Cryptogamic Society of Scotland.

In conjunction with the British Mycological Society.

THE Thirty-Seventh Annual Conference of the Society was held at Forres, September 17th, 18th and 19th, 1912. Twelve members were present. Interest and importance were added to the meeting from the fact that the British Mycological Society also held their Annual Autumn Meeting at the same place and time, under the Presidency of Miss Gulielma Lister, F.L.S. The Moray Arms Hotel was the joint headquarters of both Societies. The localities visited in the neighbourhood of Forres were Cluny Hill and Sanquhar on the first day, the banks of the Findhorn and Darnaway on the second, and Altyre Woods on the third. With the exception of the forenoon of the 17th, when rain fell, the weather was ideal, and the country was looking at its best, the walk up the Findhorn from Sluie to Divie Bridge being particularly beautiful. Fungi of all kinds were unusually abundant, and many of the party being skilled observers, a very large number was recorded, as appears from the lists here given. The district is specially favourable to the growth of these plants, and is associated in the minds of all Scottish mycologists with the name of the Rev. Dr. Keith, an ardent student of Cryptogamic Botany, who was for many years minister of Forres. It was a pleasure to the Cryptogamic Society to meet with its sister Society from England, and the meeting may be regarded as one of the most successful in the history of either Society.

The lists which follow embrace the finds of both Societies. The first list was drawn up to Mr. Carleton Rea, B.C.L., M.A.,

Hon. Secretary of the British Mycological Society, and is practically identical with the list printed in the Transactions of that Society for 1913. It is reproduced here by his kind permission. The second list is that furnished to the British Mycological Society by Miss Gulielma Lister, F.L.S., an expert authority on the Mycetozoa ; and the third list of " Additional Records of Scottish Cryptogamic ; Plants, 1912," was compiled by Mr. D. A. Boyd of Saltcoats. These names are a sufficient guarantee of carefulness and accuracy, and the Scottish Society would express their grateful appreciation of the courtesy through which their lists have been inserted here.

DAVID PAUL,

Hon. Secy. of the Scottish Cryptogamic Society.
