus paper to a bright red, add more animal charcoal. Separate the crystals from the liquor, dissolve them in boiling water slightly acidulated with sulphuric acid, add a little animal charcoal, filter and set aside to crystallize. Wrap the crystals in bibulous paper, and dry with a gentle heat. The mother-waters may be made to yield an additional quantity of sulphate of quinia by precipitating the quinia with solution of ammonia, and treating the precipitated alkali with water, sulphuric acid, and animal charcoal, as before.

QUININE, TANNATE OF, *Quiniæ et cinchonina tannas*—*q.* Valerianate of, *Quiniæ valerianas*.

QUININISM, *Quinini'smus, Quinism, Cinchonism*. The aggregate of encephalic or neuro-pathic phenomena induced by over-doses of quinia.

QUINOIDINE, Chinoidine.

QUINQUEFOLIUM, *Potentilla reptans*—*Quinquefolium majus, Potentilla reptans*.

QUINQUINA, *Cinchona*—*q.* *Aromatique, Croton cascarilla*—*q.* *Bicolor, Cinchonæ Caribææ cortex*—*q.* *Faux de Virginie, Cusparia febrifuga*—*q.* *Gris de Loxa, Cinchonæ lancifoliæ cortex*—*q.* *Javne, Cinchonæ cordifoliæ cortex*—*q.* *Orange, Cinchonæ lancifoliæ cortex*—*q.* *Piton, Cinchonæ Caribææ cortex*—*q.* *Rouge, Cinchonæ oblongifoliæ cortex*.

QUINSEY, *Cynanche tonsillar*—*q.* *Nervous, Angone*—*q.* *Wolf, Lycanche*.

QUINTAN, *Febris quinta'na, F. pemptæa, F.*

*quinta*; from *quintus*, 'a fifth.' A fever whose paroxysms return only every five days inclusively; and between which there are, consequently, three days of apyrexia.

QUINTE, (F.) This word is used synonymously with *paroxysm* or *fit*, when speaking of cough,—as *une Quinte de Toux*—'a fit of coughing.' Also, the influenza.

QUINTEFEUILLE, *Potentilla reptans*.

QUINTERON, see *Mulatto*—*q.* *black, see Mulatto*.

QUINTES, see *Pertussis*.

QUINTES'SENCE, *Quinta Essen'tia*. A name formerly given to alcohol, impregnated with the principles of some drug. It was, consequently, often synonymous with *Alcoholic tincture*. The most volatile principles of bodies were, also, called *Quintes'sences*.

QUINTI'STERNAL. The fifth osseous portion of the sternum. It corresponds to the 5th and 6th intercostal spaces.

QUINUA, *Chenopodium quinoa*.

QUOTID'IAN, *Quotidia'nus, Ephe'merus*,—itself from *quotidiè*, 'daily.' That which takes place every day.

QUOTID'IAN FEVER, *Febris quotidiana seu hemer'esia seu hemer'ina, Q. ague, An'letus quotidiana'sus, Cathe'merus, Cathemer'inus, Methemer'inos, Amphemer'inos, Amphimer'inus, Amphemer'us, Febris amph'emera seu methemer'ina seu methemer'ria, Quotidia'nus, (F.) Fièvre quotidienne*, is an intermittent, the paroxysms of which recur every day.

A *simple, double, or triple quotidian*, is a quotidian, which has one, two, or three paroxysms in the 24 hours.

## R.

R is placed at the commencement of a pre-scription, as a contraction of *Rec'ipè*. (See Abbreviation.) Originally, it was the sign  $\mathcal{J}$  of Jupiter, and was placed at the top of a formula, to propitiate the king of the gods, that the compound might act favourably.

RABDOIDES. (SUTURA.) Sagittal suture.

RABID, *Rab'idus, (F.) Rabique, Rabiéique*, from *rabies*, 'canine madness.' That which belongs to hydrophobia; as *rabid virus, &c.*

RABIÉIQUE, *Rabid*.

RABIES CANINA, *Hydrophobia*.

RABIQUE, *Rabid*.

RACAHOUT, *Amylum quernæum*. A name given by the Arabs to the starch prepared from an edible acorn obtained from *Quercus Ilex*, but, according to Plagge, the so called *Racahout* of the Arabs, sold in Paris, is a compound of potatoe starch, chocolate, and aromatics,—as vanilla.

RACCOON BERRY, *Podophyllum montanum*.

RACE, from *radice*, abl. of *radix*, 'root,' breed. The union or aggregate of individuals whose conformation or particular condition differs perceptibly from those of neighbouring varieties. In the human species, several races are designated. See *Homo*.

RACEMEUX, *Racemosus*.

RACEMO'SUS, *Rac'emous, Rac'emose, (F.) Racemosus*. In clusters, like grapes.

RACEMUS. A cluster—as of grapes.

RACHAMEL'CA, from Hebr. רחם (*rechem*) 'the womb,' and מלך (*molech*), 'a king:' *Recha-*

*mal'ca*. A peculiar formative principle, supposed, by Dolæus, to exist in the uterus.

RACHE, *Porrigo*.

RACHLÆI, *Rachiei*.

RACHIALGIA, *Colic, metallic, Rhachiodynia, Vertebral disease*—*r.* *Mesenterica, Tabes mesenterica*—*r.* *Pictoniensium, Colic, metallic*—*r.* *Pictonum, Colic, metallic*.

RACHIALGIE MÉSENTÉRIQUE, *Tabes mesenterica*.

RACHIALGITIS, *Rhachialgitis*.

RACHIDIAN ARTERIES, *Spinal arteries*—*r.* *Bulb, see Medulla oblongata*—*r.* *Canal, Vertebral canal*.

RACHIOPHYMA, *Rachiphyma*.

RACHIPHY'MA, *Rhachiph'y'ma, Rachiphyma, Tumor Dorsi*, from *ραχίς*, 'the spine,' and *φύμα*, 'a tumour.' A tumour on the spine or on the back.

RACHIS, *Vertebral column*.

RACHIS'AGRA, *Rhachis'agra, Rhach'iagra, Rhach'eagra, Rhachid'ugra, Rhachi'tis spinalis*, from *ραχίς*, 'the spine,' and *αγρα*, 'a seizure.' A gouty or rheumatic affection of the spine.

RACHITE, *Rachitæ*.

RACHIT'IC, *Rachit'icus, Rhachit'icus, (F.) Rachitique*. Same etymon as the next. Relating or appertaining to, or affected with rickets. Weak, feeble in the joints; defective in development.

RACHI'TIS, *Rhachi'tis*, from *ραχίς*, 'the spine,' and *itis*, a suffix denoting inflammation. Inflammation of the spine. Also, *Cyrtosis Ra-*

*chia*, *Cyrton'osus*, *Morbus Anglicus*, *Osteomalacia Infantum*, *Tabes pectora*; *Innutritio ossium*, *Spina nodo'sa*, *Rachitis'mus*, *English disease*, *Rickets*; from 'ραχίς, 'the spine.' (F.) *Rachitisme*, *Nourure*. A disease characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general debility, indigestion; and frequently induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or serofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health: others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease. The treatment is almost wholly *hygienic*. Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing, and tonics, afford the best prospect of success.

RACHITIS ADULTORUM, Mollities ossium.

RACHITISME, Raehitis.

RACHOSIS, *Rhacho'sis*, *Rako'sis*, from 'ραχωω, or 'ρακωω, 'I wrinkle.' A relaxation of the scrotum. *Propto'ma seu lax'itas Scroti*, *Scrotum pendulum*. An excoaration of the relaxed scrotum. — Dictionaries.

RACINE À BECQUET, *Geranium mosehatum* — *r. de Bengal*, *Cassumuniar* — *r. de Charcis*, *Dorstenia contrayerva* — *r. de Dracke*, *Dorstenia contrayerva* — *r. des Philippines*, *Dorstenia contrayerva* — *r. de Safran*, *Cureuma longa* — *r. de Saint Esprit*, *Angelica* — *r. Salivaire*, *Anthemis pyrethrum* — *r. de Turbeth*, *Convolvulus turpetum*.

RACINES DU CERVELET, *Corpora testiformia*.

RACLURES DES BOYAUX, *Ramenta intestinorum*.

RACORNISSEMENT, (F.) from *se racornir*, 'to shrivel in the fire as leather does.' *Cor'nification*. A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

RADCLIFFE'S ELIXIR, see *Tinctura aloes composita*.

RADESYGE, *Radzyge*.

RADEZYGE, *Radzyge*.

RADIAD, see *Radial aspect*.

RADIAL, *Radial'is*, from *radius*, a bone of the forearm. That which relates to the radius.

RADIAL ANTÉRIEUR, *Palmaris magnus*.

RADIAL ARTERY, *A. extern'a Cu'biti*. It arises from the brachial, at the upper and anterior part of the forearm; descends on the outer side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space which separates the first two metacarpal bones. It then buries itself in the palm of the hand, where it forms the *profund* or *radial palmer arch*. The radial artery gives off the *recurrent radial*, several *radio-muscular* branches, the *transverse palmar radio-carpal artery*, the *external superficial artery of the palm of the hand*, the *external dorsal of the thumb*, the *dorsalis carpi*, *dorsal interosseous artery of the index*, &c.

RADIAL ASPECT. An aspect towards the side on which the radius is situated. — *Barelay*. *Radial* is used by the same writer, adverbially, to signify 'towards the radial aspect.'

RADIAL EXTERNE PREMIER, see *Radialis* — *r. Externe second*, see *Radialis* — *r. Grand*, see *Radialis*.

RADIAL NERVE, *Radio-digital* (Ch.), *Spiral Nerve*, *Spiral muscular N.*, *Musculo-spiral nerve*, arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialis internus, as far as opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments. Opposite the upper extremity of the radius it divides into two branches; — the one *posterior*, which turns backwards into the substance of the supinator brevis, and when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is *anterior*: it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outside of the ring finger, and to the first interosseous muscle of the back of the hand.

RADIAL PETIT, see *Radialis*.

RADIAL VEINS, DEEP-SEATED, follow the *SALE*, course as the radial artery.

RADIALIS EXTER'NUS BRE'VIOR, *Extensor Carpi Radialis Bre'vior*, *Radialis secundus*, (F.) *Second radial externe*, *Petit radial*, *Épicondyl'o-sus-métacarpien*, (Ch.) An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

RADIALIS EXTER'NUS LONGIOR, *Extensor Carpi Radialis Longior*, *Radialis externus primus*, (F.) *Premier radial externe*, *Grand radial*, *Huméro sus-métacarpien*, (Ch.) It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and to the corresponding tuberosity, of the humerus; and terminates, below, by a long tendon, which is attached to the superior extremity of the second bone of the metacarpus. It extends the hand on the forearm.

RADIALIS EXTERNUS BREVIOR, see *Radialis* — *r. Externus primus*, see *Radialis* — *r. Extensor longior*, see *Radialis* — *r. Internus*, *Palmaris magnus* — *r. Secundus*, see *Radialis*.

RADIATED, *Radial'us*, from *radius*, 'a ray;' (F.) *Rayonné*. That which is arranged in rays; in lines, diverging from a common centre. An epithet given to several ligaments, &c., as to those which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

RADIATED SUBSTANCE OF THE KIDNEY, see *Kidney*.

RADICAL, *Radical'is*, from *radix*, 'a root.' A *radical cure*, *cura radical'is*, is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *palliative cure*.

RADICAL MOISTURE, *Humidum radicale*.

**RADICAL VESSELS, Vas'cular Rad'icles, (F.) Radicules vasculaires,** are the small vessels that take their origin in the tissues, and by their union form larger vessels.

**RADICES OSSIS HYOIDEI, Cornua ossis hyoidi.**

**RADICES/ECA, from radix, radiceis, 'a root,' and secare, 'to cut.'** One employed in collecting and preparing plants was formerly so called.

**RADICULA, Raphanus hortensis.**

**RADICULES VASCULAIRES, Radical ves-**sels.

**RADII CILIARES, Ciliary processes.**

**RADI FRONTIS.** The folds or wrinkles of the forehead.

**RADIO-CARPAL, Radio-carpia'nus.** That which relates to the radius and carpus.

**RADIO-CARPAL ARTICULATION** is the *wrist joint*, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situate below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

**RADIO-CARPAL TRANSVERSE PALMAR ARTERY, (F.) Artère Radio-carpienne-transversale-pal-maire.** A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

**RADIO-CUTANÉ (NERF,)** see Cutaneous—*r. Phalangien du pouce, Flexor longus pollicis manus.*

**RADIOLUS, Sound.**

**RADIO-MUS'CLAR, Radio-muscula'ris.** A name given to the branches sent off from the radial artery to the muscles of the forearm in the first part of its course; as well as to the nervous filaments which the radial nerve sends to the same muscles.

**RADIS, Raphanus hortensis.**

**RADISH, Raphanus hortensis—r. Water, Nas-turtium amphibium.**

**RADIUS, 'a spoke:'—so called from its shape.**

*Cercis, Foc'itè minus seu superius, Cannia minor, Os ad cubit'le, Additamen'tum ulnæ, Manu'brium manûs, Parape'chyon, Aru'nd'o bra'chii minor, (F.) Os du Rayon.* A long, prismatic bone, the upper and lesser extremity of which is called the *head*. This is supported by a *cervix* or *neck*. At the part where the neck is confounded with the *body* of the bone is the *tubercle* or *bicipital tuberosity* or eminence for the insertion of the biceps. The radius is articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna: below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than the superior, is flattened before and behind: is irregularly quadrilateral; and has, below, a double facette to be articulated with the first two bones of the carpus. On the outer side is the styloid process; and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

**RADIUS, COL DU, Collum radii.**

**RADIX, Rhiza.** A root; also, the male organ.

*Radix, Root or fang* of a tooth, is the part contained in the alveolus. The *radix* or *root* of the nail is the portion hidden under the skin, &c. Surgeons give the name to the prolongations, sent by scirrhus, cancerous, or other tumours into the neighbouring parts.

*Five Aperient Roots, Quinque radi'ces aperient'es,* were, of old, asparagus, butchers' broom, fennel, parsley, and mallage.

*Five Lesser Aperient Roots, Quinque radi'ces*

*aperient'es mino'res,*—were caper, dandelion, eryngo, madder, and rest-harrow.

**RADIX ASCLEPIADIS CRISPA,** see Gomphocar-pus crispus—*r. Braziliensis, Ipeacuanba.*

**RADIX CORDIS, Basis Cordis.** The base of the heart.

**RADIX INDICA LOPEZIANA, Lopez radix—r. Linguae, see Tongue—r. Lopeziana, Lopez radix—r. Ninsi, Sium ninsi—r. Rubra, Rubia—r. Ser-pentum, see Ophiorrhiza mungos—r. Unguis, Nail, root of—r. Ventris, Umbilicus.**

**RADULA, Raspatorium.**

**RADZYGE, Radzygyn, Radesyge, Radezyge, Thæ'ria, properly Theria, from θηριον, ('λκος,) 'a malignant ulcer.' Lepra borealis seu Norve-gica, Norwe'gian Lep'rosy.** A name given, in Norway, to a disease, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis.

Another form—the *Spedalske, or Spedalskhed*—of Norway, appears to be a variety of elephantiasis Græcorum.

**RAGE, Ira, Furor brevis, Orgè, Thymos, (F.) Colère.** Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and redness and swelling of the face.

**RAGE, Rhage.**

**RAGE, Hydrophobia.**

**RAGWEED, Ambrosia elatior—r. Great, Am-brosia trifida.**

**RAGWORT, Senecio Jacobæa.**

**RAIDEUR CADAVÉRIQUE, Rigor mortis.**

**RAIFORT, Raphanus hortensis—r. Sauvage, Cochlearia armoracia.**

**RAINBOW-WORM, Herpes iris.**

**RAINURE, Groove—r. Digastrique, Mastoid groove.**

**RAISIN, see Vitis vinifera—r. d'Amérique, Phytolacca decandra—r. de Bois, Vaccinium myrtillus—r. d'Ours, Arbutus uva ursi—r. de Renard, Paris.**

**RAISINIÈRE (F.)** A name given to a small granular, brownish or blackish tumour, which forms occasionally at the surface of the cornea in consequence of ulcers or accidental wounds of that membrane.—Nysten.

**RAISINS, Uvæ passæ, see Vitis vinifera—r. de Corinthe, see Vitis Corinthiaca.**

**RAISON, Reason.**

**RAKASIRA.** An American balsam; of a brownish or brownish-red colour; semi-transparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

**RAKIA, see Spirit.**

**RAKOSIS, Rachosis.**

**RÂLE, Rattle, Rhonchus, Rhenchus, Rhenxis, from (D.) Ra'tel; Rhoncus, Cerchus, Rhogmos, (F.) Râle.** Noise produced by the air in passing through mucus, of which the lungs are unable to free themselves. This condition is chiefly observed at the approach of death, and is commonly called, "the rattles."

The term *Râle* has been given to different sounds during respiration, caused by the air passing through fluid contained in the bronchi, or areolæ of the pulmonary tissue; which are perceived by the stethoscope.

**RÂLE BRONCHIQUE SEC, Râle sonore—r. Bronchique humide, R. muqueux—r. Caverneux, Gurgling—r. Cavernuleux, see Gurgling—r. Cré-**

pitant, *Rhynchus crepitans*, see Crepitant—*r. c. Redux*, see Crepitant.

**RÂLE MUQUEUX**, *Rhynchus mucosus*, *Mucous Rattle*, *R. bronchique humide*. The sound produced by the passage of air through mucus accumulated in the larger bronchi or trachea, or through softened tubercular matter. This râle occurs in catarrh, and in softened tubercle. When carried to a very high degree, it constitutes *gurgling*, (*F.*) *Gargouillement*. The *sub-crepitant rhynchus*, (*F.*) *Râle sous-crepitant*, is produced by the bubbling of air through liquid of variable consistence in the minute bronchial tubes. When heard at the base of both lungs, it is a sign of capillary bronchitis. When heard at one base only, it is generally connected with tuberculous higher up.

**RÂLE SIBILANT**, *Rhynchus sibilus* seu *sibilans*, *Sibilant Rattle*. A slight, though prolonged, whistling sound, occurring either at the commencement of inspiration, or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications. It is seated in the small tubes, and occurs in the first stage of bronchitis. The *clicking* and *whistling* varieties differ, in the former being short, the latter prolonged. The former is a quick sharp sibilus or whistle, which ceases almost instantaneously; the latter a prolonged sibilus, of less sharpness, lasting almost the whole time of the movement which it accompanies. To these may be added the *hissing* variety, the name sufficiently indicating its character.

**RÂLE SONORE**, *Râle bronchique sec*, *R. ronflant*, *Rhynchus sonorus*, *Sono'rous Rattle*. A sound resembling at times the snoring—(*F.*) *Ronflement*—of a person asleep; at others the sound of the bass string of an instrument when rubbed with the finger, and not unfrequently the cooing—(*F.*) *Roucolement*—of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

**RÂLE SOUS-CRÉPITANT**, see *Râle muqueux*.

**RÂLE VÉSICULAIRE**, see Crepitation.

**RAMEAU**, Ramus.

**RAMEN'TA INTESTINORUM**, (*F.*) *Racines des Boyaux*. The shreds or scrapings, as it were, of the mucous membrane of the bowels, often discharged in malignant dysentery. The evacuation in which these are contained has been termed *Diachorema xymatoïdes*.

**RAMENTUM**, Fragment, Scabs.

**RAMEX**, Hernia—*r. Varicosus*, *Varicocele*.

**RAMIFICATION**, *Ramificatio*, from *ramus*, 'a branch,' and *fi*, 'to become.' A division of arteries, veins, or nerves into branches. Also, a branch itself.

**RAMILLE**, Ramusculus.

**RAMOLLISSEMENT**, Mollities—*r. du Cerveau*, Mollities cerebri—*r. du Cœur*, Cardiomalacia—*r. de l'Estomac*, Gastromalacia—*r. du Foie*, Hepatomalacia—*r. Gris*, see Hepatization—*r. de la Moelle épinière*, Mollities medullæ spinalis—*r. Rouge*, see Hepatization—*r. de l'Intestin*, Enteromalacia—*r. des Os*, Mollities ossium.

**RAMPANT**, (*F.*) *ramper*, 'to climb.' *Repens*, *Reptans*. That which creeps or drags on the earth. The French *Baudige rampant* has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

**RAMPES DU LIMAÇON**, Scala of the cochlea.

**RAMPHOS**, Rostrum.

**RAMULUS**, Ramusculus.

**RAMUNCULUS**, Ramusculus.

**RAMUS**, *Cladus*, a branch, (*F.*) *Rameau*. A division of an artery, vein, or nerve. Also, the male organ.

**RAMUS DURIOR SEPTIME CONJUGATIONIS**, Facial nerve.

**RAMUS' CULUS**, *Ram'ulus*, *Ramun'culus*, *Sur'culus*, *Cladis'cos*, diminutive of *ramus*. A division of a ramus. (*F.*) *Ramuscule*, *Ramille*.

**RANA ESCULEN'TA**, (*F.*) *Grenouille*. This frog and the bull-frog, *Rana Taurina*—are eaten as a delicacy. They are nutritious, and easily digested.

**RANA**, Ranula.

**RANCE**, Rancid.

**RANCID**, *Rancidus*, *Sapros*, (*F.*) *Rance*, from *rancere*, 'to be stale.' An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may thus become very irritating, and unfit for the purposes for which they were originally intended.

**RANINE**, *Ranina*; from *Rana*, 'a frog.' The termination of the lingual artery is so called; that is, the portion of the artery which advances horizontally between the genio-glossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

**RANULA**, from *Rana*, 'a frog,' so called from its resemblance; *Dysphagia Ranula*, *Empyragma saliva'rè*, *Frog Tongue*, *Batrachos*, *Batrachium*, *Hydroglossa*, *Hypoglossia*, *Hypoglossum*, *Hypoglot'tis*, *Hypoglossium*, *Rana*, (*F.*) *Grenouillette*. A small, soft, fluctuating, and semi-transparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst may be punctured, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes, the salivary duct is found plugged by a small calculus.

**RANULA LAPIDEA**, see *Calculi*, salivary.

**RANUN' CULUS**, (*F.*) *Renoncule*. Family Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. A genus of plants, most of the species of which, when taken internally, act as acrid poisons. See *Poison*. They are, also, acrid and vesicant, when applied to the skin, and have accordingly been often used as counter-irritants. The following species answer to this description.

**RANUNCULUS ABORTIVUS**, *Small flowered Crow-foot*, *Chicken-pepper*.

**RANUNCULUS ACRIS**, *R. pratensis* seu *Steenii* seu *ru'fusus* seu *ylvaticus* seu *Sic'ulus*, *Upright Meadow Crowfoot*, *Butter Cups*, *Yellow-weed*, *Blister-weed*, *Pilewort*, *Burwort*, *Meadow-bloom*, *Yellows*, (*F.*) *Bouton d'or*.

**RANUNCULUS ALBUS**, *Anemone nemorosa*.

**RANUNCULUS AQUATICUS**, *R. secleratus*.

**RANUNCULUS BULBO'SUS**, *R. latus*, *Ranunculus* (*Ph. U. S.*), *Bulbous-rooted Crowfoot*, (*F.*) *Renoncule bulbeuse*, *Bassinet*.

**RANUNCULUS DIGITATUS**, *R. secleratus*.

**RANUNCULUS DECLINATUS**, *R. flammula*.

**RANUNCULUS FICA'RIA**, *Chelidonium minus*, *Scrophularia minor*, *Ficaria ranunculoides*, seu *terna* seu *communis*, *Chelidonia rotundifolia minor*, *Cur'suma hamorrhoidalis herba*, *Ranun-*

*culus vernus* seu *præcox* *Ægole'thron*, *Lessercelandine*, *Pilewort*, (F.) *Petite Chéridoine*, *Petite Éclair*, *Ficaire*. The leaves and root have been used medicinally;—the leaves as an antiscorbutic; the root as a cataplasm in piles.

RANUNCULUS FLAMMULA, *R. declinata's*, *Flammula*, *Sarrac'ta alba*, *Smaller Water Crowfoot*, *Lesser Spearwort*, (F.) *Petite Douce*.

RANUNCULUS ILYRICUS.

RANUNCULUS LINGUA.

RANUNCULUS LÆTUS, *R. bulbosus*—*r. Nemorosus*, *Anemone nemorosa*—*r. Palustris*, *R. sceleratus*—*r. Pratensis*, *R. acris*.

RANUNCULUS PENNSYLVANICUS, *Bristly Crowfoot*.

RANUNCULUS PRÆCOX, *R. ficaria*.

RANUNCULUS PUBESCENS. Grows in ditches and marshes in South Africa. The expressed juice is used by the Cape Colonists in cancerous ulcers.

RANUNCULUS RUFULUS, *R. acris*.

RANUNCULUS SCELERATUS, *R. Palustris* seu *umbellatus* seu *digitatus* seu *aquat'icus*, *Risus A'pium*, *Hecato'nia palustris*, *Marsh Crowfoot*.

RANUNCULUS SICULUS, *R. acris*—*r. Stëvenii*, *R. acris*—*r. Vernus*, *R. ficaria*—*r. Virginianus*, *Lobelia syphilitica*—*r. Umbellatus*, *R. sceleratus*.

RAPA NAPUS, *Brassica rapa*—*r. Rotunda*, *Brassica rapa*.

RAPE, *Brassica napus*, *Stuprum*.

RAPHANE'DON, from *ραφανις*, 'a radish, like a radish.' *Rhaphanedon*. A transverse fracture of a long bone, leaving no splinters;—what has been called, in France, *Fracture en rave*.

RAPHA'NIA, *Convulsio Raphania*, *Rhaphania*, *Morb'us spasmod'icus malignus* seu *popularis*, *M. Silesiacus*, *Eclampsia typhodes*, *Synclonus Raphania*. Linnæus gives this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raphanus Raphanistrum* seu *sylvestris*, *Raphanistrum scg'etum* seu *arvensë*, *Rapistrum*, being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See *Convulsio cerealis*.

RAPHANIA MAÏZICA, *Pellagra*.

RAPHANIS, *Raphanus hortensis*—*r. Magna*, *Cochlearia armoracia*.

RHAPHANISTRUM ARVENSE, see *Raphania*.

RAPHANUS, *R. hortensis*.

RAPHANUS HORTENSIS, *Raphanus*, *R. sativus* seu *niger*, *Raphanis*, *Rhaphanus*, *Radic'ula*, *Rhaphys*, *Raphys*, *Rhaps*, *Rapys*, *Radish*, (F.) *Raifort*, *Radis*. *Family*, *Cruciferæ*, *Sex. Syst.* *Tetradynamia Siliquosa*. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as anti-scorbutics.

RAPHANUS MARINUS, *Cochlearia armoracia*—*r. Raphanistrum*, see *Raphania*—*r. Rusticanus*, *Cochlearia armoracia*—*r. Sylvestris*, see *Raphania*.

RAPHĒ, *Rhaphē*, 'a suture.' A name given to prominent lines resembling a raised stitch. Such is the raphe or *tramis* which divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Raphe* seu *Linea Media'na* seu *Sutu'ra cor'poris callo'si exter'na* seu *chorda longitudinalis*, is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

RAPHEX, *Chenopodium vulvaria*.

RAPHIANKIS'TRON, from *ραφιον*, 'a needle,' and *αγκιστρον*, 'a hook.' An instrument employed in the formation of artificial pupil.

RAPHION, *Needle*.

RAPHIS, *Needle*.

RAPHYS, *Raphanus hortensis*.

RAPISTRUM, see *Raphania*.

RAPPORT (F.), *Relatio*, *Renunciatio*. A deposition made by a physician or surgeon to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, sudden or violent death, &c. Formerly, there were the *Rapports dénonciatifs*, made at the desire of the injured or their friends, and intended to point out to the judges the details of the crime or misdemeanor,—the *Rapports provisoires*, the object of which was to obtain *provisions* for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution;—and *Rapports mixtes*, or those which were both *dénonciatifs* and *provisoires*. At present, reports or depositions are generally divided into *judiciary*, or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative*, which afford information on subjects relating to any branch of the public administration, as on the nuisance, or otherwise, of certain establishments, the character of any epidemic, &c.

RAPPORT, *Eructation*.

RAPTUS POST-TERGANEUS, *Opisthotonos*.

RAPUM MAJUS, *Brassica rapa*.

RAPUNTIIUM SYPHILITICUM, *Lobelia syphilitica*.

RÁPURE, *Rasura*.

RAPYS, *Raphanus hortensis*.

RAQUETTE, *Cactus opuntia*.

RAREFA'CIENS, *Rarifaciens*, *Aræot'icus*, (F.) *Raréfiant* from *rarus*, 'rare,' and *facere*, 'to make.' Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humours.

RARÉFIANT, *Rarefaciens*.

RARIFACIENS, *Rarefaciens*.

RA'RITAS, (F.) *Rareté*. *Rarity*; scantiness; fewness.

RARITAS DEN'TIUM. A large space between the teeth, which appear to be, and may be, too few.

RASCATIO, *Excretion*.

RASCETA, *Carpus*, *Malleolus*—*r. Pedis*, *Tarsus*.

RASCHA, *Carpus*, *Malleolus*.

RASETA, *Carpus*, *Malleolus*.

RASETTA, *Carpus*, *Malleolus*.

RASH, *Exanthem*—*r. Fever*, *Scarlatina*—*r. Lichenous*, *Lichen*—*r. Mulberry*, see *Typhus*—*r. Nettle*, *Urticaria*—*r. Rose*, *Roseola*—*r. Summer*, *Lichen tropicus*—*r. Tooth*, *Strophulus*.

RASOIR, *Razor*.

RASORISM. The Italian medical doctrine of contro-stimulus, of which Rasori was the founder.

RASORIUM, *Raspatorium*.

RASPATO'RIUM, *Raso'rium*, *Rat'ula*, *Scalprum vaso'rium*, *Xyster*, *Xyste'rinm*, *Xystrum*, *Rad'ula*, *Runci'na*, *Runci'ula*, *Scalprum*, (F.) *Rugine*, *Grattoir*. An instrument used for rasping bones, to detach the periosteum,—either in certain surgical operations, or for anatomical purposes.

RASPBERRY, *Rubus idæus*—*r. Ground*, *Hydrastis Canadensis*—*r. Wild*, *Rubus strigosus*.

RASSETA PEDIS, *Tarsus*.

RASTETA, *Carpus*, *Malleolus*.

RASU'RA, *Xysma, Xysmos*, (F.) *Râpure*, from *radere, rasum*, 'to scrape.' A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasu'ra Cornu Cervi, Hartshorn shavings*.

RASURA, Scobs.

RATAFIA. A liquor prepared by imparting to ardent spirits the flavour of various kinds of fruits, adding sugar.

BATANHY, *Krameria ratanhia*—r. of the Antilles, *Krameria ixina*.

RATE, Spleen.

RATÉLEUX, Spleneticus.

RATÉLIER, see *Dentier*.

RATIO, *Rationalitas*, from *reor, ratus*, 'to think.' A reason, a cause, an explanation, a mode or manner; as *Ratio symptom'atum*, an explanation of the symptoms, — *Ratio meden'di, Genus curatio'nis, Via curandi*; the mode or manner of cure.

RATIO, Reason — r. *Medendi*, see *Ratio* — r. *Symptomatum*, see *Ratio*.

RAT'IONAL, *Rationa'lis*. That which is conformable to reason. This epithet is often opposed to *empirical*; as *rational treatment*. The French, also, say *Signes rationales*, in opposition to *Signes sensibles*. See *Organic*.

RATIONALITAS, Ratio.

RATSBANE, Arsenious acid.

RATTLE, *Râle*.

RATTLES, THE, see *Râle*.

RATTLEBUSH, *Sophora tinctoria*.

RATTLESNAKE, *Crotalus horridus*—r. Leaf, *Goodyera pubescens*—r. Plantain, *Goodyera pubescens*—r. Root, *Nabalus albus, Polygala senega, Trillium latifolium*—r. Weed, *Hieracium venosum*.

RATTLESNAKE'S MASTER, *Agave Virginea, Liatris scariosa, Nabalus albus*.

RATTLEWEED, *Actæa racemosa*.

RATULA, *Raspatorium*.

RAUCE'DO, *Rau'citas, Parapho'nia rauca, Asper'itus Arte'riæ as'peræ, Vox rauca, Branchus, Hoarseness*, (F.) *Enrouement, Raucité*. A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in diseases of the larynx and trachea.

RAUCEDO CATARRHA'LIS. Hoarseness from cold.

RAUCITAS, *Raucedo*.

RAUCITÉ, *Raucedo*.

RAUCOUS, *Raucus*. Hoarse; as a raucous voice—*Vox rauca seu raucis'oua*.

RAVE, *Brassica rapa*.

RAYONNÉ, *Radiated*.

RAYONS SOUS-IRIENS, Ciliary processes.

RAZOR, *Culter Tonsor'ius, Machæ'ris, Norac'ula, Xyrum, Xyrus*, (F.) *Rasoïr*, from *radere, rasum*, 'to shave.' An instrument for shaving. Used in surgery to remove hairs, where they would interfere with any operation.

REACHING, *Vomiturition*.

REACTION, *Reactio*, from *re*, 'again,' and *agere, actum*, 'to act.' An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix nature*. It is certainly dependent on the organic instinctive actions of the frame. It is the state of activity which succeeds the action on the nervous system of certain morbid influences.

REAL'GAR, *Realgal, Arlada, Arladar, Anri-pigmen'tum rubrum, Arsen'icum rubrum facti'tium, Abessi, Sandara'cha Græco'rum, Red Sul-*

*phuret of Mercury*. A violent poison. See *Poison*.

REASON, *Ra'tio, Logos*, (F.) *Raison*. Same etymon as *Ratio*. The faculty or property of the mind by means of which man perceives the distinction between right and wrong, in physics as well as in morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

REBOLEA, Mummy.

REBONA, Mummy.

REBOUTEUR, *Renoueur*.

RECEIV'ER, *Ampulla*, (F.) *Ballon, Réceptient*. In pharmacy, a wide-necked globular vessel, the neck of which widens gradually outwards, to receive the tapering beak of the retort in distillation. Like the retort, the receiver may be *plain* or *tubulated*.

A *quilled receiver* is one that has a tapering tube from its lower surface, which is inserted into a graduated bottle through a cork joint, when it is desirable to know accurately the amount of fluid that has passed over.

RÉCEPTACULA DURÆ MATRIS, Sinuses of the dura mater.

RECEPTAC'ULUM CHYLI, 'receptacle of the chyle;' *R. Pecquet'i seu Pecquetia'num, Diverso'rium Chyli, Stagnum chyli, Sac'culus chy'lifer seu ro'rifer, Saccus lacteus, Al'veus ampullosus seu ampulles'cens, Utric'ulus lacteus, Vesic'ula chyli, Ampul'la chyli'fera seu chyli, Cister'na lumb'a'ris, C. Chyli, Chylocyst'is, Chylodochi'um, Lat'ices lactei, Lumbar cistern, Reservoir of Pecquet*, (F.) *Réservoir du chyle, R. de Pecquet, Citerne lombaire*. A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column. It is the commencement of the duct.

RECEPTAC'ULUM COTUN'NIL. A triangular space, formed by a separation of the two laminae of the dura mater of the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno*.

RECEPTACULUM PECQUETI, R. Chyli—r. *Sellæ equinæ lateribus appositum, Cavernous sinus*.

RECEPTIV'ITY, *Receptiv'itas*, (F.) *Réceptivité*, from *recipere, receptum*, 'to receive.' A word used by Tissot to express the susceptibility of certain organs to receive morbid impressions.

RECEPTUM, *Prescription*.

RECESSIO, *Paroxysm*.

RECESSUS, *Abscess, Sinus*—r. *Sulciformis*, see *Fovea vestibuli*.

RECHAMALCA, *Rachamelca*.

RECHUTE, see *Relapse*.

RECIDIVA MORBI, *Relapse*.

RÉCIDIVE, see *Relapse*.

REC'IPĒ, (L.) (*re*, and *capere*, 'to take.') A Latin word which signifies 'take,' (F.) *Prenez*, and with which prescriptions are commenced. It is, often, represented by R, R̄, and was formerly by 4, the symbol of Jove. See *Abbreviation*.

RÉCIPIENT, *Receiver*.

RECIPROCATIO, VIBRATIONS OF, see *Sound*.

RECLINATIO, *Reclination*—r. *Palpebrarum, Ectropion*.

RECLINA'TION, *Reclina'tio*, from *reclinare*, (*re*, and *clinare*, 'to bend,') 'to bend back.' A mode of operating for the cataract, which consists in applying the needle in a certain manner to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way, that the front surface of the cataract is the upper one and its back surface the lower one.

**RECLUSOR PALPEBRARUM**, Levator palpebræ superioris.

**RECOMPOSITION**, Metasynchronis.

**RECONVALESCENTIA**, Convalescence.

**RECORDATIO**, Memory.

**RECORDATUS**, Memory.

**RECORPORATIVUS**, Metasyncritic.

**RECOVERY**, Restauratio.

**RECREATIO**, Restauratio.

**REC'REMENT**, *Recrémentum*, from *re*, and *cernere*, *cretum*, 'to sift.' A humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluid is said to be *recrémential*, (F.) *Récémenteux*, *Récémentitiel*.

**RECREMENTA VESICÆ**, Urine.

**RECREMENTO-EXCREMENTIT'IAL**. Applied to secreted fluids, as the saliva, bile, &c., which are in part reabsorbed and in part excreted.

**RECREMENTUM**, Recrement.

**RECRUDESCENT'IA**, *Palincoté'sis*, *Recrudescence*, from *re*, 'again,' and *crudus*, 'raw.' An increase of a disease after a temporary remission.

**RECTAL**, *Rectalis*. Appertaining, or relating to, the rectum,—as 'rectal tube.' See Tube, rectal.

**RECTIFICATIO**, *Rectificatio*, from *rectum facere*, 'to make right.' An operation by which certain liquids are purified by distilling them either singly or after admixture with other substances.

**RECTIT'IS**. A hybrid word, from *rectum*, and *itis*, denoting inflammation; properly *architis*, or *proctitis*. Inflammation of the rectum. *Proctitis*, *Proctalgia inflammatoria*.

**RECTOSTENOSIS**, Stricture of the rectum.

**RECTO-VAG'INAL**, *Recto-vaginalis*. That which relates or belongs to the rectum or vagina.

**RECTO-VAGINAL FISTULA** is owing to a preternatural communication between the rectum and vagina, through the above septum.

**RECTO-VAGINAL SEPTUM**, (F.) *Cloison recto-vaginale*, is formed by the junction—back to back—(or by what the French term *adossement*) of the rectum and vagina. It separates these two canals from each other.

**RECTO-VESICAL**, *Recto-vesicalis*. Having relation to the rectum and bladder; as the "recto-vesical fold or pouch" of the peritoneum, between the rectum and bladder.

**RECTUM**; so called from a notion that it is straight. It is not so. *Intestinum Rectum*, *Apeuthys'menos*, *Euthyen'teron*, *Longaon*, *Longas*, *Longanon*, *Archos*, *Cys'saros*, *Princeps*, *Monocolon* (?). The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus*. It is cylindrical, but *sacccated*, as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum. Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Columnæ*, *Columnæ car-nææ* of the Rectum or of Morgagni, (F.) *Colonnes du rectum* ou de Morgagni. They are merely folds of the mucous membrane, between which is a number of *Lacunæ*. The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal*. The veins open, partly

into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fecal matters, as they pass from the colon, which serves as a reservoir.

**RECTUS ABDOM'INIS**, (F.) *Pubio-sternal*, *Sterno-pubien* (Ch.), *Droit de l'abdomen*. A long flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the *linea alba*. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the fascia transversalis. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse aponeurotic intersections. It bends the chest on the pelvis, and conversely.

**RECTUS ANTERIOR BREVIS**, *Rectus capitis internus minor*—r. *Anterior longus*, R. *capitis internus major*—r. *Capitis anticus longus*, R. c. *internus major*.

**RECTUS CAPITIS INTERNUS MAJOR**, R. *internus major*, R. *anterior longus*, *Rectus capitis anticus longus*, (F.) *Trachélo-basilaire*, *Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth, flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the third, fourth, fifth, and sixth cervical vertebræ. It is inserted into the basillary process of the occipital bone.

**RECTUS CAPITIS INTERNUS MINOR**, R. *internus minor*, *Ren'uens*, *An'uens*, R. *anterior brevis*, (F.) *Petit trachélo-basilaire*, *Petit droit antérieur de la tête*. This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basillary process.

**RECTUS CAPITIS LATERA'LIS**, R. *lateralis Fallo'pii*, *Transversalis anticus primus*, *Rectus lateralis*, (F.) *Trachélo-atloïdo-basilaire*, *Atloïdo-sous-occipital* (Ch.), *Droit latéral de la tête*. There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

**RECTUS CAPITIS POST'ICUS MAJOR**, R. *Major*, R. *Capitis post'icus minor* (Albinus), *Spini-azoido-occipitalis*, (F.) *Azoido-occipitale* (Ch.), *Grand droit postérieur de la tête*. A flat, triangular muscle, situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head, inclines it to one side, and causes it to experience a rotary motion, which directs the face to its side.

**RECTUS CAPITIS POST'ICUS MINOR**, R. *minor*, (F.) *Tuber-atloïdo-occipital*, *Atloïdo-occipital* (Ch.), *Petit droit postérieur de la tête*. A flat, triangular muscle, situate beneath the last, which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

**RECTUS CAPITIS POSTICUS MINOR**, R. c. p. *major*—r. *Cruris*, R. *femoris*.

**RECTUS EXTERNUS OCULI**, *Abductor oculi*, *Indignabin'dus*, *Indignator'rius*, *Iracun'dus*, *Oculum movens secun'dus*, *Orbito-extus-scleroticien*. All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus*, (F.) *Droit externe*, *Irascible* ou *Abducteur*, is divided, at its posterior extremity, into two portions, one of which is attached to the

outer part of the foramen opticum, and the other to the sphenoid bone.

**RECTUS FEMORIS**, *Rectus sive Gracilis anterior, Rectus cruris*, (F.) *Ilio-rotundus, Droit antérieur de la cuisse*. A straight muscle, seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

**RECTUS INFERIOR OCULI**, *Depressor oculi, Timidus, Deprimens, Humilis, Oculum movens quartus*, (F.) *Sous-optico-sphéro-scléroticien, Droit inférieur ou abaisseur de l'œil, Muscle humble*, arises below the optic foramen, from the sphenoid bone. It depresses the eye.

**RECTUS INTERNUS OCULI**, *Adductus oculi, Bitorius, Oculi adductor, Oculum movens primus*, (F.) *Orbito-intus-scléroticien, Droit interne de l'œil ou adducteur ou baveur*. It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

**RECTUS SUPERIOR OCULI**, *Attollens oculi, Attollens oculum, Levator oculi, Superbus, Elevator oculi, Oculum movens tertius*, (F.) *Sus-optico-sphéro-scléroticien, Droit supérieur ou élévateur de l'œil, Dédaigneur*, is attached to the circumference of the foramen opticum.

All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary.[?]

**RECTUS INFERIOR FEMORIS**, *Gracilis* — r. *Internus major, R. capitis internus major* — r. *Internus minor, R. capitis internus minor* — r. *Lateralis, R. capitis lateralis* — r. *Lateralis Fallopii, R. capitis lateralis* — r. *Major, R. capitis posticus major* — r. *Minor, R. capitis posticus minor*.

**RECUBITORIUM**, *Anaëtherium*.

**RECUPERATION**, *Restauratio*.

**RECUPERATIVE**, *Recuperatory*, from *recuperatio*, 'recovery.' Restorative. Recovering. Belonging to recovery.

**RECURRENT**, *Recurrens*, from *recurrere*, (*re*, and *currere*), 'to run back.' A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanate.

**RECURRENT ARTERIES**. This name has been given to several arteries of the forearm, and to one of the leg. In the forearm, there are, 1. The *Radial recurrent, Artère récurrente de l'épicondyle* (Ch.), which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *anterior cubital recurrent, A. récurrente de l'épitrochlée* (Ch.), which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *posterior cubital recurrent*, which arises from the preceding artery, or from the eubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *posterior radial recurrent, A. récurrente olécranéenne* (Ch.). It arises from the posterior interosseous, and ascends between the posterior eubital and anconæus muscles. In the leg, — the *Arteria recurrens tibialis, A. récurrente du genou* (Ch.), is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

**RECURRENT BANDAGES** are formed by convolutions of the bandages, which make a kind of cap for the part — as the head — to which they are applied.

**RECURVATIO**, see *Hump*.

**RECUTITUS**, *Apella*.

**REDBEAN**, *Abrus precatorius*.

**REDBERRY**, *Arbutus uva ursi, Gaultheria, Panax quinquefolium* — r. *Bitter, Cornus Florida*

**RED HEAD**, *Asclepias Carassavica* — r. *Root, Celustrus, Sanguinaria Canadensis* — r. *Swamp, Vaccinium oxycoccos*.

**REDIMICULUM**, *Diadema*.

**REDINGOTES ANGLAISES**, see *Condom*.

**REDINTEGRATIO**, *Regeneration, Restauratio*.

**REDIVIA**, *Paronychia*.

**RÉDONNANCE**, *Plethora*.

**REDOUBLEMENT**, *Exacerbation, Paroxysm*.

**REDS**, *Menses*.

**REDUCTIO**, *Taxis* — r. *Præputii Impedita, Phimosis*.

**REDUCTION**, *Reductio, Repositio, Restitutio, Diapylaxis, Diaplasmus, Syntaxis*, from *re*, and *ducere, ductum*, 'to lead.' A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction of a luxation, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis*.

In pharmacy, the process of restoring oxides, chlorides, sulphurets, &c., to the metallic state.

**REDUNDANTIA**, *Plethora*.

**REDUVIA**, *Paronychia*.

**REED MACE**, *Typha latifolia*.

**REFECTIO**, *Restauratio*.

**REFECTIVA**, *Analeptica*.

**REFECTUS**, *Restauratio*.

**REFICIENTIA**, *Analeptica*.

**REFLECTION**, *Duplicature*.

**REFLECTOR EPIGLOTTIDIS**. A muscle, which arises from the arytenoid cartilage and inner part of the thyroid, and is inserted into the lateral edges of the epiglottis.

**REFLEX SYSTEM OF NERVES**, see *Nerves*.

**REFLEXIO PALPEBRARUM**, *Ectropion*.

**REFRACTION**, *Refractio, Photocamp'is, Diapylaxis*, from *re*, and *frango*, 'I break.' The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium, it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

**RÉFRAICHISSANTS**, *Refrigerants*.

**RÉFRIGÉRANT**, see *Alembic*.

**REFRIGÉRANTS**, *Refrigerantia, Psych'tica, Antither'ma, Frigefacientia*, (F.) *Réfruchissants, Réfrigeratifs*, from *re*, and *frigere*, 'to cool.' Medicines which depress the morbid temperature of the body. The chief reputed refrigerants are the *Potassæ Nitras* (?), the *Sodæ Boras* (?), but chiefly the abstraction of caloric by ice and ice-drinks, cold water, cold lemonades, soda-water, and effervescing draughts internally; and externally, cool air, cold water, evaporating lotions, and frigorific mixtures.

**RÉFRIGÉRATIVES**, *Refrigerants*.

**REFRIGERATOR**, see *Alembic*.

**REGENERATIO**, *Reproduction*.

**REGENERATION**, *Regeneratio, Palingenesia, Redintegratio*, from *re*, and *generare*, 'to beget.' Reproduction of a part of the body, which has been destroyed.

**REGIMEN**, from *regere*, 'to govern.' The rational and methodical use of food, and of every thing essential to life; both in a state of health and disease. It is often restricted, in its mean-

ing, to *Diet*. It is sometimes used synonymously with hygiene.

REGINA PRATI, *Spiræa ulmaria*.

REGIO, Region.

REGIO AURICULARIS. The region of the ear.

REGIO BUCCA'LIS. The region of the cheeks.

REGIO CARDIACA, Epigastric region.

REGIO CERVICA'LIS. The region of the neck. The cervical region.

REGIO EPIGASTRICA, Epigastrium.

REGIO FACIA'LIS. The facial region.

REGIO FRONTALIS. The frontal region.

REGIO GASTRICA, Umbilical region — *r.* Hypogastrica, see Hypogastrium — *r.* Hypochondriaca, Hypochondre — *r.* Iliaca, Iliac region — *r.* Inguinalis, Inguinal region — *r.* Ischiadica, Ischiadic region — *r.* Jugalis, Jugal region — *r.* Lumbalis, Lumbi — *r.* Mentalis, Mental region — *r.* Mesogastrica, Umbilical region — *r.* Nasalis, Nasal region — *r.* Nuchæ, Nuchal region — *r.* Nuchalis, Nuchal region — *r.* Occipitalis, Occiput — *r.* Occipitalis inferior, Nuchal region — *r.* Perinaei, Perinaeum — *r.* Præcordiaca, Præcordial region — *r.* Pubis, Pubic region — *r.* Stomachalis, Epigastric region — *r.* Stomachica, Epigastric region — *r.* Temporalis, Temple — *r.* Umbilicalis, Umbilical region.

REG'ION, *Re'gio*. Same etymon. Anatomists have called *regions*, determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium.

REGION OMBILICALE, Umbilical region.

REGIONAL ANATOMY, see Anatomy.

REGLES, Menses — *r.* *Déviés*, Menstruation, vicarious — *r.* *Difficiles*, Dysmenorrhœa.

RÉGLISSE, Glycyrrhiza.

REGLUTINATIO, *Décollement*.

REGNE ANIMAL, see Animal.

REG'ULAR, *Regula'ris*, from *regula*, 'a rule.' According to rule. Applied to the types of a disease, and to the pulse, when according to rule.

REGULAR PRACTIT'IONER. One who practises his profession according to the rules established by law or custom.

REGULUS ANTIMONII, Antimonium.

REGURGITA'TION, *Regurgita'tio*. The act by which a canal or reservoir frees itself, without effort, from substances accumulated in it. Usually, it is applied to the *puking* or *posseting* of infants; and to the *rising* of solids or fluids into the mouth in the adult, — from *re*, and *gorge*, 'the throat.' What is called "vomiting at pleasure" is regurgitation.

The substances brought into the mouth by regurgitation, the French call *Renvois*.

REIN, Kidney.

REINE DES PRÈS, *Spiræa ulmaria*.

REINERZ, MINERAL WATERS OF. Reinierz is a small town in Silesia, three German miles from Glatz. The waters are acidulous chalybeates. The principal springs are the tepid drinking spring, the cold spring, and three bathing springs.

REINFORCEMENT, FASCIC'ULUS OF, *F. Cuneat'us*. A band of fibres from the *corpus innominatum*, or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cineritious substance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the fourth ventricle, and is brought into view by brushing away the

*tuberculum cinereum* or gray matter of the ventricle. The band has received these names owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which it seems to derive new fibres.

REINS, Kidneys, Lumbi.

REJEC'TIO, *Anago'gê*, from *re*, and *jacere*, 'to cast.' Every excretion by the mouth; spitting, expectoration, regurgitation, or vomiting.

REJECTIO SANGUINIS E PULMONIBUS, Hæmoptysis.

REJUVENES'CENTE, *Rejuvenescen'tia*, from *re*, 'again,' and *juvenescens*, 'growing young;' (*juvenis*, 'a youth'). A renewal of youth. The state of being young again. The assumption of the characteristics of youth by the aged.

RELACHEMENT, Relaxation.

RELAPSE, *Hypot'ropê*, *Epist'rophê*, *Hypost'rophê*, *Morbi recidi'va*, *Hypotropias'mus*, from *re*, 'again,' and *labor*, 'I fall down.' The return of a disease, during, or shortly after, convalescence. The French use *Rechute* in this sense; and *Récidive* (*Morbus recidi'vus*) for the return of a complaint, at a greater or less period after the complete restoration of health.

The terms *Relapsing fever*, *Short fever*, *Five-day fever*, *Seven-day fever*, *Bil'ious Remitt'ent fever*, *Remitting Icteric fever*, and *Mild Yellow fever*, have been given to a form of continued fever, which has occasionally appeared epidemically, as in Edinburgh, in 1843 and 1847, and was generally attended with icteric symptoms. The main phenomena disappeared at about the end of a week; but in many cases a relapse occurred about the end of a fortnight. Few died of the affection.

RELAPSING FEVER, see Relapse.

RELATIO, *Rapport*.

RELATION, FUNCTIONS OF, see Function.

RELAX'ANT, *Laxans*, *Malaet'icum*, *Chalas'ticum*, *Paret'icum*, (F.) *Relaxant*, from *re*, and *laxare*, 'to loose.' A medicine which diminishes the tension of organs. Mucilaginous and fatty substances are relaxants.

RELAXANTIA, Emollients.

RELAXATIO CORDIS ET ARTERIARUM, Diastole.

RELAXATION, *Relaxa'tio*. Same etymon. *Chala'sis*, *Chalas'mos*, (F.) *Relachement*. In *Physiology*, relaxation is opposed to contraction. In *Pathology*, it means great looseness of a part.

RELEVEUR DE L'ANUS, Levator ani — *r.* *de la Lèvre inférieure*, Levator labii inferioris — *r.* *du Menton*, Levator labii inferioris — *r.* *de l'Omoplate*, Levator scapulae — *r.* *de la Prostata*, Levator prostatae — *r.* *de l'Urèthre*, Levator urethrae.

RELIQUAT, (F.) The remnant or remains of a disease.

REMAK FIBRES, see Fibres, Remak.

REMANSIO MENSIIUM, Amenorrhœa.

REMÈDE, Clyster, Medicament — *r.* *du Cappelain*, Liqueur hydrargyri nitrici — *r.* *de Durand*, Liqueur anodynes terbinthinatus — *r.* *du Duc d'Antin*, Liqueur hydrargyri nitrici.

REMEDIAL, Medicinal.

REMEDIMATE, Medicinal.

REMEDILESS, Incurable.

REMEDIUM, Juvans, Medicament — *r.* Dentifricium, Dentifrice.

REMEDY, Medicament — *r.* English, Cinchona.

REMISSION, Decline, Remission — *r.* Cordis et Arteriarum, Diastole — *r.* Morbi, Remission — *r.* Virium, Atony.

REMIS'SION, *Remis'sio*, *Epan'esis*, *An'esis*, *Submis'sio*, *Aph'esis*, *En'dosis*, *Remis'sio*, *Meio'sis*, from *remittere*, (*re*, and *mittere*, 'to send'),

'to relax.' In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic, *Remissio morbi*. Diminution in the febrile symptoms, such as occurs in a remittent fever, between the exacerbations.

REMITTENS ICTERODES, Fever, yellow.

REMITTENT, *Remittens*. Same etymon. Any disease which presents remissions.

REMITTENT OF CHILDREN, Fever, infantile remittent.

REMITTENT FEVER, *Febris remittens*, *Epanectus*, *Erac'erbat'ing*, *paroxysmal*, *sub-continual*, *endem'ic*, *endem'ial* or *endem'ical* fever, (F.) *Fiev're rémittente*, is one which strikingly exacerbates and remits, but without intermission. The ordinary bilious fever of the United States is a simple remittent—*Epanectus mitis*, (F.) *Fiev're rémittente simple*.

REMITTENT FEVER, BILIOUS, Remittent fever, see Relapse.

REMITTING ICTERIC FEVER, see Relapse.

REMORA, from *remorari*, (*re*, and *mora*, 'delay,') 'to arrest.' The name of two surgical instruments, intended to retain parts *in situ*. The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring; the other, called *Remora Hilda'ni*, (F.) *Arrêt d'Hildan*, *Echene'is*, was employed to maintain fractures and luxations reduced. It is not now used.

REMORA ARATRI, *Ononis spinosa*.

REN, Kidney.

RENAL, *Renal'is*, from *Ren*, 'the kidney.' That which relates to the kidney.

RENAL ARTERIES, *Emulg'ent Arteries*, are very large and short, and commonly two in number—one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

RENAL CAPSULE, Capsule, renal—*r*. Nerve, see Splanchnic Nerves.

RENAL PLEX'USES, *Emulgent Plexuses*. These are two:—one on each side. They proceed from fasciuli of the solar and celiac plexuses; from the outer side of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

RENAL VEINS, *Emulgent Veins*. These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

RENCIUS, Snoring, Stertor.

REN'CVLUS, *Renic'ulus*, *Ren'ulus*, diminutive of *Ren*, 'a kidney.' A small kidney. A lobe of the kidney.

RENES SUCCENTURIATI, Capsules, renal.

RENICULUS, Reneulus.

RENIFORM, Nephroid.

RENNES, MINERAL WATERS OF. Thermal salines in the department of Aube, France,

containing carbonic acid and chloride of magnesium. Temperature 103 to 121°, of Fahr.

RENNET, *Rennet*, from (G.) *gerinnen*, 'to coagulate.' (?) When the fourth stomach or *Abomasus* of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion—*Rennet*—is added to milk.

RENNET WHEY, see Serum lactis.

RENSELÆRIA, *Leptandra Virginica*.

RENONCULE, *Ranunculus*—*r*. *Lulbense*, *Ranunculus bulbosus*.

RENOUÉE, *Polygonum aviculare*.

RENOUEUR, (F.) *Rebouteur*, *Rhabilleur*. A bone-doctor:—a bone-setter. One who makes a trade of reducing fractures and dislocations.

RENOVATIO, Anæsthesia.

RENUENS, *Rectus capitis internus minor*.

RENULUS, Reneulus.

RENUM ATONIA, Nephratonia—*r*. Paralysis, Nephratonia.

RENUNCIATIO, *Rapport*.

RENVERSEMENT DE LA LANGUE, *Paraglossa*—*r*. *de la Matrice*, Uterus, inversion of the—*r*. *des Papières*, Ectropion—*r*. *du Rectum*, Proctocele—*r*. *de la Vessie*, Exocyste, Exstrophia of the bladder.

RENVOIS, see Regurgitation.

REPANDATIO, Lordosis.

REPARATION, Restauratio.

REPARATIVE, *Repar'atory*. Having the power of restoring or repairing.

REPELLENTIA, Repellents.

REPELLENTS, *Repellent'ia*, *Repercutient'ia*, *Apoerusc'ia*, *Repercus'sives*, (F.) *Répercussifs*, from *re*, and *pellere*, 'to drive.' Medicines which, when applied to a tumefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c., are repellents.

RÉPERCUSSIFS, Repellents.

REPERCUSSIO, Contra-fissura, Repercussion.

REPERCUS'SION, *Repercus'sio*, *Anac'losis*, from *re*, *per*, and *quere*, 'to shake or batter.' Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Délitescence*, *Delitescen'tia*, for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect delitescence differs from metastasis: *Délitescence* of an inflammation or 'sudden disappearance' is distinguished by certain French pathologists from *Resolution*. Repercussion also means *Ballotement*.

REPERCUSSIVES, Repellents.

REPERCUTIEN'TIA, Repellents.

REPLETION, Fulness, Plethora.

REPLI LONGITUDINAL DE LA MENINGE, Falx cerebri.

REPOSITIO, Anaplasia, Reduction, Taxis.

REPOUSSOIR, *Puneh*—*r*. *d'Arêtes*, Probang.

REPRIMENS, Epischetius.

REPRODUCTION, *Reproduc'tio*, *Regenera'tio*, from *re*, and *producere*, (*pro*, and *ducere*.) The function by which living bodies produce bodies similar to themselves. See Generation. As a general remark, it will be found true, that the larger animals are uniparous; and the smaller, which are more exposed to destruction, multiparous. The mammalia being of the same natural class as man, it may be useful to compare them in this respect.

COMPARATIVE TABLE OF REPRODUCTION IN THE CLASS MAMMALIA.

Species.	Age capable of engendering.	Duration of gestation.	Number of young at each birth.	Period of cessation of the function.	
<i>Primates.</i>					
Man .....	14 years	9 months	1 to 3	At a somewhat advanced age.	
Monkeys (large).....	3 years	7 months	Do.		
Do. (long tailed)	2 years	6 months	Do.		
<i>Carnivora.</i>					
Bear .....	2 years	112 days	1 to 4	25 to 30 years.	
Badger .....	.....	.....	3 to 4	20 to 25 years.	
Hedgehog .....	1 year	1 mo. and 10 days	3 to 5	Produces during life.	
Ferret .....	11 months	Do.	5 to 9 twice a year		
Otter .....	.....	3 months	3 to 4	8 to 10 years.	
Pole-cat, Marten, Weasel, and Ermine, Didelphus, Opossum, and Philander, } .....	before 1 year	56 days	3 to 6		
Lion .....	2 years	3 to 4 months	3 to 4		10 years. (?)
Tiger, Leopard } .....	Do.	3 months	4 to 5		Do.
Lynx .....	.....	9 weeks	3 to 4		9 years.
Wild Cat .....	before 1 year	56 days	4 to 6		
Wolf .....	2 years	73 days	5 to 9		15 to 20 years.
Dog, in the most natural state, } .....	10 months	63 days	3 to 6		15 years.
Fox .....	1 year	2 months	Do.		10 or 12 years.
Jackall .....	.....	Do.	5 to 8		
Isatis .....	.....	63 days	6 to 7	3 months (?)	
Phoca .....	.....	.....	2 to 3		
<i>Rodentia.</i>					
Squirrel .....	1 year	45 days	3 to 4 twice a year	Produces during life.	
Flying Squirrel.....	.....	.....	3 to 4	Do.	
Ondatra .....	.....	.....	3 to 5	Lives 6 years.	
Beaver .....	.....	4 months	2 to 3	Lives 8 years.	
Hare .....	1 year	30 days	{ 2 to 4 several } { times a year }		
Rabbit .....	6 months	Do.	4 to 8 do.	Lives 8 or 9 years.	
Rat .....	Do.	5 or 6 weeks	5 to 6 do.	Produces during life.	
Mouse .....	Do.	1 month	Do.	Do.	
Marmot .....	.....	6 weeks	2 to 4	Do.	
Guinea Pig.....	5 to 6 weeks	3 weeks	5 to 8 times a year	Do.	
Dormouse .....	1 year	.....	3 to 5	7 to 8 years. (?)	
Armadilla .....	.....	.....	4 times a year		
<i>Ruminantia.</i>					
Camel .....	4 years	11 months or 1 y'r	1	40 to 50 years.	
Dromedary .....	Do.	Do.	1	Do.	
Buffalo .....	3 years	9 months.	1	15 to 18 years.	
Beef .....	2 years	Do.	1 to 2	9 years.	
Lama .....	3 years	.....	Do.	12 years.	
Reindeer .....	2 years	8 months	1	Lives 16 years.	
Buck and Doe .....	1½ year	Do.	1 to 2	Lives 25 or 30 years.	
Roebuck.....	Do.	5 months	Do.	Lives 12 or 15 years.	
Saiga (Antelope).....	1 year	Do.	Do.	Lives 15 or 20 years.	
Chamois and Wild Goat	Do.	Do.	1, 2, and 3	Lives 18 or 20 years.	
Goat .....	Do.	Do.	Do.	7 years.	
Musimon .....	1½ year	Do.	1 to 2	8 or 10 years.	
Sheep .....	1 year	Do.	Do.	8 years.	
<i>Solipedes.</i>					
Horse .....	2½ years	290 days	1 to 2	25 or 30 years.	
Ass .....	Do.	Do.	Do.	Do.	
Zebra .....	Do.	Do.	Do.	Do.	
<i>Pachydermata.</i>					
Hog .....	9 months or 1 year	4 months	10 to 30	15 years.	
Elephant .....	16 years (?)	9 to 11 months	1 or 2	Lives 70 years. (?)	
Rhinoceros .....	5 years (?)	.....	1 or 2 (?)	Lives 60 years. (?)	
Hippopotamus .....	.....	.....	1	9 months	
Morse .....	.....	.....	1		

## REPULSORIUM, Punch.

REPURGATIO, *Anacathar'sis*, from *re*, and *purigare*, 'to cleanse.' According to Castelli—purigation by transpiration or by expectoration. Medicines producing this effect are called *Repurgantia*.

## REQUIES, Acinesia.

## REQUIETIO, Acinesia.

## RES CONTRA-NATURAM. 'Things against

nature,' (F.) *Choses contre-nature*, are those things which tend to destroy man;—as disease, and every thing connected with it.

RES CULINARIA, Culinary art—r. Medica, Medicina.

RES NATURALES, (F.) *Choses naturelles*. Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

RES NON NATURA'LES, (F.) *Choses non-naturelles*. Those things which, anciently, formed the matter of hygiene. See Non-naturals.

RES VENEREA, Coition — r. Vestiaria, Vestitus.

RÉSEAU, Rete — r. Admirable, Rete mirabile — r. Merveilleux, Rete mirabile.

RESECTIO, Resection — r. Articulorum, see Resection.

RESECTIO, *Resectio*, from *resecare*, (*re*, and *secare*), 'to cut off.' A name, given, especially by the French surgeons, to operations in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones forming irregular joints, are removed with the saw — *Resectio articulorum*, *Decapitatio articulorum*.

RESECTIO, see Amputation.

RESEDA CRISPATA — r. luteola — r. Lanceolata — r. luteola.

RESEDA LUTEOLA, *R. lanceolata* seu *crispata*, *Luteola*, *Weld*, *Dyer's Weed*. A European plant naturalized in the United States, which was at one time used as a diaphoretic and diuretic.

RESERANS, Aperient.

RESERVE AIR, see Respiration.

RESERVOIR DE LA BILE, Gall-bladder — r. *du Chyl*, *Receptaculum chyli* — r. *des Larmes*, *Lachrymal sac* — r. of *Pecquet*, *Receptaculum chyli* — r. *de Pecquet*, *Receptaculum chyli* — r. of the *Thymus*, see *Thymus*.

RESIDENTIA, Sediment.

RESIDUAL AIR, see Respiration.

RESIMUS, Camus.

RESIN, *Resi'na*, *Rheti'nē*. A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of an egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons.

RESIN, CAYENNE, *Caoutchouc* — r. of the *Spruce fir*, see *Pinus abies*.

RESINA, Resin — r. *Abietis*, *Pinus Abies*, *Pinus picea* — r. *Abietis humida*, *Pinus abies* — r. *Abietis sicca*, see *Pinus abies* — r. *Alba*, see *Pinus sylvestris* — r. *Alba humida*, see *Pinus Abies* — r. *Cayennensis*, *Caoutchouc* — r. *Copal*, *Copal* — r. *Elastica*, *Caoutchouc* — r. *Flava*, see *Pinus sylvestris* — r. *Fluida* *Canadensis*, see *Pinus balsamea* — r. *Juniperi*, *Sandarac* — r. *Laricis*, see *Pinus larix* — r. *Lentiscina*, see *Pistachia lentiscus* — r. *Liquida pini balsameae*, see *Pinus balsamea* — r. *Liquidi pini laricis*, see *Pinus larix* — r. *Nigra*, *Colophonia* — r. *Pini*, see *Pinus sylvestris* — r. *Pini empyreumatica liquida*, see *Pinus sylvestris* — r. *Pini abietis sponte concreta*, see *Pinus abies* — r. *Strobilina*, see *Pinus balsamea*, and *Pinus mughos* — r. *Terebinthi*, see *Pistachia terebinthus*.

RESINA'TUM, *Rhetino'ton*. An epithet for wine impregnated with resin, and used by the ancients as a stomachic.

RESINE DE GAÏAC, see *Guaiacum* — r. *Gomart*, see *Bursera gummifera* — r. *de Lierre*, see *Hedera helix*.

RESINOCE'RUM, *Rhetinoce'ron*, from *ρηρην*, 'resin,' and *κερος*, 'wax.' A mixture of resin and wax. — Galen.

RESOLUTIO, Resolution — r. *Membrorum*, *Paralysis*.

RESOLUTIO MORBI. The resolution or disappearance of a disease; especially when without any critical evacuation.

RESOLUTIO ET DIABROSIS VENTRICULI, *Gastromalacia* — r. *Nervorum*, *Paralysis* — r. *Ventriculi autopteptica*, *Gastromalacia* — r. *Virium*, *Dialysis*.

RESOLUTION, *Resolutio*, *Discussio*, from

*resolvere*, (*re* and *solvere*, 'to loosen.') Removal or disappearance, as of a disease. Resolution is one of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition.

RÉSOLUTION DES MEMBRES, *Paralysis*. RESOLVENTIA, *Dissectants*.

RES'ONANCE, (F.) *Retentissement*, *Résonnance*, *Résonnement*, from *re*, 'again,' and *sono*, 'I sound.' 'A return of sound.' A resounding; a reverberation of sounds. A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health,—as detected by auscultation. A thickened and hardened state of the lungs, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchophony*, from *βρονχος*, 'bronchus,' and *φωνη*, 'the voice;' (F.) *Voix bronchique*, *Voix tubaire*, *V. bourdonnante*.

RESONANCE, VIBRATIONS OF, see *Sound*.

RESONITUS, *Contra-fissura*.

RES'ONANT, *Res'onans*, *Res'onus*. (F.) *Retentissant*, *Resonnant*, *Resounding*, see *Resonance*.

RÉSONNANCE, *Resonance*.

RÉSONNEMENT, *Resonance*.

RESORBENS, *Absorbent*.

RESORPTIO, *Absorption*, *Resorption* — r. *Cutanea*, see *Absorption* — r. *Cutis*, see *Absorption*.

RESORP'TION, *Resorp'tio*, from *resorbere*, (*re*, 'again,' and *orbere*,) 'to absorb again.' Absorption of a fluid which has been previously deposited in a part by the exhalants,—as of pus, blood, serum, &c.

RESPIRABLE, *Respirabilis*. Same etymon as *Respiration*. Capable of being breathed. Adapted for respiration.

RESPIRAMEN, *Respiration*.

RESPIRAMENTUM, *Respiration*.

RESPIRATIO, *Respiration* — r. *Abolita*, *Apnoea* — r. *Brevis*, *Dyspnoea* — r. *Difficilis*, *Dyspnoea* — r. *Stertns*, *Stertor* — r. *Stertuosa*, *Stertor*.

RESPIRATIO, *Respiratio*, *Anap'noē*, from *respiro*, (*re*, and *spiro*), 'I take breath.' *Anap'neusis*, *Pneusis spiratio*, *Respiramen*, *Respiramentum*, *Respiratus*, *Respiratus*, *Spiritus*. A function proper to animals, the object of which is, to place the materials of the blood—the mixture of the venous blood with lymph and chyle—in contact with atmospheric air, in order that it may acquire the vivifying qualities that belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles, the *lungs*. In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* and *Expiration*. The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and the disengagement of a quantity of water in the state of vapour. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

The air of respiration has been divided into, first, the *residual air* or that which cannot be expelled from the lungs but remains after a full and forcible expiration, estimated at 120 cubic inches: secondly, the *supplementary or reserve air* or that which can be expelled by a forcible expiration, after an ordinary outbreathing, valued at 130 cubic inches: thirdly, the *breath, tidal or breathing air*, valued at 26 cubic inches: and fourthly, the *complementary or complementary air*, or that which

can be inhaled after an ordinary inspiration, which amounts to 100 cubic inches. This estimate gives 250 cubic inches as the average volume of air which the chest contains after an ordinary expiration.

**RESPIRATION BRONCHIQUE**, see Murmur, respiratory — *r. Exagérée*, see Puerile — *r. Hypervésiculaire*, see Puerile.

**RESPIRATION, JERKING, (F.) R. saccadée**. When the murmur of inspiration, in place of being continuous, is interrupted as by starts, it is called 'jerking.' It is a concomitant of incipient pleurisy, pleurodynia, spasmodic asthma, and tuberculosis of the lung with corresponding pleuritic adhesion.—Walsh.

**RESPIRATION OF THE CELLS**, Murmur, respiratory — *r. Metallic*, *Tintement métallique* — *r. Nulle*, see Murmur, respiratory — *r. Proof*, *Docinasia pulmonum* — *r. Puerile*, see Puerile — *r. Rôpeuse*, see Murmur, respiratory — *r. Rude*, see Murmur, respiratory — *r. Silencieuse*, see Murmur, respiratory — *r. Saccadée*, *R. jerking* — *r. Soufflante*, Murmur, respiratory — *r. Supplémentaire*, see Puerile — *r. Tubal*, see Murmur, respiratory.

**RESPIRATOR**, same etymon. Various instruments, under this name, have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of fine wire tissue.

**RESPIRATORIUM VENTRIS**, Diaphragm.

**RESPIRATORIUS**, Respiratory.

**RESPIRATORY**, *Respirato'rius*, same etymon. Appertaining to respiration. An epithet applied to the murmur heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See Murmur.

**RESPIRATORY, EXTERNAL, NERVE**, see Thoracic Nerves — *r. Internal*, nerves, Diaphragmatic Nerves — *r. Nerve of the face*, Facial Nerve — *r. Superior*, nerve, Spinal Nerve.

**RESPIRATORY TRACT**, *Tractus respirato'rius*. The middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

**RESPIRATUS**, Respiration.

**RESPIRITUS**, Respiration.

**RESSERRÉ, (VENTRE)**, Constipation.

**RESTA BOVIS**, *Ononis spinosa*.

**RESTAGNATIO**, Eruetation.

**RESTAURANS**, Corroborant.

**RESTAURATIO**, *Refec'tio*, *Refec'tus*, *Analep'sis*, *Anatrep'sis*, *Anacom'idæ*, *Analte'sis*, *Anacte'sis*, *Apocatas'tasis*. Restoration of strength, after disease or great fatigue; *Epanortho'sis*, *Recrea'tio*, *Redintegra'tio*, *Restaura'tio virium*. Return of the organs to their normal condition. *Recov'ery*, *Recupera'tion*, *Repara'tion*.

**RESTAURATIO VIRIUM**, see Restauratio.

**REST HARROW**, *Ononis spinosa*.

**RESTIFORMIS**, from *restis*, 'a rope,' and *forma*, 'shape.' Shaped like a rope, as the 'Corpora restiformia.'

**RESTIFORMIS PROCESSUS**, Coracoid.

**RESTITUTIO**, Reduction — *r. Organica*, *Morioplastice* — *r. Partium deperditarum*, *Morioplastice*.

**RESTLESSNESS**, Agitation.

**RESTORATION**, Restauratio.

**RESTORATIVE**, Corroborative.

**RESTRICTIO INTESTINI RECTI** vel **ANI**, Stricture of the rectum.

**RESUMPTIVUS**, *Resumpto'rius*; from *re*, 'again,' and *sumere*, 'to take.' Causing to resume. *Resumptivum*. Any agent calculated to restore flesh and strength to one who has been reduced.

**RESUMPTORIUS**, Resumptivus.

**RESURRECTION-MAN**, Resurrectionist.

**RESURRECTIONIST**, *Resurrection-man*, *Body snatcher*: from *re*, and *urgere*, 'to arise.' An individual who violates the sanctuary of the grave to obtain subjects for dissection.

**RESUSCITATION**, *Resuscita'tio*, from *resuscita're*, (*re*, and *suscitare*, *sursum citare* seu *ciere*,) 'to move up,' 'to stir up anew.' *Revivifica'tion*. The restoration of persons, apparently dead, to life. See Asphyxia and Suffocation.

**RETCHING**, Vomiturition.

**RETE**, Plexus — *r. Malpighii*, *Corpus mucosum*.

**RETĒ**, *Reti'culum*; 'a net;' *Dietyon*, (F.) *Réseau*. A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves when they form a kind of network.

**RETĒ** has also been applied to the *epiploon*.—Castelli.

**RETĒ MAJUS**, *Epiploon*, *gastro-colic*.

**RETĒ MIRAB'ILE**, (F.) *Réseau admirable*, *R. merveilleux*. A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries at the base of the brain.

**RETĒ MIRAB'ILE** vel **RETĒ VASCULO'SUM MALPIGHII** is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

**RETĒ MUCOSUM**, *Corpus mucosum*.

**RETĒ** seu **RETĒ VASCULO'SUM TESTIS**. An irregular plexus or network, formed by the communication of the *Vasa recta* at the upper and back part of the testicle. These *Vasa recta* are sent out at the back part of the testicle, from the convoluted seminal tubes. The *Rete Vasculosum testis* sends out from twelve to eighteen straight tubes, called *Vasa efferentia*, which convey the semen from the testes to the epididymis.

**RETENTIO**, Retention — *r. Aerea*, *Dyspnœa* — *r. Alva*, *Constipation* — *r. Bilis*, *Ischocholia*. **RETENTIO FLUXUS HÆMORRHOÏDALIS**. Suppression of the hæmorrhoidal flux.

**RETENTIO FÆTÛS**, *Dystocia* — *r. Lactis*, *Ischogalactia* — *r. Lochiorum*, *Ischiolochia* — *r. Mensium*, see *Amenorrhœa* — *r. Spermatis*, *Ischospemia* — *r. Sudoris*, *Hydroschesis*.

**RETEN'TION**, *Reten'tio*, *Apolep'sia*, *Apolep'sis*, from *retinere*, (*re*, and *tenere*,) 'to hold back.' Accumulation of a solid or liquid substance, in canals intended for its excretion, or in a reservoir, intended to contain it for a short period.

**RETENTION OF URINE**; *Paru'ria Retentio'nis vesical'is*, *Ischuria vesical'is*, *Retentio Uri'næ*, (F.) *Rétention d'urine*. A disease in which the urine accumulated in the bladder cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete*; in the latter, *incomplete*. Many writers have distinguished three degrees of this affection, to which they have given the names *Dysury*, *Strangury*, and *Ischury*. Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tumours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

**RETENTISSANT**, Resonant.

**RETENTISSEMENT**, Resonance — *r. Auto-phonique*, see *Autophonia*.

**RETIA UTERI**, see *Uterus*.

**RETICULAR**, *Retiform*, *Reticularis*, *Retinns*, *Amphiblestroïdes*, *Dyctoi'des*, *Retifor'mis*, from *rete*, 'a net.' That which resembles a net. An epithet applied to many structures in the body.

**RETICULAR BODY**, *Corpus mucosum*—r. Substance, Cellular tissue.

**RETICULARIA OFFICINALIS**, *Lichen pulmonarius*.

**RETICULUM**: diminutive of *rete*, 'a net.' The *Bonnet* or *Honeycomb bag*—the second stomach of the ruminant animal. See also, *Epiploon*, and *Rete*.

**RETICULUM CUTANEUM**, *Rete mucosum*—r. *Mucosum*, *Rete mucosum*.

**RETIFORM**, *Reticular*.

**RETINA**, from *rete*, 'a net.' *Tunica ret'ina* seu *reticularis* seu *retifor'mis* seu *intima oculi*, *Involucrum reti comparatum*, *Verrucularis membrana*, *Amphiblestroïdes membrana*. A soft, pulpy, grayish, semi-transparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroid; without, however, adhering to either of those parts. It terminates by a defined edge—*margo dentatus*—at the posterior extremities of the ciliary processes. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears to be formed of two laminae; so joined together, that it is almost impossible to separate them. The one—the innermost—is medullary, and pulpy; the other—the outer—is stronger, and fibro-vascular. The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility distributed to the eye is the fifth pair.

**RETINACULA**, see *Retinaculum*—r. *Morgagnii*, see *Fœna* of the valve of *Baubin*.

**RETINACULUM**, from *retinere*, (*re*, and *tenere*), 'to hold back.' A surgical instrument, formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum.—*Sculctet*. *Retinacula* are also band-like extensions of a cellulo-membranous structure, which seem to suspend the ovum in the Follicle of *De Granf*. They appear to correspond to the chalazæ of the egg of the bird.

**RETINACULUM**, *Bride*.

**RETINACULUM TEN'DINUM PERONEORUM**, *Vag'ina malleolaris externa*. The ligamentous sheaths that retain in situ at the outer ankle the tendons of the peroneal muscles.

**RETINITIS**, *Inflamma'tio Ret'inae*, *Amphiblestroiditis*, *Dic'ytitis*, from *retina* and *itis*, a suffix denoting inflammation,—a term of hybrid formation. Inflammation of the retina; an uncommon affection, except as an accompaniment of other forms of ophthalmia.

**RETINOSCOPY**, *Retinoscop'ia*, from *retina*, and *σκοπειν*, 'I view.' Examination of the retina.

**RETINUS**, *Reticular*.

**RETORT**, *Retor'ta*, *Batia*, *Cornu*, *Cornuta*, *Cornesta*, *Cornumusa*, (F.) *Cornue*, from *retorqueo*, (*re*, and *torqueo*, *tortum*), 'I bend back.' A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain*, or have a *tubulure* for admitting substances whilst the distillation is going on. In the latter case, it is said to be *tubulated*, (F.) *Cornue tubulé*.

**RETRAC'TION**, *Retractio*, from *retrahere*, (*re* and *trahere*), 'to draw back.' State of a part, when drawn towards the centre of the body or backwards;—as retraction of the testicles.

Sometimes it is used synonymously with *shortening* or *drawing up*; as in retraction of the thigh.

**RÉTRACTION DE LA MATRICE**, *Retroversio uteri*.

**RETRACTOR ANGULI ORIS**, *Buccinator*.

**RETRACTOR AURIS**, *Posterior Auris*, *Tri-candali's*, *Triceps Auris*, *Retrahens Auriculæ*, *R. Auriculam*, *Secundus propriorum Auriculæ*, *Bicandali's*, *Dep'rimens Auriculæ*, *Proprius Auris externa*, (F.) *Mastoïdo-conchinien*, *Mastoïdo-orculoire* (Ch.), *Auriculaire postérieur*. It consists of one or more small fasciculi or fleshy, thin, somewhat irregular fibres, situated behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

**RÉTRÉCISSEMENT**, *Arctatio*, *Stricture*.

**RETRIMENTA VESICÆ**, *Urine*.

**RETRIMENTUM**, *Excrement*.

**RÉTROCESSION**, *Retroces'sio*, *Retroces'sus*, *Retrogres'sus*, from *retrocedere*, (*retro*, 'backwards,' and *cedere*, 'to give place.')

The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

**RETROCESSUS**, *Retrocession*.

**RETROFLEXIO UTERI**, *Retroversio uteri*.

**RETROGRESSUS**, *Retrocession*.

**RETROPHARYNGE'AL**, *Retropharynge'us*, from *retro*, 'backwards,' and *pharynx*, 'the pharynx.' Relating to parts behind the pharynx,—as '*retropharyngeal abscess*,'—an abscess behind the pharynx.

**RÉTROPULSION DE LA MATRICE**, *Retroversio uteri*.

**RETROVACCINATION**; from *retro*, 'backwards,' and *vaccination*. Vaccination with matter obtained from the cow, after inoculating the animal with vaccine matter from the human subject.

**RETROVER'SIO U'TERI**, *Retroversion of the Uterus*, *Adopt'io Uteri retrovers'a*, *Retroflex'io Uteri*, *Anapod'isis* seu *Anapod'ismus Uteri*, (F.) *Rétroversion*, *Rétraction*, *Obliquité* ou *Rétropulsion de la Matrice*. A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers employed to elevate the fundus not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

**RÉTROVERSION DE LA MATRICE**, *Retroversio uteri*.

REUNIO, Synthesis—r. Partium separatarum, see Synthesis—r. per Primam intentionem, see Intention—r. per Secundam intentionem, see Intention—r. Vasorum, Anastomosis.

REUNION PRIMITIVE, see Intention—r. *Secondaire*, see Intention.

REVASSERIE, Incoherence; see Somnium.

RÊVE, Somnium.

REVEIL, see Sleep—r. *en Sursaut*, see Sleep.

REVELLENT, Derivative.

REVERY, Aphelxia.

REVIVIFICATION, Resuscitation.

RÉVULSIF, Derivative.

REVULSION, *Revul'sio*, from *re*, and *vellere*, 'to pluck;' *Antis'pasis*. The act of turning the principle of a disease from the organ in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose. See Derivation.

REVULSIVE, Derivative—r. Bleeding, see Bloodletting.

REVULSORIUS, Derivative.

REX METALLORUM, Aurum.

REYNOLDS'S SPECIFIC, see Vinum colchici.

RHA, Rheum.

RHABBARUM, Rheum—r. Album, Convulvulus mechoacan—r. Antiquorum, Rheum Rhaponticum—r. Dioscoridis, Rheum Rhaponticum—r. Monachorum, Rumex patientia—r. Nigrum, Convulvulus jalapa—r. Pauperum, Thalictron—r. Sibericum, Rheum—r. Tartaricum Rheum—r. Turcicum, Rheum.

RHABARBE, Rheum—r. *Blanche*, Convulvulus mechoacan—r. *des Moines*, Rumex Alpinus.

RHABDOIDES (SUTURA), Sagittal suture.

RHABILLEUR, *Renouveur*.

RHACHETÆ, Rhachitæ.

RHACHETRUM, Medulla spinalis.

RHACHIÆI, Rhachitæ.

RHACHIAGRA, Rachisagra.

RHACHIALGIA, Rachialgia, Rhachiodynia, Spinal irritation.

RHACHIALGITIS, Spinal irritation, Myelitis.

RHACHIDAGRA, Rachisagra, Rachialgia, Rhachiodynia.

RHACHIOCYPHOSIS, Gibbositas.

RHACHIODYN'IA; from *ραχίς*, 'the vertebral column,' and *δύνη*, 'pain;' *Rhachial'gia*. Pain in the vertebral column.

RHACHIOMYELITIS, Myelitis.

RHACHIOPLEGIA, Paraplegia.

RHACHIOSCOLIOMA, Scoliosis.

RHACHIOSCOLIOSIS, Scoliosis.

RHACHIOSTROPHO'SIS; from *ραχίς*, 'the vertebral column,' and *στροφή*, 'I turn;' *Contor'sio colum'næ vertebra'lis*. Deviation of the vertebral column.

RHACHIOT'OMUS, *Rhachiot'omum*; from *ραχίς*, 'the vertebral column,' and *τομή*, 'incision.' An instrument for opening the vertebral column.

RHACHIPARALYSIS, Paraplegia.

RHACHIPHUMA, Rachiphyma.

RHACHIRRHEUMA, Lumbago.

RHACHIS, Vertebral column—r. *Nasi*, see Nasus.

RHACHISAGRA, Rachisagra.

RHACHI'TÆ, from *ραχίς*, 'the vertebral column;' *Rhachia'i*, *Rachi'tæ*, *Rhache'tæ*, or *Rachia'i*. The muscles of the spine.

RHACHITES, Medulla spinalis.

RHACHITICUS, Rachiticus.

RHACHITIS, Rachitis—r. *Adultorum*, Mollities ossium—r. *Spinalis*, Rachisagra.

RHACHITISMUS, Rachitis.

RHACHOSIS, Rachosis.

RHACHUS, *Rhacus*, *Rhagus*; from *ρησσειν*, 'to tear.' A wrinkle. A laceration of the skin. A lacerated ulcer—*ulcus lac'ernum*.

RHACUS, Rhachus, Wrinkle.

RHÆOCCRANIA, Torticollis.

RHAG'ADES, *ραγάδες*, *Rhaga'dia*; from *ρηγνυμι*, 'to break or rend;' *Scissu'ræ*, *Fissu'ræ*, *Fimæ*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

RHAGADES, see Fissure.

RHAGÈ, *Ragè*; *ραγή*. Same etymon. A suffix denoting violent rupture or discharge, as in *Hemorrhage*, *Menorrhagia*, &c.

RHAGÈ, Fissure.

RHAGES, *Uvæ passæ*.

RHAGODEITIS, Uveitis.

RHAGOÏ'DES, *Rhago'des*, *Rhagoïdeus*, *Rhagicus*, from *ραξ*, 'a grape.' Grape-like; as *Tunica Rhagoïdes*: the uvea. Also, the choroid coat of the eye.

RHAGUS, Rhachus, Wrinkle.

RHAMNUS, *Rhamnus catharticus*, *Spina cervi'na seu domes'tica*, *Rhamnus soluti'vus*, *Spina infecto'ria*, *Cerispi'na*, *Buckthorn*, *Purging buckthorn*, (F.) *Nerprun purgatif*. Family, Rhamnoidæ. Ser. Syst. Pentandria Monogynia. The berries—*Rhamni Baccæ*—have a faint and disagreeable odour; and bitterish, nauseous taste. They are cathartic, and are apt to excite griping, which must be obviated by the use of diluents.

RHAMNUS ALATER'NUS, *R. Hispan'icus*, *Alater'nus latifo'lius*, *Common alaternus*, (F.) *Alaterne*. The leaves have been used as detergents and astringents, in the form of gargle especially.

RHAMNUS FRAN'GULA. The *Black Alder*, *Frangula Alnus*, *Alnus Nigra*, (F.) *Anne noir*, *Bourdane*, *Bourgène*. All the parts of this tree, as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root acts as a cathartic. It has also been employed as an anthelmintic.

RHAMNUS HISPANICUS, *R. alaternus*—r. *Jujuba*, see *Jujube*—r. *Lotus*, see *Jujube*—r. *Ziziphus*, see *Jujube*.

RHANTER, Canthus, (greater.)

RHAPHANEDON, Raphanedon.

RHAPHANIA, Raphania.

RHAPHANIS, Raphanus hortensis.

RHAPHANUS, Raphanus hortensis.

RHAPHE, Raphe, Suture.

RHAPHOSYMPH'YSIS; from *ραφή*, 'suture,' and *συνήψις*, 'union.' Union by suture,—as of the bones of the cranium.

RHAPHYS, Raphanus hortensis.

RHAPONTICUM, Rheum Rhaponticum—r. *Vulgare*, *Centaurea centaurium*.

RHAPONTIQUE, Rheum rhaponticum.

RHAPS, Raphanus hortensis.

RHAPYS, Raphanus hortensis.

RHATANIA; *Krameria ratanhia*.

RHAX, see *Vitis vinifera*.

RHEGE, Cramp, Contusion, Laceration.

RHEGMA, Cramp, Contusion, Laceration, Rhexis—r. *Ligamentare*, *Apospasma*.

RHEGMUS, Cramp, Contusion, Laceration.

RHEMBASMUS, Somnambulism.

RHEMBÈ, *Rhembus*; from *ρηβειν*, 'to wander about.' Irregularity in the return of febrile paroxysms.

RHEMBUS, *Rhembe*.

RHENCHUS, Rattle, Snoring.

RHENXIS, Rattle, Snoring.

RHEON, Rheum.

RHETINE, Resin.

RHETINOCERON, Resinatum.

RHETINOTON, Resinatum.

RHEUM, (pronounced *room*;) *Rheu'ma*, (F.) *Rhume*; from *ρῶν*, 'to flow.' Any thin watery discharge from the mucous membranes or skin; as the thin discharge from the air passages arising from cold.

RHEUM, SALT. A popular name in the United States, like 'tetter,' for various cutaneous affections of the eczematous and herpetic forms more especially. It is at times applied to a kind of chronic psoriasis; and likewise to cutaneous affections in those who immerse the hands in metallic or acid solutions. Webster defines it "a vague and indefinite popular name, applied to almost all the non-febrile cutaneous eruptions which are common among adults, except ringworm and itch."

RHEÛM, *Rhabar'barum*, *Rheon*, *Rha*, *Rhæum*, *Lap'athum orient'le*, *L. Chineu'se*, *Rhabar'barum ve'rum*, *R. Tartar'icum*, *R. Siber'icum*, *R. Tur'cicum*, *Rhubarb*, (F.) *Rhabarbe*. Family, Polygonæ. Sex. Syst. Enneandria Trigynia. The root—*Rheûm*—is the part used in medicine. Its odour is aromatic, peculiar, and rather nauseous; taste, somewhat aromatic, subacid, bitterish, and astringent. It colours the saliva and the urine yellow. It is easily pulverized, and forms a powder of a bright buff-yellow colour. Both water and spirit extract its virtues. Rhubarb root is purgative, stomachic and astringent. (?) It is chiefly used for the properties first mentioned. Externally, the powder is sometimes sprinkled over ulcers, to assist their granulation. Dose, ℞j to ℥ss of the powder. In a smaller dose, it is stomachic.

Numerous species of Rheum, *Rh. palmatum*, *Rh. undulatum*, and *Rh. compactum*, have purgative roots.

The rhubarbs most used in the United States are the Chinese or India Rhubarb—*Rheum Sinen'se* vel *Indicum*; the Russian, Turkey, or Bucharian Rhubarb—*Rheum Rus'sicum* vel *Tur'cicum*; and European Rhubarb.

RHEUM COMPACTUM, Rheum—r. Indicum, see Rheum—r. Palmatum, Rheum.

RHEUM RHAPSO'TICUM, *Rhapont'ic Rhubarb*; *Rhapont'icum*, *Rhabar'barum Dioscor'idis*, *R. Antiqu'rum*, (F.) *Rhapont'ique*, *Rhapontic*. The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the rheum palmatum, and less purgative; for the latter purpose, two or three drachms being required for a dose. French, *Rhapontic*, or *Crimea Rhubarb*, is obtained from this species, as well as from *Rh. undulatum*, and *Rh. compactum*.

RHEUM RUSSICUM, see Rheum—r. Sinense, see Rheum—r. Turcicum, see Rheum—r. Undulatum, see Rheum.

RHEUMA, Catarrh, Diarrhœa, Rheum, Rheumatism. Also, inflammation of a fibrous tissue, as in rheumatism and gout.—Fuchs.

RHEUMA CATARRHALE, Bronchitis, (chronic)—r. Epidemicum, Bronchitis, chronic, Catarrh, epidemic—r. Pectoris, Catarrh—r. Uteri, Leucorrhœa.

RHEUMAPYRA, Rheumatism, acute.

RHEUMARTHITIS, see Rheumatism, acute.

RHEUMARTHROSIS, see Rheumatism, acute.

RHEUMATALGIA, Rheumatism, chronic—r. Arthritic, see Rheumatism, acute.

RHEUMATIC, *Rheumat'icus*, *Rhemat'ic'mal*, (F.) *Rhumat'icale*, *Rhumat'ique*. Belonging to rheumatism; as rheumatic fever. Also, applied to one affected with rheumatism; (F.) *Rhumat'icant*.

RHEUMATIC DIATH'ESIS, *Diath'esis rheumat'ica*. The special condition of the body that gives occasion to rheumatism. It may exist without presenting the usual phenomena in the joints; whilst the heart may be seriously affected.

RHEUMATISM, *Catarrh'o'a*; from *ρῶμα*, 'a defluxion, catarrh.' *Dolor Rheumat'icus et arthrit'icus*, (Hoffman,) *Rheumat'ois*, *Myosot'is*, *Rheuma*, *Myodynia*, (F.) *Rhumatisme*. A kind of shifting phlegmasia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the names *Muscular*, *Articular*, and *Synovial*, which have been applied to it. The disease may be acute, or chronic.

RHEUMATISM OF THE ABDOMEN, Coeliorrhœma.

RHEUMATISM, ACUTE, *Rheumat'ismus acutus*, *Rh. articulo'rum acutus*, *Rh. universa'lis febr'lis*, *Arthro'sia acuta*, *Rheumatismus*, *Rh. inflammato'rius seu hyperæsthen'icus*, *Rheumat'ic Fever*, *Rheumatop'ya*, *Rheumat'ya*, *Febris rheumat'ica inflammato'ria*, *Syn'ocha rheumat'ica*, *Myosot'is*, *Myit'is*, *Canina rheumat'ismus*, *Arthrit'is rheumatismus*, *Arthro-rheumat'ismus*, *Synovit'is rheumatism'alis*, *Hæmo-artirit'is*, (F.) *Rhumatisme aiguë*, *Fèvre rhumatismale*, usually comes on with the ordinary symptoms of fever; soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease (*metastatic rheumatism*) to some internal part, especially to the heart. This tendency must always be borne in mind. Acute rheumatism seldom terminates in chronic; they who are liable to the former are rarely so to the latter, and conversely. The disease will generally run its course in spite of treatment. The usual antiphlogistic plan had better be pursued during the first days of the disease. Blood-letting may be employed, if the vigour of the patient and of the disease seem to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement, and will be found proper in almost all cases. Rheumatic inflammation is very different from other varieties, and this may account for the anomaly. After a few weeks, the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet: at times, acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gouty* or *Arthritic rheumatism* or *Rheumatic gout*, *Rheumat'ic'gia arthrit'ica*, *Rheumat'ic'is*, *Rheumat'ic'is*, *Arthrit'is rheumat'ica seu juven'lis*.

RHEUMATISM OF THE ARM, Brachiorrhœma—r. Arthritic, see Rheumatism, acute—r. of the

Bladder, Cystorrhœma—r. of the Bowels, Enterorrhœma.

RHEUMATISM, CAP'SULAR, *Rheumatismus capsularis*. Rheumatism seated in the lining membrane of the joints and bursæ of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognised by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

RHEUMATISM OF THE CHEST, Pleurodynia.

RHEUMATISM, CHRONIC, *Arthrosia chronica*, *Rheumatismus chronicus* seu *nonfebrilis*, *R. vulgaris* seu *inveteratus* seu *habitualis* seu *frig'idus*, *Rheumatalgia*, *Rheumatodynia*, *Arthrodynia*, *Arthritis arthrodynia*, (F.) *Rhumatisme chronique*, *Rhumatologie*, is attended with pains in the hips, shoulders, knees, and other large joints. These are, sometimes, confined to one joint; at others, shift from one to another, without occasioning inflammation, or fever. In this manner, the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is flannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is perhaps the most successful remedy of all.

RHEUMATISM OF THE EXTREMITIES, Acrorrhœma—r. of the Face, Prosoporrhœma—r. Gouty, see Rheumatism, acute—r. of the Heart, Cardiorrhœma—r. Lead, see Lead rheumatism—r. of the Leg, Scelorrhœma—r. of a Limb, Merorrhœma—r. Local, Merorrhœma—r. of the Loins, Lumbago—r. Metastatic, see Rh. acute—r. of the Neck, Torticolis—r. Partial, Merorrhœma.

RHEUMATISM, PRÆABDOMINAL, (F.) *Rheumatisme pré-abdominal*. Rheumatism of the muscles of the anterior and lateral portions of the abdomen; supposed by MM. Génest and Requin to be the same as the *nervous affection of the peritoneum* of Gooch.

RHEUMATISM OF THE SKIN, see Dermalgia—r. Topical, Merorrhœma—r. of the Uterus, Metorrhœma.

RHEUMATISM, VISCERAL. Rheumatism affecting the muscular or fibrous tissues of the viscera.

RHEUMATISM WEED, *Pyrola maculata*, P. umbellata.

RHEUMATISMAL, Rheumatic.

RHEUMATISMUS, Abdominis, Coeliorrhœma—r. Acutus, Rheumatism, acute—r. Articulorum acutus, Rheumatism, acute—r. Brachii, Brachiorrhœma—r. Cancrosus, Neuralgia faciei—r. Cervicis, Torticolis—r. Colli, Torticolis—r. Cordis, Cardiorrhœma—r. Cruris, Scelorrhœma—r. Dorsalis, Lumbago—r. Extremitatum, Acrorrhœma—r. Faciei, Prosoporrhœma—r. Febrilis, Dengue—r. Inflammatorius seu hypersthenicus, Rheumatismus acutus—r. Intestinalium, Enterorrhœma—r. Intestinalium cum ulcere, Dyscentery—r. Larvatus, Neuralgia faciei—r. Localis, Merorrhœma—r. Membrorum singulorum, Merorrhœma—r. Non febrilis, Rheumatism, acute—r. Partialis, Merorrhœma—r. Pectoris, Pleurodynia—r. Phlegmonodes, Myositis—r. Spurius nervosus, Neuralgia—r. Universalis febrilis, Rheumatism, acute—r. Uteri, Metorrhœma—r. Vesicæ urinariæ, Cystorrhœma

r. Vulgaris seu inveteratus seu habitualis seu frigidus, Rheumatism, chronic.

RHEUMATODYNIA, Rheumatism, chronic.

RHEUMATOPHTHALMIA, *Rheumophthalmia*; from *ρευμα*, 'rheumatism,' and *οφθαλμια*, 'inflammation of the eyes.' Rheumatic ophthalmia.

RHEUMATOPYRA, Rheumatism, acute.

RHEUMATOSIS, Rheumatism.

RHEUMOPHTHALMIA, Rheumophthalmia, Sclerotitis.

RHEXIS, *Rhegma*, *Dirruptio*, *Ruptio*, *Ruptura*, *Rupture*. Rupture of a vessel or organ. Spontaneous opening of an abscess.

RHEXIS OC'ULI. Bursting of the eye from any cause; spontaneous or excited.

RHICNO'SIS, from *ρικνωματι*, 'to become wrinkled;' *Cutis corrugatio*. Wrinkling of the skin from extenuation of the body; or opposed to *εκτασις*, or distension from repletion.

RHIGOS, Rigor.

RHIN, Nasus.

RHINAL'GIA, *Rhinodynia*, from *ριν*, 'the nose,' and *αλγος*, 'pain.' Pain in the nose.

RHINAL'GIA AB INTRU'SIS. Pain in the nose from foreign bodies.

RHINAL'GIA VERMINO'SA. Pain in the nose from worms.

RHINAN'CHONĒ, *Rhinangia*, *Rhinostegnos*; from *σιν*, 'the nose,' and *αγχωνη*, 'narrowness.' Contraction of the nose. Snuffles.

RHINANGIA, Rhinanehne, Snuffles.

RHINCHOS, Rostrum.

RHINENCEPHALIA, Cyclopia.

RHINENCHYSIS, *Rhinechysia*, from *ριν*, 'the nose,' *εν*, 'in,' and *χυω*, 'I pour.' An infusion or injection, made into the nostrils, with a syringe called *Rhinenchites*.

RHINES, Nares.

RHINI'TIS, *Nasitis*, from *ριν*, *ρινος*, 'the nose,' and *ιτις*, denoting inflammation. Inflammation of the nose. Coryza.

RHINITIS ULCEROSA, *Ozæna*.

RHINOBLENNORRHŒA, Rhinorrhœa.

RHINOC'ACĒ, *Coryza scarlatino'sa*; from *ριν*, 'the nose,' and *κακος*, 'evil.' The offensive discharge from the nose, and other symptoms indicating a morbid condition of the Schneiderian membrane that accompany the worst forms of scarlatina.

RHINOCATARRHUS, Coryza.

RHINOCNES'MUS, from *ριν*, 'the nose,' and *κνησμος*, 'itching.' Itching of the nose.

RHINODYNIA, Rhinalgia.

RHINOPHO'NIA, from *ριν*, 'the nose,' and *φωνη*, 'the voice.' A nasal voice, called, also, *Dysphonia immodulata nasalis*, *Paraphonia nasalis*, *Paraphonia vesonans*, *Pellissimus nasistis*, *Mycterophonia*, *Nasistas*, *Vox nasalis*, *Paralalia nasalis*. Speaking through the nose.

RHINOPLAS'TIC, *Rhinoplastica* (ars), from *ριν*, 'the nose,' and *πασσω*, 'I form.' An epithet applied to the operation for forming a new nose. The *Taliacottian operation*, so called because described by Tagliacozzi. It consists in bringing down a portion of flesh from the forehead, and causing it to adhere to the anterior part of the remains of the nose.

RHINOP'TIA, from *ριν*, 'the nose,' and *στροματι*, 'I see.' The act of seeing over the nose. Squinting over the nose.

RHINORRHAGIA, Epistaxis.

RHINORRHAPHY, *Rhinorrhaphia*, from *ριν*, 'nose,' and *ραφη*, 'a suture.' An operation for the removal of epicanthis, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, remo-

ring it, and bringing together the edges of the wound by harelip suture.

**RHINORRICEA**, *Rhinobleunnorchea*, from *ρινος*, 'the nose,' and *ρρω*, 'I flow.' A discharge of limpid mucus from the nose without any inflammatory symptom. A gleet from the nose.

**RHINO'SIS**, from *ρινος*, 'a skin, leather,' or from *ριγος*, 'ragous.' The state of looseness and excess of skin observed in phthisis. — Vogel.

**RHINOSTEGNOSIS**, Rhinanechone.

**RHIPTASMOS**, Jactation.

**RHIPTOLUSIA**, Affusion.

**RHIS**, Nasus.

**RHIZA**, Radix.

**RHIZAGRA**, Punch.

**RHIZOMA**, *Rhizome*, from *ριζα*, 'a root.' The part of the root of a plant, which consists of wood or flesh, as in the carrot.

**RHIZOPHAGUS**, from *ριζα*, 'a root,' and *φαγω*, 'I eat.' One who lives on roots.

**RHIZOTOMIST**, see Simples.

**RHIZOTOMUS**, Apothecary.

**RHOA**, *Punica granatum*.

**RHODELE'ON**, *Oleum rosa'rum*. Oil of roses, or oil impregnated with roses.

**RHO'DIA**, *Rhodi'ola rosea*, *Rosea*, *Rosewort*, (F.) *Rhodiote*. *Sec. Syst.* Diœcia Octandria. The root, *Rosewort*, when dry, has a very pleasant smell, and is slightly astringent. It is not used.

**RHO'DINUS**, *Rho'dins*, *Rosa'ceus*, *Ro'seus*, *Rosa'tus*. Rosy. Formed of, or containing, roses.

**RHODIOLA ROSEA**, *Rhodia*.

**RHODIOLE**, *Rhodia*.

**RHODITES VINUM**. Wine in which roses have been macerated.

**RHO'DIUM LIGNUM**, *Rhodium* or *Rosewood*. The wood or root of a tree supposed to be *Genista Canariensis* of Linnæus. (F.) *Bois de rose*, *Bois de Chypre*. *Family*, Leguminosæ. *Sec. Syst.* Diadelphica Decandria. The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.

**RHODIUS**, *Rhodium*.

**RHODODAPHNIS**, *Nerium oleander*.

**RHODODEN'DRON CHRYSAN'THEMUM**, *R. chrysan'them seu an'rena seu officia'le*, the *Oleander*, *Rose-bay*, *Yellow rhododendron*, *Mountain Laurel*, (F.) *Rosage*, *R. chrysanthe*. *Nat. Ord.* Ericaceæ. *Sec. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose, it produces acro-narcotic symptoms.

**RHODODEN'DRON MAX'IMUM**, *Great Laurel*, *American Rose-bay*. An indigenous shrub, *Order*, Ericaceæ, which flowers in July. It is stimulant and astringent, and has been used by the Indians in gout and rheumatism.

**RHODOMELA PALMA'TA**, *Dulse*, *Saccharine Fucus*. One of the Algæ, eaten in large quantities throughout the maritime countries of the north of Europe, and in the Grecian Archipelago.

**RHODOMELI**, *Mel rosæ*.

**RHODON**, *Rosa centifolia*.

**RHODOSACCHARUM**, *Confectio rosæ gallicæ*.

**RHODOSTACTON**, *Mel rosæ*.

**RHODOSTAGMA**, *Aqua rosæ*.

**RHEA**, *Punica granatum*.

**RHEAS**, *Papaver rhœas*.

**RHOEBDESIS**, Absorption.

**RHEUM**, *Rheum*.

**RHOGMOS**, *Rattle*.

**RHOITES**, *poirus*, a wine impregnated with the pomegranate; from *ραις*, *Pomegranates*, — Dioscorides. A confection, made by boiling the

juice of the pomegranate in honey. — Paulus of Ægina.

**RHOMBOÏDEUS**, from *ρομβος*, 'a rhombus,' whose sides are equal, with two obtuse and two acute angles. *Rhomboideus major* and *minor*, *Rhomboï'des*, *Cervici-dorso-scapulaire*. A muscle situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebra, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciculi, constituting the *Rhomboideus major* and *minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotatory motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

**RHOMBOS**, *ρομβος*. A bandage mentioned by Galen, so called on account of its rhomboidal shape.

**RHONCHIAL**, *Rhoucha'lis*, from *ronchus*, 'rattle.' Relating or appertaining to rhonchus; — as 'rhonchal fluctuation,' the fremitus that occurs through the influence of respiration as an attendant on cavernous rhonchi. — Walshe.

**RHONCHUS**, *Rattle*, *Snoring*, *Stertor*. — *Cavernous*, see Gurgling — *r. Cavernulous*, see Gurgling — *r. Crepitans*, *Râle crépissant* — *r. Crepitans Redux*, see Crepitant — *r. Mucosus*, see *Râle muqueux* — *r. Sibilans*, see *Râle crépissant* — *r. Sibilus*, *Râle sibilant* — *r. Sonorus*, *Râle sonore* — *r. Subcrepitant*, see *Râle muqueux*.

**RHOPALISMUS**, Priapismus.

**RHOPALOSIS**, *Plica*, *Pupul*, *Uvea*.

**RHOPE**, Congestion.

**RHOTACISMUS**, Rotacism.

**RHUBARB**, *Rheum* — *r. Chinese*, see *Rheum* — *r. French*, *Rheum Rhaponticum* — *r. India*, see *Rheum* — *r. Crimea*, *Rheum Rhaponticum* — *r. Monk's*, *Rumex Alpinus*, *Rumex patientia* — *r. Poor man's*, *Thalietron* — *r. Rhapontic*, *Rheum Rhaponticum* — *r. Russia*, see *Rheum* — *r. Turkey*, see *Rheum* — *r. Wild*, *Convulvulus panduratus*.

**RHUBARBE FAUSSE**, *Thalietron* — *r. des Pauvres*, *Thalietron*.

**RHUE**, *Ruta*.

**RHUMATALGIE**, Rheumatism, chronic.

**RHUMATIQUE**, Rheumatic.

**RHUMATISANT**, Rheumatic.

**RHUMATISMALE**, Rheumatic.

**RHUMATISME**, Rheumatism — *r. Aigu*, Rheumatism, acute — *r. Chronique*, Rheumatism, chronic — *r. Préabdominale*, Rheumatism, præ-abdominal — *r. de l'Utérus*, *Metrorrhœuma*.

**RHUME**, *Rheum* — *r. de Cerveau*, *Coryza* — *r. de Poitrine*, *Catarrh*.

**RHUS CORI'ARIA**, *Sumach*, *Shumach*, *Rhus Glabrum*, *Ad'riou*, *Elva-leaved Sumach*, (F.) *Sumac des Corroyeurs*. *Family*, Terebinthaceæ. *Sec. Syst.* Pentandria Monogynia. This is the only species of the genus *rhus* that is innocent. Both the leaves and berries have been used as astringents and tonics.

**RHUS GLABRUM**, *Rh. coriaria*.

**RHUS RADICANS**, *Rhus venia*, *Poison vine* (*America*). This plant is poisonous (see Poisons, Table of), and is extremely acrid, when applied to the skin, producing erysipelas and vesications, and has been used, like the next variety, in paralysis and other nervous affections.

**RHUS SYLVESTRIS**, *Myrica gale*.

**RHUS TOXICODEN'DRON**, *Toxicodend'ron*, *Poison Oak* (*America*), (F.) *Sumac vénéneux*. This plant has been used in paralytic affections and cutane-

ous eruptions. It is poisonous, like the last. Dose, gr. ss to gr. iv.

RHUS VERNIX, Rh. radicans.

RHYPARIA, Rupia, Sordes primarum viarum.

RHYPOS, Sordes.

RHYPTICA, Detergents.

RHYPTICUS, Abstergent.

RHYSIS, Flux.

RHYSMUS, Rhythm.

RHYSSEMA, Wrinkle.

RHYTHM, *Rhythmus, Rhysmus*, 'measured movement.' The order or proportion, as regards time, which reigns between the different movements of an organ—as of the heart;—or of the organism in health and disease. Thus, rhythm is applied to the diurnal variations of the pulse; and to the paroxysmal movements of an intermittent.

RHYTHMICAL, Periodical.

RHYTHMICAL CONTRACTIONS OF MUSCLES, are those that succeed one another after regular intervals.

RHYTHMUS, Rhythm.

RHYTIDOSIS, Rutilidosis.

RIB, Costa—r. False, see Costa—r. Floating, see Costa—r. Sternal, see Costa—r. True, see Costa.

RIBES NIGRUM, *R. ol'idum, Grossula'ria nigra, Cassis*. The Black currant, (F.) *Groseillier noir*. *Sex. Syst.* Pentandria Monogynia. The berries have been recommended in sore-throat, as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

RIBES OLIDUM, *R. nigrum*—r. Officinale, *R. rubrum*.

RIBES RUBRUM, *R. officina'le seu vulga're, Grossula'ria non spino'sa seu rubra*, the Red currant, (F.) *Groseillier rouge*; of which the White is only a variety. It is cultivated, and affords an agreeable fruit. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

RIBES VULGARE, *R. rubrum*.

RIBS, NECK OF THE, *Collum costarum*—r. Short, see Costa.

RICE, *Oryza*—r. Disease, Cholera—r. Ground, see *Oryza*—r. Jelly, see *Oryza*.

RICE WATER, see *Oryza*. The evacuations of cholera have been termed—from their resemblance to rice-water—'rice-water discharges;' and in India, 'congee discharges;'—congee in Hindoostanee meaning 'rice-water.'

RICE WILD, *Zizania aquatica*.

RICHARDSONIA, see *Ipecacuanha*.

RICHLEAF, *Collinsonia Canadensis*.

RICHWEED, *Actæa racemosa, Ambrosia trifida, Collinsonia Canadensis, Pilea pumila*.

RICIN, *Ricinus communis*.

RICINOIDES, *Jatropha curcas*.

RICINUS COMMUNIS. *The Castor oil plant, Catapulta major, Ricinus vulga'ris seu vir'idis, Palma Christi, Faba purga'trix, Cerua, Kerna, Cici*, (F.) *Ricin, Fève purgatif*. *Family*, Euphorbiaceæ. *Sex. Syst.* Monœcia Monadelphica. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds—*Sem'ina Catapultæ majoris seu Ric'ini vulga'ris*—will act as a cathartic; but the oil is alone used. It is obtained by bruising the castor-seeds, previously decorticated, and then expressing the oil without the application of heat. Recently-drawn castor oil, *Oleum de kerva, O. kerr'i'num, Alker'va, Oleum Ric'ini, O. Cic'inum, O. Palmæ liq'uidum, O. de Palmâ Christi*, (F.) *Huile de Ricin*, is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases where

powerfully stimulating purgatives would be injurious. Dose, fʒj to fʒiiss. Hufeland recommends that a drop of croton oil shall be added to an ounce of the oil of poppy, and that the mixture shall be called *O'leum Ric'ini Officina'le*.

At the Cape of Good Hope the oil is obtained from *Ricinus liv'idus*.

A variety of *Ricinus* at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mamma; or of a strong decoction, with which the mammae and the external parts of generation are washed.

RICINUS LIVIDUS, see *Ricinus communis*—r. Major, *Jatropha curcas*—r. Minor, *Jatropha manihot*—r. Viride, *R. communis*—r. Vulgaris, *R. communis*.

RICKETS, Rachitis.

RICKETY, Rachiticus.

RICTUS LUPINUS, see Harelip.

RIDE, Wrinkle.

RIDÉ, Wrinkled.

RIDING (of Bones). *Ossium superposit'io*, (F.) *Chevauchement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities riding over each other, instead of being end to end.

RIGIDITAS, Rigidity.

RIGIDITAS ARTICULORUM, *Aucylo'sis epu'ria*. Stiffness of the joints. False ancylosis.

RIGIDITY, *Rigid'itas*, from *rigere*, 'to stiffen.' Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, (F.) *Roideur cadavérique*, is one of the most certain signs of the cessation of life.

RIGOR, *Rhigos, Algor, Coldness, Cheim'ia*, (F.) *Frisson*. Same etymon. Sensation of cold, with involuntary shivering of the whole body:—a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill, frigus tenuë, perfrigera'tio*.

RIGOR ARTUM, Contractura—r. Cadaverosus, Rigor mortis—r. Corporis mortui, Rigor mortis—r. Emortalis, Rigor mortis—r. Maxillæ inferioris, Trismus.

RIGOR MORTIS, *R. corporis mort'ui, R. cadaverosus, R. emortalis, Necronarce'ma*, (F.) *Roideur ou Raideur cadavérique*. 'Stiffness of death.' Death stiffening. The rigidity of limbs that occurs on dissolution.

RIGOR NERVORUM, Tetanus—r. Nervosus, Tetanus.

RIMA, *Schisma, Schiza*. A fissure, a cleft; as *Rima*, or *Ri'mula Glottidis seu Laryng'is*, 'the opening of the glottis.' *Rima vulvæ, R. magna, Intro'itus, Sinus vulvæ, Scapha, Scaphus seu Fissu'ra magna seu Scissu'ra vulvæ, Schiza*, 'the opening of the vulva.' See *Vulva*.

RIMA CANALIS ORBITARII, Suborbital fissure—r. ad Infundibulum, *Vulva cerebri*—r. Laryngis, *Rima glottidis*—r. Magna, *Vulva*, see *Rima*—r. Transversa Magna Cerebri, Fissure, transverse, of the brain.

RIME, Rhagades.

RIMULA GLOTTIDIS, *Rima glottidis*—r. Laryngis, *Rima glottidis*.

RINEUS, Clottor naris.

RINCIOS, Rostrum.

RING, Sax. *hping, ring*, Germ. Ring, *Cricos*, (F.) *Auneau*. A name given to natural, circular, or roundish apertures, with muscular or aponeurotic parietes, which serve for the passage of some vessel or canal:—as the umbilical ring, inguinal ring, &c.

RINGWORM, *Herpes circinatus*—r. of the

Scalp, Porrigo scutulata—r. Ulcerative, Herpes oedens—r. Vesicular, Herpes præputii.

RIRE ou RIS, Risus—r. Canin, Canine laugh—r. Moqueur, Canine laugh—r. Sardouien, Canine laugh. Risus sardonius—r. Sardouique, Canine laugh.

RISAGON, Cassumuniar.

RISIGALLUM, Orpiment.

RISING, see Regurgitation—r. of the Lights, Cynanche trachealis.

RISE or ELEVATION OF THE PULSE, *Pulsus elevatio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

RISORNIUS NOVUS. Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

RISSIGALLUM, Orpiment.

RISUS, from *ridere, risum*, 'to laugh.' *Gelus, Laughing, Laughter, Laugh*, (F.) *Rire ou Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted respiration, commonly indicating mirth and satisfaction.

RISUS APIUM, Ranunculus sceleratus—r. Caninus, Canine laugh—r. Involuntarius, Canine laugh—r. Sardouicus, Canine laugh—r. Spasticus, Canine laugh.

RITA-CRISTINA. A celebrated double monster, born in Sardinia, in 1829. It lived to be nearly nine months old. Two distinct bodies were united at the pelvis. Below, the monster was single.

RIVER WEED, *Conferva rivalis*.

RIZ, *Oryza*.

ROAN TREE, *Sorbus acuparia*.

ROB, *Rob, Robub, Rohob, Rohob*, (F.) *Extrait des fruits*. This word, of Arabic extraction, means the juice of any fruit thickened to the consistency of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sopa*, and, when not quite so thick, *Defrutum*.

ROB CYNOSBATUS, Confectio rosæ caninæ—r. ex Moris, Diamorion—r. Nucum, Diacaryon.

ROBIN RUN-AWAY, *Glechoma hederacea*.

ROBINIA AMARA, *Family, Leguminosæ. See Syst. Diadelphia Decandria*. The roots of the *Robinia amara* of Cochinchina are bitter, and have been recommended, especially in that country, in diarrhoea and dyspepsia.

ROBINIA PSEUDO-ACA'CIA, *Pseudaca'cia odorata, False Aca'cia, Black Locust, Locust-tree*; native of America. The flowers are said to possess antispasmodic properties.

ROBORANS, Corroborant.

ROBORANTIA, Tonics.

ROBUB, Rob.

ROCELLA, Lichen rocella—r. Tinctoria, Lichen rocella.

ROCHE'S EMBROCATION FOR HOOPING-COUGH. An empirical preparation, composed of *ol. oliv. ℥xvj, ol. succin. ℥viii, ol. caryoph., q. s.* to scent it strongly.

ROCHER, see Temporal bone.

ROCHETTA ALEXANDRINA, Soda.

ROCKET, GARDEN, *Brassica eruca*—r. Roman, *Brassica eruca*.

ROCK ROSE, *Helianthemum Canadense*, H. *Corymbosum*.

ROCOU, Terra Orleana.

RODSCHIEDIA BURSA PASTORIS, *Thlaspi bursa*.

ROGNE, Psora.

ROHAB, Rob.

ROHENA BARK, Swietenia.

ROHOB, Rob.

ROIJUN, see *Strychnos nux vomica*.

ROIJEUR CADAVERIQUE, Rigor mortis. ROISDORFF, MINERAL WATERS OF. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

ROLLER, Bandage, Fascia.

ROMARIN, Rosmarinus—r. *Sauvage, Ledum sylvestre*.

ROME, (CLIMATE OF.) The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed favorable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favourable.

ROMPEURE, Hernia.

RONCE, *Rubus idæus*—r. *Bleue, Rubus cæsius*—r. *de Montagne, Rubus chamæmorus*—r. *Noire, Rubus fruticosus*.

RONCHUS, Snoring, Stertor.

ROND, Round—r. *Grand, Teres major*—r. *Petit, Teres minor*.

RONFLEMENT, Snoring, Stertor, see Rattle—r. *de Diable, Bruit de Diable*.

ROOB, Rob.

ROOF OF THE MOUTH, Palate.

ROOT, Radix—r. *Ague, Aletris farinosa*—r. *Bitter, Apocynum androsæmifolium*—r. *Canada, Aselepias tuberosa*—r. *Red, Celastrus*—r. *Rough, Liatris*—r. of Scarcity, *Beta hybrida*—r. *Squaw, Actæa racemosa*—r. *Sweet, Acorus calamus*—r. *Unicorn, Aletris farinosa*—r. *Yellow, Xanthoriza apiifolia*—r. *Yellow, Jeffersonia Bartoni*.

ROPE BARK, *Dicra palustris*.

ROQUETTE, *Brassica eruca, Soda*.

RORELLA, *Drosera rotundifolia*.

RORIFEROUS, *Rorifer*, (F.) *Rorifère*, from *ros*, 'dew,' and *ferro*, 'to carry.' An epithet given to vessels which pour exhaled fluids on the surface of organs.

RORIFEROUS DUCT, Thoracic duct.

RÖS, Sperm—r. *Calabrinus, Fraxinus ornus*—r. *Solis, Drosera rotundifolia*.

ROSA, R. centifolia—r. *Afzeliana, R. canina*.

ROSA ALBA, *R. usitatissima, R. leucantha*. The *White Rose*, (F.) *Rosier blanc*. *Family, Rosacæ. See Syst. Icosandria Polygynia*. The flowers of this species possess similar but inferior qualities to the damask.

ROSA ARMATA, R. canina—r. *Austriaca, R. Gallica*—r. *Calycina, R. canina*.

ROSA CANINA, *R. sylvestris* seu *sentico'sa* seu *Swartzia'na* seu *Afzelia'na* seu *arma'ta* seu *calyci'na* seu *rubra vulgaris, Cynos'rhodon, Caniru'bus, Caninus Sentic, Cynocyt'isus, Cynospas'tum, Cynos'batos, Dog Rose, Wild Briar, Hip Tree*, (F.) *Rose du chien, Eglantier de chien, E. sauvage*. The fruit of this variety, called *Hepp* or *Hipp*, has a sourish taste, and is formed into a conserve. See Confectio cynosbati. It is seldom employed, except to give form to more active remedies: as to pills, boluses, linctuses, &c.

ROSA CENTIFOLIA; *Heccatomphyl'la, Damask Rose, Rosa Damascena, R. Pallida*, (F.) *Rosier à cent feuilles, Rhodon, Rosa*. The petals of this rose have an extremely fragrant odour, and sub-acidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose water, *Oil of Roses, Otenn Rose*, and the formation of a syrup.

ROSA DAMASCENA, R. centifolia.

ROSA GALICA, *R. Austriaca, Rosa rubra, Red Rose*, (F.) *Rosier de Prusse*. The petals of this variety are astringent; and are used in infusion, conserve, &c.

ROSA LEUCANTHA, R. alba—r. Pallida, R. centifolia—r. Rubra, R. Gallica—r. Rubra vulgaris, R. canina—r. Saltans, Essera—r. Senticosa, R. canina—r. Swartziana, R. canina—r. Sylvestris, R. canina—r. Usatitissima, R. alba.

ROSACE, Roseola.

ROSACEUS, Rhodinus.

ROSAGE, Rhododendron chrysanthemum.

ROSAGO, Nerium oleander.

ROSALIA, Scarlatina.

ROSALLÆ, Scarlatina.

ROSATUS, Rhodinus.

ROSE, Erysipelas—r. Christmas, Helleborus niger—r. Corn, Papaver rhœas—r. Damask, Rosa centifolia—r. Dog, Rosa canina—r. Dog, conserve or confection of, Confectio rosæ caninæ—r. du chien, Rosa canina—r. Rash, Roseola—r. Red, Rosa Gallica—r. Rock, Helianthemum Corymbosum—r. Spots, Spots, red—r. White, Rosa alba.

ROSEA, Rhodia.

ROSEBALM, SCARLET, Monarda coccinea.

ROSEBAY, AMERICAN, Rhododendron maximum.

ROSE DROP, Gutta rosea.

ROSELLINA, Roseolæ.

ROSEMARY, Rosmarinus—r. Marsh, Statice limonium, and S. Caroliniana—r. Wild, Eriocephalus umbellulatus.

ROSENHEIM, MINERAL WATERS OF. Rosenheim is 34 miles S. E. from München, in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.

ROSEOLA, *Ecanthisis Roseola*, *Rose Rash*, (F.) *Roséole*, *Éruption anomale*, *Rosace*, *Fivre rouge*, *Épiflorescence érysipélateuse*. An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving; sometimes, with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, rheumatism, &c., and is of no consequence. See Roseola, Rubeola, and Scarlatina.

ROSEOLA ACNOSA, Gutta rosea.

ROSEOLA ÆSTIVA. The affection which prevails in summer. The eruption is of a darker colour, and is attended with more itching.

ROSEOLA ANNULATA. Characterized by patches in the form of rose-coloured rays, with central areas of the colour of the skin.

ROSEOLA FICOSA, Sycosis—r. Variolosa, Roseolæ.

ROSEOLÆ, *Roseola*, *Roselli'na*, *False measles*, *French measles*, (F.) *Roséole*, *Fausse rougeole*. This name is also given by some to an acute exanthem, midway between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, termed *Rubeolæ* by some. An eruption which often precedes that of small-pox is termed *Roseola Variolosa*.

ROSEOLE, Roseola, Roseolæ.

ROSE PINK, *Chironia angularis*.

ROSES, MILK OF. A cosmetic wash, formed, according to one method, of *subcarbonate of potass*, gr. vj; *oil of almonds*, ℥ij; *essence of bergamot*, ℥ij; *aquæ rosæ*, ℥iij; *orange flower water*, ℥ij. Mix.

ROSEUS, Rhodinus.

ROSEWOOD, Rhodum lignum.

ROSEWORT, Rhodia.

ROSIER BLANC, Rosa alba—r. à Cent feuilles, R. centifolia—r. de Provins, Rosa Gallica.

ROSin, BLACK, Colophonia—r. Brown, Colophonia—r. Weed, Silphium terebinthaceum—

r. White, see Pinus sylvestris—r. Yellow, see Pinus sylvestris.

ROSIO STOMACHI, Cardialgia—r. Ventriculi, Cardialgia.

ROSMARINUM, Rosmarinus.

ROSMARINUS, *R. officinalis* seu *latifolius* seu *hortensis*, *Alchachil*, *Libanotis coronaria*, *Dendrob'anns*, *Rosemary*, (F.) *Romarin*. Family, Labiate. Sec. Syst. Diandria Monogynia. The tops of this plant, *Rosmarinus*, (Ph. U. S.) *Herba Anthos*, have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headaches, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthos*, *av'os*. Its oil—*Oleum Rosmarini*—is official. From two to six or ten drops are given in nervous complaints, rubbed up with sugar.

ROSMARINUS HORTENSIS, Rosmarinus—r. Latifolius, Rosmarinus—r. Officinalis, Rosmarinus—r. Stæchadis facie, Teucrium cretium—r. Sylvestris, Ledum sylvestre.

ROSSALIA, Scarlatina—r. Squamosa, Scarlatina.

ROSSIGNOL. A name given, in France, to an affection to which pressmen are subject. It is a sprain, followed by tumefaction of the radio-carpal joint.

ROSSOLIO, see Spirit.

ROSTRUM, *Rhinchos*, *Rinchos*, *Ramphos*, 'a beak.' (F.) *Bec*. A name given to several old forceps, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corvi'num*, *anati'num*, *psittaci'num*, *vulturin'num*, *cyg'neum* vel *olori'num*, *grui'num*, *lacerati'num*, &c.

ROSTRUM EXTERNUM, Olecranon—r. Porcinum, Acromion—r. Posterius, Olecranon—r. Sphenoidale, Azygos processus.

ROSY BUSH, *Spiræa tomentosa*—r. Drop, Gutta rosea—r. Whelk, Gutta rosea.

ROT, Eructation.

ROT, Grinders', Asthma, grinders'.

ROTACISM, *Rotacism'us*, *Rhotacis'mus*, *Pælis'mus rhotacis'mus*, (F.) *Grassegement*. A vicious pronunciation of the Greek, P, *Rau*, common in the northern parts of England; especially near Newcastle.

ROTACISMUS, *Grassegement*.

ROTA'TOR, from *rota*, 'a wheel.' A name given to several muscles that turn the parts to which they are attached upon their axes;—such as, the oblique muscles of the eye, the pronators, supinators, &c.

ROTATOR, Trochanter.

ROTATORES DORSI. Eleven small muscles on each side of the dorsal vertebræ, which arise from the point or upper edge of each transverse process, and pass to the lower edge of the arch of the vertebræ above, as far as the base of the transverse process. Their action is to rotate the individual vertebræ on each other.

ROTATOIRES FEMORIS, Obturatores—r. Oculi, Oblique muscles of the eye.

ROTULA, Patella, Trochiscos—r. Genu, Patella.

ROTULAD, see Rotular aspect.

ROTULAR, from *rotula*, 'the patella.' Relating or appertaining to the patella.

ROTULAR ASPECT. An aspect towards the side on which the rotula is situated.—Barclay. *Rot'ulad* is used by the same writer, adverbially, to signify 'towards the rotular aspect.'

ROTULE, Patella.

ROTUNDUS, Round.

ROUCCOU, Terra Orleana.

ROUEN, MINERAL WATERS OF. This water, known under the name, *Eau des fontaines de la Martéguerie*, is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

ROUGE, Coleothar — *r. d'Angleterre*, Coleothar.

ROUGÉOLE, Rubeola — *r. Fausse*, Roseolæ.

ROUGEURS, Flush.

ROUGH ROOT, *Liatris*.

ROUILLE, Rubiginous.

ROUND, *Teres*, *Rotundus*, (F.) *Rond*. Anatomists have given this name to many organs whose fibres are collected in round fasciculi. See *Teres*.

ROUND FORAMEN, *Foramen rotundum*. A foramen of the sphenoid bone, a little behind the foramen lacrum superius, which gives passage to the second branch of the fifth pair of nerves, called superior maxillary.

ROUND HEART, *Thaspium atropurpureum*.

ROUND LIGAMENTS OF THE UTERUS, *Ligamenta rotunda Uteri*, (F.) *Cordons sus-pubiens* (Ch.), *Cordons vasculaires*, *Ligaments ronds de l'utérus*. Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the areolar tissue of the groins, mons veneris, and labia majora. These cords are whitish, flattened, and narrower in the middle than at the extremities. According to Mr. Rainey, they are composed chiefly of the striped muscular fibre.

ROUTINE PRACTITIONER, *Routinist*.

ROUTINIST, pronounced *routeen'ist*; (F.) *Routinier*; from (F.) *routine*; 'a regular habit or practice, unvaried by circumstances.' One who practises in such an unvaried manner: — a *routine practitioner*.

RUBBER, INDIAN, *Caoutchouc*.

RUBBING SOUNDS, *Bruit de Frottement*.

RUBEDO, *Rubor*, Redness; from *rubere*, 'to be red.' A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing. Blushing.

RUBEFACIENT, *Erethis'ma*, *Erethis'ticum*, *Rubejaciens*, from *rubere*, 'red,' and *facio*, 'I make.' (F.) *Rubéfiant*. That which produces redness. A medicine which causes redness of the skin. The action is called *Rubefaction*.

RUBÉFIANT, *Rubefacient*.

RUBEOLA, *Rubeola vulgaris*, from *rubere*, 'to be red.' *Rose'ola*, *Exanthe'sis Rubeola*, *Veter'na*, *Blac'e'ie*, *Bovill'æ*, *Morbil'li*, *Searlat'na pustulo'sa*, *S. Mili'a'ris*, *Febris morbillo'sa*, *Typhus morbillosus*, *Phe'nicis'mus*, *Ephy'mata*, *Measles*; (F.) *Rougéole*, *Fièvre morbillense*. One of the major exanthe'mata; generally affecting individuals but once, and produced by specific contagion. The rash usually appears on the fourth, but sometimes on the third, fifth, or sixth day of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from ten to fourteen days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots, somewhat less than the ordinary areolæ of flea-bites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semicircles or crescents. These patches are intermixed with single, circular dots and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passed over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous

of itself; but it is liable to induce pneumonia in winter, and dysentery in summer, which are, at times, very fatal. These are apt to come on at the time of, or soon after, the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. It demands a general antiphlogistic treatment. Willan has pointed out a kind of RUBEOLA SPURIA, which he calls RUBEOLA sine CATARRHO. In this the rash runs its regular course, with little fever or catarrhal affection; affording no certain security about the seventh or eighth day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids and tonics.

RUBEOLÆ, *Roseolæ*.

RUBIA, *R. Tinctorum* seu *peregrina* seu *sylvestris*, *Erythrod'annum*, *Rubia major*, *Radix rubra*, *Dyer's Madder*, *Madder*, (F.) *Garance*. Family, Rubiaceæ. *Sec. Syst.* Tetrandria Monogynia. The roots of this plant have a bitterish, somewhat austere, taste, and a slight, not agreeable, smell. They were formerly considered deobstruent, detergent, and diuretic.

RUBIGINOUS, *Rubiginosus*, from *rubigo*, 'rust.' (F.) *Rouillé*. Rusty. Having the colour of rust. An epithet given to the sputa in certain cases of pneumonia.

RUBINUS VERUS, *Anthrax*.

RUBOR, *Rubedo*.

RUBRICA FABRILIS. A red, heavy, earthy matter, formerly employed for making drying plasters; *Hard Ruddle*, *Red Chalk*.

RUBRICA SINOPICA. A heavy, compact, reddish earth: formerly used in diarrhœa.

RUBRIN, *Hæmatin*.

RUBUS AFFINIS, *R. fruticosus*.

RUBUS ARCTICUS. The *Shrubby Strawberry*, *Baccæ Norlandicæ*. Family, Rosacæ. *Sec. Syst.* Icosandria Polygynia. The fruit is recommended by Linnæus as possessing antiseptic, refrigerant, and antiscorbutic qualities.

RUBUS BATUS, *R. Cæsius*.

RUBUS CÆSIUS, *R. batus*; the *Deuberry plant*, (F.) *Ronce bleue*. The fruit resembles the blackberry in appearance and properties. The bark of the root of *R. Trivialis*, *American Deuberry*, is astringent.

RUBUS CHAMÆMORUS; the *Cloudberry Tree*, *Chamæmorus*, *C. Norvegica*, *Chamædrya*, *Cloudberry*, *Kuot-berries*, (F.) *Ronce de Montagne*. The ripe fruit is sometimes prepared like a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

RUBUS FRAMBESIANUS, *R. Idæus*.

RUBUS FRUTICOSUS, *R. affinis* seu *paniculatus* seu *niger* seu *vulgaris*; the *Common Bramble*, which affords *Blackberries*, (F.) *Ronce noire*. The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villosus*, *American Blackberry*, *High or standing blackberry*, *Hairy American Bramble*, is astringent, and has been used in the last stages of dysentery, and in cholera infantum.

RUBUS IDÆUS, *R. frambesiana*, *Batos*; the *Raspberry*, (F.) *Framboise*, *Ronce*. The fruit of the best varieties is extremely agreeable; and is much used. It was, formerly, called *Batinon moron*.

RUBUS NIGER, *R. fruticosus* — *r. Paniculatus*, *R. fruticosus*.

RUBUS STRIGOSUS, *Wild red raspberry*, of the United States. The leaves are often used as a mild astringent.

**RUBUS TRIVIALIS**, see *Rubus cæsius* — *r. Villosus*, see *Rubus fruticosus* — *r. Vulgaris*, *R. fruticosus*.

**RUCTAMEN**, Eructation.

**RUCTATIO**, Eructation.

**RUCTUATIO**, Eructation.

**RUCTUOSITAS**, see Eructation.

**RUCTUS**, Eructation — *r. Acidus*, *Oxyregmia* — *r. Nidorosus*, *Cnissoregmia*.

**RUDDLE**, **HARD**, *Rubrica fabrilis*.

**RUDOLPHIA FRONDOSA**, *Butea frondosa*.

**RUE**, *Ruta* — *r. Common*, *Ruta* — *r. de Chèvre*, *Galega officinalis* — *r. Goat's*, *Galega officinalis* — *r. Goat's*, *Virginia*, *Galega Virginiana* — *r. Meadow*, *Thalictron* — *r. des Murailles*, *Asplenium ruta muraria* — *r. des Près*, *Thalictron* — *r. Sauvage*, *Ruta*.

**RUFF**, Eructation.

**RUGA**, Wrinkle.

**RUGINE**, Raspatorium.

**RUGISSEMENT**, Rugitus.

**RUGITUS**, *Brycheth'mos*, from *rugire*, *rugitum*, 'to roar.' (F.) *Rugissement*. A Latin word, which ordinarily expresses the roaring of the lion: and which is used, by some medical writers, to designate a particular species of borborygmus compared to it.

**RUGOSE**, Wrinkled.

**RUGOUS**, Wrinkled.

**RUM**, *Tafia*, *Molasses Spirit*. A spirit distilled from sugar, or molasses. See *Spirit*.

**RUMA**, *Mamma*.

**RUMEN**, *Hypogastrium*.

**RUMEX ACETO'SA**, *R. tuberosus* seu *intermedius*, *Lap'athum pratense*, *Common Sorrel*, *Ox'alis Aceto'sa*, *Acetosa vulgaris* seu *pratensis*, *Anac'grisis*, *A. arvensis*, *Sorrel*, *Sour dock*, *Acetosa nostras*, (F.) *Oseille*. Family, *Polygonæ*. *Ser. Syst.* *Hexandria Trigynia*. The leaves are sour, and are used in cookery, and also as a refrigerant.

**RUMEX ACU'TUS**; *Sharp-pointed Wild dock*, *Oxylap'athum*, *Lap'athum*, *L. sylvestrè* seu *acutum*, *Rumex*, *R. paludosus* seu *pusillus*, *Lap'athos*, (F.) *Patience sauvage*. The decoction of the root has long been used in cutaneous affections. It is, sometimes, employed for the cure of the itch.

**RUMEX ÆTNE'NSIS**, *R. scutatus*.

**RUMEX ALPI'NUS**, *Aceto'sa Alp'ina*. The systematic name of the plant that affords the *Monk's Rhubarb*, (F.) *Rhabarbe des Moines*. See *Rumex patientia*.

**RUMEX AQUATICUS**, *Rumex hydrolapathum* — *r. Britannica*, *Rumex hydrolapathum* — *r. Confertus*, *R. patientia* — *r. Dignus*, *Oxyria reniformis* — *r. Glaucus*, *R. scutatus* — *r. Hastatus*, *R. scutatus* — *r. Hastifolius*, *R. scutatus*.

**RUMEX HYDROLAP'ATHUM**, *Water-Dock*, *Hydrolapathum*, *Rumex aquaticus*, *Herba Britannica*, *Rumex Britannica*, *Lap'athum aquaticum*, (F.) *Pareille*, *Patience d'eau*. The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally in some cutaneous affections.

**RUMEX INTERMEDIUS**, *R. acetosa*.

**RUMEX OBTUSIFO'LIUS**, *Lap'athum sylvestrè*, *Blunt-leaved Dock*. The root of this, as well as of *R. crispus*, has similar virtues to that of the other species.

**RUMEX OXYOTUS**, *R. scutatus* — *r. Paludosus*, *R. acutus*.

**RUMEX PATIEN'TIA**, *R. confertus*, *Lap'athum horten'sè*, *Rhabarbarum monachorum*, *Hippolap'athum*, *Patientia*, *Garden Patience*, *Monk's Rhubarb*, (F.) *Patience*. This root, which is supposed to possess the virtues of rhubarb, but in an

inferior degree, is, according to Linnæus, obtained from the *Rumex patientia*; according to Murray, from the *Rumex alpinus*.

**RUMEX PUSILLUS**, *R. acutus*.

**RUMEX SANGUIN'EUS**. The root of the *bloody dock* has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lap'athum sanguineum*, (F.) *Oseille ou Patience Roage*, *Saugbragon*.

**RUMEX SCUTA'TUS**, *R. glaucus* seu *hastifolius* seu *Ætne'nsis* seu *oxyotus* seu *hastatus*, *French Sorrel*, *Aceto'sa rotundifolia* seu *Roma'na* seu *Rotundifolia horten'sis* seu *scuta'ta*, *Lap'athum scutatum* seu *rotundifolia*, *Roman* or *Garden Sorrel*, *Green Sauce*, (F.) *Oseille boucher*, *Oseille ronde*, *Petite O*. Virtues the same as those of the common sorrel.

**RUMEX TUBEROSUS**, *R. acetosa*.

**RUMINATION**, *Rumina'tio*, from *ruma* or *rumen*, 'the gullet.' *Merycis' mus*. A function peculiar to ruminating animals, by which they chew a second time the food they have swallowed. An analogous phenomenon is sometimes seen in man.

**RUMP**, *Croupion* — *r. Bone*, *Coccyx*.

**RUNCINA**, Raspatorium.

**RUNCINULA**, Raspatorium.

**RUNNET**, *Rennet*.

**RUNNING**, *Chursus*, (F.) *Course*. A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.

**RUNUNCULA**, Raspatorium.

**RUPES**, Lips of the Vulva.

**RUP'IA**, *Ulcus atonicum*, *Ecephy'sis Rhy'pia*, *Rhypp'ria*, from *ρυος*, 'filth.' An eruption of large flattish blebs, which contain a fluid—at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.

It requires the use of tonics internally, and of stimulating ointments externally.

**RUPTIBILITAS**, *Fragilitas*.

**RUPTIO**, *Rhexis*.

**RUPTORIUM**, *Cauterium* — *r. Commune*, *Potassa fusa*.

**RUPTURA**, *Ecrexis*, *Hernia*, *Laceration*, *Rhexis* — *r. Corneæ*, *Ceratorrhæxis* — *r. Herniosa*, *Hernia* — *r. Ovarii*, *Oariorrhæxis* — *r. Uteri*, *Uterus*, *rupture of the* — *r. Vaginæ*, *Colporrhæxis*.

**RUPTURE**, *Hernia*, *Rhexis* — *r. du Cœur*, *Cardiorrhæxis* — *r. of the Groin*, *Bubonocèle* — *r. de la Matrice*, *Uterus*, *rupture of the* — *r. Wort*, *Herniaria glabra*.

**RUPTURED**, see *Hernial*.

**RUSCUS**, *R. aculeatus*, *Bruscus*, *Oxymyr'rhinë*, *Oxymyr'sinë*, *Myrtacanth*, *Catan'gelos*, *Myacan'tha*, *Sco'pia re'gia*, *Wild Myrtle*, *Centromyrrinë*, *Butcher's Broom*, (F.) *Petit houx*, *Fragon*. Family, *Smilacæ*. *Ser. Syst.* *Dicæcia Monadelphia*. The root has been recommended as an aperient and diuretic.

**RUSCUS ACULEATUS**, *Ruscus*.

**RUSCUS HYPGLOS'SUM**; *Uvula'ria*, *Hypoglossum*, *Bislîn'gua*, *Bonifa'cia*, *Laurus Alexandr'na angustifolia*, (F.) *Laurier Alexandrin*. Formerly used against relaxed uvula.

**RUSH**, **SWEET**, *Acorus calamus*, *Juncus odoratus*.

**RUSMA**, see *Orpiment*.

**RUSPIN'S STYPTIC**, see *Styptic*, *Ruspini's*.

**RUSPIN'S TINCTURE FOR THE TEETH**. An empirical preparation, composed of *Florentine orris* ʒiij, *cloves* ʒj, *rectified spirit Oij*, *ambergis* ʒj. **RUT**, *Heat*.

**RUTA**, *Ruta graveolens* seu *horten'sis* seu *al'tera*, *Common Rue*, *Peg'anum*, *Besa'sa*, (F.) *Rue*, *Rhue*, *Rue sauvage*. Family, *Rutacæ*. *Ser. Syst.* *Decandria Monogynia*. The plant has a

strong, ungrateful odour, and bitter pungent taste. It is acrid, so as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to ℥ij.

*Uleum Rutæ, distilled Oil of Rue*, is antispasmodic; and, externally, rubefacient. Dose, gtt. ij to vj.

RUTA ALTERA, Ruta—r. Capraria. Galega officinalis—r. Graveolens, Ruta—r. Hortensis, Ruta—r. Muraria, Asplenium ruta muraria.

RUTABULUM, Penis.

RUTA'CEUM, from *Ruta*, 'rue.' Vinegar of rue.

RUTIDOMA, see Rutidosis.

RUTIDO'SIS, *Rytido'sis, Rhytido'sis*, from *ρυτιδω*, 'I wrinkle.' The act of wrinkling; as

*Rutido'ma* means a shrivelled or wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIIA'NA TU'NICA, (F.) *Lame ou Membrane Ruyschienne*. According to Ruysch, and the greater part of his disciples, the choroid coat of the eye is formed of two laminae. His son gave to the inner the name *Tunica Ruyschiana* or *Membrana Ruyschiana* sen *Ruysch'ii*.

*Tunica Cellulosa Ruyschiana* is the areolar substance under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

RYE, Secale—r. Horned, Ergot—r. Spurred, Ergot.

RYTIDOSIS, Rutidosis.

RYTIS, Wrinkle.

S.

S. A. &c., see Abbreviation.

SABADILLA, Veratrum sabadilla, see Veratrina.

SABADILLIN, see Veratrina.

SABATILLA, Veratrum sabadilla.

SABBATIA, Chironia angularis—s. Angularis, Chironia angularis.

SABINA, Juniperus sabina.

SABINE, Juniperus sabina.

SABLÉ, *Maculo'sus*, 'sanded.' Having the appearance as if strewed with sand. The terms *sablé* and *piqueté* are sometimes applied to the brain, when a slice of it exhibits red points as if it had been strewed with red sand. Such is the case in cerebral hyperæmia.

SABOT DE VÉNUS JAUNE, Cypripedium luteum.

SABUCUS, Sambucus.

SABULOUS, *Sabulo'sus, Areno'sus, Psammo'des*. The sandy deposit often seen in the urine.

SABULUM CONARII, see Pineal gland.

SABURA, Saburra.

SABUR'RA, *Sabu'ra, Sordes*. This word signifies, by derivation, coarse sand, or ballast. In its common acceptation, it means *foulness of the stomach*, as it is sometimes called;—vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ, or of the biliary secretion; at others, as a residuum from alimentary substances badly digested. The *Saburral state, Collu'ries gastrica, Cruditates ventric'uli, Gastritis mus*, (F.) *Embarras gastrique, État saburral*, is an accumulation of saburra, (F.) *Saburres gastriques*, in the stomach, which the Humourists considered to be the cause of a number of diseases.

SABURRA VERMINOSA, Helminthiasis.

SABURRATIO, Arenatio.

SABURRES GASTRIQUES, see Saburra.

SAC HERNIAIRE, Hernial sac.

SACCATUS, Eneysted.

SACCHAR, Saccharum.

SACCHARINA, *Saccharolés*.

SACCHAROLÉS (F.), *Sacchari'na*, from *saccharum*, 'sugar.' A name given by MM. Henry and Guibourt to medicines which have sugar or honey for excipient, or for predominant principle. M. Béral so calls an exact mixture of pulverized sugar with other substances also in powder, but in less quantity.

SACCHAROM'ETER, (F.) *Saccharomètre, Pèse-sirop*, from *saccharum*, 'sugar,' and *μετρον*, 'measure.' A hydrometer adapted for determining the density of syrups.

SACCHAROMYCES, Torula cerevisiæ.

SACCHARORRHŒA, Glycyrrhœa—s. Cutanea, Sudor dulcis.

SACCHARORRHŒA LAC'TEA, *Galactorrhœa saccharata*. A secretion of unusually sweet milk.

SACCHARORRHŒA PULMONA' LIS, *Sputum dulcè seu saccharatum*. The copious expectoration of unusually sweet matter from the lungs.

SACCHARORRHŒA URINOSA, Diabetes mellitus.

SACCHARUM, *Sacchar*. From Arabic, or rather Sanserit, *Sa-kur*, 'white earth.' *Suchar, Sacchar, Sutter, Zuchar, Zu'caro, As'sokur, Tigala, Zac'charum, Zozar, Zu'charum, Zuc'carum, Zuchra, Mel arundinaceum, Sugar*, (F.) *Sucra*. The produce of the juice of the *Sac'charum officinarum* vel *officinale* of Linnaeus, *Cal'amus Indicus, Cal'amus Saccharinus, Sugar Cane*, (F.) *Canne à Sucre, Cannamelle; Arundo saccharifera* of Sloane. Family, Gramineæ. Sec. Sgnt. Triandria Digynia) and also of the beet, maple, &c.

True Sugars are those with which alcoholic fermentation may be effected, by the addition of yeast and water. They are:—

Species.	Varieties.
1.....	{ Hard sugar of the cane, maple, beet, chestnut, &c.
2.....	{ Liquid sugar, sugar of malt, of the sweet potato, molasses, honey, &c.
3.....	{ Hard sugar of the grape, ripe fruits, starch, diabetes, &c.
4.....	Hard sugar of the mushroom.

Imperfect sugars are those in which alcoholic fermentation cannot be effected by means of yeast and water.

Species.	Varieties.
1.....	Manna.
2.....	Sugar of Milk.
3.....	Sugar of jelly or glue.
4.....	Liquorice.
5.....	Picromel.

Sugar is prepared from the expressed juice of the sugar-cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is very nutritious, and is employed as an aliment, and as a demulcent

and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspeptics; an evil which does not always occur when the same substance is taken more largely.

SACCHARUM ACER'NUM, *S. Canaden'sē*, *Maple Sugar*, is often used as a demulcent.

SACCHARUM ALBUM, *S. purifica'tum*, *Saccharum* (Ph. U. S.), *White Sugar*, *Refined Sugar*, *Sal Indus*, is the *Loaf Sugar*. *Double-refined Sugar* has been called *Tabarzet*.

SACCHARUM CAN'DIDUM, *S. candum seu cantum seu canthum*, *Al'phenic*, *Nabot*, *Sugar candy*, (F.) *Sucre Candi*, is the crystallized juice of the cane.

SACCHARUM CANDUM, *S. Candidum*—*s. Cantum*, *S. Candidum*—*s. Canthum*, *S. Candidum*—*s. Commune*, *Saccharum non-purificatum*.

SACCHARUM HORDEA'TUM, *Barley Sugar*, *Penides*, *Penid'ium*, *Saccharum penid'ium*, is a variety of sugar candy.

SACCHARUM LACTIS, *Sugar of milk*.

SACCHARUM NON-PURIFICA'TUM, *Muscova'do*, *raw or brown or moist sugar*, is the *S. commu'nē*, *S. rubrum*, *Mel cannae*, or *coarse sugar*.

SACCHARUM OFFICINARUM, see *Saccharum*—*s. Penidium*, *Hordeatum*—*s. Rosaceum*, *Confectio rosæ gallicæ*—*s. Saturni*, *Plumbi superacetæ*.

SACCHARURE, from *saccharum*, 'sugar.' A medicine resulting from the intimate union of sugar with the medicinal principles of alcohol or ethereal tinctures.—Béral.

SACCULATED, Encysted.

SACCULATUS, Encysted.

SACCULI ADIPOSITI, *Fatty vesicles*—*s. Chalicophori*, see *Lacunæ of Bone*—*s. Laryngei*, *Ventricles of the larynx*.

SAC'CVLI MEDICINA'LES, *Bags containing medicinal substances*.

SACCULI MEDULLARES, see *Medullary membrane*.

SAC'CVLUS, diminutive of *saccus*, 'a little sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithes* and *otoconies*: one of these is termed the *sacculus vestibuli*, the other *sacculus*. See *Semicircular canals*.

SACCULUS, *Marsupium*—*s. Cephalicus*, *Cucupha*—*s. Chylifer seu rorifer*, *Receptaculum chyli*—*s. Cordis*, *Pericardium*—*s. Ellipticus*, see *Semicircular canals*.

SAC'CVLUS LARYNG'IS, A cæcal pouch, of variable size, formed by the mucous membrane in the ventricles of the larynx.—Hilton.

SACCULUS MEDICINALIS, *Pulvinar medicatum*—*s. Sphericus*, see *Semicircular canals*—*s. Vestibuli*, *Semicircular canals*.

SACCUS, *Sac*—*s. Coli*, *Cæcum*—*s. Cordis*, *Pericardium*—*s. Herniosus*, *Hernial sac*—*s. Epiploicus*, *Epiploon*—*s. Intestini crassi*, *Cæcum*—*s. Lacrymalis*, *Lachrymal sac*—*s. Lacrumalis*, *Lachrymal sac*—*s. Lacteus*, *Receptaculum chyli*—*s. Mucosus*, see *Bursæ mucosæ*—*s. Pleuræ*, *Pleura*—*s. Venarum cavarum*, *Sinus dexter cordis*—*s. Venarum pulmonalium*, *Sinus pulmonalis*.

SACER; *Sacral*—*s. Ignis*, *Herpes zoster*—*s. Morbus*, *Epilepsy*—*s. Musculus*, *Transversalis dorsi*.

SACERDOTIS PENIS, *Arum maculatum*.

SACHET (F.), *Sac'culus*, 'a bag.' A small bag containing perfumes to be placed among clothes to communicate to them an agreeable odour. The following is a formula for the powder they contain. *Powdered cloves and powdered cassia*, each one ounce; *powdered orris root*, an ounce and a half; *powdered yellow sandal wood*, one drachm; *otto of roses*, twenty-four drops; *oil of lavender*, *oil of bergamot*, each one drachm; *musk*, six grains. A scent-bag.

SACK. A wine used by our ancestors; *Vin sec*. Probably *Sherry*.

SACK, *Saccus*, *Secluso'rium*; *Sax. jac*. A bag or pouch.

SACK, HER'NIAL, *Saccus hernio'sus*, (F.) *Sac herniaire*. An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *cerix* or *neck*, (F.) *Collet*, the narrow portion on the outside of the orifice, where strangulation sometimes occurs: the *body*, (F.) *Corps*, which is the round prominent part; and the *fundus* or *bottom*,—the part opposite to the orifice.

SACK POSSET; from *sack*, 'the wing,' and *posset*. A posset made of sack, milk and other ingredients.

SACK, SEROUS. The shut cavity formed by any serous membrane, as by the pleura or peritoneum.

SACRAD, see *Sacral*.

SACRA FISTULA, *Vertebral column*.

SACRAL, *Sacer*, (F.) *Sacré*. That which belongs or relates to the sacrum. A name given to several parts.

SACRAL ARTERIES are distinguished into 1. The *anterior* or *middle sacral*. *Median Artery of the Sacrum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacro-vertebral articulation, and on the anterior surface of the sacrum. It furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The *lateral sacral arteries*, which are two in number; one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral. They give off *external* and *posterior branches*, which enter the sacral foramina; and *internal branches*, which are distributed to the pyramidalis, sacrum, &c.

SACRAL ASPECT. An aspect towards the region where the sacrum is situated.—Barclay. *Sacrad* is used by the same writer adverbially to signify 'towards the sacral aspect.'

SACRAL EXTREMITIES. The lower limbs.

SACRAL GROOVES, (F.) *Gouttières sacrées*. Two longitudinal excavations, slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

SACRAL NERVES, (F.) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The third and fourth, with branches of the great sympathetic, form the hypogastric plexus. The fifth and sixth (*coccyge'al nerve*) are distributed to the ischio-coccygeus muscle, and to the sphincter and levator ani.

SACRAL PLEXUS, *Sciatic plexus*,—the *sacral portion of the crural plexus* of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *pu'dic*, (F.) *honteux*, and the *lesser sciatic*. It terminates in the great sciatic nerve.

SACRÉ, *Sacral*.

SACROCOCCYGE'AL, *Sacro-coccygeus*. Relating to the sacrum and coccyx.

SACROCOCCYGE'AL ARTICULA'TION is that of

the lower extremity of the sacrum with the superior *facette* of the coccyx. It is closed by two ligaments;—an anterior and a posterior *sacro-coccygeal*.

**SACRO-COSTALIS**, *Sacro-lumbalis*—*s. Fémoral*, *Glutæus major*.

**SACROCOXAL'GIA**, from *sacrum*, 'the os sacrum,' *coxa*, 'the hip,' and *algos*, 'pain;' a hybrid term. Some authors have called this a rheumatic affection of the sacro-iliac symphysis.

**SACROÏLIAC**, *Sacro-ili'acus*. That which relates to the sacrum and ilium.

**SACROÏLIAC ARTICULATION**, **SYM'PHYSIS**, or **SYNCHONDRO'SIS**, *Ilio-sacral articulation*, *symphysis* or *synchondrosis*, is the union of two surfaces;—two inclined planes, broader above than below; one formed by the sacrum, the other by the ilium. Both surfaces are incrustated by an articular cartilage. The bands which strengthen them are the two *sacro-sciatic ligaments*, the *sacro-spinal*, a *sacro-iliac* ligament, and some irregular fibres. The *sacro-iliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacro-iliac articulation, *anterior sacro-iliac ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacro-iliac*.

**SACROISCHIATICUS**, *Sacro-sciatic*.

**SACROLOMBAIRE**, *Sacro-lumbalis*.

**SACROLUMBAR**, *Sacro-lumbal'is*, *Sacro-lombaire*. That which belongs to the sacrum and loins.

**SACROLUMBAR**, *Sacro-lumbal'is*, *Sacro-lumbal'is Muscle*, *Sacro-costa'lis*, *Dorso-trachelian portion of the Sacro-spinal* of Chaussier, (F.) *Lombocosto-trachélien*, *Sacro-lombaire*, is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ilii; to the extremities of the transverse processes of the lumbar vertebrae; to the angles of the eleven inferior ribs; to the tuberosity of the first, and the posterior tubercle of the transverse processes of the last five cervical vertebrae. The *sacro-lumbalis* straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Mus'culi Accessor'ii* vel *Additamentum ad Sacro-lumbalem*, (F.) *Accessoires du Sacro-lombaire*.

From the upper part of the sacro-lumbalis, a fleshy slip, called *Cervical'is descendens*, *Cervical'is descendens Diemerbraeck'ii*, *Transversal'is collatero'lis colli*, *Accessor'ius ad Sacro-lumbalem*, (F.) *Transversaire grêle*, runs up, to be fixed to the transverse processes of the fourth, fifth, and sixth cervical vertebrae, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacro-lumbalis.

**SACROSCIAT'IC**, *Sacro-ischiat'icæ*. That which belongs to the sacrum and ischium.

**SACROSCIATIC LIGAMENTS** are two ligaments, which assist in securing the sacro-iliac articulation. The *great* or *posterior sacro-sciatic ligament* extends from the crista ilii and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less* or *anterior sacro-sciatic liga-*

*ment* arises from the same point, and terminates in the spine of the ischium.

**SACROSPINAL**, *Dorso-trachelian* portion of the sacro-lumbalis.

**SACROSPINAL'IS**. That which relates to the sacrum and spine. Under this name, Chaussier describes the *sacro-lumbalis*, *longissimus dorsi*, *transversalis*, *transverso-spinalis*, and *intertransversalis*. He divides it into three portions.

**SACROTROCHANTÉRIEN**, *Pyramidalis*.

**SACROVERT'EBRAL**, *Sacro-vertebra'lis*. That which relates to the sacrum and the vertebrae.

**SACROVERTEBRAL ARTICULATION** is the junction of the last vertebrae of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Promontory of the Sacrum*, or the *Sacro-vertebral Angle*.

**SACROVERTEBRAL LIGAMENT** is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its use is to maintain the articulation of those two bones *in situ*.

**SACRUM**, *Os sacrum*, *Os basilatrè*, *Os Alagæ*, *Os latum*, *Os clun'ium*, *Ver'tebra magna*, *Abugazi*, *H'eron ost'ion*, *Clunis*, *Subver'tebra*, *Subver'tebrium*, *Vet'ula*; from *sacer*, 'sacred;' because it contributes to protect the genital organs, which were considered sacred, or because it was offered in sacrifice. The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular, situate at the posterior part of the pelvis, and coneave anteriorly. It has,—

1. A *pelvic* or *anterior surface*, which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral*; these are oblique, and decrease in size, from above downwards. Through these pass the anterior branches of the sacral nerves.
2. A *spinal* or *posterior surface*, which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a continuation of the spinous processes of the vertebrae; and below, a triangular notch, where the *sacral canal* terminates. On each side of the surface are four foramina, called *posterior sacral*, which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves.
3. The *vertebral surface* or *base*. Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it is seen the orifice of the *sacral canal*, of a triangular shape, which decreases in width from above downward; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection formed by the union of the base of the sacrum with the last lumbar vertebra, is called the *Promontory*, *Promontorium Ossia Sacri*, *Great Angle of the Sacrum* or *Sacro-vertebral Angle*.
4. A *coccygeal face* or *aper*, (F.) *Face coccygeenne* ou *Sommet*, which is very narrow, and is articulated with the coccyx.
5. *Two lateral margins*, which have, above, a broad, oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

SADDLE, TURKISH, *Sella Turcica*.

SÆPES, Sepes.

SAFFLOW, *Carthamus tinctorius*.

SAFFLOWER, *Carthamus tinctorius*.

SAFFRON, Crocus—s. Bastard, *Carthamus tinctorius*—s. Dyers', *Carthamus tinctorius*—s. Flower, *Carthamus tinctorius*—s. Meadow, *Colchicum autumnale*.

SAFRAN BÂTARD, *Carthamus tinctorius*, *Colchicum autumnale*—s. *des Indes*, *Curcuma longa*—s. *de Mars apéritif*, Ferri subcarbonas—s. *de Mars astringent*, Colcothar—s. *des Prés*, *Colchicum autumnale*—s. *Racine de*, *Curcuma longa*.

SAFRANUM, *Carthamus tinctorius*.

SAFRE, Smalt.

SAGA, Sago.

SAGAPE'NUM, *Sag'apin*, *Serapi'non*, (F.) *Gomme sérapique*. A gum-resin, supposed to be obtained from the *Ferula Persica*. Family, Umbelliferae. Ser. Syst. Pentandria Digynia. Its odour is fetid and alliaceous; taste pungent, bitter, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ℥ss.

SAGAPIN, *Sagapenum*.

SAGE, *Salvia*—s. Indian, *Eupatorium perforiatum*—s. Jerusalem, *Pulmonaria*—s. Tree, *Lantana*—s. Wild, *Salvia Africana*.

SAGE-FEMME, Midwife.

SAGENA, Epiploon.

SAGESSE DES CHIRURGIENS, *Sisymbrium Sophia*.

SAGIMEN VITRI, Soda, subcarbonate of.

SAGIT'TAL, *Sagitta'lis*, *Sagitta'tus*, from *sagitta*, 'an arrow.'

SAGITTAL FURROW, *Sagittal Groove*, (F.) *Gouttière sagittale*, is a channel on the median line of the inner surface of the skull-cap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus*.

SAGITTAL SUTURE, *Obelæ'a sutu'ra*, *O. Raphæ*, *Sutura Virga'ta*, *S. juga'lis*, *S. Rabdoi'des*, *Rhabdoi'des*, *Rhabdoi'des*, *Rhabdoi'deus* seu *Biparieta'lis*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta*, 'an arrow,' because it seems to meet the coronal suture as an arrow meets the string of a bow.

SAGITTA'RIA VARIAB'ILIS, *Arrowhead*, *Arrowleaf*, *Wapata* of Oregon; *Nat. Ord.* Alismaceæ; esculent, yielding fecula like arrow-root. The roots are cooling and sub-astringent, and are at times applied to the feet in cases of yaws and dropsical swellings of the legs. The leaves are applied to the breasts to dispel milk.

SAGITTA'RIMUM ALEXIPHAR'MACUM, *Malac'cæ radix*, *Canna In'dica*, *Arun'do Indica*. A root cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

SAGITTATUS, *Sagittal*.

SAGO, *Sagus*, *Saga*, *Sagu*, *Segu*, *Am'ylum palm'ceum*, (F.) *Sagon*, *Sague*. A fecula, obtained from the pith of the *Sagus rumph'i*, *Cycas circina'lis*, *C. revoluta*, &c., growing in the Moluccas, Philippine Isles, &c., and which is brought to us in small grains. The same substance is, also, obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile,

calculus, and other disorders. It is made palatable by sugar, lemon-juice, or wine, where the last is not contra-indicated.

To make sago into a proper mucilage for the sick, a tablespoonful of it should be macerated in a pint of water for two hours, and then boiled for fifteen minutes, stirring assiduously. Care must be taken, that the grains are perfectly dissolved by long boiling and constant stirring.

*Sago posset* is made by putting *sago*, ℥ij, into water, Oij; boiling until the mucilage is formed: then rubbing sugar, ℥ss, on the rind of a lemon, and putting it with *tincture of ginger*, f℥j, into sherry, Oss; adding this mixture to the mucilage, and boiling for five minutes.—It is a good restorative.

SAGO, FRENCH, see *Solanum tuberosum*, and Arrow-root, common—s. Portland Island, see *Arun maculatum*.

SAGOU, Sago.

SAGU, Sago.

SAGUE, Sago—s. *Petit*, see *Solanum tuberosum*.

SAGUS, Sago—s. *Rumphii*, see Sago.

SAHARA, *Insomnia*.

SAIGNÉE, Blood-letting—s. *Spoliative*, *Spoliativa phlebotomia*.

SAIGNEMENT DU NEZ, *Epistaxis*.

SAILORS, DISEASES, &c., OF. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be warded off by proper attention to cleanliness and ventilation.

SAIN BOIS, *Daphne gnidium*—s. *Doux*, *Adeps preparatus*.

SAINT AMAND, MINERAL WATERS OF. Sulphuretted waters, in the department of Du Nord, France. They contain carbonic and sulphohydric acids. The *Boue* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82° Fahr.

SAINT AUGUSTINE, CLIMATE OF. This sea-port of Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent north-east storms. There are only a few days, however, in winter, in which the invalid cannot take exercise in the open air. Tampa Bay, and Pensacola, in Florida, and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

SAINT CHARLES'S ROOT, *Carlo Sancto* (Radix).

SAINT CROIX, Santa Cruz.

SAINT JAMES'S WORT, *Senecio Jacobæa*.

SAINT JOHN'S DANCE, see *Mania*, dancing—*St. John's Wort*, *Hypericum perforatum*.

SAINT KITTS, see West Indies.

SAINT LEONARD'S, CLIMATE OF. This place, which is situate about a mile to the westward of Hastings, in Sussex, England, is less sheltered than it, and is therefore a less favourable retreat, during the winter months, for the phthisical valetudinarian.

SAINT MYON, MINERAL WATERS OF. Some cold, acidulous waters at Saint Myon, near Riom, in the department of Puy-de-Dôme. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

SAINT NECTAIRE, MINERAL WATERS OF. Springs in the department of Puy-de-Dôme France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103° Fahr.

SAINT PARDAUX, MINERAL WATERS

OF. Chalybeate springs in the department of Allier, France. They contain carbonic acid and iron.

SAINT SAUVEUR, MINERAL WATERS OF. Sulphurous waters in the department of Hautes-Pyrénées, France. Temperature, 76° to 93° Fahr.

SAINT VINCENT'S, see West Indies.

SAINT VITUS'S DANCE, Chorea, see Mania, dancing—s. Vitus's Dance of the Voice, Balbuties.

SAIRE, Essera.

SALAAM CONVULSION, see Convulsion, Salaam.

SALAB, Salep.

SALACITAS, Satyriasis—s. Vulvæ, Nymphomania.

SALAD, CORN, Valeriana dentata.

SALAP, Salep.

SALCOMBE, (CLIMATE OF.) A small place—the Montpelier of Huxham—which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisical invalid as a winter retreat.

SALEP, *Saloop'* (so pronounced.) *Salab, Salap.* The prepared bulb of the *Orchis mascula* and other species of *Orchis*. The salep of Cachmere is from a species of *Enloph'ia*. Salep is in small, irregular, hard masses. In its composition in relation to water, it is closely analogous to tragacanth. It is possessed of similar virtues with sago, tapioca, &c. The mucilage is prepared by dissolving the powdered salep in hot water, with assiduous stirring, and adding to the solution sugar and milk.

SALER'NUM, (SCHOOL OF.) An ancient school of medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which medicine was taught. It was much celebrated, especially in the 12th century. The work on hygiene, "*De Conservandâ Valetudine*," which bears its name, has passed through several editions in various languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses.

SALICARIA, Lythrum salicaria.

SALICINE, see Salix.

SALICORNIA ARABICA, &c., see Soda.

SALINE', *Salinus, Salinac'ius, Salinac'idus, Salit'us, Salsas, Hal'inus, Halmy'rus, Halico'des, Sal'uous*, from *sal*. That which contains a salt, or has the properties of a salt.

SALINE DRAUGHT OF MIXTURE. This may be made as follows:—*Potassæ carbon. ʒj, acid. citric. vel tartar. gr. xv, vel succ. limon. recent. ʒss, aquæ fʒviij, syrnp. cjujusvis ʒj. M.* Given in divided doses as a febrifuge.

SALINE EFFERVESCING DRAUGHT OR MIXTURE is made by adding a due proportion of either of the acids above mentioned, or of lemon-juice, to the proper proportion of the carbonate of soda or potassa. About 25 grains of the acid saturate 30 grains of the carbonate. See Powders, soda.

SALINOUS, Saline.

SALIS AMMONIACI FLORES, Ammoniacæ carbonas.

SALITIO, Leap.

SALITUS, Saline.

SALIUM, Saliva.

SALIUNCA, Valeriana Celtica.

SALIVA, *Si'alon, Si'elon, Si'alo'ma, Ptyama, Pty'alon, Pty'elon, Sal'ivum, Sputa'mea, Sputamen'tum, Sputum, Spittle.* An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992.2 parts of water, 2.9 of a particular animal matter, soluble in water, and insoluble in alcohol, *pty'alin, pty'alinum salivæ'te,*

*materia sialiva*, of 1.4 of mucus, 1.7 of chlorides of potassium and sodium, 0.9 of lactate of soda and animal matter, and 0.2 of soda.

SALIVÆ FLUXUS CIBO VISO, see Salivation.

SALIVAIRE, Salivary.

SALIVAL, Salivary.

SALIVANS, Sialagogue.

SALIVANT, Sialagogue.

SALIVARIS, Salivary — s. Herba, Anthemis pyrethrum.

SALIVARY, *Saliva'rius*, *Saliva'ris*, *Salivo'rus*, *Salival*, *Salivous*, from *saliva*, (F.) *Salivaire*. That which belongs to the saliva.

SALIVARY CALCULI, see Calculi, salivary.

SALIVARY FISTULE, *Sialosyrin'ges*, are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Fistulæ are most commonly met with in the duct of Steno.

SALIVARY GLANDS, *Secreting organs of the saliva*, *Salival glands*, are situate symmetrically, to the number of four, on each side of the face. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts — *Ductus Saliva'rii*, (F.) *Canaux ou Conduits salivaires*, carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into.—1. The *parotid*; 2. The *submaxillary*; 3. The *sublingual*; and 4. The *intra-lingual* or *lingual*, seated at the inferior surface of the tongue, where the mucous membrane forms a fringed fold.

SALIVATIO, Salivation—s. Mercurialis, Salivation, mercurial.

SALIVATION, *Saliva'tio*, *Saliva'tio cal'ida*, *Epiph'ora ptyalis'mus*, *Sialis'mus*, *Sputum Oris*, *Sial'achus*, *Sielismos*, *Sialorrhœ'a*, *Sialoz'e'mia*, *Ptyalis'mus*, *Pty'alism*, *Fluxus salivæ*, (F.) *Flux de Bouche*, *Flux salivaire*. A superabundant secretion of saliva; occasioned either locally, by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially of mercurial preparations. In this last case it is accompanied by a coppery taste in the mouth, by swelling of the gums, and sometimes by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

*Ptyalismus acutus sympathet'icus*, *Salivæ fluxus cibo viso*, *Mouth watering*, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyalismus acutus mellitus*, *Apoceno'sis ptyalis'mus mellitus*, or *Sweet spittle*. In this the saliva has a sweet or mucilaginous taste.

SALIVATION, MERCURIAL, *Saliva'tio mercuria'lis*, *Sialoz'e'mia mercurialis*, *Ptyalis'mus mercuria'lis*, *P. hydrargyria'tus*, (F.) *Ptyalisme mercuriel*, *Salivation mercurielle*. Salivation produced by mercury. The stomatitis that accompanies it is termed *mercurial*, *Hydrar'gyro-stomatit'is*, (F.) *Stomatite mercurielle*.

SALIVATION MERCURIELLE, Salivation, mercurial.

SALIVATUM, Sialagogue.

SALIVOSUS, Salivary.

SALIVOUS, Salivary.

SALIX. The *Willow*, *Ptea*, (F.) *Saule*. A genus of plants in the Linnæan system.

SALIX FRAG'ILIS, *S. pendula* seu *decipiens* seu *amygdali'na* seu *persicifolia* seu *Russelia'na* seu *pippoph'æfolia* seu *Trevira'ni*, or Crack willow (Ph. D.) SALIX ALBA, *S. cæru'lea* seu *virenti'na*, or White willow (Ph. D. and Ph. U. S.) SALIX LATIFOLIA, or broad-leaved willow. SALIX CAP'PREA, *S. sphaucela'ta* seu *tomento'sa*, or Great

round-leaved willow (Ph. L.) SALIX PENTAN'DRIA seu HERMAPHRODIT'ICA. SALIX HUMILIS, Low bush willow, Speckled willow. SALIX VITULI'NA, SALIX ERYOCEPH'ALA. The bark of each of these has a slightly aromatic odour, and a bitter astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active principle has been separated, and called *Salicine*. It is like the quinia in medicinal efficacy. Dose, ℥j to ʒj of the powder. Dose of *Salicine* from 4 to 6 grains.

SALIX ÆGYPTIACA, Calaf.

SALLOW, Lurid.

SALMIAC, Ammonia murias.

SALOOP, Salep.

SALPETRA, Soda, nitrate of.

SALPINGEMPHRAX'IS, from *σαλπιγξ*, 'the Eustachian tube,' and *εμφραξις*, 'obstruction. Obstruction of the Eustachian tube; — a cause of deafness.

SALPINGIT'IS, from *σαλπιγξ*, 'a tube,' and *itis*, 'denoting inflammation.' Inflammation of the Eustachian tube.

SALPINGOCY'E'SIS, *Paracy'e'sis tuba'ria*, *Gravid'itus tuba'ria*, from *σαλπιγξ*, 'a tube or trumpet,' and *κρησις*, 'pregnancy.' Tubal pregnancy. — See Pregnancy.

SALPINGOMALLÉEN, Tensor tympani — s. Staphylinus internus, Levator palati.

SALPINGOPHARYNGÆ'US, from *σαλπιγξ*, 'a trumpet,' and *φαρυγξ*, 'the pharynx.' Val-salva and Douglas have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

SALPINGOSTAPHYLINUS, Circumflex muscle.

SALPINGOSTENOCHÓ'RIA, from *σαλπιγξ*, 'a tube,' *στενος*, 'narrow,' and *χωρα*, 'space.' Narrowness or stricture of the Eustachian tube.

SALPINX, Tube.

SALSAFI, Tragopogon.

SALSAMENTUM CRUDUM, Omotarichos.

SALSAPARILLA GERMANICA, Sarsaparilla Germanica.

SALSEDO MUCRUM, Potassæ nitras.

SALSEPAREILLE, Smilax sarsaparilla — s. *d'Allemagne*, Sarsaparilla Germanica.

SALSILAGO, Muria.

SALSOLA DECUMBENS, S. Kali.

SALSO'LA KALI, *S. Decum'bens*, *Kali soda*, *Prickly Saltwort*, *Kali spino'sum cochlea'tum*, *Tragus* sive *Tragum Matthi'oli*. This plant, as well as the *Salsola sativa* and the *Salsola soda* seu *longifolia*, *Kali inc'r'nis* seu *soda*, *Herba vitri*, produces the alkaline salt, commonly called *Barilla*, *Soda*, or *Kelp*.

SALSOLA LONGIFOLIA, S. Kali — s. *Sativa*, &c., see S. Kali, and Soda — s. Soda, see S. Kali.

SALSUGINOSUS, Halmyrodes.

SALSUS, Saline.

SALT, *Sal*, *Hal*, *Hals*, 'αλς, (F.) *Sel*. A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term *Salts* exclusively to the combination of an acid with one or more bases. *Neutral salts* are those in which the acid and base reciprocally saturate each other. *Acid salts* or *supersalts*, (F.) *Sur-sels*, are those in which the acid predominates over the base. *Alkaline salts* or *subsals*, (F.) *Sons-sels*, those in which the base is, on the contrary, predominant. The different denominations of the salts are compounded, 1. Of the name of the acid: the termination of which is changed into *ite*, when the name of the acid is

in *ous*; — *ate*, when it is in *ic*. Thus the salts formed by the sulphurous acid are *sulphites*; those by the sulphuric, *sulphates*. 2. This name is followed up by that of the oxyd, that enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently, to shorten the name, the word *oxyd* is suppressed; and *proto, dento, trito, &c.*, put before the acid:—as *protosulphate of iron*. *Simple salts* are those resulting from the combination of an acid with a single base: *double salts* with two different bases: *triple* with three, &c. A *haloid salt* is one constituted after the type of common salt, or which contains a metal and a *salt-radical*, as chlorine, iodine, &c. An *oxysalt* is formed from the combination of an acid with an oxide.

When *salt* is used in an abstract sense, it means the chloride of sodium.

SALT APERIENT, of FREDERICK, Soda, sulphate of—s. Baker's, Ammonia carbonas—s. Barilla, Soda, subcarbonate of—s. Bay, Soda, muriate of—s. Bitter purging, Magnesia sulphas—s. Common, Soda, muriate of—s. Epsom, Magnesia sulphas—s. Glauber's, Soda, sulphate of—s. Glauber's, Lynton, see Soda, sulphate of—s. Rochelle, Soda, tartrate of—s. Roek, Soda, muriate of—s. Sea, Soda, muriate of—s. Secondary, Neutral salt—s. Seignette's, Soda, tartrate of—s. Smelling, Ammonia carbonas—s. of Soda, Soda, subcarbonate of—s. Sore-throat, Potassæ nitras fusus sulphatis paucillo mixtus—s. of Tartar, see Potassæ subcarbonas, and Potash—s. Tasteless purging, Soda, phosphate of—s. of Urine, Ammonia carbonas—s. White, Soda, muriate of—s. of Woodsoot, Ammonia carbonas—s. of Wormwood, see Potash.

SALTANS ROSA, Urticaria.

SALTATIO, Dancing—s. Sancti Viti, Chorea.

SALTERTON. A village about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the seashore, and is well protected from winds, particularly the northerly.

SALTISH, Halmyrodes.

SALTPETRE, Potassæ nitras.

SALTUS, Leap, Vulva—s. Tendinum, Subsul-tus tendinum.

SALTWORT, PRICKLY, Salsola kali.

SALUBRIOUS, Salutory.

SALUBRIOUSNESS, Salubrity.

SALUBRIS, Salutory.

SALUBRITY, *Salubritas, Salubrioness*, (F.) *Salubrité*, from *salus*, 'health.' Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

SALUS, Sanitas.

SALUTAIRE, Salutory.

SALUTARY, *Periesticos, Saluta'ris, Salu'ber, Salu'bris, Hygie'mus, Hygiasticus, Hygie'rus, Salu'brins*, (F.) *Salutaire*. Same etymon. Healthy. That which is favourable to health. Some diseases have been considered salutary; but this is doubtful.

SALUTIFEROUS, *Salu'tifer*; from *salus*, 'health,' and *fero*, 'I bear.' Bringing health; health bearing.

SALVATEL'LA; same etymon, (?) *Vena salvatela*, is situate on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed of a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name—*posterior cubital*. The ancients

recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name.

SALVE, BLISTERING, Unguentum lyttæ—s. Eye, Unguentum oxidi zinci impuri—s. Eye, Singleton's, Unguentum hydrargyri nitrico-oxydi—s. Healing, Cerate of calamine.

SALVIA, *S. officinalis* seu *hortensis* seu *vulgaris* seu *minor, Eleis'phacos*, (F.) *Sauge, Petite Sauge, Thé d'Europe, Thé de France*. Family, Labiata. *Sec. Syst.* Diandria Monogynia. Sage has a peculiar, aromatic odour, and a warm, aromatic, bitterish taste. Its virtues depend upon an essential oil. It is tonic, stimulant, and carminative. In the form of a weak infusion, it is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv to xxx or more.

SALVIA AFRICA'NA, *Wild Sage*, a South African species, has the same medical properties as Salvia.

SALVIA COLORATA, Salvia.

SALVIA HORMI'NUM, *Horminum, S. colorata, Horminum coloratum* seu *sativum*, (F.) *Sauge-hormin*, of the Pharmacopœias, is used in similar cases.

SALVIA HORTENSIS, Salvia—s. Minor, Salvia—s. Officinalis, Salvia.

SALVIA SCLAREA, *Sclarea, Gallitrichum, Athiopsis, Biser'mus, Colus Jovis, Common Clary*, (F.) *Sauge sclarée, Grande sauge, Orvale ou Toubonne*. The leaves have been recommended as corroborants and anti-spasmodics.

SALVIA VITE, *Asplenium ruta muraria*—s. *Vulgaris, Salvia*.

SAMBUCUS, *Sabu'cus, Sambucus nigra, S. vulg'ris, S. Arbo'rea, Acté, Infelix lignum; the Elder*, (F.) *Sureau commun*. Family, Capparidaceæ. *Sec. Syst.* Pentandria Digynia—(The flower and bark were formerly called *Cano'pum*.) The flowers, berries, and bark of the elder have been used in medicine. The flowers have been reputed diaphoretic and discutient: the berries, aperient and sudorific: the bark, purgative, and, in small doses, deobstruent. The flowers are sometimes used in fomentations, and to form a cooling ointment.

SAMBUCUS ARBOREA, *Sambucus*—s. *Chamæactæ, S. ebulus*.

SAMBUCUS EBULUS, *Ebulus, Chamæacté, Od'ocos, Sambucus Chamæacté* seu *Hellion, Sambucus hu'milis* seu *Herba'cea, Dwarf-elder, Dancwort*, (F.) *Hièble*. The root, interior bark, leaves, flowers, berries, (*Baccæ* seu *Grana Actes*), and seeds have all been given in moderate doses as resolvents and deobstruents; and in large doses as hydragogues. The berries of *Sambucus Canadensis*, the *Common Elder* of America, are made officinal in the American Pharmacopœia.

SAMBUCUS HELION, *Sambucus ebulus*—s. *Herbaea, S. ebulus*—s. *Humilis, S. ebulus*—s. *Nigra, Sambucus*—s. *Vulgaris, Sambucus*.

SAMI TERRA, *Sami'an Earth*. An argillaceous earth, found in the island of Samos, to which were ascribed virtues similar to those of the Terra Lemni.—Galen, Dioscorides.

SAMIUS LAPIS. A stone found in the Isle of Samos, which the ancients believed to be astringent and refrigerant.

SAMPHIRE, *Crithmum maritimum*.

SAMPSON, BLACK, *Echinacea purpurea*.

SAMPSUCHUS, *Thymus mastichina*.

SAMPSUCUS, *Origanum majorana*.

SAMPSYCH'INON, *Sampsuchinum*. An ointment composed of *σαμψυχον*; which was perhaps marjoram.—Dioscorides.

SANABILIS, Curable.

SANABLE, Curable.

SANAMUNDA, Geum urbanum.

SANATIO, Curation, Cure.

SANATIVE, Curative.

SAN GIULIANO, MINERAL WATERS OF.

At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fahr.

The spring, *Pozzetto*, contains carbonic acid, sulphates of soda, lime, and magnesia; chlorides of sodium and magnesium: carbonates of lime and magnesia; argil and silica.—Santi.

SAND, see Gravel.

SANDALUM CÆRULEUM, *Guilandina moringa*—s. *Rubrum*, *Pterocarpus santalinus*.

SAN'DARAC, *Sandara'cha*, *Gum Ju'niper*, *Gum Sandarach*, *Pounce*, *Gummi Juniperi*, *Sandara'ca*, *Veruix sicca*, *Resina Juniperi*. A name given, by the Arabs, to an odorous resin, that flows from the *Thuya aphylla*. Family, Coniferæ. *Scr. Syst. Monæcia Monadelphia*. It is stimulant, like all the resins; but is very little used.

SANDARACHA GRÆCORUM, Realgar.

SAND-BLIND. A defect of vision, in which small particles seem to fly before the eyes. See *Metamorphopsia*.

SANDERS, see Saunders.

SANDIVER, see Vitrum.

SANDIX, *Plumbi oxydum rubrum*.

SANDYX, *Plumbi oxydum rubrum*.

SANG, Blood—s. *Artériel*, *Arterial blood*—s. *Dragon*, *Rumex sanguineus*—s. *Dragon*, see *Calamus rotang*—s. *Globules du*, *Globules of the blood*—s. *Perte de*, *Hæmorrhagia*.

SANGAREE'. Wine and water, sweetened and spiced.

SANGLOT, Sob.

SANGSUE, Hirudo.

SANGUIDUCTUS DURÆ MATRIS, Sinuses of the dura mater.

SANGUIFICATIO, Hæmatisis—s. *Debiliior*, *Hyphæmatisis*.

SANGUIFLUXUS, Hæmorrhagia—s. *Uterinus*, *Metrorrhagia*.

SANGUIMOTION, Circulation.

SANGUIMOTORY, Circulatory.

SANGUIN, (*Vaisseau*) Blood-vessel.

SANGUINALIS CORRIGIOLA, *Polygonum aviculare*.

SANGUINARIA, *S. Canaden'sis* seu *acaulis*, *Bloodroot*, *Bloodwort*, *Puccoon*, *Red Puccoon*, *Red Root*, *Indian Paint*, *Tw'meric*. *Nat. Ord.* *Papaveraceæ*. *Scr. Syst.* *Polyandria Monogynia*. A North American plant, the rhizoma and seeds of which are used in medicine. They are emetic. Dose of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse, like digitalis.

SANGUINARIA, *Polygonum aviculare*.

SANGUINE, *Sanguin'eus*, *Sanguin'us*, *Hæmat'icus*, *Hæmato'des*, *Hæmate'rus*, *Hæmat'us*, *Hæmo'des*, *Hæmo'i'des*, *Sanguineous*; (F.) *Sanguin*. Bloody, blood-like; having the colour of blood, as 'a sanguine countenance.' Relating to, or containing blood—as 'sanguine temperament.' *Plethoric*.

SANGUINEA, *Potassæ nitras*.

SANGUINENESS, *Plethora*.

SANGUINEOUS, *Plethoric*, *Sanguine*.

SANGUINEUS, *Sanguine*.

SANGUINIS ABSORPTIO, Hæmorrhophesis—s. *Congestio*, *Congestio*—s. *Dissolutio*, *Hæmatelysis*—s. *Fluor*, *Hæmoptysis*—s. *Fluor Vesicæ*, *Cystorrhagia*—s. *Ictus*, *Apoplexy*—s. *Missio*, *Blood-letting*—s. *Profluvium copiosum*, *Hæmorrhagia*—s. *Profluvium ex Ore*, *Stomatorrhagia*—s. *Stagnatio*, *Hæmostasis*.

SANGUIN'OLENT, *Sanguinolentus*, from *sanguis*, 'blood.' Tinged with blood. An epithet applied, particularly, to the sputa when so tinged. *Bloody*.

SANGUINOSUS, *Sanguine*.

SANGUIPURGIUM, from *sanguis*, 'blood,' and *purgare*, 'to cleanse.' Purgation of the blood. A name given by some authors to mild fevers, from an idea that they purged the blood of noxious matters.

SANGUIS, Blood, Sperm—s. *Concretus*, *Coagulum*—s. *Draconis*, see *Calamus rotang*—s. *Hirci siccatus*, see *Blood*—s. *Menstruus*, see *Menses*—s. in *Urinâ*, *Hæmaturia*.

SANGUISOR'BA CANADEN'SIS, *Canada Burnett*. A tall indigenous plant—family, *Rosaceæ*—with white, sometimes purple, flowers, which appear from August to October. It has the same virtues as

SANGUISOR'BA OFFICINA'LIS, *S. car'nea* seu *rubra*, *Italian Pimpinell*, *Pimpinella Italica* seu *officina'lis*, (F.) *Pimpinelle noire*. It was formerly used as an astringent and tonic, in hemorrhages, dysentery, &c.

SANGUISUGA, Hirudo.

SANGUITO'UGUM. A barbarous term, to denote too great an accumulation of blood in the heart.—*Bonetus*.

SANICLE, *Sanicula*, *S. Marilandica*—s. *American*, *Heuchera cortusa*—s. *de Mariland*, *Sanicula Marilandica*—s. *Yorkshire*, *Pinguicula vulgaris*.

SANIC'ULA, *S. Europæ'a* seu *officina'rum*, *Astrantia diapiensia*, *Caucalis Sanic'ula*, *Cucullata*, *Dodeca'theon*, *Symphytum petra'eum*, *Sanic'ula mas*, *Diapen'sia*, *D. cortu'sa*, *Sanicle*, (F.) *Toute-saine*. Family, *Umbelliferae*. *Scr. Syst.* *Pentandria Digynia*. This herb was formerly used as a mild astringent. It is bitterish, and somewhat austere.

SANICULA, *Saxifraga granula*—s. *Eboracensis*, *Pinguicula vulgaris*—s. *Europæa*, *Sanicula*.

SANIC'ULA MARILAN'DICA, *Sanicle*, *Maryland Sanicle*, *Black Snakeroot*, (F.) *Sanicle de Mariland*. This indigenous plant grows in marshes, or low and shaded ground. It is possessed of tonic virtues; and the powdered root is employed in popular practice as a favourite remedy in intermittent fever. It has been recommended, also, in chorea.

SANICULA MONTANA, *Pinguicula vulgaris*—s. *Officinarum*, *Sanicula*.

SANIDO'DES, *Sanio'des*, 'resembling a board,' from *cavis*, gen. *cavidos*, 'a board,' and *εἶδος*, 'resemblance.' One whose thorax is narrow, and, as it were, contracted.

SANIE, *Sanies*.

SAN'IES, *Ichor*, *Tabum*, *Virus*, *Pus malignum*, *P. corrosivum*, (F.) *Sanie*. A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

SANIODES, *Sanidodes*.

SANIOSUS, *Ichorous*.

SANIOUS, *Ichorous*.

SAN'ITORY, *San'atory*, *Healing*. (F.) *Sanitaire*. That which relates to health, and especially to public health; as *établissement sanitaire*; *police sanitaire*.

SANITA'RIMUM, *Sanato'rium*; from *sanitas*, 'health.' A retreat selected for valetudinarians, in consequence of its salubrity. Also, an establishment for the treatment of the sick.

SAN'ITAS, *Hygie'ia*, *Hyge'a*, *Hyggian'sis*, *Hygi'asis*, *Integ'ritas*, *Prosperitas* *Valetu'dinis*, *Salus*, *Hygie'ia*, *Valetu'do*, *Valitu'do*, *Valetu'do bona seu securi'da seu com'moda*, *Hyge'ia*, *Enzoödyna'mia*, *Health*, (F.) *Santé*, from *sanus*,

'sound.' Health has been defined,—a state, in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity. *Sanity* is often used for soundness of mind.

SANITAS, Cure.

SANITY, Sanitas.

SANKIRA, Smilax China.

SANS PAIRE, (*Veine*.) Azygos vein.

SANTA CRUZ, (CLIMATE OF.) This West India island is frequently selected as a winter retreat for the phthisical valetudinarian from the United States; but it does not seem entitled to any preference, in such cases, over the other islands of the West Indies, whilst its general salubrity is said to be less than that of many.

SANTAL BLANC, Santalum album — s. *Rouge*, Pterocarpus santalinus.

SANTALUM, see Pterocarpus santalinus.

SANTALUM ALBUM, *S. citrinum* seu *pal'lidum* seu *myrtifolium*, *Sir'ium myrtifolium*, *Yellow Saunders*, (F.) *Santal blanc*. *Sex. Syst.* Tetrandria Monogynia. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but it is not now employed. The saunders woods are called, collectively, in French, *Santanx*.

SANTALUM MYRTIFOLIUM, *S. album* — s. *Rubrum*, Pterocarpus santalinus.

SANTÉ, Sanitas.

SANTONICUM, Artemisia santonieum.

SANTONINE, *San'tonin*, *Cinin*. A peculiar crystalline substance obtained from Artemisia Santonica. It possesses the anthelmintic properties of the plant. Dose, five or six grains.

SANTORINI, FISSURES OF, (F.) *Incisures* ou *Sciennes de Santorini*. Clefts at the upper and back part of the fibro-cartilaginous portion of the external ear.

SANTORINI, TUBERCLES OF. Small cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis. See Corniculum Laryngis.

SARVE, Sinapis.

SAP, Sax. *jape*, (G.) *Soft*, *Arborum Succus* seu *Lympha*, (F.) *Sève*. The circulating fluid of the vegetable, which corresponds to the blood of the animal.

SAPA, see Rob.

SAPHA'DA. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

SAPHENA, Saphena.

SAPHE'NA, *Saphè'na*, from *σαφης*, 'manifest,' 'evident.' (F.) *Saphène*. A name given to two subcutaneous veins of the lower limb. These are: 1. The GREAT SAPHENA VEIN, *Saphena interna*, *Tibio-malleolar*, (Ch.) (F.) *Grande Veine Saphène* ou *Saphène interne*. Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus, and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the

external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. The LESSER VENA SAPHENA or *Saphena externa*; the *Peroneo-malleolar Vein* of Chaussier, (F.) *Petite Veine Saphène* ou *Saphène externe*, commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the hum to open into the popliteal vein.

SAPHÈNE, Saphena.

SAPHENOUS, *Sapheno'sus*; from *Saphène*. Of or belonging to the saphena.

SAPHENOUS NERVES are two in number, and are branches of the erural or femoral nerve. They are the *short saphenous* — *nervus cutaneus internus*; and the *long saphenous*, — *nervus cutaneus internus longus*.

The *external saphenous*, formed by the union of the communians poplitei and communians peronei, passes down the leg by the side of the external saphenous vein of the foot.

SAPID, *Sap'oros*, *Sap'idus*, (F.) *Savoureux*. Possessed of sapidity. Having the power of affecting the organs of taste.

SAPIDITY, *Sap'idness*, *Saporos'ity*, *Sapor*, (F.) *Sapidité*, from *sapere*, 'to taste.' The quality of bodies that gives them taste.

SAPIN COMMUN, Pinus peicea.

SAPIN'DUS, *S. Saponaria*, *Sapona'ria*, *Soap Tree*, (F.) *Savonnier commun*. The name of the plant that affords the *Soap Nuts*, *Sapona'ria N'entæ*, *Bac'cæ Bermuden'ses*, *Soap-berries*. A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap in washing, has been recommended in chlorosis, and as a stomaehic and deobstruent.

SAPO, *Soap*, Sax. *jape*, *Smegma*, (F.) *Savon*. A product obtained by treating fatty bodies with caustic alkalies dissolved in water. In the Pharmacopœia of the United States, it means Soap made with soda and olive oil.

YELLOW SOAP is formed of turpentine, oil, and alkali.

Castile Soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases of poisoning by acids. It is mostly applied externally to bruises and sprains. In *Pharmacy*, it is used to favour the solution of resins.

SAPO AC'IDUS, *Acid Soap*, is a combination of a fixed oil with an acid.

SAPO AMMONIACALIS, Linimentum ammoniæ fortius — s. *Ammonia oleacina*, Linimentum ammoniæ fortius — s. *Anygdalinus*, *Sapo medicinalis* — s. *Cacaotinus*, *Sapo coconeus* — s. *Calcarius*, Linimentum aquæ calcis — s. *Castiliensis*, see *Sap Medicinalis*.

SAPO COCO'NEUS, *Soap of Cocoa-Nut Oil*, *S. cacaotinus*, (F.) *Savon de cacao*, has been much used in Germany in herpetic affections.

SAPO DURS, *S. Hispanicus* — s. *Hispanicus*, see *S. medicinalis*.

SAPO KALICUS, *S. Mollis*.

SAPO LIQ'UIDUS, *Liquid Soap*, *Lotio saponacea*, is a cosmetic which is composed of olive oil

**Ξiv, ol. tartari per deliquium**  $\bar{\zeta}$ ss. Rub together, and add *aquæ rosarum*  $\bar{\zeta}$ xij.

**SAPo MEDICINA'LIS, Medic'inal Soap, Sapo amygdal'inus, (F.) Savon médicinal,** is made with oil of sweet almonds and half its weight of caustic alkali, or, like the *Sapo Hispani'cus* seu *Castilien'sis, Spanish or Castile soap, Sapo durus, (F.) Savon dur,* of olive oil and soda.

**SAPo MOLLIS, Common or Soft Soap, S. vir'idis, S. ni'ger, S. ka'licus, (F.) Savon mou, Savon noir,** is made of potass and oil or tallow. The *Sapo vulgaris*, or 'common soap' of the Pharm. U. S. is made with soda and animal oil.

**SAPo NIGER, Black Soap, Melanosmeg'ma,** is a composition of train oil and an alkali: and **GREEN SOAP, Sapo vir'idis,** of hempseed, linseed, or rape oil, with an alkali. See *Sapo mollis*.

**SAPo VEGETABILIS, Pulvis gummosus alkalinus**—s. *Viridis, Sapo mollis*—s. *Vulgaris*, see *Sapo mollis*.

**SAPONA'CEOUS; Sapona'ceus;** from *Sapo*, 'soap.' Soapy. Containing soap, as *Linimentum saponaceum, Soap liniment*.

**SAPONAIRE, Saponaria.**

**SAPONA'RIA, from Sapo, 'soap.' Soap-wort, Bruise-wort, Stru'thium, Lana'ria, Lychnis sylvestris, Ibi'uma, Boitia vulg'aris Lychnis officina'lis, (F.) Saponaire. Family, Caryophyllee. Sex. Syst. Decandria Digynia.** A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

**SAPONARIA, Sapindus saponaria.**

**SAPONARIE NUCULE,** see *Sapindus saponaria*.

**SAPo'NEA, from Sapo, 'soap.'** A pectoral medicine, prepared with sweetened syrup of violets, and oil of sweet almonds.

**SAPON'ULES, Sapon'uli, (F.) Savonules.** Same etymon. Combinations of volatile or essential oils with different bases.

**ACID SAPONULES** are combinations of such oils with different acids.

**SAPOR, Sapidity, Savour.**

**SAPOROSITY, Sapidity.**

**SAPOROUS, Sapid.**

**SAPo'TA, Achras Sapota seu australis seu Zapota, Sapota alchras, El nispero, Oval-fruited Sapota, (F.) Sapotier, Sapottier, Sapotilla. Fam. Sapoteæ. Sex. Syst. Hexandria Digynia.** A tree which grows in the Antilles, and particularly at St. Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade*. The seeds make an emulsion, which has been given in nephritic affections. The bark has been recommended as a febrifuge.

**SAPoTA ALCHRAS, Sapota.**

**SAPoTIER, Sapota.**

**SAPoTILLA, Sapota.**

**SAPoTILLIER, Sapota.**

**SAPROPYRA, Typhus gravior.**

**SAPROS, Putrid, Rancid.**

**SAPROS'TOMUS, from σαπρος, 'foul, of a bad odour,' and στομα, 'mouth.'** One who has an offensive breath.

**SAPROTÉS, Putrefaction.**

**SAR'APUS, Sarapous.** One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking; from *σαιρω, 'I grin,' and πους, 'the foot.'* See *Kyllosis*.

**SARATo'GA, MINERAL WATERS OF.** The Saratoga springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visitors from every

part of the United States. The following analysis has been given of the *Congress spring*. In a wine gallon—*gaseous contents:* carbonic acid, 311 cubic inches; atmospheric air, 7. *Solid contents:* Chloride of sodium, gr. 385; iodide of sodium, gr. 3.5; bicarbonate of soda, gr. 8.982; bicarbonate of magnesia, 95.788; carbonate of lime, 98.098; carbonate of iron, 5.075; silica, 1.5; bromide of potassium, a trace. Total gr. 597.943.—Steel.

The *Walton* or *Iodine spring* contains chloride of sodium, carbonate of magnesia, and iodide of sodium.

**SARCEPIPLOCELE, Sarcoëpiplocele.**

**SARCEPIPLOMPHALOCELE, Sarcoëpiplophalacele.**

**SARCEPIPLOMPHALUS, Sarcoëpiplophalus.**

**SARCIDIUM, Caruncle.**

**SARCINA, Fœtus.**

**SAR'CINA VENTRIC'ULI, Sarcina,** 'a pack, a woolpack.' A microscopic cryptogamous plant found in the fluid of waterbrash.

**SARCION, Caruncle.**

**SARCITES, Anasarca**—s. *Flatusus, Emphysema*.

**SARCITIS, Myositis.**

**SARCOCE'LE, Hernia carno'sa, Scirrhus Testic'uli, from σαρξ, 'flesh,' and κηλη, 'a tumour,' Sarc'o'ma scroti, (F.) Hernie charnue.** Scirrhus or cancer of the testicle. This disease affects adults particularly; and appears most commonly after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of colour of the skin; the spermatic cord is swollen, and participates in the affection; very painful shootings occur; the lymphatic glands of the abdomen become swollen, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life is the extirpation of the testicle.

**SARCOCOL'LA, (F.) Colle-chair, from σαρξ, 'flesh,' and κολλα, 'glue.'** A resinous matter, obtained from *Penæa Sarcocoll'a, P. mucronata,* and other species of *Penæa*. An African shrub, which has been so called from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules, of a yellowish or reddish blue, and smells like aniseed. It was once employed as an astringent and detergent.

**SARCODES, Carneous.**

**SARCOËPIPLOCE'LE, Sarcoëpiploce'le, from σαρξ, 'flesh,' επιπλοον, 'the epiploon,' and κηλη, 'a tumour.'** Epiplocele, complicated with sarcoma or sarcocele.

**SARCOËPIPLOMPHALUS, Sarcoëpiplomp'halus, Sarcoëpiplophaloc'le, from σαρξ, 'flesh,' επιπλοον, 'the epiploon,' and ομφαλος, 'the navel.'** Umbilical hernia, formed by scirrhus epiploon or complicated with sarcoma.

**SARCOHYDROCELE, Hydro-sarcocele.**

**SARCOLEM'MA, Sarcole'ma, from σαρξ, 'flesh,' and λεμμα, 'a coat.'** The sheath which surrounds the fibrils of muscle that form a fibre. It is quite distinct from the areolar membrane that binds the fibres into fasciculi.—Bowman. See *Perynisium*.

**SARCOLOGIA, Myology.**

**SARCOL'OGY**, *Sarcology*'ia, from *σαρξ*, 'flesh,' and *λογος*, 'a discourse.' The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology.

**SARCO'MA**, *Emphy'ma Sarcoma*, *Sarcom'atoma* tumour, *Sarco'sis*, *Porrus*, *Sarcophy'ia*, *Eccar'co'ma*, *Excar'co'ma*, *Tumor car'neus*, *Exerescen'tia carno'sa*, *Pol'ypos carno'sus*, from *σαρξ*, 'flesh.' Any species of excrescence having a fleshy consistence.

**SARCOMA**, **CARCINOMATOUS**, *Scirrhus*—s. *Cercosis*, see *Cercosis*—s. *Epulis*, *Epulis*—s. *Mastoid*, *Mammary sarcoma*—s. *Medullare*, see *Encephaloid*—s. *Medullary Encephaloid*, *Hæmatodes fungus*—s. *Pulpy*, *Hæmatodes fungus*—s. *Scroti*, *Sarcocele*.

**SARCOMA**, **COMMON VASCULAR** or **ORGANIZED** of *Abernethy*, *Emphy'ma Sarcoma Vasculo'sum*, is vascular throughout: texture simple: when bulky, napped on the surface with arborescent veins. Found over the body and limbs generally.

**SARCOMATEUX**, *Sarcomatous*.

**SARCOMATODES**, *Sarcomatous*.

**SARCOMATOSUS**, *Sarcomatous*.

**SARCOM'ATOUS**, *Sarcomato'sus*, *Sarcomato'ides*, (F.) *Sarcomatous*. Belonging to, or having the characters of sarcoma.

**SARCOMP'HALUM**, *Sarcophthalmus*.

**SARCOM'PHALUS**, *Sarcophthalmus*, from *σαρξ*, 'flesh,' and *ομφαλος*, 'the navel.' A scirrhous or fleshy tumour, developed at the navel.

**SARCOMYCES**, *Sarcospongus*.

**SARCOPIHAGUS**, *Carnivorous*, *Catheretic*.

**SARCOPIHYIA**, *Exerescence*, *Sarcoma*.

**SARCOPTES**, *Acarus*.

**SARCOPTES SCABIEI**, see *Psora*.

**SARCOPYO'DES**, from *σαρξ*, 'flesh,' *πυον*, 'pus,' and *ειδος*, 'resemblance.' Having the appearance of pus mixed with flesh. An epithet given to certain excreted matters, and particularly to the sputa of those labouring under consumption.

**SARCO'SIS**, from *σαρξ*, 'flesh.' The formation of flesh. Also, sarcoma.

**SARCO'SIS CULBI**, *Ecophthal'mia fungo'sa seu sarcomat'ica*. A fleshy growth from the lobe of the eye.

**SARCOSIS UTERI**, *Metrauxis*.

**SARCO'SPONG'US**, *Sarcomy'ces*, from *σαρξ*, 'flesh,' and *σπογγος*, 'fungus.' A fleshy fungus.

**SARCO'STOSIS**, *Osteo-sarcoma*.

**SARCOTIC**, *Incarناس*.

**SARCOUS**, from *σαρξ*, 'flesh.' Of, or belonging to, flesh or muscle—as '*sarcous tissue*.'

**SARCOUS ELEMENTS**, *Prim'itive particles*. The elementary particles, which, by their union, form the mass of muscular fibre.—*Bowman*.

**SARDIASIS**, *Canine laugh*, *Risus sardonius*.

**SARDONIASIS**, *Canine laugh*, *Risus sardonius*.

**SARE**, *Essera*.

**SARRASIN**, *Polygonum fagopyrum*.

**SARRÊTE**, *Trismus infantum*.

**SARRIETTE**, *Satureia hortensis*—s. *de Crête*, *Satureia capitata*.

**SARSA**, *Smilax sarsaparilla*.

**SARSAPARILLA**, *Smilax S.*—s. *False*, *Aralia nudicanlis*.

**SARSAPARILLA GERMAN'ICA**, *Gramen major*, *G. rubrum*, *Salsaparilla Germanica*, *Carex Arnica*, (F.) *Loiche*, *L. des Sables*, *Salsepareille d'Allemagne*. *Family*, *Cyperoidæ*. *Sex. Syst.* *Monœcia Triandria*. A plant, which grows plentifully on the sea-coasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

**SARSAPARILLA**, *INDIAN*, *Hemidesmus Indicus*.

**SARTAPARILLA**, *Smilax sarsaparilla*.

**SARTO'RIOUS**, from *sartor*, 'a tailor,' because used in crossing the legs. *Suto'rinus*, *Longi'simus Femoris*, *Fuscolis*, *F. Longus seu suto'rinus*, (F.) *Ilio-cresti-tibialis*, *Ilio-prætibialis* (Ch.), *Contourier*. A muscle, situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

**SARX**, *Flesh*, *Pulp*.

**SARZA**, *Smilax sarsaparilla*.

**SASSAFRAS**, *Laurus sassafras*—s. *Medulla*, see *Laurus sassafras*—s. *Radix cortex*, see *Laurus sassafras*—s. *Swamp*, *Magnolia glauca*.

**SAT'ELLITE**, *Satelles*. That which guards. That which is placed near.

**SATELLITE VEINS** are those that accompany arteries.

**SATHI**, *Penis*.

**SATIES**, *Satiety*.

**SATIETAS**, *Plesmone*.

**SATIETAS**, *Plesmone*.

**SATI'ETY**, *Sati'etas*, *Sati'ritas*, *Sati'ties*, *Satura'tio*, *Plethos*, *Plesmonê*, from *satiare* (itself from *satis*, 'enough'), 'to give enough.' Disgust for food; commonly produced by repletion.

**SATIN**, *Lunaria rediviva*.

**SATURANS**, *Absorbent* (medicine).

**SATURATIO**, *Satiety*, *Saturation*.

**SATURA'TION**, *Satura'tio*, from *satis*, 'enough.' The state of a compound in which its elements are combined in such proportions that a fresh quantity of either cannot be added without producing excess.

**SATUREI'A CAPITA'TA**, *Ciliated Satureia*, *Thymus*, *Thymus sylvest'ria seu capitatus*, *Thymus Cre'ticus*, *Cunila*, (F.) *Sarricette de Crête*. Possesses similar properties to thyme.

**SATUREI'A HORTEN'SIS**, *Satureia*, *S. sati'ra*, *Cunila sativa Plin'ii*, *Thymbra*, *Summer Satureia*, (F.) *Sarricette*. *Family*, *Labiatae*. *Sex. Syst.* *Didynamia Gymnosperma*. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

**SATUREIA ORIGANOIDES**, *Cunila mariana*—s. *Sativa*, *S. hortensis*.

**SATURITAS**, *Satiety*.

**SATURNI DULCEDO**, *Plumbi superacetata*.

**SATURNINE**, *Soturni'nis*, from *saturus*, 'lead.' Containing or caused by lead.

**SATURNINE BREATH**. The peculiar odour of the breath in one labouring under Saturnism.

**SATURNISM'US**, *Intoxicatio seu Cachexia saturni'na*, from *saturus*, 'lead.' Poisoning by lead; lead-poisoning; saturnine cachexy.

**SATURNUS**, *Plumbum*.

**SATYRIASIS**, from *Satyrus*, 'a Satyr:' because the Satyrs are said to have been greatly addicted to venery. *Satyriasis*, *Satyri'nis*, *Priapism'us*, *Salac'itas*, *Brachy'na*, *Aras'con*, *Satyri'asis furens*, *Lagne'sis Salac'itas*, *Lagne'sis furor masculi'nis*, *Lagne'a*, *Lagni'a*, *Lagne'sis*, *Lasciv'ia*, *Lasciv'itas*, *Tenti'go vere'tri*. An irresistible desire, in man, to have frequent connexion with females, accompanied by the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are:—almost constant erection; irresistible and almost insatiable desire for venery, frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

**SATYRIASIS FURENS**, *Satyriasis*.

SATYRIASMUS, Satyriasis.  
 SATYRION, Orchis mascula.  
 SATYRISMUS, Satyriasis.  
 SATYRIUM, Goodyera pubescens.  
 SAUCE-ALONE, Alliaria.  
 SAUCE, GREEN, Rumex scutatus.  
 SAUER KRAUT (G.), 'sour cabbage,' (F.) *Chou-croûte*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.  
 SAUGE, Salvia — *s. des Bois*, Teucrium scordium — *s. Grande*, Salvia sclarea — *s. Hormin*, Salvia horminum — *s. de Jérusalem*, Pulmonaria — *s. Petite*, Salvia — *s. Sclarée*, Salvia sclarea.  
 SAULE, Salix.  
 SAUMURE, Muria.  
 SAUNDERS, RED, Pterocarpus santalinus — *s. Tree*, Pterocarpus santalinus — *s. Yellow*, Santalum album.  
 SAURA, Lizard.  
 SAURURUS CERNUUS, *Lizard's Tail*. Indigenous; Order, Saururaceæ; flowering in June. It has been used in lumbago.  
 SAUSAGE POISON, Allantotoxium.  
 SAUT, Leap.  
 SAUVE-VIE, Asplenium ruta muraria.  
 SAVEUR, Savour.  
 SAVINE, Juniperus sabina.  
 SAVINIER, Juniperus sabina.  
 SAVON, Sapo — *s. Ammoniacal*, Linimentum ammoniacæ fortius — *s. Cacao*, Sapo coconeus — *s. Calcaire*, Linimentum aquæ calcis — *s. Dur*, Sapo durus — *s. Médicinal*, Sapo medicinalis — *s. Mou*, Sapo mollis — *s. Noir*, Sapo mollis.  
 SAVONNIER COMMUN, Sapindus saponaria.  
 SAVONULE, Saponulus.  
 SAVONULUS, Saponulus.  
 SAVORY, CILIATED, Satureia capitata — *s. Summer*, Satureia hortensis.  
 SA'VOUR, *Sapour, Taste*, (F.) *Saveur*. Quality of bodies, by which they act upon the sense of taste. Chymists, at times, avail themselves of this quality to analyze an unknown substance.  
 SAVOUREUX, Savoury.  
 SA'VOURY, *Sap'idus*, (F.) *Savoureux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.  
 SAVOYAN, Galium verum.  
 SAW, *Prion, Serra*, (Da.) *Sawe*, (Sax.) *гара*, (F.) *Scie*. A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws of different sizes and shapes are used in surgery. The crown of the trepan is nothing more than a species of circular saw.  
 SAW, AMPUTATION, *Serra amputatoria*. The saw used in amputation.  
 SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex or straight edge is attached, and by which a piece of bone of any shape may be removed. With the trephine, the saw must always be circular.  
 SAW PALMETTO, Chamærops serratula — *s. Wort*, Liatris.  
 SAXIFRAGA, Pimpinella saxifraga — *s. Anglica*, Peucedanum silaus.  
 SAXIFRAGA CRASSIFOLIA. *Family*, Saxifragæ. *Sex. Syst.* Decandria Digynia. The root of this species of saxifrage has been extolled by Pallas, as pre-eminently antiseptic.  
 SAXIFRAGA GRANULATA, *S. alba*, *Sanic'ula*,

*Sedum*, *White sax'ifrage*, (F.) *Saxifrage granulée*. Recommended as diuretic and lithoniptic; but not used.  
 SAXIFRAGA RUBRA, Spiræa filipendula — *s. Vulgaris*, Peucedanum silaus.  
 SAXIFRAGE, BURNET, Pimpinella saxifraga — *s. Granulée*, Saxifraga granulata — *s. Meadow*, Peucedanum silaus — *s. White*, Saxifraga granulata.  
 SAXIFRAGUS, Lithonriptic.  
 SAXONICUS PULVIS. A powder, prepared with the roots of the wild and cultivated angelica; the asclepias vincetoxicum, &c. It was considered formerly as an antidote.  
 SCAB, from *Scab'ies*, and *scabere*, 'to dig.' An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar.  
 SCABBY or SCABBED. Covered or diseased with scabs.  
 SCABIES, Psora — *s. Agria*, Lichen — *s. Capitis*, Porrigo lupinosa, Porrigo scutulata — *s. Capitis favosa*, Porrigo favosa — *s. Fera*, Ecthyma.  
 SCABIES FERINA, *Itch of animals, Mange*. A cutaneous disease, which affects almost all domestic animals, but especially the horse, sheep, dog, and cow. It is said to have been transmitted to man; but this is questionable.  
 SCABIES FERINA, Psoriasis — *s. Papuliformis*, Prurigo — *s. Sicca*, Lichen, Psoriasis — *s. Venerea contagiosa*, Scherlievo.  
 SCABIEUSE ORDINAIRE, Scabiosa.  
 SCABIOLA, Scabies.  
 SCABIOSA, *S. arven'sis*, *Tri'chera arven'sis*, *Field Scab'ious*, (F.) *Scabieuse ordinaire*. *Family*, Dipsacæ. *Sex. Syst.* Tetrandria Monogynia. The plant is bitter and sub-astringent, and was formerly used in the cure of leprous affections and diseased lungs.  
 SCABIOSA ARVENSIS, Scabiosa — *s. Carduifolia*, Echinops.  
 SCABIOSA SUCCISA, *Succisa*, *S. pratens'is*, *Asteroceph'alus succisa*, *Morsus Diab'oli*, *Devil's bit*, (F.) *Mors du Diable*, has similar properties.  
 SCABIOUS, Erigeron Philadelphicum — *s. Field*, Scabiosa — *s. Sweet*, Erigeron heterophyllum.  
 SCABISH, Oenothera biennis.  
 SCABRITIES, Lichen.  
 SCALA, 'a ladder.' A machine formerly used for reducing dislocations of the humerus.  
 SCALE OF THE COCHLEA, *Gyri seu Ductus spirales seu Canales cochleæ*, (F.) *Rampes* ou *Échelles du Limaçon* — are the cavities in the cochlea, separated from each other by the spiral septum. The one — *Scala inter'na* seu *posterior* seu *inferior coch'leæ*, *S. tympani* — would communicate with the cavitas tympani by the fenestra rotunda, were it not for the membrane that closes it. The other — *Scala exter'na* seu *anterior* seu *superior coch'leæ*, *S. vestibuli* — opens into the cavity of the vestibule. The scale communicate with each other by an opening at the top of the partition.  
 SCALE ANTERIOR COCHLEÆ, see *Scala* — *s. Clausa*, see *Scala* — *s. Externa cochleæ*, see *Scala* — *s. Inferior cochleæ*, see *Scala* — *s. Interior cochleæ*, see *Scala* — *s. Posterior cochleæ*, see *Scala* — *s. Superior cochleæ*, see *Scala* — *s. Tympani*, see *Cochlea*, and *Scala* — *s. Vestibuli*, see *Cochlea*, and *Scala*.  
 SCALE, *Sax. reale*, from *reylan*, 'to divide, separate;' (G.) *Schale*, 'shell, peel;' *schälen*, 'to shell, to peel.' *Squama*, *Lepis*, (F.) *Écaille*, *Écaille*. An opaque and thickened lamina of cuticle; commonly produced by some degree of

inflammation of the true skin, over which it is formed.

SCALE, DRY, Psoriasis.

SCALENE ANTÉRIEUR, *Scalenus anticus*—s. *Postérieur*, *Scalenus posticus*.

SCALENUS, 'irregular or unequal.' Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists have given the name to two muscles. 1. SCALENUS ANTI'CUS, *Portion of the Costo-trachealium* (Ch.), (F.) *Scalène antérieur*, is situate at the internal and inferior parts of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebrae. This muscle bends the neck, and draws it to its side. It can also raise the first rib. 2. SCALENUS POSITI'CUS, (F.) *Scalène postérieur*, *Portion of the Costo-trachealium* (Ch.), is situate behind the last. It is, also, long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebrae of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as Albinus and Sömmerring, have described five scaleni muscles on each side, and have called them *Scalenus prior*, *S. minimus*, *S. lateralis*, *S. medius*, *S. posticus*. Riolan and Chaussier only describe one scaleni muscle on each side. Cowper and Douglas, and the generality of the English anatomists, admit three, *S. anti'cus*, *medius*, and *posticus*; or, *primus*, *secundus*, and *tertius*; Winslow, Boyer, and many of the French anatomists, — two, as above described.

SCALING—same etymon as Seale—in dentistry, is an operation, which consists in removing the tartar from the teeth.

SCALL, Impetigo—s. Asbestos, see Eczema of the hairy scalp—s. Dry, Psoriasis—s. Honeycomb, *Porrigo favosa*—s. Milky, *Porrigo larvalis*—s. Running, Impetigo—s. Running, Eczema—s. Washerwoman's, Psoriasis diffusa.

SCALLED HEAD, *Porrigo scutulata*.

SCALP, Teut. *Schelppe*, 'a shell.' The integuments covering the head. The *hairy scalp* is called, also, *Capillitium*, *Trichotom*, (F.) *Chevelure*.

SCALPEL, *Scalpellum*, *Scalpellus*, *Culter*, *Incisorium*, *Smileon*; from *scalpo*, 'I rasp, I cut.' A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its use is to divide the soft parts in operations, dissection, &c.

SCALPELLUM, Scalpel—s. *Lenticulare*, *Phacops*.

SCALPELLUS, *Bistouri*, Scalpel.

SCALPEUM, *Bistouri*.

SCALPRUM, Raspatorium—s. *Chirurgicum*, *Lancet*.

SCALPRUM DENTARIUM, *Lima dentaria*. A tooth-file. A file used by the dentist.

SCALPRUM RASORIUM, Raspatorium.

SCALY, Squamous.

SCALY DISEASES or SQUAMÆ, *Lepidoses*, form the second order in Willan and Bateman's system of cutaneous diseases.

SCAMMA, Fossa.

SCAMMONÉE D'ALEP, *Convolvulus scammonia*.

SCAMMONIUM, see *Convolvulus scammonia*—s. *Syriacum*, *Convolvulus scammonia*.

SCAMMONY, *Convolvulus scammonia*—s. of *Montpellier*, *Cynanchum Monspeliacum*.

SCAMNON HIPPOCRATIS, *Bathron Hippocrati* of Galen, (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long, on which the patient was fixed. Straps were attached above and below the fracture or luxation, and extension and counter-extension were effected by a winch. It is described in Galen, Oribasius, *Seultetus*, &c. See *Bathron*.

SCANDIX, *S. cerefolium*.

SCANDIX BULBOCASTANUM, *Bunium bulbocastanum*.

SCANDIX CEREFOLIUM, *Scandix*, *Scandyx*, *Peeten Ven'ensis*, *Cerefolium*, *Daucus Sepri'nis*, *Chærophyllum*, *Ch. Sativum* sen *Cerefolium*, *Anthriscus cerefolium*, *Chærefolium*, *Chervil*, (F.) *Cerfeuil*. Family, Umbelliferae. Sec. Syst. Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

SCANDIX ODORATA, *Sweet Cic'ely*. Properties the same as the other. Also, *Chærophyllum odoratum*.

SCANDULARIUS MUSCULUS, *Parathenar*, *Transversus pedis*.

SCANDYX, *Scandix cerefolium*.

SCAPHIA, *Scaphus*, 'a skiff or cock-boat,' from *σκαπῶ*, 'I make hollow.' The excavation or cavity of the external ear, between the helix and anthelix. The meatus auditorius externus. The rima vulvæ. Also the name of a bandage for the head, mentioned by Galen, and called, likewise, *Tholus Diocle'us*.

SCAPHIA, Nates.

SCAPHION, Cranium, Papaver (Capsule).

SCAPHIUM OCULARĒ, *Pelvis Ocularis*, *Eye-glass*, (F.) *Bassin oculaire*, *Gondole oculaire*, *Oëillière*. A small porcelain, glass or metallic vessel, used for applying lotions to the eye.

SCAPHO-CARPO-SUPER-PHALANGIUS POLLICIS, *Abductor pollicis brevis*.

SCAPHOID, *Scaphoïdes*, from *σκαφή*, 'a skiff,' and *idos*, 'form.' A name given to several parts.

SCAPHOID FOSSA, *Fossa Scaphoïdes*, (F.) *Enfoncement Scaphoïde*. A small cavity at the upper part of the internal ala of the pterygoid process, in which the *peristaphylinus internus* is attached.

SCAPHOID BONE OF THE HAND, *Os Scaphoïdes Manûs*, *Os naviculare*, *Os cymbiforme*, *Boat-like bone*, (F.) *Scaphoïde de la main*. The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex,—to be articulated with the trapezium and trapezoids. Between the upper and under cartilaginous surfaces there is a *rough fossa* for the insertion of the capsular ligament. The anterior and inner surface has an *oval cavity*, where it is articulated with the *os magnum*, which gives name to the bone. There is a *process* on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

SCAPHOID BONE OF THE FOOT, *Os Scaphoïdes Pedis*, *Os naviculare*, *Os cymbiforme*, *Boat-like bone*, (F.) *Scaphoïde du Pied*. This bone is situate at the forepart of the astragalus and inner part of the foot. The *posterior surface* forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the *ossa cuneiformia*. Between the *os naviculare* and astragalus, the foot has its principal lateral and rotary motions; although each of the other

joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

**SCAPHOÏDE DE LA MAIN**, Os scaphoides manus—*s. du Pied*. Os scaphoides pedis.

**SCAPHOÏDO-ASTRAG'ALAN**, *Scaphoïdo- astragalus*. That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament which strengthens it is termed the *Scaphoïdo-astragalan ligament*.

**SCAPHOÏDO-CUBOID**, *Scaphoïdo-cuboidæ'*. That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

**SCAPHULA**, Navicularis fossa.

**SCAPHUS**, Auditory canal, external, Rima vulvæ, Scapha.

**SCAP'ULA**, *Scap'ulum*, *Plata*, *Omopla'ta*, *Homopla'ta*, *Scop'tula*, *Epino'tion*, *Latitu'do hu'meri*, *Omoplatê*, *Os latum hu'meri*, *Scutum thora'cis seu cordis*, *Spath'ula*, *Pteryg'ium*, *Chelo'nium*, *Spat'ula*; the *Blade-bone*, the *Shoulder-blade*, (F.) *Omoplate*. An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has, 1. A *posterior* or *dorsal surface* or *Dorsum*, *Testu'do scap'ulæ*, divided transversely into two parts, by a triangular process, called *Spine of the Scapula*; which terminates by a considerable eminence, called *Acromion*. Above the spine, is the *Fossa supra-spinata*; below it, the *F. infra-spinata*. 2. An *anterior* or *costal surface*, or *venter*, forming the *Fossa subscapularis*. 3. A *superior* or *cervical edge*, which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoid process*. 4. A *posterior* or *vertebral edge*, called, also, the *base*. 5. An *outer* or *axillary* or *inferior edge*, having a thick, truncated angle, in which is the *glenoid cavity*. With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrower part, called the *cervix* or *neck*. The edges or margins are, also, called *costæ*. The scapula has three angles—an *inferior*, *superior*, and *anterior*.

**SCAPULA**, Humerus.

**SCAPULÆ NASI**, *Partes laterales nasi*. The lateral parts of the nose.

**SCAPULAL'GIA**; from *scapula*, 'the shoulder-blade,' and *αλγος*, 'pain.' Arthralgia of the shoulder-joint.

**SCAP'ULAR**, *Scap'ulary*, *Scapula'ris*, from *scapula*, 'the shoulder-blade.' That which relates or belongs to the scapula.

**SCAPULAR APONEURO'SIS**. A broad, thin aponeurosis, with decussating fibres; which is attached, *above*, to the spine of the scapula; *below*, to a crest between the *teres major* and *infra-spinatus*; *within*, to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis that covers a part of the external surface of the deltoid.

**SCAPULAR ARTERIES**. These are several. *a.* The *Superior scapular*, *Superficial scapular* of Sömmering, *Dorsalis scapulae superior*, *Transversalis scapulae*, *T. Hu'meri*. This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical*. It passes behind the clavicle, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. *b.* The *inferior scapular* or *common scapular* or *internal scapular* or *subscapular artery*. *A. Thorac'ica axilla'ris* vel *ala'ris*, is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus - gives off several branches to the armpit, and

divides into two branches:—the one, *Scapula'ris interna*, and the smaller of the two, is distributed, almost entirely, to the *serratus major* anticus, and *latissimus dorsi*; the other, the larger of the two, the *Dorsalis Scapulae inferior* vel *Circumflexa Scapula'ris*, which distributes its branches to the subscapular and supra-spinal, and infra-spinal regions.

**SCAPULAR NOTCH**, see *Notch*, *scapular*.

**SCAPULAR VEINS** follow the same course as the arteries, which they accompany.

**SCAPULARE**, *Scapulary*.

**SCAP'ULARY**, *Scapula'rê*, *Fascia Scapula'ris*, from *scapula*. A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; the tails passing over the shoulders; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

**SCAP'ULO-HUM'ERAL**. An epithet given to the *shoulder-joint*. It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connexion, there are: 1. A very strong, conoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibro-cartilaginous ring*, called the glenoid ligament, and a synovial capsule.

**SCAPULO-HUMÉRAL**, *Teres major*—*s. Huméro-olécranien*, *Triiceps extensor cubiti*—*s. Hyôidien*, *Omo-hyoideus*—*s. Radial*, *Biceps flexor cubiti*—*s. Trochitérien*, *grand*, *Infra-spinatus*.

**SCAPUS**, *Penis*, see *Hair*.

**SCAR**, *Cicatrix*.

**SCAR**, *Seam*. To mark with a cicatrix or seam.

**SCARABÆO'LUS HEMISPHERICUS**, *Coccus cacti*.

**SCARBOROUGH, MINERAL WATERS OF**. *Scarborough Spa*. A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge: the other has an admixture of purging salt. Scarborough, having the additional advantage of sea-bathing, is much frequented by invalids.

**SCARDAMYG'MUS**, *Scardamyx'is*, (F.) *Clingement*, from *σκαρδαμυσσειν*, 'to wink.' Winking, nictation.

**SCARIFICAT'ION**, *Scarifica'tio* (Galen,) *Amyx'is*, *Schasis*, *Catacas'mus*, *Catachas'mus*, *Amyg'mus*, *Schasmus*, *Encharax'is*, from *σκαριφαομα*, 'to make a slight scratch.' The act of scarifying. Also, a small incision, *Am'yche*, made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes,—as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go farther than the skin, they are termed by the French, *Monchetures*.

**SCARIFICA'TOR**, *Scarificato'rium*, *Schaste'rium*. An instrument for making scarifications. It consists of a small brass box, of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

**SCARIFICATORIUM**, *Scarificator*.

**SCARIOLA**, *Cichorium endivia*, *Lactuca scariola*.

**SCARIOLE**, *Cichorium endivia*.

**SCARLATA**, *Scarlatina*.

**SCARLATA'INA**, from *scarlatto* (I.), 'a deep red.' *Scarlatina*, *Eranthe'sis Rosa'lia*, *Rosa'lia*, *Rossa'lia*, *R. squamo'sa*, *Rosa'lia*, *Rube'olæ*, of

some, *Morbilli ignei*, *M. confluentes*, *Morbus scarlatinosus*, *Febris scarlatinosa*, *Gutturis morbus epidemicus Foresti*, *Purpura*, *Typhus scarlatinosus*, *Febris rubra*, *Scarlet Fever*, *Rash-fever*, *Porphyrismus*, *Porphyrisma*, (F.) *Fièvre rouge*, *F. pomprée*. The characteristic symptoms of scarlatina are:—a scarlet flush, appearing about the second day of fever on the face, neck, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned;—the *S. simplex*, *S. febris*, *S. benigna*, *S. sine angina*, in which the fever is moderate and terminates with the efflorescence; prostration of strength being trifling, and the contagious property slight;—and the *S. Anginosa*, *S. Paristhmica*, *S. Cynanchica*, *S. mitior*, in which the fever is severe; the throat ulcerated; the eruption later in its appearance, and less extensive; often changing to a livid hue; the fever being highly contagious. *Scarlatina maligna*, *S. gravior*, has been reckoned a variety of this, in its worst degree. It agrees with the *Cynanche maligna* of Cullen.

Scarlatina belongs to the *Major exanthemata*, and is a disease, chiefly, of children. The eruption differs from that of measles, in being an efflorescence not raised above the entele. Measles, too, is attended with catarrhal symptoms, whilst the complication, in scarlatina, is cynanche. The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection become manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; with antiseptic gargles of bark, acid, &c. Anasarca sometimes supervenes on scarlatina, and requires attention Purgatives are here demanded as well as the use of sorbefacients, such as mercury and squill, &c.

SCARLATINA ANGINOSA, see Scarlatina—s. Benigna, see Scarlatina—s. Cynanchica, see Scarlatina—s. Febris, see Scarlatina—s. Gravior, see Scarlatina—s. Miliaris, Rubeola—s. Mitior, see Scarlatina—s. Paristhmica, see Scarlatina—s. Pustulosa, Rubeola—s. Rheumatica, Dengue—s. sine Angina, see Scarlatina—s. Urticata, Urticaria.

SCARLATINOUS, *Scarlatinal*, *Scarlatinosus*. Relating or appertaining to scarlatina.

SCARLET BERRY, *Solanum dulcamara*.

SCARLET FEVER, Scarlatina.

SCATACRASIA, *Scorærasia*.

SCATACRATIA, *Scorærasia*.

SCELAL'GIA, from *σκελος*, 'the leg,' and *αλγος*, 'pain.' Pain of the leg.

SCELALGIA ANTICA, Neuralgia femoro-pretibialis—s. Postica, Neuralgia femoro-poplitea—s. Puerperarum, Phlegmatia dolens.

SCELETEU'SIS. Mummification. Also, the mode of making a skeleton, *Skeletope'a*, *Syntaxia*.

SCELETOLOGIA, Skeletology.

SCELETON, Skeleton.

SCELETOPEA, Sceleteusis.

SCELETUM, Skeleton—s. Artificiale, see Skeleton—s. Naturale, see Skeleton.

SCELONCUS, Phlegmatia dolens.

SCELORRHEUMA, *Rheumatismus cruris*, from *σκελος*, 'the leg,' and *ρευμα*, 'effluxion, rheumatism.' Rheumatism of the leg.

SCELOS, Leg.

SCELOTYRBE, Chorea, *Porphyra nautica*—s. Febrilis, see *Subsultus tendinum*—s. Festinans, *Paralysis agitans*—s. Tarantismus, Chorea.

SCEPARNON, Amnios, Ascia.

SCEPASTERIUM, *Couvrechef*.

SCEPASTRUM, *Couvrechef*.

SCEPTRUM, Penis.

SCHASIS, Searification.

SCHASMUS, Searification.

SCHASTERION, Fleam, Lancet, Searificator.

SCHIBA ARABUM, *Artemisia santoniana*.

SCHERBET', *Sherbet*, *Serbet*, *Tscherbet*, *Sorbetthum*, *Sorbet'tum*, *Sorbet'um*. A drink prepared by the Turks, Persians, &c., with sugar and the juice of acid fruits.

SCHERLIEVO, *Mal di Scherliero*, *Mal di Breno*, *Mal di Fiume*, *Margaretizza*, *Morbus Croatus*, *Frambæsia Illyrica*, *M. fluminensis*, *Falcadina*, *Malo di Scarlievo*, *Scabies venerea contagiosa*. A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and, that its principal symptoms are:—pains in the bones, ulceration of the fauces, pustules, and fungous growths in different parts of the body.

SCHERO'MA. A dryness of the eye from the want of lachrymal secretion.—Dictionaries.

SCHIAS, Neuralgia femoro-poplitea.

SCHIDAKE'DON, *Schidake'dum*, *Schindace'dum*, *Schindal'ammus*, *Schindal'mus*, from *σχιζω*, 'I cleave.' A longitudinal fracture of a bone.—Galen.

SCHINDACEDUM, *Schidakedon*.

SCHINDALAMUS, *Schidakedon*, *Schindylesis*.

SCHINDALESIS, *Schindylesis*.

SCHINDALMUS, *Schidakedon*, *Schindylesis*.

SCHINDYLE'SIS, *Schindale'sis*, *Schindal'ammus*, *Schindal'mus*. An articulation of bones—by furrowing, as it were; as in that of the vomer, which constitutes, in part, the septum narium. Also, the act of splitting into small pieces; from *σχιζέω*, 'I split into small pieces.—Hippocrates.

SCHINELÆ'ON, from *σχινος*, 'the mastic tree,' and *λαιον*, 'oil;' *Oleum lentis'cinum*. Oil of mastic.—Dioscorides.

SCHINOCEPHALUS, *Scillocephalus*.

SCHINOS, Scilla.

SCHINZNACH or HAPSBERG, MINERAL WATERS OF. These springs are situate three leagues from Baden, and are amongst the most celebrated bathing-places in Switzerland. The waters are of the saline sulphurous kind; and have a high reputation in cutaneous and rheumatic affections, visceral obstructions, and glandular enlargements. They contain sulphate of lime, sulphate of soda, chloride of sodium, chloride of magnesium, sulphate of magnesia, sulphate of lime, carbonate of magnesia, and oxide of iron; sulphohydric acid, and carbonic acid gases.

SCHISMA, Fissure, Rima.

SCHISTOCEPHALUS, from *σχιστος*, 'cleft, separated,' and *κεφαλη*, 'head.' A monster having some part of the head cleft or fissured.—Gurlt.

SCHISTOCOR'MUS, from *σχιστος*, 'cleft, separated,' and *κορμος*, 'trunk.' A monster having some part of the trunk cleft or fissured.—Gurlt.

SCHISTOMELUS, from *σχιστος*, 'cleft, separated,' and *μελος*, 'a limb.' A monster whose limbs are fissured.

SCHISTORRHACHIS, *Hydrorachis*.

SCHISTOSO'MUS, from *σχιστος*, 'cleft,' and *σωμα*, 'body.' A malformation of the abdomen, in which the fissure and eventration extend over the entire length of the abdomen; the lower extremities being absent, or very little developed, so that the body appears as if truncated inferiorly.—Vogel.

SCHIZA, Rima, Rima vulvæ.

SCHIZATRICHIA, *Trichos'chisia*, *Schizo-*

*trich'ia*, from *σχιζα*, 'a cleft,' 'a split,' and *θριξ*, 'a hair.' The splitting of the hairs at their extremities. — J. P. Frank.

**SCHLANGENBAD, MINERAL WATERS OF.** Schlangenbad is a much-frequented watering-place in Germany. The waters contain a little carbonic acid, and carbonate of soda. Temperature 86° Fahrenheit.

**SCHNEIDERIAN MEMBRANE,** Pituitary membrane.

**SCHÖENANTHUS,** *Juncus odoratus*.

**SCHOLA,** School.

**SCHOLLERA OXYCOCCOS,** *Vaccinium oxycoccos*.

**SCHOOL, Schola.** A place of education. (F.) *École.* In Europe the large Medical Schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge; owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London University — University College and King's College. Excellent private schools have, however, long existed in that metropolis. The medical schools of Europe which have been most celebrated, are those of Edinburgh, Leyden, Berlin, Halle, Tubingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are numerous; at this time not fewer than 30 or 40. Those most numerously attended, are the medical department of the University of Pennsylvania, Jefferson Medical College of Philadelphia, the University of the City of New York, and the Louisville Medical Institute.

**SCHOOLEY'S MOUNTAIN, MINERAL WATERS OF.** The waters of this New Jersey Spring are chalybeate. According to Dr. McNevin, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, siliceous, and carbonate, and oxide of iron.

**SCHORBUS,** *Purpura*.

**SCHOUSBÆA COCCINEA,** *Cacocua coccinea*.

**SCHWALBACH, MINERAL WATERS OF.** Schwalbach is a town of Germany, seated on the Aa, 32 miles west of Frankfort. The waters contain chloride of sodium, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, oxygen, &c. Employed as a tonic.

**SCHWANN, WHITE SUBSTANCE OF,** see Substance, white, of Schwann.

**SCHWENDECK, MINERAL WATERS OF.** These waters are about 5 leagues from München, in Bavaria. They contain carbonic acid; carbonate and sulphate of lime, chloride of calcium; chloride of magnesium; carbonate of soda, and oxide of iron, and are much used for cutaneous affections.

**SCIATIC, Ischiat'ic, Ischiat'icus, Sciatic'icus,** from *ισχιον*, 'the haunch.' A word formed by contraction from *ischiatric*, which latter is still used. See Ischiatic.

**SCIATIC NERVE, GREAT, Nervus ischiad'icus, Great fem'oro-poplite'al,** (Ch.) (F.) *Grand nerf sciatique*, ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semi-membranosus, semi-tendinosus, biceps and third abductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal*; the other, the *internal*.

**SCIATIC NERVE, LESSER, Inferior glu'teal branch of the sacral plexus, Lesser fem'oro-poplite'al nerve,** (Ch.) (F.) *Nerf petit sciatique*, which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches — *nervi cutanei clunium inferiores* — to the glutæus maximus; a *sciatic branch or infra-pelvic cutaneous or perineal cutaneous, Pudenda'lis longus inferior*, which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perineum, urethra, penis, scrotum, &c.; and a *posterior femoral cutaneous branch — middle posterior cutaneous nerve* — the filaments of which traverse the femoral aponeurosis, to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

**SCIATIC NOTCH, GREAT, Sciatic Fora'men, Incisura ischiad'ica major,** (F.) *Grande échancrure sciatique ou grand trou sciatique*, is a large notch at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacro-sciatic ligaments. The *lesser sciatic notch, Incisura ischiad'ica minor, Luna Albi'ni,* (F.) *Petite échancrure ischiatique*, is much smaller than the last, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

**SCIATIC REGION, Ischiadic region.**

**SCIATIC SPINE, Spine of the Ischium, Spinosa Proc'ess of the Ischium,** is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacro-sciatic ligament.

**SCIATICA, Neuralgia femoro-poplitea.**

**SCIATIQUE, Neuralgia femoro-poplitea.**

**SCIE, Saw.**

**SCIENTIA HERMETICA, Alchymy** — s. *Medendi, Medicina* — s. *Medica, Medicina*.

**SCIERO'PIA,** from *σκιεος*, 'shady,' and *ωψ*, 'the eye.' A defect of vision, in which all objects have a darker hue than natural.

**SCILLA, Scilla marit'ima, Scylla, Aschil, Schinos, Oculus Typho'ris, Ornithogalum maritimum seu squilla, Stella'ris scilla, Squilla, Squill or sea onion, Eye of Typhon,** (F.) *Ognon mariu. Family, Liliaceæ. Scr. Syst. Hexandria Monogynia.* Native of Spain, Austria, &c. The bulb or root of the squill has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scillitine*. Dose, gr. j to v of the dried root, united or not with mercury.

**SCILLA ESCULEN'TA, Phalan'gium esculentum, Eastern Quamash, Wild Hy'acinth;** indigenous; flowering in May. An article of diet amongst the Western Indians. It is made into bread and poultices for inflamed breasts.

**SCILLOCEPH'ALUS, Schil'loceph'alus,** from *σκίλλα*, 'a bulbous-rooted plant, the squill,' and *κεφαλη*, 'head.' One who has a large bulbiform head.

**SCINCUS, σκιγκος or σκιγγος.** A species of *Saurus* or *Lacer'ta*, common in Egypt, and much extolled by the ancients, as alexipharmic and aphrodisiac.

## SCINTILLA VENERIS, 'a relic of Venns.'

A name given, by Paracelsus, to the impotence and loss of power in the limbs, produced by syphilis.

SCIOM'ACHY, *Skio'machia*, *Skio'machia*; from *σκια*, 'a shade,' and *μαχη*, 'a fight.' An exercise with the ancients, which consisted in a mock encounter at boxing and jumping with one's own shadow.

SCIRRHE, Scirrhus.

SCIRRHOBLEPHARONCUS, see Scleriasis.

SCIRRHOCELE, Orchocele scirrhosa.

SCIRRHOGAS'TRIA, (F.) *Squirrogastrie*; *Scirrhus ventriculi*; from *σκιρρος*, 'hard,' and *γαστηρ*, 'stomach.' Scirrhus of the stomach.

SCIRRHOID, *Scirrhoidea*, *Scirrhoidea*, from *σκιρρος*, 'scirrhous,' and *ειδος*, 'resemblance.' Resembling scirrhus.

SCIRRHOMA, Scirrhus.

SCIRRHOPHTHAL'MIA, *Scirrhophthalmus*, from *σκιρρος*, 'scirrhous,' and *οφθαλμος*, 'the eye,' *Cancer oculi*. Cancer of the eye.

SCIRRHOPHTHALMIA PALPEBRARUM, see Scleriasis.

SCIRRHOSARCA NEONATORUM, Induration of the cellular tissue.

SCIRRHOSIS, Scirrhus.

SCIRRHOSUS, *Scirrhosus*; same etymon as scirrhus. Of or belonging to scirrhus.

SCIRRHOSUS SARCO'MA OF ABERNETHY, *Empy'ma sarco'ma scirrho'sum*. Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIRRHUS, *Squirrhus*, *Scirrho'ma*, *Scirrho'sis*, *Cancer scirrhosus*, *Carcino'ma simplex*, *C. fibro'sum*, *Induratio maligna*, *Schirrus*, *Sclerius*, *Carcinomatos sarco'ma*, *Hard cancer*, *Fibrous cancer*; from *σκιρρος*, 'hard,' 'indurated;' (F.) *Squirre*, *Schirre*, *Skirre*. A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. Scirrhus is ordinarily accompanied by violent shooting pains. It is also irregular on its surface; and when cut into has a bluish or grayish white colour. When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment seems to possess much advantage.

Galen uses the term *Scirrho'sis* for a livid excrescence caused by inflammation.

SCIRRHUS ET CARCINOMA VENTRICULI, see Gastrostenosis cardiaca et pylorica.—s. Hepatis, Hepatoscirrhus.—s. Intestinorum, Enteropathia cancerosa.—s. Palpebrarum, see Scleriasis.—s. Testiculi, Sarcocoele.—s. Uteri, Metroscirrhus.—s. Ventriculi, Gastroscirrhus.

SCISSIPARITÉ, see Generation.

SCISSORS, *Forpex*, *Forpex*, *Psalis*, *Tomis*, (F.) *Ciseaux*. A well-known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are straight or curved. Sometimes the curve is on the flat side, when they are called, in France, *Ciseaux à eniller*; at others, on their edges. The scissors, bent so that the blades make an

obtuse angle with the handles, are also much used. They are called in France *Ciseaux coudés*. Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

SCISSURA, Fissure—s. Vulvæ, see Rima.

SCISSURÆ, Rhagades.

SCISSURE DE GLASER, Fissure, glenoid—s. *Grand médyane du Cervelet*, Valley—s. *de Santorini*, Santorini, fissure of.

SCLAREA, *Salvia sclarea*.

SCLEREMA, Induration of the cellular tissue.

SCLÉREME, Induration of the cellular tissue.

SCLEREMIA, Induration of the cellular tissue.

SCLEREMUS, Induration of the cellular tissue.

SCLERENCEPHALIA, *Induratio cerebri*, from *σκληρος*, 'hard,' and *εγκεφαλον*, 'the brain.' (F.) *Endurissement du cerveau*. Induration of the brain.

SCLERIA, Scleriasis.

SCLERIASIS, *Sclero'ma*, *Sclero'sis*, *Sclero'ria*, *Sclerys'mus*, *Seph'irus*, from *σκληρος*, 'hard.' Any kind of hardness or induration. Sometimes hardness of the eyelids, *Callositas palpebrarum*, *Scirrhoblepharoncus*, *Scirrhophthalmia palpebrarum*, *Scirrhus palpebrarum*; at others, hardness of the genital organs of the female; probably synonymous with scirrhus.—Galen. Paulus. Hardness of bones, *Fragilitas Ossium*.

SCLERITIS, Sclerititis.

SCLERODERMA, Induration of the cellular tissue.

SCLERODES, Sclerotic.

SCLEROMA, Induration of the cellular tissue, Scleriasis.

SCLEROMENINX, Dura mater.

SCLERONYXIS, Scleroticonyxis.

SCLEROPHTHALMIA, Hordeolum.

SCLEROS, Hard.

SCLEROSARCO'MA, from *σκληρος*, 'hard,' and *σαρκωμα*, 'a fleshy tumour.' A hard, fleshy tumour, seated on the gums, and resembling a cock's comb.

SCLEROSIS, Induration of the cellular tissue, Scleriasis.

SCLEROSTENOSIS CUTANEA, Induration of the cellular tissue.

SCLEROT'IC, *Sclerot'ica*, from *σκληρω*, 'I harden.' *Cornea opaca*, *Sclero'des*, *Tunica dura seu albugin'ea seu durior et crassior seu extrema seu alba seu candida seu innominata oculi*, *Sclerot'is*, (F.) *Sclerotique*. A hard, resisting, opaque membrane, of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere truncated before. It is strengthened by the expansion of the muscles of the eye, to which expansion many anatomists have given the name *Tunica albugin'ea*. It forms the white of the eye, *Albumen*, *Album oculi*, *Lou'chales*, *Lou'ades*, *Lock'ades*, *Leu'ades*. The sclerotic is penetrated posteriorly by a round opening, for the passage of the optic nerve; and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels, proceeding to the interior of the eye. In the fœtus, the sclerotic may be separated into two very distinct laminae.

SCLEROTICA CERATOIDES, Cornea.

SCLEROTICITIS, Sclerititis.

SCLEROTICONYX'IS, *Scleronyx'is*, *Sclerotonyx'is*, from *σκληρος*, 'hard,' and *νυξ*, 'punctur

ing.' Perforation of the sclerotica in the operation for cataract by depression.

SCLEROTICUS, Indurans.

SCLÉROTIQUE, Sclerotic.

SCLEROTIS, Sclerotic.

SCLEROTITIS, *Inflammat'io Sclerot'icæ, Leucit'is, Lonchadit'is, Logadit'is, Sclerit'is, Sclerocit'is, Rhœumat'ic ophthalm'ia, Ophthalm'ia arthrit'ica*, from sclerotica, and *itis*, denoting inflammation. Inflammation of the sclerotic coat of the eye.

SCLEROTIUM CLAVUS, see Ergot.

SCLERUNTICUS, Indurans.

SCLERUS, Induration, Scirrhus.

SCLERYNTICUS, Indurans.

SCLERYS'MA, from *σκληρος*, 'hard.' Induration; also, induration of the liver.

SCLERYSMUS, Scleriasis.

SCLIRUS, Scirrhus.

SCLOPETA'RIUS, from *sclopetum*, 'a gun.' Relating to a gun. Hence, *Aqua sclopetaria*, a water for gunshot wounds. *Vul'nera sclopetaria*, gunshot wounds, &c.

SCLOPETOPLAGÆ, Wounds, gunshot.

SCOB, *Prisma, Xysma, Ramen'tum, Rasu'ra*. A shaving, also, an alkali; and the scoria of any metal.

SCŒNANTHIUM, *Juncus odoratus*.

SCOLECESIS, Helminthiasis.

SCOLECIASIS, Helminthiasis.

SCOLEX, *Ascaris lumbricoides*.

SCOLIOMA, Scoliosis.

SCOLIOSIS, *Scolio'ma, Rhachio-scalio'ma*, from *σκολιος*, 'crooked.' A distortion of the spine to one side. See Hump.

SCOLOPENDRA, *Asplenium scolopendrium*.

SCOLOPENDRIA, *Asplenium ceterach*, and *A. scolopendrium*.

SCOLOPENDRIUM LINGUA, *Asplenium scolopendrium*—*s. Officinarium, Asplenium scolopendrium*—*s. Phyllitis, Asplenium scolopendrium*—*s. Ruta muraria, Asplenium ruta muraria*—*s. Vulgare, Asplenium scolopendrium*.

SCOLOPOMACHÆRION, from *σκολοπαξ*, 'the woodcock,' and *μαχαίρα*, 'a knife;' so called because it is bent a little at the extremity like a woodcock's bill. A sort of blunt-pointed bistoury.—*Sculletus*.

SCOLYMUS SATIVUS, *Cynara scolymus*.

SCOOP, Teut. *Schoepe, Cochlea'rē*, (F.) *Curette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is sometimes used to extract foreign bodies from the meatus auditorius externus, nasal fossæ, &c.

SCOPA REGIA, *Ruscus*.

SCOPARIUS, see *Spartium scoparium*.

SCOPE, *σκοπη, Scop'ia, Scopos*, from *σκοπεω*, 'I look around.' A common suffix to words meaning 'view, inspection,' as *cranoscopy, stethoscopy*, &c.

SCOPOLINA ATROPOIDES, *Hyoscyamus scopulina*.

SCOPTULA, *Scopula*.

SCOPULA, Brush.

SCOR, Excrement.

SCORACRATI'A, *Scoracra'sia, Scatacra'sia, Scatacrati'a, Copracrati'a, Copracra'sia, Incontinent'ia Alvi*, from *σσωρ*, 'excrement,' and *ακρατια*, 'want of control.' Want of power to retain the feces. Involuntary evacuation of the feces.

SCORBUT, *Porphyra nautica, Purpura hæmorrhagica*—*s. des Alpes, Pellagra*—*s. de Terre, Purpura hæmorrhagica*.

SCORBU'TIC, *Scorbuti'ens*. That which belongs to scurvy. One affected with scurvy.

SCORBUTUS, *Purpura*—*s. Alpinus, Pellagra*—*s. Nauticus, Porphyra nautica*—*s. Oris, Cancer aquaticus*.

SCORDINEMA, *Carebaria, Pandiculation*.

SCORDINISMUS, *Carebaria, Pandiculation*.

SCORDIUM, *Teucrium scordium*.

SCORDON, *Allium*.

SCORITH, *Sulphur*.

SCORODON, *Allium*.

SCORPIODEX'IS, from *σκορπιος*, 'the scorpion,' and *δηξις*, 'bite;'—more properly, *SCORPIOSTIG'MA*; from *σκορπιων*, and *στιγμα*, 'puncture.' The sting of the scorpion.

SCOR'PION, *Scor'pio, Scorp'ius*, from *σκορπιων*, 'I puncture.' A genus of insects having a sting at the extremity of their tail, with which they make dangerous wounds. An *Oil of Scorpion* was once made from them, which is not now used.

SCORPIOSTIGMA, *Scorpiodexis*.

SCORPIUS, *Scorpion*.

SCORTUM, *Serotum*.

SCORZONE'RA, *S. hu'milis seu lana'ta seu nerro'sa, Escorzone'ra, Vipera'ria, Serpenta'ria Hispan'ica, Offic'inal viper's grass, Viper's grass, Goat's grass*. Family, *Cichoraceæ*. *Sex. Syst. Syngenesia Polygamia*. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzonera Hispan'ica* is esculent, but inefficacious as a drug.

SCOTAS'MA, *Scoto'ma, Scoto'dia, Scoto'sis, Scotos*; from *σκοτος*, 'darkness.' Obscurity of vision, darkness, *Snjfu'sio ra'dians*. Also *Scotodinia*.

SCOTCH FIDDLE, *Psora*.

SCOTODIA, *Scotasma, Scotodinia*.

SCOTODIN'IA, *Scoto'ma, Dinus Scoto'ma, Scotod'ine, Tenebrico'sa verti'go, Scotos, Scotas'ma, Scoto'sis, Scot'omy*, from *σκοτος*, 'darkness,' and *δινω*, 'I turn round.' Giddiness, with impaired sight, often succeeded by headach. See *Vertigo*.

SCOTOMA, *Scotasma, Scotodinia*.

SCOTOMY, *Scotodinia*.

SCOTOS, *Scotasma, Scotodinia*.

SCOTOSIS, *Scotodinia*.

SCOTT'S ACID BATH, *Nitro-muriatic acid bath*. A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.

SCRATCH, *Psora*.

SCREATUS, *Excretion*.

SCRIPTULUM, *Scruple*.

SCRIPULUM, *Scruple*.

SCRIPULUS, *Scruple*.

SCRIVENER'S CRAMP, *Cramp, writers'*.

SCROBIC'ULUS, *Scrobic'ulum*, (F.) *Fossette*. A little ditch or furrow; diminutive of *scrobs*, 'a ditch.'

SCROBIC'ULUS CORDIS, *Anticar'dium, Procar'dium*, (F.) *Fossette du cœur, Avant-cœur, Anticœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.

SCROBICULUS VARIOLÆ, *Pockmark*.

SCROFFEA, *Scrofula*.

SCROF'ULA, *Scroph'ula, Scroph'ula*; from *scrofa*, 'a sow;' because swine were presumed to be subject to a similar complaint. *Scrophulo'sis, Morbus scrophulo'sus, Vit'ium scrophulo'sum, Cacoehym'ia seu Cuchex'ia seu Dyscrasia scrophulo'sa, Pædatroph'ia glandulo'sa, Strumus*,

*Chærna, Coiras, Tabes Glandularis, Adenois scrofulosa, Scroffæ, Chæras, King's evil, The Evil, Cruels* (Scotticæ), (F.) *Scrophules, Scrofulæ, Strumes, Écronelles, Humeurs fistides, Tubercules des glandes lymphatiques, Mal du Roi*. A state of the system characterized by indolent, glandular tumours, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after supuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is frequently excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is:— to strengthen the system by animal diet; pure air, and exercise, cold bathing, or sea-water bathing, &c.

SCROFULA ABDOMINALIS INTERNA, *Physconia strumosa*.

SCROFULAIRE, *Serophularia nodosa*—s. *Aquatique, Serophularia aquatica*.

SCROFULARIA, *Serophularia*.

SCROFULEUX, *Serofulous*.

SCROFULOUS, *Scrophulous, Scrophularius, Strumous, Strumous*, (F.) *Scrofuloux, Strumeux*. Suffering from, or relating to, scrofula.

SCROPHULA, *Scrofula*—s. *Mesenterica, Tabes mesenterica*—s. *Moluccana, Framboesia*.

SCROPHULE, *Serofula*—s. *Gonorrhœicæ, Gonorrhœa impura*.

SCROPHULARIA, *S. Nodosa*.

SCROPHULARIA AQUATICA, *Betonica aquatica, Ficu'ria, Ferra'ria, Castran'gula, Greater Water Figwort, Water Bet'ony*, (F.) *Scrofulaire aquatique*. The leaves are celebrated as correctors of the bad flavour of senna. They were at one time regarded as eminently antiscrofulous, stomachic, and carminative.

SCROPHULARIA FETIDA, *Serophularia nodosa*—s. *Lanceolata, S. Nodosa*—s. *Marilandica, S. Nodosa*—s. *Minor, Ranunculus ficaria*.

SCROPHULARIA NODOSA, *Figwort, Kennelwort, Holmesweed, Henl-all, Scrophularia foetida seu vulg'ria seu lanceolata, seu Marilandica, Millemor'bia, Scrophularia*, (F.) *Scrofulaire, Herbe aux écronelles*. The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, serofulous tumours, ulcers, &c.

SCROPHULARIA VULGARIS, *Serophularia nodosa*.

SCROPHULARIUS, *Serofulous*.

SCROPIHULES, *Serofula*—s. *Mésenteriques, Tabes mesenterica*.

SCROPHULOSIS, *Serofula*.

SCROPHULOSUS, *Serofulous*.

SCROTAL, *Scrotalis*; from *scrotum*. Relating to the scrotum,—as *Hernia scrotalis, scrotal hernia*.

SCROTAL NERVE, see Genito-crural Nerve.

SCROTOCE'LE. A hybrid term; from (L.) *scrotum*, and *κηλη*, 'a tumour.' *Hernia Scrotalis, Scrotal hernia*. Inguinal hernia, descending into the scrotum; Oscheocele.

SCROTUM, from *scortens, scortenum*, 'made of leather.' (?) *Oschê, Os'cheus, Os'chus, Os'cheon, Och'eus, Perin, Scortum, Marsu'pinum, Bar'anla, Bursa testium seu virilis, Cap'ulus*, (?) *Orchus, Os'eus, Follic'ulus genitalis, Her'nia, the Parse, the Cod*, (F.) *Les bourees*. The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perineum, and penis. The skin is remarkable for its brown colour, for the

numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

SCROTUM CORDIS, *Pericardium*—s. *Pendulum, Rhachosis*.

SCRUPLE, *Diob'olum, Gramma'rium, Scrupulus, Scrupulum, Scrip'tulus, Scrip'ulum, Scrip'ulus*. A weight of twenty grains, Troy; twenty-four grains, Poids de marc.

SCUDAMORE'S MIXTURE, see Mixture, *Scudamore's*.

SCULL, *Cranium*—s. *Cap, Calvaria*.

SCURF, Sax. *peurf*, Teut. *Schorft*; *Furfura*. Small exfoliations of the cuticle are so called.

SCURFY, *Furfuraceous*.

SCURVY OF THE ALPS, *Pellagra*—s. *Grass, Sisyrrinchium Bermudianum*—s. *Land, Purpura hemorrhagica*—s. *Petechial, Purpura simplex*—s. *Sea, Porphyra nautica*—s. *Grass, common, Cochlearia officinalis*—s. *Grass, lemon, Cochlearia officinalis*—s. *Grass, wild, Cochlearia coronopus*.

SCUTELLA, *Cap*.

SCUTELLARIA GALERICULATA, *Cassida galaricula'ta, Tertian'ria, Skull-cap*, (F.) *Cus-side bleue, Family, Personœ*. *Sax. Syst. Didymna Angiospermia*. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in tertian ague.

SCUTELLARIA LATERIFLO'RA, *Skull-cap, Mad-weed, Hoodwort, Blue Pimpernel*. An indigenous plant, which grows in all parts of the United States in moist places. It was at one time esteemed a preventive of hydrophobia, but is probably possessed of little virtue of any kind.

SCUTELLARIA INTEGRIFOLIA, —another indigenous variety,—is an intense bitter.

SCUTICULA DIGITORUM MANÛS, *Phalanges of the fingers*.

SCUTULÆ DIGITORUM MANÛS, *Phalanges of the fingers*.

SCUTUM, *Thyroid cartilage*—s. *Cordis, Scapula, Sternum*—s. *Genu, Patella*—s. *Pectoris, Thorax*.

SCUTUM STOMACH'ICUM. A large plaster, applied to the breast or stomach.

SCUTUM THORACIS, *Scapula*.

SCYB'ALA, plural of *σκυβαλον*, 'dung.' *Euterol'ithus Scy'balum, Excrementa Alvi sicco'ra, Fæces indur'atæ*. Hard fecal matters discharged in round lumps.

SCYLLA, *Scilla*.

SCYPHOPHORUS PYXIDATUS, *Lichen pyxidatus*.

SCYPHUS AUDITORIUS, *Infundibulum of the cochlea*—s. *Cerebri, Infundibulum of the brain*—s. *Vienssenii, Infundibulum of the cochlea*.

SCYROS, *Callosity*.

SCYTALIDES DIGITORUM MANÛS, *Phalanges of the fingers*.

SCYTHICA, (RADIX,) *Glycyrrhiza*.

SCYTHROPASMUS, from *σκυρος*, 'gloomy;' *σκυροπαζειν*, 'to look gloomy;' *Vultus tet'ricus et maerens*. A gloomy, depressed countenance, of bad augury in serious diseases.

SCYTITIS, *Cytitis*.

SCYTODEPSIUM, *Tannin*.

SEA AIR. The air in the neighbourhood of the sea contains saline particles commingled with it, which render it a valuable change for serofulous and debilitated individuals. The sea and

sea-coast are usually, also, more equable in their temperature than places inland.

SEA SICKNESS, *Nausea marina*—s. Water, see Water, Sea.

SEAL, GOLDEN, *Hydrastis Canadensis*—s. Solomon's, *Convallaria polygonatum*.

SEAM, *Cicatrix*.

SEARCHING, *Sounding*; from (F.) *chercher*, 'to seek.' The operation of ascertaining, by the introduction of a metallic instrument, whether a patient has a stone in the bladder.

SEASONING, *Aclimation*—s. Fever, Fever, stranger's.

SEAT, Anus—s. Bone, Ischion.

SÉBACÉ, Sebaceous.

SEBA'CEOUS, *Sebaceous*, (F.) *Sébacé*; from *sebum*, 'suet.' That which has the nature of suet.

SEBACEOUS FLUX, *Stearrhœa*.

SEBACEOUS or SEBIP'AROUS GLANDS, *Sebaceous Follicles*, *Sebaceous Crypts*, *Folliculi sebacei*, *Cryptæ sebaceæ*, *Oil Glands*, *Miliary glands*, are small hollow organs, of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, *Smegma cutaneum*, *Sebum cutaneum*, having some analogy with suet, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of females. They secrete a sebaceous matter, which emits a peculiar odour; and hence, after the name of one who described them; and have been called *Glandulæ odorifera Tysoni*, *G. Tysoni*, *Tyson's glands*.

SEBESTENA, *Cordia myxa* seu *sebeste'na* seu *Africa'na* seu *domestica* seu *obl'iqua*, *Sebeste'na officinalis*, *Sebesten*, *Sobsten*, *Myxa*, *Cornus sanguinea*, *Prunus sebestina*, *Smooth-leaved Cordia*, *Assyrian plum*, (F.) *Sebestier myxa*. The dark, black fruit of the *Sebestina* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

SEBESTIER MYXA, *Sebestena*.

SEBIPAROUS, see Sebaceous.

SEBORRHAGIA, *Stearrhœa*.

SEBORRHŒA, *Stearrhœa*.

SEBSTEN, *Sebestina*.

SEBUM, *Pinguedo*, *Sevum*—s. *Cutaneum*, see Sebaceous glands.

SECALE, *S. cereal'è* seu *barbatum*. The *Rye plant*. (F.) *Seigle*. Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where a spirit is also extracted from it. The grain is disposed to acescency: and hence its internal use at first generally produces a laxative effect.

SECALE BARBATUM, *Secale*—s. *Cornutum*, *Ergot*—s. *Luxurians*, *Ergot*.

SECALIS MATER, *Ergot*.

SECERNENT, *Secreting*.

SECERNING, *Secreting*—s. *Substance*, of the kidney, see *Kidney*.

SECESSIO FÆCUM, *Defecation*.

SECESSUS NIGER, *Melæna*.

SÊCHE, *Sepia*.

SECLUSORIUM, *Sac*.

SEC'ONDARY, from *secundus*, 'the second.' Something that acts subordinately to another; as the *secondary symptoms* of a disease; that is, those which supervene on the *primary*.

SECUNDINES, *Secundines*.

SECRETA. Same etymon as *Secretion*. Things or matters secreted or separated from the blood.

SECRE'TING, *Secretorius*, *Secer'ning*, *Se'cernent*, *Excer'nent*. Same etymon as *Secretion*. That which secretes,—as a secreting organ.

SECRETIO, *Secretion*—s. *Lactis*, *Galactosis*—s. *Lotii*, *Uropoesis*—s. *Urinæ*, *Uropoesis*—s. *Victoria*, see *Victarious*.

SECRETION, *Secretio*, *Apoc'risis*; from *se-cernere*, 'to separate.' An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory system; and which differs in each organ according to its particular structure; hence the formation of different fluids;—bile, saliva, urine, milk, &c. The secretions are of three kinds:—*exhalant*, *jollicular*, and *glandular*.

SECRETORIUS, *Secreting*.

SECT, *METHODICAL*, *Methodists*.

SEC'TIO, *Section*. The act of cutting. A division.

SECTIO ALTA, see *Lithotomy*—s. *Anatomica*, *Dissection*—s. *Cadaveris*, *Autopsia cadaverica*—s. *Cadaveris legalis*, *Autopsia cadaverica*—s. *Cæsarea*, *Cæsarean section*—s. *Franconianna*, see *Lithotomy*—s. *Hypogastrica*, see *Lithotomy*—s. *Lateralis*, see *Lithotomy*—s. *Legalis*, *Obduction*—s. *Mariana*, see *Lithotomy*—s. *Nympharum*, *Nymphotomy*—s. *Rectovesicalis*, see *Lithotomy*—s. *Renalis*, *Nephrotomy*—s. *Tendinum*, *Tenotomy*—s. *Vagino-vesicalis*, *Colpocystotomia*—s. *Vesicalis*, *Lithotomy*.

SECTION, *Sectio*—s. *Sigaultian*, *Symphysotomy*.

SECUNDÆ, *Secundines*.

SECUNDINÆ, *Secundines*.

SECUNDINES, *Hystera*, *Deuter'ion*, *After-birth*, *Secund'æ*, *Secundin'æ*, (F.) *Arrière-faie*, *Secundines*, *Délivre*. All that remains in the uterus after the birth of the child,—viz., the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are commonly not expelled till some time after the birth of the fetus; hence their name. See *Délivrance*.

SECUNDUS PROPRIORUM AURICULÆ, *Retrahens auris*.

SEDANTIA, *Sedatives*.

SED'ATIVES, *Sedati'va*, *Panon'ta*, *Sedan'tia*, *Adecta*, *Catastaltica*, *Deprimen'tia*, (F.) *Culmants*, *Tempérants*, from *sedo*, 'I settle or assuage.' Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are: *Acidum Hydrocyanicum*, *Acidum Hydro-sulphuricum*, *Tabacum*, *Missio Sanguinis*, and certain gases by inhalation, as azote, carbonic acid, (?) carburetted and sulphuretted hydrogen.

SEDEM ATTOLLENS, *Levator ani*.

SEDES, Anus, *Excrement*—s. *Cruentæ*, *Dysentery*, *Hæmatochezia*—s. *Lactescentes*, *Cœliac flux*—s. *Procidua*, *Proctocele*.

SEDHEE, *Bangûe*.

SED'IMENT, *Sédimentum*, *Lemma*, *Residen'tia*. Same etymon. (F.) *Dépôt*. A deposit formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypos'taxis*, *Hypostema*, *Residen'tia*, *Subsiden'tia*, (F.) *Dépôt de l'urine*. This sediment or deposit varies in different states of the system. In calculous affections, it is one of the most important objects of attention.

SEDIMENTUM, *Sediment*—s. *Urinæ latericum*, see *Lateritious*—s. *Urinæ pityroides*, see *Furfuraceous*.

SEDITIA, *Nates*.

SEDLITZ, *MINERAL WATERS OF*. *Seidlitz*, *Seidschütz* or *Scydschütz water*. Springs in Bohemia, near Prague, which are simple salines.

They contain a large quantity of sulphate of magnesia, a little sulphate of soda and sulphate of lime, carbonic acid, carbonates of lime and magnesia, and a resinous matter. (?) They are employed as purgatives in a multitude of diseases.

SEDLITZ POWDERS may be formed of *Soda tartarizata* ℥ij, *Soda carbo.* ℥ij, in one paper; *Acid tartaric.* gr. xxxv, in another. For half a pint of water.

SEDON BRÛLANT, Sedum — s. *Reprise*, Sedum telephium.

SEDUM, *Sedum acrē seu glaciā'le seu minus seu vermiculā'rē, Illec'ebra, Helles'ebra, Illec'ebrium Vermiculā'rē, Vermiculā'ris, Piper murā'le, Sempervivum acrē, Wall pepper, Stone crop, Biting Stone crop, Small Houseleek, Aci'chryson, Eo'union*, (F.) *Joubarbe âcre, Orpin brûlant, Vermiculaire brûlante, Sédon brûlant*. Family, Crasulaceæ. *See, Syst. Decandria Pentagynia*. In its recent state it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

SEDUM, *Saxifraga granulata* — s. *Glaciale*, Sedum — s. *Minus*, Sedum — s. *Majus*, *Sempervivum tectorum* — s. *Minus*, Sedum.

SEDUM TELEPHIUM, *S. telephoides, Faba crassa, Cras'sula, C. Major, Illec'ebra major, Tele'phium, Faba'ria cras'sula, Faba crassa, Anacamp'seros, A. al'bicans seu triphyll'a seu vulgā'ris, Orpine*, (F.) *Sédon reprise, Grand orpin, Fève épaisse, Jonbarbe des vignes, &c.* Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

SEDUM TELEPHOIDES, *S. Telephium* — s. *Vermiculare*, Sedum.

SEED, Sperm.

SEGMENTA CARTILAGINEA, see Trachea.

SEGNIT'IA, *Segnit'ies*, from *segnis*, 'sluggish.' Sluggishness or torpor in the exercise of a function: — as *SEGNIETIES ALVI*, Torpor of the bowels: *SEGNIETIES VIRIUM*, Languor.

SEGNITIES, Segnitia.

SEGRAY, MINERAL WATERS OF. Near Pithiviers, in Gâtinais, in the French department of Loiret, there is a chalybeate spring, which has some reputation.

SEGU, Sago.

SEIDLITZ, Sedlitz.

SEIDSCHUTZ, Sedlitz.

SEIGLE, Secale — s. *Ergotée*, Ergot.

SEIN, Uterus, see Manna.

SEIRIASIS, *Coup de Soleil*.

SEIZURES, HIDDEN, see Seizures.

SEKISKAYAVODKA, see Spirit.

SEL, Salt — s. *Admirable de Lémery*, *Magnesiæ sulphas* — s. *Admirable perlé*, Soda, phosphate of — s. *de Cuisine*, Soda, muriate of — s. *de Déroane*, Narcotine — s. *d'Égra*, *Magnesiæ sulphas* — s. *Marin*, Soda, muriate of — s. *d'Opium*, Narcotine — s. *de Soturne*, Plumbi superacetes — s. *de Verre*, see Vitrum — s. *Volatil d'Angleterre*, Ammonia carbonas.

SELAGO, Camphorosma Monspelica, Lycopodium selago.

SELENE, Moon, see Nail.

SELENIASIS, Somnambulism.

SELENIASMUS, Somnambulism.

SELENOBLETUS, Lunatic.

SELENOGAMIA, Somnambulism.

SELERY, Apium graveolens.

SELFABUSE, Masturbation.

SELF-HEAL, Prunella.

SELF-LIMITED. An epithet applied to diseases which appear to run a definite course, but

little modified by treatment, — small-pox, for example.

SELF-POLLUTION, Masturbation.

SEMI'BRA, *Semil'bra, Sembella*, half a pound. Six ounces, Troy; eight, Avoirdupois.

SELINITES, *σελινιτης*. Wine impregnated with the seeds of the *σελινον* or *smallage*. — Dioscorides.

SELINUM ANGELICA, *Angelica Sylvestris* — s. *Galbanum*, *Bubon galbanum* — s. *Imperatoria*, *Imperatoria* — s. *Oporonax*, *Pastinaca opoponax* — s. *Oreoselinum*, *Athamanta aureoselinum* — s. *Ostruthium*, *Imperatoria* — s. *Pastinaca*, *Pastinaca sativa* — s. *Peucedanum*, *Peucedanum* — s. *Pubescens*, *Angelica sylvestris* — s. *Sylvestre*, *Angelica sylvestris*.

SELLA, *S. Turcica* — s. *Equina*, *S. Turcica* — s. *Familiaris*, *Lasanum* — s. *Obstetricia*, *Diphrys* — s. *Sphenoidalis*, *S. Turcica*.

SELLA TURCICA, *Ephipp'rium, Fossa Pituitaria, Sella, S. equina seu sphenoidalis, Turkish Saddle*, (F.) *Selle Turcique ou du Turc*. A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes; and lodges the pituitary gland. It is so called from its resemblance to a *Turkish saddle*.

SELLA TURCICA, Pituitaria fossa.

SELLE TURCIQUE, *Sella Turcica* — s. *du Turc*, *Sella Turcica*.

SELS NEUTRES, Neutral salts.

SELTZ or SELTZER, MINERAL WATERS OF. Cold, acidulous springs, the source of which is at Seltz, nine leagues from Strasburg, and in the Department of the Bas-Rhin. They contain carbonates of lime, magnesia, and soda, chloride of sodium, and much carbonic acid. They are refrigerant, tonic, diuretic, and aperient.

ARTIFICIAL SELTZER WATER may be made from *muriat. acid.* gr. xxxv, *water* Oj, *white marble* gr. iij. Stop up till dissolved. Add *carbonate of Magnesia*, gr. v, and, after some time, *seabonate of soda*, gr. xxxij. Close it till used.

SEMBELLA, *Scilbra*.

SEMERCARPUS ANACARDIUM, *Avicennia tomentosa*.

SEMEIOGRAPHY, *Semeiograph'ia, Semio-graphy, Semiogra'phia*, from *σημειον*, 'a symptom,' and *γραφη*, 'a description.' A description of symptoms or signs of disease.

SEMEIOLOGY, *Semeiol'ogē, Semiology, Semioticē, Phenomenology*, from *σημειον*, 'a symptom,' and *λογος*, 'a discourse.' (F.) *Séméiologique*. The branch of pathology whose object is the doctrine of the symptoms or signs of disease.

SEMEION BOETHIEMATICUM, Indication.

SEMEIOSIS, Semiology.

SÉMÉIOTIQUE, Smeiology.

SEMEN, Sperm — s. *Badian*, *Illicium anisatum* — s. *Cinæ*, *Artemisia santonica* — s. *Contra*, *Artemisia santonica* — s. *Contra verunes*, *Artemisia santonica* — s. *Masculinum seu virile seu genitale*, Sperm — s. *Muliebre*, Sperm (of the female) — s. *Sanctum*, *Artemisia santonica* — s. *Zedoaria*, *Artemisia santonica*.

SEMENCE, Sperm.

SEMENTINA, *Artemisia santonica*.

SEMI, from *ἡμισ*, 'half.' *Semi* or *demi*, in composition, universally signifies 'half;' both in French and English. —

SEMIAN'IMIS, *Semimortuus, Semivivus, Semivivus*; from *semi*, 'half,' and *animus*, 'soul.' Half-living. Half-dead.

SEMI-BULB OF THE FEMALE, *Bulbus vestibuli*.

SEMICANALICULUS, Sulcus.

SEMICANALIS, Sulcus.

SEMICEPHALUS, *Hemicephalus*.

**SEMICIRCULI OSSEI**, Semicircular canals. **SEMICIRCULAR**, *Semicircularis*. That which represents the half of a circle.

**SEMICIRCULAR CANALS**, *Canales* seu *Ductus semicirculares* seu *tubæformēs* seu *circulares*, *Semicirculi ossei*, *Funes* seu *Canaliculi semicircularēs labyrinthi*, (F.) *Canales demicirculaires*, are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is *superior* or *vertical*, *canalis semicircularis verticalis superior*; another *posterior* or *oblique*, *canalis semicircularis verticalis posterior*, and the third *exterior* or *horizontal*, *canalis semicircularis horizontalis*. Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements called *ampullæ*; and by both extremities they open into the vestibule. In the sac at its superior part—the *Sacculus Ellipticus*, *Alveus* seu *Utriculus communis*, *Utriculus*, *Sinus* or *Alveus utriculosis*, *Sacculus vestibuli* or *Median sinus*. In front of the S. ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sacculus sphericus* or *sacculus*.

**SEMICIRCULUS EXSCULPTUS**, Hiatus diaphragmatis aorticus.

**SEMICONGIUS**, Half a gallon, or four pints. **SEMICUBIUM**, *Semicupium*, *Inses'sio*, *Inves'sio*, *Encathisma*, *Excathisma*, (F.) *Demi-bain*, from *semi*, 'half,' and *cubare*, 'to lie down.' A half-bath, or such as receives only the hips or extremities.

**SEMICUPIUM**, Bath, half, Semi-cubium—Semi-fibulaeus, Peronæus brevis—Semi-interosseus indicis, Abductor indicis—Semi-interosseus pollicis, Opponens pollicis.

**SEMILIBRA**, Selibra.

**SEMILLA DEL GUACHARO**. Various kinds of hard and dry fruits, found in the stomachs of the young Guacharoes, a sort of nocturnal bird. The fruits are a celebrated South American remedy in ague.

**SEMILUNAR**, *Semilunaris*, (F.) *Demi-lunaire* ou *Semi-lunaire*, from *semi*, 'half,' and *luna*, 'the moon.' Having the shape of a half-moon.

**SEMILUNAR CARTILAGES**, *Semilunares fibro-cartilages*, *Sigmoid cartilages*, *Cartilaginee sigmoidæ* seu *semilunares*, are two fibro-cartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia, by means of fibrous fasciæ.

**SEMILUNAR GANGLION**,—*Ganglion abdominalē* seu *splanchnicum* seu *transversum* seu *solarē*, *G. surréal*, (Ch.), belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the supra-renal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size. From their periphery the numerous filaments proceed, which go to the formation of the solar plexus.

**SEMILUNAR NOTCH OF THE STERNUM**, *Fourchette*—s. Valves, Sigmoid valves—s. Maseulatus, Eunnch.

**SEMILUNULA UNGUIUM**, see Nail.

**SEMI-MAS**, Eunnch.

**SEMIMASCULUS**, Eunnch.

**SEMIMEMBRANEUS**, Semimembranosus.

**SEMIMEMBRANO'S US**, *Semimembra'neus*, (F.) *Ischio-popliti-fémoral*, *Ischio-popliti-tibial*, (Ch.) *Demi-membraneus*. A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below—by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing it maintains the pelvis in position, and can even draw it downwards.

**SEMIMORTUUS**, Semianimis.

**SEMINA CATAPUTIÆ MAJORIS**, see Ricinus communis.

**SEMINA FRIGIDA MAJORA**. The greater cold seeds. The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and water-melon.

**SEMINA FRIGIDA MINORA**. The lesser cold seeds. The ancients gave this name to the seeds of the lettuce, purslane, endive, and cichory.

**SEMINA RICINI VULGARIS**, see Ricinus communis.

**SEMINAL**, Spermatic—s. Filaments, Spermatozoa—s. Fluid, Sperm—s. Granules, see Granule.

**SEMINALE MEMBRUM**, Penis.

**SEMINALIS**, Spermatic.

**SEMINERVOSUS**, Semi-tendinosus.

**SEMIORBICULARIS**, Orbicularis oris.

**SEMIPESTIS**, Typhus.

**SEMINEX**, Semianimis.

**SEMINIA MORBORUM**, Predisposition.

**SEMINIFEROUS**, from *semen*, 'sperm,' and *fero*, 'I carry.' *Spermatoph'orous*. An epithet given to the vessels which secrete and convey the seminal fluid.

**SEMINIUM**, Sperm.

**SEMIOGRAPHY**, Semeiography.

**SEMIOLGY**, Semeiology.

**SEMIOTICE**, Semeiotice—s. Faciei, Physiognomy.

**SEMIPTEREGIA**, Hemiplegia.

**SEMISEXTUM**, Hemiection.

**SEMISIGILLICUS**. A weight of one drachm or three scruples.—Rhodius.

**SEMISIDERATIO**, Hemiplegia.

**SEMISIDERATUS**, see Hemiplegia.

**SEMISOMNIS**, Coma.

**SEMISOPITUS**, Coma.

**SEMISOPORUS**, Coma.

**SEMISPECULUM**. An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy.—Fabricius Hildanus.

**SEMISPINALIS COLLI**, *Semispinalis colli*, *Articulo-spinalis*, *Transverso-spinalis Colli*, *Spinalis cervicis*, *Spinalis Colli*, *Transversa'lis Colli*, *Transverso-spinalis*, (F.) *Demi-épineux* ou *transversaire-épineux du cou*. This muscle arises from the transverse processes of the six uppermost dorsal vertebræ, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted in the spinous processes of all the cervical vertebræ, except the first and last. Its action is, to extend the neck obliquely backwards and to one side.

**SEMISPINALIS DORSI**, *Semi-spinalis externus*, *Transverso-spinalis dorsi*, *Semi-spinalis*, (Riolan), *Transverso-spinalis*, (F.) *Demi-épineux du dos*, *Transversaire-épineux du dos*. This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebræ,

by as many distinct tendons, which soon grow fleshy; and then again become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebrae, by as many tendons. Its action is, to extend the spine obliquely backwards.

SEMISPINALIS EXTERNUS, Semi-spinalis dorsi—s. Internus, Transversalis dorsi—s. Spinatus, Longissimus dorsi, Semi-spinalis dorsi.

SEMISPINATUS COLLI, Semispinalis colli.  
SEMIS'SIS, *Semis*. The half of a pound, ounce, drachm, &c.

SEMITENDINOSUS, *Semi-nervosus*, (F.) *Ischio-cræti-tibialis*, *Iachio-prætibialis*, (Ch.) *Demitendineus*. This muscle is situate at the posterior part of the thigh. It extends obliquely, downwards and inwards, from the tuberosity of the ischium—to which it is attached by a flat tendon, common to it and the biceps—as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its uses are the same as those of the semimembranosus.

SEMITRITIANA, Hemitritæa — s. Tierce, Hemitritæa.

SEMIUNCIA, Hemioncion.

SEMIIVIR, Eunuch.

SEMIIVIVUS, Semianimis.

SEMOLA, BULLOCK'S, a farinaceous article of diet, which is recommended as highly nutritious and easily digestible, consequently well adapted for infants and invalids, is said to consist of the gluten of wheat, with a small proportion of starch. Semola and Semolina resemble each other greatly. They appear, indeed, to be identical.

SEMOLINA, *Manna croup*. This may be made by grinding wheat in an apparatus, separating the flour from the middlings, dressing the latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland it is called *Cracow groats*.

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white colour, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels. A recent analysis makes it consist of the gluten of wheat with a certain proportion of the starch, part of the latter having been removed.

SEMPERVIVUM ACRE, Sédum.

SEMPERVIVUM TECTORUM, *S. majus*, *House-leek*, *Sédum Majus* seu *Tectorum*, *Aizoön*, *Beinhalalen*, *Buphtalmus*, *Barba Joris*, *Seugreen*, *Agrion'ara*, *Audrachahara*, *Chrysoasper'mum*, (F.) *Joubarbe des toits*. The leaves have a mild, subacid austerly, and are often applied to bruises and old ulcers.

SEMUNCIA, Hemioncion.

SENA, Cassia senna.

SÉNÉ, Cassia senna—s. *d'Amérique*, Cassia Marilandica—s. *Faux*, *Colutea arborescens*.

SENEBIERA CORONOPUS, Cochlearia coronopus.

SENECIO, *S. vulgaris*, *Erig'erum*, *Cortalon*, *Erigeron*, *Groundsel*, *Fireweed*, (F.) *Senecion commun*. Family, Corymbifera. Ser. Syst. Syngenesia Polygamia Superflua. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as refrigerant and anti-scorbutic.

SENECIO HERACIFOLIA, *Erechtites hieracifolia*.

SENECIO JACOBÆA, *Jacobæa*, *St. James' Wort*, *Ragwort*, (F.) *Jacobée*. The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; and a decoction of the root has often been employed in cases of wounds and bruises.

SENECON COMMUN, Senecio.

SENECTA, Senectus.

SENECTA ANGUIM. The cast skin of a serpent. A decoction of it is said to cure deafness!

SENECTA DECREPITA, Decrepitude—s. *Extrema*, *Decrepitude*—s. *Summa*, *Decrepitude*—s. *Ultima*, *Decrepitude*.

SENECTUS, *Senectæ*, from *senere*, 'to be old.' *Gerous*, *Senium*, *Ætas senilis* seu *procreta* seu *mala*, *Old age*, *Senility*, (F.) *Viellence*. The last period of life, commencing, according to some, at 60 years of age, but varying according to numerous circumstances. It is characterized by progressive diminution of the physical and moral faculties.

SENECTUS ULTIMA, Decrepitude.

SENEGA, Polygala senega.

SENEGAL, GUM, *Gummi Senegalen'se* seu *Seneca* seu *Senega* seu *Sen'ica*. The exudation from the *Acacia* seu *Mimosæ Senegal*—Family, Leguminosæ, Ser. Syst. Polygamia Monocæia—which grows in the country of Africa through which the river Senegal runs. It is in loose or single drops, much larger than gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

SENEGINE, see Polygala senega.

SENEKA, Polygala senega.

SÉNEVÉ, Sinapis.

SENGREEN, Sempervivum tectorum.

SENILE, *Senilis*, from *senere*, 'to be old.' Relating or belonging to old age:—as '*senile delirium*': dotage.

SENILITY, Senectus.

SENNA, Cassia senna—s. *Alexandrina*, Cassia senna—s. *Americana*, Cassia Marilandica—s. *Bladder*, *Colutea arborescens*—s. *Essence of*, prepared, *Selway's*, see *Infusum sennæ compositum*—s. *Germanica*, *Colutea*—s. *Italia*, Cassia senna—s. *Prairie*, Cassia chamaerista—s. *Wild*, Cassia chamaerista, Cassia Marilandica.

SENNÆ, Cassia.

SENSATION, *Sensa'tio*, from *sentire*, *sensum*, 'to feel.' *Æsthe'ma*. The consciousness or cognizance by the brain of an impression caused by an external body on the organs of the senses. (F.) *Sentiment*. It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions needs but to be external to the part impressed. Sensations are divided into *external*, *internal* and *morbid*. The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external. *Objective sensations* are produced by impressions on the peripheral nerves; as in vision, audition, &c. *Subjective sensations*, such as originate centrally, or in the encephalon,—as *trinitus aurium*.

SENSATIONAL, Sentient.

SENSE, *Sensus*, *Sen'sio*, *Æsthe'nis*, (F.) *Sens*. Same etymon as Sensation. A faculty, possessed by animals, of appreciating impressions from external objects. The senses are five in number: sight, hearing, smell, taste, and touch. Of these,

the first two and the last administer more to the intellect: and, hence, have been called by some, the *intellectual senses*: the other two seem more destined for the nutrition of the body: and, hence, have been termed *corporeal* or *nutritive senses*. Other senses have been suggested—as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or cœnæsthesia, &c.

SENSES, NERVOUS SYSTEM OF THE, Medulla oblongata.

SENSIBILITAS, Sensibility—s. Anomala, see Irritable—s. Aucta, see Irritable—s. Morbosa, see Irritable.

SENSIBILITY, *Sensibilitas*. Same etymon as Sensation; *Æsthesia*. The faculty of receiving impressions, and having the consciousness of them. Bichat defines it as the property possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility *animal*: in the latter, where not, he terms it *organic*. This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does not exist in vegetables: it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body, but what are sensible—if not in health—in disease. The free extremities of the hair and nails, and the epidermis, are not so. See Insensibility.

SENSIFEROUS, Sentient.

SENSIO, Sense.

SENTORIUM, Sentorium.

SENSORI-VOLITIONAL. A term applied to nervous fibres which pass to and from the cerebro-spinal axis, and are respectively concerned in sensation and volition.

SENORIAL, Sentient.

SENORIAL POWER, according to Dr. Wilson Philip, is composed of the two functions of sensation and volition. Dr. Darwin included in it the power of muscular contraction; but it ought not to be extended to acts in which there is not consciousness.

SENOR'RIUM, *Sensorium commu'nē, Or'ganon sensorium internum, Sensitorium, Emporium spirituum, Æsthetèrion, Sensory*. The common centre of sensations.

SENSORY, Sensorium, Sentient.

SENSORY GANG'LIA. A name given by Dr. Carpenter to a series of ganglionic masses at the base of the brain, which are in direct communication with the nerves of sensation—as the *olfactory, optic, auditory* and *gustatory*.

SENSORY NERVES, *Nerves of sensation*, are so called in contradistinction to *Motor* nerves. There are *general sensory nerves*—as those connected with the posterior part of the spinal marrow, and the fifth pair; and *special sensory*, as those of the senses.

SENSUS ÆGRITUDINIS, Indisposition—s. Osmometricus, Olfaction—s. Perversus, Pseudæsthesia.

SENTIENT, *Sen'tiens, Sensory, Ideü'genous, Sensorial, Sensational, Sensif'erosus*. Feeling, causing feeling.

SENTIENT EXTREMITIES OF NERVES are their minute terminations in the organs.

SENTIMENT, see Sensation.

SEPARATOR'RIUM, from *separo*, 'I separate.' A surgical instrument, for separating the pericranium from the skull.

A *Separatory, Vitrum Hypoclepticum*, is a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, Sepedonogenesis.

SEPEDOGEN'ESIS, *Sepedogen'esis*, from *σηπεδων*, 'putrescency,' and *γενεσις*, 'generation.' A septic disposition or tendency; such as is met with in typhus gravior.

SEPESES, *Sæ'pes*, 'A hedge,' 'a row:' as *Sepes* seu *Se'ries* seu *Peeten dentium*:—a row of teeth.

SEPESES DENTIUM, See Sepes.

SEPIRUS, Seleriasis.

SE'PIA, *S. officinalis*, *Se'pium*, *Cuttle-Fish*, (F.) *Sèche*. The osseous part of the cuttle-fish—*Præcipitans magnum*—has been used as an absorbent, and is often added to tooth-powders.

SEPLASIA'RIOUS. A name formerly given to one who sold perfumes, ointments, &c. It is derived from *Seplasia*, the name of a public place at Capua, where such preparations were frequently sold. A druggist.

SEPSICHY'MIA, Septochymia.

SEPSIS, Putrefaction.

SEPTÆ'MIA; from *σηπτος*, 'rotten,' and *αίμα*, 'blood.' A morbid condition of the blood produced by septic or putrid matters.

SEPTANA FEBRIS, Fever septan.

SEPTENARY, *Septena'rius*, (F.) *Septénaire*, from *septem*, 'seven.' 'Consisting of seven.' The septenary years of the old believers in critical periods were times at which, it was supposed, important changes might be expected to take place. The grand climacteric was fixed at 63, and it was considered that if a person passed that age, he had well-founded expectations that his life might be protracted to 90.

SEPTENNIAD, Climacteric, (years.)

SEPTFOIL, UPRIGHT, Tormentilla.

SEPTIC, *Se'pticus, Septus*, from *σηπειν*, 'to rot,' *σηπτος*, 'rotten.' That which produces putrefaction. A substance which corrodes and disorganizes the soft parts without causing much pain.

SEPTIC POISON, see Poison.

SEPTICÆMIA, Septæmia.

SEPTIMESTRIS FŒTUS, see Fœtus septimemstris.

SEPTINERVIA, Plantago.

SEPTOCHY'MIA, *Sepsichym'ia*; from *σηψις*, 'putrefaction,' and *χυμος*, 'juice.' Putrefaction or putrescency of the humours.

SEPTOPYRA, Typhus gravior.

SEPT'ULUM; diminutive of *septum*, 'a partition.' A division between small spaces or cavities—as the *septula* or fibrous cords given off by the mediastinum testis to be inserted into the inner surface of the tunica albuginea.

SEPTUM, (F.) *Cloison*. A part intended to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:—

SEPTUM CEREBELLI, Falx cerebelli—s. Cerebri, Falx cerebri—s. Cochleæ auditoriæ, Lamina spiralis.

SEPTUM CORDIS, *Septum me'dium cordis*. The partition which separates the two ventricles of the heart.

SEPTUM ENCEPHALI, Tentorium.

SEPTUM LU'CIDUM seu *pellucidum seu ten'ne et pellucidum seu medium seu Speculum lucidum seu Lapis specula'ris* seu *Mediast'num seu Diaphragma ventriculo'rum laterali'um cer'ebr'i, Speculum*, (F.) *Septum médian*, (Ch.) *Cloison transparente*. The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other. This septum is composed of two laminae; between which a small cavity exists, filled by a serous fluid, and called the *Fossa of Sylvius*, 5th ventricle of Cuvier, *Sinus of the median septum*, (Ch.) The brothers Wen-

zel are of opinion that this cavity is lined by a peculiar membrane.

SEPTUM MÉDIAN. S. lucidum—s. *Médian du cerveau*, Falx cerebelli—s. Medium cerebri, S. lucidum.

SEPTUM NA'RIUM, *Interseptum* seu *Dissepimentum* seu *Interfœminum* seu *Discrimen* seu *Imbricæ* seu *Diaphragma* na'rinum, (F.) *Cloison des Fosses nasales*. The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape. These parts are lined by the pituitary membrane, which receives a considerable number of nerves and vessels.

SEPTUM NASI, see Nares.

SEPTUM PARVUM OCCIPITALE, Falx cerebelli—s. Pectiniforme, see Cavernous bodies—s. Pellucidum, S. lucidum—s. *Scalæ*, *Lamina spiralis*—s. *Staphylin*, *Velum pendulum palati*—s. *Tenuæ* et *pellucidum*, S. lucidum—s. Thoracis, *Mediastinum*—s. *Transverse*, *Tentorium*—s. *Transversum*, *Diaphragmæ*—s. *Vestibuli nervoso-membranæ*, see *Labyrinth*.

SEPTUS, Septicus.

SEPUM, Serum.

SEQUESTRUM, from *sequestro*, 'I separate.' The part of bone, in necrosis, which is dead, and separated from the living bone; acting, whilst retained, as an extraneous body. When the sequestrum is superficial and small, it is called *Exfoliation*.

SERAPEUM, Syrup.

SERAPINON, *Sagapenum*.

SERAPIUM, Syrup.

SERBET, Scherbet.

SERICUM, *Silk*; from *Seres*—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bombyx Mori* or *Silkworm*. Silk is used by surgeons for ligatures, &c.

SERICUM ANGLICUM, see *Sparadrapum adhæsivum*.

SERIES DENTIUM, see *Scpes*.

SÉRIEUX, Serious.

SERINGUE, Syringe.

SERIOLA, *Cichorium intybus*.

SERIOUS, (F.) *Sérieux*, *Grave*. A term applied to a disease, *Dyspathia*, *Morbus gravis*, and to a symptom that is attended with danger.

SERIS, *Cichorium intybus*.

SERMOUNTAIN, *Lascorptium album*.

SERO-COLITIS, see *Colitis*.

SERO-CYSTIC, *Sero-cysticus*. An epithet to tumours of the female breast, which consist, in the first stage, of one or more membranous cysts, produced perhaps by dilatation of portions of the lactiferous tubes.

SERO-HEPATITIS, see *Hepatitis*.

SER'OLIN, from *serum*, 'whey.' A fatty matter detected in the blood by Boudet, Lecanu, Sanson, and others.

SÉROSITÉ, Serum.

SEROSITY, Serum.

SEROUS, *Sérosus*, (F.) *Sérieux*. Thin; watery. Relating to the most watery portion of animal fluids, or to membranes that secrete them. See *Serum*.

SEROUS LAYER, see *Tache embryonnaire*.

SEROUS MEMBRANES, Membranes, serous.

SERPEDO, Psoriasis.

SERPENT, *Serpens*, *Anguis*, *Ophis*; from *serpo*, 'I creep.' A snake.

SNAKE BROTH was, at one time, recommended as a restorative.

Many serpents are venomous: and the bites of some fatal. See *Poisons*, Table of.

SERPENTAIRES NOIRE, *Actæa racemosa*.

SERPENTARIA, *Aristolochia serpentaria*—

s. *Gallorum*, *Arum dracunculæ*—s. *Hispanica*, *Scorzonera*—s. *Minor*, *Arum maculatum*—s. *Nigra*, *Actæa racemosa*.

SERPENTARIE BRAZILIENSIS RADIX, *Cainca* radix.

SERPENTIN, see *Alembic*.

SERPENTINE, *Ophites*.

SERPENTINUS, *Ophites*.

SERPES, *Herpes*.

SERPIG'INOUS, from *serpere*, 'to creep.'

An epithet given to certain affections, which creep, as it were, from one part to another,—' *Serpiginous erysipelas*, ' (F.) *Erysipèle serpiginæ*.

SERPIGO, *Herpes circinatus*, *Lichen psoriasis*.

SERPILLUM, *Thymus serpyllum*.

SERPOLET, *Thymus serpyllum*.

SERPULLUM, *Thymus serpyllum*.

SERPULLUM, *Thymus serpyllum*—s. *Citratum*, see *Thymus serpyllum*.

SERRA, Saw—s. *Amputatoria*, *Saw*, *amputation*—s. *Versatilis*, *Trepan*.

SERRAT'ULA AMA'RA, *Family*, *Cynarcephalææ*. See *Syst. Syngenesia Polygamia æqualis*. A species of *Saucoot*, recommended in *ague*.

SERRATULA BEHEN, *Centaurea behen*.

SERRATUS ANTICUS MINOR, *Pectoralis minor*—s. *Major*, *Serratus magnus*.

SERRATUS MAGNUS. So called from its serrated appearance; from *serra*, 'a saw.' *Serratus major anticus*, *Serratus major*, (F.) *Costobasiscapulaire*, *Costo-scapulaire*, (Ch.) *Grand dentelé*. A very broad (especially anteriorly,) thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first 8 or 9 ribs, by as many distinct digitations; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

SERRATUS POSTICUS INFERIOR, (F.) *Dorsolombo-costal*, *Lombo-costal*, (Ch.) *Petit dentelé postérieur et inférieur*. A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely at the lower part of the back; and extends from the spinous processes of the last two or three dorsal vertebrae, and the first two or three lumbar, to the inferior margin of the last four false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

SERRATUS POSTICUS SUPERIOR, (F.) *Cervicidorso-costal*, *Dorso-costal*, (Ch.) *Petit dentelé supérieur*. A flat, thin, quadrilateral muscle; situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, the spinous process of the last cervical vertebra; from the spinous processes of the first two or three dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

SERTULA CAMPANA, *Trifolium melilotus*.

SERUM, Sperm.

SERUM, 'whey.' *Orrhoa*, *Oros*, *Seros'ity*, (F.) *Sérosité*. The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c.

SERUM OF THE BLOOD, *Hæmodyon*, *Orrhoa*, *Ichor sanguinis*, (F.) *Sérum du Sang*, is the

liquid which separates from the blood, when coagulated at rest. It is of a greenish-yellow colour; viscid, slightly coagulable by heat, acids, and alcohol. It is composed of water; chloride of sodium; certain phosphates; and albumen, constantly united to soda, almost in a saponaceous combination.

The fluid which exudes from the albumen of the serum of the blood, when coagulated by heat, is by some called *serosity*.

**SÉRUM DU SANG**, S. of the blood.

**SERUM LACTIS**, *Aqua lactis*; *Serum of Milk*, *Whey*, (F.) *Sérum du lait*, *Petit lait*. That part of milk, from which the butter and caseous matter have been separated. It is a transparent, citrine-coloured liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious diluent and refrigerant.

**SERUM LACTIS HOFFMAN'NI**, (F.) *Petit-lait d'Hoffmann*, is a name given to the liquid resulting from treating with boiling water milk which has been evaporated to an almost solid consistence. It is not much used.

**RENNET WHEY** is made thus: *milk* 2 pints; *rennet*  $\frac{3}{5}$ ss, infused in a little hot water; mix and keep in a gentle heat for some hours, then strain.—Gray.

**SERUM OF SEROUS MEMBRANES**, *Serum membrarum serosarum*, *Water of Dropsy*, (F.) *Sérum des membranes séreuses*, *Eau des hydro-piques*. It resembles the serum of the blood,—especially in cases of hydrocele. The water of hydrothorax and ascites contains much less albumen:—sometimes enough to coagulate on the application of heat: at others, not.

**SERVICE, MOUNTAIN**, *Sorbus acuparia*—s. *Tree*, *Sorbus domestica*.

**SERVLETTE EN CARRÉ**, *Couvrechef*.

**SES'AMOID**, *Sesamoï'des*, *Sesamo'des*, *Sesamoïdeus*, from *σνραμν*, 'a grain of sesamum,' and *ειδος*, 'resemblance.'

**SESAMOID BONES**, *Ossa seu Ossicula sesamoïdea*, are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarso-phalangeal articulations of the great toe. Sometimes, the articulations of other bones of the metatarsus with the phalanges of the toes have them likewise. In the hand, there are two before the metacarpo-phalangeal joint of the thumb. At times, they are met with in the other metacarpo-phalangeal articulations. Occasionally, two exist behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoideum is also met with in the tendon of the peronæus longus. These bones are commonly round, and flattened only on one surface, which is incrustated with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification: and are, like the patella (which is a true sesamoid bone,) composed of much cellular substance, covered by a thin layer of compact tissue. The use of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and thus enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoïdea* to two bony points sometimes met with:—the one at the outer side of the carotid canal of the tem-

poral bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

**SESAMUM**, see *Sesamum orientale*.

**SES'AMUM ORIENTA'LE**, *S. edu'tè seu oleif'erum*, *Bennè*, *Oily Grain*. The seeds of this African plant are cultivated in Georgia and South Carolina, where the negroes use them with Indian corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

*Beune oil*, *Oleum Ses'ami*, is used in the Southern States as a laxative. The leaves—*Sesamum* (Ph. U. S.)—afford, by infusion, an excellent mucilage.

**SESCUN'CIA**, *Sesquim'cia*, *Hemio'ion*. An ounce and a half. See *Sesqui*.

**SESELI**, *Laserpitium siler*—s. *Ægopodium*, *Ligusticum podagraria*—s. *Annum*, *S. tortuosum*—s. *Carum*, *Carum*—s. *Carvi*, *Carum*—s. *Creticum*, *Tordylum officinale*—s. *Fœniculifolium*, *Sison ammi*—s. *Graveolens*, *Apium graveolens*—s. *Meum*, *Æthusa meum*—s. *Patens*, *S. tortuosum*—s. *Pratense*, *Peucedanum silaus*—s. *des Près*, *Peucedanum silaus*.

**SESELI TORTUOSUM**, *Seseli Massilien'sè seu an'num seu patens*, *Euan'thè striat'a rig'ida*, *Hartwort of Marseilles*. The seeds have a warm taste; and a greater degree of pungency than those of *Laserpitium siler*, which is the *Seseli* of the Pharmacopœias.

**SESQUI**. This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum*, 'a grain and half.'

**SESQUIUNCIA**, *Sescuncia*.

**SETA EQUINA**, 'a horse's hair.' *Hairworm*, *Helmin'thus Gor'dii*. A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions; colour pale-brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Col'ica Lappon'ica*, in which the gripings are, at times, exceedingly severe.

**SETA'CEUM**, *Seto*, *Seton*, from *seta*, 'a bristle.' A long strip of fine linen or cotton twist, passed through the skin and areolar membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is, also, applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton-needle through it, with the thread attached. Every day a fresh portion of the thread is drawn through the sore. Setons are established in many diseases;—in obstinate ophthalmiæ, cephalalgæ; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

**SETARIA ROCCELLA**, *Lichen roccella*.

**SETFAST**, see *Furunculus*.

**SETO**, *Setaceum*.

**SETON**, *Setaceum*.

**SETTERWORT**, *Helleborus fœtidus*.

**SEVADILLA**, *Veratrum sabadilla*.

**SEVATIO**, *Steatoma*.

**SÈVE**, *Sap*.

**SÈVRAGE**, *Weaning*.

**SEVUM**, *Pinguedo*.

**SEVUM**, *Sebum*, *Sepum*, *Stear*, *Adeps ovil'i*, *Sevum verveci'num*. Suet, mutton suet; Pinguedo.

**SEVUM PREPARATUM**, *Serum* (Ph. U. S.),—*Ovil'i Sevum Preparatum*, *Prepared Suet*, (F.) *Grasset de Mouton*, *Suif*, is formed by cutting suet in pieces; melting over a slow fire, and straining through linen. It is emollient,

and is sometimes boiled in milk ( $\frac{3}{4}$ ij to Oj), and is used in diarrhoea and dysentery. Its principal employment is in the formation of plasters.

SEVUM VERVEGINUM, Sevum.

SEX, *Sexus, Genus, Physis*. The physical difference between male and female in animals and vegetables;—as the *Male sex*, *Sexus potior seu fortior seu virilis*; and the *Female sex*, *Sexus sequior, S. muliebris, Alter Sexus, 'The Sex.'*

SEXTANS, *Sexta pars libræ*. The sixth part of a pound.—Galen.

SEXTARIUS. An ancient measure for liquid and solid substances. See Weights and Measures.

SEX'TULA, *Hexagium, 'εξάγων*. The sixth part of an ounce.

SEX'UAL, *Sexualis*, from *sexus*, 'sex.' That which relates to the sex; which characterizes the sex.

SEXUAL DISEASES, *Morbi sexuales*, are the diseases of the genital organs; as SEXUAL FUNCTIONS are the genital functions.

SEXUAL INTERCOURSE, Coition—s. Organs, Genital organs.

SEXUS, Sex—s. Alter, see Sex—s. Fortior, see Sex—s. Muliebris, see Sex—s. Potior, see Sex—s. Sequior, see Sex—s. Virilis, see Sex.

SEYDSCHÜTZ WATER, Sedlitz water.

SHALLOT, Echalotte.

SHAMPOO'ING, *Massing, (F.) Massage, Massément*. A Hindoo process, which consists in pressing the body of the bather in a peculiar manner: cracking the various joints, and employing blows and friction.

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in dyspepsia.

SHIAMROCK, INDIAN, *Trillium latifolium*—s. Water, *Menyanthes verna*.

SHANKER, *Chancere*.

SHARON SPRINGS, NEW YORK. These springs, which are situate about 10 or 12 miles south of Canajoharie, N. Y., and 45 miles west of Albany, are much frequented. They contain, according to the analysis of Dr. Chilton, sulphate of magnesia, sulphate of lime, chloride of sodium, chloride of magnesium, sulphohydrate of sodium, sulphohydrate of calcium, vegetable extractive matter, and free sulphohydric acid gas. Their temperature is 48° Fahr.

SHEATH, Vagina.

SHEEP POISON, *Kalmia latifolia*.

SHELLBARK, see Hickory.

SHELL FLOWER, *Trillium latifolium*—s.

Liquid, see Calcis murias—s. Membrane, Membrana testæ.

SHEPHERD'S PURSE, *Thlaspi bursa*.

SHERBET, Scherbet—s. Orange, see Syrupus aurantii.

SHERMAN'S WORM LOZENGES, see Worm lozenges, Sherman's.

SHERRY, Sack, see Wine.

SHIELD, WATER, *Nelumbium luteum*.

SHIN, *O'crea, Crista tib'ia*. The spine or anterior part of the tibia or leg. It is, also, called *Anticnemion*, and *Crea*.

SHINGLES, Herpes zoster.

SHIP FEYER, see Typhus.

SHOCK, see Concussion.

SHORT, Sax. *recept*, from *reipian*, 'to cut, to shear,' *shord, shor'd, short*, (F.) *Court*. A word used, by anatomists, in opposition to *long*; and to distinguish parts from each other that have otherwise the same name.

SHORT BOXES, for example, are those in which

the three dimensions—length, breadth, and thickness—are nearly alike; such are the vertebræ, bones of the carpus, tarsus, &c.

SHORT RIBS, see Costa.

SHORTSIGHTED, Myopia.

SHORTSIGHTEDNESS, Myopia.

SHORTWINDED, Pury.

SHOTBUSH, *Aralia spinosa*.

SHOULDER-BLADE, Scapula.

SHOVEL PICKEREL WEED, *Unisema deltofolia*—s. Pond, *Unisema deltofolia*.

SHOW, see Parturition.

SHOW-CHOO, see Spirit.

SHOWER-BATH, see Bath.

SIRUB, perhaps, from Arabic, *sharab*, 'syrup.'

A compound of spirits, lemon-juice, and sugar.

SURB, SWEET, *Calycanthus*—s. Sweet-scented, *Calycanthus*.

SHU'DDERING, *Frem'itus, Phryag'ma*, from (G.) Schauder, Schauer, (F.) *Frémissement, Tressaillement*. A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

SHUMAC, *Rhus coriaria*.

SIAGANTRI'TIS, from *σιγων*, 'the jaw,' *αντρον*, 'a cavity,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the antrum of Highmore.

SIAGON, Maxillary bone.

SIAGO'NAGRA, from *σιγων*, 'the jaw,' and *αγρα*, 'a seizure,' *Arthri'tis maxilla'ris*. A gouty or rheumatic affection of the joint of the lower jaw.

SIALACHUS, Salivation.

SIAL'AGOGUE, *Sialago'gus, Sial'ogogue, Pty-al'ogogue, Ptyas'magogue, Soli'vans, Saliva'tum, Sialocinet'icus, Apophlegmat'ions per os*, (F.) *Salivant*; from *σιαλον*, 'saliva,' and *αγω*, 'I expel.' That which provokes the secretion of saliva.

Pyrethrum and mercury are sialogogues. Sialogogues may be of two kinds,—those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former,—pyrethrum to the latter class. The chief sialogogues are armorea, calamus, mezereum, pyrethrum, tabacum, and zingiber.

SIAL'ICA, from *σιαλον*, 'saliva.' Medicines, which affect the salivary glands.—Pereira.

SIALISMUS, Salivation.

SIALOCINETICUS, Sialogogue.

SIALOLITHI, Calculi, salivary.

SIALOLOG'IA, from *σιαλον*, 'saliva,' and *λογος*, 'a discourse.' A treatise on saliva.

SIALOMA, Saliva.

SIALON, Saliva.

SIALORRHEEA, Salivation.

SIALOS'CHESIS, from *σιαλον*, 'saliva,' and *σχεισις*, 'retention.' Retention or suppression of the saliva.

SIALOSYRINGES, Salivary fistulæ.

SIALOZEMIA, Salivation—s. Mercurialis, Salivation, mercurial.

SIAMESE TWINS, see Twins, Siamese.

SIBARE, Phrenitis.

SIBBENS, *Sivvens, Framba'sia Sco'tica*. An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind.

*Sicin*, in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *sicin*, the inhabitants have made *sivvin, sibben, sibbens, and sivvens*. By some, this affection is regarded as a complication of the

venereal and itch. In the Orkneys, *sibbens* means itch. — Jamieson.

**SIBILANT**, *Sib'îns, Sib'îlans*, from *sibilo*, 'I hiss or whistle.' Making a hissing or whistling sound. See *Râle sibilant*.

**SIBILISMUS AURIUM**, Tinnitus aurium.

**SIBILUS AURIUM**, Tinnitus aurium.

**SICCANTIA**, from *siccare*, 'to dry.' *Xerantica*, (F.) *Siccatis*. Drying medicines. — Galen.

**SICCANTIA**, Desiccativa.

**SICCATIFS**, Siccantia.

**SICCATIO**, Drying.

**SICHA'SIA**, *σικχασια*, 'disgust.' A distressing disgust for food; such as is experienced by women with child.

**SICL'ICUM**. A Roman weight of about two drachms.

**SICK**, Sax. *ƿeoc*, *Æger*, *Ægro'tus*, *Nos'eros*, *Nos'o'des*, *Jacens*, *Laborio'sus*, *Laborans*, (F.) *Malade*. Labouring under disease. Such is its acceptation in old English, and generally in the United States. In England, it most commonly means, — affected with disorder of the stomach or nausea.

A sick person, *Æger*, *Ægro'tus*, (F.) *Malade*, who is under the charge of a physician is said to be a *patient*, or the patient of the physician. At times, but rarely, patient is used for a sick person in the abstract.

**SICK STOMACH**, Milk sickness.

**SICKLY**, *Morbo'sus*, *Valetudina'rius*, *Adyn'atos*, *Nosac'eros*, *Nos'o'des*, *Morbose*, (F.) *Maladif*. One who is subject to be sick, or is in feeble health.

**SICKNESS**, Disease — s. Falling, Epilepsy — s. River, Milk sickness — s. of the Stomach, Vomiting — s. Swamp, Milk sickness.

**SICLIUM**, Sicilium.

**SICUA**, Cupping-glass.

**SICULA**, Beta, Penis.

**SICYEDON**, Caledon.

**SIDA ABUTILON**, Abutilon cordatum.

**SIDE, PAIN IN THE**, Pleurodynia.

**SIDERA'TIO**, *Sydera'tio*, *Sideratio*, from *sidus*, 'a star;' because the condition was thought to be produced by the influence of the stars. The state of one struck suddenly, without apparent cause, and as if by the influence of the stars or planets—*Planet-struck*. The ancients comprised, under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

**SIDERATIO**, Apoplexy, Asphyxia, Phrenitis — s. Osis, Spina ventosa.

**SIDERATION**, Astrobolismos, Sideratio.

**SIDERION**, Ferramentum.

**SIDERITES**, Magnet.

**SIDERITIS**, Magnet, Teucrium chamæpitys.

**SIDEROS**, Ferrum.

**SIDEROXYLON**, Chrysophyllum cainito.

**SIDHEE**, see Gunjah.

**SIDMOUTH (CLIMATE OF)**. Sidmouth is in Devonshire, England, on the sea-beach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to sea-fogs.

**SIÈGE**, Anus.

**SIELISMOS**, Salivation.

**SIELON**, Saliva.

**SIEVE**, see Cribration — s. Drum, see Cribration.

**SIFFLEMENT (F.)**, from *siffler*, 'to whistle.' Whistling.

**SIFFLEMENT MODULÉ**, *Chant des artères*, *Bruit musical*, 'modulated whistling, or music of the arteries.' A kind of sound heard on auscultation, resembling, at times, the humming of certain insects.

The sound is chiefly met with in those labouring under chlorosis.

**SIGAULTIAN SECTION**, Symphyseotomy.

**SIGE**, Taciturnity.

**SIGH**, Suspirium.

**SIGHT**, Vision — s. Askew, Dysopia lateralis — s. False, Metamorphopsia, Pseudoblepsia — s. Feebleness of, Amblyopia.

**SIGILLUM SALAMONIS**, Convallaria polygonatum — s. Virginitatis, Hymen.

**SIGMATOID**, Sigmoid.

**SIGMOID**, *Sigmoid'al*, *Sigmatoid*, *Sigmoï'des*, *Sigmo'des*, *Sigmoï'deus*. That which has the form of the Greek S or C; from sigma, and *εἶδος*, 'resemblance.'

**SIGMOID CARTILAGES**, Semilunar cartilages.

**SIGMOID CAVITIES OF FOSSÆ OF THE ULNA**, (F.) *Cavités ou Fosses sigmoïdes*, are two notches at the upper part of that bone, — one for the reception of the humerus; the other for that of the radius.

**SIGMOID FLEXURE OF THE COLON**, *Flexura sigmoï'dea*, is a turn the colon takes immediately before its termination in the rectum.

**SIGMOID OR SEMILUNAR VALVES**, *Valvule Sigmoï'dea*, *Proces'sus Sigmoï'des*, (F.) *Valvules sigmoïdes ou semilunaires*, are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpus'calum* seu *Glob'ulus Aran'tii*, which completely closes up the passage. It is, also, called *Corpusculum Morgagn'ii*, and *C. Ssamoi'deum*, (F.) *Globule d'Aran'tius*.

**SIGN**, *Signum*, *Semi'on*, (F.) *Signe*. Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn regarding the nature and seat of his disease. The phenomena which precede the disease are called *anamnes'tic* or *commem'orative signs*; — those which accompany it are termed *diagnos'tic*, if they reveal the nature or seat of the disease, — *prognos'tic*, when they indicate its probable duration and termination.

**SIGNA ASSIDENTIA**, see Assidens.

**SIGNATURE**, *Signatu'ra*, *Signa'tio*, from *signum*, 'a sign;' *Episphagism'os*. This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended that every one was marked by the star under which he was born.

**SIGNATURES OF PLANTS** meant certain peculiarities in their external formation or colour, which indicated that they were adapted for particular diseases: — as in the case of the *Lungwort*, *Liverwort*, &c.

**SIGNES AVANT-COUREURS**, Precursory signs — s. *Précurseurs*, Precursory signs.

**SIGNUM**, see Parturition — s. Characteristicum, see Pathognomonic — s. Conjunctum, see Pathognomonic — s. Diacriticum, see Diacritica signa — s. Morbi essentialia, see Pathognomonic.

**SILACH**, *Silac*. An Arabic word, used to designate thickening of the eyelids, *Crassit'ies Palpebra'rum*; and, also, *Alopecia*. — Forestus, Stephanus.

**SILENCE**, see Murmur, respiratory.

**SILENE CRASSIFOLIA**, Cucubalus behen —

**s. Inflata**, Cucubalus behen — **s. Thorei**, Cucubalus behen.

**SILE'NE VIRGIS'ICA**, *Ground Pink*, *Wild Pink*, *Catch Fly*. The root has been employed, in decoction, as an efficacious anthelmintic.

**SILER LANCIFOLIUM**, *Laserpitium siler* — **s. Montanum**, *Laserpitium siler*.

**SIL'IQUA**, *Cerastion*; the carat. A weight of about four grains. A pod.

**SIL'IQUA ARABICA**, *Tamarindus* — **s. Araci** aromatici, see *Vanilla* — **s. Banilla**, see *Vanilla* — **s. Dulcis**, *Ceratonium siliqua* — **s. Vaniglia**, see *Vanilla* — **s. Vanillia**, see *Vanilla*.

**SIL'IQUASTRUM PLINII**, *Capsicum annuum*.

**SILK**, *Sericum* — **s. Weed**, *Asclepias Sullivantii*, *Asclepias tuberosa* — **s. Weed**, common, *Asclepias Syriaca* — **s. Worm**, see *Sericum*.

**SIL'LOX**, *Sulcus* — **s. Horizontal de la veine ombilicale**, see *Liver* — **s. Transversale**, see *Liver* — **s. de la Veine cave inferieur**, see *Liver* — **s. de la Veine porte**, see *Liver*.

**SIL'O**, *Camus*.

— **SILPHIUM**, *Laserpitium*.

**SIL'PHIUM PERFOLIATUM**, *Cup Plant*, *Turpentine Snow Flower*, and

**SILPH'UM TEREBINTHINACEUM**, *Prairie Burdock*, *Rosin Weed*; *Nat. Order*, *Compositae*; indigenous in Ohio and Michigan, and flowering from July to September; yield a fragrant gum, which is esteemed stimulant and antispasmodic.

**SIL'US**, *Camus*.

**SILVER**, *Argentum* — **s. Ammonio-chloride of**, see *Argentum* — **s. Chloride of**, see *Argentum* — **s. Chloruret of**, see *Argentum* — **s. Cyanide of**, see *Argentum* — **s. Cyanuret of**, see *Argentum* — **s. Iodide of**, see *Argentum* — **s. Ioduret of**, see *Argentum* — **s. Leaf**, *Magnolia macrophylla* — **s. Muriate of**, see *Argentum* — **s. Nitrate of**, *Argenti nitras* — **s. Oxide of**, see *Argentum* — **s. and Ammonia**, *Chloride of*, see *Argentum* — **s. and Ammonia**, *Chloruret of*, see *Argentum*.

**SILYBUM**, *Carduus marianus* — **s. Maculatum**, *Carduus marianus* — **s. Marianum**, *Carduus marianus*.

**SIMAROUBA**, *Quassia simarouba* — **s. Bitter**, *Quassia simarouba* — **s. Paua**, *Malgiphia mourella*.

**SIMARUBA**, *Quassia simarouba*.

**SIMARUBA CEDRON**. A South American tree, the seeds of which — *cedron seeds* — have been used as an antidote for snake-bites. They have, also, been proposed in mental diseases and in epilepsy. The scrapings of the wood have been used as a substitute for sulphate of quinia.

**SIMARUBA OFFICINALIS**, *Quassia simarouba*.

**SIMILATIO**, *Assimilation*.

**SIMITIUM**, *Plumbi subarborescens*.

**SIMO**, *Camus*.

**SIMONEA FOLLICULORUM**, *Acarus folliculorum*.

**SIMOTRACHELUS**, *Bysauchen*.

**SIMPLES**. Medicinal herbs. One skilled in simples is called a *Simplist*, a *Rhizotomist*.

**SIMPLIST**, see *Simplex*.

**SIMULATED DISEASES**, *Feigned diseases*.

**SIMULATI MORBI**, *Feigned diseases*.

**SIMUS**, *Camus*.

**SINA LEVANTICA**, *Artemisia santonica*.

**SINAPEL'E'ON**, from *σινάπης*, 'mustard,' and *ἐλαιον*, 'oil.' Oil impregnated with mustard.

**SINAPI**, *Sinapis*.

**SINA'PIS**, *Sinapis nigra* seu *cer'anna* seu *Olive-riana*, *Brassicica nigra*, *Napus*, *Eru'ca*, *Sina'pē*, *Sina'pi*, *Nā'pium*, *Nāpy*, *Common Black Mustard*, (F.) *Moutarde noire*, *Sénévé*, *Sauve*. *Family*, *Cruciferae*. *Sex. Syst.* *Tetradynamia Siliquosa*. The seeds are inodorous, when entire; but, when bruised, the odour is very pungent; taste bitterish and acrid. They yield their virtues to water, and

afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See *Sinapis*.

**SINAPIS ALBA**, *S. folio'sa*, *Bonannia officinalis*, *White Mustard*, *Napus Leucosinā'pis*, is also used medicinally. It is somewhat less pungent than the black. The distilled oil — *Oleum Sinapis* — is a powerful stimulant and rubefacient.

*Whitehead's Essence of Mustard* consists of oil of turpentine, camphor, and a portion of spirit of Rosemary: to which is added a small quantity of flour of mustard. It is a celebrated embrocation for rheumatism, &c.

*Whitehead's Essence of Mustard Pills* consist of yellow resin and balsam of tolu enough to make into pills.

*Mustard Whey* is made by taking bruised mustard seeds  $\mathfrak{z}$ ss, and milk  $\mathfrak{Oj}$ . Boil together until the milk is curdled, and strain.

This whey is used in dropsy.

**SINAPIS ARVEN'SIS**, *S. Timoriana*, *Charlock*, *Wild Mustard*, has the seeds sometimes substituted for black mustard.

**SINAPIS CER'NUA**, *Sinapis* — **s. Eruca**, *Brassica eruca* — **s. Foliosa**, *S. alba* — **s. Oliveriana**, *Sinapis* — **s. Tamoriana**, *S. arvensis* — **s. Tuberosa**, *Brassicica rapa*.

**SINAPISIS**, *Bole Armenian*.

**SIN'APISM**, *Sinapis'mus*, from *σινάπης*, 'mustard.' A cataplasm, of which mustard forms the basis, which is used for exciting redness, and acting as a counter-irritant. It is prepared by mixing flour of mustard and vinegar together to the due consistence. See *Cataplasma sinapis*.

**SIN'CIPIUT**, *Sincipital Region*, *Bregma*, *Syn'ciput*, *Mesocranium*, *Mesocranium*, *Hemicephalæum*, *Hemicephalum*, *Hemicephalum*; the top of the head. The French use it synonymously with *vertex*. By some it is applied to the frontal region or fore-part of the cranium. The parietal bones have been called *sincipital bones*, *Ossa sincipitis*, (F.) *Oss du sinciput*.

**SINDON**, *σινδών*, very fine linen. A small piece of rag, or a round pledget, supported by a thread at its middle, and introduced into the opening in the cranium made by the trephine.

**SINEW**, *Tendon*.

**SINGLETON'S GOLDEN OINTMENT** is formed of sulphuret of arsenic (realgar), and lard or spermaceti ointment.

**SINGULT'OUS**, *Lygmo'des*, *Lygo'des*, *Lyngo'des*, *Lyggo'des*; from *Singultus*, 'hicough.' Relating to or affected with hicough.

**SINGULT'US**, *Lynx*, *Lygmus*, *Spasmolygmus*, *Clonus singultus*, *Pneusis singultus*, *Hiccough*, *Hiccup*, (F.) *Hoquet*. A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrests the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health.

**SIN'ISTRAD**, from *sinister*, 'to the left hand.' A term used by Dr. Barelay, adverbially, to signify 'towards the sinistral aspect.' See *Mesial*.

**SINISTRAL ASPECT**, see *Mesial*.

**SINU'ELUX**, *Sinuus*.

**SINUOSITAS**, *Sinus*.

**SIN'UOUS**, *Sinus'us*, (F.) *Sinueux*, from *sinus*, 'a bay or curve.' An epithet given to certain ulcers, and especially to certain fistulae, which are tortuous.

**SINUS**, *Sinus'sitas*, *Colpos*, *Abcon'sio*, *Eurycho'ria*, *Recess'us*, (F.) *Golfe*. Any cavity, the interior of which is more expanded than the en-

trance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.;—and to the bosom.

In *surgery*, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c., (F.) *Clapier*.

Sinuses of bones form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

SINUS ACUSTICUS, Auditory canal, internal—s. Ampullaceus, Cavitas elliptica—s. Aortici, Sinuses of Valsalva—s. Arteriosus, S. pulmonalis—s. Basilar, Sinus transversus—s. *Cavernæus*, Cavernous sinus—s. Cavernosi uteri, Sinus uterini—s. Cavernosus, Cavernous sinus—s. Cerebri, Ventricles of the brain—s. *Choroïdien*, S. quartus—s. Circular, of Ridley, Sinus coronarius—s. Circularis, S. coronarius—s. *Coronaire du cœur*, see Cardiac veins.

SINUS CORONARIUS, *Sinus circula'ris*, S. *circula'ris Ridleyi*, Circular sinus of Ridley, Coronary sinus. A venous canal, which surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

SINUS, CORONARY, Sinus coronarius—s. Coronary of the heart, Sinus coronary, venous.

SINUS CORONARY, VENOUS, *Coronary sinus of the heart*. A name given, on account of its great size, to that portion of the great coronary vein which embraces the left auriculo-ventricular furrow.

SINUS COXÆ, see Cotyloid—s. *Droit*, S. quartus.

SINUS DEXTER CORDIS, *Sinus vena'rum cavatum*, S. *veno'sus*, *Saccus vena'rum cavatum*. The right auricle of the heart:—*A'trium cordis dextrum*. See Auricula.

SINUSES OF THE DURA MATER, *Sinus seu Fis'tula seu Cavita'tes seu Ventric'uli seu Tu'buli seu Sanguiductus seu Receptac'ula Duræ matris*, are formed by a separation of the layers of the dura mater, which acts as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies;—the *two lateral sinuses*, the *straight sinus*, and the *longitudinal sinus*. To the lateral sinuses belong,—the *petrous sinuses*, superior and inferior; the *transverse sinus*; the *cavernous sinuses*; the *coronary sinus*, and the *occipital sinuses*. To the straight sinus belongs the *inferior longitudinal*. The longitudinal sinus, properly so called, has no sinus under its dependence.

SINUS FALCIFORMIS INFERIOR, S. longitudinal, inferior—s. Falciformis superior, S. longitudinal, superior—s. Fourth, Torcular Herophili—s. Genæ pituitariis, Antrum of Highmore—s. of the Jugular vein, see Jugular veins—s. Lacrymalis, Lacrymal sac.

SINUSES OF THE LARYNX, Ventricles of the larynx.

SINUSES, LAT'ERAL, *Sinus transver'si*, S. *magni*, S. *latera'les*, (F.) *Sinus latéraux*. Each of these sinuses, distinguished into right and left, begins at the torcular Herophili, or confluence of the sinuses, and terminates at the sinus of the jugular vein.

SINUS LATÉRAUX, Sinuses, lateral.

SINUSES, LONGITUDINAL, S. *Longitudina'les*. These are two in number. 1. SUPERIOR LONGITUDINAL SINUS, S. *falcifor'mis superior*, S. *triangula'ris*, Sinus *median*, (Ch.) A long, triangular canal; convex above, concave below; which oc-

cupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the *cristi galli* of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plain surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. INFERIOR LONGITUDINAL SINUS, *Sinus falcifor'mis inferior*, *Vena falcis cer'ebr'i*. This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

SINUS MAGNI, Sinuses, lateral—s. Maxillary, Antrum of Highmore—s. *Median*, Sinus longitudinal superior—s. Median, see Semicircular canals—s. Muliebris, Vagina.

SINUS, OCCIP'ITAL, *Sinus occipita'lis*. These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend—becoming broader and nearer each other—into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmerring have given them the name of *posterior occipital sinuses*, to distinguish them from the transverse sinus, which they have called *anterior occipital sinus*.

SINUS OCCIPITALIS ANTERIOR, Sinus transversus—s. Ophthalmic, see Cavernous sinus—s. Perpendicularis, S. quartus—s. Pituitarii frontis, Frontal sinuses—s. Pocularis, see Ejaculatory ducts—s. Polymorphus, Cavernous sinus—s. Portarum, see Liver.

SINUS, PROSTAT'IC, *Sinus prostat'icus*. A fossa on each side of the verumontanum, in which are seen the numerous openings of the ducts of the prostate.

SINUS PUDENDI, Vagina—s. Pudoris, Vagina, Vulva.

SINUS PULMONALES, Sinuses of Valsalva.

SINUS PULMONA' LIS, S. *sinister cordis*, *A'trium cordis sinist'rum*, S. *vena'rum pulmona'lium*, S. *arterio'sus*, *Saccus vena'rum pulmona'lium*. The left auricle of the heart. See Auricula.

SINUS OF THE PULMONARY VEINS, Auricle, left.

SINUS QUARTUS, S. *perpendicula'ris*, (F.) *Sinus choroïdien* (Ch.), *Sinus droit*, *Straight sinus*. This sinus—triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards—passes along the base of the falx cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *venæ Galeni*, the superior cerebellous veins, &c.

SINUS RENUM, Pelvis of the kidney—s. Rhomboideus, see Ventricles of the brain—s. of the Septum lucidum, Ventricle, fifth—s. Sinister cordis, S. pulmonalis—s. Sphenoidalis, Cavernous sinus—s. Straight, S. quartus—s. Superciliaris, Frontal sinuses—s. Terminalis, Circulus venosus—s. Transversi, Sinuses, lateral.

SINUS TRANSVER'SUS, S. *occipita'lis anterior*, *Basilar sinus*. This sinus lies transversely at the anterior part of the basilar process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side, and those of the other. Its breadth is commonly very great. It is situate between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

**SINUS TRIANGULARIS**, S. longitudinal, superior—s. Urogenitalis, Urogenital sinus.

**SINUS UTERINI**, *Sinus cavernosi Uteri*, *Uteric sinuses*. A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

**SINUS UTRICULOSUS**, see Semicircular canals—s. *des Vaisseaux séminifères*, Corpus Highmori.

**SINUSES OF VALSALVA** are three depressions in the aorta—*Sinus aortici*—and pulmonary artery—*Sinus pulmonales*—immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the reflux blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large sinus of Valsalva*.

**SINUS OF THE VENA CAVA**, Auricle, right—s. *Venarum cavarum*, S. dexter cordis—s. *Venarum pulmonalium*, S. pulmonalis—s. *Venusus*, S. dexter cordis.

**SINUSES, VERTEBRAL**, (F.) *Sinus vertebrarum*. Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebrae, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side they communicate with each other by means of branches, which form true *transverse sinuses*. They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebrae. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

**SINUS VULVAE**, Rima vulvae.

**SIPERI**, Bebeeru.

**SIPERINE**, see Bebeeru.

**SIPHAR**, Peritoneum.

**SIPHILIS**, Syphilis.

**SIPHITA**, Somnambulism—s. *Parva*, Chorea.

**SIPHON**, Siphon—s. *Urinæ*, Diabetes.

**SIPHON**, *Siphon*, *αἰφών*, 'a tube.' A bent tube, whose limbs are of unequal length, employed in pharmacy for transferring liquids from one vessel to another. With this view, the shorter limb is plunged into the fluid; and air is sucked from the extremity of the lower limb. The pressure of the atmosphere forces the fluid through the tube; and the flow will continue as long as the extremity of the longer limb is below the level of the fluid in which the shorter limb is immersed.

An exhausting syringe is, at times, attached to the longer extremity of the siphon by means of which the air can be drawn from it.

**SIPHON, PLUNGING**. An instrument, used in pharmacy for obtaining a specimen,—at times, a measured specimen,—of any liquid. With this view, the instrument is immersed into liquid, and allowed to remain there until full. The opening at the top is then closed with the thumb; and the contents, thus removed, are allowed to flow out by removing the thumb and permitting the entrance of air. It is a form of the *pipette*.

**SIPHONIA CAHUCHU**, see Caoutchou—s. *Elastica*, see Caoutchou.

**SIPHUNCULUS**, Syringe.

**SIRA**, Orpiment.

**SIRENS**, Symmeles.

**SIRIASIS**, *Comp de Soleil*, Insolation, Phrenitis—s. *Ægyptiaca*, *Comp de Soleil*.

**SIRIUM MYRTIFOLIUM**, Santalum album.

**SIRIUS**, Myrtle.

**SIROP DE CAPILLAIRE**, see *Adiantum capillus veneris*—s. *de Coralline*, see *Corallina Corsicana*.

**SIRUP**, Syrup.

**SISON AMMI**, *Ethusa ammi*, *Cnidium tenuifolium*, *Pimpinella laterifolia*, *Seseli fœniculifolium*. Family, Umbellifere. See *Syst. Pentandria Digynia*. The plant that affords the *Ammi verum* of the shops; (F.) *Ammi des Boutiques*. The seeds—*Semen Ammiis cretici seu veri*—were once used as a carminative.

**SISON AMOMUM**, (F.) *Anome fanx*, is considered to be excitant and diuretic. It is the *field horewort*.

**SISON ANISUM**, *Pimpinella anisum*—s. *Podagraria*, *Ligusticum podagraria*.

**SISTENS**, Epischeticus.

**SISYMBRIUM ALLIARIA**, *Alliaria*—s. *Barbarea*, *Erysimum barbarea*—s. *Erucastrum*, *Brassica eruca*—s. *Menthastrum*, *Mentha aquatica*.

**SISYMBRIUM NASTURTIUM**, *Nasturtium aquaticum seu officinale*, *Laver odoratum*, *Cratægium*, *Cressi*, *Cardaminæ fontana seu nasturtium*, *Water Cress*, (F.) *Cresson de fontaine*. Family, Crucifere. See *Syst. Tetradynamia Siliquosa*. *Water-cresses* are commonly used in salad. They have obtained a place in the materia medica for their antiseptic qualities.

**SISYMBRIUM OFFICINALE**, *Erysimum*—s. *Parviflorum*, S. *sophia*.

**SISYMBRIUM SOPHIA**, *S. parviflorum*, *Herb Sophia*, *Sophia Chirurgo-rum*, *Flix* or *Fine-weed*, (F.) *Sagesse des Chirurgiens*. It was once reputed to be anthelminitic, and valuable in hysterical affections. It is not used.

Other species of *Nasturtium*, as *N. PALUSTRE*, *Marsh water-cress*; and *N. amphibium*, *Water-radish*, possess similar virtues with *Nasturtium officinale*.

**SISYRINCHIUM BERMUDIANUM**, *Blue-eyed grass*, *Lily grass*, *Physic grass*, *Scorvy grass*; indigenous; Order, *Iridaceæ*; flowering from June to August. Used as a cathartic by the Thompsonians. A decoction of the root is acrid and emathetic.

**SITICULOSUS**, Dipsodes, see *Alterative*.

**SITIENS**, Dipsodes.

**SITIS**, Thirst—s. *Intensa*, *Polydipsia*—s. *Morbosa*, *Polydipsia*.

**SITKA**, MINERAL WATERS OF. See *Archangel*, *New*, mineral waters of.

**SITOS**, Aliment.

**SITUS ANOMALUS seu PERVERSUS INTESTINORUM**, *Splanchnectopia*—s. *Mutatus*, see *Monster*.

**SITZBATH**, see *Bath*, half.

**SIUM**, *Sium nodiflorum seu angustifolium seu Berula seu erectum seu incisum*, *Apium sium*, *Berula angustifolia*, *Berula*, *Creeping Water-parsnep*, (F.) *Berle nodiflora*. Family, *Umbellifere*. See *Syst. Pentandria Digynia*. It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

**SIUM ANGUSTIFOLIUM**, S. *nodiflorum*—s. *Apium*, *Apium graveolens*—s. *Berula*, S. *nodiflorum*—s. *Bulboestannum*, *Bunium bulboestannum*—s. *Carvi*, *Carum*—s. *Erectum*, S. *nodiflorum*—s. *Graveolens*, *Apium graveolens*—s. *Incisum*, S. *nodiflorum*.

**SIUM LATIFOLIUM** is the common *Water-parsnep* of the United States. It is said to be poisonous.

**SIUM NISI**. The plant whose root is called *Radix Nisi*, *Ninzu*, *Nindsin*. This root was long supposed to be the same as ginseng, and it possesses similar, though weaker properties.

**SIUM SILAUS**, *Peucedanum silaus*.

Sium Sis'arum, *Skirret*, is used as a salad in Europe; and has been supposed a useful diet in chest affections.

Sium vulgare, *Ligusticum podagraria*.

SIVVENS, Sibbens.

SKELETIA, Emaciation.

SKELETOL'OGY, *Scelctolog'ia*, (F.) *Squeletologie*, from σκελετος, 'a skeleton,' and λογος, 'a discourse.' A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syndesmology*.

SKEL'ETON, *Scel'etum*, from σκελετος, *Cadaver exsiccatum*; (F.) *Squelette*, *Scelcton*, a dried body; from σκελω, 'I dry.' The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not always be formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external*, *Exo-skeleton*, *Dermo-skeleton*. In others, as in birds, the mammalia, &c., it is *internal*, *Endo-skeleton*, *Neuro-skeleton*. It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be *natural*, *Scel'etum natura'le*; when articulated by means of wires, *artificial*, *Scel'etum artificia'le*.

SKELETOPE'IA, *Scelctopœ'a*, *Scelcten'is*, from σκελετος, 'a skeleton,' and ποιω, 'I make.' The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes; the different cavities formed by the union; and to demonstrate their connexions, relations, modes of union, &c.

SKEVISCH, *Erigeron Philadelphicum*.

SKEVISH, *Fleabane*, *Erigeron Philadelphicum*.

SKIN, Cutis.

SKIN-BOUND DISEASE, Induration of the cellular tissue.

SKIOMACHIA, *Sciomachy*.

SKIRRET, *Sium sisarum*.

SKIRSE, *Scirrus*.

SKOKE, *Phytolacca decandra*.

SKOLEMORA FERNAMBUCENSIS, *Geofraa vermifuga*.

SKUE-SIGHT, *Dysopia lateralis*.

SKULL, Cranium.

SKULL-CAP, *Calvaria*, *Scutellaria galericulata*.

SKUNK-CABBAGE, *Dracontium foetidum*.

SKUNK-WEED, *Dracontium foetidum*.

SLATE, IRISH, *Hibernicus lapis*.

SLATERS, *Onisci aselli*.

SLATKAIA TRAVA, see Spirit.

SLAV'ERING, from saliva. *Ptyalis' mus iners*, *Driv'elling*, (F.) *Bave*. Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

SLEEP, Sax. *slēp*; *Somnus*, *Sompnus*, *Sopor*, *Dormit'io*, *Hypnos*, (F.) *Sommeil*. Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *waking*, (F.) *Éveil*, *Reveil*. Sometimes this is progressive and natural; at others, sudden and starting; (F.) *Reveil en sursaut*,—as in nightmare, affections of the heart, hypochondriasis, &c.

SLEEP, MAGNETIC, *Hypno'sis biomagnet'ica*, is the sleep induced by the so called animal magnetism. See Magnetism, animal.

SLEEP, NERVOUS, see Magnetism, animal.

SLEEPLESSNESS, *Insomnia*.

SLEEP-WALKING, *Somnambulism*.

SLIACS, MINERAL WATERS OF. *Sliacs* is a favourite bathing-place in Hungary, a few miles from Neusohl. Some of the waters are cold; others, thermal: the former are carbonated chalybeates; the latter are much used in the same cases as thermal springs in general.

SLING, (G.) *Schlinge*, *Mit'la*, *Mit'rrium*. A bandage employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Écharpes orslings*; as the *Grande écharpe*, *Écharpe moyenne*, *Petite écharpe*, *Écharpe de J. L. Petit*, &c.

SLIPPERS, *Impatiens*.

SLIT AND TAIL BANDAGE, *Invaginated bandage*.

SLOE-TREE, *Prunus spinosa*.

SLOUGH, *Eschar*.

SLOWS, Milk-sickness.

SLUG, *Limax*—s. *Sea*, *Biche de Mer*.

SLUMBER, *Somnolency*.

SMALLAGE, *Apium graveolens*.

SMALL-POX, *Variola*—s. *Modified*, *Varioloid*.

SMALT, *Protox'ide of Cobalt*, *Smaltum*, *Sofre*, *Azur*, *Blue Starch*. This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

SMARAG'DUS, (F.) *Émerarde*. The emerald. It was formerly regarded as a tonic.

SMARTWEED, *Polygonum punctatum*.

SMECTICA, *Detergens*.

SMECTIS, *Cimolia terra*.

SMECTRIS, *Cimolia terra*.

SMEGMA, *σμηγμα*, from *σμηχειν*, 'to wipe, to rub off.' Soap, grease, a salve, a liniment. Also, the secretion from the sebaceous follicles of the skin.

SMEGMA ARTICULARE, *Synovia*—s. *Cutaneum*, see *Sebaceous glands*.

SMEGMA PRÆPUTII. The fatty secretion from the sebaceous follicles of the glans penis.

SMEGMATORRHŒA, *Stearrhœa*.

SMEGMORRHŒA, *Stearrhœa*.

SMELL, SENSE OF, *Olfaction*.

SMELLING, *Olfaction*.

SMELOME'S OINTMENT FOR THE EYES, *Ceratum resinae*.

SMILAX, *Taxus baccata*—s. *Aspera Chinenensis*, *Smilax China*—s. *Aspera Peruviana*, *Smilax sarsaparilla*—s. *Canellæfolia*, *S. pseudo-China*.

SMILAX CHINA, *Smilax as'pera Chinen'is*. Family, *Smilacæ*. Sex. Syst. *Diœcia Hexandria*. The root—*China*, *Ch. orientalis seu ponderosa seu vera*, *Sankira*, *Ganguara*, *China root*, (F.) *Squine*, *Esquinc*. Formerly much used in cutaneous and venereal affections.

SMILAX GLAUCA, *S. sarsaparilla*—s. *Hederæfolia*, *S. pseudo-China*—s. *Indica Spinosa*, *Smilax pseudo-China*—s. *Officinalis*, *Smilax sarsaparilla*.

SMILAX PSEUDO-CHINA, *Smilax Indica spinosa seu canellæfolia seu hederæfolia*, *China occidentalis*, *China spuria nodosa*, *American* or *West India China*. In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.

SMILAX SARSAPARILLA, *S. officinalis seu glauca*, *Sarsaparilla*, *Sartaparilla*, *Smilax as'pera Peruviana*, *Sarza*, *Sarsa*, *Carivillan'di*, *Iva Pecan'ga*, *Macapatli*, *Zarsa*, *Zarsaperilla*, (F.) *Sal-separeille*. The root of the Sarsaparilla is inodorous; taste bitterish, feculaceous, and fibrous; of a dark colour externally; white within. It is

possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulceration, &c. continue. It has, also, been advised in scrofula, chronic rheumatism, &c.; but its efficiency is, to say the least of it, a matter of doubt. Dose, ℥j to ʒi of the powder.

SMILE, *σμίλη*. A curved, two-edged bistoury. A knife.

SMILEON, Scalpel.

SMYRNA, Myrrha.

SMYRNISMOS, Embalming.

SMYRNIUM OLUSA'TRUM, *Hippocistium*, *Smyrniium*, *Maccrobia*, *Macedoniolum*, *Herba Alexandrina*, *Gri'clum*, *Agrioselinum*, *Alexanders*, *Alexanders*. A plant formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

SNAGREL, *Aristolochia serpentaria*.

SNAIL, *Limax* — s. Shell, *Cochlea*.

SLAKEHEAD, *Chelone glabra*.

SLAKEROOT, *Garuleum bipinnatum* — s. Birthwort, *Aristolochia serpentaria* — s. Black, *Actæa racemosa*, *Sanicula Marilandica* — s. Button, *Eryngium aquaticum*, *Liatris spicata* — s. Canada, *Asarum Canadense* — s. Dewitt, *Prenanthes* — s. Evergreen, *Polygala paucifolia* — s. Heart, *Asarum Canadense* — s. Virginiana, *Aristolochia serpentaria* — s. White, *Eupatorium ageratoides*.

SLAKEWEED, *Aristolochia serpentaria*, *Helenium autumnale*, *Polygonum bistorta* — s. American, *Cicuta maculata*.

SNEEZING, from Sax. *niesan*, (G.) *Niesen*, *Clonus Sternutatio*, *Sternutatio*, *Sternutamentum*, *Sternumentum*, *Ptarinos*, (F.) *Éternement*. A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies, which adhere to the pituitary membrane, and have occasioned the movement.

SNEEZEWORD, *Achillea ptarmica*, *Helenium autumnale*.

SNORING, *Rhenchus*, *Rhenchis*, *Ronchus*, *Rhonchus*, *Stertor*, *Renchus*, (F.) *Roufflement*, from (G.) *Schnarhen*. Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affections of the chest — in some cases of pulmonary catarrh — a kind of snoring may be distinctly heard by applying the ear or the stethoscope to the chest.

SNOT, Nasal mucus.

SKOUT, Nasus.

SNOW, Sax. *nyap*, *Nix*, *Chion*, (F.) *Neige*. Water in a solid state, which falls from the atmosphere in white flakes. It is used externally as a tonic and discutient.

SNOWBALL, *Cephalanthus occidentalis*.

SNOWBERRY, *Symphoricarpos racemosus*.

SNUFF, CEPHALIC, *Pulvis usari compositus*.

SNUFFLES, Teut. *Snuffeln*, *Grav'do neonat'rum*, *Rhinu'gia*, *Rhinu'ch'onè*. Breathing hard through the nose, often owing to accumulation of the mucous secretions, — an affection to which infants are liable, and which is relieved by oiling the interior of the nostrils.

SOAP, Sapo — s. Acid, see Sapo — s. Berries, *Sapindus saponaria* — s. Black, see Sapo — s. Castile, *Sapo durus* — s. of the Cocoa-nut oil, see Sapo — s. Common or soft, see Sapo — s. Liquid, see Sapo — s. Medicinal, see Sapo — s. Spanish, *Sapo durus* — s. Yellow, see Sapo.

SOAPWORT, *Saponaria*.

SOB, from Sax. *reofjan*, 'to grieve;' (F.) *Sanglot*. A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation, by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

SOBOLES, Epigone.

SOBRIETAS, Temperance.

SOCIA PAROTIDIS, see Parotid.

SOCIETY, *Societas*, (F.) *Société*, from *sociare*, 'to associate.' An association for the promotion of some common object.

SOCIETIES, MEDICAL. Associations of medical gentlemen for the promotion of science have been numerous, and productive of valuable results. In the United States, societies exist in many of the states, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the states, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations that have issued from time to time useful transactions or publications, are the following: IN AMERICA, — The *Massachusetts Medical Society*; the *Physico-medical and Medical Societies of the State of New York*; the *College of Physicians of Philadelphia*, and the *American Medical Association*. IN EUROPE, — The *Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland*; the *Medico-Chirurgical and Phrenological Societies of Edinburgh*; the *College of Physicians, the Medico-Chirurgical, the Medical and the Sydenham Societies of London*; the *Associated Apothecaries and Surgeon Apothecaries of England and Wales*, and the *Provincial Medical and Surgical Association*; the *Royal Academy of Surgery*, the *Royal Society of Medicine*, the *Société Médicale d'Emulation*, the *Société de Médecine*, the *Royal Academy of Medicine*, and the *Société Médicale d'Observation, of Paris*; the *Medico-Chirurgical Academy of Vienna*; the *Medical Societies of Berlin and Copenhagen*, &c. &c. IN ASIA. — The *Medical and Physical Society of Calcutta*.

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society*; of the *Royal Societies of London, Edinburgh, Göttingen*, &c.; of the *Royal Academy of Sciences of Paris*; the *Imperial Society of Sciences of St. Petersburg*; the *Royal Academy of Sciences of Turin*; the *Academia Imperialis Leopoldina Naturæ Curiosorum*, &c.

SOCORDIA, Hallucination.

SODA. An Arabic word. *Protos'ide* of sodium, (F.) *Sonde*, is obtained by adding caustic lime to a solution of carbonate of soda. The soda in solution may be obtained by evaporation as hydrate of soda. Its action is like that of potassa; but it is not officinal.

*Soda imp'ra*, *Barilla*, *Bariglia*, *Barillor*, *Soda Hispanica*, *Anal'ton*, *Natron*, *Anal'ton*, *Nitrum Antiquorum*, *Kelp*, *Aphron'trum*, *Sol alkali'nis fucus fossilis*, *Car'bonas Soda imp'ra*, *Subar'bonas Soda imp'ra*, *Amuchron*. The mineral alkali is obtained from several sources; — naturally, in Egypt: artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast; — as the *Sal'sola sat'ra*, *S. soda*, *S. troysis*, *Salicornia herbacea*, *Salicornia Arbutica*, &c. The *Barilla ashes* are from the ashes

of the *Salicornia Europæa*: the *Kelp*, *Soude de Varec*, from the *Fucus vesiculosus* and other varieties;—the *Turkey Barilla*, *Rognette*, *Cendres du Levant*, *Rochetta Alexandrina*, from the *Mesembryanthemum Copticum*;—the *All'icant Barilla*, *Soda Alicanti'na*, *S. Alouen'sis*, from the *Mesembryanthemum nodiflorum*;—and the *Carthagena Barilla*, from the *Salicornia* and *Salso'la*.

Impure subcarbonate of soda, (F.) *Soude du commerce*, consists of subcarbonate of soda, potash, chloride of sodium, clay and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

SODA, CARDIALGIA, CEPHALALGIA, PYROSIS.

SODA ACETA'TA, *Sodæ Acetas*, *Ac'etate* of *Soda*, *Terra foliata mineralis*, (F.) *Acétate de soude*. This salt is used in similar cases with the acetate of potass.

SODA AËRATA, *Sodæ carbonas*—s. *Alonensis*, *Soda*—s. *Borate* of, *Borax*—s. *Bicarbonate* of, *Sodæ carbonas*—s. *Borate* of, *Borax*—s. *Boraxata*, *Borax*.

SODA, CAR'BO'NATE OF, *Sodæ Carbonas*, *Carbonas Natricum*, *Soda Aëra'ta*, *Sodæ Bicarbonas*, *Bicarbonate* of *Soda*, *Carbonate* of *protoxide* of *Sodium*, (F.) *Carbonate de Soude*, *S. effervescente*, *S. aérée*, *S. Crayense*. (*Sodæ subcarb*, lbj, *aqwæ destill*. Oij. Dissolve the subcarbonate of soda, and pass carbonic acid through the solution; set it aside to crystallize.) Its use is the same as the subcarbonate, than which it is less caustic, and better adapted for effervescing draughts.

SODA CAU'STICA, *Protoxide* of *Sodium*, *Cautic Soda*, (F.) *Soude caustique*, *S. à la Chaux*, *Soude pure*. The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid. It may be used as a caustic, like the *Potassa fusa*, and is even preferable to it, as it does not deliquesce and run.

SODA, CHLORIDE OF, *S. Chlorinata*, *Sodæ Chloridum*, *Chlorinated Soda*, *Natron Oxymuriaticum*, *Sodæ Chlorure'tum*, *Oxymuriate* of *Soda*, (F.) *Chlorure de Soude*, *Chlorure d'oxide de Sodium*. This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See *Liquor Sodæ Chlorinata*.

SODA, CHLORINATED, *Soda*, chloride of—s. *Hispanica*, *Soda*—s. *Hydrochlorate* of, *Soda*, *muriate* of.

SODA, HYPOSULPH'ITE OF, *Sodæ hyposulph'is*, (F.) *Hyposulfite de Soude*. This salt has been lately extolled in chronic cutaneous, and scrofulous affections. It is given in syrup.

SODA, LITHATE OF, *Urate* of *soda*—s. *Mephite* of, *Soda*, *subcarbonate* of.

SODA, MU'R'ATE OF, *Sodæ murias*, *Soda muriata*, *S. muriat'ica*, *Alkali mineralè salinum*, *Sal communi's*, *Sal culinaris*, *Sal fontium*, *Sal gemmæ*, *Sal mari'nus*, *Natron muria'tum*, *Sal albus*, *Natron muriat'icum*, *Common salt*, *Sea salt*, *Hydrochlorinas Natricus*, *Sal fos'silis*, *Sal lucidum*, *Muria*, *Rock salt*, *Bay salt*, *White salt*, *Quadrichloruret of Sodium*, *Hydrochlorate* of *protoxide* of *Sodium*, *Hydrochlorate* of *Soda*, *Chlorurè'tum Sodii*, *Sodii Chloridum*, *Chloride* of *Sodium*, (F.) *Chlorure de Sodium*, *Sel marin*, *Sel de Cuisine*. In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and anthelmintic. Externally, stimulant. It is a well-known and useful culinary substance.

SODA, NITRATE OF, *Sodæ Nitras*, *Natron nitricum*, *Alkali mineralè nitratum*, *Nitrum Cubicum*, *Nitrate* of *protoxide* of *Sodium*, *Protoni'*

*trate* of *Sodium*, *Nitrum Rhomboida'lè*, *Nitras Natricum*, *Sulphætra*, *Cubic Nitre*. Its virtues are similar to those of the nitrate of potass, for which it has been substituted.

SODA, OXYMURIATE OF, *Soda*, chloride of.

SODA, PHOSPHATE OF, *S. Phosphorata*, *Sodæ phosphas*, *Subphosphate* of *protoxide* of *Sodium*, *Phosphas Natricum*, *Natron Oxyposphorodes*, *Subprotophosphate* of *Sodium*, *Subphosphate* of *Soda*, *Sal mirabilè perlatum*, *Tribasic phosphate* of *Soda*, *Alkali mineralè phosphoratum*, *Tasteless purging salt*, (F.) *Phosphate de Soude*, *Sel admirable perlé*. (*Bone* burnt to whiteness and powdered, lbj; *Sulphuric acid*, lbvj; *Carbonate* of *soda*, q. s. Mix the bone with the acid in a covered vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through linen, gradually adding more boiling water, until the liquor passes nearly tasteless. Set the strained liquor by, that the dregs may subside; from which pour off the clear solution, and boil down to a gallon. To this solution, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of soda previously dissolved in hot water, until effervescence ceases, and the phosphoric acid is completely neutralized; then filter the liquor, and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of soda to the liquor, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Lastly, preserve the crystals in a well stopped bottle.—Ph. U. S.) Cathartic, in the dose of from  $\mathfrak{ss}$  to  $\mathfrak{ʒj}$ .

SODA, PHOSPHATE OF, TRIBASIC, *S. Phosphate* of.

SODA, SUBCARB'ONATE OF, *Sodæ Subcarbonas*, *Sodæ Carbonas* (Ph. U. S.), *Subcarbonate* of *protoxide* of *Sodium*, *Memphite* of *Soda*, *Natron præparatum*, *Sal Sodæ*, *Salt* of *Soda*, *Flos Salis*, *Sugi'men Vitri*, *Salt* of *Barilla*, *Sal alkali*, *Carbonas Sodæ* of some, (F.) *Sous-carbonate de Soude*. The impure subcarbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. It is much used as an antacid; and also as a deobstruent in scrofulous and other affections. Dose, gr. x to  $\mathfrak{ʒss}$ .

The dried *Subcarbonate* of *Soda*, *Sodæ Subcarbonas exsiccata*, *Sodæ carbonas exsiccata*, (Ph. U. S.) *Carbonas Sodæ siccatum*, (F.) *Sous-carbonate de Soude desséché*, is employed as an antacid and lithontriptic. Dose, gr. x to xv.

SODA, SUBPHOSPHATE OF, *S. phosphate* of.

SODA, SULPHATE OF, *Sodæ Sulphas*, *Natron vitriola'tum*, *Sal catharticus Glauberi*, *Alkali mineralè sulphuricum*, *Natron sulphuricum*, *Soda vitriolata*, *Sulphas natricus*, *Sal mirabilis Glauberi*, *Ape'riant Salt* of *Frederick*, *Glauber's Salts*, (F.) *Sulfate de Soude*. Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with subcarbonate of soda. It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose,  $\mathfrak{ʒvj}$  to  $\mathfrak{ʒx}$ .

The *Lynington Glauber's Salts* is a *Sulphate* of *Magnesia* and *Soda*, and is obtained from the mother liquor of sea-water, or by dissolving *Epsom salt* in a solution of *Glauber's salt*.

SODA, TARTRATE OF, *Tartrate* of *potass* and *Soda*, *Soda Tartarizata*, *Tar'tarized Soda*, *Sal Rupellen'sis*, *Rochelle Salt*, *Sal Polychrestum Seignetti*, *S. Seignetti*, *Seignette's Salt*, *Natron tartarizatum*, *Trivris potassæ et Sodæ*, *Sodæ et Potassæ Tartros* (Ph. U. S.), *Sodæ potassio-tartros*, *Tartros Potassæ et Sodæ*, *Tartrate* de *po-*

*tasse et de Soude.* (Soda carb. bi; potass. bitart. in pulv. ℥xvj, Aq. bullient. Ov.) Dissolve the carbonate in water; and add, gradually, the bitartrate. Filter the solution and crystallize, (Ph. U. S.) It is a gentle cathartic. Dose, ℥ss to ℥j.

SODA, URATE OF, Urate of Soda—s. Vitriolata, S. sulphate of—s. Water, Acidulous water, simple.

SODE ACETAS, Soda, acetate of—s. Biboras, BORAX—s. Bicarbonas, Soda, carbonate of—s. Boras, Borax—s. Boras alcalescens, Borax—s. Boras supersaturus, Borax—s. Carbonas, Soda—s. Carbonas, Soda, subcarbonate of—s. Carbonas exsiccatus, see Soda, subcarbonate of—s. Carbonas impurus, Soda—s. Chloras, Soda, chlorate of—s. Hyposulphis, Hyposulphite of soda—s. Murias, Soda, muriate of—s. Nitras, Soda, nitrate of—s. Phosphas, Soda, phosphate of—s. et Potassæ tartras, Soda, tartrate of—s. Potassio-tartras Soda, tartrate of—s. Subboras, Borax—s. Subcarbonas impura, Soda.

SODII AURO-TERCHLORIDUM, see Gold—s. Chloridum, Soda, muriate of—s. Chloruretum, Soda, muriate of.

SODIUM, *Na'trium, Natro'nium.* The metallic basis of soda.

SODIUM, CARBONATE OF PROTOXIDE OF, Soda carbonas—s. Chloride of, Soda, muriate of—s. Chlorure de, Soda, muriate of—s. Chlorure d'Oxide de, Soda, chloride of—s. Protonitrate of, Soda, nitrate of—s. Protoxide of, Soda—s. Protoxide of, hydrochlorate of, Soda, lauriate of—s. Protoxide of, nitrate of, Soda, nitrate of—s. Protoxide of, phosphate of, Soda, phosphate of—s. Protoxide of, subcarbonate of, Soda, subcarbonate of—s. Quadri-chloruret of, Soda, muriate of—s. Subborate of protoxide of, Borax—s. Subprotoborate of, Borax—s. Subprotophosphate of, Soda, phosphate of.

SODOMA GALLORUM, Syphilis.

SODOMIA, Buggery.

SODOMY, Buggery.

SOFTENING, Mollities.

SOL-POUR-SOL, Homœozogy.

SOLIE, Sericum.

SOLIF, Thirst—s. Excessive, Polydipsia.

SOL, Gold.

SOL-LUNAR, *Sol-luna'ris*; from *sol*, 'the sun,' and *luna*, 'the moon.' An epithet applied to a fancied influence exerted by the sun and moon on man in a state of health and disease.

SOLAMEN INTESTINORUM, Pimpinella anisum—s. Scabiosorum, Fumaria.

SOLANOID, *Solanoi'des*; from *solanum*, 'the potato,' and *eidos*, 'resemblance.' Resembling a potato; potato-like. An epithet applied to a form of cancer, which appears to be intermediate between scirrhus and encephaloid, increasing more rapidly than the former, yet approaching it in firmness.

SOLANUM, *S. nigrum* seu *vulgarè* seu *vulgar'tum*, Common Nightshade, Garden Nightshade, (F.) *Morelle à fruit noir.* Family, Solanææ. Ser. Syst. Pentandria Monogynia. A narcotic poison. The *Huile de Morelle* is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and dis-entient.

SOLANUM DULCAMA'RA, *Dulcamara*, *D. flexuosa*, *Solanum Scandens*, *Glycyip'eros*, *Ama'ra dulcis*, *Solanum liguosum*, *Σρυγγος* of Theophrastus, *Bitter-sweet*, *Woody Nightshade*, *Bittersweet Nightshade*, *Bittersweet Vine*, *Nightshade Vine*, *Violet bloom*, (F.) *Douce-amère*, *Morelle grimpante*. The taste of the stalks is bitter, followed by sweet-

ness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice. Dose, in powder, ℥j to ℥j.

SOLANUM ESCULENTUM, *S. tuberosum*—s. *Fœtidum*, *Datura stramonium*—s. *Furiosum*, *Atropa belladonna*—s. *Humboldtii*, *S. Lycopersicum*—s. *Lethale*, *Atropa belladonna*—s. *Liguosum*, *S. dulcamara*.

SOLANUM LYCOPER'SICUM; *Lycoper'sicum esculentum*, *Lycoper'sicum pomum am'ricæ*, *S. Humboldtii* seu *pseudolycoper'sicum*, *Malum lycoper'sicum*, *Love-apple plant*. The fruit of this, called *Tomato* or *Love-apple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and, with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

SOLANUM MAGNUM VIRGINIANUM RUBRUM, *Phytolacca decandra*—s. *Maniacum*, *Atropa belladonna*, *Datura stramonium*—s. *Minocerasus*, *Atropa belladonna*.

SOLANUM MELON'GENA, *Melongena*, *Egg-plant*, *Mud Apple plant*; (F.) *Aubergine*. A native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Ponum Melon'gena*, *Malum insanum*, is prepared in soups and sauces in those countries, like the tomato.

SOLANUM NIGRUM, *Solanum*.

SOLANUM NIV'EUM. A South African plant, the leaves of which, applied to foul ulcers, cleanse them. The fresh juice of the berries and leaves, made into an ointment with lard or fat, is used by the farmers for the same purpose.

SOLANUM PARMENTERII, *S. tuberosum*—s. *Pseudolycopersicum*, *S. Lycopersicum*—s. *Quadrifolium*, Paris—s. *Racemosum Americanum*, *Phytolacca decandra*.

SOLANUM SANCTUM; *Palestine Nightshade*. The fruit of this is globular, and is much eaten in the countries where it is a native.

SOLANUM SCANDENS, *S. Dulcamara*.

SOLANUM TUBEROSUM, *Batatas*, *Solanum esculentum* seu *Parmenterii*, *Lycoper'sicum tuberosum*, *Papas America'nus*, *Pappus America'nus*, *America'num Tuberosum*, *Batto'ra Virginia'na*; the *Pota'to*, (F.) *Pomme de Terre*. A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Potato Flour*, *P. Starch*, *French Sago*, *Petit Sague*, *Common Arrow-root*, &c.

SOLANUM URENS, *Capsicum annum*—s. *Vesicarium*, *Physalis*—s. *Vulgare*, *Solanum*.

SOLAR, *Sola'ris*, from *sol*, 'the sun.' Relating to the sun; having rays like the sun.

SOLAR PLEXUS, *Plexus sola'ris*, *Centrum communè*, *Cer'ebrium abdominalè*. A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments composing it are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastric. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infra-diaphragmatic*, *celiacæ*, *superior mesentericæ*, *inferior mesentericæ*, *renal* or *emulgent*, *spermaticæ*, &c.

SOLDANELLA, *Convolvulus soldanella*.

SOLDIER'S WEED, *Matico*.

SOLE, *Solum*, *Solea*, *Basis corporis*, *Ichnus*, *Superficies plantaris pedis*, *Petivna*, *Vestigium*, *Pe'dion*, *Peza*, *Pelma*, *Plantaris superficies pedis*, *Facies concaeva seu inferior seu Planum seu Concavum seu Pars inferior seu Planities seu Planta seu Vola pedis*, (F.) *Plante du Pied*. The sole of the foot; the under surface of the foot.

SOLEA, Sole — s. *Ipecacuanha*, see *Ipecacuanha*.

SOLEAIRE, Soleus.

SOLEN, Cradle, see *Vertebral column*.

SOLENA'RIUM, from  $\sigma\omega\lambda\eta\nu$ , 'a canal.' An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *chadle*. — Galen. The word *Solen* itself —  $\sigma\omega\lambda\eta\nu$ , *Canalis* — was used, in antiquity, for a grooved channel, in which a fractured limb was placed.

SOLENOSTEMMA ARGEL, *Cynanchum oleae-folium*.

SOLE'US, *Gastrocnemius inter'nus*, *Tibio-calcaneus*, (Ch.) (F.) *Soléaire*, from *solea*, 'a sole of a shoe.' A muscle situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the *gastrocnemius externus*, to form the *tendo Achillis*. This muscle extends the foot on the leg, and conversely.

SOLID, *Solidus*, *St'reos*. A body whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study of the solids, is called *Stereology*, from  $\sigma\tau\epsilon\rho\epsilon\omicron\varsigma$ , 'solid,' and  $\lambda\omicron\gamma\omicron\varsigma$ , 'a discourse.'

SOLIDAGO, see *Solidago virgaurea* — s. *Saracenia*, *S. virgaurea*.

SOLIDA'GO RIG'IDA, *Rigid Goldenrod*, *Bones' styptic*; indigenous; of the Composite family, flowering in August and September; is astringent and tonic.

SOLIDA'GO VIRGAU'REA, *S. vulgaris* seu *Saracenia*, *Virga aurea*, *Herba do'rea*, *Conyza coma aurea*, *Symphytum Petraeum*, *Elichrysium*, *Consolida* seu *Saracenia*, *Golden rod*. *Nat. Ord.* Composite *Corymbifera*. *Ser. Syst.* *Syngenesia superflua*. (F.) *Verge d'or*. The leaves of *Solidago odora* — *Solidago* (Ph. U. S.) — and the flowers have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

SOLIDAGO VULGARIS, *S. virgaurea*.

SOLIDISM, *Pathologia solida'ris*. The doctrine of those physicians who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Solidists* has been given. The solidists think that the solids alone are endowed with vital properties; that they alone can receive the impression of morbid agents, and be the seat of pathological phenomena. Solidism has been the prevalent doctrine. It is scarcely necessary to say, that in all our investigations, the condition of both solids and fluids must be regarded.

SOLIUM, *Baignoire*, *Tænia solium* — s. *Pedis*, *Metatarsus*.

SOLUBIL'ITY, *Solubilitas*, from *solvere*, *solutum*, 'to dissolve.' That property of a body by virtue of which it can be dissolved in a menstruum.

TABLE OF THE SOLUBILITY OF SOME SUBSTANCES IN WATER.

NAMES OF SALTS.	Solubility in 100 parts water.	
	at 60°	at 212°
<i>Acids.</i>		
Benzoic.....	0.208	4.17
Citric.....	133	200
Oxalic.....	50	100
Tartaric.....	very soluble	
<i>Salts.</i>		
Acetate of Potassa.....	100	
Soda.....	35	
Bitartrate of Potassa.....	1.5	3.3
Borate of Soda.....	8.4	16.3
Carbonate of Ammonia.....	50	
Magnesia.....	2	
Potassa.....	25	
Soda.....	50	
Chlorate of Potassa.....	6	40
Soda.....	35	35
Chloride of Lime.....	200	
Magnesium.....	100	
Potassium.....	33	
Sodium.....	35.42	36.16
Muriate of Ammonia.....	33	100
Nitrate of Potassa.....	14.25	160
Soda.....	33	100
Phosphate of Soda.....	25	50
Sulphate of Ammonia.....	50	100
Copper.....	25	50
Iron.....	50	100
Magnesia.....	100	133
Potassa.....	6.25	20
Soda.....	37	125
Supersulphate of Potassa.....	5.0	100
Tartrate of Potassa.....	25	
Potassa and Soda.....	20	
Antimony & Potassa.....	6.6	33

SOLUM, Sole.

SOLUTÉ, Solution.

SOLUTIO, Solution — s. *Alexiteria Gaubiana*, see *Disinfection* — s. *Ammonia subcarbonatis*, *Liquor ammonia subcarbonatis* — s. *Arsenicalis*, *Liquor arsenicalis* — s. *Arsenicata*, *Liquor arsenicalis* — s. *Arsenitis kalicae*, *Liquor arsenicalis* — s. *Calcis*, *Liquor calcis* — s. *Camphoræ aetherea*, *Tinctura aetherea camphorata* — s. *Camphoræ oleosa*, *Linimentum camphoræ* — s. *Continui*, *Solution of continuity* — s. *Ferri nitratiss*, *Liquor Ferri nitratiss* — s. *Guaiaici gummosa*, *Mistura guaiaici* — s. *Muriatis barytae*, *Baryta*, *muriate of* — s. *Muriatis calcis*, see *Calcis murias* — s. *Muriatis ferri aetherea*, *Tinctura seu alcohol sulfurico-aethereus ferri* — s. *Muriatis hydrargyri oxygenati*, *Liquor hydrargyri oxyuriatis* — s. *Potassii iodidi iodureta*, *Liquor iodini compositus* — s. *Resinæ guaiaici aquosa*, *Mistura guaiaici* — s. *Subcarbonatis ammoniaci spiriturosa*, *Spiritus ammoniaci*.

SOLUTIO SULPHATIS CUPRI COMPOSITA, *Aqua vitriolica caerulea*, *Sydenham's Styptic Water*. (*Sulph. cupri*, ℥ij, *alum.*, *acid. sulph.*, ʒij, *aq. ʒviij*: dissolve, and filter.) A styptic, and, largely diluted, an astringent collyrium.

SOLUTION, *Solutio*, *Lysis*, (F.) *Dissolution*. An operation which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation — *Solutum*, (F.) *Soluté*. It means, also, with many, the termination of a disease: — with others, a termination accompanied by critical signs; — and, with others, again, it is synonymous with crisis.

SOLUTION OF ACETATE OF AMMONIA, *Liquor ammonia acetatis* — s. of *Acetate of morphia*, *Liquor morphiae acetatis* — s. *Alkaline*, see *Fulgokali* — s. of *Alkaline iron*, *Liquor ferri alkalini* — s. of *Alum*, compound, *Liquor aluminis compositus* — s. of *Ammoniated copper*, *Liquor cupri ammoniati* — s. *Arsenical*, *Liquor arsenicalis* — s. of *Charcoal*, concentrated, see *Tinctura catechu*

—s. of Chlorinated soda, *Liquor sodæ chlorinatæ*  
 —s. of Citrate of magnesia, see *Magnesia citras*  
 —s. of Citrate of potassa, *Liquor potassæ citratis*  
 —s. of Continuity, see *Continuity*—s. of Corrosive  
 sublimatæ, *Liquor hydrargyri oxymeriatis*—s.  
 Donovan's, see *Arsenic and Mercury, Iodide of*  
 —s. Fowler's, *Liquor arsenicalis*—s. of Hydro-  
 date of potass, *Liquor potassæ hydriodatis*—s.  
 of Iodide of iron, *Liquor ferri iodidi*—s. of Iodine,  
 compound, *Liquor iodini compositus*—s. of Iron,

 s. of Sesquinitrate of iron, *Liquor ferri nitratis*—s.  
 of Subacetate of Lead, *Liquor plumbi subacetatis*  
 —s. of Subacetate of lead, diluted, *Liquor plumbi*  
*subacetatis dilutus*—s. of Subcarbonate of potass,  
*Liquor potassæ subcarbonatis*—s. of Sulphate of  
 morphia, *Liquor morphæ sulphatis*—s. of Tartar-  
 ized antimony, *Vinum antimonii tartarizati*—s. of  
 Ternitrate of sesquioxide of iron, *Liquor ferri ni-  
 tris*—s. of Van Swieten, *Liquor hydrargyri oxy-  
 meriatis*.

SOLUTIVUS, Laxative.

SOLUTUM, Solution.

SOLVENS, Solvent—s. Minerale, *Liquor ar-  
 senicalis*.

SOLVENT, *Solvens*, (F.) *Fondant*, from *solvere*,  
 'to dissolve.' A medicine supposed to possess  
 the property of dissolving or removing obstruc-  
 tions and extraneous substances. Thus we have  
*solvents* of the stone in the bladder, &c. See  
*Dissolventia*.

SOLVENT, MINERAL, *Liquor arsenicalis*.

SOMA, Body, Corpus.

SOMACETICS, Gymnastics.

SOMAT'IC, *Somat'icus*; from *σωμα*, 'the body,'  
 That which concerns the body;—as *somatic* death,  
 or death of the body, in contradistinction to  
*molecular* death or the death of a part.

SOMATODYM'IA, from *σωμα*, *σωματος*, 'the  
 body,' and *δύω*, 'I enter into.' A double mon-  
 strosity in which the trunks are united. Of this,  
 there are several varieties;—*Vertebrody'm'ia*,  
 where the union is by the vertebræ; *Ischiody'm'ia*,  
 by the ossa ischii; *Sternody'm'ia*, by the sternum;  
*Supraomphalody'm'ia*, (F.) *Sus-omphalodymie*, by  
 the super-umbilical regions; *Supra et infra-om-  
 phalody'mia*, by the superior and inferior um-  
 bilical regions; and *Sterno-omphalody'm'ia*, where  
 the union is by both the sternal and the umbil-  
 ical regions.—Cruveilhier.

SOMATOL'OGY, *Somatolog'ia*, from *σωμα*,  
 'the body,' and *λογος*, 'a discourse.' A treatise  
 on the human body. Anatomy.

SOMATOTOMY, Anatomy.

SOMMELL, Sleep.

SOMNAMBULATION, Somnambulism.

SOMNAMBULISM, *Somnambulatio*, *Hypno-  
 bat'is*, *Hypnobat'is*, *Hypnobati'a*, *Rhenbas'-  
 mus*, *Luvatis'mus*, *Hyponer'gia*, *Selenoga'mia*,  
*Nyctobat'is*, *Antonyctobat'ia*, *Selen'asis*, *Selen-  
 ia'mus*, *Somnambulis'mus*, *Nyctob'asis*, *Noctam-  
 bat'io*, *Noctambulis'mus*, *Nyctobat'dia*, *Nyctoba'-  
 tia*, *Siph'ita*, *Syph'ita*, *Paroni'ria ambulans*,  
*Noctim'gium*, *Oneyrodyn'ia acti'va*, *Somno-vigil*,  
*Somnambula'tion*, *Sleep-walking*, from *somnus*,  
 'sleep,' and *ambulare*, 'to walk.' A condition  
 of the brain which occasions the individual to ex-  
 ecute, during sleep, some of those actions that  
 commonly take place when awake. It has been  
 imagined that the somnambulist is guided solely

by his internal senses; but there are many facts  
 which induce the belief that the external senses  
 are not always entirely suspended. The causes  
 of somnambulism are very obscure; and the prin-  
 cipal indication of treatment is,—so to arrange  
 the bed-chamber of the somnambulist, that he  
 cannot get out of it during sleep; and to avoid sup-  
 pers, as well as all bodily and mental excitement.

SOMNAMBULISM, MAGNETIC MESMERIC, or ARTI-  
 FICIAL, *Somnambulis'mus artificial'is*, *Cataph'ora*  
*magnet'ica*, *Hypnotism*, *Somni'atby*, is that pec-  
 uliar condition, into which individuals have been  
 thrown by the *Animal Magnetizer*. It has oc-  
 curred only in those of weak nervous tempera-  
 ment; in hysterical females, &c.

SOMNAMBULISMUS, Somnambulism—s.  
 Artificialis, Somnambulism, magnetic.

SOMNAMBULIST, *Somnambulus*, *Hypnob'-  
 ates*, *Noctambulus*, *Lunat'icus*, *Noctamb'ulo*, *Som-  
 nan'bullo*. A sleep-walker.

SOMNAMBULIS'TIC, Relating or apper-  
 taining to somnambulism,—as the '*somnambu-  
 lis'tic state*.'

SOMNAMBULO, Somnambulist.

SOMNATIO, from *somnium*, 'a dream.' The  
 act of dreaming.

SOMNATIO MORBOSA, Oneironosis—s. in *Statu*  
*Vigili*, Hallucination.

SOMNIF'EROUS, *Somnifer*, *Sopor'ifer*, *Hyp-  
 not'icus*, *Hypnopoe'us*, *Soporati'vus*, *Soporif'ic*,  
*Soporif'erous*. A medicine which causes sleep.

SOMNULOQUIST; same etymon as the next.  
 One who talks in his sleep.

SOMNILO'QUIUM, *Somniloquis'mus*, *Somnil'-  
 oquism*, from *somnus*, 'sleep,' and *loquor*, 'I  
 speak.' Talking in the sleep.

SOMNOPATHY, Somnambulism, magnetic.

SOMNIUM, *Euy'pnion*, *Insom'nium*, a *Dream*,  
 (F.) *Rêve*, *Songe*. A confused assemblage, or  
 accidental and involuntary combination of ideas  
 and images, which present themselves to the  
 mind during sleep. Dr. S. Mitchell, of New York,  
 used the word *Somnium* to signify the state be-  
 tween sleeping and waking, in which persons  
 perform acts of which they are unconscious.

For 'waking dreams,' see *Hallucination*.

Those distressing dreams which occur during  
 a state of half sleep, are called, by the French,  
*Rêveseries*.

SOMNO-VIGIL, Somnambulism.

SOMNOLENCY, *Somnolent'ia*, *Hypno'asthe'sis*,  
*Hypno'dia*, *Dormitit'io*, *Heav'iness*, *Carus*, *Lethur'-  
 gus*, *Cataph'ora*, *Cataphora*, *Coma*, *Somnolen'tium*,  
*Caro'sis*, *Slumber*, (F.) *Assoupissement*. Sleepi-  
 ness. Also a state intermediate between sleep-  
 ing and waking. It is often a symptom of disease.

SOMNUS, Sleep.

SOMPXUS, Sleep.

SON, Furfur, Sound.

SONCHUS, *S. Olera'ceus*, *Hiera'cium olera'-  
 ceum*, *Cicer'bita*, *Sow Thistle*, (F.) *Laiteron doux*.  
*Family*, Cichoraceæ. Most of the species of Son-  
 chus abound with a milky juice, which is very  
 bitter, and said to possess diuretic virtues.

SONCHUS FLORIDANUS, Mulgedium Florida-  
 num.

SONDE, Sound, Specillum—s. *Caunlé*, Di-  
 rector.

SONDE D'ANEL. A very fine stilet of sil-  
 ver, awl-shaped at one end. It is used for  
 probing the lachrymal passages through the punc-  
 ture lacrymalæ.

SONDE DE BELLOC. An instrument in-  
 vented by Belloc for plugging the nasal fossæ,  
 in cases of hemorrhage. It consists of a curved  
 silver canula, open at both ends, and furnished  
 with a button. The instrument is passed through  
 the nares to the throat; and a plug is attached

to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

**SONDE BRISÉE, (F.), Eyed probe.** A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other with an eye, so that it may be used either as a probe for punctured wounds, or for a seton needle.

**SONDE À CONDUCTEUR, (F.)** A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Mandrin* is one half longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

**SONDE À DARD,** see Lithotomy (high operation.)

**SONDE DE LAFOREST.** A small, crooked caula, used for probing the nasal duct from below upwards, and for throwing injections into it.

**SONDE ou PINCE DE HUNTER.** A cylindrical silver canula; of the size of a common catheter; open at both extremities, and containing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small silver scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

**SONDE DE VARECQ,** Soda.

**SONGE,** Somnium.

**SONITUS AURIUM,** Tinnitus aurium—s. Fluidi, Hygrecema—s. Hepaticus, Hepatechema—s. Intestinalis, Enterechema—s. Stomachicus, Gasterechema.

**SONOROUS RHONCHUS,** *Râle sonore.*

**SONUS,** Sound—s. Vocis, Accent.

**SOOJA,** see Dolichos.

**SOOJIE, BASTER'S,** a farinaceous article of diet, is said to consist of wheat flour sweetened with sugar.

**SOOL,** Gastroperiodydia.

**SOOT,** Fuligo—s. Tea, see Fuligokali—s. Wart, Cancer, chimney-sweeper's.

**SOPHIA,** Sisybrium sophia—s. Chirurgorum, Sisybrium sophia.

**SOPHISTICATIO,** Falsification.

**SOPHORA HEPTAPHYL'LA,** *Anticholer'ica.* Family, Leguminosæ. Sex. Syst. Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

**SOPHORA TINCTO'RIA,** *Baptis'ia tineto'ria,* *Podalyr'ia Tineto'ria,* *Indigofera,* *Wild Indigo,* *Indigo Weed,* *Broom,* *Indigo Broom,* *Horsefly Weed,* *Yellow Broom,* *Clover Broom,* *Rattle Bush,* *Yellow Indigo.* An American plant, the taste of whose root is unpleasant, sub-acrid, and nauseous—very similar to ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the *cortical part* of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.

*Baptis'ia Leucantha,* *Tall white false Indigo,* an indigenous plant, has the same properties.

**SOPHRONISTÆ DENTES,** see Dentition.

**SOPHRONISTERES DENTES,** see Dentition.

**SOPHROSYNE,** Temperance.

**SOPHENS,** Paregoric.

**SOPHO,** Opium.

**SOPOR.** A profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

**SOPOR CAROTICUS,** Carus.

**SOPORARIÆ ARTERIÆ,** Carotids.

**SOPORATIVUS,** Somniferous.

**SOPORIFEROUS,** Somniferous.

**SOPORIFIC,** Somniferous.

**SOPOROUS,** *So'porus,* from *sopor,* 'sleep.' Sleepy; causing sleep.

**SORA,** Essera.

**SORB TREE,** *Sorbus domestica.*

**SORBASTRELLA,** *Pimpinella saxifraga.*

**SORBEFACIENT,** *Sorbefac'iens,* from *sorbere,* 'to suck in,' and *facere,* 'to make.' A remedy that promotes absorption.

The following are the chief sorbefacients:—Acida Vegetabilia; Alkalia; Ammoniacum; Brominum; Galbanum; Hydrargyri Præparata; Iodinum; Liquor Calcii chloridi; Spongia usta; Compression, (methodical;) Friction; Mental Sorbefacients, (Imagination, Emotions.)

**SORBETHUM,** Sherbet.

**SORBETTUM,** Sherbet.

**SORBETUM,** Sherbet.

**SORBIER DES OISELEURS,** *Sorbus acuparia.*

**SORBITIO,** Jus.

**SORBITIO CARNIS** seu **EX CARNE.** Broth or soup made of meat.

**SORBITUM,** Jus.

**SORBUM,** see *Sorbus domestica.*

**SORBUS,** *Cratægus aria,* S. *domestica.*

**SORBUS ACUPARIA,** seu *Aucuparia,* *Mes'pilus,* *M. acuparia,* *Mountain Service,* *Mountain Ash,* *Quicken tree,* *Roan tree,* (F.) *Sorbiere des Oiseleurs.* The berries of this tree are employed for similar purposes as the last.

**SORBUS ALPINA,** *Cratægus aria*—s. *Aria,* *Cratægus aria*—s. *Aucuparia,* S. *acuparia*—s. *Cydonia,* *Pyrus edonia.*

**SORBUS DOMESTICA,** *Sorbus,* *Pyrus domestica,* *Mes'pilus domestica,* *Oie,* *Service* or *Sorb Tree,* (F.) *Cormier.* Family, Rosaceæ. Sex. Syst. Icosandria Trigynia. The fruit of this tree, *Sorbin,* is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy.

**SORBUS MALUS,** *Pyrus malus.*

**SORDES,** *Rhypos.* A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth, on the teeth in adynamic fevers more especially, and of foul matters in the stomach—*Sordes priu'arum via'rum,* *Rhy'paria.* The French call an ulcer, exhibiting such an appearance, *sordid.* Also dirt of any kind.

**SORDES,** *Ichor,* *Saburra*—s. *Acidæ,* *Acidities*—s. *Aurium,* *Cerumen*—s. *Primarium viarum,* *Embarras gastrique,* see *Sordes*—s. *Ventris,* *Excrement.*

**SORDICULÆ AURIUM,** *Cerumen.*

**SORE,** Ulcer.

**SORE, BAY.** A disease which Mosely considers to be a true cancer. It is endemic in the Bay of Honduras.

**SORE MOUTH,** *Stomatitis*—s. *Clergyman's,* *Pharyngitis,* *follicular*—s. *Gangrenous,* *Cancer aquaticus*—s. *Inflammatory,* *Cynanche tonsillar*—s. *Putrid,* *Cynanche maligna*—s. *Throat,* *Cynanche*—s. *Throat,* *tubercular,* *Pharyngitis,* *follicular*—s. *Throat,* *ulcerous,* *Cynanche maligna.*

**SORENESS**, from Teut. *seer*, (G.) *Selir*, 'very.' Sax. *ſap*, *Parapſais acris tenerrita'do*. Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

**SORGHUM**, *Panicum Italicum*.

**SOROCCO**, *Puna*.

**SOROCCHE**, *Puna*.

**SORORIA'TIO**. The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mammae begin to show, was formerly called *sororians virgo*. — *Plantus*.

**SORREL**, COMMON, *Rumex acetosa* — *s*. French, *Rumex scutatus* — *s*. Garden, *Rumex scutatus* — *s*. Mountain, *Oxalis acetosella*, *Oxyria reniformis* — *s*. Salt of, Potass, oxalate of — *s*. Roman, *Rumex scutatus* — *s*. Tree, *Andromeda arborea* — *s*. White, *Oxalis acetosella* — *s*. Welsh, *Oxyria reniformis*.

**SOSTRUM**, improperly *Sostrum*; from *σωζειν*, 'to save.' A reward given to one who saves the life of another. A physician's fee or *honorarium*.

**SOTERIA DOCTRINA**, *Medicina*.

**SOTERIE AQUE**, Waters, mineral.

**SOTIREL'LA**. Ancient name of a medicine composed of *opium*, several *narcotics*, *nutmeg*, *saffron*, *camphor* and *soot*. It was used in certain diseases of the teeth.

**SOTRUM**, *Sostrum*.

**SUBRESAUT**, *Subsultus tendinum*.

**SOUCHERLOON**, Bit noben.

**SOUCHET DES INDES**, *Curcuma longa* — *s*. *Odocant*, *Cyperus longus* — *s*. *Rond*, *Cyperus rotundus*.

**SOUCI**, *Calendula officinalis*, *Panophobia* — *s*. *des Champs*, *Calendula arvensis* — *s*. *Ordinaire*, *Calendula officinalis*.

**SOUDE**, *Soda* — *s*. *Acétate de*, *Soda*, acetate of — *s*. *Aéré*, *Sodæ carbonas* — *s*. *Borate de*, *Borax* — *s*. *Borate saturé de*, *Borax* — *s*. *Carbonate de*, *Sodæ carbonas* — *s*. *Caustique*, *Soda caustica* — *s*. *à la Chaux*, *Soda Caustica* — *s*. *Chlorure de*, *Soda*, chloride of — *s*. *du Commerce*, *Soda* — *s*. *Croyense*, *Sodæ carbonas* — *s*. *Effervescente*, *Sodæ carbonas* — *s*. *Hyposulfite de*, *Soda*, hyposulphite of — *s*. *Phosphate de*, *Soda*, phosphate of — *s*. *et de Potasse*, *Tartrate de*, *Soda*, tartrate of — *s*. *Pure*, *Soda caustica* — *s*. *Sousborate de*, *Borax* — *s*. *Sous-carbonate de*, *Soda*, subcarbonate of — *s*. *Sulfate de*, *Soda*, sulphate of.

**SOUFFLE**, see *Murmur*, respiratory — *s*. *Amphorique*, see *Cavernous respiration* — *s*. *Métallique*, see *Cavernous respiration* — *s*. *Placentaire*, *Bruit placentaire* — *s*. *Tubaire*, see *Murmur*, respiratory — *s*. *Uterin*, *Bruit placentaire* — *s*. *Voilé*, see *Cavernous respiration*.

**SOUFRE**, *Sulphur* — *s*. *Iodure de*, *Sulphuris iodidum* — *s*. *Sublimé*, *Sulphur sublimatum*.

**SOUND**, *Specill'om*, *Stylus*, *Esporator'rium*, *Rad'olus*, (F.) *Sonde*. An instrument used by surgeons to discover whether there be a stone in the bladder. It is usually made of highly polished steel, and is shaped like the catheter. The operation is termed *sounding*.

The French *Sonde* has, however, a more extensive signification. It means different instruments introduced into cavities of certain organs, or into wounds, fistulas, &c., to investigate their condition, or to fulfil some therapeutical indication. See *Sonde*.

**SOUND**, *Sonus*, *Echos*, *Noise*, (F.) *Son*, *Bruit*. The sensation produced on the auditory nerve by the vibrations of a sonorous body. Sounds may be propagated in three modes. 1. By *reciproca'tion* or *con'sonance*, as when a sounding body, of

a definite pitch, produces a musical tone when another body of the same pitch is sounded near it. 2. By *res'onance*, as when a sounding body is placed in connection with another, one or more of whose parts may be thrown into reciprocal vibration; and 3. By *conduc'tion*, as where the vibrations are transmitted through fluid, liquid, or solid media.

**SOUND**, Catheterize, *S*. *Auricular*, *Apyromele* — *s*. *Bellows*, friction, rasp, saw, lancet, &c., see *Bruit* — *s*. *Crumpling*, pulmonary, *Froissement pulmonaire* — *s*. *Laryngeal*, *Laryngeche*.

**SOUNDING**, Searching, see *Sound*.

**SOUNDNESS OF MIND**, *Sanity*.

**SOUP'IR**, *Sigh*.

**SOUR BERRY**, see *Oxycantha Galeni*, *Vaccinium oxycoccos* — *s*. *Dock*, boreal, *Oxyria reniformis* — *s*. *Leaf*, *Andromeda arborea* — *s*. *Tree* *Andromeda arborea* — *s*. *Wood*, *Andromeda arborea*.

**SOURCIL**, *Supercilium*.

**SOURCILIER**, *Corrugator supercillii*, *Superciliary*.

**SOURDS MUETS**, see *Mutitas surdorum*.

**SOURIS**, *Nictation*.

**SOUS-ACROMIO-CLAVI-HUMÉRAL**, *Deltoid* — *s*. *Atlœdien*, *Subatlœdæus* — *s*. *Axœdien*, *Subaxœdæus* — *s*. *Clavicor*, *Subclavius* — *s*. *Costaux*, *Intercostal* — *s*. *Costané*, *Subcutaneous* — *s*. *Épinoen*, *Infra-spinatus* — *s*. *Lingual*, *Sub-lingual* — *s*. *Maxillaire*, *Submaxillary* — *s*. *Maxillo-Labial*, *Depressor anguli oris* — *s*. *Mental*, *Submental* — *s*. *Métacarpulo-latéri-phalangien*, *Prior annularis* — *s*. *Optico-sphéno-scléroticain*, *Rectus inferior oculi* — *s*. *Orbitaire*, *Suborbital* — *s*. *Publio-coccygien*, *Levator ani* — *s*. *Publio-crêti-tibial*, *Gracilis* — *s*. *Publio-pré-tibial*, *Gracilis* — *s*. *Publio-trochantérien-externe*, *Obturator externus* — *s*. *Publio-trochantérien-interne*, *Obturator internus* — *s*. *Scapulaire*, *Subscapularis* — *s*. *Sclæ*, see *Sclæ*.

**SOUTHERNWOOD**, *Artemisia abrotanum* — *s*. *Field*, *Artemisia campestris* — *s*. *Maritime*, *Artemisia maritima* — *s*. *Tartarian*, *Artemisia santonica*.

**SOWBREAD**, *Arthanita*, *Cyclamen*.

**SOWENS**, *Flummary*.

**SOY**, see *Dolichos soja*.

**SOYMIDA**, *Swietenia febrifuga*.

**SPA, MINERAL WATERS OF**. A town seven leagues southeast of Liège, where there are several springs, possessing a sharp acidulous taste; containing much carbonic acid, carbonates of iron, lime, and magnesia; carbonate of soda, and chloride of sodium. The water is much used as a tonic.

**SPA WATER, ARTIFICIAL**. *Sodæ subcarb.*, gr. viij; *magnesiæ carbon.*, ℥j; *limat. ferri.*, gr. iij; *sodii chlorid.*, gr. j; *aqvæ*, Oij. Impregnate with gas from *marble powder* and *sulph. acid.*, ãã ℥x.

**SPACE, INTERPEDUNCULAR**, *Tarini pons* — *s*. *Perforated*, anterior, *Locus perforatus anticus* — *s*. *Perforated*, posterior, *Tarini pons*.

**SPADO**, *Castratus*, *Eunuch*, *Spasm*.

**SPAGYRIA**, *Chymistry*.

**SPAG'YRISTS**, from *σπaw*, 'I separate,' and *αγειρω*, 'I assemble,' because they reduced compounds into elements, and formed the latter into compounds(?). A sect of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists of their day explained those of the inorganic kingdom. — *Medicina Paracelsistica* sen *Spagyrica*, was likewise called *Hermetica*, because it was believed that the

means of cure adopted in it had been found in the books of Hermes.

SPANÆMIA, from *σπavos*, 'poor,' and *αἷμα*, 'blood.' Poverty of the blood. Diminution in the quantity of fibrin and red corpuscles of the blood,—as where bleeding has been carried beyond certain limits.—Simon.

SPANÆMIC, *Spanæmicum* (remedium), *Dysplasticum*, *Plastilyticum* et *erethilyticum*, *Hæmatolyticum*, *Dyscrasiacum*. Same etymon as the last. Relating to spanæmia.

A medicine whose protracted use is said to impoverish the blood,—as iodine, bromine, &c.

SPANDARAPUM, Sparadrapum.

SPANISH FLY, Cantharis.

SPANOPOGON, from *σπavos*, 'rare,' and *πovov*, 'beard.' One who has lost his beard, or has a thin beard.

The Greeks called those who had little beard, or who had lost it, *Spanopogones*.

SPARADRAPA, Sparadrapum.

SPARADRAPIER. The name of a machine for spreading sparadraps. A *Plaster machine*. It consists of a table, with two raised pieces, movable, and furnished with points, by which the cloth can be stretched, and of a lamina or blade of metal to extend the plaster over it.

SPARADRAPUM, *Sparadrapa*, *Sparadrapus*, *Tela emplastica*, *Spandrapum*, (F.) *Sparadrap*. Any adhesive plaster spread upon linen or paper. The chief sparadraps are the following:—

SPARADRAPUM ADHÆSIVUM, *Adhæsive Plaster*. A spread plaster of the *Emplastrum adhæsivum*. It is also called *Strapping*.

*English Court Plaster* is a Sparadrap, (F.) *Taffetas agglutinatif*, *T. gommé*, *Tuffetas d'Angleterre*; *Ser'icum Anglicum*, *Emplastrum Anglicum*, *E. Anglica'num*, *E. Adhæsivum Woodstock'i*, *E. Ichthyocol'læ telæ inductum*, *E. Glutinosisum*, *Tela Ichthyocol'læ glutinans*, *Isinglass Plaster*. It is made by stretching black silk, and brushing it over with a solution of isinglass  $\mathfrak{z}\text{j}$ , in *proof spirit*  $\mathfrak{z}\text{xij}$ , to which *tinct. benzoïn*  $\mathfrak{z}\text{ij}$ , are added. When dry, this is repeated five times; after this, two coats are given it of a solution of *tereb. Chia*  $\mathfrak{z}\text{iv}$ , in *tinct. benz.*  $\mathfrak{z}\text{vj}$ , which render it less liable to crack.

*Liston's Isinglass Plaster* is made by spreading several coats of strong solution of isinglass in weak spirit over oiled silk, or, still better, over animal membrane previously prepared for the purpose from the peritoneal coat of the cæcum of the ox.

SPARADRAPUM PRO FONTIC'ULIS, *Issue Plaster*, is sometimes made of *simple diachylon*,  $\text{℥}\text{ij}$ ; *Burgundy pitch* and *sarcocolla*, each  $\mathfrak{z}\text{iv}$ ; *common turpentine*,  $\mathfrak{z}\text{j}$ . Spread upon linen and polished with a moistened calendering glass rubber.

SPARADRAPUM seu TELA GALTERI, *Defensive Plaster*, (F.) *Toile de Gautier*. This is made of *olive oil*,  $\text{℥}\text{ss}$ ; *suet*,  $\mathfrak{z}\text{iv}$ ; *wax*,  $\mathfrak{z}\text{x}$ ; *litharge*, *common turpentine*, *thus*, and *mastic*,  $\text{āā}$   $\mathfrak{z}\text{ij}$ ; *bole armeniac*, *flour*,  $\text{āā}$   $\mathfrak{z}\text{j}$ . Pour it, while liquid, upon cloth, and spread. Used for issues and to keep on dressings.

SPARADRAPUM VESICATORIUM. Several substances have been introduced as substitutes for blistering plaster, (see *Emplastrum Lyttæ*), under the names, *Tela vesicatoria*, *Blistering Tissue*, &c., and other forms of which are the *Taffetas évésicant*, *Papier épispastique*, *Charta vesicatoria*, *Taffetas épispastique*. They are made of an ethereal or alcoholic extract of cantharides, or of cantharidin, mixed with wax and spread, in a very fine layer, on silk or paper previously oiled or waxed. They are efficient agents.

SPARADRAPUM VIR'IDÆ, *Corn Plaster*. This may be made of *yellow wax*,  $\text{℥}\text{ij}$ ; *Burgundy pitch*,  $\mathfrak{z}\text{xij}$ ; *common turpentine*,  $\mathfrak{z}\text{vj}$ ; *verdigris*,  $\mathfrak{z}\text{ij}$ ; spread on cloth and polished.

*Kemedy's Corn Plaster* is made of *yellow wax*,  $\text{℥}\text{ij}$ ; *Venice turpentine*,  $\mathfrak{z}\text{ij}$ ; *verdigris*,  $\mathfrak{z}\text{j}$ .

SPARADRAPUS, Sparadrapum.

SPARAGMA, Laceration.

SPARAGMOS, Spasin.

SPARAGUS, Asparagus.

SPARALLIUM, *Clyster uteri'mis*. An injection into the vagina.—Ruland and Johnson.

SPAREDDIA. A ligature covered with the white of egg.—Paracelsus.

SPARGANIUM RAMOSUM, *Great Bur-reed*. Indigenous; *Order*, Typhaceæ; flowering in July and August. The roots are subastringent, but esulent; yielding a fine fecula, similar to salep. They are sometimes made into a poultice for inflamed mammae.

SPARGANON, *Spar'ganum*, from *σπαγγα*, 'I swathe, 'I wrap.' 'Swathing clothes;' a kind of bandage, with which children were formerly surrounded.—Fœsius. Also, a fascia.

SPARGANOSIS, *Spargo'sis*, *Intumescen'tia lac'tea mamma'rum*, *Mastodyn'ia polyg'ala*, from *σπαγγα*, 'I am ready to burst.' Extreme distention of the breasts by milk. Sparganosis also means the wrapping of a child in swathing clothes.

SPARGANOSIS PUEPERARUM, *Phlegmatia dolens*.

SPARGANUM, Sparganon.

SPARROWGRASS, Asparagus.

SPARSUS, Sporadic.

SPARTIUM JUN'CEUM, *Spanish broom*.

A small European shrub, cultivated in the gardens of the United States, on account of its yellow flowers. The seeds are diuretic and tonic, in small doses; emetic and cathartic in large. They have been used in dropsy—10 or 15 grains three times a day.

SPARTIUM SCOPA'RIUM, *Cyt'isus scopar'ius*, *Genis'ta*, *G. scopar'ia*, *Genis'ta hirsu'ta*, *Broom*, *Cytisio-genista*, (F.) *Génêt à balai*. *Family*, Leguminosæ. *Ser. Syst.* *Diadelphia Decandria*. *Broom Tops*, *Spartii Cæcumina*, *Scopa'rius*, (Ph. U. S.) have a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose, of the powder,  $\mathfrak{z}\text{j}$  to  $\mathfrak{z}\text{j}$ . All the genistæ have similar virtues. A decoction of genista, along with the cauterization of the pustules under the tongue, has been recommended in hydrophobia.

SPARTIUM TINCTORIUM, *Genista tinctoria*.

SPASM, *Spasmus*, *Sparag'mos*, *Synol'cē*, *Spado*, from *σπavω*, 'I draw.' The Greeks gave this name to all kinds of convulsions. It is now usually applied to involuntary muscular contractions; and these, again, have been divided into *tonic spasm*, *Paraton'ia*, which consists in permanent rigidity and immobility of the muscles that are the seat of it (see *Tetanus*); and *clonic spasm*, which consists in alternate contractions and relaxations (see *Convulsion*).

Cullen has a class, *Spasmi*—the *neurospasmi* of Fuchs.

SPASM, CLONIC, *Convulsion*—s. *Cynic*, see *Canine laugh*—s. of the *Glottis*, *Asthma thymicum*—s. of the *Larynx*, *Asthma thymicum*—s. with *Rigidity*, *Tetanus*.

SPASM, WRITERS'. Involuntary spasms of the muscles of the thumb and index finger, observed, at times, in those who are much accustomed to writing. See *Cramp, writers'*.

SPASMATICUS, *Spasmodicus*.

SPASMATODES, *Spasmodicus*.

SPASME, DE LA GLOTTE ET DU THO-

**RAX.** Asthma thymicum—*s. de la Vessie*, Cysto-spasmus.

SPASMI, see Spasm.

SPASMODES, Convulsive.

SPASMODIC, Spasmodic.

SPASMOL'OGY, *Spasmolog'ia*, from *σπασμος*, 'spasm,' and *λογος*, 'a treatise.' A treatise on spasms.

SPASMOLYGMUS, Singultus.

SPASMOTICUS, *Spasmat'icus*, *Spasmat'o'des*, *Spas'ticus*, *Spastic*, *Spasmod'ic*. Any thing relating to spasm. Also, an antispasmodic.

*Morbi constrict'o'rii*, *M. spasmo't'ici*, &c., are diseases accompanied with spasm.

SPASMUS, Convulsion, Spasm—*s. Aurium*, Otalgia—*s. Caninus*, see Canine laugh—*s. Clonicus*, Convulsion—*s. Cynicus*, see Canine laugh—*s. Facialis*, Tic—*s. Glottidis*, Asthma thymicum—*s. Linguae*, Glossospasmus—*s. Maxillae inferioris*, Trismus—*s. Muscularis*, Cramp—*s. Musculorum Faciei*, Canine laugh—*s. Universalis*, Synclonus—*s. Ventriculi*, see Cardialgia—*s. Vesicae*, Cystospasmus.

SPAS'NIA, same etymon as Spasm. A term, used by Mercurialis, to designate the lancinating pain produced, at times, in the chest by violent fits of coughing.

SPASTIC, Spasmodic, Tonic spasm.

SPASTICUM, Tetanic.

SPATHA, Hypaleiptron.

SPATHES'TER, from *σπασω*, 'I draw.' (?) A surgical instrument, used for drawing the prepuce over the glans, when too short.—P. Amman.

SPATHOMELE, Spatula.

SPATHULA, Scapula, Spatula—*s. Fœtida*, Iris foetidissima.

SPATHYEMA FETIDA, Dracontium foetidum.

SPAT'ILĒ, *σπατ'ιλη*, 'human excrement.' A liquid fecal evacuation. Excrement.—Hippocrates.

SPATIUM ORIS, Mouth—*s. Trigonum*, Lyra.

SPAT'ULA, *Spath'ula*, diminutive of *Spatha*, *σπαθη*, 'a broad-sword.' *Spathome'te*, *Specill'um latum*. An instrument used for spreading plasters, stirring ointments, holding down the tongue, &c. Also, the scapula.

SPATULA PRO ORE, Glossospatha.

SPEARWORT, Ranunculus flammula.

SPEAUTER, Zinc.

SPECIES, Powders, compound—*s. Aromaticæ*, Pulvis cinnamomi compositus—*s. Diacinnamomi*, Pulvis cinnamomi compositus—*s. Diacretæ*, Pulvis cretæ compos.—*s. Diapalapæ*, Pulvis jalapæ compositus—*s. Diambrae sine odoratis*, Pulvis cinnamomi compositus—*s. Diatragacanthæ frigidæ*, Pulvis tragacanthæ compositus—*s. Hieræ pieræ*, Pulvis aloes cum canellâ—*s. Leticificantes Rhazis*, Pulvis cinnamomi compositus—*s. e Scordio cum opio*, Pulvis cretæ compositus cum opio—*s. e Scordio sine opio*, Pulvis cretæ compositus.

SPECIF'IC, *Specif'icus*, from *species*, 'a form or fashion,' and *facere*, 'to make.' A substance to which is attributed the property of removing, directly, one disease rather than any other. Probably no such remedy exists. *Mercury* in syphilis, and *sulphur* in the itch, have been regarded as the strongest examples.

SPECIFIC OF HERRENSCHWAND. A once celebrated German vermifuge. It is said to have consisted of 10 grains of *Gamboge*, with 20 of *Carbonate of Potassa*. It is affirmed, that mercury and arsenic have also been found in it.—Paris.

SPECIFICUM PARACELSI, Potassæ sulphas.

SPECIL'LUM, *Melē*, *Stylus*, *Explorato'rium*, from *specio*, 'I examine,' *Specular'ion*, a probe,

(*F.*) *Stylet*, *Sonde*. A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

SPECILLUM, Everriculum, Hypaleiptron, Sound—*s. Auricularium*, Apyromele—*s. Cereum*, *Bougie*—*s. Excavatum*, *Stylus excavatum*—*s. Latum*, *Spatula*—*s. Minus*, *Melotus*.

SPECLARION, Specillum.

SPECTACLES, from *spectare*, 'to behold;' *Conspicill'um*, (*F.*) *Beccles*,  *Lunettes ordinaires*, *Conservees*. Glasses to assist the sight; arranged so as to be adapted to both eyes. These glasses are more or less *concave* or *convex*, according as the sight is more or less short, (*myopic*), or long, (*presbyopic*.) When the glass is adapted to one eye, it is called an *Eye-glass*, *Conspicill'um*, *Per-spicill'um*, *Vitrum oculo're*.

SPECTA'RIS LAPIS. A transparent mineral, but of what nature is not clear, which was formerly employed in epilepsy. In old times it was used for glass.—Pliny.

SPECULUM, *Catop'ter*, *Catop'tron*, *Diop'tron*. In Latin, 'a mirror;' from *specio*, 'I see.' In surgery, it means different instruments for dilating cavities, and facilitating their examination. See Dilator. There are various instruments of this kind,—the *S. Ani*, *S. Auris*, *S. Vaginae*, (*Colpury'n'ter*, *Elytreurguter*), *S. Matricis*, *S. Oculi*, *S. Oris* (*F.*) *Baillon*), *S. Gutturis*, *S. Vesicae*.

SPECULUM CITRINUM, Orpiment—*s. Indicum*, *Ferri limatura*—*s. Lucidum*, *Septum lucidum*—*s. Oris*, *Glossocatochus*—*s. Veneris*, *Achillea millefolium*.

SPECUS, Vulva—*s. Cordis*, Ventricle of the Heart—*s. Pro medullâ spinali*, see Vertebral column—*s. Vertebralis*, see Vertebral column.

SPEDALSKE, see Radzyge.

SPEDALSKHED, see Radzyge.

SPEECH, Voice, articulated.

SPEECHLESSNESS, Mutitas.

SPEEDIMAN'S PILLS, see Pilulæ aloes et myrrhae.

SPEEDWELL, BROOKLIME, *Veronica beccabunga*—*s. Female*, *Antirrhinum latine*—*s. Official*, *Veronica*—*s. Purslain*, *Veronica peregrina*—*s. Water*, *Veronica beccabunga*.

SPELTRUM, Zincum.

SPERAGUS, Asparagus.

SPERM, from *σπαιρω*, 'I sow.' *Spermat'ic fluid* or *liquor*, *Sem'inal fluid*, *Seed*, *Semen*, *S. viri'te* seu *masculin'um* seu *genita'te*, *Semin'ium*, *Genita'te*, *Medul'la*, *Rytis'ma*, *Ros*, *Sanguis*, *Serum*, *Humor genita'lis* seu *semin'alis* seu *venereus*, *Uri'na genita'lis*, *Genita'ra*, *Sperma*, *S. viri'te*, *Spermat'ium*, *Tho'rē*, *Tho'ras*, *Lac maris*, *Lagne'a*, *Lagu'a*, *Lagne'ma*, *Germen*, *Mole's milk*, *Propagatory* or *genital liquor*, *Vita'te virus*, *Vital* or *quickening venom*, (*F.*) *Semeuce*, *Fluide seminal*. A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the vasa deferentia to the vesiculæ seminales, to be thrown into the vagina, during coition, through the ejaculatory ducts and the urethra. It is the fecundating fluid, and must come into actual contact with the germ of the female. The *Ara sen'inis*, *Gonau'ra*, is incapable of effecting fecundation. The semen, at the time of emission, is composed of two different fluids; the one liquid and transparent, which is considered to be the secretion of the prostate,—the other, white, and as thick as mucilage; the product of the testicular secretion. The sperm contains, according to Vauquelin, 900 parts of water, 50 of animal mucilage, 10 of soda, and 30 of calcareous

phosphate. The animal matter is peculiar, and by some termed *spermatin*.

Microscopic observations show that it contains *spermatozoa*, or more properly *spermatozooids*; for their animalcular nature is not demonstrated. They are produced in cells—*sperm-cells*—and have probably no more title to be considered animalcular, than the cilia of the ciliated epithelium. By careful examination, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies are the *seminal granules*, *gran'ula sem'inis*. Pure sperm, in its most perfect state, consists principally of spermatozooids and seminal granules; both of which are enveloped in a small quantity of fluid, *liquor sem'inis*.

It has been imagined, but erroneously, that during coition there is a secretion of female sperm—*Semen mulie'bre*, *Thelyg'onum*. The increased secretion that takes place is chiefly from the glands of Duverney.

Sperm also means spermaceti.

SPERM CELL, see Sperm.

SPERMA, Sperm—s. Mercurii, Hydrargyrus acetatus.

SPERMA RANA'RUM, *Spermi'ola seu Spermi'olum seu Spermi'ola seu Spermi'olum rana'rum*. Frog's spawn. Once used in medicine.

SPERMACETI, Cetaceum—s. Whale, see Cetaceum.

SPERMACRASIA, Spermatorrhœa.

SPERMATACRASIA, Spermatorrhœa.

SPERMATACRATIA, Spermatorrhœa.

SPERMATIC, *Spermat'icus*, *Semina'lis*, *Sem'inal*. That which relates to the sperm. A name given to different parts connected with the organs of generation.

SPERMATIC ARTERIES, *A. Spermat'icæ*, *A. præparan'tes*, (F.) *Artères testiculaires*, *A. de l'ovaire* (Ch.), are two in number—one on each side—and arise from the sides of the aorta, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring; gives numerous ramifications to the spermatic chord, and divides into two fasciculi of branches, one of which goes to the testicle,—the other to the epididymis. In the female, the spermatic artery, *ova'rian artery*, dips into the pelvis, and passes to the ovarium, Fallopian tube, and round ligament.

SPERMATIC CHORD, *Testic'ular Chord*, *Funi'culus Spermaticus*, *Corpus varico'sum*, (F.) *Cordon spermatique ou testiculaire*. The vascular and nervous chord, by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbo-abdominal plexus; of the vas deferens, and, very often, of a fibro-cellular chord, which unites the peritoneum to the upper part of the tunica vaginalis, and in which encysted hydrocele of the spermatic chord occurs. All these parts are united together by a very lax, areolar tissue, and surrounded by coats, which, reckoning from without, are:—1. The skin and areolar membrane. 2. A fibro-cellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often also behind, the chord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation furnished by the fascia transversalis to the chord, on a level with the superior orifice of the inguinal canal. The spermatic

chord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends, almost vertically, from the superior margin of the testicle as far as the lower orifice of the inguinal canal; passes through this canal and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs composing it separate from each other:—the vas deferens descending into the pelvis to pass behind the bladder;—the blood-vessels and lymphatics ascending towards the lumbar region, &c.

SPERMATIC FLUID, Sperm.

SPERMATIC GANGLION. A large ganglion, formed by branches from the hypogastric ganglion, and from the spermatic plexus. It supplies the fundus uteri. Besides these ganglia, Dr. Robt. Lee describes *ves'ical* and *vag'in'al ganglia*, and anterior and posterior *subperitone'al ganglia* and *plexuses*, which communicate with the preceding, and constitute an extensive nervous rete over the entire uterus.

SPERMATIC LIQUOR, Liqueur, Sperm.

SPERMATIC PASSAGES OR WAYS, *Viæ Spermaticæ*, are the canals concerned in the excretion of semen.

SPERMATIC PLEXUSES of nerves, *Plexus testiculares*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testicle in man; and to the ovary and Fallopian tube in the female,—*ova'rian nerves*. They cannot be traced into the substance of these organs.

SPERMATIC VEINS are two or three in number, on each side. They accompany the spermatic artery, and open—those of the right, into the vena cava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermatic Plexus*; and another plexus before the psoas muscle, called the *Corpus pampiniforme*.

SPERMATIN, see Sperm.

SPERMATIS'MUS, *Emis'sio sem'inis*, from *σπερμα*, 'sperm.' The emission of sperm.

SPERMATOCE'LE, *Hernia semina'lis scroti*, *Oscheoce'le semina'lis*, *Gonocel'e*, from *σπερμα*, 'sperm,' and *κηλη*, 'a tumour.' The ancients gave this name to certain swellings of the testicle which were regarded as produced by an accumulation of sperm in the organ. Also, varicocele.

SPERMATOCLEMMMA, see Pollution.

SPERMATOCLEPSIS, see Pollution.

SPERMATOCYSTIDORRHAG'IA, *Caulorrhag'ia ejaculato'ria*, *Hæmatu'ria ejaculato'ria*, *H. semina'lis*, from *σπερμα*, 'sperm,' *κυστις*, 'bladder,' and *ραγη*, 'a breaking forth.' A discharge of blood from the urethra, or the act of ejaculation of sperm.

SPERMATODES, Gonoides.

SPERMATOGON'IA, *Spermogon'ia*, *Spermatogon'ia*, *Spermatogon'ia*, from *σπερμα*, 'sperm,' and *γεννω*, 'to beget.' The preparation or secretion of sperm.

SPERMATOID, Gonoides.

SPERMATOLEPSIS, see Pollution.

SPERMATOLIPSIS, see Pollution.

SPERMATOL'OGY, *Spermatolog'ia*, from *σπερμα*, 'sperm,' and *λογος*, 'a discourse.' A treatise on sperm.

SPERMATOPH'OROUS, *Seminif'erous*, from *σπερμα*, 'sperm,' and *φω*, 'I carry.' Sperm-bearing. The cells or granules in the sperm have been so called.

SPERMATOPŒIA, Spermato-gonia.

SPERMATOPOESIS, Spermatogonia.

SPERMATOPOETIC, Spermatopœus.

SPERMATOPOËUS, *Spermatopœil'icus*, *Spermatopœil'icus*, *Spermatopœil'ic*, *Gonepœ'us*, *Gonepœil'icus*, *Gonopœil'icus*, from *σπέρμα*, 'sperm,' and *ποιέω*, 'to make.' Food, to which has been attributed the property of augmenting the secretion of semen; and, consequently, of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRHŒA, *Spermorrhœa*, *Spermacrasi'a*, *Spermatozœ'mia*, *Spermacrasi'a*, *Gonacrasi'a*, *Gonacrati'a*, *Spermatacrati'a*, *Gonorrhœ'a vera*, (F.) *Flux de Sperme*, *Pollutions*, *Pertes séminales*; from *σπέρμα*, 'sperm,' and *ρῶω*, 'I flow.' An emission of sperm, without copulation. See *Gonorrhœa*, and *Pollution*.

SPERMATORRHŒA ATONICA, *Gonorrhœa laxorum*.

SPERMATOSCHESIS, from *σπέρμα*, 'sperm,' and *σχίσις*, 'retention.' Retention or suppression of the spermatic secretion.

SPERMATOZEMIA, *Spermatorrhœa*.

SPERMATOZOÏA, *Zoospermata*, from *σπέρμα*, 'sperm,' and *ζῶον*, 'animal.' *Zoospermes*, *Spermatozôïres*, *Spermatozôïdes*, *Animal'cula semina'lia* seu *spermat'ica*, *Vermiculi spermat'ici*, *Seminal filaments*, *Spermatic or seminal animalcules* (?). Reputed animalcules seen in the sperm; by most physiologists supposed to be the formative agents in generation. See *Sperm*.

SPERMATOZOAIRES, *Spermatozoa*.

SPERMATOZOIDS, *Spermatozoa*.

SPERMIOIUM RANARUM, *Sperma ranarum*.

SPERMIIUM, *Sperm*, *Spermatogonia*.

SPERMOBILE, see *Ejaculation*, *Spermatismus*.

SPERMOEDIA CLAVUS, *Ergot*.

SPERMOGONIA, *Spermatogonia*.

SPERMORRHŒA, *Spermatorrhœa*.

SPERNIOLUM RANARUM, *Sperma ranarum*.

SPEWING, *Vomiting*.

SPHACELATION, *Mortification*.

SPHACÈLE, *Sphacelus* — s. *de la Bouche*, *Cancer aquaticus*.

SPHACELIA SEGETUM, see *Ergot*.

SPHACELISMUS, *Sphacelus* — s. *Cerebri*, *Phrenitis*.

SPHAC'ELUS, *Gangræ'na Sphacelus*, *Sphaceli'mus*, *Cold mortification*, (F.) *Sphacèle*, *Gangrène froide*, from *σφαζω*, 'I slay.' This word is used, by some, synonymously with *gangrene*; by others, with *gangrene* when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, *anthraconecro'sia*, which must be thrown off—or is, in other words, totally dead. The foul disorganized portion of an ulcer—called the *slough*—must be considered a kind of *sphacelus*.

*Sphacelus* was formerly used to denote excessive pain; and for agitation from excessive pain, or violent emotion.

SPHACELUS CEREALIS, *Ergotism* — s. *Nosocomialis*, *Hospital gangrene*.

SPHËRA, *Pila* — s. *Marina*, *Pila marina* — s. *Thalassia*, *Pila marina*.

SPHERANTHUS INDICUS, *Adaca*.

SPHERIDION, *Pilula*.

SPHERION, *Globule*, *Pilula*.

SPHEROCEPHALA ELATIOR, *Echinops*.

SPHEROCOCCUS CRISPUS, *Fucus crispus* — s. *Helminthochortus*, *Corallina Corsicana* — s. *Lichenoides*, *Fucus amylicus*.

SPHERULÆ SANGUINIS, *Globules of the blood*.

SPHAGE, *Throat*.

SPHENDONE, *Funda*.

SPHENOID, *Sphenoid'es*, *Sphenoid'es*, *Sphenoid'es*, *Sphenoid'es*, *Sphenoid'alis*, from *σφην*, 'a wedge,' and *είδος*, 'resemblance.' Wedge-shaped. Hence,

SPHENOID BONE, *Sphenoid'es os*, *Os basila'rè* seu *cuneifor'mè* seu *cu'neo comparat'um* seu *sphenoid'alè* seu *multifor'mè* seu *az'ygus* seu *papilla'rè* seu *polymor'phon* seu *parilla'rè* seu *bacilla'rè* seu *alafor'mè* seu *sphœcoï'des* seu *vespifor'mè* seu *inconjugn'tum*, *Pter'ygoid bone*. An azygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has, 1. An inferior or gattural surface, on which is situate the crista, that joins the vomer; a channel, which concurs in forming the pterygo-palatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid canal; the foramina—ovale, spinale, &c. 2. A superior or cerebrul surface, on which are:—the clinoid processes; the pituitary fossa; the foramina (ovale, rotundum, and spinale); the *Apophysis of Ingrassias* or lesser wing; the foramen opticum, &c. 3. An occipital or posterior surface, which is articulated with the basilar process of the occipital bone. 4. An anterior or orbitar-nasal surface; having, anteriorly, a crista to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoidal sinuses*. 5. Two zygomatic-temporal or external surfaces, which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion*; and *ala*, which are four in number, and are subdivided into *great* (*Temporal Plates* or *Wings*) and *little* (*Apophyses of Ingrassias*). The *Sphenoid suture* surrounds the bone.

SPHENOID, SPINOUS PROCESS OF THE, *Sphenoid spine*.

SPHENOID'AL, *Sphenoid'alis*. That which belongs or relates to the sphenoid bone.

SPHENOID'ALIA COR'NUA, (F.) *Cornets sphenoidales*, *Cornets de Bertin*; *Ossicula Bertini*, *Ossa triangula'ria*, *Pyramids of Wistar*. Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded in the adult. They have the shape of a hollow pyramid, with the base turned backwards; and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

SPHENOIDAL OR SUPERIOR ORBITARY FISSURE, *Furcimen lac'erum superius*, (F.) *Fente sphenoidale*, is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit between which and the cranium it is a means of communication.

SPHENOIDAL SPINE, (F.) *Épine sphenoidale*, *Spinous Process of the Sphenoid*; — 1. A projecting crista at the inferior surface of the sphenoid-bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale* (Ch.), met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

SPHENOIDES, *Cuneiform*, *Sphenoid* — s. *Os*, *Sphenoid bone*.

SPHENOMAX'ILLARY, *Spheno-maxilla'ris*. That which relates to the sphenoid and maxillary bones.

SPHENOMAXILLARY FISSURE, *Inferior orbitar-*

*Fissure*, (F.) *Fonte sphéno-maxillaire ou orbitaire inférieure*; called, also, *Fora'men lac'erum infé'rius*, *F. spheno-maxilla'rè*, is situate at the posterior part of the angle formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbitar cavity and the zygomatic fossa.

**SPHENOMAXILLARY FOSSA** is a name given by some anatomists, to a depression at the union of the sphenomaxillary and pterygomaxillary fissures.

**SPHENO-ORBITAR**. A name given, by Bérclard to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

**SPHENOPALATINE**, *Sphenopalati'nus*. That which relates to the sphenoid and palate bones.

**SPHENOPALATINE ARTERY**, *Large lateral nasal A.*, is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the sphenopalatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

**SPHENOPALATINE FORA'MEN** is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

**SPHENOPALATINE GANGLION**, *Ganglion of Meckel*, *Sphenoid'al G.* (Ch.) A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen sphæno-palatinum, in the pterygomaxillary fissure. It seems suspended by several nervous filaments to the trunk of the superior maxillary nerve, and gives off *internal or sphenopalatine filaments, inferior or palatine filaments, and a posterior filament*, which is the *Vidian or pterygoid nerve*.

**SPHENOPALATINE NERVES**, *Lateral nasal nerves*, arise from the ganglion — just described — at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are five or six in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Naso-palatine*.

**SPHENOPALATINUS**, *Levator palati*.

**SPHENOPARI'ETAL**, *Spheno-parieta'lis*. That which belongs or relates to the sphenoid and parietal bones.

**SPHENOPARIETAL SUTURE** is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

**SPHENO-PTERYGO-PALATINUS**, *Circumflexus* — *s. Salpingostaphylinus, Circumflexus* — *s. Solpingo-mallien, Laxator tympani*.

**SPHENOSIS**, see *Wedged*.

**SPHENOSTAPHYLINUS**, *Levator palati*.

**SPHENOTEMP'ORAL**, *Spheno-tempora'lis*. That which belongs to the sphenoid and temporal bones.

**SPHENOTEMPORAL SUTURE** is the suture at the articulation of the great alæ of the sphenoid bone with the squamous portion of the temporal. Bérclard gives the name *sphenotemporal* to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

**SPHEX**, *Wasp*.

**SPHINCTER**, *Constrictor, Musculus constrictorius*, from *σφιγγω*, 'I constrict.' A name given to several annular muscles, which constrict or close certain natural openings.

**SPHINCTER ANI**, *Annula'ris Ani*. Many anatomists have described two sphincter muscles of the anus: — 1. The *S. exter'nus, Aspidi'cos, S. cuta'neus, Coccygio-cutanè-sphincter, Orbicularis Recti, Constrictor Ani, Coccygio-anal*, (Ch.) It is situate around the anus; is elliptical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric arcs, which are attached, behind, to the extremity of the coccyx, by a dense, areolar substance; and are confounded, anteriorly, with the bulbo-cavernosi and transversi perinæi muscles. This muscle contracts and closes the anus. 2. The *inner or internal Sphincter Ani, Sphincter intestinal'is* of Winslow, is by many anatomists considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

**SPHINCTER GULE**, *Constrictores pharyngis* — *s. Ilei, Bauhin, valve of* — *s. Intestinalis, Sphincter ani internus* — *s. Labiorum, Orbicularis oris* — *s. Oculi, Orbicularis palpebrarum* — *s. Palpebrarum, Orbicularis palpebrarum* — *s. Pylori, see Pylorus* — *s. Vaginæ, Constrictores cunni* — *s. Ventriculi, Pylorus*.

**SPHINCTER VESI'CAE**, *Sphincter of the bladder*. Some anatomists have given this name to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name **PSEUDO-SPHINCTER** to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening. See *Compressor urethræ*.

**SPHONDYLIIUM**, *Heraclium spondylium*.

**SPHONGUS**, *Spongia*.

**SPHRAGIDONYCHARGOCOME'TA**, from *σφραγίς*, 'a seal,' *ονυξ*, 'the nail,' *αργός*, 'white,' or perhaps *αργυρός*, 'silver,' and *κοιμω*, 'I adorn.' A charlatan who adorned his fingers to the very nails with rings. — Aristophanes, Hippocrates.

**SPHYGMA**, *Pulse*.

**SPHYGMICA ARS**, *Sphygmia art*, from *σφυγμος*, 'the pulse.' The art of judging by the pulse, in health or disease.

**SPHYGMICA DOCTRINA**, *Sphygmologia*.

**SPHYGMICUS**, *Throbbing*.

**SPHYGMOCEPHALUS**, *Crotaphæ*.

**SPHYGMODES**, *Throbbing*.

**SPHYGMOLOG'IA**, *Sphygmica Doctri'na*, from *σφυγμος*, 'the pulse,' and *λογος*, 'a description.' The doctrine of the pulse.

**SPHYGMOMETER**, *Pulsilegium*.

**SPHYGMOS**, *Pulsation, Pulse*.

**SPHYGMOSCOPIUM**, *Pulsilegium*.

**SPHYRA**, *Malleolus*.

**SPHYXIS**, *Pulsation*.

**SPIC**, *Lavendula*.

**SPICA**, *Fascia repens, the Spica bandage*, (F.) *Épi*. A bandage so called in consequence of its somewhat resembling a *spike* of barley. The turns of the bandage cross like the letter V; — each leaving a third of the roller uncovered. It is distinguished into *ascending and descending*. It may be applied over various parts of the body, and in a different manner in each case: thus, there is the *Spica seu Fascia inguina'lis, Spica inguina'lis duplex*, the spica for the shoulder, and another for the thumb.

**SPICA**, *Lavendula*.

**SPICA ALPINA**, *Valeriana Celtica* — *s. Celtica, Valeriana Celtica* — *s. Indica, Nardus Indica* — *s. Nardi, Nardus Indica*.

**SPICEBERRY**, *Gaultheria, Laurus Benzoin*.

**SPICEBUSH**, *Laurus Benzoin*.

SPICES, FOUR, see *Myrtus pimenta*.

SPICEWOOD, *Laurus benzoin*.

SPICILLUM, *Speicillum*.

SPIDER, see *Arañea teta*.

SPIDERWORT, *Liliago*, *Tradescantia Virginica*.

SPIGELIA, *S. Marilandica*.

SPIGELIA MARILAN'DICA, *Anthelmia*, *Spigelia Lonic'era*, *Lonic'era Marilandica*, *Peven'nia Wormgrass* or *Indian Pink*, *Carolin'a Pink*, *Stor-bloom*, *Wormroot*. *Nat. Ord.* Gentianææ. *Class.* Pentandria. *Order.* Monogynia. Indigenous. The root—*Spigelia* (Ph. U. S.)—is celebrated as an anthelmintic, particularly in cases of lumbrici.

It is, also, asserted to have been found serviceable in remittent fever. It is a narcotico-acrid.

Dose, gr. x to ʒss.

SPIGNEL, *Æthusa meum*.

SPIKENARD, *Conyza squarrosa*, *Nardus Indica*—*s. American*, *Aralia racemosa*—*s. Small*, *Aralia nudicaulis*—*s. Tree*, *Aralia spinosa*.

SPILANTHES ACMELLA, *Spilanthes acmella*.

SPILAN'THUS ACMEL'LA, *S. ciliata* seu *fimbriata*, *Spilanthes acmella*, *Bidens acmella*, *Acmella*, *Acemella*, *A. Mauritanica*, *Verbesina acmella*, *Balm-leaved Spilanthes*. *Family*, *Corymbifera*. *Sec. Syst.* Syngenesia Polygamia æqualis. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints; given in infusion.

SPILANTHUS, BALM-LEAVED, *Spilanthes acmella*—*s. Ciliata*, *S. acmella*—*s. Fimbriata*, *S. acmella*.

SPILANTHUS OLERA'CEUS, *Spear-leaved Spilanthes*, (F.) *Cresson de Para*. A tincture of the plant has been recommended in toothache.

SPILL, see *Nævus*.

SPILOMA, see *Nævus*.

SPILOSIS, *Epicheosis*—*s. Ephelis*, *Ephelides* *s. Poliosis*, *Poliosis*.

SPILSBURY'S ANTISCORBUTIC DROPS.

An empirical preparation, formed of *hydrag. oxymer.*, *rad. gentian.*, *cort. aurant. sicc.* ʒiij; *antimon. crud.*, *santal. enbr.* ʒi; *spiritus vini rectific.*, *aqna*, ʒvii.

SPINA, 'a thorn' *Spine*, (F.) *Épine*. A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name are:—the *nasal spine*, the *spine of the scapula*, the *spine of the ischium*, the *four iliac spines*, the *palatine spine*, the *maxillary*, the *sphenoid*, &c. The *spine of the back* is the collection of vertebrae constituting the vertebral column.

SPINA, Penis—*s. Acida*, *Oxyæantha Galeni*—*s. Egyptica*, see *Acacia gummi*—*s. Alba*, *Carduus marianus*, *Mespilus oxyæantha*, *Oнопордum acanthium*—*s. Bifida*, *Hydrorachis*—*s. Cervina*, *Rhamnus*—*s. Domestica*, *Rhamnus*—*s. Dorsi*, *Vertebral column*, see *Nasus*—*s. Dorsi introrsum Flexa*, *Lordosis*—*s. Ferrea*, *Pin*—*s. Helmontii*, *Aiguillon*—*s. Hirci*, *Astragalus verus*—*s. Infectoria*, *Rhamnus*—*s. Nodosa*, *Rachitis*.

SPINA VENTOSA, *Spina ventositas*, *Torc'do*, *Fungus Articul'i*, *Ostearthrocac'e*, *Tumor fungosus articuli*, *Lupia junctura*, *Hyperspong'ia*, *Flatus spinæ*, *Arthroac'e*, *Padarthrocac'e*, *White Swelling* (of some,) *Sileral'tio Ossis*, *Cancer Ossis*, *Gangra'na Ossis*, *Exostosis*. A term of no definite meaning, as is obvious from these various words having been considered its synonyms. By some, it is defined to be—a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteo-sarcoma. By others, it is

considered to be a tumour arising from an internal cavity of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes. See, also, *Hydrarthrus*, and *Mollities Ossium*.

SPINA VERTEBRALIS, *Vertebral column*.

SPINACH, *Spinacia*.

SPINACHIA, *Spinacia*.

SPINA'CIA, *Spinachia*, *Spinacia oleracea*, *Spin'age*, *Spinach*, (F.) *Épinard*. *Family*, *Atriplicææ*. *Sec. Syst.* Dioecia Pentandria. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

SPINACIA OLERACEA, *Spinacia*.

SPINÆ, Spinous processes—*s. Ventositas*, *Spina ventosa*.

SPINAGE, *Spinacia*.

SPINAL, *Spinal'is*, *Spino'sus*, *Spina'tus*, (F.) *Épinière*, from *spina*, 'the spine.' That which relates to the vertebral column.

SPINAL ARTERIES are two in number, viz: 1. The *posterior spinal*, *Artère médiane postérieure du Rachis*, (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. The *anterior spinal artery*, *A. médiane antérieure*, (Ch.,) is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spinal Arteries* or *Rachidian Arteries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

SPINAL CORD, *Medulla spinalis*.

SPINAL FORAM'INA, (F.) *Trous rachidiens*, in the abstract, are the foramina formed by every two contiguous vertebrae, through which the spinal nerves issue. See *Vertebral*. The term *Foramen Spina'te* is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Foramen sphenoid'sum*, (F.) *Trou Sphéno-épineux* ou *petit rond*, *Trou épineux*.

SPINAL IRRITATIO, *Rachialg'itis*, *Rachial'gia*, *Neural'gia spina'lis*, *Notal'gia*. A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebrae, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however, by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counter-irritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revealing impression on a very sensible portion of the cutaneous surface.

SPINAL NERVE, *Accessory of the Par vagum* or *8th pair*, *Accessory nerve of Willis*, *Spinal Accessory*, *Spino-cranio-trapézien*, *Superior respiratory N.*, *Elerenth pair of cephalic nerves*, *Tra-chélo-dorsal* (Ch.), arises from the medulla spi-

nalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleido-mastoidens, to which it gives filaments, and losing itself entirely on the trapezius muscle. The pneumogastric and spinal accessory nerves together—*nervus vagus cum accessorio*—resemble the spinal nerves; the former, with its ganglion, being the posterior root; the latter, the anterior.

SPINAL NERVES, Vertebral nerves—s. Prolongation, Medulla spinalis.

SPINAL SYSTEM OF NERVES, see Nerves.

SPINALES COLLI MINORES, Interspinales colli—s. et Transversales lumborum, Transversalis dorsi.

SPINALIS CERVICIS, Semi-spinalis colli—s. Colli, Semi-spinalis colli.

SPINALIS DORSI, *Grand épineux du dos, Spinalis Dorsi major*. Winslow calls thus some fleshy fasciculi, which are situate on the lateral surfaces of the spinous processes; from the third dorsal vertebra to the first or second lumbar; and which form part of the transverso-spinalis of most authors. The same anatomist calls—*Spinalis Dorsi minor, Petit épineux du dos*—some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to the other. Like the preceding, they form part of the transverso-spinalis. All these fleshy fasciculi strengthen the vertebral column.

SPINATI, Interspinales colli.

SPINATUS, Spinal.

SPINDLE TREE, *Euonymus Americanus*.

SPINE, Vertebral column—s. Curvature of the, Gibbositatis—s. Hæmal, Sternum—s. Neural, Spinous process.

SPINI-AXOIDO-OCCIPITALIS, *Rectus capitis posticus major*—s. *Axoido-trachelii-atloïdien*, *Obliquus inferior capitis*.

SPINITIS, Myelitis.

SPINO-DORSITIS, Myelitis.

SPINOLA, see *Hydrorachis*.

SPINOSUS, Spinal.

SPINOUS, *Spinosus*, (F.) *Épineux*. Having the shape of a spine or thorn.

SPINOUS PROCESSES OR APOPHYSES of the *Vertebra, Acanthæ, Spinæ, Cynolophoi, Neural Spines* of Mr. Owen, (F.) *Apophyses épineuses*, are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See *Vertebra*.

SPIRAC'ULA, (F.) *Spiracules*, from *spiro*, 'I breathe.' Respiratory pores of the skin.

SPIRÆ CEREBRI, Convolutions, cerebral.

SPIRÆ DENUDATA, S. ulmaria.

SPIRÆA FILIPEN'DULA, *Filipendula, Saxifraga rubra, Dropwort*, (F.) *Filipendule*. Family, Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

SPIRÆA TOMENTOSA, *Hardhack, Red meadow-sweet, Steeple bush, Rosy bush, White leaf*. This indigenous species, which is abundant in the northern States of the Union, is tonic and astringent; and is usually administered either in the form of extract or decoction, (*Spirææ* ʒss; aquæ Oj.)

SPIRÆA TRIFOLIATA, *Gillenia trifoliata*.

SPIRÆA ULMA'RIA, *S. demda'ta, Ulmaria, U. palus-tris, Regi'na Prati, Barba capræ, Meadow Sweet, Queen of the Meadows, Bar'bula capri'na*, (F.) *Ulmairé, Reine des Prés*. The leaves have

been recommended as mild astringents:—the flowers as antispasmodics and diaphoretics.

SPIRAMENTA PULMONUM, see *Pulmo*.

SPIRAMENTUM ANIMÆ, *Pulmo*.

SPIRAMINA PALPEBRARUM, *Lachrymal puncta*—s. *Pulmonum*, see *Pulmo*.

SPIRATIO, Respiration.

SPIRIT, *Spir'itus*; from *spirare*, 'to exhale;' (F.) *Esprit*. A name given to every liquid product of distillation. Spirits were formerly distinguished into—*inflammable, acid, and alkaline*; and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief:

*Arrack*. Distilled from coarse palm sugar, named jaggery, fermented with the bark of the *Mimosa leucophlea*; also from rice and the fermented juice of the Palm; made in India. Its varieties are:—

1. *Mahwah Arrack*. Made in India from the flowers of the *Madhuca* tree, *Bassia butyracea*.

2. *Tuba*. Made from palm wine, in the Philippine Islands.

*Araka*. Distilled, by the Tartars, from koumis, fermented mares' milk.

*Araki*. Distilled from dates, by the Egyptians.

*Arika*. A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

*Brandy*. Distilled from wine, figs, peaches, persimmon, apple, mulberries, and sometimes other fruits, in Europe, Asia, North and South America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are—

1. *Aguardiente*, (S.) In Peru, the common brandy obtained from grapes is the *Aguardiente de Pisco*, so called, because shipped at the port of Pisco. Another kind, much dearer, and of excellent flavour, is made from Muscatel grapes, and is called *Aguardiente de Italia*. It is sometimes seen in the United States.

2. *Lan*. Made from rice, in Siam.

3. *Rakia*. Made in Dalmatia from the husks of grapes mixed with aromatics.

4. *Rossolio*. Made at Dantzic, from a compound of brandy, rossolis, and other plants.

5. *Troster*. Made on the Rhine, from the husks of grapes, fermented with barley and rye.

6. *Sekis-kayavodka*. Made from the lees of wine and fruit at Scio.

*Geneva Hollands*, (*genèvre*, French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

*Gin*. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

*Goldwasser*. Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

*Kirschwasser*. Distilled from the Malacheb cherry, in Switzerland.

*Maraschino*. Distilled from the Macarska cherry, at Zara, the capital of Dalmatia.

*Rum*, (supposed to be derived from the terminal syllable of the word *saccharum*: but the aboriginal Americans call this liquor Rum.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple-sugar. Its variety is—

*Slatkaia trava*. Made in Kamschatka, from a sweet grass.

*Show-choo*. Distilled, in China, from the lees of mandarin, a wine made from boiled rice.

*Whisky*, (supposed to be derived from *usque*, the first two syllables of *usquebagh*, the original name in Ireland.) Distilled, in Scotland and Ire-

land, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes. In Ireland it was called *buil-ceann*, or madness of the head. The best Scotch whisky is *Glennivett*, the best Irish, *Emishoween*.

*Y-ter-a.* Distilled, in the Sandwich Islands, from the root of the Tee-root, baked, pounded, and fermented.

To these may be added an intoxicating liquor made by the Affghanistans, from ewes' milk; and that made in Kantschatka, from a species of mushroom, named *muchmer*.

**SPIRIT OF ANISEED**, *Spiritus anisi*.—s. Bathing, Freeman's, see *Linimentum saponis compos.*—s. Bathing, Jackson's, see *Linimentum saponis compos.*—s. Bezoardic of Bussius, see *Bussii spiritus Bezoardicus*.—s. Bone, *Liquor volatilis cornu cervi*.—s. of Burrhus, *Burrhi spiritus matricialis*.—s. of Carraway, *Spiritus carui*.—s. of Ether, aromatic, *Spiritus ætheris aromaticus*.—s. Fuming, of Beguin, *Ammonia sulphuretum*.—s. Fuming, of Boyle, *Ammonia sulphuretum*.—s. of Harts-horn, *Liquor cornu cervi*.—s. of Horseradish, compound, *Spiritus armoraciae compositus*.—s. of Lavender, *Spiritus lavandulæ*.—s. of Lavender, compound, *Spiritus lavandulæ compositus*.—s. of Mindererus, *Liquor ammonia acetatis*.—s. of Nitre, sweet, *Spiritus ætheris nitrici*.—s. of Nitric ether, *Spiritus ætheris nitrici*.—s. of Pennyroyal, *Spiritus pulegii*.—s. of Peppermint, *Spiritus menthae piperitæ*.—s. Proof, *Spiritus tenuior*.—s. of Salt, *Muriaticum acidum*.—s. of Scurveygrass, golden, see *Spiritus armoraciae compositus*.—s. of Spearmint, *Spiritus menthae viridis*.—s. of Sulphuric ether, *Spiritus ætheris sulphurici*.—s. of Sulphuric ether, compound, *Spiritus ætheris sulphurici compositus*.—s. of Turpentine, *Oleum terebinthina rectificatum*.—s. Verdigris, *Acetium acidum*.—s. of Vitriol, *Sulphuric acid*.—s. of Wine and camphor, *Spiritus camphoræ*.

**SPIRITS, ANIMAL**, Nervous fluid.

**SPIRITUOUS**, Alcoholic.

**SPIRITUS**, Breath, Life, Respiration, Spirit.—s. *Æthereus nitrosus*, *Spiritus ætheris nitrici*.—s. *Æthereus vitriolicus*, *Spiritus ætheris sulphurici*.

**SPIRITUS ÆTHERIS AROMATICUS**, *Æther Sulphuricus cum alcoholæ aromaticis*, *Æther vitriolici dulcis*, *Sweet Elixir of Vitriol*, *Vigani's Elixir of Vitriol*, *Aromatic Spirit of Ether*. (*Cinnamon*, *cort.* contus.  $\mathfrak{z}\text{ij}$ . *cardam.* *sem.* contus.  $\mathfrak{z}\text{ss}$ . *piperis longi fruct.* cont., *zingib.* *rad.* concis., *siug.*  $\mathfrak{z}\text{j}$ . *spiritus ætheris sulphuric.* *Oj*. Macerate, for 14 days, in a stopped glass vessel and strain. *Ph. L.*) It is used as a stimulant in nervous affections. Dose,  $\mathfrak{f}\mathfrak{z}\text{ss}$  to  $\mathfrak{f}\mathfrak{z}\text{j}$ .

**SPIRITUS ÆTHERIS NITRICI**, *Sp. Ætheris nitrosi*, *Sp. nitri dulcis*, *Sp. Æthereus nitrosus*, *Sweet Spirit of Nitre*, *Nitre drops*, *Æther nitricus alcoholatus*, *Spirit of Nitric Ether*. (*Nitrate of Potassa*, in coarse powder,  $\text{lb}\text{ij}$ , *Sulphuric acid*,  $\text{lb}\text{ss}$ ; *Alcohol*, *Oixss*; *Diluted Alcohol*, *Oj*; *Carbonate of Potassa*,  $\mathfrak{z}\text{j}$ . Mix the nitrate of potassa and the alcohol in a large glass retort, and having gradually poured in the acid, digest with a gentle heat for two hours; then raise the heat, and distil a gallon. To the distilled liquor add the diluted alcohol and carbonate of potassa, and again distil a gallon.—*Ph. U. S.*) It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, *gtt.*  $\text{xxv}$  to  $\mathfrak{z}\text{j}$ . Specific gravity, 0.834.

**SPIRITUS ÆTHERIS SULPHURICI**, *Æther Sulphuricus cum Alcoholæ*, *Liquor Æthereus Sulphuricus*, *Spiritus Vitrioli dulcis*, *Spiritus Ætheris vitriolici*, *Liquor Sulphuricus alcoholatus*, *Spirit of Sulphuric Ether*. (*Æther sulphuric.* *Oss*; *sp. rec.* *Oj*. *Mix.* *Ph. L.*) Stimulant,

diaphoretic, diuretic, and antispasmodic. Dose,  $\mathfrak{f}\mathfrak{z}\text{ss}$  to  $\mathfrak{f}\mathfrak{z}\text{ij}$ .

**SPIRITUS ÆTHERIS SULPHURICI COMPOSITUS**, (*Ph. U. S.* 1842), *Sp. ætheris vitriolici compositus*, *Spiritus Ætheris compositus* (*Ph. U. S.* 1851), *Liquor auroyunn Hoffmanni*, *Compound Spirit of Sulphuric Ether*, *Hoffmann's Auodyne Lignor*. (*Æther Sulphuric.* *Oss*; *Alcohol*, *Oj*; *Ol. Æther.*  $\mathfrak{f}\mathfrak{z}\text{ij}$ . *Ph. U. S. Ph. L.*) *Mix.* A stimulant and antispasmodic. Specific gravity, 0.816.

**SPIRITUS ÆTHERIS VITRIOLICI COMPOSITUS**, *Spiritus ætheris sulphuric.* *comp.*

**SPIRITUS AMMONIÆ**, *Alkali ammoniacum spirituosum*, *Alcohol ammoniacum*, *Sp. salis ammoniaci*, *Ammoniacæ alcoholisata*, *Liquor ammoniaci vinosus*, *L. ammonia spirituosus*, *Lixivium ammoniacalè vinosum*, *Spiritus salis ammoniaci vinosus* seu *dulcis* seu *dulcificatus*, *Solutio subcarbonatis ammoniaci spirituosæ*, (*F.*) *Esprit d'ammoniaque*. (*Ammon. muriat.* in pulv. subtilissim., *calcis*,  $\text{ãã}$   $\text{lb}\text{j}$ ; *alcohol.*  $\mathfrak{f}\mathfrak{z}\text{xx}$ ; *aquæ*,  $\mathfrak{f}\mathfrak{z}\text{ix}$ . The water is employed to slake the lime; the muriate of ammonia is then well mixed with it, and by means of heat, the ammonia is made to pass into the distilled water contained in a quart bottle. *Ph. U. S.*) Stimulant and antispasmodic. Dose,  $\mathfrak{f}\mathfrak{z}\text{ss}$  to  $\mathfrak{f}\mathfrak{z}\text{j}$ .

**SPIRITUS AMMONIÆ AROMATICUS**, *Alcohol ammoniacum aromaticum*, *Aromatic ammonia ted Alcohol*, *Sal volatîle Drops*, *Spiritus salis volatilis oleosus*, *Sp. volatilis aromaticus*, *Sal volatile oleosum Sylviæ*, *Sp. ammonia compositus*, *Tinctura aromatica ammoniata*, *Liquor oleosus Sylviæ*, *Lixivium ammoniacalè aromaticum*. (*Ammon. muriat.*  $\mathfrak{z}\text{v}$ ; *Potass. carb.*  $\mathfrak{z}\text{viij}$ , *cinnam.* cont., *caryophyll.* cont.  $\text{ãã}$   $\mathfrak{z}\text{ij}$ ; *Limon. cort.*  $\mathfrak{z}\text{iv}$ ; *alcohol.*, *aquæ*  $\text{ãã}$ , *Ov. M.* *Distil Ovijs.* Stimulant. Dose,  $\mathfrak{f}\mathfrak{z}\text{ss}$  to  $\mathfrak{f}\mathfrak{z}\text{j}$ .

**SPIRITUS AMMONIÆ COMPOSITUS**, *Spiritus aromaticus*.

**SPIRITUS AMMONIÆ FÆTIDUS**, *Sp. volatilis fetidus*, *Fet Drops*, *Alcohol ammoniacum fetidum*, *Tinctura asafetide ammoniata*, *Fetid Spirit of Ammonia*. (*Sp. ammonia Oij*, *asafetide*  $\mathfrak{z}\text{ij}$ . Macerate for 12 hours, and distil *Oiss.* *Ph. L.*) Stimulant and antispasmodic. Dose,  $\mathfrak{f}\mathfrak{z}\text{ss}$  to  $\mathfrak{f}\mathfrak{z}\text{j}$ .

**SPIRITUS AMMONIÆ SUCCINATUS**, *Succinated Spirit of Ammonia*, *Common Elix de Luce*, *Ammoniacum succinatum*, *Aqua Lucis*, *Liquor ex Ammonia et Oleo Succini*, *Liquor calcicans*, *Spiritus Ammonia cum Succino*, *Sp. Salis Ammoniacæ lactescens seu lactis*. (*Mastich.*  $\mathfrak{z}\text{ij}$ , *sp. rect.*  $\mathfrak{f}\mathfrak{z}\text{ix}$ , *ol. lavand.* *gtt.*  $\text{xiv}$ , *ol. succin.* *gtt.*  $\text{iv}$  *liq. ammon.*  $\mathfrak{f}\mathfrak{z}\text{x}$ . Macerate the mastich in the alcohol, and pour off the clear tincture: add the rest and shake. *Ph. L.*) Stimulant and antispasmodic. Dose, *gtt.*  $\text{x}$  to  $\mathfrak{f}\mathfrak{z}\text{ss}$ , or  $\mathfrak{f}\mathfrak{z}\text{j}$ .

**SPIRITUS ANIMALES**, see Nervous fluid.

**SPIRITUS ANISI**, *Spiritus Anisi compositus*, *Aqua anisi fortis*, *Aqua Seminum Anisi composita*, *Spirit of Aniseed*, (*F.*) *Esprit d'anis*. (*Anisi sem.* cont.  $\text{lb}\text{ss}$ , *spirit tenuior.* *cong.*, *aquæ* quod satis sit ad prohibendum empyreuma. *Ph. L.*) Carminative. Dose,  $\mathfrak{f}\mathfrak{z}\text{ss}$  to  $\mathfrak{f}\mathfrak{z}\text{ss}$ . In the compound spirit, angelica is usually an ingredient.

**SPIRITUS ANTHOS**, *Spiritus rosmarini*.

**SPIRITUS ARMORACIÆ COMPOSITUS**, *Sp. Raphani compositus*, *Aqua Raphani composita*, *Compound Spirit of Horseradish*, (*F.*) *Esprit de raifort composé*. (*Armorac. rad.* *recent.* *concis.*, *aurant.* *cort.* *exsicce.*, *sing.*  $\text{lb}\text{j}$ , *myrist.* *unc.* contus.  $\mathfrak{z}\text{ss}$ , *spirit. ten.* *cong.* *aquæ*  $\text{q. s.}$  ad prohibendum empyreuma. *Ph. L.*) Stimulant and antiscorbutic. (?) Dose,  $\mathfrak{f}\mathfrak{z}\text{j}$ , to  $\mathfrak{f}\mathfrak{z}\text{iv}$ .

The Golden Spirit of Scurvey grass—an empirical preparation—is formed by adding *gamboge*  $\mathfrak{z}\text{v}\mathfrak{ij}$ , to one gallon of the *sp. armoraciae compositus*.

*Greenough's Tincture for the teeth*, is formed of amygd. amar. ℥ij, lig. Dresil., cassia bac., āā ℥iv, irid. Florent. ℥ij, coccinell., sal. acetosellā, alum. āā ℥j, sp. vin. rect. Oij, sp. armoraciā comp. f℥ss.

**SPIRITUS BEGUINIS**, Ammoniae sulphuretum — s. Bellidis, see Osmitopsis asteriscoides.

**SPIRITUS CAMPHORÆ**, *Sp. camphoratus*, *Sp. vino'sus camphoratus*, *Tinctura Camphoræ*, (Ph. U. S.) *Spirit of Wine and Camphor*, *Spirit of Camphor*, (F.) *Esprit de Camphre*, *Alcool camphré*, *Eau de Vie camphrée*. (Camphor. ℥iv, alcohol. Oij. Dissolve.) Stimulant, anodyne and discutient. Used only externally.

**SPIRITUS CARUI**, *Sp. Cari Carui*, *Spirit of Carraçay*, *Aqua Seminum Carui fortis*, *A. Seminum Carui*, *Strong Carui Waters*, (F.) *Esprit de Carui*. (Carui sem. cont. lbss, sp. tenuior. cong., aquæ q. s. Distil a gallon. Ph. L.) Carminative. Dose, f℥j to f℥ss.

**SPIRITUS CINNAMOMI**, *Sp. Lauri Cinnamomi*, *Spirit of Cinamon*, *Aqua Cinnamomi fortis*, *Aqua Cinnam. spiritu'sa*, *Strong Cinnamon Water*, (F.) *Esprit de Cannelle*. (Cort. cinnam. ℥v, sp. rect. Oivss.) Stimulant and carminative. Dose, f℥j to f℥ss.

**SPIRITUS COLCHICI AMMONIATVS**, *Ammoniated Spirit of Colchicum*. (Sem. colchic. cont. ℥ij, sp. ammon. aromat. Oj. Ph. L.) Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from grt. xxx to f℥j.

**SPIRITUS CORNU CERVI**, *Liquor C. C.* — s. *Fumans Beguini*, *Ammonia sulphuretum* — s. *Genitalis*, *Aura seminis*.

**SPIRITUS JUNIPERI COMPOSITVS**, *Compound Spirit of Juniper*, *Aqua Juniperi composita*, (F.) *Esprit de genièvre composé*. (Ol. junip. ℥iss, Ol. carni, Ol. fenicul., āā ℥x; Alcohol dilut. cong. Solve. Ph. U. S.) Stimulant and diuretic. Dose, f℥j to f℥ss.

**SPIRITUS LAURI CINNAMOMI**, *Spiritus cinnamomi*.

**SPIRITUS LAVANDULÆ**, *Sp. Lavandulæ spicæ*, *Spirit of Lavender*, *Sp. Lavand. simpl.*, *Lavender Water*, (F.) *Esprit de Lavande*. (Lavand. recent. lbij, Alcohol. cong., aquæ Oij. Distil a gallon.) Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

**SPIRITUS LAVANDULÆ COMPOSITVS**, *Tinctura Lavandulæ composita*, *Red Hartshorn*, *Lavender drops*, *Compound Spirit of Lavender*, (F.) *Esprit de Lavande composé*. (Sp. Lavand. Oijj, sp. rosmarin. Oj, cinnam. contus. ℥j, myristic. cont. ℥ss. caryophyll. cont. ℥ij, santali conc. ℥ij. Macerate for 14 days, and filter through paper. Stimulant. Dose, grt. xl to f℥ij.

**SPIRITUS LETHALIS**, *Carbonic acid* — s. *Lumbricorum*, *Liquor volatilis cornu cervi*.

**SPIRITUS MENTHÆ PIPERITÆ**, *Spirit of Peppermint*, *Aqua Menthæ piperitidis spiritu'sa*, *Sp. Menthæ piperitidis* (F.) *Esprit de Menthe poivrée*. (Olei menth. pip. ℥vjss, sp. rectif. Oivss, aquæ, q. s. distil a gallon. Ph. L.) Carminative and stimulant. Dose, f℥ss to f℥ij.

**SPIRITUS MENTHÆ SATIVÆ**, *Spiritus menthæ viridis*.

**SPIRITUS MENTHÆ VIRIDIS**, *Spearmint*, *Spiritus menthæ sativæ*, *Aqua Menthæ vulgaris spiritu'sa*, (F.) *Esprit de Menthe verte*. (Olei Menth. virid. ℥vjss, sp. rectif. Oivss, aq. q. s. Distil a gallon. Ph. L.) Like the last in properties and dose.

**SPIRITUS MILLEPEDARUM**, *Liquor cornu cervi*.

**SPIRITUS MYRSITICÆ**, *Spiritus Myrsiticæ Moschatæ*, *Sp. Nucis Moschatæ*, *Aqua Nucis Moschatæ*, *Nutmeg Water*, *Aqua Nephriticæ*, (F.)

*Esprit de Muscade*. (Myrist. cont. ℥ij, Alcohol. dil. cong., aquæ Oj. Distil a gallon.) Cordial and carminative. Dose, f℥j to f℥iv.

**SPIRITUS MYRTI PIMENTÆ**, *Spiritus pimentæ* — s. *Nitri acidus*, *Nitric acid* — s. *Nitri dulcis*, *Spiritus ætheris nitrici* — s. *Nitri duplex*, *Nitric acid* — s. *Nitri fumans*, *Nitric acid* — s. *Nitri Glauberi*, *Nitric acid* — s. *Nitri simplex*, see *Nitric acid* — s. *Nitri vulgaris*, see *Nitric acid* — s. *Nucis moschatæ*, *Spiritus myrsiticæ* — s. *Ophthalmicus Mindereri*, *Liquor ammoniæ acetatis*.

**SPIRITUS PIMENTÆ**, *Sp. Myrti Pimentæ*, *Spiritus Pimento*, *Spirit of Pimento*, *Aqua Mirabilis*. (Ol. Piment. f. ℥ij, Alcohol. dilut. cong. Solve. Ph. U. S.) Cordial and carminative. Dose, f℥j to f℥iv.

**SPIRITUS PULEGII**, *Spirit of Pennyroyal*, *Aqua Pulegii spiritu'sa*, *Spiritu'sus Pennyroyal Water*, (F.) *Esprit de Pouliot*. (Olei pulegii ℥vij, sp. rect. Oivss, aquæ, q. s. Distil a gallon. Ph. L.) Same as spirit of spearmint in properties and dose.

**SPIRITUS PYRO-ACETICVS**, *Acetone*.

**SPIRITUS RECTIFICATVS**, *Sp. Vini rectificatus*, *Ænostagma*, *Æneleum*, *Pyroænis*, *Sp. Vinosus rectificatus*, *Alcohol*, *A. Vini*, *Spirit of Wine*, (F.) *Esprit de Vin rectifié*. Rectified spirit is much used in Pharmacy to dissolve resinous and other substances. It is seldom exhibited internally; although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient. — S. g., according to the London Pharmacopœia, 0.838; according to that of Dublin, 0.840; of Edinburgh and United States, 0.835, (see Alcohol,) and of Paris, 0.819 to 0.827.

**SPIRITUS RECTOR**, *Aroma* — s. *Raphani compositus*, *Spiritus armoraciæ compositus*.

**SPIRITUS ROSMARINI**, *Sp. Rosmarini officinalis*, *Spirit of Rosemary*, *Spiritus Anthos*, *Hungary Water*, (F.) *Esprit de Romarin*. (Ol. rosmarinii ℥iv, Alcohol. cong. Solve. Ph. U. S.) Stimulant. Dose, f℥j to f℥iv.

**SPIRITUS SALIS ACIDVS seu FUMANS**, *Muriaticum acidum* — s. *Salis ammoniaci*, *Spiritus ammoniæ* — s. *Salis ammoniaci aquosus*, *Liquor ammoniæ* — s. *Salis ammoniaci lactescens seu lacteus*, *Spiritus ammoniæ succinatus* — s. *Salis ammoniaci sulphuratus*, *Ammonia sulphuretum* — s. *Salis Glauberi*, *Muriaticum acidum* — s. *Salis marini*, *Muriaticum acidum* — s. *Salis marini coagulatus*, *Potassæ murias* — s. *Salis volatilis oleosus*, *Spiritus ammoniæ aromaticus* — s. *Sulphurico-æthereus camphoratus*, *Tinctura ætherea composita* — s. *Sulphurico-æthereus martialis*, *Tinctura seu Alcohol sulphurico-æthereus ferri* — s. *Sulphuris*, *Sulphurous acid* — s. *Sulphuris per campanam*, *Sulphurous acid* — s. *Sulphuris volatilis*, *Ammonia sulphuretum* — s. *Sulphurous volatilis*, *Sulphurous acid*.

**SPIRITUS TENUIOR**, *Alcohol dilutum*, *Spiritus vino'sus tenuior*, *Proof Spirit* (F.) *Esprit de vin délayé*. Generally made for pharmaceutical purposes, by mixing equal parts of rectified spirit and water. S. g. Lond. 0.920; Edinb. and United States, 0.935. It is employed in the same cases as those in which the alcohol is used: — chiefly, as a solvent of vegetable matters, in the form of tinctures.

**SPIRITUS VENERIS**, *Aceticum acidum* — s. *Vini rectificatus*, *Spiritus rectificatus* — s. *Vinosus camphoratus*, *Spiritus camphoræ* — s. *Vinosus tenuior*, *Spiritus tenuior* — s. *Vitalis*, *Nervous fluid* — s. *Vitrioli*, *Sulphuric acid* — s. *Vitrioli acidus Vogleri*, *Sulphuricum acidum dilutum* — s. *Vitrioli coagulatus Mynsichti*, *Potassæ sulphas* — s. *Vitrioli dulcis*, *Spiritus ætheris sulphurici* — s. *Vitrioli phlogisticatus*, *Sulphurous acid* — s. *Volatilis*

aromatius, Spiritus ammoniæ aromaticus—s. Volatilis foetidus, Spiritus ammoniæ foetidus.

SPIROID CANAL, Aquæductus Fallopii.

SPIROMETER; badly compounded from *spiro*, 'I breathe,' and *μετρον*, 'a measure':—properly *Anapnom'eter*, *Pneusm'eter*, *Pneunom'eter*, *Pneumatom'eter*. Any instrument for measuring the quantity of air concerned in respiration, and, consequently, the capacity of the lungs.

SPIROPTERA HOMINIS, see Worms.

SPISSANTIA, Incrassantia.

SPIT, Sputum.

SPI'RAL, MINERAL WATERS OF. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

SPITH'AMA, *Dorans*. A measure of twelve fingers' breadth.

SPITTING, Exspuition.

SPITTLE, Saliva—s. Sweet, see Salivation.

SPLANCHNA, Entrails.

SPLANCHNECTOP'IA, *Splanchnodias'tasis*. *Situs perver'sus seu anom'alus intestino'rnm*; from *σπλαγχνον*, 'an intestine,' *εκ*, 'out of,' and *τοπος*, 'place.' Misplacement or ectopia of the intestines.

SPLANCHNELMINTHA, Worms.

SPLANCHNEURYS'MA, from *σπλαγχνον*, 'an intestine,' and *ευρυνω*, 'I dilate.' Morbid dilatation of the intestines.

SPLANCHNIC, *Splanch'nicus*, *Vis'ceral*, from *σπλαγχνον*, 'viscus.' Relating or belonging to the viscera.

SPLANCHNIC CAV'ITIES are the three great cavities of the body;—those of the cranium, chest, and abdomen.

SPLANCHNIC NERVES belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. The *great splanchnic nerve*, (F.) *Grand splan'al* (Ch.), Its roots—four or five in number, come from the 6th, 7th, 8th, 9th, and sometimes the 10th, thoracic ganglia. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The *lesser splanchnic nerve*, *Renal nerve*, (F.) *Splanchnique accessoire* of Walther, *Petit splan'al*, (Ch.,) is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglion, which unite on the 12th dorsal vertebra into a cord, that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

SPLANCH'NICA. Medicines adapted to diseases of the bowels. Also, the 2d order of the class *Callicæ* of Good; defined,—diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

SPLANCHNODIASTASIS, Splanchnectopia.

SPLANCHNOD'YNE, from *σπλαγχνον*, 'a viscus,' and *οδονη*, 'pain.' Pain in the bowels.

SPLANCHNOGRAPHIA, Splanchnography.

SPLANCHNOGRAPHY, *Splanchnogra'phia*, from *σπλαγχνον*, 'a viscus,' and *λογος*, 'a description.' The part of anatomy which treats of the viscera.

SPLANCHNOLITH'ASIS; from *σπλαγχνον*, 'a viscus,' and *λιθος*, 'a stone.' The formation of a calculous concretion in any viscus.

SPLANCHNOL'OGY, *Splanchnolog'ia*, from *σπλαγχνον*, 'a viscus,' and *λογος*, 'a discourse.' A treatise on the viscera:—also, Splanchnography.

SPLANCHNOPATHI'A, from *σπλαγχνον*, 'a viscus,' and *παθος*, 'suffering.' A disease of the intestines.

SPLANCHNOSCLERO'SIS, from *σπλαγχνον*, 'a viscus,' and *σκληρος*, 'hard.' Induration of a viscus.

SPLANCHNOT'OMY, *Splanchnotom'ia*, *Splanchnot'omē*, from *σπλαγχνον*, 'a viscus,' and *τεμνω*, 'I cut.' Dissection or anatomy of the viscera.

SPLAYFOOT, see Kylosis.

SPLEEN, *Lien*, *Hepar sinis'trum* seu *adulte'rimum*, (F.) *Rate*. A soft, spongy, parenchymatous organ; of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is 4½ inches; its thickness 2½; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations—*splenic corpuscles* or *Malpighian bodies* of the spleen. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations—*trabeculae*. At its inner edge is a fissure, by which the vessels and nerves enter the organ. The functions of the spleen are unknown. One of the latest opinions is, that it belongs to the lymphatic system; and acts as a diverticulum to the vascular system.

SPLEEN, Hypochondriasis—s. Malpighian bodies of the, see Spleen—s. Supernumerary, Lien-eulus.

SPLEENWORT, *Asplenium*, A. filix fœmina, *Asplenium scolopendrium*—s. Bush, *Comptonia asplenifolia*.

SPLENAL'GIA, *Neural'gia lie'nis*, *Sple'nicæ*, *Splenody'n'ia*, from *σπλην*, 'the spleen,' and *αλγος*, 'pain.' Pain in the spleen.

SPLENALGIA BENGALENSIS, see Cachexia, splenic—s. Phlegmonæa, Splentitis—s. Subinflammatoria chronica, Splenoneus.

SPLENATROPH'IA, *Atroph'ia lie'nis*, from *σπλην*, 'spleen,' and *atroph'ia*, 'atrophy.' Wasting or atrophy of the spleen.

SPLENAUXE, Splenoneus.

SPLENECTAMA, Splenoparectama.

SPLENECTASIS, Splenoparectama.

SPLENECTOM'IA, *Splenect'omē*, from *σπλην*, 'the spleen,' *εκ*, 'out of,' and *τεμνω*, 'I cut.' Extirpation of the spleen.

SPLENECTOP'IA, *Disloc'tio lie'nis* seu *sple'nis*; from *σπλην*, 'the spleen,' and *εκτοπος*, 'out of place.' Dislocation of the spleen. Not a common occurrence.

SPLENEMPHIRAX'IS, *Splenophrae'cia*, from *σπλην*, 'the spleen,' and *εμ'φρασσω*, 'I obstruct.' Obstruction of the spleen.—Vogel. See Splenonecus.

SPLENES, Hypochondriasis.

SPLENET'ICUS, *Sple'nicus*, *Splenit'icus*, *Lien'osus*, (F.) *Rat'ileux*. That which relates to the spleen: one labouring under diseased spleen. A medicine adapted for diseases of the spleen.

SPLENIC, *Sple'nicus*, *Sple'nium*, from *σπλην*, 'the spleen.' That which relates to the spleen.

**SPLENIC ARTERY.** It arises from the cœliacæ; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *vasa brevia*.

**SPLENIC CACHEXIA,** see Cachexia splenica—s. Corpuscles, see Spleen.

**SPLENIC PLEXUS** is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

**SPLENIC VEIN** arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the *vasa brevia*, the right and left gastro-epiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

**SPLENICA, Splenalgia.** Also, medicines which affect the spleen.—Pereira.

**SPLENICUS, Spleneticus, Splenic.**

**SPLENIOLA, Compress.**

**SPLENIS TUMOR, Ague cake.**

**SPLENISATION, Splenization.**

**SPLENISCUS, Compress.**

**SPLENITICUS, Splenic.**

**SPLENITIS,** from *σπλην*, 'the spleen,' and *itis*, denoting inflammation. Inflammation of the spleen. *Empres'ma splenitis, Inflammat'io lie'nis, I. splenis, Splen'al'gia phlegmono'dea,* (F.) *Inflammation de la Rate.* A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by suppuration. It must be treated like other inflammations.

**SPLENIUM, Compress**—s. *Corporis Callosi,* see *Corpus callosum*—s. *Cruciatum, Croix de Malte.*

**SPLENIUS, S. Cap'itis, S. Colli,** (F.) *Cervico-dorso-mastoidien et dorso-trachélien, Cervico-mastoidien* (Ch.), *Posterior mastoid muscle.* So called from its resemblance to the spleen of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebrae; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebrae, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli,* and *Splenius cap'itis.* The splenius extends the head, inclines it, and rotates it. If the splenii of each side act together, they extend the head.

**SPLENIZATION, Splenizatio,** (F.) *Splénisation,* from *σπλην*, 'the spleen.' A term applied to the state of the lung in the first or second stage of pneumonia in which its tissue resembles that of the spleen.

**SPLENOCE'LE, Her'nia liend'lis,** from *σπλην*, 'the spleen,' and *κηλη*, 'a tumour.' Hernia formed by the spleen.

**SPLENODYNIA, Splenalgia.**

**SPLENOG'RAPHY, Splenograph'ia,** from *σπλην*, 'the spleen,' and *γραφη*, 'a description.' A description of the spleen.

**SPLENOHÆ'MIA, (F.) Splénohémie,** from *σπλην*, 'the spleen,' and *αίμα*, 'blood.' Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

**SPLENOID, Splenoï'des, Spleno'des,** from *σπλην*, 'spleen,' and *είδος*, 'resemblance.' Spleen-like. Having the appearance of the spleen.

**SPLENOL'OGY, Splenolog'ia,** from *σπλην*, 'the spleen,' and *λογος*, 'a discourse.' A treatise on the spleen.

**SPLENONCIE, Splenonecus.**

**SPLENON'CUS, Megalosple'nia, Hypertroph'ia seu Supernutrit'io splenis seu lie'nis, Intumescen'tia seu Infarc'tus seu Physco'nia lienis, Splen'al'gia subinflammato'ria chron'ica, Splenemphrax'is, Splenau'x'ē, Hypersplenotroph'ia, Lien iugens,** (F.) *Splénocic, Hypertrophie de la Rate;* from *σπλην*, 'the spleen,' and *ογκος*, 'a tumour.' Tumefaction of the spleen. See Ague cake.

**SPLENOPAREC'TAMA, Splenec'tama, Splenoparec'tasis, Splenec'tasis,** from *σπλην*, 'the spleen,' and *περεκταμα*, 'excessive volume.' Excessive enlargement of the spleen.—Ploucquet.

**SPLENOPARECTASIS, Splenoparectama.**

**SPLENOPHRAXIA, Splenemphraxis.**

**SPLENORRHAG'IA,** from *σπλην*, 'the spleen,' and *ραγη*, 'rupture.' Hemorrhage from the spleen.

**SPLENOSCIR'RHUS,** from *σπλην*, 'the spleen,' and *σκιρρος*, 'hardness.' Scirrhous or cancer of the spleen.

**SPLENOT'OMY, Splenotom'ia, Splenot'omē,** from *σπλην*, 'the spleen,' and *τεμνω*, 'I cut.' Dissection of the spleen.

**SPLINT, Teut. Splinter,** from *splijten*, 'to split;' *Hast'la, Ass'ula, Asser'culum, Plag'ula, Narthex, Fer'ula,* (F.) *Attelle, Éclisse.* A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, gutta percha, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

**SPLINTER, (F.) Esquille.** Same etymon. This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation until it is removed,—*Aculeus ligneus,* (F.) *Écharde.*

It is also applied to fragments that separate from a fractured or diseased bone.

**SPLITROCK, Heuchera cortusa.**

**SPIDIUM GRÆCORUM, Album græcum.**

**SPOLIARIUM, Apodyterium.**

**SPO'LIATIVE, Spoliati'va,** from *spolio*, 'I take away.' *Phlebotom'ia spoliati'va,* (F.) *Saignée spoliative.* Blood-letting, used for the purpose of diminishing the mass of blood.

**SPOLIATORIUM, Apodyterium.**

**SPONDYLAL'GIA, Spondylodyn'ia,** from *σπονδυλος*, 'a vertebra,' and *αλγος*, 'pain.' Pain in the vertebrae. *Cacorrhachitis.* See *Vertebral Disease.*

**SPONDYLARTHRI'TIS,** from *σπονδυλος*, 'a vertebra,' *αρθρον*, 'a joint,' and *itis*, denoting inflammation. Gouty or rheumatic inflammation of the spinal column.

**SPONDYLARTHROCE, Vertebral disease.**

**SPONDYLI, Vertebrae.**

**SPONDYLIS, Coccyx.**

**SPONDYLI'TIS, Inflammat'io ver'tebrae,** from *σπονδυλος*, and *itis*, denoting inflammation. Inflammation of the vertebrae.

**SPONDYLIUM, Coccyx, Heracleum spondylium.**

**SPONDYLOCACE, Vertebral disease.**

**SPONDYLODYNIA, Spondylalgia.**

**SPONDYLOPATHI'A,** from *σπονδυλος*, 'a vertebra,' and *παθος*, 'a disease.' A disease of the vertebral column.

**SPONDYLOPYOSIS**, Vertebral disease.

**SPONDYLUS**, *σπονδύλος*. A vertebra; and, especially, the two large cervical vertebrae. Also, the vertex.

**SPONGE**, **BASTARD**, Aleyonium.

**SPONGI**. The tumefied glands of the neck.

**SPONGIA**, *Spongos*, *Sphongus*, *Spongia officinalis*, *Spongia Marina*, *Sponge*, (F.) *Éponge*. An organized marine substance, of the great class of Zoophytes, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed in *surgery*, for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Prepared Sponge* or *Sponge Tent*.

**SPONGIA ASSA**, *S. Usta*—*s. Cynosbati*, Bedegar.

**SPONGIA USTA**, *S. Assa*, *Carbo spongia*, *Burnt Sponge*, contains carbonate and phosphate of lime, carbonate of soda, chareoal, and iodine. It is used in bronchocele, serofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder. — Ph. U. S.

**SPONGIÆ LAPIS**. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

**SPONGIODES**, *Spongiodes*.

**SPONGIOLE**, *Spongium*: from *σπογγιον*, 'a small sponge.' The soft sacculent extremity of the fibrils or true roots of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

**SPONGION**. Ancient name of an epithem made of goats' dung: and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge. — Paulus, *Goræus*.

**SPONGIOSUM (OS)**, Ethmoid bone.

**SPONGIOSUS**, *Spongiosus*.

**SPONGOID**, *Spongoides*, *Spongoides*, *Spongoides*, from *σπογγια*, 'sponge,' and *αἶδος*, 'resemblance.' Resembling sponge. Of the nature of sponge.

**SPONGOID INFLAMMATION**, *Hæmatodes fungus*.

**SPONGOID TISSUE**, (F.) *Tissu spongioïde*. An adventitious spongy tissue, found in cases of rickets. — Guérin.

**SPONGOS**, Tonsil.

**SPONSA SOLIS**, *Calendula officinalis*.

**SPONTANEOUS**, *Spontaneus*, from *sponte*, 'voluntarily.' That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Spontaneous las'itude* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause. *Spontaneous Amputa'tion* is the separation of a limb from the fetus in utero.

**SPONTANEOUS EVOLUTION**, see *Evolution* — *s. Version*. Evolution, *spontaneous*.

**SPONTÉPARITÉ**. Generation, *spontaneous*.

**SPONWOOD**, *Kalmia latifolia*, *Tilia*.

**SPORADIC**, *Sporades*, *Sporad'ici*, *Morbi dispersi*, *Morbi sparsi*, from *σπειρω*, 'to spread.' Diseases so called which supervene indifferently in every season and situation, from acci-

dental causes, and independently of any epidemic or contagious influence.

**SPORE**, *Spor'ule*, *Sporum*, *Spor'ulum*, from *σπειρω*, 'I sow.' The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

**SPORID'IUM**; same etymon. The reproductive body in algaceous plants, which resembles the spore of other plants.

**SPORULE**, Spore.

**SPORUM**, Spore.

**SPOTS, GERMINAL**, see *Molecule*.

**SPOTS, RED**, (F.) *Taches rouges*, *Rose spots*. Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

**SPOTS, ROSE, Spots, red**.

**SPRAIN**, corrupted from *strain*: — *Subluxa'tio*, *Distort'io*, *Dias'trophê*, *Diastrem'ma*, *Luxa'tio imperfecta*, *Ecarthre'ma*, *Ecarthro'sis*, *Strem'ma*, *Thlasma Stremma*; a *wrench*, (F.) *Détorse*, *Entorse*, *Fou lure*. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured. This affection, which has been regarded as incomplete luxation, occurs, particularly, in the ginglymoid joints; — as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support till the parts affected recover their due tone.

**SPRAT, YELLOW-BILLED**, *Clupea thryssa*.

**SPRUCE BEER**, *White Spruce Beer*. A beer made as follows: To 10 gallons of water, add 6 pounds of sugar, and 4 oz. of essence of spruce. Add yeast, and bottle, when ready. It is grateful and antiscorbatic.

**SPRUCE BEER POWDERS** may be formed of white sugar, ℥j, and ℥ij; *soda subcarb.*, gr. xxvj; essence of spruce, gr. x, in each blue paper; and acid of tartar, ℥ss in each white paper. For half a pint of water.

**SPUITO**, Exspuition.

**SPUMA ARGENTI**, *Plumbi oxydum semivitreum*—*s. Cerevisiæ*, *Yest*—*s. Trium draconum*, *Antimonium muriatum*.

**SPUMEUX**, Frothy.

**SPUMOSUS**, Frothy.

**SPUNK**, *Boletus igniarius*.

**SPUR**, *Sax. ppun*, (F.) *Éperon des Artères*. The angle at which the arteries leave a cavity or trunk.

**SPUR**, Ergot.

**SPURGE, CAPER**, *Euphorbia lathyris* — *s. Cypress*, *Euphorbia Cyparissias*—*s. Flax*, *Daphne gnidium* — *s. Flowering*, large, *Euphorbia corollata*—*s. Garden*, *Euphorbia lathyris*—*s. Greater*, *Euphorbia palustris*—*s. Ipecacuanha*, *Euphorbia ipecacuanha* — *s. Laurel*, *Daphne laureola* — *s. Marsh*, *Euphorbia palustris* — *s. Olive*, *Cneorum tricoccon* — *s. Olive*, *Daphne mezereum* — *s. Sea*, *Euphorbia paralias*.

**SPUTA, PRUNE JUICE**, see *Prune Juice*.

**SPUTAMEN**, *Saliva*, *Sputum*.

**SPUTAMENTUM**, *Saliva*, *Sputum*.

**SPUTATIO**, Exspuition.

**SPUTATION**, Exspuition.

**SPUTUM**, Plural, *Sputa*, *Apochrem'ma*, *Chrem'ma*, *Emptys'ma*, *Sputa'men*, *Pty'elion*, *Ptytis'ma*,

*Spit*, from *spuere*, *sputum*, 'to spit.' (F.) *Crachat*. The secretions ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *eruginous*, when of a greenish-yellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *mousseux*, when covered with froth; *rubiginous*, (F.) *rubiginæus* ou *rouillés*, when of a reddish-yellow; and *streaked*, (F.) *striés*, when mixed with lines of blood. Also, saliva.

SPUTUM CREXTUM, Hæmoptysis — s. Dulce, Saccharorrhæa pulmonalis — s. Oris, Salivation — s. Saccharatum, Saccharorrhæa pulmonalis — s. Sanguinis, Hæmoptysis.

SQUALLING, Vagitus.

SQUAMA, Scale, Table.

SQUAME, Scaly diseases.

SQUAMARIA, Plumbago Europæa.

SQUAMEUX, Squamous.

SQUAMIFORMIS, Squamous.

SQUAMOUS, *Squamo'sus*, *Lepidoï'des*, *Lepido'des*, *Squamiformis*, *Scaly*; from *squama*, 'a scale.' That which relates to or resembles a scale.

SQUAMOUS PORTION of the temporal bone, (F.) *Portion squameuse* ou *écailleuse* du *Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale.

SQUAMOUS SUTURE, *Sutu'ra squamo'sa*, *S. mendo'sa* seu *lepidoei'des* seu *lepidoides*, *Sutu'ra cra'ni's squamo'sa*, (F.) *Suture squameuse* ou *écailleuse*. The suture which unites the squamous portion of the temporal bone to the parietal.

Certain *scaly* cutaneous affections are also called *squamons*, (F.) *squameux*. See *Scale*.

SQUARE STALK, *Monarda coccinea*.

SQUAW-MINT, *Hedeoma*.

SQUAW-ROOT, *Actæa racemosa*, *Caulophyllum thalictroides*.

SQUAW-WEED, *Erigeron Philadelphicum*.

SQUEAMISHNESS, *Fastidium cibi*.

SQUEAZINESS, *Nausea*.

SQUELETTE, *Skeleton*.

SQUELETTELOGIE, *Skeletology*.

SQUILL, *Scilla*—s. *Vinegar* of, *Acetum scillæ*.

SQUILLA, *Scilla*.

SQUINANÇIE, *Cynanche*, *Cynanche tonsillar*.

SQUINANCY, COMMON, *Cynanche tonsillar*.

SQUINANTHIA, *Cynanche*.

SQUINANTHUS, *Juncus odoratus*.

SQUINE, *Smilax China*.

SQUINSY, *Cynanche tonsillar*.

SQUINT-EYED, see *Strabismus*.

SQUINTER, see *Strabismus*.

SQUINTING, *Strabismus*.

SQUIRRE, *Scirrhus*.

SQUIRREL CORN, *Dicentra Canadensis*.

SQUIRROGASTRIE, *Scirrhogastria*.

SQUIRRUS, *Scirrhus*.

SQUIRT, *Syringe*.

STACHELBERG, MINERAL WATERS OF. *Stachelberg Springs* are far down in the valley of the Linth, in Switzerland. The waters are sulphureous, and are much visited by gouty and rheumatic invalids.

STACHYS FETIDA, *Galeopsis*.

STACTE, *Myrrha*.

STADE, *Stage*.

STADIUM, *Period*, *Stage*.

STA'DIUM ACMES seu STA'SEOS. The period of the height of a disease.

STA'DIUM ANNIHILATIO'NIS seu CONVALESCENTIAE seu RECONVALESCENTIE. The period of recovery from disease.

STADIUM AUGMEN'TI seu INCREMEN'TI MORBI. The period or stage of increase of a disease.

STADIUM CALORIS, *Stage*, (hot) — s. *Convalescentiæ*, *S. annihilationis*.

STADIUM DECREMEN'TI. The period or stage of decrease of a disease.

STADIUM FRIGORIS, *Stage*, (cold) — s. *Incrementi Morbi*, *S. Augmenti morbi*—s. *Latentis Contagii*, *Prodromus* — s. *Opportunitatis*, *Prodromus* — s. *Prodromorum*, *Prodromus* — s. *Reconvalescentiæ*, *S. Annihilationis*.

STAFF, (D.) *Staf*. An instrument of great importance in lithotomy,—being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAFF TREE, CLIMBING, *Celastrus scandens*.

STAFFA, *Stapes*.

STAG'S PIZZLE, see *Cervus*.

STAGE, *Sta'dium*, (F.) *Estage*, *Étage*, *Stade*. The period or degree of a disease; especially the period of an intermittent: — as the *cold stage*, — *sta'dium fri'goris*—*hot stage*, &c.

STAGGERWEED, *Delphinium*.

STA'GIUM. The sixth part of an ounce.

STAGMA, from *σταῖμα*, 'I distil,' *Stalag'ma*. Any distilled liquid or liquor.

STAGMA, *Gutta*.

STAGNATION, *Stagna'tio*, from *stagnare*, 'to form a pond.' Accumulation and retardation of fluids in any part of the body.

STAGNUM CHYLI, *Receptaculum chyli*.

STAHLIAN. One who follows the doctrine of *Stahl*.

STAHLIANISM. The doctrine of *Stahl*, which considered every vital action under the direction and presidency of the soul. See *Animist*.

STALAGMA, *Stagma*.

STALAGMITIS CAMBOGIOI'DES, *S. Cambogia*. *Gamboge* was long ascribed to this fancied Ceylonese plant. It is now known, that the name was given by *Murray* to specimens of two distinct trees of different genera. See *Cambogia*.

STALAGMOS, *Distillation*.

STALTIUS, *Incarans*.

STAMMERING, *Balbuties*—s. of the *Fingers*,

*Cramp*, *writers'*.

STAMPING MILL, see *Pulverization*.

STANGOS, *Tin*.

STANNI MURIAS, *Tin*, *muriate* of—s. *Oxyduli murias*, *Tin*, *muriate* of—s. *Pulvis*, see *Tin*.

STANNIOLUM, *Tin*foil.

STANNUM, *Tin*—s. *Cinereum*, *Bismuth*—s.

*Folium*, *Tin*foil—s. *Glaciale*, *Bismuth*—s. *Granulatum*, see *Tin*—s. *Indicum*, *Zincum*.

STAPÉDIEN, *Stapedius*.

STAPE'DIUS, *Stapes*, (F.) *Stapédien*, *Pyramidal-stapédien*. A muscle of the middle ear, which draws the stapes obliquely upwards.

STAPES, *Stapha*, *Staffa*, 'a stirrup.' (F.)

*Étrier*. The innermost of the small bones of the ear, so called because it resembles a *stirrup*. It is situate horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to the membrane of which it is united. Its branches are one anterior, and the other posterior. They are curved; and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot; which forms a figure of 8 around the ankles.

STAPHA, *Stapes*.

STAPHIS, *Delphinium staphisagria*.

STAPHISAGRIA, *Delphinium staphisagria*.

STAPHISAIGRE, *Delphinium staphisagria*.

STAPHYLÆMATO'MA, from *σταφυλή*, 'the uvula,' and *hæmatoma*. A tumour formed by effusion of blood beneath the mucous membrane of the uvula.

STAPHYLAGRA, *Staphylepartes*.

STAPHYLE, *Uvula*, see *Vitis vinifera*.

STAPHYLEPAR'TES, from *σταφυλή*, 'the uvula,' and *εραρω*, 'I lift up,' *Staphylagra*. An instrument for laying hold of, and removing the uvula. — Paulus.

STAPHYLINI, see *Azygos muscle* — s. Medii, see *Azygos muscle*.

STAPHYLINO-PHARYNGEUS, *Palato-pharyngeus*.

STAPHYLINUS EXTERNUS, *Circumflexus*.

STAPHYLIS, *Nipple*.

STAPHYLITIS, *Uvulitis*.

STAPHYLIUM, *Nipple*.

STAPHYLODIALYSIS, *Cionis, Staphylœdema*.

STAPHYLÆDE'MA, *Angi'na uvulæ'ris, Dysphagia uvulæ'ra, Hypostaphylæ, Hypostaphylitis, Staphylo'dialysis, Prolapsus seu Proptosis uvulæ, Cæcus uvulæ, Himas, Himantoma, Himantosis, Staphylonæus, Staphylo'dæcia, Ede'ma uvulæ, Prodnctio uvulæ à pituitâ, Uvula decidua seu relaxata, Cras'pedon*. Relaxation and tumefaction of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

STAPHYLO'MA, from *σταφυλή*, 'a grape,' *Uvæ'tio, Myocephalon, Myocephalum, Paropsis Staphylo'ma, Staphylo'sis, Polygro'ma*. A name given to different tumours of the anterior surface of the globe of the eye.

STAPHYLOMA CONICUM, *Staphyloma of the cornea*—s. *Pellucidum conicum, Staphyloma of the cornea*.

STAPHYLOMA OF THE CORNEA, *Sugar-loaf Cornea, Conical Cornea, Conical hydrophthalmia, Staphylo'ma conicum, S. pellucidum conicum, Conophthal'mia, Prolapsus cor'neæ, Ceratonæus, Hyperceratosis, Hypercer'asis*, is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes attenuated and distended, at others thickened.

STAPHYLOMA OF THE IRIS is the disease described by Scarpa under the name *Procidencia Iridis*. It is hernia of the iris, through an accidental opening of the cornea. Also, *iridæuxesis*.

STAPHYLOMA OF THE SCLEROTIC differs from the last, in the prominence existing on a part of the eye covered by the sclerotic, which is much thinner.

STAPHYLOMA UVEÆ, *Iridæuxesis*.

STAPHYLONCIA, *Staphylœdema*.

STAPHYLONCUS, *Staphylœdema*.

STAPHYLOPLAS'TIC, *Staphyloplas'ticus*, from *σταφυλή*, 'the uvula,' and *πλασσω*, 'I form.' An epithet applied to the operation for replacing the soft palate, when it has been lost.

STAPHYLOR'RAPHY, *Velosynth'esia, Staphyloer'raphia, Cionorrhaphia, Cionorrhaph'ia, Uranior'rhaphe, Uranorrhaphia, Uranisor'rhap'phia, Uranisor'rhaphe*, from *σταφυλή*, 'the uvula,' and *ραφή*, 'a suture.' The operation for uniting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

STAPHYLOSIS, *Staphyloma*.

STAPHYLOT'OMY, *Staphylo'tomia*, from *σταφυλή*, 'the uvula,' and *τομή*, 'incision.' Amputation of the uvula.

STAR-APPLE, BROAD-LEAVED, *Chryso-phyllum cainito*—s. *Blazing, Aletris farinosa*—s. *Bloom, Spigelia Marilandica*—s. *Grass, Aletris farinosa, Hypoxys erecta*—s. *Knap-weed, Centaurea calcitrapa*—s. *Stroke, Coup-de-soleil*—s. *Wort, Aletris farinosa*—s. *Wort, golden, Bubonium*.

STARBECK SPA. A chalybeate spring at Harrogate.

STARCH, *Amylum*—s. *Blue, Smalt*.

STARCH, IODIDE OF, *Iod'idum seu Iodure'tum Am'yl'i, Am'ylum iodat'um*, (F.) *Iodure d'Amidon*; prepared by triturating iodine and starch, is said to have the eutrophic effects of iodine; but, by some, is esteemed inert. Dose, four to six grains.

STARCH, POTATO, see *Solanum tuberosum*—s. *Sugar, Glucose*.

STARKEY'S PILLS, see *Pilulæ ex helleboro et myrrhâ*.

STASE, *Stasis*.

STASIS, *stasis*, from *σταω*, 'I stop,' (F.) *Stase*. This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids,—*Stasis never*.

STASIS, *Station*.

STATIC. An epithet applied to the physical phenomena presented by organized bodies in contradistinction to the organic or vital.

STATICA SEPTI NA'RIUM, *Appendix cutanea septi na'rium*. The cutaneous appendage to the septum narium.

STATICE CAROLINIA'NA of the United States, *American Thrift, Marsh Rose'mary, Marsh Root, Seaside Thrift, Inkroot, Sea Lavender*, is considered to be a mere variety of the statice limonium.

STATICE LIMO'NIUM, *S. Maritimum, Behen rubrum, Limo'niium, L. majus seu vulgare, Behen, Sea Lavender, Red Behen, Behmen Ackmar, Marsh Rosemary, Lavender Thrift, (F.) Behen rouge, Family, Plumbaginæe. Ser. Syst. Pentandria* Pentagynia. The roots have been esteemed astringent, tonic, and eminently antiseptic.

STATICE MARITIMUM, *S. limonium*—s. *Vulgare, S. limonium*.

STATION, *Statio, Stasis, Status*, from *stare*, 'to stand.' The act of standing.

STATIONARY, *Stationaria*, from *stare*, 'to stand.' A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

STATISTICS, MEDICAL, *Vital Statistics, Biostat'ics, (F.) Statist'ique médicale*. That part of medicine which relates to details—*medico-statistical*—connected with the mortality, salubrity, &c., of different countries and situations.

It has, also, been used in a wider sense to signify the same as *Numerical method, (F.) Méthode numérique*; which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

STATISTICS, VITAL, *Statistics, medical*.

STATURE, *Statura, Meg'ethos, Magnitudo corporis*, from *sto, statum*, 'I stand.' The height of the human figure. The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

	STATURE.	
	Feet.	In.
An Englishman,.....	6	4½
	5	00
An Englishwoman,.....	5	4
	5	00
European male skeleton,.....	5	8
Do. ....	5	5
A Negro at the Lunatic Hospital, Liver- pool,.....	5	10½
Another from Virginia,.....	5	5½
Another from the Gold Coast,.....	5	8
Another,.....	5	00
Negro skeleton,.....	4	11
Another,.....	5	7½
A Lascar,.....	5	4
Venus de Medici,.....	5	00
Tyson's Chimpanzé ( <i>Simia Troglodytes</i> )	2	2
Mr. Abel's Orang Otang,.....	2	7
Camper's Do. ....	less than	30
Mr. White's Monkey,.....	2	2

STATUS, Acme — s. Cruditatis, Crudity — s. Erethiticus, Nervous diathesis — s. Gastricus, *Embarras gastrique* — s. Nervosus, Nervous diathesis — s. Sthenicus, Sthenia — s. Verminosus, Helminthiasis.

STAVESACRE, Delphinium staphisagria.

STAXIS, *Apostax'is*. A slight epistaxis or nasal hemorrhage. — Hippocrates.

STEAM-DOCTOR. A term applied to one who treats all or most diseases by steam.

STEAR, Pinguedo, Sebum.

STEARIN, see Pinguedo.

STEARINUM CETACEUM, Cetaceum.

STEARRHŒA, *Stearorrhœ'a*, *Seborrhœ'a*, *Seborrhag'ia*, *Smegmatorrhœ'a*, *Smegmorrhœ'a*, *Seba'ceous Flux*, from *stear*, 'suet,' and *ρρω*, 'I flow.' Augmentation of secretion from the sebaceous follicles of the skin.

STEATITES, Polysarcia.

STEATOCE'LE, from *stear*, 'suet,' and *κηλη*, 'a tumour.' A tumour formed by a collection of steatomatous matter in the serotum.

STEATO'MA, *Tumor lar'deus*, from *stear*, 'suet.' *Seva'tio*, *Steat'osis*, *Emphy'ma encys'tis steatoma*. An encysted tumour, whose contents are similar to fat.

STEATOP'YGA, from *stear*, 'fat,' and *πυγη*, 'buttocks.' *Buttock-hump*. Fat buttocks; such as exist in the Hottentot females.

STEATORRHŒA, Stearrhœa.

STEATO'SIS, Steatoma.

STEATO'SIS CORDIS, *Degenera'tio adiposa cordis*, *Cardiethmolip'osis* and *Cardiomyolip'osis* (Piorry), *Fatty heart*. Unusual deposition of fat on the heart:—by some presumed to be occasionally a true adipous degeneration of the substance of the heart, which is probably incorrect.

STEATOZOON FOLLICULORUM, Acarus Folliculorum.

STEEL. Chalybs.

STEEPLE-BUSH. *Spiræa tomentosa*.

STEER'S OPODELDOCH, see Opodeldoch, Steer's.

STEGANOP'ODES, *στεγανοπόδης*. *Planip'edes*. They who have flat feet, or are web-footed, from *στεγανός*, 'covered,' and *πους*, 'foot.'

STEGNO'SIS, *Steno'sis*, *Constipa'tio*, *Stipa'tio*, *Condensa'tio*, *Obstruc'tio*, from *στεγνωω*, 'I constrict.' Constriction or narrowness of the pores and vessels. Stricture. Constipation. Suppression of the evacuations. See Acretatio.

STEGNOTICA, Astringents.

STEIRGOSIS, Sterilitas.

STELENGIS, Stridor dentium.

STELLA, *Fas'cia stella'ta*, (F.) *Étoile*. A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple*; in the second, *double*. It was employed in cases of fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

STELLA TERRÆ, *Plantago coronopus*.

STELLARIA MEDIA, *Alsine media*—s. *Scilla*, *Scilla*.

STELLATA RUPINA, *Centaurea calcitrapa*.

STELOCHITIS, *Osteocolla*.

STENAGMUS, *Suspirium*.

STENAXIS, *Suspirium*.

STENIA, *Sthenia*.

STENICUS, Active.

STENOBREGMATE, see Cranium.

STENOCARDIA, *Angina pectoris*, *Cardiostenosis*.

STENOCHOR'IA, *Stenochori'asis*. *Angustia*. Employed by some for contraction of the vagina.

STENOCHORIA INTESTINI RECTI, Stricture of the rectum — s. *Œsophagi*, *Dysphagia constricta*.

STENOMYCTERIA, from *στενός*, 'narrow,' and *μύκτηρ*, 'nose.' Contraction of the nasal passages.

STENOSIS, *Stegnosis*.

STENOSTEGNOSIS, *Stenostenosis*.

STENOSTENO'SIS, *Stenostegno'sis*, from *Steno*, and *στενωσις*, 'contraction.' *Obstruc'tio ductûs Stenonia'ua*. Narrowness or contraction of the duct of Steno.

STENOSTOM'IA, from *στενός*, 'narrow,' and *στομα*, 'mouth.' Contraction of the mouth.

STENOTHORAC'ES, from *στενός*, 'narrow,' and *θώραξ*, 'the chest.' They who have narrow chests.

STENTOROPHO'NUS, from *Στεντωρ*, *Stentor*, a Greek in the army before Troy; and *φωνη*, 'voice.' One who has a strong voice.

STEPHANE, Crown.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British parliament for £5000.

STERA, Uterus.

STERCORA'CEOUS, *Stercora'rius*, *Diachoret'icus*, *Ster'coral*, from *stercus*, 'dung.' *Fæcal*, *Fæcal*, (F.) *Stercoraire*, *Stercoral*.

The French use the term *Fistules stercoraires* for those which are kept up by the constant passage of fecal or *stercora'ceous matter*. The name *Stercoraires* is sometimes given, in derision, to those physicians who are fond of purging their patients: à posteriori has been similarly used.

STERCORAIRE, *Stercoraceus*.

STERCUS, Excrement, *Fimus* — s. *Anseris*, *Fimus anseris* — s. *Caninum album*. *Album Græcum* — s. *Diaboli*, *Asafoetida* — s. *Equi non castrati*, *Fimus*.

STERCUS HUMA'NUM, *Homerda*. Human excrement.

STERCUS LACERTÆ, *Crocodilia*.

STEREOCYST'IS, from *στερεός*, 'hard,' and *κύστις*, 'cyst.' A hard steatoma.

STEREOS, Solid.

STEREOT'ICA, from *στερεός*, 'hard.' Fortui-

tous lesions or deformities affecting the hard parts. The 2d order, class *Tychicus* of Good.

**STERILE.** *Ster'ilis, A'gonos, Aph'orus, Aph'oricus, Ablat'es, Infecun'dus, (F.) Stérile.* Same etymology as Sterilitas. Not producing fruit: infecund.

**STERILIS.** Sterile.

**STERILITAS.** *Agonia, Steiro'sis, Steiro'sis, Agone'sia, Agone'sis, Infecun'ditas, Sterility, Arge'sis, Bar'renness, Infecun'dity, Aph'oria, Ate'nia, Ato'cia,* from *στερος*, or *στερος*, 'hard, barren.' Quality of that which is barren. Sterility may be *absolute* or *relative*. The former depends upon some vicious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

**STERNAL,** see Sternal.

**STERNAL,** *Sterna'lis,* from *sternum*, 'the breast bone.' Relating or appertaining to the sternum or breast bone.

**STERNAL ASPECT.** The aspect of the body where the sternum is situate.—Barclay. *Sternal* is used by the same writer adverbially to signify towards the sternal aspect.

**STERNALGIA,** Angina pectoris.

**STERNO-CLAVIC'ULAR,** *Sterno-clavicula'ris.* That which relates to the sternum and clavicle.

**STERNO-CLAVIC'ULAR ARTICULA'TION** is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two *radiated sterno-clavicular,* (F.) *Sterno-claviculaires rayonnées;* one anterior, and one posterior—an *inter-clavicular ligament,* extending between the two clavicles, and two synovial capsules, separated by an *inter-articular fibro-cartilage.* The costo-clavicular ligament may also be considered to belong to this articulation.

**STERNO-CLAVIO-MASTOÏDIEN,** Sterno-cleido-mastoideus—s. Cleido-hyoideus, Sterno-hyoideus.

**STERNO-CLEIDO BRACHIALIS,** Pectoralis major.

**STERNO-CLEIDO-MASTOIDEUS,** *Sterno-mastoïdeus, Cleido-mastoïdeus, Mastoïdeus, Mastoïdeus anterior, Nuta'tor cap'itis;* (F.) *Sterno-clavio-mastoïdien, Sterno-mastoïdien;* from *στερον*, 'the sternum,' *κλεις,* 'the clavicle,' and *μαστος,* 'the mastoid process.' A muscle situate at the anterior and lateral part of the neck. It is long and flattened: simple, above: and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neighbouring part of the temporal bone, and at the outer third of the upper curved line of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

**STERNO-COSTAL,** *Triangularis sterni—s. Costo-clavio-huméral,* Pectoralis major—s. *Dyuvia,* see Somatodynia—s. *Huméral,* Pectoralis major.

**STERNO-HYOÏDEUS,** *Sterno-cleido-hyoïdeus, Sterno-hyoïdes, Hyoïdes primus;* from *στερον*, 'the sternum,' and *υοιδής,* 'the os hyoides.' A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum;—at the posterior part of the sterno-clavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

**STERNO-MASTOÏDIEN,** Sterno-cleido-mastoideus—s. *Pubien, Rectus abdominis.*

**STERNO-THYROÏDEUS,** *Sterno-thyroïdes, Bron'chius.* A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides, by the medium of the thyro-hyoid membrane.

**STERNODYNIA SYNCOPALIS,** Angina pectoris—s. *Syncoptica et Palpitans, Angina pectoris.*

**STERNO-OMPHALODYMIA,** see Somatodynia.

**STERNUM,** *Sternon,* from *στερος*, 'solid;' *Pectus, Os asser seu pectoris seu xiphoides seu gladi'oli seu ensifor'me, Scutum cordis, Breast Bone, Hæmal Spine* of Owen. An azygous symmetrical bone, situate at the fore-part of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage—the xiphoid. It has an *anterior* or *cutaneous surface,* a *posterior* or *mediastinal*—a *superior* or *clavicular extremity,* and an *inferior* or *abdominal.* It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Bécclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal:* 2. *Duo-sternal:* 3. *Tri-sternal:* 4. *Quarti-sternal:* 5. *Quinti-sternal:* 6. *Ultimi-sternal* or *ensisternal.*

**STERNUMENTUM,** Sneezing.

**STERNUTAMENTORIA,** Achillea ptarmica.

**STERNUTAMENTUM,** Sneezing.

**STERNUTATIO,** Sneezing.

**STERNUTATOIRE,** Sternutatory.

**STERNUTATORY,** *Sternutato'rius,* from *sternutare,* 'to sneeze.' *Sternutamen'tum, Erch'ium, Ptar'micum, Anarrh'ium,* (F.) *Sternutatoire.* A substance which provokes sneezing; as tobacco, &c.—See Errhine.

**STERTEUR,** Stertor.

**STERTOR,** *Rouchus* or *Rhouchus, Renchus, Rheucus,* (F.) *Stertere, Ronflement,* from *stertere,* 'to snore.' The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *stertorous;* *Respira'tio stertu'su seu stertens seu stertoro'sa.*

**STERTOROUS,** see Stertor.

**STETHÈMIA,** *Hyperæ'mia Pulmo'num* seu *Pec'toris, Conges'tio Pulmonum* seu *Pectoris,* (F.) *Hyperémie des Pommons, Congestion des Pommons.* Hyperæmia of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

**STETHOCATHARSIS,** Expectoration.

**STETHOCHYSIS,** Hydrothorax.

**STETHODESMIS,** Corset.

**STETHODESMIUM,** Corset.

**STETHODESMUS,** Corset.

**STETHOMETER,** from *σθηθος,* 'the chest,' and *μετρον,* 'measure.' An instrument, proposed by Mr. Richard Quain, for measuring the extent of movement of the walls of the chest, as a means of diagnosis in thoracic diseases. It consists of a flat case, not unlike a watch-case, having on its upper surface a graduated dial and index, which is acted on by a simple mechanism. A silk cord, long enough to surround one-half the chest, passes through an aperture in the case. The dial is graduated into fifty equal parts, each of which represents the 1-200th of an inch. In using the instrument, the dial is placed firmly against the spine, and the point of the tape over the sternum, or at any other spot according to the part to be

examined. The extension of the string, as indicated by the dial, shows the amount of elasticity of the parietes of the thorax.

**STETHOPARALYSIS**, *Paralysis nervorum thoracis, phrenicorum, &c.*; from *σθηθος*, 'the chest,' and *παράλυσις*, 'paralysis.' Palsy of the muscles of the chest.

**STETHORRHEUMA**, Pleurodynia.

**STETHOSCOPE**, *Stethoscopium, Stethoscopia, Echoscopia, Psophometer, Thoracoscopium*, from *σθηθος*, 'the chest,' and *σκοπεω*, 'I examine.' An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, *Stethoscopy, Stethoscopia, &c.*, is what Laënnec terms *Auscultation médiate, Mediate Auscultation*.

**STETHOSCOPIA**, see *Auscultation*, and *Stethoscope*.

**STETHUS**, Thorax.

**STEW**, Stove.

**STHENIA**, *Steni'a, Diathesis sthen'ica, Status sthen'icus, Vis aucta*, from *σθενος*, 'strength,' 'power.' Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians, as well as *Asthenia*,—its antitheton. *Sthenic or dynamic diseases* are such as depend upon excessive excitement.

**STHENICUS**, Active.

**STHENOPYRA**, Synocha.

**STIBI**, Antimonium.

**STIBIALIS**, Antimonial.

**STIBIATUS TARTRIS LIXIVLÆ**, Antimonium tartarizatum.

**STIBII BUTYRUM**, Antimonium muriatum —s. Deuto-murias sublimatus, Antimonium muriatum —s. et Potassæ deuto-tartras, Antimonium tartarizatum —s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum —s. Oxidum acido muriatico oxygenato paratum, Algaroth —s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum —s. Oxidum præcipitando paratum, Algaroth —s. Oxodes album, Antimonium diaphoreticum —s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum —s. Oxydi sulphurati hydro-sulphuretum luteum, Antimonii sulphuretum præcipitatum —s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum —s. Oxydulum vitreatum, Antimonii vitrum —s. Oxydum semivitreum, Antimonii vitrum —s. Oxydum sulphuratum, Oxydum stibii sulphuratum —s. Subhydrosulphas, Antimonii sulphuretum rubrum —s. Submurias præcipitando paratum, Algaroth —s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum —s. Sulphuretum nigrum, Antimonium —s. Vitrum, Antimonii vitrum.

**STIBIOSUM HYDROSULPHURETUM CUM SULPHURE**, Antimonii sulphuretum præcipitatum —s. Oxidum, Antimonium diaphoreticum.

**STIBIUM**, Antimonium.

**STICHAS ARABICA**, *Lavendula stochas*.

**STICKWORT**, Agrimony.

**STICTA PULMONACEA**, Lichen pulmonarius.

**STIFF JOINT, MUSCULAR**, Contractura.

**STIFF JOINTS**, Milk sickness.

**STIFFNECK**, Torticollis.

**STIGMA**, Cicatricula.

**STIGMATA**, see *Nævus*. The breathing pores of insects are so called.

**STIGMATA OVARIO'RUM**, *Cicatri'ces Ovario'rum*. The cicatrices left in the ovary after the escape of ova.

**STILBOMA**, Cosmetic.

**STILL**, Alembic.

**STILLA**, Gutta.

**STILLATIO SANGUINIS E NARIBUS**, Epistaxis.

**STILLICIDIUM**, *Substillum*, from *stillare*, 'to drop.' This term is often used synonymously with *Strangury*. It means the flow of any fluid—particularly the urine—drop by drop. Also a kind of embrocation, *Stillicidium supra partem*, effected by dropping a liquid upon a part.

**STILLICIDIUM LACRYMARUM**, Epiphora —s. Narium, Coryza —s. Sanguinis e naribus, Epistaxis —s. *Supra partem*, see *Stillicidium*.

**STILLINGIA**, *S. sylvat'ica, Queen's Root, Queen's delight, Yaw root, Mar'cory, Cockup hat*. An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Sex. Syst. Monœcia Monadelphica. Nat. Ord. Euphorbiacæ*. The root is said to be used in syphilis, obstinate cutaneous affections, &c., like sarsaparilla.

**STIMATOR'SIS**, *Stymatosis, Hæmorrhag'ia Penis, Stymatorrhag'ia, Phalorrhag'ia, Caulorrhag'ia*, from *στυψις*, 'priapism,' itself from *στυψω*, 'to erect.' Hemorrhage from the male organ, accompanied or not with priapism.

**STIMMI**, Antimonium.

**STIMULANT**, *Stim'ulans, Excitans, Excitant, Incitans, Incentivum, Irritans, Incitant, Hypersthen'ic, from stimulare, 'to goad.'* A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffusible*,—that is, have a prompt but temporary action; others are *permanent or persistent*. The action of stimulants is called *Stimulation, Stimulatio, Incitatio*.

The chief stimulants are the following: Æther Sulphuricus, Ammonia, Asafœtida, Brucia, Camphora, Capsicum, Castoreum, Cinnamomum, Copaiba, Cubeba, Guaiacum, Hydrargyri Præparata, Iodinum, Nux Vomica, Olea Essentialia, Opium (in small dose), Piper, Sinapis, Strychnia, Zingiber,—Alcohol, Caloric, Electricity, Mental Emotions, (the Impetuous.)

**STIMULUS**, 'a goad.' *Incitamentum, Irritamentum, Irritamentum, Potentia Irritans*. Any thing which excites the animal economy.

**STINK POKE**, *Dracontium fetidum*—s. Weed, Chenopodium anthelminticum, Datura stramonium, Polanisia graveolens.

**STIPATIO**, Stenosis.

**STIPATIO TELÆ CELLULO'SÆ INFANTUM**. Induration of the cellular tissue of children.

**STIROISIS**, Sterilitas.

**STITCH**, same root as *stick*, *Sax. Frisian, (G.) st e c k e n, (F.) Point, (L.) Punctum*; (from *pungere, punctum*, 'to prick or sting.') An acute lancinating pain, like that produced by the puncture of a sharp needle.

**STITCH, COMMON**, Suture, common —s. Royal, Suture, common —s. in the Side, Pleurodynia.

**STIZOLOBIUM**, *Dolichos pruriens*.

STLENGIS, *Stridor dentium*.  
 STOBÆA RUBRICAULIS. A South African plant, *Nat. Ord. compositæ*. A tincture of the bruised roots is diuretic, and of great service in gravel.

STOCHETON, Element.

STOCKING, LACED, (F.) *Bas lassé*. A bandage used by surgeons, which consists of a stocking made of firm cloth or dog-skin, admitting of being tightly laced anteriorly. It is employed in varices and ulcers of the legs.

STŒCHAS ARABICA, *Lavendula stœchas*.

STOMA, Mouth.

STOMAC'ACÉ, *Stomac'acé, Stomal'gia, Labrisul'cinus, Cheiloc'acé, Uloc'acé, Cheilomat'cia, Stomatono'ma, Stomatonecro'sis, from στομα, 'the mouth,' and κακος, 'evil': Cancer Oris, Canker*. Fœtor of the mouth with a bloody discharge from the gums. (F.) *Cancer aquatique*; see *Cancer Aquaticus*. Also, *Scurvy*.

STOMACACE, *Porphyræ nautica*—s. *Gangrænosum, Cancer aquaticus*—s. *Universale, Purpura hæmorrhagica*.

STOMACAL, Stomachal.

STOMACALGIA, Cardialgia.

STOMACH, *Stom'achus, Ventric'ulus, Nedys, Auoc'elia, Gaster, (F.) Estomac, from στομα, 'a mouth.'* One of the principal organs of digestion. It is a musculo-membranous reservoir; continuous on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is converted into chyme. When viewed externally, the stomach has, 1. An *anterior face*, which looks a little upwards. 2. An *inferior face*, directed downwards. 3. An *inferior or colic margin*, which is convex and extensive, and is called the *greater curvature*, (F.) *Grand courbure*. It gives origin to the omentum majus. 4. A *superior or diaphragmatic margin*, which is shorter, concave, and is called the *lesser curvature*, (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A *left or œsophageal orifice*, called, also, the *cardia, Os ventric'uli or upper orifice*. 6. A *right or intestinal, or inferior orifice*, called the *pylorus*. 7. A considerable dilatation, situate to the left of the cardia and greater curvature—the *great tuberosity of the stomach*; and, 8. A less extensive dilatation, situate to the right of the greater curvature,—the *lesser tuberosity or lesser cul-de-sac, Antrum Pylori*. The inner surface of the stomach is of a reddish-white colour, and has a marbled appearance. It is constantly covered by thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles. The parietes of the stomach consist of three membranes in superposition. The outermost is serous, and is an extension of the peritoneum; the middle coat is *muscular*,—some of its fibres running longitudinally; others, transversely, and others obliquely; the innermost membrane is of a mucous nature, *Crusta villosa ventric'uli, Gastro-mycod'eris*, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pyloric valve*. These three coats are united by a dense, close, areolar membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brunner*. The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastro-epiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk

of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the œalic plexus.

STOMACH CELL, see *Favulus*—s. *Disease, Liosis*—s. *First, Inguivus*.

STOMACH PUMP, *Gastren'chyta, Autli'a gas'trica*. A useful instrument for conveying fluids to the stomach, when deglutition is impracticable, and for pumping out the contents of that organ. It consists of a forcing syringe, to the bottom and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach-tube must be attached to the nozzle, and passed down the throat,—the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach-tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach pump was first employed in America by Dr. Physick, in the year 1812.

STOMACH, SECOND. *Proventriculus*—s. *Siek, Milk sickness*—s. *Third, Venticulus callosus*—s. *Tube, see Tube, œsophageal*.

STOM'ACHAL, *Stomach'ic, Stomach'ical, Card'iacus, Stomach'icus, Stomach'al'is, Viscera'lis, (F.) Stomacal, Stomachique*. That which belongs to the stomach; that which is good for the stomach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHALGIA, Cardialgia.

STOMACHI RESOLUTIO, *Dyspepsia*.

STOMACHIC, Stomachal.

STOMACHICAL, Stomachal.

STOMACHIQUE Stomachal.

STOM'ACHUS, from στομα, 'mouth.' This word has been used in several different acceptations; for example, for the œsophagus, for the cardiac orifice of the stomach, (see *Cardia*), and for the stomach itself. Hippocrates calls the neck of the bladder *στομαχος κυστιως*; and the neck of the uterus *της μητρας στομαχος*.

STOMAL'GIA, *Stomatal'gia, Stomatodyn'ia, from στομα, 'mouth,' and αλγος, 'pain.'* Pain in the mouth; *Stomac'acé*.

STOMAPYRA, *Aphthæ*—s. *Aphtha, Aphthæ*.

STOMATALGIA, Stomalgia.

STOMAT'IC, *Stomac'icus, from στομα, 'mouth.'* A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

STOMATITE APHTEUSE, *Stomatitis, aphthous*—s. *Charbonneuse, Cancer aquaticus*—s. *Convenneuse, Stomatitis, pseudo-membranous*—s. *Crèmeuse pultacée, Aphthæ*—s. *Folliculeuse, Stomatitis, aphthous*—s. *Gangréneuse, Cancer aquaticus*—s. *Mercurielle, see Salivation, mercurial*—s. *Ulcéreuse, Stomatitis, aphthous*.

STOMATIT'IS, from στομα, 'the mouth,' and *itis, denoting inflammation.* (F.) *Inflammation de la Bouche*; *Inflammation of the mouth*.

STOMATITIS, APHTHOUS, *S. follic'ular, S. ul'cerous, Emphly'xis Aphthæ, A. Adulto'rum, (F.) Stomatite, S. aphtheuse, S. folliculeuse, S. ulc'éreuse*. An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

STOMATITIS, ERYTHEM'ATOUS. Simple inflammation of the mouth.

STOMATITIS, EXSUDATIVA, Aphthæ—s. Follicular, S. aphthous—s. Gangrenous, Cancer aquaticus.

STOMATITIS, MERCURIAL, *Hydrargyrostomatitis*, *Hydrargyrostomatitis*, *Stomatitis mercurialis*. Inflammation of the mouth induced by mercury.

STOMATITIS OF NURSING-WOMEN appears to be a variety of S. aphthous.

STOMATITIS, PSEUDOMEMBRANOUS, (F.) *Stomatite couenneuse*, *Diphthérite buccale*, *Pseudomembranous inflammation of the mouth*;—in its worst form, *Stomatyphus*, (F.) *Fégarite*. Inflammation of the mouth accompanied by the exudation of a false membrane,—a disease which is rarely seen except in large founding establishments.

STOMATITIS, ULCEROUS, S. aphthous—s. *Vesiculosa infantum*, Aphthæ.

STOMATOCACE, Stomacace.

STOMATODYNIA, Stomalgia.

STOMATO-GAS'TRIC, *Stomato-gas'tricus*, from *στομα*, 'the mouth,' and *γαστήρ*, 'the stomach.' Appertaining to the mouth and stomach,—as the *stomato-gastric ganglia* of the lower animals.

STOMATOMALACIA PUTRIDA, Cancer aquaticus.

STOMATONECROSIS, Cancer aquaticus, Stomacace.

STOMATONOMA, Stomacace.

STOMATOPANUS, from *στομα*, 'the mouth,' and *πανος*, 'a glandular tumour.' *Stomatophy'ma glandulosum*, *Panus Fau'cium*. Tumefaction of the glands of the mouth.

STOMATOPHY'MA, from *στομα*, 'the mouth,' and *φυμα*, 'a swelling.' A swelling in the mouth.

STOMATOPHYMA GLANDULOSUM, Stomatopannus.

STOMATOPLASTIC, *Stomatoplas'ticus*; from *στομα*, 'the mouth,' and *πλασσω*, 'I form.' The operation of forming a mouth, where the aperture has been contracted from any cause.

STOMATORRHAG'IA, *Stomatorrhœ'a*, *Hæmorrhag'ia oris*, *H. fau'cium*, *San'guinis profu'vium ex Orê*, *Hæmorrhôides Oris*, *Stomato'sis*, *Stomorrhag'ia*, (F.) *Hæmorrhagie buccale*, from *στομα*, 'the mouth,' and *ρηννμι*, 'I break out.' Hemorrhage from the mouth.

STOMATORRHAGIA ALVEOLORUM, Phatnorrhagia—s. *Gingivarum*, Ulorrhagia.

STOMATORRHŒA, Stomatorrhagia.

STOMATOSCOPE, from *στομα*, 'mouth,' and *σκοπεω*, 'I view.' Any instrument for keeping the mouth open, so as to permit the parts within to be inspected; *Speculum oris*.

STOMATOSEPSIS, Cancer aquaticus.

STOMATOSIS, Stomatorrhagia.

STOMATOSPASMUS, Trismus.

STOMATYPHUS, Stomatitis, pseudomembranous.

STOMOMANICON, *Platysma myoides*.

STOMORRHAGIA, Stomatorrhagia.

STONE IN THE BLADDER, Calculi, vesical—s. *Binder*, *Osteocolla*—s. *Crop*, *Sedum*—s. *Crop*, *biting*, *Sedum*—s. *Mint*, *Cunila mariana*—s. *Pock*, *Acne*—s. *Root*, *Collinsonia Canadensis*.

STONES, THE, Testes.

STOOL, Dejectio.

STOOL, CALOMEL, see *Calomel*.

STORAX, *Styrax*—s. *Liquida*, *Liquidambar styraciflua*.

STOREY'S WORM CAKES. An empirical preparation, formed of *calomel* ℞j, *jalap.* ʒj, *zincib.* ℞ij, *sacch.* ʒj, *cinnab. antim.* q. s. to colour them: *symp. simpl.* q. s. to make into cakes.

STORKBILL, *Geranium maculatum*.

STOVE. Old French *Estuve*, *Sinpha*; a

*Stew*, *Æstuda'rium*, (F.) *Éture*. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case, the *stew* or *store* is said to be *wet* or *humid*; in the opposite case, it is said to be *dry*, (F.) *sèche*. The latter, which is used by the Turks, is the *Laconicum* or *Calidarium* of the Romans. The former is their *Tepidarium* or *Vapora'rium*. These kinds of baths greatly excite the cutaneous transpiration; and are valuable agents in rheumatic and other affections.

STRABI, see *Strabismus*.

STRABILISMOS, *Strabismus*.

STRABISMUS, *Strabillis'mos*, *Parop'sis Strabismus*, from *στραβος*, 'twisted,' 'one who squints;' *Strabos'itas*, *Loxophthal'mus*, *Distor'sio*, *Lus'citas*, *Illo'sis*, *Ilo'sis*, *Helos'is*, *Squinting*, *Goggle Eye*, (F.) *Strabisme*, *Vue louche*, *Louchement*. Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motor muscles of the eye; on a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seem to depend upon an excess of strength in one of the motor muscles, we must endeavour to give tone to that which is too weak, by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses, provided with a piece of looking-glass, on the side to which the eye is vitiously turned; so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and by leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

*Strabismus* may be *single* or affect one eye only, or *double*, and it may be *convergent* or *divergent*.

Those affected with *Strabismus* are called *Strabi*, *Strab'ones*, *Strabo'ni*, *Strebli*, *Illi*, *Squint'ers*, *Squint-eyed*; in French, *Louches*, *Bigles*.

STRABISMUS, CONVERGENT, see *Strabismus*—s. *Divergent*, see *Strabismus*—s. *Double*, see *Strabismus*—s. *Single*, see *Strabismus*.

STRABONES, see *Strabismus*.

STRABONI, see *Strabismus*.

STRABOSITAS, *Strabismus*.

STRABOT'OMY, *Strabotom'ia*, from *στραβος*, 'one who squints,' and *τομή*, 'incision.' The operation for the removal of squinting by the division of the muscle or muscles that distort the eye-ball.

STRAIN, Sprain.

STRAIN, *colare*, (F.) *couler*, from *σπραγγειν*, *stringere*, (F.) *estreindre*, 'to constrict or squeeze.' To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, *Nisus*.

STRAITS OF THE PELVIS, see *Pelvis*.

STRAMOINE, *Datura stramonium*.

STRAMONIA, *Datura stramonium*.

STRAMONIUM, *Datura stramonium*—s. *Fœtidum*, *Datura stramonium*—s. *Majus album*, *Datura stramonium*—s. *Spinosum*, *Datura stramonium*—s. *Vulgatum*, *Datura stramonium*.

STRANGALIDES, from *σπραγγειν*, 'I torment.' Small, hard tumours, which form in the breast, when the milk does not find issue.

STRANGALION, Tubercle.

STRANGALIS, Tubercle.

STRANGALISMUS, Strangulation.

STRANGERS' FEVER, see Fever, strangers'.

STRANGULATIO, Qrthopncea, Strangulation

—s. Uvrina, Angone.

STRANGULATIO, *Strangulatio*, *Pnis*, *Pniq'mos*, *Strangalis'mus*, (F.) *Étranglement*, *Strangulation*. State of a part too closely constricted. Thus we say that there is *strangulation* of an intestinal hernia, when the opening that gives passage to the portion of protruded intestine contracts, so as to intercept the continuity of the digestive canal. In *Legal Medicine*, it means the forcible obstruction of the air passages, by a ligature or by the hand, for criminal purposes. See Suffocation.

STRANGULATOR, see Lyeoides.

STRANGURIA, Enuresis—s. Cruenta, Cystorrhagia.

STRANGURIE, Strangury—s. *Menstruelle*, *Dysmenorrhœa*.

STRANGURIOS; same etymon as the next. Affected with, or of the nature of, strangury.

STRANGURY, *Stranguria*, *Paruria stillantia*, from *σπρῆγγειν*, 'to squeeze,' and *ουρον*, 'urine'—*Dysuria*, *Uri'næ Stillicidium* vel *Substillum*, (F.) *Strangurie*. Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

STRATHPEFFER, MINERAL WATERS OF. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall, in Ross-shire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulpho-hydric acid.

STRATIOTES, Achillea millefolium.

STRATUM BACILLATUM, see Tunica Jacobi—s. Malpighii, Corpus mucosum—s. Pigmenti, see Choroid—s. Proligerum, Proligerous disc.

STRAWBERRY, *Fragaria*—s. Bush, *Euonymus Americanus*—s. Shrubby, *Rubus arcticus*—s. Tree, *Euonymus Americanus*—s. Wild, *Fragaria Virginiana*.

STREAK, PRIMITIVE, Groove, primitive.

STREATHAM, MINERAL WATERS OF. Streatham is a village near London. The waters are saline and cathartic.

STREBLI, see Strabismus.

STREBLOSIS, Luxation.

STREMA, Luxation, Sprain.

STREPITUS AURIUM, Tinnitus aurium. A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumours form on different parts of the body,—accompanied by sonorous excretion of gas by the mouth and anus.

STREPITUS AURIUM, Tinnitus aurium.

STRETCHING, Punctionation.

STRIE, Vibices—s. Ciliales, Ciliary processes—s. Corneæ, *Tenia semicircularis*—s. Longitudinales *Lancisii*, see *Corpus callosum*—s. Medulares, see *Processus teretes*—s. *Retinæ subjectæ ligamento ciliari*, *Halo signatus*—s. *Semilunares*, *Tenia semicircularis*—s. *Terminales*, *Tenia semicircularis*—s. *Transversæ Willisii*, see *Corpus callosum*.

STRIATED MUSCULAR FIBRE, see Muscular fibre.

STRIATUS, *Cannellé*, Grooved, see *Corpora striata*.

STRIBILIGO, Efflorescence.

STRICTURA, Stricture—s. Ani, Stricture of the rectum—s. *Intestini recti*, Stricture of the rectum—s. *Intestini recti spasmodica*, Stricture of the rectum, spasmodic—s. *Œsophagi callosa*,

*Dysphagia constricta*—s. *Œsophagi spasmodica*, *Œsophagismus*—s. *Pharyngis seu œsophagi vera*, *Dysphagia constricta*—s. *Præputii*, *Phimosis*—s. *Urethræ*, *Urethrostenosis*—s. *Ventriculi*, Stricture of the stomach.

STRICTURE, *Strictura*, from *stringere*, *strictum*, 'to tie hard.' *Coarctatio*, *Stenosis*, (F.) *Rétrécissement*. A diminution or contracted condition of some tube or duct, as the œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

STRICTURE OF THE ŒSOPHAGUS, *Dysphagia constricta*—s. of the Pharynx, *Dysphagia constricta*.

STRICTURE OF THE RECTUM, SPASMODIC, *Strictura Intestini Recti spasmodica*, *Obstructio Recti spasmodica*. An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance.

Stricture of the rectum, *Strictura Ani seu Intestini Recti*, *Archostegno'ma*, *Rectostenosis*, *Euthyenterostenoma*, *Archostenosis*, *Archostenosis*, *Proctoœnuclosis*, *Angustatio et Restrictio intestini recti vel ani*, *Stenochoria intestini recti*, *Proctostenosis organica*, occurs also organically, and is a very serious affection; being generally dependent upon scirrhus.

STRICTURE OF THE STOMACH, *Gastrostenosis*, *Coarctatio seu Strictura ventriculi*. See *Gastrostenosis cardiaca*, &c.

STRICTURE OF THE URETHRA, *Urethrostenosis*—s. of the Urinary bladder, *Cystostenochoria*—s. *Vesicæ urinariæ*, *Cystostenochoria*.

STRIDOR DENTIIUM, *Brygnum*.

STRIGA CARTILAGINOSA CORDIS, *Isthmus of the fossa ovalis*.

STRIGIL, *Strigilis*, *Stelen'gis*, *Stelen'gis*. A flesh-brush. Also, an instrument, anciently used in the baths, for scraping off the sweat.

STRIPED MUSCULAR FIBRE, see Muscular fibre.

STROBILITITES, from *στροβίλος*, *stro'bilus*, 'a cone of the pine.' Wine impregnated with the cones of the pine.

STROEMIA, Cadaba.

STROKE, APOPLECTIC. An apoplectic seizure.

STROKE, BACK, OF THE HEART, *Impulse*, *dialstolic*.

STROKE, PARALYTIC. A sudden attack of encephalo-spinal paralysis.

STROMA, *Stragulum*, *Stramentum*; from *σπρῆνω*, *σπρῆνωμι*, 'to spread out; to cover.' The bed or foundation-texture of an organ,—as the stroma of the ovary. Applied, also, to the bed or base of any deposit—as the 'amorphous stroma' of serofulous deposits.

STROMBULCUS, Forceps (bullet.)

STRONGLE, *Strongylus*—s. *Géant*, *Strongylus gigas*.

STRON'GYLUS, from *στρογγυλος*, 'round.' Hippocrates, Chabert, and others, mean the *Ascariæ lumbricoïdes* by this term. The *Strongylus Gigas*, (F.) *Strongle*, *S. géant*, is, however, distinct. It has an obtuse, flat head; mouth surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long,—and from two lines to half an inch in diameter. It is occasionally found in the human kidney; rarely in other viscera, and still more rarely in the intestinal tube.

STRONGYLUS, Teres.

STROPHIUS, *Tormina*.

STROPHULE, *Strophulous*.

**STROPHULUS**, *Lichen'asis stroph'ulus*, *Ebullit'io*, *Exanthe'ma strophulus*, *Ecor'nia strophulus*, *Red Gum*, *Red Gown*, *Tooth Rash*, *White Gum*, *Milk-spots*, (F.) *Strophule*, *Feux de dents*. It consists of an eruption of red, or sometimes whitish pimples; occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties under this genus arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance, and no medical treatment is usually necessary. If the stomach seem at all disordered, a little rhubarb and magnesia may be administered occasionally. Willan and Bateman reckon five species, — *Strophulus intertinctus*, *Red gum or gown*; *S. al'bidus* or *white gum*; *S. confertus* or *rank red gum*, *Tooth rash*; *S. volat'icus* or *Erythe'ma volat'icum*, and *S. can'didus*.

**STROPHULUS SYLVESTRIS**, *Ignis sylvaticus*—s. *Volaticus*, *Ignis sylvaticus*.

**STROPHUS**, *Tormina*.

**STRUCTIO**, *Structura*.

**STRUCTURAL**; same etymon as the next. Of, or belonging to, structure.

**STRUCTURE**, *Struct'ra*, *Struc'tio*, *Conformatio*, *Catascen'e*, from *struere*, *structum*, 'to build.' The arrangement of the different tissues or organic elements of which animals and vegetables are composed.

**STRUMA**, *Bronchocele*, *Serofula*.

**STRUMA ADIPO'SA**, *Obes'itas colli*. *Fatty neck*. Prominence of the neck from obesity.

**STRUMES**, *Serofula*.

**STRUMECUX**, *Scrofulous*.

**STRUMOSIS CEREBRI**, *Encephalophymata*—s. *Pulmonum*, *Tubercles of the lungs*.

**STRUMOSUS**, *Scrofulous*.

**STRUMOUS**, *Scrofulous*.

**STRUTHIOPH'AGUS**, from *στρονδιον*, 'a young ostrich,' and *φαγω*, 'I eat.' *Struthiophagous* tribes still exist in some parts of Africa.

**STRUTHIUM**, *Saponaria*.

**STRUVE'S LOTION FOR HOOPING-COUGH**, see *Lotion*, *Struve's*, for *hooping-cough*.

**STRYCHNIA**, *Strychni'na*, *Strych'nine*, *Strychni'num*, *Strych'nium*, *Vauqueline*. An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been discovered in the *Strychnos nux vomica*. (*Nucis vomicae*. *rasur*. lbij; *calcis pulv*. ℥vj; *acid. muriat*. f℥ij; *alcohol*, *acid. sulphuric. dil.*, *liquor. ammoniac*, *carbon. animal. purif.*, *aqnae*, aā q. s. Digest the *nux vomica* in two gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours: then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors; and distil off the alcohol by means of a water-bath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient

solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S.) The medical action of strychnia on man and animals is exactly like that of the alcoholic extract of *nux vomica*. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like the *nux vomica*. Dose, one twelfth to one eighth of a grain.

**STRYCHNIA, ACETATE OF**, *Strychniæ acetas*—s. *Hydriodate of Strychniæ hydriodas*—s. *Iodate of Strychniæ iodas*—s. *Iodide of Strychniæ hydriodas*.

**STRYCHNIA, I'ODIDE OF IODHYDRATE OF**, (F.) *Iodure d'Iodhydrate de Strychnine*, is made by a solution of *ioduretted iodide of potassium* into a solution of a salt of strychnia; treating the precipitate with boiling alcohol, and crystallizing. Used in the same cases as strychnia. Dose, a sixth of a grain.

**STRYCHNIA, NITRATE OF**, *Strychniæ nitras*—s. *Sulphate of Strychniæ sulphas*.

**STRYCHNIA AND ZINC, DOUBLE IODIDE OF**, double *Iodide of Zinc and Strychnia*.

**STRYCHNIAE ACETAS**, *Strych'nium seu Strychni'num acet'icum*, *Acet'as strych'ni'ii seu strych'nicus*, *Ac'etate of Strychnia or Strychnine*. This salt is formed by the direct combination of strychnia with acetic acid. It is given in the same cases as pure strychnia.

**STRYCHNIAE HYDRIO'DAS**, *S. iodhyd'ras*, *Strych'nium hydroiod'icum*, *Hydri'odas seu Iodhyd'ras strych'nicus*, *Hydri'odate or Iodide of Strychnia*, is prepared by mixing a solution of *iodide of potassium* with a concentrated solution of *acetate of strychnia*.

**STRYCHNIAE I'ODAS**, *Strychni'nae I'odas*, *Strychni'na Ioda'ta*, *Strych'nium seu Strychni'num Iod'icum*, *I'odas Strych'ni'ii seu Strych'nicus*, *I'odate of Strychnia or Strychnine*. This salt may be formed by adding a concentrated solution of *iodic acid to strychnia*; treating with boiling alcohol; filtering, and leaving it to spontaneous evaporation.

**STRYCHNIAE NITRAS**, *Strych'nium ni'tricum*, *Nitrate of Strychnia or Strychnine*. Used in the same cases as strychnia.

**STRYCHNIAE SULPHAS**, *Strych'nium sulphu'ricum*, *Sulphate of Strychnia or Strychnine*. Has the same properties.

**STRYCHNINA**, *Strychnia*.

**STRYCHNINE**, *Strychnia*.

**STRYCHNINUM**, *Strychnia*.

**STRYCHNIUM**, *Strychnia*—s. *Aceticum*, *Strychniæ acetas*—s. *Nitricum*, *Strychniæ nitras*—s. *Sulphuricum*, *Strychniæ sulphas*.

**STRYCHNOS**, *Solanum dulcamara*—s. *Guianensis*, see *Curare*—s. *Ignatii*, *Ignatia amara*.

**STRYCHNOS NUX VOM'ICA**, *Nux Vomica*, *Nux Metel'la*, *Caurim*, *Koochla tree*. *Family*, *Strychnoideæ*. *Sex. Syst.* *Pentandria Monogynia*. (F.) *Vomiquier*. A tree of the family *Strychnoïdes*, which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux Vomica*, *Vomic nut*, *Poison nut*, *Bachelors' buttons*, &c., (F.) *Noix vomique*. For a long time, these seeds were used only for poisoning rats; but of late years, an alcoholic extract has been prepared from them, which has been administered in paralytic affections, in small doses. Dose of the *Alcoholic Extract*, *Extractum nucis vom'icæ spirituosum*, *E. nucis vomicæ resinosum*, *E. n. v. alcohol'icum*, (F.) *Extrait alcoolique de noix vomique*, one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diar-

**rheoa** and dysentery. The following is the formula for the preparation of the **EXTRACTUM Nucis Vomice** of the Phar. U. S. Take of *Nux vomica*, lbj; *Alcohol*, a sufficient quantity. Expose the *Nux Vomica* to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distil off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistence.

The bark is the *false angustura* or false *cusparia bark*; *Rohun*.

The wood of *Strychnos colubrina*, an Indian tree, contains strychnia. It was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave in intermittents. It is the *Lignum Colubrinum*, (F.) *Bois de Couleuvre*.

**STRYCHNOS TOXICARIA**, see *Curare*.

**STRYPHNA**, Astringents.

**STRYPHINOS**, Acerb.

**STUDIOSUS MEDICINÆ**, Philiatros.

**STUDIUM INANE**, Aphelxia otiosa.

**STUDY**, BROWN, Aphelxia otiosa.

**STUFFING**, Cynanche trachealis.

**STULTITIA**, Fatuitas.

**STUMP**, (G.) *Stumpf*, (D.) *Stomp*, 'a stump;' also, 'blunt.' (F.) *Moiyon*. The part remaining from which a limb or other part has been amputated or removed in any manner.

**STUNNED**. Old French, *Estonné*, (L.) *attonitus*, 'astonished.' (F.) *Étonné*. An epithet, applied to one who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

**STUPA**, *Stapha*, *Stuppa*, *Stupeion*. Tow, used in certain surgical apparatuses and dressings. Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel or other article wrung out of hot water, plain or medicated, applied to a part, is a *stupe*. The act of applying such stupe is called *stumping*.

**STUPE**, *Stupa*.

**STUPEFACIENTIA**, Narcotics.

**STUPEFACTIFS**, Narcotics.

**STUPEFACTIO**, Narcosis.

**STUPEFACTANTS**, Narcotics.

**STUPEION**, *Stupa*.

**STUPEUR**, *Stupor*.

**STUPHA**, *Stove*, *Stupa*.

**STUPHA**, *Tin*.

**STUPIDITAS**, *Idiotism*, *Imbecility*.

**STUPING**, see *Stupe*.

**STUPOR**, *Eplex'is*, *Eplex'ia*, *Consternatio*, (F.) *Stupeur*, from *stupere*, 'to be stupified.' Diminished activity of the intellectual faculties; often amounting to lethargy. It occurs in many affections, especially in the neuroses.

**STUPOR**, *Narcosis*—s. *Artium*, *Obdormitio*—s. *Dentium*, *Hæmodia*—s. *Formicans*, *Formication*—s. *Mentis*, *Fatuitas*—s. *Vigilans*, *Catalepsy*.

**STUPPA**, *Stupa*.

**STUPRATIO**, *Stuprum*.

**STUPRUM**, *Rape*, *Stuprati'o*, (F.) *Défloration*, *Viol*. Forcible and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Déflorati'o*, *Déflorati'o*, *Devirginali'o*, *Vitiati'o*, *Apanthis'mus*, &c. In judging whether rape has been committed under such circumstances, the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also,

to be acquainted with the evidences of virginity; and to determine,—if signs of virginity no longer exist,—whether its loss be attributable to copulation, or to the introduction into the vagina of any other body than the male organ, &c. *Recent dehoneering* can, of course, be much more readily distinguished than that which has taken place some time.

**STUTTERING**, *Balbuties*.

**STYAN**, *Hordeolum*.

**STYE**, *Hordeolum*.

**STYMATES**. M. J. Cloquet has proposed this word, or *Stigmates*, from *στιγμα*, 'a mark,' to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of the hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibrocartilaginous nature.

**STYLET**, *Specillum*.

**STYLI**, *Styloid processes*.

**STYLIFORM**, *Styloid*.

**STYLO-CERATOIDES**, *Stylo-hyoideus*—s. *Cerato-hyoideus*, *Stylo-hyoideus*.

**STYLO-CHONDRO-HYOIDEUS**. A name given, by Douglas and Albinus, to a fleshy fasciculus which the stylo-hyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylo-hyoides novus*, *Stylo-hyoideus alter*.

**STYLO-GLOSSUS**. A muscle situate at the anterior and superior part of the neck. It is narrow behind, much broader before; is attached to the styloid process of the temporal bone, and to the stylo-maxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

**STYLO-HYOÏDEUS**, *Stylo-hyoïdieu*, *Stylo-cer'ato-hyoïdeus*, *Stylo-ceratoï'des*, *Stylo-hyoïdes major*. A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,—especially posteriorly: anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

**STYLO-HYOID LIGAMENT** is a fibrous, flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

**STYLO-HYOID NERVE** is the second branch given off by the facial nerve.

**STYLOID**, *Styliform*, *Styloï'des*, *Graphioï'des*, *Graphoï'des*, *Graphio'des*, *Graphidoï'des*, *Belonoï'des*, from *στυλος*, 'a style,' 'a peg,' 'a pin,' and *ειδος*, 'shape.' Shaped like a peg or pin.

**STYLOID CORNUA**, see *Hyoides os*.

**STYLOID PROC'ESSES**, *Pencil-like Processes*, *Processus Belonoides* seu *Belonoides* seu *Belonoï'des* seu *Graphioïdes* seu *Graphoï'des*, *Styli*, are, 1. A long and slender process of the temporal bone, to which are attached the stylo-glossus, stylo-pharyngeus, and stylo-hyoideus muscles, and the stylo-hyoid and stylo-maxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

**STYLO-MASTOID**, *Stylo-mastoïdeus*. That which relates to the styloid and mastoid processes.

**STYLO-MASTOID ARTERY** arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylo-mastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells, and semi-circular canals; and terminates by anas-

tomosing with a branch of the *Arteria meningæ media*, which enters by the *Hiatus Fallopii*. Murray has given the name—*Stylo-mastoid*—to the posterior auricular artery itself.

**STYLO-MASTOID FORAMEN**, *Foramen Stylo-mastoidæum* or *F. Aquæductus Fallopii*, (F.) *Trou anonyme*, is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

**STYLO-MAX'ILLARY**, *Stylo-maxilla'ris*. That which relates to the styloid processes and jaw.

The **STYLO-MAXILLARY LIGAMENT** is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

**STYLO-PHARYNGEUS**, (F.) *Stylo-thyro-pharyngien*. A muscle, situate at the anterior and lateral part of the neck. It is slender; thin above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylo-pharyngeus, and palato-pharyngeus.

**STYLOPH'ORUM DIPHYL'LUM**, *Meconopsis diphyl'la*, *Celandine Poppy*, *Horn Poppy*, *Bruise root*. An indigenous plant, of the family *Papaveraceæ*, growing from western Pennsylvania to Wisconsin, which flowers from May to August. The juice is fetid and narcotic. Infused in wine, it has been given internally in gravel; and has been applied externally to contusions, &c.

**STYLO-THYRO-PHARYNGIEN**, *Stylo-pharyngæus*.

**STYLUS**, Sound.

**STYLUS EXCAVATUS**, *Specillum excavatum*. A hollow sound.

**STYMA**, Erection, Priapismus.

**STYMATOSIS**, Stimatosis.

**STYMMATA**, from *στυμμα*, 'that which constricts or thickens.' The most solid ointments. Also, the ingredients proper for increasing their consistence.

**STYPSIS**, Astriction, Constipation.

**STYPTERIA**, Alumen, Styptics.

**STYPTIC**, **EATON'S**. A name first given to *Helvetius's Styptic*, when introduced into Great Britain. It is now usually made of calcined green vitriol, ʒj; proof spirit, tinged with a little oak bark, Oij.

**STYPTIC**, **HELVETIUS'S**, see *Ferrum tartarizatum*.

**STYPTIC**, **RUSPINI'S**, *Liquor Stypticus Ruspini*. A nostrum, said to consist of gallic acid, a small quantity of sulphate of zinc and opium, dissolved in a mixture of alcohol and rose-water, which has had much reputation as an internal and external astringent.

**STYPTICS**, *Contrahentia*, *Constrictiva Medicamentata*, *Constringentia*, *Anastaltica*, *Styptica*, from *στυπτω*, 'I constrict.' Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hemorrhage,—*Enæ'mon*. A mechanical styptic is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, mechanically, in it. A chymical styptic is one which coagulates, chymically, the blood around a bleeding orifice.

**STYRAC'INUM O'LEUM**. Oil obtained by boiling storax in good olive oil.

**STYRAX**, from *στυραξ*, 'a reed,' in which it

was preserved. A resin obtained from the *Styrax officinalis* and *S. calamita*. It is the solid storax;—*officinal storax*. There are two kinds of storax met with: 1. The *Red Storax*, *Gum Storax*, *Thus Judæorum*, *Styrax rubra*, *Styracis balsamum*, *Balsamum styracis officinalis*, which is obtained by incision from the *Styrax officinalis*, and, perhaps, from the *Liquidambar orientalis*. The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax*, *Styrax calamita*. That which has been received in reeds or vessels, and has had saw-dust added immediately to thicken it. The odour of storax is fragrant; the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

**PURIFIED STORAX**, *S. colda*, *S. purificata*, is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence.—Ph. U. S. Dose, gr. x to xxx.

**STYRAX ALBA**, see *Myroxylon Peruiferum*—s. Benzoin, see Benjamin—s. Calamita, see *Styrax*—s. *Liquida*, *Liquidambar styraciflua*—s. *Officinalis*, see *Styrax*.

**STYSIS**, Erection, Priapismus.

**SUAVEOLENS**, Beneolens.

**SUB**. A common Latin prefix, signifying 'beneath.'

**SUBACTIO**, *Chiro'sis*, *Cheirosis*. The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

**SUBAFFECTIO**, *Hydropathia*.

**SUBAGITRIX**, *Tribade*.

**SUB-ATLŌÏDEUS**, *Infra-atlōideus*, (F.) *Sous-atlōïdien*. That which is situate beneath the atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

**SUB-AXŌÏDEUS**, *Infra-axōideus*, (F.) *Sous-axōïdien*. That which is below the axis or vertebra dentata. Chaussier has given this name to the third pair of cervical nerves.

**SUBBORAS NATRICUM**, Borax.

**SUBCARTILAGINEUM**, *Hypochondre*.

**SUBCLAVIAN**, *Subclavius*, *Subclavicula'ris*, from *sub*, 'under,' and *clavis*, 'the clavicle.' That which is under the clavicle.

**SUBCLAVIAN ARTERIES**, (F.) *Artères sous-clavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachio-cephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scalmi muscles, beyond which they take the name *axillary arteries*. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. *Upwards*, the *vertebral and inferior thyroïdal*. 2. *Downwards*, the *internal mammary and superior intercostal*. 3. *Outwards*, the *transverse cervical or posterior scapular*, the *superior scapular*, and the *posterior cervical or profunda*.

**SUBCLAVIAN OR SUBCLAVIUS MUSCLE**, *Subclavi'anus*, (F.) *Costo-claviculaire* (Ch.), *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

**SUBCLAVIAN VEINS**, (F.) *Veines sous-clavières*,

are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short; the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

**SUBCLAVIC'ULA**, from *sub*, 'under,' and *clavicula*, 'the clavicle.' The first rib.

**SUBCLAVICULARIS**, Subclavian.

**SUBCLAVIUS**, Subclavian muscle.

**SUBCRUEN'TUS**, 'somewhat bloody;' from *sub*, and *crueutus*, 'bloody;' *Hypophæ'mos*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

**SUBCRURÆI**, see *Cruræus*.

**SUBCUTANEOUS**, *Subcutaneus*, from *sub*, 'under,' and *cutis*, 'the skin;' *Intercutaneus*, (F.) *Sous-cutané*. That which is placed immediately under the skin.

**SUBCUTANEUS COLLI**, Superficialis colli — s. *Malæ* (Nervus). Orbital nerve.

**SUBDELIRIUM**, Typhomania.

**SUB'DITA**, *Subditi'tia*, from *subdere*, 'to put under;' *Pros'theta*. Medicines introduced into some one of the natural apertures;—as suppositories, pessaries, &c.

**SUBDITITIA**, Subdita.

**SUBDUCTIO**, Dejection.

**SUBER**, *Cork*:—the bark of the *Quercus Suber* or *Cork Tree*. (F.) *Liège*. Family, *Amentaceæ*. *Sex. Syst.* Monœcia Polyandria. Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk!

**SUBETHI**, *Conia*.

**SUBFRONTALIS SUTU'RA**. A suture resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

**SUBGRONDATIO**, Depression.

**SUBHUMERATIO**, Catomismos.

**SUBIGATOR**, *Tribade*.

**SUBINFLAMMATIO**, Subinflammation — s. *Hepatis*, *Hepatitis*, chronic.

**SUBINFLAMMATION**, *Subinflamma'tio*, from *sub*, 'under,' and *inflammatio*. *Inflammativ'cula*, *Hypophlegma'sia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. Lymphatic engorgements, serofula, herpes, and cancer he considered subinflammations.

**SUBINTRAN'TES FEBRES**, from *sub*, 'under,' and *intrare*, 'to enter.' *Communican'tes febres*. Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.—L. Bellini.

**SUBJECTIVE SENSATIONS**, see *Sensation*.

**SUBJEE**, *Banque*.

**SUBLIGACULUM**, *Truss*.

**SUBLIGATURA**, *Truss*.

**SUBLIMENTUM**, *Encephema*.

**SUBLIMATE**, **CORROSIVE**, *Hydrargyri oxymurias*.

**SUBLIMA'TION**, *Sublima'tio*, *Meteoris'mus*, *Hypno'sia*, from *sublimo*, 'I raise up.' An operation by which dry and solid matters are volatilized

and condensed at the upper part of a subliming apparatus. Calomel, sal ammoniac, &c., are commonly obtained by sublimation. The product of sublimation is a *Sub'limæ Sublima'tum*, (F.) *Sub'limé*.

**SUBLIMATUS CORROSIVUS**, *Hydrargyri oxymurias*.

**SUBLIME**, *Sublimis*.

**SUBLIMÉ**, *Enaërema*, *Sublimate* — s. *Corrosif*, *Hydrargyri oxymurias*.

**SUBLI'MIS**, (F.) *Sublime*, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term '*respiration sublime*' for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the *alæ nasi* at the time of inspiration.

**SUBLINGUA**, *Uvula*.

**SUBLIN'GUAL**, *Sublingua'lis*, (F.) *Souslingual*, from *sub*, 'under,' and *lingua*, 'the tongue.' That which is seated under the tongue.

**SUBLINGUAL ARTERY**, with some, is the *Lingual*. With others, it is a branch given off by the lingual opposite the genio-glossus muscle, which is distributed particularly to the sublingual gland, to the mylo-hyoid, and genio-glossus muscles, &c.

**SUBLINGUAL GLAND**, *Glan'dula sublingua'lis*, *G. Bartholin'na*, *G. Rivinia'na*, is seated in the substance of the inferior parties of the mouth, beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts—*Ductus Rivinia'ni* seu *Waltheria'ni*—some of which open beneath the frænum linguæ, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

**SUBLINGUIUM**, *Uvula*.

**SUBLINGUUM**, *Epiglottis*.

**SUBLOB'ULAR**, *Sublobula'ris*; from *sub*, 'under,' and *lobus*, 'a lobe.' That which is placed under a lobe.

**SUBLOBULAR VEINS OF THE LIVER**. The veins in which the intra-lobular veins terminate. By their union, the sublobular veins form the hepatic veins.

**SUBLUXATIO**, *Sprain*.

**SUBMAX'ILLARY**, *Submaxilla'ris*, *Infra-maxilla'ris*, (F.) *Sous-maxillaire*, from *sub*, 'under,' and *maxilla*, 'the jaw.' That which is seated beneath the jaw.

**SUBMAXILLARY GANGLION** is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

**SUBMAXILLARY GLAND**, *Maxillary Gland*, *Hypognath'aden*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastrics. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum linguæ, by a very small orifice. It is also called *Ductus inferior*.

**SUBMENTAL**, *Submenta'lis*, (F.) *Sousmental*,

from *sub*, 'under,' and *mentum*, 'the chin.' Situate under the chin.

**SUBMENTAL ARTERY** is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylo-hyoideus, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infra-hyoid region.

**SUBMENTAL VEIN**, which accompanies the artery, opens into the labial.

**SUBMER'SION**, *Submer'sio*, from *sub*, 'under,' and *mergere*, *mersum*, 'to plunge.' The act of plunging, or being entirely plunged, in a liquid.

*Asphyx'ia* by *submersion*, *Drowning*, *Asphyxia Immer'sorium*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages; but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

**SUBMISSIO**, Remission—s. *Cordis*, *Systole*.

**SUBMU'COUS**, *Submuc'o'sus*; from *sub*, 'under,' and *mucus*. Under a mucous membrane,—as the 'submucous areolar tissue.'

**SUBMURIAS AMMONIACO-HYDRARGYRICUS**, *Hydrargyrum præcipitatum*.

**SUBMUS'CLAR**, *Submuscula'ris*; from *sub*, 'under,' and *musculus*, 'a muscle.' Seated beneath muscles or a muscular layer.

**SUBOCCIP'ITAL**, *Suboccipita'lis*; from *sub*, 'under,' and *occiput*. That which is situated under the occiput.

**SUBOCCIP'ITAL NERVE**, *Occipital nerve*.

**SUBOR'BITAR**, *Suborbita'rius*, *Infra-or'bitar*, *Infra-orbita'lis*, *Infra-orbita'rius*, (F.) *Sous-orbitaire*, from *sub*, 'under,' and *orbita*, 'the orbit.' That which is seated beneath the orbitary cavity.

**SUBORBITAR ARTERY**, *Infra-orbitar*, *A.*, proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infra-orbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infra-orbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infra-orbitar vein follows the same course.

**SUBORBITAR CANAL**, *Infra-orbitar Canal*, (F.) *Canal ou Conduit sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen-infra-orbitarium*, (F.) *Trou sous-orbitaire*. The infra-orbitar artery and nerve pass along it.

**SUBORBITAR FISSURE**, *Infra-orbitar Fissure*, *Rima cana'lis orbita'rii*, *Fissura infra-orbita'lis*. A fissure in the superior maxillary bone; the superior commencement of the suborbitar canal.

**SUBORBITAR FOSSA**, Canine fossa.

**SUBORBITAR NERVES**, *Infra-orbitar Nerves*, seem to terminate the superior maxillary. They issue from the infra-orbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior* or *palpebral filaments*, *inferior* or *labial*, *internal* or *nasal*, and *external* or *buccal*.

**SUBPERITONE'AL**, *Subperitonea'lis*; from *sub*, 'under,' and *peritoneum*. That which lies under the peritoneum.

**SUBPERITONEAL APONEUROSIS**, *Fascia*, *subperitoneal*—s. *Ganglia*, see *Spermatic ganglion*.

**SUBPLACENTA**, *Decidua membrana*.

**SUBPOPLITE'US**, *Poplite'us* muscle.

**SUBPUBIC ARCH**, *Arcus subpu'bicus*. A strong arch of the superior pelvic aponeurosis, which completes the posterior orifice of the obturator or subpubic canal.

**SUBPUBIC MEMBRANE**, Obturator membrane.

**SUBPUBIO-FEMORALIS**, *Abductor brevis*—s. *Prostaticus*, *Compressor prostatae*.

**SUBPUTRIS**, *Hyposaprus*.

**SUBSCAP'ULAR**, *Subscapula'ris*, (F.) *Sous-scapulaire*, *Sous-scapulo-trochinien*, from *sub*, 'under,' and *scapula*, 'the shoulder-blade.' That which is beneath the scapula.

**SUBSCAPULAR FOSSA**, *Fossa Subscapula'ris*. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

**SUBSCAPULAR MUSCLE**, *Subscapula'ris Muscle*, *Immer'sus*, *Infra-scapula'ris*, (F.) *Sous-scapulo-trochinien* (Ch.), *Porte-fenille*, *Muscle sous-scapulaire*. A muscle situate in the above-mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapular fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

**SUBSCAP'ULAR NERVES** are two in number. One arises from the brachial plexus above the clavicle; the other from the posterior aspect of the plexus within the axilla. They are distributed to the subscapularis muscle.

**SUBSE'ROUS**, *Subsero'sus*; from *sub*, 'under,' and *serous*. Under a serous membrane,—as the 'subserous areolar tissue.'

**SUBSIDENTIA**, *Sediment*.

**SUBSTANCE ÉMAILLÉE DES DENTS**, *Enamel* of the teeth—s. *Horny*, see *Tooth*.

**SUBSTANCE, HYALINE**, *Cytoblastema*—s. *Intercellular*, *Cytoblastema*—s. *Vitrée des Dents*, *Enamel* of the teeth.

**SUBSTANCE, WHITE, OF SCHWANN**. A hollow cylinder within the tubular nervous fibre, which differs in composition and refracting power from the matter that occupies the centre of the tube.

**SUBSTANTIA ADAMANTINA DENTIUM**, *Enamel*—s. *Filamentosa dentium*, *Enamel*—s. *Hyalina*, *Cytoblastema*—s. *Ossea dentium*, see *Tooth*—s. *Osteoidea*, see *Tooth*.

**SUBSTANTIA PERFORATA ME'DIA**. When the pia mater has been removed from the space between the crura cerebri termed the *intercrural* or *interpeduncular*, the surface appears cribriform from the perforations of the numerous minute vessels which penetrate it. This is the *substantia perforata media* of Vicq d'Azyr.

**SUBSTANTIA PULPOSA DENTIS**, *Dental pulp*—s. *Rhomboidea*, *Corpus dentatum*—s. *Spongiosa Urethrae*, *Corpus spongiosum urethrae*—s. *Vitreum dentium*, *Enamel* of the teeth—s. *Vitreum*, *Cytoblastema*.

**SUBSTANTIVE**, *Substantivus*; from *substare*, (*sub* and *stare*), 'to stand under or subsist.' An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment: the condiment, as mustard, eaten with it, an *adjective* aliment.

**SUBSTILLUM**, *Stillicidium*.

**SUBSULTIO**, *Palpitation*.

**SUBSULTUS TEN'DINUM**, *Saltus ten'dinum*, *Clonus subsultus*, *Subsultus*, *Carphologia spasmod'ica*, *Myopal'mus*, *Twitching of the Ten-*

*don*, (F.) *Soubresaut*, from *subsilire*, *subsultum*, (*sub* and *salire*,) 'to make short leaps.' Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere; and is an evidence of great cerebral irritability, and debility, when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibilitas*, *Sclerotyphē febrilis*, and *Irritabilitas morbo'sa*.

SUBSURDITAS, Deafness.

SUB'UBERES, from *sub*, 'under,' and *ubera*, 'the breasts.' *Infantes sugen'tes*, Sucking children. Infants at the breast, in contradistinction to the *En'beres*, *απογαλακτοι*, or those which have been weaned.

SUBUN'GUAL, *Subun'guical*, (F.) *Sous-unguēale*, from *sub*, 'under,' and *unguis*, 'a nail.' Belonging to parts under the nail; — as *subunguial exostosis*, (F.) *Exostose sous-unguēale*, an exostosis under the nail of the great toe especially.

SUBVERSIO STOMACHI, Vomiturition.

SUBVERTEBRA, Sacrum.

SUBVERTEBRUM, Sacrum.

SUBVOLA, Hypothenar.

SUC. Succus — *s. de Citron*, see *Citrus medica* — *s. Gastric*, Gastric juice — *s. Médullaire*, Marrow — *s. du Limon*, see *Citrus medica*.

SUCCA'GO, from *succens*, 'juice.' The inspissated juice of plants; robs, jellies, &c.

SUCCIDA'NEUM, *Succida'neum*, *Substitu'tum*, *Antiballon'enium*, *Surrogat'um*, *Antemballon'enium*, *Quid pro quo*, from *succedere*, (*sub*, and *cedere*), 'to go under, to come in place of another.' An epithet for medicines that may be substituted for others possessing similar properties.

SUCCENTURIA'TUS, from *succenturiare* (*sub*, and *centuria*), 'to supply a soldier to fill a vacancy;' and hence, 'to substitute or put in the room of.' That which is a substitute for another; as *Renes succenturiati*, *Ventriculus succenturiatus*, &c.

SUCCHAR, Saccharum.

SUCCIDANEUM, Succedaneum.

SUCCIN, Succinum.

SUCCINCTURA, Diaphragm.

SUCCINCTUS, Diaphragm.

SUCCINI RESINA, Musk, artificial.

SUCCINIC ACID, *Ac'idum Succini*, *A. Succin'um*, *Acor Succin'ens*, *Sal Succini*, *Sal volatilē Succini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

SUC' CINUM, *Elec'trum*, *Ambra*, *Ambram*, *Ampar*, *Bereni'cē*, *Amber*, *Yellow Amber*, (F.) *Succin*, *Ambre jaune*. This substance, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis*. It is inodorous, except when heated or rubbed; insipid; in fragments of a pale golden-yellow colour; transparent, and has a shining lustre. S. g. 1.08; insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil—the *O'leum* or *Bal'samm Succini*, (F.) *Huile de Succin*. This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties.

The *O'leum Succini rectificat'um*, *Rectified Oil of Amber*, is made as follows:—*Oil of Amber*, Oj; *water*, Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in well-stopped bottles.—(Ph. U. S.)

The *White amber*, *Leuc'electrum*, (F.) *Ambre blanc*, is a variety.

SUCCINUM CINEREUM, Ambergris — *s. Griseum*, Ambergris.

SUCCION, Sucking.

SUCCISA, *Scabiosa succisa* — *s. Pratensis*, *S. succisa*.

SUCCOLATA, Chocolate.

SUCCORY, WILD, *Cichorium intybus*, *Chironia angularis*.

SUC'CUBUS, from *sub*, and *cubare*, 'to lie.' Some authors have used this word synonymously with nightmare. Others mean by it a female phantom, with which a man in his sleep may believe he has intercourse; — as *Incubus* has been applied to the male phantom, with which a female may dream she is similarly situate.

SUCCUS, *Chylus*, *Opos*, *Opis'ma*, *Chylis'ma*, *Ecchylo'ma*, *Apothlim'ma*, *Juice*, (F.) *Suc*. The fluid obtained by pressing plants, flesh, &c.; — *sne-cus expressus*. It is, also, applied to certain animal fluids, as *S. Gastricus*, &c.

SUCCUS ACACIE GERMANICÆ INSPISSATUS, see *Prunus spinosa* — *s. Arborum*, Sap — *s. Cicutæ spissatus*, *Extractum conii* — *s. Cyrenaicus*, *Laserpitium*.

SUCCUS ENTER'ICUS, *S. Intestinalis*, *Intestinal Juice*. The fluid secreted from the lining membrane of the small intestines.

SUCCUS EXPRESSUS, *Apothlimma* — *s. Gastricus*, Gastric juice — *s. Glycyrrhizæ*, *Extractum glycyrrhizæ* — *s. Hypocistidis*, see *Cytium* — *s. Intestinalis*, *Succus entericus* — *s. Japonicus*, *Catechu* — *s. Limonis*, see *Citrus medica* — *s. Liquiritiæ*, *Extractum glycyrrhizæ* — *s. Nervæus*, *Nervous fluid* — *s. Nutritius*, *Chyle* — *s. Orni concretus*, see *Fraxinus ornus* — *s. Pancreaticus*, see *Pancreas* — *s. Spissatus Aconiti Napelli*, *Extractum aconiti* — *s. Spissatus atropæ belladonnæ*, *Extractum belladonnæ* — *s. Spissatus conii maculati*, *Extractum cicutæ* — *s. Spissatus hyoseyami nigri*, *Extractum hyoseyami* — *s. Spissatus lactuæ sativæ*, *Extractum lactuæ*.

SUCCUS'SION, *Hippocratic Succus'sion*, *Succus'sio*, from *succutio* (*sub*, and *quatio*), 'I shake from beneath.' A mode of ascertaining the existence of a fluid in the thorax, (*fluctuation by succussion*,) by giving the body one or more slight shakes.

SUCCUSSIO, *Ballotement*.

SUCHOR, Saccharum.

SUCKING, *Suctio*, *Suctus*, *Athel'is*, *Bdalis*, *Myze'sis*, (F.) *Succion*, from *sugere*, *suctum*, 'to suck.' The act of drawing liquid into the mouth, by forming a vacuum with the tongue acting as a piston, during inspiration.

SUCKING BOTTLE. A bottle so formed, that, when filled with milk, it can be sucked from instead of the breast.

SUCKING CHILD, *Lactens*. A suckling.

SUCKLE, *Lactare*, *γαλακτορροφειν*, *τιθησκειν*, (F.) *Allaiter* or *Alaiter*. To give suck. To nurse.

SUCKLING, Lactation, Sucking child.

SUCRE, Saccharum — *s. Candi*, *Saccharum candidum* — *s. de Lait*, Sugar of milk — *s. de Saturne*, *Plumbi superacetas*.

SUCTIO, Exsuctio, Sucking,

SUCTION POWER. The force exerted on the blood in the veins, by the active dilatation of the heart. See Derivation.

SUCTORIA, from *sugo*, 'I suck.' Animals provided with mouths for sucking. Also, organs for sucking or adhesion, — hence termed *suctorial* — as '*suctorial oscula*.'

SUCTORIAL, see Suctoria.

SUCTUS, Sucking.

SUDAMINA, *Hydro'ata*, *Hydro'ta*, *Pop'u'la sudoral'es*, *Sufferen'cæ*, *Alhu'sef*, *Planta noctia*, *Boa*, from *sudor*, 'sweat.' Small vesicles,

which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended with much sweating. It is a military eruption. See Military fever.

SUDAMINA, Desudatio, *Échaubouluures*, Lichen tropicus.

SUDARIUM, Achicolum.

SUDATION, Hidrosis.

SUDATORIA, Hidrosis—s. Maligna, see Sudor Anglicus.

SUDATORIUM, Achicolum.

SUDOR, *Hidros*, (F.) *Sueur*, 'sweat.' The product of cutaneous transpiration, when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxyd of iron.

SUDOR, Military fever.

SUDOR ANGLICUS, *Hidron'osos*, *Hidrop'ya*, *Hidrop'y'etos*, *Febris sudatoria*, *Miliaris sudatoria*, *Sudor miliaris*, *Morbis sudatorius*, *Ephem'era maligna*, *E. sudatoria*, *E. Britannica*, *Pestis Britannica*, *Sudatoria maligna*, *E. Anglica pestilens*, *Sweating Sickness*, *Sweating Fever*, (F.) *Suette*, *S. Miliare*, *S. épidémique*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486; and recurred, at different times, until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name *SUETTE DE PICARDIE*, *Suette des Picards*, *Fièvre suante*; *Miliaris sudatoria*, *Sudor Picardicus*, to an epidemic disease, which has appeared several times in that province; the principal symptoms of which were profuse sweats and a military eruption. The disease recurred in 1821, and has been described, at length, by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues; and proposes to class it with variola, scarlatina, and measles.

SUDOR COLLIQUATIVUS, S. Profusus.

SUDOR CRUENTUS, *S. sanguineus*, *Hæmatidrosis*, *Hæmathidrosis*, *Epidrosis cruenta*, *Hæmorrhagia per Cutem*, (F.) *Hématidrose*, *Sueur de Sang*; *Sweating of blood*, *Bloody sweat*, *Hæmorrhage from the skin*. Cutaneous perspiration intermixed with blood:—a very uncommon affection.

SUDOR DULCIS, *Saccharorrhœa cutanea*, *Ephidrosis saccharata*. A discharge of saccharine matter by perspiration.

SUDOR LOCALIS, Meridrosis—s. Miliaris, Military fever, Sudor Anglicus—s. Partialis, Meridrosis.

SUDOR PERFUSUS, *S. Colliquativus*. A profuse or immoderate sweat.

SUDOR SANGUINEUS, Sudor cruentus—s. Universalis, Panhidrosis.

SUDORIFER, Sudoriferous, Sudorific.

SUDORIFEROUS, *Sudorifer*, *Hydrophorus*, from *sudor*, 'sweat,' and *fero*, 'I carry.' That which carries sweat, as the *sudoriferous* ducts or glands.

SUDORIFIC, *Sudorificum*, *Sudorifer*, *Hidroticum*, *Hydroticum*, *Hydrotopæum*, *Hidropoëticum*, from *sudor*, 'sweat,' and *facio*, 'I make.' A medicine which provokes sweating. See Diaphoretic.

FOUR SUDORIFIC WOODS, *Quat'or ligna sudorifica*, were, formerly, *guaiacum*, *perfumed cherry*, *sarsaparilla*, and *sassafras*.

SUDORIPAROUS, see Perspiration.

SUDORIS NULLITAS, Anidrosis—s. Privatio, Anidrosis—s. Suppressio, Ischidrosis.

SUET, Sevum.

SUETTE, Sudor Anglicus—s. *Épidémique*, Sudor Anglicus—s. *Miliare*, Sudor Anglicus—s. *de Picardie*, Sudor picardicus—s. *des Picards*, Sudor picardicus.

SUEUR, Sudor—s. *Anglaise*, Sudor Anglicus—s. *d'Expression*, Expression, sweat of—s. *de Sang*, Diapedesis, Sudor cruentus.

SUFFERSURÆ, Sudamina.

SUFFIMEN, Suffimentum.

SUFFIMENTUM, *Hypocapnis'ma*, *Suffim'entum*, *Thym'ama*, *Suffit'us*, *Suffumigatio*, *Suffumigatio*, (F.) *Parfum*. A perfume; suffumige; fumigation.

SUFFITIO, Fumigation.

SUFFITUS, Fumigation, Suffimentum.

SUFFLATIO, Puffiness.

SUFFOCATIO, Suffocation, Orthopnoea—s. Hypochondriaca, Hypochondriasis—s. Hysterica, Angone—s. Stridula, Cyanche trachealis—s. Uterina, Angone.

SUFFOCATION, *Suffocatio*, *Præfocatio*, *Apopnix'is*, *Asphyxia*, *Melanæ'ma*, from *sub*, 'under,' and *focus*, 'a fire-place.' Death, or suspended animation from impeded respiration, whether caused by the inhalation of noxious gases, *drowing*, *hanging*, *strangling*, or *smothering*. The principal morbid appearances in such cases are:—the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

*Treatment of suspended animation by suffocation in general.* The patient must be conveyed into a room not too warm. Blood-letting must be used, if at all, with caution;—friction must be employed with salt, or warm flannels; stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

SUFFOCATION, *Pnigoph'bia*, (F.) *Étouffement*, is used for threatened suffocation, as *strangling* is. It means the state of dyspnoea and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

SUFFOCATION UTÉRINE, Hysteria.

SUFFRAGO, Poples.

SUFFUMIGATION, Suffimentum.

SUFFUMIGE, Suffimentum.

SUFFUMIGIUM, Fumigation.

SUFFUMINATIO, Fumigation.

SUFFUSIO, Pseudoblepsia—s. Auriginosa, Icterus—s. Bilis, Icterus—s. Colorans, Chromopsia—s. Dimidians, Hemipopia—s. Exclarans, Oxyopia—s. Fellis, Icterus—s. Lentis crystallinæ, Cataract—s. Metamorphosis, Metamorphopsia—s. Multiplicans, see Diplopia—s. Myodes, Metamorphopsia—s. Nigra, Amaurosis—s. Oculi, Cataract, Pseudoblepsia—s. Oculorum, Metamorphopsia—s. Radians, Scotasma—s. Sanguinis, Echinomata.

SUGAR, Saccharum—s. Barley, Penidium—s. Candy, Saccharum candidum—s. Cane, see Saccharum—s. Diabetic, Glucose—s. Fruit, Glucose—s. Grape, Glucose—s. Honey, Glucose—s. of Lead, Plumbi superacetat.

SUGAR OF MILK, *Saccharum lactis*, *Galactosaccharum*, *Lactine*, (F.) *Sucre de Lait*, is obtained from whey by evaporation and crystallization. It possesses the demulcent properties of the sugars.

SUGAR, PINE, see Arrowroot—s. Starch, Glucose.

SUGARS, VARIOUS, see Saccharum.

SUGARBERRY, *Celtis occidentalis*.

SUGILLATION, *Sugillatio, Livor, Sugillation, (Ede'ma cruentum; a bruise; from sugillare, 'to give a black eye.'* By most authors used synonymously with ecchymosis and ecchymoma. It is, also, applied to the spots, or ecchymoses which occur in consequence of intrinsic causes,—in disease and in incipient putrefaction. It is common in dead bodies. To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises:—Whether the appearance have been induced before death or afterwards? Whether it be a case of ecchymosis or of sugillation? In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

SUGGRUNDIUM, perhaps from *suggredi*, 'to go under.' The eave of a house.

SUGGRUNDIUM OCULI, Superciliary arch—s. Supercilium, Frontal protuberance.

SUCIDA, Autochir.

SUCIDAL INSANITY, Suicide.

SUCIDE, *Suicidium*: from *sui cædes*, 'murder of one's self.' The act of killing one's self. *Autochiria, Autoctonia, Idiocetonia, Autophon'ia*. Suicide is very frequently the result of disease of the mind; the individual seeming, at times, to be irresistibly impelled to self-destruction.—*Melancholia Suicidum, M. autochiria, Suicidal Insanity*. Also, one who commits self-murder.

SUIE, Fuligo.

SUIE, Sevum.

SUITES DE COUCHES, Lochia.

SULCATUS, *Cannelé*, Grooved.

SULCULUS LABII SUPERIORIS, Lacuna Labii superioris.

SULCUS, *Semicanal'is, Semicanal'iculus*. A furrow. A groove. (F.) *Sillon*. Anatomists have given this name to grooves on the surface of bones and other organs.

French writers on anatomy often use the term *Sillon* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières*, 'gutters.' Also, the vulva.

SULCUS ANTERO-POSTERIOR JECORIS, see Liver—s. Labii superioris, Lacuna Labii superioris.

SULCUS, LAT'ERAL, ANTE'RIOR, OF THE SPINAL MARROW. A mere trace on the marrow, marked only by the attachment of the filaments of the anterior roots of the spinal nerves.

SULCUS, LATERAL, POSTERIOR, OF THE SPINAL MARROW, corresponds with the attachment of the posterior roots of the spinal nerves.

SULCUS TRANSVERSALIS, see Liver—s. Umbilicalis, see Liver.

SULFATE D'AMMONIAQUE, Ammonia sulphas.

SULFIDUM CARBONII, Carbonis sulphuretum.

SULFUR, Sulphur.

SULFURE DE CARBON, Carbonis sulphuretum.

SULPHAS ALUMINARIS, Alumen—s. Ammoniacæ Cupratis, Cuprum ammoniatum—s. Cadmicus, Cadmii Sulphas—s. Kalico-aluminium, Alumen—s. Natricus, Soda, sulphate of—s. Zincium, Zinci sulphas.

SULPHUR, *Sulfur, Scorith, Thei'ou, Thion, Aeric'h, Terra foli'ata, Fumus cit'rinus, Aqu'nila, Brimstone, (F.) Soufre*. The Native Sulphur is called *Rock Sulphur, Sulphur vivum*, &c. Sulphur, as we meet with it, is in rolls, Sulphur in

rot'ulis, *S. rotundum, Roll Brimstone*. It is a volcanic production, and is obtained, in large quantities, from Solfatara, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly odorous, when heated or rubbed; insipid; solid, and brittle. S. g. 1.99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

SULPHUR ANTIMONIATUM, Antimonii sulphuretum præcipitatum—s. Carburet of, Carbonis sulphuretum—s. Chloratum, Sulphur, Chloride of.

SULPHUR, CHLORIDE OF, *Sulphuris Chlor'idum, Sulphuris Dichlo'ridum, Dichlo'ride of Sulphur, Protochlo'ride of Sulphur, Hypochlo'ride of Sulphur, Subchlo'ride of Sulphur, Sulphur chlorat'um, Hypochlore'tum sulphuro'sum, Bisulph'uret of Chlorine, Chlorum hypersulphurat'um*, is obtained by passing dry chlorine gas over washed and dried flowers of sulphur, until they are for the most part dissolved, and distilling the decanted fluid from the excess of dissolved sulphur. One drachm of the liquid to an ounce of lard has been used in lepra, psoriasis, and other chronic cutaneous diseases. Ten drops, dissolved in ether, have been given in adynamic fever.

SULPHUR, DICHLORIDE OF, Sulphur, chloride of—s. Hypochloride of, Sulphur, chloride of—s. Iodatum, Sulphuris iodidum—s. Iodide of, Sulphuris iodidum—s. Ioduret of, Sulphuris iodidum—s. Liver of, Potassæ sulphuretum.

SULPHUR LOTUM, *Sulphur sublimat'um lotum, Washed Sulphur, Magisterium Sulph'uris, Sulphuris Flores loti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

SULPHUR PRÆCIPITATUM, *Lac Sulph'uris, Milk of Sulphur, Precipitated Sulphur, (F.) Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

SULPHUR, PROTOCHLORIDE OF, Sulphur, chloride of—s. Subchloride of, Sulphur, chloride of.

SULPHUR SUBLIMATUM, Sulphur, (Ph. U. S.) *Sublimed Sulphur, Flowers of Sulphur, (F.) Soufre sublimé, Fleurs de Soufre*, is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific (?), and it is a valuable remedy in most cutaneous affections that are local. Dose, ʒss to ʒij.

The fæces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brimstone, Dregs of Sulphur vivum, Sulphur caballinum, S. vivum, Sulphuris vivi recrementa*. They are very impure, and are only used externally.

SULPHUR, VEGETABLE, *Lycopodium*—s. Wort, Peucedanum.

SULPHURATUS, Sulphureous, Sulphurated. SULPHUREOUS, *Sulphure'ous, Sulph'urus, Sulphuratus, Sulph'uretted*. Possessing the properties of, or relating to, or containing sulphur.

SULPHURETTED, Sulphureous—s. Hydrogen, see Hydrogen, sulphuretted.

SULPHURETUM AMMONIACÆ, Ammonia sulphuretum—s. Ammonia hydrogenatum, Liqueur fumans Boyllii—s. Kalicum, Potassæ sulphuretum—s. Lixivia, Potassæ sulphuretum.

SULPHURIC ACID, *Ac'idum Sulph'uricum vel Sulfuricum, Olenum Vitrioli, Spir'itus Vitrioli, S. v. fortis, Acidum vitriol'icum, Oil of Vitriol, Spirit of Vitriol, Vitriolic Acid, Aridum Vitrioli diphlogisticatum, Acor Sulphuris, (F.) Acide Sulphurique on Sulfurique*. Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. g. 1.845 (Ph. U. S.) It is escharotic,

stimulant, and rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections.

**SULPHURIC ACID, AROMATIC, *Ac'idum Sulphuricum Aromaticum, A. vitriolicum aromaticum, A. vitriolicum aromaticum, A. vitriolicum aromaticum, A. vitriolicum aromaticum, Elixir vitrioli, E. v. aromaticum, E. vitrioli Mynsich'ti, E. vitrioli Edinburgen'sium, E. vitrioli cum tinctura aromatica, E. vitrioli dulcè seu acido-aromaticum, Alcohol cum aromatibus sulphuricatus, Tinctura acidi sulphurici,*** is formed of sulphuric acid, f̄ijjss; ginger, bruised, ʒj; cinnamon, bruised, ʒiss; alcohol, Oij. — Ph. U. S. Dose, gtt. x to xxx.

**SULPHURIC ACID, DILUTED, *Ac'idum Sulphuricum Dilutum, Acidum vitriolicum dilutum, Elixir vitrioli, Elixir vitrioli, Spiritus vitrioli ac'idus Vogle'ri, (F.) Acide sulfurique délayé,*** is formed, according to the Pharmacopœia of the United States, by adding *aq. destillat.* f̄ʒxij, to *acid. sulph.* f̄ʒj. It is tonic, astringent, and refrigerant. Dose, gtt. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ʒvj of water.

Very dilute sulphuric acid was formerly termed *Phlegma vitrioli*.

**SULPHURIS CHLORIDUM, Sulphur, chloride of—s. Dichloridum, Sulphur, chloride of.**

**SULPHURIS IODIDUM, *S. Ioduretum, Sulphur Iodatum, Ioduret or Podide of Sulphur, (F.) Soufre Ioduré, Iodure de Soufre.*** It is thus directed to be prepared in the Pharmacopœia of the U. S. (*Iodin.* ʒiv; *sulphur.* ʒj.) Rub the iodine and sulphur together in a glass, porcelain, or marble mortar, until they are thoroughly mixed. Put the mixture into a matrass, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the matrass in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the matrass to cool, break it, and put the iodide into bottles, which are to be well stopped.

**SULPHURIUS, Sulphureous.**

**SULPHUROSUS, Sulphureous.**

**SULPHUROUS, Sulphureous.**

**SULPHUROUS ACID, *Ac'idum sulphuros'icum, A. sulphuris volat'ile, A. Sulphuro'sum vel Sulphurosam, Spiritus sulphuris, Spiritus sulphuros'us volat'ilis, Sp. sulphuris per campanam, Sp. vitrioli phlogistica'tus, Gas sulphuris, (F.) Acide Sulfureux, Air Acide Vitriolique.*** Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur. It is sometimes used in the gaseous,—at others, in the liquid state. Sulphurous acid gas is used to disinfect cloths, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

**SULTZMALT, MINERAL WATERS OF.** Sultzmalt is a village in the department of the Upper Rhine: where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

**SUMAC DES CORROYEURS, *Rhus coriaria—s. Vénéneux, Rhus toxicodendron.***

**SUMACH, *Rhus coriaria.***

**SUMBUL. The name of a root, *Sumbuli radix, Jatamansi, Musk-root,* presumed to belong**

to the Umbelliferæ family, much employed in Russia and Germany against cholera. Its exact botanical history is not determined. It contains a strongly odorous principle like that of musk; and is regarded as an antispasmodic.

**SUMBULI RADIX, Sumbul root.**

**SUMEN, Hypogastrium.**

**SUMMER COMPLAINT.** A popular name in the United States, for diarrhœa occurring in summer. It is often, also, made to include dysentery and cholera infantum. With some it means cholera infantum only.

**SUMMER DISEASES, see Estival—s. Rash, Lichen tropicus.**

**SUMMITAS CUTIS, Epidermis.**

**SUMMUS HUMERUS, Acromion.**

**SUNBURN, Ephelides—s. Dew, Drosera rotundifolia—s. Flower, false, Helenium autumnale—s. Flower, swamp, Helenium autumnale—s. Flower, tickweed, Coreopsis trichosperma—s. Flower, turpentine, Silphium perfoliatum—s. Pain, see Hemicrania—s. Rash, Lichen—s. Stroke, *Coup de Soleil—s. Egyptian, Coup de Soleil.***

**SUPELLECTILE DIOGENIS, Palm.**

**SUPELLEX ANATOMICA, Museum anatomicum—s. Diogenis, Palm.**

**SUPER. A common Latin prefix; in composition, signifying 'above.'**

**SUPERBUS, Rectus superior oculi.**

**SUPERCHLORIDUM FORMYLICUM, Chloroform.**

**SUPERCILIARIS, Corrugator supercili.**

**SUPERCILIARY, *Superciliaris,* from *super,* 'above,' and *cilium,* 'the edge of the eyelid.' That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Sorcilier.***

**SUPERCILIARY ARCHES, *Superciliary Ridges, Arcus superciliar'es, Suggin'dia oculorum, (F.) Arcades sourcilières,* are two slightly projecting apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal *bosse,* and covered by the superciliaris muscle, to which they give attachment.**

**SUPERCILIARY RIDGES, Superciliary arches.**

**SUPERCILIUM, *Ophrys, Oph'rya, Vallum, (F.) Sourcil.* Same etymon. The eyebrows are two arched eminences,—convex above, and more or less prominent, according to the individual,—which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail*. The eyebrows are covered with short and stiff hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum, frontalis,* and *superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.**

**SUPERCILIUM ACETAB'ULI. The edge of the cotyloid cavity of the os innominatum.**

**SUPERCONCEPTION, see Superfœtation.**

**SUPEREVACUATIO, Hypercrisis.**

**SUPERFŒCUNDATIO, see Superfœtation.**

**SUPERFICIA' LIS COLLI, *Subcut'neus Colli.* A nerve formed by communicating branches from the second and third cervical nerves. It is distributed to the superficial parts of the neck.**

**SUPERFICIES PLANTARIS PEDIS, Sole.**

**SUPERFŒCUNDATIO, Superfœtation.**

SUPERFŒTATIO, Superfœtation.

SUPERFŒTATIO, *Superfœtatio*, *Epięye'sis*, *Hyperęye'sis*, *Superimpregnatio*, *Epięionę*, *Superęcuada'tio*, *Superęcuada'tion*, *Superimpregnatio*, from *super*, 'upon,' and *fœtare*, 'to bring forth young.' Conception of a fœtus—*epięye'ma*—in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy. Twin cases may be of this kind of *superconception*.

SUPERGEMINALIS, Epididymis.

SUPERGENUALIS, Patella.

SUPERHUMERALE, Epomis.

SUPERIMPRŒGNATIO, Superfœtation.

SUPERIOR AURIS, Attollens aurem—s. Rotundus clitoridis, Ischio-cavernosus.

SUPERLABIA, Clitoris.

SUPERLIGAMEN, Epidemius.

SUPERLIGULA, Epiglottis.

SUPERNUTRITIO LIENIS, Splenoncus—s.

Splenis, Splenoncus.

SUPEROXALAS KALICUM, Potass, oxalate of.

SUPERPURGATIO, Hypercatharsis.

SUPERSCAPULARIS, Supraspinatus—s. Inferior, Infra-spinatus.

SUPINATEUR COURT ou PETIT, Supinator radii brevis — s. *Grand ou long*, Supinator radii longus.

SUPINATIO, *Supina'tio*, from *supinus*, 'lying on the back.' The movement in which the forearm and hand are carried outwards, so that the anterior surface of the latter becomes superior.

In Pathology, *Supination*, *Supinatio*, *Hyptias'ma*, *Hyptias'mus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINATOR. Same etymon. That which produces supination. A name given to two muscles of the forearm.

SUPINATOR BREVIS seu MINOR, Supinator radii brevis — s. Longus seu major, Supinator radii longus.

SUPINATOR RADII BREVIS, *S. brevis* seu *minor*, (F.) *Épicondylo-radial* (Ch.), *Supinateur court* ou *petit supinateur*. A muscle, seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself, in such a manner that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

SUPINATOR RADII LONGUS, *S. longus* sive *major*, *Bra'chio-radial'is*, (F.) *Huméro-sus-radial* (Ch.), *Long* ou *grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPPEDANEA, Hypopodia.

SUPPLANTALIA, Hypopodia.

SUPPLEMENTA EPIPLOICA, Epiploic appendages.

SUPPLEMENTARY AIR, see Respiration.

SUPPORTER, ABDOMINAL. Belt, Russian — s. Utero-Abdominal, see Belt, Russian.

SUPPOSITION DE PART, Pregnancy, pretended.

SUPPOTORIUM, Suppository — s. Uterinum, Pessary.

SUPPOSITORY, *Supposito'rium*, *Hypoth'eton*, *Bacil'us*, *Balanis'mus*, *Balanus*, *Glaus*, from *supponere*, (*sub* and *ponere*, 'to put,') 'to put under.' Any solid medicine, in the form of a cone or cylinder, intended to be introduced into the rectum;—either for the purpose of favouring intestinal evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

SUPPRESSIO ALVI, Constipation — s. Lochiorum, Ischlocholia—s. Lotii, Ischuria—s. Mensium, Amenorrhœa — s. Menstruationis, Amenorrhœa—s. Sudoris, Ischidrosis.

SUPPRESSION DU FLUX MENSTRU-EL, Amenorrhœa—s. *de Part*, see Parturition—s. *d'Urine*, Ischuria.

SUPPURANS, Suppurative.

SUPPURATION, *Suppuratio*, *Epięye'ma*, *Purulen'tia*, *Pyo'sis*, *Pye'sis*, *Diapye'ma*, *Diapye'sis*, *Pyogen'ia simplex*, *Purulence*, *Purulency*, (F.) *Aboutissement*. Formation or secretion of pus, (see, also *Pyogenia*.) from *sub*, 'under,' and *pus*. It is a frequent termination of inflammation, and may occur in almost any of the tissues. This termination is announced by slight chill; by remission of the pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When pus is thus formed in the articular membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*: and such ulcers we are in the habit of establishing artificially in certain cases of disease.

SUPPURATIVE, *Suppurans*, *Suppurativus*, *Diapye'ticus*, *Epyo'ticus*, *Epyęcon'tus*. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

SUPRA. A common Latin prefix: in composition, signifying 'above.'

SUPRA-COSTA'LES, *Levato'res Costa'rum*, (F.) *Sur-costaux*, from *supra*, 'above,' and *costa*, 'a rib.' A name given to twelve small, fleshy fasciculi, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebræ to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others consider them to form part of the intercostales externi.

SUPRA-OMPHALODYMIA, see Somatodymia — s. et Infra-omphalodymia, see Somatodymia.

SUPRA-OR'BITAR, *Supra-orbita'lis*, *Supra-orbita'rius*, (F.) *Sus-orbitaire*, from *supra*, 'above,' and *orbita*, 'the orbit.' That which is situate above the orbit.

SUPRA-OR'BITAR FORA'MEN, *Fora'men Supra-orbita'rium*, *F. orbitarium sup'e'rius*, (F.) *Trou sus-orbitaire* ou *orbitaire sup'e'rieur*, is a foramen or notch completed by a ligament at the inner third of the orbital arch. It gives passage to the *supra-orbital* or *superciliary artery*, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

SUPRA-PU'BIAN, *Supra-pubic*, *Supra-pubiana's*, from *supra*, and *pubes*. That which is seated above the pubis.

SUPRA-PUBIAN NERVE, (F.) *Nerf sus-pubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of

these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh, and is distributed to the integuments of the upper and anterior part of the limb.

**SUPRA-RENAL**, *Supra-renal'is*, (F.) *Surrénal*, from *supra*, 'above,' and *ren*, 'the kidney.' Seated above the kidney—as the *supra-renal* capsule.

**SUPRA-SCAPULAR**; *Supra-scapula'ris*; from *supra*, 'above,' and *scapula*. Seated above the scapula;—as

**SUPRA-SCAPULAR NERVE**. This arises from the fifth cervical; passes through the supra-scapular notch, and is distributed to the supra-spinatus and infra-spinatus muscles.

**SUPRA-SCAPULARIS**, *Supra-scapularis*, and *Supraspinatus* muscle.

**SUPRA-SEMIORBITALIS**, *Orbicularis oris*.

**SUPRA-SPINATUS**, *Supra-spinosus*, (F.) *Sur-épineux*, *Sus-épineux*, from *supra*, and *spina*. That which is seated above the spine.

**SUPRA-SPINATA FOSSA**, (F.) *Fosse sus-épineuse*, is a triangular depression above the spine of the scapula.

**SUPRA-SPINATUS MUSCLE**, *Super-scapula'ris*, *Supra-scapularis*, (F.) *Sus-spino-scapulo-trochitérien*, *Petit sus-scapulo-trochitérien* (Ch.), is situate in the fossa supra-spinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supra-spinata: and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

**SUPRA-SPINOSA LIGAMENTA**, *Supra-spinal ligaments*, are two in number. 1. The *Dorso-lumbo-supra-spinal ligament*, (F.) *Ligament sur-épineux dorso-lombaive*, extending above the spinous processes of the dorsal and lumbar vertebrae from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical-supra-spinal ligament*, (F.) *Ligament-sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

**SUR**, *Supra*. A French prefix, signifying 'above.'

**SURA**, *Gastrocnem'is*, *Gastrocnem'ia*, *Gastrocnem'ium*; calf of the leg, (F.) *Mollet*, *Gras de Jambe*. The projection, formed at the posterior part of the leg by the gastrocnemii muscles. Also, the fibula.

**SURCILIER**, *Corrugator supercilii*, *Superciliary*.

**SURCOSTAUX**, *Supracostales*.

**SURCULI FELLEI**, *Pori biliarii*.

**SURCULUS**, *Ramusculus*.

**SURDENT** (F.), *supra*, 'above,' and *dens*, 'a tooth.' When a milk-tooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent*.

**SURDITAS**, *Cophosis*, *Deafness*.

**SURDITÉ**, *Cophosis*, *Deafness*.

**SURDOMUTITAS**, *Deaf-dumbness*.

**SUREAU COMMUN**, *Sambucus*.

**SURELLE**, *Oxalis acetosella*.

**SURÉPINEUX**, *Supra-spinatus*.

**SUR-EXCITATION**, see *Excitement*, and *Super-excitation*.

**SURFEIT**, *Colica capulosa*.

**SURGEON**, *Chirurg'geon*; old French, *Surgien*, *Chiro'nax*, *Chirurgus*, *Vul'nerum medicus*, *Chir'iat'ter*, *Chir'iat'er*, *Iatrus*, (F.) *Chirurgien*, from *χειρ*, 'the hand,' and *εργον*, 'work.' One who prac-

tises surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous: he must use the right or left with equal facility: his sight must be clear and penetrating: his mind intrepid; and although unmoved when he proceeds to operate, he must not be in haste, nor cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

In the middle ages, the Universities of Italy and Spain sent out educated surgeons, as well as physicians, under the name *chirurgi-physici*.

**SURGEON-APOTHECARY**. One who unites the practice of surgery with that of the apothecary. *A general practitioner*.

**SURGEON-DENTIST**, *Dentist*.

**SUR'GEONCY**. The office of a surgeon.

**SUR'GERY**, *Chirurg'gia*, *Chiriatri'a*, *Cheirix'is*, *Chi'risis*, *Chirix'is*, *Chiris'mus*, *Metacheirix'is*, *Metachir'risis*, *Metachir'ismus*, *Tractatio maana'ria*, *Medici'na operati'va*, *Medici'na eff'icax*, (F.) *Chirurgie*. The part of the healing art which relates to external diseases; their treatment; and, especially, to the manual operations adapted for their cure. Also, the office of a surgeon.

**SURGERY, ANAPLASTIC, MORIOPLASTIC**—s. *Anaplastique*, *Morioplastique*—s. *Dental*, *Dentistry*.

**SURGERY, MILITARY**, (F.) *Chirurgie militaire*, is that which relates to the operations to be performed on the field of battle, or subsequently;—with the attention to be paid to the wounded, &c.

**SURGERY, OP'ERATIVE**, is termed *Acir'gia*, *Acur'gia*, and *Acidur'gia*, (F.) *Médecine opératoire*.

**SURGERY, PLASTIC, MORIOPLASTIC**.

**SUR'GICAL**, *Chirurg'gicus*, (F.) *Chirurgical*, *Chirurgique*. That which relates to surgery; as *surgical anatomy*, *surgical operations*, *surgical instruments*, &c.

**SURGIEN**, *Surgeon*.

**SURINAMINE**, see *Geoffræa Surinamensis*.

**SUR-IRRITATION**, see *Irritation*.

**SUROXYGÉNÈSES**. A name given by Baumes to diseases attributed by him to superabundance of oxygen.

**SURPEAU**, *Epidermis*.

**SURRECTA ALBA**, *Ranunculus flammula*.

**SUR-RENAL**, *Supra-renal*.

**SURROGATUM**, *Succedaneum*.

**SURSELS**, see *Salt*.

**SURTOUTS LIGAMENTEUX DE LA COLONNE VERTÉBRALE**, *Vertebral ligaments*.

**SURUMPE** (S.) A disease to which the traveller in the Cordilleras is liable. It consists of a violent inflammation of the eyes, caused by the reflection of the bright rays of the sun. The eyes become highly inflamed, and the lids swell and bleed. The pain is intense, and frequently induces delirium.—Tschudi.

**SURVIE**, *Survivorship*.

**SURVIVORSHIP**, (F.) *Survie*, from *super-vivere*, (*super*, and *vivere*), (F.) *survivre*, 'to live longer.' In *legal medicine*, this word means the probability that any individual has survived others in an accident, which has been fatal to all. This is often an important question, connected with the inheritance of property, and on which physiology can rarely afford more than presumptive grounds for conclusion.

**SUS**, *Supra*. A French prefix, signifying 'above.'

**SUS-ACROMIO-HUMÉRAL**, *Deltoid*.

**SUS-CARPIEN**; from *sus*, (F.) 'above,' and *carpe*, 'the wrist.' Above the wrist. An epithet given by Chaussier to the dorsal artery of the wrist—*Artère sus-carpienne*—a branch of the radial.

**SUS-ÉPINEUX**, Supra-spinatus—s. *Maxillo-labial*, Levator anguli oris—s. *Maxillo-labial, graud*, Levator labii superioris alæque nasi—s. *Maxillo-labial moyen*, Levator labii superioris proprius—s. *Maxillo-nasal*, Compressor naris—s. *Omphalodymie*, see Somatodymia—s. *Optico-sphéno-scléroticien*, Rectus superior oculi—s. *Orbitaire*, Supra-orbital—s. *Phalangien du pouce*, Abductor pollicis brevis—s. *Pubio-fémoral*, Pectinalis—s. *Scapulo-trochitérien, le plus petit*, Teres minor—s. *Scapulo-trochitérien, petit*, Supra-spinatus—s. *Spino-scapulo-trochitérien*, Supra-spinatus.

**SUSCEPTIBILITY**, *Facile suscipiens*, (sub or sus, and capio, 'I take,') 'easily taking, or undertaking.' Sensibility, in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous*, is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

**SUSCEPTIO INTESTINORUM**, Intussusception.

**SUSPENDICULUM**, Cremaster.

**SUSPENSIA**, Enæorema.

**SUSPENSOIRE**, Suspensory.

**SUSPENSORIUM**, Suspensory—s. Testis, Cremaster.

**SUSPENSORY**, *Suspensorius*, from *suspendere*, (sub or sus, 'under,' and *pendere*, 'to hang,') 'to hang under.' (F.) *Suspensoire*. That which sustains or suspends.

**SUSPENSORY BANDAGE**, *Suspensorium*, is a bandage intended to support the scrotum, in cases of disease of the testicle or of serotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained below by strings passing between the thighs, and fixed to the cincture behind.

**SUSPENSORY LIGAMENT OF THE LIVER**, *Ligamentum suspensorium hepatis*, *Perpendiculum hepatis*, is a triangular duplicature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falcx of the umbilical vein.

**SUSPENSORY LIGAMENT OF THE PENIS** is a fibro-cellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

**SUSPENSUM**, Enæorema—s. Urinæ, Enæorema.

**SUSPIRATION**, Suspirium.

**SUSPIRATUS**, Suspirium.

**SUSPIRITUS**, Suspirium.

**SUSPIRIUM**, *Suspiratio*, *Suspiratus*, *Suspiritus*, from *sub* or *sus*, 'under,' and *spiro*, 'I breathe;' *Mygmus*, *Mychmus*, *Mychthismus*, *Stenagmus*, *Stenacis*, *Sigh*, *Suspiratio*, (F.) *Suspir*. A short breathing. A slow, voluntary contraction of the diaphragm and intercostal muscles, the effect of which is to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed,—a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the *sob*:—the latter being involuntary and spasmodic. Sighing, occurring in fevers to a great extent, indicates considerable depression. When accompanied with a vocal sound, it constitutes a *groan*.

**SUSPIRIUM CARDIACUM**, Angina pectoris.

**SUSTENTACULUM**, Aliment.

**SUSTENTATOR CLITORIDIS**, Erector clitoridis—s. Penis, Erector penis.

**SUSURRATION**, Whispering.

**SUSURRUS**, *Bourdouement*:—s. Aurium, Tinnitus aurium.

**SUTELA**, Suture.

**SUTERBERRY**, *Xanthoxylum fraxineum*.

**SUTORIUS**, Sartorius.

**SUTTER**, Saccharum.

**SUTURA ABDOMINALIS**, Gastroraphy—s. Arcualis, Coronal suture—s. Biparietalis, Sagittal suture—s. Clavata, Suture, quilled—s. Corporis callosi externa, see Raphe—s. Cranii squamosa, Squamous suture—s. Dentata, see Suture—s. Frontoparietalis, Coronal suture—s. Jugalis, Sagittal suture—s. Lambdoidalis, Lambdoid suture—s. Limbosa, see Suture—s. Lepidoides, Squamous suture—s. Mendosa, Squamous suture—s. Notha, see Suture—s. Obelæa, Sagittal suture—s. Ossium Spuria, Harmony—s. Proræ, Lambdoid suture—s. Punctata, Suture, common—s. Puppis, Coronal suture—s. Rhabdoides, Sagittal suture—s. Serrata, see Suture, Sagittal suture—s. Vera, see Suture.

**SUTURAL**, *Sutura'lis*; same etymon as the next. Relating to a suture.

**SUTURE**, *Sutura*, *Sute'la*, *Armè*, *Rhaphè*, from *suere*, *sutum*, 'to stitch'; *Dove-tail joint*, (F.) *Engrenure*. A kind of immovable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dove-tailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoid, and sagittal sutures are called *true sutures*, *suturae nothæ*.

A *dentated suture*—*Sutura dentata*—is one in which the processes are long and dentiform, as in the interparietal suture. In a *serrated suture*—*sutura seu syntaxis serrata*—the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sutura limbosa* there is along with the dentated margins a degree of bevelling of one, so that one bone rests on the other, as in the occipito-parietal suture.

**SUTURE**, in *Surgery*, *Rhaphè*, means an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutura sicca* or *dry suture*, in opposition to the *Sutura cruenta* or suture properly so called. The suture is generally performed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture*, the *quilled suture*, the *glover's suture*, and the *twisted suture*. 1. The **INTERRUPTED SUTURE**, (F.) *Suture à points séparés*, *Suture entrecoupée*, is performed by passing a needle, armed with a ligature, through the lips of the wound previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The **QUILLED SUTURE**, *Sutura clavata*, (F.) *Suture enchevillée* ou *empeignée* ou *empeignée*, *Compound Suture*, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plaster, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. 3. The **GLOVER'S ST-**

**TURE**, *Continued Suture, Uninterrupted Suture*, (F.) *Suture de Pelletier, Suture en surget*, is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura punctata*, (F.) *Suture à points passés*, has been used in similar cases. 4. The **ROYAL STITCH** or **SUTURE** is the name of an old operation for the cure of bubonocoele. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus excited. 5. The **TWISTED SUTURE**, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately around the pin, from one side of the division to the other, in the form of the figure ∞. The number of pins and sutures must, of course, correspond with the extent of the wound. This is the suture used in cases of harelip. 6. The **SUTURE À ANSE**, of Le Dran, has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound are tied together, and twisted so as to form a thread, which is fixed externally.

**SUTURE, COMPOUND**, Suture, quilled—s. Continued, Suture, glover's—s. *Écailleuse*, Squamous suture—s. *Empennée*, Suture, quilled—s. *Emplumée*, Suture, quilled—s. *Enchevillée*, Suture, quilled—s. *Entortillée*, Suture, twisted—s. *Entrecompée*, Suture, interrupted—s. False, Harmony—s. *Occipitale*, Lambdoid suture—s. Occipito-parietal, Lambdoid suture—s. *de Pelletier*, Suture, glover's—s. *à Points passés*, Suture, common—s. *à Points séparés*, Suture, interrupted—s. Sagittal, see Sagittal suture—s. *Squamense*, Squamous suture—s. *en Surget*, Suture, glover's—s. Superficial, Harmony—s. Uninterrupted, see Suture, glover's.

**SWAB**, from Sax. *ŷpebban*, 'to clean with a mop.' A piece of sponge or rag tied to a rod of whalebone or wood, for cleansing the mouth of the sick, or applying remedial agents to deep-seated parts.

**SWADDLING CLOTHES**, Swathing clothes. **SWAGBELLY**, Physconia.

**SWALLOW**, *Hirundo*—s. Wort, *Asclepias vincetoxicum*—s. Wort, orange, *Asclepias tuberosa*—s. Wort, tuberous-rooted, *Asclepias tuberosa*—s. Wort, white, *Asclepias vincetoxicum*.

**SWALLOW'S NEST**, *Nidus hirundinis*.

**SWAMP CABBAGE**, *Dracontium foetidum*—s. Dogwood, *Petala trifoliata*—s. Sickness, Milk sickness—s. Wood, *Cephalanthus occidentalis*, *Dica palustris*.

**SWATHING CLOTHES**, *Swaddling Clothes, Incunab'ula, Fasciæ, Panni*, from Sax. *ŷweðan*, 'to bind.' (F.) *Maillet*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

**SWEAT**, *Sudor*—s. Bloody, *Sudor cruentus*—s. Glands, see Perspiration—s. Root, *Polemonium reptans*—s. Scab, *Crusta genu equinae*.

**SWEATING**, *Hidrosis*—s. Bath, *Acicholum*—s. of Blood, see Diapedesis, and *Sudor cruentus*—s. House, *Acicholum*—s. Plant, *Eupatorium perfoliatum*—s. Room, *Acicholum*—s. Sickness, *Sudor Anglicus*.

**SWEATING SICKNESS**, **MALWAH**. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah in India.

**SWEET BITTER**, *Triostemum*—s. Bush, *Comptonia asplenifolia*—s. Fern, *Comptonia asplenifolia*—s. Flag, *Acorus calamus*—s. Pod, *Ceratonium siliqua*—s. Root, *Aralia nudicaulis*.

**SWELLING**, *Epanaste'ma, Excar'ma, Exœde'sis, Presis, Presma, Oœnus, Exturnefactio, Tumor, Tunnefactio*, (F.) *Enflure, Gonflement*, from Sax. *ŷpellan*, (D.) *swellen* (G.) *schwellen*, 'to swell.' Morbid increase of bulk in the whole, or a part, of the body. See *Tumour*.

**SWELING**, **WHITE**, *Hydrarthrus*. **SWERTIA CHIRAYITA**, *Gentiana chirayita*—s. Difformis, see *Calumba*—s. Frasera, see *Calumba*—s. *Lutea*, *Gentiana lutea*.

**SWIETE'NIA FEBRIFUGA**, *S. So'mida, Soy'm'ida, S. Febrif'uga, Febrifuge Swiete'nia*, (F.) *Mahogany febrifuge*. Family, *Meliaceæ*. *Sec. Syst.* Decandria Monogynia. The bark of this tree, which is a native of the East Indies, and called there *Roheua Bark*, has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ʒj to ʒij of the powder.

**SWIETE'NIA MAHOG'ANI**, *Cedrus Mahog'ani, Mahogany Tree*, grows in the West Indies and tropical America, and is possessed of similar properties.

**SWIETENIA SOMIDA**, *S. Febrifuga*.

**SWIMBLADDER**, *Airbladder*.

**SWIMMING**, *Natation*—s. Bladder, *Airbladder*—s. of the Head, *Vertigo*.

**SWOON**, *Syncope*.

**SWOONING**, *Syncope*.

**SYALADENITIS**, *Inflamma'tio glandula'rum saliva'linum*, from *σάλων*, 'saliva, adn', 'a gland,' and *itis*, denoting inflammation. Inflammation of the salivary glands.

**SYCAMINOS**, *Morus nigra*.

**SYCAMINUM**, see *Morus nigra*.

**SYCE**, *Ficus, Ficus carica*.

**SYCEA**, *Ficus*.

**SYCEPH'ALUS**, from *συν*, 'with,' and *κεφαλή*, 'head.' A monster having two heads united together.

**SY'CION**, *συκκων*, from *συκων*, 'a fig.' A decoction of dried figs.

**SY'CIOS ANGULA'TUS**. *One-seeded star cumber, Wild Bry'ony*. The roots and seeds of this indigenous plant, *Order Cucurbitaceæ*, are bitter, purgative and diuretic. It is used in dropsy in the same cases as bryony.

**SYCI'TES**, from *συκων*, 'a fig.' Wine, in which figs have been infused.

**SYCITES**, *Catorchites*.

**SYCYMA**, *Ficus*.

**SYCO'SIS**. Same etymon. A tumour of the shape of a fig. Also, a fungous ulcer. A horny excrescence about the eyelids. Dr. Bateman defines it:—an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches;—*Phyma Syco'sis, Rose'ola fico'sa*. Of this he has given two species: 1. *Syco'sis Mentis, S. barbæ, Men'tagra, Ment'igo, Varns Men'tagra, Chiuuicik, Barber's Itch*, (F.) *Dartre pustulense mentagre*:

and, 2. *Sycosis Capilli*, *S. Capillitii*. The treatment, in both cases, resembles that for porrigo favosa.

SYCOSES, Ficus.

SYCUM, Ficus.

SYDERATIO, Sideratio.

SYLLEPSIS, Conception.

SYLLEPSIOLOG'IA, from *συνληψις*, 'conception,' and *λογος*, 'a description.' The doctrine of conception.

SYM, SYN, *συν*, 'with, together,' like the *cum*, *con*, *col*, *cor*, &c., of the Latins. A common prefix. Before *b*, *p*, *ph*, *ps*, and *m*, — *sym*, or *syn*, is changed into *sym* or *syn*, (com;) before *c*, *ch*, *g*, *k*, and *x*, into *syn* or *xyn*, *συγ*, *ξυγ*, (con;) before *l* into *syl* or *xyl*, (col;) before *r* into *syn* or *xyn* (cor;) and before *s* into *sy* or *xy*, and *sys*, (co and cos.

SYMBLEPHARON, Ankyloblepharon.

SYMBLEPHAROSIS, *Concretio palpebrarum cum bulbo oculi*, from *συν*, 'with,' and *βλεφαρον*, 'an eyelid.' A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, Ankyloblepharon.

SYMBOL, *Symbolum*, *Character*, (F.) *Caractère*, from *συμβάλλω* (*συν*, 'with,' and *βάλλω*, 'I throw'), 'I compare.' A sign or representation of something else.

The following are the symbols used in prescriptions:

- R, Recipe. See R.
- gr., *Granum*, a grain.
- ℞, *Scrupulus seu scrupulum*, a scruple.
- ʒ, *Drachma*, a drachm.
- ℥, *Uncia*, an ounce.
- lb, *Libra*, a pound.
- ℥j, *Minimum*, a minim.
- f℥, *Fluidrachma*, a fluidrachm.
- fʒ, *Fluiduncia*, a fluidounce.
- ℔, *Octarius*, a pint.
- C, *Congius*, a gallon.

SYMBOLE, Commisure.

SYMBOLEUSIS, Consultation.

SYMBOLISMUS, Sympathy.

SYMBOLIZATIO, Sympathy.

SYMBOLICA, Symptomatology.

SYMBOLUM, Sympathy.

SYMMELES, from *συν*, 'with,' and *μελος*, 'an extremity.' *Monopus*. A genus of monsters whose extremities are joined together: *Sirens*. — I. G. St. Hilaire.

SYMMETRIA, Symmetry.

SYMMET'RICAL, *Symmet'ricus*, *συμμετρος*, from *συν*, 'with,' and *μετρον*, 'to measure.' An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like halves; or which — if situate, the one to the right, the other to the left of this line — have a similar conformation, and a perfectly analogous arrangement.

SYMMETRICAL DISEASES, see Symmetry.

SYMMETRY, *Symmet'ria*, *Commen'sium*, *Membrorum Om'nium Competentia*, *Proportio*. The regularity in form, observed in many parts, situate on the median line; and, also, the resemblance which exists between many organs that are situate on each side of the median line. Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, locomotion, &c.

It has been affirmed — and there is evidence in favour of the assertion — to be a law of the animal economy, that, when uninfluenced by disturbing agents, all general or constitutional diseases affect equally and similarly the correspond-

ing parts of the two sides of the body. This has been called the *Symmetry of Diseases*; and the resulting diseases are said to be *symmetrical*.

SYMMETRY OF DISEASES, see Symmetry.

SYMPARATERESIS, Observation.

SYMPASMA, Catapasma.

SYMPATHESIS, Sympathy.

SYMPATHETIC, *Sympathicus*, *Sympatheticus*, (F.) *Sympathique*, from *συν*, 'with,' and *πάθος*, 'suffering.' That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbid cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection*, produced by irritation in the intestinal canal.

The epithet *sympathetic* is, also, given to different nerves. See Trisplanchnic, Pneumogastric, and Facial.

SYMPATHETIC, GREAT, Trisplanchnic nerve — s. Middle, Pneumogastric.

SYMPATHETIC POWDER, *Pulvis sympatheticus* of Sir Kenelm Digby, was composed of calcined sulphate of iron, prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

SYMPATHETICUS MINOR, Facial nerve.

SYMPATHETISMUS, Sympathy.

SYMPATHIA, Consent of parts.

SYMPATHICUS, Sympathetic.

SYMPATHIQUE, Sympathetic.

SYMPATHY, *Sympathi'a*, *Sympathe'sis*, *Compassio*, *Consensus*, *Sympatheticus'mus*, *Sympathi'a*, *Conflux'io*, *Conspirat'io*, *Commer'cium*, *Consortium*, *Homoiopathi'a*, *Homoe'th'nia*, *Adelphi'e'is*, *Symbolis'mus*, *Symboliza'tio*, *Syn'bolum*. The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between different organs throws light on the etiology of diseases, their seat, and the particular organ towards which our therapeutical means should be directed. See Irritation.

SYMPEPSIS, Coction.

SYMPEXIS, Concretion.

SYMPHORA, Congestion.

SYMPHOREMA, Congestion.

SYMPHORESIS, Congestion.

SYMPHORICAR'PUS RACEMOSUS, *Snow-berry*. An indigenous plant, Order Caprifoliaceae, Tribe Lonicerae, whose berries are large, bright white, and remain till winter; flowering from June to September. The root is tonic and astringent, and has been used in ague; and by the Indians in syphilis.

SYMPHYIA, Symphysis.

SYMPHYOCEPH'ALUS, *Metop'ages*, *Cephalop'ages*, from *συνφωσις*, 'united together,' and *κεφαλη*, 'head.' A monstrosity in which twins are united by the head.

SYMPHYSEOT'OMY, *Symphysiot'omy*, *Synchondrot'omy*, *Symphysiotom'ia*, *Symphysiotom'ia*, from *συνφωσις*, and *τεμνω*, 'I cut.' The operation or section of the *Symphysis*, *Sigaultian operation*, *Sigaultian section*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *Désymphyser*, the fe-

male is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien*.

SYMPHYSIA, from *συμφυσις*, 'a growing together.' A malformation consisting in the union of parts that are usually divided. — Breschet.

SYMPHYSIOTOMIA, Symphyseotomy.

SYM'PHYSIS, *Symphy'ia*, *Coalescent'ia*, *Coal'itus*, from *συμφω* (*συν*, 'with,' and *φω*, 'I grow'), 'I unite together.' A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name symphysis has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis*, *sacro-iliac symphysis*, &c. See *Monster*.

SYMPHYSIS, Coalescence, Commixture, Insertion — s. Cartilaginea, Synchondrosis — s. Ligamentosa, Syndesmosis — s. Ossium muscularis, Syssarcosis — s. Pubis, Pubic articulation.

SYMPHYSOTOMY, Symphyseotomy.

SYMPHYTOS, Hereditary.

SYM'PHYTUM. Same etymon. *Symphytum officinale* seu *album* seu *Bohe'micum*, *Consolida major*, *Comfrey*, *Alum*, *Alus*, (F.) *Grande Consoude*. Family, Boraginæ. *Sec. Syst.* Pentandria Monogynia. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhœa, &c.

SYMPHYTUM, *Solidago virgaurea* — s. *Album*, *Symphytum* — s. *Bohemium*, *Symphytum* — s. *Minimum*, *Bellis* — s. *Minus*, *Prunella* — s. *Officinale*, *Symphytum*.

SYMPHYTUM PETRE'UM, *Coris Monspelien'sis*, *Montpell'ier Coris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, *Sanicula*.

SYMPLOCARP'US ANGUSTISPATHA, *Dracontium angustispatha* — s. *Fœtida*, *Dracontium fœtidum*.

SYMPOD'IA, *Monopod'ia*, from *συν*, 'together,' and *πους*, *ποδος*, 'a foot.' A monstrosity in which there is coalescence of the lower extremities.

SYMPTOM, *Sympto'ma*, *Ac'cidens*, *Casus*, from *συν*. 'with,' and *πτωμα*, 'a fall,' from *πιπτω*, 'I fall.' Any change, perceptible to the senses, in any organ or function, which is connected with morbid influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *symptoms of symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of evacuations in dysentery is a symptom of symptoms. See *Sign*.

SYMPTOMA TURPITUDINIS, *Nymphomania*.

SYMPTOMATIC, *Symptomat'icus*, That which is a symptom of some other affection. Thus we speak of a symptomatic disease, in opposition to one that is idiopathic.

SYMPTOMATOLOGY, *Symptomatolog'ia*, *Symbolog'ica*, from *συνπτωμα*, 'a symptom,' and *λογος*, 'a treatise.' The branch of pathology, the object of which is the knowledge of symptoms.

SYMPTOSIS, from *συν*, 'with,' and *πιπτω*, 'I fall.' Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

SYNEREMA, *Corrugation*.

SYN'ETION, *Concausa*.

SYNANCHE, *Cynanche*, *Cynanche tonsillaris*.

SYNANCIE, *Cynanche*.

SYNAPHYMENTITIS, see *Ophthalmia*.

SYNAPTASE, see *Amygdalin*.

SYNARTHRODIA, *Synarthrosis*.

SYNARTHRO'DIAL, *Synarthrodial'is*, from *συν*, 'with,' and *ἀρθρωσις*, 'articulation.' That which belongs to synarthrosis; as *Synarthrodial articulation*.

SYNARTHROSIS, *Synarthro'dia*, *Abarticula'tio*, *Coarticula'tio*. An immovable articulation. Synarthrosis includes three species: *Suture*, *Harmony*, and *Gomphosis*.

SYNATHROESIS, *Congestion*.

SYNATHROISMUS, *Congestion*.

SYNCAN'THUS, from *συν*, 'with,' and *καθος*, 'the corner of the eye.' A morbid adhesion between the globe of the eye and the orbit.

SYNCHONDRO'SIS, *Sym'physis* seu *Cop'ula* seu *Connex'io cartilagin'ea*, *Chondrosyndes'mus*, from *συν*, 'with,' and *χονδρος*, 'a cartilage.' Union or articulation of bones by means of cartilage: — as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

SYNCHONDROTOMY, *Symphyseotomy*.

SYNCHRONIUS, *Synchronous*.

SYN'CHRONOUS, *Syn'chronus*, *Synchron'ius*, *Isoch'ronous*, from *συν*, 'with,' and *χρονος*, 'time.' That which occurs at the same time. Thus the pulsations of an artery may be synchronous with those of the heart.

SYNCHRONUS, *Synchronous*.

SYNCHYSIS, *Confusion*.

SYNCIPUT, *Sinciput*.

SYNCLONESIS, *Synclonus*.

SYN'CLONUS, *Synclone'sis*, from *συνκλονεω*, (*συν*, 'with,' and *κλονεω*, 'I shake,') 'I shake together.' *Clon'ici universal'es*, *Clonus*, (Young.) Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will. Also, general spasm, *spas'mus univ'ersalis*. See *Tremor*, *Chorea*, &c.

SYNCLONUS BALLISMUS, *Paralysis agitans* — s. *Berberia*, *Berberi* — s. *Chorea*, *Chorea* — s. *Raphania*, *Raphania* — s. *Saltans*, *Chorea* — s. *Tremor*, *Tremor*.

SYNCOMIS'TUS, from *συνκομιζω*, (*συν*, and *κομιζω*), 'I bring together.' *Autop'yros*, *Panis domesticus*, *secundarius*, *cibarius*, *confusus*, *vens*. Bread of the whole wheat or of the unsifted meal. *Household bread*. Also, a cataplasm made of the same.

SYN'COPAL, *Syncopa'lis*, *Syncopt'icus*, *Syncoptus*. Same etymon as *Syncope*; as *Syn'copal Fever*, *Febri's Syncoपाल'is*. A pernicious intermittent, characterized by repeated attacks of syncope.

SYN'COPE, from *συνκοπτω*, 'I fall down.' *An'imi defect'io*, *Animi deli'quium*, *Leipopsych'ia*, *Lipopsych'ia*, *Apsych'ia*, *Apsyx'ia*, *Lipsis An'imi*, *Asphyx'ia*, *Aropsych'ia*, *Lipothym'ia*, *Leipothym'ia*, *Eclips'is*, *Su'bitus animi casus*, *Siccus*, *Swooning*, *Fainting*, *Fainting fit*, *Faintness*, *Exol'tion*, (F.) *Evanouissement*, *Défaillance*, *Pamaison*. Complete and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are

all that will be required during the fit. See Asphyxia, and Suffocation.

An approach to this condition is termed *faintness*.

SYSCOPE ANGINA, Angina pectoris — s. Anginosa, Angina pectoris.

SYNOPTICUS, Syncepal.

SYNOPTUS, Syncepal.

SYNCRITICA, Astringents.

SYNDACTYLUS, Aschistodaetylus.

SYNDESMITIS, see Ophthalmia. Also, inflammation of articular ligaments; *Inflammatio ligamentorum*.

SYNDESMOG'RAPHY, *Syndesmograph'ia*, from *συνδέσμος*, 'a ligament,' and *γραφη*, 'a description.' A description of the ligaments. The part of anatomy which describes the ligaments.

SYNDESMOL'OGY, *Syndesmolog'ia*, from *συνδέσμος*, 'a ligament,' and *λογος*, 'a treatise, discourse.' A treatise on the ligaments.

SYNDESMO-PHARYNGEUS. A fasciculus of the constrictor pharyngis superior.

SYNDESMOS, Ligament.

SYNDESMOSIS, *Synncro'sis*, *Synymen'esis*, *Connex'io* seu *Sym'physis ligamento'sa*, *Commis'sura ner'va*, *Connervatio*, *Colligatio*, from *συνδέσμος*, 'ligament,' The articulation of two or more bones by means of ligament; — as of the radius with the ulna.

SYNDESMOT'OMY, *Syndesmatom'ia*, from *συνδέσμος*, 'ligament,' and *τεμνω*, 'I cut or dissect.' Dissection of the ligaments.

SYNDESMUS, Bandage, Ligament.

SYNDROMĒ, from *συν*, 'with,' and *δρῶμος*, 'a course.' *Concur'sus*, *Concourse*. A name given by the Empirical Sect to the union of symptoms which takes place in diseases. *Syndromē plethorica*, for example, meant the union of symptoms produced by plethora.

SYNDYASMUS, Coition.

SYNECHES, see Continued fever.

SYNECHIA, from *συν*, 'with,' and *εχειν*, 'to have,' or 'to hold.' Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia anterior*; the latter, *S. posterior*.

SYNERGIA, Synergy.

SYNERGIA, Synergy.

SYNERGIE, Synergy.

SYNERGY, *Synerg'ia*, *Synergi'a*, (F.) *Synergie*; from *συν*, 'with,' and *εργον*, 'work.' A correlation or concurrence of action between different organs in health; and, according to some, in disease.

SYNESIS, Intellect.

SYNEUROISIS, Syndesmosis.

SYNEZIZIS, *Synize'sis*, *Considen'tia*, from *συν*, 'with,' and *ζευνναι*, 'to join.' *Parop'is Synizesis*, *Caligo d. Synizesi*, *Caligo Pupill'ia*, *Imperforatio pupillae*, *Closure* or *occlusion* or *obliteration* of the Pupil, *Phthisis Pupill'ae*, *Amyo'sis*. This disease is sometimes faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital*. At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with synezisis are completely blind: — the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. This operation is called the *operation for artificial pupil*.

SYNGENES, Inhereditary.

SYNGENICUS, Congenital.

SYNHYMENESIS, Synyuencsis.

SYNIMENESIS, Synymenesis.

SYNIZESIS, Considentia, Synezisis.

SYNNEUROISIS, Syndesmosis.

SYN'OCHIA, from *συνεχω*, (*συν*, and *εχω*, 'I have or hold,') 'I continue.' *Inflam'matory Fever*, *Dynam'ic Fever*, *Angiop'ya*, *Sthenop'ya*, *Febris canis' des*, *F. canmot' des*, *Febris den'rens*, *F. ardens*, *Febris contin'ua sanguin'ca*, *Febris contin'ua non putris*, *Syn'ochus* (Vogel), *Febris acmastic'a*, *Synochus impu'tris* (Galen), *Febris acu'ta*, *F. acu'ta sanguin'ca*, *F. continens*, *F. continens non putrida*, *F. angioten'ica*, *F. sthenica*, *F. sanguin'ca*, *Homot'onos*, *F. inflammatoria*, *Ene'cia canna*, *Ene'cia*, *F. ton'ica*, *Phlogop'yrus*, *Canma*, *Calentura continua*, (F.) *Fièvre ardente*, *F. continue inflammatoire*, *F. sanguine*, *F. irritative*, *F. angioténique*, *F. inflammatoire*, *Gastro-entérite intense*, *General inflammation*. A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-coloured; disturbance of mind slight. It requires, of course, the most active treatment.

SYNOCHA RHEUMATICA, Rheumatism, acute—s. Vaccina, Vaccina.

SYN'OCHAL, *Synocha'lis*; same etymon. Relating to, or having the characters of, synocha.

SYN'OCHUS, *Ene'cia syn'ochus*, *Febris lenta*, (Linnaeus,) same etymon. Continued fever, compounded of synocha and typhus: — in its commencement often resembling the former; in its progress, the latter: *Mixed fever*, *Common continued fever*, *Syn'ochoid fever*. See Continued fever, Fever, and Typhus.

SYNOCHUS, Synocha—s. Biliosa, Fever, gastric, Fever, bilious—s. Catarrhalis, Influenza—s. Icteroles, Fever, yellow—s. Imputris, Synocha—s. Miliaria, Miliary fever—s. Varicella, Varicella.

SYNOLCE, Spasm.

SYNONIA, Synovia.

SYNSTEOG'RAPHY, *Synsteogra'phia*, from *συν*, 'with,' *σσειον*, 'a bone,' and *γραφω*, 'I describe.' The part of anatomy which describes the joints.

SYNSTEOL'OGY, *Synsteolog'ia*, from *συν*, 'with,' *σσειον*, 'a bone,' and *λογος*, 'a treatise.' A treatise on the joints.

SYNSTEO'SIS, *Synosto'sis*, from *συν*, 'with,' and *σσειον*, 'a bone.' Union by means of bone.

SYNSTEOT'OMY, *Synsteotom'ia*, from *συν*, 'with,' *σσειον*, 'a bone,' and *τεμνειν*, 'to cut.' Dissection of the joints.

SYNSTOSIS, Synstosis.

SYNO'VIA, from *συν*, 'with,' and *ωον*, 'an egg.' *Mucila'go*, *Un'guen articula'rē*, *Synovia*, *Arthro'gia articula'ris*, *Unctu'culum* seu *Megma articula'rē*, *Mucila'go articulo'rnm* seu *unctura'rum*, *Humor articula'ris*, *Hydrarthrus*, *Humor* seu *Hum'idum uat'rum* seu *Gluten articulo'rnm* (F.) *Synovie*. A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia has been found, on analysis, to consist of water, a little albumen, soda, chloride of sodium, phosphate of lime, and—Fourcroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNO'VIAL, *Synovia'lis*. That which relates to the synovia.

SYNOVIAL GLANDS, *Havers's Glands*, *Glandulae articula'res*, *G. Synovia'les*, *G. Haversianae*, are the secretory fringes, which float in the interior of the synovial capsules (see Capsules.) They do not seem to be glandular. They have been

called *Synovial fimbriae*, (F.) *Franges synoviales*.

SYNOVITIS; from *Synovia*, and *itis*, a termination denoting inflammation. A term, badly compounded, applied at times to inflammation of the synovial membrane.

SYNOVITIS RHEUMATISMALIS, Rheumatism, (acute.)

SYN'TASIS, *συντασις*, from *συντείνω*, (*συν*, and *τείνω*, 'I stretch,') 'I strain.' Tension of parts: hence *συντακτικά*, are medicines which render parts tense. *Syntexis*, on the other hand, means *Colligatio*, or wasting of the body; from *συντηκω*, 'I melt together.'

SYNTAXIS, Articulation, Reduction, Taxis—s. Serrata, see Suture.

SYNTECOPYRA, Hectic fever.

SYNTECTYCOPYRA, Hectic fever.

SYNTENO'SIS, from *συν*, 'with,' and *τενων*, 'a tendon.' A species of articulation in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula with the tibia, &c.

SYNTERESIS, Prophylaxis.

SYNTERETICUS, Prophylactic.

SYNTEXIS, Colligation, Consumption.

SYNTHENA. A term employed by Paracelsus to designate a species of epilepsy, accompanied by cardialgia and tormina.

SYN'THESIS, *Reunio*, 'composition or putting together,' from *συν*, and *τιθεμι*, 'I place.' A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other, *Reunio partium separatarum*, *Syn'thesis of contiguity*, means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Syn'thesis of contiguity* is the reduction of displaced organs; as in cases of hernia and luxations.

SYNTHESIS, Composition.

SYNTHETIS'MUS, same etymon. The aggregate of operations and means for reducing a fracture, and maintaining it reduced:—comprising extension, counter-extension, coaptation, and bandaging.

SYNTRIMMA, Contritio.

SYNTRIPSIS, Contritio.

SYNTROPHOS, Connutritus.

SYNULOSIS, Cicatization.

SYNULOTICA, Cicatrisantia.

SYNUSIA, Coition.

SYNYME'NESIS, *Synhymene'sis*, *Synime'nesis*, from *συν*, 'with,' and *μνη*, 'a membrane.' Union of bones by membrane, as in the case of the bones of the head in the fœtus.

SYNYMENESIS, Syndesmosis.

SYPHAR, Peritoneum.

SYPHILIDES, *Syphilitida*, (F.) *Dermo-syphilitides*, *Dermatosies véroleuses*. Same etymon as Syphilis. The cutaneous eruptions that accompany constitutional syphilis are so denominated by the French writers.

SYPHILIDIA'TER, *Syphilitidia'trus*, from *Syphilis*, and *ιατρος*, 'a physician.' A pox doctor. One who occupies himself in treating syphilis.

SYPHILIDOMANIA, Syphilomania.

SYPHYLIPHO'BIA; from *Syphilis* and *φοβος*, 'dread.' A morbid dread of syphilis, giving rise to fancied symptoms of the disease: a form of hypochondriasis.

SYPHILIS, *Morbus Gallieus*, *Siphilis*, *Syphilis'mus*, *Cachexia venerea*, *Cachochymia Venerea*, *Malum venereum*, *Morbus Italicus*, *M. Hispanicus*, *Puden'dagra*, *Lues*, *Me'veinum*, *Lues venerea*, *Lues syphilis*, *Morbus aphrodisius*, *Sy-*

*philis venerea*, *S. maligna*, *Morbus Neapolitanus*, *Morbus Indicus*, *Patura*, *Basilis'eus*, *Boæ*, *Sod'oma Gallo'rum*; *Veneruel*, *Veneruel Disease*, *Pox*, *French Pox*; (F.) *Vérole*, *Maladie vénérienne*, *Mal de Naples*, *Mal Français*, *Maladie de Vénus*. The etymology of syphilis is unknown. Some consider it to proceed from *συσ*, 'a hog;' and others, from *σιφος*,—formed, by contraction, from *σιταλος*, 'shameful,' 'dirty,' &c. It is an infectious disease, communicable by coition, or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, followed sooner or later by a bubo. The chancre is a primary symptom or sore; but there are others which are secondary or constitutional. These are:—ulcers in the throat; copper-coloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed tertiary phenomena. The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century [?]. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every antisiphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight for the cure of chancre: for venereal sore throat, and other recent constitutional symptoms, eight or ten weeks will be required; and, of course, a longer time, if these symptoms have persisted longer. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and tonics and eutrophics have been administered. The preparations of iodine have been much used, of late, in the revellent treatment of this disease.

SYPHILIS INDICA, Frambœsia.

SYPHILIS PSEUDO-SYPHILIS, *Lues Syphilo'des*, *Pseudo-syphilis*. A term given to ulcers or other affections that resemble syphilis, but are indeterminate in their character,—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. The *Sivrens*, *Radesyge*, &c., have been referred to this head.

SYPHILISMUS, Syphilis.

SYPHILOG'RAPHER, from *syphilis*, and *γραφω*, 'I describe.' A writer on syphilis.

SYPHILOID, *Syphiloï'des*; from *syphilis*, and *ειδος*, 'resemblance.' Resembling syphilis,—as 'a syphiloid affection.'

SYPHILOMANIA, *Syphilidomania*,—vulgarly, *Noddlé Pox*. A mania, with which some persons are affected, so that they subject themselves to antiveneal treatment, under the notion that they are affected with syphilis.

SYPHITA, Somnambulism.

SYPHIAURICULARIS, Ottenchytes.

SYPHION, see Siphon.

SYRIGMOPHO'NIA, from *στυγμος*, 'whistling,' and *φωνη*, 'voice.' A piping state of the voice.

SYRIGMUS, Tinnitus aurium.

SYRINGA, Eustachian Tube, Fistula, Syringe, Trachea.

SYRINGA CLYSMATICA, Syringe, (Clyster.)

SYRINGA VULGARIS, *Lilac vulgaris*, *Common Lilac*. The leaves and fruit are bitter and somewhat acrid, and have been used as a tonic and antiperiodic.

SYRINGE, *Syrinx*, *Syring'a*, *Sipho Siphuncululus*, *Squirt*, (F.) *Seringue*, from *συναγξ*, 'a pipe.'

A familiar apparatus through which any liquor is squirted.

Various forms of syringe are used in medicine and surgery.

SYRINGE, CLYSTER, *Syringa clysmatica*, *Clystantium*, (F.) *Clyso pompe*. A syringe for administering clysters.

SYRINGE, CRIPING, *Antlia sanguisuga*.

SYRINGIUS, Fistulous.

SYRINGITIS EUSTACHII, Inflammation of the Eustachian tube.

SYRINGMOS, Tinnitus aurium.

SYRINGODES, Fistulous.

SYRINGOTOME, *Syringotomus*, *Syringotomum*, from *συνρυξ*, 'a pipe,' 'a fistula,' and *τεμνειν*, 'to cut.' A surgical instrument, formerly used in the operation for *fistula in ano*. It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts. The operation for fistula in ano has been called *Syringotomy*.

SYRINGOTOMY, *Syringotomia*. Same etymon as the last. The operation for fistula in ano by incision.

SYRINX, Eustachian tube, Fistula, Syringe, Trachea—s. *Hiera*, Vertebral column.

SYRMAISMOS, from *συναίρω*, 'I evacuate.' A gentle evacuation by vomiting or stool.

SYROP, Syrup—s. *d'Ail*, Syrupus alii—s. *d'Armoise composé*, Syrupus aromaticus—s. *de Chicorée composé*, Syrupus de cichorio compositus—s. *des Cinq racines*, Syrupus e quinque radicibus—s. *de Cuisinier*, Syrupus de sarsaparilla et sennâ compositus—s. *d'Éther*, Syrupus cum æthere sulphurico paratus—s. *de Gingembre*, Syrupus zingiberis—s. *de Guimauve*, Syrupus althææ—s. *de Louque vic*, Mellitum de mercuriali compositum—s. *de Mercure*, Syrupus de mercurio mediante gummi—s. *de Mûres*, Syrupus mori—s. *de Nerprun*, Syrupus rhamni—s. *de Pavots blancs*, Syrupus papaveris—s. *de Pommes composé*, see Syrupus sennæ—s. *de Quinquina avec le Vin*, Syrupus de kinâ kinâ cum vino—s. *de Roses pâles*, Syrupus rosæ—s. *de Roses rouges*, Syrupus rosæ—s. *de Vinaigre*, S. acetii.

SYRUP, *Sirup*, *Syrupus*, *Scrapium*, *Scrapium*, (F.) *Syrup*; derived, according to some, from *συνω*, 'I draw,' and *σνος*, 'juice'; but more probably, from the Arabic *Siruph*, *Sirab*, or *Scharab*, which signifies 'a potion.' A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, it is directed, that syrups, whose density is not precisely determined by the process, should have the s. g. 1.261, when boiling, and of about 1.319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable. See Syrupus simplex.

SYRUP, see Syrupus—s. of Almonds, Syrupus amygdalæ—s. Antiscorbutic, Syrupus antiscorbuticus—s. of Buckthorn, Syrupus rhamni—s. of Capillaire, common, Syrupus simplex—s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino—s. of Citric acid, Syrupus acidi citrici—s. of Clove July flower, Syrupus caryophylli rubri—s. of Clove pinks, Syrupus Caryophylli rubri—s. of Ether, Syrupus cum æthere sulphurico paratus—s. of Five roots, Syrupus e quinque radicibus—s. of Garlic, Syrupus alii—s. of Ginger,

Syrupus zingiberis—s. of Gum Arabic, Syrupus acaciæ—s. *Hive*, Syrupus scillæ compositus—s. of Honey, Mellitum simplex—s. of Iodide of iron, Liquor Ferri iodidi—s. of Ipecacuanha, Syrupus ipecacuanhæ—s. of Lemon, Syrupus limonis—s. of Marshmallows, Syrupus althææ—s. of Meadow saffron, Syrupus colchici autumnalis—s. of Mugwort, compound, Syrupus aromaticus—s. of Mulberries, Syrupus mori—s. of Orange juice, see Syrupus aurantii—s. of Orange peel, Syrupus aromaticus—s. of Orgeat, Syrupus amygdalæ—s. of Poppies, Syrupus papaveris—s. of Poppy, red, Syrupus rhæados—s. of Rhatany, Syrupus krameria—s. of Rhubarb, Syrupus rhej—s. of Rhubarb, aromatic, Syrupus rhei aromaticus—s. of Rhubarb, spiced, Syrupus rhei aromaticus—s. of Saffron, Syrupus croci—s. of Squills, Syrupus scillæ—s. of Squill, compound, Syrupus scillæ compositus—s. of Suceory, compound, Syrupus de eichorio compositus—s. of Tolu, Syrupus toltanus—s. of Vinegar, Syrupus acetii—s. of Violets, Syrupus violæ—s. of Wild cherry bark, Syrupus Pruni Virginianæ.

SYRUPUS, S. simplex.

SYRUPUS ACA'CIÆ, *Syrup of Gum Arabic*, (*Acaciæ* 3ij, *Sacchar*. ʒxv, *Aq.* fʒviiij. Dissolve the gum in the water; add the sugar, and strain. Ph. U. S.) A good pectoral syrup. Dose, fʒj to ʒiij.

SYRUPUS ACE'TI, *S. Ac'idi Aceto'si*, *Syrup of Vinegar*, (F.) *Syrup de Vinaigre*. (*Aceti* Oijss, *sacch. purif.* lbiiiss. Boil to form a syrup. Ph. E.) It is refrigerant and antiseptic. Dose, fʒj to fʒij.

SYRUPUS ACIDI ACETOSI, S. acetii.

SYRUPUS AC'IDI CIT'RICI, *Syrup of Citric Acid*. (*Acid. citric. pulv.* ʒij; *Ol. Limon.* ℥iv; *Syrup.* Oij. Rub the acid and oil with an ounce of the syrup; add the rest of the syrup, and dissolve with a gentle heat. Ph. U. S.) Virtues the same as those of the Syrupus Limonis.

SYRUPUS CUM Æ'THERE SULPHURICO PARATUS, *Syrup of Ether*, (F.) *Sirup d'Éther*. (Very pure sugar, 1000 p.; distilled water, 500 p.; dissolve in the cold, and strain; add sulphuric ether, 48 p. Shake for five or six days, and draw off the limpid syrup. Ph. L.) Properties like those of ether.

SYRUPUS AL'LII, *Syrup of Garlic*, (F.) *Syrup d'Ail*. (*Allii* recent. concis. ʒvij, *acet. destillat.* Oj, *sacchar.* ℥ij. Macerate the garlic in the vinegar, in a glass vessel, for four days; then express the liquor and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. Ph. U. S.) Use, same as that of garlic. Dose, fʒj to fʒij.

SYRUPUS ALTHÆ'Æ, *Syrup of Marshmallow*, *Syrupus ec Althæ'æ*, S. de *Althæ'a*, S. *Althææ officinalis*, (F.) *Syrup de Guimauve*. (*Althææ rad. recent.* cont. lbss, *sacch. pur.* ℥ij, *aqua* Oiv. Boil the root in the water to one-half, and press out the liquor; when cold, defecate; add the sugar, and boil. Ph. L.) Emollient and demulcent. Dose, fʒj to fʒiiij.

SYRUPUS AMOMI ZINGIBERIS, S. zingiberis.

SYRUPUS AMYGDALÆ, *Syrup of Almonds*, *Syrup of Orgeat*, *Orgeat*. (*Amygdal. dulc.* ℥ij, *amygdal. amar.* ʒiv, *aqua*, Oij, *sacchar.* lbvj. Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluidounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool, put it into bottles,

which must be well stopped, and kept in a cool place. *Ph. U. S.*)

SYRUPUS ANTICAUSODICUS, see Anticausodic.

SYRUPUS ANTISCORBUTICUS, *S. de Armorac'ia compositus, Antiscorbutic Syrup.* (Leaves of cochlearia, buckbean, water-cresses, horse-radish root and bitter oranges, each ℥ij, cinnamon, ℥iiss. Cut, and pour on white wine ℔iv. Macerate for two days; distil over Oj in a sand-bath; add to this of sugar, ℔ij, and form a syrup. Again, take what remains in the cucurbit: pass it through cloth; let it rest; decant, and add sugar ℔ij; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. *Ph. P.*) Antiscorbutic, alterative, tonic, stomachic, &c. Dose, fʒij to fʒiij.

SYRUPUS AROMATICUS, *S. de Artemisi'ia compositus, Compound Syrup of Mugwort, (F.) Syrup d'armoise composé.* (Tops of artemisia vulgaris, in flower, ℥vj, inula root, ligusticum levisticum, and fennel, each ℥ss, pennyroyal, catmint, savine leaves, each ℥vj, marjoram, hyssop, pyrethrum, rue, basil, each ℥iij, aniseed and cinnamon, each ℥ix; bruise and macerate in hydromel ℔xvii; distil over Oss; add to this a pound of sugar. Again, take the liquid that remains in the cucurbit, strain it gently; and add sugar ℔iv. Then mix the two. *Ph. P.*) Tonic, emmenagogue, &c.

SYRUPUS DE ARMORACIA COMPOSITUS, S. antiscorbuticus—s. de Artemisi'ia compositus, S. antiscorbuticus—s. Asparagi, see Asparagus.

SYRUPUS AURANTII, S. Aurantio'rum, S. Citri Aurantii, S. Corticis Aurantii, S. Aurantii Corticis (Ph. U. S.), S. e Cortic'ibus Aurantio'rum, S. de Cortice Aurantio'rum, Syrup of Orange peel. (Aurant. cort. cont. ℥ij, aq. ferv. Oj, sacch. ℔ijss. Macerate the peel in the water for twelve hours. Add the sugar. *Ph. U. S.*) Stomachic. Dose, fʒj to fʒij.

A Syrup of Orange Juice, Orange Sherbet, Syrupus e succo Aurantiorum, may be made by adding white sugar ℔ij to ℔j of the juice of oranges, strained and clarified.

SYRUPUS BALSAMICUS, S. toluianus.

SYRUPUS CARYOPHYLLI RUBRI, S. Dianthi Caryophylli, Syrup of Clove July flower, Syrup of Clove Pinks, Syrupus infusio'nis florum caryophyllo'rum. (Petalo'rum dianth., caryoph. recent. unguibus resectis ℔j, aquæ bull. Oiv, sacch. purif. ℔vij. *Ph. E.*) Aromatic.

SYRUPUS CASSIE SENNÆ, S. sennæ.

SYRUPUS DE CICHORIG COMPOSITUS, S. de Rheo, Compound Syrup of Succory, (F.) Syrup de chicorée composé. (Root of succory ℥vj, leaves of succory ℥ix, leaves of fumitory and scolopendrium, each ℥iij, Althekegi berries ℥ij. Boil in water Oxiv to Oxij; pass through cloth, and dissolve in white sugar ℔v. Boil till it has the consistence of syrup. Again, take water Oviii, rhubarb ℥vj, yellow sanders and cinnamon, each ℥ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. *Ph. P.*) It is laxative and stomachic. Dose, fʒj to fʒss.

SYRUPUS CINCHONÆ CUM VINO, S. de kinâ kinâ cum vino.

SYRUPUS CINCHO'NLÆ, Syrup of Cincho'nia. (Simple syrup one pound; sulphate of cinchonina nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS CITRI AURANTII, S. aromaticus.

SYRUPUS COLCHICI AUTUMNALIS, S. Colchici, Syrup of Meadow Saffron. (Rad. colch. autumn. recent. ℥j, acidi acetosi fʒxvi, sacch. pur. ℥xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain, with gentle expression. To the strained fluid add the sugar, and boil to a syrup. *Ph. E.*) Diuretic, antiarthritic. Dose, fʒj to fʒss, or more.

SYRUPUS CORTICIS AURANTII, S. aromaticus—s. Citri medicæ, S. limonium—s. e Succo citro-num, S. limonium.

SYRUPUS CROCI, Syrup of Saffron. (Croci stigmat. ℥j, aquæ fervent. Oj, sacch. purif. ℔iiss. *Ph. L.*) Cardiac. Chiefly used for colouring.

SYRUPUS DIACODION, Diacodion—s. Dianthi Caryophylli, S. caryophylli rubri.

SYRUPUS EMETICÆ, Syrup of Em'etina. (Simple syrup ℔j, emetine 16 gr.) In small doses, expectorant; and in large, emetic.

SYRUPUS EMPYREUMATICUS, Melasses—s. Ferri iodidi, Liqueur Ferri iodidi—s. Hydrargyri, Syrupus de mercurio mediante gummi—s. Infusio'nis florum caryophyllorum, Syrupus caryophylli rubri.

SYRUPUS IPEACACUAN'HE, Syrup of Ipeacacua-ha. (Ipeacac. in pulv. crass. ℥j, alcohol. dilut. Oj, sacchar. ℔iiss, aquæ q. s. Macerate the ipeacacua-ha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to 6 fluidounces, again filter, and add sufficient water to make the liquid measure a pint; add the sugar, and evaporate by a water-bath to a proper consistence. *Ph. U. S.*) It may also be prepared by displacement.

SYRUPUS DE JALAP'Â, Syrup of Jalap. (Pulv. Jalapæ ℥x, sem. coriandr., fœnicul. dulc. āā ℥ss; aquæ fʒxijss, sacch. ℥xxv. *Ph. P.*) Cathartic. Dose, fʒij to fʒss for children.

SYRUPUS DE KINÂ KINÂ CUM VINO, S. Cincho'na cum vino, Syrup of Cinchona with wine, (F.) Syrup de quinquina avec le vin. (Cort. cinchonæ officinalis ℥ij, ext. cinchonæ ℥vj, vini albi (Vin. Lunel. vel enjusvis ei similis), Oj, alcohol (s. g. .985, to .915.) fʒj, sacchar. alb. ℔iiss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. *Ph. P.*) Dose, fʒss to fʒij.

SYRUPUS KRAME'RIÆ, Syrup of Rhatany. (Ext. Kramer. ℥ij, aquæ Oj, sacchar. ℔ijss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. *Ph. U. S.* It may also be made by displacement from Kramer. in pulv. crass. ℔j, sacchar. ℔iiss; aq. q. s.) An adjunct to astringent mixtures; or given in diarrhoea, a tea-spoonful to a child.

SYRUPUS LIMONIS, S. Limonium—s. Succu limonis, S. limonium.

SYRUPUS LIMO'NUM, S. limonis, (Ph. U. S.) S. citri med'icæ, S. e succo citro'num, S. e succo limo'num, S. succi limo'nis, Syrup of Lemon, Lemon Syrup. (Limon. succ. colat. Oj, sacchar. ℔ij.) Cooling, antiseptic.

SYRUPUS E MECONIO, S. papaveris—s. de Melle, Mellitum simplex.

SYRUPUS DE MERCURIO MEDIAN'TE GUMMI, Mercurius gummosus Plenck'ii, Syrupus Hydrar'gyri, (F.) Syrup de mercure ou Mercure gommeux de Plenck. (Hydrargyri pur. ℥j, p. gum. acacia, ℥iij, syrup diacod. ℥ss. Rub together till the mercury is extinguished. *Ph. P.*) Possesses the properties of the blue pill. Dose, gr. ij to viij, or more.

SYRUPUS MORI, S. e succo moro'rum, S. succi mori, Syrup of Mul'berries, (F.) Syrup de mûres. (Mori succ. colat. Oj, sacchar. purif. ℔ij. *Ph. L.*) Gratefully refrigerant.

SYRUPUS E SUCCO MORORUM, S. mori.

SYRUPUS MORPHIÆ ACETA'TIS, Syrup of acetate of morphia. (Syrup, one pint, acetate of morphia, gr. iv.) Dose, two tea-spoonfuls, as an opiate. It is about the strength of the same quantity of syrup of poppies.

SYRUPUS MORPHIÆ SULPHA'TIS is made in the same way.

SYRUPUS NIGER, Melasses.

SYRUPUS PAPAVERIS, S. papaveris somniferi,

*S. papaveris albi*, *S. e meco'nio*, *S. de meconio*, *Diaco'dion*, *Syrup of poppies*, (F.) *Syrup de palets blancs ou diacode*. (*Papav. capsul. exsicc.* et contus. exemptis seminibus, ℥xiv, sacch. pur. ℔ij, aq. fervent. cong. ijss. Macerate the capsules in water for 12 hours; boil to a gallon, and express strongly. Boil the liquor to Oij; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as form a syrup. *Ph. L.*) One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a SYRUPUS OPII, called *Common Syrup of Poppies*, which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties, those of opium and syrup.

SYRUPUS DE PAPAVERE ERRATICO, *S. rhœados* — *s. de Pomis compositus*, see *S. sennæ*.

SYRUPUS PROTEÆ, see *Protea mellifera*. *Syrupus Pruni Virginia'næ*, *Syrup of Wild cherry bark*. (*Pruni Virginia.* in pulv. crass. ℥v, sacch. char. ℔ij, aquæ q. s. Moisten the bark with water; let it stand for 24 hours; transfer it to a percolator; pour water gradually upon it, until a pint of filtered liquor has passed. Add the sugar in a bottle, and dissolve by agitation. *Ph. U. S.*, 1851.) Dose, as a demulcent expectorant, f℥j to f℥ij.

SYRUPUS QUININÆ, *Syrup of Quinia*. (*Simple syrup*, 2 pints, sulphate of quinia, 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS E QUINQUE RADICIBUS, *Syrup of five roots*, (F.) *Syrup des cinq racines*. (*Rad. apii, feniculi, apii petroselinii*, āā ℥v. Infuse for 24 hours in boiling water Oiss, and strain. *Rad. asparag., rusci aculeati*, āā ℥v, aquæ, Ovij. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add white sugar, ℔vj. *Ph. P.*) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f℥ss to f℥j, or more.

SYRUPUS RHAMNI, *S. Rhamni cathartici*, *S. de Spinâ cervinâ*, *S. spinæ cervinæ*, *Syrup of Buckthorn*, (F.) *Syrup de nerprun*. (*Rhamn. baccar. succ. recent. Oiv, zingib. rad. concis., pimentæ bacc. contrit.*, āā ℥ss, sacch. purif. ℔iiss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours, and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. *Ph. L.*) Cathartic, but apt to gripe. Dose, f℥iv to f℥ij.

SYRUPUS RHEI, *Syrup of Rhubarb*. (*Rhei*, in pulv. crass. ℥ij; *Alcohol*, Oss; *Aquæ Oiss*; *sacchar. ℔ij*. Mix the alcohol and water; pour f℥iv on the rhubarb, mixed with an equal bulk of sand, and allow the whole to stand four hours; put the mass into a percolator, and gradually pour on the remainder of the alcohol and water. By means of a water-bath, evaporate to f℥xiiij; add the sugar, and make a syrup. *Ph. U. S.*) Dose to a child, as a laxative, one or two teaspoonfuls.

SYRUPUS RHEI AROMATICUS, *Aromatic Syrup of Rhubarb*, *Spiced Syrup of Rhubarb*. (*Rhei*, cont. ℥iiss; *Caryophyl. cont.*, *Cinnam. cont.* āā ℥ss; *Myrist. cont.* ℥ij; *Alcohol. dilut. Oij*; *Syrup Ovj*. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain; then, by means of a water-bath, evaporate the liquor to a pint, and while still hot, mix with the syrup previously heated. *Ph. U. S.*) It may also be made by the process of displacement.

The aromatic syrup of rhubarb is a gentle cathartic. Dose to a child, f℥j; to an adult, f℥ij.

SYRUPUS DE RHEO, *Syrupus de Cichorio compositus*.

SYRUPUS RHE'ADOS, *S. de papav'cræ errat'ico*, *S. papaveris erratici*, *Syrup of Red Poppy*, (F.) *Syrup de coquelicot*. (*Rheud. petal. recent. ℔j, aq. fervent. f℥xviiij, sacch. purif. ℔iiss*. To the water, heated in a water-bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate, and add sugar to form a syrup. *Ph. L.*) Chiefly used to give colour.

A factitious syrup is often made of aloes, dissolved in simple syrup.

SYRUPUS ROSÆ, *Syrupus rosarum soluti'vus*, *S. e rosis siccis*, *S. rosæ centifolia', S. rosæ rosens soluti'vus*, *Syrup of Roses*, (F.) *Syrup de roses pâles*. (*Rosæ centif. petal. exsicc. ℥vij, sacch. purif. ℔vj, aq. fervent. Oiv*. Macerate the petals for 12 hours. Evaporate the strained liquor to ℔iiss. Add the sugar. *Ph. L.*) Gently laxative. Dose, f℥ij to f℥iiss, or more.

SYRUPUS ROSÆ GAL'LICÆ, *Syrup of Red Roses*, (F.) *Syrup de roses rouges*. (*Rosæ Gallic. petal. exsicc. ℥vij, aquæ bull. Ov, sacch. purif. ℔vj*; prepared like the last. *Ph. E.*) Mildly astringent. Added to stomachic infusions.

SYRUPUS SACCHARI, *S. Simplex*.

SYRUPUS SARSAPARILL'Æ, *Syrup of Sarsaparilla*. (*Rad. Sarsap. cont. ℔j, aquæ bullient. cong., sacch. purif. ℔j*. Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. *Ph. L.*) Used in the same cases as the root. Dose, f℥j to f℥iv, and more.

SYRUPUS DE SARSAPARILL'Æ ET SENNÆ COMPOSITUS, *Compound Syrup of Sarsaparilla and Senna*, (F.) *Syrup de Cuisinier*. (*Rad. Sarsap. concis. ℔ij*. Infuse for 24 hours in warm water Oij; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with flowers of borage, white roses, senna leaves and aniseed, each ℥ij; reduce to half, pass, and add honey ℔ij. Boil to a syrup. *Ph. P.*) It is considered to be alterant, depurative, and sudorific. Dose, f℥ss to f℥ij.

A similar syrup, under the name SYRUPUS SARSAPARILL'Æ COMPOSITUS, *Compound Syrup of Sarsaparilla*, is directed in the Pharmacopœia of the United States. (*Sarsaparill. cont. ℔ij; Lign. guaiac. rasur. ℥ij; Rosæ centifol., Sennæ, Glycyrrhiz. cont. āā ℥ij; Ol. Sassafras, Ol. Anisi. āā m. v; Ol. Gaultheriæ m. iij; Alcohol. dilut. Ox; Sacchar. ℔vij*. Macerate the sarsaparilla, guaiacum wood, roses, senna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a warm bath to four pints; filter, add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. *Ph. U. S.*)

It may also be made by the process of displacement.

SYRUPUS DE SCAMMO'NIO, *Syrup of Scammony*. (*Pulv. Scammon. ℥ss, sacch. alb. ℥iv, alcohol. (s. g. .985 to .915) f℥viiij*. Heat the mixture moderately; then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add *Syrup of Violets*, f℥iv. *Ph. P.*) ℥j contains 18 grains of scammony. Dose, f℥j to f℥ss.

SYRUPUS SCILLÆ, *S. scilliticus*, *S. scillæ marit'imæ*, *Syrup of Squilla*. (*Aect. scillæ. Oj, sacch. ℔ij*.) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

SYRUPUS SCILLÆ COMPOSITUS, *Mel Scillæ Compositum*, *Compound Honey of Squill*, *Compound Syrup of Squill*, *Hive Syrup*. (*Scillæ*

cont.; *Senegæ* cont.  $\text{āā}$   $\text{Ḷiv}$ ; *Antim. et Potassa Tart.* gr.  $\text{xlviij}$ ; *Aquæ Oiv*; *Sacchar.*  $\text{ībiiss}$ . Pour the water upon the squills and seneka, and, having boiled to one-half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potassa.)

It may also be made by the process of displacement. *Ph. U. S.*

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

SYRUPUS SENEGÆ, *Syrup of Seneka.* (*Senegæ* cont.  $\text{Ḷiv}$ ; *Aquæ Oj*; *Sacchar.*  $\text{ībj}$ . Boil the water with the seneka to one-half, and strain; then add the sugar, and form into syrup. *Ph. U. S.*)

It may also be formed by the process of displacement. *Ph. U. S.*

This is a favourite stimulant expectorant (?) with many practitioners. Dose,  $\text{fḶj}$  or  $\text{fḶij}$ .

SYRUPUS SENNÆ, *S. cassiæ sennæ, Syrup of Senna.* (*Sennæ*  $\text{Ḷij}$ , *sem. fœnicul.* cont.  $\text{Ḷj}$ , *sacch. pur.*  $\text{Ḷxv}$ , *aquæ bullient.*  $\text{Oj}$ . Macerate the senna leaves and fennel-seeds with a gentle heat for an hour. Strain; add the sugar, and make into a syrup. *Ph. U. S.*) Cathartic. Dose,  $\text{fḶij}$  to  $\text{fḶiiss}$ , or more.

The Parisian Codex has a *Syrupus de Sennâ* of a compound character, called *Syrupus de pomis compositus*, (F.) *Syrop de pommes composé*. It contains, also, borage, bugloss, &c. Dose,  $\text{fḶss}$  to  $\text{fḶij}$ .

SYRUPUS SIMPLEX, *Syrupus* (Ph. U. S.), *S. Sacchari, Saccharum clarificatum, Liquarium, Simple Syrup, Syrup, Common syrup of capillaire.* (*Sacch. purif.*  $\text{ībiiss}$ , *aquæ Oj*. Dissolve the sugar; set aside for 24 hours; remove the scum, and pour off the clear liquid.) Used to cover nauseous tastes, &c.

SYRUPUS DE SPINÂ CERVINÂ, *Syrupus rhamni* — s. de *Stœchade communis*, see *Lavendula*.

SYRUPUS TOLUTANUS, *S. Tolutani, S. toluiferæ balsami, S. balsamicus, Balsamic syrup, Syrup of tolu.* (*Tinct. Tolut.*  $\text{fḶiiss}$ ; *Aquæ Oj*; *Sacchar.*  $\text{ībiiss}$ . Mix the tincture with the sugar in coarse powder; expose it on a shallow dish to a gentle heat, until the alcohol has evaporated; pour the water upon it; heat gradually until the sugar is dissolved, and strain. *Ph. U. S.*) Use—to give flavour.

SYRUPUS VIOLÆ, *S. violæ odoratæ, S. violarum, S. e succo violarum, Syrup of Violets.* (*Flor. recent. viol. odorat.*  $\text{ībij}$ , *aq. bull.*  $\text{Oviij}$ , *sacch. pur.*  $\text{ībxx}$ . Macerate, in a covered vessel, for 24 hours; pass, without expression, through linen; add the sugar so as to form a syrup. *Ph. E.*) Very gently laxative. Dose,  $\text{fḶj}$  to  $\text{fḶij}$ .

SYRUPUS E SUCCO VIOLARUM, *S. violæ.*

SYRUPUS ZINGIBERIS, *S. amomi zingiberis, Syrup of Ginger.* (F.) *Syrop de gingembre.* (*Tinct. Zingib.*  $\text{fḶiv}$ ; *Aquæ Oiv*; *Sacchar.*  $\text{ībx}$ . Mix the tincture with four pounds of the sugar in coarse powder; and expose it in a shallow dish to a gentle heat until the alcohol has evaporated. Add the rest of the sugar, and then the water in a covered vessel; heat gradually until the sugar is dissolved, and strain. *Ph. U. S.*) To the strained liquor add the sugar, and form a syrup.

N. B. The Parisian Codex contained a few other compound syrups besides those enume-

rated; amongst these is a *Syrup of calf's lungs, Syrupus e pulmonibus vitulinis*, (F.) *Syrop de mou de veau*, as an expectorant.

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

SYSPA'SIA, from *συσπασ*, (*συν*, and *σπασ*, 'I draw,') 'I contract.' Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

SYSPASIA CONVULSIO, Convulsion — s. Epilepsia, Epilepsy — s. Hysteria, Hysteria.

SYSSARCO'SIS, from *συν*, 'with,' and *σαρξ*, 'flesh.' *Commisura ossium carnea, Symphysis ossium muscularis, Convexio ossium cornuosa, Carina'tio, Concarna'tio.* Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

SYSTALCIS, Systole.

SYSTALTIC, *Systal'ticus, Peristaltic*; from *συσταλλω*, (*συν*, and *σταλλω*,) 'I contract.' A systaltic motion in a part is one in which there is alternate contraction and dilatation. See Systole.

SYSTATICA, from *συνιστημι*, (*συν*, and *ιστημι*, 'I place,') 'I associate.' Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind; — the 4th order, class *Neurotica*, of Good.

SYSTEM, *Syste'ma*, from *συν*, 'together,' and *ιστημι*, 'I place.' This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of beings for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means, — a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, system is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance, the *nervous system, muscular system*, &c.

SYSTEMATISM. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist*.

SYSTEMATIST, see Systematist.

SYSTEMATOL'OGY, *Systematolog'ia*, from *συστημα*, 'system,' and *λογος*, 'a discourse.' The doctrine or a treatise of systems.

SYSTÈME VASCULAIRE À SANG NOIR, see *Vascular* — s. *Vasculaire à sang rouge*, see *Vascular*.

SYSTEMIC. Belonging to the general system — as 'systemic circulation' in contradistinction to the 'pulmonic.'

SYSTOLE. Same etymon as SYSTALTIC; *Systal'sis, Constrictio, Contractio* seu *Augustatio* seu *Submissio* seu *Micatio cordis*. The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

SYSTOLIC, *Systol'icus*; same etymon. Relating to the systole of the heart, — as 'systolic murmur.'

SYZYGIUM NERVORUM, Par *nerworum*.

## T.

**T BANDAGE**, *T. fas'cia*, *Fas'cia T. formis* seu *Helioid'ri*, *Cru'cial Bandage*. A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T*. This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

**T FASCIA**, *T Bandage*.

**TABELA**, *Nicotiana tabacum*—*t. des Saroyards*, *Arnica montana*—*t. des Vosges*, *Arnica montana*.

**TABACUM**, *Nicotiana tabacum*.

**TABARZET**, *Saccharum album*.

**TAB'ASHEER**, *Tabaschir*, *Tabaxir*. A substance found in the knots of the bamboo, in the East Indies, as a consequence of a morbid condition of the part. It is distinguished for its great proportion of silicic acid, in combination with a small quantity of mineral and vegetable matters: as well as for its slight refractive property. It has been used in obstruction of the bowels. The sweet juice of the bamboo stalks has also been called *Tabasheer*.

**TABEFACTION**, *Emaciation*.

**TABEFY**, *Emaciate*.

**TABEL'LA**, *Tab'ula*, *Tabula'tum*; *Lozan'ga*, *Lozan'gia*, *Mor'sulus*, *Morsell'us*, a *lozenge*; *Tes'sell'la*, (F.) *Tablette*, 'a small table.' A solid medicine, composed of a powder, sugar, and mucilage; and generally shaped like a disk. See *Pastil*, and *Troch*.

**TABELLA**, *Table*.

**TABELLÆ ABSORBENTES**, *T. de Magnesiâ*.

**TABELLÆ AC'IDI OXAL'ICI**, *T. ad sitem*, *Lozenges of Oxalic Acid*. (*Acid. oxalic. ʒj, sacch. alb. ʒss, ol. limonis, gtt. xvij vel gtt. xij*. Make into lozenges with mucilage of gum tragacanth. *Ph. P.*) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

**TABELLÆ DE ALTHÆ'Â**, *Lozenges of Marsh-mallows*. (*Rad. althææ, pulv., ʒiiss, sacchar. alb. pulv. ʒivss; f. massa. Ph. P.*) Demulcent; expectorant.

**TABELLÆ ANTIMONIA'LES KUNCKE'LII**, *Tabellæ de stib'ii sulphure'to*, *Lozenges of Sulph'uret of Antimony*, *Mor'suli antimonial'es*, *M. stib'ii*, *M. stibiat'i*, *Trochisc'ei stibiati*. (*Amygdal. dulc. ʒj, sacch. lbss, sem. cardam., cinnam. pulv., sulph. antim. præpar., aa ʒj; fiant tabellæ. Ph. P.* Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

**TABELLÆ AD ARDOREM VENTRICULI**, *Trochisei carbonatis calcis*—*t. Cardialgiæ*, *Trochisci carbonatis calcis*.

**TABELLÆ DE CAT'ECU ET MAGNE'SIÂ**, *Lozenges of Catechu and Magnesia*, (F.) *Tablettes de catechu et de magnésie*. (*P. catech. ʒvj, p. magnes. ʒiv, p. cinnam. ʒiij, sacch. alb. lbss, g. tragac. gr. xij, aq. cinnam. q. s. ut f. massa. Ph. P.* Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

**TABELLÆ CINCHO'SÆ**, *T. de kinâ kinâ*, *Bark Lozenges*. (*Ext. cinchon. sic. ʒss, sacch. ʒiv, cinnam. ʒss, mucilag. g. trag. q. s. ut f. massa. Ph. P.*) Tonic.

**TABELLÆ DE CITRO ET DIACARTHAMO**, *T. de Scammonio et Sennâ*.

**TABELLÆ DE FERRO**, *Steel lozenges*, *Tabulæ murtiat'es*, *T. instaurant'es*, *T. antichloro'iræ*. (*Ferri limat. porphyriz. ʒss, p. cinnam. ʒj, p. sacch. ʒv, g. trag. et aq. cinnam. q. s., ut fiat massa*. Each lozenge to weigh 12 gr. *Ph. P.*) Tonic, stomachic. Dose, v to x.

*Aromatic lozenges of steel*. These consist of sulphate of iron, with a small proportion of the Tincture of *Cantharides*.

**TABELLÆ DE KINÂ KINÂ**, *T. cinchonâ*.

**TABELLÆ DE MAGNESIÂ**, *P. absorbent'es*, *Magnesiæ lozenges*. (*Magnes. ʒj, sacchar. alb. ʒiv, mucil. g. tragac. q. s. Ph. P.*) Absorbent and antacid.

**TABELLÆ DE RHEO**, *Rhubarb lozenges*. (*P. rhej ʒss, sacch. ʒv, mucilag. gum. tragac. q. s.; f. massa*. Each to contain 12 grains. *Ph. P.*) Stomachic and laxative.

**TABELLÆ DE SCAMMONIO ET SENNÂ COMPOS'ITE**, *Compound lozenges of scammony and senna*, *T. de citro et diacarthamo*. (*Scammon. ʒiij, Sennâ ʒivss, rhej. ʒiiss, caryoph. ʒj, corticis limon. confect. ʒj, sacch. ʒvj; f. massa. Ph. P.*) Purgative. Dose, ʒij to ʒvj, or more.

**TABELLÆ AD SITEM**, *T. acidi oxalici*—*t. ad Sodam*, *Trochisci carbonatis calcis*—*t. de Stibii sulphureto*, *T. antimonial'es Kunckelii*.

**TABELLÆ DE SULPHURE SIM'PLICIS**, *Simple sulphur lozenges*. (*Sulphur lot. ʒss, sacch. ʒiv, muc. g. tragac. eum aquâ rosâ præpar. q. s. Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, a lozenge.

**TABELLÆ DE SULPHURË COMPOS'ITE**, *Compound sulphur lozenges*. (*Sulph. lot. ʒj, acid. benzoic. gr. xij, rad. irid. p. ʒss, ol. anisi, gtt. viij, sacch. ʒvss, g. trag. q. s. Ph. P.*) Aperient, expectorant, and stimulant. (?) Dose, 4 a day.

**TABERNA MEDICA**, *Pharma copium*.

**TABES**, *Maras'mus Tabes*, *Tabum*, *Tab'idness*, from *tabere*, 'to consume;' *Te'kedon*, *Atroph'ia*, *Decline*. Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

**TABES**, *Atrophy*, *Phthisis*—*t. Coxaria*, *Isehiophthisis*—*t. Diabetica*, *Diabetes mellitus*—*t. Diuretica*, *Diabetes mellitus*.

**TABES DORSAL'IS**, *T. Dorsal'is*, *Maras'mus tabes dorsal'is*, *Phthisis not'ia seu dorsal'is seu sicca*, *Myelophth'isis*, *Myelatroph'ia*, *Tabes ossis sacri*. By this term is meant a wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head,—caused, it has been conceived, by too early or too frequent addition to venery.

**TABES GLANDULARIS**, *T. mesenterica*, *Scrofula*—*t. Ischiadica*, *Isehiophthisis*—*t. Lactea*, *Atroph'ia lactantium*, see *Galactia*.

**TABES MENTERICA**, *Atroph'ia mesenterica*, *Atroph'ia Infantum*, *A. glandular'is*, *A. infant'is*, *A. dorsi*, *Parabys'ma mesenter'icum*, *Ma'cies Infantum*, *Pælatroph'ia*, *Tabes glandular'is*, *T. Scrofulosa*, *Scrofula mesenterica*, *Rachial'gia mesenterica*, *Myelophth'isis sicca*, *Febria hectica infantum*, *Phthisis mesaria'ica*, *Physcol'ia mesenterica*, *Mesenter'itis*, *Mesenter'ic Disease*, (F.) *Carreau*, *Chartre*, *Scrofules* ou *Écranelles mésentériques*, *Étiènie mésentérique*, *Rachialgie mésentérique*, *Atrophie mésentérique*, *Physicome mésentérique*, *Entéro-mésentérique*, *Tubercles des ganglions mésentériques*, *Phthisie mésentérique*. An eu-

gorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery, — as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a serofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhœa, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is usually unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of suppuration. The treatment is the same as in serophulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

**TABES NUTRICUM**, *Atrophia lactantium*, see *Galactia* — *t. Ossis sacri*, *Tabes dorsalis* — *t. Pectoris*, *Rachitis* — *t. Pulmonalis*, *Phthisis pulmonalis* — *t. Serofulosa*, *T. mesenterica* — *t. Senum*, *Marasmus senilis*.

**TABESCERE**, Emaciate.

**TABID**, *Tab'idus*, (F.) *Tabide*. Same etymon as *Tabes*. Relating or appertaining to *tabes*. Wasted by disease.

**TABIDNESS**, *Tabes*.

**TABLE**, *Tab'ula*, *Tabell'a*, *Tabul'a'tum*, *Lam'ina*, *Paries*, *Squama*. A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is external; the other *internal*, and called *Tab'ula vi'trea*, on account of its brittleness.

**TABLES DE MORTALITÉ**, Mortality, bills of.

**TABLET**, *Trochiscus*.

**TABLETTE**, *Tabella*.

**TABLETTES DE CACHOU ET DE MAGNÉSIE**, *Tabellæ de catechu et magnesiâ*.

**TABLIER**, *Ventrale cutaneum*.

**TABOURET**, *Thlaspi bursa*.

**TABULA**, *Tabella*, *Table*.

**TABULÆ ANTICHLOROTICÆ**, *Tabellæ de ferro* — *t. Instantantes*, *Tabellæ de ferro* — *t. Martiales*, *Tabellæ de ferro*.

**TABULATUM**, *Tabella*, *Table*.

**TABUM**, *Ichor*, *Sanies*, *Tabes*.

**TAC**, *Influenza*.

**TACAMAHACA**, *Fagara octandra* — *t. Caragna*, *Caranna*.

**TACHE**, *Macula*.

**TACHE EMBRYONNAIRE**, 'Embryonic spot'; *Cu'mulus*, *Ger'minal cu'mulus*, *Cu'mulus germinati'vus seu prolif'gerus*, *A'rea germinati'va*, *Nu'cleus cicatric'ulæ seu blastoderm'atis*. A name given by M. Coste to a spot seen on the blastoderma about the end of the first week, from which the development of the embryo proceeds.

According to Bischoff, the blastodermic vesicle consists here of a double layer — the upper one the *serous* or *animal*; the lower, the *mucous* or *vegetative*; and between these is afterwards formed the *vascular layer*.

**TACHE GERMINATIVE**, see *Molecule* — *t. de Naissance*, *Nævus*.

**TACHENCAUSIS**, Combustion, human.

**TACHES HÉPATIQUES**, *Chl'asma*.

**TACHES LAITEUSES**, *Plaques laiteuses*,

'milky spots or patches.' White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

**TACHES DE ROUSSURE**, *Ephelides* — *t. Rouges*, *Spots*, *Red*.

**TACHYIA'TER**, *Tachyiatrus*. Same etymon as the next. One who cures speedily.

**TACHYIATRIA**, from *ταχυς*, 'quick,' and *ιατρεία*, 'healing.' The art of curing quickly.

**TACH'Y'TOMY**, *Tachytom'ia*, from *ταχυς*, 'quick,' and *τομή*, 'incision.' The art of cutting or operating rapidly.

**TACITUR'NITY**, *Taciturnitas*, *Sigê*, 'silence, from *tacere*, 'to be silent.' 'State of a person who does not speak.' Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

**TACT**, *Tactus*, from *tangere*, *tactum*, 'to touch.' A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. *Tact* is passive: *Touch*, active.

**TACTILE**, *Tac'tilis*; same etymon. Relating or appertaining to touch.

**TACTION**, *Touch*.

**TACTUS**, *Tact*, *Touch* — *t. Dolorificus*, *Haptodysphoria*.

**TÆDA**, *Dæs*, *daïs*. A term used for a medicine employed under the form of fumigation, pessary, or troch.

**TÆNIA**, *Te'nia*, *Fas'cia*, from *ταβια*, 'a fillet, a riband.' See *Bandage*. Also a genus of intestinal worms, characterized by an elongated, flattened, and articulated body, with four sutorial oscula on the head. Of this genus, two only inhabit the human body — the *Tænia lata*, (see *Bothriocephalus latus*), and *Tænia solium*.

**TÆNIA ACEPHALA**, *Bothriocephalus latus* — *t. à Anneaux courts*, *Bothriocephalus latus* — *t. à Anneaux longs*, *Tænia solium* — *t. Articulus demittens*, *Tænia solium* — *t. Cucurbitina*, *Tænia solium* — *t. Dentata*, *Bothriocephalus latus* — *t. Grisea*, *Bothriocephalus latus* — *t. Hippocampi*, *Corpora fimbriata* — *t. Humana armata*, *Tænia solium* — *t. Humana inermis*, *Bothriocephalus latus* — *t. Hydatigena*, *Hydatid* — *t. Lata*, *Bothriocephalus latus* — *t. Longues articulations*, *Tænia solium* — *t. Membranacea*, *Bothriocephalus latus* — *t. Nervosa Halleri*, *Ganglion of Gasser* — *t. Non armé*, *Bothriocephalus latus* — *t. Osculis lateraliibus geminis*, *Bothriocephalus latus* — *t. Osculis lateraliibus solitariis*, *Bothriocephalus latus* — *t. Osculis marginalibus solitariis*, *Tænia solium* — *t. Osculis superficialibus*, *Bothriocephalus latus* — *t. Prima*, *Bothriocephalus latus* — *t. Sans épine*, *Tænia solium* — *t. Secunda*, *Tænia solium*.

**TÆNIA SEMICIRCULAR'IS**, *T. striata*, *Gem'inum centrum semicircula'rê*, *Limbus post'rior cor'poris striati*, *Striæ cor'næ seu semilunares seu terminales*, *Frænum noxum*, *Fascia semicircular'is*, (F.) *Bandelette des éminences pyramides* (Ch.), *Bandelette*, *B. demicirculaire*, *Lame cor'née*. A medullary, grayish, semitransparent layer, situated in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

**TÆNIA SOLIUM**, *T. os'culis marginal'ibus solit'ariis*, *Tænia cucurbit'ina*, *Tænia huma'na armata*, *Hal'yis solium*, *Vernis cucurbit'ius*, *Lumbri'cus latus*, *Tænia sans épine*, *Tænia articulos demittens*, *Solium*, *T. secunda*, *Tænia à longues articulations*, *Tænia à anneaux longs*, *Ver solitaire*, *V. cucurbitain*, *Long Tape Worm*, has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal

foramina vaguely alternated. The tenia solium is commonly a few feet long; sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. The oil of turpentine, in some form, largely exhibited, is perhaps the best remedy.

TENIA STRIATA, *T. semicircularis* — *t. Tarini*, Lamina cornea — *t. Tenella*, *Bothriocephalus latus* — *t. Vulgaris*, *Bothriocephalus latus*.

TENIE COLI, see Colon.

TENIAFUGE, *Tæniofugum*, from *tænia*, and *fugo*, 'I drive off.' A remedy calculated to expel tenia.

TENIOLA, *Bandelette*. Used by Gerber for a simple, band-like, or flat fibre, *Filum tæniiforme*, seen under the microscope.

TAFFETAS AGGLUTINATIF, *Sparadrappum adhesivum* — *t. d'Angleterre*, see *Sparadrappum adhesivum* — *t. Épiépastique*, *Sparadrappum vesicatorium* — *t. Gommé*, see *Sparadrappum adhesivum* — *t. Vésicant*, *Sparadrappum vesicatorium*.

TAFIA, Rum.

TAILLADE, Incision, see *Entaille*.

TAILLE, Lithotomy — *t. Hypogastrique*, Hypogastric operation of lithotomy, see Lithotomy — *t. Par le rectum*, see Lithotomy — *t. Postérieure*, see Lithotomy — *t. Recto-vésicale*, see Lithotomy — *t. Sus-pubienne*, see Lithotomy.

TAKAMAHAKA, *Fagara octandra*.

TAL. A word formerly employed for alkali. It also meant the dung of the peacock.

TALC EARTH, Magnesia.

TALCUM NEPHRITICUM, Nephreticous lapis.

TALEN'TUM, *ταλαντον*. An ancient weight equal to 54 pounds, 2 oz., 5 dr., and 24 grains *Poids de Marc*. See Weights and Measures.

TALCOLUS, Malleolus.

TALICOTIAN OPERATION, Rhinoplastic.

TALINUM UMBELLATUM, see *Mistura*.

TALIPES, *Kyllosis* (Clubfoot) — *t. Equinus*, see *Kyllosis* — *t. Valgus*, see *Kyllosis* — *t. Varus*, see *Kyllosis*.

TALON, see *Calcaenum*.

TALPA, 'a mole.' *Topina'ria*, *Tupina'ria*, *Talpa'ria*, *Testu'do*, (F.) *Taupe*. A tumour situate on the head, which has been supposed to burrow like a mole.

TALPARIA, Talpa.

TALUS, *Astragalus*, Malleolus, see *Calcaenum*.

TAMARA CONGA, *Averrhoa carambola*.

TAMARĒA ZECLA, *Tamarindus*.

TAMARIN, *Tamarindus*.

TAMARIN'DI PULPA, *Pulp of tamarinds*, (*Tamarinds*, *q. s.* Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments, by pressing through a hair-sieve. Ph. U. S.)

TAMARINDS, PULP OE, *Tamarindi pulpa*.

TAMARINDUS, *T. Indica*, *Thamarindus*, *Ociphænon*, *Sil'iqua Arabica*, *Balampl'li*, *Tamarā'a zecla*, *Oryphæni'cia*, *Aca'cia Indica*, *Tamarind tree*, (F.) *Tamarin*. Family, Leguminosæ. *Sec. Syst.* Triandria Digynia. The pulp of the tamarind with the seeds connected by numerous tough strings, is exported from the West Indies, preserved in syrup, — *Tamarindus*, (Ph. U. S.) It is refrigerant and laxative. *Tamarind rhey* is made by boiling ℥ij of the pulp with ℥iiss of milk. When strained, it is used as a diluent in fever.

TAMARISCUS, *Tamarix Gallica*.

TAMARIX, *T. Gallica*, *P. Pentandra*, *Tamariscus*. The *Tamarisk tree*. Family, Portulacæe. *Sec. Syst.* Pentandria Pentagynia. The

bark, wood, and leaves were formerly employed medicinally; — the former for its aperient and corroborant virtues, in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

TAMBOUR, *CAVITÉ DU*, Tympanum.

TAMPA BAY, see *Saint Augustin*.

TAMPON, see *Plugging*.

TAMPONNEMENT, *Plugging*.

TANACE'TUM, *T. vulgare*, *Tana'ria*, *Athana'sia*, *Parthe'nium mas*, *Tansy*, (F.) *Tanaisie vulgaire*. Family, *Corymbiferae*. *Sec. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy have a peculiar, strong odour, and warm, bitter taste. They are tonic, deobstruent(?), and anthelmintic. Dose, ℥ss to ʒj. The infusion is usually drunk as tea.

TANACE'TUM BALSAMITA, *Balsamita mas seu vulgaria*, *B. suaveolens*, *B. major*, *Tanacetum hortense*, *Costus hortorum*, *Mentha Romana seu Saracenicæ*, *Costmary*, *Alcock*, *Cock-mint*, (F.) *Menthe cog*, *Herbe au cog*, *Grand Baume*. A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

TANACETUM HORTENSE, *T. balsamita*.

TANACE'TUM MULTIFLORUM. A South African plant, which is used as a tonic, antispasmodic and anthelmintic. It is given in flatulency, gout, amenorrhœa and dropsy: but is especially prescribed in cases of ascariæ lumbricoides and other entozoa. It is administered in the form of powder or infusion; the latter acting also, as a diaphoretic and diuretic. It is used likewise as a resolvent and anodyne fomentation.

TANASIE VULGAIRE, *Tanacetum*.

TANASIA, *Tanacetum*.

TANGÉ, *ταγγη*, 'rancidity.' A putrescent tumour.

TANINUM, *Tanninum*.

TANNIC ACID, *Tannin*.

TANNICUM PURUM, *Tannin*.

TANNIN, from (F.) *tanner*, 'to tan.' *Tannicum purum*, *Tanninum*, *Tannin*, *Principium adstringens seu Scytodepsicum seu Byrsodepsicum seu Coriacæum*, *Scytodepsinum*, *Acidum Tannicum*, *A. Quercitanicum*, *Tannic acid*, (F.) *Acide tannique*. A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of tanning. Pure tannin, obtained from galls, by the action of ether, (see Ph. U. S.) has been employed as an excellent and powerful astringent. Dose, two grains repeated several times a day.

TANSY, *Tanacetum* — *t. Wild*, *Potentilla anserina*.

TAPER, HIGH, *Verbascum nigrum*.

TAPE'TUM, *Ta'pestry*, *Tape'tum choroidæa*. A shining spot, on the outside of the optic nerve, in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum, occasioning the reflection of a portion of the rays from the membrana Ruysehiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

TAPETUM, see *Corpus Callosum*.

TAPETUM ALVEOLI, *Membrana externa dentium*. The outer membrane of the teeth. The lining membrane or periosteum of the alveoli.

TAPEWORM, BROAD, *Bothriocephalus latus* — *t. Long*, *Tenia solium*.

TAPIOCA, see *Tatropha manihot* — *t. Pearl*, see *Tatropha manihot*.

TAPSUS BARBATUS, *Verbascum nigrum*.

TAPSARIA, *Decoctum hordei*.

TAR, see *Pinus sylvestris* — *t. Barbadoes*, *Pentoleum* — *t. Mineral*, *Pissaspphaltum*.

TARACHÈ, *Tarax'is*, *Tarag'ma*, *Tarag'mus*, 'disorder.' A disorder of sight, which arises from a blow, compression of the eye, or the action of dust, smoke or other external cause. By some, it is understood to signify mild or incipient ophthalmia.

*Ταραχη της κοιλίας*, 'disturbance of the belly.' *Diarrhœa*.

TARAGMA, *Tarache*.

TARAGMUS, *Tarache*.

TARAGON, *Artemisia dracunculus*.

TARANTALISMUS, *Tarantismus*.

TARANTISMUS, *Tarentis'mus*, *Tarantalis'mus*, *Dinomonia*, *Chorea Sancti Valentini*, *Tarentulism*, *Tar'antism*. A feigned or imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed, by the vulgar, to the bite of the tarantula. A sort of tarantismus, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentismus Tangitanius*, *Jamon-tarentisme*.

TARANTULA, from *Tarentum* or *Tarento*, a town of Italy where it abounds; *Tarentulo*, (F.) *Tarentule*. A species of spider—the *Aranea Tarantula* of Linnæus, *Lycosa Tarantula* of Latreille, whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MINERAL WATERS OF. Chalybeate springs in the department of Arriège, France. They contain iron and carbonic acid.

TARAXACUM, *Leontodon taraxacum* — *t. Dens leonis*, *Leontodon taraxacum*.

TARAXIS, *Tarache*, see *Ophthalmia*.

TARCHON SYLVESTRIS, *Achillea ptarmica*.

TARENTISMUS, *Tarantismus* — *t. Tangitanus*, *Tarantismus*.

TARENTULA, *Tarantula*.

TARENTULISM, *Tarantismus*.

TARGAR, *Juniperus communis*.

TARI. Palm or cocoa wine, from which sugar was obtained, called *Jugre*. It was once used as a tonic.

TARINI PONS, *Interpeduncular space*, *Posterior perforated space*, *Locus perforatus posterior*. A cineritious substance, between the corpora albicantia, which assists in forming the bottom of the third ventricle.

TARO, *Arum esculentum*.

TARQUETTE, *Hornaria glabra*.

TARSAL, *Tar'seus*. That which relates to the tarsus.

TARSAL ARTICULATIONS result from the union of the bones of the tarsus with each other.

TARSEA LATA (LIGAMENTA). Three ligaments, described by Winslow as stretching from the edge of the orbit to that of the tarsi, with which, he thought, they formed a complete layer of the eyelids. Zinn could not trace the ligaments all the way to the tarsi; whilst Haller doubted altogether their ligamentous texture, and Zeis regards them as merely areolar substance.

TARSEUS, *Tarsal*.

TARSO-METATARSAL, *Tarso-metatar'seus*. That which relates to tarsus and metatarsus.

TARSO-METATARSAL ARTICULATIONS are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarso-metatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal*, and others *plantar*.

TARSO-MÉTATARSI-PHALANGIEN DU I OÙCE, *Adductor pollicis pedis*—*t. Phalangien du pouce*, *Flexor brevis pollicis pedis*—*t. Sous-phalangien de petit orteil*, *Flexor brevis minimi*

*digiti pedis*—*t. Sous-phalangien du premier orteil*, *Flexor brevis pollicis pedis*.

TARSOPHY'MA, from *Tarsus*, and *φύμα*, 'a tumour.' A swelling of the tarsus.

TARSORRHAPHY, *Tarsorrhaph'ia*, from *tarsus*, 'the tarsal cartilage,' and *ραφή*, 'suture.' An operation for diminishing the size of the opening between the eyelids, when it is enlarged by surrounding cicatrices.

TARSOTOMY, *Tarsotom'ia*, from *tarsus*, and *τομή*, 'incision.' The section or removal of the tarsal cartilages.

TARSUS, *Planta prima pedis*, *Rasce'ta seu Rasce'ta pedis*, *Pe'dium*, *Cavic'ulæ pedis nudus*.

1. The posterior part of the foot. The tarsus consists of 7 bones, arranged transversely in two rows, between which amputation is sometimes performed. The first or *Tibial row*, (F.) *Pre-mière rangée*, *R. jambière*, consists of the astragalus and os calcis; the second or *metatarsal*, (F.) *seconde rangée*, *R. métatarsienne*, of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tarsi*, *Tarsal cartilages*, *Tarsal fibro-cartilages*, *Orchoi*, *Crepid'ines* seu *Coro'næ* seu *Chelæ* seu *U'lgulæ Palpebrarum*, *Tharsi*, are two small cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, Antimonium tartarizatum (improperly), *Potassæ supertartras impurus*—*t. Calcareous*, *Potassæ subcarbonas*—*t. Crystals* of, *Potassæ supertartras*—*t. Emetic*, *Antimonium tartarizatum*—*t. Soluble*, *Potassæ tartras*, see *Potash*.

TARTA'REI MORBI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, *Potassæ supertartras*.

TARTARIC ACID, *Ac'idum tartar'icum*, *A. tartaro'sum*, *Acor tartar'icus*, *Acidum tartari essential'e*, *Tarta'reous acid*, *Sal tartari essential'e*. (*Potassæ bitart.* *Bliss*, *aq. destillat. ferr.*, *cong. iij*, *creta ppt. lbj. acidi sulph. lbj.* Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk, until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid and wash the tartrate of lime with distilled water, until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter and evaporate to crystallize. *Ph. L.*) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, *Potassæ supertartras impurus*—*t. Vitriolatum*, *Potassæ sulphas*.

TARTARUS AMMONIÆ, *Ammonie tartras*—*t. Chalybeatus*, *Ferrum tartarizatum*—*t. Crudus*, *Potassæ supertartras impurus*—*t. Dentium*, *Odontolithos*—*t. Emeticus*, *Antimonium tartarizatum*—*t. Kalicoferrius*, *Ferrum tartarizatum*—*t. Kalinus*, *Potassæ tartras*—*t. Lixiviæ*, *Potassæ tartras*—*t. Martialis*, *Ferrum tartarizatum*—*t. Potassæ ferruginosus*, *Ferrum tartarizatum*—*t. Subpotassicus*, *Potassæ supertartras*—*t. Superpotassicus*, *Potassæ supertartras*—*t. Tartarizatus*, *Potassæ tartras*.

TARTRATE D'AMMONIAQUE, *Ammoniaë tartras*.

TARTRE BRUT, *Potassæ supertartras impurus*—*t. Cru*, *Potassæ supertartras impurus*—*t. des Dents*, *Odontolithos*—*t. Émétique*, *Antimonium*

tartarizatum—*t. Stibié*, Antimonium tartarizatum.

TARTRUM SOLUBILE, Potassæ tartras.  
TASIS, Extension, Tension.

TASTE, *Gustus, Geusis, Geuma, Genthmos*, (F.) *Goût*. One of the five external senses, which instructs us of the savours of bodies, and of which the tongue is the principal organ.

*Gustation, Gustatio*, is the exercise of this faculty. In disease, the taste frequently becomes variously vitiated. The nerves of taste are probably the lingual branch of the fifth pair and the glosso-pharyngeal.

TASTE, Savour.

TAUPE, Talpa.

TAUROCOL'LA, from *ταυρος*, 'a bull,' and *κόλλα*, 'glue.' Glue made of the ears and genitals of the bull. It was formerly much esteemed.

TAURUS, Penis, Perineum.

TAXIS, 'arrangement;' from *τάσσω*, 'I order,' 'I arrange;' *Reposit'io, Reductio, Syntaxis*. A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by blood-letting *ad deliquium*; the warm bath; warm fomentations; tobacco; emollient glysters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

TAXUS BACCA'TA. The *Yew tree, Smilax, Smilax, Thym'alos*, (F.) *If. Family*, Coniferae. *Sex. Syst.* Diœcia Monadelphia. The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir*.

TAYE, Caligo.

TAYLOR'S REMEDY FOR DEAFNESS, see Allium.

TEA, Thea—*t. Apple*, see Apple tea—*t. Bahama, Lantana camara—t. Beef*, see Beef tea—*t. Berried, Gaultheria—t. Berry, Gaultheria—t. Blankenhein*, see Galeopsis grandiflora—*t. Brazil, Lantana pseudothea—t. Bushman's, Methyscophyllum glaucum—t. Caffre, Helichrysum nudifolium—t. Chicken*, see Chicken tea—*t. Flaxseed, Infusum Lini compositum—t. Ginger, Infusum Zingiberis—t. Hottentots', Helichrysum serpyllifolium—t. Labrador, Ledum latifolium—t. Lemon-peel*, see Citrus medica—*t. Marsh, Ledum palustre—t. Mexico, Chenopodium ambrosioides—t. Mountain, Gaultheria—t. Mutton*, see Mutton tea—*t. New Jersey, Celastrus—t. Oswego, Monarda coccinea—t. Redberry, Gaultheria—t. Slippery elm, Infusum Lini compositum—t. Soot*, see Fuligokali—*t. South sea, Ilex vomitoria—t. Spanish, Chenopodium ambrosioides—t. Veal*, see Veal tea.

TEAR, Sax. *ȝcap, Lacryma, Lachryma, Lac-rima, Lacryma, Daery, Dacryma, Dacryon, Humor lacrymal'is, Eyedrop*, (F.) *Larme*. An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye,

and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base, phosphates of lime and soda, and albumen.

TEARS, DEERS', Bezoar of the deer.

TEASEL, CULTIVATED, *Dipsacus sylvestris*.

TEAT, Nipple.

TEAZEL, *Eupatorium perfoliatum*.

TECEDON, Phtisis.

TECNOCTONIA, Infanticide.

TECOLITHOS, Judæus (lapis.)

TECO'MA RADICANS, *Bigno'nia radi'cans, Trumpet flower, Trumpet creeper, Virgin'ia creeper*. Indigenous; the orange and scarlet flowers appearing in July. *Order*, Bignoniaceæ. The leaves are acrid.

TECTARIA CALAHUALA, see Calaguala radix—*t. Ferruginæ*, see Calaguala radix.

TEETH, see Tooth—*t. Eye, Canine teeth—t. Jaw, Molar teeth—t. Milk*, see Dentition—*t. Neck of the, Collum dentium—t. Vitreous substance of the, Enamel of the teeth*.

TEETHING, Dentition.

TEGIMEN, Integument.

TEGMEN, Integument.

TEGULA HIBERNICA, Hibernicus lapis.

TEGUMEN, Integument.

TEGUMENT, Integument.

TEGUMENTARY, Relating or appertaining to the integument.

TEGUMENTUM, Integument—*t. Auris*, see Tympanum—*t. Ventriculorum cerebri, Centre, oval of the brain*.

TEIGNE, Pityriasis, Porrigo, Porrigo lupinosa—*t. Annuaire, Porrigo scutulata—t. en Anneau, Porrigo scutulata—t. Favose, Porrigo favosa—t. Furfuracæ, Porrigo furfurans—t. Nummulaire, Porrigo scutulata*.

TEINESMOS, Tenesmus.

TEINODYN'IA; from *τείνω*, 'to extend,' and *ὄδυν*, 'pain.' Pain of the sinews or tendons.

TEINOPHLOGO'SIS; from *τείνω*, 'to extend,' and *φλογωσις*, 'inflammation.' Inflammation of the sinews or tendons.

TEINTURE, Tincture—*t. Éthérée, Æthereal—t. Rubéfiante, Tinctura cantharidis*.

TEKEDON, Tabes.

TELA, Texture, Tissue—*t. Accidentalis Medullaris, Encephaloid—t. Cellulosa, Cellular tissue—t. Emplastica, Sparadrapum—t. Eretilis, Erectile tissue—t. Galteri, Sparadrapum Galteri—t. Hippocratici eribrosa, Cellular tissue—t. Hy-menochondroides, Tissue, cartilaginous—t. Hy-menochondroides, Tissue, cartilaginous—t. Ichthyoeolla glutinans, see Sparadrapum adhaesivum—*t. Inodularis, Tissue, inodular—t. Organica, Histos—t. Vesicatoria, Sparadrapum vesicatorium*.*

TELAMON, Habena.

TELAMO'NES, *τελαμώνες*, 'bandages.' Charpie, used for wounds; or linen, employed for bandages.

TELANGECTASIS, Telangiectasia.

TELANGIECTASIA, *Telangiectasia, Telangiectasia, Angiectectasia, Hæmatotelangi'osis, Hæmatelangi'osis, Angiecta'asia, Anastom'osis aneurysmat'ica*; from *τελος*, 'far,' *αγγειον*, 'vessel,' and *εκτασις*, 'dilatation.' Dilatation of vessels. *Nævus maternus. Aneurism by anastomosis*. According to some, fungus hæmatodes. See Hæmatodes fungus.

TELANGIECTASIA OCULI, Cirsophthalmus.

TELEPHIUM, *Ulex telephium*. The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound, which

Achilles inflicted on Telephus, degenerated into a similar ulcer.

TELEPHIUM, *Sedum telephium*.

TELLURISMUS, Magnetism, animal.

TELEM, Penis.

TEMPE, Temple.

TEMPERAMENT, *Temperamentum*, *Temperatura*, *Temperatio*, *Temperies*; originally from *tempus*, 'time,' the great *temperer*; *Complexio*, *Crisis*, *Eucrasia*. A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed that, according to the predominance of any one of the four humours then generally admitted,—blood, lymph, bile, and atrabilis or black bile,—the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine*, *lymphatic*, *choleric*, or *atrabilious* or *melancholic* predominance or temperament. The idea of the existence of certain of these humours has been banished; yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly and still is generally understood, although there can be no question that difference of organization occasions a difference in the activity of organs.

TEMPERAMENT, BILIOUS, Choleric temperament.

TEMPERANCE, *Sophrosynē*, *Nephalotes*, *Sobrietas*, *Sobrietas*. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPÉRANTS, Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPLE, *Tempus*, *Regio Temporalis*, *Crotaphus*, (F.) *Tempe*. A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples*, distinguished into *right* and *left*, correspond to the temporal fossa on each side. The word is said to be from the Latin *tempus*, 'time,' because in this part the hair first begins to turn white, and to indicate age.

TEMPORAL, *Temporalis*. That which relates to the temples.

TEMPORAL APONEUROSIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal muscle.

TEMPORAL ARTERIES, *Crotaphite Arteries*, are several:—1. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches; the one anterior—*A. temporalis frontalis* seu *inter'na* seu *ant'ior*; the other posterior—the *A. temporalis occipitalis* seu *exter'na* seu *superior*. The temporal artery, before its division, gives off, 1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *transverse artery of the face*. 3. The *middle temporal*, which arises beneath the cheek-bone, and traverses the temporal aponeurosis, immediately beneath that bone II. The *Deep-seated Temporals*, *A. ten-*

*porales profundæ*. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior*. They send their principal divisions to the temporal muscle.

TEMPORAL BONE, *Os temporale* seu *temporale* seu *arcuatilè* seu *armalè* seu *parietalè inferius* seu *erotaphiticum* seu *mement'o mori* seu *mendo'sum* seu *crot'aphus*, is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions:—1. The *squamous*, *Pars squamosa*, *Os lepidoides* seu *squamosum* seu *squamifor'mè*, (F.) *Portion écaillense* ou *squamense*. 2. The *mastoid process*, and, 3. The *Petrous portion*, *Petrus prot'ess*, *Pars petrosa*, *Pyramis trigona*, *Os lapideum* seu *lapidosum* seu *saxcum* seu *petrosum* seu *lithoïdes* seu *durum* seu *prærupit' rupi assimilat'um* seu *nervale*, *Pars pyramidalis ossis temporis*, (F.) *Portion pierreuse*, *Rocher*, *Os pétreux*, *Apophyse pyramidale*, *A. pétrée*.

It has, first, an *auricular* or *external face*, on which is a surface that makes part of the temporal fossa; the *zygomatic process*; the *glenoid cavity*; the *fissure of Glaser*; the *meatus auditorius externus*; the *mastoid process*; the *digastric groove*; the *canalis caroticus*; the *jugular fossa*; the *styloid process*; the *stylo-mastoid foramen*, &c. 2. A *cerebral* or *internal surface*, which corresponds to the cavity of the cranium, and on which is the *Pars petrosa*, the *hiatus Fallopii*, the *meatus auditorius internus*, the *fissure of the aquæductus vestibuli*, a *portion of the gutter for the lateral sinus*, &c. 3. A *circumference*, on which is observed the orifice of the *bony portion of the Eustachian tube* and the *aquæductus cochleæ*, &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

TEMPORAL FOSSA is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the zygomatic fossa; and completed, before, by the cheek-bone.

TEMPORAL MUSCLE, *Temporalis*, *Crotaphites*, (F.) *Arcadi-temporo maxillaire*, *Temporo-maxillaire* (Ch.), is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

TEMPORAL NERVES. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the fifth pair, behind the condyle of the jaw; and the *temporales profundæ*,—*anterior* and *posterior*,—furnished by the same nerve, at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

TEMPORAL VEINS were formerly called *Ætoi* or *Ætoi Phlebes*, *Aquile Vena*.

TEMPORO-AURICULAIRE, Attollens aurement.

TEMPORO-FA'CIAL, *Temporo-facialis*. Belonging to the temple and face.

TEMPORO-FACIAL NERVE, *Nervus temporo-facialis*. A branch of the facial nerve distributed to the face and temple.

TEMPORO-MA XILLAIRE, Temporal muscle.

**TEMPORO-MAXILLARY**, *Temporo-maxillaris*. That which belongs to the temporal bone and lower jaw.

**TEMPORO-MAXILLARY ARTICULATION** or joint of the lower jaw, is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process and the portion of the glenoid cavity, anterior to the fissure of Glaser; the other belongs to the condyle. This articulation is furnished with an inter-articular fibro-cartilage, two synovial capsules, and two lateral ligaments: — the one internal, and the other external.

**TEMPORO-MAXILLARY NERVES** of Biehat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

**TEMPUS**, Temple — t. Interealare, Apyrexia, Intermisssion.

**TEMULENCE**, Temulentia.

**TEMULENTIA**, *Ebrietas*, *Ebriositas*, *Methyasmus*, *Temulence*, *Tem'neucy*, *Inebriation*, *Intoxicat'ion*, *Drunk'eness*: — from wine, *Enophlygia*, *Enophlyxia*, *Violen'cia*, *V'iolence*, (F.) *Ivresse*. Plater gave this name to delirium; Ettmuller, to an apoplectic condition, depending upon drunkenness; the *Apoplexia Temulenta* or dead drunkenness. Commonly, *Temulentia* is used synonymously with drunkenness, *Methë*; and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mauia e Timulentia* is the same as *Delirium Tremens*.

**TENACULA**, Bone-nippers — t. Volsella, Forceps (lithotomy).

**TENACULUM**, from *teneo*, 'I hold.' A kind of fine hook attached to a handle which is thrust through the parietes of a blood vessel to draw it out and enable it to be tied.

**TENACULUM, ASSALINI'S**. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

**TENAÏLE INCISIVE**, Bone-nippers.

**TENASMUS**, Tenesmus.

**TENDON**, *Tendo*, *Promer'atio*, from *τενω*, 'I stretch.' *Tenon*, a *Sinec*. A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends; — as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

**TENDON D'ACHILLE**, Achilles tendo.

**TENDON, CORDIFORM, OF THE DIAPHRAGM**, Centre, phrenic.

**TENDONS, TWITCHING OF THE**, Sub-sultus tendinum.

**TENEOTOMIA**, Tenotomy.

**TÉNESME**, Tenesmus — t. de l'Œsophage, Œsophagismus — t. Vésical, Bradysuria.

**TENESMUS**, *Tenesmos*, *Tenasmus*, from *τενω*, 'I stretch.' *Proctica Tenesmus*, *Proctospasmus*, *Obstipatio Tenesmus*, *Tinagmus*, (F.) *Tenesme*, *Épreintes*. Frequent, vain, and painful desires to go to stool; — one of the chief symp-

oms of inflammation of the lining membrane of the digestive tube, as of dysentery.

**TENESMUS VESICÆ**, Bradysuria — t. Vesicæ mucosus, Cystirrhœa.

**TENETTES**, Forceps (craniotomy).

**TÉNIA**, Tænia.

**TENNESSEE', MINERAL WATERS OF**. On the waters of the French Broad River, in this state, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable.

**TENON**, Tendon.

**TENONT'AGRA**, from *τενω*, 'tendon,' and *αγρα*, 'seizure.' A variety of gout, which affects the tendinous parts of muscles, or the tendinous ligaments which strengthen certain articulations.

**TENONTOTOMIA**, Tenotomy.

**TENONTOTRO'TI**, from *τενω*, 'tendon,' and *τιρωσκω*, 'I wound.' They who are wounded in the tendons. — Galen.

**TENOT'OMY**, *Tenotomia*, *Teneotomia*, *Tenotomia*, *Sec'tio* sen *Dissec'tio tendinum*, from *τενω*, 'a tendon,' and *τομη*, 'incision.' The operation of dividing a tendon, often practised for the removal of loxarthrus, or deviation of the joints — as in elub-foot.

**TENSEUR DE L'APONÉVROSE FÉMO-RALE**, Fascia lata muscle.

**TEN'SION**, *Ten'sio*, *Tensura*, *Tasis*, *Diat'asis*, *Eutonia*, (*Eutonia* is, also, used for over-tension.) *Conten'sio*, *Disten'sio*, from *tendere*, 'to stretch.' State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

**TENSOR CHOROIDEÆ**, Ciliary muscle — t. Palati, Circumflexus musculus.

**TENSOR TARSII**. A small muscle, belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Muscle of Horner*. It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lacrymale. Its chief office seems to be, to influence the position of the puncta lacrymale, and to regulate the course of the tears through the lachrymal ducts.

**TENSOR TYMPANI**, *Inter'ius Auris*, *Internus Mall'ei*, (F.) *Salpingo-malléen*. A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleariformis, and is inserted into the apophysis of the handle of the malleus.

**TENSOR VAGINÆ FEMORIS**, Fascia lata muscle.

**TENSURA**, Tension.

**TENSUS**, Penis.

**TENT**, *Tenta*, *Turunda*, and its diminutive, *Turundula*, *Peniculus*, *Penicillus*, *Penicillum*, *Motas*, *Lemuis'eus*, (F.) *Tente*, *Mèche*, from *teutare*, 'to try or explore.' In surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes, also, made of prepared sponge, gentian root, &c. They are not so much used as they formerly were.

TENTACULARIA, *Filaria hominis bronchialis*.  
TENTACULUM CEREBELLI, Tentorium.

TENTA'MEN MED'ICUM. 'A medical trial.'  
An examination in medicine, in the Prussian universities, which is conducted both in writing and *riçâ voce* before the Dean of the Medical Faculty.

TENTE, Tent — *t. du Cervelet*, Tentorium.

TENTIGO VENEREA, Nymphomania — *t. Veretri*, Satyriasis.

TENTIPEL'LUM, from *tendo*, 'I stretch,' and *pellis*, 'the skin.' Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

TENTORIUM, *T. cerebelli super-extensum*, *T. cerebelli*, *Tentaculum cerebelli*, *Septum transversæ* (Ch.), *Transverse septum*, *Septum enceph'ali*, *Intersept'ia horizontalia Pacchio'ni*, *Processus transversæ duræ matris*, *Lateral Processes of the Dura Mater*, *Diaphragma cerebri*, (F.) *Tente du cervelet*, *Plancher du Cerveau*, from *tendere*, *tentum*, 'to stretch.' A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

TENTORIUM CEREBELLI, Tentorium.

TENTUM, Penis.

TENTWORT, *Asplenium ruta muraria*.

TENUIS MATER, Pia mater.

TENUITAS AQUOSA, Predominium aquæ.

TEPHROSIA VIRGINIANA, *Galega Virginiana*.

TEPIDARIUM, see Stove.

TEPLITZ, Töplitz.

TERAS, Monster.

TERATOGEN'ENY, *Teratogen'ia*, from *teras*, *terasos*, 'a monster,' and *γενεσις*, 'generation.' The formation of monsters.

TERATOL'OGY, *Teratolog'ia*, from *teras*, *terasos*, 'a monster,' and *λογος*, 'a discourse.' A description, or the doctrine of monsters.

TERATOSIS, see Monster.

TERCERON, see Mulatto — *t. Black*, see Mulatto.

TEREBELLA, Trepan.

TÉRÉBENTHINE, *Terebinthina* — *t. de Bordeaux*, see *Pinus sylvestris* — *t. de Chio*, see *Pistacia terebinthus* — *t. de Copahu*, *Copaiba* — *t. Commune*, see *Pinus sylvestris* — *t. d'Égypte*, see *Amyris opobalsamum* — *t. de Giléad*, see *Amyris opobalsamum* — *t. du Grand Caire*, see *Amyris opobalsamum* — *t. de Judée*, see *Amyris opobalsamum* — *t. de Melèze*, see *Pinus larix*.

TEREBIN'THINA, from *τερβινθος*, or *τερεβινθος*, 'the turpentine tree.' *Tur'pentine*, *Botin*, *Albotin*, *Altlibat*, *Brutino*, (F.) *Térébenthine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceæ and coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell; and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See *Turpentine*, *Pinus palustris* and *Pinus sylvestris*. All the turpentine are stimulant, diuretic, and cathartic.

TEREBINTHINA ARGENTORATENSIS, see *Pinus picea* — *t. Balsamea*, see *Pinus balsamea* — *t. Canadensis*, see *Pinus balsamea* — *t. Chia*, see *Pistacia terebinthus* — *t. Communis*, see *Pinus sylvestris* — *t. Cypria*, see *Pistacia terebinthus* — *t. Empyreumatica*, see *Pinus sylvestris* — *t. Laricina*, see *Pinus larix* — *t. Veneta*, see *Pinus larix* — *t. Vera*, see *Pistacia terebinthus* — *t. Vulgaris*, see *Pinus sylvestris* — *t. de Vénise*, see *Pinus larix*.

TEREBINTHUS, *Terminthus* — *t. Gummifera*, *Bursera gummifera* — *t. Lentiscus*, *Pistacia lentiscus* — *t. Vulgaris*, *Pistacia terebinthus*.

TEREBRA, Trepan.

TEREBRATIO, Trepanning.

TEREDO OSSIUM, *Caries*, *Spina ventosa*.

TERES, *Stron'gylus*, *Cylindroi'des*, 'long and round.' An epithet given to many organs, the fibres of which are collected into round fasciculi.

TERES LIGAMEN'TUM, (F.) *Ligament rotâ*. This name is given to the round ligament in the cotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is, also, given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius.

TERES MAJOR, (F.) *Anguli-scapulo-huméral*, *Scapulo-huméral* (Ch.), *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it, also, inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

TERES MINOR, (F.) *Le plus petit sus-scapulo-trochitérien*, (Ch.) *Petit rond*, *Margini-sus-scapulo-trochitérien*, *Nonus hu'meri Placenti'ni*, is situate at the posterior and inferior part of the shoulder; it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one part, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

TERESIS, Observation.

TERETRIUM, Trepan.

TERETRON, Trepan.

TERGAL, Dorsal.

TERGEMINI, Trigemini.

TERGUM, Dorsum, Vertebral column.

TERMINALIA, see *Myrobalanus*.

TERMINOLOGY, Nomenclature.

TERMIN'THUS, *Terebin'thus*, from *τερβινθος*, 'the turpentine tree.' *Phyma Anthrax*, *Termin'thus*, *Berry* or *Fungous carbuncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

TERMIN'THUS, *Pistacia terebinthus*.

TERMINUS SUPERIOR ASPERÆ ARTERIÆ, Larynx.

TERMONOLOGY, Nomenclature.

TERMS, Menses.

TERRA ABSORBENS MINERALIS, *Magnesiæ carbonas* — *t. Aluminis*, *Argilla pura* — *t. Amara aërata*, *Magnesiæ carbonas* — *t. Amara sulphurica*, *Magnesiæ sulphas* — *t. Bolaris*, *Argilla pura* — *t. Foliata*, *Sulphur* — *t. Foliata mineralis*, *Soda acetata* — *t. Foliata tartari*, *Potassæ acetat* — *t. Fornacum*, see *Bricks* — *t. Fullonica*, *Cimolia purpurescens* — *t. Japonica*, *Catechu*, *Nuclea gambir*.

TERRA LEM'NIA, *Argilla bolus flava*, *Lem'nian Earth*, *Lemp'nias*. A name given by the ancients to a solid, reddish, astringent, substance, prepared with the pulp of the fruit of the Baobab, an African tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

**TERRA LIVONICA.** A *terra sigillata* or sealed earth from Livonia, redder than that from Silesia, and very astringent.

**TERRA MERITA,** Curcuma longa.

**TERRA NOCERIA'NA.** A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

**TERRA ORLEA'NA,** *Pigmentum uruen, Uruch,* (F.) *Rocou, Roucou, Bichet.* A pigmental matter obtained from the seeds of *Bixa Orleana* seu *Orellina* seu *Americana, Orella'na, Orlea'na.* In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag, Roll, or Egg Annotto.*

*Spanish Annotto, Bixa,* is in small, oblong cakes. It is chiefly employed as a colouring matter.

**TERRA OSSEA,** *Materia ossea.* Bony matter. The earthy portion of bones.

**TERRA PONDEROSA, Baryta**—t. *Ponderosa muriata, Baryta, muriate of*—t. *Ponderosa salita, Baryta, muriate of*—t. *Saponaria, Cimolia purpurescens.*

**TERRA PORTUGAL'LICA,** *Barros, Bucaros.* A reddish, astringent, styptic earth, obtained from Portugal.

**TERRA SIGILLA'TA,** *Scaled Earth.* A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seignior. To these belong the *Terra Silesiaca, Terra Lemnia, T. Turcica.* See *Bolus alba.*

**TERRA SILESIA'CA,** see *Terra sigillata*—t. *Talcosa oxyanthraeodes, Magnesie carbonas*—t. *Turcica,* see *Terra sigillata.*

**TERRA URINÆ.** The earthy deposit in the urine.

**TERRA VITRIOLI DULCIS,** Colcothar.

**TERRAPIN,** *Emys palustris.*

**TERRE BOLAI'RE,** *Bolus*—t. *Noix, Bunium bulbocastanum*—t. *Pesante, Baryta*—t. *Sigillée, Bolus alba.*

**TERRETTE,** *Glechoma hederacea.*

**TERTIAN FEVER,** *Febria terti'na, An'etna tertianus, Tritæus, Tertian Ague,* (F.) *Fièvre tierce.* An intermittent, whose paroxysms recur every third day, or every 48 hours. The mildest, and the most pernicious, intermittents belong to this head. As a general rule, it is the most manageable form of ague.

**TERTIANARIA,** *Scutellaria galericulata.*

**TESSARA,** Cuboid.

**TESELLA,** Tabella.

**TEST, DANIEL'S,** see *Docimasia pulmonum*—t. *Hydrostatic,* see *Docimasia pulmonum*—t. *Plouquet's,* see *Docimasia pulmonum*—t. *Static,* see *Docimasia pulmonum.*

**TESTA,** see *Ostræa.*

**TESTA PRÆPARATA,** *Prepared Oyster-shell.* Oyster-shell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as *Creta præparata.*

**TESTA'CEOUS,** from *testa,* 'a shell.' A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See *Creta.*

**TESTE FORNACEÆ,** Bricks—t. *Ostræe,* see *Ostræa.*

**TESTES,** The *Testicles.* Vulgarly, the *Stones.* A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates.*

**TESTES CEREBRI,** see *Quadrigemina corpora.*

**TESTICLE,** *Testis, T. viri'lis, Testiculus, Orchis, Pomum amoris, Didymus, Her'nia, Gem'iti (pl.), Gemelli (pl.), Ovum,* (F.) *Testicule,* from

*testis,* 'a witness;' because the testicles are evidences of virility. The name of two glandular organs, contained in the serotum, whose office is to secrete sperm. The substance of the testicle consists of numerous conical, flattened lobules—*lobuli testis*—whose bases are directed towards the surface of the organ, and the apices towards the corpus Highmorianum. They are formed of a gray and softish substance, composed of tortuous canals, called *Tubuli seminiferi* vel *Vasa seminaria,* folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opaque white colour, and very tough, called *Tunica Albuginea,* or, simply, *Albuginea, Peritæstis,* of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

**TESTICLE, SWELLED,** *Hernia humoralis.*

**TESTICONDUS,** *Cryptorchis.*

**TESTICULE,** *Testicle.*

**TESTICULUS,** *Testicle*—t. *Accessorius, Epididymis*—t. *Caninus, Orchis mascula.*

**TESTIMONIUM MATURETATIS,** 'Evidence of fitness.' A certificate of complete education, required, in the Prussian universities, of a candidate, before he can be admitted to examination for the degree of Doctor of Medicine.

**TESTIS FEMINEUS,** *Ovary*—t. *Irritable, Orchidalgia*—t. *Minor, Prostate*—t. *Muliebris, Ovary*—t. *Virilis, Testiclo.*

**TESTUDINATIO CRANII,** *Camarosis.*

**TESTUDO,** *Cheloniæ,* (F.) *Tortue.* A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a turtle; *Emphy'ema encystis ganglion.* See *Talpa.*

**TESTUDO CEREBRI,** *Fornix*—t. *Scapulae,* see *Scapula.*

**TETANIC,** *Tetanicum, Spasticum, Convulsivum, Convulsive,* from *τενω,* 'I stretch.' A remedy, which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica, Strychnia, Bruceia, Arnica,* and *Toxicodendron.*

Also, an epithet for a tonic convulsion.

**TETANOMATA,** *Tetanothra.*

**TETANO'THRA,** *Tetanom'ata, Erugoto'ria,* from *τενω,* 'free from wrinkles.' Medicines which remove wrinkles.—*Gorræus.*

**TÉTANOS,** *Tetanus.*

**TETANUS,** from *τενω,* 'I stretch.' *Spasm with rigidity, Convulsio Indica, Holoton'ia, Holoton'icus, Holotet'anus, Tet'anus universalis, Rigor nervosus seu nervorum, Extensio seu Distensio, Entas'ia tetanus, Cat'ochus cervicis, Cat'ochus holoton'icus,* (F.) *Tétanos.* A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emp'prosthot'onos*), sometimes backwards (*Opisthot'onos*), and sometimes to one side (*Pleur'othot'onos*). When tetanus is confined to the muscles of the jaws, it is called *Trismus.* It is a most formidable affection. The means of treatment are:—copious and repeated blood-letting; bathing, cold and warm; powerful doses of opium,

and other narcotics. In *Traumatic Tetanus*, or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it.

TETANUS ANTICUS, Emprosthotonos — t. Dolofricus, Cramp — t. Dorsalis, Opisthotonos — t. Lateralis, Pleurothotonos — t. Maxillæ inferioris, Trismus — t. Posterganeus, Opisthotonos — t. Posticus, Opisthotonos — t. Universalis, see Tetanus.

TETARTÆUS, Quartan.

TETARTOPHIA, from *τεταρος*, 'the fourth,' and *φωα*, 'I arise.' *Quarta'nus remittens*. A quartan, in which the intermission is inordinately short or imperfect.

TÊTE, Caput, Head — t. *de Veau*, Elephantiasis of the Greeks.

TETRADRACHMON, from *τετρας*, 'four,' and *δραχμη*, 'a drachm.' A weight of four drachms or half an ounce.

TETRAGONUS, *Platysma myoides*.

TETRAHIT LONGIFLORUM, *Galeopsis grandiflora*.

TETRAMYRON, from *τετρας*, 'four,' and *μυρον*, 'an ointment.' An ointment of four ingredients. — Galen.

TETRANGURIA, *Cucurbita citrullus*.

TETRANTHÆRA PICHURIM, *Faba Pichurim*, *F. Pechu'rei*. The seeds of this Brazilian plant have been used in diarrhœa, dysentery, flatulent colic, &c. Dose,  $\mathfrak{ij}$ .

TETRA'O COTURNIX, *Coturnix*, the Quail, (F.) *Caille*. The quail is an esteemed article of diet. The Greek name is *ορνις*; and the places, called *Ortygia*, are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

TETRAPHARMACUM, from *τετρας*, 'four,' and *φάρμακον*, 'a medicine.' A medicine consisting of four ingredients.

TETRASCELUS, from *τετρα*, 'four,' and *σκελος*, 'leg.' A monster having four legs. — Gurlt.

TETROBOLON. The weight of four oboli, or two scruples. — Gorraeus.

TETROROS, *Astragalus*.

TETTER, Herpes — t. Crusted, Impetigo — t. Honeycomb, *Porrigo favosa* — t. Humid, *Eczema impetigo* — t. Milky, *Porrigo larvalis* — t. Pustular, Impetigo — t. Running, Impetigo — t. Scaly, *Psoriasis*.

TETTERWORT, *Chelidonium majus*.

TEUCRIUM ÆGYPTIACUM, T. capitatum — t. Belium, T. capitatum.

TEUCRIUM CAPITATUM, *Poley Mountain of Montpellier*, T. Belium seu *Ægyptiacum*, *Polylium Capitatum*, is, generally, substituted for the last. The common *Poley Mountain* is the *Teucrium montanum*; and the *Golden Poley Mountain*, the *Teucrium Polylium*, *Polylium*.

TEUCRIUM CHAMÆDRYS, T. officinale, *Chamædris*, *C. minor repens*, *C. vulgaris*, *Quer'cula minor* seu *Calamandri'na*, *Trissa'go*, *Chamædrops*, *Triza'go*, *Common German'der*, *Creeping German'der*, *Small German'der*, *English Treacle*, (F.) *Petit chène*, *Germandrée officinale*. Family, Labiata. *Sex. Syst.* Didynamia Gymnospermia. This is possessed of aromatic and bitter properties. The dose of the dried powder is from  $\mathfrak{ss}$  to  $\mathfrak{ʒi}$ .

TEUCRIUM CHAMÆPITYS, *Chamæpitys*, *Arthetica*, *Arthetica*, *Aju'ga*, *A. Chamæpitys*, *Bulgula Chamæpitys*, *Abiga*, *Chamænorus*, *Ica arthritica*, *Holo'yron*, *Io'nia*, *Sideri'tis*. *Common Ground-pine*, (F.) *Petite Ivette*. Properties like the last. The tops or leaves have been recommended as

aperients and tonics; especially in female obstructions, and in paralytic disorders.

TEUCRIUM CRETICUM, T. *hyssopifolium* seu *Rosmarinifolium*, *Rosmarinus stœchadis facie*, *Poley-mountain of Candy*, *Polylium Creticum*. The tops and whole herb enter into the old compounds, *Mithridate* and *Theriaca*. It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

TEUCRIUM FLAVUM has similar properties to T. chamædris.

TEUCRIUM HYSSOPIFOLIUM, T. Creticum.

TEUCRIUM IVA, *Chamæpitys moscha'ta*, *Ica moscha'ta* *Monspeliensium*, *Ica*, *Chamæpitys anthy'llus*, *French Ground-pine*, (F.) *Ivette musquée*. It has similar virtues to T. Chamæpitys, but is weaker.

TEUCRIUM MARITIMUM, T. Marum.

TEUCRIUM MARUM, T. *maritimum*, *Marum Syriacum*, *Marum Creticum*, *Majorana Syriaca*, *Marum verum*, *M. Cortusi*, *Chamædryis inca'na maritima* seu *marum*, *Marum german'der*, *Syrian herb mastich*, *Cat thyme*, *Origanum Syriacum*, (F.) *Marum* ou *Germandrée maritime*, *Herbe aux chats*. A very aromatic plant, of a camphorated smell; formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

TEUCRIUM OFFICINALE, T. chamædris — t. *Palustre*, T. scordium — t. *Pyramidale*, *Ajuga* — t. *Rosmarinifolium*, T. Creticum.

TEUCRIUM SCORDIUM, T. *palustris*, *Water German'der*, *Scordium*, *Trissa'go palustris*, *Chamædryis palustris* seu *scordium*, *Allium red'olens*, (F.) *Germandrée Scorodone*, *Sauge des bois*, *Germandrée aquatique*. The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other Teucris.

TEXTUM INTERLOBULARE, *Interlobular tissue*.

TEXTURA, Texture — t. Organica, Histos.

TEXTURAL. Same etymon as Texture. Relating or appertaining to a texture.

TEXTURE, *Textu'ra*, *Textus*, from *texere*, *textum*, 'to weave.' *Tela*, *Hypha*, *Hyphæ*. The particular arrangement of the tissues that constitute an organ.

TEXTUS, Texture, Tissue — t. Cellulosus, Cellular tissue — t. Desmosus, Desmoid tissue — t. Nervorum, Plexus nervorum — t. Organicus, Cellular tissue — t. Papillaris, Corpus papillare — t. Parenchymalis, Cellular tissue.

THËRIA, Radzyge.

THALAMUS, *Σαλαμος*, (F.) *Couche*. 'A room or chamber; a bed.' The place at which a nerve originates, or has been considered to originate.

THALAMI NERVORUM OPTICORUM seu OPTICI, *Eminentia magna cer'ebri*, *Ganglia cerebri posteriora*, *Crura medullæ oblongatæ* (of some), *Striata corpora superiora posteriora*, *Colliculi nervorum opticorum*, *Optic thalami*, *Posterior cerebral ganglion*, (F.) *Couches des nerfs oculaires*, (Ch.) *Couches des nerfs optiques*, *Couches optiques*. Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculata*, that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly, and adhere merely to the inner margin of those bodies. Gall considers, that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cerebral inférieur*. They are, also, called *Posterior ganglion of the cerebrum*. From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the

various bands that connect the different parts of the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissura mollis*. The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus optici*.

THALAMUS REGALIS, Pericardium.

THALICTRON, *Thalictrum*, *T. magnum*, seu *flavum* seu *flavescens* seu *pratense* seu *nigricans* seu *rugosum* seu *vaginatum*, *Meadow-rue*, *Poor Man's Rhubarb*, *Rhabarbarum pauperum*, (F.) *Pigamon jaunâtre*, *Rue des prés*, *Fausse-Rhubarbe*, *Rhabarbe des pauvres*. Family, Ranunculaceae. *Sex. Syst.* Polyandria Polygynia. The root resembles rhubarb in its properties.

THALICTRUM ANEMONI'DES, *Meadow Rue*, *Rue-leaved Anemouy*; an indigenous plant, flowering in April and May.

THAMARINDUS, Tamarindus.

THANASIMUS, Mortal.

THANATODES, Mortal.

THANATOID, *Thanatoïdes*; from *thavatos*, 'death,' and *eidōs*, 'resemblance.' Resembling death. Apparently dead.

THANATOL'OGY, *Thanatolog'ia*, *Thnescolog'ia*, from *thavatos*, 'death,' and *logos*, 'a discourse.' A description, or the doctrine, of death.

THANATOS, Death.

THAP'SIA, from the island Thapsus. The *deadly carrot*, *Thapsia asclepias*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. The root operates violently, both upwards and downwards. It is not used.

THAPSUS BARBATUS, *Verbascum nigrum*.

THARSI, see Tarsus.

THASPIUM ATROPURPUREUM, *Th. cordatum*, *Round heart*. The flowers, which appear in June, are of a dark purple.

THASPIUM BARBINO'DE, *Meadow Parsnep*. An indigenous plant, of the Northern and Western States,—Order, Umbelliferae,—which flowers in June. Flowers, yellow.

Both plants have been esteemed vulnerary, antisyphilitic, and diaphoretic; and as antidotes to the bite of a rattlesnake.

THASPIUM CORDATUM, *Th. atropurpureum*.

THÉ, *Thea*—*t. des Apalaches*, *Ilex vomitoria*—*t. de France*, *Salvia*—*t. d'Europe*, *Salvia veronica*—*t. de la Mer du sud*, *Ilex vomitoria*—*t. du Mexique*, *Chenopodium ambrosioides*—*t. de Simon Pauli*, *Myrica gale*—*t. Suisse*, *Falltranck*.

THEA, *Chaa*, *Tea*, (F.) *Thé*. There are two principal species of tea-plant; the *Thea Bohe'a*, and *Thea vir'idis*; the *black tea*, and the *green*. Family, *Hesperidæ*. *Sex. Syst.* Polyandria Monogynia. In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666; since which time its use has become almost universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncracies, entirely harmless.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Beef tea*, *Mint tea*, &c.

THEA GERMANICA, *Veronica*.

THEBES'US, VEINS OF. A name given to supposititious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foramina*

*Thebesii*. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Valvula Thebesii*, *V. Guiffartiana*, *V. cœva magna*.

THËCA, *Cæca*, *Vagina*, *Sheath*—*t. Cerebri*, *Cranium*—*t. Cordis*, *Pericardium*—*t. Vertebralis*, see *Vertebral canal*.

THEION, Sulphur.

THEIOPEGÆ, Water, mineral (sulphureous.) THEIOTHERMÆ, Waters, mineral, sulphureous.

THELASIS, Lactation.

THELASMUS, Lactation.

THELASTRIA, Nurse.

THELE, Nipple, Papilla.

THELITIS, from *θηλη*, 'the female nipple,' 'the female breast,' and *itis*, denoting inflammation. Inflammation of the nipple.

THELON'CUS, Mastoneus.

THELOS, Mamma.

THELYGON'IA, from *θηλος*, 'pertaining to the female sex,' and *γεννη*, 'generation.' The part taken by the female in the act of generation. Also, nymphomania.

THELYGONUM, Sperm (of the female.)

THELYPTERIS, Pteris aquilina.

THENAD, Thenal.

THENAL, *Thenar*; same etymon as *thenar*. Relating or appertaining to the thenar.

THENAL ASPECT. An aspect towards the side on which the thenar is situated.—Barclay. *Thenad* is used, adverbially, by the same writer, to signify 'towards the thenal aspect.'

THENAR, *Sevar*, from *θενω*, 'I strike.' The palm of the hand, or sole of the foot.

THENAR, Flexor brevis pollicis manus, Palm.

THENAR or THENAL EM'INENCE is the projection at the anterior and outer part of the hand, formed by the abductor brevis, opponens, and flexor brevis pollicis.

THENAR or THENAL MUSCLE. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis and the anterior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenæ muscle* to the abductor and flexor brevis pollicis pedis.

THEOBROMA CACAO, Cacao.

THEOMANIA, Dæmonomania.

THEOPLÉGIA, Apoplexy.

THEOPLEXIA, Apoplexy.

THEORET'ICAL, *Theoret'icus*, *Theo'ricus*, from *θεωρω*, 'I contemplate.' (F.) *Théorétique*. *Théorique*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THEORIA, Theory.

THÉORIQUE, Theoretical.

THEORY, *Theoria*, from *θεωρω*, 'I contemplate.' The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example, the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. *Theory* regards nature as it is, and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

THEORY OF MEDICINE, *Institutes of Medicine*, *Theoretical Medicine*, is that part of the science

which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of Medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some, it is considered to include General Pathology and General Therapeutics.

THEIOTHERMÆ, Waters, mineral, sulphurous.

THERAPEIA, Curation, Therapeutics.

THERAPEUSIS, Therapeutics.

THERAPEUTA, Therapeutist.

THERAPEUTICE, Therapeutics.

THERAPEUTICS, *Therapeutiḗcē, Therapeu'sia, Therapeu'sis, Iatrotech'niciḗ, Practice of Physic, Therapei'a, Therapi'a, Curato'ria Meth'odus, Methodus Meden'di*, from *ἔραπειω*, 'I wait upon, I alleviate, I attend upon the sick.' (F.) *Thérapeutique*. That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

THÉRAPEUTIQUE, Therapeutics.

THERAPEUTIST, *Therapeu'ta*. Same etymology. One who practises therapeutics. A practitioner of medicine. To be a good therapeutist, a man must be well versed in every department of medicine, and be capable of observing and reasoning well. He may be a good *observer*, and yet a bad *reasoner*. He cannot practise well unless he is both. Hence, the comparatively small number of good therapeutists.

THERAPIA, Therapeutics.

THERIA, Radzyge.

THERIAC, Theriaca—t. of Antipater, Antipatri theriaca.

THERIACA, *Ἡριακά*, *The'riac*, from *Ἡρ*, 'a ferocious or venomous animal,' and *ἀκομαί*, 'I cure.' Treacle. (F.) *Thériaque*. A medicine, believed to be capable of curing or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers. *Theriac* and *Theriactal* have been used adjectively for medicinal.

THERIACA ANDROM'ACHI, *Venice Treacle*, is an ancient alexipharmic electuary; consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, has held its place in their Codex, with even an additional number of ingredients. The *Electuarium Opiatum polypharmacium* of the Codex has contained acid ingredients, 5; astringent, 5; bitter, 22; indigenous aromatics, 10; umbelliferous aromatics, 7; balsams and resinous substances, 8; fetid ingredients, 6; narcotics, 1; earthy substances, 1; gummy or amylaceous, 4; saccharine, 3; total 72! and one of these the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

THERIACA CELESTIS, *Tinctura opii*—t. Communis, Melasses—t. Edinensis, Confectio opii.

THERIACA GERMANO'RUM. An extract or rob, prepared from juniper berries. Used as a stomachic.

THERIACA LONDINENS'IS, *Cataplasma Cymini*. A cataplasma of cumin seed, bay berries, german-dog, snakeroot, cloves, honey, and sometimes opium, or syrup of poppies.

THERIACA RUSTICORUM, Allium.

THÉRIAQUE, Theriaca.

THERIAKI. In Turkey, opium-eaters, or they

who indulge largely in the use of opium, are so called.

THERIATRICA, Veterinary art.

THERIOIDES, Ferine.

THERIO'MA, *Therion*, from *Ἡρ*, 'a venomous animal.' Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

THERION, Therioma.

THERIO'TOMY, Zootomy.

THERMA, Heat—t. Emphytum, Animal heat  
THERMÆ, *Ἐρμαί*, *Ther'mata*. Warm baths or springs. See Waters (mineral.)

THERMÆ FABARIÆ, Pfeffers Mineral Waters of—t. Piperinæ, Pfeffers, Mineral Waters of—t. Plumbariæ, Plombières, Mineral Waters of.

THERMAL, *Therma'lis*; from *Ἐρμα*, 'heat,' *Ἐρμος*, 'hot.' Relating or appertaining to heat—Hot, warm. As 'a thermal mineral water.'

THERMANTICA, Calefacients.

THERMASMA, Fomentation.

THERMATA, Therma.

THERMUM EMPHYTUM, Animal heat, Bio-lychnium.

THESIS, *Θεσις*, from *τιθεμι*, 'to place.' 'A position or proposition.' *Disputatio, Inaugural Dissertation*. The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form, giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smellie, and Stoll, have published collections of these.

Also, a suffix denoting 'arrangement;' hence *Diathesis*.

THEVE'TIA A'HOUI, *Ahouai*. The kernels of the nut of this Brazilian tree are said to be a violent poison. At the Antilles, its nuts are called *Noix de Serpent*; and they are used against the bites of serpents.

THIGH, Sax. *Seoh, Femur, Femen, Crus, Merus, Merium*, (F.) *Cuisse*. The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. Above, it is bounded, anteriorly, by the groin; externally, by the hip; behind, by the fold of the nates; and within, by the perineal region. Below, it is bounded, anteriorly, by the prominence of the knee; posteriorly, by the ham. It is formed of a considerable number of muscles, blood-vessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur—t. Neck of the, Collum femoris.

THION, Sulphur.

THIRST, Sax. *ἄψυτ*, (D.) Dorst, *Sitis, Dipsa, Potio'nis desiderium*, (F.) *Soif*. A simple desire or an absolute want for liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the pharynx, produced by suppression of the salivary and mucous secretions. This is probably true; but, again, it is owing to the wants of the system,—a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation*,—an *instinctive want*—arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, Excessive, Polydipsia—t. Morbid Dipsosis.

THIRSTY, Dipsodes.

THISTLE, BLESSED, *Centaurea benedicta* — t. Cotton, *Onopordium acanthium* — t. Globe, *Echinops* — t. Holy, *Centaurea benedicta* — t. Ladies', *Carduus Marianus* — t. Milk, common, *Carduus Marianus* — t. Pine, *Atractylus gummifera* — t. Sow, *Sonchus oleraceus* — t. Star, *Centaurea calcitrapa* — t. Yellow, *Argemone Mexicana*.

THLADIAS, Eunuch.

THLASIAS, Eunuch.

THLASIS, Contusion — t. Depressio, Depressio.

THLASMA, Contusion — t. Concussio, Concussio — t. Stremma, Sprain.

THLASPI, *Penagocera*. Family, Cruciferae. *Scr. Syst.* Tetradymia Siliculosa. Two species of thlaspi are directed, in some pharmacopœias, for medical use:—the *Thlaspi arvense* or *Tracle mustard*, and the *Thlaspi campestre* seu *hiran'tum* seu *vulgar'tium*, *Lepid'ium campest're*, *Lep'ia campest'ris*, *Ibe'ris campest'ris*, *Mith'ridate mustard*. The pharmaceutical properties of both kinds resemble those of common mustard.

THLASPI BURSA, *Th. bursa'tum*, *Capsell'a bursa pasto'ris*, *Ibe'ris bursa pasto'ris*, *Nastur'tium bursa pasto'ris*, *Rudschie'dia bursa pasto'ris*, *Bursa pasto'ris*, (F.) *Bourse à berger*, *Bourse à pasteur*, *Talbonnet*, *Shepherd's purse*. A common European plant, introduced into this country. It is slightly astringent, but is little used.

THLASPI BURSATUM, *Thlaspi bursa* — th. *Nasturtium*, *Lepidium sativum* — th. *Sativum*, *Lepidium sativum*.

THLIBIAS, Eunuch.

THLIPSECEPH'ALUS, from  $\theta\lambda\psi\iota\varsigma$ , 'compression,' and  $\epsilon\kappa\epsilon\phi\alpha\lambda\omicron\varsigma$ , 'the encephalon.' A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital regions — a distinct fontanelle not existing.

THLIP'SIS,  $\theta\lambda\psi\iota\varsigma$ , *Compressio*. Compression, and especially constriction of vessels by an external cause. Oppression.

THNESCOLOGIA, Thanatology.

THOLUS, Achæolum — t. *Diocleus*, *Scapha*.

THOMPSONIAN. One who practises or believes in Thompsonianism.

THOMPSONIANISM, *Thompsonism*. A fanciful doctrine, of which a person of the name of Thompson, of New York, is the founder. One of its leading principles is, that the human body is composed of four elements (?), earth, air, fire and water; and one of its apothegms, — that metals and minerals are in the earth, and, being extracted from the depths of the earth, have a tendency to carry all down into the earth who use them; that the tendency of all vegetables is to spring up from the earth, and therefore to uphold mankind from the grave.

The Thompsonians are Botanic Physiëians. \*

THORACENTE'SIS, *Paracente'sis Thora'cis*, from  $\theta\omega\rho\alpha\zeta$ , 'the thorax,' and  $\kappa\epsilon\tau\eta\sigma\iota\varsigma$ , 'perforation.' Tapping the thorax. Perforation of the thorax.

THORACHIQUE, Thoracic.

THORAC'IC, *Thora'cicus*, from *thorax*, 'the chest;' (F.) *Thoracique* ou *Thorachique*. That which relates or belongs to the chest; as *Thora'cis vis'cera*, &c.

THORACIC INFERIOR ARTERY, *Arte'ria Thora'cica Exter'na Infer'ior* vel *Longa*, *A. mamma'ria externa*, *A. Thora'cica inferior*, (F.) *Deuxième des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the lateral part of the thorax, and the serratus major anticus. It afterwards bends inwards; becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis

major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

THORACIC SUPERIOR ARTERY, *Arte'ria Thora'cica Exter'na Superior*, (F.) *Artère thoracique supérieure*, *Première des Thoraciques* (Ch.), arises from the axillary artery or from the acromial; and descends forwards between the pectoralis major and P. minor, to which it distributes itself by a great number of branches. In some subjects, there are two or three *Arteriæ thoracicæ externæ superiores*.

THORACIC DUCT, *Ductus thora'cicus* seu *chylifer* seu *chyl'i seu lact'ens* seu *ro'rifor* seu *Pecqueti* seu *Pecquetianus*, *Vena alba thora'cis*, *Alveus ampull'es'cens*, *Distributo'rius lactea thora'cis*, *Ductus thora'cicus post'rior* seu *vertebra'lis*, *Galax'ia*, *Duct* of *Pecquet*, *Alimentary Duct*, (F.) *Canal ou Conduit Thoracique*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyl'i*, which is formed by the union of five or six large lymphatic trunks, — themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena æygos. It contracts in dimension, as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

THORACIC LIMBS are the upper limbs; so called because they are articulated with the lateral and upper parts of the chest.

THORACIC, LONG or INFERIOR, Mammary inferior external artery.

THORACIC NERVES. The *short or anterior thoracic nerves* are two in number. They arise from the braehial plexus, and divide into an anterior and a posterior branch: — the former distributed to the pectoralis major muscle; the latter uniting with a branch of the other to form a loop, from which numerous branches are given off to the pectoralis major and p. minor.

The *long thora'cic nerve*, *Posterior thora'cic*, *External respiratory* of Sir Charles Bell, is a long branch, which arises from the fourth and fifth cervical nerves, immediately after their escape from the intervertebral foramina, and passes downwards to be distributed upon the serratus magnus muscle.

THORACIC REGIONS are the different regions of the chest. Thus we say, *anterior*, *lateral*, and *superior thoracic*, &c.

THORACICA, Pectorals.

THORACICS, FIRST OF THE, Mammary superior external artery.

THORACIQUE, Thoracic.

THORACOCENTE'SIS, from  $\theta\omega\rho\alpha\zeta$ , 'the chest,' and  $\kappa\epsilon\tau\eta\sigma\iota\varsigma$ , 'puncture.' *Paracente'sis thora'cis*. Puncture of the chest to evacuate contained fluid — as in empyema.

THORACOCYSTIS, Thoracystis.

THORACO-GASTRODIDY'MUS, *Didymus sym'phyo-thoracogast'rus*, *Xyphodidymus*: from  $\theta\omega\rho\alpha\zeta$ , 'the chest,'  $\gamma\alpha\sigma\tau\eta\rho$ , 'the belly,' and  $\delta\acute{\iota}\delta\upsilon\mu\omicron\varsigma$ , 'a twin.' A monstrosity in which twins are united by the chest and abdomen. — Gurll.

THORACO-FACIAL, *Platysma myoides* — t. *Maxillo-facial*, *Platysma myoides*.

THORACODIDY'MUS, from  $\theta\omega\rho\alpha\zeta$ , 'the chest,' and  $\delta\acute{\iota}\delta\upsilon\mu\omicron\varsigma$ , 'a twin.' A monstrosity in which twins are united by the thorax. — Gurll.

THORACODYNE, Pleurodynia.

THORACOPATHIA, from *θώραξ*, 'the chest,' and *πάθος*, 'disease.' Disease or suffering in the chest.

THORACOSCOPIA, see Auscultation.

THORACOSCOPIUM, Stethoscope.

THORACYST'IS, *Thoracocystis*, from *θώραξ*, 'the chest,' and *κυστίς*, 'a bladder.' Encysted dropsy of the chest. Hydatids in the chest.

THORAX, *θώραξ*, 'a cuirass, a coat of mail.' *Cith'arus*, *Venter me'dius*, *Pectus*, *Stethus*, *Scutum pectoris*, the *Breast*, the *Chest*, *Bir*, *Chelys*, *Cassa*, (F.) *Poirine*. One of the splanchnic cavities; bounded, posteriorly, by the vertebrae; laterally, by the ribs and scapula; anteriorly, by the sternum; above, by the clavicle; and below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation—the lungs and the heart.

THORAX, Corset.

THORE, Sperm.

THORN APPLE, *Datura stramonium*—t. Red, *Datura Sanguinea*.

THOROUGHSTEM, *Eupatorium perfoliatum*.

THOROUGHWAX, *Eupatorium perfoliatum*.

THOROUGHWORT, *Eupatorium perfoliatum*.

THOROW-WAX, *Eupatorium rotundifolium*.

THORULUS STRAMNEUS, *Fanon*.

THREADWORM, *Dracunculus*—t. Long, *Trichocephalus*.

THREPSIS, Assimilation, Nutrition.

THREPSOL'OGY, *Threpsolog'ia*, from *θρεψις*, 'nutrition,' and *λογος*, 'a description.' The doctrine of, or a treatise on, the nutrition of organized bodies.

THREPTICE, Assimilation.

THRIDACE, *Lactucarium*.

THRIDAX, Lettuce.

THRIFT, LAVENDER, *Statice limonium*—t. American, *Statice Caroliniana*—t. Sea-side, *Statice Caroliniana*.

THRIX, Capillus, Hair.

THROAT, *στόμα*, *στομα*, *στομα*, *Jugulum*, *Interstitium Jugularē*, *Guttur*, *Sphagē*. The anterior part of the neck. (F.) *Gorge*. Also, the *Fauces*, (F.) *Gosier*.

THROATROOT, *Geum Virginianum*, *Liatri*.

THROATWORT, *Campanula trachelium*.

THROBBING, *Pulsat'ivus*, *Sphygmicus*, *Sphygmo'des*, *Pul'satory*. A *throbbing pain*, (F.) *Douleur pulsative*, is a kind of pain which is, or seems to be, augmented by the pulsation of arteries.

THROE, Agony, Pains, labour.

THROMBI LACTEI, *Infarctus mammae lacteus*.

THROMBOCYS'TIS, from *θρομβος*, 'a clot,' and *κυστίς*, 'a cyst.' The cyst occasionally surrounding a clot of blood—as in encephalic hemorrhage.

THROMBOSIS, Coagulation, Thrombus.

THROMBUS, *θρομβος*, 'a clot,' from *τρεφειν*, 'to coagulate;' *Thrombo'sis*, *Thrombus*, *Hæmatoma*. A small, hard, round, bluish tumour; formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of blood-letting. The thrombus is most commonly owing to the opening in the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Compresses, dipped in salt water; camphorated spirit, and slight compression, usually disperse it. See Blood.

THROMBUS NEONATORUM, Cephalæmatoma.

THROTTLE, Trachea.

THROW, Agony, Pains, labour.

THROWORT, *Leonurus cardiaca*.

THRUSH, *Aphthæ*—t. Milk, *Aphthæ*—t. White, *Aphthæ*.

THRYPSIS, Comminution.

THUJA OCCIDENTALIS, *Thuja occidentalis*.

THUREA, *Juniperus lycia*—t. *Virga*, *Juniperus lycia*.

THUS, see *Pinus abies*—t. *Fœmininum*, see *Pinus abies*—t. *Judæorum*, *Croton cascarilla*, *Styrax*, *Thymiama*—t. *Libanotos*, *Juniperus lycia*—t. *Maseulium*, *Juniperus lycia*—t. *Verum*, *Juniperus lycia*—t. *Vulgare*, see *Pinus abies*.

THUYA APHYLLA, see *Sandarac*.

THUYA seu THUJA OCCIDENTALIS, *T. obtusa*, *Cupressus Arbor Vitæ*, *Arbor Vitæ*, *Tree of Life*. *Nat. Family*, *Conifere*. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vitæ*, is also called *Thuya*.

THYLACIITIS, *Gutta rosea*.

THYM, *Thymus*.

THYMA, *Thymion*.

THYMALOS, *Taxus baccata*.

THYMASTHMA, *Asthma thymicum*.

THYMBRA, *Satureia hortensis*—t. *Hispanica*, *Thymus masticina*.

THYME, CAT, *Teucrium Marum*—t. Common, *Thymus*—t. *Lemon*, see *Thymus serpyllum*—t. *Mother of Thymus serpyllum*—t. *Virginia*, *Pycnanthemum linifolium*—t. *Wild*, *Thymus serpyllum*.

THYMELEA, *Daphne gnidium*—t. *Laureola*, *Daphne laureola*—t. *Mezereum*, *Daphne mezereum*—t. *Monspelica*, *Daphne gnidium*.

THYMELCO'SIS, from *θυμος*, 'thymus,' and *ελκος*, 'an ulcer.' Ulceration of the thymus gland.

THYMI'AMA, *θυμιαμα*, 'a perfume;' *Muskwood*, *Thus Jaddo'rum*, (F.) *Narcaphte*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax.

THYMIAMA, Fumigation, Suffimentum.

THYMIASIOTECHNIA, *Thymiatechny*.

THYMIASIS, Fumigation.

THYMIATECH'NY, *Thymiatechnia*, *Thymiasiatechnia*, *Cura fumigato'ria*, from *θυμιαμα*, 'an odour,' and *τεχνη*, 'art.' The art of employing perfumes in medicine.

THYM'ION, *Thyma*, *Thymus*, *Porrus*, *Porrus*, *Verruca rhago'idea*, *Verruca minor*, from *θυμος*, 'thyme.' A small wart on the skin, resembling a bud of thyme.

THYMIOSIS, *Frambœsia*—t. *Indica*, *Frambœsia*.

THYMI'TES. Wine impregnated with thyme.

THYMI'TIS, from *θυμος*, 'thymus,' and *itis*, denoting inflammation. Inflammation of the thymus gland.

THYMPATHIA, *Psychopathia*, from *θυμος*, 'the mind,' and *πάθος*, 'affection.' A disease of the mind.

THYMOS, Rage.

THYMOXAL'ME, from *θυμος*, 'thyme,' *οξυς*, 'acid,' and *αλς*, 'salt.' A compound of thyme, vinegar, and salt.

THYMUS, *θυμος*, *Gland'ula Thymus*, *Corpus Thymianum* seu *Thymicum*, *Gland'ium*, *Thymus gland*, *Corpus incomprehe'sibile* of Jos. Frank. An organ, the uses of which are totally unknown,

and which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fœtus, it is very large, and contains in a central cavity—*reservoir of the thymus*—a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The arteries, called *thymic*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

THYMUS, *T. vulgaris* seu *tenuifolius* seu *hortensis*, *Common Thyme*, (F.) *Thym, T. ordinaire*. Family, Labiate. *Sex. Syst.* Didynamia Gymnosperma. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used.

THYMUS, *Satureia capitata*, *Thymion*—*t. Calaminthus*, *Melissa calamintha*—*t. Capitatus*, *Satureia capitata*—*t. Ciliatus*, *T. mastichina*—*t. Creticus*, *Satureia capitata*—*t. Hortensis*, *Thymus*—*t. Inclusus*, *T. serpyllum*.

THYMUS MASTICHINA, *T. ciliatus*, *Common herb Mastich*, *Marum vulgare*, *Samp'suchus*, *Clinopodia*, *Mastichina Gollo'rum*, *Thymra Hispanica*, *Juca Indica*. A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum*; but it is said to be less powerful.

THYMUS MULTIFLORUS, *Melissa nepeta*—*t. Nepeta*, *Melissa nepeta*.

THYMUS SERPYLLUM, *T. includens*, *Mother of Thyme*, *Wild Thyme*, *Herpylos*, *Herpyllos*, *Serpyllum*, *Serpyllum*, *Serpyllum*, *Gila'rum*, *Serpyllum vulgare minus*, (F.) *Serpolet*. This plant has the same sensible properties as the garden thyme; but has a milder, and rather more grateful flavour. *Lemon Thyme*, the *Serpyllum citratum*, is merely a variety of the *Thymus Serpyllum*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVATICUS, *Clinopodium vulgare*—*th. Sylvestris*, *Satureia capitata*—*th. Tenuifolius*, *Thymus*.

THYRA, *θυρα*, 'a gate, folding-door.' In composition, *Thyro*, and *Thyro*, *θυρεος*, 'a shield resembling a folding-door,' mean the thyroid cartilage.

THYREMPHRAXIS, *Bronchoecle*.

THYREO, *Thyro*, in composition, relate to the thyroid cartilage or gland.

THYREOADENITIS, *Thyreoiditis*.

THYREO-ARYTENOID, *Thyro-arytenoidens*, or *Thyro-arytenoides*. That which relates to the thyroid and arytenoid cartilages.

THYREO-ARYTENOID LIGAMENTS, *Inferior Ligaments of the Larynx*, *Lips of the Glottis*, *Vocal Cords*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See *Glottis*.

THYREO-ARYTENOID MUSCLES, *THYREO-ARYTENOIDES*, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage; whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice.

Santorini has given the name *Thyreo-arytenoidens obliquus* to a portion of the *arytenoidens* muscle.

THYREO-EPIGLOTTIC, *Thyreo-epiglottidens*, *Thyreepiglotticus*. Sabatier and Santorini have given this name to the outer portion of the thyro-arytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THYREO-HYOÏD, *Thyro-hyoidens*, *Thyro-hyoides*, *Hyoethyroides*. That which belongs or relates to the thyroid cartilage and os hyoides.

THYREO-HYOÏD or HYO-THYROID MEMBRANE is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached above to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage.

THYREO-HYOÏDEUS or *Hyo-thyreoidens* Muscle is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx: or, it can depress the os hyoides.

THYREO-PHARYNGEUS, *Thyro-Pharyngeus*.

THYREOID, *Thyroid*.

THYREOÏDEUS, *Thyroideal*.

THYREOÏTIS, *Thyreoidenitis*, *Angina thyreoidea*, from *θυρεος*, 'a shield,' and *itis*, denoting inflammation. Inflammation of the thyroid gland.

THYREONCUS, *Bronchoecle*.

THYREOPHRAXIA, *Bronchoecle*.

THYREPIGLOTTICUS, *Thyreopiglottic*.

THYRO, see *Thyro*.

THYRO-ARYTENOID, *Thyro-arytenoid*.

THYRO-CRICO-PHARYNGEUS, see *Cricopharyngeal*.

THYRO-HYOÏDEUS, *Thyro-hyoid*.

THYRO-PHARYNGEUS, *Thyro-pharyngeus*. *Valsalva*, *Morgagni*, *Santorini*, and *Winslow* have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilage.

THYRO-PHARYNGEUS, *Constrictor pharyngis*, see *Cricopharyngeal*.

THYRO-PHARYNGO-STAPHYLINUS, *Palato-pharyngeus*.

THYROCELE, *Bronchoecle*.

THYROID, *Thyreoid*, *Thyroides*, from *θυρα*, 'a gate or folding-door,' or from *θυρεος*, 'a shield,' and *ειδος*, 'form.' That which has the shape of a folding-door.

THYROID CARTILAGE, *Cartilago Scutiformis*, *C. Scutalis*, *C. Clypealis*, *Cœlportorium*, *C. Pelliculis seu peltatis*, *Scutum*, *Adam's Morian's Os*, is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage*; and, below, by a less prominent eminence, the *lesser cornu*, which is articulated with the cricoid.

THYROID GLAND, *Corpus Thyreoidum*, *Glandula Thyroidea*, (F.) *Gland on Corpus Thyroide*, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx,

as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus of the Thyroid Gland*. The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. These are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroïdeale*, as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

**THYROÏDEAL**, *Thyroïdeus, Thyreoïdeus, (F.) Thyroïdien*. That which concerns the thyroid gland or cartilage.

**THYROÏDEAL ARTERIES** are two on each side. 1. The *superior Thyroïdeale, superior laryngeale, superior guttural*, arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *crico-thyroid*. 2. The *inferior Thyroïdeale, inferior guttural*, much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis ascendens*.

**THYROÏDEAL VEINS** are, 1. A *superior thyroïdeale*, and several *middle thyroïdeale*, which open into the internal jugular vein. 2. An *inferior thyroïdeale*, much larger than the preceding, whose branches form — by anastomosing with those of the opposite side, in front of the trachea — a very remarkable venous plexus, which J. Cloquet calls the *infra-thyroïdeale plexus*. The inferior thyroïdeale veins open, — the left into the corresponding subclavian; — the right, into the *vena cava superior*.

**THYROÏDIEN**, Thyroïdeal.

**THYROPHRAXIA**, Bronchocele.

**THYRSUS**, Penis.

**TIBI-PÉRONÉO-TARSIEN**, Peronæus longus.

**TIB'IA**. A Latin word, which signifies a *flute* or pipe. *Cnemē, Procnē'mē, Procnē'nium, Fo'cile majus, Aru'ndō major, Canna major, Canna major seu domestica cruris*. The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior or femoral extremity*, which is very large, rounded, and has two eminences at the sides, called *Tuberosities of the Tibia*, or *Tibial tuberosities*. The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called *Spine of the tibia*, which are articulated with the condyles of the *Os femoris*. 2. An *inferior or tarsal extremity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine or crista of the tibia* or *tibial spine*. It is the *shin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

**TIBIA MINIMA**, Fibula.

**TIBILEUS**, Tibial.

**TIB'IAL**, *Tibia'lis, Tibia'ns, (F.) Tibial, Jambier*. That which relates to the tibia or to the leg.

**TIBIAL APONEURO'SIS, (F.) Aponévrose Jambière**, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

**TIBIAL ARTERIES** are two in number. 1. The *Tibia'lis Anti'ca*, which arises from the popliteal artery, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tarsi*. Amongst the numerous branches, given off by the tibialis antica, may be distinguished — the *Tibialis recurvens, A. malleolaris interna*, and *A. malleolaris externa*. 2. The *Tibialis Post'ca*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches — the *Plantar arteries*.

**TIBIAD**, see Tibial aspect.

**TIB'IAL ASPECT**. An aspect towards the the side on which the tibia is situated. — Barclay. *Tibiad* is used adverbially by the same writer, to signify, 'towards the tibial aspect.'

**TIBIAL NERVES** are two in number. 1. The *anterior tibial nerve, Prétibio-susplantaire, (Ch.)* One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve, Branche tibiale du nerf fémoro-poplitée, (Ch.)* is the internal popliteal.

**TIBIAL VEINS, ANTERIOR AND POSTERIOR**, have the same arrangement as the arteries which they accompany.

**TIBIA' LIS ANTI'CUS, Cate'næ mus'culus, (F.) Tibio-sus-métatarsien, Tibio-sustarsien, (Ch.) Jambier antérieur**. A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its point inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

**TIBIALIS GRACILIS**, Plantar muscle.

**TIBIALIS POST'CUS, (F.) Tibio-tarsien, Tibio-sous-tarsien, (Ch.) Jambier postérieur**. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time rais-

ing its inner edge. It, likewise, extends the leg on the foot.

**TIBIO-CALCANIEN**, Soleus—*t. Phalangetien*, Flexor longus digitorum pedis profundus perforans — *t. Sous-tarsien*, Tibialis posticus — *t. Sus-métatarsien*, Tibialis anticus — *t. Sus-tarsien*, Tibialis anticus.

**TIBIO-TARSAL**, *Tibio-tar'seus*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

**TIBIO-TARSAL ARTICULATION** is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior and posterior ligaments.

**TIBIO-TARSIEN**, Tibialis posticus.

**TIC**, *Ticitching*, *Vellication*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called in France *Tic convulsif* ou *Tic non douloureux*, to distinguish it from *Tic douloureux* or *neuralgia faciei*, and has been termed a *partial chorea* or form of *chronic chorea*, *Spasmus facialis*, *Chorea faciei*.

**TIC DOULEUREUX**, Neuralgia, facialis — *t. non douloureux*, see Tic.

**TICKLE WEED**, *Veratrum viride*.

**TICKLING**, (F.) *Chatouillement*. This word, sometimes, means the action of tickling (*titillatio*, *titillation*;) at others, the sensation produced by this action (*pruritus*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; for example, the sole of the feet, and the hypochondriac regions.

**TICKSEED SUNFLOWER**, *Coreopsis trichosperma*.

**TICKWEED**, *Hedeoma* — *t. Sunflower*, *Coreopsis trichosperma*.

**TIDAL AIR**, see Respiration.

**TIERCE**, see Tertian.

**TIGE PITUITAIRE**, Infundibulum of the brain — *t. Sus-sphénoïdale*, Infundibulum of the brain.

**TIGILLUM**, Crucible.

**TIGLIA SEU TIGLII GRANA**, see Croton Tiglium.

**TIGRETIER**, see Mania, dancing.

**TIGULA**, Saccharum.

**TIKIMMA**, *Cacocinia coecinea*.

**TILBURY, MINERAL WATERS OF**. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

**TILIA**, *T. Europæa* seu *grandiflora* seu *cordifolia* seu *pauciflora* seu *platyphylla*, *Phil'gra*. The Lime tree or Linden tree, Basswood, White-wood, Spoonwood, (F.) *Tilleul*. Family, Tiliaceæ. The flowers have been supposed to possess anodyne and antispasmodic virtues.

**TILLEUL**, Tilia.

**TILICHERRY CORTEX**, *Nerium antidysentericum*.

**TILMA**, Linteam.

**TILMOS**, Evulsion.

**TILMUS**, Carphologia.

**TILY, OF THE INDIANS**, *Viburnum dentatum*.

**TIMAC**. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

**TIMIDUS**, *Rectus inferior oculi*.

**TIN**, (D.) *Tenninum*, *Cassiteros*, *Cattiteros*, *Stangos*, *Jupiter*, *Stupia*, *Loos*, *Plumbum album* seu *caudatum*, *Plumbum caudatum*, (F.) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; s. g. 7.291;

giving a peculiar tinkling sound when struck. It is used, in medicine, only as a mechanical anthelminthic. Dose,  $\mathfrak{z}$  of the *Pulvis Stanni*, *Stannum granulum* or *Granular tin*, in molasses. This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.

**TIN, BUTTER OF**, Tin, muriate of—*t. Chloruret of Tin*, muriate of—*t. Deutohydrochlorate of Tin*, muriate of.

**TIN-FOIL**, *Stannum foliatum*, *Stanni'olum*, is used for plugging carious teeth, &c.

**TIN-GLASS**, Bismuth — *t. Granular*, see Tin — *t. Muriate of*, superoxygenated, *T. muriate of*.

**TIN, MURIATE OF**, *Butter of Tin*, *Fuming liquor of Libavius*, *Murius Stanni*, *Murius Oxyduli Stanni*, *Chloruret of Tin*, *Deuto-hydro-chlorate of Tin*, *Superoxygenated Muriate of Tin*. This is formed of Tin, one part; concentrated muriatic acid, three parts. To be crystallized by the aid of heat. A violent cathartic. Dose, gr. ij or iij.

**TIN, SULPHURET OF**, *Aurum musivum*.

**TINAGMUS**, Concussio.

**TINASMUS**, Tencemus.

**TINCTURA**, from *tingere*, *tinctum*, 'to dye.' *Tincture*, *Essentia*, (F.) *Teinture*, *Alcoolat*, *Alcohol*. The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintessence*, in one of its old significations; and with the *Alcoolatum* of the *Codex* of Paris. It is not unusual, however, to speak of *aqueous tincture*, *etherical tincture*, &c. Tinctures are made either with pure alcohol or proof spirit. The former are precipitated by water; and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them, or separate any thing from them in a palpable form; unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable.—Ph. U. S.

**TINCTURA ABSINTHII COMPOSITA**, *Compound Tincture of wormwood*, *Essentia absinthii composita* seu *amara*. (*Absinth.*, *artem. pontic.*, *caryoph.*  $\mathfrak{aa}$   $\mathfrak{z}$ ss, *sacch.*  $\mathfrak{z}$ ij. *alcohol*. *Oss.* Macerate for fifteen days. *Ph. P.*) Tonic, stomachic, vermifuge, and emarminative. Dose, f  $\mathfrak{z}$ ij to f  $\mathfrak{z}$ ss.

**TINCTURA ACACIÆ CATECHU**, *T. catechu* — *t. Acetatis ferri cum alcoholo*, see *T. ferri acetatis* — *t. Acidi sulphurici*, *Sulphurium acidum aromaticum*.

**TINCTURA ACONITI**, (Ph. U. S. 1842.) *Tinctura Aconiti foliorum*, (Ph. U. S. 1851.) *Tincture of Aconite*, (*Aconit. folior.*  $\mathfrak{z}$ iv, *alcohol. dilut.* *Oij.* Macerate for 14 days, express, and filter through paper. It may also be made by displacement. Ph. U. S.) Dose, gtt. v. It is rubbed on the seat of neuralgia.

**TINCTURA ACONITI RADICIS**, *Tincture of Aconite root*, (*Aconit. radicis*, *contus.*  $\mathfrak{b}$ ij, *Alcohol.* *Oij.* Macerate for 14 days; express and filter. It may also be prepared by displacement. Ph. U. S.) Uses same as the last.

TINCTURA ÆTHE'REA CAMPHORA'TA, *Solutio camphoræ æthe'rae, Liqueur nervinus Bangii, Spiritus sulphurico-æthereus camphora'tus, Naphtha vitrioli camphora'ta.* (Camphor. p. i. Æther sulphuric. p. ii.) Stimulant in atonic diseases, arthritic cardialgia and spasm. Dose, 20 to 30 drops in white wine.

TINCTURA ÆTHE'REA FERRI, Alcohol (seu Tinctura) sulphurico-æthereus ferri—t. Alcoholica Chinæ composita, T. cinchonæ composita—t. Alcoholica corticum aurantiorum Whytiti, Tinctura cinchonæ amara—t. Alexipharmaca Huxhami, Tinctura cinchonæ composita.

TINCTURA AL'OEES, T. *Al'oes Socotori'næ, Es-sen'tia Aloes, Al'cohol cum Aloë perfoli'ata, Tincture of Aloes.* (Aloes, pulv.  $\mathfrak{z}$ j, ext. glycyrrh.  $\mathfrak{z}$ ij, aquæ Oiss, alcohol. Oss. Macerate for 14 days, and filter. Ph. U. S.) Properties, those of aloes. Dose, f $\mathfrak{z}$ ss to f $\mathfrak{z}$ iss.

TINCTURA AL'OEES ÆTHE'REA, *Æthe'ral Tincture of Aloes, Tinctura aloes vitriola'ta.* (Aloes Socot., Myrrh,  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{z}$ iss, croci  $\mathfrak{z}$ j, sp. ætheris sulph. Oj. Digest the myrrh in the ether for 4 days; then add the aloes and saffron. Ph. E.) Stimulant and cathartic. Dose, f $\mathfrak{z}$ j to f $\mathfrak{z}$ ij.

TINCTURA AL'OEES COMPOSITA, *Elixir Proprietatis, E. aperitivum, E. Aloes, Tinctura Aloes cum Myrrhâ, T. Aloës et Myrrhæ,* (Ph. U. S.,) T. Aloes et Myrrhæ crocata, *Elixir of long life, Compound Tincture of Aloes,* (F.) *Elixir de longue vie, Baume de vie de Lelièvre,* (Aloes, in pulv.,  $\mathfrak{z}$ ij, croci,  $\mathfrak{z}$ j, Tinct. Myrrhæ, Oij.) Macerate for 14 days, and filter. Purgative and stomachic. Dose, f $\mathfrak{z}$ j to f $\mathfrak{z}$ ij.

Boerhaave's *Elixir* consisted of aloes, myrrh, saffron, and tartare of potassa, digested in alcohol and water.

Rudelife's *Elixir* is formed of Aloes Socotr.  $\mathfrak{z}$ vj, cort. cinnam., rad. zedoar,  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{z}$ ss, rad. rhei  $\mathfrak{z}$ j, coccinell.  $\mathfrak{z}$ ss, syrup. rhamni  $\mathfrak{z}$ ij, sp. tenuior. Oj. aquæ puræ f $\mathfrak{z}$ v.

TINCTURA AL'OEES ET MYRRHÆ, T. aloës composita—t. Aloes et myrrhæ crocata, T. A. composita—t. Aloes vitriolata, T. A. ætherea—t. Amara, T. gentianæ composita—t. Amomi repentis, T. cardamomi—t. Amomi zingiberis, T. zingiberis.

TINCTURA ANGUSTU'RÆ, *Tincture of Angustura.* (Cort. cuspar. in pulv. crass. redact.  $\mathfrak{z}$ ij, sp. vin. ten. Oij. Digest. Ph. D.) Dose, f $\mathfrak{z}$ j to f $\mathfrak{z}$ ij.

TINCTURA ANTIFEBRILIS WARBURGI, see Beberu.

TINCTURA ANTIODONTAL'GICA, *Toothache Tincture.* (Tannin.  $\mathfrak{z}$ j, Mastich, gr. v, æther.  $\mathfrak{z}$ ij. M.) To be applied on cotton wool, to the tooth previously dried.

TINCTURA ARISTOLOCHIÆ SERPENTARIÆ, T. serpentariæ—t. Aromaticæ, T. cinnamomi composita—t. Aromaticæ ammoniata, Spiritus ammoniæ aromaticus.

TINCTURA ASSAFÆTIDÆ, T. *Fer'ula Assafetida, Tincture of Assafetida, T. fetida, T. assafetida.* (Assafetid.  $\mathfrak{z}$ iv, alcohol. Oij. Macerate for 14 days and filter.) Dose, gtt. xv to f $\mathfrak{z}$ j.

TINCTURA ASSAFÆTIDÆ AMMONIATA, Spiritus Ammonie fœtidus.

TINCTURA AURAN'TII, T. *Corticis Aurantii, Tincture of Orange Peel.* (Aurant. cort. recent.  $\mathfrak{z}$ ij, sp. rect. Oij. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose, f $\mathfrak{z}$ ss to  $\mathfrak{z}$ j.

TINCTURA AUREA, Alcohol seu tinctura sulphurico-æthereus ferri.

TINCTURA BELLADON'NÆ, *Tincture of Belladonna.* (Belladonnæ,  $\mathfrak{z}$ iv, alcohol. dilut. Oij. Macerate for 14 days; express, and filter through paper. It may, also, be prepared by displacement. Ph. U. S.)

TINCTURA BENZO'INI COMPOS'ITA, *Compound Tincture of Benzoin, T. Benzoes composita, Balsamum Catholicum, B. Per'sicum, Balsamum traumaticum, Elixir traumaticum, Friar's Balsam, Vervain's Balsam, Wade's Drops, Jesuit's drops, Commander's Balsam, Wound Balsam, Balsam for cuts.* (Benzoin.  $\mathfrak{z}$ ij, styrac. purif.  $\mathfrak{z}$ ij, Balsam. tobt.  $\mathfrak{z}$ j, aloes, in pulv.  $\mathfrak{z}$ ss, alcohol. Oij. Macerate for 14 days and filter. Stimulant.) Used chiefly to wounds and ulcers.

The basis of *Turlington's Balsam of Life* is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy:—Alcohol. Oviiij, Benzoin.  $\mathfrak{z}$ xij, Styrac. liquid.  $\mathfrak{z}$ iv, Aloes Socotrin.  $\mathfrak{z}$ j, Balsam Peruvian.  $\mathfrak{z}$ ij, Myrrhæ,  $\mathfrak{z}$ j, Rad. Angelic.  $\mathfrak{z}$ ss, Balsam Tolut., Ext. Glycyrrh.  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{z}$ iv. Digest for 10 days, and strain.

The *Essence of Coltsfoot* consists of equal parts of the Compound Tincture of Benzoin and Balsam of Tolu, to which is added double the quantity of Rectified Spirit of Wine. It is sold as a pectoral.

TINCTU'RA CALUM'BÆ, T. *Columbæ, T. Colombo, Tincture of Columbo, Columbo Bitters,* (Columb. rad. cont.  $\mathfrak{z}$ iv, alcohol. dilut. Oij. Macerate for 14 days; express, and filter. Ph. U. S.) Dose, f $\mathfrak{z}$ ss to  $\mathfrak{z}$ iv. It may, also, be made by displacement.

TINCTURA CAMPHORÆ, Spiritus camphoræ.

TINCTURA CAM'PHORÆ COMPOS'ITA, T. *Opii Camphora'ta,* (Ph. U. S.,) *Compound Tincture of Camphor, Camphorated Tincture of Opium, Elixir Paregoricum, Paregoric Elixir.* (Opii, in pulv. Acid Benzoic.  $\mathfrak{a}\mathfrak{a}$   $\mathfrak{z}$ j. ol. anisi, f $\mathfrak{z}$ j, mellis despumat.  $\mathfrak{z}$ ij, Camphor.  $\mathfrak{z}$ ij, alcohol. dilut. Oij. Macerate for 14 days, and filter through paper. Ph. U. S.) One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, f $\mathfrak{z}$ j to f $\mathfrak{z}$ ij.

Squire's *Elixir*, an empirical carminative preparation, is thus made, according to one formula. (Opii  $\mathfrak{z}$ iv, camphor.  $\mathfrak{z}$ j, coccinell.  $\mathfrak{z}$ j, fœnicul. dulc.  $\mathfrak{z}$ ij, tinct. serpent. Oj, sp. anisi. cong. ij, aquæ Oij, auri musivi,  $\mathfrak{z}$ vj.)

TINCTURA CANTHAR'IDIS, T. *C. Vesicato'ria, F. Lytta, T. Meloës vesicato'rii, Tincture of Blistering Flies, T. of Spanish Flies,* (F.) *Teinture rubéfiante.* (Cantharid. cont.  $\mathfrak{z}$ ij, alcohol. dilut. Oij. Macerate for 14 days; express, and filter. It may, also, be prepared by displacement. Ph. U. S.) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gtt. x.

Matthew's *Injection*, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute Tincture of *Cantharides*.

TINCTURA CAP'SICI, *Tincture of Capsicum.* (Capsic.  $\mathfrak{z}$ j. alcohol. dil. Oij. Macerate for 14 days, and filter. It may, also, be prepared by displacement.) Stimulant. Dose, f $\mathfrak{z}$ ss to  $\mathfrak{z}$ j.

TINCTURA CARDAMO'MI, T. *amomi repentis, Tincture of Cardamoms.* (Cardam. cont.  $\mathfrak{z}$ iv, alcohol. dilut. Oij. Macerate for 14 days, strain, and filter. It may, also, be made by displacement.) Use, the same as the seeds. Dose, f $\mathfrak{z}$ j to f $\mathfrak{z}$ iv.

Solomon's *Balm of Gil'ead*, an empirical preparation, seems to be an aromatic tincture,—of which *Cardamoms* form a leading ingredient,—made with brandy. Some affirm that it contains *cantharides*.

TINCTURA CARDAMOMI COMPOS'ITA, *Compound Tincture of Cardamoms, Stomach Tincture, Tinctura Stomach'ica.* (Cardamom. cont.  $\mathfrak{z}$ vj. Carui. cont.  $\mathfrak{z}$ ij, cinnam. cont.  $\mathfrak{z}$ v, Uvæ passæ demptis acinis,  $\mathfrak{z}$ v, coccii. cont.  $\mathfrak{z}$ j, alcohol. dilut. Oïss.

Macerate for 14 days; express and filter. *Ph. U. S.*) Stomachic and carminative. Dose, fʒij to fʒiv.

TINCTURA CARMINATIVA SYL'VII, *Alcoholatum Carminativum Sylvi*, Carminative Elixir of Sylvius. (*Rad. angelic.* 4 p., *rad. imperator.*, *galang.* ʒā 6 p., *fol. rosarum.*, *mijoran.*, *rutæ*, *basilic.* ʒā 48 p., *baccar. laur. nobil.* 12 p. *sem. angelic.*, *lingust. levant.*, *anis.* ʒā 16 p., *zingib.*, *nuc. moschat.* ʒā 6 p., *cinnam.* 12 p., *caryoph.*, *cort. limon.* ʒā 4 p. Add alcohol 1500 p. Macerate and distil, 1000 p. *Ph. P.*) A warm stomachic, carminative, &c. Dose, ʒss to fʒss.

TINCTURA CASCARILLÆ, *T. Crotonis Eleutheriæ*, Al'cohol cum Crotonæ Cascarilla, Tincture of Cascarilla. (*Cascarill.* *cort. cont.* ʒiv, *sp. ten.* Oij. *Ph. L.*) Dose, fʒj to fʒiv.

TINCTURA CASTOREI, *T. Castorei Ros'iaci*, *Essentia Castorei*, Al'cohol castoria'tum, *T. Castorei Canadensis*, Tincture of Castor. (*Castor cont.* ʒij, *alcohol.* Oij. Macerate for 7 days, express, and filter.) Tonic and antispasmodic. Dose, gtt. xx to fʒij, or more.

TINCTURA CASTOREI COMPOSITA, Compound Tincture of Castor. (*Cast.* ʒj, *g. asafatid.* ʒss, *alcohol.* ammoniat. Oj. *Ph. E.*) Antispasmodic. Dose, fʒj to fʒiv. Called, also, *Elixir fetidum*, *Tinctura castorei fetida seu fetida ammoniata*.

TINCTURA CAT'ECHU, *Tinctura Japonica*, *T. Mimosaæ Catechu*, *T. Aca'ciæ Catechu*, Tincture of Catechu. (*Catech.* ʒij, *cinnam. contus.* ʒij, *alcohol.* dilut. Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) Astringent. Dose, fʒj to fʒij.

The Concentrated Solution of Charcoal, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CICTUÆ, *T. conii maculati*.

TINCTURA CINCHONÆ, *T. Corticis Peruvia'ni Simplex*, *T. Cort. Peruvia'ni*, Tincture of Cinchona, Tincture of Bark. (*Cinchon. flav.* in pulv. ʒvi, *alcohol.* dilut. Oij. Macerate for 14 days, express, and filter through paper. It may, also, be made by displacement. *Ph. U. S.*) Dose, fʒj to ʒiv or more.

TINCTURA CINCHONÆ AMA'RA, *Elixir antihypochondriacum*, *E. rob'orans Why'tii*, *E. Why'tii*, *Essentia Corticis Peruvia'ni Composita*, Tinctura alcohol'ica corticum aurantiorum Why'tii, *T. Kinki'næ ama'ra*, *Elixir stomachicis spirituosus*. (*Cinch. p. viij*, *Gentian. Rad.*, *Cort. Aurant. p. iij*. *Alcohol.* (.900) 96 p. Digest. Dose, one or two teaspoonfuls.

TINCTURA CINCHONÆ AMMONIATA, *T. Corticis Peruvia'ni volatilis*, Ammoniated Tincture of Bark, Volatile Tincture of Bark. (*Cinchon. lancifol. cort. cont.* ʒiv, *sp. ammon. aromat.* Oij. *Ph. L.*) In dyspepsia, combined with acidity and languor.

TINCTURA CINCHONÆ ÆTHE'REA COMPOSITA, *T. Kinæ Kinæ æthe'rea composita*, *Elixir'ium Antisepticum Docto'ris Chausier*, *Chausier's Antiseptic Elixir*. (*Cinchon. officin.* ʒij, *cas-carill.* ʒss, *cinnam.* ʒij, *croci* ʒss, *sacch. alb.* ʒxxxvij. Put these bruised into a matrass, and add *vin. alb. Hispanic.* vel *vin. muscat.*, *alcohol.* ʒā Oj. Macerate for two days, and add sulphuric ether fʒiiss. *Ph. P.*) Tonic, stimulant, and antiseptic. Dose, fʒss to fʒj.

TINCTURA CINCHONÆ COMPOSITA, Compound Tincture of Cinchona or Bark, *Harsham's Tincture of Bark*, *T. Corticis Peruvia'ni Composita*, *T. febrifuga Docto'ris Harsham*, *Essentia China*, *E. Corticis Peruvia'ni Alexipharmaca Harshami*, *Essentia Antiseptica Harshami*, *Tinctura Alexipharmaca Harshami*, *Tinctura Alcohol'ica China Composita*. (*Cinchon. rubr. pulv.* ʒij, *aurant. cort. cont.* ʒiiss, *serpent. cont.* ʒij, *croci*, *santal.* ʒā ʒj, *alcohol.* dilut. fʒxx. Macerate for 14 days,

express, and filter. *Ph. U. S.*) It may, also, be made by displacement. More grateful than the simple tincture. Dose, fʒj to fʒij.

TINCTURA CINNAMOMI, Tincture of Cinnamon, *Essentia Cinnamomi*, *T. Lauri Cinnamomi*, (*Cinnam. cont.* ʒij, *alcohol.* dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Stomachic. Dose, fʒj to fʒij.

TINCTURA CINNAMOMI COMPOSITA, Compound Tincture of Cinnamon, Tinctura Aromatica, *Essentia Aromatica*, *Alco'ol cum Aromat'ibus Compos'itus*, *Eau de Bonferme ou d'Armagne*. (*Cinnam. cont.* ʒj, *cardam.* cont. ʒss, *zingib.* cont. ʒij, *alcohol.* dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Use, same as the last. Dose, fʒj to fʒij.

TINCTURA DE COCHLEA'RIS, *Alcoholatum de Cochlea'ris*, *A. antiscorbuticum*. (*Fol. cochlear.* recent. 2500 p., *rad. armoracæ*, 230 p., *alcohol.* (22° to 32° Beaumé) 3000 p., distil off 2000 p. *Ph. P.*) Antiscorbutic. Dose, fʒij to ʒj.

TINCTURA COL'CHICI, *T. C. Sem'inis*, (*Ph. U. S.*) Tincture of Colchicum Seed. (*Colchic. sem.* cont. ʒiv, *alcohol.* dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Dose, ten to sixty drops.

TINCTURA COLCHICI SEMINIS, *T. colchici*—*t. Colombæ*, *T. Calumbæ*.

TINCTURA CONII, *T. C. Macula'ti*, *T. Cicuta*, Tincture of Hemlock. (*Conii fol.* ʒiv, *alcohol.* dil. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be made by displacement. Use;—the same as that of the leaves.

TINCTURA CONII MACULATI, *T. conii*—*t. Convulvuli Jalapæ*, *T. jalapii*—*t. Corticis aurantii*, *T. aurantii*—*t. Corticis Peruviani composita*, *T. cinchonæ comp.*—*t. Corticis Peruviani simplex*, *T. cinchonæ*—*t. Corticis Peruviani volatilis*, *T. cinchonæ ammoniata*.

TINCTURA CROCI SATI'VI, *T. Croci*, Tincture of Saffron. (*Croci Angl.* cont. ʒj, *alcohol.* dilut. ʒxv. *Ph. E.*) Slightly stomachic (?). Dose, fʒj to fʒij.

TINCTURA DE CROCO COMPOSITA, *Elixir'ium de Garus*, *Alcoholatum de Croco Compositum*, Compound Tincture of Saffron, *Elixir of Garus*. (*Aloes Socotr.* 320 p., *myrrh.* 64 p., *croci.* 32 p., *cinnam.*, *nuc. moschat.*, *caryoph.* ʒā, 16 p. *alcohol.* 1000 p. *aq. flor. aurant.* 5000 p. Digest for two days, distil 4000 p. and add *syrup. de capillaire*, 5000 p. *Ph. P.*) Aromatic, cordial, stomachic. It is also called *Elixir cordia'te et stomachic'um*, and *E. anticol'icium croc'atum*.

TINCTURA CROTONIS ELEUTHERIÆ, *T. casca-rilla*.

TINCTURA CUBE'Æ, Tincture of Cubebs. (*Cubeb.* cont. ʒiv, *alcohol.* dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Dose, one or two fluidrachms.

TINCTURA DIGITA'LIS, Tincture of Digitalis, *T. Digitalis purpu'ra*. (*Digital.* ʒiv, *alcohol.* dilut. Oij. Macerate for 14 days, express, and filter.) It may, also, be prepared by displacement. Use, same as that of the leaves. Dose, gtt. x.

TINCTURA FEBRIFUGA DOCTORIS HUXHAMI, *T. cinchonæ composita*.

TINCTURA FERRI ACETA'TIS, Tincture of Acetate of Iron. (*Potass. acetat.* ʒij, *sulph. ferr'i* ʒj, *sp. rectific.* Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. *Ph. D.*) Tonic and astringent. Dose, gtt. xx to fʒj. The Dublin college directs a *Tinctura Acetatis Ferri cum Alcoho'le*, which differs from the other, in having

half the quantity, only, of the *Acetate of Potass*.

**TINCTURA FERRI AMMONIATA**, *Tincture of Ammoniated Iron*, *T. Ferri Ammoniacalis*, *T. Florum martialis*, *T. Martis Myrsichiti*. (*Ferri ammon.*  $\mathfrak{z}$ iv, *sp. teu.* Oj. Ph. L.) *Use*—same as that of the ammoniated iron. Dose,  $\mathfrak{z}$ ss to  $\mathfrak{z}$ ij.

**TINCTURA FERRI CHLORIDI**, *T. ferri muriatis*, *TINCTURA FERRI MURIATIS*, *T. Ferri chloridi*, (Ph. U. S.), *T. Ferri sesqui-chloridi*, *Liquor Ferri muriatis*, *Tincture of Muriate of Iron*, *T. Martis in Spiritu Salis*, *T. M. cum Spiritu Salis*, *T. Ferri Muriati*, *Tincture of Steel*, *Alcohol ferriatus*. (*Ferri subcarb.*  $\mathfrak{f}$ ss, *acid. muriat.* Oj, *alcohol.* Oij.) Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. (Ph. U. S.) Tonic and styptic. Dose, *gtt.* x to xx.

*Bestucheff's Tincture* or *Klaproth's Tincture* is an ethereal tincture of chloride of iron. It is composed of dry perchloride of iron, one part; *Hoffmann's anodyne liquor*, seven parts.

The *Antivenereal Drops*, at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of chloride of iron and corrosive sublimate.

**TINCTURA FERRI SESQUICHLORIDI**, *T. Ferri muriatis*—*t. Ferri Asafetidae*, *T. Asafetidae*—*t. Florum martialis*, *T. ferri ammoniata*—*t. Fœtida*, *T. asafetidae*—*t. Fœtida ammoniata*, *T. castorei composita*—*t. Fuliginis*, see *Fuligo*.

**TINCTURA GAL'BANI**, *Tincture of Galbanum*. (*Galb.*  $\mathfrak{z}$ ij, *sp. tenuior.* Oij. Ph. D.) Stimulant and antispasmodic. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijij.

**TINCTURA GALLARUM**, *T. Gallæ*, (Ph. U. S.) *Tincture of Galls*. (*Gall. contus.*  $\mathfrak{z}$ iv, *alcohol. dilut.* Oij.) Macerate for 14 days, express and filter. (Ph. U. S.) It may, also, be prepared by displacement. Astringent. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijij.

**TINCTURA GENTIANÆ COMPOSITA**, *Compound Tincture of Gentian*, *Tinct. Amara*, *Spiritu Bitters*, *Elixir Stomachicum*. (*Gent. concis.*  $\mathfrak{z}$ ij, *aurant. cort.*  $\mathfrak{z}$ ij, *cardam. cont.*  $\mathfrak{z}$ ss, *alcohol. dilut.* Oij.) Macerate for 14 days, express, and filter. It may, likewise, be prepared by displacement. (Ph. U. S.) Tonic and stomachic. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijij.

*Brandt's Nervous Cordial* consists of the *Tinctures of Gentian*, *Columba*, *Cardamom*, and *Bark*, with the *Compound Spirit of Lavender*, and *Wine of Iron*.

*Stoughton's Elixir* is a compound tincture of gentian. The *Elixirium Doct'oris Stoughton* seu *Tinctura Amara* of the Parisian Codex is prepared as follows:—*Absinth. summit.* excisat., *Teucri chamædrys.*, *Rad. gentian.*, *cort. aurant.*  $\mathfrak{a}$   $\mathfrak{z}$ vj, *cascarilla*  $\mathfrak{z}$ ij, *rhei*  $\mathfrak{z}$ ss, *aloes socotr.*  $\mathfrak{z}$ ij, *alcohol.* Oij.) Digest.

**TINCTURA GUAJACI**, *T. G. Officinæ*, *Tincture of Guaiacum*. (*Guaiac.*  $\mathfrak{f}$ ss, *alcohol.* Oij.) Macerate for 14 days, and filter.) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana* or *Burdock*.

**TINCTURA GUAJACI AMMONIATA**, *Ammoniated Tincture of Guaiacum*, *T. Guaiacina Volatilis*, *Elixir Guaiaci Volatile*, *Alcohol cum Guaiac officinæ ammoniatus*, *Alcohol ammoniac et Guaiaci*, *T. Guaiaci*, (*P. L.* 1788.) *Volatile Tincture of Guaiacum*. (*Guaiac.* pulv.  $\mathfrak{z}$ iv, *sp. ammon. arom.* Oiss. Macerate for 14 days, and filter.) Properties same as the last. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijij.

*Hatfield's Tincture*—a nostrum—consists of *Guaiacum* and *Soap*,  $\mathfrak{a}$   $\mathfrak{z}$ ij, rectified spirit, Oiss.

**TINCTURA HELLEBORI**, *T. H. Nigri*, *Tincture of Black Hellebore*, *T. Melampodii*. (*Helleb. nigr.* cont.  $\mathfrak{z}$ iv, *alcohol. dilut.* Oij.) Macerate for 14 days, express and filter. It may also be pre-

pared by displacement. (Ph. U. S.) Dose,  $\mathfrak{z}$ ss to  $\mathfrak{z}$ ij.

**TINCTURA HIERA**, *Vinum aloes*.

**TINCTURA ILMULI**, *Tincture of Hops*. (*Humuli*,  $\mathfrak{z}$ v, *alcohol. dilut.* Oij.) Tonic and sedative. Dose,  $\mathfrak{z}$ ss to  $\mathfrak{z}$ ijij.

**TINCTURA HYOSCYAMI**, *T. Hyoscyami nigri*, *Tincture of Henbane*. (*Hyoscyam. fol.*  $\mathfrak{z}$ iv, *alcohol. dilut.* Oij.) Macerate for 14 days, express and filter. It may also be prepared by displacement. (Ph. U. S.) Narcotic, anodyne. Dose, *gtt.* xx to  $\mathfrak{z}$ ij.

**TINCTURA IODINI**, (Ph. U. S., 1842.) *Tinctura Iodini*, (Ph. U. S., 1851.) *Alcohol Iodii*, *Tincture of Iodine*. (*Iodin.*  $\mathfrak{z}$ ij, *alcohol.* Oj. Dissolve. Ph. U. S.) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goitre, &c. Dose, ten drops three times a day.

**TINCTURA IODINI COMPOSITA**, (Ph. U. S., 1842.) *Tinctura Iodini Composita*, (Ph. U. S., 1851.) *Compound Tincture of Iodine*. (*Iodin.*  $\mathfrak{z}$ ss, *Potassii iodid.*  $\mathfrak{z}$ ij, *Alcohol.* Oj. Dissolve. Ph. U. S.) Dose, 10 to 30 drops.

**TINCTURA JALAP'II**, *T. Jalapæ*, (Ph. U. S.) *T. Convolvuli Jalapæ*, *Tincture of Jalap*, *Val'ga*. (*Jalap. pulv.*  $\mathfrak{z}$ v, *Alcohol. dilut.* Oij.) Macerate for 14 days, express, and filter. (Ph. U. S.) It may also be made by displacement. Cathartic. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijij.

**TINCTURA JALAP'II COMPOSITA**, *Elixir Jalapæ Compositum*, *Elixir purgans*, *Essentia catholica purgans Rothii*, *Elixir antihelminticum Succorum*, *Eau de vie Allemande*. (*Jalap.  $\mathfrak{f}$ ss, Scammon.*  $\mathfrak{z}$ ij, *Alcohol.* (22°) Ovj.) Macerate for eight days. (Ph. P.) Dose, 60 to 100 drops.

**TINCTURA JAPONICA**, *Tinctura catechu*—*t. Kinæ kinæ æthera composita*—*t. Cinchonæ æthera composita*—*t. Kiunkinæ amara*, *Tinctura cinchonæ amara*.

**TINCTURA KINO**, *Tincture of Kino*. (*Kino*, in pulv.,  $\mathfrak{z}$ vj; *Alcohol. dilut.* q. s. Put the kino, mixed with an equal bulk of sand, into a percolator, and gradually pour on diluted alcohol until  $\mathfrak{z}$ vij of filtered liquor pass. The tincture should be renewed frequently, and kept in closely stopped bottles. (Ph. U. S.) Astringent. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijij.

**TINCTURA KRAMERIE**, *Tincture of Rhatany*. (*Kramer.* in pulv.  $\mathfrak{z}$ vj, *alcohol. dilut.* Oij.) Macerate for 14 days, express, and filter. (Ph. U. S.) It may also be prepared by displacement. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijij.

**TINCTURA LAURI CINNAMOMI**, *Tinctura cinnamomi*—*t. Lavandulæ composita*, *Spiritus lavand. comp.*—*t. Lyttæ*, *Tinctura cantharidis*—*t. Martis Glauberi*, see *Ferrum tartarizatum*—*t. Martis in spiritu salis*, *Tinctura ferri muriatis*—*t. Martis Mynsichti*, *Tinctura ferri ammoniata*—*t. Martis vinosæ*, *Vinum ferri*—*t. Melampodii*, *Tinctura hellebori nigri*—*t. Meloës vesicatorii*, *Tinctura cantharidis*—*t. Metallorum*, *Lilium Paracelsi*—*t. Mimosæ catechu*, *Tinctura catechu*.

**TINCTURA LOBELLE**, *Tincture of Lobelia*. (*Lobel.*  $\mathfrak{z}$ iv, *alcohol. dilut.* Oij.) Macerate for 14 days, express, and filter. (Ph. U. S.) It may also be prepared by displacement. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijij.

**TINCTURA LUPULINÆ**, *Tincture of Lupuline*. (*Lupulin.*  $\mathfrak{z}$ iv, *alcohol.* Oij.) Macerate for 14 days, and filter. (Ph. U. S.) Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijij.

**TINCTURA MELOES VESICATORII**, *Tinctura cantharidis*.

**TINCTURA MOSCHI**, *Tincture of Musk*, *Essence of Musk*. (*Mosch.* in pulv. redact.  $\mathfrak{z}$ ij, *sp. vini rect.* Oj.) Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ijiv.

**TINCTURA MYRRHÆ**, *Tincture of Myrrh*, *Simple Tincture of Myrrh*. (*Myrrhæ contusæ*  $\mathfrak{z}$ iv, *alcohol.* Oij.) Macerate for 14 days, and filter. (Ph.

U. S.) Tonic, deobstruent, antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

*Hudson's Preservative for the Teeth and Gums* consists of Tinct. myrrh., tinct. cinch., aq. cimam. aa ʒij, cau d'arquebusade, ʒj, pulv. gum. Arab. ʒss. M.

TINCTURA NERVINA BESTUCHEFFII, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervina Halensis, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervino-tonica, Lamotte's, Alcohol seu tinctura sulphurico-æthereus ferri.

TINCTURA NUCIS VOMICÆ, Tincture of Nux Vomica. (Alcohol. s. g. .837, fʒj; Dry Extract of Nux Vomica, 3 gr.) Dose, gtt. v to xxx, in cases where the nux vomica is indicated.

It is directed, in the last edition of the Ph. U. S. (1851), to be prepared as follows:—Nucis vomica rasur., ʒviij; alcohol, Oij. Macerate for 14 days, express, and filter. It may also be prepared by the process of displacement. Dose, gtt. v to xx.

TINCTURA OLEI MENTHÆ PIPERITÆ, Tincture of Oil of Peppermint, Essence of Peppermint. (Ol. menthæ piperitæ, fʒij, alcohol. Oj. Dissolve. Ph. U. S.) Dose, 5 drops, as a carminative.

TINCTURA OLEI MENTHÆ VIRIDIS, Tincture of Spearmint, Essence of Spearmint, is made in the same manner. Ph. U. S.

TINCTURA OPII, Tincture of Opium, Liquid Laudanum, Theriaca caelestis, Al'cohol cum Opio, Tinctura Thebaïca, Tinctura Sedati'va. (Opii pulv. ʒijss, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gtt. xx to lx and more. By macerating the dregs remaining after making the Tinctura Opii in a solution of Tartaric Acid, a solution is obtained, which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Liqueur Opii Sedati'vus*.

TINCTURA OPII ACETA'TA, Ac'etated Tincture of Opium. (Opii ʒij; aceti, fʒxij; alcohol. Oss. Rub the opium with the vinegar; add the alcohol, and having macerated for 14 days, express and filter. Ph. U. S.) Twenty drops are equivalent to a grain of opium.

TINCTURA OPII AMMONIATA, Ammoniated Tincture of Opium, Edinburgh Paregoric Elix'ir. (Flor. benz., croci, aa ʒij, opii ʒij, ol anisi ʒss, alcohol. ammoniat. fʒxxvj. Digest. Ph. E.) fʒj contains one grain of opium. Used like the Tinctura Camphoræ Composita.

TINCTURA OPII CAMPHORATA, Tinctura camphoræ composita—t. Plumbose, Liqueur plumbi subacetatis dilutus.

TINCTURA QUAS'SIÆ, T. Quassia excell'sæ, Tincture of Quassia. (Quassia rasur. ʒij, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Tonic. Dose, fʒj to ʒij.

TINCTURA QUINLE SULPHATIS, Tincture of Sulphate of Quinia. (Sulphate of Quinia, gr. vj; alcohol, (.847) fʒj. M.) Dose, fʒj to ʒiv, in the day.

A Tinctura Cincho'niæ Sulpha'tis may be made in a similar manner.

TINCTURA RHABARBARI, Tinctura rhei—t. Rhabarbari composita, Tinctura rhei—t. Rhabarbari vinosæ, Vinum rhei palmati.

TINCTURA RHEI, T. Rhabar'ari, T. Rhabarbari spirituosæ, T. Rhei, T. Rhei palma'ti, Tincture of Rhubarb. (Rhei, contus. ʒij, cardam. cont. ʒss, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. Ph. U. S.) Stomachic or purgative, according to the dose employed;

fʒj to ʒij, as a stomachic; fʒiv to ʒj, as a purgative.

TINCTURA RHEI COMPOSITA, T. Rhabarbari composita, Compound Tincture of Rhubarb. (Rhei rad. concis. ʒij, glycyrrhiz. rad. cont. ʒss, zingib. rad. concis., croci stigmat. aa ʒij, aqua fʒxij, sp. ten. Oj. Ph. L.) Properties same as the last.

TINCTURA RHEI ET AL'OE, Tincture of Rhubarb and Aloes, Elixir sucrum. (Rhei concis ʒx, aloes, pulv. ʒvj, cardam. cont. ʒss, alcohol dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) Properties like the last.

Rymer's Cardiac Tincture consists of an infusion of Capsicum, Camphor, Cardamom seeds, Rhubarb, Aloes and Castor in Proof Spirit, with a very small quantity of Sulphuric Acid.

TINCTURA RHEI ET GENTIANÆ, Tincture of Rhubarb with Gentian, Tinctura Rhei Amara. (Rhei cont. ʒij, gentian. cont. ʒss, alcohol. dilut. Oij. Macerate for 14 days, express and filter. Ph. U. S.) It may also be prepared by displacement. Properties same as the last.

TINCTURA RHEI ET SENNÆ, Tincture of Rhubarb and Senna, Warner's Gout Cordial. (Rhei cont. ʒj, sennæ, ʒij, coriandr. cont., feniculi. cont. aa ʒj, santal. rasur. ʒij, croci ext. glycyrrhiz. rad. aa ʒss, war. passar. acinis exemptis, lbss, alcohol. dilut. Oij. Macerate for 14 days; express and filter. Ph. U. S.) Dose, fʒss to fʒij.

TINCTURA RHEI, Tinctura rhei—t. Rhei amara, Tinctura rhei et gentianæ—t. Sacra, Vinum aloes.

TINCTURA SANGUINARIÆ, Tincture of Blood-root. (Sanguinar. cont. ʒiv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Dose, 30 to 60 drops.

TINCTURA SAPONIS CAMPHORATA, Linimentum saponis—t. Saponis et opii, Linimentum saponis et opii.

TINCTURA SCILLÆ, Tincture of Squill. (Scillæ ʒiv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Dose, gtt. xv to lx.

TINCTURA SEDATI'VA, Tinctura opii.

TINCTURA SENNÆ, T. Sennæ Composita, Elixir Saluti'is, Daffy's Elixir, Tincture of Senna. (Sennæ fol. ʒij, carui sem. cont. ʒij, cardam. sem. cont. ʒj, warum passarum demptis acinis, ʒiv, sp. ten. Oij. Ph. L. & D.) Stomachic, carminative and cathartic. Dose, fʒij to fʒj.

TINCTURA SENNÆ ET JALAPÆ, Tincture of Senna and Jalap. (Sennæ ʒij, jalap. pulv. ʒj, coriandr. cont., carui cont., aa ʒss, cardam. cont. ʒij, sacch. ʒiv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Dose, fʒij to fʒj.

TINCTURA SERPENTARIÆ, T. S. Virginia'na, T. Aristolochi'a Serpentaria, Tincture of Snake-root. (Rad. serpent. ʒij, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Tonic. Dose, fʒss to fʒij.

TINCTURA STOMACHICA, Tinctura cardamomi composita.

TINCTURA STRAMONII, Tincture of Stramonium. (Stramon. sem. cont. ʒiv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Dose, ten to twenty minims.

TINCTURA STRYCHNINÆ, Tincture of Strychnia. (Alcohol. s. g. .837, Oj, strychnia gr. ij.) Dose, 6 drops to 24. Properties, those of strychnia.

TINCTURA SEU AL'COHOL SULPHURICO-ÆTHE'REUS FERRI, Gutta nervina, Liqueur Anodyne Martialis, Al'cohol æthereus ferratus, Naphtu

*Vitrioli Martialis, Solutio Muriatis ferri æthe-rea, Spiritus sulphurico-æthereus martialis, Tinctura nervina Hales'nis, T. Tonico-nervina Hales'nis, Tinctura ul'rea, T. nervina Bestucheffii, T. nervino-tonica (Lamotte's), T. æthe'rea ferri, Æther Martialis, De La Motte's Golden Drops, Bestucheff's Nervous Tincture, Elixir d'Or de M. le Général De La Motte.* An ethereal solution of muriate of iron. It is much used in gout, hypochondriasis, &c.

TINCTURA SULPHURIS VOLATILIS, Liqueur fumans Boylii — t. Thebaica, Tinctura opii, Vinum opii.

TINCTURA TOLUIFERÆ BALSAMI, *Tincture of Balsam of Tolu, T. Balsami Tolutani, T. Tolutani*, (Ph. U. S., 1842.) *T. Tolutana*, (Ph. U. S., 1851), (*Bals. Tolutan.* ℥iij, alcohol Oij.) Reputed to be expectorant and corroborant. Dose, fʒss to fʒj, or more.

TINCTURA TONICA NERVINA HALENSIS, Alcohol (seu Tinctura) sulphurico-æthereus ferri.

TINCTURA VALERIANÆ, *Tincture of Valerian.* (*Valerian.* cont. ℥iv, alcohol. dilut. Oij. Macerate for 14 days, express, and strain. It may also be prepared by displacement. Ph. U. S.) Stimulant and antispasmodic. Dose, fʒss to fʒij.

TINCTURA VALERIANÆ AMMONIATA, *Ammoniated or Volatile Tincture of Valerian, T. Valeriana Volatilis.* (*Valeriana* cont. ℥iv, sp. ammon. arom. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Like the former. Dose, fʒss to fʒij.

TINCTURA VERATRI, *T. Veratri albi, Tincture of White Hellebore.* (*Rad. veratri alb.* cont. ℥viij, alcohol. dilut. Oijss. Ph. E.) Emetic and cathartic; but not very manageable. Dose, gtt. v to x.

TINCTURA ZINGIBERIS, *T. Amomi Zingiberis, Tincture of Ginger.* (*Zingib.* cont. ℥viij, alcohol. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Stimulant and carminative. Dose, fʒss to fʒij.

TINCTURE OF ACETATE OF IRON, *Tinctura ferri acetatis* — t. of Aconite, *Tinctura aconiti* — t. of Aconite root, *Tinctura aconiti radici* — t. of Balsam of Tolu, *Tinctura toluifera balsami* — t. of Bark, *Tinctura cinchonæ* — t. of Bark, ammoniated, *Tinctura cinchonæ ammoniata* — t. of Bark, compound, *Tinctura cinchonæ composita* — t. of Bark, Huxham's, *Tinctura cinchonæ composita* — t. of Bark, volatile, *Tinctura cinchonæ ammoniata* — t. of Belladonna, *Tinctura belladonnæ* — t. Bestucheff's, see *Tinctura ferri muriatis* — t. of Blistering Fly, *Tinctura cantharidis* — t. Cardiac, Rymer's, *Tinctura rhei et aloes* — t. of Colchicum seeds, *Tinctura colchici* — t. of Colombo, *Tinctura Calumbæ* — t. of Cubebs, *Tinctura cubebæ* — t. of Galls, *Tinctura gallarum* — t. of Ginger, *Tinctura zingiberis* — t. for the Gout, Dr. Wilson's, see *Colchicum autumnale* — t. Hatfield's, see *Tinctura guaiaci ammoniata* — t. of Hellebore, white, *Tinctura veratri* — t. of Hemlock, *Tinctura conii maculati* — t. of Henbane, *Tinctura hyoscyami* — t. of Hops, *Tinctura humuli* — t. of Iodine, compound, *Tinctura iodini composita* — t. of Iron, ammoniated, *Tinctura ferri ammoniata* — t. of Iron, muriated, *Tinctura ferri muriatis* — t. Klaproth's, see *Tinctura ferri muriatis* — t. of Lobelia, *Tinctura lobeliæ* — t. of Ludwig, see *Ferrum tartarizatum* — t. of Lupuline, *Tinctura lupulinæ* — t. of Musk, *Tinctura moschi* — t. Nervous, Bestucheff's, *Tinctura seu alcohol sulphurico-æthereus ferri* — t. of Oil of Peppermint, *Tinctura Olei menthæ piperitæ* — t. of Oil of Spearmint, *Tinctura olei menthæ viridis* — t. of Opium, acetated, *Tinctura opii acetata* — t. of Orange-peel, *Tinctura aurantii* — t. of Rhatany, *Tinctura krameria* — t. of Rhubarb, *Tinctura*

*rhei* — t. of Rhubarb and aloes, *Tinctura rhei et aloes* — t. of Rhubarb and gentian, *Tinctura rhei et gentianæ* — t. of Rhubarb and senna, *Tinctura rhei et sennæ* — t. of Saffron, *Tinctura croci* — t. of Saffron, compound, *Tinctura de croco composita* — t. of Senna and jalap, *Tinctura sennæ et jalapæ* — t. of Snakeroot, *Tinctura serpentaria* — t. of Soap, camphorated, *Linimentum saponis* — t. of Spanish Fly, *Tinctura cantharidis* — t. of Squill, *Tinctura scillæ* — t. of Steel, *Tinctura ferri chloridi* — t. Stomach, *Tinctura cardamomi composita* — t. of Stramonium, *Tinctura stramonii* — t. for the Teeth, Greenough's, see *Spiritus armoraciæ compositus* — t. Toothach, *Tinctura antidontalgica* — t. of Wormwood, compound, *Tinctura absinthii composita*.

TINDER, *Boletus ignarius*.

TINEVA, *Porrigo* — t. *Faciei, Porrigo larvalis* — t. *Favosa, Porrigo favosa* — t. *Ficosa, Porrigo scutulata* — t. *Furfuracea, Porrigo furfurans* — t. *Granulata, Porrigo scutulata, Porrigo lupinosa* — t. *Lactea, Porrigo larvalis* — t. *Lupina, Porrigo lupinosa* — t. *Mucosa, Porrigo lupinosa* — t. *Porriginosa, Porrigo furfurans* — t. *Tondens, Porrigo decalvans*.

TINKER'S WEED, *Triosteum*.

TINKLING, METALLIC, *Tintement métallique*.

TINNIMENTUM METALLICUM, *Tintement métallique*.

TINNITUS AURIUM, *Fluctuatio seu Sonitus aurium, Paracelsi imaginaria, Susurrus aurium, Ot'e'chus, Syrig'mus, Syring'mos, Sib'illus aurium, S. clang'us, Strep'itus seu Sibilis'mus aurium, Echos, Eneche'na, Bonbus, Murmur, 'ringing of the ears,' from tinnire, 'to ring.' (F.) Tintement, Tintouin, Bourdonnement, Bruissement.* An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

TINTEMENT, *Tinnitus aurium* — t. *Bullaire, T. métallique*.

TINTEMENT MÉTALLIQUE (F.), *Tintement bullaire, Tinnimen'tum metallicum, Canon stethoscop'icus, Metallic Respiration, Metallic Voice, Metallic Tinkling.* A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking glass, metal, or porcelain, with a pin; but is, perhaps, more like the sound of the keys of a musical snuff-box. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the *metallic resonance*. The 'metallic tinkling,' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax*.

TINTINNABULUM, *Uvula*.

TINTOUIN, *Tinnitus aurium*.

TIPSARIA, *Decoctum hordei*.

TIRE-BALLE, *Forceps* (bullet.)

TIRE-FOND, (F.) A surgical instrument, formerly used to elevate the piece of bone sawed off by the trephine.

TIRE-PUS, *Pyulcon*.

TIRE-TÊTE, (F.) A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crotchet is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

TIRES, Milk sickness.

TISANE, *Pti'sana* or *Ptis'sana, Ptisane*, from *πιττανη*, 'pearl barley,' itself from *πιτταω*, 'I decorticate.' A name given to aqueous medicines, containing but little, if any, medicinal agent.

The ancients gave the name particularly to the decoction of barley.

**TISANE COMMUNE**, Decoetum hordei.

**TISIC**, Phthisis.

**TISICAL**, Phthisicus.

**TISSU**, Tissue — *t. Accidental*, see Accidental, and Tissue, accidental — *t. Cavernense*, Cavernous texture — *t. Celluleux des os*, Cancelli — *t. Inodulaire*, Tissue, inodular — *t. Lardacé*, see Lardaceous — *t. Spongoïde*, Spongoid tissue.

**TISSUE**, *Textus, Tela*, (F.) *Tissu*. By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. Histological anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see Fibre. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed: but every division is imperfect and liable to objection. The following, by Messrs. Todd and Bowman, is one of the most recent.

**TABULAR VIEW OF THE TISSUES OF THE HUMAN BODY.**

		<i>Examples.</i>
1. Simple membrane, homogeneous, or nearly so, employed alone, or in the formation of compound membranes.	}	Posterior layer of the cornea. — Capsule of the lens. — Sarcolemma of muscle, &c.
2. Filamentous Tissues, the elements of which are real or apparent filaments.		White and yellow fibrous tissues. — Areolar tissue.
3. Compound membranes, composed of simple membrane and a layer of cells of various forms, (epithelium or epidermis) or of areolar tissue and epithelium.	}	Mucous membrane — Skin. — True or secreting glands — Serous and synovial membranes.
4. Tissues which retain the primitive areolar structure as their permanent character.		Adipose tissue. — Cartilage. — Gray nervous matter. Bone. — Teeth.
5. Sclerous or hard tissue.		
6. Compound tissues.		
a. Composed of tubes of homogeneous membrane, containing a peculiar substance.	}	Muscle. — Nerve.
b. Composed of white fibrous tissues and cartilage.		Fibro-cartilage.

**TISSUE, ACCIDENTAL or ADVENTITIOUS**, consists of every substance — foreign to the primitive organization of the economy, but yet organized and living — which may be developed in the anterior or at the surface of organs. Laënnec divides the accidental tissues into two sections: 1. Those that resemble others in the animal economy, or *analogous accidental tissues*; and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process — the *heterologous* or *heteroclitic accidental tissues*. To the first class belong, ossifications; accidental fibrous, fibro-cartilaginous, cartilaginous, areolar, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhi, melanosis, &c.

**TISSUE, AREOLAR**, Cellular tissue.

**TISSUE, CARTILAGINOUS**, *Hymnochondroïdes* seu *Hymnochondroïdes* (*Textura seu Tela*.)

**TISSUE, CRIBIFORM**, Cellular tissue — *t. Fibrous*, see Fibrous — *t. Filamentous*, Cellular tissue.

**TISSUE, INODULAR**, *Tela inodularis*, (F.) *Inodule, Tissu inodulaire*. A name given by Delpech to an accidental fibrous tissue developed in suppurating wounds, which is the principal agent in cicatrization. It has, at first, the appearance of a reddish cellululo-fibrous layer; but soon loses

its vascularity; and its fibres, which pass in all directions, become of a dull white colour, and of a consistence and hardness, that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

**TISSUE, LAMINATED**, Cellular tissue — *t. Ligamentous*, Desmoid tissue — *t. Mucous*, Cellular tissue — *t. Porous*, Cellular tissue — *t. Reticulated*, Cellular tissue.

**TIT**, Nipple.

**TITHENE**, Nurse.

**TITHYMALUS CYPARISSA**, Euphorbia cyparissias — *t. Lathyris*, Euphorbia lathyris — *t. Latifolius*, Euphorbia lathyris — *t. Palustris*, Euphorbia palustris — *t. Paralias*, Euphorbia paralias.

**TITILLAMENTUM**, Gargarism.

**TITILLATION**, Tickling.

**TITHE**, Nipple.

**TITHION**, Nipple.

**TITHIS**, Nipple.

**TITHOS**, Mamma, Nipple.

**TITUBANTIA**, *Bredouillement*.

**TITUBATIO**, Fidgets, Vacillatio.

**TO-AND-FRO-SOUND**, *Bruit de frottement*.

**TOAD-FLAX**, Antirrhinum linaria — *t. f. Bastard*, Comandra umbellata.

**TOAST-WATER**, *Aqua tostæ panis*. Toast well half a slice of a stale quartern loaf; put it into a pitcher, and pour over it a quart of water. After two hours, decant the water from the bread. It is a common drink in febrile affections.

**TOBACCO**, Nicotiana tabacum — *t. English*, Nicotiana rustica — *t. Indian*, Lobelia inflata — *t. Poison*, Hyoscyamus niger — *t. Wild*, Lobelia inflata.

**TOCETOS**, Parturition.

**TOCODOMYCODORITIS MALIGNA VAGINALIS**, Colpocæe puerperarum.

**TOCOLOGY**, Obstetrics.

**TOCOS**, Parturition.

**TODDY TREE**, Mamei.

**TOE**, Digitus pedis.

**TOEPLITZ**, see Toplitz.

**TOFUS**, Tophus.

**TOILE D'ARAIGNEE**, Araneæ telu — *t. Choroidienne*, see Choroid — *t. de Gaultier*, Sparradrappum Galteri.

**TOKAS**, Puerpera.

**TOKOLOGY**, Obstetrics.

**TOLA**, Tonsil.

**TOLERANCE**, *Tolerantia*; from *tolerare*, 'to bear.' The power of bearing. A word used by the Italian school of Rasori, to signify the power of bearing large doses of certain potent remedies, as tartrate of antimony and potassa. See *Contra-stimulus*.

**TOLES**, Tonsil.

**TOLIUM**, Tonsil.

**TOLLES**, Tonsil.

**TOLLUM**, Tonsil.

**TOLUIFERA BALSAMUM**, *Myroxylon Toluiferum*. Family, Terebinthaceæ. *Sec. Syst.* Decandria Monogynia. The name of the tree which affords the *Balsam of Tolu*, *Balsamum Toluianum*, *Toluianum*, *Toluiferæ Balsami Balsamum*, *Goac'anz*, *Red Balsam of Peru*, (F.) *Bonne de Tolu*, *B. de Carthagène*. It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant, (?) and is used in coughs. It is chiefly, however, employed on account of its flavour.

**TOLUTANUM**, see *Tolnifera balsamum*.

**TOMATA**, Solanum lycopersicum.

**TOMÉ**, *Tom'us, τομή, τομός*, 'incision.' A common suffix, as in *Lithotomy*, *Bronchotomy*, &c.

TOME, Cut, Incision.

TOMEION, Knife.

TOMEN'TUM CER'EBRI, from *tomeutum*, 'a flock of wool.' The infinite number of small vessels which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, Knife.

TOMIS, Scissors.

TOMOTOCIA, Cæsarean section.

TONE, *Tonus*, from *τενω*, 'I stretch.' The state of tension or firmness proper to each organic tissue. It is the effect of tonicity.

TONE, Elasticity.

TONGA, see *Datura sanguinea*.

TONGRES, MINERAL WATERS OF. The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate, containing carbonates of iron and magnesia.

TONGUE, Sax. *zung*, (D.) *Tong*, *Lingua*, *Glossa*, *Glotta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its particular use is, to procure the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and exspuition. It has the shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its *upper surface*, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea media'na*; at the posterior extremity of which is the *foramen cæcum* or *Fora'men of Morgagni*. The *inferior surface* is free, and covered by the mucous membrane on its anterior third and sides: but behind and in the middle it is attached to the lower jaw by means of the genio-glossus; and to the hyoides by the hyoglossus. Its *margins* are rounded; thick behind, thinner anteriorly. Its *tip*, or *point*, or *dental extremity* is rounded and free:—the *root*, *base*, or *hyoid extremity*, *Radix linguae*, is continuous with the epiglottis and velum palati. It is very thick at the foramen cæcum; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane—*Periglottis*, *Invol'crum linguae*, *Membr'na seu Tun'ica vaginalis seu Cutis seu Epider'mis seu Tunica seu Invol'crum mucosum seu Crusta villosa linguae*—which forms also the frænum beneath the tongue. On this membrane are seen the different *papillæ*. The nerves of the organ proceed from the *inferior maxillary, glosso-pharyngeal* and *hypoglossal*. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the glosso-pharyngeal to be the special nerve of gustation. The arteries are the *lingual*, from the external carotid; and the *palatine* and *tonsillar*, from the labial. The veins are the *superficialis linguae, ranina, lingualis*, and *submental*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the hyoglossi muscles.

TONGUE, BLACK. A fever which prevailed in the western States in the winter of 1842-3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, Glossocele—t. Inflammation of the Glossoitis—t. Red, fever, see Typhus—t. Scraper, *Cure-langue*—t. Tie, see Ankyloglossum.

TON'IC, *Ton'icus*. Same etymon as *Tone*. Relating to tone.

*Tonic*, *Ton'icus*, *Tono'ticus*, *Antasthen'icus*, (F.) *Tonique*, *Fortifiant*, in Therapeutics, means a

medicine, which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortant'ia*, *Confortat'iva*, *Corroborant'ia*, *Confirmant'ia*, *Roborant'ia*, &c.

The following are the chief Tonics:—Acidum Arseniosum, Acidum Nitricum, Acidum Sulphuricum, Argenti Nitras, Bismuthi Subnitras, Carbo Ligni, Cascarilla, Cinchona, Cinchonina, Colomba, Cornus Florida, Cupri Acetas, Cupri Sulphas, Cuprum ammoniatum, Cusparia, Eupatorium perfoliatum, Ferri Præparata, Gentiana, Liriodendron, Lupulina, Piperina, Prunus Virginiana, Quassia, Quinia, Salix, Salicina, Serpentaria, Zinci præparata; Aquæ minerales acidulæ et ferruginæ, Mental Tonics, (Confidence, Hope, Amusement.)

TONIC POWER, Irritability.

TONIC SPASM, *Spasmus ton'icus*, *Convulsio tonica*, *Conductio*, *Spasticus*, *Tonos*, *Ento'nia*, *Entasis*, *Enta'sia*. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

TONIC'ITY, *Tonic'itas*. The faculty that determines the general tone of the solids. Excessive tonicity causes *er'ethism* or *crispness*; deficient tonicity, *atony* or *weakness*. Tonicity has been used in the same sense as irritability.

TONIQUE, Tonic.

TONOS, Tonic spasm—t. Trismus, Trismus.

TONOTICUS, Tonic.

TONSIL, *Tonsill'a*, *Amygdala*, *Paristh'mia*, *Paristh'mium*, *Amphibranchium*, *Glan'dula colli*, *Tola*, *Tolles*, *Toles*, *To'lium*, *Tollum*, *Spongus*, *Ant'ias*, Pl. *Anti'ades*, *Almond of the ear*, *Almond of the throat*, (F.) *Amygdale*, *Tonsille*. An ovoid collection of follicles, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSILLÆ PESTILENTES, Cynanche maligna.

TONSILLARUM GANGRÆNA, Cynanche maligna.

TONSILLE, Tonsil.

TONSILLIT'IC, *Tonsillit'icus*. Belonging or relating to the tonsils; as the '*tonsillitic* branches of the glosso-pharyngeal nerve.'

TONSILLITIS, Cynanche tonsillar.

TONSORIUS CULTER, Razor.

TOOTH, Sax. *toð*, *Dens*, *Odous*, (F.) *Dent*.

The teeth, *Dentes*, *Mord'ices*, are small, hard bones, fixed in the alveoli of each jaw, and serving to lay hold of, and to cut, tear, and triturate alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitriform substance. This part is called the *crown* or *coro'na*. It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus—the *fang* or *root*, (F.) *racine*. In the adult, the teeth are 32 in number; 16 to each jaw:

these consist of 4 *incisors*, 2 *canine*, 4 *bicuspidati*, and 6 *molares*. (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cavitas Pulpæ*, *Corium Dentis*, *Autrum dentulæ*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enam'el*. The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. — See *Dentition*. Researches by Retzius, Müller and others, have led them to believe that the *ivory* of the tooth or *Dentine*, *Substantia os'sea* of Malpighi, proper tooth substance, bone of the tooth, *osseous substance of tooth*, *tooth bone*, consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called by Professor Owen *calcig'erous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crusta petrosa*, *cementum* or *cortical substance*, commences in an extremely thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel thought that it lined the *cavitas pulpæ*. They gave it the name *Substantia osi'deæ*. It is the *mat'ria tartar'ea* of Malpighi. It has been found, however, that the hard substance deposited on the inner surface of the dentine, at the age of twenty years or later, and which encroaches on the cavity, has a distinct structure from the cement, and resembles in part dentine, and in part bone. It is the *horny substance* of Blumenbach, the *ostodontine* of Owen, and the *secondary dentine* of Tomes. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum*. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTH-ACH, *Odontalgia*.—t. Bone, see *Tooth* —t. Bush, *Xanthoxylum fraxineum* —t. Tree, *Aralia spinosa*, *Xanthoxylum elava* *Herculis*.

TOOTH EDGE, *Agacement des dents*, *Hæmodia*.—t. Paste, *Dentifricium*—t. Rash, *Strophulus* —t. Shell, dog-like, *Dentalium*.

TOPHACEOUS CONCRETION, *Tophus*.

TOPHUS, *Tofus*, *Osteo'ophus*, *Toph'æcons Concretion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout; (see *Calculi*, *arthritis*), and occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel and *ehalaza*.

TOPIC, *Topical*, *Top'icns*. A local application; (F.) *Topique*. See *Local*.

TOPICUS, *Local*.

TOPINARIA, *Talpa*.

TOPIQUE, *Topic*.

TÖPLITZ or TEPLITZ, MINERAL WATERS OF. Töplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium, carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fahr.

TÖPLITZ, *Töplitz*.

TOPOGRAPHICAL ANATOMY, see *Anatomy*.

TORCULAR, *Tourniquet*.

TORCULAR HEROPHILI, *The Press of Herophilus*, *Lecheu'lon*, *Lenos*, *Lennum*, *Fourth Sinus*, (F.) *Confluent des Sinus*, *Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet.

It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it:—one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey from the cavity the blood that has been poured into it by the others.

TORCULUM, *Tourniquet*.

TORDYLIUM, *T. Officin'alē*, *Ses'eli Cre'ticum* seu *Mont'num*, (F.) *Sœcli de Crête*. *Family*, *Umbelliferae*. *Sex. Syst.* *Pentandria Digynia*. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the *theriaca*.

TORONIA ASIATICA, *Cala-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL, *Geranium maculatum*, *Tormentilla*.

TORMENTILLA, *T. erecta* seu *sylves'tris* seu *officin'lis* seu *tuberosa*, *Fragaria tormentill'a officin'lis*, *Potentill'a tormentill'a*, *Common Tormentil*, *Upright Scitfoil*, *Heptaphyllum*, *Consolida rubra*, (F.) *Tormentille*. *Family*, *Rosaceæ*. *Sex. Syst.* *Icosandria Polygynia*. The root has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x to ʒj.

TORMENTUM, *Ileus*, *Intussusceptio*.

TORMINA, *Strophos*, *Colic'al'gia*, *Encelial'gia*, *Anile'ma*, *Anile'sis*, *Gripes*, *Mulligrubs*, (F.) *Tranchées*. Acute colicky pains. *Dysentery*.

TORMINA CELSI, *Dysentery*.—t. *Parturientum*, *Pains*, *labour*.—t. *Post partum*, see *Pains*, *labour*.

TORNACULUM, *Tourniquet*.

TOROSITAS, *Corpulentia carno'sa*, *Hab'itus athlet'icns*. Muscular strength; from *torosus*, 'brawny,'—*tori*, 'brawn.'

TOROSUS, *Muscular*.

TORPEDO, *Narcosis*.

TORPEFACTIO UNIVERSALIS, *Holnarcosis*.

TORPID, *Torpidus*, (F.) *Engourdi*; from *torpeo*, 'I am benumbed.' Numb. Incapable of exertion and of feeling. Dull, stupid, inactive.

TORPIDITAS, *Torpor*.

TORPIDUS, *Narcotized*, *Torpid*.

TORPOR, *Torpiditas*, *Noth'otes*, *Parap'isis expers*, (F.) *Engourdissement*, from *torpere*, 'to be numbed.' State of a part which becomes numb, and almost incapable of motion. *Torpor*, *Torpidity*, *Torpidness*, *Torpidude* are also applied to a debilitated, sluggish condition of a part or of the whole of the body; *Aër'gia*, (F.) *Accablement*.

TORPOR, *Narcosis*.—t. of the *Colon*, see *Colon*, *torpor* of the—t. *Intestinorum*, *Constipation*.—t. *Soporificus*, *Noear*.

TORQUAY. A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phthisical invalid.

TOR'SION, *Tor'sio*. The act of twisting. *Torsion* of the extremities of bleeding vessels, *Angios'trophæ*, until the blood ceases to flow, is sometimes used to arrest hemorrhage from divided vessels.

TORTELE, *Erysimum*.

TORTICOLLIS, *Obstip'itas*, *Caput obstipum*, *Obstipa cervix*, *Obstip'itas cap'itis* seu *Colli*, *Collum obstipum*, *Trachel'agra*, *Enta'sia Loxia*, *Lox'ia*, *Cephalo'ia*, *Ancylode'ræ*, *Ancylode'ris*, *Rhabda'ria*, *Ancheuro'rh'ima*, *Rheumatis'mus colli*, *Rh. Cervic'is*, *Stiffneck*, *Wryneck*; from *torquere*, *tortum*, 'to twist,' and *collum*, 'the neck.'

A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTOISE, FRESHWATER, GREAT, *Hydraspis expansa*.

TORTUE, Testudo.

TORTURA ORIS, Canine laugh, Neuralgia faciei—t. Oris paralytica Linnæi, Paralysis, Bell's.

TORULA CEREVISIÆ, *Saccharomyces* seu *Mycoderma cerevisia*, *Cryptococcus fermentum*, Yeast plant. One of the simplest forms of vegetation, capable, under favourable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in fæces.

TORULUS GLANDIS, Crown of the glands.

TORUS, Muscle—t. Manûs, Metacarpus.

TOTA BONA, Chenopodium bonus Henricus.

TOTUM CARNOSUM, Pancreas.

TOUCH, *Tactus*, *Tactio*, *Haphtë*, *Hapsis*, *Tactio*, *Palpatio*, (F.) *Toucher*. One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active.

TOUCH-ME-NOT, *Impatiens fulva*.

TOUCH, ROYAL. It was at one time almost universally believed, in England, that the royal touch would remove *Serofula* or *King's Evil*, (as it was thence called.) This superstition is now entirely exploded. Edward, the Confessor, was the first English king who touched for the Evil.

TOUCHER, *Esaphe*, Touch.

TOUCHWOOD, *Boletus igniarius*.

TOUR DE MAÎTRE, *Coup de maître*.

TOURBILLON VASCULAIRE, *Vasa vasorum*.

TOURNESOL, *Heliotropium Europæum*.

TOURNIOLE, Paronychia.

TOURNIQUET, *Torcular*, *Torculum*, *Torculum*, *Prælium*, *Prælium*, *Prælium* seu *Prælium arterialem*, *Verticillum*, *Fascia tortilis*, from (F.) *tourner*, 'to turn.' A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

TOUS-LES-MOIS, *Amylum cannaeum*. A fecula obtained from the root of *Canna coccinea*. It resembles potato starch, and may be substituted for arrow-root. It is obtained from St. Kitts.

TOUTE BONNE, *Salvia sclarea*.

TOUTE ÉPICE, see *Myrtus pimenta*—t. *Saine*, *Sanieula*.

TOUX, Tussis—t. *Blene*, Pertussis—t. *Bronchique*, Bronchial cough, Cough, tubal—t. *Caverneuse*, see *Cavernous respiration*—t. *Convulsive*, Pertussis—t. *Quinteuse*, Pertussis—t. *Tubaire*, Bronchial cough, Cough, tubal.

TOXICÆMIA, Toxicohæmia.

TOXICAL, Poisonous.

TOXICATIO, Poisoning.

TOXICODENDRON, *Rhus toxicodendron*.

TOXICOHÆMIA, *Toxicohæmia*, from *τοξικον*, 'a poison,' and *αἷμα*, 'blood.' Poisoning of the blood.—Piorry.

TOXICOL'OGY, *Toxicolog'ia*, from *τοξικον*, (itself from *τοξον*, 'a bow,') 'a poison,' and *λογος*, 'a description.' A treatise on poisons.

TOXICO'SES, (G.) *Toxikosen*, from *τοξικον*, 'a poison.' A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system.

TOXICUM, Poison, Venom.

TRABECULA CEREBRI, Corpus callosum—t. Cordis, Columnæ carneæ.

TRABECULÆ SPLENIS, see Spleen—t. Willisii. Chordæ Willisii.

TRABES CORDIS, Columnæ carneæ.

TRABS, Penis—t. Cerebri, Corpus callosum—t. Medullaris, Corpus callosum.

TRACE, PRIMITIVE, Groove, primitive.

TRACHE'Æ, (generally, however, accented *Trachea*.) *Trachea arteria*, *Bronchus*, *Aspera arteria*, *Fistula spiritalis*, *F. pulmonalis*, *Canua*, *Syringa*, *Syrinx*; the Windpipe, *Throttle*, (F.) *Trachée artère*, from *τραχυς*, 'rough,' and *αρτηρία*, 'artery,' composed of *αἰρ*, 'air,' and *τηρεῖν*, 'to keep.' The trachea is a cylindrical, fibro-cartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchia*, which separate to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, *Anuli cartilaginæi*, *Segmenta cartilaginæa*, *Orbes cartilaginæi*, incomplete behind; situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well-marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroidal; and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia. The breathing tubes of insects are termed *Tracheæ*.

TRACHEA ARTERIA, Trachea.

TRACHEÆ, see Trachea.

TRACHEAL, *Trachealis*. Appertaining to the trachea. An epithet applied to respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia; the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

TRACHEAL GLANDS, Mucous follicles on the posterior surface of the trachea. They are small, flattened ovoid bodies.

TRACHÉE ARTÈRE, Trachea.

TRACHEITIS, Cynanche trachealis.

TRACHELAGRA, Torticollicis.

TRACHELIAN, Cervical.

TRACHELISM'US, from *τραχηλος*, 'the neck.'

A term proposed by Dr. Marshall Hall, for a fancied spasmodic action of the muscles of the neck, which he esteems to be the cause of many morbid phenomena, by inducing compression of the veins of the neck and an impeded return of blood from the head.

TRACHELITIS, Cynanche trachealis.

TRACHELIUM AMERICANUM, *Lobelia cardinalis*.

TRACHÉLO-ATLŌDO-OCCIPITAL, *Obliquus superior capitis*—t. *Atlōdo-basilare*, *Rectus capitis lateralis*—t. *Basilare*, *Rectus capitis in-*

ternus major — *t. Bosilaire, petit, Rectus capitis internus minor.*

TRACHELO-DIAPHRAGMATIC, *Trachelo-diaphragmaticus*. The fourth pair of cervical nerves, whence the phrenic nerve chiefly arises. — Chaussier.

TRACHÉLO-MASTOÏDIEN, Complexus minor — *t. Occipital, Complexus* — *t. Phymis, Bronchocele* — *t. Scapulaire, Levator scapulae.*

TRACHELOS, Collum.

TRACHEOCELE, Bronchocele.

TRACHEOPHONY, Laryngophony.

TRACHEOPHYSIS, see Phthisis laryngea.

TRACHEORRHAG'IA, *Hæmoptoë* seu *Hæmoptysis laryngea et trachealis*, from *τραχεια*, 'the trachea,' and *ρρρρρρ*, 'to break forth.' Hæmorrhage from the trachea.

TRACHEOSTENO'SIS, from *τραχεια*, 'the trachea,' and *στενωσις*, 'contraction.' Contraction or narrowness of the trachea.

TRACHEOTOMY, see Bronchotomy.

TRACHITIS, Cynanche trachealis.

TRACHOMA, *Aspre'do*, from *τραχυς*, 'rough.' *Granular conjunctiva, Granular eyelid*, (F.) *Asperité des Paupières*. A roughness of the inner surface of the eyelids; granular eyelids. A variety of ophthalmia, of which three kinds have been designated: — *T. sabulo'sum*, from sand, &c., getting between the eyelids; *T. carmenulo'sum*, *Phadaro'des, Phudaro'sis, Morum pal'pebræ inter'na*, from fleshy excrescences; and *T. herpet'icum*, from hard pustules on the inner surface of the eyelids. This last is, also, called *Fico'sis*, and *Pal'pebra fico'sa*.

TRACT, OPTIC, see Optic nerves — *t. Respiratory*, see Respiratory tract.

TRACTATIO MANUARIA, Surgery.

TRACTORATION, Perkinism, see Tractors, metallic.

TRACTORS, METALLIC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *Tractor'ation*. The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See Perkinism.

TRACTUS INTESTINORUM, Intestinal Tube — *t. Opticus*, see Optic nerves — *t. Respiratorius, Respiratory tract*.

TRACTUS SPIR'ALIS FORAMINULENT'US. Minute openings at the base of the modiolus, arranged in a spiral manner, which transmit the filaments of the cochlear nerve. The central canal of the Tractus is longer than the rest, and is called *Tu'bulus centralis modiol'i*.

TRADESCANT'IA VIRGIN'ICA, *Spiderwort*; indigenous; Order, Commelynaceæ; flowering from May to August. The roots are demulcent.

TRAGACAN'THA, *Gummi Tragacantha, G. Astrag'uli Tragacantha, Gum Tragacanth, Gum Dragon*. The concrete juice of the *Astragalus Tragacantha* or *Astragalus Verus*, a native of Persia. Family, Leguminosæ. Sex. Syst. Diadelphia Decandria. (F.) *Gomme Adragant, Adragant*. This gum is inodorous; nearly insipid; of a whitish colour; semi-transparent, and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA AROMATICA, Pulvis cinnamomi compositus.

TRAG'ICUS, *Tragien* (Ch.). from *Tragus*. A small, flat, triangular muscle which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, *Tragicus*.

TRAGOMASCHA'LIA, *Tragomas'chalë*, from *τραγος*, 'a goat,' and *μασχάλη*, 'axilla.' The strong, unpleasant odour of the armpits.

TRAGOPHONIA, Egophony.

TRAGOPO'GON, *Barba hirci*, from *τραγος*, 'a goat,' and *πωγων*, 'beard.' A genus of plants; Family, Cichoraceæ. Sex. Syst. Syngenesia Polygamia Æqualis. (F.) *Barbe de Bouc*; of which the roots of the *Tragopogon porrifolium, Salsifi, Oyster-root*, and the young shoots of the *T. pratensis, Meadow Salsifi, Common Goat's Beard*, (F.) *Salsifs des prés*, are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, *Pimpinella saxifraga* — *t. Angelica, Ligusticum podograria* — *t. Magnum, Pimpinella magna* — *t. Majus, Pimpinella magna* — *t. Saxifraga, Pimpinella magna*.

TRAGUS, *τραγος*, 'a goat;' from its being furnished, in some persons, with hair, like the beard of a goat. *Hircus, Hircinus*. A small, flattened, triangular nipple, situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name. Also, the peculiar goat-like smell of the axilla.

TRAGUS MATTHIOLI, *Salsola kali*.

TRAINASSE, *Polygonum aviculare*.

TRAMIS, Perinæum.

TRANCE, Catalepsy, Ecstasis.

TRANCHÉES, *Tormina* — *t. Uterines, Pains, after*.

TRANSFIGURATIO, Transformation.

TRANSFORMATIO, *Transformatio, Transfiguratio, Transmutatio, Metab'olë*, from *trans*, 'beyond,' and *forma*, 'form.' Change of form.

TRANSFORMATIONS DE TISSU, (F.) The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

TRANSFUSION, *Transfusio*, from *transfundere* (*trans*, and *fundere*, 'to pour'), 'to pour from one vessel into another.' *Transfusio San'guinis, Cura Medea'na, Methemachym'ia, Hæmone'tach'ysis, Hæmometach'ysis, Diach'ysis, Transplanta'tio medicæ nova, Chirur'gic transfusio'ria, Ectichæmato'sis*. The act of passing the blood of one animal into the veins of another; an operation which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

The operation can only be performed safely on animals having like kinds of blood. See Globule.

TRANSLATION, Metastasis.

TRANSMUTATIO, Transformation.

TRANSPIRATIO, Perspiration — *t. Unilatera, Hemidiaphoresis*.

TRANSPLANTA'TIO, *Metaphyte'ia*. A pretended method of curing diseases, devised by Paracelsus — by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTATIO, Morioplastice — *t. Medica nova, Transfusio*.

TRANSPLANTA'TIO DENTIS, *Insit'io dentis*. The act of transplanting a tooth from one person to another.

TRANSPORT, Delirium.

TRANSPOSITIO, Metathesis.

TRANSPOSIT'ION, *Transpositio*, from *trans*, 'over,' and *ponere*, 'to put.' *Metathesis*. Change of position.

TRANSPOSITION OF THE VIS'CERA, *Polype'ria promiscua translati'va*, *Intus inver'sus*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, Diapedesis.

TRANSUDA'TION, *Transudatio*, from *trans*, 'through,' and *sudare*, *sudatum*, 'to sweat.' The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

TRANSUDATION, Exomose.

TRANSVERSAIRE ÉPINEUX, *Transversalis dorsi*—*t. Épineux du cou*, *Semispinalis colli*—*t. Grêle*, see *Sacro-lumbalis*—*t. Épineux du dos*, *Semi-spinatus dorsi*.

TRANSVERSAL DE LA CONQUE, *Transversalis auris*—*t. du Nez*, *Compressor nasi*—*t. des Orteils*, *Transversus pedis*.

TRANSVERSALIS, Transverse.

TRANSVERSA' LIS ABDOM'INIS, (F.) *Lombo-abdominal*, (Ch.) *Transverse de l'Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebrae; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

TRANSVERSALIS ANTICUS PRIMUS, *Rectus capitis lateralis*—*t. Collateralis colli*, see *Sacro-lumbalis*.

TRANSVERSA' LIS COLLI, *Transversalis Major colli*, *Portion of the Sacro-spinal* (Ch.), (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the five or six lowest vertebrae of the neck; and to those of the four or five first dorsal. It extends the vertebrae of the neck, and inclines them to its side.

TRANSVERSALIS COLLI, *Semi-spinalis colli*.

TRANSVERSALIS DORSI, *Transverso-spinalis*, *Multifidus Spinæ*, *Lumbo-cervical portion of the Spinal* (Ch.), (*Transverso-spinalis Lumbo'rum*, *Transverso-spinalis Dorsi*, *Transverso-spinalis Colli*), *Musculus sacer*, *Spinales et transversales lumborum*, *Semi-spinalis intermus sive Transverso-spinalis colli pars interna* (Winslow), *Lumbo-dorsi-spinal*, &c., (F.) *Transversaire épineux*. This muscle, usually called, by English anatomists, *Multifidus spinæ*, and including all the *transverso-spinales*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebra. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is—to straighten the vertebral column, and to impress upon it a slight rotary motion.

TRANSVERSALIS NASI, *Compressor naris*.

TRANSVERSARIUS, Transverse.

TRANSVERSE, *Transver'sus*, *Transversa'lis*, *Transversa'rius*, from *trans*, 'over,' and *vertere*, 'to turn.' That which runs across: also, that

which relates to the transverse processes of the vertebrae.

TRANSVERSE ARTERY OF THE FACE, arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

TRANSVERSE FISSURE, see *Liver*—*t. Ligament of the Atlas*, *Annular ligament*.

TRANSVERSE PERINEAL ARTERY, *Urethro-bulbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the transversus perinæi muscle, as far as the bulb of the urethra, into which it dips, subdividing into numerous branches.

TRANSVERSE PROC'ESSES OF THE VER'TEBRÆ, *Diapophyses*, of Owen, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebrae.

TRANSVERSE SUTURE, *Sutu'ra transversa'lis*, runs across the face, and sinks into the orbit; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

TRANSVERSE DE L'ABDOMEN, *Transversalis abdominis*—*t. de l'Oricule*, *Transversus auris*—*t. du Périnée*, *Transversus perinæi*.

TRANSVERSO-SPINAL, *Semi-spinalis colli*, *Semi-spinalis dorsi*—*t. Spinalis*, *Transversalis dorsi*—*t. Spinalis colli*. *Semi-spinalis colli*—*t. Spinalis dorsi*, *Semi-spinalis dorsi*.

TRANSVER'SUS AURIS, *Transver'sus Auriculae*, (F.) *Transverse de l'Oricale* (Ch.), *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

TRANSVER'SUS PEDIS, *Scandula'rius*, (F.) *Transversal des Orteils*, *Métatarso-sous-phalangien transversal du premier orteil* (Chaussier). A muscle, which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the base of the first phalanx of the great toe, being blended with that of the adductor pollicis.

TRANSVER'SUS PERINÆI, *Leva'tor Ani parvus*, *Ischio-périneal* (Ch.), (F.) *Transverse du Périnée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbo-cavernosus. The use of this muscle is,—to compress the urethra, and to support the rectum and bladder. To a fasciculus of this muscle, Santorini has given the name *Ure'thræ Eleva'tor seu Ejacula'tor*.

TRANSVER'SUS PERINÆI ALTER, *Prostat'icus inferior*. A small muscle which occasionally accompanies the last.

TRAPA NATANS, (F.) *Macre flottante*, *Noix d'Eau*, *Chatoigne d'Eau*. *Ser. Syst.* *Tetrandria Monogynia*. The plant which affords the *Noces Aquat'icæ*, *Trib'uli aquatici*, *Caltrrops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

TRAPÈZE, Trapezium, Trapezium.

TRAPEZIUM OS, *τραπέζιον*. So called from its shape. *Os multangulum majus*, (F.) *Os trapèze*. The first bone of the second row of the carpus. It is articulated, above, with the scaphoides; below, with the first bone of the meta-

carpus; within, with the trapezoides, and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

**TRAPÉZIUS**, *Cucullaris*, (F.) *Dorso-scapularis* (Cb.), *Trapèze*, *Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebrae; and on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

**TRAPÉZOID LIGAMENT**. The anterior part of the coraco-clavicular ligament. It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely, between the acromion process and clavicle.

**TRAPEZOÏDES, OS**, *Os multangulum minus*, *Os pyramidale corpi*, from *τραπέζιον*, 'a trapezium,' and *αδός*, 'shape or resemblance.' The second bone of the second row of the carpus,—so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

**TRAUBENCUR**, Grape cure.

**TRAUISMUS**, see Balbuties and Blæsitæ.

**TRAUOTES**, see Blæsitæ.

**TRAUMA**, Wound.

**TRAUMATIC**, *Traumaticus*, *Vulnerarius*, *Vulnerary*; from *τραυμα*, 'a wound.' Any thing relating to a wound.

**TRAUMATICA**, Detergents, Vulneraries.

**TRAUMATICUS**, Traumatic, Vulnerary.

**TRAUMATOPYRA**, *Febris traumatica*; from *τραυμα*, 'a wound,' and *πυρ*, 'fire.' A wound fever, or fever consecutive to a wound.

**TRAVAIL**, Parturition.

**TRAVAIL D'ENFANT**, Parturition.

**TRAVELLER'S JOY**, Clematis vitalba.

**TRACLE**, Melasses, Theriaca—t. English, *Tenerium chamaedrys*—t. Venice, Theriaca.

**TREAD**, Cicatricula—t. of the Cock, Molecule.

**TREE**, ELK, *Andromeda arborea*—t. of Life, *Thuya occidentalis*—t. Sour, *Andromeda arborea*.

**TRÉFLE D'EAU**, *Menyanthes trifoliata*.

**TREFOIL**, *Hepatica triloba*—t. Bean, stinking, *Anagyris*—t. Marsh, *Menyanthes verna*—t. Sour, *Oxalis acetosella*—t. Shrubby, *Petala trifoliata*—t. Water, *Menyanthes trifoliata*.

**TREMA**, Foramen.

**TREMBLEMENT**, Tremor—t. *Métallique*, see Tremor.

**TREMBLES**, Milk-sickness.

**TREMBLING**, Tremor.

**TREMELLA AURICULA**, *Peziza auricula*.

**TREMOR**, *Trepidatio*, *Synclonus* Tremor, *Tromo-spasmus*, *Tromus*, Trembling, (F.) Tremblement, from *tremere*, 'to tremble.' Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affec-

tions. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement métallique*, Tremor metallicus. Tremor seems to resemble paralysis more than convulsion. See Paralysis agitata and Pavitatio.

**TREMOR CORDIS**, Hippus, Palpitation—t. Metallicus, see Tremor—t. Purring, *Frémissement cataire*.

**TREPAN**, *Trepanium*, *Terebella*, *Trip'anon*, *Pereter'ium*, *Peretor'ium*, *Serra versat'ilis*, *Cham'icis*, *Cham'ic'ion*, *Ter'ebra*, *Ter'etron*, *Tere'trium*, *Vertib'ulum*, *Try'panon*, (F.) *Trépan*, from *τρῑπανω*, 'I perforate.' A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trepán* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits, as the Crown, the *Trépan perforatif* or *Perite'rión*, the *T. exfoliatif* or *Desquamato'rium* *trep'anum*, and the *T. abaptis'ta*.

In Great Britain and the United States, this instrument has been superseded by the trephine, which is more manageable.

**TREPANATIO**, Trepanning.

**TRÉPANATION**, Trepanning.

**TREPAN'NING**, *Terebra'tio*, *Anatre'sis*, *Cephalotripe'sis*, *Trepanatio*, *Trype'sis*, *Tresis*, *Pri'sis*, *Prismus*, *Ford'atio*, (F.) *Trépanation*. Same etymon as Trepan. The methodical application of the trepan.

**TREPANON**, Trepan.

**TREPANUM**, Trepan.

**TREPHINE**. The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Centre-pin*. The centre-pin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw.

**TREPHOUSA**, Nurse.

**TREPIDATIO**, Tremor—t. Cordis, Cardiotromus.

**TREPON'DO**. A weight of three pounds.—Scribonius.

**TRE'SIS**, *τρῑσις*, from *τρῑω*, 'I bore.' Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

**TRESIS**, Trepanning, Wound—t. Cansis, Burn—t. Punctura, Puncture—t. Vultus, Wound—t. Vultus laceratum, see Laceration—t. Vultus simplex, Cut.

**TRESSAILLEMENT**, Shuddering.

**TRESSO'RIA**, *Episi'ón*, *επισσιών*. A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

**TRI**, *τρι*, in composition, 'three.' Hence:

**TRIANGLE MÉDULLAIRE**, Fornix.

**TRIANGLE VESICAL**, see Urinary Bladder.

**TRIANGULAR**, *Trigo'nos*, *Triangula'ris*, from *tris*, for *tres*, 'three,' and *angulus*, 'an angle.' That which has three angles.

**TRIANGULAR LIGAMENT or INFRA-PUBIAN** is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens.

**TRIANGULARIS**, Depressor anguli oris—t. Coccygis, Coccygeus—t. Nasi, Compressor naris.

**TRIANGULARIS STERNI**, *Sterno-costal* (Ch.), *Pectoralis inter'nus*. A muscle situate at the anterior and inner part of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

**TRIBAS**, (F.) *Tribade*, from *τριβω*, 'I rub,' *Fricatrix*, *Frica'trix*, *Futu'tor*, *Mas'cula*, *Subagita'trix*, *Subiga'tor*. A female whose clitoris is so large as to cause her to be regarded as an hermaphrodite. One who acts as a male with another female.

**TRIBULI AQUATICI**, see *Trapa natans*.

**TRIBUTUM LUNARE**, Menses—t. Menstruum, Menses.

**TRICÆ**, Plica—t. Incuborum, Plica—t. Scroforum, Plica.

**TRICAGO**, *Teucrium chamædris*.

**TRICAUDALIS**, *Retrahens auris*.

**TRICEPS**, from *tris* for *tres*, 'three,' and *caput*, 'head.' A name given to muscles that have three fleshy bundles at one of their extremities.

**TRICEPS ADDUC'TOR FEM'ORIS**. Under this appellation are comprehended three distinct muscles; *Adductor brevis*, *A. longus*, and *A. magnus*.

**TRICEPS AURIS**, *Retrahens auris*—t. *Brachialis*, *Triceps extensor cubiti*.

**TRICEPS CRURIS**, *Femoralis*, (F.) *Trifémoro-rotulien* (Ch.), *Crural*, *Trifémoro-tibi-rotulien*, *Triceps crural*, *T. de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz. 1. A middle fasciculus (the *cruralis* of most anatomists.) 2. An external fasciculus (the *vastus externus*) and 3. An inner fasciculus (the *vastus internus*.) It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

**TRICEPS DE LA CUISSE**, *Triceps cruris*—t. *Crural*, *Triceps cruris*.

**TRICEPS EXTEN'SOR CU'BITI**, *Triceps brachialis*, (F.) *Scapulo-huméro-olécranien* (Ch.), *Triceps brachial*. This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head,—*long head of the biceps externus* of Douglas, *Anconeus major* of Winslow,—arises from the anterior extremity of the inferior costa of the scapula, near its neck, and below the origin of the teres minor. The second head, or *short head of the biceps externus* of Douglas, *Anconeus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head,—*Brachialis externus* of Douglas, *Anconeus internus* of Winslow,—the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the latissimus dorsi. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

**TRICEPS MAGNUS**, *Adductor magnus*—t. *Minor*,

*Adductor longus femoris*—t. *Secundus*, *Adductor brevis*.

**TRICHÆ INCUBORUM**, Plica.

**TRICHANGIECTASIA**, *Angiectasia*, *Trichocircus*, from *τριξ*, *τριχος*, 'a hair,' *αγγειον*, 'a vessel,' and *εκτασις*, 'dilatation.' Morbid dilatation of the capillary vessels.

**TRICHAUX'Ë**; from *τριξ*, *τριχος*, 'hair,' and *αυξη*, 'increase.' Increase in the quantity and size of the hair, without change of texture.

**TRICHERA ARVENSIS**, *Scabiosa*.

**TRICHIA**, *Entropion*.

**TRICHIASIS**, *Trichio'sis*, *Tricho'sis*, from *τριξ*, *τριχος*, 'hair,' *Morbus pilaris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pilimictio*. It must be regarded as a variety of *Catur'rhuis ves'icæ*. 2. To a painful swelling of the breasts, in child-bed women, when the milk is excreted with difficulty:—a disease attributed, by Aristotle, to a hair swallowed by accident and carried to the breasts through the circulation; and 3dly, To inversion of the eye-lashes. See *Entropion*.

**TRICHIASIS LACTEA**, *Infaretus mammæ lacteus*.

**TRICHILIA**, *Cathartics*.

**TRICHINA SPIRA'ALIS**. Same etymon. A small species of entozoa discovered in the muscles of voluntary motion. *Trichinæ* consist of very minute cysts, of an oblong figure, having considerable resemblance, in size and colour, to young pediculi, and are somewhat allied to the eels found in paste and vinegar. No symptoms have as yet been observed to be pathognomonic of their presence.

**TRICHIOSIS**, *Trichiasis*—t. *Distrix*, *Distrix*.

**TRICHIS'MUS**. Same etymon. *Capillatio*, *Fissura pilaris*. A capillary fracture, fissure, or crack.

**TRICHURIA**, *Trichocephalus*.

**TRICHOCEPH'ALUS**, *Trichoceph'alus dispar*: from *τριξ*, *τριχος*, 'a hair,' and *κεφαλη*, 'head.' *Trichuria*, *Trichuris vulgaris*, *Trichuris intestinalis*, *As'caris trichuria*, *Trichin'ria*, *Trichocephalus hom'inis*, *Mastigo'des hominis*, *Long thread-worm*. A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

**TRICHOCIRCUSUS**, *Trichangiectasia*.

**TRICHO LABIS**, *Madisterium*.

**TRICHO LABIUM**, *Madisterium*.

**TRICHOLOGIA**, *Carphologia*.

**TRICHOMA**, *Capillamentum*, *Plica*.

**TRICHOMANES**, *Asplenium trichomanoides*—t. *Crenata*, *Asplenium trichomanoides*.

**TRICHOMATION**, *Capillamentum*.

**TRICHOMATOSE HAIR**, *Plica*.

**TRICHOM'ONAS**, *Trichom'onad*; from *τριξ*, *τριχος*, 'a hair,' and *μονας*, *μοναδος*, 'unity.' An animalcule found by M. Donné in the mucus of the vagina, where cleanliness has not been attended to, and to which he has given the name *Trichom'onas vagina'lis*. By some it is considered to be nothing more than separated ciliated epithelium from the uterus.

**TRICHON'OSUS**, from *τριξ*, *τριχος*, 'hair,' and *νοσος*, 'disease.' A disease of the hair.

**TRICHOPIHY'ÏA**, *Trichophyt'ica*, from *τριξ*,

τριχος, 'hair,' and φέρω, 'to grow.' Remedies that promote the growth of the hair.

TRICHOPHYTON TONSURANS, see Porrigo decalvans.

TRICHOSCHISIS, Schizatriehia.

TRICHOSIS, *Pila'rē malum*; from τριχος, 'hair.' Morbid organization or deficiency of hair. A genus in the system of Good.

TRICHOSIS, Entropion. Trichiasis — t. Area, Porrigo decalvans — t. Athrix, Alopecia — t. Distrix. Distrix — t. Furfuracea, Porrigo furfuracea — t. Hirsuties, Hirsuties — t. Plica, Plica — t. Poliosis, Poliosis — t. Setosa, Hystriaciasis.

TRICHOTON, Scalp.

TRICHURIS, Trichocephalus.

TRICLISPERMA GRANDIFLORA, Polygala paucifolia.

TRICUSPID, *Triens'pis*, *Trienspida'lis*, *Trienspida'tus*, from *tris* for *tres*, 'three,' and *enspis*, 'a point.' That which has three points.

TRICUSPID VALVES, *Valvulæ Triceps'pides* seu *triglo'chines* seu *trisul'cæ*, are three triangular, valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendinæ, which set out from the columnæ earneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRIENS, *Un'icæ quatuor*. The third part of a pound. Four ounces, Troy. — Galen.

TRIFACIAL, Trigemini.

TRIFÉMORO-ROTULIEN, *Triceps cruris* — t. *Tibi-rotulien*, *Triceps eruris*.

TRIFOLIUM ACETOSUM, *Oxalis acetosella* — t. Aquaticum, *Menyanthes trifoliata* — t. Aureum, *Hepatica triloba* — t. Cervinum, *Eupatorium cannabinum* — t. Fibrinum, *Menyanthes trifoliata* — t. Hepaticum, *Hepatica triloba*.

TRIFOLIUM MELLILLOTUS OFFICINALIS, *T. offic'ina'le*, *Melilotus cit'rina*, *Melilotus*, *Lotus sylvest'ris*, *Serratula Comp'na*, *Trifolium caballinum*, *Coro'na regia*, *Trifolium odora'tum*, *Common melilot*, (F.) *Melilot*. Family, Leguminosæ. *Sec. Syst.* Diadelphia Decandria. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, gylsters, &c.

TRIFOLIUM OFFICINALE, *T. melilotus officinalis* — t. Paludosum, *Menyanthes trifoliata* — t. Palustre, *Menyanthes trifoliata*.

TRIGASTRIC, *Trigas'tricus*, *Triven'ter*; from τρεῖς, 'three,' and γαστήρ, 'belly.' That which has three bellies. An epithet for museles so circumstanced.

TRIGEMINI, *Tergen'ini*, from *tris*, 'three,' and *gem'inus*, 'double,' 'threefold,' 'triplets.' *The fifth pair of nerves*, *Par trigeminum*, *Nervi div'isi*, *N. gustato'rii*, *Nervus quintus*, *Par quintum nervorum cerebrallium*, *N. tremellus*, *N. mixtus*, *N. sympathet'icus med'ius*, *N. sympath'icus med'ius*, *N. unon'gannus*, *N. innominat'us*, *Par trium fasciculatum*, *Trifuc'ial*, (F.) *Nerv gustatif innominat'*, *Nerv à trois cordes*, *Nerv trigemian*. This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, proceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion — the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not

passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the *first*, or *ophthalmic branch*, and the *second* or *upper maxillary*, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the *third* or *lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole, therefore, of the first and second branches, and a part of the third are sensiferous nerves, whilst the remaining part of the third — the *musculo-ducatory* or *musculo-tactory* — is wholly motoriferous, and passes to the pterygoid and other muscles concerned in mastication.

TRIGONE CÉRÉBRAL, Fornix — t. *Vésical*, see Urinary Bladder.

TRIGONEL'LA FŒNUM, *T. Fœnum Græ'cennu*, *Fœnugreek*, *Fœnugreek*, *Fœnum Græ'cennu*, *Bu'cerus*, *B. Fœnum Græ'cennu*, *Corphos*, *Ægoc'leros*, (F.) *Fœnugree*. Family, Leguminosæ. *Sec. Syst.* Diadelphia Decandria. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

TRIGONOS, Triangular.

TRIGONUS VESICÆ, see Urinary bladder — t. Lieutaudi, see Urinary bladder.

TRIJUMEAUX, Trigemini.

TRILLIUM LATIFOLIUM, *Broadleaf Bethroot*, *Bethroot*, *Rattlesnake root*, *Wakerobin*, *Coughroot*, *Indian Balm*, *Ground Lily*, *Jews' Harp*, *Indian Shanrock*, *Pariswort*, *Truelwee*. *Sec. Syst.* Hexandria Trigynia. A plant peculiar to North America, which blossoms in the spring. The root is astringent.

There are many species of Trillium, all of which possess the same properties.

TRIOCEPHALIA, Aprosopia.

TRIORCHIS, from τρεῖς, 'three,' and ορχίς, 'a testicle.' One who has three testicles.

TRIOSTOSPERMUM, Triosteum.

TRIOSTEUM, *T. Perfoliatum* seu *major*, *Triosteospermum*, *Bastard Ipœcean'ho*, *Fever Root*, *Feverwort*, *Tinker's weed*, *Horse ginseng*, *Ipœcæ*, *Wild Coffee*, *White ginseng*, *Gen'tian*, *White Gentian*, *Sweet Bitter*. In very large doses, the bark of the root proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

TRIBE DE ROCHE. Different lichens of the species Gyrophora, inhabiting the arctic regions of America, bear this name. They are eaten as food by the hunters.

TRIPHAR'MACUM, τριφάρμακον. A medicine composed of three ingredients.

TRIPLET, from *triplex*, 'triple.' One of three children born at the same accouchement or gestation. Also, relating to triplets — as a 'triplet conception.'

TRIPLET MONSTERS, *Monstro trip'lica* seu *trigem'ina*, are such as have parts of the body tripled. They are rare.

TRIPSIS, Contusio, Trituration.

TRIPUDIATIO SPASTICA, Chorea.

TRIQUETRUM, (OS.) Cuneiform (bone.)

TRISIS, Bryginus.

TRISMUS, from τριζω, 'I gnash.' *Ento'sia Trismus*, *Crisp'trum*, *Tonus Trismus*, *Locked Jaw*, *Spassmus seu Rigor* seu *Tet'anus maxill'æ inferio'ris*, *Gnathospas'mus*, *Stomatospas'mus*, (F.) *Mal de Macheiro*. Spastic closure of the under jaw; a partial tetanus. Cullen makes two va-

rieties—*T. nascentium*, *T. neonatorum*, *Ninckay fits*, (F.) *Sarrète*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

TRISMUS CAPISTRATUS, *Brédissure*—t. Catarrhalis maxillaris, Neuralgia maxillaris—t. Clonicus, Neuralgia faciei—t. Cynicus, see *Canine laugh*—t. Diastrophe Sauvagesii, Paralysis, Bell's—t. Dolorificus, Neuralgia faciei—t. Maxillaris, Neuralgia faciei—t. Nascentium, see *Trismus*—t. Neonatorum, see *Trismus*—t. Sardonicus, *Risus sardonicus*.

TRISPERMUM, from *τρεις*, 'three,' and *σπερμα*, 'a grain or seed.' A cataplasm, consisting of three seeds,—*cumin*, *bay*, and *smallage*. *Goræus*.

TRISPLANCHIA, Cholera.

TRISPLANCHNIC, *Trisplanch'nicus*; from *τρεις*, 'three,' and *σπλᾶγγον*, 'viscus.' That which relates to three orders of viscera.

TRISPLANCHNIC NERVE, *Great sympathet'ic, Intercostal, Ganglion'ic nerve, Nerve of organ'ic life, Ver'tebral nerve*;—named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *nervous system of the automa'tic functions*. It has also been called the *organic nervous system*, and *ganglion'ic nervous system*. It is called *Trisplanchnic*, because it distributes its branches to the organs in the three great splanchnic cavities—the head, chest and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part, it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck:—the *superior, middle, (thyroid ganglion), and inferior, (ver'tebral ganglion)*; 12 in the back—the *thoracic*; 5 in the loins—the *lumbar*; and three or four *sacral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *coccygeal, Gan'glion impar, æ'gygous gan'glion*. Meckel divides it into two portions—1. The *central ganglions or central part*, composed of the numerous ganglion'ic plexuses in the abdomen; the centre of which is the *semilunar and solar plexuses*. 2. The *external ganglions, Limitrophes or external part*, which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either.

TRISPLANCHNITIS, Cholera, (spasmodic.)

TRISSAGO, *Teucurium chamædryd*s—t. *Palustris, Teucurium scordium*.

TRISTEMANIA, Melancholy.

TRISTERNAL, Bèclard has given this name to the third bony portion of the sternum;—that which corresponds to the third intercostal space.

TRISTITIA, Athynia, Mœror.

TRITÆOPHYA AMERICANA, Fever, yellow.

TRITÆOPHYES, *Tritæoph'ya*, from *τρεις*, 'tertiary,' and *φυω*, 'I originate.' A fever, whose type approaches the tertian. Sauvages gave the

name *Tritæophya Vvatislaviensis*, to an epidemic, which broke out in the Prussian army at Breslav, in the middle of the last century.

TRITÆUS, Tertian fever.

TRITICUM ÆSTIVUM, *T. cereal'è* seu *Cevallos seu compac'tum seu erinac'cum* seu *Gaertneria'dum* seu *Linna'dum* seu *pruino'sum*, 'Summer wheat;' and TRITICUM HYBERNUM seu *glaucum* seu *Muticum* seu *Sic'ulum*, *Winter wheat*, (F.) *Froment. Family. Gramineæ. Sex. Syst. Triandria Digynia*. From these plants our wheaten flour is obtained, by grinding the seeds—*Wheat, Pyrus, Frumen'tum*—and to them we are indebted for our bread and pastry. The nutritive properties of wheaten flour are so well known as not to need comment.

*Bread*, (F.) *Pain*, mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread, Mica panis*, are a common excipient for pills and boluses.

TRITICUM ARVENSE, *T. repens*—t. *Cereale, T. æstivum*—t. *Cevallos, T. æstivum*—t. *Compac'tum, T. æstivum*—t. *Faginum, Polygonum fagopyrum*—t. *Gaertnerianum, T. æstivum*—t. *Glaucum, T. hybernum*, and *T. repens*—t. *Hybernum*, see *T. æstivum*—t. *Muticum, T. hybernum*—t. *Linnaeanum, T. æstivum*—t. *Pruinosum, T. æstivum*.

TRITICUM REPENS, *T. arven'sè* seu *glaucum, Agropyrum lævis'simum, Brocum glaber, Gramen caninum, Gramen dioscor'idis, G. repens, Lolial'ceum radi'cè repen'te, Dog-grass, Couch-grass, Quicken, (F.) Chieudent*. The roots are sweet, and possess aperient properties. They are said, also, to be diuretic.

TRITICUM SICULUM, *T. hybernum*.

TRITON, Contritio, Trituration.

TRITON PALUSTRIS, see *Ectozoa*.

TRITURA, Contritio.

TRITURATIO, *Tritura'tio, Tritu'ra, Tritus, Tritio, Tripsis*, from *terere, tritum*, 'to bruise.' The act of reducing a substance to powder.

TRITURATIO, Contritio.

TRITUS, Contritio, Trituration.

TRIVELIN, see *Liver*.

TRIVENTER, Trigastic.

TROCAR, *Trochar, Acus paracent'ica* seu *paracent'ica, A. trig'etra vulg'aris, Paracent'icium, Paracentet'ion*. Corrupted from the (F.) *Troisquarts* or *Trocart*, 'three quarters;' so called from the triangular shape of the point—*Trig'etrum*. An instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a cannula, which is so adapted to the perforator, that, when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the cannula remains in the wound and affords the fluid a ready passage outwards.

TROCART, Trocar.

TROCH, Trochiscos.

TROCHANTER, *Trokanter, Rota'tor*, from *τροχων*, 'I turn.' Anatomists have given the names *great* and *little trochanter* to two processes at the upper extremity of the femur. The *great trochanter, glutus*, is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter*, means the larger process, the smaller he calls *trochantin*.

TROCHANTERIAN, *Trochanteria'dus, Trochanter'ian*. That which belongs or relates to the great trochanter.—*Chaussier*.

TROCHANTINIAN, *Trochantin'ian, Trochantinia'dus*. That which belongs or relates to the trochantin or lesser trochanter.

## TROCHAR, Troear.

TROCHES OF CARBONATE OF LIME, Trochisci carbonatis calcis — t. of Chalk, Trochisci carbonatis calcis — t. Escharotic, Trochisci escharotici — t. Gum, Trochisci gummosi — t. of Ipecacuanha, Trochisci ipecacuanhæ — t. Liquorice, Trochisci glycyrrhizæ — t. Liquorice, with opium, Trochisci glycyrrhizæ cum opio — t. of Magnesia, Trochisci magnesiæ — t. Nitre, Trochisci nitratis potassæ — t. of Peppermint, Trochisci menthæ piperitæ.

## TROCHIA, Orbit.

## TROCHILIA, Trochlea.

TROCHIN, from τροχον, 'to turn.' Chaussier has given this name to the smaller of the tuberosities at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm,—the subscapularis.

TROCHIN'IAN, Trochinian's. That which belongs or relates to the trochin.

TROCHIS'CUS, *Phthois, Artis'cus, Collis, Collis, Phthois'cus, Rot'ula, Cyclis'mos*, diminutive of τροχος, 'a wheel.' A troch or round table, (F.) Trochisque. See Pastil, and Tabella. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the trochisque differs from the tablette,—the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach.

The Parisian Codex has two formulæ for troches for external use.

TROCHISCI BECHICI NIGRI, T. glycyrrhizæ glabrae.

TROCHISCI CARBONATIS CALCIS, Troches of Carbonate of lime, T. of chalk, Tabellæ ad ardentem ventriculi, Lozenges for the heartburn, Tabellæ cardialgicæ, T. ad sodam, Trochisci e cretâ, T. cretæ (Ph. U. S.) (Cret. ppt.  $\frac{3}{4}$ iv; acaciæ, in pulv.  $\frac{3}{4}$ j; myrist. in pulv.  $\frac{3}{4}$ j; sacch. in pulv.  $\frac{3}{4}$ vj. M. Form into troches with water.) Antacid and absorbent.

TROCHISCI E CRETÂ, Tr. carbonatis calcis — t. Cretæ, T. carbonatis calcis.

TROCHISCI VEL PASTILLI EMETINÆ PECTORALES, Pectoral Lozenges of Emetine. (Sugar,  $\frac{3}{4}$ iv; emetine, 32 grains. Form into lozenges of nine grains each.) One is a dose.

TROCHISCI ESCHAROTICI, Escharotic Troches. (Hydrag. oxyzur. p. 8; amyli, p. 16; mucilag. g. tragac. q. s. Make into troches, to which a few drops of laudanum may be added.—Ph. P.) Used in foul ulcers, to remove excrescences, &c.

TROCHISCI ESCHAROTICI DE MIN'IO. (Oxyd. plumbi. rubr. p. 16; hydrarg. oxyzur. p. 32; mic. panis, p. 128; aq. rosæ, q. s.—Ph. P.) Used like the last.

TROCHISCI GLYCYRRHIZÆ GLABRÆ, Liquorice troches, Black pectoral lozenges, Trochisci bechici nigri. (Ext. glyc. glabræ, gum. acac.  $\frac{3}{4}$  p. j; sacch. purif. p. ij. Dissolve in warm water; strain; evaporate, and form into troches.—Ph. E.) Demulcent. To allay cough.

TROCHISCI GLYCYRRHIZÆ CUM O'PIO, T. G. et opii (Ph. U. S.). Trochisci Thebaici, T. sedativo-balsamici, T. pectorales regia Danorum, Liquorice Troches with Opium, Wistar's Lozenges. (Opii, in pulv.  $\frac{3}{4}$ ss; ext. glycyrrhiz. in pulv., sacchar. in pulv., acaciæ, in pulv.,  $\frac{3}{4}$ ā  $\frac{3}{4}$ x; ol. anisi, f $\frac{3}{4}$ j. Make into troches.—Ph. U. S.) Demulcent and anodyne.

Spitta's Lozenges for coryza, hoarseness, and sore-throat, are composed as follows:—(Cubeb. recent. in pulv.  $\frac{3}{4}$ j; extract. glycyrrhiz.  $\frac{3}{4}$ j; myr-

oryl.  $\frac{3}{4}$ j; acaciæ,  $\frac{3}{4}$ iv; syrup, q. s. ut fiant trochisci gr. x singulis.

TROCHISCI GUMMOSI, Gum Troches. (G. acac. p. v; amyli, p. i; sacch. pur. p. xij. Make up the troches with rose-water.—Ph. E.) Demulcent.

TROCHISCI IPECACUANHÆ, Troches of Ipecacuanha. (Ipecacuanh. in pulv.  $\frac{3}{4}$ ss; sacchar. in pulv.  $\frac{3}{4}$ xiv; maranta, in pulv.  $\frac{3}{4}$ iv; mucilag. tragacanth. q. s. Make into troches.—Ph. U. S.)

TROCHISCI MAGNESIÆ, Troches of Magnesia. (Magues.  $\frac{3}{4}$ iv; sacchar. lbj; myrist. pulv.  $\frac{3}{4}$ j; mucilag. tragacanth. q. s. Make into troches.—Ph. U. S.) Useful in acidity of the stomach, with constipation.

TROCHISCI MENTHÆ PIPERITÆ, Troches of Peppermint. (Ol. menth. piperit. f $\frac{3}{4}$ j; sacchar. in pulv. lbj; mucilag. tragacanthæ, q. s. Make into troches.—Ph. U. S.) Used as a carminative.

TROCHISCI NITRATIS POTASSÆ, Nitre Troches. (Nitrat. potassæ, p. j; sacch. pur. p. iij. Make into troches with mucilage of tragacanth.—Ph. E.) In slight inflammatory sore-throat and fever.

TROCHISCI PECTORALES REGIS DANORUM, Tr. glycyrrhizæ cum opio — t. Sedativo-balsamica, Tr. glycyrrhizæ cum opio.

TROCHISCI SODÆ BICARBONATIS, Troches of Bicarbonate of Soda. (Sodæ bicarb.  $\frac{3}{4}$ iv; sacchar. in pulv. lbj; mucilag. tragacanth. q. s. To be made into a mass, and divided into troches, each weighing ten grains.—Ph. U. S.)

The Pastilles de Vichy, Pastilles digestives d'Hauteville-Vichy, Pastilli digestivi Darceii, composed of bicarbonate of soda, oil of peppermint, and sugar, are much used in France, like the Vichy waters, in cardalgia, gout, and lithiasis.

TROCHISCI STIBIATI, Tabellæ antimoniales Kunkelii — t. Thebaici, T. glycyrrhizæ cum opio.

## TROCHISQUE, Trochiscos.

TROCHITER, from τροχον, 'to turn.' The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles.—Chaussier.

TROCHITER'IAN, in the language of Chaussier, means any thing belonging or relating to the trochiter.

TROCH'LEA, Trochil'ia, (F.) Trochlée ou Troklée. A pulley; from τροχον, 'I turn,'—for example, the articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm. Also, the cartilaginous pulley over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit.

## TROCHLEA LABYRINTHI, Cochlea.

## TROCHLEARIS, Obliquus superior oculi.

TROCHLEATEUR, GRAND, Obliquus superior oculi—t. Petit, Obliquus superior oculi.

## TROCHLÉE, Trochlea.

TROCHOID, from τροχος, 'a wheel,' and εἶδος, 'resemblance.' Trochoïdes, Ax'ea commissura. An articulation, in which one bone turns upon another, like a wheel upon its axle; as the Atlanto-axoid articulation.

## TROCHOIDES, Axæa commissura.

## TROËNE, Ligustrum vulgare.

## TROCHILARTS, Trocar.

## TROKANTER, Trochanter.

## TROKANTERIAN, Trochanterian.

## TROKANTINIAN, Trochantinian.

## TROKLÉE, Trochlea.

## TROMOMANIA, Delirium tremens.

## TROMOPARANGÆA, Delirium tremens.

TROMOS, see Paralysis agitans.

TROMOSPASMUS, Tremor.

TROMPE, Tuba — *t. d'Eustache*, Eustachian tube — *t. de Fallope*, Tuba Fallopiana — *t. Uterine*, Tuba Fallopiana.

TROMUS, Tremor.

TRONC, Trunk — *t. Brachial*, Brachial artery — *t. Basilaire*, Basiliary artery.

TROPÆOLUM MAJUS, *Indian Cress*, *Nasturtium Indicum*, *Acrivi'ola*, *Flos sanguineus monar'di*, *Nasturtium Peruvia'num*, *Cardamin'dum majus*, *Cardamin'dum majus*. Family, Geraniaceæ. *Sex. Syst.* Octandria Monogynia. (F.) *Cresson des Indes*, *Cresson du Mexique*, *Capucine*. An antiscorbutic.

TROPÆOLUM TUBEROSUM, *Ulluco*. A tuberous plant, cultivated in the Sierra, Peru. It is smaller than the potato.

TROPHALIS, Colostrum.

TROPHE, Aliment, Cibatio, Pabulum.

TROPHI. Same etymon as Trophy. In insects, the parts of the mouth that are employed in receiving and preparing the food.

TROPHICAL, *Troph'icus*. Same etymon as Trophy. Relating to nourishment or nutrition.

TROPHICAL NERVES. The organic nerves, or nerves of the sympathetic system, have been so termed, from a belief that they were concerned in nutrition.

TROPHIMOS, Nutrition.

TROPHONEURO'SIS, from τροφή, 'nourishment,' and *neurosis*. A morbid condition of the process of nutrition owing to diminished nervous influence.

TROPHON'OSI, *Trophonu'si*, from τροφή, 'nourishment,' and νόσος, 'a disease.' Diseases of nutrition.

TROPHY, *Troph'ia*, τροφή, a suffix denoting 'nourishment or nutrition;' as hypertrophy, 'excess of nourishment or nutrition.'

TROPONU'SI, *Morbi trop'ici*, from τροπή, the solstitial or tropical point where the sun turns or alters its course, and νόσος, 'a disease.' Diseases that prevail in the tropics.

TROSTER, see Spirit.

TROU, Foramen — *t. Anonyme*, Foramen stylo-mastoideum — *t. Avengle on Borge*, Cæcum foramen — *t. Borge* of the Medulla oblongata, Foramen cæcum of the medulla oblongata — *t. de Botal*, Botal foramen, Ovale foramen — *t. Déchiré antérieur*, Lacerum anterior foramen — *t. Déchiré postérieur*, Lacerum posterior foramen — *t. Épineux*, Spinale foramen — *t. Mentonnier*, Mental foramen — *t. Optique*, Foramen opticum — *t. Orbitaire supérieur*, Foramen supra-orbitarium — *t. Orbitaire supérieur*, Orbital foramen superior — *t. Ovale*, Ovale foramen — *t. Rond*, *petit*, Spinale foramen — *t. Sous-orbitaire*, see Suborbital canal — *t. Sous-pubien*, Obturatorium foramen — *t. Sphéno-épineux*, Spinale foramen — *t. Sus-orbitaire*, Foramen supra-orbitarium.

TROUS CAROTIDIENS, Carotica foramina — *t. Condyloldiens*, Condyloidea foramina — *t. de Conjugaison*, Conjugationis foramina — *t. de Conjugaison*, see Vertebræ — *t. Olfactifs*, Olfactory foramina — *t. Rachidiens*, Spinal foramina.

TROUSSE-GALANT, Cholera morbus.

TROUSSEAU, Fasciculus.

TROUSSEAUX ARRIÈRE - MÉSENTÉRIQUES, (F.) A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

TRUBS, Lycoperdon tuber.

TRUCULENTUS, Homicidal.

TRUELOVE, Paris, Trillium latifolium.

TRUFFE, Lycoperdon tuber.

TRUFFLE, Lycoperdon tuber.

TRUMBUS, Thrombus.

TRUMPET CREEPER, *Tecoma radicans* — *t.* Flower, *Tecoma radicans* — *t.* Weed, *Eupatorium purpureum*.

TRUNCUS, Trunk.

TRUNK, *Truncus*, (F.) *Tronc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts: — a *superior*, the *head*; a *middle*, the *thorax*, and an *inferior*, the *pelvis*. These three regions contain the great splanchnic cavities. They are united by a common *stalk* — the vertebral column. To the *middle* are articulated the superior extremities; and, to the *inferior*, the lower extremities.

The *trunk* of an artery, vein, nerve, or lymphatic, is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

TRUSS, from (F.) *trousser*, 'to tie up.' *Brach'erium*, *Brach'erium*, *Brachi'lè*, *Brachi'rolum*, *Brach'er'olum*, *Amma*, *Hamma*, *Subligac'ulum*, *Subligatu'ra*, (F.) *Brayer*. A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac; and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring*, (F.) *Ressort*. It embraces the body on the side affected; extends from beyond the spine, and terminates opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex *pad*, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

TRYGODES, Feeculent.

TRYPANON, Trepan.

TRYPESIS, Trepanning.

TRYPISIS, Friction.

TSCHERBET, Sherbet.

TSIANA, Costus.

TSJAMPACA, *Michelia champaca*.

TUBA, Tube — *t. Aristotelica*, Eustachian tube — *t. Cæca*, Tuba, Fallopiana — *t. Uterina*, Tuba Fallopiana — *t. Vocalis*, Tube, vocal.

TUBAL RESPIRATION, see Murmur, respiratory.

TÛBE, *Tuba*, *Trumpet*, *Salpinx*, (F.) *Trompe*. A name given to some parts which are hollow, and have the shape of a trumpet.

TUBE, ALIMENTARY, Canal, alimentary — *t.* Eustachian, Eustachian tube.

TUBE, FALLOPIAN, *Tuba Fallopiana* seu *Fallopia*, *Hysterosalpinx*, *Oviductus mulie'bris*, *Vas def'erens mulie'ris*, *Tuba uteri'na*, *T. cæca*, *Ductus varicosus* seu *Proces'sus lateralis* seu *Meatus semina'dis* seu *Meatus semina'dis uteri*, (F.) *Trompe de Fallope*, *T. utérine*, is a canal, floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight

and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *fin'briated extremity*; called, also, *Folia'cum ornamentum*, *Morsus diab'oli*, *Infundibulum* seu *Digitat'iones* seu *Fin'bria* seu *Vexilla tub'rum Fallo'pii*, *Lacin'ia tub'rum Fallo'pii*, (F) *Morceau frangé*, *Pavillon de la trompe*, *Morceau du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue exterior to which is spongy and erectile. The use of the Fallopian tubes is to conduct the sperm to the ovarium, and the fecondated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the uterus, the abdominal termination being termed *Ostium abdominale*; the uterine, *Ostium uterinum*.

TUBE, INTESTINAL, Canal, alimentary.

TUBE, ŒSOPHAGEAL, *Stomach Tube*. A long elastic gum tube, capable of being passed into the Œsophagus or stomach.

TUBE, RECTAL, *Defecation tube*. An elastic gum tube, similar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enematæ to be thrown up into it.

TUBE, STOMACH, see Tube, Œsophageal.

TUBE, VOCAL, *Tuba voc'al'is*. The part of the air-passages above the inferior ligaments of the larynx, including the passages through the nose and mouth.

TUBER, Hump, *Lycoperdon tuber*, *Tubercle* — t. *Atloïdo-occipital*, *Rectus capitis posticus minor* — t. *Cibarium*, *Lycoperdon tuber*.

TUBER CINE'REUM. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

TUBER FRONTALE, Frontal protuberance — t. *Gulosorum*, *Lycoperdon tuber* — t. *Gutturosum*, *Bronchocele* — t. *Ischio-trochant'rien*, *Quadratus femoris* — t. *Ischii*, see *Ischiatic* — t. *Nigrum*, *Lycoperdon tuber* — t. *Pellagra*, *Pellagra* — t. *Tympani*, *Promontory of the tympanum*.

TUBERA TERRÆ, *Lycoperdon tuber*.

TUBERCLE, *Tuber'culum*, *Tuber*, *Strangal'tion*, *Stran'galis*, *Tuber'culous depos'it*, a *Kernel*, (vulg.), a *Knot* (vulg.), (F.) *Tubercule*. A tumour in the substance of organs, from the production of new matter: — sensation null; growth sluggish. In *Pathological Anatomy*, the term is generally given to a species of degeneration which consists of an opaque matter, of a pale yellow colour: this, in its crude condition, has a consistence analogous to that of concrete albumen: it subsequently becomes soft and friable, and gradually acquires a consistence and appears analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophy'mata*, *Tuber'cula Pulmo'num*, (F.) *Tubercules pulmonaires*, are the cause of *Tuber'cular Phthisis*. *Mesenteric tubercles* are often met with in the same affection, but particularly in *Tubes Mesenterica*. Laënnec classes tubercles among the accidental tissues which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a serofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels, whose existence, however, is more than questionable. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers that they are

produced by hydatids. The morbid condition which gives rise to the development of tubercles, *Tuberculization*, is termed *Tuberculo'sis*, *Morbus tuberculo'sus*, *Strumosis* seu *Phymato'sis pulmo'num*, and *Dyscrasia Tuberculo'sa*. Tubercles are seen of various forms, — to wit, in fine points, (F.) *Poussière tuberculeuse*, gray and yellow granulations, miliary tubercles; and gray or yellow tubercular masses, softened, and cretaceous.

TUBERCLE, BLACK, *Melanosis*.

TUBERCLES OF THE AREOLA, see *Mamma*.

TUBER'CU'LA ARAN'TII, *Cor'pora Arantii*, *Corpus'cula Aran'tii*, *Tubercles of Arantius* or *Aranzi*. Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

TUBERCULA ARTHRITICA, *Calculi*, *arthritic* — t. *Cerebri*, *Encephalophymata* — t. *Gonorrhœica*, *Gonorrhœa impura* — t. *Hepatis*, *Hepato-strumosis* — t. *Intestinorum*, *Enterophymata* — t. *Nervorum nodosa*, *Ganglions*, *nervous* — t. *Parvi duræ matris*, *Glandulæ Paechioni* — t. *Peritonæi*, *Cœliophymata* — t. *Pulmonum*, see *Tubercles*, (of the lungs) — t. *Quadrigenina*, *Quadrigenina Tubercula*.

TUBER'CU'LAR, *Tuber'culous*, *Tuberculo'sus*, *Tuber'culate*, (F.) *Tuberculeux*. That which relates to tubercles, or which is formed by tubercles.

TUBERCULAR OR TUBERCULOUS CONSTITUTION or DIATHESIS, *Phthisio'sis*, is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachex'ia*, *Tuberculo'sis*, *Morbus tuberculo'sus*, *Dyscrasia tuberculo'sa*, is the condition of one labouring under tuberculosis.

TUBERCULAR MATTER. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards pulsatious, semi-fluid, and curdy. See *Tubercle*.

TUBERCULAR PHTHISIS, is that produced by the development of tubercles in the lungs.

TUBERCULAR SORE THROAT, *Pharyngitis*, *follicular*.

TUBERCULATE, *Tubercular*.

TUBERCULATE SARCO'MA of AB'ERNETHY, *Emphy'ma Sarcoma tuberculo'sum*, *Tumor tuberculo'sus*. Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

TUBERCULATED LIVER, *Cirrhosis*.

TUBERCULE, *Tubercle*.

TUBERCULES DES GLANDES LYMPHAT'QUES, *Serofula* — t. *du Foie*, *Hepatostrumosis* — t. *des Ganglions mésentériques*, *Tabes mesenterica* — t. of the *Larynx* and *Fauces*, *Pharyngitis*, *follicular* — t. *Miliary*, see *Granulation* — t. *Pisiformes*, *Mamillary tubercles* — t. *Pulmonaires*, see *Tubercle* — t. *Quadrigenæux*, *Quadrigenina corpora*.

TUBERCULEUX, *Tubercular*.

TUBERCULIZATION, see *Tubercle*.

TUBERCULOSIS, see *Tubercle*, and *Tubercular Cachexia* — t. *Laryngis* et *Tracheæ*, *Phthisis laryngea* — t. *Pulmonum*, *Phthisis pulmonalis* — t. *Vertebrarum*, *Vertebral disease*.

TUBERCULOSUS, *Tubercular*.

TUBERCULOUS, *Tubercular* — t. *Deposit*, *Tubercle* — t. *Disease of the Lungs*, *Phthisis pulmonalis* — t. *Dust*, *Poussière tuberculeuse*.

TUBER'CU'LU' M CINE'REUM, 'Ash-coloured tubercle,' diminutive of *tuber*; *Fusci'ola*

*cinerea*. A mass of eimeritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineritious substance in the eord, and upon the sides with the corpus testiforme.

TUBERCULUM LACRYMALE, see Lacrymal puncta — t. Loweri, Lower, tubercle of.

TUBEROSITAS, Tuberosity — t. Tympani, Promontory of the tympanum.

TUBÉROSITÉ BICIPITALE, Bicipital tubercle—t. *Sciaticque*, see Ischiatic.

TUBEROSITY, *Tuberositas*, from *tuber*, 'a bump.' Anatomists have given this name to an eminence or process, the surface of which is unequal and rough; and which gives attachment to muscles or ligaments.

TUBI MEMBRANACEI, see Villous membranes.

TUBULAR, *Tubularis*, (F.) *Tubulaire*. Same etymon as the next. Relating to or having the form of a small tube.

TUBULAR BLOWING SOUND, see Murmur, respiratory—t. Neurine, see Neurine—t. Substance of the Kidney, see Kidney.

TUBULE, *Tubulus*; diminutive of *Tuba*. A small tube.

TUBULI BELLINI, Uriniferous tubes — t. Durae matris, Sinuses of the dura mater—t. Nervei, Nerve fibres — t. Pelvis renum, see Calix — t. Uriniferi Bellini, Uriniferous tubes.

TUBULUS, *Cannula* — t. Centralis Modiolii, see *Traectus spiralis foraminulatus*.

TUBUS ACUSTICUS, Ear-trumpet — t. Alimentaris, Canal, alimentary — t. Intestinorum, Canal, alimentary—t. Nervorum, Neurilemma—t. Vermicularis caeci, Appendix vermiformis caeci.

TUCKAHO, *Lycoperdon tubum*.

TUE-CHIEN, *Colchicum autumnale*.

TULBAGHIA ALLIACEA. A South African plant, *Nat. Ord.* Asphodeleæ, the bulbs of which, boiled in milk, are recommended in phthisis and as an anthelmintic.

*Tulbaghia cephalica* and *T. violacea* serve the same purpose.

TULIP TREE, *Liriodendron*.

TULIPIER, *Liriodendron*.

TULIPIFERA LIRIODENDRON, *Liriodendron tulipifera*.

TUMEFACTIO, Swelling—t. Mollis, Puffiness.

TUMESCENTIA PITUITOSA, Leucophlegmatia.

TUMEUR, Tumour — t. *Anomale*, see *Hæmatodes fungus* — t. *Blanche*, Hydrarthrus — t. *Carerense*, see *Hæmatodes fungus* — t. *Encéphaloïde*, Encephaloid — t. *Erectile*, see *Hæmatodes fungus*—t. *Hémorrhagiale circonscrite*, see *Aneurism* — t. *Lymphatique des articulations*, Hydrarthrus—t. *Variqueuse*, see *Hæmatodes fungus*.

TUMOR, Swelling, Tumour—t. *Albus*, Hydrarthrus—t. *Anomalus*, *Hæmatodes fungus*—t. *Artuum*, *Obdormitio*—t. *Capitis Sanguineus*, *Cephalæmatoma*—t. *Carneus*, *Sarcoma*—t. *Cysticus*, *Encystis*—t. *Cysticus serosus*, *Hygroma*—t. *Fibrosus*, *Tumour, fibrosus*—t. *Ficosus*, *Ficus*—t. *Flatulentus*, *Emphysema*—t. *Fugax*, see *Fugacious*—t. *Fungosus articuli*, *Spina ventosa* — t. *Fungosus sanguineus*, *Hæmatodes fungus* — t. *Gangliiformis*, *Ganglion, nervous* — t. *Genarum*, *Meloncus* — t. *Geni albus*, *Genocæ* — t. *Glandulæ parotidæ*, *Parotidoneus* — t. *Lacteus*, *Galactocœle* — t. *Lardeus*, *Steatoma*—t. *Malarum*, *Meloncus*—t. *Ovarii*, *Oarioncus* — t. *Parotidis*, *Parotidoneus* — t. *Prostatæ*, *Prostatoneus*—t. *Renalis*, *Nephroncus* — t. *Sanguineus*, *Hæmatoma* — t. *Squamiformis carnosus*, *Lepidosarcoma* — t. *Tuberculosus*, *Tuberculate sarcoma* — t. *Tunicatus*, *Encystis* — t. *Uteri*, *Hysteroncus*.

TUMOUR, from *tumeo*, 'I swell;' *Tumor*, *Oncos*, *Oncus*, *Epar'ma*, *Eparsis*, *Emphy'ma*, *Eccrescentia* (Sauvages,) *Ephy'ma*, (F.) *Tumeur*. A rising or prominence, of greater or less size, developed by a morbid cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid; and he calls *excrecences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White Swelling*;—see Hydrarthrus. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Scrofula is the most common cause of these affections.

TUMOUR, ERECTILE. A tumour produced by the development of a soft, vascular tissue, which is susceptible of elevation and depression. See Erectile.

TUMOUR, FIBROUS, *Fibrous growth*, *Fibro'ma*, *Tumour fibrosus*, *Inchoy'oma*. A tumour or growth formed of fibrous tissue.

TUMOUR, LAMINATED, NACREOUS FATTY, Cholesteatoma — t. Milk-like, Encephaloid.

TUMOUR, VARICOSE, *Tumour varicosus*. A circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

TUMOUR, VASCULAR, see *Hæmorrhoids*.

TUNAS, see *Cactus opuntia*.

TUNBRIDGE, MINERAL WATERS OF. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

TUNDA OCULI, *Conjunctiva membrana*.

TUNDUS CORDIS, *Muero cordis*.

TUNIC, *Tunica*, *Chiton*, a coat. An envelope. A name given to different membranes, which envelop organs; as the tunics or coats of the eye, stomach, bladder, &c.

TUNICA ACINALIS, *Uvea* — t. *Aciniformis*, *Uvea* — t. *Acinosa*, *Uvea* — t. *Adnata*, *Conjunctiva* — t. *Agnata*, *Conjunctiva* — t. *Alba oculi*, *Sclerotic* — t. *Albuginea*, *Albuginea* — t. *Albuginea oculi*, *Sclerotic* — t. *Allantoïdes*, *Allantois* — t. *Arachnodes*, *Arachnoid membrane*—t. *Aranea*, *Arachnoid membrane* — t. *Caduca*, *Decidua* — t. *Candida oculi*, *Sclerotic* — t. *Carnosæ*, *Panniculus carnosus* — t. *Conjunctiva*, *Conjunctiva* — t. *Costalis*, *Pleura*—t. *Crassa*, *Decidua*—t. *Crystallina*, *Arachnoid membrane* — t. *Dura oculi*, *Sclerotic* — t. *Durior et crassa*, *Sclerotic* — t. *Elytroides*, *Vaginalis tunica* — t. *Erythroides*, *Cremaster*—t. *Exterior ovi*, *Decidua* — t. *Extima oculi*, *Sclerotic* — t. *Farcinialis*, *Allantois* — t. *Filamentosa*, *Decidua*

TUNICA GRANULOSA. An investment of the ovum exterior to the zona pellucida, described by Dr. Barry, but the existence of which, as a structure, distinct and independent from the membrana granulosa, is denied.

TUNICA HORTENSIS, *Dianthus caryophyllus* — t. *Innominata oculi*, *Sclerotic* — t. *Interna oculi*, *Retina*.

TUNICA JACOBI. A highly delicate serous

membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacob, of Dublin. Its structure is curious, being composed of cylindrical, transparent, highly refractive staff-shaped bodies, and hence called *Stratum bacillatum*, which are arranged perpendicularly to the surface of the retina, their outer extremities being imbedded, to a greater or less depth, in a layer of the pigmentum nigrum.

**TUNICA MUSCULARIS**, Dartos — t. Nervorum, Neurilemma — t. Perforata, Uvea — t. Prætensa abdominis, Peritonæum — t. Reticularis, Retina — t. Retiformis, Retina — t. Rhagoides, Choroidæ tunica, Uvea — t. Rubicunda scroti, Dartos — t. Rubra, Diathus carophyllus — t. Ruyschiana, see Choroid — t. Subcostalis, Pleura — t. Thoracis, Corset — t. Uvalis, Uvea — t. Uvea, Uvea — t. Uviformis, Uvea — t. Vaginalis, see Vaginal — t. Vaginalis Linguae, see Tongue — t. Vaginalis Propria, Vaginal coat of the Testicle — t. Vaginalis reflexa, Vaginal coat of the Testicle — t. Vasculosa oculi, Choroid, see Eye.

**TUNICA VASCULO'SA TESTIS**, *Pia mater testis*. An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by areolar tissue, which separates the lobules of the testis from each other. It is situated immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

**TUNICA VITREA**, Hyaloid membrane.

**TUNICULA**, Clitoris.

**TUNIQUE ALBUGINÉE**, Albuginea.

**TUNNYFISH**, SALTED, Omotariebos.

**TUPHLO-ENTERITIS**, Typhlo-enteritis.

**TUPHUS**, Typhus.

**TUPINARIA**, Talpa.

**TURBA HÆMORRHOIDALIS**, see Hæmorrhoids

**TURBATIONES ANIMI**, Affections of the mind.

**TURBINATED BONES**, *Ossa turbinata*. Bones shaped like a top; from *turbo* or *turben*, 'a top.' *Ossa spongio'sa*, *Cornua*, *Conchæ na'rrium*, *Tur'bines nasi* seu *na'rrium*, *Conchyl'ia*, *Bucci'na*, *Lam'ina spongio'sæ nasi*, *Ossa tertia maxillæ superio'ris*. Very thin, bony plates, rolled up in the form of horns, and situated in the nasal fossa. 1. *Oss spongio'sum superius* or *Cornet de Morgagni*; — the highest. 2. *Oss spongio'sum me'dium*, the middle *cornu* of French anatomists, — the *ethmoid'al cornu* or *Oss spongio'sum superius*, *Oss turbinatum*, of English anatomists, *Oss convolutum superius*, *Concha*, *C. na'rrium superius*, *C. Morgagniana*, (F.) *Cornet Moyen*. This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. *Oss spongio'sum vel turbinatum inferius*, *Concha inferior*, *Convolutum inferius oss*, *Oss sous-ethmoid'al*, (Ch.), projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoid'al cornu*.

All the turbinated bones extend the olfactory surface.

**TURBINES NASI SEU NARIUM**, Turbinated bones.

**TURBITH BLANC**, *Globularia alypum* — t. Mineral, *Hydrargyrus vitriolatus* — t. Montpelier, *Globularia alypum* — t. Plant, *Convolvulus turpethum*.

**TURBO CEREBRI**, Pineal gland.

**TURGENTIA**, Turgescence.

**TURGES'CENCE**, *Turges'cency*, *Turgid'ity*, *Tur'gidness*, *Turgescent'ia*, *Turgen'tia*, *Orgos'mus*, from *turgescere*, 'to swell.' Superabundance of humours in a part. The term *Turgescence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility — *Turgor vitalis* — has been presumed to exist in certain organs, as in the capillaries; but the generality of physiologists do not admit it.

**TURGESCENTIA**, Turgescence.

**TURGESCENTIA VESICULÆ FELL'Æ**, *Ascit'es Hep'ato-cyst'icus*, *Physco'nia bilio'sa*, *Hep'at'algia Petiti'na*, *Cystocel'è bilio'sa*, *Hydrocholecyst'is*, *Hydrops vesicæ fell'æ*, (F.) *Hydropisie de la Vésicule du Fiel*, *Distension de la Vésicule du Fiel*, *Cholécystectasie*. Distension of the gall-bladder by bile.

**TURGIDITY**, Turgescence.

**TURGIDNESS**, Turgescence.

**TURGOR VITALIS**, see Turgescence.

**TURMERIC**, *Curcuma longa*, *Sanguinaria Canadensis*.

**TURN OF LIFE**, see Menses.

**TURNING**, *Versio*, *V. factus*, from (F.) *turner*, 'to turn.' (F.) *Version*. The operation of bringing down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts.

**TURNIP**, *Brassica rapa* — t. Dragon, *Arum triphyllum* — t. Indian, *Arum triphyllum* — t. Pepper, *Arum triphyllum*.

**URNS**, Menses.

**TURPENTINE**, *Terebinthina* — t. Bordeaux, see *Pinus sylvestris* — t. Brionçon, see *Pinus cembra* — t. Chio, see *Pistacia terebinthus* — t. Common, see *Pinus sylvestris* — t. Common, American, see *Pinus sylvestris* — t. Cyprus, see *Pistacia terebinthus* — t. Damarra, see *Pinus damarra* — t. Dombeya, see *Dombeya exelsa* — t. Horse, see *Pinus sylvestris* — t. Strasburg, see *Pinus picea* — t. Tree, *Pistacia terebinthus* — t. Venice, see *Pinus larix* — t. Venice, true, see *Pistacia terebinthus* — t. White, see *Pinus sylvestris*.

**TURPETHIUM**, *Convolvulus turpethum* — t. Minerale, *Hydrargyrus vitriolatus* — t. Nigrum, *Hydrargyri oxydum cinereum*.

**TURQUOISE**. This stone has been long imagined to change its colour, according as the wearer is at the time in good or bad health: — a superstitious notion.

**TURTLE BLOOM**, *Chelone glabra* — t. Green, *Chelonia mydas* — t. Head, *Chelone glabra*.

**TURUNDA**, Tent.

**TURUNDULA**, Tent.

**TUSSACA RETICULATA**, *Goodvera pubescens*.

**TUSSEDO**, Tussis.

**TUSSICULA**, Tussis.

**TUSSICULAR**, *Tussicula'ris*, *Tussiculo'sus*, from *tussis*, 'a cough.' Relating to a cough, or to a slight cough.

**TUSSICULOUS**, Tussicular.

**TUSSILA'GO**, *T. Far'fara seu vulga'ris*, *Be'chium*, *Be'chion*, *Cal'ceum equi'num*, *Chama'len'cè*, *Chama'ge'ron*, *Filius ante patrem*, *Far'favel'la*, *Galliomarchus*, *Far'fara*, *Far'fara Be'chium*, *Ungula caballi'na*, *Colts'foot*, (F.) *Pas d'âne*. Family, *Corymbifera*. Ser. *Syst. Syngenesia Polygama Superflua*. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

**TUSSILAGO FARFARA**, *Tussilago* — t. Ilybri'da, *T. pelusites*.

**TUSSILAGO PETASITES**, *T. hybrida* seu *Petasites hermaphrodita*, Butterbur, Pestilent-wort, *Petasites*, *Petasites major* seu *rubens* seu *officina'lis* seu *hybrida* seu *vulgaris*. The roots of this plant have been recommended as aperient and alexipharmic.—They have a strong smell; and a bitterish, acrid taste, of the aromatic kind, but not agreeable.

**TUSSILAGO PETASITES HERMAPHRODITA**, *T. petasites*—*t. vulgaris*, *Tussilago*.

**TUSSIS**—diminutive, *Tussic'ula*; *Cough*, *Coughing*, *Begma*, *Bex*, *Tusse'do*, *Bexis*, *Tussis nervosa*, *Catar'rhus*, *Pneusis Tussis*, (F.) *Toux*. Violent, sonorous, frequent, and short expirations, by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa. The cough is said to be *dry*, when unaccompanied by expectoration. It is symptomatic of many diseases. See *Bronchitis*.

**TUSSIS AMPHEMERINA**, *Pertussis*—*t. Asinina*, *Pertussis*—*t. Bronchica*, *Cough*, *tubal*, see *Bronchitis*—*t. Canina*, *Pertussis*—*t. Catarrhalis Simplex*, *Catarrh*—*t. Clamosa*, *Pertussis*—*t. Clangosa*, *Pertussis*—*t. Convulsiva*, *Pertussis*—*t. Delassans*, *Pertussis*—*t. Ferina*, *Pertussis*—*t. Pueros strangulans*, *Pertussis*—*t. Quinta*, *Pertussis*—*t. Senilis*, *Bronchitis* (chronic)—*t. Spasmodica*, *Pertussis*—*t. Stomachalis*, *Pertussis*—*t. Suffocans*, *Pertussis*—*t. Suffocativa*, *Pertussis*—*t. Tussiculosa*, *Pertussis*.

**TUSSIVE**; *Tussiv'ens*; from *tussis*, 'cough.' Belonging or relating to cough:—as *tussive* vibration; the vibration of the parietes of the chest, caused by coughing.

**TUTAM'INA**, pl. of *Tuta'men*, 'a defence,' 'a protection,' from *tutare*, 'to defend.' Parts are so called which defend or protect each other.

**TUTAMINA CER'EBRI** are the scalp, pericranium, bones of the skull, and the meninges.

**TUTAMINA OC'ULI** are the eyebrows, eyelids, and lachrymal apparatus.

**TUTENAG**, Zincum.

**TUTHIA**, Tutia.

**TUTIA**, *Pom'pholyx*, *Cadm'ia*, *Alfusa*, *Mesera*, *Capni'tis*, *Tuthia*, *Or'ydu* *zinci impurum*. The oxyd of zinc that attaches itself to the chimneys of furnaces in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

**TWIN**, Gemellus.

**TWINKLING OF THE EYE**, Nictation.

**TWINLEAF**, COMMON, *Jeffersonia Bartoni*.

**TWINROOT**, *Orchis*.

**TWINS**, SIAMESE. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrum of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. They are now [1851] living in North Carolina: both are married, and have children. See *Xiphopages*.

**TWITCHING**, Tic.

**TYCH'ICA**, from *τυχη*, 'accident.' Fortuitous lesions or deformities. The 7th class of Good's *Nosology*.

**TYLE**, Callosity.

**TYLOMA**, Callosity.

**TYLOSIS**, Callosity.

**TYLUS**, Callosity.

**TYMMA**, Wound.

**TYMPAN**, Tympanum.

**TYMPANAL**, Tympanic.

**TYMPANIA**, Tympanites.

**TYMPANIAS**, Tympanites.

**TYMP'ANIC**, *Tympan'icus*, *Tym'panal*; same etymon as tympanum. Relating to the tympanum, as 'tympanic canal.'

**TYMPANIC NERVE**, see *Petrous ganglion*.

**TYMPANITA**, Tympanites.

**TYMPANITE**, Tympanites.

**TYMPANITES**, *Emphyse'ma Abdom'inis*, *Hydrops Tympanites*, *Affectio tympanit'ica*, *Ectympano'sis*, *Pneumato'sis Abdom'inis*, *Hydrops abdominis aëreus*, *Aëro'sis*, *Aëro-enterectal'sia*, *Phy'socæ'lia*, *Tympano'sis*, *Physe'ma*, *Physe'sis*, *Hydrops siccus et flatulentus*, *Tympan'ia*, *Tympan'ias*, *Tympan'ita*, *Tympanit'is*, *Emphyse'ma Tympanites*, *E. Tympanit'icum*, *Meteoricismus*, *Tympany*, *Meteorism*, *Wind dropsy*, (F.) *Tympanite*, *Pneumotose péritonéale*, *Balloonement*, from *τυμπανον*, 'a drum;' so called because the abdomen is distended with wind, and sounds like a drum when struck. A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from the decomposition of substances contained in it; the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs: but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.

Sometimes the air is contained in the cavity of the peritoneum—constituting *Tympanites abdominalis*, *Aëropéritonie*, of some:—the accumulation in the intestines being called *Tympanites intestina'lis*.

**TYMPANITES**, UTERINE, *Physometra*.

**TYMPANIT'IS**, *Inflammat'io tympani*; from *τυμπανον*, 'a drum,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the middle ear. Also, tympanites.

**TYMPANOSIS**, Tympanites.

**TYM'PANUM**, *τυμπανον*, 'a drum.' The *Drum* or *barrel of the ear*. The names *Cavitas* of the *Tympanum* or *Cavity of the Drum*, *Cav'itas Tympani*, *Antrum* seu *cavitas antro'sa Auris*, *Corum Tympani*, (F.) *Tympan*, *Cavité du tympan*, *Caisse du tambour*—have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An *external*, which is almost entirely formed of the *Membrane of the Drum*, *Membrana tympani*, *Diaphragma auris*, *Mediastivum* seu *Tegumen'tum auris*, *Myrid'ga*, *Myriax*, (F.) *Membrane du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal*, on which are the *Fenestra ovalis*, *Promontory*, and *Ford'men rotundum*. 3. A *superior*. 4. An *inferior*, on which is the *glenoid fissure*. 5. A *posterior*, on which are the opening of the mastoid cells, and the pyramid. 6. An *anterior*, on which are the *Processes cochlearform'is* and the inner orifice of the *Eustachian tube*. The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by

certain muscles, and representing a kind of bent lever extending from the membrana tympani to the fenestra ovalis. They are called the *Bones* or *Ossicles of the Ear*, and are the malleus, incus, os orbiculare, and stapes.

For the nervous plexus of the tympanum, see Petrosal Ganglion, and Otic Ganglion.

TYPMANYM MIXES, see Fenestra—t. Secundarium, see Fenestra.

TYPMANY, Tympanites—t. of the Womb, Physometra.

TYPE, *Τυπος*, *Periodus morbi*, from τυπος, 'a stamp,' itself from τετυω, 'I strike.' The *type* is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA ANGUSTIFOLIA has the same properties as

TYPHA AROMATICA, *Acorus calamus*.

TYPHA LATIFOLIA, *Cattail*, *Reed macc.* (F.) *Muscette*, *Masse d'Eau*, (τυφος, 'a marsh,' [?]). A plant common in marshes and ponds, in this country and in Europe. *Family*, Typhaceæ. *Ser. Syst.* Monœcia triandria. Its roots have been used in dysentery and blennerhagia. The young shoots, before they reach the surface of the water, taste like asparagus, when boiled.

The down, (F.) *Aigrette*. *Poils*, which accompanies the flowers, has been applied to burns like cotton.

TYPHICUS, Typhoid.

TYPHIQUE, Typhoid.

TYPHILITIS, Typhlo-enteritis.

TYPHLO-ENTERITIS, *Typhlo-enteritis*, *Typhilitis*, *Typhloteritis*, *Inflammatiō Cæci*, *Phlegmonous Tumour of the Cæcum*, (F.) *Inflammation du Cæcum*, from τυφλος, *cæcus*, and *enteritis*, 'inflammation of the intestines.' Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOENTERUM, Cæcum.

TYPHLOPS, Cæcus.

TYPHLOSIS, Cæcitas.

TYPHLOTERITIS, Typhlo-enteritis.

TYPHLOTERON MONOCOLON, Cæcum.

TYPHLOTERUM, Cæcum.

TYPHLOTES, Cæcitas.

TYPHODES, Typhoid.

TYPHOËMIE ENTÉRIQUE, see Typhus.

TYPHOHÆMIA, see Putrefaction.

TYPHOD, *Typhoides*, *Typhodes*, *Typhicus*, *Typhoides*, *Luetica*, (F.) *Typhique*, *Typhoïde*, *Typhode*. Appertaining to or resembling typhus; as *Typhoid Fever*. Also, according to some, *Typhous Fever*, typhus. Fuchs has employed the word *Typhoïde* for a family of diseases, to distinguish them from *phlogoses*; of this family, *Stomacæe*, *Pharyngocæe*, and *Pneumocæe* are examples.

TYPHOD AFFECTION, see Typhus—t. Fever of India, Cholera.

TYPHOMA'NIA, from τυφος, 'stupor,' and *μανια*, 'delirium.' *Delirium with stupor*, *Subdelirium*. The kind of delirium common in typhus.

TYPHOMANIA, *Coma vigil*, *Insomnia*.

TYPHONIA, *Coma vigil*.

TYPHOSEPTSES, Typhoseptoses.

TYPHOSEPTO'SES, *Typhoseptoses*, from τυφος, 'stupor,' and *σηψις*, 'putrefaction.' Typhous affections.

TYPHOSUS, Typhoid.

TYPHOUS, *Typhosus*; same etymon as Typhus. Belonging or relating to typhus.

TYPHOUS DEPOS'IT. A peculiar substance of new formation found in the areolar membrane,

between the mucous and muscular coats of the patches of Peyer in typhoid fever.

TYPHOUS FEVER, see Typhoid.

TYPHOUS, *Semipetris*, *Typhus*, *Febris Typhoides*, *Febris asthenica* seu *adynamica*, *Asthenopyra*, (F.) *Fièvre adynamique*, *F. ataxique*, *F. adynamique ataxique*, *Typhus d'Europe*, from τυφος, 'stupor.' A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being usually from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See Fever.) By most writers, this disease has been divided into two varieties—the *Typhus mitior* and *Typhus gravior*. TYPHUS MIT'IOR, *T. simplex*, *T. nervosus*, *T. comatosus*, *Febris lenta nervosa*, *Blechopyrus*, *F. putrida nervosa*, *F. hec'tica maligna nervosa*, *Nervous Fever*, *Neurop'ya*, *Neuropyretus*, (F.) *Fièvre nerveuse*, is characterized by slight shiverings, heavy, vertiginous headache; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium. TYPHUS GRA'VIOR, *Typhus carcerum*, *T. castrensis*, *T. anthrophothoracicus*, *True Typhus*, *Ecanthemat'ic typhus*, *Nervous fever with ecanthematous eruption*, *Contagious typhus*, *Febris nervosa epidemica*, *F. nervosa exanthemat'ica*, *F. maligna cum sopore*, *F. nervosa petechialis*, *F. pestilentialis Europæ*, *Typhus contagiosus exanthemat'icus*, *T. nostras*, *T. Europæus*, *T. communis*, *T. bellicus*, *T. exanthemat'icus*, *T. Hiber'icus*, *Pestis bellica*, *Febris pestilens maligna*, *Febris nautica pestilentialis*, *Febris petechialis*, *Typhus petechialis*, *Porphyro-typhus*, *Pulicularis morbus*, *Febris puncticularis*, *F. Saprophyra*, *F. carcerum et nosocomiorum*, *F. Putrida*, *F. continens putrida*, *F. continua putrida*, *Septopyro*, *Putrid Fever*, *Jail Fever*, *Hospital Fever*, *Ship Fever*, (F.) *Fièvre des Camps*, *F. nautique*, *F. d'Hôpital*, *F. nosocomiale*, *F. des Prisons*, *F. lenticulaire*, *Typhus contagieux*, is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; a 'mulberry rash,' appearing on the fifth to the seventh day of the disease, and lasting till the end; delirium, succeeded by stupor, signs of incipient putrescency,—as true petechiæ, vibices, hemorrhages, &c. Typhus, under particular circumstances, seems to be communicable by contagion; but if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of Fever, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold ablation or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, whilst it is free from the objection which applies to most others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuations; the latter cannot.

Of late, certain observers have endeavoured to show, that there is an essential difference between typhoid fever and typhus; that the former is an abdominal affection, and dependent upon, or con-

nected with, an inflamed or ulcerated condition of the mucous follicles of the intestines; hence it has received the names *Fèvre mésentérique*, *F. typhoïde*, *Maladie ou Affection typhoïde*, *F. entéro-mésentérique*, *Entérite typho-hémique*, *Typhoëmie entérique*, *Entéro-mésentérique typhoïde*, *Exanthème intestinale*, *Dothineutérie*, *Dothinentérie*, &c., *Ileodicholite*, *Entérite folliculeuse*, *Gastro-entérite* with nervous affection of the brain, *Follicular gastro-enteritis*, *F. enteritis*, *Enteritis folliculo'sa*, *Typhus abdominalis*, *T. intestinalis*, *T. Sporadicus*, *Enterotyphus*, *T. gauglionaris abdominalis*, *Febbris intestinalis ulcero'sa*, *F. nervo'sa gastrica*, *F. nervo'sa enterica*, *F. enterica*, *F. nervo'sa mesenterica*, *Enterhelio'sis nervo'sa*, *Typhus entericus*, *Ileopyra*, *Leotyphus*, *Typhoid affection*, *Enteric fever*. Accompanying this form of fever there is generally a typhoid eruption, consisting of rose-red papulæ, (see Spots, red,) which appear mostly on the abdomen. They are distinct from true petechiæ, as they can be removed by pressure; and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria. The common continued fever or synochus of Great Britain, and of this country, has been presumed by some to be this variety: but farther observations are needed to establish the distinctions which have been attempted; and there is reason to believe, that the abdominal affection is a complication, existing in certain cases and epidemics of adynamic fever, and not in others. The *Red Tongue Fever* of Kentucky is considered by Professor Bartlett to be typhoid fever.

Certain modern French writers have considered the Typhus of the European continent, *Typhus of Europe*, *Peste d'Europe*, *pestilential fever*, *contagious typhus*, *Hungary fever*, *Hospital fever*, *camp fever*, *jail fever*, *lenticular petechial fever*, &c., to be identical with the typhoid affection. They admit but one fever on the European continent—the typhoid. Typhus, they maintain—but by no means establish the position—to be peculiar to England.

TYPHUS ABDOMINALIS, see Typhus—*t. d'Amé-*

*rique*, Fever, yellow—*t. Anthracicus*, Plague—*t. Anthrophthoræus*, Typhus—*t. Aphthoideus*, Aphthæ—*t. Bellicus*, Typhus—*t. Bengalensis*, Cholera—*t. Bubonicus*, Plague—*t. TYPIC, *Typical*, *Typicum*, (F.) *Typique*. Same etymon as *Type*. Characterized by periodicity,—as a 'typical fever;' or one which observes a particular type.

TYPOSES, see Periodicity.

TYPUS, Type.

TYRANNUS, see Critical days.

TYRBASIA, Agitation.

TYRBE, Agitation.

TYREMESIS, *Tyrotémésis*, from τυρος, 'cheese,' and ἐμέσις, 'vomiting;' *Tyro'sis*, *Tyreu'sis*. Vomiting of curdy matter, in infants especially.

TYREUSIS, Tyremesis, Tyrosis.

TYRIA, Porrigo decalvans.

TYRIASIS, Elephantiasis Arabica.

TYRODES, Cheesy.

TYROMA, Porrigo decalvans.

TYROS, Cheese.

TYROSIS, Tyremesis. Also, the curdling of milk in the stomach; *Tyreu'sis*.

TYROTEMESIS, Tyremesis.

## U.

UBERIS APEX, Papilla.

ULA, Gingivæ.

ULATROPH'IA, from οὖλον, 'the gum,' and atrophia, atrophy. Shrinking of the gums; falling away of the gums.

ULCER, *Ulcus*, (diminutive *Ulcusculum*), *Helcos*, *Elco'sis*, *Elco'ma*, *Helcus*, *Helco'ma*, a *Sore*, (F.) *Ulcère*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body:—the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic:—an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary:—an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is an augmented action of the absorbents; and a specific action of the small vessels, which secrete pus from the blood. Ulcers have been variously divided, according to their nature;—into *simple*, *sinuous*, *fistulous*, *fungous*,

*gangrenous*, *scorbutic*, *syphilitic*, *cancerous*, *interterate*, *scrofulous*, *phagedenic*, *virulent*, *cacoëthic*, *sordid*, *carious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.

ULCER, MALIGNANT, Hospital gangrene—*u. Putrid*, Hospital gangrene.

ULCERA INTESTINALIA, Gastrelcosis—*u. Laryngis*, Phthisis laryngea—*u. Serpentina oris*, Aphthæ—*u. Uteri*, see Metrophthisis—*u. Ventriculi*, Gastrelcosis—*u. Vesicæ*, Cystophthisis.

ULCERATED, *Ulcera'tus*, *Exulcera'tus*, *Helco'des*, (F.) *Ulcéré*. In the state of an ulcer. Affected with ulcers.

ULCERATIO INTESTINALIS, Enterelcosis—*u. Ventriculi*, Gastrelcosis.

ULCERATION, *Ulcera'tio*, *Exulceratio*, *Pyogen'ia corrosi'va*. A superficial ulcer. The formation of an ulcer—*Exelco'sis*, *Elco'sis*, and *Helco'sis*.

ULCÈRE, Ulcer—*u. du Larynx*, Phthisis laryngea.

ULCEROUS, *Ulcero'sus*, *Helco'des*, *Helcoïdes*.

Having the character of an ulcer. Affected with ulcers.

ULCERS, EGYPTIAN, Ægyptia ulcera.

ULCUS, Ulcer—u. Atonicum, Rupia—u. Cacoethes, see Cacoethes—u. Cancerosum, Cancer, Chancre—u. Daeryodes, see Daeryodes—u. Depaseens, Phagedenic ulcer—u. Ferinum, Phagedenic ulcer—u. Fistulosum, Hypophora—u. Hypulium, see Hypulus—u. Narium fetens, Ozæna—u. Obambulans, Phagedenic ulcer—u. Pulmonum, Phthisis pulmonalis—u. Sinuosum, Hypophora—u. Syriacum, Cynanche maligna—u. Telephium, Telephium—u. Tuberculosum, Lupus—u. Uteri, Hysterelosis, Leucorrhœa.

ULCUSCULA PRÆPUTII, Herpes præputii.

ULCUSCULUM, Ulcer—u. Cancerosum, Chancre.

ULE, Cicatrix.

ULETICUS, Gingivalis.

ULICUS, Gingivalis.

ULITIS, from *ουλος*, 'solid,' (*σαρξ ουλη*, 'solid flesh :') hence, *ουλον*, 'the gum.' *Inflammatio gingivæ*, *Periodontitis gingivarum*, (F.) *Gingivite*, *Inflammation des gencives*, from *ουλον*, 'the gum,' and *itis*, denoting inflammation. Inflammation of the gums.

ULITIS SEPTICA, Cancer aquaticus.

ULLUCO, Tropæolum tuberosum.

ULMAIRE, Spiræa ulmaria.

ULMARIA, Spiræa ulmaria—u. Palustris, Spiræa ulmaria.

ULMUS, *U. campestris* seu *glabra* seu *montana* sua *nuda* seu *sativa* seu *scabra*, *Ptelea*, *Common Elm*, (F.) *Orme*. *Family*, Amentacea. *Sex. Syst.* Pentandria Digynia. The inner, rough bark of this tree is inodorous; and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

ULMUS ALATA, *Lynn Wahoo*. The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.

ULMUS AMERICANA, *U. fulva*, *Rough-leaved Elm*, *Red Elm*, *Slippery Elm*. The inner bark is highly mucilaginous, and is used in coughs, diarrhœas, and dysenteries; also, as a poultice for tumours; lacerated and contused wounds, &c.

ULMUS CAMPESTRIS, Ulmus—u. Fulva, *U. Americana*—u. Glabra, Ulmus—u. Montana, Ulmus—u. Nuda, Ulmus—u. Sativa, Ulmus—u. Scabra, Ulmus.

ULNA, *O'lenê*, *Foc'ilê inferius* seu *majus*, *Cunna Bra'chii*, *Os cubiti inferius*, *Os proci-bitale*, *Cu'bitus*, *Cubit*, *Arundo bra'chii major*. Anatomists have given this name to the bone of the forearm which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater *sigmoid* or *semilunar fossa* or *olecranonoid cavity*, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the insertion of the *Brachialis internus*. On the outside of this extremity of the bone is the *lesser sigmoid cavity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibro-cartilage which separates it from the os cuneiforme; and a pointed process, called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the

os cuneiforme. It is developed by three points of ossification.

Also, the elbow.

ULNAD, see Ulnar aspect.

ULNAR, Cubital.

ULNAR ASPECT, An aspect towards the side on which the ulna is situated.—Barelay. Ulnad is used adverbially by the same writer, to signify 'towards the ulnar aspect.'

ULNARIS, Cubital—u. Externus, see Cubital muscles—u. Gracilis, Palmaris longus—u. Internus, see Cubital muscles.

ULOCACE, Cancer aquaticus, Stomacacc.

ULON'CUS, from *ουλον*, 'the gum,' and *ογκος*, 'tumour.' Swelling of the gums; epulis.

ULORRHAG'IA, *Stomatorrhag'ia*, *Hæmorrhag'ia gingivarum*, *Ulorrho'a*, from *ουλον*, 'the gum,' and *ρρηγνυμι*, 'I break forth.' Bleeding from the gums.

ULORRHŒEA, Ulorrhagia.

ULOTICA, Cicatrixantia.

ULTIMI-STERNAL, Professor Bécларd has given this appellation to the sixth or last bony portion of the sternum. He calls it also *Ensisternal*.

ULTIMUM MO'RIENS, 'last dying.' A term given to the part of the economy which dies last.

ULVA CRISPA, Fucus crispus.

UMBIL, YELLOW, Cypripedium luteum.

UMBILIC, Umbilical, Umbilicus.

UMBILICAL, *Umbilic*, *Umbilicalis*, *Umbilical'ca'tus*, from *umbilicus*, 'the navel.' That which belongs or relates to the navel.

UMBILICAL ARTERIES, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords, — the vein forming the *Ligamentum rotundum* of the liver.

UMBILICAL CORD, Funiculus umbilicalis.

UMBILICAL REGION, *Re'gio umbilical'is*, *Mesogastrium Re'gio gas'trica* seu *Mesogastrica*, (F.) *Région ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumbar regions*. In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

UMBILICAL RING, *An'nulus umbilical'is*, (F.) *Anneau ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

UMBILICAL VESICLE, *Vesicula umbilicalis*.

UMBILICAL VESSELS, (F.) *Vaisseaux ombilicaux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

UMBILICALIS, Umbilical.

UMBILICATUS, Umbilical.

UMBILICUS, *Umbo*, *Om'phalos*, *Umbil'cum*, *Radix ventris*, *Mesomphalium*, *Mesom'phalum*, *Protum'is*, (*navel of a new-born child*;) the *umbilic*, the *navel*; from *umbo*, 'the button or prominence in the midst of a buckler,' or from *υμφαλος*, or rather *ομφαλος*, which signifies the same, as well as the navel; (F.) *Ombilic*, *Nombil*. ▲

round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

UMBILICUS MARINUS, *Cotyle'don marina*, *Andro'sacê*, *Acetabulum marinum*, *Andro'sacê Matth'oli*, *Fungus petræus marinus*. A submarine production, found on the rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Elbow, Umbilicus.

UMBRELLA TREE, Magnolia tripetala.

UMSCHLAG, see Compress.

UNBOWELING, Exenterismus.

UNCARIA GAMBIR, Nauclea Gambir.

UNCAS, INDIAN, Veratrum viride.

UNCIA, Ounce.

UNCIFORM, *Unciformis*, *Uncinata*, from *uncus*, 'a hook,' and *forma*, 'shape.' That which has the shape of a hook.

UNCIFORM BONE, *Os unciforme*, *Os hamatum*, *Os uncinatum*, (F.) *Os crochu*. The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the fourth and fifth metacarpal bones. It is developed from a single point of ossification.

UNCIFORM EMINENCE, Hippocampus minor.

UNCINATUS, Unciform.

UNCINUS, Hook.

UNCTION, Inunction, Unguentum, Unguentum hydrargyri.

UNCUS, Hook.

UNDERCLIFF, ISLE OF WIGHT, ENGLAND, (CLIMATE OF.) The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the southeast coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take some exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

UNDIM'IA. A name given, by Paracelsus, to a tumour, filled with a gelatinous matter, like the white of an egg.

UNDOSUS, Cymatodes.

UNDULATIO, Fluctuation.

UNEDO, *Arbutus unedo* — u. Papyracea, *Arbutus unedo*.

UNQUEAL MATRIX, see Nail.

UNGUEN, Unguentum — u. Articulare, Synovia.

UNGUENT, ARMATORY, Hoplochryisma.

UNGUENTARIA, see Myristica moschata.

UNGUENTARIUS, *Myropæus*, *Myrep'sus*, *Myropoles*, *Myropolus*, *Pigmentarius*; from *unguentum*, 'an ointment.' One who makes and sells ointments. A perfumer.

UNGUENTUM, *Unguen*, *Myron*, *Uction*, (F.) *Onguent*, from *ungere*, 'to anoint.' Ointment. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used, chiefly, as local applications to ulcers and wounds; but are sometimes rubbed upon a part in cutaneous affections; and, especially, where it is desired that the constituents of the ointment should be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately.

UNGUENTUM AC'IDI NITRO'SI, *Ointment of Nitrous Acid*, *Pondatum vel Unguentum Nitricum vel Oxygendatum*, (F.) *Pommade oxygénée*, *Graisse*

*oxygénée*, *Pommade d'Alyon*. (*Adip. suillæ*, ℥j; *acid. nitros.* ℥vj. Melt the fat, and rub in the acid gradually, till cold. Ph. E.) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

UNGUENTUM ADIPOCERE CETORUM, *Ceratum cetacei* — u. *Ægyptiacum*, *Linimentum æruginis* — u. *Ægyptium album*, *Crinomyron* — u. *Album*, *Unguentum cetacei* — u. *Album Resolvens*, *Linimentum ammoniac fortius*.

UNGUENTUM DE ALTHÆA, *Marsh mal'low Ointment*, *U. de Terebinthinâ et cerâ*, *Ceratum de Althæâ*, *Emplastum mucilaginosum*, *E. emolliens*, *E. citrinum*, *E. flavum*, *E. de Althæâ*, *Unguentum flavum*, *U. Citrinum*, *U. resinæ pini sylvestris compositum seu resumptivum seu lenitivum*, (F.) *Onguent de guimauve*, *O. d'althéa*. (*Olæi de mucilagine*, 1000 p., *ceræ flavæ*, 250 p., *resinæ terebinthin.*, āā 125 p. Liquefy; strain and stir till cold. Ph. P.) *Common Olive Oil* might be substituted for the *Oil of Mucilages*.

UNGUENTUM AMYGDALINUM, *Ceratum Galeni*.

UNGUENTUM ANTIMONIUM, *U. A. Tartarizati*, *U. A. Potassio-tartratis*, *U. tar'tari emet'ici*, *Ointment of tartarized antimony*. (*Antimon. et potass. tartrat.* in pulv. subtiliss. ℥ij, *adipis.* ℥j.) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counter-irritant. This preparation is also called *Ung. Tar'tari stibiat'i seu emet'ici*, *Ung. e Tar'taro stibiato*, *Adeps Tartaræ stibii medicatus*, *Ung. Tar'tratis Potassæ stibiati*, (F.) *Pommade d'Antenrieth*, *Pommade stibée*.

UNGUENTUM ANTIMONII POTASSIO-TARTRATIS, *Unguentum antimonii* — u. *Antimonii tartarizati*, *U. antimonii* — u. *Antipernium*, see *Antipernius*.

UNGUENTUM AQUÆ ROSÆ, *Ointment of Rose water*, *Cold Cream*. (*Aq. Rosæ*, f℥j; *ol. amygdol.* f℥ij; *cetacei*, ℥ss; *ceræ albæ*, ℥j.) Melt together, in a water-bath, the oil, spermaceti, and wax; then add the rose-water, and stir until it is cold. Ph. U. S.) Cooling to irritated surfaces.

UNGUENTUM ARMARIUM, *Hoplochryisma* — u. *Arthanite*, see *Arthanita* — u. *Articulare*, *Synovia* — u. *Basilicon flavum*, *Ceratum resinæ* — u. *Basilicon nigrum*, *Unguentum resinæ nigræ* — u. *Basilicon viride*, *Unguentum subaceticum cupri*.

UNGUENTUM BELLADONNÆ, *Ointment of Belladonna*. (*Ext. belladonnæ* ℥j; *adipis* ℥j; *M. Ph. U. S.*) An anodyne application to irritable ulcers, &c.

UNGUENTUM CANTHARIDIS, *Unguentum lyttæ*.

UNGUENTUM CERÆ (*albæ vel flavæ*), *Wax Ointment*, *Unguentum simplex*, (Ph. U. S.) *Linimentum simplex*, *Oil and Bees' Wax*, (F.) *Onguent de cire*. (*Ceræ* ℥j, *adipis* ℥iv, *Ph. U. S.* or — *ceræ* ℥ij, *ol. oliv.* ℥v.) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

UNGUENTUM CERATUM, *Ceratum Galeni* — u. *Cerussæ*, *Unguentum oxid'i plumbi albi*, *Unguentum plumbi subcarbonatis* — u. *Cerussæ acetatæ*, *Ceratum plumbi superacetatis*, *U. plumbi superacetatis* — u. *Citrinum*, *U. de althæâ*, *U. hydrargyri nitratis*.

UNGUENTUM CETA'CEI, *Unguentum Sper'matis Ceti*, *U. album*, *Linimentum album*, *Spermaceti ointment*, (F.) *Onguent de blanc de baleine*. (*Cetacci* ℥vj, *ceræ albæ* ℥iv, *ol. oliv.* f℥ij. Ph. L.) The ordinary dressing for blisters and excoriations.

UNGUENTUM CREASO'TI, *Ointment of Creasote*. (*Creasot.* f℥ss; *adipis*, ℥j. Add the creasote to the lard previously melted with a moderate heat, and stir constantly till cold. Ph. U. S.) Used in chronic cutaneous affections.

UNGUENTUM CUPRI SUBACETATIS, Unguentum subacetatis cupri.

UNGUENTUM DIGESTIVUM SIMPLEX, *U. Terebinthinæ et ovi'rum vitell'i, Simple digestive ointment, (F.) Ointment digestif simple. (Terebinthin. pur. 64 p. Viell. oror. No. 2, vel 32 p. Mix, for a long time, in a glass mortar, and add gradually, enough of the Oil of Hypericum (Millepertuis) to make a soft ointment. Ph. P.) Detergent. It may be rendered more so by adding a little of the Acetate of copper.*

UNGUENTUM ELEMII, Balsam of Arcæus, Unguentum elemi compositum.

UNGUENTUM ELEMII COMPOSITUM, *Linimentum Arcæ'i, Unguentum e gummi elemi, Ung. de Terebinthinæ et adipisibus, U. elemi, Ointment of Elemi, (F.) Baume d'Arcæus. (Elemi lbj, terebinthinæ vulgaris ℥x, sevi præparati lbj, oliæ olei f ℥ij. Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. Ph. L.) Stimulant and digestive. To keep open issues, &c.*

UNGUENTUM EPISPASTICUM DE DAPHNÆ GNIDIO, *Adeps Corticæ daphnæ gnidii medicatus, (F.) Pommade de Gâron. (Adip. præpar. 320 p., cerâ, 32 p., cort. daphn. gnid. 128 p. Melt the fat and wax; and add the bark softened in water. Boil until the water is evaporated; then pass through cloth. Ph. P.) To keep open blisters, issues, &c. See Unguentum Mezerei.*

UNGUENTUM EPISPASTICUM FORTIUS, Cerate of cantharides—u. Epispasticum mitius, Unguentum lyttæ—u. Epispasticum viride, Unguentum lyttæ medicatum—u. Flavum, Unguentum de althæâ—u. e Gummi elemi, Unguentum compositum—u. Hellebori albi, Unguentum veratri.

UNGUENTUM GALLÆ, *Ointment of Galls, (Gallæ in pulv. ℥j; adipis. ℥vij. M. Ph. U. S.)* As an astringent in piles, indolent ulcers, &c.

UNGUENTUM HYDRARGYRI, *U. cærulæum, U. Neapolitanum, Blue ointment, Ceratum mercuriale, Adeps Hydrargyri medicatus, Mercurial Ointment, Unction, (F.) Ointment mercuriel ou Napolitain.*

The *Strong Mercurial Ointment, Unguentum Hydrargyri fortius* of the London Pharmacopœia, *Unguentum Hydrargyri* (Ph. U. S.), is thus made—Hydrarg. lbj, adipis ℥xxij, sevi ℥j. Rub till the globules entirely disappear.

The *Milder Mercurial Ointment, Unguentum Hydrargyri Mitius*,—is made by adding, to one pound of the strong, two pounds of lard.

Mercurial ointment is antisyphilitic and diseuient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The *stronger* ointment is used for this purpose. The *weaker* is employed as a dressing, or as an application to cutaneous eruptions.

UNGUENTUM HYDRARGYRI AMONIATI, Unguentum hydrargyri præcipitati albi—u. Hydrargyri calcis albæ, Unguentum hydrargyri præcipitati albi—u. Hydrargyri compositum, Unguentum hydrargyri nitratis—u. Hydrargyri deutoxydi nitrati, Unguentum hydrargyri nitricæ-oxydi—u. ex Hydrargyro mitius dictum cinereum, Unguentum oxydi hydrargyri cinereum.

UNGUENTUM HYDRARGYRI NITRATIS, *U. H. nitrati, U. supernitratis hydrargyri, Ointment of Nitrate of Mercury, Citrine Ointment, Balsamum mercuriale, Ung. hydrargyri compositum, U. mercuriale citrinum, Adeps nitratæ hydrargyri medicatus, Unguentum citrinum ad scabiem, (F.) Ointment de nitrate de mercure, O. citrin contre la gale. (Hydrarg. ℥j, acid. nitric. f ℥xv, olei balsuli f ℥ix, adipis ℥ij. Dissolve the mercury in the acid; and, while hot, add the oil and melted lard. Ph. U. S.*

A milder ointment,—*Ung. Nitratæ Hydrargyri mitius*,—is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarsi, &c.

UNGUENTUM HYDRARGYRI NITRICO-OXYDI, *Ung. subnitratis hydrargyri, Ung. Oxydi Hydrargyri rubri, U. H. oxidi rubri (Ph. U. S.), Ointment of Nitric Oxyd of Mercury, Balsamum ophthalmicum rubrum, Unguentum deutoxydi hydrarg. nitrati, Red Precipitate Ointment, Golden Ointment, Singleton's Eye Salve, U. Hydrargyri rubri, U. ex Hydrargyro oxydato rubro, U. mercurii rubrum, U. ophthalmicum rubrum, U. subnitratis hydrargyriæ. (Hydrarg. oxid. rubr. in pulv. subtiliss. ℥j; Ung. simpl. ℥j. Add the oxyd, reduced to a fine powder, to the melted ointment. Ph. U. S.) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.*

*Belleville's Cerate*, which has been long used in cases of scalled head, and of chronic cutaneous diseases in general, is made as follows:—Plumbi acet. ℥j; hydrarg. oxid. rubr. ℥ss; hyd. chlorid. nit. ℥ij; ceræ albæ ℥iv; ol. oliv. ℥vj. Melt the last two, and add the others in fine powder.

UNGUENTUM HYDRARGYRI OXYDI RUBRI, Unguentum hydrargyri nitrico-oxydi—u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitrico-oxydi—u. Hydrargyri oxydi rubri, Unguentum hydrargyri nitrico-oxydi.

UNGUENTUM HYDRARGYRI PRÆCIPITATI ALBI, *U. Hydrargyri ammoniatæ, (Ph. U. S.), U. subnitratis hydrargyri ammoniatæ, Unguentum ad scabiem Zelleri, U. mercuriale album, U. mundificans Zelleri, Ointment of white precipitate, Ung. e mercurio præcipitato, Ung. calcis hydrargyri albæ. (Hyd. ammon. ℥j, ung. simpl. ℥ss. Melt the fat, and add the precipitate.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.*

UNGUENTUM HYDRARGYRI RUBRI, U. Hydrargyri nitrico-oxydi—u. Hydrargyri subnitratis ammoniatæ, U. Hydrargyri præcipitati albi—u. Hydrargyri subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri supernitratis, U. hydrargyri nitratis—u. Infusi meloes vesicatorii, U. lyttæ—u. Irritans, U. lyttæ.

UNGUENTUM IODINI, *U. Iodii, Ointment of Iodine. (Iodin. ℥j; Potass. iodid. gr. iv; Aquæ Mvi; Adipis. ℥j. Rub the iodine and iodide first with the water until liquified, and then with the lard until mixed. Ph. U. S.)* Used as a local application to goitrous and other swellings.

UNGUENTUM IODINI COMPOSITUM, *U. Iodii compositum, Compound Ointment of Iodine. (Iodin. ℥ss; Potassii iodid. ℥j; Alcohol, f ℥j; adipis ℥ij. Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. Ph. U. S.)*

UNGUENTUM LAVRINUM, *Oleum laurinum, Adeps lauro-medica'tus, Bay Ointment, (F.) Ointment ou Huile de laurier. (Fol. lauri, 500 p., adip. smilæ, 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add Bay berries, in powder, 500 p. Digest and pass through linen. Ph. P.)* Reputed to be corroborant and nervine. It is simply emollient.

UNGUENTUM LENITIVUM, U. de althæa—u. Lillicæum, Crinomyon.

UNGUENTUM LYTTÆ, *Ung. cantharidis, U. vesicatorium, U. irritans, U. ad vesicatu, Blistering Salve, Ung. infusæ meloes vesicatorii, Ointment of Spanish Flies, Ointment of Infusion of Spanish Flies, Unguentum epispasticum mitius, Milder blistering Ointment. (Cantharid. in pulv.*

℥ij; aquæ destillat. Oss; cerat. resin. ℥viiij. Boil down the water with the Spanish flies to one-half, and strain; then mix the cerate with the strained liquor, and evaporate to the proper consistence. *Ph. U. S.*) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

UNGUENTUM LYTTE MEDICA'TUM, *Adeps cantharid'ibns medicat'us, Pomat'm seu Unguentum epispasticum vir'idè stim'ulans ac'ribus, Green blistering Ointment, (F.) Pommade épispastique verte. (Pomati vel unguenti cantharid. 64 p., unguent. populei 168 p., ceræ albæ 256 p., cupri acetot., ext. opii, āā 24 p.)* Melt the unguentum populeum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. *Ph. P.)* Use, same as the last.

UNGUENTUM LYTTE MEDICA'TUM A'LIUD, *Adeps cantharid'ibns medicat'us alius, Pomat'm epispasticum flavum et mit'ius, Yellow Blistering Ointment, (F.) Pommade épispastique jaune. (Pulv. cantharid. 120 p., adip. præp. 1680 p., aquæ 250 p.)* Melt the lard; mix the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water-bath, and add powdered turmeric, 8 p. Let it cool till the superfluous liquid separates; pour off and add yellow wax, 250 p., Oil of Lemon, 8 p. *Ph. P.)* A complex preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "*Dr. Physick's Issue Ointment.*" It is made by boiling half an ounce of powdered cantharides in two ounces of rose-water, and evaporating until one-half of the fluid is driven off, having previously added 15 grains of tartar emetic. The decoction is to be strained, and three ounces of olive oil, an ounce and a half of white wax, and one ounce of spermaceti added to it, and the mixture then boiled till all the water is evaporated.

UNGUENTUM MELANICUM CAUSTICUM, Causticum Æthiopicum.

UNGUENTUM MERCURIALE ALBUM, Unguentum hydrargyri præcipitati albi—u. Mercuriale citrinum, Unguentum hydrargyri nitratis—u. e Mercurio præcipitato, Unguentum hydrargyri præcipitati albi—u. Mercurii rubrum, Unguentum hydrargyri nitrico-oxydi—u. Mundificans Zelleri, Unguentum hydrargyri præcipitati albi.

UNGUENTUM MEZEREI, *Ointment of Mezezeon. (Mezer. incis. transversim, ℥iv; adipis, ℥xiv; ceræ albæ, ℥ij;)* moisten the mezereon with a little alcohol, and beat in an iron mortar, until reduced to a fibrous mass; then digest it with the lard, in a salt-water bath, for 12 hours; strain forcibly, and allow the strained liquor to cool slowly, so that any undissolved matters may subside; from these separate the medicated lard; melt it with the wax at a moderate heat, and stir constantly till they are cold. *Ph. U. S.)* To keep open blisters, issues, &c.

UNGUENTUM MURIA'TIS HYDRARGYRI OXYGENATO MEDICA'TUM, *Adeps muria'tè hydrargyri oxygenato medicatus, Cyrillo's Ointment, (F.) Pommade de Cyrillo. (Hydrar. oxygmnr. 4 p.; adipis suillæ præp. 32 p.—Ph. P.)* Antivenereal and alterative. Used in friction, ℥ss at a time.

UNGUENTUM NARDINUM, see Nardus Indica—u. Neapolitanum, Unguentum hydrargyri—u. Nervinum, Unguentum Sambuci—u. Nitricum vel oxygenatum, Unguentum acidi nitrosi.

UNGUENTUM OPHTHALMICUM, *Adeps ox'ido hydrargyri rubro et plumbi aceta'tè medicat'us, Regent's Pommade ophthalmique, (F.) Pommade ophthalmique. (Butyr. recent., ag. rosar. lavat. 4½ p;*

*camphor., oxyd. hydrarg. rubr., acetatis plumbi, āā 0.25 p.)* Mix intimately.—*Ph. P.)* In chronic inflammation of the conjunctiva or tarsi.

UNGUENTUM OPHTHALMICUM, Unguentum oxidi zinci impuri—u. Ophthalmicum rubrum, Unguentum hydrargyri nitrico-oxydi.

UNGUENTUM OX'IDI HYDRARGYRI CINE'REI, *Adeps seu Unguentum ex hydrargyro mit'ius dictum cinereum, Ointment of gray oxide of mercury, (F.) Oungent gris. (Oxyd. hydrarg. ciner. p. j; adipis snilli, p. iij.—Ph. E.)* Properties like the mercurial ointment. It is not much used.

UNGUENTUM OX'IDI PLUMBI ALBI, *Ung. cerussæ, Ung. album, Ung. subacetat'is plumbi, Ointment of white oxide of lead, White ointment. (Ung. simplicis, p. v; oxyd. plumb. alb. p. j.—Ph. E. and P.)* Cooling and desiccative. Applied to excoriated and burnt surfaces.

UNGUENTUM OXIDI PLUMBI CARBONATI, U. Plumbi subcarbonatis—u. Oxidi zinci, Unguentum zinci.

UNGUENTUM OX'IDI ZINCI IMPU'RI, *Unguentum trit'ia, Ung. ophthalmicum, Eye-solve, Adeps ox'idi zinci medicat'us, Tutty ointment, Ointment of impure oxide of zinc. (Linim. simpl. p. v; oxyd. zinc. imp. præp. p. j.—Ph. E.)* Generally used in ophthalmia tarsi and tonic ophthalmia.

UNGUENTUM PICIS LIQ'UIDÆ, *Ung. Picis, Ung. e Pice, Tar Ointment. (Picis liquid., sevi, sing. lbj.)* Melt, and stir till cold.) Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

UNGUENTUM PICIS NIGRÆ, Unguentum resinæ nigræ—u. Plumbi acetatis, Ceratum plumbi superacetatis—u. Plumbi carbonatis, Unguentum plumbi subcarbonatis—u. Plumbi oxydi carbonati, Unguentum plumbi subcarbonatis—u. Plumbi subacetatis, Unguentum oxidi plumbi albi—u. Plumbici carbonatis, Unguentum plumbi subcarbonatis.

UNGUENTUM PLUMBI SUBCARBONAT'IS, *U. plumbi carbonat'is, Cerat'm de cerussâ, Ung. album, U. album simplex, U. carbonat'is plumbici, U. cerussæ, U. oxidi plumbi carbonati, (F.) Oungent blanc de Rhazes, O. de cerusse, O. de Tornamiro. (Plumbi carbonat. in pulv. subtiliss. ℥ij; Unguent. simpl. lbj.)* Add the carbonate of lead to the ointment previously softened over a gentle fire, and mix.—*Ph. U. S.)* Chiefly used as a dressing for burns.

UNGUENTUM PLUMBI SUPERACETA'TIS, *U. acetat'is plumbi, Ointment of sugar of lead. Unguentum saturninum, U. cerussæ acetat'è, Balsammum universa'tè. (Olive oil, lbss; white wax, ℥iss; superacetate of lead, ℥ij.)* Cooling, desiccative. Called, also, *Balsammum saturninum, Bntyrum saturni, Linimentum plumbatum, Pomat'm saturni, Ung. triphar'macum.*

UNGUENTUM POPULE'UM, *Adeps papav'erè, hyoscy'amo, et belladon'nâ medicat'us. (Fresh buds of the populus nigra, 500 p., macerated in adeps snillus præp. melted, 1500 p., for 24 hours. Preserve this. Take black poppy leaves, belladonna, hyoscyamus, black nightshade, āā 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain.—Ph. P.)* Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

UNGUENTUM POPULE'UM, see Populus.

UNGUENTUM POTAS'SÆ HYDRIODA'TIS, *U. potas'sii io'didi, Ointment of hydr'iodate of potass. (Potass. iodid. in pulv. subtil. ℥j; aq. bullient. f℥j; adipis, ℥j.)* Dissolve the iodide in the water, and mix the solution with the lard.—*Ph. U. S.)* Half a drachm of this ointment is rubbed on serofulous glands, goitre, &c.

UNGUENTUM POTASSII IODIDI, Unguentum Po-

tassæ Hydriodatis—u. Pulvis meloes vesicatorii, Cerate of cantharides—u. Resinæ flavæ, Ceratum resinæ flavæ.

UNGUENTUM RESINÆ NIGRÆ, *Ung. resinæ nigrum, Ung. basilicon nigrum, Ung. tetrapharmacum, Black basilicon, Black resin ointment, Unguentum picis nigræ. (Resin. nigr., ceræ flavæ, resinæ flav. ʒi ʒi; olei olivæ. Oj.—Ph. L. Use, the same as the Ceratum resinæ or Yellow basilicon.*

UNGUENTUM RESINÆ PINI SYLVESTRIS COMPOSITUM, Unguentum de Althæa—u. Resinosum, Ceratum resinæ flavæ—u. Resumptivum, Unguentum de althæa.

UNGUENTUM SABINÆ, Ceratum Sabinæ.

UNGUENTUM SAMBU'CI, *Ung. sambuciinum, Green ointment, Unguentum nervinum, Elder ointment, (F.) Ounguent de sureau. (Sambuci flor. ℥ij; adipis præp. ℥ij. Boil.—Ph. L. and D.) Emollient.*

UNGUENTUM SATURNINUM, Unguentum plumbi hyperaceti—u. ad Scabiem Zelleri, Unguentum hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, Unguentum ceræ—u. Solidum de cicuta, Emplastrum cicute—u. Spermatis ceti, Unguentum cetacei.

UNGUENTUM STRAMO'NII, *Ointment of Stramonium. (Ect. stramon. fol. ʒj; adipis, ʒj. Rub the extract with a little water until uniformly soft, and then with the lard.—Ph. U. S.) An anodyne ointment to irritable ulcers, hemorrhoids, &c.*

UNGUENTUM SUBACETA'TIS CUPRI, *U. cupri subaceta'tis (Ph. U. S.), Ung. deter'gens, Ung. basilicon vir'idè, Ung. æruginis, Balsamum vir'idè, Ointment of subacetate of copper, Verdigris ointment. (Cupri subacet. in pulv. subtiliss. ʒj; unq. simpl. ʒxv. Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold.—Ph. U. S.) Detergent and escharotic.*

UNGUENTUM SULPHURATUM AD SCA'BIEM, *Adeps sulphurè et ammo'niæ muriatè medicatus. (Adipis, 120 p.: sulph. lot. 60 p.; ammoniæ muriat., aluminæ sulphat. ʒi 4 p.; fiat unguentum.—Ph. P.) Antiprosie.*

Bailey's Itch Ointment is composed of olive oil, lard, nitre, alum, sulphate of zinc, and cinnamon; scented with oil of aniseed, oil of origanum, and oil of spike, and coloured with alkanet-root.

UNGUENTUM SULPHURATUM ALCALI'NUM AD SCA'BIEM, *Adeps sulphurè et carbonatè potassæ medicatus, Hel'merick's Alcaline Sulphurated Itch Ointment. (Adip. præp. 800 p.; sulphur. lot. 200 p.; carbonat. potass. pur. 100 p.; fiat unq.—Ph. P.) Use, same as the last.*

Bateman's Itch Ointment resembles this. It is coloured with cinnamon, and scented with essence of bergamot.

UNGUENTUM SULPHURIS, *Ung. e sulph'urè, Sulphur ointment. (Sulph. ℥ij; adip. ℥ij.—Ph. U. S.) Used chiefly in itch, and some herpetic affections.*

UNGUENTUM SULPHURIS COMPOSITUM, *Compound Sulphur Ointment, Itch Ointment, Unguentum Antiprospericium, Jackson's Itch Ointment, Pommeade Antiprosperique de Jussier. (Sulph. sublim. ℥ss; veratri rad. contus. ʒij; potassæ nitrat. ʒj; saponis mollis, ℥ss; adipis, ℥ss; ol. bergamot. ℥xxx.—Ph. L.) The UNGUENTUM SULPHURIS COMPOSITUM of the Pharm. U. S., is made as follows:—Sulphur. ʒj; hydrargyri ammoniat., acid. benzoic. ʒi ʒi; ol. bergamot., acid. sulphuric. ʒi ʒi; potassæ nitrat. ʒij; adipis, ℥ss. To the melted lard add the other ingredients, and stir till cold. Use, the same as the last; but it is more stimulating*

UNGUENTUM SULPHURIS IOD'IDI, *Ointment of Iodide of Sulphur. (Sulphur. iodid. ʒss; adipis,*

ʒj. Rub the iodide with a little of the lard; add the remainder, and mix.—Ph. U. S.) An excellent application in chronic cutaneous affections.

UNGUENTUM SUSISUM, Crinomyon.

UNGUENTUM TAB'ACI, *Tobacco Ointment. (Tabac. recent. concis. ʒj; adipis, ℥j. Boil the tobacco in the lard, over a gentle fire, till it becomes friable; then strain through linen.—Ph. U. S.) Applied to irritable ulcers, tinea capitis, &c.*

UNGUENTUM TARTARI EMETICI, *U. antimonii tartarizati—u. Tartari stibiati, U. antimonii tartarizati—u. Tartarati potassæ stibiati, U. antimonii tartarizati—u. de Terebinthinâ et adipibus, U. elemi compositum—u. de Terebinthinâ et cerâ, U. de althæa—u. Terebinthine et ovorum vitelli, U. digestivum simplex—u. Tetrapharmacum, Basilicon, U. resinæ nigræ—u. Tripharmacum, U. plumbi superacetatis—u. Tutia, U. oxidi zinci impuri.*

UNGUENTUM VERA'TRI, *U. V. albi, Unguentum helleb'uri albi, White hellebore ointment. (Veratr. pulv. ʒj; adipis, ʒviij; olei limon. ℥xx.) Used in cases of itch, where sulphur is objected to. It is not equally efficacious.*

The principal ingredients in the EDINBURGH OINTMENT are white hellebore and muriate of ammonia.

UNGUENTUM AD VESICATA, *U. lyttæ—u. ad Vesicatoria, Cerate of cantharides—u. Vesicatorium.*

UNGUENTUM ZINCI, *Ung. oxid'idi zinci, U. zinci oxid'idi (Ph. U. S.), Zinc ointment. (Zinci oxid. ʒj; adipis, ʒvj. Use, the same as that of the Unguentum tutiæ.*

UNGUENTUM ZINCI OXIDI, *U. zinci.*

UNGUIS, Hippocampus minor, Nail, Pterygion—u. Avis, Hippocampus minor—u. Halleri, Hippocampus minor—u. Odoratus, Blatta Byzantia.

UNGUIS OS, *Os lachryma'le.* A small, quadrilateral, very thin, and semi-transparent bone, which has been compared to a human nail, and is situate at the anterior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and inferior spongy bones, and is developed by a single punctum ossificationis.

UNGULA CABBALLINA, Tussilago.

UNGULÆ PALPEBRARUM, see Tarsus.

UNILOC'ULAR, *Unilocularis*, from *unus*, 'one,' and *loculus*, 'a cell.' Having one cell or cavity, as *Bilocular* means having two cells or cavities; *multilocular*, having many.

UNIO, Pearl.

UNIOCLUSUS, Cyclops, Monoeylus.

UNIPARIENS, Uniparous.

UNIPARIENT, Uniparous.

UNIP'AROUS, *Unipariens, Unipariens*, from *unus*, 'one,' and *pario*, 'I bring forth.' Producing one and a birth.

UNISE'MA DELTIFO'LIA, *Pontederia cordata, Shovel Pikeretweed, Pond Shore, Shoreleaf, Water Plantain.* An indigenous plant, Ord. Pontederiaceæ, *Sec. Syst.* Hexandria Monogynia, which grows in water, and flowers from June to August. The root is emollient and astringent.

UNTING BANDAGE, (F.) *Bandage unissant.* A bandage for bringing the edges of a wound into approximation. The arrangement of such a bandage differs according as the wound is transverse or longitudinal.

UNIVOCAL GENERATION, see Generation.

UNOCULUS, *Borgue, Cyclops, Monoeylus.*

UNORGANIZED, Inorganic.

UNSTRIPED MUSCULAR FIBRE, see Muscular fibre.

UNWELL, see Menstruation.

UPAS. A word used in the Archipelagos of Molucca and Sunda, and signifying *Vegetable Poison*, *Ipo*, *Bohon Upas*, *Bou Upas*, *Pohon Antiar*, *Boon Upas*. A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree which produces it is said to be the *Antiaris Toxicaria*. Another species of upas, the *U. Tienté*, is the produce of a *Strychnos*. Many idle stories are told regarding the upas, most of which are fabulous.

URACHUS, *U'raeus*, *Urinae'ulum*, from *ουρον*, 'urine,' and *εχω*, 'I contain.' (F.) *Ouraque*. The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois*. According to Sabatier, this is the arrangement of the urachus in the human foetus; but Bichat and other anatomists consider, that when the canal exists in it, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeurosis.

URACRATIA, Enuresis.

URACUS, Urachus.

URÆMIA, from *ουρον*, 'urine,' and *αιμα*, 'blood.' A condition of the blood in which it contains urine or urea.

URALI, Curare.

URANA, Ureter.

URANE, Urinal.

URANISCONTITIS, from *ουρανισκος*, 'the palate,' and *itis*, denoting inflammation. *Palati'itis*. Inflammation of the palate.

URANISCOPLAS'TICŒ, from *ουρανισκος*, 'the roof of the mouth,' and *πλαστικος*, 'forming.' The operation of engrafting in case of deficiency of the soft palate.

URANISCORRHAPHIA, Staphylorrhaphy.

URANISCOS, Palate.

URANORRHAPHIA, Staphylorrhaphy.

URAPOSTEMA, *Abscess'us urino'sus*, *Urcæ'dema*. A tumefaction produced by the escape of urine. An abscess containing urine.

URARI, Curare.

URAS, Urate.

URATE, *Uras*, *Lithate*, *Lithas*; from *ουρον*, 'urine.' A generic name for salts, formed by the combination of uric or lithic acid with different bases. *Urate* or *Lithate of Soda* is found in arthritic calculi:—*Urate* or *Lithate of Ammonia* in some urinary calculi.

URÆA, *Uren*, *Uren'ium*, *U'ricum*, *Mate'ria urino'sa*, *Princip'ium* seu *Sal urino'sum*, (F.) *Urée*. Same etymon. A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. Dose, gr. xv to ℥j.

UREC'CHYSIS, *Urech'ysis*, from *ουρον*, 'urine,' and *εχωσις*, 'effusion.' Effusion of urine into the cellular membrane.

UREDŒ, Urticaria.

URÆE, Urea.

UREMA, Urine.

UREN, Urea.

URENIUM, Urea.

URENS, Caustic.

UREORRHOEA, Diabetes.

URESLESTHESIS, Diuresæsthesis.

URESIS, Micturition.

URE'TER. Same etymon as Urate. *U'raua*, *Vena alba renum*, *Canalis ner'veus fistulo'sus renum*, *Ductus* seu *Ductor Uri'næ*, *Vas urina'rium*, (F.) *Urètere*. A long, excretory canal—membranous and cylindrical—which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *bas fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vésical*. The ureter is formed of an exterior, white, opaque, and fibrous membrane; and of an inner, which is mucous.

URETERAL'GIA, from *ουρητηρ*, 'the ureter,' and *αλγος*, 'pain.' Pain in the course of the ureter,—as from calculus, *Ureteral'gia calculo'sa*.

URETERALGIA CALCULOSA, see Ureteralgia—u. Inflammatoria, Ureteritis.

URETÈRE, Ureter.

URETER'ICUS. An epithet for ischury, &c., arising from an affection of the ureter.

URETERITIS, *Ureteral'gia inflammato'ria*, *Ureterophlegmasia*. Inflammation of the ureter; generally caused by calculus.

URETERO-LITH'ICUS, from *ουρητηρ*, 'the ureter,' and *λιθος*, 'a stone.' An epithet applied to ischury or other affection caused by a stone in the ureter.

URETEROLITHUS. Same etymon. Calculus in the ureter.

URETEROPHLEGMASIA, Ureteritis.

URETERO-PHLEGMAT'ICUS, from *ουρητηρ*, 'the ureter,' and *φλεγμα*, 'phlegm or mucus.' Any affection caused by mucus accumulated in the ureter.

URETERO-PY'ICUS, from *ουρητηρ*, 'the ureter,' and *πυον*, 'pus.' An epithet applied to affections caused by the presence of pus in the ureter.

URETERORRHAG'IA, from *ουρητηρ*, 'the ureter,' and *ραγη*, 'rupture.' Hemorrhage from the ureter.

URETERO-STOMAT'ICUS, from *ουρητηρ*, 'the ureter,' and *στομα*, 'orifice.' That which is dependent upon obstruction of the orifice of the ureter.

URETERO-THROMBOÏ'DES, from *ουρητηρ*, 'the ureter,' *θρομβος*, 'grumous blood,' and *ειδος*, 'resemblance.' Ischury from grumous blood in the ureter.

URE'THRA, *ουρηθρα*, *Canalis* seu *Med'tus* seu *Ductus urina'rius*, *Uris*, *Ure'tra*, *Fis'tula urina'ria*, *Iter urina'rium* seu *Uri'næ*; (F.) *Urèthre*, *Urètre*, from *ουρον*, 'urine.' The excretory ducts for the urine in both sexes; and for the sperm in man. In the latter, it is 8 or 10 inches long; and extends from the neck of the bladder to the extremity of the penis, in which its external aperture is situate. In the male urethra, three portions are distinguished:—1. A *Prostatic portion*, near the bladder, about an inch and a quarter in length, which traverses the prostate gland:—2. A *membranous portion*, *Isthmus ure'thræ*, *Pars ure'thræ membranacea*, from 8 to 10 lines long, which is separated from the rectum by the areolar tissue only:—3. A *spongy portion*, which expands, anteriorly, to form the glans, and which commences at the *bulb of the urethra*. Before opening externally, the canal has a dilatation, called the *Fossa* or *Fossic'ula navicula'ris*. On the interior of the urethra two white lines are perceptible—the one above, the other below. The latter commences at the *verumontanum*; and at the surface of this, the *ejaculatory ducts*, and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which

are seen, particularly at the bulb, the orifices of a number of follicular ducts, *Laennæ* or *Sinusæ* of Morgagni. At about an inch and a half from the opening of the meatus, one of these *laennæ* is generally found, much larger than the rest, and is named *Laenna Magna*. The arteries of the urethra are numerous, and proceed from the internal pudic, — the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the female, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *meatus urinarius*. In its course, it is slightly curved, the concavity being forwards.

URETHRA, BLIND DUCTS OF THE, see *Cæcus* — u. Mucous *laennæ* of the, see *Cæcus*.

URETHRAL, *Urethralis*, *Urethricus*, from *ουρηθρα*, 'the urethra.' Relating to the urethra.

URETHRAL'GIA, from *ουρηθρα*, 'the urethra,' and *αλγος*, 'pain.' Pain in the urethra. Gonorrhœa.

URÊTHRE, Urethra.

URETHREMPHRAxis, Urethrophraxis.

URETHRITIS, Gonorrhœa.

URETHROBLENNORRHIÆ'A, from *ουρηθρα*, 'the urethra,' *βλεννα*, 'mucus,' and *ρεω*, 'I flow.' Gonorrhœa; gleet.

URETHROCYSTAUCHENOTOMIA, see Lithotomy.

URÊTHROCYSTEOANEURYSMATOTOMIA, see Lithotomy.

URETHROCYSTËOTRACHELOTOMIA, see Lithotomy.

URETHROILEMORRHAGIA, Urethrorrhagia.

URETHROPHRAX'IS, *Urethremphrax'is*, from *ουρηθρα*, 'the urethra,' and *φρασσαω*, 'I obstruct.' Obstruction of the urethra.

URETHROPLAS'TIC, *Urethroplas'ticus*; from *ουρηθρα*, 'the urethra,' and *πλασσαω*, 'I form.' An epithet given to the operation *urethroplasty* which supplies defects in the canal of the urethra through which the urine escapes.

URETHRORRHIÆ'GIA, *Urethrohæmorrhæ'gia*, *Cælorrhæ'gia stillatit'ia*, *Hæmatu'ria stillatit'ia*, from *ουρηθρα*, 'the urethra,' and *ρηγνυμι*, 'I break out.' Hemorrhage from the urethra. — Frank.

URETHRORRHIÆ'A, from *ουρηθρα*, 'the urethra,' and *ρεω*, 'I flow.' A discharge of any kind from the urethra.

URETHROSTENO'SIS, *Strictu'ra ure'thræ*, *Urostenosis*, from *ουρηθρα*, 'the urethra,' and *στενωσις*, 'narrowness.' Stricture of the urethra.

URETHROT'OMUS, (F.) *Urêthrotome*, from *ουρηθρα*, 'the urethra,' and *τεμνω*, 'I cut.' An instrument so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

URETHROT'OMY, *Urethrotom'ia*; same etymon. An operation, which consists in opening the urethra for the removal of stricture. See *Boutonnière*.

URETHRYMENO'DES, from *ουρηθρα*, 'the urethra,' and *μηνη*, 'a membrane.' That which is caused by a membrane formed in the urethra.

URETICUS, Diuretic, Urinary.

URETRA, Urethra.

URÊTRE, Urethra.

URETRIS, Urinal.

URIAS, Fistula, (urinary,) Urethra.

URIASIS, Lithia, Uresis.

URIC ACID, *Ac'idum u'ricum*, *Ac'idum uro-lith'icum*, *Acidum lith'icum*, *Lithic Acid*, *Urylic Acid*. An acid which exists in human urine, chiefly, if not wholly, in the form of urate of soda or urate of ammonia, and which in combination constitutes the greater part of urinary calculi. It is often deposited from the urine in health. See *Calculi*, urinary.

URIC OXIDE, *Ox'idum u'ricum*, *Xanthic oxide*, *Xanthine*, *Uronic acid*. A substance not discovered in healthy urine, although probably bearing some relation to the yellow colouring matter. It is a very rare ingredient of calculous concretions, and little is known either of its chemical or pathological history.

URICUM, Urea.

URICUS, Urinary.

URINA CEREBËLLA, see *Cerebella*—u. *Chyli*, see *Urine*—u. *Cibi*, see *Urine*—u. *Diabetica*, *Urine*, diabetic—u. *Febrilis*, *Urine*, febrile—u. *Furfuracea*, see *Furfuraceus*—u. *Galactodes*, see *Galactodes*—u. *Genitalis*, *Sperm*—u. *Jumentosa* see *Jumentaria*, *Urine*, jumentous—u. *Mucosa*, *Cystirrhœa*—u. *Nephelodes*, see *Nepheloid*—u. *Oroboides* see *Orobodes*, see *Oroboides*—u. *Pericardii*, see *Pericardium*—u. *Potûs*, see *Urine*—u. *Sanguinis*, see *Urine*—u. *Vaccæ*, *Urine*, cows'.

URINACULUM, Urachus, Urinal.

URINÆ PROFLUVIUM, Diabets—u. *Suppresso*, *Ischuria*—u. *Stillicidium*, *Strangury*—u. *Substillum*, *Strangury*.

URINAL, *Urinat'rium*, *Chernib'ium*, *Uranë*, *Ure'tris*, *Urina'culum*, *Urodochi'um*, *Urod'ochë*, *Urodoche'um*, *Uratra'cium*, *Matra'cium*, *Mat'ula*, *Mat'ella*; from *urina*, 'urine.' A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URINALIS, Diuretic, Urinary.

URINARIA, *Antirrhinum linaria*, *Leontodon taraxacum*.

URINARY, *Urinarius*, *Urinalis*, *Urinarius*, *Uricus*, *Urelicus*. Same etymon. That which relates to the urine.

URINARY BLADDER, *Vesi'ca Urina'ria*, *Cystis*, *Urocy'stis*, (F.) *Vessie*. A musculo-membranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis in man; and between the pubis and vagina in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculæ seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibro-cellular expansion called the *anterior ligament*. The posterior ligaments are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peritoneum;—of a muscular membrane; of a somewhat thick layer of areolar tissue; and is lined on its inner surface, by a mucous membrane, which is, sometimes, raised up, here and there, in long prominences or *columns* by the muscular fibres beneath. To this condition the French anatomists give the term—*vesiæ à colonnes*. In the *bas-fond* the two ureters open, and the urethra commences; and the triangular

space, which the apertures of these three canals leave between them, is called, by the French, the *Trigone vésical* or *Vesical Triangle*, *Trigo'nus* seu *Trigo'nus vesi'cæ* seu *Lieutan'di*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigone vésical*, and is called the *Vesical uvula*, *U'vula vesi'cæ*, (F.) *Lnette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexuses; and its lymphatic vessels pass into the hypogastric ganglia.

**URINARY CALCULI.** The calculi which form in the urinary passages. See Calculi, urinary.

**URINARY PASSAGES, (F.)** *Voies urinaires*. The aggregate of canals and cavities intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

#### URINATORIUM, Urinal.

**URINE, Uri'na, U'ron, Ure'ma, Lot'im, Lot, Lapis au'reus, Omich'ma, Recremen'ta** seu *Retrimen'ta vesi'cæ, Aqua pedum, Aqua*. An excrementitious fluid; secreted by the cortical part of the kidney; filtered through the tubular portion; poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow colour; of a peculiar odour, and of an acid, saline, and slightly bitter taste. That which is passed some time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is the *Uri'na potûs*, (F.) *Urine de la Boisson, Urine from drink*:—the latter *Uri'na san'guinis*, (F.) *Urine de la digestion, Urine de la coction, Urine cuite, Cocted urine, Urine of digestion*. Three distinct varieties of urine may, according to Dr. Golding Bird, be recognised: *First*, That passed some little time after drinking freely of fluids, which is generally pale, and of low specific gravity—1.003 to 1.009—*Urina potûs*. *Secondly*, That secreted after the digestion of a full meal; s. g. 1.020 to 1.028, or even 1.030—*Urina chyli vel cibi*. *Thirdly*, That secreted independently of the immediate stimulus of food and drink, as after a night's rest, which is usually of average density—1.015 to 1.025, and presents the essential characters of urine—*Urina san'guinis*.

The following are the ordinary constituents of healthy human urine:—urea, uric acid, [hippuric acid;] extractive matters, embracing alcohol extract, spirit extract, and water extract, with their respective constituents; mucus; brown colouring matter of the urine, (hæmaphæin;) red colouring matter of the urine, (uroerythrin;) carbonic, lactic, hydrochloric, sulphuric, phosphoric, silicic, and hydrofluoric acids; soda; potassa; ammonia; lime; magnesia; and peroxide of iron. The proportion of solid matters in 1000 parts of urine may vary from 20 to 70. The following table expresses the relative amounts of the different components in every 100 parts of the solid mat-

ter, according to the analysis of different observers:

	Berzelius.	Lehmann.	Simon.	Marchand
Urea,	45.10	49.68	33.80	48.91
Uric Acid,	1.50	1.61	1.40	1.59
Extractive matter,	36.30	22.95	42.60	32.49
Ammonia, Salts,				
and Chloride of Sodium.				
Alkaline Sulphates,	10.30	11.58	8.14	10.18
Alkaline Phosphates,	6.88	5.96	6.50	4.57
Phosphates of lime and magnesia,	1.50	1.97	1.59	1.81

Its average specific gravity is about 1.015. The quantity passed by the adult in the 24 hours varies. On the average it may amount to two pounds and a half. Sometimes, the urine, in health and disease, exhibits appearances that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydrûria*, ('*υδωρ*, 'water;') by a deficiency of urea, *Anazotûria*, (av, privative, and *azote*;) by a superabundance of urea, *Azotûria*. Urine in which the deposit consists of lithic acid, and the lithates, has been termed *Lithûria*; and that in which the deposit consists of the earthy and earthy-alkaline phosphates, *Phosphûria Ceramûria*, (*κεραμος*, 'potter's earth,') &c. &c. At times, a *pellicle* forms on the surface (*Cremor urinæ*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubecula, nubes*), towards its upper part, which is called *Enazore'ma* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypostasis, Sedimentum*, &c., have been given. (See these various words.) The urine is often deserving of attention in disease; but it has been considered a matter of more importance than it merits. Some empirics have presumed to pronounce on the nature of disease by simply inspecting it. See Uroscopy.

Human urine was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces. Cow's urine, *Urina Vacca, Allflower water*, was once used, warm from the cow, as a purge, in the dose of Oss.

Urine has been variously designated by pathologists, according to its appearance, &c., for example:—

**URINE, ANÆMIC, Uri'na anæ'mica**. Used, but not felicitously, for the form of urine that occurs in anæmia, chlorosis, &c.—Bequerel.

**URINE ARDENTE, Ardent urine**—*Bloody, Hæmaturia*—*u. de la Boisson, Urine, hysterical, see Urine—u. de la Coction*, see Urine.

**URINE, CRUDE, (F.) Urine crue**. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposit.

**URINE CRUE, Urine, crude**—*u. Cuite*, see Urine.

**URINE, CYSTINIC, Cystimûria**. Urine containing cystine or cystic oxide in solution, or as a deposit.

**URINE, DIABETIC, Uri'na diab'etica**. Urine passed in *Diabetes mellitus, Melitûria*. It contains a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

**URINE DE LA DIGESTION**, see Urine.

**URINE, DROP'SICAL**, is an ammoniacal urine, often containing much albumen and scarcely any urea.

**URINE, DYSPEP'TIC**, has been found to precipitate tannin abundantly, and to soon putrefy.

**URINE ÉPAISSE, Urine, mucilaginous**.

**URINE, FEBRILE, Uri'na febrî'tis**. Urine discharged in inflammation and inflammatory fever.

URINE, FILAMENTOUS, see Filamentous.

URINE, FLOCCULENT, (F.) *Urine floccuense*, is when the fluid is troubled by flocculi, suspended in it.

URINE, FURFURACEOUS, see Furfuraceous—*u. floccuense*, Urine, flocculent—*u. des Goutteux*, Urine, gouty.

URINE, GOUTY, (F.) *Urine des goutteux*, contains much phosphate of lime, and, after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

URINE HUILEUSE, Urine, oily.

URINE, HYSTERICAL, is clear, colourless, and similar to the *Urine de la Boisson*.

URINE, ICTERICAL, contains bile.

URINE, INCONTINENCE OF, Enuresis.

URINE OF INFLAMMATORY DISEASES. This is, generally, small in quantity, and very high-coloured.

URINE, INVOLUNTARY DISCHARGE OF, Enuresis.

URINE, JUMENTOUS, *Urina jumentosa seu jumenta'ria*, (F.) *Urine Jumentense*. A term used, by the French, for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

URINE LACTESCENTE, U. milky—*u. Laitense*, Urine, milky.

URINE, MILKY, (F.) *Urine lactescente ou laitense*. White and troubled urine.

URINE, MUCILAGINOUS, (F.) *Urine épaisse*. Urine containing much mucus.

URINE, NERVOUS. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

URINE OF NERVOUS FEVERS is generally very thin; and often deposits a mixture of uric and rosacic acids.

URINE, OILY, (F.) *Urine huileuse*, is that which pours like oil, or which has an oily pellicle at its surface.

URINE, OXALIC, *Oxalu'ria*. Urine containing a salt of the oxalic acid.

URINE, PHOSPHORES'CENT, *Phosphoru'ria*, *Phosphu'ria*. Urine which is luminous or phosphorescent.

URINE, PURPURIC, see Porphyria.

URINE, RICK'ETY, contains much phosphate of lime.

URINE, SANDY, *Arenosa urina*—*u. Stoppage of*, *Isehuria*—*u. Ténue*, Urine, thin.

URINE, THIN, (F.) *Urine ténue*. Urine that is transparent, slightly coloured, and but little dense.

URINEF'EROUS, *Urinifer*, from *ουρον*, 'urine,' and *fero*, 'I carry.' That which carries urine.

URINEFEROUS SUBSTANCE OF THE KIDNEY, see Kidney.

URINEFEROUS TUBES OR DUCTS OF BELLINI, *Tubuli vel ductus uriniferi Bellini*, *Tubuli Bellini*, *Bellinia'ni Ductus*, *Bellinia'næ Fis'tulæ*. The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillæ.

URINODES, Urinous.

URINOMETER, from *ουρον*, 'urine,' and *μετρον*, 'measure.' A small hydrometer for taking the specific gravity of urine. The urinometer suggested by Dr. Prout is divided into 60 degrees, the zero being the point at which it floats in distilled water. The numbers on the scale added to 1000, the specific gravity of water, give the particular specific gravity: thus, supposing the number cut by the surface of the liquid to be 30, it would indicate a s. g. of 1.030. The letters H. S. on the back of the scale mean "healthy standard," which ranges from 10° to 20°.

URINOUS, *Urinous*, *Urinodes*. Having the character of urine. Similar to urine.

UROCE'LE, *Ede'ma scroti urino'sum*, *Uroscœce'le*, *Oscœce'le urina'lis*, from *ουρον*, 'urine,' and *κηλη*, 'a rupture.' A tumour of the scrotum, owing to the effusion of urine into the same, and into the areolar tissue.

UROCHES'IA, *Urochez'ia*, from *ουρον*, 'urine,' and *χιζεν*, 'to go to stool.' A discharge of urine by the bowels.

UROCRASIA, Enuresis.

UROCRIS'IA, from *ουρον*, 'urine,' and *κρινω*, 'I judge.' *Urocrite'ria*. A judgment formed either of the urine, or of disease after inspecting the urine.

UROCRITERION, Urocrisis.

UROCYSTIS, Urinary bladder.

UROCYSTITIS, Cystitis.

UROCYSTOCATARRHUS, Cystirrhœa.

URODIALYSIS, from *ουρον*, 'urine,' and *διαλυσις*, 'dissolution, loss of strength.' A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodialysis Neonato'rum*; in the aged, *Urodialysis Senum*.—Schönlein.

URODOCHIUM, Urinal.

URODYN'IA, from *ουρον*, 'urine,' and *δύνη*, 'pain.' Pain during the excretion of the urine.

UREDEMA, Urapostema.

UROGENITAL, *Urogenita'lis*, *Gen'ito-n'ri-nary*, *Gen'ito-urina'rius*. Relating or appertaining to the urinary and genital apparatus.

UROGENITAL SINUS, *Sinus uro-genita'lis*. A cavity or canal in the embryo of the mammalia opening externally, in which the excretory ducts of the Wolffian bodies, the ureters and the efferent parts of the generative apparatus, terminate internally. It is prolonged into the urachus. Subsequently it becomes separated by a process of division into a *pars urina'ria* and a *pars genita'lis*. The former, extending towards the urachus, is converted into the urinary bladder; whilst from the latter are formed the *vesiculæ seminales* in the male, and the middle portion of the uterus in the female.—J. Müller.

UROLITHI, Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOG'IA; from *ουρον*, 'urine,' *λιθος*, 'a stone,' and *λογος*, 'a description.' A description of urinary calculi.

UROLITHOTOMIA, Lithotomy.

UROMANTI'A, from *ουρον*, 'urine,' and *μαντεία*, 'divination.' The art of divining diseases by simple inspection of the urine; *Urosco'pia*. One professing to be able to do this is called *Uromantea*. Vulgarly, a water-doctor.

UROMPH'ALUS, *Her'nia Ura'chi*. A monstrosity, which consists in the protrusion of the urachus at the umbilicus.

URON, Urine.

URON'CUS, from *ουρον*, 'urine,' and *ογκος*, 'a swelling.' A urinary swelling.

URONOL'OGY, *Uronolog'ia*, from *ουρον*, 'urine,' and *λογος*, 'a description.' The part of medicine which treats of the urine.

UROPHTHISIS, Diabetes mellitus.

UROPLA'NIA, from *ουρον*, 'urine,' and *πλανη*, 'wandering.' The presence of urine in other parts than the urinary organs.

UROPOE'SIS, *Uropo'e'sis*, from *ουρον*, 'urine,' and *ποιω*, 'I make.' *Secretio urinae seu lo'tii*. The secretion of urine by the kidney.

UROPOIESIS, Uropoësis.

UROPYGION, Coecyx.

UROPYGIUM, *Croupion*.

URORRHAGIA, Diabetes.

URORRHŒA, Enuresis, Diabetes.

UROSCHEOCELE, Urocele.

UROSCOPIA, see Uromantia.

URO'SES, from *ουρον*, 'urine.' Diseases of the urinary organs.—Alibert.

UROST'EALITH, *Urosteal'ithos*, from *ουρον*, 'urine,' *σταιν*, 'suet,' and *λιθος*, 'stone.' A peculiar fatty ingredient of urinary calculi, discovered by Heller.

UROSTENOSIS, Urethrostenosis.

URUS ACID, Uric oxide.

UROZEMIA, Diabetes—u. Albuminosa, Kidney, Bright's disease of the—u. Mellita, Diabetes mellitus.

URTICA, *U. Dioica* seu *major* seu *hispid*a, *Pyrrhetrum*, the *Common stinging nettle*, *Ad'icè*, (F.) *Ortie*. Family, Urticæ. *Sex. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbutic properties.

URTICA BALEARICA, *U. pilulifera*—u. *Dioica*, *Urtica*—u. *Hispid*a, *Urtica*—u. *Iners magna foetidissima*, *Galeopsis*—u. *Major*, *U. dioica*—u. *Minor*, *U. urens*—u. *Mortua*, *Lanium album*.

URTICA PILULIF'ERA, *Pill-bearing Nettle*, *U. Pilulo'sa* seu *Roma'na* seu *Balea'drica*, (F.) *Ortie Romaine*. The seed was formerly given in diseases of the chest.

URTICA PILULOSA, *U. pilulifera*—u. *Roman*, *U. pilulifera*.

URTICA URENS, *U. minor*, *Dwarf nettle*, (F.) *Ortie brulante*. A lesser variety of the nettle, possessing similar virtues.

Nettles have been used as stimulants to paralytic limbs.

URTICAIRE, Urticaria.

URTICARIA, from *urtica*, 'a nettle;' *Enanthe'sis urtica'ria*, *Ure'do*, *Scarlati'na urtica'ta*, *Cuido'sis*, *Urtica'ria porcell'ana*, *Ecanthe'ma urtica'tum*, *Epiny'ctis prurigin'o'sa*, *Febris urtica'ta*, *Pur'pura urtica'ta*, *Febris rubra prurigin'o'sa*, *Saltans rosa*, (F.) *Urticaire*, *Fidvre Ortie*, *Porcellaine*, *Nettle-rash*; vulgarly *Hives*, *Bold Hives*; from *urtica*, 'a nettle,' because the eruption resembles that produced by the stings of a nettle. A disease distinguished by those elevations of the cuticle called *wheals*. They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettle-rash is induced by shell-fish, eggs, nuts, &c. It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint;—*Urtica'ria febr'ilis*, *U. evan'ida*, *U. perstans*, *U. confer'ta*, *U. subcuta'nea*, and *U. tubero'sa*.

URTICARIA PORCELLANA, *Essera*, Urticaria.

URTICA'TIO, *Cuido'sis*, *Urtica'tion*, from *urtica*, 'a nettle.' A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, *Terra Orleana*.

URYLIC ACID, Uric acid.

USNEA, *Lichen saxatilis*—u. *Florida hirta*, *Lichen plicatus*—u. *Hirta*, *Lichen plicatus*—u. *Plicata*, *Lichen plicatus*.

USSACU, *Hura Brasiliensis*.

USTILAGO, Ergot.

USTIO, Burn, Ustion.

USTION, *Ustio*, *Causis*, from *urere*, *ustum*, 'to burn.' The act of burning or of applying the actual cautery. Also the effect of cauterization; a burn.

USTULA'TIO, *Ustula'tion*. A pharmaceutical operation by which a substance is dried by heat.

USUALIA, Officials.

USUS, Habit.

UTER, Uterus.

UTERI ADSCENSUS, Hysteria—u. Antever-sio, *Hysteroloxia anterior*—u. *Carcinoma*, *Metrocarcinoma*—u. *Convulsivus morbus*, *Lorind matricis*—u. *Coryza*, *Leucorrhœa*—u. *Exulceratio*, *Hysterelocis*—u. *Flexio*, *Hysteroloxia*—u. *Inclina-tio*, *Hysteroloxia*—u. *Obliquitas*, *Hysteroloxia*—u. *Pronatio*, *Hysteroloxia anterior*—u. *Pruritus*, *Nymphomania*—u. *Reflexio completa*, *Hysteroloxia posterior*—u. *Retroversio*, *Hysteroloxia posterior*—u. *Rheuma*, *Leucorrhœa*—u. *Ulcus*, *Hysterelocis*—u. *Versio incompleta*, *Hysteroloxia*.

UTERINE, *Uteri'us*, from *uterus*, 'the womb.' That which belongs or relates to the womb.

UTERINE ARTERY, *Arte'ria uteri'na hypogas'trica*. Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

UTERINE MUSCLE OF RUYSC consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTERINUS FRATER. In law, a brother by the mother's side.

UTERO-ABDOMINAL SUPPORTERS, see Belt, Russian.

UTERO-GESTATION, Pregnancy.

UTEROMANIA, Nymphomania.

UTERUS, *Uter*, *Utric'ulus*, *Loci*, *Loci mulie'bres*, *Vulva*, *Venter*, *Arvum nativæ*, *Conceptaculum*, *Matrix*, *Ager nativæ*, *Hys'tera*, *Metro*, *Stera*, *An'gus*, *Delphys*, *Alvus*, *Epompha'lion*, *Gaster*, *Mater*, *Nedys*, *Postrema*, the *Womb*, (F.) *Matrice*, *Sein*. The uterus, destined to lodge the fœtus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cervix* or *neck*, to distinguish it from the rest of the organ, called the *body*. From its *fundus* or upper portion, the Fallopian tubes pass off. The mouth is called *Os Uteri* or *Os Tincæ*. The cavity is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. It forms, also, the *broad ligaments of the uterus*, *Ligamenta lata*, *Alæ vesperilio'nis*, *Re'tia Uteri*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and, behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolunga-

tion of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ, called *Uterine Sinuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions, vital properties, &c.

UTERUS, Abdomen—u. Anteversion of the, Hysteroloxia anterior.

UTERUS BIFIDUS. A double uterus. One separated into two cavities.

UTERUS DUPLEX, Dihysteria—u. Hour-glass contraction of the, *Chaton*—u. Inclinatus, Hysteroloxia.

UTERUS, IRRITABLE, *Neuralgia of the Uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure; and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be,—the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See Hysteralgia.

UTERUS, INVERSION OF THE, *Inversio Uteri*, *Metronastrophè*, *Adoptosis Uteri inversa*, (F.) *Inversion de la Matrice*, *Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

UTERUS MASCULINUS, see Ejaculatory ducts—u. Obliquus, Hysteroloxia—u. Retroversion of the, Hysteroloxia posterior.

UTERUS, RUPTURE OF THE, *Metrorrhæxis*, *Hysterorhæxis*, *Ruptura Uteri*, *Perforatio Uteri*, *Laceration of the Womb*, (F.) *Rupture de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE, see Semicircular canals.

UTRICULAR, *Utricularis*; from *utriculus*, 'a small bag or bottle.' Relating to or resembling a small bag or bottle.

UTRICULAR GLANDS, *Glandulæ utriculares*. The glands or follicles in the interior of the uterus, which are concerned in the formation of the decidua.

UTRICULUS, see Ejaculatory ducts, Uterus—u. Communis, see Semicircular canals—u. Lacteus, *Receptaculum chyli*.

UVA, *Uvula*, see *Vitis vinifera*—u. *Inversa*, Paris—u. *Lupina*, Paris—u. *Ursi*, see *Arbutus ursi*—u. *Vulpina*, Paris.

UVÆ CORINTHIACÆ, see *Vitis Corinthiaca*.

UVÆ PASSÆ, *Rhages*, *Dried Grapes*, *Raisins*, see *Vitis vinifera*.

UVÆ PASSÆ MAJORES, see *Vitis vinifera*—u. *Passæ minores*, see *Vitis Corinthiaca*—u. *Passæ sole siccata*, see *Vitis vinifera*.

UVATIO, *Ceratocœle*, *Staphyloma*.

UVÆA, from *uva*, 'an unripe grape.' *Tu'nica acinosa* seu *aciniformis* seu *uvælis* seu *acinulîs* seu *uviformis*, *Rhagoîdes*, *Tu'nica rhagoîdes* seu *uvea* seu *perforata*, *Membrana uvea*, *Rhor*, (F.) *Uvée*. Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it.

UVÆA, COMMISSURE OF THE, Ciliary ligament.

UVÉE, *Uvea*.

UVEITIS; a word of hybrid formation; from *uvea*, 'the uvea,' and *itis*, denoting inflammation; properly, *Rhagoîdêitis*. Inflammation of the uvea.

UVIGENA, *Uvula*.

UVIGERA, *Uvula*.

UVULA, diminutive of *uva*, 'a grape.' *Pinnaculum fornicis gutturalis*, *Uva*, *Staphylè*, *Tintinnabulum*, *Colomella*, *Cion*, *Cionis*, *Gargareon*, *Columna oris*, *Gurgulio*, *Interseptum*, *Processus* seu *Cartilago Uvifer*, *Uvig'ena*, *Uvig'era*, *Pap* of the Throat, *Himas*, *Plectrum*, *Sublingua*, *Sublinguim*, (F.) *Luette*. A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains, within it, the *azygos uvulæ* muscle. Its use is not clear.

Also, a small prominence or lobule in the portion of the cerebellum that forms the posterior boundary of the fourth ventricle. It is on the median line, and behind the nodulus.

UVULA, see Vermiform process inferior—u. *Decidua*, *Staphylœdema*—u. *Relaxata*, *Staphylœdema*—u. *Vesicæ*, see *Urinary bladder*—u. *Vesicæ*, see *Urinary bladder*.

UVULAR, *Uvularis*, from *uvula*. That which belongs to the uvula.

UVULAR GLANDS are small follicles, belonging to the mucous membrane covering the uvula.

UVULARIA, *Ruscus hypoglossum*.

UVULARIA PERFOLIATA, *Smaller Bellwort*; indigenous: *Order*, *Melanthacææ*; flowering in May and June. The root, when fresh, is subacrid and mucilaginous. A decoction of the plant is used in sore mouth. It is said to cure the bites of rattlesnakes.

UVULITIS, a word of hybrid formation, from *uvula*, and *itis*, denoting inflammation. *Aug'ina uvularis*, *Staphyl'itis*, *Cioni'tis*, *Inflammatio n'vulæ*, (F.) *Inflammation de la Luette*, *Falling down of the Palate*. Inflammation of the uvula.

## V.

VACCIN, see Vaccina.

VACCINA, *Vaccinia*, *Variola vaccina*, *V. vaccinia*, *V. tutoria*, *V. tutrix*, *Exanthema vaccina*, *E. antivariolosum*, *Synocha vaccina*, *Vaccinola*, *Vaccinola vera*, *Vaccina primigena* seu *vaccinatoria* seu *antivariolosa*, *Vaccinola scutellata*, *Variola tutoria*, *Cow-pox*, *Kine Pock*, *Inoculated Cow-pox*, *Emphyxis vaccina inserta*, from *vacca*, 'a cow'; (F.) *Vaccine*. The cow-pox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, may preserve him from small-pox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for small-pox in Gloucestershire, in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect, although they had never passed through the small-pox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow, which they had taken by milking the animal; and which eruption they called *Cow-pox*. This discovery induced him to institute experiments, and he found that such preservative effect actually existed. The *Vaccine Virus*, *Virus Vaccinum*, (F.) *Vaccin*, or the fluid of the eruption, is not now usually taken immediately from the cow; experience having demonstrated, that it is nearly as efficacious when obtained from the human vesicle. The characteristic of cow-pox eruption is:—a semi-transparent, pearl-coloured vesicle, with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph; contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed areola, which varies in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour, and hardness of the adjoining areolar membrane. This areola declines on the 11th or 12th day; the surface of the vesicle then becomes brown in the centre; and the fluid in the cells gradually concretes into a hard, rounded scab or crust, of a reddish-brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells of which the vesicle had been composed. This is the progress of the *genuine cow-pox*. At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular* or *spurious cow-pox*. If the eruption runs speedily to a height, has an aureola too early, is irregular at its edges, and contains pus instead of a limpid fluid,—it cannot at all be depended upon.

Small-pox occurs, at times, as an epidemic after vaccination. For a while, the enthusiastic advocates of vaccination would not admit the affection to be small-pox; and, accordingly, they

gave it the name Varioloid. It is unquestionably small-pox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *small-pox inoculation*. Vaccination is now practised every where, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection revaccination may be occasionally necessary.

VACCINA ANTIVARIOLOSA, *Vaccina*—v. *Primigena*, *Vaccina*—v. *Tutoria*, *Vaccina*—v. *Tutrix*, *Vaccina*—v. *Vaccinatoria*, *Vaccina*.

VACCINAL, *Vaccine*.

VACCINATION, *Vaccinatio*, from *vacca*, 'a cow'; *Cow-pox inoculation*, *Jennerian inoculation*. An operation which consists in inserting the vaccine virus under the cuticle, so that it may come in contact with the absorbents. It is extremely simple, and requires merely that the point of the lancet should be held under the cuticle for a short time. The best time for taking the matter from the *Cow-pox vesicle*, for vaccination, is about the 7th or 8th day, before the appearance of the aureola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later—is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VACCINATOR, *Vaccinist*, one who inoculates for the cow-pox.

VACCINE, *Vaccina*.

VACCINE, *Vaccinus*, *Vaccinialis*, (F.) *Vaccinal*; same etymon. Relating or appertaining to vaccination, as the '*vaccine vesicle*,' 'a *vaccine physician*.'

VACCINELLA, A term employed by some to designate spurious cow-pox.—*Vaccinolis*, *Vaccinola spuria* seu *leprosa*.

VACCINIA, *Vaccina*—v. *Palustris*, *Vaccinium oxycoccos*.

VACCINIST, *Vaccinator*.

VACCINIUM MACROCARPON, see *V. oxycoccos*.

VACCINIUM MYRTILLUS, *Vitis idæa myrtillus*. The *Myrtle Berry*, *Vaccinia myrtillus*, *Bilberry*, *Blea-berry*, *Whortle-berry*, *Black Whorts*, *Vaccinium nigrum*, (F.) *Airelle Angulense*, *Ruisin de Bois*. Family, *Vaccinææ*. *Sex. Syst.* *Oc-tandria Monogynia*. The berries—*Baccæ Myrtillo-rum*—are esteemed to be antiscorbutic, when prepared with vinegar. They are also said to possess antiseptic and sub-astringent properties when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

VACCINIUM NIGRUM, *V. myrtillus*.

VACCINIUM OXYCOCOS, *Oxycoccos*, *O. palustris*, *Schollera oxycoccos*, *Vaccinia palustris*, *Vitis Idæa palustris*, *Moorberry*, *Cranberry*, *Moss-berry*, *Swamp Redberry*, *Sourberry*, (F.) *Canne-berge*. The berries are pleasantly acid and cooling. They make an agreeable preserve. The common American Cranberry is from *Vaccinium macrocarpon*.

VACCINIUM PUNCTATUM, V. vitis idæa — v. Resinosum, Gaylussacia resinosa.

VACCINIUM STAMINÆUM, *Buckberry, Squaw Hackleberry, Deerberry*. The leaves of these plants are astringent.

VACCINIUM VITIS IDÆA, V. punctatum, *Vitis Idæa punctata, Red Bilberry, Ampelos Idæa, Whortleberry, Coneberry, (F.) Airelle ou Canneberge punctate*. A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of Vaccinium.

VACCINOIS, Vaccinella.

VACCINUS, Vaccina.

VACCIOLA, Vaccina — v. Leprosa, Vaccinella — v. Scutellata, Vaccina — v. Spuria, Vaccinella — v. Vera, Vaccina.

VACILLATIO, *Titubatio*, from *vacillare*, 'to waver.' Staggering; waddling — *claudica'tio anati'ca*.

VACILLATIO DENTIUM, Odontoseisis.

VAGIN, Vagina.

VAGINA, 'a sheath,' *Vagi'na mulie'bris seu uteri'na seu Uteri seu Penis, Sinus mulie'bris seu Pudori seu Pudendi, Colens, Peris, Perin, Colpos, Vulco-uterine canal, (F.) Vagin*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Antos*, with the vulva; by the other, with the womb, the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and caruncula myrtiformes. — Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulose-vascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also, enter into the composition of the organ.

The term Vagina or sheath, *Theca*, is extended to many parts, which serve as envelopes to others.

*Sheath*, (F.) *Gaine*, is sometimes applied to the fascia enveloping the limbs; to areolar membrane, enveloping the muscles, and entering between their fibres; to that which surrounds the blood-vessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

VAGINA CORDIS, Pericardium — v. Femoris, Fascia lata aponeurosis — v. Funiculi Umbilicalis, see Funiculus umbilicalis — v. Glissonii, Capsule of Glisson — v. Malleolaris externa, Retinaculum tendinum perinaeorum — v. Muliebris, Vagina — v. Muscularis, Perimysium — v. Nervorum, Neurilemma — v. Penis, Vagina — v. Portæ, Capsule of Glisson — v. Uterina, Vagina.

VAGINA OF THE VENA PORTA, *Sheath of the Vena Porta*, (F.) *Gaine de la Veine-porte*, is the areolar membrane that accompanies the divisions of the vena porta into the substance of the liver.

VAGINÆ SYNOVIALES, Bursæ mucosæ.

VAGINÆ L, *Vagina'lis*, from *vagina*, 'a sheath.' — Relating or pertaining to a sheath.

VAGINAL ARTERY. This exists, as a matter of course, only in the female. It arises from the hypogastric or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

VAGINAL BILIARY PLEXUS. A plexus of ramifications of the hepatic duct through the capsule of Glisson.

VAGINAL BRANCHES OF THE VENA PORTA are those which have to pass through the sheath of the capsule of Glisson, previous to entering the interlobular spaces. In this course, they form

the vaginal plexus. There are, also, *vaginal branches*, and a *vaginal plexus* formed by the hepatic artery.

VAGINAL COAT OF THE EYE, see Eye.

VAGINAL COAT OF THE TESTICLE, *Tunica Vaginalis*, T. *Elytroï'des* vel *Elytro'des*, is the serous membrane which envelops the testicle. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen. The tunica vaginalis forms a close sac, investing the testicle and epididymis, without containing them in its cavity, and reflected so as to form a bag around the circumference of the testis; hence it is divided into *Tunica vaginalis propria* and *Tunica vaginalis reflexa*. Between the two layers, the inner surface is smooth, and lubricated by a serous fluid.

VAGINAL GANGLIA, see Spermatic ganglion.

VAGINAL PLEXUS, see Vaginal branches of the vena porta.

VAGINAL PROCESS OF THE TEMPORAL BONE, (F.) *Apophyse vaginale* ou *engainante, Gaine de l'apophyse styloïde, Chaton*, is a bony crista, which embraces the base of the styloid process.

VAGINITIS, Leucorrhœa (vaginal.)

VAGISSEMENT, Cry, Vagitus.

VAGITUS, (F.) *Vagissement*. The cry of the new-born child. *Synalling*.

VAGITUS UTERINUS. The cry of the child in utero.

VAGUS NERVUS, Pneumogastric.

VAIRON (F.), *Dispar oculus*. One who has eyes of different colours. It also means a *wall-eyed animal*, or one whose iris is surrounded by a whitish circle.

VAISSEAUX, Vessel — v. *Sanguin*, Blood-vessel.

VAISSEAUX CAPILLAIRES, Capillary vessels — v. *Chylifères*. Chyliferous vessels — v. *Lactés*, Chyliferous vessels — v. *Lactifères*, Lactiferous vessels — v. *Ombilicair*, Umbilical vessels.

VALANIDA, Fagus sylvatica.

VALANTIA APARINE, Galium aparine.

VALERIAN, AMERICAN, *Cypripedium luteum, Valeriana pauciflora* — v. Garden, *Valeriana phu* — v. Greek, *Polemonium reptans* — v. Official, *Valeriana* — v. Wild, *Valeriana*.

VALERIANA, V. *officinalis*, *Wild Valerian, Valeriana minor, Officinal Valerian*. Family, Dipsacæ. *See Syst. Triandria Monogynia*. The root, *Valeriana*, (Ph. U. S.) has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacid, and warm taste; and its virtues are extracted by water and alcohol.

VALERIANA CAPE'NIS, a South African species, has similar virtues.

VALERIANA CELTICA, V. *Saxatilis, Celtic Nard, Spica Celtica, S. Alpina, Nordus Celtica, Salin'ca, Nardum Gull'icum, Spica Celtica, Diorcor'idis*, (F.) *Nard Celtique*. The roots of this Alpine plant have been recommended as a stomachic, carminative and diuretic. It has a moderately strong smell, and a warm, bitterish, subacid taste.

VALERIANA DENTA'TA, V. *locusta, Corn Salad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

VALERIANA MAJOR, V. *phu* — v. *Lochna*, V. *dentata* — v. *Minor, Valeriana* — v. *Officinalis, Valeriana*.

VALERIANA PAUCIFLORA, *American Valerian*, has the properties of the other Valerians.

VALERIANA PHU, *V. major*, *Garden Valerian*, (F.) *Grand Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy.

VALERIANA SAXATILIS, *V. celtica*.

VALÉRIANE GRAND, *Valeriana* phu.

VALET À PATIN (F.), *Volsel'la Patin'i*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALETUDINARIUM, Hospital.

VALETUDINARIUS, Sickly, Valetudinary.

VALETUDINARY, *Valetudinarian*, *Valetudinarius*, *Inval'idus*, from *valetudo*, 'health.'—One of delicate health. One subject to frequent diseases. An *Inval'id*.

VALETUDO, Sanitas—*v. Adversa*, Disease—*v. Bona*, Sanitas—*v. Commoda*, Sanitas—*v. Secunda*, Sanitas.

VALGUS, see *Kylosis*

VALIGA, *Tinctura jalapii*.

VALITUDO, Sanitas.

VALLECULA, Valley.

VALLEY, *Vallecula*, (F.) *Grand Scissure Médiane du Cervelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions.

VALLUM. The eyebrow or supercilium. Also, a species of bandage.—Galen.

VALS, MINERAL WATERS OF. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron, and alum. They are employed in passive hemorrhages, leucorrhœa, &c.

VALVE, *Valvula*, *Diclis*, (F.) *Valvule*, from *valvæ*, 'folding-doors,' itself from *volvo*, 'I fold up.' A small door. Any membrane or duplicature of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be,—to retard or to modify the course of substances along canals, &c. See *mitral*, *sigmoid*, *tricuspid*, *ileo-cæcal valve*, &c.

VALVE OF FALLOPIUS, *Bauhin*, valve of—*v. Ileo-cæcal*, *Bauhin*, valve of—*v. Ileo-colic*, *Bauhin*, valve of—*v. of Tulpius*, *Bauhin*, valve of—*v. of Varolius*, *Bauhin*, valve of

VALVES, SEMILUNAR, Sigmoid valves.

VALVULA, Valve—*v. Cæci*, *Bauhin*, valve of—*v. Cerebelli*, *Valvula Viuessenii*—*v. Coli*, *Bauhin*, valve of—*v. Foraminis ovalis*, *Ovalis fossa*—*v. Guiffartiana*, see *Thebesius*, veins of—*v. Plei*, *Bauhin*, valve of—*v. Magna Cerebri*, *V. Viuessenii*.

VALVULA SEMILUNA'RIS, *Plica Semilunaris*, *Membran'ula semilunaris conjunct'va*, *Plica lunata*. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membra'na nictitans* vel *Palpebra tertia*.

VALVULA TARINI, *Velum medullare posterius*—*v. Thebesii*, see *Thebesius*, veins of—*v. Vaginé*, Hymen—*v. Venæ magnæ*, see *Thebesius*, valve of.

VALVULA VIUESSE'NI, *Velum Viuessenii*, *Valvula cerebelli* seu *Willisiana* seu *magna cer'ebri*, *Velum interje'ctum cerebelli*, *V. opoph'ysi vermiformi obtentum*, *Lacuna ventriculi quarti superior*, *Velum medulla'rè* seu *medulla'rè anti'cum seu ante'rius*, (F.) *Valvule de Viuessens*, *Voile médullaire supérieure*. A thin, medullary lamina,

over the under end of the *Aquæductus Sylvii* and upper part of the fourth ventricle. At the sides of the valves are two medullary tracts, called *Processus ad Testes*, *Colum'næ Vall'væ Viuessenii*, or *Oblique intercer'eb'al Com'missure*.

VALVULA WILLISIANA, *Valvula Viuessenii*.

VALVULE BICUSPIDALES, *Mitral valves*.

VALVULE CONVEXITES. Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be, to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyloferous vessels.

VALVULÆ CORDIS, *Ostiola cordis*—*v. Cordis mitrales*, *Mitral valves*—*v. Triglochines*, *Tricuspid valves*—*v. Trisulcæ*, *Tricuspid valves*.

VALVULE, Valve—*v. d'Eustache*, *Eustachian valve*—*v. de Pyloro*, see *Pylorus*—*v. de Viuessens*, *Valvula Viuessenii*.

VALVULES, *V. Épiscopales*, *Mitral valves*—*v. Sigmoides* ou *Semilunaires*, *Sigmoid valves*.

VANELLOE, *Vanilla*.

VANILLA, *Banil'ia*, *Banilas*, *Banilloës*, *Banilla*, *Benzo'ënil*, *Ar'acus aromati'cus*, (F.) *Vanille*, *Baume de Vanille*. The *Vanelloe*—*Sil'igna vanill'æ* seu *Banill'æ* seu *Vaniglia* seu *vanillia* seu *Ar'aci aromati'ci*—is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epidendrum Vanilla*, *Vanill'a aromati'ca* seu *Mexica'na*. Family, *Orchideæ*. *Sex. Syst.* *Gynandria Monandria*. *Vanelloes* have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

VANILLA AROMATICA, see *Vanilla*.

VAPEURS, *Hypochondriasis*, *Hysteria*.

VAPORARIUM, *Atmist'rium*, *Lacnic'ium*, *Py'ria*, *Pyriate'rium*, *Vapour bath*. A useful remedy in rheumatic and cutaneous affections; and wherever it is important to relax the cutaneous capillaries. In the *Russian Vapour Bath*, the vapour is produced by throwing water over hot stones. Its temperature is from 122° to 145°.

VAPORARIUM, *Hypocaustum*, see *Stove*.

VAPORATIO, *Evaporation*.

VAPORES UTERINI, *Hysteria*.

VAPOUR, Flatulence—*v. Bath*, *Vaporarium*.

VAPOURISH, *Hypochondriac*, *Hysterical*.

VAPOUROUS, *Windy*.

VAPOURS, *Hypochondriasis*, *Hysteria*.

VAPOURY, *Hypochondriacal*, *Hysterical*.

VARA, *Barre*.

VAREC, *Kelp*—*v. Vésiculeux*, *Fucus vesiculosus*.

VARENI, *Ambulo-flatulentus*, *Gout* (wandering.)

VARICE, *Varix*.

VARICELLA'A, (diminutive of *Variola*, Small-pox,) *Em'phlysis varicella*, *Ezanthéma varicella*, *Syn'ochus varicella*, *Chicken pox*, *Variola lymphat'ica*, *V. spu'ria*, *V. sylvestris*, *Variola nothæ*, *V. illegit'ima*, *Pseudo-variola*, *V. volat'ica*, *V. puella*, *Eoll'ion*, *Eoll'ium*, (F.) *Varicelle*, *Pêtié vérole volante*, *Vérolette*. A disease characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of pens. They appear in successive crops, are covered by a thin pellicle, and, about the third, fourth, or fifth day from their appearance, burst at the top, and congregate into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentiformes*, or *lenticular chicken pox*,

which are irregularly circular, and flattened on the top; the fluid being at first whitish, and afterwards straw-coloured. This is the common *chicken pox*. 2. The *Varicella coniformis*, *Conoidul Chicken Pox*, *Pemphigus varioloides*, *Variola lymphatica*, *Hydrach'nis*, *Swine Pox*, *Water Pox*, *Water Jags*, in which the vesicles are generally acuminated, and the fluid pellucid throughout; and, 3dly, the *Varicella globularis* or *Hives*, in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Variella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is generally required.

VARICELLA VARIOLIDEA, Varioloid.

VARICIFORMES PARASTATÆ. A name given, by some authors, to the ducts of the epididymis, because they seem knotty and varicose.

VARIOCOBLEPH'ARON, from *varix*, and *βλεφαρον*, 'eyelid.' A varicose tumour of the eyelid.

VARICOE'LE, from *varix*, and *κηλη*, 'a tumour;' *Oschence'le varico'sa*, *Her'nia varico'sa*, *Rameæ varico'sus*, *Spermatoc'le*, *Cirsoc'le*. A varicose dilatation of the veins of the serotum and spermatic cord. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the serotum, so as to render the remainder of the serotum a natural bandage. This plan has been found effectual.

VARICOMPHALUS, from *varix*, and *ομφαλος*, 'the umbilicus.' Varicose tumour of the umbilicus; cirsomphalus.

VARICOSE, *Varico'sus*, (F.) *Variquenz*. Affected with varix; or belonging to, or connected with, varix;—as a *varicose vein*, a *varicose ulcer*, that is, one kept up by *varices*.

VARICOSITAS CONJUNCTIVÆ, Cirsophthalmia.

VARICULA, *Varix parva*. A diminutive of *varix*. Also, a varicose swelling of the veins of the tunica conjunctiva.—M. A. Severinus.

VARIOLA, *Variolæ*, *V. vera*, *Varioli*, *Small-Pox*, *Eumpe'sis Variola*, *Euphlog'ia*, *Chazpè*, *Æolec'thyma*, *Pox* (N. of England), *Pestis variolosa*, *Febri variolosa*; from *varius*, 'spotted,' or from *vari*, 'pimples;' (F.) *Variole*, *Petit Vérole*, *Picote*. A disease, now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules, appearing from the third to the fifth day, and suppurating from the eighth to the tenth, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation,

but this *inoculated small-pox*—*Variola inserta*—communicates the disease as readily through the air as the *natural small-pox*, or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discrete* or *distinct*, and the *confluent*. 1. In VARIOLA DISCRE'TA, *Eumpe'sis variola discreta*, *Variola discreta benigna*, *Variolæ regulares seu discreta*, *Distinct Small-pox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout, and ceasing when the eruption is complete. 2. In VARIOLA CONFLUENS, *Eumpe'sis variola confluenta*, *Variolæ regulares confluentes*, *Vesic'ulæ Divæ Bar'baræ*, *Vésicales de Sainte-Barbe* or *Confluent Small-pox*, the pustules are confluent, or run together; fœcid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhœa, and, in adults, ptyalism, with swelling of the hands and feet, generally appear, towards the period of the *secondary fever*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous,—the unfavourable symptoms being—flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen, with cathartics, being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches, being, however, separated by intervals of unaffected skin; it constitutes the clustered, coherent, or corymbose variety—*Variola corymbosa*.

VARIOLA AMBOINENSIS, *Frambœsia*—v. *Corymbosa*, see *Variola*—v. *Inserta*, *Variola* (by inoculation)—v. *Lymphatica*, *Variella*—v. *Mitigata*, *Varioloid*.

VARIOLA sine VARIOLIS, *Variolons Fever*. These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

VARIOLA SPURIA, *Variella*—v. *Vaccina*, *Vaccina*—v. *Vaccinatorum*, *Varioloid*.

VARIOLÆ, *Variola*—v. *Equine*, see *Grease*—v. *Illegitima*, *Variella*—v. *Modificata*, *Varioloid*—v. *Nothæ*, *Variella*—v. *Pucellæ*, *Variella*—v. *Sylvestris*, *Variella*—v. *Tutoria*, *Vaccina*—v. *Vera*, *Variola*—v. *Volatiae*, *Variella*.

VARIOLATION, *Inoculation* (*Small-pox*.)

VARIOLE, *Variola*.

VARIOLI, *Variola*.

VARIOLOID, *Varioloids*, *Varioloides*, *Variola modificata*, *V. mitigata*, *V. vaccinatorum*, *Variell'la*, *Varioloides*, from *variola*, *small-pox*, and *ειδος*, 'form,'—resembling *small-pox*. This is, really, *small-pox*, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox*. That it is *small-pox* is proved by the fact, that matter, taken from a varioloid pustule, will communicate *small-pox* to one who has never had it naturally or by inoculation, or who has never been vaccinated. It is, almost always, a milder disease than *small-pox*; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

VARIOLOIS, Varioloid.

VARIQUEUX, Varicose.

VARIX, *Phlebeurys'ma*, *Phlebec'tasis*, *Her'nia scia Ectasia vena'rum*, *Angiectasia vena'sa*, *Id'ia*, *Cirrus*, *Cedma*, *Var'icose Vein*, (F.) *Varice*, is considered, by some, to come from the verb *variare*, 'to turn,' to twist,'—on account of the sinuosities of varicose veins. Dilatation of a vein. Varices are owing to local retardation of the venous circulation; and, in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger: but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein, or ligature. The second course is apt to be followed by phlebitis.

VAROLI, BRIDGE OF, Pons Varolii.

VARUS, Acne, Ionthus, see Kyllosis—v. Mentagra, Syosis.

VAS, Vessel, Penis—v. Deferens mulieris, Tuba Fallopiana—v. Urinarius, Ureter.

VASA ABSORBENTIA, Absorbent vessels—v. Capillaria, Capillary vessels.

VASA CHYLOPOIÉTICA URINIFERA. Blood-vessels, which, according to Lippi, convey drinks from the chyloferous vessels to the renal veins.

VASA EFFERENTIA, see Efferent—v. Exhalantia, Exhalant vessels—v. Hydragoga, Lymphatic vessels—v. Lactea, Chyliferous vessels, Lactiferous vessels—v. Meningea, Meningeal vessels—v. Sedalia, Hæmorrhoidal vessels—v. Lymphatica, Lymphatic vessels—v. Nutritia, Vasa vasorum—v. Recta, see Rete testis—v. Resorbentia, Absorbent vessels, Lymphatic vessels.

VASA VASORUM, *V. nutrit'ia*. Small vessels that supply larger. However minutely a vessel is traced, its parietes will be found supplied with blood for its nutrition by a smaller vessel.

VASA VORTICOSA, (F.) *Tourbillon vasculaire*. The contorted vessels which creep on the choroid coat of the eye; ciliary veins.

VASCOA AMPLEXICAULIS. A South African shrub, *Nat. Ord.* Leguminosæ, the roots of which taste like liquorice. They are used, in decoction, in catarrh and phthisis, and are a good substitute for liquorice.

VASCULAR, *Vascula'ris*, *Vasculo'sus*, *Ang'e'al*. from *vas*, 'a vessel.' That which belongs or relates to vessels;—arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Full of vessels. Bichat gave the name *Vascular system* to the blood-vessels, and of this he made two divisions. 1. The *Arterial system*, or *System of red blood*, (F.) *Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart and the aorta with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Venous system* or *Vascular system of black blood*, (F.) *Système vasculaire à sang noir*, carries the blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

VASCULAR LAYER, see Tache embryonnaire—v. Radicals, Radical vessels—v. Substance of the Kidney, see Kidney—v. System, intermediate, Capillary system—v. System, peripheral, Capillary system—v. Tumour, see Hæmorrhoids.

VASCULARITY. The state of being vascular, or largely supplied with vessels.

VASCULUM, Penis, Vessel.

VAS'CULUM ABER'RANS, *Appendix to the Epididymis*. A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

VASE À SAIGNER, Cup.

VASTUS. That which is *vast* or has a great extent.

VASTUS EXTERNUS and VASTUS INTERNUS are two considerable, fleshy masses, which form part of the Triceps cruris.

VASUM, Vessel.

VATERIA INDICA, see Copal.

VATICINIUM CHIROMANTICUM, Chiromancy.

VAULT, (old F. *Voulte*), 'a round or turn;' from *volvère*, *volutum*, 'to turn;' *Fornix*, *Cam'era*, (F.) *Voûte*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly,—as the *Vault of the cranium* or the upper part of the skull,—the *Palatine vault* or *roof of the mouth*, &c., &c.

VAUQUELINE, Strychnina.

VEAL TEA. This may be made in the same manner as beef tea, by using a pound of fillet of *veal*, free from fat and sliced, and a pint and a half of *boiling water*; and boiling for half an hour. It may also be made with the same quantity of the fleshy part of a knuckle of veal.

VECORDIA, Idiôtism.

VECTIS, Lever—v. Elevatorius, Elevator—v. Triploides, Elevator, triploid.

VEGETARIAN, see Vegetarianism.

VEGETARIANISM. Same etymon as Vegetation. A modern term, employed to designate the view, that man, for his full mental and corporeal development, ought to subsist on the direct productions of the vegetable kingdom, and totally abstain from flesh and blood. An embracer and practiser of this doctrine is called a *vegetarian*.

VÉGÉTATIF, Vegetative.

VEGETATION, *Vegetat'io*, 'growing like a plant,' from *vigeo*, 'I flourish.' A morbid part, which rises as an excrescence in syphilis, &c.—as the *Cauliflower excrescence*, &c. The term is also applied to the fleshy granulations or *Hyper-sarcomas*, which sometimes arise at the surfaces of wounds or ulcers.

VEG'ETATIVE, *Vegetat'ivus*, (F.) *Végétatif*, same etymon as the last. Having relation to growth or nutrition; hence, the *vegetative* or nutritive functions.

VEGETATIVE LAYER, see Tache embryonnaire.

VEGETATIVUS, Vegetative.

VEHICLE, *Vehic'ulum*, *Oche'ma*, *Constit'uens*, (F.) *Véhicule*, from *vehere*, 'to carry.' Any thing which serves to carry; thus air is the *vehicle* of sound; the arteries are the *vehicles* of the blood, &c. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

VÉHICULE, Vehicle.

VEILED PUFF, see Cavernous respiration.

VEIN, *Vena*, diminutive *ven'ula*, *Phlebs*, *Phleps*, (F.) *Veine*. The veins are vessels for the conveyance of black blood from every part of the body to the heart. They are found wherever there are arteries, and, altogether, form the *venous system*,

which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the vena cava and the coronary vein. 2. The *Abdominal venous system*, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Vena Porta*, or the *Portal System*. See *Porta*. The veins form two sets, one *deep-seated*, *Venæ satel'ites*, *V. concom'ites*, which accompany the arteries; the other *superficial or subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of two coats; the one, external, loose, extensible, and with parallel, longitudinal fibres—the *proper membrane*; the other, the *common or inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments are from the great sympathetic.

TABLE OF THE VEINS.

I. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

1. Subclavians.	1. Axillary which	Receives the	1. Posterior ulnar.
		1. Basilic, formed of the	2. Anterior ulnar.
		2. Cephalic, forming the	3. Median basilic.
		3. Circumflex veins.	1. Superficial radial.
		4. Inferior scapular.	2. Median cephalic.
		5. Long thoracic.	
		6. Superior thoracic.	
		7. Acromial veins.	
	2. External Jugular.	Receives the	1. Pterygoid.
		1. Internal maxillary, composed of the	2. Spheno-palatine.
		4. Infra-orbital.	3. Alveolar.
		5. Mental.	6. Inferior dental.
		6. Inferior dental.	7. Deep temporal.
		7. Deep temporal.	1. Middle temporal.
		2. Anterior auriculars.	2. Anterior auriculars.
		3. Transverse of the face.	3. Transverse of the face.
	3. Posterior Auricular.	The trunk then takes the name of <i>External Jugular</i> , and in its course along the neck, receives—	
	4. Cervical cutaneous.		
	5. Trachelo-scapular, &c.		
	Receives		
	1. Superior Cerebral Veins.		
	2. Veins of the Corpus Striatum.		
	3. Veins of the Choroid plexus.		
	4. Superior Cerebellar Veins.		
	5. Inferior Cerebellar Veins.		
	6. Lateral and inferior Cerebral Veins.		
	7. Ophthalmic Vein, composed of the	1. Lachrymal.	2. Central of the retina.
		3. Infra-orbital.	4. Ciliary.
		5. Ethmoidal.	6. Palpebral, and
		7. Nasal Veins.	7. Nasal Veins.
	3. Internal Jugular.	1. Palpebral, and	2. Superciliary Veins.
		2. Superciliary Veins.	3. Dorsals of the nose.
	8. Facial Vein, called <i>angular</i> , near the eye, receiving the	4. Superior } Coroua-	5. Inferior } ries of
		6. Several Buccal and	7. Masseteric Veins.
		8. Ranine.	9. Submental, and
		10. Inferior Palatine.	
	9. Lingual and Pharyngeal Veins.		
	10. Superior thyroid.		
	11. Occipital, and		
	12. Veins of the Diploë.		
	2. Right Internal Mammary Vein.		
	3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.		

4. Vena Azygos, which receives the	1. Right Bronchial.	2. Intercostal Veins.	3. Semi-azygos.
2. VEINS WHICH FORM THE INFERIOR VENA CAVA.			
1. Common Iliacs.	Receive the 1 External Iliacs, formed by the—	1. Femoral or Crural, which is a continuation of the	1. Several abdominal veins.
		2. Popliteal, commencing by 2. External Saphena and	
		3. Veins which accompany the fibular arteries, and receiving the—	3. External pudic veins.
	2. Internal Iliacs which receive the—	1. Vesical Veins, commencing with the	1. Dorsal veins of the penis of the male.
		2. Sacro-lateral Veins.	
	3. Middle Sacral Vein.		
	4. Lumbar Veins—four in number on each side, commencing by an—	1. Abdominal branch.	2. Dorsal branch.
	5. Spermatic Veins, commencing with the	1. Spermatic plexus in the male.	2. Ovarium, Fallopian tube, &c. in the female.
	6. Renal Veins.		
	7. Capsular and Adipose Veins.		
	8. Hepatic Veins.		
	9. Middle,	Hepatic Veins.	
	10. Left, and		
	11. Right		
	12. Inferior Diaphragmatic Veins, two in number.		

3. VEINS OF THE HEART.

1. Great right Coronary.
2. Small right Coronary.
3. Left Coronary Veins.

4. VEINS WHICH FORM THE VENA PORTÆ.

- |                  |              |   |
|------------------|--------------|---|
| 1. Splenic Vein. | Receives the | 1. Veins which correspond to the vasa brevia. |
|                  |              | 2. Right and left gastro-epiploic.            |
|                  |              | 3. Duodenal, and                              |
|                  |              | 4. Pancreatic veins.                          |

VEINE, Vein—v. *Cave*, Cava vena—v. *Céphalique*, Jugular vein, internal—v. *Céphalique du pouce*, Cephalic vein of the thumb—v. *Cubitale cutané*, Basilic vein—v. *Fessière*, Gluteal vein—v. *de Méline*, Draeneulus—v. *Porte*, Porta vena v. *Prélombo-thoracique*, Azygos, (vena)—v. *Préparate*, Cephalic vein—v. *Radiale cutané*, Cephalic vein—v. *Sans paire*, Azygos, vein—v. *Trachélo-sous-cutané*, Jugular vein, external.

VEINES ARTÉRIELLES, Arterial veins—v. *Ciliaires*, Ciliary veins—v. *Sous-clavières*, Subclavian veins—v. *Sus-hépatiques*, Hepatic veins.

VEINS, CORONARY, Cardiac veins—v. Intra-lobular, Hepatic veins—v. Supra-hepatic, Hepatic veins.

VEINSTONE, Phlebolite.

VELAMEN NATIVUM, Integument.

VELAMENTA BOMBYCINA, Villous membranes—v. Cerebralia, Meninges—v. Infantis, Membranes of the fœtus.

VELAMENTUM ABDOMINALE, Peritonæum—v. Corporis commune, Integument—v. Nativum, Integument.

VELAR, Erysimum.

VELLICATION, Tic.

VELOSYNTHESIS, Staphylorraphy.

VELUM, Velum pendulum palati—v. Apophysi vermiformi obtentum, Valvula Vieussenii—v. Interjectum cerebelli, Valvula Vieussenii—v. Medullare anticum, Valvula Vieussenii.

VELUM MEDULLA'RĒ INFERIUS, (F.) *Voile médullaire inférieur*. A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

VELUM MEDULLA'RĒ POSTERIORIS seu POSTICUS seu SEMILUNA'RĒ, *Valvula Tari'ni*. The small posterior valve of the cerebellum; a thin medullary plate, situate between the medulla oblongata and vermis inferior, in front of the nodulus.

VELUM PALATI, Velum pendulum palati—v. Palatinum, Velum pendulum palati.

VELUM-PEN'DULUM PALATI, 'Pendulous veil of the palate.' *Velum, Velum Palati'num, Velum Palati, Velum Pen'dulum, Velum Staphyli'num, Palatum pen'dulum, Pen'dulum pala'ti, Claustrum Palati, Soft Palate, Palatum Mollē, (F.) Septum Staphylin (Ch.), Voile du Palais*. A moveable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its anterior surface corresponds to the mouth; the posterior to the pharynx. Its superior edge is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle—the *uvula*. The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars*; the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glosso-staphylini, the pharyngo-staphylini and the palato-staphylinus. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glosso-pharyngeal nerve, likewise, sends it some filaments.

VELUM STAPHYLINUM, Velum pendulum palati—v. Vieussenii, Valvula Vieussenii.

VELVET LEAF, Pareira.

VENA. Vein. Penis—v. Alba renum, Ureter—v. Alba thoracis, Thoracic duct—v. Apoplectica, Jugular vein, internal—v. Arteriosa, Porta vena, Pulmonary artery—v. Capitis, Cephalic vein—v. Cava. Cava vena—v. Cubiti interior, Basilic vein—v. Demiazgyos, see Azygos—v. Falcis cerebri, Sinus longitudinal inferior—v. Hemiazgya, see Azygos—v. Lactea, Porta vena—v. Magna, Porta vena—v. Medina Arabum, Dracunculius—v. Medinensis, Dracuncululus—v. Ostiaria, Porta vena—v. Pari carens, Azygos, (vena)—v. Portalis, Porta vena—v. portarum, Porta vena—v. ad Portas, Porta vena—v. quæ ad Portas est, Porta vena—v. Ramalis, Porta vena—v. sine Pari, Azygos, (vena)—v. Stelechæa, Porta vena—v. Subalaris, Vena axillaris—v. Terminalis, Circulus venosus.

VENÆ APOPLECTICÆ, Jugular veins—v. Cavæ hepaticæ, Hepatic veins—v. Centrales, Intralobular veins—v. Concomites, see Vein—v. Galeni, Choroid, (veins)—v. Innominatæ, see Innominatum—v. Intralobulares, Intralobular veins—v. Lactææ, Chyliferous vessels—v. Lymphaticæ, Lymphatic vessels—v. Miantes, (arteries,) see Artery—v. Pulsatiles, (arteries,) see Artery—v. Satellites, see Vein—v. Soporales, Jugular veins—v. Sphagtitides, Jugular veins.

VENÆSECTIO, see Blood-letting—v. Revulsoria, see Blood-letting.

VENÆ VORTICO'SÆ. The veins which principally form the external or venous layer of the choroid coat of the eye; so called from their peculiar arrangement; from *vertex* seu *vortex*, 'a whirlpool.'

VENAL, Venous.

VENEFICIUM, Poisoning.

VENENATION, Poison, Poisoning, Venom.

VENENATUS, Venomous.

VENENOSE, Venomous.

VENENUM, Poison, Venom.

VENÆREAL, *Vene'reus, Aphrodisiacus, Vene'rean, (F.) Vénérien*, from *Venus*, 'the goddess of pleasure.' That which relates to the pleasures of love. In a more restricted sense, the word *venereal* is synonymous with *syphilitic*, and also with *syphilis*. Some authors have proposed that those diseases should be called *venereal* which are produced by excess in venery; and that *syphilitic* should be limited to those which are the result of impure connexion. It is, also, used in the same sense as aphrodisiac, — adapted to excite venereal desire.

VENÆREAL DESIRE, Libido—v. Disease, Syphilis.

VÉNÉRIEN, Venereal. This term, also, means one labouring under syphilis; as *Hôpital des vénériens*.

VENERIVAGUS, Libidinous.

VENERY. Same etymon. The pleasures of love. Sexual communication. Coition.

VENESECTIO, see Blood-letting.

VENIMEUX, Venomous.

VENLY, Venom.

VENOM, *Vene'num, Tox'icum, Venena'tion, (F.) Venin*. A poisonous fluid secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs, according to some, from *virus*, as the latter is always the result of a morbid process, which may be produced by the individuals who receive it, in their turn, and be transmitted to others.

VENOM, QUICKENING, Sperm—v. Vital, Sperm.

VEN'OMOUS, *Venena'tus, Ven'enoze, (F.) Venimeux*. An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c.; and, by some, to liquids in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia. *Virus* is more commonly used in this case.

VENOSITAS, Venosity—v. Sanguinis, Prædominium sanguinis venosi.

VENOSITY, *Venos'itas, Ve'nousness, Venous state, Venous cachex'ia, Melanœ'mia, Melano'sis universalis*, from *vena*, 'a vein.' A condition in which, it has been supposed, the blood is moved slowly; is more venous; and the venous blood itself in greater quantity. This state is said to be chiefly observed in hemorrhoids, gout, hypochondriasis, melancholia, &c.—Puchelt.

VENOUS, *Venal, Veno'sus*. Same etymon. Appertaining to a vein, or to the blood of the veins; as *venous* cachexia, *venous* pulse.

VENOUS CACHEXIA, Venosity—v. Hum, *Bruit de Diable*—v. State, Venosity—v. System, abdominal. Porta vena—v. System, see Vascular.

VENOUSNESS, Venosity.

VENT, Wind.

VENTER, Abdomen, Belly, Uterus. In law, venter designates the maternal parentage of children. Thus, if A were B's child by his first wife, he would be described in law as "by the first

center." "A died seized, leaving two infant daughters by different venters."

VENER IMUS, Abdomen, Hypogastrum, Neira—v. Inferius, Abdomen—v. Infimus, Abdomen—v. Magnus, Inguivies—v. Medius, Thorax—v. Parvus, Hypogastrum—v. Perpendens, Hysteroloxia anterior—v. Renum, Pelvis of the kidney—v. Supremus, Cavum cranii.

VENTEUX, Windy.

VENTILATION, *Ventilatio*, from *ventus*, 'wind.' The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and that carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities; and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air. It is, moreover, one of the most valuable additions to our stock of therapeutical agencies in many diseases.

Instruments used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

VENTOSITÉ, Flatulence.

VENTOSITY, Flatulence.

VENTOUSES SCARIFIÉES, Cupping with the scarificator.

VENTOUSES SÈCHES, Cupping, dry.

VENTRAL, Abdominal.

VENTRAL HERNIA, *Hernia ventralis*. Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles.

VENTRALE, Belt (Russian).

VENTRALĒ CUTANĒUM, 'Cutaneous apron.' (F.) *Talbier*. An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

VENTRE, Abdomen—v. *Inférieur*, Abdomen—v. *Resserré*, Constipation.

VENTRE INSPICIENDO DE, see *De ventre inspicendo*.

VENTRICLE, *Ventriculus*, diminutive of *venter*, 'belly.' Literally, a little belly. A name given, in anatomy, to various parts.

VENTRICLE OF ARANTIIUS. A small cavity, lined with gray substance, at the point of the calamus scriptorius.

VENTRICLES OF THE BRAIN, *Ventriculi seu Cavitates seu Sinus Cerebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the *lateral ventricles*, *middle ventricle*, *fourth ventricle* or *ventricle of the cerebellum*, and *fifth ventricle*. The *middle ventricle* or *third ventricle*, (F.) *Ventricule moyen du cerveau*, is situate in front of the pineal gland. It is bounded, *above*, by the tela choroidea and the fornix; *below*, by a portion of cerebral substance, which separates it from the base of the cranium; *laterally*, by the thalami nervorum opticozum; *anteriorly*, by a medullary cord, called the *anterior commissure*; and, *posteriorly*, by another medullary cord, called the *posterior commissure*. It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crura of the fornix. The *Lateral ventricles*, *Ventriculi laterales*, *V. magni*, *V. majores*, *V. priores*, *V. superiores*, *V. tricornes*, (F.) *Ventricules latéraux*, are two in number. They are large, and, owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above*, by the inferior surface of the corpus callosum; *anteriorly*, by the curved portion of the same body; *posteriorly*, by a considerable mass of cerebral

substance; and, *internally*, they are separated from each other by the septum of the ventricles, — a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata*, *Thalami optici*, and *Tavia semicircularis*: — their inferior portion contains the *corpus fimbriatum*, *cornu Ammonis*, &c. The *Fourth ventricle*, *Ventriculus cerebelli seu quartus*, *V. Arantii*, *Sinus rhomboidens*, (F.) *Quatrième ventricule*, is situate beneath the *aqueduct of Sylvius*, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth ventricle*, *Ventriculus septi pelli'cidi*, *Incisura septi*, (F.) *Cinquième ventricule*, is the small serous cavity between the laminae of the septum lucidum; called, also, *Fissure* or *Fossa of Sylvius* or *Sinus of the septum lucidum*.

VENTRICLES OF THE HEART, *Ventriculi cordis*, *Specus cordis*, (F.) *Ventricules du cœur*, are two in number. The *Right ventricle*, *Pulmonary ventricle*, *Ventriculus anterior*, *V. primus*, *V. pulmonalis*, (F.) *Ventricule droit ou pulmonaire*, is situate at the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columnæ carneæ* and *Cordæ tendineæ*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* arises. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The *Left ventricle*, *Ventriculus aorticens*, *V. posterior*, *V. secundus*, (F.) *Ventricule gauche ou aortique*, is situate at the posterior and left part of the heart. Its parietes are much thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columnæ carneæ* and *Cordæ tendineæ* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve*; and from it proceeds the largest blood-vessel of the body — the aorta.

VENTRICLES OF THE LARYNX, *Sac'culi laryngei*, *Sinuses of the larynx*, (F.) *Ventricules ou Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, *V. right*.

VENTRICULAR, *Ventricularis*. Same etymon as *Ventricle*. Relating to a ventricle.

VENTRICLE AORTIQUE, *Ventricle*, left — v. *Cinquième*, *Ventricle*, fifth — v. *Droit*, *Ventricle*, right — v. *Gauche*, *Ventricle*, left — v. *Moyen du Cerveau*, *Ventricle*, middle, of the brain — v. *Pulmonaire*, *Ventricle*, right — v. *Quatrième*, *Ventricle*, fourth.

VENTRICULES DU CERVEAU, *Ventricles of the brain* — v. *du Cœur*, *Ventricles of the heart* — v. *Latéraux*, *Ventricles*, lateral.

VENTRICULI CORDIS, *Ventricles of the heart* — v. *Dilatatio*, *Gastroectasis* — v. *Dissolutio*, *Gastro-malacia* — v. *Durae matris*, *Sinuses of the dura mater* — v. *Emollitio*, *Gastro-malacia* — v. *Exulceratio*, *Gastrectosis* — v. *Fluxus*, *Gastro-rhœa* — v. *Inflammatio*, *Gastritis* — v. *Laterales*, see *Ventricles*, lateral of the brain — v. *Magni*, *Ventricles*, lateral, of the brain — v. *Majores*, *Ventricles*, lateral — v. *Metamorphosis gelatiniformis*, *Gastro-malacia* — v. *Perforatio*, *Gastro-brosis* — v. *Priores*, *Ventricles*, lateral — v. *Pseudophlogosis resolutiva et colligativa*, *Gastro-malacia* — v. *Superiores*, *Ventricles*, lateral — v. *Tricornes*, *Ventricles*, lateral — v. *Ulceratio*, *Gastrectosis*.

VENTRICULUS, Stomach, Ventricle—v. Anterior, Ventricle, right—v. Aorticus, Ventricle, left—v. Arantii, see Ventricles of the brain.

VENTRICULUS CALLOSUS, 'Callous stomach.' The gizzard or third stomach of the gallinaceous bird. It consists of a double-bellied or *digastric* muscle; is lined by a firm cuticle, and forms a kind of pouch, depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturiatus* issues. In the interior of the gizzard there are numerous pebbles, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS CEREBELLI, see Ventricles of the brain—v. Posterior, Ventricle, left—v. Primus, Ventricle, right—v. Pulmonalis, Ventricle, right—v. Quartus, see Ventricles of the brain—v. Secundus, Ventricle, left—v. Septi Pellucidi, see Ventricles of the brain—v. Succenturiatus, Duodenum.

VENTRILOQUE, Engastrimythos.

VENTRILOQUISM, see Engastrimyth.

VENTRILOQUIST, Engastrimythos.

VENTRILOQUY, see Engastrimyth.

VENTROSITAS, Physconia.

VENTUS, Wind.

VEN'ULA, *Phlebion*, diminutive of *Vena*. See Vein. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENULÆ CENTRALES, Intralobular veins—v. Intralobulares, Intralobular veins.

VENUS, Clitoris, Coition, Cuprum—v. Crystals of, Cupri subacetat — v. *Crystante de*, Cupri subacetat.

VER *CUCURBITAIN*, *Tænia solium*—v. *Cutané*, *Dracunculus*—v. *Filaire*, *Dracunculus*—v. *de Guinée*, *Dracunculus*—v. *Luisant*, *Cicindela*—v. *de Médecine*, *Dracunculus*—v. *Solitaire*, *Bothrioccephalus latus*, *Tænia solium*.

VERATRIA, *Veratrina*.

VERATRINA, *Veratrina*, *Veratrine*. A vegetable alkali, found in the seeds of *Veratrum sabadilla*, *V. officinale*, *Helonia officinalis*, and *Asagraea officinalis*, which are known in commerce under the names *Cebadilla*, *Cevadilla*, and *Sabadilla*, and are imported from Mexico. They usually occur, in commerce, mixed with the fruit of the plant, are two or three lines long, of a black colour, and are shining, flat, shriveled, winged, and elastic seeds. *Veratrine* is solid, white, pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances, — *Sabadillin*, *Veratrin*, gum resin of the *sabadilla*, and black greasy matter. It is extremely poisonous, and but little used internally in medicine. Magendie has given it as an emetic and drastic in very small doses. It has been recommended to be applied in the way of friction, or endemically, (from gr. v to xx to  $\frac{3}{4}$  of lard or cerate,) in various neuralgic affections. The following is the formula for its preparation in the Pharmacopœia of the United States:—Take of *cevadilla*, ℥ij; alcohol, 2 gallons; sulphuric acid, solution of ammonia, purified animal charcoal, and magnesia, each a sufficient quantity. Boil the *cevadilla* in a gallon of the alcohol, in a retort with a receiver attached, for an hour, and pour off the liquor. To the residue add another gallon of the alcohol, together with the portion recently distilled; again boil for an hour, and pour off the liquor. Repeat the boiling a third time with the remaining alcohol, and with that distilled in the previous operation. Press the *cevadilla*, mix and strain the

liquors, and, by means of a water-bath, distil off the alcohol. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquors, and evaporate to the consistence of syrup. Add magnesia in slight excess, shake the mixture frequently, then express and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in alcohol, and strain after each digestion. Distil off the alcohol from the mixed liquor, boil the residue for fifteen minutes in water with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquor, evaporate with a moderate heat to the consistence of syrup, and then drop in as much solution of ammonia as may be necessary to precipitate the *veratria*. Lastly, separate and dry the precipitate. See *Colchicum autumnale*.

VERATRUM ALBUM, *Helleborus albus*, *Elleborum album*, *Elleborus albus*, *Cherbachem*, *White hellebore*, (F.) *Hellebore blanc*. *Ser. Syst.* Polygamia Monœcia. *Nat. Ord.* Melantheæ (Lindley.) The root or rhizoma of this common European plant is indebted to the *veratrine* for its properties. It is inodorous; has a bitterish, acrid, nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder*; but it operates with great violence. It forms, also, an itch ointment. See *Ung. Veratri*.

VERATRUM LUTEUM, *Chamelirium luteum*.

VERATRUM SABADILLA, *Sabadilla*, *Sabatilla*, *Camis Interfec'tor*, *Caus'ticum Americ'num*, *Cevadilla Hispano'rum*, *Sevadilla*, *Hor'deum caus'ticum*, (F.) *Cécadille*. The seeds of this plant have been used, mostly as anthelmintics. Dose, gr. ij to a child, four years old. It possesses the same general properties as the *veratrum album*.

VERATRUM VIRIDÈ, *American Hellebore*, *Swamp hellebore*, *Indian poke*, *Indian Uncas*, *Poke weed*, *Bear weed*, *Itch weed*, *Tickle weed*, *Earth gall*, *Devilbit*, *Wolfbane*, *Puppet root*, is indigenous in the swampy districts of almost every part of the United States. Its properties are like those of the genus.

VERBASCULUM, *Primula veris*.

VERBASCUM ALBUM, *V. thapsus*—v. *Alatum*, *V. thapsus*—v. *Collinum*, *V. thapsus*—v. *Crassifolium*, *V. thapsus*—v. *Elongatum*, *V. thapsus*—v. *Lychnitis*, *V. thapsus*—v. *Montanum*, *V. thapsus*.

VERBASCUM NIGRUM, *Black Mullein*, *Candle's regia*, *Thapsus barbatus*, *Tapsus barbatus*, *Candelæria*, *Lanæria*; and VERBASCUM THAPSUS, *V. thapsus des seu alatum seu collinum seu album seu crassifolium seu elongatum seu lychnitis seu montanum seu simplex*, *Phlogmus*, *Phlomis*, *Phlox*, *great broad-leaved Mullein*, *High Taper*, *Cow's Lungwort*, or *Yellow Mullein*, (F.) *Molene*, *Bonillon blanc*; *Familiy*, *Solanæ*; *Ser. Syst.* Pentandria Monogynia, — especially the latter, — have been used as emollient, applied externally in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage which they contain has been extracted by decoction or infusion, and administered in pectoral affections.

VERBASCUM SIMPLEX, *V. thapsus*—v. *Thapsoides*, *V. thapsus*—v. *Thapsus*, see *V. nigrum*.

VERBENA HASTATA, an American species, is more bitter than the European, and said to be emetic.

VERBENA OFFICINALIS, *Verbena*, *Dichromos*,

*Verbena'ca*, *Peristephium*, *Hierobotanè*, *Herba sacra*, *Vervain*, *Purvain*, (F.) *Verveine*. Family, Pyrenaeæ. Sect. Syst. Diandria Monogynia. A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of service in scrofula. It is not used.

*VERBENA URTICIFOLIA*, an indigenous species, has been used in poisoning from *Rhus Toxicodendron*.

*VERBENACA*, *Verbena officinalis*.

*VERBESINA ACMELLA*, *Spilanthus Ac-mella*.

*VERBUS*, Penis.

*VERCOQUIN*, *Phrenitis verminosæ*. A form of phrenitis, attributed to the presence of a worm in the brain!

*VERDET*, Cupri subacetæ.

*VERDIGRIS*, Cupri subacetæ.

*VERENDA*, Genital organs.

*VERETRUM*, Penis.

*VERGE*, Penis — v. *d'Or*, *Solidago virgaurea*.

*VERGERETTE DE PHILADELPHIE*, *Erigeron Philadelphicus*.

*VERGETUREN*, Vibices.

*VERJUICE*, *Omphacium*, (F.) *Verjus*, *Verdjus*.

A sour kind of grape. Also, an acid liquor, prepared from very sour grapes or crab-apples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See *Vitis vinifera*.

*VERJUN*, Verjuice.

*VERMES*, Worms — v. *Cerebri*, Choroid plexus.

*VERMICULAIRE BRULANTE*, Sedum.

*VERMICULAR*, Vermiform.

*VERMICULARIS*, Lumbicalis, Sedum.

*VERMICULI SPERMATICI*, Spermatozoa.

*VERMICULUM*, *Vermiculum*. An elixir; a tincture. — Ruland and Johnson.

*VERMICULUS CAPILLARIS*, *Dracunculus*.

*VERMIFORM*, *Vermicular*, *Vermicularis*, *Vermiformis*, from *vermis*, 'a worm,' and *forma*, 'form.' That which resembles a worm.

*VERMIFORM PROCESSES*, *Processus Vermiformes*, *Protuberantia vermiformes*, *Monticuli cerebelli*, *Apertices vermiformes*, *Vermis*, Worm, (F.) *Éminences vermiformes du cervelet*, are two medullary projections, at the surface of the cerebellum. The superior vermiform process, *Vermis superior cerebelli*, is an elongated projection, at the anterior and middle part of the superior surface of the cerebellum; — and the inferior vermiform process, *Vermis inferior cerebelli*, *Pyramid of Malacarne*, is a somewhat large projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions — the *pyramid*, the *uvula*, and the *nodulum*. The anterior portion of the superior vermiform process is elevated, and termed *Monticulus*.

*VERMIFUGE*, Anthelmintic.

*VERMIFUGE*, *MATHIEU'S*. This consisted of two distinct eluctaries; the one for killing, the other for expelling tape-worm. The former is made of an ounce of *tin filings*, and six drachms of *ferri root*.

*VERMIFUGUS*, Anthelmintic.

*VERMILION*, *Hydrargyri sulphuretum rubrum*.

*VERMILLON DE PROVENCE*, *Antimonii sulphuretum rubrum*.

*VERMINATIO*, Helminthiasis.

*VERMINATION*, CUTANEOUS, *Malis*.

*VERMINEUX*, Verminous.

*VERMINOUS*, *Verminosus*, (F.) *Vermineux*. That which is caused by worms; as a *verminous affection*.

*VERMIS*, Vermiform processes — v. *Bombycinus*, *Cornu ammonis* — v. *Cerebelli*, Vermiform process — v. *Cerebri*, Fever, Hungary — v. *Cucurbitinus*, *Tania solium* — v. *Digitæ*, *Paronychia*.

*VERMITIO*, Helminthiasis.

*VERNIX CASEOSA*, 'cheesy varnish.' The fatty varnish, or deposit, often found on the fetus, which is secreted by the sebaceous follicles of the skin.

*VERNIX SICCA*, *Sandaracæ*.

*VERNONIA ANTHELMINTICA*, *Ascaricida anthelmintica*, *Calagirah*, *Calageri*. A plant which is indigenous in India. Family, Compositæ. Sect. Syst. Syngenesia Polygamia superflua. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic, in cases of ascariæ and lumbrici in children.

*VERNONIA NOVEBORACENSIS*, *Iron weed*, *Flat top*; an indigenous plant; whose purple flowers appear in August and September, is reported to possess emathitic properties.

*VÉROLE*, Syphilis — v. *Petite*, *Variola* — v. *Petite volante*, *Varicella*.

*VÉROLETTE*, *Varicella*.

*VERONICA*, *Veronica officinalis* seu *Tournefortii*, *Veronica mas*, *Thea Germanica*, *Betonica Pauli*, *Chama'drys*, *Male Veronica*, *Fluellin*, *Officinal Speedwell*, (F.) *Véronique*, *Thé d'Europe*. Family, *Rhinanthodeæ*. Sect. Syst. *Diandria Monogynia*. This plant was once used as a pectoral.

*VERONICA AQUATICA*, *V. beccabunga*.

*VERONICA BECCABUNGA*, *Beccabunga*, *Anagallis aquatica*, *Laver Germanica*, *Veronica aquatica*, *Cepæa*, *Water Pimpernel*, *Brooklime*, *Brooklime Speedwell*, *Water Speedwell*, *Neck-weed*, *Water Purslain*, (F.) *Véronique cressonée*. This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous; and has been long banished from practice.

*VERONICA MAS*, *Veronica* — v. *Officinalis*, *Veronica*.

*VERONICA PEREGRINA*, *Neckweed*, *Purslain*, *Speedwell*; indigenous; flowering from April to June, is given internally in scrofulosis, and is applied as a wash to scrofulous tumours.

*VERONICA PURPUREA*, *Betonica officinalis* — v. *Tournefortii*, *Veronica* — v. *Virginica*, *Leptandra Virginica*.

*VÉRONIQUE*, *Veronica* — v. *Cressonée*, *Veronica beccabunga*.

*VERPA*, Penis.

*VERRE*, Vitrum — v. *d'Antimoine*, *Antimonii vitrum*.

*VERRUCA*, diminutive *Verrucula*, *Ephy'ma verruca*, *Phymatosis verrucosa*, a *Wart*, (F.) *Verrucæ*. A small, hard, mamillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semi-transparent, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

*VERRUCA CARNOSA*, *Condyloma* — v. *Formicaria*, *Formica* — v. *Minor*, *Thymion* — v. *Pulpebrarum*, see *Hydatid* — v. *Pensilis*, *Aerochordon* — v. *Rhazoiden*, *Thymion*.

*VERRUCARIA*, *Calendula officinalis*, *Heliotropium Europæum*.

*VERRUCOSE*, *Warty*.

*VERRUCULUS*, *Warty*.

*VERRUCULA*, *Verruca*.

*VERRUE*, *Verruca*.

*VERS*, Worms.

VERSE-CHARMS, see Charm.

VERSION, Turning.

VERTE-DE-GRIS, Cupri subacetates.

VERTEBRA DENTATA, Axis — v. Dorsi Prima, Lophia — v. Lumborum Prima, Asphaltites — v. Magna, Sacrum.

VERTEBRÆ, *Spondyli*, (F.) *Vertèbres*; from *verte*, 'to turn.' This name has been given to the bones, which by their union form the vertebral or spinal column. The vertebræ are short, thick, very angular bones; twenty-four in number, and situate one above another. The *body* — *centrum*, of Owen — of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibro-cartilage, with the contiguous vertebræ. The *Processes*, (F.) *Masses apophysaires*, of each vertebra are: — 1. The *spinous process*, situate behind, and in the median line. 2. The two *transverse processes*, standing off from each side. 3. The *four articular or oblique processes* — *zygapophyses*, of Owen — two *superior*, and two *inferior* — which serve to unite the vertebræ with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison*, through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of ring of the lateral and posterior parts of the vertebra; and the foramen, within this, — that is, between the body and processes, — concurs in forming the vertebral canal. The vertebræ have particular characters, according to the regions they occupy. They are divided into seven *cervical*, twelve *dorsal*, and five *lumbar*. The first cervical is called *atlas*; the second, *axis* or *vertebra dentata*; and the seventh, *vertebra prominens*. The vertebræ are articulated with each other. Those of the back are joined, moreover, to the ribs. The first or atlas is articulated with the occipital bone; and the last lumbar vertebra with the sacrum. The cervical vertebræ are developed by nine points of ossification; the dorsal and lumbar by eight.

VERTEBRAL, *Vertebra'lis*. That which relates or belongs to the vertebræ.

VERTEBRAL ARTERY, *Posterior cerebral artery*, (Ch.) is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertebral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Basillary artery*. Besides the branches sent to the neck, the vertebral artery gives off the *anterior* and *posterior spinal arteries*, and the *inferior cerebellous*, in the cavity of the cranium.

VERTEBRAL COLUMN, *Rachis*, *Rhachis*, *Notos*, *Aenes'tis*; the *Spine*; the *back* bone, *Car'na*, *C. hom'inis*, *Spina dorsi* seu *vertebra'lis*, *Columna spinal'is*, *C. vertebra'lis*, *C. dorsi*, *Spina Dorsum*, *Tergum*, *Comp'ges Vertebra'rum*, *Acan'tha*, *Sacra fistula*, *H'era Syriac*, (F.) *Colonne vertebrale*, *Épine du dos*, *Échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid and hollowed by a canal called *vertebral*, which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral

column is formed by the superposition of the vertebræ. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also, in the dorsal region, a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *anterior* or *prespinal* surface; a *posterior* or *spinal*; two *lateral*; a *base*; and an *apex* or top. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trachelian*; in the back, *predorsal*; and in the loins, *prelumbur*. The dorsal surface has, at its middle, the spinous processes; and, at its sides, the *vertebral gutters*, (F.) *Gouttières vertèbrales*, formed by the succession of the *vertebral plates*, (F.) *Lames vertèbrales*, which, by their junction, constitute the spinous processes. These are filled by the sacro-spinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *vertebral notches*, (F.) *Échancrures vertèbrales*. These are called *vertebral foramina*, (F.) *Trous de conjugaison*, and give passage to the *vertebral nerves*. The base of the vertebral column is oblique, to unite with the sacrum; and forms with it an angle, called *sacro-vertebral angle* or *promontory*. The *apex* or top of the vertebral column is articulated with the occipital bone. Sometimes, the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Vertebral* or *Spinal Canal*, *Rachid'ian Canal*, *Solen*, *Canal'is medullæ Spinal'is*, *Specus pro medullæ Spinali seu vertebra'lis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *Theca vertebra'lis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

VERTEBRAL DISEASE, *Rachial'gia* (of some,) *Caries* of the *Vert'ebrae*, *Spondylarthroc'acè*, *Spondyloc'acè*, *Kypho'sis inflammato'ria*, *K. paralytica*, *Gibbos'itas cario'sa*, *Car'ies vertebra'rum*, *Spondylal'gia*, *Spondylopyo'sis*, *Tuberculo'sis Vertebra'rum*. The spinal column is liable to distortion, (see *Hump*), at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and, hence, it has been called, by the French, *Maladie de Pott*, (*Malum Pot'tii*, *Gibbus Pot'tii*, or *Pott's disease*.) It usually occurs in serofulous subjects, and the treatment consists in establishing a counter-irritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebræ. The sore must be suffered to remain open and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

VERTEBRAL LIGAMENTS, (F.) *Ligaments vertèbraux*, *Surtouts ligamenteux de la colonne ver-*

*vertebrale*, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipito-axoid ligament, and seated behind the bodies of the vertebrae, from the axis to the sacrum.

VERTEBRAL NERVE, Trisplanehine.

VERTEBRAL NERVES, *Spinal Nerves*, spring successively from the spinal marrow; from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *anterior*, from the *anterior* or *antero-lateral* column of the spinal marrow, and the other *posterior*, from the *posterior* column, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See *Nerves*.

VERTÈBRES, Vertebrae.

VERTEBRODYMIA, see *Somatodymia*.

VERTEBRO-ILIAC LIGAMENT, Ileo-lumbar ligament.

VERTEX, *Cor'yp'hē, Acro'r'i'a, Spon'dylus*. The top or highest part of the head. See *Sineiput*.

VERTEX CORDIS, Mucro Cordis—v. *Cubiti*, *Olecranon*—v. *Palpitans*, *Fontanella*.

VERTIBULUM, Trepan.

VERTICULA, Articulation.

VERTICULUM, Articulation.

VERTICULUS, Articulation.

VERTIGE, Vertigo.

VERTIG'INOUS, *Vertigino'sus*, (F.) *Vertiginous*. Relating or pertaining to vertigo. Giddy.

VERTIGO, from *vertere*, 'to turn'; *Dinos, Ilin'gos, Gid'diness, Diz'ziness, Dinus vert'igo, Hallucina'tio vertigo, Antal'gia vertigo, Circumgyra'tio, Swimming of the head*, (F.) *Vertige, Étourdissement*. A state in which it seems that all objects are turning round; or that the individual himself is performing a movement of gyration. Two varieties have been designated;—*simple vertigo*, where the objects are seen; and *scotodynia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain; and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEBRICOSSA, *Scotodynia*.

VERUGAS (S.), from *verruca*. A peculiar disease affecting certain localities of Peru, which manifests itself by sore-throat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of *Surea*: called *Agua de Veruyn*.—Tschudi.

VERUMONTANUM, *Gallinaginis caput*.

VERVAIN, *Verbena officinalis*.

VERVEINE, *Verbena officinalis*.

VESANIA, *Vesania*, 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term; under which they have included the different species of mental alienation, *lypochondriasis*, *somnambulism*, and even *hydrophobia*. See *Nosology*.

VESANIA MANIA, *Mania*.

VESANIE, *Insanity*.

VESICA BILIARIA, Gall-bladder—v. *Cordis*, see *Pericardium*—v. *Fellen*, Gall-bladder—v. *Intestinales*, *Vesicula umbilicalis*—v. *Prostatica*, see

*Ejaculatory Duets*—v. *Sacenta*, Stricture of the urinary bladder—v. *Urinaria*, Urinary bladder.

VESICÆ IRRITABILITAS, *Cysterethismus*—v. *Unguinosæ tendinum*, *Bursæ mucosæ*.

VESICAL, *Vesica'lis*, from *vesica*, 'the bladder.' That which belongs or relates to the bladder.

VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three: the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesico-prostatic* (Ch.), and proceeds to the *base-fund* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VESICAL GANGLIA, see *Spermatie Ganglion*—v. *Triangale*, see *Urinary Bladder*.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, Blister, *Epispastic*.

VESICARIUM, Ovarium.

VESICA'TION, *Vesica'tio*; same etymon, (F.) *Vesication*. The action of a vesicant. The formation of blisters.

VÉSICATOIRE, Blister—v. *Magistral*, *Magistral*.

VESICATORIUM, Blister.

VESICLE, *Vesicula*—v. *Allantoid*, *Allantois*—v. *Blastodermic*, see *Molecule*—v. *Cowpox*, see *Vaccination*.

VESICLE OF DEVELOPMENT, *V. of Evolution*. A vesicle or cyst concerned in histogeny.

VESICLE OF EVOLUTION, *V. of Development*—v. *Germinal*, see *Molecule*—v. *Purkinjean*, see *Molecule*—v. *Umbilical*, *Vesicula umbilicalis*.

VESICLES OF DE GRAAF, *Folliculi Graafiani*.

VESICO-VAG'INAL, *Vesico-vagina'lis*. Relating to the bladder and the vagina; as *vesico-vaginal fistula*.

VESIC'ULA, *Cystinx, Ves'icle*; diminutive of *vesica*, 'a bladder.' A small bladder or cyst.

VESICULA, *Ves'icle, Ecephly'sis, Cystinx*, in pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colourless, but often opaque and whitish or pearl-coloured. It is succeeded, either by a scurf, or by a laminated scab.

VESICULA ÆNIGMATOSA, *Vesicula umbilicalis*—v. *Alba*, *Vesicula umbilicalis*—v. *Bilis*, Gall-bladder—v. *Blastodermatica*, see *Molecule*—v. *Chyli*, *Receptaculum chyli*—v. *Erythroidea*, *Erythroïd vesicle*—v. *Fellis*, Gall-bladder—v. *Gangrenescens*, see *Anthrax*—v. *Germiativa*, see *Molecule*—v. *Omphalo-mesenterica*, *Vesicula umbilicalis*—v. *Ovalis*, *Vesicula umbilicalis*—v. *Proflifera*, see *Molecule*—v. *Prostatica*, see *Ejaculatory Duets*.

VESIC'ULA UMBILICA'LIS, *Umbilical Ves'icle*. *Vesicula alba seu omphalo-mesenter'ica seu anigmato'sa seu oval'is, Ves'ica intestinalis, Intestinal Vesicle, Vitelline Pouch*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situated between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them. The *vitelline ped'icle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow;—*Ductus omphalo-mesenter'icus seu vitello-intestina'lis seu vitella'rius*,

*vitelline Duct.* Its arteries are the omphalo-mesenteric. The *vitelline fluid*, contained in the vesicle, has been compared, from analogy, to the *vitellus* or yolk of birds; and, like it, is an oleaginous substance, and presumed to be inservient to the nutrition of the embryo.

VESICULÆ constitute the 6th order of Bateman's classification of *Cutaneous Diseases*.

VESICULÆ, see Villous membranes — v. Divæ Barbaræ, Variola confluens — v. Gingivarum, Aphthæ — v. Pulmonales, see Cellulæ — v. Rotundæ cervicis uteri, Nabothi glandulæ — v. Sanguinis, Globules of the blood — v. Seminales mulierum, Nabothi glandulæ — v. Spermaticæ, Vesiculæ seminales.

VESICULÆ SEMINALES, *V. Semina'ria* seu *spermat'icæ*, *Cap'sulæ semina'les*, *Conceptac'ula seminaria*, *Gonocyst'ides*, (F.) *Vesiculæ seminiales*, *Gardouches*, *Greniers*, are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with the sperm. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their *posterior extremity* or *fundus* terminates by a round cul-de-sac. Their *anterior extremity* or *neck* is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculæ exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

VESICULAR, *Vesicula'ris*. Of or belonging to a vesicle:—full of or containing small vesicles or cells. The cortical or gray matter of the brain is sometimes termed *vesicular*. See Cortex cerebri and Neurine.

VÉSICULE BILIAIRE, Gall-bladder — v. *du Fiel*, Gall-Bladder — v. *Germinative*, see Moleculæ — v. *Ovulifère*, see Folliculi Graafiani.

VÉSICULES DE GRAEF, Folliculi Graafiani — v. *de Sainte Barbe*, Variola confluens — v. *Séminales*, Vesiculæ seminales.

VESPA, Wasp.

VESSEL, *Vas*, *Vasum*, diminutive *Vasculum*, *Angel'on*, *Angos*, *Conceptaculum*, from (L.) *vas*, *vasculum*, (F.) *Vaisseau*. A canal, more or less elastic, formed by the superposition of membranes, and distinguished, according to its uses and general arrangement, into *Artery*, *Vein*, and *Lymphatic*. See, also, *Vascular*.

VESSELOUP, Lycoperdon.

VESSIE, Urinary bladder — v. *à Colonnes*, see Urinary bladder — v. *Col de la*, Collum vesicæ.

VESSIE NATATOIRE, Air-bladder.

VESTIBULAR NERVE, see Auditory Nerve.

VESTIBULE, *Vestibulum*, from *vestio*, 'to cover.' The porch or entrance to a house.

VESTIBULE, *Vestibulum*, *V. Vagi'næ*, *Prona'us*, *Atrium Vagi'næ*, *Amb'itus genita'lis mulie'bris*, is a smooth cavity between the perinæum and nymphæ in the female, which leads to two passages — to the urethra above, and to the vagina below.

VESTIBULE OF THE EAR, *Vestibulum*, *V. labyrin'thi*, (F.) *Vestibule*. A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals, and behind the cochlea. It is lined by a particular membrane, and contains the liquor of Cotunnus and branches of the auditory nerve. There is also another membrane, constituting the

*membranous vestibule*, but it is not an exact imitation of the osseous cavity. It is composed of two distinct sacs, which open into each other — the *sacculus vestibuli*, and the *sacculus*. There are three contiguous *cavities* in the vestibule; one of which, the *semi-oval*, is situate above; another, the *hemispherical*, below; and the third, or *incisiform*, which is the orifice of the aquæductus vestibuli, behind.

VESTIBULUM LABYRINTHI, Vestibule of the ear — v. *Vaginae*, Vestibule.

VESTIGE (F.), *Vestig'ium*, 'a vestige,' 'a trace.' A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it. The term is also applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestiges* of what they are in certain animals.

VESTIGIUM, Sole, *Vestige* — v. *Foraminis ovalis*, *Ovalis fossa* — v. *Pedis*, *Metatarsus*.

VESTITUS, *Esthe'ma*, *Esthe'sis*, *Clothing*, *Res vestia'ria*, *Dress*, *Vesture*, (F.) *Vêtement*, from *vestire*, *vestitum*, 'to clothe.' Any substance used for the purpose of covering nakedness, or preserving from atmospheric temperature by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded — the darkest hues transmitting the heat most readily through them. It has been found that the same rule applies to odours — the darker colours retaining a greater amount of odorous particles than the lighter. Hence the necessity of white walls, white bed-clothes, &c., in the wards of hospitals; for it is probable that the like law applies to contagious miasms.

VESTURE, Vestitus.

VETA, Puna.

VÊTEMENT, Vestitus.

VETERANA, Rubeola.

VETERINARIUS, see Hippia'ter and Veterinarius.

VETERINARY, *Veterina'rius*, (F.) *Vétérinaire*, from *veterinus*, 'that which bears burdens;' itself from *veter*, 'to carry.' That which appertains to beasts of burden: hence, *veterinary surgeon*, (see Farrier,) *veterinary college*, and *veterinary medicine*.

VETERINARY ANATOMY, see Anatomy.

VETERINARY ART, *Ars* seu *Medici'na veterina'ria*, *Zoö'axis*, *Zoia'trica*, *Theria'trica*, *Mulomedi'ci'na*, *Zoötherapi'a*, *Zoötherapeu'ticæ*, *Ars zoia'trica*, *Far'riery*. The art of treating the diseases, &c., of cattle.

VETERNOSITAS, Coma vigil.

VETERNUS, Coma vigil.

VETONICA CORDI, *Betonica officinalis*.

VETULA, Sacrum.

VEXILLA TUBARUM FALLOPII, see Tube, Fallopian.

VEXILLUM, *Drapeau*.

VIA, Way — v. *Curandi*, Ratio medendi — v. *Stomachi et ventris*, *Esophagus*.

VIABILITY, see Viable.

VIABLE, *Viabilis*, from *via*, 'way;' or from (F.) *vie*, 'life,' (Orfila.) A word, which may be introduced with great advantage from the French into our language. It is an epithet applied to a fœtus whose organs are properly formed, and so developed as to permit its continued existence. Every fœtus is not *viable*. Anencephali have lived ten or twelve days, yet they are not viable; a part or the whole of the brain being wanting.

The older the fœtus, the more viable is it. It is an ille prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fœtus. It may be laid down as a general rule, that no fœtus born before the end of the seventh month is viable.

VIE CHYLIFERÆ, Chyliferous vessels.

VIE CLANDES'TINE, *Clandestine Passages*. Supposititious secret ways or passages or 'royal roads,' to account for the rapid transmission of substances taken into the stomach to the kidneys or bladder.

VIE EXTRAORDINARIE LACTIS, Galactoplasia—v. Lacrymales, Lacrymal passages—v. Prima, Ways, digestive—v. Secundæ, Ways, second.

VIAL, Phiala.

VIBICES, *Mol'opes, Striæ*, (F.) *Vergetures*. Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

VIBRAMEN, Oscillation.

VIBRANS, Vibratory.

VIBRATILE, Vibratory.

VIBRATILITY, *Vibratilitas*, from *vibrare*, 'to oscillate.' Capability of being thrown into vibration.

VIBRATIO, Oscillation—v. Cardiacæ, Palpitation—v. Cordis, Palpitation.

VIBRATION, PECTORAL, see *Frenitus*—v. Tactile, see *Frenitus*—v. Tussive, see *Tussive*.

VIBRATIONS OF SOUND, see *Sound*.

VIBRATOR, Deferens vas.

VIBRATORY, *Vibrative, Vibrans*, (F.) *Vibratile*, from *vibrare*, 'to quiver.' An epithet applied to the pain that accompanies some neuralgia, which seems to the patient to vibrate among the nerves.

VIBRATORY MOTION, see *Cilia*.

VIBRATUS, Oscillation.

VIBRIO; from *vibrare*, 'to quiver.' A genus of infusory animalcules, of which different species are met with,—for example, *Vibrio prolifer* in almost all putrescent fluids containing protein, and in the pus of chaneres; in which last the *V. lineola* has likewise been found.

VIBRIS'SÆ, from *vibrare*, 'to quiver.' The hairs which grow at the entrance of the nostrils and of other outlets. In the feline tribe, the whiskers.

VIBURNUM CASSINOIDES, *Ilex Paraguisensis*.

VIBURNUM DENTATUM, *Arrow Wood, Mealy Tree, Tily* of the Indians. A high indigenous shrub, of the same family as *V. lentago*; the bark of which has been used by the Indians as a diuretic.

VIBURNUM LÆVIGATUM, *Ilex Paraguensis*.

VIBURNUM LENTA'GO, *Sweet Viburnum, Nanny-berry*. A handsome indigenous tree, of the honeysuckle family—*Caprifoliaceæ*—which flowers in May and June. It has been used as an antiperiodic.

VIBURNUM PRUNIFOLIUM, *Black Haw, Stoe-leaved Viburnum*. Indigenous: flowering in May. The leaves have been used as tea.

VIBURNUM, SLOW-LEAVED, *V. prunifolium*—v. Sweet, *V. lentago*.

VIC-LE-COMPTÉ, MINERAL WATERS OF. *Vic-le-Compte* is a small village in the department of Puy de Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

VICARIOUS, *Vicarius*, from *vicis*, 'change, place.' Taking the place of another:—as 'vica-

riour secretion,' *Secretio vicaria*; a secretion which takes place in one part instead of another.

VICAR'S BRAY, MINERAL WATERS OF. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blarnegone. The water is one of the strongest chalybeates known.

VICE, Cachosis.

VICHY, MINERAL WATERS OF. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposit carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c.

VICHY WATER, FACIT'IOUS, *Aqua Vicien'sis*, (F.) *Enu de Vichy*, is made of simple acidulous water, impregnated with twice its bulk of carbonic acid, ℥xxxss; subcarbonate of soda, gr. xxxij; sulphate of soda, gr. xvj; chloride of sodium, gr. iv; subcarbonate of magnesia, gr. ss; chloride of iron, gr. ʒ. Mix. Ph. P.

VICIA ERVILIA, Ervum.

VICIA FABÆ, *Faba, F. major seu vulgaris, Or'obus faba*. The Common Garden Bean, (F.) *Fève ou fève des marais*. Family, Leguminosæ. Ser. Syst. Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINITRACTUS, Erysipelas.

VICINITRAHA, Erysipelas.

VICTORIALIS FEMINEA, *Gladiolus vulgaris*—v. *Longa, Allium victoriale*—v. *Rotunda, Gladiolus vulgaris*.

VICTUS RATIO, Diet.

VIDANGES, Lochia.

VIDIAN CANAL, Pterygoid canal.

VIE, Life—v. *Durée de la*, see *Longevity*—v. *Moyenne*, see *Longevity*.

VIELLESSE, Senectus.

VIERGE, Virgin.

VIF ARGENT, Hydrargyrum.

VIGILANCE, Insomnia.

VIGILANTIA, Egregorsis.

VIGILATIO, Egregorsis.

VIGILIA, Egregorsis.

VIGILIE, Egregorsis—v. *Nimia, Coma vigil*.

VIGILIUM, Egregorsis.

VIGNE, *Vitis vinifera*—v. *Blanche, Bryonia alba*—v. *du Nord, Humulus lupulus*—v. *Vierge, Bryonia alba*.

VIGOR, Aene.

VILLA FRANCA, (CLIMATE OF.)—This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains; and is more effectually sheltered from the north and north-west winds than Nice, with the climate of which that of Villa Franca closely corresponds.

VILLI, see *Villosus membranes*.

VILLOUS, *Villosus*, from *villus*, 'a hair.'

VILLOUS MEMBRANES OF COATS, *Velamenta Bombyc'ina*, (F.) *Membranes villosæ, Membranes veloutées*, are such as are covered with soft papillæ or *Villi, Flocci, Flocculi, Vesicula, Cylindri, Tubi Membrana'cei*, constituted of blood-vessels,

nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chausser gives the name *simple villous membranes* to the serous membranes; and that of *complicated or follicular villous membranes* to the mucous membranes. On these membranes there are bodies endowed with *ciliary motion*.

VIN, Wine — *v. de Bordeaux*, Claret — *v. de Pontet*, see *Pontet* — *v. de Quinquina composé*, Vinum de kinâ kinâ compositum — *v. Sec*, Sack.

VINAIGRE, Acetum, see Aceticum acidum — *v. Scillitique*, Acetum scillæ — *v. de Bois*, Pyrogenous acid.

VINAIGRES MÉDICINAUX, Acetia.

VINCA MINOR, *Vinea peruviana*, *Clematis daphnoides major*, *Lesser periwinkle*, (F.) *Perveche*, *Violette des Sorciers*. It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

VINCETOXICUM, *Aselepias vincetoxicum*.

VINCTURA, Fascia.

VINCULA, Fascia.

VINCULUM, Bandage, Lien — *v. Caninum*, Frænum penis — *v. Linguae*, Frænum linguae — *v. Præputii*, Frænum penis — *v. Umbilicale*, Funiculus umbilicalis.

VINE, *Vitis vinifera* — *v. Grape*, *Vitis vinifera* — *v. Poison*, *Rhus radicans* — *v. Wild*, *Paraire*.

VINEGAR, AROMATIC SPIRIT OF, see Aceticum acidum — *v. of Cantharides*, Acetum cantharidis — *v. Common*, Acetum — *v. Distilled*, see Aceticum acidum — *v. Marseilles*, Acetum aromaticum — *v. of Meadow saffron*, Acetum colchici — *v. of Opium*, *Guttæ nigrae* — *v. Radical*, Aceticum acidum — *v. of Squills*, Acetum scillæ — *v. of the Four Thieves*, Acetum aromaticum — *v. Thieves*, Acetum aromaticum — *v. Whey*, see Acetum — *v. of Wood*, see Aceticum acidum.

VINETTIER, *Oxycantha Galeni*.

VINEUX, Vinous.

VIOLENTA, see Temulentia.

VIOLENTIA, Temulentia.

VINOSUS, Vinous.

VINOUS, *Vino'sns*, *Eno'des*, *Enoi'des*. Relating to wine. Having the character of, or resembling, wine. Made of wine.

VINUM, Wine, Sherry wine, (Ph. U. S. 1842,) see Wine.

VINUM ABSINTHITES, *Wine of Wormwood*. (*Fol. absinth. exsic.*, *absinth. Pontic.*,  $\text{ãã}$   $\text{ʒv}$ ), *vini albi Oiv*. Macerate for 24 hours, and strain. (Ph. P.) Stimulant, tonic, febrifuge, vermifuge.

VINUM ADUSTUM, Brandy — *v. Album*, Sherry wine, (Ph. U. S. 1851,) see Wine — *v. Album Hispanicum*, see Wine — *v. Album Montanum*, see Wine.

VINUM AL'OEË, *V. aloës Socotori'næ*, *Vinum aloëticum*, *V. ar'o'mo-aloëticum*, *Wine of Aloes*, *Tinctura h'era*, *Tinctura sacra*. (*Aloës in pulv.*  $\text{ʒj}$ , *cardam. cont.*, *Zingib. cont.*,  $\text{ãã}$   $\text{ʒj}$ ); *vini alb. Oj*. Macerate for 14 days, and filter. (Ph. L.) Purgative and stomachic, according to the dose. Dose,  $\text{ʒʒj}$  to  $\text{ʒʒij}$ .

VINUM AMARUM, *V. Gentianæ comp.* — *v. Amarum scilliticum*, &c., *V. diureticum amarum* — *v. Amarum cum spiritu vini*, *V. gentianæ compositum* — *v. Antimoniale*, *V. antimonii tartarizati* — *v. Antimoniatum Huxhami*, *V. antimonii tartarizati* — *v. Antimonii potassio-tartratis*, *V. antimonii tartarizati*.

VINUM ANTIMONII, *V. antimo'nii tartarizati*, *V. tartaratis antimonii*, *V. antimo'nii potassio-tartratis*, *Liquor tartari emetici*, *Solution of tartarized antimony*, *Essentia antimonii seu stibii*, *Antimonial wine*, *Vinum benedictum*, *Vinum antimoniatum Huxhami*, *V. antimoniale*, *Aqua benedicta Rulandi*, *Vinum emeticum*. (Ant. et

*Potass. tart. Oj*, *vini albi fʒx*. Dissolve the tartarized antimony in the wine. (Ph. U. S.) Each fluidounce contains two grains of the tartrate.

The ordinary Antimonial wine is made with glass of antimony  $\text{ʒj}$ , sherry Oiss.

Ward's Red Drop consists of a strong vinous solution of tartarized antimony.

VINUM ANTISCORBUTICUM, *Antiscorbutic wine*. (*Rad. armoraciae recent.*  $\text{ʒj}$ , *fol. cochlearia recent.*, *nasturtii agrot.*, *trifol. aquatic.*, *semin. sinap.*,  $\text{ãã}$   $\text{ʒss}$ , *ammonia muriat.*  $\text{ʒij}$ , *vin. albi Oij*. Macerate for 36 hours; filter, and add *tinctura cochlear.*  $\text{ʒss}$ . (Ph. P.) Stimulant and tonic. Dose,  $\text{fʒss}$  to  $\text{fʒij}$ .

VINUM AROMATICUM, *Aromatic wine*. (*Species aromatic.*  $\text{ʒiv}$ , *vin. rubr. Oij*. Macerate for 6 days and filter. (Ph. P.) Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

VINUM AROMO-ALOETICUM, *V. aloes* — *v. Benedictum*, *V. antimonii tartarizati*.

VINUM CAMPA'NUM, *V. Campana'cesum*. Champagne wine. A well-known sparkling wine of France.

VINUM CANARINUM, see Wine — *v. Chalybeatum*, *V. ferri* — *v. Cinchonæ compositum*, *V. de kinâ kinâ comp.*

VINUM COL'CHICI, *Wine of Colchicum*, *V. Colchici Rad'icis*, *Want's Eau d'Hisson*. (*Colchic. rad. bene contus.*  $\text{lbj}$ , *vini alb. Oij*. Macerate for 14 days, with occasional agitation, and then express strongly, and filter. (Ph. U. S.) It may also be prepared by displacement. Diuretic, sedative, and purgative. Chiefly used in gout. Dose,  $\text{gtt. 40}$  to  $\text{fʒj}$ .

Reynold's Specific for gout and rheumatism consisted of the fresh bulb of *Colchicum*  $\text{ʒviiij}$ , *Sherry wine*,  $\text{fʒxvj}$ . The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with *syrrup of poppies* and flavoured with *rum*. Reynolds is said to have killed himself by taking an over-dose of it.

VINUM COLCHICI RADICIS, *V. colchici*.

VINUM COLCHICI SEM'INIS, *Wine of Colchicum seed*. (*Colchic. sem. cont.*  $\text{ʒiv}$ ; *vini alb. Oij*. Macerate for 14 days, with occasional agitation, then express and filter. (Ph. U. S.) Dose,  $\text{fʒj}$  to  $\text{fʒij}$ .

VINUM CBEMATUM, Brandy.

VINUM DIURETICUM AMARUM, *Vinum amarum scilliticum compositum in Charitatis Nosocomio usurpatum*, *Bitter diuretic wine*. (*Cort. cinchon.*, *Winteran.*, *limon.*,  $\text{ãã}$   $\text{ʒij}$ , *rhus toxicodendr.*, *scilla*, *caecamin. angelica*,  $\text{ãã}$   $\text{ʒss}$ , *fol. absinth.*, *melissa*,  $\text{ãã}$   $\text{ʒj}$ , *baccæ junip.*, *macis*,  $\text{ãã}$   $\text{ʒss}$ , *vin. alb. Oviij*. Macerate and filter. (Ph. P.) Stimulant, tonic, and diuretic. Dose,  $\text{fʒss}$  to  $\text{fʒiss}$ .

VINUM EMETICUM, *V. antimonii tartarizati*.

VINUM ER'GOTE, *Wine of Ergot*. (*Ergotæ*,  $\text{cont.}$   $\text{ʒij}$ ; *vini alb. Oj*. Macerate for 14 days, with occasional agitation; then express, and filter. (Ph. U. S.) Dose,  $\text{℥xxx}$  to  $\text{fʒj}$  to produce the peculiar effects of ergot.

VINUM FERRATUM, *V. Ferri*.

VINUM FERRI, *V. chalybeatum*, *Steel wine*, *Wine of Iron*, *Vinum ferratum*, *V. Martiatum*, *V. Martis*, *Tinctura Martis vino'sa*, *Tinctura Martis cum vino*. (*Iron*,  $\text{ʒj}$ , *super-tartrate of Potass.*, in powder,  $\text{ʒvj}$ , *distilled water*, *Oij* or *q. s.*, *proof spirit*,  $\text{fʒxx}$ . Rub the iron and super-tartrate of potass together, and expose them to the air in a flat vessel, moistened with a fluidounce of water, for a fortnight; agitating every day with a spatula, and sprinkling them with water, to keep them moist. Then dry with a gentle heat, and mix with  $\text{ʒxxx}$  of *distilled water*. Filter the fluid and add the spirit. (Ph. L.) Tonic. Dose,  $\text{ʒʒj}$  to  $\text{ʒʒiv}$ .

It is sometimes made by adding two pints of

wine to two ounces of iron filings; macerating and filtering.

VINUM GENTIANÆ COMPOSITUM, *V. Amarum*, Compound wine of gentian, *Infusum amarum vinosum*, *Vinum amarum cum spiritu vini*, Wine bitter. (Rad. gentian. luteæ ʒss, cort. cinchon. offic. ʒj, cort. aurant. ʒij, canellæ alb. ʒj, alcohol. dilut. fʒiv, vini alb. Hispanic. Oijss. Ph. E.) Dose, fʒiv to fʒvj.

VINUM HIPPOCRATICUM, Claret—v. Hispanicum, Vinum, see Wine—v. Hordeaceum, Cerevisia—v. Hydatodes, see Hydatoid.

VINUM IPECACUANÆ, *Ipecacuan'ha wine*. (*Ipecacuan*. cont. ʒij, vini alb. Oij.) Macerate for 14 days, express, and filter. Emetic and diaphoretic. Dose, as an emetic, fʒiv to fʒx.

VINUM DE KINÂ KINÂ COMPOSITUM, *V. cincho'na compositum*, Compound bark wine, (F.) *Vin de quinquina composé*. (Cort. cinchon. pulv. ʒss, quassia, cort. Winteran., cort. aurant. sic., aâ ʒss, alcohol. (12° to 22° Baumé) Oj.) Macerate for 24 hours; and add vini albi Ovj. Macerate for four days, and filter. Ph. P.) Tonic, febrifuge, and stomachic. Dose, fʒss to fʒij.

VINUM MARTIATUM, *V. ferri*—v. Martis, *V. ferri*—v. Medicatum, see Claret.

VINUM MEDICINALE, *Medicated Wine*. Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicine employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures; but the old names were left unaltered. Sherry is the wine usually employed. The following are medicated wines.

VINUM MERM, *Aceratum*—v. Nicotianæ tabaci, *V. tabaci*—v. Opiatum fermentatione paratum, *Laudanum abbatiss Rousseau*.

VINUM OPII, *Wine of Opium*, *Vinum de opio compositum*, *Laudanum liquidum Sydenhami*, *Laudanum liquidum Hoffmanni*, *Tinctura Thebaïca*, *Ford's laudanum*. (Opii in pulv. ʒij; cinna. cont., caryophyll. cont. aâ ʒj; vini albi Oj.) Macerate for 14 days; express and filter.—Ph. U. S.) Narcotic. Dose, gtt. xv to fʒj.

VINUM DE OPIO COMPOSITUM, *V. opii*—v. Picatum, *Pissites*.

VINUM PORTUGALICUM, *V. rubrum*, (Ph. U. S. 1851.) Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States; but greatly used in England.

VINUM QUINÆ, *Wine of Quinia*. (Wine ʒij, sulphate of quinia gr. x. Mix.) Dose, fʒiiss or more; according as it is used as a stomachic, or to arrest ague. A *Vinum Cincho'niæ* may be made in the same way.

VINUM RHEI, *V. R. palmati*, *Rhubarb Wine*, *Tinctura Rhubarbari Vinosæ*, *Vinum Rhubarbari*, *Elixir Rhei dulcè*, *E. R. Compositum*. (Rhei cont. ʒij, canellæ cont. ʒj, alcohol. dilut. fʒij, vini albi, Oj.) Macerate for 14 days; express and filter.—Ph. U. S.) Laxative and stimulant. Dose, fʒiv to fʒiiss.

VINUM RHEI PALMATI, *V. Rhei*—v. Rhenanum, see Wine—v. Rhubarbari, *V. rhei palmati*—v. Rubrum, *V. Portugallicum*—v. Rubrum Portugallicum, see Wine.

VINUM TABACI, *Vinum Nicotianæ Tabaci*, *Tabac'oe Wine*. (Tabac. incis. ʒj, vini albi, Oj.) Macerate for 14 days; express and strain. Ph. U. S.) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not used. Dose, gtt. xx to xxxvj.

VINUM VERATRI, *V. V. albi*, *Wine of White Hell'lebere*. (*Veratri* cont. ʒij; Vini albi, Oj.)

Macerate for 14 days, express and filter.—Ph. U. S.) In cutaneous affections, and in gout. Dose, ten minims.

VINUM VERATRI ALBI, *V. Veratri*.

VIOL, *Stuprum*.

VIOLA, *Viola odora'ta seu mar'tia*, *Ion*, *Matrona'tis*, *Viola'ria*, the *Sweet Violet*, (F.) *Violette à bouquets*, *V. odorante*. The flowers of the sweet violet have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANINA, *V. sylves'tris*. The *Dog Violet*. The root of this plant is emetic and cathartic. Dose, ʒj.

VIOLA IPECACUANHA, see *Ipecacuanha*—v. Lutea, *Cheiranthus cheiri*—v. Martia, *Viola*—v. Odorata, *Viola*—v. Palustris, *Pinguicula vulgaris*.

VIOLA PEDA'TA, *Viola*, (Ph. U. S.) This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

VIOLA SYLVESTRIS, *V. Canina*.

VIOLA TRI'COLOR, *Heart's ease*, *Pansies*, *Jac'ea tricolor*, *Herba seu Flos Trinita'tis*, (F.) *Pensée*, *P. sawage*. The decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, *Viola*.

VIOLET, *DOG*, *Viola canina*—v. Bloom, *Solanum dulcamara*—v. Sweet, *Viola*.

VIOLETTE À BOUQUETS, *Viola*—v. *Odorante*, *Viola*—v. *des Sorciers*, *Viola minor*.

VIOLIER JAUNE, *Cheiranthus cheiri*.

VIORNA, *Clematis vitalba*.

VIPER, *EGYPTIAN*, *Aspis*—v. Grass, *Scorzonera*—v. Ten inch long, *Echidna ocellata*.

VIPERA, *Coluber berus*.

VIPERARIA, *Aristolochia serpentaria*, *Scorzonera*.

VIPERINA VIRGINIANA, *Aristolochia serpentaria*.

VIR, *Penis*—v. *Effeminatus*, *Gynæcaner*.

VIRAGO, see *Pogoniasis*.

VIRGA, *Penis*—v. *Cerea*, *Bougie*—v. *Cerebri*, *Pineal gland*.

VIRGILIA, *Cladrastis tinctoria*.

VIRGIN, *Virgo*, *Par'thenus*, *Expers nuptia'rum*, (F.) *Virge*, *Pucelle*. A female who has never had sexual intercourse. Applied, also, occasionally to the male so circumstanced.

VIRGINAL, *Virginalis*, from *virgo*, 'a virgin.' The external genital organs of the virgin.

VIRGINAL MEMBRANE, *Hymen*.

VIRGINIA, *MINERAL WATERS OF*. There are several celebrated mineral springs in Virginia, on the western side of the Blue Ridge. Two Thermal springs exist in Bath county. The *Warm Spring*, as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The *Hot Spring* is a few miles from the Warm. Its temperature is 107°. They are both slightly sulphureous. The *Sweet Springs* are at the eastern foot of the Allegheny, in Botetourt county; 42 miles from the Warm Springs. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The *White Sulphur*, as well as the *Red Sulphur*, and *Salt Sulphur Springs*, are also much celebrated. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. About 15 miles from Staunton are *Stribling's Springs*—a sulphuretted water; and near Warrenton, in Fauquier county, there is a sulphureous water, called *Lee's Springs*, which is much frequented. *Berkley* and *Capon Springs* are likewise celebrated.

VIRGINIA, *Hymen*.

VIRGINITY, *Virgin'itas*, *Parthenei'a*, *Integ'*

*ritas, Maid'enhood, Maid'enhead, (F.) Virginité, Pucelage.* The state of one who has never had carnal commerce.

**VIRGIN'S BOWER, COMMON,** *Clematis vitalba, Clematis Virginica*—*v. Bower*, upright, *Clematis recta*—*v. Sweet-scented, Clematis flammula*.

**VIRGIN'S MILK, Lac Vir'ginis, Lac Virginalé, (F.) Lait virginal.** A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, sub-acetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

**VIRGINITAS DEFLORATA,** Defloration.

**VIRGO,** Virgin—*v. Aurea, Solidago virgaurea*.

**VIRGULA,** Penis.

**VIRIDE ÆRIS,** Cupri subacetat — *v. Montanum, Cuprum*.

**VIRILE,** Penis.

**VIRILES'CENTE;** from *vir*, 'a man.' The state of the aged female in which she assumes certain of the characteristics of the male.—Mehliis.

**VIRILIA,** Pudibilia.

**VIRILITY,** Adult age.

**VIROSUS,** Virulent.

**VIRTUE,** Faculty.

**VIRTUS FORMATRIX,** Plastic force — *v. lastica, Plastic force*.

**VIRULENT, Virulentus, Viro'sus, from virus.** That which is of the nature of a virus or which is caused by a virus. Highly noxious.

**VIRUS,** from *vis*, 'force.' A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic, vaccine, and syphilitic viruses*. *Virus* differs from *venom* in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process; — *a morbid poison*.

**VIRUS, Ichor, Poison, Sanies** — *v. Vaccine, see Vaccina* — *v. Vitale, Sperm*.

**VIS, Force** — *v. Adhænsionis, Cohesion (force of)* — *v. Attractionis, Cohesion (force of)* — *v. Aucta, Sthenia* — *v. Cohænsionis, Cohesion (force of)* — *v. Conservatrix, V. medicatrix naturæ* — *v. Elastica, Elasticity* — *v. Essentialis, Plastic force*.

**VIS EXPUL'TRIX.** The organic force by which, it was supposed, the useless was removed from the body.

**VIS FORMATIVA,** Plastic force — *v. Generatrix, Potentia generandi* — *v. Imminuta, Asthenia* — *v. Insita, Irritability* — *v. Irritabilitatis, Irritability*.

**VIS MEDICA'TRIX NATU'RÆ, Vis conserva'trix, Autoocati'a, Antonom'ia, Autoocato'ria, Authy-gian'sis, Autotherapei'a, Physiat'ricæ, Physio-autoocati'a, Physiantocati'a.** A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

**VIS MOR'TUA.** Under this name Haller included the mechanical properties of membrane, — flexibility, extensibility, elasticity, &c. — which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

**VIS MUSCULARIS, Myodynastia** — *v. Nervorum,*

*Nervous power* — *v. Nervosa, Nervous power* — *v. Plastica, Plastic force* — *v. Reproductiva, Plastic force* — *v. Vitæ, Irritability*.

**VIS VITA'LIS, Vis seu Fac'ultas Zo'tica, (F.) Force vitale.** The *vital force* — *Biod* of Baron Von Reichenbach — which distinguishes living matter from the dead. Also, Irritability.

**VIS ZOTICA, Vis vitalis.**

**VISAGE,** Countenance.

**VISCAGO BEHEN, Cucubalus behen.**

**VISCERA,** Entrails.

**VISCERAL, Splanchnic.**

**VISCERALIS, Stomachal.**

**VISCERATION, Exenterismus.**

**VISCÈRES, Entrails.**

**VISCONIA, Phœsonia.**

**VISCUM ALBUM, Mis'tletoe, Ixos, Ix'ia, Dabach, (F.) Gui.** A parasitic plant, which grows on a number of trees. *Family, Caprifoliaceæ. Ser. Syst. Diccia Tetrandria.* That of the oak — *Viscum quercinum* — has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses; the wood or leaves being given in powder, in the dose of  $\mathfrak{ss}$  or  $\mathfrak{ʒi}$ . The berries, also called *Pommes hemorrhoidales*, from their supposed virtues, are drastic; and, when applied externally, are maturative.

**VISCUM CAPEN'SE.** A South African parasitic shrub, which grows on the stems of several species of *Rhus* and *Euclea*.

**VISCUM FLAVES'CENS, Yel'lowish Mis'tletoe,** indigenous, has been given in similar cases as the *Viscum album*.

**VISIO, Pupil, Vision.**

**VISION, Vis'io, Visus, from videre, visum, 'to see'; Opsi's, Omma, (F.) Vne.** The action of seeing. The *sight*. The sight is one of the five senses, and the eye is its organ. By it we distinguish colours, and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have proceeded; and, in order that no obscurity may arise from the reflections that might otherwise occur, the anterior of the eye is lined by a membrane — the choroid — which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely; so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

**VISION, BINOCULAR, see Binocular** — *v. Coloured, Chromopsia* — *v. Double, Diplopia* — *v. Single, see Binocular*.

**VISORIUM ORGANUM, Eye.**

**VISORIUS, Visual.**

**VIS'UAL, Visa'lis, Viso'rius.** Same etymon. That which concerns the sight or belongs to vision.

**VISUAL ANGLE** is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle that we judge, to a certain extent, of the dimensions of objects.

**VISUS**, Vision—v. *Acris*, *Oxydercia*—v. *Acrior*, *Nyctalopia*—v. *Coloratus*, *Chromopsia*—v. *Debilitas*, *Asthenopia*—v. *Decolor*, *Achromatopsia*—v. *Diuidiatus*, *Hemiopia*—v. *Diurnus*, *Hemeralopia*—v. *Duplicatus*, *Diplopia*—v. *Hebetudo*, *Amblyopia*—v. *Juvenum*, *Myopia*—v. *Lucidus*, *Photopsia*—v. *Museum*, see *Metamorphopsia*—v. *Nocturnus*, *Nyctalopia*—v. *Senilis*, *Presbytia*.

**VITA**, Life—v. *Propria*, *Irritability*.

**VITAL**, *Vitalis*, *Biotic*, *Bioticus*, (F.) *Vital*, from *vita*, 'life.' Relating or appertaining to life;—as

**VITAL DYNAMICS**, see *Dynamic*—v. *Force*, *Vitalis*.

**VITAL PRINCIPLE**, *Flammula* seu *Aura vitalis*, *Microcosmetor*, (F.) *Flamme vitale*, *Vital Flamme*. The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except in its connexion with organization.

**VITAL PROPERTIES**, see *Properties*, *vital*—v. *Statistics*, *Statistics*, *medical*.

**VITALBA**, *Clematis vitalba*.

**VITALITY**, *Vitalitas*, from *vita*, 'life.' The vital principle: also used in the sense of vital action or movement.

**VITALIZE**, To endow with life.

**VITALS**, *Vitalia*. Parts that are necessary for life—the heart, lungs, and nervous centres more especially.

**VITARO'BORANT**, **PALMER'S**. A farinaceous preparation, which appears to consist of a mixture of the red or Arabian lentil and wheat flour, the latter in considerable amount, sweetened with sugar. It bears considerable resemblance to *Revalenta*.

**VITELLARY**, *Vitelline*—v. *Membrane*, *Zona pellucida*.

**VITELLINE**, *Zona pellucida*.

**VITELLINE**, *Vitellinus*, *Vitellary*, from *vitellus*, 'the yolk of an egg.' Appertaining to or resembling the vitellus or yolk.

**VITELLINE DISC**, *Proligerous Disc*—v. *Fluid*, see *Vesicula umbilicalis*.

**VITELLINE PEDICLE** or **APOPHY'SIS**, is the pedicle which attaches the umbilical vesicle to the embryo. See *Vesicula umbilicalis*.

**VITELLINE POUCH**, *Vesicula umbilicalis*—v. *Vessels*, *Omphalo-mesenteric*.

**VITELLO-MESENTERIC**, *Omphalo-mesenteric*.

**VITELLUM OVI**, see *Ovum*.

**VITELLUS OVI**, see *Ovum*.

**VITEX**, *V. Agnus Castus* seu *verticillata*, *Agnus Castus*, (F.) *Gatilier*, *Petit Poivre*, *Poivre saucage*. *Family*, *Pyrenaceæ*. *Ser. Syst.* *Didynamia Angiospermia*. The *Chaste Tree*. The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as antaphrodisiacs.

**VITI SALTUS**, *Chorea*.

**VITIA PRIME CONFORMATIONIS**, see *Monster*.

**VITIATIO**, *Stuprum*.

**VITILIGINES**, *Ephelides*.

**VITILIGO**, *Lepra*—v. *Alphus*, *Lepra alphonides*—v. *Melas*, *Lepra nigricans*—v. *Nigra*, *Lepra nigricans*.

**VITIS ALBA SYLVESTRIS**, *Bryonia alba*—v. *Apyrena*, see *V. Corinthiaca*.

**VITIS CORINTHIACA**. *Family* of the *Vines*. *Ser. Syst.* *Pentandria Monogynia*. This plant affords the *Uva passa minor*, *Passæ Corinthiaca*, *Passula minor*, *Uva Corinthiaca*, *Corinthiaca*, *Currants*, (F.) *Raisins de Corinthe*; which

are the dried fruit of the *Vitis Corinthiaca* or *Vitis apyrena*; and are similar, in their properties, to the raisin.

**VITIS IDEEA MYRTILLUS**, *Vaccinium myrtillus*—v. *Idea Palustris*, *Vaccinium oxycoccos*—v. *Idea punctata*, *Vaccinium vitis idæa*—v. *Sativa*, *V. vinifera*.

**VITIS VINIFERA**, *V. sativæ*, *Am'pelos*, *A. (Euph'pros)*. The *Grape vine*, the *Vine*, (F.) *Vigne*. Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lo'ryma*, has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Verjuice*. The *Grape*, *Uva*, *Botrys*, *Strophylé*, *Rhoz*, (F.) *Raisin*, when ripe, is a wholesome delicious fruit; and, when dried, forms the *Uva passa major*, *Passula major*, *Uva passa solè sicca'ta*, *Zibebæ*, *Raisins*. These are inodorous; and to the taste, sub-acidulous, sweet, and mucilaginous. They are demulcent and nutritive.

**VITIUM**, *Disease*—v. *Cadueum*, *Epilepsy*.

**VITIUM CONFORMATIONIS**. A disease or fault of conformation.

**VITIUM DIVINUM**, *Epilepsy*—v. *Hereuleum*, *Epilepsy*—v. *Scrophulosum*, *Serofula*.

**VITRARIA**, *Parietaria*.

**VITREOUS**, *Hyaline*—v. *Humour*, *Corpus vitreum*—v. *Humour of the ear*, *Vitreine auditive*.

**VITREUS**, *Hyaline*.

**VITRINE AUDITIVE** (F.), from *vitrum*, 'glass'; *End'olymph*, *Liquor of Scarpa*, *Fluid of Scarpa*, *Vitreous Humour of the Ear*. The fluid contained in the *membranous labyrinth* of the ear, so called from its resemblance to the *vitreous humour* of the eye.

**VITRIOL**, *Ferri sulphas*—v. *Blue*, *Cupri sulphas*—v. *Ceruleum*, *Cupri sulphas*—v. *Green*, *Ferri sulphas*—v. *Roman*, *Cupri sulphas*—v. *White*, *Zinci sulphas*.

**VITRIOLUM ALBUM**, *Zinci sulphas*—v. *Ammoniacale*, *Ammoniac sulphas*—v. *Cupri*, *Cupri sulphas*—v. *Cyprium*, *Cupri sulphas*—v. *Ferri*, *Ferri sulphas*—v. *Goslariense*, *Zinci sulphas*—v. *Martis*, *Ferri sulphas*—v. *Romanum*, *Cupri sulphas*—v. *Veneris*, *Cupri sulphas*—v. *Viride*, *Ferri sulphas*—v. *Zinei*, *Zinci sulphas*.

**VITRUM**, *Hyalos*, *Glass*, *Brancia*, (F.) *Verre*, from *videre*, 'to see.' Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum, which swims on glass when first made, has been used in tooth-powders. It is called *Sandiver*, *Sel de verre*, *Glass Gall*, *Fel vitri*, &c.

**VITRUM ANTIMONII**, see *Antimonii vitrum*—v. *Hypoclepticum*, *Separatorium*—v. *Oculare*, see *Spectacles*—v. *Sublimatorium*, *Aludel*.

**VITTA**, *Bandelette*, *Caul*.

**VIVISECTIO**, *Vivisection*.

**VIVERRA CIVETTA**, see *Civetta*.

**VIVIPARITÉ**, see *Viviparous*.

**VIVIPAROUS**, from *vivus*, 'alive,' and *pario*, 'I bring forth.' An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous*. The condition may be termed *Viviparousness*, (F.) *Viviparité*. See *Generation*.

**VIVIPAROUSNESS**, see *Viviparous*.

**VIVISECTION**, *Vivisectio*, *Vivisection*, *Biotomia*, from *vivus*, 'alive,' and *secare*, *sectum*, 'to cut.' The act of opening or dissecting living animals. One who performs vivisections is a *vivisector*.

**VOCAL**, *Oral*—v. *Tube*, see *Tube*, *vocal*.

VOCALIS, Vowel.

VOCE DI PETTO, see Voice—*v. di Testa*, see Voice.

VOICE, *Vox, Audē, Phonē*, (F.) *Voix*, from *vocare*, 'to name, to call.' An appreciable sound produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function by which this is effected has been called *Phona'tion*. It is a function of animal life; and, in animals, is limited to the production of the *simple* or *instinctive voice*, as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated,—an evidence of his intellectual superiority.

VOICE, ARTIC'ULATED, *Speech, Loque'la, Glossa, Glotta, La'tia, Phrasis*, (F.) *Parole, Voix articulée*, is the voice as produced by the glottis, modified by the motions of the tongue, lip, and other parts of the vocal tube. Most physiologists agree in regarding the glottis, or the space between the thyro-arytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube*, or the space which the sound has to traverse after it is produced in the glottis, as a reed instrument, like the clarinet, the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c., are concerned, but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis alone, or in it aided by an obscure action of the parts above it.

The singing voice is not limited to the larynx; the pharynx would seem to be concerned also. The notes that are produced in the latter have been termed *supra-laryngeal*, or *notes of the second register*. They constitute the *pharyngeal voice, fussetto* or *fauvette* voice or *voce di testa*, (L.) The *laryngeal voice* or *voice of the first register*, is the *Voce di Petto*, (L.)

VOICE, BLEATING, Egophony—*v. Cavernous, Pectoriloquy*.

VOICE, CHOL'ERIC, *Vox Choleric'a*. The peculiar husky voice of those affected with cholera.

VOICE, CONVULSIVE, *Vox convulsi'va*, (F.) *Voix convulsive*. A neurosis of the voice, consisting in the production of discordant sounds—acute and grave—which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

VOICE, FALSETTO, see Voice—*v. Goat's, Egophony*—*v. Laryngeal, Laryngophony*, see Voice—*v. Pharyngeal*, see Voice—*v. Tracheal, Laryngophony*.

VOIE, Way.

VOIES DIGESTIVES, Ways, digestive—*v. Lachrymales*, Lachrymal passages—*v. Premières*, Ways, digestive—*v. Secondes*, Ways, second—*v. Urinaires*, Urinary passages.

VOILE DU PALAIS, Velum pendulum palati—*v. Médullaire inférieure*, Velum medullare inferius—*v. Médullaire supérieure*, Valvula Viuesenii.

VOIX, Voice—*v. Aigre*, see Acid—*v. Articulée*, Voice, articulated, Pectoriloquy—*v. Bourronnant*, see Resonance—*v. Bronchique*, Resonance—*v. Caverneuse*, Pectoriloquy—*v. Chérotante*, Egophony—*v. Égophonique*, Egophony—*v. de Polichinelle*, Egophony—*v. Sénile*, Egophony—*v. Tabaire*, see Resonance.

VOLA, Palm—*v. Man's*, Palm—*v. Pedis*, Sole.

VOLATICA, Lichen.

VOLATILIZA'TION, *Volatilisa'tio, Volatisa'-*

*tio*, from *volare*, 'to fly.' The operation of reducing volatilizable substances into gas or vapour.

VOLATISATIO, Volatilization.

VOLIT'ION, *Volit'io*, from *volo*, 'to will.' The act of willing. Hence:

VOLIT'IONAL, relating to volition. Thus the muscles may be moved by a *volitional* or by an *emotional* impulse.

VOLNUS, Wound.

VOLSELLA, Acanthobolos, Forceps, Madisterium—*v. Patini, Valet à Patin*.

VOLTAISM, Galvanism.

VOLTUS, Countenance, Face.

VOLUNTARY, *Hecus'ins, Volunta'rius*, from *voluntas*, 'will.' Relating to the will; as '*voluntary* muscles;' muscles which act in obedience to the will.

VOLUNTAS, *Volent'ia, Arbit'rium, Cupid'itas, Boule'sis, Bule'sis, Thele'ma*, (F.) *Volonté*. Will or desire.

VOLUNTAS SEU CUPID'ITAS DESEDEND'I, *Lubi'do insteti'ni*. The desire to go to stool.

VOLVULUS, Ileus—*v. Intestinorum, Intussusceptio*.

VOMENDI CONAMEN INANE, Vomiturition.

VOMER, 'a ploughshare;' *Os vomeris, Aratrum, Os maxillæ superioris undec'imum*. One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification. Also, the penis.

VOM'ICA, *Pyocyst'is*, from *vomere*, 'to vomit,' 'to cast up.' (F.) *Vomique, Crachement de pus*.

A term used by some authors for any encysted collection of purulent matter in the interior of a viscus. The acceptance is commonly, however, restricted to purulent collections in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomicæ are distinguished; the one caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

VOMICINE, Brucia.

VOMIQUE, Vomica.

VOMIQUEER, *Strychnos nux vomica*.

VOMISSEMENT, Vomiting—*v. de Sang, Hæmatemesis*.

VOMIT, Emetic—*v. Black, Fever, yellow, Melæna*.

VOMIT, DRY, OF MARRIOTT. A once celebrated emetic, called 'dry,' from its having been given without solution. It consisted of equal portions of tartrate of antimony and potassa, and sulphate of copper.

VOMITIF, Emetic.

VOMITINE, Emetine.

VOMITING, *Vomit'us, Vomit'io, Vomit'im, Vom'itum, Ecomit'io, Anatropē, Em'esis vomit'io, Palmus vom'itus, Ægrit'io ventric'uli, Spewing, Puking, Sickness of the Stomach*, (F.) *Vomissement*, from *vomere*, 'to cast up.' The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach, calling, by reflex action, on the appropriate muscles to expel the contents of the viscus. It is not accomplished solely by the contraction of the stomach, as was for a long time believed. That organ, indeed, assists in the

process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms, or blisters to the epigastric region, &c.

VOMITING AT PLEASURE, Regurgitation — v. of Blood, Hæmatemesis — v. Stercoraceous, Copremesis.

VOMITIO, Vomiting — v. Sanguinis, Hæmatemesis.

VOMITIUM, Vomiting.

VOMITO NEGRO, Fever, yellow — v. Prieto, Fever, yellow.

VOMITORIUM, Emetic.

VOMITORY, Emetic.

VOMITUM, Vomiting.

VOMITURIT'ION, *Vomituri'tio, Emes'ia, Dysemes'ia, Subver'sio stom'achi*. Same etymon as Vomiting. Ineffectual efforts to vomit; *Vomen'di coua'men ina'nè, Retching, Reaching, Heav'ing*. Some authors mean, by this term, a vomiting of but little matter, or that which is effected almost without effort. The first acceptance is the most general.

VOMITUS, Vomiting — v. Cruentus, Hæmatemesis — v. Fæculentus, Copremesis — v. Marinus, Nausea marina — v. Navigantium, Nausea marina — v. Niger, Fever, yellow — v. Pituitosus, Blennemesis — v. Profusus, Hyperemesis — v. Purulentus, Pyemesis — v. Sanguinis, Hæmatemesis — v. Stercoris, Copremesis.

VOORARA, Curare.

VOUACAPUA AMERICANA, Geoffræa inermis.

VOÛTE, Vault — v. *Médullaire*, Corpus callosum — v. *à Trois Piliers*, Fornix.

VOWEL, *Vocal'is*, from Latin *vox*, 'the voice,' and *voco*, 'to call.' (F.) *Voyelle*. Physiologically, a continuous breath or sound, produced in the glottis; but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a, e, i, o, u, æ, and y* are vowels.

VOX, Voice — v. Choleric, Voice, choleric — v. Clangosa, Oxyphonia — v. Convulsiva, *Voice Convulsiva* — v. Nasalis, Rhinophonia — v. Rauca, Raucedo, Raucous voice — v. Raucisona, Raucous voice.

VO YELLE, Vowel.

VUE, Vision — v. *Courte*, Myopia — v. *Diurne*, Hemeralopia — v. *Faible*, Amblyopia — v. *Longue*, Presbytia — v. *Louche*, Strabismus — v. *Nocturne*, Nyctalopia.

VULGA, Vulva.

VULNÉRAIRE, Vulnerary — v. *Suisse*, see Falltrank.

VULNERARIUS, Traumatic.

VULNERARY, *Vulnera'rius, Traumat'icus, Traumatic*, from *vulnus, vulneris*, 'a wound.' (F.) *Vulnéraire*. A name applied by the ancients to

medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

VULNERATIO NERVI, Neurotrosis.

VULNUS, Wound — v. *Laceratum*, see Laceration — v. *Selopetarium*, Wound, gun-shot — v. *Simplex*, Cut.

VULNUSCULUM, Wound.

VULPIS MORBUS, Alopecia.

VULTUEUX (F.). *Vultuo'sus*. Corvisart has used the expression, *Face vultueuse, Face des vultuo'sa*, for the face, when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée*.

VULTUS, Countenance, Face — v. *Tetricus* et *Mæstus*, Seythropasmus.

VULVA, Uterus, see Vulva.

VULVA, from *vulva*, 'a door.' *Hortus, Cunnus, Pudendum mulie'bre, Sinus pudoris, Choiros, Arum, Bucca, Bulga, Cadar'eus, Custos, Femen, An'tulus, Femur sannam, Follic'ulus, Fundus, Gre'mium, Hia'tus, Lan'viam, Navis, Oppid'ulum, Specus, Vulga, Cymba, Saltus, Clitor'ium, Ost'ium, Sulcus, Amphicæus'tis, Concha, Porcus, Porta, Interfemineum, Mulie'bria, Fossa magna mulie'bris, Episc'ion, Es'chara, Hor'tulus cupid'inis, Boubal'ios, Byssos, Cava, Caver'na, Delphys, Delta, Fovea, Gynæce'um, the Female pudend'm, the Female organs of generation, the Female parts, Loci mulie'bres, (F.) Vulve. A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna*. Some anatomists mean, by this term, the whole of the external genital organs of the female: — mons veneris; labia majora, and the cleft or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the caruncle myrtiformes, fossa navicularis and fourchette.*

VULVA, *Fora'men commu'nè ante'rius, Iter ad infundib'ulum, Iter seu Ad'itus ad tertium ventric'ulum, Rima ad infundib'ulum, Apertu'ra anterior ventric'uli tertii cerebri*. An opening situate at the junction of the optic thalami, in the third ventricle of the brain, and immediately beneath the anterior crus of the fornix.

VULVAIRE, Chenopodium vulvaria.

VULVAR, *Vulva'ris*, from *vulva*. That which relates to the vulva. Chaussier gives this name to the external pudic arteries, because they are distributed to the vulva.

VULVARIA, Chenopodium vulvaria.

VULVE, Vulva.

VULVITIS, a hybrid word, from *vulva*, and *itis*, denoting inflammation. Inflammation of the vulva.

VULVO-UTERINE CANAL, Vagina.

## W.

WAD, Graphites.

WAHOO, see Eouonymus.

WAISTCOAT, STRAIT, *Indu'cula*, (F.) *Camisole*, *Gilet de force*. A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

WAKE-ROBIN, *Arum maculatum*, *Trillium latifolium*.

WALE, Wheal.

WALKING, *Gressus*, *Inces'sus*, *Deambula'tio*, *Ambula'tio*, *Bad'isis*, (F.) *La marche*. The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thigh-bones, the extent of which is regulated by volition, under the guidance of vision.

WALLA'CHIA, MINERAL WATERS OF. There are many excellent sulphureous springs in this country, especially those at Bobotsch, Finceschti, Sibitchiudi Suz, Bräsa, Otschin, Serbo-neschte, Kimpalungi, Kosia, and Oloneschti. Chalybeate and saline springs have, also, been found at Sibitschiudi Suz. — Siller.

WALLFLOWER, *Cheiranthus cheiri*.

WALLRUE, *Asplenium ruta muraria*.

WALNUT, *Juglans regia* — w. White, *Juglans cinerea*.

WALTON, MINERAL WATERS OF. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

WANT, from past participle of Sax. *wanian*, 'to wane,' 'to fall away.' 'Need of that which is necessary.' (F.) *Besoin*. This word is sometimes used to express the imperious necessity which compels us to take food, drink, &c. (See Hunger and Thirst.) In a more general sense, it means the impressions transmitted by the organs to the brain, when it is necessary that they should act: these wants are called *instinctive desires* and *internal sensations* or *stimuli*. Such are the desires or wants to eat, drink, void the urine, breathe (*besoin de respirer*), &c.

WANT, in the sense of indigence, (L.) *Egestas*, *Indigen'tia*, is the cause of a number of diseases.

WARBURG'S FEVER-DROPS, see Bebeeru.

WARD'S ESSENCE FOR THE HEADACH, *Linimentum camphoræ compositum* — w. White Drops, see Hydrargyri nitras.

WARMBRUNN, MINERAL WATERS OF. Much frequented springs in Silesia, about a league from Hirschberg. They are thermal, 95° to 100° Fah., and are chiefly used as baths. The impregnating materials are carbonate of soda, sulphate of soda, sulphate of lime, chloride of sodium, carbonate of magnesia, and sulphohydric acid gas.

WARM SPRINGS, see Virginia, mineral waters of.

WARNERA CANADENSIS, *Hydrastis Canadensis*.

WART, *Verruca* — w. Corneous, *Cornu*.

WARTY, *Ver'rucose*, *Ver'rucous*, *Verruco'sus*, from Sax. *peart*. Full of warts. Resembling, relating, or belonging to warts.

WARTY TUMOUR OF CICATRICES. A name given by Mr. Howship to the tumour, which

sometimes appears on an old scar, many years, perhaps, after the injury that caused it.

WASH, BLACK, see Hydrargyri submurias — w. Preventive, *Lotion*, *Hannay's* — w. White, *Liquor plumbi subacetatis dilutus*.

WASHERWOMAN'S SCALL, *Psoriasis diffusa*.

WASP, *Vespa*, *Sphex*, (F.) *Guêpe*. A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See Poisons, Table of.) The best application is the sp. *ammonia aromaticus*, or some preparation of ammonia.

WASSERBURG, MINERAL WATERS OF. Wasserburg is a town of Bavaria, seated on the Inn, 28 miles east of München. The water, called, also, *Aqua Aga'tii*, contains carbonic acid; carbonates of lime and magnesia; sulphates of lime and magnesia; chloride of sodium, carbonate of soda and oxide of iron.

WASSERCUR, *Hydrosudotherapia*.

WATER, *Σαξ. πᾶτερ*, (G.) *Water*, *Aqua*, *Hydor*, *ὑδωρ*, *Alma*, (F.) *Eau*, *Protoz'idie of hydrogen*. Water was at one time regarded as a simple element. It is now known to consist of eight parts by weight of oxygen, and one of hydrogen. It freezes at 32°, and boils at 212° of Fahrenheit; and is taken as the unit in all tables of specific gravity of solid and liquid substances. Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in sea-water and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by Celsus, "*Aqua levissima pluvialis est; deinde fontana; tum ex flumine; tum ex puteo; post hæc ex nive, aut glacie; gravior his ex lacu; gravissima ex palude.*" Pure water is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

WATER OF AIX-LA-CHAPELLE, see Aix-la-Chapelle — w. Allflower, *Urine*, *cows'* — w. Apple, *Apple-tea* — w. Barley, *Decoctum hordei*.

WATER BED. A bed, contrived by Dr. Arnott, which, in consequence of its being placed on water, is well adapted for the bedridden.

WATER, BINELLI, *Aqua Binellii* — w. of Bitter Almonds, *Aqua Amygdalarum concentrata* — w. Brash, *Pyrosis* — w. Brochieri, *Aqua Brochierii* — w. Camphor, *Mistura Camphoræ*.

WATER CANKER, *Cancer aquaticus*.

WATER, CARU, STRONG, *Spiritus carui* — w. Chicken, *Chicken-tea* — w. Cinnamon, *Aqua cinnamomi* — w. Cinnamon, strong, *Spiritus cinnamomi* — w. Cologne, *Eau de Cologne*.

WATER CURE, *Hydrosudotherapia*.

WATER, DISTIL'LED, *Aqua destilla'ta*, (F.) *Eau distillée*, *Holy water*, is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary; as water, containing any saline impregnation—hard water, for example—decomposes certain substances. Distilled water has been recommended as a diet-drink in cancerous affections; and it is used in the religious ceremonies of the Catholic church. In the Pharmacopœia of the United States, it is directed to be made as follows:—Take of *water*, ten gallons. First distil

two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

**WATER-DOCTOR**, see *Uromantia*.

**WATER-DRESSING**. The treatment of wounds and ulcers by the application of water. It generally consists in dipping folds of lint in water, and placing them on the part:—the whole being covered with oiled silk or elastic gum.

**WATER, EPILEPTIC**, of Langius, *Langii aqua epileptica* — w. Fennel, *Aqua fœniculi*.

**WATER FLAG, YELLOW**, *Iris pseudacorus*.

**WATER, FLORIDA**,—a celebrated perfume,—may be made of *Ol. Bergami* f ʒiv; *Tinct. benzoin. c.* f ʒij; *Alcohol. cong.*

**WATER, GOULARD**, *Liquor plumbi sub-acetatis dilutus*.

**WATER, HARD**. Common water, which decomposes and curdles soap; in contradistinction to *soft water*, which is readily miscible with soap. The hardness of water depends upon the presence in it of earthy salts, the most common of which is sulphate of lime.

**WATER, HOLY**, Water, distilled — w. Honey, see *Mel* — w. in the *Head*, *Hydrocephalus* — w. Hungary, *Spiritus rosmarini*.

**WATER JAGS**, see *Varicella*.

**WATER, LAKE**, *Aqua ex lacu*, (F.) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

**WATER, LAUREL**, see *Prunus lauro-cerasus* — w. *Lavender*, *Spiritus lavandulæ* — w. *Lemon-peel*, see *Lemon-peel Tea* — w. *Lime*, *Liquor calcis* — w. *Lime*, compound, *Liquor calcis compositus* — w. *Magnesia*, aerated, *Magnesia, fluid* — w. *Magnesia*, carbonated, *Magnesia, fluid*.

**WATER, MARSH**, *Aqua paludosa*, (F.) *Eau de Marais*, is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

**WATER, MINERAL**, *Aqua mineralis*, *A. salubris*, *A. medicata*, *Fons salutaris*, *F. medicatus*, *F. soterius*, *Aqua soteria*, (F.) *Eau minérale*. Water, holding in solution different saline and gaseous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

Mineral waters may be divided into four classes:—1. *Gaseous* or *Acidulous*. 2. *Chalybeate*. 3. *Saline*. 4. *Sulphureous*. These may be *thermal*, or *cold*,—*natural*, or *artificial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to another.

1. *Gaseous, Acidulous* or *Carbonated Mineral Waters*, *Aquæ mineralis acidulæ*, (F.) *Eaux minérales gazeuses* ou *acidules*. The waters referred to this class are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline

matter that may be also contained in them. The most celebrated amongst the acidulous waters are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeac, Seltzer, Schlungenbad, Sultzmatz, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalybeate* or *Ferruginous Mineral Waters*, *Aquæ mineralis ferruginosæ*, *A. Chalybeatæ*, *A. Martialis*, (F.) *Eaux minérales ferrugineuses*, contain iron—sulphate, chloride or carbonate, generally the latter—held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In this dictionary, those only are specified which have some celebrity; yet there are upwards of ninety; whilst there are more than sixty of the saline, and upwards of thirty-five of the sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline Mineral Waters*, *Aquæ minerales salinæ*, *Anna alcalizata* (Paracelsus,) *Hydralmæ*, (F.) *Eaux minérales salines*. Waters, holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present are sulphates, chlorides, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balaruc, and Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphureous Mineral Waters*, *Aquæ minerales sulphurææ*; when warm, termed *Thiothermæ*, *Thiopepæ*, *Theothermæ*, *Fontes sulphurei calidi*, (F.) *Eaux minérales sulfureuses*, *Eaux sulfurées*, *E. sulfureuses*, *E. hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognized by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Baréges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-Chapelle, Enghien, Harrogate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

The following Table by Dr. Pereira exhibits the composition of some of the principal mineral waters.

FIXED CONSTITUENTS  
MINERAL SPRINGS.

ENTERING INTO THE COMPOSITION OF SOME OF THE MORE CELEBRATED

PROPORTIONS IN 10,000 PARTS OF WATER.

NOTE.—In reducing the analyses contained in this Table to a uniform measure, in order to render them susceptible of direct comparison with each other, the old English gallon is assumed to be as = 58,338 grains; the wine pint = 7305 grains; the imperial gallon = 70,000 grains; and the German 16-ounce measure = 7368 grains.

The different salts have been reduced to their elementary constituents by Wollaston's scale of chemical equivalents.

WATER, MINERAL, Acidulous water, simple.  
 WATERS, MINERAL, ARTIFICIAL, (F.) *Eaux minérales artificielles ou factices*. These are imitations of the natural; and some of them—as the factitious Cheltenham water, and Sedlitz water—answer the purpose of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.  
 WATER, NUTMEG, Spiritus myrticæ—w. Parsnep, creeping, Sium—w. Pennyroyal, spirituosus, Spiritus pulegii—w. Peppermint, Aqua menthæ piperitæ.  
 WATER POX, see Varicella.  
 WATER, PROTOXIDE OF NITROGEN, Aqua nitrogenii protoxydi.  
 WATER QUALM, Pyrosis.  
 WATER, RAIN, *Aqua pluvialis, A. pluvia, A. Imbrium*, (F.) *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution, are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.  
 WATER, RICE, see Oryza.  
 WATER, RIVER, *Aqua fluvialis*, is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.  
 WATER, ROSE, *Aqua rosæ*.  
 WATER, SEA, *Aqua Mari'na, Humor Dor'idis*, (F.) *Eau de Mer*. This contains chlorides of sodium, magnesium and calcium, and sulphate of magnesia. It is cathartic, and forms the usual glyster at sea. It makes an excellent tonic bath; superior in most cases—especially in scrofula—to the fresh water-bath.  
 WATER, SEARLE'S PATENT OXYGENOUS AERATED, *Aqua Nitrogenii protoxydi*—w. Seydchut, Sedlitz water.  
 WATER SHIELD, *Brasenia hypopeltis*.  
 WATER, SNOW, *Aqua nivata*, (F.) *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.  
 WATER, SODA, Acidulous water, simple—w. Soft, see Water, hard—w. Spearmint, *Aqua menthæ viridis*.  
 WATER, SPRING, *Aqua fontana, Hydrop'gê*, (F.) *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard*; if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.  
 WATER, STYPTIC, Sydenham's solutio sulphatis cupri composita—w. Tar, see Pinus sylvestris—w. Toast, see Toast-water.  
 WATER, WELL, *Aqua putealis* seu *Puteana*, *A. ex puteo*, (F.) *Eau de puit, Eau de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.  
 WATERS, DISCHARGED OR BROKEN, Profusio aquæ—w. Distilled, *Aquæ destillatæ*—w. First, Primitivæ.  
 WATTWEILER, MINERAL WATERS OF. Wattweiler is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda; chloride of sodium, and free carbonic acid.  
 WAX, Cera—w. Ear, Cerumen.  
 WAX, MYRTLE. A wax obtained from the fruit of *Myrica cerifera*. It has been prescribed in dysentery.  
 WAX, YELLOW AND WHITE, Cera flava et alba.  
 WAXING KERNELS, *Crescentiæ*, (F.) *Croissances, Croissants, Glandes de croissance*. A po-

pular term for small tumours, formed by an enlargement of the lymphatic glands—in the groins of children particularly. They have been looked upon as connected with the growth of the body,—hence their name.  
 WAY, Saxon wæg, *Via, Passage, Odos*, (F.) *Voie*. A name given to different canals.  
 WAYS, DIGESTIVE, *Digestive Passages, Primæ Viæ*, (F.) *Voies digestives, Premières voies*, are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.  
 WAYS, SECOND, *Second Passages, Secundæ viæ*, (F.) *Secondes voies*, comprise the chyloferous, lymphatic and blood vessels.  
 WEAKSIGHTEDNESS, Asthenopia.  
 WEAL, Wheal.  
 WEANING, from Saxon wēnan, 'to wean;' *Ablactatio, Apogalactismus*, (F.) *Sévrage*. The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.  
 WEANING BRASH, see Brash, weaning.  
 WEATHERCOCKS, Impatiens.  
 WEB, MUSCULAR, Panniculus carnosus.  
 WEB-EYE, Caligo.  
 WEDGED, (D.) wegghe, *Inclusus, Inhærens*, (F.) *Enclavée*. The head of the fœtus is said to be wedged in the pelvis, when it remains fixed, notwithstanding the uterine efforts.  
 The condition is called *Incunctio* seu *Inclavatio fœtus, Spheno'sis, Inhærens*, (F.) *Enclavement*. See Paragomphosis.  
 WEED, see Mastitis—w. in the Breast, see Mastitis—w. Dyer's, *Reseda luteola*—w. Field, *Anthemis cotula*—w. Horsefly, *Sophora tinctoria*—w. Milk, *Apocynum androsæmifolium*—w. Soldiers', *Matico*—w. Silver, *Potentilla anserina*.  
 WEEPING, Fletus.  
 WEIGHT, from Saxon wægan, 'to weigh;' (F.) *Pesanteur*. A sensation of heaviness or pressure over the whole body, or over a part—the stomach or head, for example.  
 WEIGHTS AND MEASURES, *Pondera et Mensuræ*, (F.) *Poids et Mesures*. The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are are upon decidedly the best footing, but they are not adopted out of France. The greatest diversity prevails over Europe in the measures, both of weight and capacity. Some of the following tables will show, that every subdivision of the pound, as well as the pound itself, differs in England and in France.  
 WEIGHTS.  
*Troy Weight, as used by the British Apothecaries.*  
 —*Pondus pharmaceuticum seu medicinal.*  

The pound lb	} contains	12 ounces.
The ounce		8 drachms.
The drachm		3 scruples.
The scruple		20 grains.
The grain gr.		

These, and the signs by which they are denoted, are the same in all the British Pharmacopœias, as well as in the American.

lb.	Oz.	Drm's.	Scrup.	Gr's.
1	=	12	=	96
			=	288
		1	=	8
			=	24
			=	480
			=	60
			=	20

Poids de Marc.

The pound	} contains	{	16 ounces.
The ounce			8 drachms.
The drachm			3 scruples.
The scruple			24 grains.
The grain			

Avoirdupois.

Pound.	Ounces.	Drachms.	Troy grains.
lb. 1.	= 16	= 256	= 7000
	1	= 16	= 437.5
		1	= 27.34375

The avoirdupois drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound of 7680 grains avoirdupois = 7000 grains troy, and hence 1 grain troy = .97 grain avoirdupois.

The *Poids de Marc* is that employed by the French Pharmacians, when the new weights are not. The Avoirdupois is now used by the Dublin College.

The following tables exhibit the relative value of the old French and English weights :

<i>Poids de Marc.</i>	<i>Troy Wt.</i>	<i>Avoird.</i>	<i>Troy grs.</i>
1 <i>pd. (liere)</i>	= 1.31268 <i>lb</i>	= 1.080143 <i>lb</i>	= 7561

Mètre	39.371	=	1	0	3.37

VALUES OF THE GRECIAN, ROMAN, AND ARABIAN WEIGHTS AND MEASURES IN POIDS DE MARC.

1. Weights of the Ancient Greeks.

	lbs.	oz.	dr.	gr
The talent (ταλαντον)	54	2	5	24
The mina (μυνα)	14	3	40	
The drachm (δραχμη)	1	11		
The obolus (οβολος)				13
The ceration (κιρατιον)				4
The chalcus (χαλκος)				2
The septon (σεπτον)				½

2. Weights of the Ancient Romans.

	oz.	dr.	gr.
The pound (libra)	10	6	48
The ounce (uncia)		7	16
The duella		2	29
The sicilius		1	58
The sextula		1	14
The consular denier, denarius		1	2
The imperial denier or drachm, drachma			65
The victorialis			37
The scriptulum or scruple			21
The obolus			11
The siliqua			4

The Greeks divided their obolus into *chalei* and *lepta*: some divided it into 6 *chalei*, and each *chalcus* into 7 *lepta*; others into 8 *chalei*, and every *chalcus* into 8 *lepta* or *minuta*.

Dr. Milligan, in his edition of Celsus, gives the following table, exhibiting the Troy weight of measures of capacity and of weight in use amongst the Romans.

	Urna.	Libra.	Uncia.	Denarius.	Scrupulus.	Sextans.	Chalcus.	Grana.
Amphora	2 =	80 =	960 =	6720 =	20160 =	40320 =	403200 =	420480
Urna	1 =	40 =	480 =	3360 =	10080 =	20160 =	210600 =	210240
Congius	½ =	10 =	120 =	840 =	2540 =	5040 =	50400 =	52920
Sextarius	¼ =	12-3 =	20 =	140 =	420 =	840 =	8400 =	8700
Libra		1 =	12 =	84 =	252 =	504 =	5040 =	5256
Hemina			8 4-7 =	60 =	180 =	360 =	3600 =	3759
Acetabulum			2 1-7 =	15 =	45 =	90 =	900 =	939
Sesqui-cyathus			2 1-7 =	15 =	45 =	90 =	900 =	939
Cyathus			1 3-7 =	10 =	30 =	60 =	600 =	626
Sescuncia			1½ =	10½ =	31½ =	63 =	630 =	657
Uncia			1 =	7 =	21 =	42 =	420 =	438
Cochleare				2½ =	7½ =	15 =	150 =	156
Drachma				1 =	3 =	6 =	60 =	62 4-7
Denarius				1 =	3 =	6 =	60 =	62 4-7
Scrupulus					1 =	2 =	20 =	20 2-3
Scrupulus dimidiatus					½ =	1 =	10 =	10 1-3
Obolus						1 =	10 =	10 1-3
Sextans						1 =	10 =	10 1-3
Chalcus							1 =	1 1-3

He gives also the following 'Carmen Mnemonicum,' which exhibits the analogies of the Roman and British imperial weights.

To the congus and gallon, each, ten pounds allow,

On the bushel and amphora eighty bestow;

Rome's pound, as in Troy weight, twelve ounces obtain,

But her ounce is Abodrupos, strictly, in grains:

Denarii drams, scruples scrupli define,

Septarius answers to our bottle of wine,

And the mina's a short pint—fourteen ounces in fine.

3. Weights said to be of the Arabians, Modern Greeks, and Latins of the barbarous periods of the Middle Ages.

	oz.	dr.	gr.
The alchemion	14	3	40
The manes or omino	10	6	28

The Greek bean or gramme, the kermel, gouum, harmi, gracchus			21
The ring, cumulus, seminet, onolisch, onolossat			11
The danieh			8
The kirat, alkitat, kararit			4

1. Greek Measures.

	lbs.	oz.	dr.	gr.
The metretes (μετρητης)	84	4	3	00
The chus, chon, congus (χους)		7	0	66
The xetes (ξετης)		1	1	74
The coryla (κορυλη)		8	7	58
The tetrarton (τεταρτον)		4	3	65
The oxybaphon (οξυβαφον)		2	1	69
The cyathus (κυαθος)		1	4	00
The concha (κογχη)				6 00
The mystron (μυστρον)				3 00
The chama minor (χημη)				2 00
The cochliarion (κοχλιαριον)				1 00

2. Roman Measures of Capacity.

	lbs.	oz.	dr.	gr.
The amphora or cadus	56	2	7	24
The urna	28	1	3	48
The congus		7	0	66
The sextarius		1	4	74
The hemina		10	1	18
The quartarius		5	0	45
The acetabulum		2	4	23
The cyathus or small glass		1	5	30
The ligula or spoonful				3 24

3. Measures said to be of the Arabian, Arabist, and Latin Physicians of the Middle Ages.

	lbs.	oz.	dr.	gr.
The <i>missokas</i> weighed	3	8	1	33
<i>Ahen. kirt. cyb. cheria, or Roman mina.</i>	1	6	0	00
The <i>phial. hughius, or hassitius</i>	10	1	18	
The <i>calix or rejelati</i>	5	0	44	
The <i>handful. pugillum, cornusum</i>	3	2	68	
The <i>hassuf, aessae, or anesime</i>	2	4	20	
The <i>conos or coatus, alcantus or almunesi, brialie cuabus.</i>	1	5	34	
The <i>lesser bachates</i>	5	5	56	
The <i>largest spoonful.</i>	4	44		
A <i>spoonful.</i>	1	52		
The <i>colanos or reclanarium.</i>	1	28		
A <i>small spoonful or flagerina, or cyanes.</i>	1	11		
The <i>smallest spoonful or fakatiel.</i>			42	

A good section on weights and measures is contained in the edition of "The Seven Books of Pansus Ægineta," by Mr. Francis Adams, published by the Sydenham Society of London, vol. iii, p. 609, London, 1847.

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example:—

A *glassful or cupful*, ((F.) *Verre*), is reckoned to contain 4 or 5 fluidounces.

A *wine-glassful*,  $1\frac{1}{2}$  ounce or two ounces.

A *table-spoonful*, ((F.) *Cuiller à bouche*), about half an ounce.

A *coffee or dessert-spoonful*, about 3 drachms.

A *tea-spoonful*, a fluidrachm.

A *handful, manipulus*, ((F.) *Poignée*), as much as can be held in the hand.

The *Pugillus* ((F.) *Pincée*) is as much as can be held by the three fingers.

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

	French.	oz.	dr.
A <i>Manipulus</i> of barley weighs	3	2	$\frac{1}{2}$
" linseed	1	4	
" linseed meal	3	3	
" dried mallow leaves	1	3	
" dried chicory leaves	1	0	
" flowers of the tilia	1	$\frac{1}{2}$	

	dr.	scr.	gr.
A <i>Pugillus</i> of chamomile flowers weighs	2		
" arnica	1	2	
" marsh-mallow	1	1	
" mallow			60
" fennel seeds			1 60
" aniseed	1	$\frac{1}{2}$	60

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms: when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

**WEILBACH, MINERAL WATERS OF.** The village of Weilbach is in the plain between the Maine and the southern extremity of the Tannus hills. It has in its neighbourhood a cold sulphureous alkaline spring, the water of which is bottled and exported, although not of great efficacy. Its use is at times combined with that of the saline springs in Nassau, and of Baden-Baden, in various chronic abdominal and thoracic affections.

**WELD, Reseda luteola.**

**WELK, Welk.** An inequality; a protuberance; a cutaneous eruption of this character. Aene.

**WENDING, MINERAL WATERS OF.** These waters are situate about four leagues from Donawert in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little

chloride of calcium, and oxide of iron; and are much used in asthetic diseases.

**WEN, Sax. Ven, Lu'pia, Tumour, (F.) Loup.** A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to bronchocele.

**WESTERN ISLANDS, Azores.**

**WEST INDIES, (CLIMATE OF.)** The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

**WHAHOO, see Euonymus.**

**WHEAL, Weal, Wale.** A ridge, or elevation of the skin, produced by a rod or whip; or as if produced in that manner. Such elevations are seen in urticaria.

**WHEAT, Triticum—(F. Indian, Zea mays—w. Turkey, Zea mays.**

**WHELK, Aene, Welk—w. Chin, Sycosis—w. Rosy, Gutta rosea.**

**WHEY, Serum lactis—w. Mustard, see Sinapis—w. Rennet, see Serum lactis—w. Tamarind, see Tamarindus—w. Vinegar, see Acetum—w. Wine, Wine whey.**

**WHIFFING MURMUR, see Murmur, respiratory.**

**WHISKY, see Spirit.** A spirituous liquor obtained from oats, potatoes, &c., by distillation.

**WHISKY LIVER, Liver, nutmeg.**

**WHISPERING; evidently an onomatopœia (hoop's'pering), Susurra'tio, Susurra'tion.** Articulation of the air sent through the vocal tube without any action of the glottis.

**WHISTLING, Sifflement, see Râle sibilant.**

**WHITE, Flake, Plumbi subcarbonas.**

**WHITE BALL, Cephalanthus occidentalis—w. Leaf, Pyrola maculata, Spiræa tomentosa—w. Leg, Phlegmatia dolens—w. Matter of the brain, see Cerebrum—w. Root, Angelica lucida, Asclepias tuberosa.**

**WHITE, SPANISH, Bismuth, subnitrate of.**

**WHITE SWELLING, Hydrarthrus—w. Swelling of lying-in women, Phlegmatia dolens—w. Substance of Schwann, see Nerve fibre—w. Sulphur, see Virginia, mineral waters of—w. Weed, Chrysanthemum leucanthemum—w. Wood, Liriodendron, Tilia.**

**WHITENESS OF COMPLEXION, Paleness.**

**WHITES, THE, Leucorrhœa.**

**WHITLEYA STRAMONIFOLIA, Anisodus luridus.**

**WHITLOW, Paronychia.**

**WHOOPIING-COUGH, Pertussis.**

**WHORLYWORT, Leptandria purpurea.**

**WHORTLEBERRY, Vaccinium myrtillus, Vaccinium vitis idæa—w. Bears', Arbutus uva ursi.**

**WHORTS, BLACK, Vaccinium myrtillus.**

**WIDOW-WAIL, Cneorum tricocum, Daphne Alpina.**

**WIESBADEN, MINERAL WATERS OF, see Wiesbaden.**

**WIESSAU, MINERAL WATERS OF.** These waters are situate about four leagues from the convent of Waldsassen in Bavaria. They contain

carbonic acid; carbonates of lime and magnesia; chlorides of calcium, magnesium, and aluminum; carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pyrmont.

WILD, Sax. *piß*, (D.) Wild. An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong mental emotion;—a *wild look*, (F.) *Physiognomie égarée*.

WILDBAD, MINERAL WATERS OF. Wildbad is a small town of Wurtemberg, three German miles from Baden-Baden. It is much frequented as a watering-place. The water is thermal, from 95° to 100° of Fahr., and is much employed in cases in which thermal waters are indicated. It is used internally, a pint not containing more than a grain of solid ingredients, which consist of salts of soda and lime. The proportion of carbonic acid gas is very small.

WILDUNGEN, MINERAL WATERS OF. Wildungen is situate a few miles from Cassel in Germany. In its neighbourhood are several mineral springs; the chief of which, according to Stucke, contain a bituminous matter; chloride of sodium and sulphate of soda; carbonate and sulphate of lime, &c. They are used, chiefly, as refrigerants.

WILL, Voluntas.

WILLOW, Salix.

WILLOW HERB, common, *Lythrum salicaria*—w. Herb, great, *Epilobium augustifolium*—w. Herb, purple, *Lythrum salicaria*—w. Herb, purple veined, *Epilobium coloratum*.

WILLOW, Low-BUSH, *Salix humilis*—w. Speckled, *Salix humilis*—w. Red, *Cornus sericea*—w. Rose, *Cornus sericea*—w. Sweet, *Myrica gale*.

WIND, Sax. *piñd*, *Ventus*, *An'emos*, (F.) *Vent*. Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness, and by the emanations of different kinds, which they transport to greater or less distances. The winds which blow over a considerable extent of country, are dry and serene: those which come from the ocean are moist and chilly.

WIND DROPSY, *Emphysema*, *Tympanites*—w. Flower, *Anemone*—w. Pipe, *Trachea*—w. Root, *Asclepias tuberosa*.

WINDINESS, Flatulence.

WINDY, *Flatulentus*, *Flatulent*, *Va'poureux*, (F.) *Venteux*. That which causes wind or flatulence; also, that which is caused by wind or flatulence; as *windy food*, *windy colic*, &c. Also, one affected with flatulence, or who is 'troubled with the wind.'

WINE, Sax. *bin*, (G.) *Wein*, originally, perhaps, from *ovos*, *Ænos*, *Vinum*, (F.) *Vin*. A name given by chymists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape, or of fruits, the product of whose fermentation resembles, in almost all respects, that of the juice of the grape. Wine is composed of alcohol; saccharine matter; malic acid; tartaric acid; bitartrate of potass; acetic acid; an extractive colouring matter, more or less bitter, and partly resinous; and sometimes of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation.

The following table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds

of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more brandied, or "reinforced," than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked, that some of the wines analyzed by Mr. Brande were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

PROPORTION OF ALCOHOL, S. G. 0.825, IN ONE HUNDRED PARTS BY MEASURE OF THE FOLLOWING WINES, AND MALT AND SPIRITOUS LIQUORS.

1. Lissa .....	26.47

The only wine recommended in some pharmacopœias is *Sherry*, *Vinum*, *Vinum album Hispanicum*, *Leuce'nus*. It is a *dry wine*; the least variable in its properties, and agrees best with the dyspeptic. Other wines used officially are—*Canary* or *Sack wine*, *Vinum Canari'num*; *Mountain wine*, *Vinum album montanum*; *Tent wine*; *Rhenish wine*, *Vinum Rhena'num*; and *Port wine*, *Vinum rubrum Portugallicum*.

The wines habitually drunk are almost innumerable. Those that are sweet, or contain a large portion of free, saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine, it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the *materia medica*.

*Mulled Wine* is made as follows:—Take of bruised *cinnamon*  $\frac{3}{4}$ ; half a *nutmeg* grated; and ten bruised *cloves*. Infuse in boiling water *Oss* for an hour; strain and add *sugar*  $\frac{3}{4}$ . Pour the whole into a pint of hot *Port* or *Sherry*. Useful in adynamic conditions.

WINE, AMINEAN, *Aminæum vinum*—w. of Aloe, *Vinum aloes*—w. Antimonial, *Vinum antimoni tartarizati*—w. Antiscorbutic, *Vinum antiscorbuticum*—w. Aromatic, *Vinum aromaticum*—w. Bark, compound, *Vinum de kinâ kinâ compositum*—w. Barley, *Cerevisia*—w. Bitter, diuretic, *Vinum diureticum amarum*.

WINE BITTERS, *Vinum gentianæ compositum*. The formulæ for these may be various. The following is as good and as agreeable as any. (*Rad. gentian*. lbj, *cort. aquant*.  $\frac{3}{4}$ x, *sem. cardam*. cont.  $\frac{3}{4}$ iv, *cinnam. cort.*  $\frac{3}{4}$ iv, *wine*, foreign or domestic, three gallons and a half.) Tonic and stomachic.

WINE, CEDAR, *Cedrinum vinum*—w. Champagne, *Vinum campanum*—w. Chian, *Chium vinum*—w. of Colchicum, *Vinum colchici*—w. of Colchicum seed, *Vinum colchici seminis*—w. of Ergot, *Vinum ergotæ*—w. of Gentian, compound,

*Vinum gentianæ compositum*—w. of Hellebore, white, *Vinum veratri*—w. Ipecacuanha, *Vinum ipecacuanhæ*—w. of Iron, *Vinum ferri*—w. Medicated, *Vinum medicinale*—w. Mulled, see *Wine*—w. of Opium, *Vinum opii*—w. Port, *Vinum Portugallicum*—w. Pullet, *Poulet, vin de*—w. of Quina, *Vinum quiniæ*—w. Rhubarb, *Vinum rhei palmati*—w. Sherry, *Vinum*—w. Steel, *Vinum ferri*—w. Tobacco, *Vinum tabaci*.

WINE WHEY, *White Wine Whey*. Take of good *milk* two-thirds of a pint, and add *water* to make a pint. Take of *sherry*, or any other good *white wine*, two glasses, and of *sugar* a dessert-spoonful. Place the *milk* and *water* in a deep pan on the fire; and the moment it boils, pour into it the *wine* and *sugar*. Stir assiduously for 12 or 15 minutes, whilst it boils. Lastly, strain through a sieve.

It is a good mode of giving wine in adynamic states.

WINE, WHITE, see *Wine*—w. of Wormwood, *Vinum absinthites*.

WING-SEED, *Petela trifoliata*.

WINKING, *Scardamygmus*.

WINTER-BARK TREE, *Wintera aromatica*—w. Berry, *Virginia*, *Prinos*—w. Berry, smooth, *Prinos lævigatus*—w. Berry, whorled, *Prinos*.

WINTER BLOOM, *Hamaclis Virginiana*—w. Cough, *Bronchitis, chronic*—w. Green, *Gaultheria*—w. Green, round-leaved, *Pyrola*—w. Green, spotted, *Pyrola maculata*.

WINTERA, see *Wintera aromatica*.

WINTERA AROMATICA, *Drimys Winteri*, *Wintera'na aromatica*, *Winter-bark Tree*. The bark, *Wintera* (Ph. U. S.), *Cortex Wintera'nus*, *Cortex Winteranus Magellan'icus*, *Cortex Magellan'icus*, *Cinnamo'mum Magellan'icum*, (F.) *Écorce de Winter*, *Cannelle poivrée*, is very much allied in its properties to *Canella alba*.

WINTERANA AROMATICA, *Wintera aromatica*.

WISBADEN, MINERAL WATERS OF. Wisbaden is a town of Germany, about 6 miles north of Mainz, and 22 west of Frankfurt. It has been long celebrated for its hot springs; and is much frequented. There are numerous cold and thermal springs,—the former containing sulphuric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fahr.

WISMUTHUM, *Bismuth*.

WOAD, *Isatis tinctoria*.

WOLFEBANE, *Veratrum viride*.

WOLFSBANE, *Aconitum*—w. Wholesome, *Aconitum anthora*.

WOLFSCLAW, *Lycopodium*.

WOLFSJAW, see *Harelip*.

WOMANHOOD, *Mulieritas*.

WOMB, *Uterus*—w. Falling down of the, *Prolapsus uteri*.

WOMB GRAIN, *Ergot*.

WOMB, LACERATION OF THE, *Uterus*, rupture of the—w. Tympany of the, *Physometra*.

WOOD, BRAZIL, *Cæsalpinia echinata*—w. Elk, *Andromeda arborca*—w. Fernambuco, *Cæsalpinia echinata*.

WOOD-LICE, *Onisci aselli*—w. Nicaragua, see *Cæsalpinia*—w. Peach, see *Cæsalpinia*—w. Pernambuco, *Cæsalpinia echinata*—w. Sampfen, *Cæsalpinia sappan*—w. Sappan, *Cæsalpinia sappan*—w. Sorrel, *Oxalis acetosella*—w. Sour, *Andromeda arborca*—w. Waxen, *Genista tinctoria*.

WOODBINE, COMMON, *Lonicera periclymenum*.

WOODROOF, SWEET-SCENTED, *Asperula odorata*.

WOODS, SUDORIFIC, (F.) *Bois sudorifiques*. This term is applied, collectively, to the guai-

cum, sassafras, china, and sarsaparilla; which are often used together to form the sudorific decoction.

WOORARA, Curare.

WORM, see Alembic, Vermiform process — w. Bark tree, Geoffræa inermis — w. Cakes, Story's, see Cakes, worm, Story's — w. Disease, Helminthiasis — w. Goosefoot, Chenopodium anthelminticum — w. Grass, perennial, Spigelia Marilandica.

WORM, GUINEA, Dracunculus.

WORM LOZENGES, CHING'S. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges*. (*Saffron*, ℥ss, *water*, Oj; boil, and strain; and add of *white panacea of mercury*, (calomel washed in spirit of wine,) ℔ij, *white sugar*, 28 lbs, *mucilage of gum tragacanth* q. s., to make a mass. Divide, so that each lozenge may contain a grain of the panacea.) The *Brown Lozenges*. (*Panacea* ℥vij, *resin of jalap* ℔ijss, *white sugar* ℔ix, *mucilage of gum tragacanth* q. s. Each lozenge to contain gr. ss of the panacea.)

WORM LOZENGES, SHERMAN'S, are said to be composed of calomel, gamboge, and sugar.

Peters's Worm Lozenges are said to be composed in a similar manner.

WORM ROOR, Spigelia Marilandica — w. Seed, Artemisia antonica, Chenopodium anthelminticum — w. Seed, goosefoot, Chenopodium anthelminticum — w. Weed, Corsican, Corallina Corsicana, Polanisia graveolens — w. Weed, white, Corallina — w. Wood, biennial, Artemisia biennis — w. Wood, common, Artemisia absinthium — w. Wood, creeping, Artemisia rupestris — w. Wood, lesser, Artemisia Pontica — w. Wood, Roman, Artemisia Pontica — w. Wood, Sea, Artemisia maritima — w. Wood, silky, Artemisia glacialis.

WORMIA'NA OSSA seu OSSIC'ULA, *O. epactalia*, *O. raphogeminantia*, *O. triquetra*, *O. triangularia* Blasi, *Claves calvariae*, *O. suturarium*, (F.) *Os Wormiens*, *Clefs du crâne*, *Os épactaur*, *Os surnuméraires*, (Ch.), *Os intercalés*, *Os triangulaires*. Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They were called *Wormiana*, from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The *Ossa Wormiana* exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMS, originally from (L.) *Vermes*; *Intestinal Worms*, *Entozoa*, *Entozoa'ria*, *Enterozoa*, *Eudozoa*, *Vermes intestini*, *Entelminth'a*, *Entelminth'es*, *Helminth'i*, *Helminth'ia* Alvi, *H. pod'icis*, *Splanchnelmintha*, *Entoparasites*, (F.) *Vers*, *Vers intestinaux*, *Entozoa'ires*. Animals whose common character is that of existing only in other animals; hence their name *entozoa*, from εντος, 'within,' and ζωον, 'animal.' They are met with, not only in the natural cavities, but even in the tissue of the organs. Cuvier, Rudolphi, Brera, Bremser, Laënnec, and others, have endeavoured to classify them, — some according to their shape; others, according to their anatomical characters.

The following table exhibits the entozoa, which have been met with in the human body, and their usual habitat:—

Entozoa.	Where found.
Trichoceph'alus dispar,	Intestines.
Oxyu'ris vermiculo'ris,	
As'caris lumbricoi'des,	Intestines.
Bothrioceph'alus latus,	
Tæ'nia so'lium,	Intestines.
Ditrachy'eras rudis,	
Diploso'ma crena'ta,	Urinary bladder.
Spirop'tera hom'inis,	
Dactyl'ius aculea'tus,	Urinary bladder.
Dis'toma hepaticum,	
Stron'gylus gigas,	Gall bladder.
Fila'ria oc'uli,	Kidney.
Acephalocyst'is endog'ena,	Eye.
Echinococ'cus hom'inis,	Liver.
Polys'toma pingue'ola,	Liver, Spleen, and Omentum.
Polys'toma vena'rum seu sanguic'ola, Hexathyrid'ium vena'rum,	
Fila'ria bronchia'lis,	Veins.
Trichi'na spir'a'lis,	
Cysticer'cus cellulosa'e,	Bronchial glands.
Acephalocyst'is multif'ida,	
Fila'ria medin'is,	Muscles.
	Brain.
	Cellular texture.

The most common of these are:—the *Oxyures vermiculares*, *Ascarides lumbricoïdes*, and *Tænia*, which are found in the intestines. The origin of these worms is extremely singular, and more favourable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptom, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the functions; but all these signs may be produced by intestinal irritation resulting from other causes.

*Anthelmintics* or *vermifuges*, employed, as the name imports, for their removal, may be of two kinds—*mechanical* and *true*. To the first class—the *mechanical*—belong *Emetics*, *Purgatives*, *Mucuna*, *powdered Tin*, &c. To the latter—the *true anthelmintics*, — *Turpentine*, *Chenopodium anthelminticum*, *Pink-root*, *Semina Santoniei*, &c. Of these, the best is turpentine. See *Oleum terebinthinæ*. The great object, however, is to prevent their generation. This must be done by generous diet, fresh air, and tonics, where necessary.

WORT, Sax. *þýrt*, *Mustum*, *Infusum Bynes* seu *Bra'sii* seu *Malti*, (F.) *Moût de la Bière*. An infusion of malt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

WOUND, Sax. *þunS*, *Vulnus*, *Volnus*, (diminutive *Vulnusculum*), *Plaga*, *Trauma*, *Troma*, *Tresis*, *Tresis Vulnus*, *Blabê*, *Tymma*, (F.) *Platê*, *Bles-sure*. A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure*, *Incision*, when made by a cutting instrument;—*punctured*,

*Nygma*, (F.) *Pique*, when made by a pointed instrument;—*lacerated*, (F.) *Déchirure*, *Plaie par arrachement*, when the parts are lacerated or torn by the wounded body; *poisoned*, *Cellulitis venenata*, *Necrosis*, (F.) *Plaie envenimée*, when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Gunsnot wounds*, *Selopetoplagæ*, *Vulnæra selopetæria*, (F.) *Plaies d'armes à feu ou d'arquebuse*, *Coup de feu*, belong to the last division.

WOURALI, Curare.

WOURARI, Curare.

WOURARU, Curare.

WRACK, SEA, *Fucus vesiculosus*.

WRACK, BLADDER, YELLOW, *Fucus vesiculosus*.

WRAPPING UP, (OF THE HYDROPATHISTS,) *Emaillottage*.

WRENCH, Sprain.

WRIGHTIA ANTIDYSENTERICA, *Nerium antidysentericum*.

WRINKLE, Sax. *ppinck*, *Ruga*, *Rytis*, *Rhacus*, *Rhachus*, *Rhagus*, *Rhysselma*, *Corrugatio cutis*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c. See *Corrugation*.

WRINKLED, *Rugosus*, *Rugosus*, *Rugose*, (F.) *Ridé*. Full of wrinkles.

WRIST, Carpus.

WRIST-DROP. Paralysis of the muscles of the forearm, induced by the poison of lead.

WRITERS' SPASM, see *Spasm*, *writers'*.

WURALI, Curare.

WURSTGIFT, *Allantotoxium*.

WRONG HEIR, *Cancellus*.

## X.

XALAPPA, *Convolvulus jalapa*.

XANTHIC OXIDE, *Uric oxide*.

XANTHINE, *Uric oxide*.

XANTHIUM, *X. strumarium* seu *Orientalis* seu *Vulgaris*, *Barda'na minor*, *Lappa minor*, *Lesser Burdock*, *Burweed*, *Burthistle*, *Clotbur*, (F.) *Lampourde*, *Petit Glouteron*, *Petite Bardane*. This herb, as one of its names imports, was once esteemed for the cure of scrofula. The seeds have been administered in cutaneous affections.

XANTHIURIA, *Xanthuria*.

XANTHOP'SIA, from *ξανθος*, 'yellow,' and *οψις*, 'vision.' Yellow vision, — as sometimes occurs in jaundice.

XANTHORRHIZA, *Xanthorrhiza apiifolia*.

XANTHORRHIZA APIIFOLIA, *Xanthorrhiza*, *X. simplicis sima*, *X. Marbo'ca*, *Zanthorrhiza tinctoria*, *Yellow Root*, *Parsley-leaved Yellow Root* or *Yellow wort*, *Shrub yellow root*. The root of this American plant — *Xanthorrhiza*, (Ph. U. S.) — is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

XANTHOS, *Yellow*.

XANTHOSIS. A term applied to the yellow discoloration often observed in cancerous tumours — especially in encephaloid of the testicle. — *Lebert*.

XANTHOXYLUM CLAVA HERCULIS, *Prickly Ash*, *Toothach Tree*, (F.) *Clavaler à feuilles de frêne*, *Frêne épineux*. The bark — *Xanthoxylum*, (Ph. U. S.) — is a very strong stimulant and powerful sialagogue. It has been given, internally, in rheumatism. Another species — *Xanthoxylum fraxinifolium*, *Xanthoxylum fraxineum*, *Shrubby prickly ash*, *Toothach bush*, *Pellitory*, *Yellow wood*, *Suterberry*, — possesses active powers. A spirituous infusion of the bark has been highly recommended in cases of violent colic. The fresh juice, expressed from the roots of the *xanthoxylum*, is said to afford relief in the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

XANTHU'RIA, *Xanthu'ria*, from *ξανθος*, 'yellow,' and *ουρον*, 'urine.' A condition of the system and of the urine, in which xanthic oxide is deposited from the urine.

XANTICA, *Carminatives*.

XANTOLINA, *Artemisia santonica*.

XENODOCEUM, *Hospital*.

XENODOCHEUM, *Hospital*.

XERANSIS, *Arefaction*, *Drying*.

XERANTIA, *Siccantia*.

XERASIA. Same etymon; from *ξηρος*, 'dry.' A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust. — *Galen*.

XERION, *Catapasma*.

XEROCOLLYRIUM, from *ξηρος*, 'dry,' and *κολλυριον*, 'a collyrium;' *Collyrium siccum*. A dry collyrium.

XERODER'MA, from *ξηρος*, 'dry,' and *δερμα*, 'skin.' Diminution of secretion of the sebaceous glands.

XEROMA, *Xerophthalmia* — *x. Conjunctival*, *Xerophthalmia*.

XEROMA, LACHRYMAL. Suppression of the lachrymal secretion.

XEROMYCTER, *Xeromycteria*.

XEROMYCTERIA, *Xeromycter*, from *ξηρος*, 'dry,' and *μυκτηρ*, 'the nose.' Dryness of the nose.

XEROMYRON, *Unguentum siccum*; from *ξηρος*, 'dry,' and *μυρον*, 'an ointment.' A dry ointment. — *Gorræus*.

XEROPHAGIA, from *ξηρος*, 'dry,' and *φαγω*, 'I eat.' Excessive use of dry aliment. A kind of regimen to which the ancient athlete subjected themselves, with the view of increasing their strength.

XEROPHTHALMIA, *Ophthalmia sicca*, *Ophthalmoxerosis*, *Xeroma*, from *ξηρος*, 'dry,' and *οφθαλμια*, 'inflammation of the eye.' An inflammation of the eye, without discharge. The term — as well as *Conjunctival Xeroma*, and *Cuticular Conjunctiva* — has been given to cases in which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, *lippitudo*.

XEROTRIBIA, see *Friction*.

XEROTRIPSIS, *Friction*, *dry*.

XIPHISTERNUM, *Xiphoid*.

XIPHODES, *Xiphoid*.

XIPHODYMUS, *Thoraco-gastrodymus*.

XIPHOID, *Xiphoides*, *Xiphodes*, *Ensisiformis*, from *ξίφος*, 'a sword,' and *ειδος*, 'shape;' *Cartilago Xiphoides*, *C. Xiphoides*, *C. Sentalis*, *C. Ensisiformis*, *C. Peltalis seu peltatus*, *Ensisiform cartilage*, *Furcella inferior*, *Micronatum os*,

*Macrona'ta Cartila'go, Chondros, Processus xiphosternal'is seu xiphoides seu sterni xiphoides, Xiphisternum, (F.) Appendice ou cartilage xiphoides, C. Mucroné, Appendice sous-sternale, Palette.* The name of the appendix which terminates the sternum beneath; and which is so called from some resemblance to a sword.

XIPHOID LIG'AMENT, *Costo-xiphoid L. (F.) Ligament xiphoidien ou costo-xiphoidien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOP'AGES, *Didymus, Symphyo-epigas'trius*; from *ξίφος*, 'a sword,' and *πηνυμι*, 'I fix.' A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese twins.

XYLO-ALOES, Agallochum — x. Balsamum,

see *Amyris opobalsamum* — x. *Cassia, Laurus cassia* — x. *Cinnamomum, Laurus cinnamomum.*

XYLUM, Gossipium.

XYMPATHIA, Sympathy.

XYRIS, Iris foetidissima.

XYRIS BULBO'SA, X. *Indica, X. Carolina'na, Yellow-eyed Grass*; indigenous; Order, Xyridaceæ; flowering from July to September. The roots and leaves are said to be used by the Hindoos in lepra, and chronic cutaneous diseases in general.

XYRUM, Novacula.

XYRUS, Novacula.

XYSMA, Lintume, Rasura, Scobs.

XYSMOS, Rasura.

XYSTER, Raspatorium.

XYSTOS, Lintume.

XYSTRUM, Raspatorium — x. Ophthalmicum, Ophthalmoxyster.

## Y.

YAM. This esculent root is principally obtained from three species of *Diosco'rea*, — *ala'ta bulbifera*, and *sati'va*. They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like the potato.

YAM ROOT, WILD, *Dioscorea villosa*.

YARD, Penis.

YARROW, COMMON, *Achillea millefolium*.

YAUPON, *Ilex vomitoria*.

YAWNING, from Sax. *geonan, Chasmē, Chasmus, Hia'tus, Osce'do, Oscita'tio, Clonus pandiculatio maxilla'rum, Gaping, (F.) Baillement.* Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *ennui*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency, and obstinacy, become a true disease.

YAWROOT, *Stillingia*.

YAWS, *Framboesia*.

YEAST, Yest — y. Plant, *Torula cerevisiæ*.

YELK, see Ovum.

YELLOW, *Flavus, Lu'teus, Xanthus*, from past participle of Sax. *æælan*, 'to burn.' One of the seven primitive colours.

YELLOW ASH, *Cladrastis tinctoria* — y. Berry, *Podophyllum montanum* — y. Fever, see Fever, Yellow — y. Fever, mild, see Relapse.

YELLOW LIGAMENTS, (F.) *Ligaments jaunes*, occupy the spaces between the vertebral plates,

from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called in consequence of their colour.

YELLOW PAINT, *Hydrastis Canadensis* — y. Root, *Jeffersonia Bartoni* — y. Root, Parsley-leaved, *Xanthorrhiza apiifolia* — y. Root, Shrub, *Xanthorrhiza apiifolia* — y. Star, *Helenium autumnale* — y. Weed, *Ranunculus acris* — y. Wood, *Xanthoxylum fraxineum* — y. Wort, Parsley-leaved, *Xanthorrhiza apiifolia*.

YELLOW S, *Cypripedium luteum, Icterus, Ranunculus acris.*

YERBA DEL SOLDADA, Matico — y. *de Huaca, Datura sanguinea.*

YEST, *Yeast, Sax. gerτ, from γρη, 'a storm,' γρησ, 'stormy'; Cerevisiæ Fermentum, Spuma Cerevisiæ, Barm, (F.) Levure, Levure de la Bière.* The scum, which collects on the surface of beer whilst fermenting. Yest is antiseptic and tonic. It has been much extolled in putrid fevers, — a table-spoonful being given as a dose, in porter, wine, &c. It is, also, applied, in the form of cataplasm, to foul ulcers. In all these cases, it acts by virtue of the generation of carbonic acid gas.

YEUX ARDENS, Ardent eyes — y. *d'Écrevisse, Cancrorum chelæ.*

YEW TREE, *Taxus baccata*.

YLECH, *Ilech*.

YLIATER, *Ilech*.

YOLK, see Ovum.

YOUTH, Adolescence.

YOPON, *Ilex vomitoria*.

YPSELOGLOSSUS, *Basioglossus*.

YRIDES, *Orpiment*.

YSAM'BRA, *Pedigam'bra*. An ancient Spanish poison, of which hellebore formed the greatest part.

YUCCA, *Jatropha manihot*.

Y-WER-A, see Spirit.

## Z.

ZACCHARUM, *Saccharum*.

ZAEL, *Borosail*.

ZAFFRAN, *Crocus*.

ZAMBO, see *Mulatlo*.

ZAMIA INTEGRIFOLIA, see Arrowroot — z. *Puni'la*, see Arrowroot.

ZANNA. A kind of Armenian bole, used by

the ancients as a desiccative. It was also called *Zarnacha*.

ZANTHORRHIZA APIIFOLIA, *Xanthorrhiza apiifolia*.

ZANTHOXYLUM CLAVA HERCULIS, *Xanthoxylum clava Herculis*.

ZAPANIA NODIFLORA, *Anacoluppa*.

ZARNACHA, Zanna.

ZARSA, *Smilax sarsaparilla*.

ZARZAPARILLA, *Smilax sarsaparilla*.

ZEA MAYS, *Z. vulgare*, *Mays zea* seu *Americana*, *Mays*, *Indian Corn*, *Corn*, *Turkey Wheat*, *Maize*, *Ador*, *Indian Wheat*. (F.) *Mais*, *Graine de Turquie*, *Blé d'Inde*, *Blé d'Espagne*, *Blé d'Italie*, *Blé de Turquie*. A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread.

ZÉDOAIRE ROND, *Kæmpferia rotunda*.

ZEDOARIA, *Kæmpferia rotunda* — z. Longa, see *Kæmpferia* — z. Rotunda, see *Kæmpferia*.

ZEDOARY, *Kæmpferia rotunda*.

ZELOSIS, *Zelotypia*.

ZELOTYPIA, from *ζηλος*, 'love,' and *τυπος*, 'form,' 'model,' *Zelo'sis*. It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection; — melancholy, mania, &c.

ZEMA, Decoction.

ZEN'ICON, *Ζενικον*. Ancient name of a Keltic poison, used for poisoning arrows.

ZEPHACH, Peritonæum.

ZERMA, *Zerna*.

ZERNA, *Zerna*. Amongst the barbarous Latin writers it signified ulcerated impetigo, *Impetigo ulcera'ta*.

ZERUMBET, *Cassumuniar*.

ZESIS, Effervescence, Decoction.

ZEST, see *Citrus medica*.

ZESTOLUSIA, Bath, hot.

ZIBEBÆ, see *Vitis vinifera*.

ZIBETHUM, *Civetta*.

ZIGNITES, *Zingrites*.

ZINC, *Zincum*, *Zinkum*, *Speltrum*, *Speanter*, *Tuteaq*, *Zinchum*, *Zint*, *Stannum Indicum*. Perhaps formed etymologically from (G.) *Zin*, 'Tin.' A metal obtained from calamine and blende. Its colour is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated. S. g. 7.190. Melts at 700° Fah., burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.

ZINC ACÉTATE DE, *Zinci acetat*—z. *Butter of Zinc*, *chloridum* — z. *Chloride of Zinc*, *ehloridum* — z. *Chlorure de Zinc*, *ehloridum* — z. *Ferrohydrocyanate of Zinc*, *cyanuretum* — z. *Flowers of Zinc*, *oxydum* — z. *Hydrocyanate of Zinc*, *cyanuretum* — z. *Iodide of Zinc*, *Iodidum* — z. *Ioduret of Zinc*, *Iodidum*.

ZINC AND MORPH'IA, DOUBLE I'ODIDE OF. (F.) *Iodure double de Zinc et de Morphine*. This salt is prepared by boiling iodide of iodhydrate of morphia with water and zinc, after they have acted on each other for some days; filtering and crystallizing. It is considered to combine the properties of morphia and the salts of zinc, and has been prescribed as an anodyne and antispasmodic. Dose, a quarter of a grain.

ZINC OXIDE DE, *Zinci oxydum* — z. *Oxyd of Zinc*, *oxydum*.

ZINC AND STRYD'NIA, DOUBLE I'ODIDE OF. This salt is prepared by digesting for several days in hot water, iodide of iodhydrate of strychnia and zinc; filtering and crystallizing. It has been proposed in the same cases as strychnia.

ZINC SULFATE DE, *Zinci sulphas*—z. *Sulphate of Zinc*, *Sulphas*—z. *Valerianate of Zinc*, *Valerianas*.

ZINCHUM, *Zincum*.

ZINCI ACE'TAS, *Ac'etate of Zinc*, (F.) *Acetate de Zinc*. (*Plumbi acet. lbj, zinc. granul. ℥ix, aquæ destillat. Oijj*. Dissolve the acetate of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquid yields no precipitate, with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one-fifth, and set it aside to crystallize. Pour off the same liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and having heated the solution, drop into it, while hot, a filtered solution of chlorinated lime, until it ceases to let fall sesquioxide of iron; filter the liquor, acidulate it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

ZINCI CARBONAS IMPURUS, *Calamina*.

ZINCI CARBONAS PRÆCIPITATUS, *Precipitated carbonate of Zinc*. (*Zinci sulphat., sodæ carbonat. āā ℥j; aq. bullient. cong.* Dissolve the sulphate of zinc and carbonate of soda respectively in Oiv of water. Mix the solutions; stir, and set the mixture by, that the powder may subside. Having poured off the liquid, wash the precipitated carbonate of zinc with hot water, until the fluid of the washings is nearly tasteless, and dry with a gentle heat.—*Ph. U. S.*) Used to prepare the *Zinci oxidum*.

ZINCI CARBONAS PRÆPARATUS, *Calamina præparata*.

ZINCI CHLO'RIDUM, *Z. chloruretum*, *Zincum chlorat'um*, *Z. muriat'icum (oxydatum)*, *Chloride or Chloruret of Zinc*, *Butter of Zinc*, (F.) *Chlorure de Zinc*. (*Zinc. in frustulis, ℥iiss; acid. nitric., erectæ præparat. āā ℥j; acid. muriat. q. s.* To the zinc, in the porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness.—*Ph. U. S.*) It is very deliquescent in the air, forming the *Butter of Zinc*, *Butyrum Zinci*.

Chloride of Zinc is a powerful escharotic, and has been lately employed as an effective antiseptic.

ZINCI CHLORURETUM, *Z. chloridum*.

ZINCI CYANURETUM, *Hydrocyanas Zinci*, *Zincum Cyanogenat'um*, *Z. Borns'icum*, *Z. Zödtienum*, *Hydrocyanate of Zinc*. This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium. It has been recommended in nervous cardiacalgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with four, three, or two parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

ZINCI FERROHYDROCY'ANAS, *Cyanuretum Ferrozincicum*, *Zincum Ferrohydrocyanicum*, *Ferrohydrocyanate of Zinc*. Made by the mutual decomposition of boiling-hot solutions of sulphate of zinc and ferrocyanate of potassa. It has been recommended in the same cases as the last preparation.

ZINCI HYDROCYANAS, *Zinci cyanuretum*.

ZINCI IOD'IDUM, *Z. Iodure'tum*, *Zincum Iodat'um*, *Iodet'um Zinci* seu *Zincicum*, *Protoiodure'tum Zinci*, *Iodide or Ioduret of Zinc*. This salt

is made by boiling together iodine and zinc to dryness, and subliming. An ointment, composed of a drachm to an ounce of lard, has been used in cases where the external use of iodide of potassium is indicated.

ZINCI IODURETUM, *Z. iodidum* — *z. Nix*, *Zinci oxydum*.

ZINCI OXYDUM, *Zincum calcinatum*, *Oxyd of Zinc*, *Flowers of Zinc*, *Nihil Album*, *Lava Philosophorum*, *L. Philosophica*, *Nix Zinci*, *Nihil Gris'eum*, *Pom'pholyx*, (F.) *Oxide de Zinc*. (Procured by burning zinc in a long, deep, crucible, placed so as to collect the sublimate. Also, by exposing the precipitate thrown down from a solution of sulphate of zinc by carbonate of ammonia to a strong heat, so as to drive off the carbonic acid.—Ph. U. S.) It is tonic and antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. For its external use, see Ung. Zinci.

ZINCI OXYDUM IMPURUM, Tutia.

ZINCI SULPHAS, *Sulphate of Zinc*, *Zincum Vitriolatum*, *Vitriolum Album*, *White Vitriol*, *V. Goslar'ense*, *V. Zinci*, *Sulphas Zin'cium*, *Gilla Vitrioli*, *Gilla Theophrasti*, *Sal Vomito'rium Vitrioli*, *Chalcant'um Album*, *White Copperas*, *Sal Vitrioli*, (F.) *Sulfate de Zinc*. (*Zinc*. in frustul.  $\frac{3}{4}$ ij; *acid. sulphuric.*  $\frac{3}{4}$ vj; *aquæ destillat.* Oij. To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—Ph. U. S.) The sulphate of zinc is inodorous; taste, styptic. It is in white, semi-transparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name *Antipertus'is*, and, as its title imports, given in whooping-cough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to  $\frac{3}{4}$ ss; as a tonic, gr. j to ij. Used externally as a collyrium, gr. j to water f $\frac{3}{4}$ j.

ZINCI VALERIA'NAS, *Vale'rianate of Zinc*. A salt formed by saturating valerianic acid with freshly prepared carbonate of zinc. It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day.

ZINCUM, *Zinc* — *z. Borussicum*, *Zinci cyanuretum* — *z. Calcinatum*, *Zinci oxydum* — *z. Chloratum*, *Zinci chloridum* — *z. Cyanogenatum*, *Zinci cyanuretum* — *z. Ferrohdrocyanicum*, *Zinci ferrohdrocyanas* — *z. Iodatium*, *Zinci iodidum* — *z. Muriatium*, *Zinci chloridum* — *z. Vitriolatium*, *Zinci sulphas* — *z. Zooticum*, *Zinci cyanuretum*.

ZINGIBER, *Amomum zingiber* — *z. Cassumuniar*, see *Cassumuniar* — *z. Cliffordia*, see *Cassumuniar* — *z. Germanicum*, *Arum maculatum* — *z. Officinale*, *Amomum zingiber* — *z. Purpureum*, see *Cassumuniar* — *z. Spurium*, see *Cassumuniar* — *z. Zerumbet*, see *Cassumuniar*.

ZINGIBERIN, *Piperin*.

ZINGRITES, *Zign'ites*. A stone, resembling glass; to which the ancients attributed marvelous properties.

ZINKUM, *Zincum*.

ZINT, *Zincum*.

ZINZIBER, *Amomum zingiber*.

ZIPHAC, *Peritonæum*.

ZIRBUS, *Epiploon* — *z. Adipinus*, *Epiploon*, *gastro-colic*.

ZIZA'NIA AQUAT'ICA, *Wild Rice*; called by the Indians, *Menomene*, grows abundantly on the marshy margins of the northern lakes and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the north-

ern savages and the Canadian traders and hunters with their annual supplies of grain.

ZIZYPHUM, *Jujube*.

ZIZYPHUS JUJUBA, see *Jujube* — *z. Nitida*, see *Jujube* — *z. Sativa*, see *Jujube* — *z. Sylvestris*, see *Jujube*.

ZOA'GRIA, from  $\zeta\omega\eta$ , 'life,' and  $\alpha\gamma\rho\omega$ , 'I catch up.' The saving and preservation of life. *Zoösis*. A reward for preserving life; *Sostrum*. A votive offering hung up in the temples for life saved.

ZOANTHRO'PIA, *Melancholia zoänthro'pia*, from  $\zeta\omega\omega$ , 'an animal,' and  $\alpha\nu\theta\rho\omega\pi\omega\varsigma$ , 'a man.' A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and cynanthropia belong to this species of monomania.

ZOARA, *Insomnia*.

ZOE, *Life*.

ZOGRAPHIA, *Zoographia*.

ZOIATRIA, *Veterinary art*.

ZOIATRUS, *Hippiater*.

ZOMIDIUM, *Jus*.

ZOMOS, *Consommé*, *Jus*.

ZONA, *Herpes zoster* — *z. Castitatis*, *Hymen* — *z. Ciliaris*, *Ciliary zone* — *z. Ignea*, *Herpes zoster*.

ZONA PELLUCIDA, *Oolemma pellucidum*, *Vitellary membrane*, (F.) *Vitelline*, *Membrane vitelline*. The membrane that surrounds the yolk in the mammalia is so called on account of its thickness and peculiar transparency.

ZONA SERPIGINOSA, *Herpes zoster* — *z. Virginitatis*, *Hymen*.

ZONA TENDINO'SA. The whitish circle around the auriculo-ventricular orifice of the right side of the heart.

ZONE, *Cingulum*.

ZONULA CILIARIS, see *Ciliary*, and *Ciliary zone* — *z. Cochleæ*, see *Lamina spiralis* — *z. Hildani*, *Cingulum Hildani* — *z. Zinnii*, see *Ciliary*.

ZOÖCHEMIA, *Chymistry*, *animal*.

ZOÖCHEMICAL, *Zoöchym'ical*, *Zoöchem'icus* seu *Zoöchym'icus*. Appertaining or having relation to animal chymistry.

ZOÖCHEMY, *Chymistry*, *animal*.

ZOÖCHYMY, *Chymistry*, *animal*.

ZOÖGENIUM, *Azote*.

ZOÖG'ENY, *Zoögen'ia*, *Zoögen'esis*, from  $\zeta\omega\omega$ , 'animal,' and  $\gamma\epsilon\nu\sigma\iota\varsigma$ , 'generation.' The doctrine of animal formation.

ZOÖG'RAPHY, *Zoögra'phia*, *Zogra'phia*, from  $\zeta\omega\omega$ , 'an animal,' and  $\gamma\rho\alpha\phi\eta$ , 'a description.' A description of animals. The natural history of animals.

ZOÖHEMATINE, *Hæmatine*.

ZOÖHY'LAS, from  $\zeta\omega\omega$ , 'an animal,' and  $\upsilon\lambda\eta$ , 'matter.' *Animal matter*.

ZOÖHY'LICA CONCREMEN'TA. Concretions formed of animal matter.

ZOÖIASIS, *Veterinary art*.

ZOÖL'OGIST, *Zoölogis'ta*, *Zoö'logus*, from  $\zeta\omega\omega$ , 'an animal,' and  $\lambda\omicron\gamma\omicron\varsigma$ , 'description.' One skilled in the natural history of animals.

ZOÖL'OGY, *Zoölog'ia*. Same etymon. The natural history of animals.

ZOÖMAGNETISMUS, *Magnetism*, *animal*.

ZOÖMYCUS, *Mucus*.

ZOÖMYXA, *Mucus*.

ZOÖN, *Animal*.

ZOÖNOMIA, *Organozoönom'ia*, *Zoönom'y*, from  $\zeta\omega\omega$ , 'an animal,' and  $\nu\omicron\mu\omicron\varsigma$ , 'law.' The laws which govern the organic actions of animals in general:—*Animal Physiol'ogy*, *Zoöphysiolog'ia*.

ZOONOSOLOG'IA, from ζων, 'an animal,' νοσος, 'a disease,' and λογος, 'description.' The nosology of animals.

ZOOPATHOLOG'IA, from ζων, 'an animal,' παθος, 'a disease,' and λογος, 'a description.' The pathology of animals.

ZOÖPH'AGOUS, *Zoöph'agus*, (F.) *Zoöphage*. from ζων, 'an animal,' and φαγω, 'I eat.' Feeding on animals. Carnivorous.

ZOÖPTHALMUS, Hydrophthalmia.

ZOÖPHYSIOLOGIA, Physiology, animal, Zoonomia.

ZOÖPHYTE, *Zoöph'ytum*, *Phytozo'ön*, *Animal plant*, from ζων, 'an animal,' and φυτόν, 'a plant.' A name given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.

ZOÖSIS, Animation, Zoagria.

ZOOSPERMATA, Spermatozoa.

ZOÖSPERMES, Spermatozoa.

ZOOTHAP'SIS, from ζων, 'life,' and θάπτω, 'I inter.' Burial alive. Premature interment.

ZOOT'OMIST, *Zootom'icus*. Same etymon as the next. One who dissects animals.

ZOOT'OMY, *Zoötom'ia*, from ζων, 'an animal,' and τέμνω, 'I cut.' *Theriot'omy*, *Anatom'ia animalis seu comparati'ua seu compara'tu*, *Comparative Anatomy*. The anatomy of animals. Animal anatomy.

ZOPISSA, see *Pinus sylvestris*.

ZOPYRON, Fomites.

ZOSTER, Herpes zoster.

ZOSTERA MARINA, *Pila marina* — z. *Maritima*, *Pila marina*.

ZOZAR, Saccharum.

ZUCARO, Saccharum.

ZUCCARUM, Saccharum.

ZUCHAR, Saccharum.

ZUCCHARUM, Saccharum.

ZUCHRA, Saccharum.

ZULAPIJUM, Julep.

ZYGAPOPHYSES, see *Vertebrae*.

ZYGOMA, *Malæ os*.

ZYGOMATIC, *Zygomat'icus*, *Juga'lis*, *Jugal*. That which relates to the *zygoma* or check-bone.

ZYGOMATIC ARCH, see *Zygomat'ic process* — z. *Bone*, *Malæ os*.

ZYGOMATIC FOSSA is the space included between the posterior margin of the outer ala of the pterygoid process, and the crista which descends from the malar tuberosity to the superior alveolar margin.

ZYGOMATIC MUSCLES are two in number. 1. *Zygomat'icus major*, *Distort'or Oris*, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique*, which is situate obliquely at the fore-part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the *os malæ*, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomat'icus minor*, (F.) *Petit Zygomato-labial* (Ch.), *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the *os malæ*, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

ZYGOMATIC PROCESS, *Processus zygomat'icus*, *Apoph'ysis Zygomat'ica*, *Malar process*, *Jugal process*, arises from the outer surface of the temporal bone by two roots, one of which is transverse, (*Condyle du temporal*, Ch.), and the other longitudinal: between them is the glenoid cavity. The process passes forwards, and is articulated with the posterior angle of the *os malæ*, with which it forms a bony bridge, called the *Zygomat'ic arch*, *Pars zygomat'icus*, *Arcus zygomat'icus*, (F.) *Arcade Zygomatique*. The cavity, beneath this bridge, is sometimes called *Zygo'ma*.

ZYGOMATIC SUTURE is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.

ZYGMATIQUE GRAND, *Zygomat'icus major* — z. *Petit*, *Zygomat'icus minor*.

ZYGMATO-LABIAL, *Zygomat'icus major* — z. *Labial*, *petit*, *Zygomat'icus major* — z. *Maxillaire*, *Masseter* — z. *Orcilaire*, *Anterior auris*.

ZYGOPHYLLUM FAGABO, (F.) *Fabagelle*. A Syrian and Mauritanian plant, possessed of an acrid and bitter taste. It has vermifuge properties. The Arabs believe that the recently expressed juice of *Zygo'phyllum simplex*, is capable of removing specks from the cornea.

ZYMA, Ferment.

ZYMOMA, Ferment.

ZYMOSES, Fermentation, see *Zymotic*.

ZYMOT'IC, *Zymot'icus*, from ζυμοω, 'to ferment.' An epithet proposed for any epidemic, endemic, or contagious affection. *Zymosis* is used to signify such an affection.

ZYTHOGALA, Posset.

ZYTHUM, Cerevisia.

ZYTHUS, Cerevisia.

CATALOGUE  
OF  
BLANCHARD & LEA'S  
MEDICAL AND SURGICAL PUBLICATIONS.

PHILADELPHIA, SEPTEMBER, 1853.

TO THE MEDICAL PROFESSION.

In submitting the following catalogue of our publications in medicine and the collateral sciences, we beg to remark, that no exertions are spared to render the issues of our press worthy a continuance of the confidence which they have thus far enjoyed, both as regards the high character of the works themselves, and in respect to every point of typographical accuracy and mechanical execution. Gentlemen desirous of adding to their libraries from our list, can in almost all cases procure the works they wish from the nearest bookseller, who can readily order any which he may not have on hand. From the great variation in the expenses of transportation through territories so extensive as those of the United States, prices cannot be the same in all sections of the country, and therefore we are unable to affix retail prices to our publications. Information on this point may be had of booksellers generally, or from ourselves, and all inquiries respecting any of our books will meet with prompt attention by addressing

BLANCHARD & LEA, PHILADELPHIA.

**TWO MEDICAL PERIODICALS, FREE OF POSTAGE,  
FOR FIVE DOLLARS PER ANNUM.**

---

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, subject to postage, when not paid for in advance, - - - - - \$5 00  
THE MEDICAL NEWS AND LIBRARY, invariably in advance, - - - 1 00  
OR, BOTH PERIODICALS furnished, FREE OF POSTAGE, for Five Dollars remitted in advance.

---

**THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES,**

EDITED BY ISAAC HAYS, M. D.,

is published Quarterly, on the first of January, April, July, and October. Each number contains at least two hundred and eighty large octavo pages, appropriately illustrated, wherever necessary, by engravings on copper, stone, or wood. It has now been issued regularly for a period of THIRTY-FIVE years, during a quarter of a century of which it has been under the control of the present editor. Throughout this long space of time, it has maintained its position in the highest rank of medical periodicals both at home and abroad, and has received the cordial support of the entire profession in this country. Its list of Collaborators will be found to contain a large number of the most distinguished names of the profession in every section of the United States, rendering the department devoted to

**ORIGINAL COMMUNICATIONS**

full of varied and important matter, of great interest to all practitioners.

As the aim of the Journal, however, is to combine the advantages presented by all the different varieties of periodicals, in its

**REVIEW DEPARTMENT**

will be found extended and impartial reviews of all important new works, presenting subjects of novelty and interest, together with very numerous

**BIBLIOGRAPHICAL NOTICES,**

including nearly all the medical publications of the day, both in this country and Great Britain, with a choice selection of the more important continental works. This is followed by the

## QUARTERLY SUMMARY,

being a very full and complete abstract, methodically arranged, of the

### IMPROVEMENTS AND DISCOVERIES IN THE MEDICAL SCIENCES.

This department of the Journal, so important to the practising physician, is the object of especial care on the part of the editor. It is classified and arranged under different heads, thus facilitating the researches of the reader in pursuit of particular subjects, and will be found to present a very full and accurate digest of all observations, discoveries, and inventions recorded in every branch of medical science. The very extensive arrangements of the publishers are such as to afford to the editor complete materials for this purpose, as he not only regularly receives

### ALL THE AMERICAN MEDICAL AND SCIENTIFIC PERIODICALS,

but also twenty or thirty of the more important Journals issued in Great Britain and on the Continent, thus presenting in a convenient compass a thorough and complete abstract of everything interesting or important to the physician occurring in any part of the civilized world.

An evidence of the success which has attended these efforts may be found in the constant and steady increase in the subscription list, which renders it advisable for gentlemen desiring the Journal, to make known their wishes at an early day, in order to secure a year's set with certainty, the publishers having frequently been unable to supply copies when ordered late in the year. To their old subscribers, many of whom have been on their list for twenty or thirty years, the publishers feel that no promises are necessary; but those who may desire for the first time to subscribe, can rest assured that no exertion will be spared to maintain the Journal in the high position which it has occupied for so long a period.

By reference to the terms it will be seen that, in addition to this large amount of valuable and practical information on every branch of medical science, the subscriber, by paying in advance, becomes entitled, without further charge, to

### THE MEDICAL NEWS AND LIBRARY,

a monthly periodical of thirty-two large octavo pages. Its "NEWS DEPARTMENT" presents the current information of the day, while the "LIBRARY DEPARTMENT" is devoted to presenting standard works on various branches of medicine. Within a few years, subscribers have thus received, without expense, the following works which have passed through its columns:—

WATSON'S LECTURES ON THE PRACTICE OF PHYSIC.

BRODIE'S CLINICAL LECTURES ON SURGERY.

TODD AND BOWMAN'S PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN.  
Parts I., II., and III., with numerous wood-cuts.

WEST'S LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.

MALGAIGNE'S OPERATIVE SURGERY, with wood-cuts, and

SIMON'S LECTURES ON GENERAL PATHOLOGY.

While the year 1853, presents

### THE CONTINUATION OF TODD & BOWMAN'S PHYSIOLOGY, BEAUTIFULLY ILLUSTRATED ON WOOD.

Subscribers for 1853, who do not possess the commencement of Todd and Bowman can obtain it, in a handsome octavo volume, of 552 pages, with over 150 illustrations, by mail, free of postage, on a remittance of \$2 50 to the publishers.

It will thus be seen that for the small sum of FIVE DOLLARS, paid in advance, the subscriber will obtain a Quarterly and a Monthly periodical,

### EMBRACING ABOUT FIFTEEN HUNDRED LARGE OCTAVO PAGES

mailed to any part of the United States, free of postage.

These very favorable terms are now presented by the publishers with the view of removing all difficulties and objections to a full and extended circulation of the Medical Journal to the office of every member of the profession throughout the United States. The rapid extension of mail facilities, will now place the numbers before subscribers with a certainty and dispatch not heretofore attainable; while by the system now proposed, every subscriber throughout the Union is placed upon an equal footing, at the very reasonable price of Five Dollars for two periodicals, without further expense.

Those subscribers who do not pay in advance will bear in mind that their subscription of Five Dollars will entitle them to the Journal only, without the News, and that they will be at the expense of their own postage on the receipt of each number. The advantage of a remittance when ordering the Journal will thus be apparent.

As the Medical News and Library is in no case sent without advance payment, its subscribers will always receive it free of postage.

It should also be borne in mind that the publishers will now take the risk of remittances by mail, only requiring, in cases of loss, a certificate from the subscriber's Postmaster, that the money was duly mailed and forwarded.

Funds at par at the subscriber's place of residence received in payment of subscriptions.

Address, **BLANCHARD & LEA, PHILADELPHIA.**

ASHWELL (SAMUEL), M. D.

**A PRACTICAL TREATISE ON THE DISEASES PECULIAR TO WOMEN.**

Illustrated by Cases derived from Hospital and Private Practice. With Additions by PAUL BECK GODDARD, M. D. Second American edition. In one octavo volume, of 520 pages.

One of the very best works ever issued from the press on the diseases of females.—*Western Lancet*.

This is an invaluable work.—*Missouri Medical and Surgical Journal*.

We strongly recommend Dr. Ashwell's Treatise to our readers as a valuable book of reference, on an extensive, complicated, and highly important class of diseases.—*Edinburgh Monthly Journal of Medical Sciences*.

ARNOTT (NEILL), M. D.

**ELEMENTS OF PHYSICS; or Natural Philosophy, General and Medical.**

Written for universal use, in plain or non-technical language. A new edition, by ISAAC HAYS, M. D. Complete in one octavo volume, of 484 pages, with about two hundred illustrations.

ABERCROMBIE (JOHN), M. D.

**PATHOLOGICAL AND PRACTICAL RESEARCHES ON DISEASES OF**

THE STOMACH, INTESTINAL CANAL, &c. Fourth edition, in one small octavo volume, of 260 pages.

BENNETT (HENRY), M. D.

**A PRACTICAL TREATISE ON INFLAMMATION OF THE UTERUS**

AND ITS APPENDAGES, and on Ulceration and Induration of the Neck of the Uterus. Third edition. In one neat octavo volume, of 350 pages, with wood-cuts.

We shall not call it a second edition, because, as Dr. Bennett truly observes, it is really a new work. It will be found to contain not only a faithful history of the various pathological changes produced by inflammation in the uterus and its annexed organs, in the different phases of female life, but also an accurate analysis of the influence exercised by inflammation in the production of the various morbid conditions of the uterine system, hitherto described and treated as functional.—*British and Foreign Medical-Chirurgical Review*.

Few works issue from the medical press which are at once original and sound in doctrine; but such, we feel assured, is the admirable treatise now before

us. The important practical precepts which the author inculcates are all rigidly deduced from facts. . . . Every page of the book is good, and eminently practical. . . . So far as we know and believe, it is the best work on the subject of which it treats.—*Monthly Journal of Medical Science*.

We refer our readers with satisfaction to this work for information on a hitherto most obscure and difficult class of diseases.—*London Medical Gazette*.

One of the best practical monographs amongst modern English medical books.—*Transylvania Medical Journal*.

BEALE (LIONEL JOHN), M. R. C. S., &amp;c.

**THE LAWS OF HEALTH IN RELATION TO MIND AND BODY.**

A Series of Letters from an old Practitioner to a Patient. In one handsome volume, royal 12mo., extra cloth.

BILLING (ARCHIBALD), M. D.

**THE PRINCIPLES OF MEDICINE.** Second American, from the Fifth and

Improved London edition. In one handsome octavo volume, extra cloth, 250 pages.

BLAKISTON (PEYTON), M. D., F. R. S., &amp;c.

**PRACTICAL OBSERVATIONS ON CERTAIN DISEASES OF THE**

CHEST, and on the Principles of Auscultation. In one volume, 8vo., pp. 384.

BENEDICT (N. D.), M. D.

**COMPENDIUM OF LECTURES ON THE THEORY AND PRACTICE**

OF MEDICINE, delivered by PROFESSOR CHAPMAN in the University of Pennsylvania. In one octavo volume, of 258 pages.

BURROWS (GEORGE), M. D.

**ON DISORDERS OF THE CEREBRAL CIRCULATION, and on the Con-**

nection between the Affections of the Brain and Diseases of the Heart. In one 8vo. vol., with colored plates, pp. 216.

**BUDD (GEORGE), M. D., F. R. S.,**  
Professor of Medicine, in King's College, London.

**ON DISEASES OF THE LIVER.** Second American, from the second and enlarged London edition. In one very handsome octavo volume, with four beautifully colored plates, and numerous wood-cuts. pp. 468. New edition. (*Now Ready.*)

The reputation which this work has obtained as a full and practical treatise on an important class of diseases will not be diminished by this improved and enlarged edition. It has been carefully and thoroughly revised by the author; the number of plates has been increased, and the style of its mechanical execution will be found materially improved.

The full digest we have given of the new matter introduced into the present volume, is evidence of the value we place on it. The fact that the profession has required a second edition of a monograph such as that before us, bears honorable testimony to its usefulness. For many years, Dr. Budd's work must be the authority of the great mass of British practitioners on the hepatic diseases; and it is satisfactory that the subject has been taken up by so able and experienced a physician.—*British and Foreign Medico-Chirurgical Review.*

We cannot too strongly recommend the diligent study of this volume. The work cannot fail to rank the name of its author among the most enlightened pathologists and soundest practitioners of the day.—*Medico-Chirurgical Review.*

We feel bound to say that Dr. Budd's treatise is greatly in advance of its predecessors. It is the first work in which the results of microscopical anatomy and the discoveries of modern chemistry have been brought fully to bear upon the pathology and treatment of diseases of the liver; and it is the only work in which a method of studying diseases of this organ, founded upon strictly inductive principles, is developed.—*Dublin Medical Press.*

Having thus attempted to give a brief summary of the more important contents of this work, we would, in conclusion, recommend it to every practitioner and student as well worthy of a careful and patient perusal.—*The New Orleans Medical and Surgical Journal.*

**BLOOD AND URINE (MANUALS ON).**

**BY JOHN WILLIAM GRIFFITH, G. OWEN REESE, AND ALFRED MARKWICK.** One thick volume, royal 12mo., extra cloth, with plates. pp. 460.

**BRIGHAM (AMARIAH), M. D.**

**ON MENTAL CULTIVATION AND EXCITEMENT.** In one neat volume, 18mo., extra cloth.

**BRODIE (SIR BENJAMIN C.), M. D., &c.**

**CLINICAL LECTURES ON SURGERY.** 1 vol. 8vo., cloth. 350 pp.

BY THE SAME AUTHOR.

**PATHOLOGICAL AND SURGICAL OBSERVATIONS ON THE DISEASES OF THE JOINTS.** 1 vol. 8vo., cloth. pp. 216.

BY THE SAME AUTHOR.

**LECTURES ON THE DISEASES OF THE URINARY ORGANS.** 1 vol. 8vo., cloth. pp. 214.

\*.\* These three works may be had neatly bound together, forming a large volume of "Brodie's Surgical Works." pp. 780.

**BIRD (GOLDING), A. M., M. D., &c.**

**URINARY DEPOSITS: THEIR DIAGNOSIS, PATHOLOGY, AND THERAPEUTICAL INDICATIONS.** A new American, from the third and improved London edition. With over sixty illustrations. In one royal 12mo. volume, extra cloth. pp. 338.

The new edition of Dr. Bird's work, though not increased in size, has been greatly modified, and much of it rewritten. It now presents, in a compendious form, the gist of all that is known and reliable in this department. From its terse style and convenient size, it is particularly applicable to the student, to whom we cordially commend it.—*The Medical Examiner.*

It can scarcely be necessary for us to say anything of the merits of this well-known Treatise, which so admirably brings into practical application the results of those microscopical and chemical researches regarding the physiology and pathology of the uri-

nary secretion, which have contributed so much to the increase of our diagnostic powers, and to the extension and satisfactory employment of our therapeutic resources. In the preparation of this new edition of his work, it is obvious that Dr. Golding Bird has spared no pains to render it a faithful representation of the present state of scientific knowledge on the subject it embraces.

Although, of course, there are many topics which are open to differences of opinion, we cannot point to any well-substantiated result of inquiry which the author has overlooked.—*The British and Foreign Medico-Chirurgical Review.*

BY THE SAME AUTHOR.

**ELEMENTS OF NATURAL PHILOSOPHY;** being an Experimental Introduction to the Physical Sciences. Illustrated with nearly four hundred wood-cuts. From the third London edition. In one neat volume, royal 12mo. pp. 402.

**BARTLETT (ELISHA), M. D.,**

Professor of Materia Medica and Medical Jurisprudence in the College of Physicians and Surgeons, New York.

**THE HISTORY, DIAGNOSIS, AND TREATMENT OF THE FEVERS OF THE UNITED STATES.** Third edition, revised and improved. In one octavo volume, of six hundred pages, beautifully printed, and strongly bound.

In preparing a new edition of this standard work, the author has availed himself of such observations and investigations as have appeared since the publication of his last revision, and he has endeavored in every way to render it worthy of a continuance of the very marked favor with which it has been hitherto received.

The masterly and elegant treatise, by Dr. Bartlett is invaluable to the American student and practitioner.—*Dr. Holmes's Report to the Nat. Med. Association.*

We regard it, from the examination we have made of it, the best work on fevers extant in our language, and as such cordially recommend it to the medical public.—*St. Louis Medical and Surgical Journal.*

Take it altogether, it is the most complete history of our fevers which has yet been published, and every practitioner should avail himself of its contents.—*The Western Lancet.*

Of the value and importance of such a work, it is needless here to speak; the profession of the United States owe much to the author for the very able volume which he has presented to them, and for the careful and judicious manner in which he has executed his task. No one volume with which we are acquainted contains so complete a history of our fevers as this. To Dr. Bartlett we owe our best thanks for the very able volume he has given us, as embodying certainly the most complete, methodical, and satisfactory account of our fevers anywhere to be met with.—*The Charleston Med. Journal and Review.*

BY THE SAME AUTHOR.

**AN INQUIRY INTO THE DEGREE OF CERTAINTY IN MEDICINE,** and into the Nature and Extent of its Power over Disease. In one volume, royal 12mo. pp. 81.

**BOWMAN (JOHN E.), M. D.**

**PRACTICAL HANDBOOK OF MEDICAL CHEMISTRY.** In one neat volume, royal 12mo., with numerous illustrations. pp. 288.

BY THE SAME AUTHOR.

**INTRODUCTION TO PRACTICAL CHEMISTRY, INCLUDING ANALYSIS.** With numerous illustrations. In one neat volume, royal 12mo. pp. 350.

**COLOMBAT DE L'ISERE.**

**A TREATISE ON THE DISEASES OF FEMALES,** and on the Special Hygiene of their Sex. Translated, with many Notes and Additions, by C. D. MEIGS, M. D. Second edition, revised and improved. In one large volume, octavo, with numerous wood-cuts. pp. 720.

The treatise of M. Colombat is a learned and laborious commentary on these diseases, indicating very considerable research, great accuracy of judgment, and no inconsiderable personal experience. With the copious notes and additions of its experienced and very erudite translator and editor, Dr. Meigs, it presents, probably, one of the most complete and comprehensive works on the subject we possess.—*American Med. Journal.*

M. Colombat De L'isere has not consecrated ten years of studious toil and research to the frailer sex in vain; and although we regret to hear it is at the expense of health, he has imposed a debt of gratitude as well upon the profession, as upon the mothers and daughters of beautiful France, which that gallant nation knows best how to acknowledge.—*New Orleans Medical Journal.*

**COPLAND (JAMES), M. D., F. R. S., &c.**

**OF THE CAUSES, NATURE, AND TREATMENT OF PALSY AND APOPLEXY,** and of the Forms, Seats, Complications, and Morbid Relations of Paralytic and Apoplectic Diseases. In one volume, royal 12mo., extra cloth. pp. 326.

**CHAPMAN (PROFESSOR N.), M. D., &c.**

**LECTURES ON FEVERS, DROPSY, GOUT, RHEUMATISM, &c. &c.** In one neat Svo. volume. pp. 450.

**CLYMER (MEREDITH), M. D., &c.**

**FEVERS; THEIR DIAGNOSIS, PATHOLOGY, AND TREATMENT.** Prepared and Edited, with large Additions, from the Essays on Fever in Tweedie's Library of Practical Medicine. In one octavo volume, of 600 pages.

**CARSON (JOSEPH), M. D.,**

Professor of Materia Medica and Pharmacy in the University of Pennsylvania.

**SYNOPSIS OF THE COURSE OF LECTURES ON MATERIA MEDICA AND PHARMACY,** delivered in the University of Pennsylvania. In one very neat octavo volume, of 208 pages.

CARPENTER (WILLIAM B.), M. D., F. R. S., &c.,

Examiner in Physiology and Comparative Anatomy in the University of London.

**PRINCIPLES OF HUMAN PHYSIOLOGY;** with their chief applications to Psychology, Pathology, Therapeutics, Hygiene, and Forensic Medicine. Fifth American, from the fourth and enlarged London edition. With three hundred and fourteen illustrations. Edited, with additions, by FRANCIS GURNEY SMITH, M. D., Professor of the Institutes of Medicine in the Pennsylvania Medical College, &c. In one very large and beautiful octavo volume, of about 1100 large pages, handsomely printed and strongly bound in leather, with raised bands. New edition. (*Just Issued.*)

*From the Author's Preface to the present Edition.*

"When the author, on the completion of his 'Principles of General and Comparative Physiology,' applied himself to the preparation of his 'Principles of Human Physiology,' for the press, he found that nothing short of an entire remodelling of the preceding edition would in any degree satisfy his notions of what such a treatise ought to be. For although no fundamental change had taken place during the interval in the fabric of Physiological Science, yet a large number of less important modifications had been effected, which had combined to produce a very considerable alteration in its aspect. Moreover, the progressive maturation of his own views, and his increased experience as a teacher, had not only rendered him more keenly alive to the imperfections which were inherent in its original plan, but had caused him to look upon many topics in a light very different from that under which he had previously regarded them; and, in particular, he felt a strong desire to give to his work as *practical* a character as possible, without foregoing the position which (he trusts he may say without presumption) he had succeeded in gaining for it, as a *philosophical* exposition of one important department of Physiological Science. He was led, therefore, to the determination of, in reality, producing a *new treatise*, in which only those parts of the old should be retained, which might express the existing state of knowledge, and of his own opinions on the points to which they relate."

The American edition has been printed from sheets prepared for the purpose by the author, who has introduced nearly one hundred illustrations not in the London edition; while it has also enjoyed the advantage of a careful superintendence on the part of the editor, who has added notices of such more recent investigations as had escaped the author's attention. Neither care nor expense has been spared in the mechanical execution of the work to render it superior to former editions, and it is confidently presented as in every way one of the handsomest volumes as yet placed before the medical profession in this country.

The most complete work on the science in our language.—*Am. Med. Journal.*

The most complete exposition of physiology which any language can at present give.—*Brit. and For. Med.-Chirurg. Review.*

We have thus adverted to some of the leading "additions and alterations," which have been introduced by the author into this edition of his physiology. These will be found, however, very far to exceed the ordinary limits of a new edition, "the old materials having been incorporated with the new, rather than the new with the old." It now certainly presents the most complete treatise on the subject within the reach of the American reader; and while, for availability as a text-book, we may perhaps regret its growth in bulk, we are sure that the student of physiology will feel the impossibility of presenting a thorough digest of the facts of the science within a more limited compass.—*Medical Examiner.*

The greatest, the most reliable, and the best book on the subject which we know of in the English language.—*Stethoscope.*

The most complete work now extant in our language.—*N. O. Med. Register.*

We do not hesitate a moment in pronouncing it the best text-book in the English language. In this new edition, the author has again displayed his great zeal. The work is almost a new one, having been entirely remodelled; a vast amount of valuable material has been added, and with great propriety, assigned its appropriate place.—*St. Louis Med. and Surg. Journal.*

The best text-book in the language on this extensive subject.—*London Med. Times.*

A complete cyclopaedia of this branch of science.—*N. Y. Med. Times.*

The standard of authority on physiological subjects. \* \* \* In the present edition, to particularize the alterations and additions which have been made, would require a review of the whole work, since scarcely a subject has not been revised and altered, added to, or entirely remodelled to adapt it to the present state of the science.—*Charleston Med. Journ.*

The changes are too numerous to admit of an extended notice in this place. At every point where the recent diligent labors of organic chemists and micrographers have furnished interesting and valuable facts, they have been appropriated, and no pains have been spared, in so incorporating and arranging them that the work may constitute one harmonious system.—*Southern Med. and Surg. Journal.*

Any reader who desires a treatise on physiology may feel himself entirely safe in ordering this.—*Western Med. and Surg. Journal.*

From this hasty and imperfect allusion it will be seen by our readers that the alterations and additions to this edition render it almost a new work—and we can assure our readers that it is one of the best summaries of the existing facts of physiological science within the reach of the English student and physician.—*N. Y. Journal of Medicine.*

The profession of this country, and perhaps also of Europe, have anxiously and for some time awaited the announcement of this new edition of Carpenter's Human Physiology. His former editions have for many years been almost the only text-book on Physiology in all our medical schools, and its circulation among the profession has been unsurpassed by any work in any department of medical science.

It is quite unnecessary for us to speak of this work as its merits would justify. The mere announcement of its appearance will afford the highest pleasure to every student of Physiology, while its perusal will be of infinite service in advancing physiological science.—*Ohio Med. and Surg. Journ.*

BY THE SAME AUTHOR.

**PRINCIPLES OF GENERAL AND COMPARATIVE PHYSIOLOGY.**

Intended as an Introduction to the Study of Human Physiology; and as a Guide to the Philosophical pursuit of Natural History. New and improved edition, (*preparing.*)

## CARPENTER (WILLIAM B.), M. D., F. R. S.,

Examiner in Physiology and Comparative Anatomy in the University of London.

ELEMENTS (OR MANUAL) OF PHYSIOLOGY, INCLUDING PHYSIOLOGICAL ANATOMY. Second American, from a new and revised London edition. With one hundred and ninety illustrations. In one very handsome octavo volume. (*Lately Issued.*)

In publishing the first edition of this work, its title was altered from that of the London volume, by the substitution of the word "Elements" for that of "Manual," and with the author's sanction the title of "Elements" is still retained as being more expressive of the scope of the treatise. A comparison of the present edition with the former one will show a material improvement, the author having revised it thoroughly, with a view of rendering it completely on a level with the most advanced state of the science. By condensing the less important portions, these numerous additions have been introduced without materially increasing the bulk of the volume, and while numerous illustrations have been added, and the general execution of the work improved, it has been kept at its former very moderate price.

To say that it is the best manual of Physiology now before the public, would not do sufficient justice to the author.—*Buffalo Medical Journal.*

In his former works it would seem that he had exhausted the subject of Physiology. In the present, he gives the essence, as it were, of the whole.—*N. Y. Journal of Medicine.*

Those who have occasion for an elementary treatise on Physiology, cannot do better than to possess themselves of the manual of Dr. Carpenter.—*Medical Examiner.*

The best and most complete exposé of modern Physiology, in one volume, extant in the English language.—*St. Louis Medical Journal.*

With such an aid in his hand, there is no excuse for the ignorance often displayed respecting the subjects of which it treats. From its unpretending dimensions, it may not be so esteemed by those anxious to make a parade of their erudition; but whoever masters its contents will have reason to be proud of his physiological acquirements. The illustrations are well selected and finely executed.—*Dublin Med. Press.*

BY THE SAME AUTHOR.

## A PRIZE ESSAY ON THE USE OF ALCOHOLIC LIQUORS IN HEALTH AND DISEASE. In one neat 12mo. volume.

BY THE SAME AUTHOR. (*Preparing.*)

## THE MICROSCOPE AND ITS REVELATIONS. In one handsome volume, beautifully illustrated with plates and wood-cuts.

## CHELIUS (J. M.), M. D.,

Professor of Surgery in the University of Heidelberg, &amp;c.

## A SYSTEM OF SURGERY. Translated from the German, and accompanied with additional Notes and References, by JOHN F. SOUTH. Complete in three very large octavo volumes, of nearly 2200 pages, strongly bound, with raised bands and double titles.

We do not hesitate to pronounce it the best and most comprehensive system of modern surgery with which we are acquainted.—*Medico-Chirurgical Review.*

The fullest and ablest digest extant of all that relates to the present advanced state of surgical pathology.—*American Medical Journal.*

As complete as any system of Surgery can well be.—*Southern Medical and Surgical Journal.*

The most learned and complete systematic treatise now extant.—*Edinburgh Medical Journal.*

A complete encyclopædia of surgical science—a very complete surgical library—by far the most complete and scientific system of surgery in the English language.—*N. Y. Journal of Medicine.*

The most extensive and comprehensive account of the art and science of Surgery in our language.—*Lancet.*

## CHRISTISON (ROBERT), M. D., V. P. R. S. E., &amp;c.

## A DISPENSATORY; or, Commentary on the Pharmacopœias of Great Britain and the United States; comprising the Natural History, Description, Chemistry, Pharmacy, Actions, Uses, and Doses of the Articles of the Materia Medica. Second edition, revised and improved, with a Supplement containing the most important New Remedies. With copious Additions, and two hundred and thirteen large wood-engravings. By R. EGLESFELD GRIFFITH, M. D. In one very large and handsome octavo volume, of over 1000 pages.

It is not needful that we should compare it with the other pharmacopœias extant, which enjoy and merit the confidence of the profession: it is enough to say that it appears to us as perfect as a Dispensatory, in the present state of pharmaceutical science, could be made. If it omits any details pertaining to this branch of knowledge which the student has a right to expect in such a work, we confess the omission has escaped our scrutiny. We cordially recommend this work to such of our readers as are in need of a Dispensatory. They cannot make choice of a better.—*Western Journ. of Medicine and Surgery.*

There is not in any language a more complete and perfect Treatise.—*N. Y. Annalist.*

In conclusion, we need scarcely say that we strongly recommend this work to all classes of our readers. As a Dispensatory and commentary on the Pharmacopœias, it is unrivalled in the English or any other language.—*The Dublin Quarterly Journal.*

We earnestly recommend Dr. Christison's Dispensatory to all our readers, as an indispensable companion, not in the Study only, but in the Surgery also.—*British and Foreign Medical Review.*

CONDIE (D. F.), M. D., &amp;c.

**A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN.** Third edition, revised and augmented. In one large volume, 8vo., of over 700 pages.

Dr. Condie's scholarship, acumen, industry, and practical sense are manifested in this, as in all his numerous contributions to science.—*Dr. Holmes's Report to the American Medical Association.*

Taken as a whole, in our judgment, Dr. Condie's Treatise is the one from the perusal of which the practitioner in this country will rise with the greatest satisfaction.—*Western Journal of Medicine and Surgery.*

One of the best works upon the Diseases of Children in the English language.—*Western Lancet.*

We feel assured from actual experience that no physician's library can be complete without a copy of this work.—*N. Y. Journal of Medicine.*

Perhaps the most full and complete work now before the profession of the United States; indeed, we may say in the English language. It is vastly superior to most of its predecessors.—*Transylvania Med. Journal.*

A veritable pædiatric encyclopædia, and an honor to American medical literature.—*Ohio Medical and Surgical Journal.*

Every important fact that has been verified or developed since the publication of the previous edition, either in relation to the nature, diagnosis, or treatment of the diseases of children, has been arranged and incorporated into the body of the work; thus posting up to date, to use a counting-house phrase, all the valuable facts and useful information on the subject. To the American practitioner, Dr. Condie's remarks on the diseases of children will be invaluable, and we accordingly advise those who have failed to read this work to procure a copy, and make themselves familiar with its sound principles.—*The New Orleans Med. and Surg. Journal.*

We feel persuaded that the American medical profession will soon regard it not only as a very good, but as the VERY BEST "Practical Treatise on the Diseases of Children."—*American Medical Journal.*

We pronounced the first edition to be the best work on the diseases of children in the English language, and, notwithstanding all that has been published, we still regard it in that light.—*Medical Examiner.*

COOPER (BRANSBY B.), F. R. S.,

Senior Surgeon to Guy's Hospital, &amp;c.

**LECTURES ON THE PRINCIPLES AND PRACTICE OF SURGERY.**

In one very large octavo volume, of 750 pages. (*Lately Issued.*)

For twenty-five years Mr. Bransby Cooper has been surgeon to Guy's Hospital; and the volume before us may be said to consist of an account of the results of his surgical experience during that long period. We cordially recommend Mr. Bransby Cooper's Lectures as a most valuable addition to our surgical literature, and one which cannot fail to be of service both to students and to those who are actively engaged in the practice of their profession.—*The Lancet.*

A good book by a good man is always welcome; and Mr. Bransby Cooper's book does no discredit to

its paternity. It has reminded us, in its easy style and copious detail, more of Watson's Lectures, than any book we have seen lately, and we should not be surprised to see it occupy a similar position to that well-known work in professional estimation. It consists of seventy-five lectures on the most important surgical diseases. To analyze such a work is impossible, while so interesting is every lecture, that we feel ourselves really at a loss what to select for quotation. The work is one which cannot fail to become a favorite with the profession; and it promises to supply a hiatus which the student of surgery has often to deplore.—*Medical Times.*

COOPER (SIR ASTLEY P.), F. R. S., &amp;c.

**A TREATISE ON DISLOCATIONS AND FRACTURES OF THE JOINTS.**

Edited by BRANSBY B. COOPER, F. R. S., &c. With additional Observations by Prof. J. C. WARREN. A new American edition. In one handsome octavo volume, with numerous illustrations on wood.

BY THE SAME AUTHOR.

**ON THE ANATOMY AND TREATMENT OF ABDOMINAL HERNIA.**

One large volume, imperial 8vo., with over 130 lithographic figures.

BY THE SAME AUTHOR.

**ON THE STRUCTURE AND DISEASES OF THE TESTIS, AND ON THE THYMUS GLAND.** One vol. imperial 8vo., with 177 figures, on 29 plates.

BY THE SAME AUTHOR.

**ON THE ANATOMY AND DISEASES OF THE BREAST,** with twenty-five Miscellaneous and Surgical Papers. One large volume, imperial 8vo., with 252 figures, on 36 plates.

These three last volumes complete the surgical writings of Sir Astley Cooper. They are very handsomely printed, with a large number of lithographic plates, executed in the best style, and are presented at exceedingly low prices.

CHURCHILL (FLEETWOOD), M. D., M. R. I. A.

**ON THE THEORY AND PRACTICE OF MIDWIFERY.** A new American, from the last and improved English edition. Edited, with Notes and Additions, by D. FRANCIS CONDIE, M. D., author of a "Practical Treatise on the Diseases of Children," &c. With 139 illustrations. In one very handsome octavo volume, pp. 510. (*Lately Issued.*)

To bestow praise on a book that has received such marked approbation would be superfluous. We need only say, therefore, that if the first edition was thought worthy of a favorable reception by the medical public, we can confidently affirm that this will be found much more so. The lecturer, the practitioner, and the student, may all have recourse to its pages, and derive from their perusal much interest and instruction in everything relating to theoretical and practical midwifery.—*Dublin Quarterly Journal of Medical Science.*

A work of very great merit, and such as we can confidently recommend to the study of every obstetric practitioner.—*London Medical Gazette.*

This is certainly the most perfect system extant. It is the best adapted for the purposes of a text-book, and that which he whose necessities confine him to one book, should select in preference to all others.—*Southern Medical and Surgical Journal.*

The most popular work on midwifery ever issued from the American press.—*Charleston Med. Journal.*

Were we reduced to the necessity of having but one work on midwifery, and permitted to choose, we would unhesitatingly take Churchill.—*Western Med. and Surg. Journal.*

It is impossible to conceive a more useful and elegant manual than Dr. Churchill's Practice of Midwifery.—*Provincial Medical Journal.*

Certainly, in our opinion, the very best work on the subject which exists.—*N. Y. Annalist.*

No work holds a higher position, or is more deserving of being placed in the hands of the tyro, the advanced student, or the practitioner.—*Medical Examiner.*

Previous editions, under the editorial supervision of Prof. R. M. Huston, have been received with marked favor, and they deserved it; but this, reprinted from a very late Dublin edition, carefully revised and brought up by the author to the present time, does present an unusually accurate and able exposition of every important particular embraced in the department of midwifery. \* \* The clearness, directness, and precision of its teachings, together with the great amount of statistical research which its text exhibits, have served to place it already in the foremost rank of works in this department of remedial science.—*N. O. Med. and Surg. Journal.*

In our opinion, it forms one of the best if not the very best text-book and epitome of obstetric science which we at present possess in the English language.—*Monthly Journal of Medical Science.*

The clearness and precision of style in which it is written, and the great amount of statistical research which it contains, have served to place it in the first rank of works in this department of medical science.—*N. Y. Journal of Medicine.*

Few treatises will be found better adapted as a text-book for the student, or as a manual for the frequent consultation of the young practitioner.—*American Medical Journal.*

BY THE SAME AUTHOR.

**ON THE DISEASES OF INFANTS AND CHILDREN.** In one large and handsome volume of over 600 pages.

We regard this volume as possessing more claims to completeness than any other of the kind with which we are acquainted. Most cordially and earnestly, therefore, do we commend it to our professional brethren, and we feel assured that the stamp of their approbation will in due time be impressed upon it. After an attentive perusal of its contents, we hesitate not to say, that it is one of the most comprehensive ever written upon the diseases of children, and that, for copiousness of reference, extent of research, and perspicuity of detail, it is scarcely to be equalled, and not to be excelled, in any language.—*Dublin Quarterly Journal.*

After this meagre, and we know, very imperfect notice of Dr. Churchill's work, we shall conclude by saying, that it is one that cannot fail from its copiousness, extensive research, and general accuracy, to exalt still higher the reputation of the author in this country. The American reader will be particularly pleased to find that Dr. Churchill has done full justice throughout his work to the various American authors on this subject. The names of Dewees, Eberle, Condie, and Stewart, occur on nearly every page, and these authors are constantly referred to by the author in terms of the highest praise, and with the most liberal courtesy.—*The Medical Examiner.*

The present volume will sustain the reputation acquired by the author from his previous works. The reader will find in it full and judicious directions for the management of infants at birth, and a compendious, but clear account of the diseases to which children are liable, and the most successful mode of treating them. We must not close this notice without calling attention to the author's style, which is perspicuous and polished to a degree, we regret to say, not generally characteristic of medical works. We recommend the work of Dr. Churchill most cordially, both to students and practitioners, as a valuable and reliable guide in the treatment of the diseases of children.—*Am. Journ. of the Med. Sciences.*

We know of no work on this department of Practical Medicine which presents so candid and unprejudiced a statement or posting up of our actual knowledge as this.—*N. Y. Journal of Medicine.*

Its claims to merit both as a scientific and practical work, are of the highest order. Whilst we would not elevate it above every other treatise on the same subject, we certainly believe that very few are equal to it, and none superior.—*Southern Med. and Surgical Journal.*

BY THE SAME AUTHOR.

**ESSAYS ON THE PUERPERAL FEVER, AND OTHER DISEASES PECULIAR TO WOMEN.** Selected from the writings of British Authors previous to the close of the Eighteenth Century. In one neat octavo volume, of about four hundred and fifty pages.

To these papers Dr. Churchill has appended notes, embodying whatever information has been laid before the profession since their authors' time. He has also prefixed to the Essays on Puerperal Fever, which occupy the larger portion of the volume, an interesting historical sketch of the principal epi-

demics of that disease. The whole forms a very valuable collection of papers, by professional writers of eminence, on some of the most important accidents to which the puerperal female is liable.—*American Journal of Medical Sciences.*

CHURCHILL (FLEETWOOD), M. D., M. R. I. A., &c.

ON THE DISEASES OF WOMEN; including those of Pregnancy and Child-bed. A new American edition, revised by the Author. With Notes and Additions, by D. FRANCIS CONDIE, M. D., author of "A Practical Treatise on the Diseases of Children." In one large and handsome octavo volume, with wood-cuts, pp. 684. (Just Issued.)

*From the Author's Preface.*

In reviewing this edition, at the request of my American publishers, I have inserted several new sections and chapters, and I have added, I believe, all the information we have derived from recent researches; in addition to which the publishers have been fortunate enough to secure the services of an able and highly esteemed editor in Dr. Condie.

We now regretfully take leave of Dr. Churchill's book. Had our typographical limits permitted, we should gladly have borrowed more from its richly stored pages. In conclusion, we heartily recommend it to the profession, and would at the same time express our firm conviction that it will not only add to the reputation of its author, but will prove a work of great and extensive utility to obstetric practitioners.—*Dublin Medical Press.*

Former editions of this work have been noticed in previous numbers of the Journal. The sentiments of high commendation expressed in those notices, have only to be repeated in this; not from the fact that the profession at large are not aware of the high merits which this work really possesses, but from a desire to see the principles and doctrines therein contained more generally recognized, and more universally carried out in practice.—*N. Y. Journal of Medicine.*

We know of no author who deserves that approbation, on "the diseases of females," to the same extent that Dr. Churchill does. His, indeed, is the only thorough treatise we know of on the subject; and it may be commended to practitioners and students as a masterpiece in its particular department. The former editions of this work have been commended strongly in this journal, and they have won their way to an extended, and a well-deserved popu-

larity. This fifth edition, before us, is well calculated to maintain Dr. Churchill's high reputation. It was revised and enlarged by the author, for his American publishers, and it seems to us that there is scarcely any species of desirable information on its subjects that may not be found in this work.—*The Western Journal of Medicine and Surgery.*

We are gratified to announce a new and revised edition of Dr. Churchill's valuable work on the diseases of females. We have ever regarded it as one of the very best works on the subjects embraced within its scope, in the English language; and the present edition, enlarged and revised by the author, renders it still more entitled to the confidence of the profession. The valuable notes of Prof. Huston have been retained, and contribute, in no small degree, to enhance the value of the work. It is a source of congratulation that the publishers have permitted the author to be, in this instance, his own editor, thus securing all the revision which an author alone is capable of making.—*The Western Lancet.*

As a comprehensive manual for students, or a work of reference for practitioners, we only speak with common justice when we say that it surpasses any other that has ever issued on the same subject from the British press.—*The Dublin Quarterly Journal.*

DEWEES (W. P.), M. D., &c.

A COMPREHENSIVE SYSTEM OF MIDWIFERY. Illustrated by occasional Cases and many Engravings. Twelfth edition, with the Author's last Improvements and Corrections. In one octavo volume, of 600 pages. (Just Issued.)

BY THE SAME AUTHOR.

A TREATISE ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN. Tenth edition. In one volume, octavo, 548 pages. (Just Issued.)

BY THE SAME AUTHOR.

A TREATISE ON THE DISEASES OF FEMALES. Tenth edition. In one volume, octavo, 532 pages, with plates. (Just Issued.)

DICKSON (PROFESSOR S. H.), M. D.

ESSAYS ON LIFE, SLEEP, PAIN, INTELLECTION, HYGIENE, AND DEATH. In one very handsome volume, royal 12mo.

DANA (JAMES D).

ZOOPHYTES AND CORALS. In one volume, imperial quarto, extra cloth, with wood-cuts.

ALSO,

AN ATLAS TO THE ABOVE, one volume, imperial folio, with sixty-one magnificent plates, colored after nature. Bound in half morocco.

ALSO,

ON THE STRUCTURE AND CLASSIFICATION OF ZOOPHYTES. Sold separate, one vol., cloth.

DE LA BECHE (SIR HENRY T.), F. R. S., &c.

THE GEOLOGICAL OBSERVER. In one very large and handsome octavo volume, of 700 pages. With over three hundred wood-cuts. (Just Issued.)

DRUITT (ROBERT), M. R. C. S., &amp;c.

**THE PRINCIPLES AND PRACTICE OF MODERN SURGERY.** A new American, from the last and improved London edition. Edited by F. W. SARGENT, M. D., author of "Minor Surgery," &c. Illustrated with one hundred and ninety-three wood-engravings. In one very handsomely printed octavo volume, of 576 large pages.

No work, in our opinion, equals it in presenting so much valuable surgical matter in so small a compass.—*St. Louis Med. and Surgical Journal*.

Druitt's Surgery is too well known to the American medical profession to require its announcement anywhere. Probably no work of the kind has ever been more cordially received and extensively circulated than this. The fact that it comprehends in a comparatively small compass, all the essential elements of theoretical and practical Surgery—that it is found to contain reliable and authentic information on the nature and treatment of nearly all surgical affections—is a sufficient reason for the liberal patronage it has obtained. The work before us is a new edition, greatly enlarged and extended by the author—its practical part having undergone a thorough revision, with fifty pages of additional matter. The editor, Dr. F. W. Sargent, of Philadelphia, has contributed much to enhance the value of the work, by such American improvements as are calculated more perfectly to adapt it to our own views and practice in this country. It abounds everywhere with spirited and life-like illustrations, which to the young surgeon, especially, are of no minor consideration. Every medical man frequently needs just such a work as this, for immediate reference in moments of sudden emergency, when he has not time to consult more elaborate treatises. Its mechanical execution is of the very best quality, and as a whole, it deserves and will receive from the profession, a liberal patronage.—*The Ohio Medical and Surgical Journal*.

The author has evidently ransacked every standard treatise of ancient and modern times, and all that is really practically useful at the bedside will be found in a form at once clear, distinct, and interesting.—*Edinburgh Monthly Medical Journal*.

Druitt's work, condensed, systematic, lucid, and practical as it is, beyond most works on Surgery

accessible to the American student, has had much currency in this country, and under its present auspices promises to rise to yet higher favor. The illustrations of the volume are good, and, in a word, the publishers have acquitted themselves fully of their duty.—*The Western Journal of Medicine and Surgery*.

The most accurate and ample resumé of the present state of Surgery that we are acquainted with.—*Dublin Medical Journal*.

A better book on the principles and practice of Surgery as now understood in England and America, has not been given to the profession.—*Boston Medical and Surgical Journal*.

An unsurpassable compendium, not only of Surgery, but of Medical Practice.—*London Medical Gazette*.

This work merits our warmest commendations, and we strongly recommend it to young surgeons as an admirable digest of the principles and practice of modern Surgery.—*Medical Gazette*.

It may be said with truth that the work of Mr. Druitt affords a complete, though brief and condensed view, of the entire field of modern surgery. We know of no work on the same subject having the appearance of a manual, which includes so many topics of interest to the surgeon; and the terse manner in which each has been treated evinces a most enviable quality of mind on the part of the author, who seems to have an innate power of searching out and grasping the leading facts and features of the most elaborate productions of the pen. It is a useful handbook for the practitioner, and we should deem a teacher of surgery unpardonable who did not recommend it to his pupils. In our own opinion, it is admirably adapted to the wants of the student.—*Provincial Medical and Surgical Journal*.

DUNGLISON, FORBES, TWEEDIE, AND CONOLLY.

**THE CYCLOPÆDIA OF PRACTICAL MEDICINE:** comprising Treatises on the Nature and Treatment of Diseases, Materia Medica, and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, &c. &c. In four large super royal octavo volumes, of 3254 double-columned pages, strongly and handsomely bound.

\*\*\* This work contains no less than four hundred and eighteen distinct treatises, contributed by sixty-eight distinguished physicians.

The most complete work on Practical Medicine extant; or, at least, in our language.—*Buffalo Medical and Surgical Journal*.

For reference, it is above all price to every practitioner.—*Western Lancet*.

One of the most valuable medical publications of the day—as a work of reference it is invaluable.—*Western Journal of Medicine and Surgery*.

It has been to us, both as learner and teacher, a work for ready and frequent reference, one in which modern English medicine is exhibited in the most advantageous light.—*Medical Examiner*.

We rejoice that this work is to be placed within the reach of the profession in this country, it being

unquestionably one of very great value to the practitioner. This estimate of it has not been formed from a hasty examination, but after an intimate acquaintance derived from frequent consultation of it during the past nine or ten years. The editors are practitioners of established reputation, and the list of contributors embraces many of the most eminent professors and teachers of London, Edinburgh, Dublin, and Glasgow. It is, indeed, the great merit of this work that the principal articles have been furnished by practitioners who have not only devoted especial attention to the diseases about which they have written, but have also enjoyed opportunities for an extensive practical acquaintance with them, and whose reputation carries the assurance of their competency justly to appreciate the opinions of others, while it stamps their own doctrines with high and just authority.—*American Medical Journ.*

DUNGLISON (ROBLEY), M. D.

Professor of the Institutes of Medicine, in the Jefferson Medical College, Philadelphia.

**HUMAN HEALTH;** or, the Influence of Atmosphere and Locality, Change of Air and Climate, Seasons, Food, Clothing, Bathing, Exercise, Sleep, &c. &c., on Healthy Man; constituting Elements of Hygiene. Second edition, with many modifications and additions. In one octavo volume, of 461 pages.

DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

**MEDICAL LEXICON;** a Dictionary of Medical Science, containing a concise Explanation of the various Subjects and Terms of Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Obstetrics, Medical Jurisprudence, &c. With the French and other Synonyms; Notices of Climate and of celebrated Mineral Waters; Formulæ for various Official, Empirical, and Dietetic Preparations, etc. Ninth edition, revised. In one very thick octavo volume, of over nine hundred large double-columned pages, strongly bound in leather, with raised bands. (*Just Issued.*)

Every successive edition of this work bears the marks of the industry of the author, and of his determination to keep it fully on a level with the most advanced state of medical science. Thus the last two editions contained about NINE THOUSAND SUBJECTS AND TERMS not comprised in the one immediately preceding, and the present has not less than FOUR THOUSAND not in any former edition. As a complete Medical Dictionary, therefore, embracing over FIFTY THOUSAND DEFINITIONS, in all the branches of the science, it is presented as meriting a continuance of the great favor and popularity which have carried it, within no very long space of time, to a ninth edition.

Every precaution has been taken in the preparation of the present volume, to render its mechanical execution and typographical accuracy worthy of its extended reputation and universal use. The very extensive additions have been accommodated, without materially increasing the bulk of the volume by the employment of a small but exceedingly clear type, cast for this purpose. The press has been watched with great care, and every effort used to insure the verbal accuracy so necessary to a work of this nature. The whole is printed on fine white paper; and, while thus exhibiting in every respect so great an improvement over former issues, it is presented at the original exceedingly low price.

A miracle of labor and industry in one who has written able and voluminous works on nearly every branch of medical science. There could be no more useful book to the student or practitioner, in the present advancing age, than one in which would be found, in addition to the ordinary meaning and derivation of medical terms—so many of which are of modern introduction—concise descriptions of their explanation and employment; and all this and much more is contained in the volume before us. It is therefore almost as indispensable to the other learned professions as to our own. In fact, to all who may have occasion to ascertain the meaning of any word belonging to the many branches of medicine. From a careful examination of the present edition, we can vouch for its accuracy, and for its being brought quite up to the date of publication; the author states in his preface that he has added to it about four thousand terms, which are not to be found in the preceding one.—*Dublin Quarterly Journal of Medical Sciences.*

On the appearance of the last edition of this valuable work, we directed the attention of our readers to its peculiar merits; and we need do little more than state, in reference to the present issue, that, notwithstanding the large additions previously made to it, no fewer than four thousand terms, not to be found in the preceding edition, are contained in the volume before us.—Whilst it is a wonderful monument of its author's erudition and industry, it is also a work of great practical utility, as we can testify from our own experience; for we keep it constantly within our reach, and make very frequent reference to it, nearly always finding in it the information we seek.—*British and Foreign Med.-Chirurg. Review.*

It has the rare merit that it certainly has no rival in the English language for accuracy and extent of references. The terms generally include short physiological and pathological descriptions, so that, as the author justly observes, the reader does not possess in this work a mere dictionary, but a book, which, while it instructs him in medical etymology, furnishes him with a large amount of useful information. The author's labors have been properly appreciated by his own countrymen; and we

can only confirm their judgment, by recommending this most useful volume to the notice of our cisatlantic readers. No medical library will be complete without it.—*London Med. Gazette.*

It is certainly more complete and comprehensive than any with which we are acquainted in the English language. Few, in fact, could be found better qualified than Dr. Dunglison for the production of such a work. Learned, industrious, persevering, and accurate, he brings to the task all the peculiar talents necessary for its successful performance; while, at the same time, his familiarity with the writings of the ancient and modern "masters of our art," renders him skilful to note the exact usage of the several terms of science, and the various modifications which medical terminology has undergone with the change of theories or the progress of improvement.—*American Journal of the Medical Sciences.*

One of the most complete and copious known to the cultivators of medical science.—*Boston Med. Journal.*

A most complete Medical Lexicon—certainly one of the best works of the kind in the language.—*Charleston Medical Journal.*

The most complete Medical Dictionary in the English language.—*Western Lancet.*

It has not its superior, if indeed its equal, in the English language.—*St. Louis Medical and Surgical Journal.*

Familiar with nearly all the medical dictionaries now in print, we consider the one before us the most complete, and an indispensable adjunct to every medical library.—*British American Medical Journal.*

We repeat our declaration, that this is the best Medical Dictionary in the language.—*West. Lancet.*

The very best Medical Dictionary now extant.—*Southern Medical and Surgical Journal.*

The most comprehensive and best English Dictionary of medical terms extant.—*Buffalo Medical Journal.*

BY THE SAME AUTHOR.

**THE PRACTICE OF MEDICINE.** A Treatise on Special Pathology and Therapeutics. Third Edition. In two large octavo volumes, of fifteen hundred pages.

Upon every topic embraced in the work the latest information will be found carefully posted up.—*Medical Examiner.*

The student of medicine will find, in these two elegant volumes, a mine of facts, a gathering of precepts and advice from the world of experience, that will nerve him with courage, and faithfully direct him in his efforts to relieve the physical suf-

ferings of the race.—*Boston Medical and Surgical Journal.*

It is certainly the most complete treatise of which we have any knowledge.—*Western Journal of Medicine and Surgery.*

One of the most elaborate treatises of the kind we have.—*Southern Med. and Surg. Journal.*

## DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

**HUMAN PHYSIOLOGY.** Seventh edition. Thoroughly revised and extensively modified and enlarged, with nearly five hundred illustrations. In two large and handsomely printed octavo volumes, containing nearly 1450 pages.

On no previous revision of this work has the author bestowed more care than on the present, it having been subjected to an entire scrutiny, not only as regards the important matters of which it treats, but also the language in which they are conveyed; and on no former occasion has he felt as satisfied with his endeavors to have the work on a level with the existing state of the science.

The increased amount of matter may be estimated from the fact that the mere list of authors referred to in the preparation of the additions to this edition alone extends over nine large and closely printed pages. The number of illustrations has been greatly extended, the present edition containing four hundred and seventy-four, while the last had but three hundred and sixty-eight; while, in addition to this, many new and superior wood-cuts have been substituted for those which were not deemed sufficiently accurate or satisfactory. The mechanical execution of the work has also been improved in every respect, and the whole is confidently presented as worthy the great and continued favor which it has so long received from the profession.

It has long since taken rank as one of the medical classics of our language. To say that it is by far the best text-book of physiology ever published in this country, is but echoing the general testimony of the profession.—*N. Y. Journal of Medicine.*

There is no single book we would recommend to the student or physician, with greater confidence than the present, because in it, will be found a mirror of almost every standard physiological work of the day. We most cordially recommend the work to every member of the profession, and no student should be without it. It is the completest work on

Physiology in the English language, and is highly creditable to the author and publishers.—*From the Canadian Medical Journal.*

The most complete and satisfactory system of Physiology in the English language.—*Amer. Med. Journal.*

The best work of the kind in the English language.—*Silliman's Journal.*

The most full and complete system of Physiology in our language.—*Western Lancet.*

BY THE SAME AUTHOR.

**GENERAL THERAPEUTICS AND MATERIA MEDICA;** adapted for a Medical Text-book. Fourth edition, much improved. With one hundred and eighty-two illustrations. In two large and handsomely printed octavo volumes, of 1000 pages.

In this work of Dr. Dunglison, we recognize the same untraying industry in the collection and embodying of facts on the several subjects of which he treats, that has heretofore distinguished him, and we cheerfully point to these volumes, as two of the most interesting that we know of. In noticing the additions to this, the fourth edition, there is very little in the periodical or annual literature of the profession, published in the interval which has elapsed since the issue of the first, that has escaped the careful search of the author. As a book for reference, it is invaluable.—*Charleston Med. Journal and Review.*

It may be said to be the work now upon the subjects upon which it treats.—*Western Lancet.*

As a text-book for students, for whom it is particularly designed, we know of none superior to it.—*St. Louis Medical and Surgical Journal.*

It purports to be a new edition, but it is rather a new book, so greatly has it been improved, both in the amount and quality of the matter which it contains.—*N. O. Medical and Surgical Journal.*

We bespeak for this edition, from the profession, an increase of patronage over any of its former ones, on account of its increased merit.—*N. Y. Journal of Medicine.*

We consider this work unequalled.—*Boston Med. and Surg. Journal.*

BY THE SAME AUTHOR.

**NEW REMEDIES, WITH FORMULÆ FOR THEIR ADMINISTRATION.**

Sixth edition, with extensive Additions. In one very large octavo volume, of over 750 pages.

One of the most useful of the author's works.—*Southern Medical and Surgical Journal.*

This well-known and standard book has now reached its sixth edition, and has been enlarged and improved by the introduction of all the recent gifts to therapeutics which the last few years have so richly produced, including the anæsthetic agents, &c. This elaborate and useful volume should be found in every medical library, for as a book of reference, for physicians, it is unsurpassed by any other work in existence, and the double index for

diseases and for remedies, will be found greatly to enhance its value.—*New York Med. Gazette.*

The great learning of the author, and his remarkable industry in pushing his researches into every source whence information is derivable, has enabled him to throw together an extensive mass of facts and statements, accompanied by full reference to authorities; which last feature renders the work practically valuable to investigators who desire to examine the original papers.—*The American Journal of Pharmacy.*

DUFTON (WILLIAM), M. R. C. S., &amp; c.

**THE NATURE AND TREATMENT OF DEAFNESS AND DISEASES OF THE EAR;** and the Treatment of the Deaf and Dumb. One small 12mo. vol. pp. 120.

DE JONGH (L. J.), M. D., &amp;c.

**THE THREE KINDS OF COD-LIVER OIL**, comparatively considered, with their Chemical and Therapeutic Properties. Translated, with an Appendix and Cases, by EDWARD CAREY, M. D. To which is added an article on the subject from "Dunglison on New Remedies." In one small 12mo. volume, extra cloth.

DURLACHER (LEWIS).

**A TREATISE ON CORNS, BUNIONS, THE DISEASES OF NAILS, AND THE GENERAL MANAGEMENT OF THE FEET.** In one 12mo. volume, cloth. pp. 134.

DAY (GEORGE E.), M. D.

**A PRACTICAL TREATISE ON THE DOMESTIC MANAGEMENT AND MORE IMPORTANT DISEASES OF ADVANCED LIFE.** With an Appendix on a new and successful mode of treating Lumbago and other forms of Chronic Rheumatism. One volume, octavo, 226 pages.

ELLIS (BENJAMIN), M. D.

**THE MEDICAL FORMULARY:** being a Collection of Prescriptions, derived from the writings and practice of many of the most eminent physicians of America and Europe. To which is added an Appendix, containing the usual Dietetic Preparations and Antidotes for Poisons. The whole accompanied with a few brief Pharmaceutic and Medical Observations. Ninth edition, corrected and extended, by SAMUEL GEORGE MORTON, M. D. In one neat octavo volume, of two hundred and sixty-eight pages.

FERGUSON (WILLIAM), F. R. S.,  
Professor of Surgery in King's College, London, &c.

**A SYSTEM OF PRACTICAL SURGERY.** Fourth American, from the third and enlarged London edition. In one large and beautifully printed octavo volume, of about seven hundred pages, with three hundred and ninety-three handsome illustrations. (*Now Ready.*)

The most important subjects in connection with practical surgery which have been more recently brought under the notice of, and discussed by, the surgeons of Great Britain, are fully and dispassionately considered by Mr. Ferguson, and that which was before wanting has now been supplied, so that we can now look upon it as a work on practical surgery instead of one on operative surgery alone, which many have hitherto considered it to be. And we think the author has shown a wise discretion in making the additions on surgical disease which are to be found in the present volume, and has very much enhanced its value; for, besides two elaborate chapters on the diseases of bones and joints, which were wanting before he has headed each chief section of the work by a general description of the surgical disease and injury of that region of the body which is treated of in each, prior to entering into the consideration of the more special morbid conditions and their treatment. There is also, as in former editions, a sketch of the anatomy of particular regions. We have now pointed out some of the principal additions in this work. There was some ground formerly for the complaint before alluded to, that it dwelt too exclusively on operative surgery; but this defect is now removed, and the book is more than ever adapted for the purposes of the practitioner, whether he confines himself more strictly to the operative department, or follows surgery on a more comprehensive scale.—*Medical Times and Gazette.*

No work was ever written which more nearly comprehended the necessities of the student and practitioner, and was more carefully arranged to that single purpose than this.—*N. Y. Med. and Surg. Journal.*

The addition of many new pages makes this work more than ever indispensable to the student and practitioner.—*Ranking's Abstract*, January, 1853.

For the general practitioner, who does not make a specialty of surgery, it is certainly invaluable. The style is concise, pointed, and clear. The descriptions of the various operations are concentrated and accurate, so that in cases of emergency, the principles of the most difficult operations may be obtained by a reference of a few moments to its pages.—*Western Lancet.*

As a book of reference for the surgeon and student it is an admirable work, purely on the practice of surgery, and not encumbered with any irrelevant matter, nor with too much theory or discussion on surgical subjects.—*Stethoscope.*

Among the numerous works upon surgery published of late years, we know of none we value more highly than the one before us. It is perhaps the very best we have for a text-book and for ordinary reference, being concise and eminently practical.—*Southern Med. and Surg. Journal.*

The nature and variety of these additions, however, must render it of course impracticable to dwell upon them here; and the best we can do for the book itself, as well as for our readers, is to recommend all who desire one of the most instructive manuals of practical surgery, to provide themselves with copies for their private reading.—*Medical Examiner.*

FRICK (CHARLES), M. D.

**RENAL AFFECTIONS;** their Diagnosis and Pathology. With illustrations. One volume, royal 12mo., extra cloth.

GUTHRIE (G. J.), F. R. S., &amp;c.

**THE ANATOMY OF THE BLADDER AND URETHRA,** and the Treatment of the Obstructions to which those Passages are liable. In one volume, octavo, 150 pages.

FWONES (GEORGE), PH. D., &c.

**ELEMENTARY CHEMISTRY; Theoretical and Practical.** With numerous illustrations. Third American, from a late London edition. Edited, with Additions, by ROBERT BRIDGES, M. D. In one large royal 12mo. volume, of over 500 pages, with about 150 wood-cuts, sheep, or extra cloth.

The work of Dr. Fownes has long been before the public, and its merits have been fully appreciated as the best text-book on chemistry now in existence. We do not, of course, place it in a rank superior to the works of Brande, Graham, Turner, Gregory, or Gmelin, but we say that, as a work for students, it is preferable to any of them.—*London Journal of Medicine*.

The rapid sale of this Manual evinces its adaptation to the wants of the student of chemistry, whilst the well-known merits of its lamented author have constituted a guarantee for its value, as a faithful exposition of the general principles and most important facts of the science to which it professes to be an introduction.—*British and Foreign Medico-Chirurgical Review*.

A work well adapted to the wants of the student. It is an excellent exposition of the chief doctrines

and facts of modern chemistry, originally intended as a guide to the lectures of the author, corrected by his own hand shortly before his death in 1849, and recently revised by Dr. Hence Jones, who has made some additions to the chapter on animal chemistry. Although not intended to supersede the more extended treatises on chemistry, Professor Fownes's Manual may, we think, be often used as a work of reference, even by those advanced in the study, who may be desirous of refreshing their memory on some forgotten point. The size of the work, and still more the condensed yet perspicuous style in which it is written, absolve it from the charges very properly urged against most manuals termed popular, viz.: of omitting details of indispensable importance, of avoiding technical difficulties, instead of explaining them, and of treating subjects of high scientific interest in an unscientific way.—*Edinburgh Monthly Journal of Medical Science*.

GRAHAM (THOMAS), F. R. S.,

Professor of Chemistry in University College, London, &c.

**THE ELEMENTS OF CHEMISTRY.** Including the application of the Science to the Arts. With numerous illustrations. With Notes and Additions, by ROBERT BRIDGES, M. D., &c. &c. Second American, from the second and enlarged London edition

PART I. (*Lately Issued*) large 8vo., 430 pages, 185 illustrations.

PART II. (*Preparing*) to match.

The great changes which the science of chemistry has undergone within the last few years, render a new edition of a treatise like the present, almost a new work. The author has devoted several years to the revision of his treatise, and has endeavored to embody in it every fact and inference of importance which has been observed and recorded by the great body of chemical investigators who are so rapidly changing the face of the science. In this manner the work has been greatly increased in size, and the number of illustrations doubled; while the labors of the editor have been directed towards the introduction of such matters as have escaped the attention of the author, or as have arisen since the publication of the first portion of this edition in London, in 1850. Printed in handsome style, and at a very low price, it is therefore confidently presented to the profession and the student as a very complete and thorough text-book of this important subject.

GROSS (SAMUEL D.), M. D.,

Professor of Surgery in the Louisville Medical Institute, &c.

**A PRACTICAL TREATISE ON THE DISEASES AND INJURIES OF THE URINARY ORGANS.** In one large and beautifully printed octavo volume, of over seven hundred pages. With numerous illustrations.

A volume replete with truths and principles of the utmost value in the investigation of these diseases.—*American Medical Journal*.

Dr. Gross has brought all his learning, experience, tact, and judgment to the task, and has produced a work worthy of his high reputation. We feel perfectly safe in recommending it to our readers as a monograph unequalled in interest and practical value by any other on the subject in our language; and we cannot help saying, that we esteem it a matter of just pride, that another work so creditable to our country has been contributed to our medical literature by a Western physician.—*The Western Journal of Medicine and Surgery*.

We regret that our limits preclude such a notice as this valuable contribution to our American Medical Literature merits. We have only room to say that the author deserves the thanks of the profession for this elaborate production; which cannot fail to augment the exalted reputation acquired by his former works, for which he has been honored at home and abroad.—*N. Y. Med Gazette*.

Whoever will peruse the vast amount of valuable practical information it contains, and which we have been unable even to notice, will, we think, agree with us, that there is no work in the English language which can make any just pretensions to be its equal. Secure in the esteem and confidence of the profession in this country, at least, its distin-

guished author will doubtless receive their warmest congratulations that he has succeeded in producing a treatise so creditable to himself, and, as we humbly believe, to American surgical literature.—*N. Y. Journal of Medicine*.

It has remained for an American writer to wipe away this reproach; and so completely has the task been fulfilled, that we venture to predict for Dr. Gross's treatise a permanent place in the literature of surgery, worthy to rank with the best works of the present age. Not merely is the matter good, but the getting up of the volume is most creditable to transatlantic enterprise; the paper and print would do credit to a first-rate London establishment; and the numerous wood-cuts which illustrate it, demonstrate that America is making rapid advances in this department of art. We have, indeed, unfeigned pleasure in congratulating all concerned in this publication, on the result of their labours; and experience a feeling something like what animates a long-expectant husbandman, who, oftentimes disappointed by the produce of a favorite field, is at last agreeably surprised by a stately crop which may bear comparison with any of its former rivals. The grounds of our high appreciation of the work will be obvious as we proceed; and we doubt not that the present facilities for obtaining American books will induce many of our readers to verify our recommendation by their own perusal of it.—*British and Foreign Medico-Chirurgical Review*.

GRIFFITH (JOHN WILLIAM), M. D., &c.

**A PRACTICAL MANUAL ON THE BLOOD AND SECRETIONS OF THE HUMAN BODY.** Royal 12mo., with plates. (See "Manuals on Blood and Urine.")

## GLUGE (GOTTLIEB), M. D.,

Professor of Physiology and Pathological Anatomy in the University of Brussels, &amp;c.

**AN ATLAS OF PATHOLOGICAL HISTOLOGY.** Translated, with Notes and Additions, by JOSEPH LEIDY, M. D., Professor of Anatomy in the University of Pennsylvania. In one volume, very large imperial quarto, with three hundred and twenty figures, plain and colored, on twelve copperplates.

We are glad to see this excellent work of Gluge translated into English by so competent a hand, and put within the reach of the profession in this country. The history of the development and changes of the elements of pathological tissues, has become now a necessary introduction to the study of morbid anatomy. It can no longer be looked upon as merely accessory. Bearing the same relation to it as does normal histology to normal anatomy, it appears to us to be of still higher importance, since it has a closer and more direct bearing upon practical medicine. Whatever makes our knowledge of diseased structure clearer, must throw light also upon the plan of cure, and show us, too, in many instances, where a cure is impossible. This being, as far as we know, the only work in which pathological histology is separately treated of in a comprehensive manner, it will, we think, for this reason, be of infi-

nite service to those who desire to investigate the subject systematically, and who have felt the difficulty of arranging in their mind the unconnected observations of a great number of authors. The development of the morbid tissues, and the formation of abnormal products, may now be followed and studied with the same ease and satisfaction as the best arranged system of physiology.—*American Med. Journal.*

Professor Gluge's work will be found a very valuable addition to the micrologist's collection. It contains, in the compass of one volume, a concise description and well-executed illustrations of the elements to be observed under the microscope in the principal pathological lesions.—*Dublin Quarterly Journal of Medical Science.*

## GRIFFITH (ROBERT E.), M. D., &amp;c.

**A UNIVERSAL FORMULARY,** containing the methods of Preparing and Administering Official and other Medicines. The whole adapted to Physicians and Pharmacutists. In one large octavo volume, of 568 pages, double columns.

Dr. Griffith's Formulary is worthy of recommendation, not only on account of the care which has been bestowed on it by its estimable author, but for its general accuracy, and the richness of its details.—*Medical Examiner.*

Most cordially we recommend this Universal Formulary, not forgetting its adaptation to druggists and apothecaries, who would find themselves vastly improved by a familiar acquaintance with this every-day book of medicine.—*The Boston Med. and Surg. Journal.*

A very useful work, and a most complete compendium on the subject of *materia medica*. We know of no work in our language, or any other, so comprehensive in all its details.—*London Lancet.*

Pre-eminent among the best and most useful compilations of the present day will be found the work before us, which can have been produced only at a very great cost of thought and labor. A short description will suffice to show that we do not put too high an estimate on this work. We are not cognizant of the existence of a parallel work. Its value will be apparent to our readers from the sketch of its contents above given. We strongly recommend it to all who are engaged either in practical medicine, or more exclusively with its literature.—*Lond. Med. Gazette.*

A valuable acquisition to the medical practitioner, and a useful book of reference to the apothecary on numerous occasions.—*Amer. Journal of Pharmacy.*

BY THE SAME AUTHOR.

**MEDICAL BOTANY;** or, a Description of all the more important Plants used in Medicine, and of their Properties, Uses, and Modes of Administration. In one large octavo volume, of 704 pages, handsomely printed, with nearly 350 illustrations on wood.

One of the greatest acquisitions to American medical literature. It should by all means be introduced, at the very earliest period, into our medical schools, and occupy a place in the library of every physician in the land.—*South-western Medical Advocate.*

Admirably calculated for the physician and student—we have seen no work which promises greater advantages to the profession.—*N. O. Med. and Surg. Journal.*

One of the few books which supply a positive deficiency in our medical literature.—*Western Lancet.*

We hope the day is not distant when this work will not only be a text-book in every medical school and college in the Union, but find a place in the library of every private practitioner.—*N. Y. Journal of Medicine.*

## GREGORY (WILLIAM), F. R. S. E.,

Professor of Chemistry in the University of Edinburgh, &amp;c.

**LETTERS TO A CANDID INQUIRER ON ANIMAL MAGNETISM.** Description and Analysis of the Phenomena. Details of Facts and Cases. In one neat volume, royal 12mo., extra cloth.

## GARDNER (D. PEREIRA), M. D.

**MEDICAL CHEMISTRY,** for the use of Students and the Profession: being a Manual of the Science, with its Applications to Toxicology, Physiology, Therapeutics, Hygiene, &c. In one handsome royal 12mo. volume, with illustrations.

HASSE (C. E.), M. D.

AN ANATOMICAL DESCRIPTION OF THE DISEASES OF RESPIRATION AND CIRCULATION. Translated and Edited by SWAINE. In one volume, octavo.

HARRISON (JOHN), M. D.

AN ESSAY TOWARDS A CORRECT THEORY OF THE NERVOUS SYSTEM. In one octavo volume, 292 pages.

HUNTER (JOHN).

TREATISE ON THE VENEREAL DISEASE. With Notes and numerous Additions, by DR. PH. RICORD, Surgeon to the Venereal Hospital of Paris. Translated from the French, with additional Notes, by F. J. BUMSTEAD, M. D. In one octavo volume, with plates. (*Nearly Ready.*)

Ricord's Annotations to Hunter's Treatise are very extensive, amounting to nearly half as much as the original work, and bringing it thoroughly up to the present state of the subject.

HORNER (WILLIAM E.), M. D.,

Professor of Anatomy in the University of Pennsylvania.

SPECIAL ANATOMY AND HISTOLOGY. Eighth edition. Extensively revised and modified. In two large octavo volumes, of more than one thousand pages, handsomely printed, with over three hundred illustrations.

This work has enjoyed a thorough and laborious revision on the part of the author, with the view of bringing it fully up to the existing state of knowledge on the subject of general and special anatomy. To adapt it more perfectly to the wants of the student, he has introduced a large number of additional wood-engravings, illustrative of the objects described, while the publishers have endeavored to render the mechanical execution of the work worthy of the extended reputation which it has acquired. The demand which has carried it to an EIGHTH EDITION is a sufficient evidence of the value of the work, and of its adaptation to the wants of the student and professional reader.

HORNER (W. E.) in connection with H. H. SMITH.

ANATOMICAL ATLAS. One volume, imperial 8vo. (See SMITH.)

HOBLYN (RICHARD D.), A. M.

A DICTIONARY OF THE TERMS USED IN MEDICINE AND THE COLLATERAL SCIENCES. Revised, with numerous Additions, from the second London edition, by ISAAC HAYS, M. D., &c. In one large royal 12mo. volume, of four hundred and two pages, double columns.

We cannot too strongly recommend this small and cheap volume to the library of every student and practitioner.—*Medico-Chirurgical Review.*

HOPE (J.), M. D., F. R. S., &c.

A TREATISE ON THE DISEASES OF THE HEART AND GREAT VESSELS. Edited by PENNOCK. In one volume, octavo, with plates, 572 pages.

HERSCHEL (SIR JOHN F. W.), F. R. S., &c.

OUTLINES OF ASTRONOMY. New American, from the third London edition. In one neat volume, crown octavo, with six plates and numerous wood-cuts. (*Just Issued.*)

JOHNSTON (ALEXANDER KEITH), F. R. S., &c.

THE PHYSICAL ATLAS OF NATURAL PHENOMENA. For the use of Colleges, Academies, and Families. In one large volume, imperial quarto, handsomely and strongly bound, with twenty-six Plates, engraved and colored in the best-style. Together with 112 pages of descriptive letter-press, and a very copious Index.

JONES (T. WHARTON), F. R. S., &c.

**THE PRINCIPLES AND PRACTICE OF OPHTHALMIC MEDICINE AND SURGERY.** Edited by ISAAC HAYS, M. D., &c. In one very neat volume, large royal 12mo., of 529 pages, with four plates, plain or colored, and ninety-eight wood-cuts.

We are confident that the reader will find, on perusal, that the execution of the work amply fulfils the promise of the preface, and sustains, in every point the already high reputation of the author as an ophthalmic surgeon as well as a physiologist and pathologist. The book is evidently the result of much labor and research, and has been written with the greatest care and attention; it possesses that best quality which a general work, like a system or manual can show, viz.: the quality of having all the materials whencesoever derived, so thoroughly wrought up, and digested in the author's mind, as to come forth with the freshness and impressiveness of an original production. We regret that we have received the book at so late a period as precludes our giving more than a mere notice of it, as,

although essentially and necessarily a compilation, it contains many things which we should be glad to reproduce in our pages whether in the shape of new pathological views, of old errors corrected, or of sound principles of practice in doubtful cases clearly laid down. But we dare say most of our readers will shortly have an opportunity of seeing these in their original locality, as we entertain little doubt that this book will become what its author hoped it might become, a manual for daily reference and consultation by the student and the general practitioner. The work is marked by that correctness, clearness, and precision of style which distinguish all the productions of the learned author.—*British and Foreign Medical Review.*

KIRKES (WILLIAM SENHOUSE), M. D.,

Demonstrator of Morbid Anatomy at St. Bartholomew's Hospital, &c.; and

JAMES PAGET, F. R. S.,

Lecturer on General Anatomy and Physiology in St. Bartholomew's Hospital.

**A MANUAL OF PHYSIOLOGY.** Second American, from the second and improved London edition. With one hundred and sixty-five illustrations. In one large and handsome royal 12mo. volume. pp. 550. (*Just Issued.*)

In the present edition, the Manual of Physiology has been brought up to the actual condition of the science, and fully sustains the reputation which it has already so deservedly attained. We consider the work of MM. Kirkes and Paget to constitute one of the very best handbooks of Physiology we possess—presenting just such an outline of the science, comprising an account of its leading facts and generally admitted principles, as the student requires during his attendance upon a course of lectures, or for reference whilst preparing for examination. The text is fully and ably illustrated by a series of very superior wood-engravings, by which a comprehension of some of the more intricate of the subjects treated of is greatly facilitated.—*Am. Medical Journal.*

We need only say, that, without entering into discussions of unsettled questions, it contains all the recent improvements in this department of medical science. For the student beginning this study, and the practitioner who has but leisure to refresh his memory, this book is invaluable, as it contains all that it is important to know, without special details, which are read with interest only by those who would make a specialty, or desire to possess a critical knowledge of the subject.—*Charleston Medical Journal.*

One of the best treatises that can be put into the hands of the student.—*London Medical Gazette.*

The general favor with which the first edition of this work was received, and its adoption as a favorite text-book by many of our colleges, will insure a large circulation to this improved edition. It will fully meet the wants of the student.—*Southern Med. and Surg. Journal.*

It possesses the especial merit of being clear and concise, and at the same time affording a good outline of Physiology.—*Western Lancet.*

Numerous new and superior illustrations have been introduced for the purpose of making the subject of more easy comprehension by the student. This edition has evidently been prepared with great care, and is handsomely printed on good paper, and will prove a very valuable book for the student in acquainting himself with all the leading well-established facts in physiology, and for the practitioner as a work of reference.—*New York Medical Times.*

Particularly adapted to those who desire to possess a concise digest of the facts of Human Physiology.—*British and Foreign Med.-Chirurg. Review.*

We conscientiously recommend it as an admirable "Handbook of Physiology."—*London Journal of Medicine.*

KNAPP (F.), PH. D., &c.

**TECHNOLOGY;** or, Chemistry applied to the Arts and to Manufactures. Edited, with numerous Notes and Additions, by DR. EDMUND RONALDS and DR. THOMAS RICHARDSON. First American edition, with Notes and Additions, by Prof. WALTER R. JOHNSON. In two handsome octavo volumes, printed and illustrated in the highest style of art, with about five hundred wood-engravings.

LEHMANN.

**PHYSIOLOGICAL CHEMISTRY.** Translated by GEORGE E. DAY, M. D. In one very large octavo volume. (*Preparing.*)

LEE (ROBERT), M. D., F. R. S., &c.

**CLINICAL MIDWIFERY;** comprising the Histories of Five Hundred and Forty-five Cases of Difficult, Preternatural, and Complicated Labor, with Commentaries. From the second London edition. In one royal 12mo. volume, extra cloth, of 238 pages.

LAWRENCE (W.), F. R. S., &amp;c.

**A TREATISE ON DISEASES OF THE EYE.** Third American edition, much improved and enlarged. With over two hundred illustrations. By ISAAC HAYS, M. D., Surgeon to Wills Hospital, Philadelphia, &c. In one very large and handsome octavo volume, of over eight hundred pages. This new edition to be ready by July.

This work, by far the largest and most comprehensive on the subject within reach of the profession in this country, will receive an entire revision on the part of the editor. Brought up in this manner to the most advanced state of science, and presenting an equal improvement over its predecessors as regards mechanical execution, it is confidently presented as worthy of the extended reputation which it has hitherto enjoyed.

BY THE SAME AUTHOR.

**A TREATISE ON RUPTURES;** from the fifth London edition. In one octavo volume, sheep, 480 pages.

LEIDY (JOSEPH), M. D.

Professor of Anatomy in the University of Pennsylvania, &amp;c.

**ATLAS OF PATHOLOGICAL HISTOLOGY.** By GOTTLIEB GLUGE, M. D. Translated from the German, with Additions, by JOSEPH LEIDY, M. D., Professor of Anatomy in the University of Pennsylvania. In one vol., large imperial quarto, with 320 figures, plain and colored, on twelve plates.

BY THE SAME AUTHOR.

**HUMAN ANATOMY.** By JONES QUAIN, M. D. From the fifth London edition. Edited by RICHARD QUAIN, F. R. S., and WILLIAM SHARPEY, M. D., F. R. S., Professors of Anatomy and Physiology, in University College, London. Revised, with Notes and Additions, by JOSEPH LEIDY, M. D., Professor of Anatomy in the University of Pennsylvania. Complete in two large 8vo. vols. of about 1300 pages, beautifully illustrated with over 500 engravings on wood.

LISTON (ROBERT), F. R. S., &amp;c.

**LECTURES ON THE OPERATIONS OF SURGERY,** and on Diseases and Accidents requiring Operations. Edited, with numerous Additions and Alterations, by T. D. MÜTTER, M. D. In one large and handsome octavo volume, of 566 pages, with 216 wood-cuts.

We can only say, in conclusion, that Liston's Lectures, with Mütter's additions, should be in every surgeon's library, and in every student's hand, who wishes to post up his surgical knowledge to the present moment.—*N. Y. Journ. of Medicine.*

It is a compendium of the modern practice of Surgery as complete and accurate as any treatise of similar dimensions in the English language.—*Western Lancet.*

LALLEMAND (M.).

**THE CAUSES, SYMPTOMS, AND TREATMENT OF SPERMATORRHEA.** Translated and edited by HENRY J. McDOUGAL. In one volume, octavo, 320 pages. Second American edition. (*Now Ready.*)

LARDNER (DIONYSIUS), D. C. L., &amp;c.

**HANDBOOKS OF NATURAL PHILOSOPHY AND ASTRONOMY.** FIRST COURSE, containing Mechanics, Hydrostatics, Hydraulics, Pneumatics, Sound, and Optics. In one large royal 12mo. volume, of 750 pages, with 424 wood-cuts. SECOND COURSE, containing Heat, Electricity, Magnetism, and Galvanism, one volume, large royal 12mo., of 450 pages, with 250 illustrations. THIRD COURSE (*nearly ready*), will contain Meteorology and Astronomy, with numerous steel-plates and wood-cuts. Revised, with numerous Additions, by the American editor.

The work furnishes a very clear and satisfactory account of our knowledge in the important department of science of which it treats. Although the medical schools of this country do not include the study of physics in their course of instruction, yet no student or practitioner should be ignorant of its laws. Besides being of constant application in practice, such knowledge is of inestimable utility in facilitating the study of other branches of science. To students, then, and to those who, having already entered upon the active pursuits of business, are desirous to sustain and improve their knowledge of the general truths of natural philosophy, we can recommend this work as supplying in a clear and satis-

factory manner the information they desire.—*The Virginia Med. and Surg. Journal.*

The present treatise is a most complete digest of all that has been developed in relation to the great forces of nature, Heat, Magnetism, and Electricity. Their laws are elucidated in a manner both pleasing and familiar, and at the same time perfectly intelligible to the student. The illustrations are sufficiently numerous and appropriate, and altogether we can cordially recommend the work as well-deserving the notice both of the practising physician and the student of medicine.—*The Med. Examiner.*

## MEIGS (CHARLES D.), M. D.,

Professor of Obstetrics, &amp;c., in the Jefferson Medical College, Philadelphia.

**OBSTETRICS: THE SCIENCE AND THE ART.** Second edition, revised and improved. With one hundred and thirty-one illustrations. In one beautifully printed octavo volume, of seven hundred and fifty-two large pages. (*Lately Published.*)

The rapid demand for a second edition of this work is a sufficient evidence that it has supplied a desideratum of the profession, notwithstanding the numerous treatises on the same subject which have appeared within the last few years. Adopting a system of his own, the author has combined the leading principles of his interesting and difficult subject, with a thorough exposition of its rules of practice, presenting the results of long and extensive experience and of familiar acquaintance with all the modern writers on this department of medicine. As an American Treatise on Midwifery, which has at once assumed the position of a classic, it possesses peculiar claims to the attention and study of the practitioner and student, while the numerous alterations and revisions which it has undergone in the present edition are shown by the great enlargement of the work, which is not only increased as to the size of the page, but also in the number. Among other additions may be mentioned

## A NEW AND IMPORTANT CHAPTER ON "CHILD-BED FEVER."

As an elementary treatise—concise, but, withal, clear and comprehensive—we know of no one better adapted for the use of the student; while the young practitioner will find in it a body of sound doctrine, and a series of excellent practical directions, adapted to all the conditions of the various forms of labor and their results, which he will be induced, we are persuaded, again and again to consult, and always

with profit. It has seldom been our lot to peruse a work upon the subject, from which we have received greater satisfaction, and which we believe to be better calculated to communicate to the student correct and definite views upon the several topics embraced within the scope of its teachings.—*Am. Journal of the Medical Sciences.*

BY THE SAME AUTHOR.

**WOMAN: HER DISEASES AND THEIR REMEDIES.** A Series of Lectures to his Class. Second edition, revised. In one large and beautifully printed octavo volume, of nearly seven hundred large pages.

It contains a vast amount of practical knowledge, by one who has accurately observed and retained the experience of many years, and who tells the result in a free, familiar, and pleasant manner.—*Dublin Quarterly Journal.*

There is an off-hand fervor, a glow, and a warm-heartedness infecting the effort of Dr. Meigs, which is entirely captivating, and which absolutely hurries the reader through from beginning to end. Besides, the book teems with solid instruction, and it shows the very highest evidence of ability, viz., the clearness with which the information is presented. We know of no better test of one's understanding a subject than the evidence of the power of lucidly explaining it. The most elementary, as well as the obscure subjects, under the pencil of Prof. Meigs, are isolated and made to stand out in such bold relief, as to produce distinct impressions upon the mind and memory of the reader.—*The Charleston Med. Journal.*

Professor Meigs has enlarged and amended this great work, for such it unquestionably is, having passed the ordeal of criticism at home and abroad, but been improved thereby; for in this new edition the author has introduced real improvements, and increased the value and utility of the book immeasurably. It presents so many novel, bright, and sparkling thoughts; such an exuberance of new ideas on almost every page, that we confess ourselves to have become enamored with the book and its author; and cannot withhold our congratulations from our Philadelphia confreres, that such a teacher is in their service. We regret that our limits will not allow of a more extended notice of this work, but must content ourselves with thus commending it as worthy of diligent perusal by physicians as well as students, who are seeking to be thoroughly instructed in the important practical subjects of which it treats.—*N. Y. Med. Gazette.*

BY THE SAME AUTHOR.

**OBSERVATIONS ON CERTAIN OF THE DISEASES OF YOUNG CHILDREN.** In one handsome octavo volume, of 214 pages.

It puts forth no claims as a systematic work, but contains an amount of valuable and useful matter, scarcely to be found in the same space in our home literature. It cannot but prove an acceptable offering to the profession at large.—*N. Y. Journal of Medicine.*

We take much pleasure in recommending this excellent little work to the attention of medical practitioners. It deserves their attention, and after they commence its perusal, they will not willingly abandon it, until they have mastered its contents. We read the work while suffering from a

carbuncle, and its fascinating pages often beguiled us into forgetfulness of agonizing pain. May it teach others to relieve the afflictions of the young.—*Western Journal of Medicine and Surgery.*

The work before us is undoubtedly a valuable addition to the fund of information which has already been treasured up on the subjects in question. It is practical, and therefore eminently adapted to the general practitioner. Dr. Meigs's works have the same fascination which belongs to himself.—*Medical Examiner.*

BY THE SAME AUTHOR. (*Preparing.*)

**ON THE NATURE, SIGNS, AND TREATMENT OF PUERPERAL FEVER.** In one handsome octavo volume.

BY THE SAME AUTHOR. (*Nearly Ready.*)

**A TREATISE ON ACUTE AND CHRONIC DISEASE OF THE NECK OF THE UTERUS.** With numerous plates, drawn and colored from nature in the highest style of art. In one handsome octavo volume.

MILLER (JAMES), F. R. S. E.,

Professor of Surgery in the University of Edinburgh, &amp;c.

**PRINCIPLES OF SURGERY.** Third American, from the second and revised Edinburgh edition. Revised, with Additions, by F. W. SARGENT, M. D., author of "Minor Surgery," &c. In one large and very beautiful volume, of seven hundred and fifty-two pages, with two hundred and forty exquisite illustrations on wood. (Extensively used as a text-book.)

The publishers have endeavored to render the present edition of this work, in every point of mechanical execution, worthy of its very high reputation, and they confidently present it to the profession as one of the handsomest volumes as yet issued in this country.

This edition is far superior, both in the abundance and quality of its material, to any of the preceding. We hope it will be extensively read, and the sound principles which are herein taught treasured up for future application. The work takes rank with Watson's Practice of Physic; it certainly does not fall behind that great work in soundness of principle or depth of reasoning and research. No physician who values his reputation, or seeks the interests of his clients, can acquit himself before his God and the world without making himself familiar with the sound and philosophical views developed in the foregoing book.—*New Orleans Medical and Surgical Journal.*

Without doubt the ablest exposition of the principles of that branch of the healing art in any lan-

guage. This opinion, deliberately formed after a careful study of the first edition, we have had no cause to change on examining the second. This edition has undergone thorough revision by the author; many expressions have been modified, and a mass of new matter introduced. The book is got up in the finest style, and is an evidence of the progress of typography in our country.—*Charleston Medical Journal and Review.*

We recommend it to both student and practitioner, feeling assured that as it now comes to us, it presents the most satisfactory exposition of the modern doctrines of the principles of surgery to be found in any volume in any language.—*N. Y. Journal of Medicine.*

BY THE SAME AUTHOR. (Now Ready.)

**THE PRACTICE OF SURGERY.** Third American from the second Edinburgh edition. Edited, with Additions, by F. W. SARGENT, M. D., one of the Surgeons to Will's Hospital, &c. Illustrated by three hundred and nineteen engravings on wood. In one large octavo volume, of over seven hundred pages.

This new edition will be found greatly improved and enlarged, as well by the addition of much new matter as by the introduction of a large and complete series of handsome illustrations. An equal improvement exists in the mechanical execution of the work, rendering it in every respect a companion volume to the "Principles."

We had occasion in a former number of this Journal, to speak in deservedly high terms of Professor Miller's work on the "Principles of Surgery," and we are happy to be able to pronounce an equally favorable judgment on the manner in which the present volume is executed. \* \* \* We feel no hesitation in recommending Professor Miller's two volumes as affording to the student what the author intended, namely, a complete text-book of Surgery.—*British and Foreign Medical Review.*

Although, as we are modestly informed in the preface, it is not put forth in rivalry of the excel-

lent works on Practical Surgery which already exist, we think we may take upon ourselves to say that it will form a very successful and formidable rival to most of them.—*Northern Journ. of Medicine.*

Taken together they form a very condensed and complete system of Surgery, not surpassed, as a text-book, by any work with which we are acquainted.—*Ill. and Ind. Med. and Surg. Journal.*

Mr. Miller has said more in a few words than any writer since the days of Celsus.—*N. O. Med. and Surg. Journal.*

MALGAIGNE (J. F.).

**OPERATIVE SURGERY,** based on Normal and Pathological Anatomy. Translated from the French, by FREDERICK BRITTON, A. B., M. D. With numerous illustrations on wood. In one handsome octavo volume, of nearly six hundred pages.

We have long been accustomed to refer to it as one of the most valuable text-books in our library.—*Buffalo Med. and Surg. Journal.*

Certainly one of the best books published on operative surgery.—*Edinburgh Medical Journal.*

To express in a few words our opinion of Malgaigne's work, we unhesitatingly pronounce it the very best guide in surgical operations that has come before the profession in any language.—*Charleston Med. and Surg. Journal.*

MOHR (FRANCIS), PH. D., AND REDWOOD (THEOPHILUS).

**PRACTICAL PHARMACY.** Comprising the Arrangements, Apparatus, and Manipulations of the Pharmaceutical Shop and Laboratory. Edited, with extensive Additions, by Prof. WILLIAM PROCTER, of the Philadelphia College of Pharmacy. In one handsomely printed octavo volume, of 570 pages, with over 500 engravings on wood.

It is a book, however, which will be in the hands of almost every one who is much interested in pharmaceutical operations, as we know of no other publication so well calculated to fill a void long felt.—*Medical Examiner.*

The book is strictly practical, and describes only manipulations or methods of performing the numerous processes the pharmacist has to go through, in the preparation and manufacture of medicines, together with all the apparatus and fixtures neces-

sary thereto. On these matters, this work is very full and complete, and details, in a style uncommonly clear and lucid, not only the more complicated and difficult processes, but those not less important ones, the most simple and common.—*Buffalo Medical Journal.*

The country practitioner who is obliged to dispense his own medicines, will find it a most valuable assistant.—*Monthly Journal and Retrospect.*

MACLISE (JOSEPH), SURGEON.

## SURGICAL ANATOMY,

FORMING ONE VOLUME, VERY LARGE IMPERIAL QUARTO.

With Sixty-eight large and splendid Plates, drawn in the best style, and beautifully colored.

*Containing one hundred and ninety Figures, many of them the size of life.*

TOGETHER WITH COPIOUS AND EXPLANATORY LETTER-PRESS.

Strongly and handsomely bound in extra cloth, being one of the cheapest and best executed Surgical works as yet issued in this country.

Copies can be sent by mail, in five parts, done up in stout covers.

This great work being now concluded, the publishers confidently present it to the attention of the profession as worthy in every respect of their approbation and patronage. No complete work of the kind has yet been published in the English language, and it therefore will supply a want long felt in this country of an accurate and comprehensive Atlas of Surgical Anatomy to which the student and practitioner can at all times refer, to ascertain the exact relative position of the various portions of the human frame towards each other and to the surface, as well as their abnormal deviations. The importance of such a work to the student in the absence of anatomical material, and to the practitioner when about attempting an operation, is evident, while the price of the book, notwithstanding the large size, beauty, and finish of the very numerous illustrations, is so low as to place it within the reach of every member of the profession. The publishers therefore confidently anticipate a very extended circulation for this magnificent work.

One of the greatest artistic triumphs of the age in Surgical Anatomy.—*British American Medical Journal*.

Too much cannot be said in its praise; indeed, we have no language to do it justice.—*Ohio Medical and Surgical Journal*.

The most admirable surgical atlas we have seen. To the practitioner deprived of demonstrative dissections upon the human subject, it is an invaluable companion.—*N. J. Medical Reporter*.

The most accurately engraved and beautifully colored plates we have ever seen in an American book—one of the best and cheapest surgical works ever published.—*Buffalo Medical Journal*.

It is very rare that so elegantly printed, so well illustrated, and so useful a work, is offered at so moderate a price.—*Charleston Medical Journal*.

Its plates can boast a superiority which places them almost beyond the reach of competition.—*Medical Examiner*.

Every practitioner, we think, should have a work of this kind within reach.—*Southern Medical and Surgical Journal*.

No such lithographic illustrations of surgical regions have hitherto, we think, been given.—*Boston Medical and Surgical Journal*.

As a surgical anatomist, Mr. MacLise has probably no superior.—*British and Foreign Medico-Chirurgical Review*.

Of great value to the student engaged in dissecting, and to the surgeon at a distance from the means of keeping up his anatomical knowledge.—*Medical Times*.

The mechanical execution cannot be excelled.—*Transylvania Medical Journal*.

A work which has no parallel in point of accuracy and cheapness in the English language.—*N. Y. Journal of Medicine*.

To all engaged in the study or practice of their profession, such a work is almost indispensable.—*Dublin Quarterly Medical Journal*.

No practitioner whose means will admit should fail to possess it.—*Ranking's Abstract*.

Country practitioners will find these plates of immense value.—*N. Y. Medical Gazette*.

We are extremely gratified to announce to the profession the completion of this truly magnificent work, which, as a whole, certainly stands unri-

valled, both for accuracy of drawing, beauty of coloring, and all the requisite explanations of the subject in hand. To the publishers, the profession in America is deeply indebted for placing such a valuable, such a useful work, at its disposal, and at such a moderate price. It is one of the most finished and complete pictures of Surgical Anatomy ever offered to the profession of America.—With these plates before them, the student and practitioner can never be at a loss, under the most desperate circumstances. We do not intend these for commonplace compliments. We are sincere; because we know the work will be found invaluable to the young, no less than the old, surgeon. We have not space to point out its beauties, and its merits; but we speak of it *en masse*, as a whole, and strongly urge—especially those who, from their position, may be debarred the privilege and opportunity of inspecting the fresh subject, to furnish themselves with the entire work.—*The New Orleans Medical and Surgical Journal*.

This is by far the ablest work on Surgical Anatomy that has come under our observation. We know of no other work that would justify a student, in any degree, for neglect of actual dissection. A careful study of these plates, and of the commentaries on them, would almost make an anatomist of a diligent student. And to one who has studied anatomy by dissection, this work is invaluable as a perpetual remembrancer, in matters of knowledge that may slip from the memory. The practitioner can scarcely consider himself equipped for the duties of his profession without such a work as this, and this has no rival, in his library. In those sudden emergencies that so often arise, and which require the instantaneous command of minute anatomical knowledge, a work of this kind keeps the details of the dissecting-room perpetually fresh in the memory. We appeal to our readers, whether any one can justifiably undertake the practice of medicine who is not prepared to give all needful assistance, in all matters demanding immediate relief. We repeat that no medical library, however large, can be complete without MacLise's Surgical Anatomy. The American edition is well entitled to the confidence of the profession, and should command, among them, an extensive sale. The investment of the amount of the cost of this work will prove to be a very profitable one, and if practitioners would qualify themselves thoroughly with such important knowledge as is contained in works of this kind, there would be fewer of them sighing for employment. The medical profession should spring towards such an opportunity as is presented in this republication, to encourage frequent repetitions of American enterprise of this kind.—*The Western Journal of Medicine and Surgery*.

The very low price at which this work is furnished, and the beauty of its execution, require an extended sale to compensate the publishers for the heavy expenses incurred.

MULLER (PROFESSOR J.), M. D.

**PRINCIPLES OF PHYSICS AND METEOROLOGY.** Edited, with Additions, by R. EGLESFELD GRIFFITH, M. D. In one large and handsome octavo volume, extra cloth, with 550 wood-cuts, and two colored plates.

The Physics of Müller is a work superb, complete, unique: the greatest want known to English Science could not have been better supplied. The work is of surpassing interest. The value of this contribution to the scientific records of this country may be duly estimated by the fact that the cost of the original drawings and engravings alone has exceeded the sum of £2,000.—*Lancet*.

MAYNE (JOHN), M. D., M. R. C. S., &amp;c.

**A DISPENSATORY AND THERAPEUTICAL REMEMBRANCER.** Comprising the entire lists of *Materia Medica*, with every Practical Formula contained in the three British Pharmacopœias. With relative Tables subjoined, illustrating, by upwards of six hundred and sixty examples, the Extemporaneous Forms and Combinations suitable for the different Medicines. Edited, with the addition of the Formulæ of the United States Pharmacopœia, by R. EGLESFELD GRIFFITH, M. D. In one 12mo. volume, extra cloth, of over 300 large pages.

MATTEUCCI (CARLO).

**LECTURES ON THE PHYSICAL PHENOMENA OF LIVING BEINGS.** Edited by PEREIRA. In one neat royal 12mo. volume, extra cloth, with cuts, 388 pages.

MARKWICK (ALFRED).

**A GUIDE TO THE EXAMINATION OF THE URINE IN HEALTH AND DISEASE.** Royal 12mo. (*See Manuals on Blood and Urine.*)

MEDLOCK (HENRY), AND F. SCHOEDLER.

**BOOK OF NATURE; or Elements of the Science of Physics, Astronomy, Chemistry, Mineralogy, Geology, Botany, Zoology, and Physiology.** (*See Schoedler.*) In one vol., large 12mo. An admirable work for families and District Schools.

NEILL (JOHN), M. D.,

Demonstrator of Anatomy in the University of Pennsylvania; Surgeon to the Pennsylvania Hospital, &c.;

and

FRANCIS GURNEY SMITH, M. D.,

Professor of Institutes of Medicine in the Pennsylvania Medical College.

**AN ANALYTICAL COMPENDIUM OF THE VARIOUS BRANCHES OF MEDICAL SCIENCE;** for the Use and Examination of Students. Second edition, revised and improved. In one very large and handsomely printed royal 12mo. volume, of over one thousand pages, with three hundred and fifty illustrations on wood. Strongly bound in leather, with raised bands. (*Extensively used by students.*)

PREFACE TO THE NEW EDITION.

The speedy sale of a large impression of this work has afforded to the authors gratifying evidence of the correctness of the views which actuated them in its preparation. In meeting the demand for a second edition, they have therefore been desirous to render it more worthy of the favor with which it has been received. To accomplish this, they have spared neither time nor labor in embodying in it such discoveries and improvements as have been made since its first appearance, and such alterations as have been suggested by its practical use in the class and examination-room. Considerable modifications have thus been introduced throughout all the departments treated of in the volume, but more especially in the portion devoted to the "Practice of Medicine," which has been entirely rearranged and rewritten. The authors therefore again submit their work to the profession, with the hope that their efforts may tend, however humbly, to advance the great cause of medical education.

Notwithstanding the increased size and improved execution of this work, the price has not been increased, and it is confidently presented as one of the cheapest volumes now before the profession.

In the rapid course of lectures, where work for the students is heavy, and review necessary for an examination, a compend is not only valuable, but it is almost a *sine qua non*. The one before us is, in most of the divisions, the most unexceptionable of all books of the kind that we know of. The newest and soundest doctrines and the latest improvements and discoveries are explicitly, though concisely, laid before the student. Of course it is useless for us to recommend it to all last course students, but there is a class to whom we very sincerely commend this cheap book as worth its weight in silver—that class is the graduates in medicine of more than ten years' standing, who have not studied medicine since. They will perhaps find out from it that the science is not exactly now what it was when they left it off.—*The Stethoscope*

Having made free use of this volume in our examinations of pupils, we can speak from experience in recommending it as an admirable compend for students, and as especially useful to preceptors who examine their pupils. It will save the teacher much labor by enabling him readily to recall all of the points upon which his pupils should be examined. A work of this sort should be in the hands of every one who takes pupils into his office with a view of examining them; and this is unquestionably the best of its class. Let every practitioner who has pupils provide himself with it, and he will find the labor of refreshing his knowledge so much facilitated that he will be able to do justice to his pupils at very little cost of time or trouble to himself.—*Transylvania Med. Journal.*

NELIGAN (J. MOORE), M. D., M. R. I. A., &c.

A PRACTICAL TREATISE ON DISEASES OF THE SKIN. In one neat royal 12mo. volume, of 334 pages. (*Just Issued.*)

We know of no other treatise on this interesting and important class of diseases that so happily meets the urgent wants of the great mass of physicians.—*N. Y. Journal of Medicine.*

The greatest value of Dr. Neligan's treatise consists in the plain and thoroughly practical exposition he has given of this class of maladies.—*Brit. and For. Med.-Chirurg. Review.*

PHILLIPS (BENJAMIN), F. R. S., &c.

SCROFULA; its Nature, its Prevalence, its Causes, and the Principles of its Treatment. In one volume, octavo, with a plate.

PEREIRA (JONATHAN), M. D., F. R. S., AND L. S.

THE ELEMENTS OF MATERIA MEDICA AND THERAPEUTICS.

Third American edition, enlarged and improved by the author; including Notices of most of the Medicinal Substances in use in the civilized world, and forming an Encyclopædia of Materia Medica. Edited by JOSEPH CARSON, M. D., Professor of Materia Medica and Pharmacy in the University of Pennsylvania. In two very large octavo volumes, on small type, with about four hundred illustrations.

VOLUME I.—Lately issued, containing the Inorganic Materia Medica, over 800 pages, with 145 illustrations.

VOLUME II.—Embracing the Organic Materia Medica, was left by the late author in nearly a complete state, is now revising with his MSS., by ALFRED S. TAYLOR and G. OWEN REES, and may be expected in October 1853, with plates and several hundred wood-cuts.

The present edition of this favorite and standard work, will be found far superior to its predecessors. Besides very large additions and alterations which were made in the last London edition, the work has undergone a thorough revision on the part of the author expressly for this country; and has farther received numerous additions from the editor. It is thus greatly increased in size, and most completely brought up to the present state of our knowledge on this important subject. A similar improvement will be found in its mechanical execution, being printed with new type on fine white paper, with a greatly extended series of illustrations, engraved in the highest style of art.

The work, in its present shape, and so far as can be judged from the portion before the public, forms the most comprehensive and complete treatise on materia medica extant in the English language.—Dr. Pereira has been at great pains to introduce into his work, not only all the information on the natural, chemical, and commercial history of medicines, which might be serviceable to the physician and surgeon, but whatever might enable his readers to understand thoroughly the mode of prepar-

ing and manufacturing various articles employed either for preparing medicines, or for certain purposes in the arts connected with materia medica and the practice of medicine. The accounts of the physiological and therapeutic effects of remedies are given with great clearness and accuracy, and in a manner calculated to interest as well as instruct the reader.—*The Edinburgh Medical and Surgical Journal.*

PAGET (JAMES), F. R. S., AND W. S. KIRKES.

MANUAL OF PHYSIOLOGY. Second American edition. One vol., large 12mo. (See Kirkes.)

PIRRIE (WILLIAM), F. R. S. E.,

Professor of Surgery in the University of Aberdeen.

THE PRINCIPLES AND PRACTICE OF SURGERY. Edited by JOHN NEILL, M. D., Demonstrator of Anatomy in the University of Pennsylvania, Surgeon to the Pennsylvania Hospital, &c. In one very handsome octavo volume, of 780 pages, with 316 illustrations. (*Just Issued.*)

However well it may be adapted for a text-book (and in this respect it may compete with the best of them) of this much our reading has convinced us, that as a systematic treatise, it is carefully and ably written, and can hardly fail to command a prominent position in the library of practitioners; though not complete in the fullest sense of the word, it nevertheless furnishes the student and practitioner with as chaste and concise a work as exists in our language. The additions to the volume by Dr. Neill, are judicious; and while they render it more complete, greatly enhance its practical value, as a work for practitioners and students.—*N. Y. Journal of Medicine.*

We know of no other surgical work of a reasonable size, wherein there is so much theory and practice, or where subjects are more soundly or clearly taught.—*The Spectator.*

There is scarcely a disease of the bone or soft parts, fracture, or dislocation, that is not illustrated

by accurate wood-engravings. Then, again, every instrument employed by the surgeon is thus represented. These engravings are not only correct, but really beautiful, showing the astonishing degree of perfection to which the art of wood-engraving has arrived. Prof. Pirrie, in the work before us, has elaborately discussed the principles of surgery, and a safe and effectual practice predicated upon them. Perhaps no work upon this subject heretofore issued is so full upon the science of the art of surgery.—*Nashville Journal of Medicine and Surgery.*

We have made ourselves more intimately acquainted with its details, and can now pronounce it to be one of the best treatises on surgery in the English language. In conclusion, we very strongly recommend this excellent work, both to the practitioner and student.—*Canada Med. Journal.*

Our impression is, that as a manual for students, Pirrie's is the best work extant.—*Western Med. and Surg. Journal.*

RAMSBOTHAM (FRANCIS H.), M. D.

**THE PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE AND SURGERY**, in reference to the Process of Parturition. Sixth American, from the last London edition. Illustrated with one hundred and forty-eight Figures, on fifty-five Lithographic Plates. In one large and handsomely printed volume, imperial octavo, with 520 pages.

In this edition, the plates have all been redrawn, and the text carefully read and corrected. It is therefore presented as in every way worthy the favor with which it has so long been received.

*From Prof. Hodge, of the University of Pa.*

To the American public, it is most valuable, from its intrinsic undoubted excellence, and as being the best authorized exponent of British Midwifery. Its circulation will, I trust, be extensive throughout our country.

We recommend the student who desires to master this difficult subject with the least possible trouble, to possess himself at once of a copy of this work.—*American Journal of the Med. Sciences.*

It stands at the head of the long list of excellent obstetric works published in the last few years in Great Britain, Ireland, and the Continent of Europe. We consider this book indispensable to the library of every physician engaged in the practice of midwifery.—*Southern Med. and Surg. Journal.*

When the whole profession is thus unanimous in placing such a work in the very first rank as regards the extent and correctness of all the details of the theory and practice of so important a branch of learning, our commendation or condemnation would be of little consequence; but regarding it as the most useful of all works of the kind, we think it but an act of justice to urge its claims upon the profession.—*N. O. Med. Journal.*

RIGBY (EDWARD), M. D.

Physician to the General Lying-in Hospital, &c.

**A SYSTEM OF MIDWIFERY**. With Notes and Additional Illustrations. Second American Edition. One volume octavo, 422 pages.

The repeated demands for this work, which has now for some time been out of print, have induced the publishers to prepare another edition. The reputation which it has acquired for the clearness of its views, especially as regards the physiological portion of obstetrical science, will secure for it the confidence of the profession. A copy of the first edition was placed in the hands of the late Professor Dewees, a few weeks before his death, and obtained from him the expression of his most favorable opinion.

RICORD (PH.), M. D.

**HUNTER ON VENEREAL**, with extensive Additions by Ricord. (*Nearly Ready.*) See HUNTER.

ROYLE (J. FORBES), M. D.

**MATERIA MEDICA AND THERAPEUTICS**; including the Preparations of the Pharmacopœias of London, Edinburgh, Dublin, and of the United States. With many new medicines. Edited by JOSEPH CARSON, M. D., Professor of Materia Medica and Pharmacy in the University of Pennsylvania. With ninety-eight illustrations. In one large octavo volume, of about seven hundred pages.

This work is, indeed, a most valuable one, and will fill up an important vacancy that existed between Dr. Pereira's most learned and complete system of Materia Medica, and the class of pro-

ductions on the other extreme, which are necessarily imperfect from their small extent.—*British and Foreign Medical Review.*

REESE (G. OWEN), M. D.

**ON THE ANALYSIS OF THE BLOOD AND URINE IN HEALTH AND DISEASE**, and on the Treatment of Urinary Diseases. Royal 12mo., with plates. (*See Blood and Urine, Manuals of.*)

RICORD (P.), M. D.

**A PRACTICAL TREATISE ON VENEREAL DISEASES**. With a Therapeutical Summary and Special Formulary. Translated by SIDNEY DOANE, M. D. Fourth edition. One volume, octavo, 340 pages.

SKEY (FREDERICK C.), F. R. S., &amp;c.

**OPERATIVE SURGERY**. In one very handsome octavo volume of over 650 pages, with about one hundred wood-cuts.

Its literary execution is superior to most surgical treatises. It abounds in excellent moral hints, and is replete with original surgical expedients and suggestions.—*Buffalo Med. and Surg. Journal.*

With high talents, extensive practice, and a long experience, Mr. Skey is perhaps competent to the task of writing a complete work on operative surgery.—*Charleston Med. Journal.*

We cannot withhold from this work our high commendation. Students and practitioners will find it an invaluable teacher and guide upon every topic connected with this department.—*N. Y. Medical Gazette.*

A work of the very highest importance—a work by itself.—*London Med. Gazette.*

**SHARPEY (WILLIAM), M. D., QUAIN (JONES), M. D., AND  
QUAIN (RICHARD), F. R. S., &c.**

**HUMAN ANATOMY.** Revised, with Notes and Additions, by **JOSEPH LEIDY, M. D.** Complete in two large octavo volumes, of about thirteen hundred pages. Beautifully illustrated with over five hundred engravings on wood.

It is indeed a work calculated to make an era in anatomical study, by placing before the student every department of his science, with a view to the relative importance of each; and so skilfully have the different parts been interwoven, that no one who makes this work the basis of his studies, will hereafter have any excuse for neglecting or undervaluing any important particulars connected with the structure of the human frame; and whether the bias of his mind lead him in a more especial manner to surgery, physic, or physiology, he will find here a work at once so comprehensive and practical as to defend him from exclusiveness on the one hand, and pedantry on the other.—*Monthly Journal and Retrospect of the Medical Sciences.*

We have no hesitation in recommending this treatise on anatomy as the most complete on that subject in the English language; and the only one, perhaps, in any language, which brings the state of knowledge forward to the most recent discoveries.—*The Edinburgh Med. and Surg. Journal.*

Admirably calculated to fulfil the object for which it is intended.—*Provincial Medical Journal.*

The most complete Treatise on Anatomy in the English language.—*Edinburgh Medical Journal.*

There is no work in the English language to be preferred to Dr. Quain's Elements of Anatomy.—*London Journal of Medicine.*

**SMITH (HENRY H.), M. D., AND HORNER (WILLIAM E.), M. D.**

**AN ANATOMICAL ATLAS,** illustrative of the Structure of the Human Body. In one volume, large imperial octavo, with about six hundred and fifty beautiful figures.

With the view of extending the sale of this beautifully executed and complete "Anatomical Atlas," the publishers have prepared a new edition, printed on both sides of the page, thus materially reducing its cost, and enabling them to present it at a price about forty per cent. lower than former editions, while, at the same time, the execution of each plate is in no respect deteriorated, and not a single figure is omitted.

These figures are well selected, and present a complete and accurate representation of that wonderful fabric, the human body. The plan of this Atlas, which renders it so peculiarly convenient for the student, and its superb artistical execution, have been already pointed out. We must congratulate

the student upon the completion of this Atlas, as it is the most convenient work of the kind that has yet appeared; and we must add, the very beautiful manner in which it is "got up" is so creditable to the country as to be flattering to our national pride.—*American Medical Journal.*

**SARGENT (F. W.), M. D.**

**ON BANDAGING AND OTHER POINTS OF MINOR SURGERY.** In one handsome royal 12mo. volume of nearly 400 pages, with 128 wood-cuts.

The very best manual of Minor Surgery we have seen; an American volume, with nearly four hundred octavo pages of good practical lessons, illustrated by about one hundred and thirty wood-cuts. In these days of "trial," when a doctor's reputation hangs upon a close hitch, or the roll of a bandage, it would be well, perhaps, to carry such a journal as Mr. Sargent's always in our coat-pocket, or, at all events, to listen attentively to his instructions at home.—*Buffalo Med. Journal.*

We have carefully examined this work, and find it well executed and admirably adapted to the use of the student. Besides the subjects usually embraced in works on Minor Surgery, there is a short chapter on bathing, another on anæsthetic agents, and an appendix of formulæ. The author has given an excellent work on this subject, and his publishers have illustrated and printed it in most beautiful style.—*The Charleston Medical Journal.*

**STANLEY (EDWARD).**

**A TREATISE ON DISEASES OF THE BONES.** In one volume, octavo, extra cloth, 286 pages.

**SMITH (ROBERT WILLIAM).**

**A TREATISE ON FRACTURES IN THE VICINITY OF JOINTS, AND ON DISLOCATIONS.** One volume octavo, with 200 beautiful wood-cuts.

**SIMON (JOHN), F. R. S.**

**GENERAL PATHOLOGY,** as conducive to the Establishment of Rational Principles for the Prevention and Cure of Disease. A Course of Lectures delivered at St. Thomas's Hospital during the summer Session of 1850. In one neat octavo volume. (*Lately Issued.*)

His views are plainly and concisely stated, and in such an attractive manner, as to enchain the attention of the reader, and should they be adopted by the profession at large, are calculated to produce important changes in medicine. Physicians and students will obtain from its perusal, not only the latest

discoveries in Pathology, but that which is even more valuable, a systematic outline for the prosecution of their future studies and investigations. Altogether, we look upon it as one of the most satisfactory and rational treatises upon that branch now extant.—*Medical Examiner.*

**SMITH (TYLER W.), M. D.,**

Lecturer on Obstetrics in the Hunterian School of Medicine.

**ON PARTURITION, AND THE PRINCIPLES AND PRACTICE OF OBSTETRICS.** In one large duodecimo volume, of 400 pages.

SOLLY (SAMUEL), F. R. S.

THE HUMAN BRAIN; its Structure, Physiology, and Diseases. With a Description of the Typical Forms of the Brain in the Animal Kingdom. From the Second and much enlarged London edition. In one octavo volume, with 120 wood-cuts.

SCHOEDLER (FRIEDRICH), PH. D.,

Professor of the Natural Sciences at Worms, &c.

THE BOOK OF NATURE; and Elementary Introduction to the Sciences of Physics, Astronomy, Chemistry, Mineralogy, Geology, Botany, Zoology, and Physiology. Translated from the sixth German edition, with Additions, by HENRY MEDLOCK, F. C. S., &c. And Additions and Alterations by the American Editor. In one thick volume, small octavo, with over 600 illustrations on wood. (Suitable for the higher Schools.)

SMITH (F. GURNEY), M. D., AND JOHN NEILL, M. D.

ANALYTICAL COMPENDIUM OF THE VARIOUS BRANCHES OF MEDICAL SCIENCE. One vol., large 12mo. (See Neill.)

TAYLOR (ALFRED S.), M. D., F. R. S.,

Lecturer on Medical Jurisprudence and Chemistry in Guy's Hospital.

MEDICAL JURISPRUDENCE. Third American, from the fourth and improved English Edition. With Notes and References to American Decisions, by EDWARD HARTSHORNE, M. D. In one large octavo volume, of about seven hundred pages. (*Just Ready.*)

In the preparation of the English edition, from which this has been printed, the author has found it necessary to revise the whole of the chapters, as well as to make numerous alterations and additions, together with references to many recent cases of importance. A Glossary has also been added for the convenience of those whose studies have not been directed specially to this subject. The notes of the American editor embrace the additions formerly made by Dr. Griffith, who revised the work on its first appearance in this country, together with such new matter as his experience and the progress of the science have shown to be advisable. The work may therefore be regarded as fully on a level with the most recent discoveries, and worthy of the reputation which it has acquired as a complete and compendious guide for the physician and lawyer.

So well is this work known to the members both of the medical and legal professions, and so highly is it appreciated by them, that it cannot be necessary for us to say a word in its commendation; its having already reached a fourth edition being the best possible testimony in its favor. The author has obviously subjected the entire work to a very careful revision. We find scattered through it numerous additions and alterations, some of them of considerable importance; and reference is made to a large number of cases which have occurred since the date of the last publication.—*British and Foreign Med.-Chirurg. Review.*

The fourth edition of Dr. Taylor's Manual of Medical Jurisprudence needs merely a simple announcement at our hands; the merits of the work have been freely canvassed by us on a former occasion, and we have now but to say that the author has spared no pains in keeping it on a par in all respects with the advance of both medical and legal science.—*Dublin Med. Journal.*

This work of Dr. Taylor's is generally acknowledged to be one of the ablest extant on the subject of medical jurisprudence. It is certainly one of the most attractive books that we have met with; supplying so much both to interest and instruct, that we do not hesitate to affirm that after having once commenced its perusal, few could be prevailed upon

to desist before completing it. In the last London edition, all the newly observed and accurately recorded facts have been inserted, including much that is recent of Chemical, Microscopical, and Pathological research, besides papers on numerous subjects never before published; in the supervision of this, the third American, one of the last labors of the lamented Dr. Griffith, we find a goodly number of notes and additions. The publishers deserve the support of the profession for the publication of a work of such sterling merit.—*Charleston Medical Journal and Review.*

It is not excess of praise to say that the volume before us is the very best treatise extant on Medical Jurisprudence. In saying this, we do not wish to be understood as detracting from the merits of the excellent works of Beck, Ryan, Traill, Guy, and others; but in interest and value we think it must be conceded that Taylor is superior to anything that has preceded it. The author is already well known to the profession by his valuable treatise on Poisons; and the present volume will add materially to his high reputation for accurate and extensive knowledge and discriminating judgment. Dr. Griffith has, in his notes, added many matters of interest with reference to American Statute Law, &c., so that the work is brought completely up to the wants of the physician and lawyer at the present day.—*N. W. Medical and Surgical Journal.*

BY THE SAME AUTHOR.

ON POISONS, IN RELATION TO MEDICAL JURISPRUDENCE AND MEDICINE. Edited, with Notes and Additions, by R. E. GRIFFITH, M. D. In one large octavo volume, of 688 pages.

The most elaborate work on the subject that our literature possesses.—*British and Foreign Medico-Chirurgical Review.*

It contains a vast body of facts, which embrace all that is important in toxicology, all that is necessary to the guidance of the medical jurist, and all that can be desired by the lawyer.—*Medico-Chirurgical Review.*

One of the most practical and trustworthy works on Poisons in our language.—*Western Journal of Medicine.*

It is, so far as our knowledge extends, incomparably the best upon the subject; in the highest degree creditable to the author, entirely trustworthy, and indispensable to the student and practitioner.—*N. Y. Annalist.*

THOMSON (A. T.), M. D., F. R. S., &c.

DOMESTIC MANAGEMENT OF THE SICK ROOM, necessary in aid of Medical Treatment for the Cure of Diseases. Edited by R. E. GRIFFITH, M. D. In one large royal 12mo. volume, with wood-cuts, 360 pages.

**TODD (R. B.), M. D., AND BOWMAN (WILLIAM), F. R. S.**  
**PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN.** With numerous handsome wood-cuts. Parts I, II, and III, in one octavo volume, 552 pages. Part IV will complete the work.

The distinguishing peculiarity of this work is, that the authors investigate for themselves every fact asserted; and it is the immense labor consequent upon the vast number of observations requisite to carry out this plan, which has so long delayed the appearance of its completion. Part IV, with numerous original illustrations, is now appearing in the *Medical News and Library* for 1853. Those who have subscribed since the appearance of the preceding portion of the work can have the three parts by mail, on remittance of \$2 50 to the publishers.

**TRANSACTIONS OF THE AMERICAN MEDICAL ASSOCIATION.**  
**VOLUME V**, for 1852, large 8vo., of 940 pages, with numerous maps.  
 Also to be had, a few sets of the Transactions from 1848 to 1851, in four large octavo volumes. These volumes are published by and sold on account of the Association.

**WATSON (THOMAS), M. D., &c.**  
**LECTURES ON THE PRINCIPLES AND PRACTICE OF PHYSIC.**  
 Third American, from the last London edition. Revised, with Additions, by D. FRANCIS CONDIE, M. D., author of a "Treatise on the Diseases of Children," &c. In one octavo volume, of nearly eleven hundred large pages, strongly bound with raised bands.

To say that it is the very best work on the subject now extant, is but to echo the sentiment of the medical press throughout the country.—*N. O. Medical Journal*.

Of the text-books recently republished Watson is very justly the principal favorite.—*Holmes's Rep. to Nat. Med. Assoc.*

By universal consent the work ranks among the very best text-books in our language.—*Illinois and Indiana Med. Journal*.

Regarded on all hands as one of the very best, if not the very best, systematic treatise on practical medicine extant.—*St. Louis Med. Journal*.

Confessedly one of the very best works on the principles and practice of physic in the English or any other language.—*Med. Examiner*.

As a text-book it has no equal; as a compendium of pathology and practice no superior.—*New York Annalist*.

We know of no work better calculated for being placed in the hands of the student, and for a text-book; on every important point the author seems to have posted up his knowledge to the day.—*Amer. Med. Journal*.

One of the most practically useful books that ever was presented to the student.—*N. Y. Med. Journal*.

**WALSHE (W. H.), M. D.,**  
 Professor of the Principles and Practice of Medicine in University College, London.  
**DISEASES OF THE HEART, LUNGS, AND APPENDAGES; their Symptoms and Treatment.** In one handsome volume, large royal 12mo., 512 pages.

We consider this as the ablest work in the English language, on the subject of which it treats; the author being the first stethoscopist of the day.—*Charleston Medical Journal*.

The examination we have given the above work, convinces us that it is a complete system or treatise upon the great speciality of Physical Diagnosis. To give the reader a more perfect idea of what it con-

tains, we should be glad to copy the whole table of contents and make some extracts from its pages, but our limits forbid. We have no hesitation in recommending the work as one of the most complete on this subject in the English language; and yet it is not so voluminous as to be objectionable on this account, to any practitioner, however pressing his engagements.—*Ohio Medical and Surgical Journal*.

**WHAT TO OBSERVE**  
**AT THE BEDSIDE AND AFTER DEATH, IN MEDICAL CASES.**

Published under the authority of the London Society for Medical Observation. In one very handsome volume, royal 12mo., extra cloth (*Just Issued.*)

Did not the perusal of the work justify the high opinion we have of it, the names of Dr. Walshe, the originator, and of Dr. Ballard, as the editor of the volume, would almost of itself have satisfied us that it abounds in minute clinical accuracy. We need not say that the execution of the whole reflects the highest credit not only upon the gentlemen mentioned, but upon all those engaged upon its production. In conclusion, we are convinced that the possession of the work will be almost necessary to every member of the profession—that it will be found indispensable to the practical physician, the pathologist, the medical jurist, and above all to the medical student.—*London Medical Times*.

We hail the appearance of this book as the grand desideratum.—*Charleston Medical Journal*.

This little work, if carefully read by even old practitioners, cannot fail to be productive of much good; as a guide to the younger members of the profession in directing their attention specially to the best mode of investigating cases so as to arrive at

correct diagnosis, it will prove exceedingly valuable. The great difficulty with beginners, who have not been under the immediate training of an experienced physician, is continually found to be in the appreciation of the true condition of the organs and tissues. Let such provide themselves with this work and study it thoroughly, and they will find much of the difficulty removed.—*Southern Medical and Surgical Journal*.

This is truly a very capital book. The whole medical world will reap advantages from its publication. The medical Journals will soon show its influence on the character of the "Reports of Cases" which they publish. Drs. Ballard and Walshe have given to the world, through a small but useful medical organization, a cheap but invaluable book. We do advise every reader of this notice to buy it and use it. Unless he is so vain as to imagine himself superior to the ordinary human capacity, he will in six months see its inestimable advantages.—*Stethoscope*.

WILSON (ERASMUS), M. D., F. R. S.,  
Lecturer on Anatomy, London.

**A SYSTEM OF HUMAN ANATOMY, General and Special.** Fourth American, from the last English edition. Edited by PAUL B. GODDARD, A. M., M. D. With two hundred and fifty illustrations. Beautifully printed, in one large octavo volume, of nearly six hundred pages.

In many, if not all the Colleges of the Union, it has become a standard text-book. This, of itself, is sufficiently expressive of its value. A work very desirable to the student; one, the possession of which will greatly facilitate his progress in the study of Practical Anatomy.—*New York Journal of Medicine.*

Its author ranks with the highest on Anatomy.—*Southern Medical and Surgical Journal.*

It offers to the student all the assistance that can be expected from such a work.—*Medical Examiner.*

The most complete and convenient manual for the student we possess.—*American Journal of Medical Science.*

In every respect, this work as an anatomical guide for the student and practitioner, merits our warmest and most decided praise.—*London Medical Gazette.*

BY THE SAME AUTHOR.

**THE DISSECTOR; or, Practical and Surgical Anatomy.** Modified and Rearranged, by PAUL BECK GODDARD, M. D. A new edition, with Revisions and Additions. In one large and handsome volume, royal 12mo., with one hundred and fifteen illustrations.

In passing this work again through the press, the editor has made such additions and improvements as the advance of anatomical knowledge has rendered necessary to maintain the work in the high reputation which it has acquired in the schools of the United States, as a complete and faithful guide to the student of practical anatomy. A number of new illustrations have been added, especially in the portion relating to the complicated anatomy of Hernia. In mechanical execution the work will be found superior to former editions.

BY THE SAME AUTHOR.

**ON DISEASES OF THE SKIN.** Third American, from the third London edition. In one neat octavo volume, of about five hundred pages, extra cloth. (*Just Issued.*)

Also, to be had done up with fifteen beautiful steel plates, of which eight are exquisitely colored; representing the Normal and Pathological Anatomy of the Skin, together with accurately colored delineations of more than sixty varieties of disease, most of them the size of nature. The Plates are also for sale separate, done up in boards.

The increased size of this edition is sufficient evidence that the author has not been content with a mere republication, but has endeavored to maintain the high character of his work as the standard text-book on this interesting and difficult class of diseases. He has thus introduced such new matter as the experience of the last three or four years has suggested, and has made such alterations as the progress of scientific investigation has rendered expedient. The illustrations have also been materially augmented, the number of plates being increased from eight to sixteen.

The "Diseases of the Skin," by Mr. Erasmus Wilson, may now be regarded as the standard work in that department of medical literature. The plates by which this edition is accompanied leave nothing to be desired, so far as excellence of delineation and perfect accuracy of illustration are concerned.—*Medico-Chirurgical Review.*

As a practical guide to the classification, diagnosis, and treatment of the diseases of the skin, the book is complete. We know nothing, considered in this aspect, better in our language; it is a safe authority on all the ordinary matters which, in

this range of diseases, engage the practitioner's attention, and possesses the high quality—unknown, we believe, to every older manual—of being on a level with science's high-water mark; a sound book of practice.—*London Med. Times.*

Of these plates it is impossible to speak too highly. The representations of the various forms of cutaneous disease are singularly accurate, and the coloring exceeds almost anything we have met with in point of delicacy and finish.—*British and Foreign Medical Review.*

BY THE SAME AUTHOR.

**ON CONSTITUTIONAL AND HEREDITARY SYPHILIS, AND ON SYPHILITIC ERUPTIONS.** In one small octavo volume, beautifully printed, with four exquisite colored plates, presenting more than thirty varieties of syphilitic eruptions.

This, in many respects, is a remarkable work, presenting views of theory and principles of practice which, if true, must change completely the existing state of professional opinion.—*New York Journal of Medicine.*

Dr. Wilson's views on the general subject of Syphilis appear to us in the main sound and judicious, and we commend the book as an excellent monograph on the subject. Dr. Wilson has presented us a very faithful and lucid description of

Syphilis and has cleared up many obscure points in connection with its transmissibility, pathology and sequela. His facts and references will, we are satisfied, be received as decisive, in regard to many questions vexate. They appear to us entitled to notice at some length. We have perhaps been somewhat prodigal of space in our abstract of this book. But it is certainly a very good resumé of received opinions on Syphilis, and presents, to many, original and striking views on the subject.—*Med. Examiner.*

WHITEHEAD (JAMES), F. R. C. S., &c.

**THE CAUSES AND TREATMENT OF ABORTION AND STERILITY;** being the Result of an Extended Practical Inquiry into the Physiological and Morbid Conditions of the Uterus. In one volume, octavo, 368 pages.

WILDE (W. R.),

Surgeon to St. Mark's Ophthalmic and Aural Hospital, Dublin.

**AURAL SURGERY, AND THE NATURE AND TREATMENT OF DISEASES OF THE EAR.** In one handsome octavo volume, with illustrations. (*Just Ready.*)

So little is generally known in this country concerning the causes, symptoms, and treatment of aural affections, that a practical and scientific work on that subject, from a practitioner of Mr. Wilde's great experience, cannot fail to be productive of much benefit, by attracting attention to this obscure class of diseases, which too frequently escape attention until past relief. The immense number of cases which have come under Mr. Wilde's observation for many years, have afforded him opportunities rarely enjoyed for investigating this branch of medical science, and his work may therefore be regarded as of the highest authority.

WEST (CHARLES), M. D.,

Senior Physician to the Royal Infirmary for Children, &c.

**LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.**

In one volume, octavo, of four hundred and fifty pages.

The Lectures of Dr. West, originally published in the London Medical Gazette, form a most valuable addition to this branch of practical medicine. For many years physician to the Children's Infirmary, his opportunities for observing their diseases have been most extensive, no less than 14,000 children having been brought under his notice during the past nine years. These have evidently been studied with great care, and the result has been the production of the very best work in our language, so far as it goes, on the diseases of this class of our patients. The symptomatology and pathology of their diseases are especially exhibited most clearly; and we are convinced that no one can read with care these lectures without deriving from them instruction of the most important kind.—*Charleston Med. Journal.*

Every portion of these lectures is marked by a general accuracy of description, and by the soundness of the views set forth in relation to the pathology and therapeutics of the several maladies treated of. The lectures on the diseases of the respiratory apparatus, about one-third of the whole number, are particularly excellent, forming one of the fullest and most able accounts of these affections, as they present themselves during infancy and childhood, in the English language. The history of the several forms of phthisis during these periods of existence, with their management, will be read by all with deep interest.—*The American Journal of the Medical Sciences.*

WILLIAMS (C. J. B.), M. D., F. R. S.,

Professor of Clinical Medicine in University College, London, &c.

**PRINCIPLES OF MEDICINE; comprising General Pathology and Therapeutics, and a brief general view of Etiology, Nosology, Semeiology, Diagnosis, Prognosis, and Hygienics.** Edited, with Additions, by MEREDITH CLYMER, M. D. Fourth American, from the last and enlarged London edition. In one octavo volume, of nearly five hundred pages. *Now Ready.* This new edition has been materially enlarged and brought up by the editor.

It possesses the strongest claims to the attention of the medical student and practitioner, from the admirable manner in which the various inquiries in the different branches of pathology are investigated, combined, and generalized by an experienced practical physician, and directly applied to the investigation and treatment of disease.—**EDITOR'S PREFACE.**

The best exposition in our language, or, we believe, in any language, of rational medicine, in its present improved and rapidly improving state.—*British and Foreign Medico-Chirurg. Review.*

Few books have proved more useful, or met with a more ready sale than this, and no practitioner should regard his library as complete without it.—*Ohio Med. and Surg. Journal.*

BY THE SAME AUTHOR.

**A PRACTICAL TREATISE ON DISEASES OF THE RESPIRATORY ORGANS; including Diseases of the Larynx, Trachea, Lungs, and Pleuræ.** With numerous Additions and Notes, by M. CLYMER, M. D. With wood-cuts. In one octavo volume, pp. 508.

YOUATT (WILLIAM), V. S.

**THE HORSE.** A new edition, with numerous illustrations; together with a general history of the Horse; a Dissertation on the American Trotting Horse; how Trained and Jockeyed; an Account of his Remarkable Performances; and an Essay on the Ass and the Mule. By J. S. SKINNER, formerly Assistant Postmaster-General, and Editor of the Turf Register. One large octavo volume.

BY THE SAME AUTHOR.

**THE DOG.** Edited by E. J. LEWIS, M. D. With numerous and beautiful illustrations. In one very handsome volume, crown 8vo., crimson cloth, gilt.

**ILLUSTRATED MEDICAL CATALOGUE.**

BLANCHARD & LEA have now ready a Catalogue of their Medical and Surgical Publications, containing descriptions of the works, with Notices of the Press, and specimens of the Illustrations, making a pamphlet of forty-eight large octavo pages. It has been prepared with great care, and without regard to expense, forming one of the most beautiful specimens of typographical execution as yet issued in this country. Copies will be sent by mail, and the postage paid, on application to the Publishers, by enclosing a three cent postage stamp.

B. & L. subjoin a condensed list of their publications in general and educational literature, of which more detailed catalogues will be furnished on application.

### HISTORY AND BIOGRAPHY.

- BROWNING'S HISTORY OF THE HUGUENOTS.** 1 vol. 8vo.
- CAMPBELL'S (LORD) LIVES OF THE LORD CHANCELLORS OF ENGLAND,** from the earliest times to the Reign of George IV. In seven handsome crown octavo volumes, extra cloth or half morocco
- CAMPBELL'S (LORD) LIVES OF THE CHIEF JUSTICES OF ENGLAND,** from the Norman Conquest. In two handsome crown octavo vols., to match the "Chancellors."
- DIXON'S LIFE OF WILLIAM PENN.** A new work. 1 vol. royal 12mo., extra cloth.
- GRAHAME'S COLONIAL HISTORY OF THE UNITED STATES.** 2 vols. 8vo. A new edition.
- HERVEY'S MEMOIRS OF GEORGE II.** 2 vols. royal 12mo., extra cloth.
- INGERSOLL'S HISTORY OF THE LATE WAR.** 2 vols. 8vo.
- KENNEDY'S LIFE OF WILLIAM WIRT.** 2d edition, 2 vols. royal 12mo., extra cloth, with Portrait.
- Same work, library edition, 2 vols. 8vo.
- KAVANAGH'S WOMAN IN FRANCE IN THE EIGHTEENTH CENTURY.** 1 vol. royal 12mo., extra cloth
- LOUIS BLANC'S FRANCE UNDER LOUIS PHILIPPE, 1830-1840.** 2 vols. crown 8vo., extra cloth.
- LOUIS BLANC'S FRENCH REVOLUTION.** 1 vol. crown 8vo., extra cloth.
- MARSH (MRS.) ROMANTIC HISTORY OF THE HUGUENOTS.** 2 vols. royal 12mo., extra cloth.
- NIEBUHR'S ANCIEN T HISTORY.** By LEONHARD SCHMITZ. In three handsome crown octavo vols., (Lately Issued.)
- PARDOE'S FRANCIS THE FIRST.** 2 vols. royal 12mo., extra cloth.
- PALGRAVES NORMANDY AND ENGLAND.** In three vols. crown 8vo. (Preparing)
- RUSH'S COURT OF LONDON.** 1 vol. 8vo.
- RANKE'S HISTORY OF THE REFORMATION IN GERMANY.** To be complete in 1 vol. 8vo.
- RANKE'S HISTORY OF THE OTTOMAN AND SPANISH EMPIRES.** 8vo. Price 50 cents.
- RUSSELL'S LIFE OF CHARLES JAMES FOX.** In handsome royal 12mo.
- STRICKLAND'S LIVES OF THE QUEENS OF ENGLAND,** from the Norman Conquest. Complete in 6 handsome crown 8vo. volumes, various styles of binding.
- STRICKLAND'S LIVES OF THE QUEENS OF HENRY VIII.** In one handsome crown 8vo. vol., extra cloth, various styles.
- STRICKLAND'S LIFE OF QUEEN ELIZABETH.** In one handsome crown 8vo. volume, extra cloth, various styles
- STRICKLAND'S TALES FROM HISTORY.** 1 vol. royal 18mo., extra crimson cloth, illustrated.
- STEINMEYER'S HISTORY OF THE JESUITS.** 2 vols. crown 8vo., extra cloth.

### MISCELLANEOUS.

- ACTON (MRS.) MODERN COOKERY.** Edited by Mrs. S. J. HALE. 1 handsome volume, royal 12mo., extra cloth, with illustrations.
- ADDISON ON CONTRACTS,** and on Parties to Accons, ex contractu. 1 large octavo volume, law sheep.
- BOZ'S (DICKENS) COMPLETE WORKS.** In ten vols. 8vo., extra cloth, with numerous plates. Any volume sold separate.
- Same work, common edition, in paper, 10 parts. Any volume sold separate.
- Same work, in 4 large vols., good paper, fancy cloth.
- BUFFUM'S SIX MONTHS IN THE GOLD MINES.** 1 vol. royal 12mo., extra cloth or paper, 50 cents.
- BAIRD'S WEST INDIES AND NORTH AMERICA.** 1 vol. royal 12mo., extra cloth.
- CLATER ON THE DISEASES OF HORSES.** By SKINNER. 1 vol. 12mo.
- CLATER'S CATTLE AND SHEEP DOCTOR.** 1 vol. 12mo., cuts.
- COOPER'S SEA TALES.** 6 vols. 12mo., cloth.
- COOPER'S LEATHERSTOCKING TALES.** 5 vols. 12mo., cloth.
- DON QUIXOTE.** With numerous illustrations by Jehannot. 2 vols. 8vo. cloth, or half morocco.
- DAVIDSON, MARGARET.** Memoirs of and Poems. In one vol. 12mo., paper 50 cents, or extra cloth.
- DAVIDSON, LUCRETIA.** Poetical Remains. 1 vol. 12mo., paper 50 cents, or extra cloth.
- DAVIDSON, MRS.** Poetry and Life. In one vol. 12mo., paper 50 cents, or extra cloth.
- ENCYCLOPEDIA OF GEOGRAPHY.** In three octavo vols., many cuts and maps, various bindings.
- ENCYCLOPEDIA AMERICANA.** 14 vols. 8vo., various bindings.
- Vol. 14 bringing the work up to 1846, sold separate.
- EXPLORING EXPEDITION. NARRATIVE OF** In six vols., imperial quarto, with several hundred plates, maps, and wood cuts
- EVANS'S SUGAR-PLANTER'S MANUAL.** 1 vol. 8vo., extra cloth, plates.
- ERMAN'S TRAVELS IN SIBERIA** 2 vols royal 12mo., extra cloth.
- ENDLESS AMUSEMENT.** Neat 18mo., crimson cloth, with cuts.
- FIELDING'S SELECT WORKS.** In one vol. 8vo. cloth, or 4 parts, paper
- FLETCHER'S NOTES FROM NINEVEH.** 1 vol. royal 12mo., extra cloth.
- FRANCAPELLI'S MODERN FRENCH COOK.** In 1 vol. 8vo., with many cuts.
- HAWKER ON SHOOTING.** Edited by PORTER. With plates and cuts. 1 vol. 8vo., beautiful extra cloth, new edition. (Just Issued.)
- HOLTHOUSE'S LAW DICTIONARY.** By PRYNGTON. 1 vol. large 12mo., law sheep.
- HILLIARD ON REAL ESTATE** New and much improved edition, 2 large vols. 8vo., law sheep.
- JOHNSON'S DICTIONARY OF GARDENING.** By LANDBRETH. 1 vol. large royal 12mo., 650 pages, many cuts.
- LANGUAGE OF FLOWERS.** 8th edition. 1 vol. 18mo., colored plates, crimson cloth, gilt
- LEWIS'S HINTS TO SPORTSMEN.** 1 vol. royal 12mo., extra cloth, illustrated.
- LYNCH'S NARRATIVE OF THE U. S. EXPEDITION TO THE DEAD SEA AND RIVER JORDAN.** 1 large octavo volume, with numerous plates and maps.
- Same work, condensed edition, in neat royal 12mo.
- MACFARLANE'S TURKEY AND ITS DEPTINY.** 2 vols. royal 12mo., extra cloth.
- MACKEY'S TRAVELS IN THE UNITED STATES.** 2 vols. royal 12mo., extra cloth.
- MARTINEAU'S EASTERN LIFE.** 1 vol. crown 8vo., extra cloth.
- MARTINEAU'S HOUSEHOLD EDUCATION.** 1 vol. royal 12mo., extra cloth.
- PAGET'S HUNGARY AND TRANSYLVANIA.** 2 vols. royal 12mo., extra cloth.
- PULSZKY'S HUNGARIAN LADY.** 1 vol. royal 12mo., extra cloth.
- PICCIOLA—The Prisoner of Fenestrella.** Illustrated edition, with cuts, royal 12mo., beautiful crimson cloth.
- Same work, fancy paper, price 50 cents.
- PHILOSOPHY IN SPORT MADE SCIENCE IN EARNEST.** 1 vol. 18mo., neat crimson cloth, with cuts.
- READINGS FOR THE YOUNG FROM SIR WALTER SCOTT.** 2 vols. royal 18mo., extra crimson cloth, plates.
- SELECT WORKS OF TOBIAS SMOLLETT.** Cloth or paper.
- SHAW'S OUTLINES OF ENGLISH LITERATURE.** 1 large vol. royal 12mo., extra cloth.
- SMALL BOOKS ON GREAT SUBJECTS.** In three neat volumes, royal 18mo., extra cloth
- SAM SLICK'S NEW WORK—WISE SAWS AND MODERN INSTANCES.** 1 vol. 12mo., (Nearly Ready.)
- THOMSON'S DOMESTIC MANAGEMENT OF THE SICK ROOM.** 1 vol. 12mo.
- WHEATON'S INTERNATIONAL LAW.** 1 vol. large 8vo., law sheep, or extra cloth. 3d edition, much improved.
- YOUATT ON THE HORSE, &c.** By SKINNER. 1 vol. 8vo., many cuts.
- YOUATT ON THE DOG.** With plates. 1 vol. crown 8vo., beautiful crimson cloth.
- YOUATT ON THE PIG.** 1 vol. 12mo., extra cloth, with cuts.
- Same work in paper, price 50 cents.

## NATURAL SCIENCE.

- AMERICAN ORNITHOLOGY. By PRINCE CHARLES BONAPARTE. In four handsome folio volumes, with beautiful colored plates.
- ARNOTT'S ELEMENTS OF PHYSICS. New Edition. By ISAAC HAYS, M. D. In one octavo volume, with 200 illustrations.
- ANSTED'S ANCIENT WORLD, OR PICTURESQUE SKETCHES OF CREATION. 1 vol. 12mo., numerous cuts.
- BRODERIP'S ZOOLOGICAL RECREATIONS. 1 vol. royal 12mo., extra cloth.
- BOWMAN'S PRACTICAL CHEMISTRY. 1 vol. royal 12mo., extra cloth; cuts.
- BEALE ON THE LAWS OF HEALTH IN RELATION TO MIND AND BODY. 1 vol. royal 12mo., extra cloth.
- BIRD'S NATURAL PHILOSOPHY. 1 vol. royal 12mo., with many cuts.
- BRIGHAM ON MENTAL CULTIVATION, &c. 12mo., cloth.
- BREWSTER'S TREATISE ON OPTICS. 1 vol. 12mo., cuts.
- COLERIDGE'S IDEA OF LIFE. 1 vol. 12mo., cloth.
- CARPENTER'S GENERAL AND COMPARATIVE PHYSIOLOGY. With numerous wood-cuts. 1 vol. large 8vo., new edition. (Preparing.)
- CARPENTER ON THE MICROSCOPE. Handsomely illustrated. (Preparing.)
- DANA ON CORALS. 1 vol. royal 4to., extra cloth, with wood-cuts.  
Atlas to do, large imperial folio, half morocco, with over 60 magnificent colored plates.
- DE LA BECHE'S GEOLOGICAL OBSERVER. 1 large vol. 8vo. over 300 cuts. (Now Ready.)
- FOWNES' RECENT WORK ON CHEMISTRY. Third edition. By BRIDGES. 1 vol. 12mo., many cuts, sheep or extra cloth.
- GRAHAM'S ELEMENTS OF CHEMISTRY. Large 8vo., many cuts. (Part I, lately issued, Part II, preparing.)
- GREGORY ON ANIMAL MAGNETISM. 1 vol. royal 12mo., (Now Ready.)
- GRIFFITH'S CHEMISTRY OF THE FOUR SEASONS. 1 vol. 12mo., many cuts.
- GRIFFITH'S MEDICAL BOTANY. 1 vol. large 8vo., extra cloth, nearly 400 cuts.
- HANDBOOKS OF NATURAL PHILOSOPHY AND ASTRONOMY. By DIONYSIUS LARDNER. First Course, 1 thick vol. royal 12mo., with 420 wood cuts.
- Second Course, 1 vol. royal 12mo., with 250 wood-cuts. (Just Issued.)
- Third Course, 1 vol. royal 12mo. (Nearly Ready.)
- HERSCHEL'S OUTLINES OF ASTRONOMY. 1 vol. crown 8vo., ex. cl., with plates and wood cuts.
- HERSCHEL'S TREATISE ON ASTRONOMY. 1 vol. 12mo., cuts and plates.
- HALES'S ETHNOLOGY AND PHILOLOGY OF THE U. S. EXPLORING EXPEDITION. 1 vol. royal 4to., extra cloth.
- HUMBOLDT'S ASPECTS OF NATURE. 2d edition. 1 large vol. royal 12mo., extra cloth.
- ILLUSTRATED SERIES OF SCIENTIFIC WORKS, beautifully printed. (Now Ready.) Muller's Physics, 1 vol., Weisbach's Mechanics, 2 vols., Knapp's Technology, 2 vols., Mohr, Redwood, and Proctor's Pharmacy, 1 vol., De la Beche's Geological Observer, 1 vol. 8vo., and Carpenter's Comparative Physiology, 1 vol.; printed and bound to match, containing in all over 3000 illustrations. Graham's Chemistry, 1 vol., (Nearly Ready.) To be followed by others in various branches.
- JOHNSTON'S PHYSICAL ATLAS OF NATURAL PHENOMENA. In one large and handsome imperial 4to. vol., half bound in morocco, with 26 maps, beautifully colored.
- KNOX'S RACES OF MEN. 1 vol. royal 12mo., extra cloth.
- KNAPP'S TECHNOLOGY, OR CHEMISTRY APPLIED TO THE ARTS AND TO MANUFACTURES. Translated by Ronalds. Edited by Johnson. Vol. I., with 244 large wood engravings. Vol. II., large 8vo., with 250 wood engravings.
- KIRBY AND SPENCE'S ENTOMOLOGY. 1 large 8vo. vol., with plates, plain or colored.
- MULLER'S PHYSICS AND METEOROLOGY. 1 vol. large 8vo., 2 colored plates, and 550 wood-cuts.
- MILLWRIGHT'S AND MILLER'S GUIDE. By OLIVER EVANS. In one vol. 8vo., sheep, many plates.
- MATTEUCCI ON PHYSICAL PHENOMENA OF LIVING BEINGS. 1 vol. royal 12mo., ex. cl., cuts.
- SOMERVILLE'S PHYSICAL GEOGRAPHY. New edition. 1 large vol. royal 12mo., extra cloth.
- SCHOEDLER AND MEDLOCK'S BOOK OF NATURE. With Additions and Improvements. In one thick volume, crown 8vo., with over 600 illustrations.
- WEISBACH'S PRINCIPLES OF THE MECHANICS OF MACHINERY AND ENGINEERING. 2 large octavo volumes, extra cloth, 900 beautiful wood engravings.

## EDUCATIONAL WORKS.

- ARNOTT'S ELEMENTS OF PHYSICS. New edition. Complete in 1 vol. 8vo., many illustrations.
- BOLMAR'S FRENCH SERIES, consisting of:—
