### Vaughan's Tuberoses

Owing to the fact of the true strain of "Excelsior Pearl" Tuberoses being extremely scarce this year, there has been thrown on the market large quan-tities of the "common" variety, which is quite inferior, both as regards size of flower and freedom of bloom. Our stock of "Excelsior Pearl" has been grown from the original "Hallock" strain and can be depended upon to give satisfaction to the florist and pri-vate grower as well. vate grower as well.

## ....ROSE NOVELTIES FOR 1900....

LIBERTY ROSE.

### Grand New Rambler Rose HELENE.

Imported by us from Germany two years ago, and after a thorough trial we regard it as an improvement upon the Crimson Rambler, of which it is a seedling. In growth and foliage it resembles Grimson Rambler, sending up strong cances 8 to 10 feet in one season. We find it is less subject to mildew. It is perfectly hardy and will stand the severest winter unprotected. Its flowers are larger than Grimson Rambler, almost double, and of excellent substance, remaining in perfection on the bush for weeks. The flowers are borne in large clusters, a well formed bush producing them in mazing profusion, each cluster containing 30 to 40 well-formed flowers. The color is a pure soft rose, almost blush. Base of petals yellowish white.

21/2 inch pot plants, each, 20c.; 12 for \$2.00; per 100, \$15.00.

### New HARDY ROSE PRINCESS OF NAPLES.

A cross between Captain Christy and La France. The plants grow very solid and compact, and stronger than those of Captain Christy; bave more spines and very dense, healthy, large, dark green foltage. It flowers very freely and easily, and keeps on flowering for a long time. The flowers are of good form, solid, but nevertheless of very loose, graceful appearance; color, delicate, satiny pink. The fragrance is excellent; better, stronger and more agreeable than that of La France. The whole plant is covered with flowers in the main flowering season. The fact that the plant grows so easily makes it especially suitable for early and late forcing and cut-flower purposes, also for pot plants and outdoor work. out-door work.

Each, 15c.; per doz., \$1.50; per 100, \$10.00.

3 inch pots, strong stock, each, 25c.; per doz., \$2.50.

## The Grand New Rose "LIBERTY"

Never has Nature yielded to the painstaking hybridist and plant raiser a more beautiful or more satisfying color than that seen in the new hybrid Tea Rose "Liberty," which to day marks the limit of glorious deep, yet bright coloration in a family by no means deficient in warm ricb bues of crimson red. Most nearly approached by Meteor in color, this new comer surpasses that standard variety in purity, being witbout the tendency to blacken that Meteor exhibits, and also the blue cast sometimes seen on the fully expanded petal of Meteor has not been detected in any degree whatever upon a single one of many critically examined blossoms of Liberty. To the practical grower, too, this novelty will surely appeal, because of the greater ease of cultivation, in that it does not exact a temperature in excess of that generally accorded to other roses when grown under glass. There can be little doubt but that "Liberty" is destined to rapidly become the one dark flowered rose for both commercial and private uses. As to the behavior of the plants in the hands of the grower, we had presented to our notice by Mr. Ernest G. Asmus, of West Hoboken, N. J., figures which showed that from September up to March 8th, each plant in his 100x16 ft. house has yielded an average of 26½ blooms. An inspection of the growing plants satisfies us as to the vigor and vitality of "Liberty." It has every evidence, too, of being a continuous bloomer. In habit the plant is erect growing, making good wood of considerable leugth and rigidity, and displaying a strong inclination to make a compact bush. The foliage is of moderate size, with seven roundisb leaflets, very shapely and evenly serrate on the margins. Spines are moderately numerous, straight and irregularly scattered on the stems.

We are booking orders now for delivery in March next. Stock grown by Mr. Ernest G. Asmus, the well known rose grower. Prices as follows:

## L'INNOCENCE

May be called the White Madame Caroline Testout, of which it is an offspring. It is a strong, symmetrical grower. Foliage large and tough; flowers large, full, deep and double; globular in form; color bright snowy white. THE GRAND PINK BEDDER JEAN VIAUD (Bruant).

THE GRAND PINK BEDDER JEAN VIAUD (Bruant).
 The best of all new Geranlums sent out for a long time. The plant is of stocky growth; incessant bloomer; flowers of largest size, in lummense trusses. Flowers are semi-double, yerry similar to those of Beaute Pollevine, but the exquisite light freeh rose turits entirely different. The upper petals are marked with two beautiful white bloches, adding greatly to the freehness of coloring. It is a plant of the future. Its habit of growth, uninterrupted blooming and hardiness will attract attention at once, and it will be growth in large quantities when better known. Each, 25c.; per doz., \$2.50.
 William Langguth, or Red Flowered Mrs. Parker. The plant is of a sbort, stocky growth, beautiful deep green leaves, each marked with broad, snowwhite band. It beats all the silver-leaved kinds in free blooming. Flowers double, very handsomely. Visitors at our greenhouses have all agreed in pronouncing it a first-class novelty. Each, 15c.; per doz., \$1.50; per 100, \$10.00.
 Capt. Dreyfus. In this variety we have as good a bedder as S.A. Nutt of a different color, being bright cherry red; trusses large and thrown high habve the foliage by the long, strong foot stalks. An exceedingly useful sort for bedding. Each, 25c.; per doz., \$2.50.
 Le Colosse. Very large trusses, gligantic semi-double floret; color a very bright

color. Each, 25c.; per doz., \$2.50. Bellerophon (BRUANT RAOE). One of the grandest of recent introductions; will rank with the hest. It is a single scarlet, with large, round florets, combined into immense trusses, which are held high above the plant. It is very free in bloom, the habit and foliage especially fine. Each, 20c.; per doz., \$1.50. Le Fraicheur. Double. White, with a narrow band of rosy pink around each petal, exactly like a Picotee. Absolutely novel and distinct, and one of the prettiest flowers that we have seen for years. Colors delightfully fresh and clear. Each, 25c.; per doz., \$2.50.

Dryden. Single, and a grand bedder; stands sun and rain remarkably well. It is a bright rosy red, with large white blotches on the two upper petals and smaller blotches on the three lower ones, and five suffused with lake at the junction of the two colors. Habit dwarf and compact, and extremely free in bloom. Each, 15c.; per doz., \$1.50.

AMERIGA

This new Geranium is a seedling of the popular dwarf variety Mars. Its color is brilliant and striking, being snow-white on the edge and changing through all the salmon shades into deepest rose in the center. The flowers are large and not self-colored; they are striped, mottled, blothed, and not two flowers on a plans in bloom seem to be alike. The trusses are carried on strong stalks well above the plant and are extra large. It withstands the outdoor sun as well as any sun-proof variety, and being of such remarkahly dwarf growth, combined with its free-flowering habit, is bound to become the ideal pot and bedding geranium.

Price, 2½ inch plants, each, 50c.; doz., \$5.00.

#### JAPANESE FERN BALL-IN LEAF.

### Imported Japanese Fern Balls.

These Fern Balls arrive from Japan in January. The roots are twisted and worked together in a ball shape 8 to 10 inches in diameter. The fresh young leaves soon sprout out and form a solid mass of fronds, completely covering the ball (see illustration), forming a ball of fern leaves 15 to 18 inches in diameter. They do well hanging in a greenhouse or window where not too much sun reaches them. They take up no valuable room and can be suspended from the roof and left there until wanted.

## The Grand New Ageratum "Stella Gurney."

A short, compact grower, well branched and extremely free blooming. The individual tufts are very large and dense, and the color is the most intense blue of a very agreeable shade we have ever seen in Ageratums. It has a velvety texture quite unlike the cotton-like flowers of this class. It is a thirfy grower, proparates easily, and by its neat, short and dense flowers of brilliant blue furnishes a bedding plant without an equal, it can be used as a border around Geraniums, with Dusty Miller or other combination, always making a pleasing effect. Grown by us two seasons, and it has bloomed from early Spring to late in the Fall, adding greatly to its usefulness and desirability. The best Ageratum in existence, Each, 15c.; doz., \$1.25; 100, \$8.00.

### NEW WHITE AGERATUM LOUISE BONNET.

Flowers white and abundantly produced. Growth is dwarf and compact, just what we have so long needed for borders. Each, 10c.; per doz., 75c.; per 100, \$5.00.

### AGERATUM PRINCESS PAULINE.

A most distinct and novel variety, of dwarf, compact habit, rarely exceeding five inches in height, its peculiarity being that both colors, blue and white, are combined in the same flower, the body of the flower being white, while the stamens are of a light sky-blue, giving the flower a pretty, variegated appearance. Per doz., 50c.; per 100, \$4.00.

### New Passiflora Southern Beauty.

The prettiest of all climbing plants. Grows well in any soil and commences to bloom in July and continues to flower until frost. Will make a growth of 20 feet during the summer. Flowers 4 to 5 inches across; color is blue, white, pink and red; very fragrant. In the North must be protected by covering in Winter. Each, 10c.; per doz., 80c.; per 100, \$6.00.

AGERATUM PRINCESS PAULINE,

ORIGINATED BY L. E. MARQUIS, SYRACUSE, N. Y.

Has received five first-class certificates, silver cup at Philadelphia for best pink and silver medal of the Massachusetts Horticultural Society. It is without doubt the finest pink carnation ever introduced. It has been so pronounced by expert judges. Its color is distinctive, being unlike that of any other carnation. It is a true pink—a soft rich shade with no trace of purple or magenta and equally beautiful by artificial light or daylight. Its form is exceptionally perfect-very full and double, usually well rounded and built up in the center. Its petals are perfectly serrated and quilled. Its calyx is practically faultless and does not burst. Its size is phenomenal, 3½ to 4 inches and it often exceeds this, and that under ordinary culture. Its fragrance is delightful. Its keeping qualities are woulderful. Cut-flowers will last from one to two weeks. Flowers shipped from Syracuse to Chicago kept finely eight days after receipt. Its stems are strong and average 2 to 3 feet in length. It is very prolific-as free as the best of the standard varieties and much freer than any other large variety. It makes no "grass"-every shoot produces a flower. It is an absolutely continuous bloomer. It is a very vigorons grower, free from rust or other disease. It propagates readily. The loss in propagating is practically nothing. It lifts easily and owing to the mass of fibrous roots it makes, it receives no perceptible check. It lacks no essential of the model Carnation. In Color, Form, Size, Fragrance, Stem and Growth it is ideal. Rooted Cuttings March to April, 1900. Per doz., \$2.00; per 100, \$10.00; per 1000, \$75.00; 25 at 100 rate, 250 at 1000 rate.

Mrs. Thos. Lawson. (Peter Fisher.)-No plant, of whatever kind, has ever received so much description and free advertising by the newspapers of the whole country as this seusational Carnation, which is said to have been sold for \$30.000. The size is enormous, stems stiff. It is free in growth, of strong, healthy coustitution, and of a true pink color; altogether a 20th century Carnation. Everything has been claimed for it, and our own opinion is that it will justify the claim.

Per doz., \$3.00; per 100, \$14.00; per 1000, \$120.00.

ESTELLE, (Witterstaetter). (Scarlet Seedling Portia X Jubilee.)-A bright, illuminating scarlet, uever coming "off-color," is fragrant, form excellent, better than Jubilee, which it somewhat resembles, stem strong and stiff, short at first after lifting, but attaining a length of from twelve to sixteen inches by December. Size from three to three and a half inches. In habit it is exactly the same as Portia, producing a heavy crop by the holidays, and blooming con-

tinuously. A most profitable variety. (Stock limited.) P.r doz., § 2.00; per 100, \$10.00; per 1000, \$75.00; 25 at 100 rate; 250 at 1000 rate.

### New Pink Carnation "ETHEL CROCKER."

Mr. Albert M. Herr considers this new California variety one of the best ever offered to the trade. The flowers under ordinary culture measure from 3 to 31/2 inches in diameter, perfect in form and with a calyx that does not burst. The color is a clear rich pink, delightfully scented and with a stem almost as strong as that of the variety Mayor Pingree. The habit of the plant is good, health perfect, strong growth, and Mr. Herr says, "is freer in bloom than any other Carnation I ever grew. Flowering season is from October 1st to July 1st continously, not a cropper, and all told the best commercial variety I ever saw or grew." Par doz., \$2.00; per 100, \$10.00; per 1000, \$75.00.

(Ready in February.)

Chicago or Red Bradt .- This is a sport from Mrs. G. M. Bradt and is identical with the parent except in color, which is a deep scarlet. Will be extensively planted this year by most of the large growers. From soil, per doz., \$1.50; per 100, \$7.50; per 1000, \$60.00. (Ready now.)

Olympia. (John N. May.)- Color, glossy snow-white, very delicately peuciled scarlet. Much less red in it than in Mrs. Bradt. Flowers extra large, smooth edges, stems, 2 to 2½ feet. Mr. May says that it produces 28 per cent. more flowers than Mrs. Bradt.

Per doz., \$2.00; per 100, \$12.00; per 1000, \$100.00,

Genevieve Lord. (Weber.)-The Peer of any light Pink Carnation ever offered to the trade. Color, clear pink, a little darker than Albertine. Blooms 3 to 31/2 inches in diameter; very fragrant; calyx good, never bursts: long stem which holds the flower erect. In habit of growth it is almost perfection Sturdy, vigorous and free. Never rusts.

Per doz., \$2.00; per 100, \$10.00; per 1000, \$75.00.

## CHRYSANTHEMUMS .... Novelties for Spring of 1900. Ready March 1st.

**VELLOW FITZWYGRAM.**—The earliest yellow Chrysanthemum. Ready to cut September 25th to October 10th. Every grower has long wanted a yellow and pink to sell with his early whites; here is your yellow. It is dwarf, and stiff stemmed, 2'4 feet; requires no staking. Precedes all other yellows by two to three weeks. The color is rich, and this variety has developed a stronger habit and freer foliage than its parent, the white Lady Fitzwygram. It bears close planting, but must be started early so that the bud can be taken about July 25th, not later. We have an enormous stock of it, and are prepared to furnish young plants by February lst or sooner, at a price within the reach of every one. Doz., \$1.00; 100, \$7.00; 1,000, \$60.00.

GOLDMINE.-(Nathan Smith & Son.)-Unsurpassed in size, having been grown 11 inches in diameter. Foliage and general habit resembles Sunderbruch. Rich golden yellow. Outer petals reflexed, and center incurving in a whorl. In perfection November 20th to 30th. Best flowers were from buds taken October 10th. We predict it will depose Modesto and Golden Wedding, being more dwarf, surpassing both in size, a rival in color, and having better stem than the former. Certificated by the C. S. A. at Chicago in 1898, scoring 93 points and averaging 93 points before four com-Each, 50c.; doz., \$5.00; 100, \$35.00. mittees in 1899.

INTENSITY. - (Nathan Smith & Son)-Form reflexed, showing only the bright crimson upper surface of petals. Stem slender, but sufficiently wiry to carry the flower erect. Four and one-half feet high. Buds taken October 1st give best results. Those desiring succession of flowers can readily conceive the value of a bright crimson in perfection November 20th to 30th, a date when other good reds are scarce. Certificated by the C.S.A. Each, 50c.; doz., \$5.00; 100, \$35.00.

WALTER MOLATSCH.-(H. A. Molatsch)-Its period of blooming is October 8th, and the variety is most easily described as an early Wm. H. Lincoln. It is of good size, full center, an excellent keeper, and will stand an unusual amount of rough treatment, the petals not scalding easily, having a firm hold and being so tough that they are not easily bruised. In habit the plant is dwarf, growing about 3 feet high, the stem is thick and stiff and the foliage all that can be desired. N. C. S. Certificate,

Each, 50c.; doz., \$4.00; 100, \$25,

SUPERBA.-(Mme. F. Perrin and Maud Dean)-The latest Jap. Inc. pink that has come to our notice, being in perfection December 10th to 20th. A very double flower 5½ to 6 inches in diameter with high, rounded center. Color bright pink, intermediate between that of its parents. This we believe to be one of the best commercial varieties we have produced. Buds that were taken November 1st, will not be developed for Christmas. Height 4 feet. Take only terminal bud. Certificated by the C. S. A. in 1898 and passing all of the Committees in 1899. Each, 50c.; doz., \$4.50.

WHITE BONNAFFON.-(Mrs. H. Robinson and Mrs. H. McK. Twombley)-A commercial variety of great promise which we predict will become as popular as the typical Maj. Bonnaffon. Color pure white, form identical with Bonnaffon, growth very short-jointed, not exceeding 3 feet in height. Foliage large and very dark green. Its lateness (November 20th to 30th) greatly enhances its value. Take terminal bud about October 10th. Certificated by four Committees of the C. S. A.

The plants grow about 30 inches high, and produce from twenty to twenty-five flowers, which are borne on stems from 20 to 25 inches long. Its *upright habit* admits of close planting, and it will attain full growth when set only 10 to 16 inches apart. The growing of many plants in a small space is a decided advantage when raised under glass. **Per oz.**, \$1 00; ½ oz., 60c.; ¼ oz., 3oc.

### **NEW LARGE=FLOWERING BROWALLIA.**

#### Browallia Speciosa Major.

This new sort is without a doubt the most beautiful of all the Browallias. NEW MAMMOTH FLOWERING...... Allegheny Hollyhocks. Bloom the First Year from Seed. \* \* \* \* \* A New Type of Hollyhocks.

The flowers of this new variety are so different from the Chater's that but for the similar habit of the plant it would not be taken for a Hollyhock. They are from four to six inches in diameter, running from semi-double to double, and are finely fringed and curled. The colors are shell pink, rose and ruby red, a shade or two deeper at the center, and exquisitely tinted toward the edge. The flowers do not, as on the double Hollyhocks, rot on the stems, but drop as soon as they fade. Every bud to the top of the plant is developed into flowers, making the flowering season considerably longer. Trade pkt., 15c.; ¼ oz., 40c.; oz., \$1.25.

#### CHATER'S PRIZE HOLLYHOCKS.

Our seed of this has been saved from the finest and largest double flowers only, and will produce flowers extremely double and in the best, brightest, and most distinct colors. Double Pure White, or \$1,00: 1/02, 25c.

#### VAUGHAN'S DOUBLE PETUNIAS.

VAOUMAN'S DOUBLE PETIONIAS. This is a mixture of the best large flowering and fringed double Petunias. Our seed is saved from plants grown in pots, carefully hand-fertilized, and will produce grand flowers. Of course everyone knows that only a certain percent-age of double flowers may be expected from seed; but our mixture will produce from 20 to 30 per cent. of doubles; remainder will be choice, large, single flowers. Pkt., (600 seeds), 51.00. Double pure white, (250 seeds), 50c. **Dwarf Double Lilliput**, produces bushy plants, with small double flowers, which are partly spotted, blotched and self-colored; a very pretty plant. Pkt., (500 seeds.) 50c. **Extra Large Flowering Double Fringed.**—This extra choice strain produces about 30 per cent. of splendid double fringed flowers. Packet, (500 seeds.) 75c.

#### New Giant Double Petunias.

In this strain we offer the best in existence in Double Petunias. The flowers vary from 5 to 6 inches in diameter and embrace all the choice colors hitherto known among Petunias. About 30 per cent. of the plants will produce these gigantic double flowers. Packet, (50 seeds,) 40c.

New Double White Petunia. Petunia hybr. fl. pl. Azaleæflora Alba.

Originated from that beautiful single white Petunia Snowball, this new kind represents an entirely new class of Petunias. The plauts grow very uniform, about 10 iuches bigh, are well-brauched and of strong, compact habut. The flowers are of medium size, double and lovely snow-white, resembling those of a double Azalea. The seed brings a larger percentage of double flowers than that of other double Petunias. Pkt., 20c.; 3 for 50c.

It takes the place of all the old tin cans, bottles, and like unsightly receptacles often used in the cemetery where only the attractive and ornamental should be seen. It will hold sufficient water to keep the flowers fresh and sweet, and will accommodate flowers with long as well as short stems. The vase is bell shaped and the top has a diameter of about five inches.

### FERTILIZERS.

Trees, vines, plants and grass require food; cannot live on air and water alone. New soil may contain sufficient food for the growth of several crops, but a shortage of one or more food elements soon appears unless what is taken off in crops is replaced by manure and Fertilizer, there is not ouly a decreased yield, but the plant becomes unhealthy and stunted in growth. Fruit trees and vines to thrive require plenty of well balanced food. If the food is not in the soil of the orchard or field it will have to be put in. The necessary elements of plant food which are likely to be ex-hausted are Nitrogen, Phosphoric Acid and Potash. Barnyard manure and Commercial Fertilizers both contain these elements. Commercial Fertilizers are sontain them in more concentrated, available, better balanced form. Barnyard manure is out of balance-does not contain enough of the mineral elements. Vaughan's "ROSE GROWER" Bone Meal,-This is a special

brand we have put up for the trade. It is ground fine hence acts quickly. Free from acid, very white in appearance, and a superb article. It is made from bone accumulated in large slaughter houses, and should not be compared with the Bone Meal made from cattle heads and feet gathered on the western prairies. Our "Rose Grower" bone has been slightly steamed to soften it so it can be ground fine, and is thus quicker in its action. The finer bone is ground the quicker the mild acid thrown out can be dissolved by the tiny roots of the plants and made use of as food. A finely ground bone can also be more evenly distributed through the soil. ANALYSIS.—Amno-nia, 4½ to 5½ per cent. Total phosphoric acid, 22 to 25 per cent. Total bone phosphate, 48 to 54 per cent.
