# WAGE RATES AND HOURS OF LABOUR IN CANADA, 1943

REPORT No. 26

## SUMMARY

**T**HIS report, the twenty-sixth in the series beginning in 1921, contains tables of index numbers of rates of wages and tables showing average wage rates for selected occupations along with the predominant ranges of rates and the standard or normal hours of labour per week. The statistics of rates are given by province or region and in some cases by cities. They apply to nearly all industries. In most cases the data apply to 1943 only, but for a number of industries comparative figures for earlier years are shown.

A new index number of wage rates has been calculated for the period 1939 to 1943 on the base of rates in 1939, the last pre-war year, as 100. This index is shown by industries and main industry groups in Table I. For the period 1901 to 1939 the index on the base of rates in 1935 to 1939 as 100 has been converted to the new base and the whole series 1901 to 1943 shown in Table II. In Table IIA the index is shown on the base of rates in 1935 to 1939 as 100.

An appendix to the report gives data regarding wages paid to farm labour in 1943 and 1944, as published by the Dominion Bureau of Statistics.

The general level of wages in Canada during 1943 was the highest yet recorded, the index covering six main industrial groups being 32.8 per cent higher than in 1939 and 23.8 per cent higher than in 1920 which was the peak of the inflationary movement following World War I. For the period August 1939 to December 1943 the index number of the cost of living advanced 18.4 per cent.

During the period 1939 to 1943 considerable increase in wage rates in all industries was indicated, continuing the advance from the low levels of the depression reached in 1933. From 1939 to 1940 the general index number of wage rates advanced 3.9 per cent; from 1940 to 1941, 8.8 per cent; 1941 to 1942, 8.3 per cent; and from 1942 to 1943, 8.4 per cent. The gradually upward trend has continued from year to year in all industries since the outbreak of war.

In addition to adjustments made by authority of the War Labour Boards the wage data include any cost of living bonus paid, including the last bonus ordered by the National Board which became effective in November, 1943.

## INTRODUCTORY NOTE

Statistics of rates of wages and hours of labour have been collected by the Department since it began to function in 1900 and were published from time to time in the *Labour Gazette*. A separate report on wages was issued in 1921 as a supplement to the *Labour Gazette*. This was the first report in the present series and contained statistics for certain trades and industries in various cities in Canada from 1901 to 1920 with index numbers based on rates in 1913 as 100. The information was obtained mainly from employers and trade unions but data from collective agreements in force and from Departmental officers and correspondents were also used.

In subsequent reports the scope of the statistics has been gradually broadened to include a representative list of occupations in most industries and additional groups were added from time to time to the table of index numbers.

In Report Number 24, containing statistics for 1940 and previous years, the index number was converted to the base 1935 to 1939 as 100 following the publication by the Dominion Bureau of Statistics of a new official index number of the cost of living on that base. Report No. 25 covered the years 1929, 1940 and 1941. No report was published covering the year 1942, but a table of index numbers appeared in the *Labour Gazette* for December, 1943 and again in October 1944.

The method of presenting the statistics on wage rates in the present report has been changed from the method employed in previous reports. In these the rates were shown for most industries in the form of coded samples giving the predominant or representative rate or range of rates paid by each establishment for each of several selected occupations. With few exceptions statistics by region or province were not shown.

The revised form of publication shows the weighted average wage rates as well as the predominant range of rates (approximately the middle 80 per cent) by main occupations and by province or region. Where feasible, rates in Montreal and Toronto are also given. In the construction industry, printing and publishing, street railways, and certain classes of civic employees' rates are given for other cities as well.

The hours shown are the standard or normal hours per week in the industry. Where there is a variation in the number of hours as between establishments affecting a considerable proportion of workers the predominant range is shown.

### SOURCE OF INFORMATION

The Statistics for 1943 have been obtained from some 15,000 establishments supplemented by information from trade union returns and from collective agreements. Most of the establishments with 15 or more employees were included in the survey with a representative number of smaller firms in certain industries such as garages, foundries and machine shops, sawmills and in the construction industry.

Prior to 1942 the mailing list of employers contained about 6,000 establishments including most of the larger firms and a representative number of smaller firms.

The more complete coverage was undertaken to meet the needs of the National War Labour Board when it began to function in 1942.

### WAGE CONTROL AND THE COST OF LIVING BONUS\*

Much of the wartime increase in wages as indicated by the index number of wage rates came about by way of a cost of living bonus, payment of which was provided for under the wages control policy of the Government. All such bonuses have been included in the rates throughout this Report.

The first order relating to the control of wages and the payment of a bonus to cover increases in the cost of living was Order in Council P.C. 7440 of December 16, 1940, for the guidance of Boards of Conciliation and Investigation in their recommendations in dealing with disputes over wages for mining, some public

---

\* For details of the Orders in Council dealing with wage control and cost of living bonus, see appropriate issues of the *Labour Gazette*; a bulletin issued by the Department of Labour, Wartime Orders in Council Affecting Labour (Revised Edition June 1943); and bulletins issued by the National War Labour Board.

utilities and war industries under the Industrial Disputes Investigation Act. The policy was recommended also for the adjustment of wages generally.

This Order was replaced by the Wartime Wages and Cost of Living Bonus Order P.C. 8253 of October 24, 1941, which stabilized all wage rates at the level in effect on November 15, 1941. No change in basic rates was permitted without the approval of The National War Labour Board or a Regional Board which were set up under the Order.

This Order in turn was replaced by the Wartime Wages Control Order P.C. 5963 of July 10, 1942, which was a consolidation of previous orders and amendments thereto.

A cost of living bonus was payable under both the above Orders and adjusted quarterly in accordance with orders issued by the National Board. For each rise of one point in the cost of living index of the Dominion Bureau of Statistics, adjusted to the base of August 1939 as 100, the bonus must be increased by 25 cents a week in the case of adult male employees and all other employees receiving \$25.00 a week or more, and by one per cent of the basic weekly wage rate in the case of men under 21 years of age and women who receive less than \$25.00 per week.

Following the establishment of the ceiling on prices effective December 1, 1941, increases in the cost of living were slight with the result that no general adjustment in the bonus was ordered until the summer of 1942. The first adjustment was 60 cents per week for those on the flat rate or 2.4 per cent for those on a percentage basis as from August 15, 1942. This was later increased to 95 cents per week or 3.8 per cent as the case may be as from November 15, 1943.

The maximum bonus payable under these orders was \$4.60 per week for those on the flat rate bonus and 18.4 per cent of the basic wages for those on a percentage bonus both based on an increase in the cost of living since August 1939 of 18.4 points.

Under Order in Council P.C. 9384 of December 9, 1943, effective February 15, 1944, provision was made for the establishment of wage rates incorporating therein cost of living bonuses payable in respect of the rise in the cost of living, to stabilize the wage structure established in this manner, and to provide machinery for rectification of any gross inequalities and injustices in wage rates so established.

## INDEX NUMBERS

In Table I the new index number of wage rates covering the period 1939 to 1943 is shown for each of six main industrial groups and for each of the industries included therein according to the Dominion Bureau of Statistics classification. The index number was calculated by the use of weighted aggregates.

The weighted average wage rate was obtained for each of a representative list of occupations in an industry. Each such average was multiplied by the number of workers in the occupation used as a weight for that occupation throughout the period. For the index number for the industry the sum of these products was expressed as a percentage of the corresponding sum in the base year.

To obtain each main industrial group index, the indexes for the various industries included were weighted by the number of workers in each industry based on census data and to obtain the general index the main industrial groups were weighted in proportion to the number of workers in each group.

For the period 1901 to 1939 no new calculation was made, the index number previously published on the old basis being converted to the base of rates in 1939 as 100. This index was calculated by the use of link relatives. The

percentage change from year to year for each occupation was calculated. The simple arithmetic average of these percentages was obtained and the average increase or decrease applied to the index for the industry for the preceding year. To obtain the general index the main group indexes were weighted in proportion to the number of workers in each group based on data from the decennial census.

For the period 1940 to 1943 the index numbers were calculated by both methods mentioned above. The differences were not substantial for any of the years of "over-lap". The figures are as follows, the new index being shown first in each year and followed by the index as calculated by the former method: 1940, 103·9 and 103·9; 1941, 113·1 and 114·2; 1942, 122·5 and 123·1; 1943, 132·8 and 132·4.

**Table V—WAGE RATES AND HOURS OF LABOUR IN MANUFACTURING INDUSTRIES, 1943**

**(1) PRIMARY TEXTILE PRODUCTS**

NOTE.—For more detailed information see report "Wages in the Primary Textiles Industry in Canada, 1943", issued as supplement to the *LABOUR GAZETTE* for October, 1944.

The rates shown in the Primary Textiles Industry are average straight time wages or earnings per hour. Most of the employees in this industry are on piece work.

Table VII—WAGE RATES AND HOURS OF LABOUR IN TRANSPORTATION AND STORAGE, 1943

(1) WATER TRANSPORTATION (INLAND AND COASTAL)

NOTE.—Rates include board and lodging and vary to a great extent according to size or type of vessel. Hours on duty for officers, seamen, deckhands, etc., generally average twelve per day (watches—six hours on, six hours off) seven days per week except when in port; for engineers, firemen, oilers, etc., hours generally average eight per day, but twelve in some cases; for stewards, cooks, etc., hours vary according to requirements. All classes may be required for extra duty at any time, especially in the Great Lakes and Upper St. Lawrence service when passing through canals. On most of the British Columbia coastal passenger vessels hours for all classes average eight per day, 6 days per week, with extra pay for overtime. Some of the tug-boat employees in all areas are on the eight-hour day.

- (a) Deductions from each employee's earnings on basic rates effective as follows. Train, engine and telegraph service, 10 per cent Dec. 1, 1931; 20 per cent May 1, 1932; 15 per cent Nov. 1, 1933; Maintenance of way and bridge and building, 10 per cent May 1, 1932; 15 per cent Dec. 1, 1933; Locomotive and car shops, 10 per cent April 1, 1932; 15 per cent Dec. 16, 1933, with certain exceptions. Deductions amended for all classes effective as follows: Jan. 1, 1935, 12 per cent; May 1, 1935, 10 per cent; in 1937, between February and December, eliminated by April 1.
- (b) Cost of living, bonus per week: \$1.93—June 1, 1941; \$2.75—Sept. 1, 1941; \$3.65—Nov. 15, 1941; \$4.25—Aug. 15, 1942; \$4.60—Nov. 15, 1943, this amount being incorporated in basic rates Feb. 15, 1944.
- (c) Basic rates increased from September 15, 1943, by 6 cents per hour, as the result of a retroactive award by the National War Labour Board, Dated July 31, 1944.
- (d) These employees are allowed approximately one cent per hour extra for checking in and out.
- (e) Machinists, boilermakers, blacksmiths, plumbers, etc., sheet metal workers, cabinet makers, carpenters—coach, locomotive and bench, welders, etc.
- (f) Freight car carpenters, freight car painters, car inspectors, car repairers, etc.

\* Maximum rates based on length of service.

† Including troublemen and, in some cases, groundmen; in some localities line maintenance work is performed by employees of light, heat and power distribution utilities, rates for which are included here.

‡ Including shedmen, pitmen, cleaners, blacksmiths, carpenters, painters, etc.

(a) Rate applies also to bus drivers.

(b) Rate per month.

## APPENDIX—WAGES IN AGRICULTURE, 1943—Concluded

The information given below has been reproduced from a bulletin on "Farm Wages in Canada", issued September 27, 1944, by the Dominion Bureau of Statistics—Agricultural Branch. The figures were compiled from reports made by farm correspondents in all provinces.

### Farm Wage Rates August 15, 1943, 1943 and 1944

Although the average rates of wages paid to hired farm workers in Canada show a further increase at August 15, 1944, declines in certain provinces are indicated for the first time in some years. The average rate paid for help hired by the day when the employer provided the board of the hired man was \$3.76 at August 15, 1944, compared with \$3.51 at the same date in 1943. Increases are shown for all provinces except Ontario and Quebec. In these two provinces the rate declined about 75 cents per day from last year. Additional farm labour made available through various schemes such as military leave, prisoners of war, the transfer of western farmers, students and "commando" groups tended to ease the labour situation and the lower rates paid to students resulted in the lower average. Rates in the Prairie Provinces were considerably above those of last year as a result of larger crops being harvested this year. When no board was provided the average rate for day labour was \$4.39 compared with \$4.74 in 1943 with lower rates again indicated for Ontario and Quebec. When the men were hired by the month the average monthly rate with board was \$67.92 at August 15, 1944, as compared with \$61.26 at the same date in 1943. When the workers provided their own board the average rate for men hired by the month rose from \$84.26 in 1943 to \$87.86 in 1944.
