

BRIDE TAKEN AWAY.

A Muscular Mother-in-Law Interrupts Honey-moon of William Whitman at New York.

William H. Whitman, a Long Island railroad employe, the other day was married to Jennie Sander, a 19-year-old girl, who lived with her mother at No. 528 East Fourteenth street, New York.

His first wife died two months ago, and, having an affectionate regard for the family, he immediately began to make love to the sister, who smiled on his suit. The mother objected, and they eloped.

Whitman took his bride to a boarding house. Shortly after the breakfast bell rang there was an unexpected visit from the mother. What occurred was told by the bridegroom to Magistrate Flammer when Whitman sought to have his new mother-in-law punished.

"She rapped at my door, judge," said Whitman, "and when I opened it she rushed in and shouted: 'Where's my daughter Jennie, you scoundrel?'"

"She's here, mother, I said, but you can't have her, because she is mine now forever. We're married, mother."

"With that, judge, she said: 'Show me the proof.' When I handed her the marriage certificate she grabbed it out of my hands, and, tearing it into bits, she started for the stove. I grappled with her, but she managed to get most of the pieces into the fire.

"I managed to get these pieces," continued Whitman, as he handed Magistrate Flammer several scorched pieces of paper, "and she pointed to his badly damaged wedding outfit."

Other witnesses testified to the manner in which the girl's mother, who is very muscular, slammed Whitman about and threw him downstairs, finally taking the bride home and locking her up. Whitman is a very small man, and was badly used up.

SHAPED INTO SCARFPIPS.

Bullets Fired by Martin Thorn, the New York Murderer, Worn by the Attorneys.

Two of the bullets which Martin Thorn intended for his hated rival, William Guldenesuppe, the bathruber, but which lodged in the walls of the Woodside cottage, have been mounted in gold and are worn as scarfpips by ex-District Attorney Olcott, of Manhattan, and District Attorney William J. Youngs, of Queens.

"I have noticed him," continued the observer, "from his childhood. When he was a little boy he couldn't go to school with his lessons correct but what he would make a mistake somewhere else and be sure to get a flogging from his teacher. Since he has grown up he has started in several kinds of business. He's a rank failure in them all. Starting out with nothing but the brightest prospects before him, he is overcome by some calamity, and down his business goes. He is a good fellow, too, and for the life of me, I can't tell what is the matter with him."

"However, he is only one instance of a miser. I know a man whose name is Good. Well, if there was ever a bad man it is that fellow Good. When a boy he was whipped every day by his mother. Later he commenced to steal. He has served several terms in prison."

GETS HIS FORTUNE BACK.

Confiscated Estate of Gen. Ezeta, Who Was Exiled from Salvador, Has Been Restored to Him.

Gen. Carlos Ezeta, the ex-president of the republic of Salvador, has been vindicated by his people. His vast estates, the stocks and money confiscated by the government by Gutierrez after Ezeta was forced to leave his native land four years ago, have been returned to him, and Ezeta is again worth more than \$2,000,000.

The money that Ezeta has used in this country was furnished by his wife, who now is in the South American republic, settling up the exiled general's affairs.

She will return to San Francisco, says the Examiner, on May 8. The general says he will never again interest himself in Salvadoran politics. He is now living in Oakland.

A WATER BICYCLE.

Strange Craft Undergoing Practical Test at San Francisco—Can Go 18 Knots an Hour.

A water bicycle, driven by two men seated tandem fashion, may now daily be seen on San Francisco bay. It was built on original lines by F. O. Winquist, a foreman in the Union iron works, and H. Olson, who propose to take it up the Yukon. Their strange craft is constructed of aluminum and steel, and it is said a speed of 18 knots an hour can be made. Several tests have proved the claims of the inventors and owners. They crossed the bay on the equally day the craft was wrecked and are now preparing for a trip to the Farallones, 30 miles out on the ocean.

An Elevated City Path.

The wheelmen of California will be the first to have an elevated city path. Work is now under way on such a path between Pasadena and Los Angeles, a distance of nine miles. It will be at an elevation of from 18 to 50 feet, with a width of 12 feet, the surface to be of wood. A toll of five cents is to be charged each way to all who use it. It will be lighted by electricity and divided in the center. A cyclist's pavilion is to be built half way along the path.

The Only English Pope.

The only Englishman who ever ruled as pope was Nicholas Breakspere, who was born about the year 1100 at Langley, near St. Albans. He was unanimously elected for the papal chair in 1154, and bore the title of Adrian IV.

Costly Railroad Station.

It is estimated that the total cost of the new union station at Boston, when completed, will be the enormous sum of \$12,000,000.

FORGOT WHERE HE WAS.

And in His Bewilderment the Deacon Betrayed a Family Secret.

Deacon Puffly is a pillar of church and society in one of the townships. He has passed the age of his greatest activity, but his desire to do good is as manifest as ever, and any weakness of the flesh is largely due to the fact that he carries so much of it, says the Detroit Free Press.

While the deacon reads of the suffering Cubans and the movement to send them relief, he at once sent word around that there would be a meeting at the district schoolhouse to talk over the situation and raise means for the good cause. There was a goodly gathering, and after the deacon had put the machinery in motion he settled back in his seat to hear from the several others who left like relieving their minds. The fire in the big box stove was a hot one; there was a lack of proper ventilation and when the usual bedtime for the deacon had arrived he dropped gently asleep.

Shortly after this occurred there was some important point to be settled, and the chair expressed a desire to hear from Deacon Puffly. His wife quickly rose to the emergency and gave her husband a pinch that was emphasized by a twist.

"Ouch!" shouted the deacon. "Quit that, Betsy. Get up and handle the fire yourself; I'm sick this morning!" By the time that order had been restored the deacon was wide awake, and in his confusion doubled the liberal subscription he had already made for the benefit of the sufferers.

SOME MISNOMERS.

Unfortunate Names That Have Been Thrust Upon Various Individuals.

"It's strange," said the observer, the other day, "how so many people are misnamed."

The cause of this remark was occasioned by a man whose name was Luck, who passed down the street, says the Louisville Commercial.

"You see that man. From his name you would think he was destined to be one of the most fortunate creatures who ever drew a breath. Although his name is Luck he was certainly born under the unluckiest star that ever shone."

"I have noticed him," continued the observer, "from his childhood. When he was a little boy he couldn't go to school with his lessons correct but what he would make a mistake somewhere else and be sure to get a flogging from his teacher. Since he has grown up he has started in several kinds of business. He's a rank failure in them all. Starting out with nothing but the brightest prospects before him, he is overcome by some calamity, and down his business goes. He is a good fellow, too, and for the life of me, I can't tell what is the matter with him."

"However, he is only one instance of a miser. I know a man whose name is Good. Well, if there was ever a bad man it is that fellow Good. When a boy he was whipped every day by his mother. Later he commenced to steal. He has served several terms in prison."

NEW PIGMENT FOR ARTISTS.

A Rich Color Is Made from the Smut of the Oat and is of Unfading Tint.

A Scotch artist has discovered that a pigment of great beauty of color and fastness can be made from the smut of the oat, says the St. Louis Globe-Democrat. The color is a deep, rich, warm shade, sometimes approaching sepia in tone. The smut is a fungoid growth, which is often seen in the shape of deep brown or sepia-colored spots on oats and other cereals. Specimens of the pigment painted on paper has a water color have withstood the exposure to direct sunlight for many months, and shown little change in strength of color when subsequently compared with unexposed duplicate specimens. In mild, diffused daylight, the color remains quite fast and unaltered. The brownish-black powder taken from smutty oats is very dry and light in nature, and when mixed with a few drops of alcohol and then mixed with mucilage and water, it can be effectively handled. In its deepest tones it is of a fine sepia shade, deepening to a brown black. When diluted with water or Chinese white it gives pleasing tints of a flat brown, of the pheasant-egg cast. The new pigment has been received with much approval by artists.

The Rights of Newsboys.

The judgment comes from the district court at the national capital that the sale of newspapers on the streets is a legitimate business, and that newsboys have a right to enter street cars and sell papers to passengers provided they behave themselves and leave the car when their business is finished. One newsboy was forcibly ejected from a car in Washington some time ago and had a leg crushed by a car running on the other track. He has just obtained an award of \$5,000 damages from a jury under instructions to the above effect by the judge.

Defaulters in China.

Through the medium of the Peking Gazette, the oldest paper in the world, the emperor of China recently issued an official order for the arrest of a defaulting magistrate of a town in the province of Kuangsi. The degree provided not only for the imprisonment of the culprit until he should have returned all his stealings, but also ordered the confiscation of his property.

Retreat for Beavers.

The last safe retreat of the beaver in the United States is the canyon of the Rio Grande, between Eagle Pass and El Paso, a distance of about 300 miles.

ONLY ONE OF HIS KIND.

A South Dakota Farmer Whose Honor Surprised a Railway Claim Agent.

A cow belonging to a farmer residing near Carthage, we regret we cannot call his name, says the Madison (S. D.) Leader, strayed on to the Northwest railroad track and was run down and killed by a train. The farmer decided his cow had trespassed on the company's property and had received her just deserts, so he gave the section man a dollar to bury her and said no more about it. The matter was reported to headquarters in the regular course of business and soon afterward an officer of the company called on the farmer.

"You had a cow killed on the track a few days ago, didn't you?" "Yes, sir," timidly replied the farmer, thinking he was up against a soulless corporation in a suit for trespass. "Well, how did it happen?" "I'm sure I don't know; the cow got out of the pasture and got onto the track and was killed; it wasn't my fault; I paid the section man a dollar to bury her, so the company isn't anything out." "How much was the cow worth?" "Oh, she was just a good fair cow, worth about \$25."

The agent departed and the farmer went on worrying about a trespass suit that he was sure would be brought against him. A few days later he received a letter from headquarters, and upon opening it with trembling hand he discovered, not a summons for a suit in trespass, but a check for \$25 for the loss of his cow and an annual pass over the road, the latter stating that he was the only man that had ever had a cow killed on the road that did not swear she was a registered thoroughbred worth \$150.

WHY THE EYES TIRE.

It is Because the Muscle of Accommodation Soon Becomes Tired.

People speak about their eyes being tired, meaning that the retina or seeing portion of the eye is fatigued, but such is not the case, as the retina hardly ever gets tired, declares the Philadelphia Ledger. The fatigue is in the inner and other muscles attached to the eyeball and the muscle of accommodation which surrounds the lens of the eye. When a near object is to be looked at this muscle relaxes and allows the lens to thicken, increasing its refractory power. The inner and outer muscles are used in covering the eye on the object to be looked at, the inner one being especially active when a near object is looked at. It is in these three muscles mentioned that the fatigue is felt and relief is secured temporarily by closing the eyes or gazing at far-distant objects.

The usual indication of strain is a redness of the rim of the eyelid, betokening a congested state of the inner surface, accompanied by some pain. Some times this weariness indicates the need of glasses rightly adapted to the person and in other cases the true remedy is to massage the eye and its surroundings as far as may be with the hand wet, in cold water.

THE MURPHYS SLIGHTED.

But It Was Not Because the Little Girl Was Neglectful of Her Duty.

A letter-carrier was telling of a funny experience he had one day shortly after being appointed in the postal service, says the Louisville Commercial. "I was carrying a route in the suburbs when a little freckle-faced girl stopped me and cried: 'Anything for the Murphys?' 'No, there is not.' 'Anything for Jane Murphy?' 'Nothing.' 'Anything for Ann Murphy?' 'No.' 'Anything for Bob Murphy?' 'No, not a bit.' 'Anything for Terry Murphy?' 'No, nor for Pete Murphy, nor Dennis Murphy, nor for Mary Murphy—dead, living, unborn, native-born, civilized, or uneducated, savage or barbarous, male or female, white or black, naturalized or otherwise,' I responded, becoming weary of the questions. 'The little girl looked at me in astonishment and said: 'Please to look and see if there is anything for Clarence Murphy.'"

WON FAME; LOST HEALTH.

The Great Artist Munkacsy's Breakdown Said to Have Been Caused by Overwork.

Munkacsy's great picture, "Ecco Homo," is in a great measure the cause of the incurable mental disease from which he now suffers. He broke down under the strain of the work. His wife lately told a friend that the great painter forgot everything else in his desire to finish the picture and to make it worthy of his fame. He neglected the simplest and most imperative rules of health. He had no regular meals. He almost lived in the studio and rarely had a breath of fresh air. The mental strain was, therefore, in its more immediate origin, a physical one, and his system had no power of resistance. The artist was deaf to all remonstrances, and he worked on under these conditions until he had finished the work. But one thing remained—to paint his signature at the foot of it. He had just finished the signature when he fell prostrate, and from that moment he has never recovered the use of his faculties.

Saltness of Various Seas.

A ton of Atlantic water when evaporated yields 31 pounds of salt; that of Pacific water 79 pounds. Arctic and Antarctic waters yield 85 pounds to the ton, and Dead sea water 187 pounds.
