

N-X-13

N-REPORT-13

Tachikawa Airfield
90.17-14.04

Dispersal Area North
of Tachikawa

Dispersal areas to the north of Tachikawa Airfield were complete and in use at the close of the war.

Shelters had been constructed from the planes in the shelter of the wooded areas.

All taxiways were earth surfaced and in all probability operations were impeded during wet periods.

No evidences of underground installations were found.

Several defensive positions were found in various stages of construction.
