### AND NAVIGATION ACCOUNTS.

#### ACCOUNTS RELATING TO THE TRADE AND NAVIGATION OF THE UNITED KINGDOM.

- II .- AN ACCOUNT of the EXPORTS of the Principal Articles of Foreign and Co
- III .- An Account of the Exports of the Principal Articles of British and Irish Pr
- - -Classification of the Exports of the chief articles of Manufacture, distin-guishing the quantities of each, shipped to each of the various markets of the world,

In presenting the present Supplement to our readers, we have great satisfaction in referring to the numerous evidences which it supplies of the improved activity of commerce, and the greater consumption of all the leading articles which constitute the daily subsistence of the great masses of the population. These tables prove, in a remarkable manner, the extraordinary advantages which have resulted to the country from the combined effects of cheap and abundant food, and the numerous improvements which have taken place in our commercial laws during the last few years; and particularly in the abolition of the duties on raw materials, and the reduction of many that were before excessively high. We direct the reader's attention, first, to the articles of import up to the 5th of May:—

Live Animals.—It will be observed that, although the numbers imported are still extremely trifling, and altogether insufficient to be considered in any way competing with our home production, there has been, nevertheless, a considerable comparative increase on the numbers of former years; and, as far as it goes, tends to sustain the observations which we have so often made, that large imports are only encouraged by the country being in that state which at the same time secures a good market to the home producer.

Provisions, Cen., &c..—The importation of salted provisions shows a considerable reduction on last year. But in the articles of butter and cheese there is a very marked increase. There are no other two articles which have formed a more accurate test of the state of the country than these two. The quantities imported invariably, for many years back, have rapidly sunk in depressed times, and have as rapidly risen when the people have been prosperous—the lowest prices for home produce having always been co-existent with the smallest import, and the highest prices with the largest import. The only article of salt provisions which shows any increase is salt pork, which, as far as regards that imported from foreign countries, shows

will further prevent any considerable quantities coming to this market.

Colonial Produce.—The changes in the duties of our colonial produce, added to the improved condition of the country, begin to exhibit a very extraordinary and marked increase in the amount of consumption. It is, however, in comparing the trade of this year with that of last, necessary to bear in mind the several circumstances which make a greater apparent difference than a real one. The changes which were effected last year, as well as in the present year, in the duties on several and important leading articles, require to be closely considered in their effects upon the deliveries of each year.

Coffee.—The import of coffee in the present year, for the whole kingdom, shows a slight increase on that of last year, up to the 5th of May; but an equal diminution on that of 1843. The increase of the present year is entirely on that of foreign growth. A reference, how-

ever, to our Table of Imports for the port of London, in another part of this paper, made up to the end of last week, shows that, while the import of colonial coffee has been somewhat less in the present year than in 1844, it is greatly in excess of 1843 and 1842: and, taking the whole imports, including foreign coffee, the quantity in the present year is a little in excess of any former year; thus,—

| Colonial        |       | *****   | 1843<br>ewts<br>45,119<br>92,259 | *****       | 1844<br>cuets<br>77,358<br>49,606 | ****** | BY A. W. St. St.       |

And as near as we have been able to compute the actual consumption of the whole kingdom to this date, it exceeds by four millions of lbs that of the corresponding period of last year. Our tables for London alone, made up to last Saturday, show a total consumption as follows.

97,674 ...... 109,818 . 102,582

In comparing the present year with 1844, it is, however, needful to bear in mind that a great reduction of duty had been proposed and decided upon by Parliament in the month of April, but which did not take effect until the 1st of July, and that, consequently, the stocks in dealers' hands were reduced at the end of June to the the stocks in dealers' hands were reduced at the end of June to the lowest possible point, so that, no doubt, the increase of consumption in the present year over 1844 is more apparent than real. It will be remembered that, early in July last year, very large quantities went into consumption, and no doubt, by the end of this month, the difference will not appear so great between the two years. Table II exhibits a great increase in the export of coffee up to the 5th of May, as compared with 1844, but it is somewhat less than that of 1843. The exports from London to the 30th of June were—

1842 cwts 28,914 1843 cwta 50,475 1844 cwls 35,021

The stocks left on hand on that day were-of

473.564 ..... 411.545 ..... 383,400 Total .... ..... 388,811

Sugar.—This article, at the present moment, excites great interest, owing to the important recent changes in the laws affecting its importation. In making any comparisons with 1844, we must always

bear in mind that the deliveries of that year were greatly interrupted during the whole of the first six months, pending the discussion on the sugar bill. It is true they were for a time also interrupted in the present year, but that was only for about one month, from the middle of February till the middle of March, when the new duties took effect; and we have never seen a stronger example of the wisdom of allowing such changes to take effect instantly, when once decided upon, than in the case before us. It is quite clear that no course would have been more prejudicial to those interested in this trade than to have postponed or delayed the period when these duties should take effect. In the first six months of last year, although the actual consumption of sugar was greater than in 1843, yet the deliveries showed a considerable reduction, from the causes referred to; which were however, at a subsequent period, made up. Up to the 5th May the consumption of sugar, in the whole kingdom, in the present year, exhibits a large excess over former years; and in the present year, exhibits a large excess over former years; and this excess is more remarkable when estimated up to the 30th of June. For the whole kingdom we have no means yet of forming any accurate estimate later than the 5th of May, but our tables, in another part of this paper, show the following results in the port of London

|        | SUGAR duty   | y paid in | London, Ja  | nuary 1 | to June 30. |        |
|--------|--------------|-----------|-------------|---------|-------------|--------|
| 1842   |              | 1843      |             | 1844    |             | 1845   |
| tons   |              | tons      |             | tons    |             | tons   |
| 61,890 | ************ | 58,381    | *********** | 51,357  |             | 78,649 |

Of the latter quantity there is 1,424 tons of foreign free-labour sugar. On referring to the table it will be observed that this great increase of consumption has arisen chiefly on East India and Mauritius sugar, though there is also a slight increase on that of the West Indies. A reference to this article in Table I shows that, up to the 5th of May, the following quantities of sugar had paid the respective duties:

|                     | Musco.<br>colonial<br>14s 0d |     | hite clay<br>colonial<br>16s 4d |     | Musco.<br>foreign<br>23s 4d | 11  | hite clayed<br>foreign<br>28s 0d |

Which, including 93 cuts of foreign sugars, which paid the highest duty (66s 4d), make a total quantity, duty paid to the 5th of May, of 1,496,403 cwts.

The import of sugar, as well as the consumption, exhibits a large increase in the present year from all the British possessions as compared with former years; and, whether we take the Official Accounts to the 5th of May for the whole kingdom, or the accounts for the port of London to the 30th of June, the excess of imports is greater even than that of consumption. To the 5th of May, Table I shows the import to be in the import to be, in

And the Table of Imports into London, up to the 30th June, exhibits

| Total          | 32,029                   | ******** | 32,750 | ******** | 43,109 | ******** | 51,441                 |  |

And, for reasons which we have already explained, the stock of sugar in retailers' and dealers' hands, at this moment, is much greater than at the same period last year; still there is no question, in com-parison with the consumption, that the stock at this moment may be

parison with the consumption, that the stock at this moment may be regarded as not being in excess of former years; and especially when we consider that the consumption is likely still very materially to increase, unless checked by much higher prices.

TEA.—Up to the 5th of May the import of tea into the United Kingdom exhibits a reduction of 1,322,670 lbs compared with the same period last year, but a great increase on the quantity of 1843; and the consumption shows an increase for this period of the year of no less than 1,545,632 lbs; the quantities being:—

The account made up to Saturday the 21st ult. for the ports of London, Liverpool, Bristol, and Hull, shows only a consumption of 14,816,997 lbs, while for the whole kingdom to the 5th of Mayi is 14,191,359 lbs; which shows that there is a great increase going forward in the trade of the outports, including Scotland and Ireland. To the four chief ports the quantity on which duty had been paid on the 5th of May was:—

| London Liverpool. Bri-tol. Hull | 8,227,931<br>1,750,010<br>302,361<br>126,452 |
|---------------------------------|--|
|                                 | 10 406 754                                   |

including Scotland and Ireland. This has become an important feature in the tea trade.

Tobacco.—The quantity imported to the 5th May is somewhat less than last year, but still greatly in excess of 1843. The quantity taken for consumption is, however, greatly in excess of either of the former years, thus-

The quantity exported is somewhat less than in former years.

The imports during the month, from 5th April to 5th May, amount only to 803,715 lbs; while the quantity on which duty has been paid in the same time is no less than 2,082,417 lbs.

Whys.—The countity invested which is one lest Monthly Supple.

m the same time is no less than 2,082,417 lbs.

Wine.—The quantity imported, which in our last Monthly Supplement was deficient of last year, is now a little in excess, and which arises entirely on that from France and the Cape of Good Hope; in all other sorts there is a slight falling off. There is also an increase in the quantity of French and Cape wines on which duty has been paid, but in all other sorts such a reduction as to leave the aggregate

paid, but in all other sorts such a reduction as to leave the aggregate quantity slightly deficient on that of last year, but very greatly in excess of 1843. The quantities imported and duty paid were—

From January 1st to May 5.

Manufacturers' Raw Materials.—Flax.—In our last Supplement we had occasion to remark upon the great reduction of the import of this very important staple; and we had hoped that the opening of the continental navigation would have shown a more favourable account up to the 5th of May; the deficiency still, however, continues nearly as striking, the import being, to May 5—

is much to be feared that the short supply of flax will continue to

ate prejudicially to our linen trade. LK.—I he import of raw as well as thrown silk has considerably increased, but especially the former; and, at least from China, there is every reason to expect a continued extensive import. The consumption is, however, going forward at an increased rate, and the market is firm and steady. Table I exhibits the import of raw silk to the 5th May to be no less than 1,608,853 lbs in this year, against 911,837 lbs in 1844, and 872,658 lbs in 1843. The import of silk manufactured goods generally exhibits a considerable falling off, with some particular exceptions, especially those from India. Of gloves the increase is great

crease is great. Cotton Wo COTTON WOOL.—The entire import of the year exhibits a great increase on 1844, but is still rather below 1843. The consumption, however, exceeds all former experience. We refer, however, to our monthly reviews of this important article.

Sheep's Wool.—We refer the reader to an article in the Com-

mercial department of our paper.

Orls.—The import of palm oil exhibits a very important increase upon former years, but of cocoa nut and olive oil there is a great re-

upon former years, but of cocoa nut and olive oil there is a great reduction of quantity.

Metals.—The quantities of all articles under this head exhibits a very remarkable deficiency in the imports of the present year; and especially of unwrought copper, bar iron, steel, and spetter. With respect to the latter article Spelter, the accounts which we have received from the continent, to which we have referred more particularly under the commercial department, sufficiently explains the cause of this great deficiency of import to this country. It appears by that account that the arrivals from Silesia to Stettin are no less than 3,040 tons, and to Hambro' 3,240 tons deficient of the quantities received in the same period of last year; attributable chiefly to the protracted winter, and the state of the river navigation. The export of spelter in Table II also exhibits a great reduction in the present year.

year.

TIMBER.—A reference to Table I shows a very great increase in this branch of trade, but especially in that of colonial growth. The amount and importance of this branch is rapidly increasing, and has been greatly added to by the privileges granted, by the Ashburton Treaty, to the State of Maine, to send their timber to this country at the colonial rate of duty.

Bark for tanners' use shows a great reduction in the quantity imported in the present year. Except cochineal and organized madders.

in the present year. Except cochineal and ground madders, STUFFS show a considerable increase. For other articles we YE STUFFS

Table III exhibits a most satisfactory evidence of the steady increase of the exports of our manufactures of all kinds. The repeal of the coal duty has already had a striking effect. With the exception of iron, tin in bars, and salt, all other articles show a steady in-

-CLASSIFICATION OF EXPORTS .- On the whole, this ver Table V.—CLASSIFICATION OF EXPORTS.—On the whole, this very important and laborious classification of our exports to each individual market, when examined minutely, exhibits a satisfactory progress of our trade in the most important markets. Our space will not here admit of our entering at large into a review of this table, to which we refer the commercial and political reader, who would justly appreciate the comparative importance of our various markets.

## ACCOUNTS RELATING TO THE TRADE AND NAVIGATION OF THE UNITED KINGDOM.

### I. IMPORTS INTO THE UNITED KINGDOM.

An Account of the Imports of the Principal Articles of Foreign and Colonial Merchandise, and of the Consumption of such Articles, in the first four months ending 5th May 1845, compared with the same periods of 1843 and 1844.

| The articles marked thus (*) in the column of quantities<br>cleared for consumption, 1845, are those on which the duty<br>has been repealed, the only return therefore being the   | Q          | nantities impor | ted.       | Quanti     | ities entered for<br>Consumption. | Home      |
