DATA
MODELLING
DAYS

November 30
December 2
2023

WIKIDATA

What were your highlights of the event?

What caught your attention?

What did you discover during the Data Modelling Days?

What interesting discussions did you attend?

What did you get done during the event?

What inspired you?

Feel free to write them down in the chat!

DATA MODELLING DAYS

Special thanks to…

- The 25+ speakers who ran 25 sessions during 3 days!

- Everyone who helped with facilitation, taking notes, answering questions, tools, helping others

- People who scheduled satellite events

- You all for being enthusiastic about data modelling, improving our processes & fixing things!

Documentation & outcomes

- **Slides, videos and notes** will be published shortly after the event, links will be added to the **schedule** on the main event page
(it will probably take a few days, please be patient)

- Speakers: please **upload your slides** and other materials
to Wikimedia Commons in
[[Category:Data Modelling Days 2023 presentations]]

- Please add what you work on, what you discussed…
to the Outcomes page: w.wiki/89wo

Outcomes and next steps

Here's what we take away from this event (1/2)

- Hopefully more of you had a chance to get more familiar with EntitySchemas and how useful they could be in the future for Wikidata

- Data modelling clinics seem to have been great but still a bit too advanced for beginners we also wanted to reach with them

Here's what we take away from this event (2/2)

- We were so happy to see data modelling clinics and discussions in other sessions helping resolve the issues and set up connections for future amazing projects! Should we think of other ways to facilitate the conversation outside the events?

- More insights around important topics like autofix, seeing the bigger picture when making local edits and automated list generation. Hope to continue the discussions!

- Wikidata Geoguessr needs more New Zealand content - let's get on it by adding more geocoordinates and images to relevant Items ;-)

DATA MODELLING DAYS

Here's what we should do together next

- Take some time and digest all the content and discussion

- Keep the discussions going on Project chat, Wiki Projects, chat rooms and future events

- Continue exploring the ways to help prevent the issues

- Get together to write some EntitySchemas for a topic you care about

- Figure out what topic we want for the next Wikidata XXX Days - any ideas?

DATA
MODELLING
DAYS

How to be involved in data modelling things and keep the discussions going?

- Join **WikiProjects** on your topics of interest and contribute to keeping them active!

- Join the **WikiProject Data Quality**

- Join the **WikiProject Ontology** (and the Telegram group)

- Join the **WikiProject Schemas** (and the Telegram group)

We're not done just yet!

- 19:00 UTC (in a few minutes)
  Wikidata Live Editing: modelling choices for occupation/employment and SHEX/Entityschemas
  Livestream on Wikipedia Weekly's
  Youtube channel

- 20:00 UTC (in 1 hour)
  Social time & games
  Here on Jitsi

- Tomorrow, December 3
  Self-organized sessions, live editing
  Feel free to schedule them on the event page
  and to reuse this Jitsi room (no recording, no facilitation)

**Thanks for joining <3
See you around
on Wikidata channels!**

Feedback, suggestions for future events:
feel free to write to Léa Lacroix
lea.lacroix_ext@wikimedia.de
