INTRODUCTION

This special report, compiled from records of the 1966 and 1961 Censuses, shows the population totals of unincorporated places with a population of 50 persons or more at either the 1966 or the 1961 Census.

The regular series of the 1966 Census reports shows the population totals for all organized municipalities in each province, such as townships, parishes, municipal districts, as well as for all incorporated cities, towns and villages. (See Reports 1-1 to 1-7, inclusive of the Volume I Series.)

The present report consists of two parts, the first part being an alphabetical index of these unincorporated places throughout Canada, showing for each of them, besides the population, the province, the census divisions and subdivisions where it is located. The second part is a geographical distribution of the same places within each province, by census division and subdivision, with the population figures also shown.

However, due to the lack of legal or official boundaries, it has not always been possible to distinguish the population of these unincorporated places from that of the surrounding area. Census enumerators were instructed to indicate distinctly on their records all households living in dwellings grouped fairly closely together within an area locally known by a specific name. The degree of success achieved in this procedure has varied from area to area. For example, the post-office address has sometimes been confused with the actual location of the dwellings, making it difficult to determine the exact number of persons living in the locality proper.

For such reasons as mentioned above, the population totals shown in this report for 1961 and 1966 should be considered as approximations. The sign (>) following any population figure means that such figure includes part of the population of the surrounding area. However, in order to avoid a repetition of this symbol in the entries for Prince Edward Island, Nova Scotia and New Brunswick, where it would be the case in the majority of places, it has been omitted.

Methodical comparison between 1966 and 1961 data has often resulted in obtaining more valuable figures, and sometimes has permitted the revision of population figures already published in the preceding bulletin for 1961. The symbol (*) indicates the revised figures.

When no acceptable figures could be established, the symbol (...) is used instead of the population figures. Places for which no population was reported by the enumerator at both the 1966 and the 1961 Censuses, are not shown in this report.

Finally when an unincorporated place straddles the boundary between two municipalities, this place has been allocated to the municipality where the largest part of its population is located.

Note: The classification in Part II excludes all census divisions and/or subdivisions which contain no unincorporated places of 50 or more inhabitants.

Ce rapport spécial, fondé sur les résultats des recensements de 1966 et de 1961, donne la population totale des localités non constituées comptant 50 habitants ou plus lors de l'un ou de l'autre de ces recensements.

La série régulière des rapports du recensement de 1966 présente les chiffres de la population des municipalités organisées dans chaque province, telles que townships ou cantons, paroisses, districts municipaux, de même que ceux de toutes les cités et villes et de tous les villages constitués. (Voir rapports 1-1 à 1-7 inclus de la série du volume I.)

Le présent rapport comprend deux parties dont la première est un index alphabétique des localités en question à travers le Canada, donnant pour chacune d'elles, en plus de la population, la province et les divisions et subdivisions de recensement où elle se localise. La deuxième partie est une répartition géographique de ces mêmes localités dans chaque province, division et subdivision de recensement, avec la population également montrée.

Toutefois, dû à l'absence de limites juridiques ou officielles, il n'a pas toujours été possible de distinguer la population de ces localités non constituées de celle du territoire environnant. Les agents recenseurs devaient indiquer distinctement sur les formulaires tous les ménages groupés dans l'agglomération connue localement sous le nom considéré. Le succès de cette procédure a varié d'une région à l'autre. L'adresse du bureau de poste, par exemple, a parfois été confondue avec celle de la résidence des ménages, rendant ainsi difficile la détermination du nombre réel de personnes attribuables à l'agglomération proprement dite.

C'est pourquoi les chiffres de population publiés dans ce rapport pour 1961 et 1966 doivent être tenus pour des approximations. Le signe (>) placé après un chiffre de population indique qu'il inclut celle d'une partie de la région avoisinante. Cependant pour l'Île-du-Prince-Édouard, la Nouvelle-Écosse et le Nouveau-Brunswick où la grande majorité des localités se trouvent dans ce cas, le symbole (>) a été omis afin d'en éviter la répétition trop suivie.

La comparaison méthodique des informations consignées en 1966 avec celles de 1961, a souvent permis d'arriver à des résultats plus valables et parfois de réviser les chiffres déjà publiés dans le bulletin précédent pour 1961. Le signe (*) indique les chiffres révisés.

Quand aucun chiffre acceptable n'a pu être établi, on l'a indiqué par l'emploi du signe (...) à la place du chiffre de population. Les localités pour lesquelles aucune population n'a été rapportée par l'agent recenseur au deux derniers recensements ne paraissent pas dans ce rapport.

Finalement quand une localité non constituée s'étend des deux côtés de la limite entre deux municipalités, elle est rapportée comme située dans celle où se trouve la majorité de sa population.

Note: La classification de la Partie II, exclut toutes les divisions et/ou subdivisions de recensement ne contenant aucune localité non constituée, de 50 habitants ou plus.
