## PREFACE.

THE value of the Directory compiled in these pages has been impressed upon me in the course of business of the WESTERN SCHOOL JOURNAL, in which interest the large majority of these names is necessary. Repeated inquiry from various sources leads me to issue a complete Directory. The greatest care has been exercised to secure accuracy, and at large expense of time and money.

To those who can use any considerable part of these names as lists of OFFICERS, their value needs no argument. To those who seek addresses for circularizing in a general way, the lists commend themselves at sight—*first*, as being of representative people; *second*, as being geographically distributed; *third*, as giving permanent addresses, those of teachers only being subject to much change. Probably seventy-five per cent. are farmers; the rest professional people.
