LANDSCAPE SERVICE

Our trained men are glad to be of assistance to you at all times in planning your garden—in suggesting plants for different situations. We also design, construct, and build rock-gardens, lawns, and pools. Our work is guaranteed. In all our landscape work a complete analysis of the soil is made by our Soil Technologists, and the areas treated accordingly. This intelligent treatment abolishes the element of chance and insures satisfactory work. For soil-preparation we use a Rototiller, which leaves the soil in a finely pulverized condition. It thoroughly incorporates fertilizers and organic material, applied as a top-dressing, throughout the entire soil-mass.

'Will be submitted by our Landscape Architect, whenever requested. A minimum charge will be made to cover this expense, but will be deducted if we do the work.
