WILLIAM W. THOMPSON'S PATENT IMPROVED LEADEN PIPES.

THE manufacturer, residing in St. Louis, Missouri, invites the attention to the excellence of his leaden pipes made by a new and peculiar process, (to which he has the exclusive right in the entire district of country west and south-west of the Allegheny Mountains,) of a better quality than can be produced by any other known process.

The most prominent pipes is remarkable for uniformity of thickness, the accuracy of the bore, the perfect polish of the interior surface, the absence of seams, and the ease of their very long length without joint, for its natural strength.—These advantages will be evident to any body upon examination.

Besides his usual store from one-eighth to five inch in bore, he manufactures also, for the use of farmers and others, very light leaden pipes for conducting water from spring at long distances under slight pressure or head of water, and for other purposes.
