country that were entitled to meet him on even terms. Early in the season Joe Bunker, then in the very best of condition after his careful wintering in Georgia, beat Director in a race at Fleetwood Park, only one heat of which was better than 2:20, but that he could have repeated the performance later in the year even the most ardent admirers of Bunker will hardly claim. From this time until the close of his campaign Director's career was one of almost uninterrupted success. He won races both in his class and for all stallions, beginning by defeating Monroe Chief at Chicago, in a contest that will not soon be forgotten by those who witnessed it. At Cleveland he achieved a notable victory over Wilson, that horse trotting one heat in 2:16 $\frac{1}{2}$ , and being assisted by every horse in the race except Director. It was in this race that Director obtained his record of 2:17, and when the fact that in doing so he trotted for three-quarters of a mile on the outside of three horses is considered, the merit of the performance will be appreciated. That 2:17 under such adverse circumstances is fully equal to 2:15 on a good track, with the pole and with nothing to contend against, is the opinion of many horsemen who have nothing to prejudice them; and that Director's race at Cleveland was far and away the best ever trotted has never been disputed. But it is not alone in the matter of speed that Director is conspicuous. Perhaps his most notable quality is his gameness, and in this respect it is doubtful if his equal has been seen. It has enabled him to win where other horses would have had no chance for victory, and to this quality may justly be ascribed the greater measure of his success. There are plenty of horses that can trot a quarter as fast as Director, but the one that cannot beat him to the quarter-pole and can beat him a mile, is yet to be found. In all his races there have been trotters that could easily take the pole from him at the commencement of the journey, but on the homestretch, or even before that was reached, the little black has forced them to lower their colors. In point of actual performances he is clearly the superior of Phallas, as he beat that horse on every one of the four occasions they came together last summer, and in addition to that beat other good horses as well. After winning all kinds of races in all parts of the country, Director started for the great \$10,000 purse at Hartford, and, with every horse in the race against him, defeated a field consisting of Wilson, 2:16 $\frac{1}{2}$ ; Fanny Witherspoon, 2:17; Phallas, 2:15 $\frac{1}{2}$ ; Adele Gould, 2:19, and three others of equal note. This was a famous victory indeed, but Director accomplished it with comparative ease, once he set to work at the job; and he followed it up by winning again at Albany and Boston, at both of which places he defeated Phallas and other good ones, so that as to the merit of his Hartford race there can be no possible question. In point of breeding Director is by far the best of the Dictators, his dam being the famous Dolly, by Mambrino Chief, she being also the dam of Thorndale, 2:22 $\frac{1}{2}$ , and Onward, 2:25 $\frac{1}{2}$ . With equal points of merit in other respects, a horse that is out of a dam whose excellence has been proven is, without doubt, the superior of one that has not this recommendation, and therefore it is only fair to award Director first place among the entire sons of Dictator. —*Breeders' Gazette.*

### Care of Yearlings—A Reverse Description of Eastern Methods.

We recently published an article from the *New York Spirit* on the methods in vogue among the great breeding establishments of preparing yearlings for the annual sales. The following from the *Turf, Field and Farm* tells quite another story, and one much more creditable to the breeders who, after all, were only charged with putting their colts in presentable and attractive condition.

An article appeared a few weeks since in a contemporary which does gross injustice to the large breeding establishments of the country, and is calculated to mislead new beginners in the art and science of breeding for the turf. One would suppose, being unacquainted with the facts, that the large breeding establishments kept up and fed their colts like pigs in a pen, stuffed with the most fattening foods, allowed no fresh air nor exercise, and groomed until the coat shines like satin. Such, however, is the contrary to the facts. No one of the large breeding establishments, such as Mr. Cbas. Reed's Fairview Stud, Belle Meade, Woodburn, Elmendorf, and Runnymede, has ever practiced the habit of feeding oil-cake, or making an undue application of the brush to the coats of yearlings. It is seldom that a brush or comb is used upon any colt in any one of these establishments until a few days before the annual sales, when a new, fresh-shedded coat of hair gives the colts their true appearance of vigor and health. The colts, from the time of weaning until brought to the hammer, are fed a liberal allowance of clean, sweet oats and fragrant hay, and in very bad weather and at night are housed in order that each animal shall consume its own food, else some would fare badly with the gluttons. This practice gives the colts some eight or nine hours of open air exercise, and experience and the success attending the plan have been found worthy of imitation, as it tends to the formation of both bone and muscle, and prevents flatulence, inflammation, and other ills to which horse flesh is heir. The time to make a race-horse is before he is born, by giving the dam the best care, and the produce will show it when dropped, and, as all the most valuable stakes are run at two and three years old, it is absolutely necessary that the colts should be bountifully fed. Air and exercise are indispensable to convert the food into wholesome nourishment, promote circulation of the blood, add firmness and strength to the muscles, increase the strength, texture, and growth of the bone, assist digestion, prevent flatulence, and enable the animal to endure fatigue. Without constant and regular exercise a horse cannot enjoy good health, and experienced breeders know and appreciate this fact. It will be news to the breeders to learn that their colts are kept up for months and stuffed with oil-cake, with feet as bright as patent leather shoes, and coats sleek as satin from constant application of brush and rubber. There is little or no difference in the general treatment of all the great establishments, either in the east or west. All are bountiful feeders, and allow free range, the only restraint being to separate the colts in pairs, and allow a number of fillies to exercise in the same paddock. This course of procedure has enabled Belle Meade to breed such grand race-horses as Bramble, who ran forty-nine races up to five years old, and won thirty of them, including in one year the Baltimore, Westchester, Saratoga, Monmouth and Brighton Cups; Bootjack to start in eighty-four races, win forty-nine, and run second in nineteen; Bancroft to run until six years old, starting in forty-three races, winning twenty-three, and being second in five, including in one year the Louisville, Cincinnati and Brewers' Cups, with many other very fast races, defeating the best horses on the turf; Brambletta to run fifty-six races, win thirty-two, and run second in eleven, seventeen of which were run at two years old, winning ten, and running second in four, when really only half trained; and such race-horses as

Bounce, mile heats in 1:42, 1:41 $\frac{1}{2}$ ; Boardman, one mile in 1:40 $\frac{1}{2}$ , the fastest ever run in a race with other horses; Barrett, who crossed the ocean twice, and but for temper a first-class race-horse; Vandallite, winner of eleven good races at three years old, including the Annual at Jerome, the Dixie and Breckenridge Stakes at Baltimore, two miles in 3:35 $\frac{1}{2}$ , and 3:35, with the penalty, the fastest these two races were ever run by one and the same horse. The same generous course of treatment at Woodburn resulted in the production of the unconquered Asteroid and Norfolk, the latter being credited with the fastest three-mile heat race on record, 5:27 $\frac{1}{2}$ , 5:29 $\frac{1}{2}$ ; Springbok and Preakness, the two famous stake and cup horses, running a dead heat in the Saratoga Cup, two and a quarter miles, in the fastest time on record at the distance, 3:56 $\frac{1}{2}$ ; Harry Bassett, winner of all his stakes in his two and three-year-old years, including the Belmont and Champion at Jerome, Travers and Kenner at Saratoga, Jersey Derby and the great Bowie Stakes, four-mile heats at Baltimore; Duke of Magenta, winner of four out of seven stakes at two years old, and eleven out of twelve in his three-year-old year, and is sound to this day in his legs and feet; Tom Ochiltree, a winner at all distances from one to four miles; Glenmore, winner of the best three heats of four miles ever run, 7:29 $\frac{1}{2}$ , 7:30 $\frac{1}{2}$ , 7:31; Abd-el-Koree, Abd-el-Kader, Wildside, winner of four miles in 7:25 $\frac{1}{2}$ ; Fallowcraft, four miles in 7:19 $\frac{1}{2}$ ; Spendthrift, Uncas, Bayswater, Beacon, Vauxhall, Wanderer, Monerchist, Madge, Joe Daniels, Hubbard, Foxhall, winner of the Grand Prix de Paris, Cesarewitch, and Cambridgeshire Handicaps, with weight no horse ever carried to win it, and a host of others which raced through years at long distances, and with high weights. The same results have followed a similar mode of treatment at Elmendorf (Preakness), where Monitor first saw the light. He has raced successfully at all distances under the highest weights, and is credited with the fastest two miles and a furlong ever run, 3:44 $\frac{1}{2}$ , and is now aged and sound. Ferida, the best mare which has appeared for a decade, her four miles in 7:23 $\frac{1}{2}$  never having been equaled by a mare. Postguard, one of the best timber horses in the country, Strathspey, Aella, Clara D., Jennie B., Judith, Little Minch, Little Rufin, Marchioness, Vigil, winner of the Dixie and Breckenridge, Vera Cruz, Vagrant, winner of Phoenix Hotel Stakes, Kentucky Derby, and Grand Exposition Stakes at Philadelphia. The same general system was pursued at Stockwood, where the phenomenal horse Hindoo was foaled, who won seven out of nine races at two years old, and eighteen out of twenty at three years old, including all the large stakes, and five out of six at four years old, including the Louisville Cup, Merchants' and Turf Stakes, the Coney Island Stakes and Cup, in which he defeated the great Eole and Parole. The results at Runnymede have strengthened the practice of generous feed and plenty of air and exercise, as the performances of Runnymede, winner of six important stakes at two and three years old; Barnes, winner of seven large stakes; Belle of Runnymede, a creditable performer, and last, though not least, the famous Miss Woodford, winner of five out of eight stakes at two years old, and ten out of twelve at three years old, including the Champion Stallion Stakes, and over fifty thousand dollars in money clearly show. The identical course of treatment at the Kennessaw Stud gave the turf Luke Blackburn, one of the best race-horses ever foaled in America, and winner of 22 out of 24 races at three years old, including the American Stallion Stakes, at Louisville, Ky., and making the fastest time at one and a half miles on record, 2:34; Aranza, which crossed the ocean twice, and is still sound and winning; Gidalia, one of the grandest mares which has ever graced the turf, and Geo. Kinney, a winner of 12 out of 18 races in 1883, defeating all the best horses on the turf. The paddocks at Chestnut Hill, during the successful career of Leamington, produced many horses with badly developed feet and legs, and many of them broke down and were retired at a very early age. The practice there was generous treatment and good exercise, but there was not room to allow the same range as is to be found at the other studs. The same general system is followed at Rancoas, Brookdale and the Nursery, and covered paddocks are used in bad weather. Location, soil, climate and grasses have much to do with early maturity and development. Certain it is that none of the great breeding establishments have ever resorted to the suicidal policy of confinement, and oil cake or other soft flesh-making or coat-glossing foods. No horse within our knowledge bred at any of these public sale establishments was ever afflicted with big head. All colts are more or less liable to become huckshined, especially when hurried in preparation over hard, rough and dry tracks, but the complaint is rather an exception than the rule. Horse-breeding is at best a great lottery and full of disappointments; an accident may destroy the best; but the horses bred and sold at the largest breeding studs of the country have more than sustained the reputation of their breeders. Nearly all the valuable fixed events have been won by horses bred in them, and the number remaining on the turf to a good age and retiring sound is in proportion to their excellence, and is not excelled in England or any country. It is seldom that any colt bred in any private establishment has ever proved a first-class race-horse, and not one good race-horse can be named either on or off the turf that ever proved a good one where the starving process has been resorted to in raising colts. No man ever grew to maturity strong and healthy that had been starved and housed in his infancy and youth, and the same general law of nature applies to all the brute creation.

### Dewey & Stewart's Indorsements.

These leading Michigan breeders, who raised the famous stallion Jerome Eddy, 2:16 $\frac{1}{2}$ , and other fine animals, write in the following terms of the great remedy for sprung knees and cockled ankles, known as Sparkhall's Specific:

Owosso, Michigan, February 16th, 1884.  
R. H. SPARKHALL: Dear Sir—Having used your Specific with good success, we think highly of it, and do cheerfully recommend it to the public as a most excellent liniment.

Yours,

DEWEY & STEWART.

### Dates Claimed.

Oakland Park, M. M. Allen, Lessee, April 26th to May 3d.  
Capital Turf Club, Sacramento, May 6th to 10th.  
Visalia Fair Association, Visalia, May 1st to 3d.  
Fresno Fair Association, Fresno, May 20 to 24th.  
Souma County Agricultural Association, Santa Rosa, Aug. 18th to 23d.  
Thirteenth District, Marysville, Aug. 26th to 30th.  
State Fair, Sacramento, Sept. 11th to 20th.

It is reported that Mr. Pierre Lorillard has purchased a farm near Red Bank, N. J., where he will breed and trotting horses. If Mr. Lorillard gives the subject attention as he has given the gallopers, he will sur success of the new enterprise.

Foals.

At Rancho del Paso, property of J. B. Haggins. April 7th, bay filly by Exile, dam Primrose, by Son of Geo. M. Patchen, Jr., granddam Blackbird by Blackbird. April 16th, bay filly, both hind feet white, by Ecbo, dam Sister to Alexander. April 18th, bay filly, star and snip, off fore ankle and off hind foot white, by Buccaneer, dam Queen of Hearts Filly by Young Ecbo. April 19th, bay filly, star in forehead, by Exile, dam Ann Mary, by Charles Dickens, granddam Mary Ann by Pilot Temple. April 19th, chestnut filly, star in forehead, and near hind foot white, by Algona, dam Cbarming by Geo. M. Patchen, Jr., granddam Charmer by Belmont. April 20th, bay colt, star in forehead, and off hind foot white, by Echo, dam Sister to Ruth Ryan by Lodi. April 21st, bay colt, few white hairs in forehead, both hind feet white, by Ecbo, dam Lyons' Mare by old St. Clair. April 21st, bay colt, near hind foot white, by Exile, dam Sally Coward by May Boy. Thoroughbreds. April 18th, chestnut colt, off hind leg and near hind foot white, by Wheatley, dam Rosemary by Joe Daniels. April 20th, 1884, chestnut filly, white face, and near hind foot white, by Wheatley, dam Winefred by Joe Daniels. April 21st, chestnut filly, star and snip, near hind foot white, by Longfield, dam Grecian Bend by Lodi. Property of F. L. Duncan, Santa Rosa. April 15th, Nellie H. by Signal, her dam by Henry Clay, a dark bay filly with black points, by Anteco. The name of Nellie D. is claimed for this filly.

The Turf in Australia.

By the last steamer dates to March 26th reached this city. The autumn meeting of the Victoria Racing Club begins on March 1st at Flemington, and the local press reports great sport. From the Melbourne papers we summarize the principal events.

First day. Ascot Vale Stakes—Of 20 sovs. each, with 200 sovs. added for two-year-olds; second to receive 100 sovs., and third 50 sovs. Six furlongs. Hon. J. White's h c Bargo, by Marlborough—Guelder Rose, 122 lbs... 1 Mr. S. Barnard's ch c The Broker, by Goldsborough—Melody, 129 lbs. (including 7 lbs. penalty)..... 2 Mr. E. De Mestre's b or br c Sirocco, by Piscator—Zephyr, 122 lbs..... 3 Time—1:38. Betting 5 to 4 against Bargo; 100 to 30 against the Broker. Six horses started.

The St. Leger Stakes—Of 25 sovs. each, with 300 sovs. added; for three-year-olds; second to receive 50 sovs., and third 25 sovs. One mile and three-quarters and 132 yards. Hon. J. White's h c Martini-Henry, by Musket—Sylvia, 122 lbs..... 1 Mr. W. Branch's h c Off Colour, by King Cole—The Gem, 122 lbs..... 2 Mr. A. F. Smart's br c Archie, by Rapidity—Eugenie, 122 lbs..... 3 Time—3:24. Betting 3 to 1 on Martini-Henry who won in a canter by a length. Five started.

Newmarket Handicap—Of 20 sovs. each, with 300 sovs. added; second to receive 50 sovs., and third 20 sovs. Six furlongs. Mr. J. O. Inglis's b c Malva, 4 years, by St. Albans—Edella, 119 lbs... 1 Mr. D. S. Wallace's h c Le Grand, 3 years, 122 lbs..... 2 Mr. J. Whittingham's b or br c Claptrap, 4 years, 110 lbs..... 3 Time—1:51. Betting 7 to 1 against Malva; 100 to 5 against Le Grand; 15 to 1 against Claptrap. The favorite Segenoh finished fourth, Tbrity one started.

Second Day. Australian Cup.—A handicap sweepstakes of 20 sovs. each 10 sovs. forfeit, or 5 only if declared before 4 p. m. on Monday, 4th February, with 500 added. For the year-olds and upwards. The handicap weight of the winner of the V. R. C. St. Leger to be not less than 110 lbs., and the winner of any handicap of the value of 100 sovs. after the declaration of the weights to carry 3 lbs. extra; of two or more such races, 5 lbs. extra. The second horse to receive 100 sovs., and the third 50 sovs. out of the stake. Two miles and a quarter. Hon. J. White's ch c Morpeth, by Goldsborough—Goldfinch, four years, 117 pounds..... 1 Mr. W. Gannon's br h Sweet William, five years, 121 pounds..... 2 Mr. D. S. Wallace's b c Le Grand, three years, 110 pounds..... 3 Time—4:03. Betting 3 to 1 against Morpeth, 7 to 1 against Sweet William, 8 to 1 against Le Grand. Seventeen started.

The last day was the sensational one of the meeting by reason of the defeat of Martini-Henry for the Champion Stakes, three miles, for which he started a strong favorite. Champaign Stakes.—Of 25 sovs. each, with 1,000 sovs. added. Weight for age. Second to receive 200 sovs., and the third 100 sovs. out of the stake. Three miles. Horses foaled north of the line allowed 7 lbs. 69 subs. Mr. D. S. Wallace's b c Le Grand, by Epigram—Legend, three years, 110 pounds..... 1 Mr. W. Branch's h c Off Colour, three years, 110 pounds..... 2 Hon. W. Pearson's b h Commotion, five years, 131 pounds..... 3 Time—5:26. Betting, 2 to 1 on Martini-Henry, 100 to 30 against Commotion, 7 to 1 Navigator, 8 to 1 Off Colour, 10 to 1 Le Grand, 100 to 8 Sting.

The following are the Melbourne Sportsman's notes of the running. The big event of the meeting, the Champaign, followed. Martini-Henry maintained his place in the market to the last, 2 to 1 being laid upon him. He looked well, but good judges were of opinion that he was not so fit as he was in the spring. Commotion, who found numerous friends at 3 to 1, appeared to be in grand condition. Navigator was rather big, but both Off Colour and Le Grand were in the pink of condition. Sting was also as fit as he could be made. Mr. Watson did not keep them long at the post. Iron Hand at once went to the front, the favorite heading the next division. Mr. Pearson's colt kept a lead of quite fifty lengths round to the turn, where Martini commenced to draw up, and passed him at the entrance to the straight. He led past the stand with a couple of lengths, cheers going up from the excited spectators. Rounding the bonc-turn another cheer showed that Commotion was being sent in pursuit of Mr. White's colt, and the pair were soon racing in earnest. Approaching the bridge, however, Martini-Henry had had enough of it, and tried to cut by attempting to bolt, and it took Hales all his time to keep him on the course. Commotion passed him at the back, and, followed by Off Colour and Le Grand, kept the pace very warm. At the home-turn the pair joined him and passed him. The race was now between Le Grand and Off Colour, and at the distance the Queensland colt, answering every call of O'Brien's, came away, and won with a little in hand, by half a length. Off Colour, who ran very gamely and consistently, was second; Commotion was third, three lengths off, Sting fourth, Navigator fifth, Martini-Henry, who was not persevered with, 100 yards off, sixth, and Iron Hand last. The owner and rider of the winning horse were applauded when the weighing-in was accomplished. The winner has run most consistently during the meeting, being second in the Newmarket Handicap, and third in the Australian Cup. Commotion, however, could have been closer to him, but for the way he tackled Martini-Henry and raced him down. Off Colour ran very gamely. Martini-Henry's defeat was greatly felt by his backers.

Observations at Louisville.

After four days most delightfully spent in Henderson I could not resist the temptation to pay Louisville a visit before returning to St. Louis. I wanted to see if I could note any change in the horses at the Jockey Club grounds after the two weeks of fine weather which had elapsed since I left the Fall City. I arrived here at daylight yesterday morning, and after performing the necessary ablutions, in company with Col. Clark I drove to the course. The Colonel likes a good breakfast, and made me wait until he could order one to suit his special palate, before we left. I came very near going without him, as I wished to be early on the track, and as it was we missed several horses that had already worked before our arrival, and these I may not see at all. One of those we missed was Brazil, and he was reported to have worked uncommonly well. I have always fancied this colt, for I know he has great speed, and I wished to see what action he would show after going more than a mile. The horses at Louisville have improved vastly since I last wrote you, though I fear some may be hurried a little too fast. The best run that has been made thus far was a one and a quarter miles, by Harpoon, which he covered in 2:18 1/2, doing the mile in 1:48 1/2. Several have worked a mile in 1:50 or better, but none so good as 1:48 1/2. Powhatan and Loftin worked together in 1:50, some days since. I saw them cover one and a half miles yesterday in 2:53—the first quarter in 30s., the second in 28s., the mile in 1:51, mile and a quarter in 2:22, mile and a half in 2:53. Loftin could not be pulled back to Powhatan until after he had gone a little over three-quarters of a mile, and looked as though he could have gone away from him at any time until they were pulled up. Loftin was much more backward than Powhatan when I first saw them, and is yet, but to my notion he is the better horse of the two, and I still think if Col. Johnson wins the Derby it will be with Loftin, but I don't believe he will win it at all. Bob Miles was worked, but not pushed; he did a mile in 1:53 1/2. Exploit and Farandole are both doing extremely well—moving as well as could be asked; they did one mile and a quarter in 2:21, making the mile in 1:51. Bob Miles suits well enough. The only question with me is, "will he be fit on Derby day?" I am inclined to think he will be, for I know Mr. Williams will do all in his power to bring him to the post well and in order. He knows the colt thoroughly, and he is in splendid form now—better than any one on the track—while by the record is vastly the superior of any he has to meet. I don't hesitate to say, barring accidents, I think he will win. This idea of twelve or fifteen horses having a chance is, to me, a curious notion. Now, I think Richard Loud has as good a chance as any of the outsiders, yet I can't consider him in the same class as Bob Miles any more than I would class Bramble with the Duke of Magenta. A horse that has never shown might be named as a probable winner, but of those now before the public, as the horses are to-day, I can't see how one can be named to beat Williams' entry. This I state after careful examination and due consideration. The Oaks is a different venture. I believe it will, good day and good track, be the best Oaks ever run. There are four or five extremely fine fillies in it, and several that have private tips of the highest class. It will not be a walk-over for either Matinee, Eva S., or Modesty. In fact, I consider it almost as uncertain as the Merchants'. I have not time to discuss this stock at present, but may do so at some future day; if I do, then I will tell of a very dark one that will come very near being first, if she keeps good. Eva S., did a mile in 1:50 1/2 on Friday last—so I was told by a gentleman who timed her—so you see she is keeping up her promise of being "the best-looking filly on the track," as I wrote you in my last. Lizzie S. is a little flighty, but when it comes for real action she will be found ready for the fray. Brown Dick gave her a mile in 1:50 1/2, and repeated in 1:50; he also worked Belle of the Highlands and the Admiral together, in very nearly the same time. His two-year-olds were not given any fast work. The fastest two-year-old run made was accomplished by Col. Churchill's Aristides and Ruffin fillies; the former is a little the better of the two. They covered the ground in 51 1/2s., which seems to me almost too fast for this early; yet it was a trial in which they were expected to show something, as I noticed Col. Churchill had several of his friends to see what they could do.

I did not see Mr. Pate's Derby horses work, as I have already stated, but I looked them over afterwards and found them quite fine, especially Conking, who shows high form. Monogram looks well, but showed slight signs of lameness after his exercise. I fear his legs may not stand a preparation, but if they do you may expect to hear from him. Bob Pate (the Cow) takes kindly to his work, but I am afraid to express an opinion of him. Aretino did not move as I should like to see him. He will have to improve over his present way of going to beat Richard Pryor's pair, old John Davis and April Fool. He was my first choice for the Cup. Perhaps after Lee Paul gets on his feet he may bring him around, for the colt looks good and should do well.

Right here I want to call the Gilmore men's attention to one fact—the Cup is occasionally run in mud, and if the ground should be heavy that day Gilmore will not be in the race. I have no idea he can beat Davis or April Fool on any kind of ground, all fit, but in the mud it would be a walk-over for April Fool as between them.

Cardinal McCloskey has a slight splint; were it not for that he, in his greatly improved condition, would be very dangerous, and may yet be, as Dick is endeavoring to have him right and well on Cup day. Vera is doing slow work; her best mile was in 1:58. I can't agree with you in considering Wallensee as a Cup candidate. I think he belongs to an entirely different set. His race at New Orleans was nothing. Such horses as Fosteral and Pricess, Slocum and Brunswick (not well) are a poor lot to win Cup honors over. I think Wallensee a fair-selling plate at 1 1/2 miles, and nothing more. Should be start in the Cup, as I believe he will, it is my opinion that he will be in great luck if he gets to the distance stand when the winner crosses the score. Yet it is difference of opinion that makes betting.

Islington shows better on the track than in his stable. He is, without doubt, a great colt, better than I considered him in my last letter. This crop of two-year-olds is one of remarkable strength, perhaps the best in many years. There are so many good ones that one is lost in doubt when he begins to compare them. Brown Dick has a good one in Spanish King. He worked him a quarter in 25 seconds, yet I believe he has a better in his string, but as this one is the pick of the stable I will not name mine, yet time will show if he has not a better colt than King Spanish. I have already given an account of the two-year-olds, so will not speak further of them.

I have not seen Corrigan's string at work as yet. They are about as I last wrote, only improved from the good weather. Freeland is still the great tip for the Merchants'.

There has been some talk of a new jockey club being organized here and gotten up in conflict with the old Association. I have made inquiries on the subject, and don't believe it is very seriously thought of, and doubt if it will ever

go further than a little talk. For what reason should this club be inaugurated? Louisville now has the leading association of the south and west. Every turfman and owner in the country has thorough confidence in the club and its officers. Its very name is a guarantee to everything that is straightforward and enterprising on the turf. Its stakes are not only valuable in a moneyed point, but a winner of the Derby, Cup, Merchants', or turf, has at once an increased value, because it is an established fact that none but a race-horse can win these events. It would be singular, indeed, if turfmen would be willing to give up these great advantages to try a venture of which they know nothing, to say nothing of the business community who fully realize that the Louisville Jockey Club have done more to advertise the city than any feature in its history. The society element would never consent to give up these meetings.—Cor., N. Y. Sportsman.

About Forfeits.

It is thought that Mr. Neab Armstrong, of Moutana, who has retired from the turf, and who has declined to pay a stake forfeit of \$50, due Col. Frank Waters, of Lexington, will fight the question in the courts. His only plea is that the forfeit is a debt which cannot be collected under the gaming act, but Col. Waters proposes to meet the issue squarely, and he will not be satisfied until he has a decision from the highest court of Kentucky. In two of the states the courts have held that a stake liability cannot be evaded under the gaming act, and Col. Waters will risk his reputation as a lawyer that the courts of Kentucky will adopt the same view. On Saturday last, at Lexington, we heard Gen. Robinson, President of the Kentucky Association, Mr. Simonds, the lessee of the track, and Col. Waters discuss the policy of adopting the cash system of entry to stakes. The plan suggested was 2 1/2 per cent. to accompany the nomination and the rest to be paid in like instalments at designated times. This would do away with all credit and enable the association to pay to the winner of the stake the entire amount due him as soon as a decision from the stand is rendered. It would give no trouble or annoyance to the owner of the winning horse, and it would be easy on the owners of the losing horses, because it would not force them to spin around for money after the day had gone against them. The man who is compelled to pay after all hope is lost feels the bitter sting of the debt. The only argument advanced against the plan was that horse owners are just as good stake-holders as an association or a jockey club. In view of the fact that there have been in recent years many accessions of men of doubtful responsibility to the nomination list, the opposing argument does not rise much above the gravity of school-boy declamation. If a club has standing enough to secure entries it should be looked upon as a much safer stake-holder than scores of individuals who constantly figure in the forfeit lists.—Turf, Field and Farm.

Thoroughbred Foals. March 30 | Ch c | Jeunie C. | Monday

English Trotters.

Although trotting races in England are now confined almost exclusively to country fairs, the trotter was fairly well recognized in English sporting circles during the greater part of the eighteenth century. The best performance of a trotter in England a century ago was from forty-five to fifty seconds slower for a mile than the present American record. In 1792 a mile was trotted in a few seconds less than three minutes, and sixteen miles were made in an hour on a common road, the weight being 224 pounds. A unique and valuable sporting book published in England in 1844 gives some interesting information regarding old-time trotting and running races in that country. From the time of James I down the turf has been under the direct patronage of the royal family. King James possessed a fine stand of race-horses during the period Cromwell ruled the nation. During Queen Anne's reign the interest in raising and in the breeding of fine stock was at fever heat, and it was at this period that the famous "Royal Plates" were established. The most flourishing period of the turf was from 1766 to 1784, there being over ninety courses at that time in England alone, and about 105 altogether in the United Kingdom. In the record of trotting performances it is noted that in 1810 ten miles were made on the Epsom road in thirty minutes and ten seconds. The greatest performance in harness with a light waggon was two miles in 6:36. A grey gelding is recorded as making fourteen and a half miles in several seconds less than an hour. The chief of the best trotters within the last half-century were Charles of Scott, a trotting stallion got by Blank, a race-horse, and Useful Cub, a trotting stallion got by a black cart horse out of a Chapman's mare. These two stallions have been the progenitors of a great number of trotters of the highest qualifications.

L. M. Morse of Lodi, has sold to a gentleman of this city his pair of four-year-old geldings, John O'Brien and mate, for \$2,500. These colts are both sons of Mambriano Wilke's, and were very cheap at the figure named.

## Drivers of 2:20 Horses.

The following drivers gave the best records to trotters and pacers in the 2:20 list:

John Splan—Rarus, 2:13; Wilson, 2:16; Charley Ford, 2:16; Fanny Witherspoon, 2:17; Clemmie G., 2:17; Wedgewood, 2:19; Adelaide, 2:19; Mattie Hunter, 1:12; Gem, 2:13; and Sweetzer, 2:15.

Charles S. Green—Lulu, 2:15; Lucille Goldstun, 2:16; Red Cloud, 2:18; Great Eastern, 2:18; Thos. L. Young, 2:19; Flsely Goldstun, 2:20; May Queen, 2:20; and Humboldt, 2:20.

John E. Turner—Trinket, 2:14; Edwin Thoru, 2:16; Haulis, 2:17; Nettie, 2:18, and Daisysdale, 2:19.

John Murphy—Majolica, 2:17; Pickard, 2:18; Patchen, 2:18; Croxix, 2:19; Keene Jim, 2:19; Edwrsd and Dick Swiveller, 2:16; double team, and Frank and Mate, 2:08; trotter with running mate.

Orrin A. Hickok—St. Julien, 2:11; Santa Clara, 2:17; Lucy, 2:18; Overman, 2:19; and Camors, 2:19.

Daniel Macs—Hopeful, 2:14; Darby, 2:16; Josphus, 2:19; Prospero, 2:20; and Sorrel Dan, 2:14.

Budd Doble—Goldsmith Maid, 2:14; Gloster, 2:17; Dexter, 2:17; and Judge Fullerton, 2:18.

Geo. W. Saunders—Clingstone, 2:14; William H., 2:18; and George V., 2:20.

James H. Goldsmith—Alley, 2:19; Driver, 2:19; Flora Belle, 2:13; and Change, 2:19.

Peter V. Johustou—Piedmont, 2:17; Mouroe Chief, 2:18; J. B. Thomas, 2:18; Bodine, 2:19; Aldine, 2:19; and Johustou, 2:10.

Charles Marvin—Smuggler, 2:15; Bonita, 2:18; and Hinda Rose, 2:19.

Edwin Bither—Jay-Eye-See, 2:10; and Phallas, 2:15.

Wm. W. Bair—Maud S., 2:10; and So-So, 2:17.

Gus. Wilson—Hattie Woodward, 2:15; and Alexander, 2:19.

John A. Goldsmith—Director, 2:17; and Romero, 2:19.

George W. Voorhis—Black Cloud, 2:17; and Cozette, 2:19.

James Goldou—Dick Swiveller, 2:18; and Comee, 2:19.

A. B. Cook—Rosa Wilkes, 2:18; and Joe Bunker, 2:19.

Frank Veu Ness—Albamar, 2:19; and Bonsetter, 2:19.

Wm. H. McCarthy—Minnie R., 2:19; Von Arnim, 2:19; and Little Brown Jug, 2:11.

A. McDowell—Sleepy Joe, 2:19; Fuller, 2:13; and Lone Jack, 2:19.

Jas. A. Dustin—Troubadour, 2:19; and Deck Wright, 2:19.

Wm. E. Weeks—Tony Newell, 2:19; and Capt. Emmone, 2:20.

S. C. Phillips—Etta Jones, 2:20; and Sleepy Tom, 2:12.

Ed. Gesr—Dr. Norman, 2:19; and Annie W., 2:20.

David Muckle—Proteine, 2:18; and Princess, 2:19.

Mr. Wiley of the Cook Farm, called upon us this week, and reports everything blooming at the ranch. He says, regarding the death of Collette, noted two weeks ago, that he is satisfied the filly was kicked by some of the other horses in the pasture. Mr. Wiley has a new love in a bay filly foaled by Steinway from Katie G., by Electioneer, second dam Fanny Maloune by Niagara. He declares her to be the finest foal he ever saw, without exception.

Director has found more business in the stud than Mr. Goldsmith anticipated, forty mares being already booked. A few more will be accepted as it has been decided not to train the horse this year.

Wm. Frasar of Portland, Oregon, has sold to C. M. Forbes, same city, the bay colt Editor, by Kisher, dam by St. Lawrence, for \$400.

## FISH.

## Webfoot Fish Liars.

Fishermen are allowed great license in story-telling, but sailors can double discount them, and when the latter have taken to shore life and turned riggers, etc., they can outlie any other class of people. Half a dozen of these worthies were collected in Justice Bushwiler's office yesterday, the court being absent. A reporter called and the gaug turned themselves loose for his benefit. "Stingular thing that," said one, "about the Cotesworth. When she was hove down a sword fish's sword was found sticking in her bottom. It had pierced clean through one of her iron plates and penetrated the living over an inch."

"Yes," said another, "and it had cut a piece out of the flange of an angle iron as clean as a whistle."

"How long was that lamper eel found sticking to the rudder?" asked a third.

"Twelve feet," said a fourth; "I measured it myself, and it was nine inches in diameter."

"Those were large barnacles in her bottom," said a fifth.

"Yes," said the sixth, "I took home several as big around as a soup plate."

The leader then commenced a yarn about a lumberman in Maine chopping down a tree and finding half a bushel of herring in the center, which seemed to interest the others, but did not interest the reporter, who went softly out expecting to see lightning strike the place in less than a minute.—Oregonian.

From all quarters we again hear of high and muddy water in our streams completely stopping trout fishing with success. No doubt, this state of things will continue for three weeks, at which we rejoice. Then when the true lover of trout fishing tries our streams, the fish he catches will be trout bringing home. During the week, we learn of several good men being out, but in each case they enjoyed no sport. Flies were no temptation, however delicately or accurately cast. On trying coarser baits, occasionally a trout would rise lazily and flop over for the fun of the thing, but showed no desire to take the bait. We predict, towards the end of next month, great success in this enchanting sport.

From high and muddy water the streams around Petaluma are undisturbed for the present. The only reliable report of fair catches this week reaching us came from Redwood creek in Alameda county. This stream is in the hills a few miles beyond Oakland, and runs toward Contra Costa county.

The fingerling sharps, who call themselves trout-fishers, and boast of their large catches, are getting very shy when we approach to interview them, their memories, all at once, becoming very treacherous. No use gentlemen, we are ubiquitous, and you can no more hide your evil-doings from us than you can hide the light of day from man. Be true sportsmen and then you need not fear our interviews.

Taking the points about good localities given weekly in our columns, some fifty or sixty persons went over to Sancelito on Sunday, and, what is better, every one made a fine catch of large-sized flounders. We understand our efforts were freely discussed, and generally commended. That's just as we desire. Read the BREEDER AND SPORTSMAN, next to your

bible, dear public, and California will soon be distinguished for her true and honest men in every branch of legitimate sport. The only way for a man to really enjoy his own privileges in this grand country is to respect the privileges of other men. When that happy day comes there will be an abundance of sport for all.

Deputy-Constable Jones is doing good work on the Sacramento river, being reported last week as having captured three boats and arrested six men on San Pablo bay, on Saturday night, they being engaged at that time in the illegal catching of fish. Two pleaded guilty and paid their fines, while the other four will be tried in Beucia some day soon. Two weeks ago four Chinese fishermen were fined \$50 each in Solano county. This is all good news, but why are the efforts of this brave and enterprising officer confined to the Sacramento river? The reason, we fear, is easily found. If Jones was sent out on a round tour of the State it would do more good than the annual appropriation of \$5,000, or anything that a score of Fish Commissioners could do in a life-time. He would reap a rich harvest in every county. We must eventually have a State Fish Warden, and officer Jones is our man from first to last for the position.

The eastern papers say there is nothing much new in fishing tackle, save several new reels that are described as combining all possible good qualities. *Forest and Stream* thinks that perfection has at last been reached in these important devices for the angler.

If those curious in such things, will visit Mr. Golcher's store, on Montgomery street near Washington, they will see in the new Raised Reel which he has recently received from the East, and in the Leonard's Catgill Fly and Light Split Bamboo Rod, something that is indeed new and worthy the inspection of all fond of fly fishing. At Mr. Ladd's on Kearney street, near Sacramento, and at Mr. Allen's, 416 Market street, there is also a general assortment of new goods in this line that would do credit to any country. From reading the paragraph quoted above, we were induced to make an inspection of novelties on hand in our city, and this is the result.

Indian Tom and his squaw came in last week with about 300 pounds of river trout, some of which must have weighed twenty pounds. Tom and his meñala toted them on their backs to their tepee, and are now satisfied they have plenty of grub for the present. The fish were speared and netted near Pyramid Lake.—*Truckee Republican*. Can this destruction last long? While the Indian hunts and fishes for food perhaps no objection can be taken to his doing so, though it gives him privileges very galling and very unjust to this white man. But when the slaughter is unreasonable in game or fish it is another thing, and should and must be reduced to proper limits. It may be nobody's business just now to stop the slaughter, but if left alone it will lead by and by to everybody's want.

Oregon eels are a curious fish. They have a mouth built on the model of a sucker's. They climb falls by attaching themselves to the rocks at the side, and by striking the water with their tails they leap a short distance along the rock, and then take a fresh hold. At the falls on Eagle creek hundreds of them can be seen trying to pass the obstruction in this manner. The greater number of them are thrown down many times, but return and try again. It is a very singular spectacle to see a dozen or two of snaky-looking fish hanging to the wet rock, their tails in the swift water, which keeps them flapping about like whip lashes. Some people eat them.

James Nagle, steward of the steamer Oregon, brought down on the last trip a rare and ugly-looking sea monster, caught in the northern waters. It is called by some a sea spider, on account of its resemblance to that insect, but it is more generally known as a horned crab. It weighs about ten or twelve pounds, and measures about three feet from claw to claw. It has teeth like a dog, and two huge claws in front. If we knew more of the great deep we should be less surprised at the monsters it sometimes yields up. We know nothing of them yet, but the sea is full of them in greater ugliness and greater number than to be found elsewhere.

In fish culture the good work goes bravely all over the Union. The last item of importance is as follows:

"Nearly 2,500,000 lake trout, 1,200,000 whitefish, 50,000 brook trout, 10,000 landlocked salmon and 8,000 California trout are ready for distribution at the Spirit lake and Auamosa hatching houses of the Iowa Fish Commission."

Santa Cruz county contains many very fine trout streams. Boulder creek especially enjoying a great reputation. The local papers report some good catches, but the streams are too high for general sport. We know several devoted and expert anglers in this city, who visit Boulder creek every season, and we give this for their information.

A. J. Rhodes came down from Independence Lake last week with 100 pounds of fresh fish. They were beauties and no mistake.—*Sierra Valley Leader*, April 4th. Is not 100 pounds rather too many to catch at one time? As the exact number of pounds is given we should like to be informed of the means by which the fish were caught.

From Oregon to San Diego we daily hear gratifying news of the abundance of shad of large size. Near home, San Pablo bay is reported to be the best place for catching this delicious fish, some being recently caught there weighing eight pounds each. It will soon be the same with striped bass. What a glorious monument to the memory of the old commissioners. Let us all remember them with gratitude, now we see the grand results of their unselfish labors.

The *Silver State* says: Senator Marker, of Washoe, has planted 20,000 eastern brook trout on his Humboldt broad domains. It is thought there is no known cause why they should not do well, and in a few years not only stock the waters on the Marker place, but many of them also find their way into the Humboldt river.

The New York *Mail and Express* says, the trout supplied the New York markets come chiefly from "private preserves." What a reflection on the administration of law in that State! It will be the same, however, in California, if we are not warned by the fate of New York, and soon change our evil ways.

The Philadelphia *Call* forcibly remarks: It is not against the law to fish for trout now in Pennsylvania, but it is a grievous waste of time. We wish our fingerling sharps to cut out this paragraph and read it every day. Otherwise it will soon be the same in California as it is in Pennsylvania.

Bay fishing generally was not successful last week. The few instances of moderate sport coming to our knowledge, if we reported them, would not redeem the general failure, and might mislead.

## THE KENNEL.

## A Possible Kennel Club.

EDITOR BREEDER AND SPORTSMAN:—I am sorry to see by your of the 5th inst. that the prospects for a good bunch show in San Francisco this spring are not promising. Cannot owners of sporting and non-sporting dogs unite and form themselves into a kennel club for the purpose of holding yearly bench shows? The smallest beginnings sometimes develop the best. A love of the dog, unity, and a little energy would be all the capital required.

Los Angeles, April 11th.      ARTHUR J. HUTCHINSON.

Captain Hutchinson's imported stag hound bitch Grulach, arrived from England without accident and in fine health. The description of this bitch and some notes of collateral matters, which the captain says he mailed to us, never reached this office, much to our regret.

We regret to hear that the dog of Mr. Jones' fine brace of Cocker spaniels died soon after his return from his hunting trip to Humboldt county. Fortunately, the bitch had a litter of four puppies before the dog died, so the breed will not be lost to us.

Sybil 2d visited Regent on the 20th instant. The result ought to be a valuable addition to Mr. Bennett's kennel.

## THE DRAMA.

## The California.

The Excelsior Combination have had no reason to complain, during the week which is advertised as positively the last in San Francisco, of poor business, for the house every night has been crowded to its capacity. We have nothing to add to what we have already said as to the excellence of the performances, and nothing to detract. No doubt the house on the remaining exhibitions, Saturday's matinee especially, will be suffocating from the crowd. In very many quarters we have heard a decided hope expressed that this distinguished company would perform for a week or two in the Grand Opera House, at popular prices. All we have to say on this matter is, that if they were to do so they would reap a richer harvest than they have done already, flattering as must be the patronage they have received in our city from the first night. The suggestion is worthy of Mr. Kiralfy's consideration.

Since writing the above we are glad to find the arrangement we suggested above is to be carried out, and that Excelsior will be given at the Grand Opera House.

## The Grand Opera House.

During the week Bert's complete dramatic company have given Rosedale in a manner both as regards mounting and performance that deserved a much better patronage. We cannot recall any play in which we ever saw the company to better effect than in the interesting drama of Rosedale. The plot is well constructed, full of good dramatic incidents, eloquent language, lofty sentiments, and quite free from improbabilities, except in one character, Sarah Sykes, maid of all work, and this is again one of those extravagant burlesques which cannot possibly exist in good English society, but which is ever the fate of these characters. The other characters were all well taken and well sustained. If we must give preference to any we give it to Miss Louise Calvert and Harry Mainhall, who, all through, sustained their characters with much ability. Grismer and little Minnie Tittel were very properly called before the curtain—a compliment well earned. May Tittel made all that could be made of Sarah Sykes, impossible as the character is, and gave evidence of being one of the keenest mimics and best acrobats on our local stage. We regret Rosedale, was not better patronized.

## Oakland Theatre.

For the week, at this theatre the Russian Slave, has been the attraction, but for some reason other than the merits of the performance the houses have not been as good as usual. The people of Oakland, however, have been so liberal in their patronage since Bert opened the Colosseum, that we do nothing more than record the falling off for the week, assured, as we are, the cause is only accidental. Miss Charlotte Tittel took the character of the Slave, and acquitted herself with her usual grace, power and ability. The piece was admirably mounted, and performed with much spirit and accuracy. During the week Miss Tittel received a most earnest call before the curtain. Next week Sheridan will appear in *Marble Heart* and *Camille*, supported by Misses Davenport, Phoebe Daviea and Charlotte Tittel.

## The Vienna Garden.

Wyatts Minstrel Company have been well patronized during the week. The first part is certainly good, with some new jokes and racy dialogues well worth hearing. The singing was also much appreciated. In the after pieces, Gus Stanley, in his female impersonations, gained most applause, but at times, his robust, unfeminine action detracts from his merits. We scarcely thank Charles Coghlin, good and useful man as he is in his line of business, will make a fortune as a play-writer. Some of his sketches are very weak, hardly, indeed, worth presenting to an intelligent audience such as frequents the Vienna Gardens. The quartette sang well during the week, Morant being as popular as ever. Wetter, the bass, has a good voice, but his manumens are unpleasant. Altogether, however, the engagement is successful.

## The Gypsy Band.

This distinguished musical corps will arrive here tomorrow and open at the Standard Theatre on Monday night. A few weeks ago we gave the leading particulars of the band. Since then we have been reading the European criticisms on their music, and the verdict in their favor is as unanimous as it is pronounced. In music, the band far excels the Spanish Students, brilliant and charming as they were; in instrumentation, fullness and power, they equally excel Thomas' chorus or Gilmore's band. The Gypsies, in fact, are marvellous. Their advent here is an epoch in our musical history. As everything really good is liberally patronized in San Francisco, we predict for the Gypsies a fortune equal to that excited by the Excelsior Combination, simply because they are good.

The Capital Turf Club have offered \$500 for the best all for Vanderlynn, Romero and Albert W., and the best of those horses have accepted. So the race goes.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, etc.).

Fish and Game Seasons in Sierra.

EDITOR BREEDER AND SPORTSMAN:—In your issue of March 22d I see a piece about fishing in Independence lake, Sierra county. (I think it was taken from the Bee). It goes after our District Attorney, and insinuates that we were living under a legislation of our own. Now, I want to say that the trout do not commence to spawn until the latter part of April and in May, and in the mountain lakes as late as June, so they do not get any protection from the law whatever in this county. Our trout streams are among the finest in the State, and a great number of trout are taken every year with scarcely any diminishing in number. The laws for game and fish are altogether wrong for this section, and our sportsmen will not abide by them. We had the best law that could be made for this part of the State. Sportsmen take no interest in the matter now and will shoot when the right time comes. We have some genuine sportsmen here that have heretofore lived up closely to the law, but will commence shooting by first of September as before. If they should wait till the first of October there would be no birds to shoot, as the quail frequently commence leaving during August, especially if nights are cold and windy, and by the first of October they have all left for the lower country. So it's shoot in September or not at all. The sportsman that had the new law passed in the last legislature did not know anything about the country here or the habits of the birds; if they did they would have left the law as it was for Plumas, Lassen and Sierra counties. His Nibs.

Downville, April 18th, 1884.

[To snit the interests of all counties, and produce harmony of action among all true sportsmen, we believe an effort will be made next Session of the Legislature, to have the law sectional instead of general. It will certainly remove many complaints.—Ed.]

Match at Oakland Race Track.

Although the score made in the triangular match between Messrs. Pearson, Slade and Jones, on Sunday, at Oakland Race Track, was not up to the standard of the men's reputation at the trap, the match, during its progress, as we anticipated, excited much interest among the many spectators who gathered at the track to see it, and the betting all through on the final result, and especially on individual shots, was brisk and heavy. Pearson, from the announcement of the match, had decidedly the call in public favor, but still considerable sums changed hands. The conditions were \$100 to the man, 50 birds each, 30 yards rise, ground traps, both barrels, of course, the winner to take the pool and the lowest man on the score to pay all expenses. The birds were supplied by Burbank, and proved a good lot, the proportion being tailers with a pronounced inclination to prospect the adjacent country. To this peculiarity in the birds is ascribed the low average of the birds killed. Although there was little difference in the character of the birds as they rose to each man, Pearson certainly did the steadiest shooting, at one time killing fourteen in succession in excellent style. Considering the fineness of the day, suited as it was in every respect to trap shooting, each man made several misses very difficult to understand, but this is the case in all such matches. The men stood on equal terms as to the trap, as it was decided for by throwing dice. In point of what is called "luck" the fates were most hostile to Dr. Slade, eight of his birds falling dead beyond the boundary lines. This thing is the most disconcerting of all to a man at the trap, but we dislike to make it an apology for losing, because it is evident that, although at times it cannot be avoided, the birds so lost are not as well shot as those that fall within the line, and to kill his birds is just what a man goes to the trap for. Still, for all this, we must not forget that Slade's proportion of birds so lost, in this case, is unusually large, and but for the mishap he would have beaten or tied Pearson's score. It is seldom incompetency so much as nervous anxiety that causes this loss. As usual, there were some fine long shots. The best of these were in the shoot-off between Slade and Jones, the former's second bird and the latter's third being killed at very long range with second barrel, in grand style. Mr. T. Williams acted as referee. The score:

Score table for the match at Oakland Race Track, listing names like Pearson, Jones, Slade and their respective scores.

The latter gentlemen, being on 31 birds, shot-off to see who the wicked man was and the fates were still against Slade, as he lost by two out of four birds. During the week we heard incidentally that Mr. Jones has had enough of trap-shooting matches, and that he has put his gun by until duck season again comes round. The report is, he would not undergo the mental and nervous strain again for \$1000, and that having got out of the scrape he intends to keep out. If such is his organization, perhaps the resolution is a wise one.

At Bird's Point, Alameda.

As announced, the Neophyte Club had its first medal shoot on Saturday, at Bird's Point, fifteen out of the twenty members facing the trap. As we remarked on the formation of this association, formed chiefly for practice which they cannot get when shooting with the Alameda County Sportsman's Club, to which they all belong, many of the Neophytes are only so in name, as the score shows, for out of the fifteen there were two clean scores, one eleven, two tens, four nines and two eights, which is a good average. Two gentlemen who are really neophytes at the trap gave great promise for the future, Messrs. E. Brown and E. Chapin, the one killing nine, the other ten out of twelve birds, which is a fine record for their first appearance at the trap. Mr. Upham's clean score of twelve, winning the first gold medal, did not surprise us, for he is well known as a steady, fine shot in the field, but Mr. Beunett's clean score, winning second medal, was somewhat unexpected, but equally creditable as showing what he is capable of. Mr. Pollak's eleven proves him to be at the trap what he is also known to be in the field, a very capable man with the gun. The style of Messrs. C. Kellogg and J. J. Roach the lawyer was much admired, in both cases being keen, quick and clean, showing they only want practice to win reputation at the trap. Mr. Roach, like Mr. Goodall, had hard tailers and quarterers all through, with a disadvantage of the trap also, Mr. Goodall only having the center trap once, and Mr. Roach twice. Mr. Wadsworth and Mr. Edson did not shoot up to their average. They also had more than their share of tailers, and the center trap only twice each. Mr. Haskell had only one incomer, and the center trap twice, but he killed ten birds in good style. Mr. Upham had two incomers, and center trap five times, his birds being chiefly difficult tailers and quarterers. Mr. Bennett did not have the center trap once, and his birds, with the exception of two incomers, were chiefly tailers and quarterers. Most birds were killed with second barrel, except in the case of Mr. Edwards who used a single barrel gun. The best long shots were Mr. Brown's tenth bird with second barrel, and Mr. Bennett's first bird. Altogether it was a very creditable beginning. Indeed it would not surprise us to hear of the Neophytes soon challenging the parent club to a contest at the trap. The score: Upham.....1111111111-12 Edwards.....111001111011-9 Pollak.....111110111111-11 Dean.....10111101101010-8 Wadsworth.....110101001011-5 C. Kellogg.....111111011010-9 Haskell.....11011111111011-10 Michaels.....00000 E. Brown.....10111101011-9 J. J. Roach.....001101010010-5 E. Chapin.....11011101111-10 T. Bennett.....111111111111-12 Edson.....101111011011-9 Goodall.....000111111011-8 Platt.....10111001100-6

A sweepstakes match, \$250 entrance, \$15 to the first and \$5 to the second, was shot, with the result following: Edwards.....1111011-5 Bennett.....001100-2 Wadsworth.....11110-5 Hill.....101111-5 Edson.....101010-3 Kellogg.....101110-4 Haskell.....101100-3 Pollak.....10101-4 Edwards, Wadsworth and Hill then shot off the tie. The first-named failed to get his bird, and the other divided the money.

The Trap Tourney at Chico—Notes of Other Events.

EDITOR BREEDER AND SPORTSMAN:—The long-talked of and much-looked for tournament, under the management of the B. C. S. C., came off as per announcement, and was an immense success, so far as entries, planning, and carrying out details, everything that would conduce to the comfort and convenience of the shooters and spectators, of which there were a goodly number, a large proportion of which were of the fair sex. The decisions of judges and referee gave general satisfaction, and nothing transpired to mar the pleasure at any time. There were forty entries, divided in four teams of ten each. There was plenty of birds, and, as a rule, strong tailers. The weather was simply magnificent. Just cloudy enough to keep the sun from glaring, and first enough wind to make it comfortable and not to interfere with the guns. First match, 12 single birds, 21 yards rise.

Table listing names and scores for the first match at Chico.

Table listing names and scores for the second match at Chico.

Table listing names and scores for the third match at Chico.

Table listing names and scores for the fourth match at Chico.

The ties on 12 were shot off to double birds, with the following score. G. W. Raney.....1110111-6 Brown.....1101011-4 J. D. Lopez.....101011-11 J. T. McIntosh.....101011-5 TIES ON ELEVEN. C. Robinson.....11111-5 H. T. Hopper.....1101011-5 C. J. Hass.....100011-3 S. McDonald.....11110-3 John Crothers.....10010-3 Bassford.....11111-5 T. H. Barnard.....10101-4 G. W. Raney, Suisun, first prize, \$120; J. T. McIntosh, Chico, second prize, \$100; J. D. Lopez, Petaluma, third prize, \$70; J. H. Brown, Stockton, fourth prize, \$60; C. Robinson and Bassford divided fifth and sixth prizes, \$90; Hopper and McDonald seventh and eighth prizes, \$55; T. H. Barnard of Chico, ninth prize \$15.

Table listing names and scores for the freeze out at Chico.

Monday evening there was a lively dispute among some of our local breeders of game cocks. Several fights were made, and considerable money and wine was wagered on the results—that is, there was fully two hundred spectators, among them being many strangers and some of our most respectable citizens. It was an invitation affair, and some really good chickens were produced. Our board of Agricultural Directors have issued their programme and claim the first week in September. The committee

who canvassed the city collected about two thousand dollars. The Standard Muistrels showed here last night to standing room only, and gave a splendid performance.

OCCASIONALLY

Melbourne Gun Club, Australia.

The following will be interesting to our Australian as well as American readers, showing, as it does, that with the exception of the two first fifteen straight at 31 1/2 and 31 yards, the average scores scarcely equal the same of our local clubs.

There was a good attendance of members on Friday to take part in the second competition for the Club Fund Cup, which, according to the conditions, has to be won three times before becoming the property of any shooter. Messrs. F. M'Evoy and G. Peppin tied, each killing 15 birds without a miss, and it was agreed to shoot off for a trophy the following Friday, after dividing the £1 optional sweep in which all competitors joined. Eleven birds each.—Sportsman.

Table listing names and scores for the Melbourne Gun Club competition.

Another match for the Australian Cup Handicap shows a better record. It was won by M'Evoy, the crack shot, after a tie by four, nine birds each.

Table listing names and scores for the Australian Cup Handicap match.

Tom Pearson, last Sunday, killed fourteen straight; Messrs. Upham and Bennett, twelve straight, on Saturday; Messrs. Robinson, Lambert, Orr, Golcher and others, scarcely ever shoot without killing eleven or twelve straight. Comparing the number of shooters, California, we think, will stand good with any country. In the last match above, twenty-six faced the trap, besides those named.

Another Tournament.

The California Wing Shooting Club of San Francisco have sent us a handsomely printed circular containing the programme of their contemplated tournament, which the members propose to hold at San Bruno on 3d and 4th of May next, accompanied by a polite invitation from the president to attend. Under such a distinguished and liberal club, we need not say everything will be done to secure the success of the tournament and the pleasure of the visitors. The prizes promise to be large, and from the character of the gentlemen who are certain to be present, hotly and closely contested. Next week, as the time approaches and the arrangements mature, we will give more particulars. At present we can only publish the list of prizes.

Saturday, May 3d—First match—Fifteen single rises, twenty-one yards, entrance \$15; second match—twelve birds, Hurlingham rules, entrance \$10.

Sunday, May 4th—First match—Twelve birds, Hurlingham rules, entrance \$12.50; second match—six double rises, entrance \$7.50.

Prizes in above divided into 30, 25, 20, 15 and 10 per cent. Following the regular matches, as above, on each day sweepstakes will be shot, prizes in which will be divided into 50, 30 and 20 per cent. California State Association Rules to govern, excepting as to ground-trap rule No. 8. Shooting shall be in squads. Entries, excepting sweepstakes, close on Friday, May 2d, with S. E. Knowles, Secretary of the California Wing Shooting Club, corner of Post and Dupont streets.

The Sacramento Foresters' Club.

This club shot their regular medal match last Sunday, with very unfavorable weather. The strong wind is said to have carried an unusually large number of birds outside of the boundaries. The shooting was for a new medal, the old one having become the private property of W. P. Gerber. In the club shooting the medal was won by J. W. Todd, the new President, with a score of eleven. The three Gerber brothers scored ten each, and after the club match they shot at three pairs each, Henry Gerber winning the fraternal contest by a score of 5 out of 6. The usual pool shooting followed the main match, and there were several impromptu matches at clay pigeons. The score of the shooting for the medal is as follows:

Table listing names and scores for the Sacramento Foresters' Club medal match.

The Pacific Sportsman's Club, of Sacramento, have their regular live pigeon match at Agricultural Park to-morrow. The officers of this club are: President, Randolph Petter; vice-president, Frank Kunc; treasurer, Charles Flohr; secretary, J. E. Morrell; captain, Horace Greenwood. The club has a membership of 22, and ample funds.

It has been suggested to agitate a grand state tournament at Sacramento during the next State Agricultural Fair. The idea is worthy of support, and will, no doubt, be carried into effect. But is it not too soon to agitate the matter effectually?

Mr. Charles Pierce of Oakland, whose firm are the sole agents for the Ligovsky clay pigeons, was at Petaluma on Sunday last, and got his work so well in as to give him hopes of an excitement in that kind of shooting. He reports a healthy feeling in all sporting matters at Petaluma.

The Gun Club of San Francisco and the Alameda Gun Club have fixed 10th of May next for the third and deciding contest for the Silver Cup Trophy presented by the Messrs. Pierce of Oakland.

At Colma.

The Lincoln Gun Club, with its first and second classes, held their regular monthly shoot at Colma, which we are informed is a good place for the purpose.

Like the Perker Gun Club we believe the Lincolns shoot at clay pigeons, 15 birds, 15 yards rise, which we still think in many ways, especially economy, are the better birds to shoot at to attain quickness and accuracy.

The score in the shoot for second class was as follows: Edler..... 110111101111-13 Drinkhouse..... 06010111011111-10

In the gulches back of Fairfax, under Mount Tamalpais, Messrs. Fischer, Hoz and Meutz of this city, and Mr. Obitz of San Rafael, killed, on Sunday week, a large black bear, which weighed, when dressed, about 300 pounds.

The Lincoln Gun Club of this city have elected Geo. Edler, president; F. Drinkhouse, vice-president; F. Yonker, secretary; Wm. Schendel, treasurer, officers for the ensuing year.

THE RIFLE.

The Military Trophy Match.

The range at Shell Mound was very much crowded on Sunday, partly to witness the sixth match for the Military Trophy between teams of the Fifth Infantry, Colonel Ranlett commanding, partly to practice for the Spring meeting of the California Rifle shooting, and partly because the day was lovely in itself and admirably suited for rifle shooting.

The Oakland Boys, who are a fine lot of marksmen, claim they had to substitute two men who were not as good as those whose places they filled, but they doubtless put their best men forward, and their percentage 83 1-15 is so good it needs no apology.

Table with 2 columns: FIELD AND STAFF, COMPANY A, OAKLAND. Lists names and scores for various participants.

Table with 2 columns: COMPANY C, PETALUMA. Lists names and scores for various participants.

We regret not being able to obtain the particulars of Company B's score of San Jose, in time to publish in full. In the true spirit of citizen soldiers they turned out a team of ten men, and made, we believe, a record of 590.

Lieutenant Townsend, Company B, First Infantry, who takes a great interest in rifle shooting, and is very regular in his attendance at the target, had a friendly match on Sunday at the same place, with Captain Teller, of Company E, of same regiment.

Mr. Townsend afterwards made 45, 45, 42, 41—a total of 173.

Out of the army of sharpshooters present who got tired at looking on, seven of them made up a match for a dinner, those making the three lowest scores to pay the bill.

Table with 3 columns: Name, 200 yds., 500 yds., Total. Lists scores for various participants.

Company C of Second Artillery, as well as other companies, also were out, but the score made by them, owing to reasons not understood, as the Leviathan daily Stealer says, were withheld from the public.

Company C, First Infantry, also had their crack team out practicing, with the exception of one man. They did some fine work. Out of a possible 100, Perkins made .93 and Kelly .91.

At Schuetzen Park, Alameda.

There were some fine scores made by members of the Schuetzen Club at their range on Sunday, but then, this is always the case with this distinguished body of sharpshooters. One hundred dollars were divided into forty prizes, each man allowed thirty shots at 200 yards off-hand, the nearest center shot to count.

At the same time and place the Turner Sharpshooters, who also rank high in our rifle world, were out, and did work becoming their record. The following carried off prizes in the following rotation: First, D. Schoenfeld; second, C. K. Zimmer; third, J. Utschig; fourth, H. Kummer; fifth, O. Barmeister; sixth, H. Pracht; seventh, C. Sagehorn; eighth, H. Krall; ninth, D. Worth; tenth, J. H. Seyden; eleventh, Lorick; twelfth, L. Herz.

Qualified.

Under the rules established for marksmanship in Fifth Infantry the following is a recapitulation of all who have been reported at Headquarters as qualifying as Sharpshooters and Marksmen, during the three months ending March 31st, 1884.

Table with 3 columns: Name, 200 yds., 500 yds., Percent. Lists scores for various participants.

Twenty-one officers and men making 1,831 out of 2,100, or 87 1/2 per cent.

Marksmen (First 10 shots at 200 yards.)

Table with 3 columns: Name, 200 yds., Percent. Lists scores for various participants.

Lieutenant S. I. Kellogg, Inspector of Rifle Practice of Fifth Infantry, has completed his plan for the promotion of practice in the battalion. Colonel Ranlett, his commanding officer, has accepted it in detail without alteration, as the system hereafter to be followed in the corps.

Another Great Performance.

Lieutenant Fred Kuhnle, the celebrated California Rifleman, at the Petaluma Range, Thursday week, while practicing for the Military Trophy match last Sunday, made another score that is well worth recording.

We mentioned last week the number of men in California and Nevada who had made 457 and better out of a possible 500. Among others, we mentioned Howard Carr of Market street. Beside his acknowledged record of 457 he also claims one of 459, which some authorities reject.

Another Challenge.

An eastern gentleman has challenged Dr. Pardee to shoot a match for \$2,000, provided he was allowed some time to get the funds. This time has been granted, but we could not obtain an interview with Dr. Pardee to learn all particulars in time for this week's issue.

STABLE AND PADDOCK.

Owners of stallions cannot be too careful in selecting their brooms. If there is one place in horsemanship in which position, good judgment and common sense is required above another, that place is in the handling of a stallion during the breeding season.

The writer in the Humane Journal declares that it is not humane to refuse your horse sufficient and good water; to give him decaying or insufficient food; to let him go un-groomed; to scratch his skin with an iron or wire-tooth curry-comb; to shear his mane or tail; to use over-checks or blinders; to put frosted bits into his mouth; to work him when his shoulders are sore, or ride him when his back is galled by a cruel saddle; to drive him upon stone pavements, or icy roads with smooth shoes; to drive him in a storm, or let him stand in one without protection; to let him stand in the cold without blankets or other covering; not to furnish him good and sufficient bedding at all times; to drive him too fast; to jerk him by the bits; to whip him up hill, or to raise ridges upon him with a whip; to strike him if he shies; to strike him if he stumbles; to whip him or beat him if he balks; to work him more than twelve hours a day; to turn him out when old to die of neglect and starvation.

An exchange says there are several facts taught by the experiences of breeders who have made the raising of blooded colts a specialty, among them that a pacing mare always throws a trotting colt, whether bred to a thoroughbred or a trotting stallion, and that mares that are kept for a long time on the turf, though excellent as performers, do not fill the expectations as brood-mares.

The old Spanish proverb "A wise man changes his mind, but a fool never does," has a great deal of truth in it. It would be a dull season, or week, or day, that an observing man could not find some manner of treatment or management of his horses that he could improve upon.

Our English contemporary, the Stock-Keeper, states that the owner of a milk factory gives his horses buttermilk to drink instead of water. Each horse gets his allowance daily throughout the year, and the system, having been continued now for above a year, and found to answer in a most satisfactory manner, is not likely to be abandoned.

The most progressive farmers are not only engaged in "breeding up" their horses, cattle, sheep and swine, but their grains, vegetables, etc., as well. It is as wise to raise mongrel stock as mongrel crops. Nearly everything in the line of farm crops have been greatly improved by judicious selection and careful cultivation, and the farmer who would keep abreast of the times should be careful to see that he has secured the best of each variety, rather than be content with growing the variety raised by his father and grandfather.

Eight cents per pound is the price of choice cuts of "horse steak" in some of the markets of France and Germany. After being unfitted for service by old age the horses of these and many other countries of Europe find their way to the meat markets of the large cities. Large quantities are used in the manufacture of sausage. It is said that at Strasburg alone thirty head a week are slaughtered and sold for food.

A horse has been known to live to the age of 62 years, but the average life-time is between 25 and 30 years. From one of the New England states comes the report of a horse, now past 35, which is hale and hearty and able to draw as heavy a load as most of the young horses. It is a noticeable fact that when horses of remarkable ages are found they are generally from well-bred stock.

Mr. L. J. Rosa has sold the chestnut gelding, Harry Rose, three years, by Rutherford—Aileen Oge by Norfolk, to William M. Ayres for \$1,000. This colt was a good performer as a two-year-old, and did himself credit at the late meeting of the Blood Horse Association, where he ran under Mr. Ayres' management.

The fair of the Thirteenth District will be held at Marysville on August 26th to 30th inclusive. The society better condition than it was last year, and will be correspondingly liberal in the premium lists.

National Association of Trotting Horse Breeders.

In the proper department of this paper will be found the advertisement of the above named Association of the stakes, and fixed events of 1884, 1885, 1886 and 1887. We hope it is not necessary for us to reiterate what we have so frequently voiced in these columns, regarding the advantages to be reaped by breeders through the medium of the association, and we trust that the Pacific coast nominations in the various stakes will be in number proportionable to our claims as a breeding country. In the circular letter issued with the programme the executive committee says:

The Executive Committee, in announcing this, the eighth annual programme of the association, desire to call especial attention to the fact that the conditions imposed in the several stakes express the result of their earnest endeavor to so far realize and appreciate the comparative advantages of breeders and owners of trotting stock, as will command for these events their hearty approval and support.

The first cost of entering in these stakes for the younger classes is so small, and the ensuing payments so easy, that those having eligible colts cannot well afford to forgo so favorable an opportunity to engage them.

Every colt nominated in one of these stakes is at once brought prominently and favorably before the public, as is his sire and dam, and a colt well engaged hears substantial testimony to the good opinion in which he is held by his owner, is appreciated in value, and offers special inducements to intending purchasers.

The following stakes, which have already closed, constitute a portion of the programme of the coming Fall Meeting:

The Mali Stakes, for foals of 1881; \$250 each. Present value \$1,500 with 20 nominations, from whom an additional payment of \$50 each will be due May 1st next, and a final payment of \$50 each Aug. 20th, 1884, from those who declare to start.

The Produce Stakes, for foals of 1881; \$150 each. Only the produce of mares subscribed for at \$25 each, May 1st, 1881. Present value \$2,275, with 11 nominations, from whom a final payment of \$50 each will be due Aug. 20th, 1884, from those who declare to start.

The National Trotting Stallion Stakes, for foals of 1881; by stallions only represented by the subscription of the amount of their season's service fee for 1880. Present value \$1,270, with 19 nominations, from whom a payment of \$15 each will be due May 1st, 1884, and a final payment of \$60 each August 20th, 1884, from those who declare to start.

The Juvenile Stakes, for foals of 1881; by stallions whose get have never beaten 2:30 at three years old or under; \$100 each. Present value \$975, with 22 nominations, from whom an additional payment of \$25 each will be due May 1st, 1884, and a final payment of \$40 each August 20th, 1884, from those who declare to start.

The Everett House Stakes, for foals of 1881; by stallions whose get have never beaten 2:45 at three years old and under; \$100 each. Present value \$655, with 15 nominations, from whom an additional payment of \$25 each will be due May 1st, 1884, and a final payment of \$40 each August 20th, 1884, from those who declare to start.

The Annual Nursery Stakes, for foals of 1881; \$150 each. Present value \$925, with 13 nominations, from whom an additional payment of \$25 each will be due May 1st, 1884, and a final payment of \$75 each August 20th, 1884, from those who declare to start.

The Wilson Stallion Stakes. Present value \$9,100, with 49 nominations, from whom a final payment of \$50 each will be due August 20th, 1884, from those who declare to start.

It is a matter of real congratulation that never within the history of the society has it been in so prosperous a condition as now, having in its treasury over \$3,000 of earned money, with a membership never so large and steadily increasing. It is thoroughly equipped, and its influence upon the breeding of trotting horses has been of the best possible character, and every year is becoming broader and deeper.

It welcomes to membership all respectable breeders and admirers of trotting horses, whoever or wherever they may be, the only pecuniary responsibility being \$10 initiation fee and \$10 annual dues, and it points with pride to its past record and present position to justify the claim that it is entitled to receive at least this much of their substantial and moral support.

The Oakland Meeting.

The Spring Running Meeting at Oakland Park, under the management of M. M. Allen, begins to-day and continues on Tuesday, Thursday and Saturday of next week. The track is now in prime order, and as the horses were brought forward by the active work of the Blood-Horse Meeting, performances that approach the best may reasonably be expected. The programme, which will be found elsewhere in this paper, contains three events for each day, and Mr. Allen's ability as a manager is sufficient assurance that all the arrangements will be perfect. He deserves success, and we hope the outcome of this meeting will justify him in his undertaking.

We have received the third volume of the Percheron Stud-book, containing a record of the Percheron horses imported into the United States and Canada, and those of pure blood foaled in the United States, since the publication of the volume II, and not included in the previous volumes. The book also contains a translation of the introduction to volume I of the Percheron Stud-book of France, a record compiled under the authority of the French Government. The book under consideration is embellished with a portrait of M. Fardonet, President of the Societe Hippique Percheronne of France, compiled and published by J. H. Sanders of the Breeders' Gazette, Chicago. The Percheron Breeders Association of America, under whose auspices these Stud-books are issued, is the oldest organization of draft horse breeders in existence, and its stud-book, the first volume of which was published in January, 1877, was the first stud-book of draft horses of any breed ever published in the world. The value of pedigree and consequent history in the draft horse has been amply demonstrated by breeders, and with drafts, as with any other class of stock, the breeder who would avoid the danger of reversion to worthless ancestry must breed to established blood lines, with qualities fixed by many generations of selection and perpetuation. The day of accidental draft horses has gone by, and this Percheron Stud-book is the best assistant to success in existence.

The hay pacing mare Corette by Winthrop will, we are informed, go East with the Los Angeles contingent, and make the tour of the circuit this season. It is intimated that Mr. Hickok will probably be her driver, Mr. Yates having sold his half interest in the mare to his partner Mr. Parker. Corette is very fast, and with her record of 2:17 will be thrown in the best company, but Mr. Parker's estimate of her abilities is of that bubbling and enthusiastic character that ignores figures and past performances, and scorns the thought of anything less than first money.

Mr. Hickok has so far recovered as to be able to jog his horses again, and will leave by the Central overland train to-morrow (Sunday) afternoon with his stable. Mr. Haggin's runners will go in the same car, and the prospect is good for fine weather and a pleasant trip.

Budd Duhe is now in the carriage business in Chicago.

Blood-Horse Meeting.

Setrudey was the last day of the meeting, and was favored with beautiful weather, and consequently with a notable increase in the attendance. This was the steke day, but unfortunately their attraction was sensibly diminished by the absence of the Baldwin end Palo Alto stable, and Mr. Winters' egen carried off the two end three-year-old events, although his horses did not appear to be in first-class racing trim. The first event was the Geno Stake for two-year-olds, in which the backers of the favorites laid \$50 on Mr. Winters' pair, Alte end Estill, against \$12 for Mr. Heggins' Hidalgo. The start was a fair one, and the running was made by Estill and Hidalgo, but on nearing the straight run in the former was outfooted end Alta hed to move up at a lively pece to claim the victory, which he did by half a length, from Hidalgo.

SUMMARY.

BAY DISTRICT TRACK, April 19th, 1884--The Geno Stake for two-year olds; \$50; \$25 forfeit with \$250 added; a dash of three-quarters of a mile; the stake to be named after the colt that beats Geno's time; closed with 23 nominations. Theodore Winters' b c Alta, by Norfolk-Ballinette, 110 pounds..... 1 J. B. Haggin's h k c Hidalgo, entered by J. B. Chase, by Joe Daniels -Electra, 110 pounds..... 2 Theodore Winters' c c Estill, by Norfolk-Lady Jane, 110 pounds... 3 Time-1:16.

The second race was The Spirit of the Times' Stake, which was also reduced to a match between the Winters' end Haggin stables, the former being represented by the Prince of Norfolk end Callie Smart, end Hirondele sporting the pretty green end orange colors. The betting was \$100 to \$45 on Mr. Winters' pair, end Callie Smart was sent out to make the running, but she quit at the end of six furlongs, and then the Prince moved up, but could only get the best of Hirondele within a few yards of the wire, winning finally by two lengths.

SUMMARY.

The Spirit of the Times' Stake; for three-year-olds, \$100 each, \$25 forfeit, with \$300 added, a mile and three-quarters; closed with thirty-one nominations. Theodore Winters' c c, Prince of Norfolk, by Norfolk-Marion, 118 pounds..... 1 J. B. Haggin's c h f Hirondele, by Glenelg-Susie Linwood, 113 pounds..... 2 Theodore Winters' c h f Callie Smart, by Norfolk-Mattie A., 113 pounds..... 3 Time-3:11.

The third race was a free handicap, a mile and repeat, in which Bryant W. was made such a hot favorite that even as much as \$120 to \$20 was laid on his chances against those of Quebec, and it really appeared as if it were picking up money, as the black horse won easily in straight heats in 1:45 1/2 and 1:49 1/2.

SUMMARY.

Free Handicap; purse \$200, a mile and repeat, for all ages. T. H. Williams, Jr.'s, blk h Bryant W., by Monday-Bebe, four years, 110 pounds..... 1 1 Mr. Stovell's c h g Quebec, by Norfolk-Jenny Hull, aged, 92 pounds..... 2 2 Time-1:45 1/2-1:49 1/2.

The programme was brought to a conclusion with the Concoction purse, 5 mile dash, in which that promising mare Neilson sold at \$110 against \$35 for Jubilee end Billy the Kid, and won in a very handy manner; Jubilee, as usual, showing good speed for a short run, but seemingly lacking in staying powers. As usual, the programme was carried out in a punctual manner, and everything passed off smoothly, save in the case of the contested race on the fowl, and the only regret was that the weather was not more favorable for the interests of the association.

SUMMARY.

Consolation Purse, \$200; for beaten horses during the meeting; a dash of one mile. Horses beaten once allowed five pounds, and twice ten pounds. H. C. Judson's b m Neilson, by Wildie-Susie Williamson, 3 years, 87 pounds..... 1 G. L. Richardson's b g Billy the Kid, aged, by Leinster-Lily Simpson 102 pounds..... 2 T. Hazlett's c h g Jubilee, aged, by Norfolk-by Lodi, 114 pounds 3 Time-1:44.

Clearing Up at Los Angeles.

EDITOR BREEDER AND SPORTSMAN:--After our long siege of wind, rain and washouts, we are again in communication with the outer world, our sky is clear, our weather balmy, our air filled with the fragrance of a thousand flowers end the songs of our feathered warblers, our roads dry, and our hills and plains spotted with every tint of the rainbow according to the predominance of this or that variety of wild flowers. In short, we are supremely happy, as a community on the high road of prosperity should be.

Our race track being again in good order--and, by the way, we have got one of the best ones in the State--a goodly number of fine flyers ere exercised every morning, many of whom are developing into excellent steppers, and should their owner's expectations be realized they will give you a rush in the coming fall, and try to establish our claims as a breeding country. The game season being over our sportsmen ere beginning to look to the trap es their only source of amusement for the coming summer, and the domestic pigeon end his clay substitute will soon become the victim of the sportsman's leaden pellets.

Our theatre goers here been especially favored during the last two months, having had an abundance of entertainments of every description. The Louise Rial troupe, while weather bound after playing a couple of weeks, gave benefits to the flood sufferers and the Eagle Corps (our local militia), and, in turn, our citizens tendering a complimentary benefit to the talented young actress. Then came the Kettie Putnam Combination for a season of one week, followed by Hart the pedestrian, and the Sullivan Combination, and a reported match between Sullivan and a Tucson blacksmith, which called out a packed house to find that the T. h. appeared on the haudhill only. Considerable indignation was manifested by the crowd, but Sullivan's reputation and the muscle he exhibited hed such a soothing effect that they all retired satisfied, only to be again bilked by Muldoon's exhibition of Greco-Roman wrestling with a straw man, so to speak, that he wallopped about the stage with perfect ease. Children with twice hurt fingers are doubly afraid of the fire. So the next hippodroming affair of the Sullivan-Muldoon order can expect a slim house here.

Los Angeles, April 16th, 1884.

For years Gen. Jackson, at Belle Meade, has been laboring to solve the question as to how to properly administer sufficient exercise to his colts and fillies, but at last he has so subdivided his lots, and by cut-offs in the lanes approaching them secured a run of over a half mile, which the youngsters gallop over twice each day, besides their romps in the paddocks. By his judicious system the colts and fillies have an opportunity of learning how to extend themselves, and the flesh that accumulates upon these youthful animals is as firm, and their muscles are as well developed as though obtained through regular work on the track.

## OUR NEW YORK LETTER.

California Stallions Entered at Monmouth Park—Accidents Among the Racing Cracks—Trotting Stakes to Close in the East May 1st—Racing in the South—The Great Yearling Sales—General News, etc.

Last week the entries were made public for the Champion Stallion Stakes of 1885, to be run in August, 1885, at Monmouth Park, New Jersey. Seventeen sires are represented by a subscription of \$500 each, and your coast has the nominations, Mr. E. J. Baldwin entering for Santa Anita farm his chestnut horse Rutherford by Australian, while El Arroyo and Mr. Theodore Winters have put in their Joe Hooker by Monday, out of Mayflower, etc. The others in the list are Belle Meade's Bramble, Great Tom and Enquirer; Rancocas' Mortimer, Duke of Magenta, and Saxon; Elmendorf's Glenelg and Virgil; Erdenheim's Alarm and Reform; the Nursery's (Belmonts) Ill-used and Kingfisher; Brookdale's Stonehenge; Runnymede's Billet and Iship's Sensation. Only foals of the above seventeen sires will be eligible to the Lorillard Stakes for 1885, which close next August. If 1884 should develop a promising yearling or two-year-old by Ten Broeck, Longfellow, King Alfonso, Glen Athol, Pat Malloy, Lisbon, Aristidee, King Ban, Himyar, Lelaps, Aramis, Kyrle Daly, or Wildidle, the most prominent of the absentees, he or she will be debared from competing in the rich stallion stakes as a two-year-old, or the Lorillard Stakes as a three-year-old, by the parsimony or carelessness of the owners of these absent sires. The fund of the Stallion Stakes now comprises \$13,500, and with twelve starters the race will be worth the snug nest egg of \$16,500; of this sum the owner of the winning colt or filly will get \$8,250. The owner of the stallion siring the winner \$5,250. The owner of the second horse, and the owner of the same sire each \$1,000, and the owner of the third horse, together with the owner of the same sire, each \$500. The Lorillard Stakes, with \$5,000 added, will not be much less in value than the Stallion Stakes, and some breeders and racing owners are likely to regret the failure of certain stallions to enter the Monmouth Stakes for the class of 1885. Since the foregoing was penned I learned from Secretary Coster that there will likely be a prominent addition to this great event for next year. Maj. B. G. Thomas' imp. King Ban by King Tom, whose entry was formally mailed in time to the Monmouth Park Association prior to April 1st, but was never received. It must have been lost in the mails, and a correspondence was at once begun between Maj. Thomas and Capt. Coster with the result that the last-named gentleman has written personally to each of the ten subscribing owners to the stake, asking their consent to the admission of King Ban, which acquiescence will undoubtedly be cheerfully given. This will make then 18 entries to the great stake, with a fund so far of \$14,000.

Accident, death and disability have removed of late so many of the racing cracks of all ages, that many owners, trainers and backers are shaking in their shoes wondering where or on whom the blow will fall next. Beginning some weeks ago by the deaths in Kentucky of the promising colts Aecalon, Cridge and Ten Full, the list of "fallen ones by the wayside" was further extended by Barney Aaron's misfortune at New Orleans, Chatter's ditto at Fleetwood farm, quickly followed by Free Gold's lameness at Monmouth Park, and the letting down of the great Leonatus at Louisville. Back to Jerome Park the scene shifted to the Kittson stable, where Sir Hercules and Sibley, the two \$10,000 colts, fell victims to exposure and pneumonia, and again to Louisville, where the Derby colt Farandole runs away on Saturday last, kills his negro jockey, and badly injures himself. Jerome has the next visitation in the Dwyer's splendid two-year-old filly Mies Palmer by Billet injuring her head so badly in her box that lock-jaw was feared, but fortunately averted. A few days after Eolist and his great brother Eole, in Snedeker's string, pulled up so lame that a break-down was feared in the latter's case. Both had to be let up at once, and though they are working again it is said their earlier engagements are likely to be forfeited. Of these, Eolist had just been hacked, some two weeks ago, to win over \$20,000 in the Suburban Handicap, which makes his accident a particularly hard one to his party. "Freddie" Gebhardt is in hard luck, first Lilly, and now his horses going back on him. Since Monday last the regular spring meeting at New Orleans has been in the act, and to-day the meeting closed with great *relat*. During the six-days' racing some exciting events were contested, and the racing season of 1884 finally inaugurated. That it will be the greatest one ever known in America is reasonably certain, providing racing officials keep the proceedings free from all scandals of any sort whatsoever. A fine two-year-old was developed at New Orleans on Wednesday, Ramlal by Glen Athol winning his maiden race, half a mile in 51½ seconds. Bred at the famous Woodburn farm in Kentucky, this colt was sold last spring at the regular sale of yearlings for the low price of \$210. This shows what has been time and again demonstrated what a lottery the sales of yearlings are, and that the last very often is first. Col. Bruce of this city will undertake any commissions at the regular sales of yearlings, beginning in Tennessee at Reed's sale near Gallatin. General Harding's grand lot by Enquirer, Great Tom and Bramble to be sold April 30th, at Nashville, and two weeks later the Kentucky sales at Woodburn and elsewhere. Consult the advertising columns of the BREEDER AND SPORTSMAN, or inquire at the office on Montgomery street for all information on these points. Mr. A. J. Alexander, at Woodburn, and will offer in the get of Glen Athol, Pat Malloy, Lisbon, Falsetto, etc., some unusually great bargains this year, and likewise those to be sold by Gen. Harding at Belle Meade, noted above. Send on your commission racing owners and breeders of the Pacific coast. Jim Renwick arrived at Jerome Park a few days since. He looks in fair shape, considering his long trip, and for a three-quarter-bred one (as is alleged) shows quality all over. His first start is likely to be in the Fordham Handicap, May 30th, as Welch says he will not send him to Chicago until the middle of June, if then. On May 1st, some very rich trotting events close with the National Association of Trotting Horse Breeders in this city, P. O. Box 516, N. Y., and with the Chicago Driving Park, 116 Monroe street, Chicago. To trotting interests on your coast these associations make some very liberal offers, which are set forth at length in the advertising columns of the BREEDER AND SPORTSMAN. Consult the conditions, then Messrs. Hickok, Haggin, Rose, Goldsmith, Rathbone, Walsh, Pritchard, Simpson and others, and mail your entries on or before Thursday, May let.

NEW YORK, April 19th.

PACIFIC.

Katie Creel, with a stable hoy in the saddle, recently ran away at New Orleans and ran five miles. When stopped she was found to be very sore and lame in the left hind leg.

## BILLIARDS.

The billiard tournament which is being held at the Saylor Brothers' parlors, has attracted great crowds every evening during this week. The games are 300 points up, croch harred. The opening game took place last Monday evening, and was between W. R. F. Lowry, and J. F. B. McCleery. The latter won the bank, scoring 3, followed by Lowry, with a well-executed around-the-table-run of 47. On the sixth inning McCleery ran 97 points, followed two innings later by one of 92 points, the score standing then 209 for McCleery, 99 for Lowry. The playing during the game was very good, and was warmly applauded. McCleery completed his 300th point on the 25th inning. Lowry having but 204 points to his credit. Winner's best runs, 96, 98. Average, 12. The second game of the tournament was played on Tuesday evening, the contestants were Benjamin Saylor and Adam Klesser. The playing was not remarkably good. Saylor was so confident of defeating his opponent that he seemed to use but little exertion in the play. Klesser won the lead off, but lost the game. Saylor completed his 300th point on the 34th inning, Klesser having then but 113 points. Saylor's best runs were 51, 61. Average, 8, 14-17. The third game took place Wednesday evening, between McCleery and Adam Klesser. The former opened the game with a run of 36, and another of 13, Klesser in the meantime scoring but 4 points in 7 innings. On the 14th inning McCleery had 127 points against 32 for Klesser. At this stage, however, Adam played cautiously, and astonished the audience with his fine display of rail nursing. His runs were not large, but were oft repeated, so that on the 24th inning the score stood McCleery, 206, against Klesser's 173. At this rate a few more innings and the champion of Wisconsin would leave the Professor in the rear. Those innings, however, were never to take place, Mac railed the balls, and with steady execution ran the game out with 94 points. Winner's best runs, 58, 94. Average 11½. The fourth game was the best game ever witnessed here; it took place on the next evening between Benjamin Saylor and W. R. F. Lowry. Saylor won the lead off and missed, Lowry scored 17 on his inning. On the 4th inning Saylor railed the balls, and with delicate nursing ran them the length of the long rail, turned to the short one, and completed a run of 136 points; two innings later, the game standing Lowry 46, Saylor 176, the latter ran the balls down the right rail once more and won the game. Following is the score: Lowry, 17, 2, 10, 17, 0. Average 9.1-5 Saylor, 0, 1, 34, 136, 5, 124. Average 50. It took exactly 23 minutes to play the game. William Roach acted as referee for all the games. The game which took place last evening finished after this paper went to press. The game this evening will be between McCleery and Saylor.

The billiard exhibition which took place last Saturday evening at the Metropolitan Temple for the benefit of the Veterans Home was not, as far as the attendance went, the success that was anticipated. However, in a financial sense everything was satisfactory, as the sale of tickets amounted to nearly \$1,000. The first game was played by Lon Morris and J. F. B. McCleery; the latter playing 500 points to his opponent's 800. McCleery won the lead-off, and remained ahead until the 36th inning, when Morris ran 64 points followed on the next inning by 136 carroms. The score stood then—McCleery 350, Morris 462. The latter was in very poor play as he had not touched a cue in over two months. On the 39th inning Mac scored 63 points; Lon followed with a specimen of what he is capable of doing on the rail, by completing a run of 213 points, the greater part of which were made *a la balk* line. The game then stood McCleery 418, Morris 682. After this Lon made desperate attempts to reach the rail again, but did not succeed. Mac made 57 more points on the 43d inning, and won the game on the 50th, Lon having but 745 points to his credit. McCleery's best runs were 57, 63, average 10. Morris's best runs were 136, 213, average 15 10-49. W. R. F. Lowry acted as referee. The second game, on account of the lateness of the hour, was in 150 points, between McCleery and Ben Saylor, and resulted in a victory for the latter. As it was only an exhibition, no official score was kept. The fancy shot exhibition was a treat indeed, for those who stayed to witness it. Lon did not seem to be out of practice in this style of handling the cue, while McCleery did very creditably.

## BICYCLING.

## Horses vs. Bicycles.

This contest resulted last Saturday night in a bare victory for the Bicycle riders. The excitement of the large concourse of people present near the finish was intense, and the enthusiasm displayed demonstrated the appreciation of the entertainment. Regarding this kind of contest it is now very plain to a great many, that with such a rider as Anderson, and with proper length of time to select stock, that the horseman can very easily defeat any two living bicyclists. Anderson's plugs were clean done up near the finish, and in the early part of the evening what promised a victory for the horseman was averted by the splendid riding of Prince and Armaindo. The plucky little Canadian lady surpassed all her previous achievements and was lustily cheered every round by the spectators. In the seventy-two hours' run, the Bicyclists rode 1,073 miles, Prince 549½ and Armaindo 523½, while Anderson with the fifteen horses made 1,071½ miles.

## Oakland Bicycle Club Annual Run.

On the 10th of May the O. B. C. will hold their annual run. They will start some time on Saturday afternoon, from Oakland and ride down to San Jose where they will camp for the night. The next morning will be spent in cycling around the Garden City, and the party will come up on the afternoon train. All California Bicycle clubs have been invited to join in the run, which will be replete with the conviviality common to these occasions. The cameras of the many photographers in the O. B. C. ranks will doubtless be along. We will anxiously await some specimens of their "snap-shot," as well as an early report of any comets and etc. that may be discovered by the telescoplet of the party.

The fourth annual meet of the L. A. W. will be held on the 19th and 20th of May, at Washington. 20,000 wheelmen are expected to be in line for the grand parade on the 20th.

Mr. Salisbury lost a valuable brood-mare by death last week. She was a daughter of Volunteer, and commonly known as the Crazy Mare. She died suddenly from causes unknown, although Mr. Goldsmith's opinion is that the damp weather soured the clover and brought on indigestion.

## AQUATIC.

## Pacific Yacht Club.

This club will inaugurate the season on next Saturday, May 3d, with the usual ceremonies at the Club house. The order of events on the water will be as follows:

Saturday—Yachts will leave Front Street Wharf for Saucelito about 1 p. m.

Sunday—Sail in squadron from the Club house to a stake boat off Hunter's point; returning will try rate of sailing back to Club house, passing the middle ground buoy on the starboard head.

The following circular has been issued by the Club, which interests intending visitors:

At a meeting of the yacht owners and Directors of the Pacific Yacht Club, it was decided to open the season of '84 on Saturday, May 3d, when the usual ceremonies will be held at the Club house.

You are requested to apply to W. H. Martiustein, s. w. corner Battery and Pacific Streets, for tickets for yourself and friends.

There will be a charge of \$1.00 for each ticket issued.

Your attention is called to the fact that no tickets will be issued at the gate on "Opening Day," and admittance refused all parties who present themselves at the gate without a ticket. It has been found necessary to adopt this rule to protect the Club from imposition, and it will be strictly adhered to.

Members are requested to give the names and addressee of their guests upon application for tickets.

Invitations are now ready, and may be obtained from date until 3 p. m. Saturday, May 3d.

## Hanlon in Australia.

EDITOR BREEDER AND SPORTSMAN:—Since the last steamer left, the sporting fraternity have been on the "qui vie" for Hanlon's arrival, and preparations were made for a grand reception to the champion sculler. The steamer arrived about 8 p. m. on Saturday evening, and Hanlon landed and went to a quiet hotel, where he stayed till Monday morning by which time the steamer was at the wharf. By 10 o'clock a great crowd had collected, and a formal reception given to him, he having gone on board at 9 a. m. Since then he has been the lion of the city. He has made no matches yet, though challenged by Beach. He has been examining the waters for the best course, and has decided to row his matches only on the Nepean river, which is about thirty miles from Sydney, and which he pronounces the finest he has ever seen. On Saturday next he gives an exhibition at Manly, which promises to be a success financially. There are four or five of the local men anxious to contest with the champion who will probably accommodate them.

The Australian Cricketers sailed from Adelaide last week for England. They return by way of San Francisco, and will likely arrange a match for there. You may expect them about September. The team is not considered a very strong one, much better players being unable or unwilling to make the trip. I will keep you posted on Hanlon's doings by every steamer. He expects to be here some time, intending to visit all the colonies.

I. M. F.

SYDNEY, March 27th.

## POULTRY.

Among the other indispensable duties is that of looking to the cleaning of pens and roosts before the windows, doors and woodwork are fitted up and made snug for the fowls before cold weather sets in. Whitewash the walls, nest boxes, roosts and feed trough thoroughly. Don't spare brush nor whitewash; thrust it into the cracks and crevices, and give no quarter to the enemy, though they show the white feather or beg for truce. The whitewash should be put on hot, and if an ounce of carbolic acid be added to the painful it will make it more effective. It is not a hard task to whitewash, where there is a will. All one has to do is to draw on a pair of overalls, roll up his sleeves and go to work. He need not be particular how it may splash, if it only penetrates and purities every place where a vagrant parasite or louse might take refuge. There is really no limit to the whitewashing process. —*Poultry Monthly*.

Dr. Jacob Brandmier, who has had years of experience in raising chickens, says that the "cholera" has always appeared among them in the fall of the year when they are very fat, and has never occurred in the spring, for the reason that the chickens are poor at the time. He says when they become very fat in the fall a yellow, oily liquid oozes from their mouth, which indicates the appearance of "chicken cholera," and the only remedy is to keep plenty of oak bark in the water they drink, and also mix their food with water off of the bark.

The Massachusetts *Ploughman* recommends wire netting four and one-half feet wide as the best material for poultry-yard fences. It does not shut out the light and air, and hence is well adapted to small enclosures. In making a yard of this material the posts should be quite small at the top, and not come above the netting, and there should be no railing, but let the netting make the fence, then the hens not being able to see the top will not attempt to fly over.

A poultryman asserts that a hen should never be set in a box above the ground or floor of the chicken house, if possible to do otherwise, as the eggs dry too fast and lose their vitality. Much better success may be expected if the nests are made on the ground.

The *Rural New-Yorker* finds that 34 eggs of the new Wyandotte fowls weigh four pounds, or 8½ eggs to the pound, rather a small average size. The eggs vary in color much the same as do those of Light Brahmas.

Many poultrymen favor making a total change of fowls every three years, and keeping but few or none over two years, on the ground they will be stronger and healthier and give better results in every way.

Mr. Goldsmith in behalf of Mr. Salisbury has added the filly Sister by Admiral to his stable, having made an exchange with Mr. Valensin. Sister will be worked for speed this season, and if she trains on will be campaigned; otherwise she will be bred.

Jay Beach's mare Maggie Arnold, by Almont Lightning, foaled a fine bay colt by Altamont. This colt is double-bred in Hambletonian and Mambrino Chief blood, and is the best-bred youngster Mr. Beach has yet brought out.

### HERD AND SWINE.

#### Feeding Stock.

The time in the world's history when feeding stock was an occupation in which the indolent and ignorant man could successfully engage has passed away, and an age in which the man of science and energy can find enough to call into activity all the powers of his intellect to a greater profit, and grander and than any other calling in life, has come. Watch the operations of two stockman who have spent the summer in raising and saving feed for their stock through the coming winter, and mark the results of their labor, which are frequently as follows: The one will use all the feed he has prepared during the summer, and if his stock was weighed in the spring it would weigh less than it did in the fall, and if offered for sale would bring less per pound than when he commanded feeding. Thus, he loses all his feed and labor, besides the loss sustained in the value of his stock. The other will sell enough of increase alone to pay for all the feed he laid up in the fall, and enough over and above to pay the cost price of the original stock. And there is perhaps, no material difference in the grade of the stock fed by the two men. The question now arises, where does the secret of success or failure lie?

After over twenty years of experience, experimenting and careful observation, I have come to the conclusion that any kind of stock will pay if it is properly handled in the proper place. Locality should be carefully considered. If you are located on a river bottom or level prairie, where improved farm implements can be successfully used, and the soil will produce an abundant yield, cattle and hogs will prove most profitable, from the fact that cattle, and especially hogs, require more grain to prepare them for market. Those located on high lands that are better adapted to sheep and less fertile will find sheep the most profitable. But while these are facts perhaps well understood by every observer, there are in every locality those who make a greater profit from stock of any kind than others, with the same or even less labor.

There is no class of stockmen among whom the degrees of success and failure reach farther than they do among sheepmen. Let us try and explain the difficulty of analogy. Imagine a man in the woolen-mill business. He purchases his outfit of machinery, arranges all the appliances necessary, purchases a limited quantity of wool, and then turns on the steam. Now, to make the analogy fair, we must agree that the steam once applied, and the machinery once in motion it cannot be stopped and started again. So the supply of oil, coal, etc., must be kept up, whether there are goods turned out for sale or not. Now, what will be the result if the operator has only secured wool enough to run the mill at its full capacity one day in the week. It is evident that he would be losing heavily the remaining five. To divide the amount of work done among the six days will produce the same general result, for remember he cannot stop his machinery, and he must keep up his supply of oil to prevent loss or damage from friction, and he must also have a certain number of employes to prevent the machinery from getting out of order, loss from breakage, etc. So that loss is inevitable unless it is run something near up to its full capacity. Just so it is with the stockman—every animal he keeps is a machine in constant motion, subject to laws that produce results analogous to the wear and tear of machinery. So that the profit in feeding stock will decrease and increase in proportion as the work done by your animal machinery falls short of or approaches the full capacity or force provided by nature to run it.

#### Starting Tame Grasses.

A Kansas Farmer writer says red clover, alfalfa, orchard grass, blue-grass and meadow oat grass are best sown in the spring. Timothy does best if sown in the fall or spring, and some persons sow blue-grass in August or September. Clover and timothy, timothy and red top, red top and blue-grass and white clover (for lawns) may be sown together. Timothy does well sown on rye ground immediately after the grain. All the other seed above named should be sown as early in the spring as the ground is fit to receive it. Have the ground in the best condition, clean and fine. If seed is sown broadcast, narrow lightly, and if possible scatter straw or hay, or straw manure all over the sown ground. This serves to protect against wind, which often uncovers seeds and blows them away. If the ground is dry rolling will be good after the harrow. If a drill is used no harrowing need be done, but the roller is useful. Quantities to sow per acre: Red clover, ten to twelve pounds per acre; alfalfa, twenty-five pounds; timothy, fifteen pounds; orchard grass, twenty pounds; Kentucky blue-grass, three bushels for lawn, one-half that much for pasture; red top, twenty pounds; Johnson grass, one bushel; meadow oat grass, twenty-five pounds. Our advice to all beginners is to prepare a piece of ground and divide it into plots, on each one of which sow different kinds of seed, and thus by experiment learn what will suit your particular soil and climate best. As soon as the weeds get high enough to cut, mow them down, but not very close to the ground, and let them lie; do this as often as necessary during the first year. Don't attempt to make hay during the first year. Mow the weeds, and if any of the grass is high enough to be cut, very well; but mow for protection to the root, not for hay.

#### Depraved Appetite in Cows.

Cattle sometimes evince a craving for materials not usually consumed by ruminants, such as wood, old leather, dry mortar, sand, stones, clothing, houses, etc. The animals do not always swallow these things, but merely show a desire for chewing them. This is generally due to a deficiency in their food of certain elements that are necessary for the animal economy. That such is the case is evidenced thereby that such depravity generally appears among a number of cattle simultaneously in the same neighborhood, or on the same premises. A deficiency in certain earthy salts necessary for the maintenance of the bony structures of the body, sooner or later results in softening of those structures. The rapidity with which this ailment develops in animals depends upon the extent of the deficiency of the necessary nutrients in the herbage or food. As the disease is dependent upon the nature of the herbage, etc., it will be proper, with a view of aiding treatment, to change the food, and give one or two rations a day of a mixture of flaxseed meal (not oil cake) and ground oats and corn, wetted with a pint to a quart of lime water, which latter is prepared by slacking freshly burned lime in a proportionally large quantity of water, stirring it briskly, and, when the undissolved portions have settled, pouring off the clear liquid for use. As the lime water readily absorbs carbonic acid-gas from the atmosphere, only so much of the liquid should be prepared as is used each day. The animals should at all times have access to common salt, which should not be mixed among their food, but placed in separate receptacles within their reach. The use of depletive remedies, sedatives, physicking, bleeding, etc., is not to be recommended.

### Selecting Breeders from the Spring Litter of Pigs.

The most promising selections for show purposes will not, as a matter of course, be the best pig to set apart to be used as a breeder. Natural tendency to fatness and fatness in the fully developed state, are necessary in the show-pig; but pretty much all high-bred swine, as bred in these days, have as strong a tendency to obesity as it is safe to encourage in breeding animals, if we expect to count eight or ten pigs in a litter, pretty much all having a good leas of life from the start. The best show pig may come from the smallest sow in the herd, yet as a rule it is not wise to select breeders from that class. We want the most size in the shortest time, and, as stated, there are hardly any pigs in these days that do not inherit ample fattening proclivities, so that we can quite safely forego a little of the fat that we may secure in the prospective breeder roominess and tendency to growth. All litters, no matter how well bred, show variations at weaning time, and appearances indicate that we can know the best pig for future almost from the start. These appearances, however, are often deceptive, as we find a few months later, the best pig at weaning time may not do as well as expected during the next following three or four months; hence it is best to notice the development, eventually choosing those having size and with greater width, depth and length, combined with the finest points. The practice which many have of discarding the old sow and filling up from the young litters is very unwise, providing the dams are of equal merit and breeding with the pigs. If, however, a young sow be kept till she is a year old, well-fed in the meantime, before being bred, she will bring as strong and growthy pigs as the older sow. The notion that a sow should be bred early that she may become a good suckler, is erroneous. Maturity in growth of the whole body is quite necessary to the development of the milk glands, and so we have proved to our satisfaction by sufficient tests. The well-nourished sow, dropping her first litter at one year to sixteen months, will be as stated, bring as good pigs as the older sows, and is quite as likely to have an ample supply of milk.

#### Value of Good Bulls.

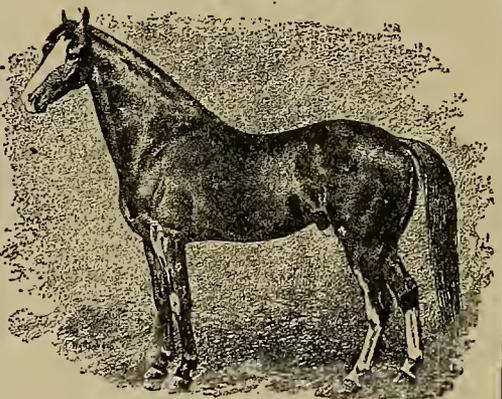

A correspondent of a Chicago stock paper writes this: "Last year I spent a couple of weeks in Iowa, and I could not help noticing the difference of the grade of stock, even in the same locality. Some farmers would have a fine herd of high grades, others the worst of scrubs; and the breeder of scrubs would talk of the high grades of his stock and give me a long pedigree of his bull, and ask many questions in regard to the Texans, and about the long-horned, wild, range cattle, when, in fact, the Texas grade of to-day is better than the average of his own herd. I call to mind several cases where good, thrifty farmers were using a sire that was inferior to many a western grade. The fact of the case is, western men do not hesitate to pay from \$100 to \$500 for a sire that is what they want, and thus, so far as I have seen, the range cattle are improving faster and becoming more uniform in size and style than the average stock kept on farms."

The foreman of an extensive creamery makes the following excellent suggestions for butter makers: Cream can't swell in churning if it is shut away from outside air. There are two great mistakes made by dairymen; one that cream must be sour, and the other that it must be churned hot. Air the cream by frequent stirring, so that the oxygen of the air will ripen it; churn in revolving churns at about 54 deg. or 55 deg., and wash out the buttermilk with brine and set the color at the same time. These are the three great things for dairy people to know.

Throat diseases commence with a cough, cold, or sore throat. "Brown's Bronchial Troches" give immediate relief. Sold only in boxes. Price 25 cts.

### STALLIONS THOROUGHBRED.

#### The Thoroughbred Stallion

## JOE HOOKER, BY MONDAY.

First dam Mayflower, by Imp. Eclipse.  
 Second dam Hennie Farrow, by Imp. Shamrock.  
 Third dam Ida, by Imp. Belshazzar.  
 Fourth dam Gannet's dam, by Sir Richard.  
 Fifth dam, by Imp. Eagle.  
 Sixth dam Bet Bosley, by Wilke's Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by Imp. Stirling.  
 Ninth dam, by Clodius.  
 Tenth dam, by Imp. Silver Eye.  
 Eleventh dam, by Imp. Jolly Roger.  
 Twelfth dam, by Partner.  
 Thirteenth dam, by Imp. Monkey.  
 Fourteenth dam, Imp. mare from the stud of Brandon.

TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares at a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.  
 My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freeport road.  
 This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Rowlock. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1883.  
 THOS. WINTERS, Sacramento, Cal.

### The Thoroughbred Stallion

## WILDIDLE.

By Imp. AUSTRALIAN. Dam Idlewild, by Lexington.  
 This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.  
 Wildidle is the sire of Gov. Stanford's Frolic filly record of one mile, 1:42, at two years old, May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.  
 Terms of season, \$75, payable at time of service, and in all cases before removal.  
 Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address  
 H. C. JUDSON, Owner, or  
 W. L. APPELBY, Supt.,  
 P. O. Box 223, Santa Clara, Cal.

### STALLIONS

—AT—

## RANCHO DEL PASO.

For the Season of 1884.

### Thoroughbreds.

## LONGFIELD.

Chestnut horse, by MONARCHIST, he by Lexington.  
 First dam, Dame Gourlay (Blue Gown), by Planet.  
 Second dam, Flora G., by Lexington.  
 Third dam, Fanny G., by Imp. Margrave.  
 Fourth dam, Lances, by Lance.  
 Fifth dam, Aurora, by Aratus.  
 Sixth dam, Paragon, by Imp. Buzzard.  
 Seventh dam, Indiana, by Columbus (son of Imp. Pantaloon).  
 Eighth dam, Jane Hunt, by Hampton's Paragon.  
 Ninth dam, Moll, by Imp. Figure.  
 Tenth dam, Slamerkin, by Imp. Wildair.  
 Eleventh dam, Imp. Crab Mare, by Cal.  
 Twelfth dam, Armanthus' dam, by Second.  
 Thirteenth dam, by Stirling.  
 Fourteenth dam, by Crett's Partner.  
 Fifteenth dam, by Greyhound.  
 At \$50 the season, due at the time of service.

## JIM BROWNE.

Chestnut horse, by FOSTER, he by Lexington.  
 First dam, Flush, by Hiawatha.  
 Second dam, Fanny Bug, by Imp. Ambassador.  
 Third dam, Ida, by Imp. Belshazzar.  
 Fourth dam, Madame Bosley, by Sir Richard Tonson.  
 Fifth dam, Nancy Nichol, by Imp. Eagle.  
 Sixth dam, Bet Bosley, by Wilke's Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by Imp. Sterling.  
 Ninth dam, by Clodius.  
 Tenth dam, by Imp. Silver Eye.  
 Eleventh dam, by Jolly Roger.  
 Twelfth dam, by Imp. Partner.  
 Thirteenth dam, Imp. Monkey.  
 Fourteenth dam, an Imp. mare from the stud of Harrison of Brandon.  
 At \$50 the season, due at time of service.

### Trotting Stallions.

## ECHO.

Bay horse, by RYSDYK'S HAMBLETONIAN.  
 First dam, Fanny Felter, by Magnolia, son of Seely's American Star.  
 Second dam, by Williamson's Belmont.  
 Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of Imp. Messenger.  
 At \$100 the season, due at time of service.

## ALGONA.

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian.  
 First dam, Emma Kinhead, by Consort, son of Cassius M. Clay.  
 Second dam, Emie Dean, by Mambrino Chief.  
 Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy.  
 At \$100 the season, due at time of service.

## ALASKA.

Brown horse, by ELECTIONEER.  
 First dam, by Washington, he by Geo. M. Patchen.  
 Second dam, by Williamson's Belmont.  
 At \$50 the season, due at time of service.  
 The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents.  
 JOHN MACKAY, Superintendent,  
 Sacramento, Cal.

### THOROUGHBRED STALLION

## X X,

Pedigree.

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.  
 First dam, Columbia, by imported Bonnie Scotland.  
 Second dam, Young Fashion, by imported Monarch.  
 Third dam, Fashion, by imported Trustee.  
 Fourth dam, Bonnets of Blue, by Sir Charles.  
 Fifth dam, Realty, by Sir Archy.  
 Sixth dam, by imported Medley.  
 Seventh dam, by imported Centinel.  
 Eighth dam, by Mark Anthony.  
 Ninth dam, by imported Janns.  
 Tenth dam, by imported Monkey.  
 Eleventh dam, by imported Silvereye.  
 Twelfth dam, by Spauker.  
 See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.  
 X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name, Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Anteo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauanita, Bonnie Kate (the dam of Bonnie Lizette), Andes, Hook Hock-Ing, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, big form, and of the best disposition.  
 Will make the ensuing season, 1884, from February 15th to June 10th, at the Oakland Trotting Park. Terms, \$50 the season.  
 JOSEPH CAIRN SIMPSON,  
 Oakland or 608 Montgomery Street, San Francisco.

**SHEEP.**

**Sheep and Wool in the Colonies.**

The visitor to Australian shores is at once impressed with the overshadowing importance of sheep husbandry. Before he lands from the steamer that has so long been his home, his eyes are greeted with the sight of warehouses and wharfs loaded with bales of wool, which are being rapidly swung by immense cranes moved by steam power into vessels destined for foreign ports.

In no other country is the business of wool-growing so extensive; in no other land is so large a percentage of the talent and capital of the people concentrated on flock increase and improvement. Flocks aggregating thirty animals for each inhabitant in the colonies insure for their protection the guardianship of law, the co-operation of science, and every accessory to success that ingenuity can devise or money secure. Throughout the country districts the preponderance of wealth and intelligence is with the flock owners, while in the cities the leading merchants are those who have been able to secure a commission on the greatest proportion of flock products.

There are in Australia in round numbers ninety millions of sheep, divided among the seven colonies about as follows:

New South Wales.....	35,500,000
Victoria.....	13,000,000
West Australia.....	4,000,000
South Australia.....	8,000,000
Queensland.....	13,500,000
Tasmania.....	2,000,000
New Zealand.....	13,000,000
<b>Total</b> .....	<b>\$9,000,000</b>

The extent of the country thus occupied is immense beyond any preconceived ideas of the average observer. Thus there are in

New South Wales.....	323,437
Victoria.....	88,198
West Australia.....	978,298
South Australia.....	914,730
Queensland.....	678,600
Tasmania.....	26,215
New Zealand.....	122,600

When the total of 3,132,078 square miles is compared with the area of the United States, and is found to equal the latter, excepting only the Territory of Alaska, a more definite idea of its immensity may be gained. It will also be noted that the distribution of sheep is by no means uniform throughout the country. Thus, New South Wales, with less than one-tenth of the entire area, has about one-third the aggregate number of sheep. Victoria, with less than one thirty-fifth of the territory, has one-eighth of the sheep. Several causes combine to bring about this condition. The two colonies named contain the principal seaports of Australia, viz., Sydney and Melbourne; and as a consequence emigration and capital, both essential to the establishment and development of sheep husbandry, have been first attracted and employed. Then, again, in a country extending over thirty degrees of latitude, and stretching from east to west a distance of 2,500 miles, there will be found much territory not so well adapted for pasturage as that lying between the extremes. Extending to within ten degrees of the equator much of the so-called "hot country" is yet undeveloped—some of it unexplored—while the native "black fellows" still hold undisputed sway over large tracts in the interior. The remoteness from markets for selling products, and securing supplies have hitherto operated to retard the occupancy of large sections of country not favored with the presence of navigable rivers, and until railways are pushed further inland the rapid spread of sheep husbandry beyond its present confines need not be looked for. Cattle-raisers have the extreme frontier pretty much to themselves at the present time.

This is not intended to intimate that the number of sheep is not likely to be augmented. Quite the contrary. It seems apparent that the same incentives to development that have made and marked the sheep husbandry of Australia as unprecedented in the history of that industry in the world's annals, will operate for its further improvement long into the future. This can be accomplished by a more thorough occupancy of territory now available; by augmenting the yield of wool from the flock, rather than by adding to its numbers; by enhancing the carrying capacity of the land when occupied, rather than by adding to its area. The attention of the more intelligent and enterprising flock-owners is already directed to the achievement of these results; and a prediction of their success seems warranted by a contemplation of what has already been achieved.

Australian sheep husbandry has many natural advantages. Though its founders and promoters are entitled to praise for what they have accomplished by unwearied devotion to their business and unstinted expenditure of their money, still they have done no more in these directions than have breeders in some other countries. But upon them nature has looked down with her most benignant smile. Every prospect pleases; shade is at hand as a refuge from the scorching heat of summer, and every wind of winter is tempered to the weaklings of the flock. A temperature rarely down to the freezing point permits perennial pasturage, never disappointing the husbandman who has not overstocked his runs.

Under such circumstances what wonder that Anglo-Saxon pluck and intelligence, backed by the incentives of a steady demand and fair prices for wool in the markets of the world, should have seen the opportunity and so magnificently improved it.—A. M. G., in *Breeders' Gazette*.

**Shearing Sheep.**

Shearing should be done on a clean floor. We shear on the baro floor, with the sheep penned in a small stable floored on a level with the shearing floor; this saves unnecessary lifting. The stable should be kept well covered with sawdust or straw; sawdust we like best. We use a bench about knee-high—a little higher for small sheep and somewhat lower for large ones.

The shearer sets the sheep on its rump on the bench, and standing with his left foot upon the bench, lays the sheep's neck across his left knee, with its right side against its body, commencing at the brisket and opens the fleece down the right side of the belly to the right flank or stifle; shear the belly in course, turning the wool to the left. Begin at the brisket and shear up the under side of the neck to middle of under jaw, shearing the left side of the face and neck to the left ear. Turn the sheep slightly around with its feet toward you; shear from left ear down neck and side, taking foreleg and shoulder, to left flank; next shear top-side, if it has any, and head to right ear, down the neck and side, shearing well around to the middle of the back and down to where other courses stopped; incline sheep to you, begin at the back of

left hind leg, shearing in courses with the leg to the thigh joint. Lay the sheep down on the right side, shear left hip to the tail; shear lengthwise of the tail end well under on the right hip; while in this position shear end twist and inside of hind leg. Raise up the sheep, keeping a little wool under the right hip that it may rest comfortably, turning the shorn side to, with its head again across your left leg; shear from right ear end jaw down the neck to right foreleg and shoulder; shear the right side down to the flank, inclining the sheep to you while you shear down. The sheep is then laid on its left side and the wool shorn from its right hip and leg, finishing at the boofs of same.

The more quietly and gently you handle the sheep, from the time it is penned till shorn, the better for both it and you as regards life and character.—*Michigan Farmer*.

Advices received from Australia mention the fact that scab appeared in the flocks of American sheep shipped from this country last summer, and that, to prevent the spread of the disease, the government had destroyed all infected and exposed sheep, together with the buildings, pens, etc., with which they had recently been in contact. As the sheep in question had been through the government quarantine, had been twice dipped as precaution against the possible presence of disease, and had, some time before the appearance of the disease, been examined by the government inspector, and given a clean bill of health and permit to travel anywhere in the colony, the source of infection is somewhat of a mystery. The sheep had, for some time previous to the appearance of the disease, been two hundred miles in the interior, where they were to be held for the annual sales in July next.

**A Celebrated Old-time Trotter.**

The Philadelphia Record has an old print of the once celebrated trotting horse Whalebone, with the following inscription attached:

Whalebone. A Noted Horse for Speed & Bottom, Bright bay, 15 hands, 3½ inches high, has strong points & shews great blood was sired by Hamiltonian & Hamiltonian by old Messenger. He was bred by General Coles of Long Island. Amongst his numerous performances are the following. 1827. He was matched on the New York trotting Course, against time 15 miles within the hour in harness which he accomplished in 54 minutes & six seconds, with great ease performing his last mile in 3 minutes and 2 seconds his then owner Mr. Elliott after the match offered to trot him seventeen miles within the hour but was not taken up. May 15 1829, won the Hunting Park Association purse of \$200, & a Silver Cup, value \$50, beating in two heats Creeper, Lady Kate, Gray Squirrel, & Moonshine. October 15, 1829 on the Hunting Park Association course he trotted under the Saddle rode by Mr. Spicer, sixteen miles in four-mile heats in the unprecedented of 46 minutes and 11 seconds, performing the third heat in 11 minutes & 17 seconds, (the day previous he trotted 8 miles in harness against Sir Peter. October 23, 1830, won the Hunting Park Association purse of \$300, 3 mile heats, winning the 3d. & 4th, heats, beating Sir Peter, Jerry, Comet & Top Gallant, and distancing all on the 4th heat. October 23, 1830, on the Union Course, Long Island, he won the trotting Club purse of \$200, beating the Calf, Comet & Sir Andrew, winning the 2d. & 3d. heats, the Calf taking the first. December 6, 1830. He beat Sweet Brier in harness 7 miles round the Hunting Park Course winning each mile, except the 2d & 5th. On the New York trotting Course Decr. 1828 he performed a 2nd., 3 mile heat in harness in 8 minutes 20 seconds and on the Hunting Park Course, October 14th, 1829, a second 4 mile heat in harness in 11 minutes 18 seconds, and is justly considered the best bottomed horse in the Country."

**BELLE MEADE**

1884 **STALLIONS.** 1884

**BRAMBLE,**

By imp. Bonnie Scotland, dam Ivy Leaf, by imp. Australian.

**ENQUIRER,**

The sire of McWhirter, Fortuna, Harkaway, Falsetto, Blue Eyes, Pinafore, Getaway, W. P. Burch, etc.

**Imp. GREAT TOM,**

The sire of Gen. Harding, Thackeray, Swift, Tennyson, Trombone, Tarquin, etc.  
And the grand Race-horse,

**LUKE BLACKBURN,**

By imp. Bonnie Scotland, dam Nevada, by Lexington.  
Each of these horses will be bred to a limited number of approved mares, at

**\$100-The Season-\$100**

\$5 to the Groom.

Mares will be kept at reasonable charges during the season. The annual Sale of Belle Meade Yearling, 49 in number will take place April 30th. Catalogues of the sale will be issued to the public in due time. Address,

**W. G. HARDING,**  
Nashville, Tenn.

**TROTTING STALLIONS.**

**Standard Trotting Stallion**

**BILLY HAYWARD, 489,**

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

**JAS. J. MARTIN, Agent.**

**Mambrino Trotting Stallion**

**ABBOTSFORD.**

Record 2:19 1/2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. R. WHIPPLE, San Mateo, Cal.

**PEDIGREE.**

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Paymaster; dam Woodbine, (dam of Wedgewood, 2:19), by Woodford, son of Kosciusko, by Sir Archy.  
Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minnetonka, a record of 2:24. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbottsford 2:19½; Malice 2:19½; Manetta 2:19½; Mambrino Dudley 2:22; Convoy 2:22½; Magenta 2:24½; Manfred 2:25; Fancoast 2:25½; Rachel 2:26½; Inca 2:27; Lady McFarridge 2:28; Dacia 2:29½; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Princeps, the sire of Trinet 2:14. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,250 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.  
Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17½; Adelaide 3:18½; Commonwealth 2:22; Hiram Woodruff 2:25; Valley Chief 2:27; Faustina 2:28½; Phil Sheridan, Jr., 2:29½; Tom Malloy 2:30.

**TERMS.**

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

**WASH JAMES, Agent,**  
San Mateo, Cal.

**The Trotting Stallions**

**Baywood and Fleetwood**

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

**BAYWOOD**

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover.  
Sired by Nutwood; first dam by Geo. M. Patchen; second dam h Champion; third dam by Belmont.

**FLEETWOOD**

Is four years old, sorrel, with both front feet white and white stripe face; 15½ hands high, and weighs close to 1,100 pounds. He is a model a perfect horse; high life, fine style and action, and looks like thoroughbred.  
Sired by Nutwood. First dam Copper Bottom Mare, by Young Amer ica; second dam the Pilotson Mare, pedigree unknown but she was reported to have been bred in Kentucky.  
Terms, \$25 for the season, or \$10 to insure.

**E. S. SMITH, San Jose.**

**The Trotting-Bred Stallion**

**A. T. STEWART,**

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, sixteen and one-half hands high, and weighs over 1,300 pounds. Bred by D. L. Harris, of Fayette County, Kentucky. Foaled in 1872, and is an bred Mambrino. Sired by Mambrino Patchen, full brother of Lou Thorn, record 2:18½, sire of Katie Middleton, 2:23, and nine in 2:30 list. Dam by Mambrino Chief, sire of Lady Thorn; second dam, by Young's Pilot, Jr., brother in blood to the sire of the dam of Maul S., 2:10, Mambrino Patchen sired by Mambrino Chief, he by Mambrino Paymaster, and he by Mambrino, thoroughbredson of imported Messenger.

Terms for the season, \$30.  
Address

**SOMERS & AYERS**

Among the Fancy.

Never was a truer saying than the one of London being a world within itself. It is not the casual visitor that finds out these facts from experience, because it takes years of constant residence, and a wonderful degree of curiosity on the part of the sojourner to fathom them even then.

London, of all cities in the world, is one in which wealth and poverty, virtue and vice, dwell in absurd proximity to each other. Few of the thousands of rich folks who loiter about the grand *allee* of Covent Garden (with its curious collections of rare fruits and flowers) dream of the miserable haunts so close at hand as those in Charles street, Hanway Court, and other streets which go to make up the quarter of Drury Lane, nor do the thousands of fair ladies and fine gents who drive and promenade down Oxford street and around Soho Square conceive what their fellow-creatures in the Dials and the streets running into them are like. Yet, to know London and get initiated into the resorts of the "Fancy," not only must these places be read of, but become familiar by constant frequentation, and the *habitudes* of them cultivated.

In King street, just a few doors from the *Five Dials*, is the famous little public, for years kept by "Jemie Shaw." Now, how can a man be posted on London sports without having made the acquaintance of this character? Old Jemie could and did boast of having shaken the bands of as many "haricrats" as any man in "Hengland." A *seance* at his house *particuler* party was on, was indeed a scene not to be forgotten. Leading out of the little, low, dingy tap-room was a parlor—a long, narrow room, low in the ceiling and furnished with one table in the center, and two cushioned benches on either side of it, and occupying its entire length. At the far end was seated the veteran host; always in his shirt sleeves, arms bare, and wearing in the purple ruffle of his shirt a pin representing a bull dog's head (claimed to be the gift of Lord Waldgrave), a most fitting emblem for one so high an authority on that breed of the canine family.

Upon the chimney shelf sat the playful Jennie (a monkey), whose pranks and tight rope performance were both odd and extraordinary. Thus the apartments looked before the guests assembled, provided the programme of the evening's entertainment did not include a dog fight; in that event the places near the host would be occupied by several of the animals, Jennie would have conditioned to tackle any that might have been brought in to meet them. Should it be a small mill or a *bout* between *chanteleurs*, then the arrangements were made accordingly. It was usually not until after the opera that the expected scions of great families would congregate, but the moment they did begin to arrive then those customers on the outside were supposed to withdraw.

The mills in most instances were between novices picked up by some of the guests, and therefore no notorious battles were ever fought there (nor indeed was it Jimmie's custom to hold dog and cock fights, save those gotten up among these aristocratic guests), many of the conflicts so beld would have put to hush a fair equivalent number of those carried on more openly. Pluck and endurance were required to furnish the noble spectators with that thirst for blood which the common people had to gratify at public exhibitions. The spectators seldom failed to be satiated, because the poor creatures who underwent the cruel punishment for their amusement sadly need what they always got—plenty of sovereigns. There was never any rowdiness at Jimmie Shaw's, for whether his parlor was occupied by titled "swells," dog, or bird fanciers, in every instance he persisted upon having and enforced good order.

Mambrino Chief.

As the name of Rysdyk's Hambletonian lives and reigns in the Empire State, so does that of Mambrino Chief in Kentucky, the state of his adoption. Unfortunately for turf history, none of the writers of the blue-grass region noted the special excellences of form and character which Mambrino Chief possessed. Neither did the artists preserve his appearance on canvas. It pleased them better to waste their talents on some flash animal, long since passed into oblivion. Trotting stallions of lasting merit are never numerous, and it is most desirable to learn all we can as to the fathers of families. Knowing what a fund of turf lore Isaac Woodruff has stored away in his memory, I sought him lately to have a little chat about Mambrino Chief. I found he knew the great horse well, and that he was instrumental in having him taken to Kentucky. Said he, "When Chief was owned by Dr. Cockroft, of Christy street, I was living at 115 Third avenue. He brought him to me, and I speeded him on the avenue. Joe Burr and others who stood in front of my door said he could heat 2:35. He was driven in 2:34 on Centre-ville Course before they took him to Kentucky."

"You mentioned that you had something to do with his going there."

"Yes; I met Jim Clay, who asked me if I knew of a stallion suitable to cross with Kentucky mares. I told him I knew of just the horse, a big one, with plenty of bone and action, and I directed him where to find him."

"I wish you would give me a general idea of his make up, style and way of going."

"Well, he was a great, big, dark brown

horse, almost a black, very big boned, a sensible head, broad jaw, but clean throatle, moderately long neck, prominent breast, and deep shoulders. He was almost as high over the rump as at the withers, rather a round turned one, very little dropping quarters, and not to call long bipped, large, powerful gaskin, good mane and tail. To sum it up, he was a very fine-looking, big horse, with fine style, rapid gaited, and level headed."

"Did you ever see him after he left here?"

"Indeed I did. Why, I banded him at the State Fair when he was exhibited in the amphitheatre, near Lexington, against Alexander's Norman and others, in 1859 or 1860."

"Who received the first premium?"

"Norman; but it was a wrong award, and the people cried shame as they saw Chief, with his fine style and powerful gait, on-show, out-look, and out-act him, and Norman couldn't trot. I heard it was done to pacify Mr. Alexander, who complained of unfair treatment in the thoroughbred class. After the decision I took Chief out on the track to show his gait, and he trotted a quarter there in 37 seconds without any work. He was handy as a pony, and went without weights or boots. I tell you, he was a great horse, and it was a pity he died just as he began to make his mark in Kentucky."—N. Y. Spirit.

Col. H. S. Russell has bought the green etal-lion Hill's Smuggler, bred by N. H. Hill, of Boston, Mass., by Smuggler, dam by imp. Consternation. He has been sent to H. C. Wood-unt, of Mineola, L. I., where his speed will be further developed, and he will probably be entered in this year's races, as he can now trot in 2:30. Col. Russell has also bought of G. A. Newell a brown mare, by Smuggler, dam by Godfrey's Patchen. She is 7 years old, and is said to be a very promising trotter.

The Belle Meade Stud, property of Gen. W. G. Harding, has lately been transferred to Messrs. W. H. Jackson and U. S. Senator Jackson under whose charge it will be hereafter.

James Elliott, who owned and drove Early Rose, has refused \$2,000 for her yearling brother, now in Kentucky. The dam of Early Rose is in foal to Belmont.

The Arabian race at Newmarket, England, in July, is likely to be an interesting one. Several Arabian borses are now on the way from India to take part.

Banquet and Tyrant are both looked upon with great favor for the Kentucky Derby. The odds are still long against them.

SPRING Racing Meeting OF THE FRESNO FAIR GROUND Association FRESNO, CAL.

All purses to be divided at the rate of sixty, thirty and ten per cent. All running races, not less than three to enter, and three to start. Pacific Blood-Horse Association rules to govern. In all running races second horse to save entrance.

Entrance to all purses ten per cent., money to accompany the nominations; all entrances to be given in writing, giving name, color, and sex of horse; also, name and residence of owner. Entries in all races to close May 5th with W. W. PHILLIPS, Secretary, Fresno, or KILLIP & Co., 116 Montgomery St., San Francisco. Excursion tickets to Fresno \$7.

W. W. PHILLIPS, Secretary, FARMERS' BANK. LEWIS LEACH, President, A. B. BUTLER, Vice-President.

Abdallah, the sire of Ryedyk's Hambletonian, and the value of whose direct descendants is estimated at \$200,000,000, was sold in his old age to a fish peddler for \$35, and being unable to work was turned out on the seashore to die of starvation.

One hundred and ninety thoroughbreds are in training at Louisville, Ky.

TIPS.

Tips of all sizes for Trotting, Running, and Road horses can be obtained by application to this office or to

PAUL FRIEDHOFER, 116 Washington St., San Francisco.

Eighth Day—Saturday, July 12th.

No. 16. Purse \$2,500. 2:27 Class. No. 17. Purse \$2,500. 2:21 Class.

In addition to the Regular classes, a large amount of money has been set aside for Special Races, and exhibitions of speed by Johnston, Jay-see-see, St. Julien, Trinket, Clingstone, Phallas, and other horses whose records or performances bar them from the Class Purse, for Double Team Races, Trotting with Running Mate, or a Stallion Race, should one be deemed advisable.

Total Amount for the Meeting, \$60,000. CONDITIONS.

All the within purses (except Nos. 2, 6, 8, 13 and 15) are for trotting, and are divided, fifty per cent. to the first horse; twenty-five per cent. to the second horse; fifteen per cent. to the third horse, and ten per cent. to the fourth horse.

Mile heats best three in five, in harness, and to the rules of the National Trotting Association, except as hereafter specified.

Entrées in all purses close on Thursday, May 1st, 1884. Entrance fee ten per cent. of purse, as follows: 2 1/2 per cent. cash, which must positively accompany the entry; 2 1/2 per cent. on Monday, June 2d, and the remaining five per cent. from those who start at 8 o'clock P. M. of the evening previous to the race, at the Secretary's office, 116 Monroe Street. No entry will be accepted or considered unless the 2 1/2 per cent. cash accompanies the same, nor will any entry be allowed to compete unless the second payment of 2 1/2 per cent. is made or mailed on or before 11 o'clock P. M. of Monday, June 2d, 1884; and any entry on which the last payment of 5 per cent. is not paid at 8 o'clock P. M. of the evening previous to the day set for the race, shall be considered drawn, and will not be permitted to start; but no entry shall be held, or liable for any amount beyond the first payment of 2 1/2 per cent., but failure to pay either of the payments when due shall be considered as a withdrawal and shall disqualify the entry from competing in the race. It is the intention to place the whole matter of entrance on an absolutely cash basis, and no deviation from these rules will be allowed in any case or in any particular.

Address communications and entries to D. L. HALL, Secretary, 116 Monroe St., Chicago, Ill.

National Association OF Trotting-Horse Breeders.

FIXED EVENTS AND STAKES FOR 1884, 1885, 1886 and 1887. To Name and Close Thursday, May 1st, 1884.

The Executive Committee announce, in addition to the six stakes for three-year-olds, and the Wilson Stakes for four-year-olds, the present value of which is \$9,100, already closed, the following fixed events, to name and close THURSDAY, MAY 1st, 1884, to be trotted for during the EIGHTH ANNUAL MEETING, to be held at the grounds of the New York Driving Club, Morrisania, N. Y., Sept. 9th, 10th, 11th, 1884. THE UNION STAKES, for four-year-olds, foals of 1880, by stallions whose get have never beaten 2:30 at four years old or under. THE MANHATTAN STAKES, for five-year-olds, foals of 1879, by stallions whose get have never beaten 2:25 at five years old or under; \$200 entrance in each stake, payable in the following forfeits; \$20 to accompany the nomination May 1st, 1884; \$50 additional July 1st, 1884, and the remainder (\$100) twenty days before the meeting of 1884, when the stakes will be trotted for. THE PACIFIC STAKES, for four-year-olds, foals of 1880. THE INITIATION, THE CONFIRMATION, THE HOPEWELL, THE STANDARD and THE SEQUEL STAKES, for 2:30, 2:25 and 2:40 stallions, and for 2:40 and 2:30 mares, respectively, will close Aug. 1st, 1884, the conditions of which will be duly announced. In addition to the foregoing, the following are the stakes and fixed events for 1885 and 1886, to name and close THURSDAY, MAY 1st, 1884.

1886. The National Trotting Sires Stakes, for foals of 1883 by stallions only for whom no subscription is subscribed. Closed for sires May 1st, 1883, with the following subscriptions, amounting to \$400, which is added to the stakes: h h Dean Sage, b h Electioneer, h h Gen. Benton, b h Bonum Eximium, b h Bonum, b h Buccaneer; all of whose get (foals of 1883) are eligible only to May 1st, 1884, at \$100 each, payable in the following forfeits: \$10 to accompany nomination, May 1st, 1884; \$15 additional Jan. 1st, 1885; \$25 additional Jan. 1st, 1886, and the remaining \$50 twenty days before meeting of 1886, when the stakes will be trotted for. THE ANNUAL NURSERY STAKES, for foals of 1883, \$150 entrance, payable in the following forfeits: \$10 to accompany nomination May 1st, 1884; \$25 additional Jan. 1st, 1885; \$40 additional Jan. 1st, 1886, and the remainder (\$75) twenty days before the meeting of 1886, when the stakes will be trotted for. THE JUVENILE STAKES, for foals of 1883, by stallions whose get have never beaten 2:30 at three years old or under. THE EVERETT HOUSE STAKES, for foals of 1883, by stallions whose get have never beaten 2:45 at three years old or under; \$100 entrance in each stake payable in the following forfeits: \$5 to accompany nomination May 1st, 1884; \$20 additional Jan. 1st, 1885; \$25 additional Jan. 1st, 1886, and the remainder (\$50) twenty days before the meeting of 1886, when the stakes will be trotted for.

1887. THE NATIONAL TROTTLING SIRE STAKES, for foals of 1884, only by sires subscribed for whose get have never beaten 2:30; subscription for sires \$30 each, to accompany nomination of sire May 1st, 1884 (when the subscription for sires closes), and for the get \$100 each payable in the following forfeits: \$10 to accompany nomination, Jan. 1st, 1885; \$15 additional Jan. 1st, 1886; \$25 additional Jan. 1st, 1887, and the remainder (\$50) twenty days before the meeting of 1887, when the stakes will be trotted for. THE MATRON STAKES, for foals of 1884, only the produce of mares subscribed for at \$25 each, which must accompany nomination of May 1st, 1884, and be added to the stakes; and for their produce (foals of 1884) \$150 each, payable in the following forfeits: \$15 to accompany nomination Jan. 1st, 1885; \$25 additional Jan. 1st, 1886; \$35 additional Jan. 1st, 1887, and the remainder (\$75) twenty days before the meeting of 1887, when the stakes will be trotted for.

Conditions. In all Stakes and Trials of speed the rules of this Association shall control. All nominations shall be in writing, in the name of the owner, addressed to J. W. Treasurer, P. O. Box 516, New York City, inclosed in a sealed envelope and plainly marked "Nomination," with a bank draft, postal order, or certified check for the amount of first payment first written entry, and must bear the post mark of not later than the day upon which the Stakes closes. A nomination by telegraph received by the Treasurer before the hour of closing, and confirmed by a properly written entry, as above prescribed, posted not later than the following day, shall be deemed valid. The number of nominations by one owner is unlimited, but only one can start in a race. Nominations shall state name, color, marks, age and sex, whether horse, gelding or mare, and the names of the sire and dam, if known, and her sire, if known. Nominations shall follow the ownership of the horse, and the name of the owner as the start-money shall be forthwith filed with the Secretary. All entries shall close at midnight of the day named at the office of the Treasurer, unless otherwise provided. Only horses owned or bred by members, or the get of stallions owned or stood by members, shall be eligible to entry. Money paid on entry in any of the Stakes opened by this Association wherein ALL nominations fail to make FINAL payments, shall be regarded as forfeit to the treasury of the Association. All races to be in harness, mile heats best three in five, except for three years old and under, which are to be mile heats unless otherwise provided in the first announcement of the Stake. If three or more horses start in a Stake race, two-thirds of the Stake shall be awarded to the winner, two-thirds to the second horse and one-ninth to the third horse, except other rules provided in the published conditions of the race. If not more than two horses start, only first and second money shall be awarded, and in case of walks over only the first money shall be awarded, and it shall be optional with the Executive Committee whether the horse shall or shall not appear. A horse distancing the field shall only be entitled to so much of the money as the start-money in the race could have won. In all races best two in three, the distance shall be eighty yards; and in all races best three in five, the distance shall be one hundred yards; except in heats wherein eight or more horses start, and therein the distance shall be one hundred and fifty yards. In all stakes for three-year-olds offered by this Association ten or more nominations required to fill, and in a Stake for four-year-olds and over five nominations required to fill.

H. W. T. MALL, President. L. D. PACKER, Secretary.

TRY AN ADVERTISEMENT THE TRUTH AND SPORTING AUTHORITY, THE BREEDER AND SPORTSMAN

THE NEW ZEALAND Stud and Pedigree Stock Co. LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Anstralasian Colonies, San Francisco, and elsewhere. The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes. The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Anstralasian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd. The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Anstralasian Colonies. The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Anstralasian Colonies.

Fastest Time on Record. Martini-Henry, by Mnsket-Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30, and beating a field of twenty-nine, thus lowering the previous best record of 3:30, by Darrivell (5 years), carrying 102 pounds, in 1879.

Musket-The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares. During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized for £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent. Any information regarding stock may be obtained on application to P. H. BOURKE, Secretary, Auckland, New Zealand.

DIETZ'S PATENT CHECK HOOK. Simple in its Structure and Practical in its Use. The horse never loosens the check-rein when this Check-Hook is used. Horsemens can appreciate the value of a Check-Hook of this kind. There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook. Orders sent to A. C. DIETZ, No. 9 Front St., San Francisco, Cal. Will receive prompt attention. When ordering state whether gold or silver plate required.

THE TROTTING STALLION  
**SILVERHEEL**

WILL MAKE THE SEASON OF 1884 AT THE DASHAWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland. Silverheel is a dark bay, foaled July 9th 1876; bred by R. B. Chisholm of Kane County, Illinois. Sired by Wilson's Blue Bull, his dam Maggie Rice by Gage's Logan; grandam Fanny Stratford, a mare which had every mark of high breeding, and was the dam of John A. Rice that showed a 2:40 gait when two years old. Logan by Rysdyk's Hambletonian, his dam Lady Wallace by Ohio Eclipse. With little training when four years old, Silverheel showed three heats in 2:40.

**TERMS.**  
Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.  
**SACKWIDER & CHISHOLM.**

Hambletonian Trotting Stallion

**BOB MASON**

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star). Belle Mason by Belmont (Wilkinson's). First dam, Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catspa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.  
**Description.**  
Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

**TERMS.**  
Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

**CHARLES J. ELLIS, Owner.**  
**WM. DONATHAN, Agent.**

Fast Trotting Stallion

**HA HA.**

Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 1/2 hands. Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' handling, showed 2:20 1/2, without a skip.

**Breeding.**

GILT-EDGE, combining, close at hand, Hambletonian, Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:19 1/2.  
N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

**FRED ARNOLD,**  
Stockton, Cal.

Trotting Stallions

Prompter, 2305, and Privateer

Will make the season of 1884, from February 1st to July 1st, at Agricultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasturage at reasonable rates. Accidents and escapes at owner's risk.

**Prompter** is a bright bay, star in forehead, hind ankles white, sixteen hands high, and weighs 1,140 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Blue Bull, dam Prairie Bird (four-year-old pacing record 2:28 1/2, and dam of Flight, five-year-old record 2:29, and three-fourths sister to dam of Pride, yearling record 2:44, and three-fourths sister to dam of Buccaneer, public trial against time 2:34, and full sister in blood to dam of Eawn, record 2:30 1/2), by Flaxtail, grandam by son of Tally Ho Morgan, great grandam by Irwin's Tuckahoe, great great grandam by Lester's Consul.

**Privateer** is four years old, a beautiful brown with tan shadings, never sixteen hands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Mambrino Chief, yearling record 3:05 1/2.

For extended pedigree and further description of the above horses send for circular.  
**M. W. HICKS,**  
Sacramento, Cal.

THE ELECTIONEER STALLION  
**STANFORD**

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

**TERMS.**  
\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

**Pedigree and Description.**

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk.  
Second dam, Kitty, by Owen Dale, son of Belmont.  
Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred.  
Dam of Dave Hill by Vermont Hambletonian.  
Dam of Red Lion by Vermont Hambletonian.

**J. J. FAIRBANKS,**  
Agent.

Oakland, January 18, 1884.

The Trotting Stallions

**DIRECTOR AND MONROE CHIEF**

Will make the season of 1884 at

Oakland Trotting Park,

Commencing February 1st and ending June 1st.

**TERMS.**

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

**Director, 2:17.**

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallas, 2:16 1/2); first dam Dolly (dam of Torndale, 2:22 1/2; Onward, 2:25), by Mambrino Chief; second dam by Potomac; third dam by Saxe Wiener, Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

**Monroe Chief, 2:18 1-4.**

Two-mile record, 4:46.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whip stock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performances, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

**JOHN A. GOLDSMITH,**  
OAKLAND TROTTING PARK.

The Trotting Stallion

**BRIGADIER.**

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.  
Frank Pierce, Jr., by Frank Pierce, son of Beppo.  
Brigadier will make the season of 1884 from February 10th to July 1st.

**TERMS.**

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes. Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.  
February 2d, 1884.

**J. B. McDONALD.**

2:20 1-4.

The Fast-Trotting Stallion

**ANTEEO.**

Dark bay colt, near hind foot white; foaled May 6th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER.  
First dam, Columbine, by A. W. Richmond.  
Second dam, Columbia, by imp. Bonnie Scotland.  
Third dam, Young Fashion, by imp. Monarch.  
Fourth dam, Fashion, by imp. Trustee.  
Fifth dam, Bonnets of Blue, by Sir Charles.  
Sixth dam, Reality, by Sir Archy.  
Seventh dam, by imp. Medley.  
Eighth dam, by imp. Centinel.  
Ninth dam, by Mark Anthony.  
Tenth dam, by imp. Janus.  
Eleventh dam, by imp. Monkey.  
Twelfth dam, by imp. Silverys.  
Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

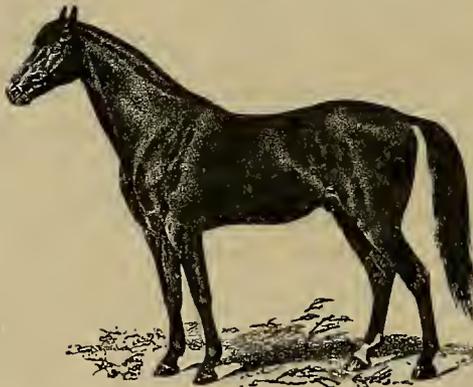

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

**TERMS.**

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents. Anteeo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20 1/2, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

**M. ROLLINS, Agent.**  
Santa Rosa.

**MAMBRINO WILKES.**

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christian by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Ripston's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,250 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prominent sire.

All make the ensuing season, commencing February 1st, 1884, at the Drew stable, STOCKTON, and L. M. Morse's near LODI.

**TERMS:**

\$40 for the season, or \$25 single service.  
This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

**A. L. HINDS, Agent.**

The Trotting Stallion

**STEINWAY,**

With two-year-old record, third heat, of 2:31, and three-year-old record, fourth heat, of 2:25 1/2.

**TERMS.**

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County,

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McClevery & Nohlett, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

**Description.**

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

**Pedigree.**

Steinway, by Strathmore; first dam Ahness, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Haleyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 16th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Clara, 2:17; and Tucker, 2:19; Chestnut Hill, 2:24; Alice Stoner, 2:24; Steinway, three-year-old, 2:25; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:25; Monitor, 2:28; Henderson, 2:28; Strathlan, three-year-old, 2:29; and Stuart, three-year-old, 2:28. Stuart is full brother to Belnor, who trotted a mile in 2:54 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23, and he in turn got Governor Sprague, record 2:20 1/2; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walker; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

**Performances.**

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verhena, Admiration, Mystery, in 2:39, 2:32, 2:31 1/2. Memento won the first heat. As three-year-old, at Sharpshury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35, Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30, 2:30 1/2, Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchfly and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:24, 2:28 1/2, but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23, 2:27 1/2.

Address

**GEORGE WILEY,**  
Cook Farm, Danville, Contra Costa Co., Cal.

THE TROTTING STALLIONS

**SINGLETON AND LA HARPE.**

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO July 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

**PEDIGREE.**

Singleton is by Willie Schepfer, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepfer's dam Nellie by son of Vermont Black Hawk, grand dam by Busiris, thoroughbred (No. 375). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:44 1/2) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Lester's Consul, by Shepperd's Consul.

Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

**LA HARPE**

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,150 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldenith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star, (son of Platt's Western Star by Blacknose). 1st dam by Bonerous, 2nd dam by Galathea (8811). La Harpe's dam Prairie Bird by Flaxtail (dam of Flight, 2:28, and Prompter, 2:33). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Lester's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

**TERMS:**

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.  
La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

**J. T. MCINTOSH,** Box 60, Chico, Cal.

LITTLE'S SHEEP DIP

CHEMICAL FLUID

Price Reduced to \$1.25 Per Gallon.

Twenty gallons of fluid mixed with cold water will make 1,230 gallons of Dip. It is superior to all Dips and Dressings for SCAB in Sheep; is certain in effect is easily mixed, and is applied in a cold state. Unlike sulphur or tobacco, or other poisonous Dips, it increases the growth of the wool, stimulates the fleece, and greatly adds to the yield. It destroys all vermin. It is efficacious for almost every disease (internal and external) sheep are subject to.

APTOS, SOQUEL AND SANTA CRUZ, IS VIA THE

Southern Pacific Railroad,

(Broad Gauge). The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known retreats, PURISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and MCMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

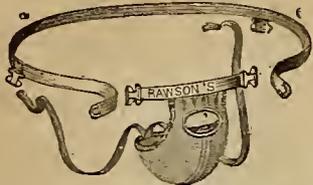

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND STRAIN. Guns and Fishing Tackle will be carried free of charge. Gunstaken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES. - Passenger Depot, Townsend street, Valencia Station, and No. 613 Market Hotel. A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt. Agt.

**RAWSON'S** (Self-Adjusting) U. S. ARMY **SPRUNG KNEES**

**Suspensory Bandages.**

A perfect fit guaranteed. Support, Relief, Comfort. Automatically Adjustable.

**DISPLACEMENT IMPOSSIBLE.**

Treatise on Nervous Tension and Circular mailed free. Sold by Druggists. S. E. G. RAWSON. Sent by mail safely. Patente, Saratoga Springs, N. Y.

**RUPTURE**

Absolutely cured in 30 to 60 days, by Dr. Pierce's Patent Magnetic Elastic Truss. Warranted the only Electric Truss in the world. Entirely different from all others. Perfect Retainer, and is worn with ease and comfort night and day. Cured the renowned Dr. J. Sims of New York, and hundreds of others. New Illustrated pamphlet free, containing full information. **MAGNETIC ELASTIC TRUSS COMPANY.** 704 Sacramento St. San Francisco, Cal.

116 Montgomery Street, San Francisco.

**FAIRLAWN, 1884.**

**TENTH ANNUAL CATALOGUE**

Now ready for distribution. Contains descriptions and pedigrees of 252 head of High-Bred Trotting Stock now at Fairlawn. Will be sent free to all applicants who enclose 3 cents in stamps to prepay postage.

**25 HIGHLY-BRED BROOD-MARES,**

Bred to the Fairlawn Stallions, and

**130 HEAD OF VERY PROMISING YOUNG STOCK,**

Consisting of Young Stallions, Fillies and Roadsters, are offered at *Private Sale.*

**THE ONE PRICE PLAN** Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person. All stock sold on orders can be returned if they do not come fully up to the descriptions given.

The Stallions in use at Fairlawn are

**ALMONT 33.**

Represented in the 2:30 list by 24 performers, with records ranging from 2:15½ to 2:30. Limited to 20 approved mares at \$300 the season.

**HAPPY MEDIUM 400.**

Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season.

**ABERDEEN 27.**

Having ten of his get with records ranging from 2:15½ to 2:27¼. Limited to 40 mares at \$150 the season.

**ALECTO 2548.**

By Almont, out of Violet, by Rysdyk's Hambletonian. Limited to 30 mares at \$50 the season.

**STARMONT 1526.**

By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season.

Ethan Allen, Jr., 473, used as a Private Stallion.

The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 2:30 list. The sons of each of these stallions are siring trotters. Almont has six different sons that have sired 2:30 trotters. Mares failing to get with foal can be returned in 1885 free of charge. For further information, and catalogues containing full particulars, address

**WM. T. WITHERS, Lexington, Ky.**

**ASHLAND PARK TROTTING STUD**

NEAR LEXINGTON, KY.

**B. J. TREACY, PROPRIETOR.**

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsons, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address 2-1751 **B. J. TREACY, Lexington, Ky.**

**KERR'S ASTHMA CURE**

Cures Asthma, Bronchitis, Throat and Lung affections, Coughs, Colds, Quinzy, Sore Throat, Soreness in the Chest or Lungs, Weakness in the Back, Pains in the Back, Bowels, Sides, Colic, Croup, Pneumonia, Measels, Whooping Cough and Indigestion. It heals the entire system. Pleasant tasted as ice cream. For sale by all druggists. Price, 50 cents and \$1.00 per bottle. Post-office box 1870.

FIVE DOLLARS A YEAR.

## ATHLETICS.

### George's Wonderful Performance.

By cablegram we were informed of W. G. George's wonderful performance at the London Athletic sports on Monday April 7th. The following account taken from *Pastime* (English) gives full particulars:

Ten Miles Handicap Open.—W. G. George, scratch (Moseley H.), 1; C. F. Turner, 3 min. 10 sec. (Spartan H.), 2; H. J. Clarke, 6 min. (Westbourne A. A. C.), 3; A. A. Brickett, 5 min. (Highgate H.), 4; C. Catlin, 2 min. (Blackheath H.), 0. Eighteen others started, with starts varying from 3 min. 10 sec. to 6 min. When the scratch man received the word to go five of the competitors had completed their first mile, and Catlin was well over 700 yards away. George did not dash away so fast as usual, and appeared to be going sluggishly. His time, however, soon dispelled this idea, and as it was seen that he was rapidly drawing into first position, hopes that the record would be cut were freely expressed. He caught Catlin for the first time in the ninth lap, though the Blackheath man stuck to him for a time but could not keep the pace, and the scratch man, running in splendid form, again went away, passing him for the second time just before completing the fifth mile. At six miles, Brickett was leading, closely followed by Clarke, some eighty yards behind the pair being Pritchard, with Turner fourth and George fifth. After completing the seventh mile, the Spartan took third place only to be passed by George, who now went in pursuit of the two leaders, whom he passed just before finishing his eighth mile. Being informed of his time, he stuck gamely at his task, and eventually won by a lap and four yards from Turner, who was a hundred yards in front of Clarke, about twenty yards separating the latter from Brickett. Appended are the winner's times for each lap. The only professional record beaten is the ten miles, which stands at 51 min. 26 sec., by L. Bennett, April 3d, 1863, and which is now 6 sec. worse than George's: First lap (quarter of a mile) 1 min. 8 sec.; 2, 2 min. 21 sec.; 3, 3 min. 37 sec.; 4 (one mile), 4 min. 52 1-5 sec.; 5, 6 min. 8 sec.; 6, 7 min. 25 sec.; 7, 8 min. 43 sec.; 8 (two miles), 10 min. 1 sec.; 9, 11 min. 17 sec.; 10, 12 min. 31 2-5 sec.; 11, 13 min. 45 2-5 sec.; (three miles), 12 15 min. 6 sec.; 13, 16 min. 23 sec.; 14, 17 min. 39 3-5 sec.; 15, 18 min. 56 2-5 sec.; 16 (four miles), 20 min. 14 1-5 sec.; 17, 21 min. 31 sec.; 18, 22 min. 49 sec.; 19, 24 min. 7 sec.; 20 (five miles), 25 min. 25 sec.; 21, 26 min. 44 sec.; 22, 28 min. 1 sec.; 23, 29 min. 18 sec.; 24 (six miles), 30 min. 36 sec.; 25, 31 min. 53 2-5 sec.; 26, 33 min. 10 2-5 sec.; 27, 34 min. 27 3-5 sec.; 28 (seven miles), 35 min. 46 sec.; 29, 37 min. 4 2-5 sec.; 30, 38 min. 22 sec.; 31, 39 min. 40 2-5 sec.; 32 (eight miles), 40 min. 58 sec.; 33, 42 min. 15 sec.; 34, 43 min. 33 sec.; 35, 44 min. 52 sec.; 36 (nine miles), 46 min. 12 sec.; 37, 47 min. 31 sec.; 38, 48 min. 51 sec.; 39, 50 min. 9 sec.; 40, 51 min. 20 sec. The record-breaking commenced at 4 1/2 miles, the previous best being 21 min. 39 sec., and each quarter-mile after that was a best amateur performance at the respective distances. All the records George cut in this race had been previously made by himself, except, of course, the professional record mentioned above. The best amateur records until last Monday were: 5 miles, 25 min. 36 sec.; 6 miles, 30 min. 49 sec.; 7 miles, 35 min. 55 1-5 sec.; 8 miles, 42 min. 11 sec.; 9 miles, 47 min. 33 sec., and 10 miles, 52 min. 53 sec. George, therefore, improved the latter record by 1 min. 33 sec. The extraordinary regularity of pace sustained by the winner may be gathered from the fact that his lap times show that he covered one lap, the first, in 1 min. 8 sec., one lap, the last, in 1 min. 11 sec., one in 1 min. 13 sec., one in 1 min. 14 2-5 sec., four, within 1 min. 16 sec. ten, within 1 min. 17 sec.; fourteen, within 1 min. 18 sec.; six, within 1 min. 19 sec.; while only two occupied 1 min. 20 sec. That he might have done faster had he been pressed may be reasonably inferred from his time for the last lap, and every fresh performance by him only arouses more speculation as to the limits of his wonderful powers.

Owing to the long spell of wet weather, the participants in the cross-country run have not been able to get sufficient exercise, and in order to give the contestants an opportunity to exercise the Committee have wisely determined to postpone the run one week.

According to the local paper, Santa Maria San Luis Obispo county has six baseball clubs. As Santa Maria does not pretend to Metropolitan proportions, the membership rolls of these clubs must be very like a duplicate census report.

The Trinity School and Urban Academy will engage in a football match next Saturday, the 10th inst.

### The "Los Angeles Athletic Club."

A few years ago there was formed in Los Angeles a club composed of young men of that city, in society called the "Los Angeles Athletic Club." The club was more or less quiet for some time, but on September 10th of last year a Field Day was held at their Agricultural Park, which, for the first affair of the kind, was a brilliant success, and the events, though there were comparatively few contestants, all proved of great interest to what was termed by the papers "the largest and most fashionable gathering ever seen at the park." The performances were as a rule creditable for a first meeting, and there was every promise that the subsequent meetings would show great improvement in all their records, and would surely popularize amateur athletics in the growing metropolis of southern California. Immediately, therefore, a meeting was announced for Washington's Birthday of this year, and the results were looked for with considerable interest by the amateur athletes of this city. There being no mention of any such affair in the papers, a gentleman of Los Angeles was communicated with, who disclosed the fact that the meeting had fallen through from lack of entries, adding that "the members of the club had taken more kindly to the billiard room and other social attractions than to the running path." This is a very unfortunate state of affairs for an athletic club, starting with a membership of two hundred and sixty, including several fine athletes, and with such brilliant prospects for the future. Messrs. Winston, Dewey, DeBuxton, your names appeared prominently in the report of the meeting, credited with good performances. Can you not rouse your fellow-members into some activity? The day is not far off when amateur athletics will have nearly the same standing on this coast as they now have in the east; and when all parts of the State will send representatives to San Francisco to compete in an annual "Championship" meeting, under the auspices of the "Pacific Coast Association of Amateur Athletes," and to these future meetings the preliminary steps for which we hope will soon be taken by our local clubs—the L. A. A. C. should send a large delegation.

### Oxford and Cambridge Sports.

The twenty-first annual meeting of the rival English Universities was held at Lillie Bridge Grounds, London, April 8th. Attendance about 15,000. Day cloudy. Tom Wilkinson (professional), of Sheffield, officiated as starter.

One Hundred-yards Run—L. Carter (Oxford), 1; C. H. Lowe (Cambridge), 2. Very close finish; time 10 3-5.

One-fourth Mile Run—M. H. Paine (Oxford), 1st; H. C. L. Tindall (Cambridge), 2d; A. S. Blair (Oxford), 3d. The three first men finished all of a bunch, clean run out, in 51 1-5 seconds.

One Mile Race—J. E. H. Pratt (Oxford), 1st; W. M. D. La Touche (Cambridge), 2d; F. E. J. Smith (Oxford), 3d. A great race and surprise. La Touche was regarded as a certainty, and although he ran up to his previous record was beaten by Pratt a few yards in 4 minutes 26 4-5 seconds. Smith finished 25 yards behind.

Three-mile Run—J. C. Toler (Oxford), 1st; J. H. A. Marshall (Oxford), 2d; L. W. Reed (Cambridge), 3d; time 15 min. 24 3-5 sec. Toler run with splendid judgment.

One Hundred and Twenty-Yards Hurdle Race—W. R. Pollock (Cambridge), 1st; A. McNeil (Oxford), 2d; H. T. Bowlby (Oxford), 3d. As expected Pollock won; the time varied from 16 sec. to 16 2-5 sec.

Running Wide Jump—O. Graham (Cambridge), 20 ft. 11 in.; 1st; H. Emmons (Oxford), 20 ft. 3 in. Paine has a record for 21 ft. 6 in. when fresh, but the exertion in the 1/4-mile race played him out.

High Jump—G. L. Colbourne (Cambridge), 5 ft 9 in.; A. E. Nuttall (Cambridge), 5 ft. 8 in.; Horuby (Oxford), 5 ft. 8 in. Throwing the Hammer—F. P. Le. Marchand (Oxford), 107 ft. 4 in.; W. J. Morrison (Cambridge), 94 ft. 7 in.

Putting Sixteen-pound Shot (no follow)—J. H. Ware (Oxford), 37 ft. 6 in.; A. G. Pallerson (Cambridge), 34 ft. 8 1/2 in.

The score for the great six-day go-as-you-please contest at Madison Square Garden, New York, at 12 o'clock Thursday night stood: Fitzgerald, 448; Rowell, 440; Vint, 404; Herty, 395; Noremac, 392; Panchot, 392; Elson, 372; Nitaw, 350.

A great number of new performers are in training for the sports on Decoration Day, and many of them have already shown sprinting abilities of no mean order in their trials.

The membership of the Williamsburg Athletic Club will exceed one thousand before the opening of their grounds on Decoration Day.

Efforts are being made to bring Delaney and Fredricks together in a mile race previous to the departure of the latter for England.

### A Chance for Sprint Runners.

Malone, the famous amateur runner of Ireland a short time back, is now running in the professional ranks in Australia. From latest advices from the colonies we learn that Malone has been doing some wonderful performances. In a Sheffield Handicap he was defeated by one yard in the announced time of 14 1/2 seconds; after this performance a few of the leading inhabitants of Cootamundia, a small town in New South Wales, signified their intention of backing Malone 150 yards against any man in England or America for from \$2,500 to \$5,000 or more a side. The backers will allow any one desirous of meeting Malone in a race in Australia \$500 for expenses, or, we understand, they will take a like amount to run the race in their city. Our champion sprint runners have of late been issuing very big challenges in a great many sporting papers all over the country, now here is a splendid opportunity to assert their superiority, and at the same time win a large amount of money, if they desire to contest in what would probably be a square race. Who is the first to speak?

## CRICKET.

A general meeting of all the cricketers in the city will be held next Thursday evening, at the Occidental hotel, when steps will be taken to form a Cricket Association for the purpose of advancing the game on the coast. A large attendance is expected, and judging from the tone of the cricketers a great amount of substantial business may be confidently looked for.

At the annual meeting of the Inter-collegiate Cricket Association, Arthur M. Cox of Columbia College was elected Secretary and Treasurer of that institution. Mr. Cox first began playing Cricket when a member of the Merion Club of this city.

The Merion and Occidents will most probably meet on Saturday, May 17th, for their final contest of the season.

The Occident Cricket Club will probably play a team of British sea captains Saturday afternoon, May 10th.

John Wisden, the once famous cricketer, died April 5th, at London, England.

## BICYCLING.

John S. Prince and wife, Miss Louise Armanido and Mr. T. W. Eck started eastward last Saturday. They go by way of Denver, where they have engagements. They will shape their courses so as to intercept Woodside and Morgan, and when they meet Prince declares the horns must be hung up. No bugling, nothing short of a match with the money up will suit. The iron went deep into Jack's soul and he thirsts for revenge.

H. C. Finkler has returned from Los Angeles, and looks in the pink of condition for the bicycle races on Decoration Day. Three or four riders promise Finkler a merry time for the races.

The plan of providing some of the messengers of the United States with bicycles for quickly delivering dispatches has proved a great success.

The fancy riding of young Finlay on a Star bicycle is spoken of as wonderful by our eastern exchanges.

The Chico Bicycle Club will shortly hold their first uniform parade.

The bicycle is becoming very popular in Mexico.

### Answers to Correspondents.

Question answered only through these columns. No replies by mail or telegraph.

Turf, San Francisco.

Please give day of the month and what year Lucky B., Jocko, Judge McKinstry and Wildidler ran the four mile race at Oklund, Jocko winning. Answer.—The race was the Baldwin Stake, run at the fall meeting of the Blood Horse Association, Aug. 18th, 1883.

Big Lize, San Jose.

There have been several Legal Tenders. State which you mean. 2d. Boston by Timoleon, dam Sister to Tucker by Bull's Florizel. 3d. Arab 2:24; Mugdallah, 2:24; Lize 2:29.

TURF AND TRACK.

Dates Canceled.

Oakland Park, M. M. Allen Lessee, April 26th to May 3d. Capital Turf Club, Sacramento, May 6th to 10th. Fresno Fair Association, Fresno, May 20th to 24th. Bay District Association, San Francisco, May 31st to June 14th. Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d. Thirteenth District, Marysville, Aug. 26th to 30th. Chico Fair Association, Chico, Sept. 1st to 6th. State Fair, Sacramento, Sept. 11th to 20th.

Vermont Black Hawk.

Black Hawk, as his name implies, was a black horse, foaled in 1833, bred by Wingate Twombly, Greenfield, N. H.; got by Sherman Morgan, son of Justin Morgan; dam brought from New Brunswick, and claimed to be a half-bred English mare. Black Hawk was sold when four years old to Benjamin Thurston, of Lowell, Mass., and was purchased, in 1844 by David Hill, of Bridport, Vt., in whose possession he died, in the autumn of 1856. This horse was the most noted son of Sherman Morgan. He was the sire of Ethan Allen, Lanet, Belle of Saratoga, and many other celebrated trotters. The large number of high-priced colts got by this famous sire not only enriched the breeders of Vermont, but added millions of revenue to the wealth of other States.

This horse was a noted trotter in his day. The 2:40 horse was a marvel of speed in those days of slow tracks and heavy weights. In 1842, Black Hawk won a match of \$1,000, by trotting five miles over the Cambridge Park Course in 16 minutes. In 1843, he won a race of two-mile heats over the same course, beating Jim and Dying Sergeant in 5:43-5:48-5:47. Mr. Hill issued a challenge to trot his stallion, Black Hawk, against any stallion in the United States that had stood for mares that season, a race of mile heats, best three in five, for \$500 a side, the race to come off at the New York State Fair, to be held at Saratoga, in the fall of 1847. Mr. Morse accepted the challenge with his grey Norman. The two distinguished stallions met at the appointed time. The writer was present at that exciting race. Black Hawk vanquished his opponent in three straight heats, and gained a world-renowned fame as one of the most perfect trotting stallions that stood for mares. After this race his barem was crowded. His services were engaged at least one year in advance, till he died, at the age of 23 years and 6 months. Black Hawk held the rare gift of entailing his speed and stamina to his colts for three or four generations. At Boston, Nov. 3, 1853, Black Hawk Maid beat Blue Morgan, two mile heats, best two in three. Time, 5:23-5:22. Oct. 14, 1854, Know Nothing won a race of two-mile heats over the Cambridge Park Course, beating Black Hawk Maid in 5:26—mare drawn after the first heat. Both of these celebrities were sired by Black Hawk.

Know Nothing was matched, July 29, 1856, to trot a race over the Fashion Course, Long Island, mile heats, best three in five, with the great queen of trotters, Flora Temple. The horse under saddle, the mare to go in harness. The gelding won in three straight heats. Time, 2:29-2:29-2:30.

The blood of Black Hawk has been perpetuated to a long list of worthy representatives that have shed imperishable luster upon the turf, and proved successful progenitors in the stud. In the descendants of the first generation of this great son of Sherman Morgan we find Lanet, with a record of 2:25; Ethan Allen, with a record of 2:25, in harness, and a record with running mate of one mile in 2:15. In the second generation, we find Badger Girl, record 2:22; Billy Barr, 2:23; and Hotspur, 2:24. In the third generation, we find such distinguished trotters as Cherley Ford, 2:16; Comee, 2:19; and Henry, 2:20. In the fourth generation, we find the fast mare Lady Maid, record 2:18; Camors, 2:19; and Captain Emmons, 2:20. Here are a few of the noted flies in this Black Hawk line of the Morgan family. Some of the most distinguished trotters that have appeared on the course come down from the lions of this prepotent sire. He had the rare gift of entailing his speed to his colts out of all kinds of mares.

The Sherman line is the most celebrated for speed of any branches of the descendants of Justin Morgan, who founded a family of trotters that have produced over 300 of the favorite class that have trotted one mile in 2:30 or better.

The Sherman Morgan line of fast-trotting roadsters is a very numerous family. They are scattered over every state in the Union. They are esteemed for their great power and undaunted resolution. They never shunt up at great tasks, or cower down over long roads. They are formed for strength and action. There is no breed better formed for superior strength in proportion to weight than the close-coupled Morgans. They are admirably adapted to all kinds of active road work. Their iron constitution enables them to stand hard work, keep easily, and live to an advanced age. Speed and bottom are what constitute great roadsters. Endurance never spends its force in false motions. The Black Hawk family have the perfect, true, even-measured stride, with light, quick, clock-work action, that gets over the ground with the least exertion. Should they fail to obtain to great speed, they would have a capital road gait for lasting all day at a rapid rate of speed, and returning the next day. They have the nervous energy to put in force their physical powers.

The following 2:20 horses come through the male line of the Morgan family. Lucille Goldust, record 2:16; Charley Ford, 2:16; Lady Maid, 2:18; Albemarle, 2:19; Comee, 2:19; Camors, 2:19; Fleety Goldust, 2:20; Capt. Emmons, 2:20; Frank, 2:20; Nelly R., 2:20; Nancy Hackett, 2:20; Little Fred, 2:20; Henry, 2:20; H. B. Winship, 2:20. Through the female line the descendants of Justin Morgan have contributed a still larger number to the 2:20 list.

Fanny Jenks was bred in Vermont, and called a Morgan. Her pedigree was unknown; but from her size, form, and action there is little doubt that she belonged to the Morgan family. On the 5th of May, 1845, in a match against time, for \$500 a side, to trot 100 miles in 10 hours, over the Bull's Head Course, near Albany, N. Y., she performed the entire distance in 9 hours 42 minutes 57 seconds. After winning her match without stopping, this mare was trotted once around the course, making her extra mile in 4 minutes 23 seconds. The above record includes 18 minutes 27 seconds in stopping for refreshments, which leaves Fanny Jenks, for bottom to stand against the world.

There are other celebrated trotters that trace their origin to this famous breed of Morgan Horses, such as Lady Fulton, Whalebone, Mack, and a host of others that have left their mark in blazing triumphs upon the race-course, as a memorial of their rich inheritance. Justin Morgan was one of three grand divisions of the equine family whose branches have produced the fastest trotters in the world.—Live Stock Journal.

James Hanrahan, Real Estate Broker and General Collector, 319 Sansome St.

Ed. Bither.

Although Mr. Bither is but a young man, he has been particularly fortunate, as well as a good driver, in getting hold of such great ones as Jay-Eye-See and Phallas, which he has not only educated and trained from colts, but driven them all their great races. Jay-Eye-See to a record of 2:10; next to the fastest trotter on earth, Mand S., 2:10, and Phallas to a record of 2:15; next to the fastest stallion on earth. Smuggler 2:15. At Cleveland, in June, '83, he drove Jay-Eye-See a mile in 2:16, for which he was much censured by many, even by his owner. They all said no five-year-old should be driven so fast, and even if he could go, it should be kept dark. But when in September he gave him the record of 2:10, in Providence, R. I., thus proving him the fastest five-year-old in the world, and placing himself high up on the ladder of fame, there were no words of censure for him then, but congratulations poured in on every side, not only from his gentlemen friends but many a fair lady was deeply interested in handsome Eddie's success. When he dons his gorgeous pea-green jacket he is perfectly irresistible. "Love me, love my dog" is an old saying, and if we substitute the word horse for dog it exactly fits the case; it is wonderful what an interest the ladies take in Jay-Eye-See. The fact is that his driver is young, good-looking and unmarried, surely cannot account for it; however, Eddie has his own ideas on the subject, and if he says little he thinks a good deal.

Mr. Bither has been with Mr. Case for the last nine years, during which time he has given good records to a number of horses, but this year he is out with more good ones than ever before, and doubtless we will hear favorably from some of them before the season is over.

He has now in his hands the prince of the turf (as we may call Jay-Eye-See), Phallas, Victoria, Gurgle, and Eudymion, all of whom are said to be in first-class condition. The first two have been driven all winter on the snow barefooted, and they claim that you could not find sonnder or better feet in the country. They are at present at Louisville, where they are preparing for the coming season's campaign.

Mr. Bither was born in Charleston, Maine, and is a young man of good habits, square and straightforward in his dealings, and one who has proved that prosperity is not likely to spoil him; he was just as unaffected and unassuming after his successful season last year as ever before; in fact he was the same Eddie Bither. I know, no matter what he may have done in the past, he proposes never to have anything to do with an unfair race, and as far as he is concerned, always to drive to win.

Jay-Eye-See has won every race he has ever trotted but one, and that was in Chicago as a four-year-old; Eddie Bither was driving him and lost the first heat, so they thought he was young and inexperienced, and put him down, and put Budd Dohle in his place; the result was his first and last failure.

Last year at Buffalo Bither pulled him one heat, by the directions of the person who had the management of Mr. Case's horses; he won the race, but has always regretted the step he took, and will never repeat it under any circumstances.

Mr. Bither is one of the few drivers who know how to take care of their money, and should he have a few more successful seasons like last one, he will be well-fixed for the rest of his life.—Chicago Horseman.

Kentucky Notes.

The weather the past week has been showery and wet, which has prevented any very fast work. The horses have been moving strongly, and we hear of no sickness or breakdowns here. It will be seen that there has been a number scratched in the stakes at Louisville. In the Derby and Clark—Empire, Envoy and Brazil. Oaks—Marie D., Trinket, Tatoo and Capitola. Cup—Leonatus and Monogram. Tobacco and Fleetwood—Brazil. Moet & Chandon—Tattoo. Dixiana—Ascender. Minnehaha—Ten Eyck and Boh Pate. Nentna—Ascender and Bob Pate. Turf, Ascender and Leonatus, and in Tennessee and Elmendorf—Testator. There are also a number in the stakes for the fall meeting.

The betting on the Derby has undergone no change, but certainly will the coming week. Richard L., from the exhibition he made at New Orleans, does not look like he had much chance to win this stake. Farondole has ran away and crippled himself, how severely we are unable to say, and there is a report that Buchanan's legs are very dicky, and we did hear that he had been fired. There are some good judges who doubt whether Bob Miles will undergo a real Derby preparation. These rumors and reports make the race of the most doubtful and uncertain character, and it looks like the winner will have to come from the dark division.

In the Louisville Cup Leonatus and Monogram have been scratched, and there is a report that Aretino is lame. Tyrant, the promising two-year-old colt by Great Tom, dam Moselle, who has been on the complaining list, has improved. He was lame and seemed to be stiff all over.

In all stakes that closed before the adoption of the new rules, two-year-olds carry 105 pounds, and three-year-olds 110 pounds, with five pounds allowance to mares in the spring. This scale applies to the Blue Ribbon, Phoenix, Ashland Oaks, Viley and Kentucky Stallion Stakes for 1884 and 1885. At Louisville to the Derby, Oaks, Clark, St. Leger and Great American Stallion Stakes for 1884 and 1885. The scale first adopted by the Kentucky Association was different from this, but at a meeting held March 13th, 1882, the scale stated above was adopted, making it uniform with New Orleans, Memphis, Nashville, Louisville, Covington, Cincinnati and St. Louis, and only a slight difference from the Chicago Driving Park.—Live Stock Record.

Trotting in Australia.

The peculiarly Yankee sport of trotting makes but little headway in the Colonies, and the mixed meeting of the Victoria Trotting Club, held on St. Patrick's Day, was hardly a success. The details of the trotting events are as follows:

Purse—Of 30 sovs., with a sweep of 2 sovs. for starters. For 2 min. 43 sec. class. Winner, the purse; second, the sweep. Mile heats; best two in three. Mr. G. Brady's g g Leithamstead..... 3 1 1 Mr. F. Robin's br g Brown Hawk..... 0 3 2 Mr. J. A. Roberts' b m Septh..... 0 3 2 Mr. J. J. Miller's b h Contractor..... 3 4 4 Mr. F. Colbath's b h Von Molthe, Jr..... 5 5 5 Time—2:43, 2:43, 0:00.

Free For All—Of 50 sovs., and a sweepstake of 3 sovs. for starters. Winner, the purse; second, the sweep. Mile heats; best three in five. Mr. J. A. Roberts' g h Len Horse..... 2 1 1 1 Mr. T. N. Currow's ch h Honesty..... 3 3 1 2 2 Mr. J. Mullins' h g Oliver..... 1 2 dis. Time—2:38, 2:36, 2:36, 2:37, 2:35.

Steeple-chasers fetch big prices in England. An offer of £1,500 was refused for Mohican previous to his single-handed battle with School Girl in the Sandown Steeple-chase.

The Story of a Yorkshire Groom.

The history of Tom Ward, the Yorkshire groom, is an illustration of the "profound" remark of Mr. Weller, senior, that "a man who can form an accurate judgment of a horse can form an accurate judgment of anything." And here, fortunately, there are no misty traditions which the sun of criticism ruthlessly dispels, no tombstones at variance with the registers of births and deaths, and no entries about one sister's age which are subsequently shown to have reference to another, born afterward but christened by the same name. Of early advantages Ward had none. Neither the squire of the village, nor the parson, nor even the attorney paid for his schooling, or gave him a start in life. He went to the church school at Howden, in Yorkshire, became a fair scholar, and, what is more to the purpose, acquired good, steady principles, to "which he steadily adhered through life."

In the year 1823, after serving in the stables of Mr. Ridsdale, the trainer, he was sent to Vienna with a horse, and was retained by Prince Aloys von Lichtenstein. Here he might have remained with no higher reputation than that of a light weight, a good jockey, and a man of strict probity. Fortunately the Duke of Lucca wanted to rival the English in the matter of stables and horses, and carried off Ward. He soon found that this clever under-groom, with his gray eyes, neat dress and cleanly person, was a man on whom a prince, beset with flatterers and intriguers, could thoroughly depend. From groom Ward became valet, and from valet confidant and keeper of the privy purse. Then the public finances fell into confusion, and by the advice of the duchess the task of checking abuse and restoring credit was intrusted not to Ward, as the reader might anticipate, but, by her agency, to the Austrian Archduke Ferdinand, governor of Galicia and maternal uncle to the duchess. However, Ward's elevation was not long delayed. He was created a baron, and made minister of finance. Practically, it would seem, he became prime minister, directed important negotiations, and managed the cession of the Duchy of Lucca to the State of Tuscany.

The accession of the Duke of Lucca to the Duchy of Parma, and the troubles of 1847-8, are matters of history, and Ward's share in these events and his mediation between Austria, Medina and Tuscany are all described in his own correspondence. Ward had managed to acquire a good knowledge of French, Italian and German, and his letters in his own language—correct, idiomatic and forcible—are proof, if proof were wanting, that eminent success in diplomacy and statesmanship can be attained without publicity, evasion, or unnecessary concealment. In 1854, after the death of Charles, Duke of Parma, his widow thought fit to remove Ward from his post as minister and to order him to leave her dominions. The last five years of Ward's life were spent near Vienna, where he took to farming, and, as far as we make out, lived in comparative independence. The Italians to this day talk of "Signor Tommaso."

Colonial Sporting Notes.

Trahan, who rode Commotion in the Champion, was evidently instructed to race Martini-Henry all the way, the impression of the stable being that there were only two horses in the Champion—Martini-Henry and Commotion. Had Commotion been reserved for the final struggle, the probabilities are he would have made a very close thing of it with the winner.

It is whispered that there is a chestnut colt in the Hon. James White's stable who will start a hot favorite for next season's Derby and Cup. The "dark" 'un is called Phil. Athol, and is by Blair Athol out of Philina (imported). Like Martini-Henry when he first swept the board, the colt is a maiden, and is reported to be able to run away from Bargo.

The Malua party are reported to have netted twenty thousand pounds by the victory of the flying son of St. Albans. The biggest portion of the wager was "nibbled" for in Melbourne, and a large sum was got on in Sydney.

Hales, who is just now the crack jockey of Australia, had five mounts on the first day of the Victorian Racing Club's fall meeting, and came first in three of them on Bargo, Martini-Henry and Salvo.

Salvage, the winner of the Auckland (N. Z.) Cup at the recent summer meeting of the Auckland Jockey Club, has been nominated for the Adelaide Cup of 2,000 guineas, to be run in May next.

Notwithstanding the defeat of Martini-Henry in the Champion Stakes, the stable of Mr. White was credited with five events during the meeting, and the stakes won amounted to \$14,222.

Magnet smashed a fetlock during the race for the Australian Cup, and the injury being incurable the colt was destroyed. Magnet was by Vagabond out of Magic Lantern.

Some ardent followers of the "blue and white" have already commenced to back Bargo for the next V. R. C. Derby and Cup.

Mr. Pearson has withdrawn his horses Fryingpan, Primus, Ironhand and Trumpeter from all engagements.

Mr. Tom Haydon has been appointed Secretary to the Victorian Trotting Club.

Declarations in the American Derby.

Secretary Brewster of the Washington Park Club, Chicago, forwards the following declarations to date in the American Derby.

E. J. Baldwin's chestnut filly Savanna. Edward Corrigan's bay colt Ten Fall. Chas. L. Hunt's chestnut filly Queen T. R. C. Pate's chestnut gelding Embargo. Palo Alto Stock Farm's brown filly Rita. Palo Alto Stock Farm's bay colt Shenandoah. Palo Alto Stock Farm's filly Freda. Palo Alto Stock Farm's chestnut filly Glendair.

The defeat of Mr. Pierre Lorillard's Comanche for the great Northamptonshire stakes, for which he was second, was in a measure due to unfair riding on the part of the winner, alluding to which the Sportsman said: "The Yankee colt Comanche, whose appearance did credit to the Daeubury establishment, and though as a matter of fact he had not done what was asked of him when tried, he was still pretty much faucied by the immediate connections of the stable. To make a long story short Mr. Lorillard's colt ran very well, and had the rider of Loch Ranza been content to observe a straight course instead of crossing him to get to the rail, Comanche would have made even better fight though he might not have been equal to the task of heating the Duke of Hamilton's three-year-old."

Le Grand.

Australia has another equine phenomenon, and for a time at least Martini-Henry, the pride of the New Zealanders, is dethroned. Le Grand has taken his place as the champion three-year old. He has accomplished a feat never before recorded in favor of one horse in the history of the Australian turf. From Saturday to Saturday he was second in the Newmarket Handicap, six furlongs, won by Malua in the first time of 1:15; third in the Australian Cup, won by Morpeth, and first in the Champion Stakes, 3 miles in 5:26. The great merit of this last performance is indicated by the fact that such equine giants as Martini-Henry, Commotion, Navigator, Off Color and Sting were among the slain. Le Grand is a bay colt with black points, of great size and substance, standing fully 16 hands 3 inches in height. He was bred by the late Sir Joshua P. Bell, at the Graunge, Queensland, and at the sale of that property to Mr. Kent was bought by that gentleman, who sold him to his present possessor Mr. D. S. Wallace. The following is his genealogical tree.

I. E. G. R. A. N. D.	Epigram (Imp.)	Blair-Athol	Stockwell	The Baron	Birdcatcher Echidna
			Blink Bonny	Pocahontas	Glencoe Marpessa
				Melbourne	Humphrey Clinker Morpeth's dam
	Eltermlire	Chanticleer	Queen Mary	Gladiator Beverlac's dam	Sir Hercules Guiccioli
			Whim	Drone Kiss	
			Lanercost	Liverpool Otis	
	Cathedral	Newninstor	Touchstone	Colsterdale's dam	Tomboy Tesane
			Beeswing	Camel Banter	Dr. Syntax Tomboy's dam
			Melbourne	Humphrey Clinker Morpeth's dam	
	Symblic	Pompey	Stolen Moments	Lady Elizabeth	Sleight of Hand Mare by Margrave
			Emilius	Orville Emily	
			Variation	Bustard Johanna Southcote	
Legend (Imp.)	Hawise	Jereed	Sultan My Lady		
		Sister to Hornsea	Velocipede Miss Cranfield		

The record of his performance up to the close of the Victoria Club's Fall Meeting, is as follows:

At two years, Sydney Turf Club, third in January Stakes, 5 furlongs, 112 pounds, won by Ildagonda, 84 pounds. Brisbane, won Sire's Produce Stake, 7 furlongs, 122 pounds, time 1:34. Rockhampton, July, won Sire's Produce Stakes, 1 mile, time 1:51; won Champagne Stakes, 1 mile, time 1:43.

At three years, Hawkesbury Spring Meeting, won Mare's Produce Stake, 1 1/2 miles, 117 pounds, time 2:19. Randwick Spring Meeting, won Derby 1 1/2 miles, 122 pounds, time 2:46; won Cravan Plate, 1 1/2 miles, 109 pounds, time 2:14; won Randwick Plate, 3 miles, 96 pounds, time 6:07. Flemington Spring Meeting, third in Melbourne Stakes, 1 1/2 miles, 110 pounds, won by Commotion, 129 pounds; beaten way off in Melbourne Cup, 2 miles, won by Martini-Henry; won Royal Park Stakes, 1 1/2 miles, 123 pounds, time 2:10; third in Canterbury Plate, 2 miles, won by Off Color. Sydney Turf Club, beaten off in Anniversary Handicap, 1 1/2 miles, 119 pounds, won by Here's Luck, 96 pounds. Geelong Summer Meeting, won Mare's Produce Stakes, 1 1/2 miles, 129 pounds, time 2:44. V. R. C. Autumn Meeting, second in Newmarket Handicap, 6 furlongs, 122 pounds, won by Malua, 119 pounds time 1:15; third in Australian Cup, 2 1/2 miles, 110 pounds, won by Morpeth, 117 pounds, time 4:03; first in Champion Stakes, 3 miles, 110 pounds, time 5:26. Le Grand is a horse of immense proportions and muscular development, and has proven the possession of two great requisites for a race-horse, speed and stamina, but whether he will be able to carry the weights that will be imposed next season is a question. From this distance he does not seem to be near so grand a colt as Martini-Henry, although it is possible that the last named found three miles a little too far for his comfort. Competent judges declared the New Zealand champion to be much below his spring form. He started a strong favorite, and his lack of condition was shown by the way Commotion ran him down with twenty pounds more in the saddle. A few months earlier Commotion could make no such impression on the son of Musket and Sylvia, and that the struggle between the two was severe is evidenced by the fact that after Martini-Henry had sulked and fell off Commotion could not go on, and finished third. Le Grand was able to make the pace to suit his foot, and although the time, 5:26, shows that the rate was fast, the circumstance of being able to go along with being worried goes a great way in a race.

The Epsom Spring Meeting began on April 22d, and as the favorite old Licensed Victualler's race, the Metropolitan Handicap, was on the cards, there was a large attendance. Additional interest was also given to the race by the presence of Mr. F. T. Walton's mare Groffe, it being her first appearance since her indifferent performances for the Cesarewitch and Cambridgeshire last October. She did but little better, the race being a triumph for the light-weighted three-year-olds, one of which, the Duke of Hamilton's Loch Ranza, was so well fancied that as little as 6 to 4 was freely accepted. But he failed, and the finish was a sharp struggle between Mr. Lefevre's colt Zadig and Mr. Cumberland's filly See-See, each 77 pounds. The colt started with the odds at 10 to 1 against him and the filly at 11 to 1. A head separated them at the finish. There were ten starters.

Mr. Walton also got a set back in the race for the Riddlesdown Plate for three-year-olds and upward. It was a dash for a mile, and the American ran his three-year-old colt, Hopeful (late Mondamin). The race was won by Mr. J. Gretton's four-year-old colt Henley, with Hopeful second, and "Mr. Manton's" (Duchess of Montrose) three-year filly Gang Warily, third. There were four other starters.

Winning jockeys get fair pay in Australia. For a flat race 10 per cent. on the stakes in the fixed fee; 15 for a hurdle race, and 20 for a steeple-chase. Owners, as a rule, supplement these sums with a substantial bonus.

Steeple-chasing.

There is something so manly, so English, as we Englishmen are pleased to understand it, about the sport of steeple-chasing, that its decadence would be a matter of much regret.

The nature of chasing has altered since our forefathers, mounted on their favorite hunters, had spins against each other in the course of a run, and were prone to magnify the excellence of their steeds, or perhaps the capacity of the steeds' riders after dinner.

By some such reflections as these it was that steeple-chases were originated in former times. Matches grew up in the course of discussion about the events of the day's sport after hounds—and probably the older generation of sportsmen were more careful to ride after hounds instead of over them. Sometimes, indeed, the men could not wait till morning to decide the question, for more than one case is on record where a party of sportsmen have risen from the table and started off on a steeple-chase forthwith, putting white garments—may one say shirts—over their coats, so that competitors might be visible, and a man who was down might not be jumped unnecessarily in the shadow.

In these days steeple-chases had something to do with steeple-chases. Courses were not marked out; that came later, and the regulation "steeple-chase course" of the present day later still. Some distant point was fixed on—four, five, eight; it might have been ten miles off (unnecessarily and cruelly severe chases of twice ten miles are recorded), and to this the riders made the best of their way. The hunters that ran these races were, as regards the question of speed, very far inferior to the chasers of to-day, which latter are almost invariably thoroughbred; most believers in the past flatter themselves that there was wonderful superiority of endurance about the old-fashioned hunter, that is to say, that he could "stay" at racing pace better than our horses, casts-off from the fat, as they often are. Nevertheless, one cannot but regret the contests of a by-gone age, and admit that there was more of the real spirit of sport in them than in the fashionable Sandown chases of to-day—infinitely more.

Pluck has in no way decreased. Not long since a good man, who is still to the fore, Mr. Arthur Yates, broke his collar bone on the way to the post for a four-mile steeple-chase, but took so little notice of the matter that he rode his race, and was beaten only by a short head. On another occasion the same rider, after a bad fall, caught his horse by the tail, and getting somehow into the saddle, won in a canter. The sound horsemanship of Mr. J. M. Richardson, the delicate handling of Mr. Arthur Coventry were probably never approached by the good men of half a century back; yet there was something about those old chases which calls for special admiration.

So much more tax was laid on a man's resource. He had not to jump so many regulation fences, but to find his way over the country. Discretion aided him, or want of discretion stopped him, as the case might be. He had ground of all sorts to cross, and here his judgment was tested—how best to get over the plough; whether it was a good thing to ride a little out of the line where the going was heavy, to splash down that watery furrow; how to manage the ridges; whether to chance that boggy piece, and dash boldly through it, or to cast about for firmer ground. To weigh all this, and to pick good places at the jumps—the country was a stiff one, but a man did not select ugly places for the sake of crossing them—showed that knowledge of the real sport which one cannot but admire.

Chasing used to be nearly allied to hunting; now it is a sort of offshoot of racing. We have seen how chases were gotten up in the hunting field, and how the consequence was a struggle over so many miles of country—fair hunting country, as a matter of course—and generally "owners' run." But this sort of things did not last. A well-bred hunter doubtless held his own in most cases against a coarser-bred animal; but the thoroughbred was superior to all. An owner, we will say, had a horse which disappointed him continually under Newmarket rules.

"What's to be done with him?" the owner says, when, after having been fancied and backed, he has run third, an outsider winning, with the first favorite second.

"Well, sir, he's got a turn of speed and he looks like jumping. He might win a hurdle race," his trainer suggests.

"See what you can do with him, then," is the owner's reply, and the disappointing one is put into schooling for hurdles, or, if he jumps well but is not very speedy, for the more advanced game.

Thus steeple-chasing, that is, steeple-chasing proper, declined. Courses sprang up, or, it should rather be said, were made up in all directions, and the clerks of these courses lived on their success, and laid themselves out to secure as many horses as possible. It is natural, however regrettable, that they should have made their courses more and more easy, half-schooled chasers being more plentiful than the finished article, for it takes a long time to teach a steeple-chaser his business.

Jumping fences in the hunting field is one thing, jumping them at a racing pace is quite another. Most men who have had any experience of country life know how the hunter jumps. As he sees the fence before him he usually shortens his stride, goes at it in a more collected form, pauses more or less as he takes off, and having made his effort, slightly pauses again on landing. It is an interesting sight to see the young horse being taught the business in which it is hoped that he will shine. Here is our young one coming. He is to have his first gallop at racing pace over his training ground, having been through his course of schooling and acquitted himself well. We will take our place by this fence and watch. The big brown is a well-known chaser, who wants a gallop; the gray mare is a hunter—a genuine hunter by profession—who is to be run at a local meeting, and is let into the spin to see what pace she has; and the bright chestnut, on which the trainer himself has mounted—after seeing him carefully fitted with "boots" lest he should cut or over-reach—is the novice.

But the three have started off, and are near the first fence. They have come to it in a line, but the brown is over first, and, moreover, is away first. More is not perceptible, except that he evidently has the lead when they have landed, a lead soon wrested from him by the impetuous young one, whose rider does not violently banl at his head, but lets him go on for a little way almost as he pleases, and then quietly draws him back again to the others. They near the fence where we stand, and now we shall see what they can do. The brown has taken hold of his bit, not to run away, but to lean on his rider's hand; the gray on the left is evidently galloping her hardest, though her companion is going easily within himself; the young one speeds along, his hind legs well under him, and, as they near the fence, he pricks up his ears to take in, as it were, what he has to do. The thud of their hoofs on the soft turf is unchecked. Here they are! The brown, with no perceptible effort in rising, glides over the fence. It is firmly made up, as he knows, and he jumps it, with nothing to spare, but

safely enough. How he picks up his legs it is not easy to say, for the twigs seem to brush his girths as he crosses over. The pace is altogether too fast for the hunter. She is flurried, and gets right under the guard rail in front of the fence, and this she knocks with all four feet, so that at this jump, when by an effort she is safely over, she pauses more than at the former. The youngster is across before her. He gives his head one shake, rubs at it, is well over, and off again on the other side so quickly that five or six strides beyond he is level with the brown, which rose a length in front of him.

Let us canter across and take up a station on the spot where they are to finish. They near the last fence, and the young one is a couple of lengths ahead. Except that he is a little too eager, he comes over in grand style, taking off, indeed, six or eight feet too soon, and jumping big, but none the less easily and cleverly. The brown slips over in his almost mechanical style, and then, for this is a race, his rider tries to overhaul the chestnut, but though the old horse answers to the call as best as he can when the rider's whip is raised, the leader, hardly out of a canter, bolds his own, his trainer turning his head to see what the followers are doing. As for the hunter, she has lumbered up to the last fence, stopped almost dead from sheer distress, gamely thrown herself over, landing anyhow, and is coming on at the best pace she can raise, which is a very bad one, far in the rear. The young one promises well. The gray is a hunter and not a race-horse, which, to all intents and purposes, the chaser of to-day must be.

Of late, for various reasons, steeple-chasing has somewhat languished, but the spectacle is too picturesque and popular the sport too characteristically English to make reasonable the fear that it can ever die out.—*Longman's Magazine.*

Jerome Park Notes.

The trouble with Eole, as bruited all over the land by this time, was not that he was actually broken down, but that if he was persevered with in his work a breakdown would have been the inevitable result. The ever-cautious Suedeker at once stopped the horse and awaited instructions from Mr. Gebhardt, who is "on tour," they say. Dr. Farley, it is said, examined the horse, and approved of Suedeker's course. Neither he nor Eolist has done any work of consequence this week. Eolist had a bruised heel, and Lord Beaconsfield is also lame. Durbess, Privateer, and the two-year-old Grenadier are doing well.

The California gelding, Jim Renwick, is in charge of the trainer G. R. Buchanan. The horse is owned by Levi Knott of Oregon, but is leased to W. J. Welch, a mining broker, who has for some years been located here. It was he who challenged Mr. P. Lorillard to run Duchess of Norfolk against Herbert in the fall of 1882, at Sheephead Bay, after the notable race in which the filly was disqualified by fouling Herbert. Jim Renwick is a perfect giant, with four white feet, the hind ones stockings. He was shipped from Sacramento March 27th, and was in this city a week prior to his removal to Jerome Park. He must be a tough customer to stand the trip. They stopped over at Ogden, Council Bluffs, and Chicago. Renwick weighs now 1,150 pounds.

E. J. McElmeel has purchased Com. Kittson a neat-looking bay filly, Fidele, two years, by Alarm out of Lady Scarborough, by Leamington. A friend of McElmeel's has also purchased the brown colt Alfred, two years, by Alarm or Strachino out of Mura, by Leamington, and Walter Rollins will have both. Alfred is said to resemble The Admiral as he looked this time a year ago. The two-year-old filly by Enquirer out of Tribulation, bought some time back from Mr. George Lorillard, has developed a bad case of cockled ankle, and she is unfit to train. She will be sent to Yonkers. The Rebel mare owned by Mr. McElmeel has been bred to Navarro. Gen. Monroe, the "boss" of the stable, since Eole's let-up is now more eagerly watched than any other old horse at the track. Much of his work, however, is in walking and cantering on the Boulevard. But by the time racing is at hand he will be ready, we think.

James Lee will receive six two-year-olds and the four-year-old brown gelding Retreuch on Sunday from Chestnut Hill. The horses now at the track in Lee's care are all doing well.

Miss Palmer began eating this week. The veterinarian who attended her for her injured jaw says it was never broken, and though much swollen, is quite likely to be all right again in good time. But she can't be as she was before the accident. It is not clear just how this occurred, but Mr. Roe explains it by saying that an opening, which had been cut for some former occupant of the stable, attracted the attention of the high-mettled young miss. She poked her head through, and the two-year-old in the box made an effort to catch her by the muzzle. Miss Palmer, in suddenly withdrawing her head, got the jaw fast, and in the morning it was swelled very large. Mr. Roe says he was exceedingly sorry it occurred, as, though he had not yet tried any of the young ones, she gave much promise.

The real version of part of the interview between a reporter of one of the dailies and Mr. Roe was as follows:

"Now," said the newspaper man, "I don't want you to tell me what you don't want to see printed." "Well," said Roe, "I'm very sure I'll not tell you anything I don't want printed."

The cleverest of all the young trainers—Heffner—got a great scare the other day at Jerome Park. Two of his horses were out walking. Suddenly Jimmy Lee said, "Why, Heffner, Markland's lame!" Heffner never stopped to think that Markland was in his box, but jumped to his feet and was only brought to a realizing sense of the joke by the roars of laughter which Lee and those present gave vent to.

Mr. E. F. Hunter has received from Ohio the aged chestnut gelding Gen. Keifer, by plowman out of Lady Washington, by Beacon, grandam Maiden (dam of Parole), by Lexington. Last year he won the third and fourth beats of a half-mile heat race at Dayton, O., in 53 sec., 58 sec. He also ran second in a mile dash won by Minietta in 1:57. Mr. Hunter's filly Chick, three years, by Hurrah out of Chance, who is in foal, will be sent to young Mr. Lorillard's farm in Westchester county, where she will be bred to Siddartha, after she has had her foal.

There is now at Jerome Park in training, in charge of Percy Benn, a good-looking five-year-old bay filly called Lizzie Miller, by Craig Millar out of Lizzie Grey-stock, by Master Bagot. She was bred by Mr. Crawford, and imported by Hiram Payne, livery stable proprietor of this city. In the same stable there is a piebald horse said to be four years old, by Anglo-Saxon (he said to be by Jerome Edgar) out of Queen Kate, by Bonnie Scotland. He is the property of Mr. Werner Benning of Arlington, N. J. As the horse or his sire is not in the stud-book, we hope Mr. Benning will give us full particulars about his age, etc. He is called Star Saxon.

J. O'Nay, who had been a running mate with a trotter, has now gone in to C. Miller's stable at the track.—*Sportsman.*

An inspection of the horses of Kern county is being made by a veterinary under authority of the Board of Supervisors.

## Foals.

At Rancho del Paso, Property of J. B. Haggin.  
 April 27th, bay colt, right hind foot white, by Exile, dam Lucy, by Washington the dam of Alaska.  
 April 23d, bay colt, by Algona, dam by Middletown; g d by Tattler.  
 April 24th, bay filly, by Algona, dam Eila, by Speculation.  
 April 26th, bay filly, by Echo, dam Mahle, by the Moor.  
 April 27th, chestnut filly, left hind foot white, and white spot on inside of right hind foot, by Exile, dam Rosa Clay, by Sayres, Harry Clay; g d, by Edward Everett.  
 April 29th, chestnut colt, star, both fore legs, right hind leg white, by Exile, dam by Alexander.

## Names Claimed.

By Mrs. J. W. Warren, Lindeu, Cal.  
 LOTTIE C., for bay filly, white crescent in forehead, both hind feet white to ankle joint, foaled March 10th, 1883; by Fred Aruold. First dam Rosaline, by Major Mono; second dam Kitty by Royal George. (Filly foaled at Stockton.)  
 GEORGE H., for bay colt, star in forehead, foaled March 14th, 1884, by Mambrino Wilkes. Dam Rosaline, as above. (Colt foaled at Petrolia, Humboldt county.)

## Blue Bull's Pedigree.

One Alfred Glen of Latonia, Ill., writes to the *Western Sportsman* about the pedigree of Blue Bull. Mr. Glen is not in that candid frame of mind necessary to give any information of value in the premises, and by his own confession knows nothing positively about it, but we give his screed for what it is worth:

I noticed an item in the *Sportsman* of March 15th, on the pedigree of Wilson's Blue Bull. Now, as I was personally acquainted with Dan Dorrel, and knew his horse, I propose to tell what I know, and let all others know that there is and has been a great deal of 'bosh' talk about the breeding of this horse. What I give of his pedigree Mr. Dorrel told me himself; and my confidence in his statement, added to what I know myself, convinces me that the Old Sam pedigree is a trumped up affair.

In the fall of 1860 I attended fairs with some horses at the following places: North Madison, East Enterprise, Aurora, and Vevay, Ind. Dan Dorrel was at the last three of these with Blue Bull, a chestnut stallion, five years old, a natural pacer; and how a horse foaled in 1858 could be five years old in the fall of 1860 is a little past my comprehension. He was only shown in harness once at the three fairs, and that was at Vevay. He took first premium at East Enterprise for fast pacing. The sweepstakes pacing did not go off at the Anrora fair on account of rain, though the fair was continued over Saturday. At the Vevay fair he took first premium for fast pacing, and first for saddle, also second for light harness.

Mr. Dorrel told me he bought him the spring he was a two-year-old; that he was thin in flesh; and the man who raised him thought he could not be castrated, as only one testicle could be felt, and he did not want an entire colt on his place; later when he got in better order he came all right.

Dorrel told me that he was sired by a Blue Bull; that the pacing gait came from his sire; that his dam was finely bred—a Blacknose mare; "and," he continued, "I don't know that I would have bought the colt if I had not known his dam to be an extra fine-bred mare, as I believe the dam should be well bred as well as the sire; his sire is a fair horse, but he gets his speed in part, and a good constitution from his dam."

Now let me say that he was called Dan Dorrel's Blue Bull, and wasn't known or thought of as Little Sam, and no one ever heard of it then. In Dearborn county there was a family of Blue Bull horses, a good many of them dun or blue, with black manes and tails, though I have seen among them many bays and sorrels. There were also a good many of the same breed in Ohio county. They were horses of good size, some weighing as high as 1,400 pounds; they were considered a family of pacers, a few of them possessing considerable speed, and for farm purposes they were good stock.

I don't doubt that his pet or stable name was Sam; but when you take his age into consideration you will see that he could not possibly have been sired by the Old Sam horse of Petersburg, Ky., in 1857.

I have often been at a loss to know why Wilson's, or as I knew him, Dorrel's Blue Bull was always spoken of as Kentucky-bred, when he was sired in Indiana, foaled there, raised there, and trained and brought out there by Daniel Dorrel of Ohio county. He was considered the fastest pacer of all the Blue Bulls, and there was a large number of them through the country at that time had a good show of speed at the pacing gait. Mr. Wilson may have entered him at Indianapolis as Sam. I have nothing to say about that, but I believe he was sired by a Blue Bull, and was known only as such at five years old by the public, in Dearborn, Ohio and Switzerland counties. This was in the fall of 1860. After this he went to Kentucky and I lost sight of him (as I came to Illinois) until he turned up as the sire of 2:30 and better trotters in the hands of Mr. Wilson of Ruchville, Indiana. All things considered, he was the greatest sire of fast trotters that ever lived.

Another correspondent of the same paper who did know the horse as "Old Sam" says:

The pedigree of the great Hoosier sire has been a sort of Jack-o-lantern ever since 1873—it has been discussed by rag, tag and bob-tail, and is about as far from being settled as when investigation commenced. I know of three different pedigrees that Wilson's Blue Bull has had. At one time his sire was confidently given as a dun horse with a black stripe down his back and zebra legs, that worked in a cart at Lawrenceburg, Ind. Mr. James Wilson sent a man to Lawrenceburg to find this dun horse, with instructions to buy and bring him to his farm. He said if this plebian cart horse could get as good an animal as Old Sam, he wanted to breed some mares to him, even though he was a dun with a black stripe and zebra legs. But the most diligent search at Lawrenceburg could not find the horse, and the most persistent inquiry during an entire week failed to unearth any one that had even heard of such a horse.

Mr. Wilson himself went to Rising Sun, Ind., in search of the sire of Blue Bull. He said he wanted the sire, no matter whether he was a dun horse with stripes on his legs and back, or even a mule, but his investigations at Rising Sun were as fruitless as was the trip of his agent to Lawrenceburg.

The racing meetings in Montana for 1884 are as follows: Helena, July 4th, 5th, and September 8th and 12th; Butte, August 17th, 20th; White Sulphur Springs and Bozeman are to be announced.

John Young of Walla Walla, W. T., has sent Rosa Mansfield and her daughter Daisy A., by Dr. Lindsay, to the Grand Ronde valley to be bred to Richard III, son of Crichton.

## Flora Temple's First Foal.

In 1868, when the news was first flashed over the wire from Chestnut Hill that Flora Temple had foaled a fine filly, there was as much interest manifested in the event as in the performance of Flora at Kalamazoo, Michigan, upon the 15th of October, 1859. For some time the farm was fairly besieged with visitors anxious to get a glimpse of the queen of trotters and her first-born, and there was not a horseman of any prominence in the country but who predicted a brilliant career for the youngster. At the period of foaling Flora Temple was twenty-three years old. She had been retired from the track but a couple of years and was still strong and vigorous. She was bred to Rysdyk, a highly finished horse then two years old, by Rysdyk's Hambletonian, dam Lady Duke by Lexington; grandam Magdalene by Modoc, now owned by Mr. J. P. Wiser of Prescott, Ontario.

The young foal was named Kitty Temple, and before being fully matured was sold to a prominent Congressman in the state of New York. Mr. Robert Bonner subsequently purchased her and bred her to Startle, son of old Hambletonian and Lizzie Walker, by Seely's American Star. The result was a brown filly, foaled in 1879, named Flora Temple II, and Fanny Temple a brown filly foaled 1880. At the recent sale in New York Fanny Temple was sold to Mr. Nathan Strauss, of New York, owner of the celebrated gelding Majolica (2:17) for \$1,000, and Flora Temple II was knocked down to Mr. D. B. Streeter, of Brooklyn, for \$600. At the second public sale of Mr. Bonner's in 1881 Kitty Temple was sold to Mr. Charles Wheeler of Bryn Mawr, Pa., who bred her to the clever stallion Messenger Chief by Abdallah Pilot, he by Alexander's Abdallah, dam by Mambrino Messenger and full sister to General George H. Thomas, sire of the well-known stallion Scott's Thomas, record 2:21. In 1882 Kitty Temple foaled a fine bay colt now living and considered by Mr. Wheeler very promising.

Last week Mr. Charles Cling, proprietor of the Schuylkill Valley Stock Farm, Birdsboro, Berks Co., Pa., purchased Kitty Temple of Mr. Wheeler, thus securing a mare whose antecedents alone should make her especially valuable. In addition to this she is a particularly well-shaped little mare, closely resembling her distinguished mother in bodily development and about the limbs. Her clear-cut head denotes much intelligence, while her eyes are especially conspicuous, being unusually large and brilliant. Of course, Mr. Cling proposes to breed Kitty Temple, but he is as yet undecided as to the particular horse. One thing we are confident of and that is the young proprietor of the Schuylkill Valley Stock Farm will never regret the purchase of the first-horn of the first mare that trotted in 2:20 or better. The pictures frequently observed of a little-bottled mare with a colt by her side are Flora Temple and Kittie, and are taken from the original oil painting by Emanuel Troye, the famous animal artist, which is now in the possession of the executors of the estate of J. W. Bradley, Esq.

Flora Temple had three colts, Kitty Temple, in 1868, by Rysdyk; Prince Imperial, in 1869, by Wm. Welch, dam supposed to be by imp. Trustee, now owned by an eastern gentleman, and The Queen's Daughter, foaled in 1871, by imp. Leamington. William Welch was sold to Mr. Robert Steel, and by him to Mr. Richard Peniston, who took him to Kentucky, where he has since died. Mr. Welch sold The Queen's Daughter to Mr. Steel, who disposed of her to Col. Russel, owner of Smuggler.—*The Sporting Life*.

## The Champion Stallion Stakes.

The following are the entries for the Champion Stallion Stakes to be run at Monmouth Park in 1885, by their two-year-old sons and daughters:

1. E. J. Baldwin's ch h Rutherford, by Australian—Aerolite, by Lexington.
2. Theo. Winter's br h Joe Hooker, by Monday—Mayflower, by Eclipse.
3. Clay & Woodford's br h Billet, by imp. Voltigeur—Calcutta, by Flatcatcher.
4. D. Swigert's blk h Virgil, by Vandal—Hymenia, by Yorkshire.
5. D. Swigert's b h Glenelg, by imp. Citadel—Babta, by Kingston.
6. G. L. Lorillard's br h Sensation, by Leamington—Susan Beane, by Lexington.
7. W. G. Harding's b h Bramble, by Bonnie Scotland—Ivy Leaf, by Australian.
8. W. G. Harding's imported ch h Great Tom, by King Tom—Woodcraft, by Voltigeur.
9. W. G. Harding's b h Enquirer, by imp. Leamington—Lida, by Lexington.
10. N. W. Kittson's b h Alarm, by Eclipse—Mand, by Stockwell.
11. N. W. Kittson's b h Reform, by Leamington—Stolen Kisses, by Knight of Kars.
12. P. Lorillard's b h Dnke of Magenta, by Lexington—Magenta, by Yorkshire.
13. P. Lorillard's b h imp. Saxou, by Beadsman—Girasol, by Asteroid.
14. P. Lorillard's imp. ch h Mortimer, by Compeigne—Comtesse, by Nuncio.
15. A. Belmont's h h Kingfisher, by Lexington—Elkhorn Lass, by Kingston.
16. A. Belmont's imported b h The Ill-Used, by Breadalbane—Ellenoire, by Chanticleer.
17. D. D. Withers' imp. ch h Stonehenge, by Blair Athol—Coinhra, by Kingston.
18. Major B. G. Thomas' imp. ch h King Bau, by King Tom—Atlantis, by Thormanby.

Eighteen sires appear and as fifteen was the minimum required to fill the stake stands. We are disappointed in the lack of interest displayed by the breeders of the Pacific coast. Only two stallions named, where there should have been at least eight, is not what we expected.

Geo. Bromwell of Liverpool, writing to an English paper the *St. James Gazette*, says that in Peru the pacer "type of hack has been brought to a perfection probably unknown elsewhere. Doubtless, this has originated from the climate, the nature of the country, and the extensive sandy deserts, in which a trotting or galloping horse, sinking fetlock deep, would soon exhaust himself; but apart from practical uses, the gait has there attained the position of a positive art, and it requires a very practiced rider in that style of riding to do justice to a true *cabal o de paso*. There are at least ten recognized varieties of the *paso*, or pace, known to the initiated. The great majority of the native horses are pacers, but a really first-rate one becomes an article of luxury, and may command an extravagant price. On some of the estates great care is devoted to the breeding of these horses, many of which are of extreme beauty, and their training and biting are processes to which the greatest patience and plenty of time are given.

## Woodburn Yearlings, 1884.

1. A very large, splendid-looking bay colt, deep-bodied and big-boned fellow, and a most serviceable-looking youngster, one of the best in the entire lot, there being only one objection, a trifle wide in the brislet, by King Alfonso, out of Invercauld (dam of Invermore and Dodette), by St. Albans.
2. Chestnut colt, blaze face, left fore and left hind leg white above the pasterns. This is a large, stout and deep-bodied youngster and big-boned, cutting a little under the knee, own brother to Glenmore, by Glen Athol out of Lotta, by Hunter's Glencoe.
3. Bay colt, with small star, by King Alfonso out of Desolation, by Devastation. This is a large, stout, jackscrew fellow, built for lasting and bard work.
4. A small, neat, chestnut colt, large star and left hind pastern white, by King Alfonso out of Jersey Belle (dam of Jersey Lass, Favorite, and Macbeth), by Australian.
5. Bay colt, small star, left fore and left hind foot white, a good-shaped and speedy-looking youngster, by King-Alfonso out of Hester (dam of Springbok), by Lexington.
6. A good-sized and plain colt, dark bay, star, left fore and two white heels behind, by King Alfonso out of Simplicity, by Eclipse.
7. Chestnut colt, large star and two white heels behind, by King Alfonso out of Fanchon (sister in blood to Spendthrift, Followercraft, Rutherford, etc.), by Australian. This is a large, fine colt, of great quality and high racing form, and looks greatly like the best of Australia's get. This is our pick of the colts.
8. Bay or Brown colt, with a small star, speedy looking, by King Alfonso out of Verga, by Virgil.
9. A good-sized and speedy-looking chestnut colt, blaze face and two white stockings behind, by King Alfonso out of Galanthus (sister to Springbok), by Australian.
10. A very neat bay colt, blaze face, brother to Ripple, by Lisbon out of Maggie Hunter, by Australian. He has a slight flesh cut on the knee from playing with other colts.
11. Chestnut colt by Glen Athol out of Anxiety, by Alarm, is dead since issuing of the catalogue.
12. A fairish bay colt, with a small star, by Glen Athol out of Cachuca, by King Alfonso.
13. A plain, good-sized chestnut colt, star and slight blaze, by Glen Athol out of Orelia, by Waverley.
14. Chestnut colt, property of Dr. D. D. Carter, Versailles, Ky., by Ten Broeck out of Rebecca, by Longfellow, we did not see, being at his owner's place.
15. A very racy-looking bay colt, blaze face, little white on left fore foot, and left hind foot white half way to hock, by Lisbon out of Penelope (dam of Telemachus), by Commodore.
16. Bay colt with star, like his sire, by Lisbon out of Peaceful, by Planet.
17. A plain, large bay colt, small star and four white legs, by Lisbon out of Fleurilla, by Dick Cheatham.
18. Bay colt, star, by Lisbon out of Emma Hunter, by Lever.
19. A plain bay colt, star, slight blaze and left hind pastern white, light of bone below the knee, by Lisbon out of Glene, by Gleneig.
20. A quick-actioned, small but speedy-looking bay or brown colt, small star, by Lisbon out of Fairy, (dam of Artist, Piedmont, etc.), by Knight of St. George.
21. Bay, large star, left fore and little white on left hind foot, like his sire Lisbon, out of Nora (dam of Bombay, Asterlight, etc.), by Sovereign.
22. Plain, large chestnut colt, small star and snip on nose, and left fore-pastern white, by Glen Athol out of Little Miss, by Sovereign.
23. A large and highly formed gray colt, blaze face and white stockings behind, by Glen Athol out of Geneva (dam of Silvio), by Lexington.
24. A small, delicate-looking, brown colt, small star, and snip on nose, and left hind pastern white, by Glen Athol out of imp. Britannia IV (dam of Brown Prince, Brigand, Madame Dudley, etc.), by The Flying Dutchman.
25. A good-looking bay or brown colt, star and stripe, by Glen Athol out of Knight Rose (dam of Voltage).
26. Very small late bay colt, left fore and left hind foot white, by Pat Malloy out of Heiress, by Scythian.
27. A fine, large, good-shaped, and highly-formed bay filly, large star and left hind foot white, by King Alfonso out of Aerolite (dam of Spendthrift, Followercraft, Rutherford, etc.), by Lexington.
28. A delicate-looking bay filly, small star, sister to Windrush, by King Alfonso out of Glenuine, by Gleneig.
29. A handsome and very racy-looking chestnut filly, blaze face and left hind leg white, by Lisbon out of Flash (dam of Mittie B.), by Lightning.
30. Bay filly, small star (sister to Mollie Brown), by King Alfonso out of Mollie Wood, by Lexington. This is a large and fine bay filly, who has snagged herself on the left forearm.
31. A very good-looking chestnut filly, blaze face, by King Alfonso out of Ultima (dam of Atilla, Aurora Rabby, etc.), by Lexington.
32. Bay or brown filly, white on both hind pasterns, by King Alfonso out of Quickstep (sister to Waltz), by Lexington. This is a handsome filly, and looks as if certain to race.
33. A good-sized and pretty bay filly, star and both heels white, by King Alfonso out of Ilder, by Leamington.
34. Is a large, roomy, and deep-bodied bay filly, large star, slight stripe, and two white legs behind above the pasterns, by King Alfonso out of Favorite (sister to Jersey Lass, dam of Macduff), by King Ernest.
35. A fair-sized chestnut filly, blaze face, by King Alfonso out of Ethel, by Leamington.
36. A large, handsome and racy-looking bay filly, small star, by King Alfonso out of Inverness (dam of Garrick and Sborn Line), by Maccaroni.
37. A fine-sized bay filly, large star and left hind foot white above the pastern (sister to Katie Croel), by King Alfonso out of Marguerite, by Lexington.
38. A very handsome and high-formed bay filly, with a star, by King Alfonso out of Zephyr (sister to Arizona, dam of Arauz), by Lexington.
39. A good-sized and neat chestnut filly, large star, by King Alfonso out of Miranda, by Lexington.
40. A deep-bodied and stout bay or brown filly, small star and three white feet, left fore and two behind, by Lisbon out of Austria, by Australian.
41. A bay filly, star and right hind foot white, by Lisbon out of Ateria, by Planet.
42. A bay filly, star and left hind foot white, by Pat Malloy out of Jennie H. (dam of Toledo and Manette), by Knight of St. George. This filly resembles her sire greatly, in full of quality, deep bodied, excellent back, loins, hips, and quarters.

Coughs and colds. Those who are suffering from coughs, colds, sore throat, etc., should try Brown's Bronchial Troches. Sold only in boxes.

## When the Sugar is On.

Professor Sample has on more than one occasion told his class that the horse is not nearly so intelligent as people credit him. If he was, the Professor adds, he would kick the heads off half the people who attempt to manage him. But it is evident that the Professor knows but little of the Australian race-horse; otherwise he would have to exclude that sagacious animal from his general statement that the horse is not so intelligent as people think. Let us look at the matter from the standpoint of actual facts, and we shall find that, just as there are men who know how to bide their time, and by making their effort at the right moment, achieve that success and position for which other men have striven time after time in vain, so it is with the intelligent race-horse. Some horses there are who try again and again to win, but get no nearer than second. Other horses again, dissatisfied with the weights put upon them or from other causes, do not run at all forward in the race; and, strange as it may seem, in these instances they are in some mysterious manner able to announce to their human guides, counsellors, and friends that it is not desirable to back them for a penny. And here, perhaps, it would be well to again return to Professor Sample, who tells his pupils that if they want the horse to understand they must talk to him in "horse talk;" and poor Adam Lindsay Gordon, in his account of a certain charge, speaks of the electric flash which passed from the rider to the steed. We may therefore assume that there is some occult means of communication between the intelligent horse and his wide-awake trainer. The intelligent race-horse to which we have referred, after failing on several occasions to run into a prominent position, and having informed his human friends that he cannot win, finds on some occasion that the handicapper insults him by putting on too little weight. He at once says to his friends—in "horse talk," of course—just take me away to some place where those prying touts—who, though not much account, nose about—and train me carefully, and I will take the scales off the eyes of that parlied handicapper, and will be revenged on those animals that run home in front of me when I am out for an airing. But take care you back me well. The intelligent horse's human friends take his advice. In due time the despised of the handicapper, and the neglected of the general public, comes to the post in a big race, carrying thousands of pounds for his friends, and the animal which had hitherto been nowhere wins easily in very fast time. Who, after this, shall say that the sagacious race-horse which performs these feats is not an animal of extraordinary intelligence? It is said that all things are possible to the man who knows how to wait, and the point may with equal truth be applied to the sagacious race-horse. Kind reader, is there any need to apply the moral? If so, never back race-horses. You evidently will not be able to understand their peculiarities, account for their idiosyncracies, or admire their great intelligence and their ardent love for their human confederates which makes them take so much care of their pockets.—*Melbourne Sportsman.*

## New Orleans Notes.

The two-year-old Ramlal is named after a character in the novel "Mr. Isaacs." He is 15.2 hands high, well proportioned, has good back and shoulders, and good judges say that he will make a weight-carrier and a stayer. All of the Hurstbourne youngsters run under the new colors of the stable—black silk jacket with white sleeves and a red cap. These are similar to Lord Palmouth's colors. The victory was a popular one, because Capt. J. L. Harris, the owner of the winner and the founder of the stake, is a New Orleans gentleman who is taking a lively interest in turf matters. Gabe Caldwell has gone to Nashville.

Loud goes to Lexington. D. D. Davis and D. L. Klanberg to Nashville.

Annie C., who jumped on the fence in a race on Thursday, will probably recover.

Mike Welch goes to Nashville. He is awaiting the betting between Blazes and Wallensee.

Planet, Jr., the grey horse who went lame during the winter meeting, was sold to Wm. Fagan for \$350.

Boh Wolf has a great liking for Richard L., and he induced Blaylock to ride him on Sunday. Wolf now weighs 115 lbs., but will train down to 107 for the sole purpose of riding the horse in the Phoenix Hotel and Blue Ribbon Stakes at Lexington, and the Louisville Derby. Wolf is one of the cleverest jockeys in the country, and Richard L. will not suffer by his guidance.

Starter J. F. Caldwell leaves New Orleans not in the best of health.

The hegira from the track is well under way. Special trains carried off large numbers of horses to Memphis, among them the stables of John Grayer, John Croker, D. Younger, C. H. Pettigill, L. Graham, J. A. Batchelor, W. H. Cheppn, Brannon Bros., J. J. Carroll, J. E. McDonald. Thursday witnessed the departure of Morris & Patton, Fred Carter, M. T. Danaher, J. J. Merrill and W. B. Jennings. Friday, Ed. Green and S. W. Street left with their horses.—*Picayune.*

Mr. H. Sandford, the American sportsman who visited England a short time ago, not placing implicit reliance on the time taken on English race-courses, made arrangements with another American to test the records. The result was that he found they were generally wrong from three to five seconds. The London *Field*, in a late issue, refers to English time-taking thus: "Our system of timing a race is so absurd as to be utterly unreliable." It is a pity the English racing authorities do not effect some alteration in this direction, for though they may not place the same reliance upon the time test that Americans and Anstralian do, it is an absurdity to see impossible records sometimes added to a race. In timing pedestrians they are scrupulously particular, so that false records may not be given. Why shouldn't they take the same pains with their race-horses?—*Melbourne Sportsman.*

Thomas H. Williams, Jr.'s brown horse Bryant W. is coming along rapidly this season. At the meeting of the Blood Horse Association, although a good way off from condition, he finished close to the point, and last Saturday at Oakland he beat Joe Howell at three-quarter-mile heats, winning the first and third heats in 1:15, 1:15. During the Golden Gate Fair at Oakland last fall, the horse pulled up so lame in one of the races that Mr. Williams regarded him as permanently broken down, but the injury was only temporary. Bryant W. is by Monday from Bahé, by imp. Nena Sahib, her dam Lady Hawkins, by Jack Hawkins. His pedigree is short but he is a performer, and if nothing unfavorable happens him he will be heard from later in the year.

The Chicago Driving Park has awarded the pooling for their midsummer running meeting, July 17th to August 20th, to Ira E. Bride & Co., at their bid of \$710 per day for the auction and Paris mutual pools, the association to have the entire control and receipts of the booking stands.

## BILLIARDS.

## Last Game of the Tournament.

The fifth game of the billiard tournaments, which took place last week, was played after this had gone to press, consequently the report of it was omitted until this issue. The contestants were W. R. F. Lowry and Adam F. Kleser. The former won the game with ease, although his playing was not up to his usual style. Kleser did pretty well considering that he was playing against a much stronger opponent, than what his speed should be matched against. The game throughout was in-around-the-table play, as the rail on no occasion was reached and held for more than a dozen caroms. Lowry completed his 300th point in the 37th inning, making an average of 8-437, Kleser having then but 182 points to his credit. The result of this game assured the third prize to the Kentuckian, while Adam was left out in the cold.

The game on the following night was between J. F. B. McCleery and Benjamin Saylor. This one attracted a full house, as people interested in this branch of sports knew that it was to be a hotly contested game, as each player had defeated the other contestants in the tournament, and stood, before the game, on an equality for the first prize. The bank was won by McCleery, who made but four points, and the game went on quietly until the seventh inning, when Saylor reached the rail and herded them, as a by-stander termed his execution, down to the short rail on which he missed on the 14th carom. His playing in this run was excellent, as he had on several occasions to use great judgment in playing the balls out of holes that had been made in the cloth during the tournament. These defects in cloth are very liable to occur at any time by the striking of a cue, and for this reason in a tournament of a week's duration, the cloth should be changed at least once. When McCleery took the play on the eighth inning, his execution was not at all weakened by his opponent's good work. He in his turn railed the balls and completed 106 points, his efforts being enthusiastically applauded. Three innings after this Saylor again reached the rail and finished the game with a beautiful run of 126 points. Saylor's average was 25, McCleery's was 13. William Roeb acted as referee.

On Tuesday night last, McCleery and W. R. F. Lowry, crossed cues for a purse of \$50, offered to the winner by an admirer of each, who wished to see them come together once more. The game was well contested, McCleery winning by 43 points in a game of 400. Lowry's best runs were 58, 79, 105; average 11 1-7, McCleery's best runs were 62, 81, 115; average 13 5-9.

The next tournaments that are to take place are the "Parisian" Pool, which was postponed some time ago for some unknown reason, and which the "J. M. Brunswick and Balke Co." will put before the public in a few days, and the Saylor Brother's fifteen-hall pool contest, which will probably take place next week in their billiard parlors.

## AQUATIC.

## Petereen's Prospects.

Henry Petersen has been challenged for a race with Jacob Gandnar, to take place in Creve-Coeur Lake, near St. Louis. Petersen has asked the advice of his friends here, and will await the arrival of Tom Flynn, who will manage him in this and all other affairs of the kind in the east. Mr. Flynn is now engaged at Sacramento, but will start eastward immediately after the adjournment of the extra session, which, he anticipates, will occur within a few days. He will make matches where he thinks advisable, and back the boy with his coin. Petersen could not be in better hands. If our Atlantic consins can appreciate an oarsman who is an honorable gentleman, we commend Mr. Flynn to their gracious offices. He goes on a combined trip of business and pleasure, and will probably make the acquaintance of most of the sportsmen of athletic and aquatic inclinations while he is east. The distance Gauden proposes to row is not stated, but it is not likely to exceed two miles. He is about Petersen's equal as to size and weight, but has never shown any such staying power as a three-mile affair with the Californian would call for.

A boating club has been organized at Antioch, with the following officers: President, A. C. Hartley; vice-president, Wm. A. Fiske; secretary, W. S. Barnum; treasurer, J. M. Belshaw; captain, C. M. Belshaw; trustees, J. T. Belshaw and Gabe Meyer.

J. D. Griffin, of this city, has finished and delivered the new four-oared barge of the Amity Club of Stockton. The boat weighs 170 pounds.

The Amity Boat Club of Stockton, will not engage in any races on Sundays.

## THE KENNEL.

## The New York Bench Show.

The eighth annual hench show to be held by the Westminster Kennel Club at the Madison Square Garden, commencing next Tuesday, the 6th inst., promises to surpass all previous exhibitions. Canada will be largely represented, and England sends St. Bernards, mastiffs, deer hounds, grey hounds, fox terriers, pugs, and English blood hounds. The latter breed were never before exhibited in this country. Prize-winning dogs throughout the country will compete in the champion's classes. The trials of speed and leaping by greyhounds will be a novel and attractive feature of the show. The dogs will be slipped from the leash at the same time, and run the entire length of the Garden. A special prize will be given for the best five St. Bernards by one exhibitor. A large number of special prizes have been offered in the different classes, among them a silver cup, to cost \$100, for the best fox terrier; a silver cup, to cost \$100, for the best pair of bulldogs; Thomas H. Terry offers \$100 for the best collie dog sired by "Champion Rohiu Adair," or "Tweed II," the same gentleman offers \$10 for the best collie bitch by either of the above named dogs; a member of the Eastern Field Trials Club donated \$25 for the best-looking setter that has been placed in any field trial held in England or America, the Westminster Kennel Club to compete; \$25 for the best-looking pointer dog or bitch that has been placed in any field trial, and Francis Lee Morell offers a silver medal for the best brace of Irish setter puppies to be of the same litter.

The entries for the National American Kennel Club's Fifth American Derby closed April 1st. They number eighty-eight, of which seventy-four are English setters, nine are pointers, and five are Irish setters.

## Coureing at Sacramento.

Last Sunday a party of Sacramento coursers went out to Antelope for an impromptu meeting, and had some good sport. The result of the runs was as follows:

J. M. Farrelley's b and w d Dan beat Geo. Smith's b b Emma; Thos. Waites w and b h Juno beat J. M. Farrelley's b and w d Longfellow; J. M. Farrelley's b and w h Wee Lassie beat John Devue's h b Uua; Jos. Powers' b and w d Waterford beat John Rooney's w d Snowball; J. M. Farrelley's h l and w b Fannie, ran a bye.

First ties.—Dan beat Juno, Wee Lassie beat Fannie, Waterford ran a bye.

Final ties.—Dan beat Wee Lassie, Dan and Waterford ran an undecided course and divided first and second money, Wee Lassie third.

## FISH.

## Striped Baes.

Further inquiries about striped bass in our waters have been satisfactory during the week, assuring us, as they do, that there can no longer be any doubt about their abundance. In the present apathy among those whose position ought to make them energetic and decided in repressing a grievous outrage, we gladly quote the earnest language of a leading daily on the subject. Speaking of young striped bass being caught in nets during the week, it says: "From what we learn this fish is established on the Pacific coast, the increase being, however, hampered by the innumerable small-meshed nets of the Chinese, which, in violation of the law, vex the waters of the bay. There is abundant evidence that the original striped bass introduced into the bay at Martinez, in 1879, have lived and spawned, but the Chinese nets in San Pablo and Suisun bays take the larger part of the increase, year by year, for drying and export to China. Something should be done by the Fish Commissioners to stop this dried small-fish business, which is not only contrary to law as to the size, but would not be permitted to citizens in other countries, much less to aliens whose only interest is their immediate gain." We do not suppose there is any use in calling the attention of the Fish Commissioners more earnestly than usual to this appeal, because the same complaint in other connections is made to them every week with no avail. But while the State pays an annual tax of \$5,000 to introduce the best fish into our waters, the destruction of the young shad and striped bass by the nets of the villainous Chinese, is an outrage that cannot be endured in silence. They are a people so low in moral organization that they know nothing, feel nothing, recognize nothing but robbery, manning and degradation. As to ever making them feel or recognize the obligations of law, the claims of justice, the rights of property, or the exactions of civilization, is the most absurd thing in the world. Besides they are not citizens, never will be citizens. What right, therefore, have they to fish at all in our waters professionally, and thus commit a double wrong against the State, her laws and her citizens? There is only one way to redress this wrong, and that is to exclude them from fishing in our waters altogether. No legislative, executive or municipal regulations can reach these degraded people, the proportion of whom are only human in form. Precisely how it is with the young striped bass we are not posted, but we know the young of shad cannot be touched in any way without immediate death. From inquiries we made last year we found the Chinese shipped small fish, too small for any use to Americans, to China to the value of \$100,000. Those they could not ship they either eat or dried to manure their garden patches. Should such a wrong be permitted in a people who, from their nature can be nothing but law breakers, aliens, parasites? The only way to save our money, and have abundance of good, wholesome fish food for our own people, is to exclude the Chinese fishermen from our waters altogether, or at least until by their conduct they show a proper appreciation of the privilege.

The opening of May, on Thursday, calm, warm, and exhilarating as the month generally is with us, has revived the hopes of our true anglers, and many are again talking about getting out to their favorite streams. No doubt trout fishing will now begin in earnest, but no doubt also, the State, will benefit from the delay enforced so long by the unpropitious season. Besides several other parties we hear of getting ready, a party of four gentlemen were to leave for the coast streams this week, and visit the principal, San Gregorio, Pescadero, Waddells, Brietano, San Lorenzo, and others of note. These streams lie in a lovely country, the climate of which is perfectly enchanting in fine weather. They also have two other advantages which should not be overlooked by gentlemen seeking real pleasure. All the favorite necessaries of life, fresh butter, milk, eggs, bread and meat can be had at the neighboring villages and adjacent farms on reasonable terms, and the streams themselves are too far off to be manured by the crowds of reckless men calling themselves trout-fishers, who spare nothing they can catch, and who, if unlucky themselves, will resort to all kinds of meanness to make the true angler unlucky. At this time of the year, although the streams are still high along the coast, we know no more delightful or promising section of the State to visit during the month of May and June. Whether the creels are well-filled or not, a trip to this section will well repay the time and expense.

All the older states are attending to the question of fish protection and fish culture in an earnest manner, warned by the truth that if they do not they will soon have no fish. The Iowa Legislature has enacted a law preventing the spearing of fish in any of the permanent lakes or ponds or outlets or inlets thereto within the state, between the first day of November and the thirty-first day of May next following. The sale of fish so taken is made unlawful. Any person who may draw from the water any game fish, such as pike, bass and the like, when seining for minnows for bait, shall return the same without injury under the penalties of this Act. A law of equal severity against the Chinese wholesale robberies and thieving schemes would be sound policy in our legislature when it meets.

Spencer F. Baird, United States Fish Commissioner, has a model of the largest brook trout ever taken, that weighed 11 1/2 pounds.

Fish Commissioner Buckingham has forwarded to Madem, Fresno county, a number of young catfish to be planted near that place.

Four million three hundred and forty thousand boxes of "sardines" were packed in Lubeck, Me., last year.

An attempt is being made to stock some of the English lakes with American white fish.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, Doves, etc.).

Pacific Gun Club.

The unfavorable weather last Saturday prevented the devotees of the trap enjoying their usual sports, and nothing was done in a general way.

T. Schwerin... 11110311\*11\*1\*11-11 Dahl... 1111\*(11)\*01\*10-9 A. Schwerin... 130000011\*1\*01\*1\*-6 Thompson... 110010111101-8

After the match several eweepstakes were shot off, the winners being Messrs. Brooks and Smith.

At Sacramento.

On Sunday last at Agricultural Park, the Pacific Sportsman's Club of Sacramento, held their spring medal match. It was a handicap shoot at 12 birds each.

Table with columns for names (Geo. Vaughn, Chas. Florb, A. Graves, etc.) and rows of scores for different distances (21 yards, 30 yards, etc.).

Mr. Peddler took the first medal, and the ties for the second were shot off at three pairs each, thus:

Table showing scores for Vaughn and Graves in a tie-breaker match.

Owing to the scarcity of birds the tie was left undecided. Nine members then engaged in a freeze-out at 21 yards, but there were not birds enough to complete the third round.

The California Club's Tournament.

The notable event among our local talent, and one exciting very great interest in our shooting circles, is the tournament at San Bruno of the California Wing Shooting Club of this city, for to-day and to-morrow.

Saturday, May 3d—First match—Fifteen single rises, twenty-one yards, entrance \$15; second match—twelve birds, Hurlingham rules, entrance \$10.

Sunday, May 4th—First match—Twelve birds, Hurlingham rules, entrance \$12.50; second match—six double rises, entrance \$7.50.

Prizes in above divided into 30, 25, 20, 15 and 10 per cent. Following the regular matches, as above, on each day eweepstakes will be shot, prizes in which will be divided into 50, 30 and 20 per cent.

We beg to acknowledge receipt of a pamphlet from Mr. Ramon E. Wilson containing the labors of the American Ornithologists' Union in reference to the migration of birds.

His Nibs' Letter.

The letter published in our columns last week, from our Downville correspondent, on the inapplicability of our game laws, has attracted more than usual attention, because it struck a responsive chord in many breasts.

Personal.

We acknowledge with pleasure a visit from Mr. H. T. Payne, of Los Angeles, during the present week, who visited our city as a delegate to the Republican Convention now in session.

Another Match.

To-morrow, at Bird's Point, there will be a match between R. N. Brooks and Mr. Halle. The conditions are \$100 a side, 50 birds each, 30 yards rise, both barrels; Mr. Brooks gives his opponent 2 birds.

The Napa Register says: Deer are being slaughtered in large numbers in the redwoods, and in the hills farther up the valley, in violation of the game laws.

The Oil County Gun and Rod Club is in a flourishing condition. This club was organized less than three years since, and now has an active membership of over forty, and in that number are several that will compare favorably with any field or trap shots in Southern California.

In reference to the latter match, as a guide for the future, we would recommend our friends always to use the clay pigeons. The glass halls bear no comparison to them in requiring accurate and quick shooting.

Crittenden Robinson is in possession of two photos of the leading men attending the late tournament at Chico, taken by Mr. Wood. Many of the likenesses are good.

The Forester Gun Club of Sacramento will have its next pigeon shoot May 18th.

The Lagunitas Gun Club held their third shoot of the season at Colma, Sunday, April 27th. The first match was at twenty glass balls, eighteen yards rise.

The second match was at six clay pigeons, eighteen yards rise, with the following score: Kessing 5, Rnss 5, Desbond 3, Coyle 3, Clark 1, Howe 2, Hickey 1.

We understand this record needs to be received with a few big grains of salt. The scores of 19 and 18 out of 20 by very young men excited our suspicions at once, and our inquiries only confirm them.

A flock of quail made their appearance in the western part of town a few days since. This would indicate that the pot-hunters are after the birds.—[Grass Valley Union.] So, also, may we ask when and where the unconscionable pot-hunter, in his selfish greed, is not after the quail even in their days of incubation?

Mr. Raney, the winner of the first prize \$120 at Chico, last week, is a young man of only some twenty-three summers, and promises to make a name for himself at the trap.

Dr. Knowles, one of our prominent gun men, has been experimenting of late with wood powder, the modern invention. He is so well pleased that he bought up all there was in the city, four one-pound cans.

We have already referred to the annual picnic shoot of the Gun Club of San Francisco, which occurs on Decoration Day, 30th May next. Those receiving invitations, for none but invited guests will be admitted on the grounds, we are requested to inform that they can take the boat via Sanelito at 7:30 or 9:15 A. M., to Ross Station; thence to the grounds at Laurel Avenue wagons will be in attendance for guests.

German sportsmen impose a fine on each other when they hit an animal or bird without killing it. We should like the same rule adopted in this country.

To-day, 3d inst., the Alameda county Sportsman's Club hold their third monthly shoot for club medals at Bird's Point, Alameda. Members are requested to be on hand by 1:30 sharp.

THE RIFLE.

At the Presidio.

On Saturday the last match for the long contested Silver Cup trophy, known as the Presidio Railroad Cup, open to any regularly organized rifle team in the State, came off and ended in favor of Police Team No. 1, by their beating Police Team No. 2 sixteen points.

Table showing scores for Police Team 1 and Police Team 2 across various distances (200 yds, 500 yds, 600 yds, Total).

Grand total... 314

The five individual prizes of 20, 15, 10, 10 and 5 of the entrance-money were carried off by officers Linville, Peckin-pah, Nash, N. T. Fields and McCarthy in the order mentioned.

Perhaps after this victory Linville's confidence will be revived, and he may accept some of Col. Ranlett's challenges. We hope he will.

Sunday at the Ranges.

At the present time there are so many prominent matches and tournaments in the near future, and such an increased enthusiasm in rifle shooting, that the ranges in our immediate neighborhood are especially crowded on Sundays.

The most prominent of these is the meeting of the California Rifle Association, to-morrow week, 11th inst., at Shell Mound, and we are glad it is attracting so much attention.

Sunday was a good day for shooting and many excellent scores were made. The best we have to record is the score of Lieutenant Kellogg at Shell Mound, on Sunday. It was the result of a practice at a 600-yards target, and though the sight was baffling from the haziness of the atmosphere, the score again snatches his pre-eminence among our riflemen.

In a total of twenty shots, he made 92 out of a possible 100, as follows: 1st String..... 3 5 4 4 5 4 5 5 5-45 2d String..... 5 5 4 5 4 5 4 5 5-47

Total.....92 The C. R. A. impose this distance at its forthcoming tournament for the first time, so others besides Kellogg tried it, but not with the same success. It will be the distance for the champion medal. This score makes Kellogg the favorite in the batting.

The other record spoken of above, and which we have pleasure in publishing, as honorable to the State, was made at Schuetzen Park, Alameda, by Mr. F. Boeckman, on 14th of this month. Mr. Boeckman had 50 shots at the 25-ring target, which would make the possible 1,250.

First String..... 22 21 23 25 22 21 18 24 22 18-212 Second String..... 23 25 17 24 17 21 22 23 23 24-219 Third String..... 22 25 23 24 23 23 24 21 17 19-221 Fourth String..... 21 22 16 22 24 20 19 21 24 16-205 Fifth String..... 25 24 21 24 24 16 22 15 19 14-204 Total.....1,057

The Second Artillery had its Regimental Team also out at Shell Mound and made the following score: 200 yds. 500 yds. Total. Capt. Laufenburg..... 41 47 88 Lieut. Mangels..... 43 42 85 Thierbach..... 42 41 83 Robinson..... 40 41 81 Lieut. Warren..... 41 40 81 Capt. Sprowl..... 39 41 80 Sergeant Lemcke..... 35 45 80 Corporal Lodds..... 43 37 80 Corporal Kubls..... 45 35 80 Sergeant McClintock..... 40 40 80

Afterwards Lanfenberg, Klose and Lodds had a private match which resulted in a tie all round. Lodds..... 4 4 5 4 5 4 4 4 4-43 Laufenburg..... 5 5 4 4 5 4 4 4 4-43 Klose..... 4 4 4 5 5 3 4 5 5 4-43

The German Fusiliers, also were out at Shell Mound on Sunday, to hold their regular medal shoot at 200 yards. This body use the Manser rifle, the same as used in the German army. The winners, with a possible 50, were:

FIRST CLASS. SECOND CLASS. Captain Stettin..... 36 Mr. Eckler..... 31 W. Huber..... 33 Wm. Schafer..... 29 Swbauer..... 31 Dahser..... 29

We were requested to explain this comparative low score. The Manser rifle is admitted to be the very best of army guns in the world on the field, but they are far behind the American arms in sights, at least for target shooting. In this respect, it is held there is from twelve and a half to fifteen per cent. difference between the Mausers and the American guns used on our local ranges. Putting this difference to the score made on Sunday it gives the Fusiliers a remarkable record. We doubt if the difference is accurately given, and probably ten per cent. would be a large allowance.

Lieutenant Townsend favored us with the score in the return match between himself and Captain Teller. Both these gentlemen belong to First Infantry, and this match on Sunday at Shell Mound was so equal that it required the Creedmoor count to decide the winner. The conditions were 40 shots each, at 200 yards. The score was:

Capt. Teller..... 5 4 4 4 4 5 4 4 5-43 Lt. Townsend..... 4 4 4 4 5 4 4 4 3-40 4 4 4 4 5 4 4 3-40 4 5 4 4 5 3 4 4-41 4 5 4 4 4 4 4 4-41 4 5 4 4 4 4 4 4-41 4 5 4 4 5 5 3 4 4-44

Total.....166 Total.....166 Subsequently, as a test of merit, the two gentlemen shot a single ten string each, when Townsend beat his opponent cleverly by four points. The score: Townsend..... 5 5 5 4 5 4 5 4 5-47 Teller..... 5 4 4 5 4 4 5 4 4-43

At Harbor View.

Owing to the attractions at the different ranges across the bay, the attendance of the Eintracht Club at Harbor View on Sunday, was not as large as usual, only eight members being present at their regular meeting. Twenty shots to the man, 200 yards, 25-ring target. Out of a possible 500, the score stood:

Tapken..... 353 Hagerup..... 261 Schneider..... 291 Klare..... 248 Wolf..... 276 Wirtner..... 244 Krueger..... 269 Ehr..... 220

At the same time and place the attendance of the Swiss Rifle Club, and probably from the same cause, was also very small, though some of those present, the stand-by all the year round, did some very fine shooting for the "best center," the four first named making almost plum centers. It seems as if, Herman Hopf, once so regular in his attendance, and so earnest in the welfare of the club, has deserted the target altogether. A good fine, perhaps, might bring him round again. On Sunday the score stood:

BEST CENTER. M. Steuber..... 1st prize J. Huguenin..... 5th prize G. D. Mariana..... 2d prize P. A. Giannini..... 6th prize P. Croce..... 3d prize P. Wetzel..... 7th prize J. Leemann..... 4th prize

At 20 shots each for the greatest number of bull's-eyes, the score stood: Croce..... 8 Huguenin..... 4 Mariana..... 6 Leemann..... 4 Wetzel..... 5 Steuber..... 2 Giannini..... 4

The club had its usual monthly dinner at the Harbor View House, and the usual pleasant time.

Captain Fairbanks, residing at Petaluma, and commanding Company C of Fifth Infantry, intends entering a team from his company in the contests of the Rifle Association. The company, partaking of the spirit of their commander, appreciate the duties and obligations of the citizen soldier, and have lately made some good records at the target. In all these engagements which add so much to the spirit and bearing of the man and soldier, Company D, of Vallejo, appears to take no interest and no part. We will bet a crook the Girlie Rifle Team of Solano will beat the Vallejo boys if ever they meet at the target.

At Carson.

On Sunday last the Thaxter and Crawford rifle teams had another match at Carson, the former winning. The total of the score which follows, is 863—showing good work for a company team of ten men:

THAXTER TEAM. 200 yds. 500 yds. Thaxter..... 45 48-93 Cowing..... 45 43-88 Laing..... 42 43-85 Little..... 41 43-84 Wright..... 40 44-84 Total.....424 CRAWFORD TEAM. 200 yds. 500 yds. Crawford..... 44 46-90 Alley..... 41 45-86 Hark..... 41 45-86 Saffed..... 43 42-85 Slocomb..... 41 41-82 Total.....423

The Field and Staff team of Fifth Infantry, in the true spirit of soldiers and gentlemen, do not intend the Military Trophy Cup, which they recently won, shall become private property to grace their mess-table, when they meet in official or social gatherings, but shall be again contended for if Companies A, B and C, of the battalion, so decide. The arrangement in forming the teams, however, will be changed. This time the Field and Staff Team, if they shoot at all in the next match, will be selected in rotation by the companies winning first, second and third choice, backward and forward, so as to equalize the teams of five or seven as nearly as possible, and shoot with the company selecting them. Thus Kuhnle may shoot with the Petaluma, Kellogg with the Oakland, Brown and Parsons with the San Jose Company, or vice versa if the choice be so made. This is a good arrangement to obtain a well-contested match and improve the battalion in rifle shooting, but it depends entirely upon the decision of the three companies whether or not they accept the proposal, in compliance with the wishes of Col. Ranlett, the officer commanding. The arrangements should be accepted by all means. As usual, the Vallejo Company are not in with the spirited movements of their comrades to improve the condition of the battalion.

POULTRY.

Diseases of Young Chicks.

Lice.—Of course they have no business on your little downy chicks, and they wouldn't be there if you had attended to the nests and sitting hens as I have told you time and time again, but you didn't do it, and now you see the consequences. People who refuse to take my advice generally do come to grief, and I am human enough to be glad of it!

Chicks that refuse to eat, throw their heads back, tumble over on their backs, and act as if bewitched generally, are probably troubled with the large chicken lice that at first are found only on the heads of the victims. Chicks that are adorned with top-knots are very apt to be troubled with these pests. The quickest way to get rid of these lice is to take a big pin and catch them one by one—you will not often find more than two or three on a chick—and then rub on something to kill the ulti. One of the best things for that is a mixture of carbolic acid and fresh lard—one-half-ounce of the acid to a gill of lard. If the acid not be at hand, use whale oil, or falling in that, try salted lard,—that, at least, can be found in every house.

For the common chicken lice, that infest both fowls and chicks, dust the hen just at night with carbolic powder, or with insect powder—the chicks will get their share from the mother hen—and afterwards provide a place for the hen and chicks to dust themselves.

It is a good plan to deep the carbolic powder, or the insect powder, and likewise a mixture of the carbolic acid and lard, on hand ready for use when needed.

Keep coal oil and sulphur, lard and sulphur, and clear sulphur away from young chicks: the sulphur is apt to get in the eyes and injure them, even if it does not cause blindness, and all mixtures of grease and sulphur generally kill lice and chicks together. Clear coal oil may be used on chicks if used sparingly, and no evil results follow, but when there are other remedies that are equally good and quite safe, it is better to let the coal oil alone. Just so with clear sulphur; it may be used and no harm come of it, but it is better to keep on the safe side.

Gapes.—It really seems to me that first and last I have said enough about this chicken ail, but all the same the question will be sure to come up again—nothing ever stays settled in this world!

The chief symptom of this disease is throwing up the head and gasping. The best remedy is fumigation with carbolic acid; and next best fumigation with sulphur, followed by a dose of the solution of carbolic acid and water. Shut the chicks up in a box or close coop and smoke them well, but take care not to suffocate them.

Chills are caused by exposure to cold and wet. If still able to stand when discovered, all that is necessary is to put the chick in a warm, dry place at once; but if almost dead, they must be warmed quickly, else they will soon be very dead. Dip them in water as hot as you can bear your hand in, and keep them there till they begin to protest by kicking around pretty lively; then give them a dose of pepper tea, and put in a warm place till quite dry. Treat chilled ducklings and turkeys the same way.—Prairie Farmer.

Farmers as a rule are too liable to neglect their poultry and let them shift for themselves, and as a result their poultry yard is generally composed of old hens or late-hatched pullets, or both; and even if one of the old hens should bring off an early brood, a little neglect during the cold, wet weather of early spring will generally prove fatal to the tender chicks. A little experience will soon show that one cannot afford to neglect his poultry, for there is no animal on the farm that feels the effect of careless management so quick as a laying hen; and take a lot of hens in good laying condition, even of some of the best improved breeds, and a little neglect on the part of the keeper will soon shut off the supply of eggs.

It is very rare that a hen's time is worth too much to be spent in brooding and rearing a family. This is more nearly an automatic method of rearing chickens than any which art can devise. It will, at least, run itself with less help than any other, and with more certain results.

There is no use in setting eggs which have not been fertilized, which may be determined by holding in the hand before the eyes and in range of the sun or a bright lamp. Unfertilized eggs are just as good for using, but it is waste of a hen's time to set them.

STABLE AND PADDOCK.

Physicing Horses.

There is no class of remedial agents used in the treatment of equine disorders so indiscriminately as purgatives, and probably none that cause greater mortality. Because a dose of physic judiciously administered is known to be of great value in a number of diseases, it is often taken for granted by ignorant people that it will be equally beneficial in all cases, and that because a little will do good a larger dose should do more good.

It seems almost incredible that such opinions should be held at this period of the nineteenth century by even the most illiterate; yet, nevertheless, such is the fact. Only a few months ago we were called upon to make a post-mortem examination of a draught horse that had been treated for a "stoppage" by a farrier, the animal having succumbed notwithstanding the fact that 24 drachms of alvas, besides a quantity of oil, had been administered with the object of relieving the supposed "stoppage." On examination it was found that the whole of the contents of the bowels was in a perfectly fluid state, consequently the inability to evacuate must have arisen from paralysis of the bowels caused by the poisonous doses of medicina, and not from impaction with dried feces, as was supposed.

But the indiscriminate use of physic is not confined to the treatment of disease. If a horse is low in condition, no matter how debilitated the animal may be, a dose of physic is considered the proper thing to prepare him for putting in condition. Again, if a race-horse is too fat he must have physic to reduce him, and this process of reduction is sometimes repeated till the animal's constitution is destroyed.

It seems to be the prevailing notion that whatever affection the horse may be suffering from the first object in the treatment should be to keep the bowels active, and every sign which indicates the accomplishment of this object is looked upon as favorable to recovery.

With a certain class of affections this is perfectly correct; but with others, and by far the larger majority, if we based our treatment on this idea we should be only treating a symptom while the disease was allowed to run its course, and this is the line of procedure generally adopted by empirics who know nothing of pathology or of the therapeutic action of the drugs they employ. Everyone knows that under ordinary circumstances a dose of physic will purge; but how that effect is produced is only known to those who have studied therapeutics.

In cases of strangle, influenza, inflammation of the lungs, pleurisy, catarrh, etc., we often get constipation of the bowels; but to give a strong purgative in any of these diseases would only add to the existing debility and depression, and probably cause the death of the animal in a few hours.

The desire to see the bowels acting freely in all cases of disease has led to the use of drastic purgatives, such as croton oil, calomel and aloes, where there is not the slightest necessity for them, and the effect is like adding fuel to fire with the object of extinguishing it. The disease, instead of being relieved, is only intensified and rendered unmanageable by subsequent remedial measures. In all inflammatory affections of the more vital organs, and especially the respiratory, physics should be looked upon as poison; and in all affections where there is great debility it cannot but be injurious. In young horses and delicate feeders, physic is often attended with serious consequences. Founder is not infrequently brought on in this way.

Even in cases where a purgative would have a beneficial effect, the dose given is often so large as to cause superpurgation, from which hundreds of horses die and thousands are irreparably injured.

Physic not only does harm by being administered too frequently or in too large doses, and in being given when not required, but also from the injurious nature of the articles used.

Except under the direction of a professional man, the use of physic should be restricted to very few ailments, and care should always be taken to have the animal well prepared by feeding on bran mashes at least a couple of days before the medicine is administered.

In all cases of slight derangements of the digestive organs, where it is not considered necessary to seek professional advice, it is always better to endeavor to correct the disorder by regulating the diet than flying at once to physic. These derangements are generally brought on by some irregularity in diet or management, and if they can be corrected in a natural way so much the better. If it is necessary to have recourse to physic, an under dose is preferable to an overdose, and is more easily corrected. Horses that are accustomed to hard work and hard feeding if suddenly knocked off their work through some injury, when properly prepared, are generally benefited by a dose of physic.

After physic has been administered walking exercise should be allowed, and an abundance of water, if not too cold. After purgation has commenced, the horse should be kept clothed in the stable, and allowed bran mashes and a little clean hay. Never repeat physic until after the third day, as the previous dose may not have worked off.

Answering a query as to how to halter and break a very wild yearling colt, the Rural New Yorker says: Put him in a large box stall or small pen in the barn yard, so that he is dependant on you for food and drink, and so that he can't get very far away from you. At feeding time approach him gently with a dish of oats, shorts or something that he loves, and persevere till you can get him to eat from the dish before you give him any other food. Do this each day, gradually getting nearer him each time, till he will let you put your hand on his neck and caress him. When he will do that the battle is half won. Persevere, getting more and more free with him, until you can put a head-piece of a five-ring halter on him, having about one foot of strap attached with a ring in the end, all being stout enough to hold him when the time comes. Let him wear this continually, and each time when he is eating your oats, take hold of the leading piece and gently pull it enough so he knows you have hold of it; but don't try to control him for several days. You should first secure his perfect confidence, and, above all things, you must not get angry with him or speak a harsh word. This treatment for a very few days will so tame him that he will stand when you hold the halter. Then have a leading part with a snap in the end, which you can snap into the ring on the end of the piece attached to the halter. The main thing is to let the colt understand what you wish him to do, and to reward him for doing it. Of course, you can break him much quicker with a Rarey cord; but by the latter he would be controlled through fear, by the former through love, and love is much the stronger and more lasting.

Messrs. Brown & Castro, of San Luis Obispo, have added an imported Percheron Stallion to their stud. These gentlemen are thorough horsemen, and San Luis Obispo will be a large gainer through their enterprise.

# THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE  
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE  
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET  
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

JOSEPH CAIRN SIMPSON, - - - EDITOR

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 29 and 31 Chatham street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

## ADVERTISING RATES.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 20 cents each insertion.

San Francisco, - - - Saturday, May 3, 1884.

## Declaring to Win.

"Broadchurch," the New Orleans correspondent of the New York Spirit, in one of his late letters notes the following incident:

In the Walker Handicap, run on Thursday, the Louisiana Stable had two entries, Wallensee and Fosteral. Until a short time before the start it was not definitely known on the outside which horse the stable had selected to win. The judges took cognizance of the situation, and required the owners to make a declaration on the subject. As I understand it, the latter did so under protest, claiming that no rules of the turf exacted of them such declaration. Colonel Simmons took the ground that the precedents of a century, not to speak of considerations of equity and fairness, the speculating public demanded of the owners an official declaration as to the horse they chose to win with. In the absence of a declaration, he contended, the judges would be perfectly justified in ruling off the better animal, provided he was pulled in order to let his stable companion win. The rules did make provision for punishment in the case of a pulled horse, and this would apply to the case in question just the same as in ordinary races, always provided the declaration exacted was not made. The matter derived special importance from the fact that the book-makers laid odds against the horses separately, and they were also sold separately in some of the auction pools. To prevent complications of this kind, it seems to me there ought to be a rule that would squarely cover such cases.

This has been a crying evil for years, and should be remedied by unmistakable provisions in the rules. It should not be left to so uncertain an authority as "precedent," or be dependent on the intelligence or honesty of the judges. The public have rights in the premises that cannot be ignored. Owners of race-horses are apt to contend that there is no obligation on their part to assist or protect outside speculators; that their horses are their private property and under their absolute control, to be handled as occasion requires. It is a plausible claim, but not founded on fact. They are under obligations to protect the public from imposition. The whole theory of racing law declares it. The power of the judges is vested expressly for the public

benefit. The position of Col. Simmons as given in the above extract was a sound one, as custom has established the system. But the precedents invoked do not meet the demands of the case. The whole procedure is wrong. The late Col. Gift used to say that when any one man started more than one horse at a time it was no gentleman's race. Perhaps the Col. was a radical on that point, but in his inner mind his ideas were correct. He was opposed to legalizing the act of juggling horses on the track. If horses were owned by different parties this juggling would not be allowed for an instant, but when they are owned by the same party it is legitimate. Even when the declaration of the proposed winner is made there is no absolute security for the outsider who is not admitted to the secret councils of the stable. He is invited to lay his money on the horses individually. It is not the book-makers and pool-sellers alone, who invite the public to stake on the chances of the result. Owners encourage betting and participate largely themselves. With the latitude allowed the temptation to take unfair advantages is strong, and in some cases not successfully resisted. Furthermore the best intentions of owners sometimes fail of their purpose. Trainers and jockey<sup>s</sup> lay large sums on races, and frequently the instructions of owners are cunningly avoided. In either case the public is helpless. Declaring to win is only half way. Either Jockey Clubs should go back to the custom of only one horse for each owner, or else the betting rules should be so framed that money can only be laid on stables and not on individual horses.

It is a simple proposition of equity and honesty. Without the encouragement of the public, racing would have no appreciable existence. Racing rules are intended to do even justice in the matters here referred to, but they are plainly incomplete. Let the Code be revised in the light of experience, and its faults corrected.

## The Chico Programme.

The third district fair association are the first in the field this season with their advertised announcement of stakes and purses now open. The meeting will commence on Tuesday September 2d, and continue to and including Saturday the 6th. Fourteen races are on the bill. Three of these are for trotting colts and are confined to district horses. The rest of the programme is open to the world. The district races ought to be very interesting this year. They include a purse for two-year-olds owned in the third district; a purse for yearlings with the same geographical limitation, and a purse for two-year-olds open to the third and thirteenth districts. The programme as a whole is well divided between trotters and runners, with one event for pacers, \$400 being offered for the side wheelers. For trotters there is \$400 for the 2:30 class; \$300 for the 2:35; \$400 for the free-for-all, and \$150 for single roadsters to buggy, owners to drive. This last is a capital idea and should be generally imitated by all fair associations and trotting clubs. For runners the programme offers a three-quarter dash for two-year-olds; a mile and a half for three-year-olds; three-quarter mile heats for all ages; mile dash for all ages; seven-eighths of a mile, for two-year-olds, and a two-mile dash for all ages. These are all stakes with added money. The entrance-fee is small, no more than is usually fixed for forfeit in most cases, and is made p. p. This is a shrewd method of inducing entries, and securing a goodly number of starters. The managers evidently intend to make their meeting attractive to both horsemen and the public. The programme and conditions will be found in our advertising department, and deserve careful perusal and consideration.

## The Del Paso Sale.

The first annual sale at Rancho Del Paso, property of Mr. J. B. Haggin, will commence on Friday the 16th, inst., and continue until the stock is disposed of, if not concluded on the first day. This breeding stud is one of the most extensive and carefully selected in the world, and the entire produce will be offered. The catalogue contains 135 lots, 51 highly bred yearlings and two-year-olds, the balance roadster geldings, harness, carriage and work horses. The stallions in service at Rancho Del Paso are Echo, Algonia, Alaska and Norwood, and the colts are from dams by The Moor, George M. Patchen, Jr., Lodi, Gladiator, Elmo, Langford, David Hill, Jr., Ben Franklin, Ten Broeck, Speculation, John Nelson, Echo, Whipple's Hambletonian, Gen. Dana, Winthrop, Belmont, Ethan Allau, Jr., St. Clair, Grinstead, Kentucky Prince, Volscian, Hubbard, Belshazzar, and Gen. McClellan. Among the yearlings is a bay colt, by Alaska out of the dam of Arab. The youngsters are all broken to harness and show for themselves. Catalogues containing full pedigrees of the stock, and all necessary information regarding the sale, may be had by application to Killip & Co., auctioneers, 116 Montgomery street.

## Woodburn Yearlings.

The annual sale of yearlings at Woodburn occurs on the 15th inst., when forty-two head will be offered. The stallions in service at the old farm are King Alfonso (sire of Foxhall, Fonso, Grenada, etc.), by Phaeton out of Capitola, by Vandal; Glen Athol (sire of Glenmore, Checkmate, Nannie H., etc.), by Blair Athol out of Greta, by Voltigeur; Lisbon (sire of Ripple), by Phaeton out of imp. Lady Love, by Stockwell or Caterer; Pat Malloy (sire of Ozark, Gen. Harney, Lord Murphy, Reveller, Boh Miles, etc.), by Lexington out of Glorianna, by American Eclipse; Falsetto, by Enquirer out of Farfalletta, by Australian, and Powhatan (brother to Parole), by Leamington out of Maiden by Lexington. Commissioners who have visited the farm pronounce the youngsters a good-looking lot. Among them are a brother to Glenmore, half brother to Macbeth, half brother to Springbok, a brother to Ripple, half brother to Telemachus, half brother to Brown Prince, Brigand, Madam Dudley, etc., half sister to Spendthrift, half sister to Mittie B., half sister to Atilla, sister to Katie Creel, and others of high breeding. The supply of catalogues having failed to reach us, we print in another column a descriptive list of the offering taken from the *Live Stock Record*. Col. S. D. Bruce will attend all the sales as usual, and will execute all commissions entrusted to him with his well-known ability and fidelity.

## The Eastern Campaign.

Mr. Haggin's contingent, Duke of Monday, Winnemucca, Sweetbriar and Premium started eastward last Sunday, their objective point being Louisville. Brown's string will thus be increased to ten. They will be the only California representatives at the springs meeting in the Mississippi valley, but the stable is freely engaged and the horses are reported to be in fine condition. They are at present rated as probable starters in the following events: At Louisville: Dixiana Stakes, 1-16 miles, Nellie Peyton; Woodburn Stakes, 1 1/2 miles, Marc Daly and Sweetbriar; Louisville Cup, 2 1/2 miles, Duke of Monday; Tobacco Stakes, mile heats, Winnemucca and Marc Daly; Magnolia Stakes, 3/4-mile heats, Nellie Peyton; Merchants Stake, 1 1/2 miles, Winnemucca; Swigert Stake, 1 mile, Sweetbriar; Nantura Stake, 1 1/2 miles, Marc Daly; Moet & Chandon Stake, 1 1/2 miles, Marc Daly and Sweetbriar. Latonia, Covington, Kentucky: Ripple Stakes, 1 1/2 miles, Marc Daly and Winnemucca; Merchants Stake, 1 1/2 miles, Nellie Peyton; Cincinnati Hotel Stake, 1 1/2 miles, Nellie Peyton and Sweetbriar. Chicago, Washington Park Club: American Derby, 1 1/2 miles, Marc Daly and Winnemucca; Kenwood Stakes, 5/8 of a mile, Tyrant; Oakwood Handicap, 1 1/2 miles, Nellie Peyton; Boulevard Stakes, 1 1/2 miles, Sweetbriar; Columbia Stakes, 1 1/2 miles, Duke of Monday; Hyde Park Stakes, 3/4 mile, Tyrant; Commercial Stakes, 1 1/2 miles, Nellie Peyton; Washington Park Cup, 2 1/2 miles, Duke of Monday; Quickstep Stakes, 1/2 mile, Tyrant; Great Western Handicap, 1 1/2 miles, Nellie Peyton; Woodlawn Stakes, 1 1/2 miles, Marc Daly and Winnemucca; Lightening Stakes, 3/4 mile, Nellie Peyton. Lexington: Clay Stakes, 1 1/2 miles, Marc Daly. The Lexington meeting is the first in the calendar, commencing next Wednesday, the 7th inst. Louisville follows next, May 16th; Latonia, May 30th; Chicago, June 28th. Mr. Baldwin has a number of engagements at Chicago, but none earlier than that. Mr. Winters was in the city a few days since, and stated that he did not yet know whether his horses would cross the mountains this year or not. The cause of this uncertainty, as he gives it, is that his horses have not had work enough to show their capacity, and he is averse to starting on such a trip with a string of colts that he really knows nothing about. So the weight of responsibility will rest on Mr. Haggins' horses. Patsy Duffy went with the string, and we shall expect a good report; likewise from the Santa Anita stable later in the year.

It is reported that at a meeting of the San Jose Fair Association held this week Secretary Montgomery tendered a final resignation, which was accepted, and a successor elected. It is a misfortune when officers of such proven efficiency as Mr. Montgomery drop out of the ranks. He has been a tireless worker, and steps down with an enviable record. The fraternity of journalists who have been the recipients of his genial attentions will regret to know that he is no longer in the service.

The Bay District Association are now arranging the programme of their Summer Trotting Meeting, and claim May 31st, June 4th, 7th, 11th, and 14th, as their dates. Liberal purses will be offered for 3:00, 2:40, 2:30, 2:27, 2:24, and free for all classes, and Mr. Hinchman is engaged with his usual industry, and acumen in apportioning the money, and perfecting the details of the meeting.

### The Oakland Meeting.

The spring meeting has been favored with beautiful weather, and a very fair attendance. On Tuesday the purse for a dash of half a mile was won by Harry Rose in 49 seconds, with Jou Jou second, Red Oak third, and A. A. P. last. The purse of \$200, a mile and three-eighths was taken by Trade Dollar, with Jocko second in the 2:28, and Bryant W. captured the \$200 purse, heats of three-quarters of a mile, taking the first and third heats, and making a dead heat with Haddington in the second run. Time, 1:15, 1:15 and 1:15½.

On Thursday, in the race of a mile and a quarter for three-year-olds, John A. was first in the easiest manner, and L. Newall and Fred Ross, the jockeys on Jou Jou and Harry Rose were ruled off the track for not riding to win. Time, 2:17. The Owners Handicap, heats of a mile, was won by Patsy Duffy from Joe Howell in 1:45 and 1:46. The selling purse, also mile heats, was won by Billy the Kid, Laura taking the first heat. Time, 1:43½, 1:48½, 1:54½. Summaries of all the events will appear next week.

### Capital Turf Club.

The spring meeting of this club will begin at Sacramento on Tuesday next, and occupy the remaining days of the week. The programme contains twelve numbers, six running, four trotting, and two pacing; all well filled, and the horses in good form for lively work. The free-for-all trotting, with Vanderlynn, Romero, and Albert W. in the lists, ought to be a good race. It will be Romero's first appearance since he was added to the list of geldings, and what effect, if any, that operation had on his stamina, is a matter of conjecture. This race will most likely throw some light on the question. The track at Sacramento has been remodeled to such an extent that it is almost entirely new, and with the faults of the old course corrected it is now near enough to "regulation" to please all. As the weather will unquestionably be fine, probably the pleasantest week in the season, we expect to see large attendance and no end of sport at this meeting.

### Sunday at Jerome Park.

There was a great gathering at Jerome Park on Sunday morning last. They had come to enjoy the gallops of the pleasant April morning, and they came from all quarters. Major Hubbard, accompanied by Mr. Raymond and Mr. Charles, were early on the ground, and the beaming face of the master of Preakness looked out from below the timing stand. Issaquena and Albia did a good move, and then Panique and Rataplan were sent out and finished so full of it that the owner of Himalaya, for whose benefit it was, no doubt, intended, took the hint.

"Well, Hubbard," he remarked, "I think I might as well pay you my forfeit now."

"What's that?" asked the major, not seeing the point.

"Why, my colt can't do anything like that run, and I might as well give you the forfeit now. The Withers' Stakes are yours, of course."

"Hahn't you better give it to Rowe?" retorted the Major.

"I guess Alcock's got the best claim," observed Rowe, looking very cunning.

The fact is, both Panique and Rataplan have improved very fast since they began work at Jerome Park. Both have trained kindly, and while Panique is a colt of amazing speed, and is a strong fancy for the Withers' Stakes, we must own that we have an intense fondness for Rataplan's style of going. He moves with great ease, propelling his great muscular frame over the ground with a force of a steam engine, and carries his head low like a stayer, which we think he will prove. There is no doubt that he is by Reform, as he was foaled fourteen months after Alarm's last cover. In appearance he bears a striking likeness of his grandsire, the noted English horse Rataplan, brother to Stockwell. As an evidence of this, last week we accompanied Major Hubbard and Lee to the club-house where there is a picture of old Rataplan. Lee had never seen it, but when Major Hubbard put his hand over the name and asked Lee what horse it looked like, his immediate answer was, "Our Rataplan, only our horse has better legs."

Eldorado is still the most-talked-of colt on the grounds, and so rapidly has he improved, and takes his work so heartily, that there is a panicky feeling among those who have backed Burton, Himalaya, and Reveller for the Withers. Eldorado runs something like Luke Blackburn, and dashes through the stretch, racing like a lion, and fighting for his head. Last week we called attention to Eldorado but it seems that we were not alone in our fancy for him, for within a few days past he has been backed down to 8 to 1 for the Withers. There is a rapidly growing impression that he is a better colt than Burton, but some are afraid to back him, holding that the Dwyers would prefer to win with Burton, as it would better suit their book. We are not in the confidence of the Dwyers, but they have given it out that they had not backed Burton for a cent. Many say they would prefer backing Eldorado for the Suburban than the Withers. We would not, and we could readily state why. The gelding is in the Suburban at 90 lbs. If he starts with that weight the question is, who can ride him? McLaughlin is the only one who can hold him now, as he is like a wild horse in his work. But McLaughlin cannot ride at 90 lbs., nor 100 lbs., and we do not think we have seen the light-weight able to handle so free a mover.

Eole has resumed work of the slow kind at Jerome Park. Meeting Eph Snedeker the other day, we alluded to the recent scare.

"Why do you get up such scares? Wherever I went last week I heard the story of Eole's breaking down."

"Well," replied Snedeker, grimly, "a man can't take his horse off the track for a few days to physic him without the whole world knowing it, and then there's no tellin' what they won't say. Why, Mr. Gebhardt wasn't in town, but his coachman heard the report, and came up here frightened out of his wits."

"Did you think the horse was on the verge of breaking down?" we asked.

"No; but if I was to send him along it might do it. There was a great deal of talk last spring because I didn't have him ready for the Westchester Cup. These people who know so much ought to try their hand. If they think Eole is an easy horse to fit early, that would show 'em their mistakes. I ain't goin' to break the horse down to please this one and that."

It was the remark of the late Dr. Weldon that it was permissible in a trainer not to tell the truth about his horses, "for," said he, "if he tells the truth, no one will believe him." Now, people have a way of looking upon whatever Snedeker says as an attempt at throwing them off, but there is a deal of truth in what he remarked to us. Eole is a very hearty, gross horse, and, like all such, a hard one to train, for as it requires terrible work to get him into racing condition, there is always a chance that his legs will not stand the work. It is doubtful if Eole has ever been thoroughly fit in his life. He never has had a horse able to work with him, and has broken down a dozen of those set to do the work. We never saw him look so fit as the day of the first Monmouth Stakes last season. He was our horse that day, and while he did not win, he succeeded in beating his conqueror the following Tuesday. Ordinarily Eole is a big, plain horse, with no style about him. But that day there was an absence of belly, his neck looked lean, his muscle hard, and the sweat came out as clear as spring water. His eye was like a star, and he looked the blood-like racer as

They stripped him there in the farther stall,  
A giant in stature above them all;

Hard of muscle, of sinew clean,  
And bright as a star in his mirror sheen.

Built like a castle above; below  
Like tempered steel in the furnace glow;

Bone, and tendon, and sinew show.

He is a very different looking horse now. All his old languor and indifference are with him. He does not look quite as big as he did this time last season, but there is a mighty lot to spare on him we think as we view him, leading his brother Eolist through the stretch at a canter, in which "the big horse" never did show to advantage. All talk of his appearing at the spring meeting is deemed out of the question, and if he starts for the Coney Island Cup they will be lucky. Indeed, his preparation will be slow, as, should he be unduly hastened, it is thought he would "crack" to a certainty.

The master of Preakness is noted for his fondness for a good joke, and, like all such, he occasionally perpetrates one himself. During our recent visit to Preakness, we were introduced to a nice-looking filly, by King Alfonso, "out of Macduff, sir," as Hyland remarked with emphasis.

"What do you call her?" we asked.

"Sapphire," returned Hyland.

"Sapphire?" we asked again, to assure ourselves.

"Oh, no; Sapphire—she isn't by Tom Ochiltree," retorted the master of the "black and yellow."—*N. Y. Spirit.*

Shortly after Major B. G. Thomas had purchased and imported King Ban, Mr. Cutter, the distinguished Michigan horseman, called to see the great horse, and was so struck with him that he asked the Major if he would take exception to any questions he might ask relating to him. The Major replied, certainly not as the horse was public. "Well then," said Mr. Cutter, "did you buy King Ban?" "Yes," "Did you pay for him?" "Yes." "Well, Major, did you have any money left?"

The *American Cultivator* says: The thousands of horsemen who had the pleasure of seeing the gallant chestnut gelding Judge Fullerton (2:18), during his successful turf career, little dreamed that a trotter capable of winning 104 heats in 2:30 or better would ever compete with a baboon in a race for drawing custom for a clothing establishment, yet that is his present condition here in Boston, and what is worse the monkey has the pole, with the chances of winning largely in his favor.

Mr. H. B. Hurlbut, of Cleveland, O., died last week. He was very wealthy, and during his declining years exhibited great taste for fine and fast roadsters. His stable, which contains the famous team Lysander Boy and Small Hopes, Prince Echo and others, valued at \$30,000, goes to his trainer John Miller, of Elyria, O.

The directors of the Louisiana Jockey Club have ruled off J. S. Brannon and his son William for shooting the colored rubber Betic. Under the new rules they cannot be reinstated. Their occupation as trainers is at an end.

Duke of Monday, erstwhile so nurlily at the post, appears to be outgrowing his cussedness, and is this year quite civil and tractable. If the Duke gets away from the starter well he can keep company with the best.

Count Telfener, the Italian capitalist, brother-in-law of John W. Mackay of bonanza fame, has become something of a turfman, and will introduce American thoroughbreds on the Rome race-courses.

Noah Armstrong of Twin Bridges, Montana, has sold to Armstrong & Lassa of Glendale, the six-year-old chestnut horse Ed. Wood by Forrest Goldstam, dam by John Morgan.

## YACHTING.

### The San Francisco Yacht Club Opening.

Boreas and Pluvius seem to have joined forces and entered into partnership to give the above-named club the worst day possible for its Opening Day; as, for the last few years the weather on the day appointed by the San Franciscans for the commencement of the aquatic festivities of the sailing season, have been most unpropitious. Last Saturday was no exception to the rule, except that the elements were not quite so rude as usual. At the hour fixed by Commodore Harrison, the following yachts were ready to start: the schooners Aggie, Fleur de Lis, Lurline and Purvis' new boat, as yet nameless; the yawls Frolic (flag ship), Emerald and Elia, and the sloop Nellie. On the firing of the starting gun all the yachts made a good start with the exception of the Nellie whose crew was not on board at that time. The Aggie which had been laying off and on got the best of the start, as the other vessels had to make sail and get their anchors stowed while she shot off immediately at the signal. A sharp, cold wind was blowing from the westward bringing with it a fine cutting rain which hit the weather side of the yachtsmen's faces with a force that made them tingle, and which made heavy coats and oilskins a comfort. The majority of the vessels headed off for the Contra Costa shore, so as to get out of the strength of the young ebb tide then running, but when they reached the upper of South Hampton shoal the wind hauled round so far to the northward that all of them flattened in so

as to avoid the trouble and loss of time of beating out of the cove formed by San Pablo and Richmond Points. This gave the aftermost boats a decided advantage, as they were able to tell by the trim of the sails on the leaders what weather they might expect. By the time the Brothers were passed the Aggie had a decided lead which she kept to the finish. The sun came out and showed himself in San Pablo bay, but the wind increased in violence, and such a countering sea was running, that the vessels were almost unable to keep their course. This was especially noticeable in the case of the Frolic and Emerald, as they continually kept making "shoots" into the wind and would then fall off. Off Red Rock the Elia went about and returned to the city to gather together the remainder of her party who were unable to leave business at the starting time. On reaching Mare Island straits the vessels had a dead heat to make their anchorage to the northward of Georgia street wharf, and the wind just howled through the narrow opening. The fleet arrived as follows: Aggie, Fleur de Lis, Larline and the Frolic, Emerald and Nellie bunched; Purvis' schooner came in about an hour after these. Owing to the Fleur de Lis anchoring in the middle of the straits, where the bottom consists of gravel and clay, she failed to hold, and the strong tide and wind conjointly caused her to drift into the slip of the ferry boat, but she was relieved of her predicament by the kindness and prompt action of the U. S. Tug Nellie who went to her assistance. The wind kept up all night, but this did not seem to interfere with the pleasures of the yachtsmen, some of whom went on shore while others paid convivial visits to friends on other yachts. The fleet was augmented during the night by the arrival of the Elia, Lolita and Spray, which left the city at about nightfall. The Stockton yacht Hatie, was also there, but as she laid off South Vallejo she was very unobtrusive. Sunday morning was inaugurated by a slight rain but this soon cleared off, and as if the co-partnership before mentioned had considered their duty performed, and were taking a rest after their exertions, Old Sol came forth, and with his genial rays warmed the surface of the earth. This was very pleasant during the forenoon when idleness was the order of the day, but when one o'clock, the hour for the start, drew near, and the yachtsmen looked over the side and saw the flood tide humming past and could not see the faintest indications of a breeze, discontent pervaded the minds of the sailing masters. Commodore Harrison, however, postponed the start an hour, when a light westerly breeze sprang up, with which the boats just managed to breast the tide. The boats on the Mare Island shore had a decided advantage from being to windward, as they were thus unable to ease their sheets. The Nellie, to keep up her reputation of being late did not start until the big yachts were out of sight round Mare Island. On making the San Pablo bay, the Fleur de Lis and Elia stood over to the Contra Costa shore, while the others went about as soon as they could weather the light house, and kept up towards the Sonoma flats. The Fleur de Lis gained considerable advantage from the course she took, as she caught a slant of wind well down to the southward, and was enabled to keep along the Contra Costa shore, out of the ebb tide, with sheets slightly lifted. When she was about off Pinole Point the ebb tide began to make, and the Chispa came out of Carqueize Strait, followed about half an hour later by the schooner Nellie, both boats having come of Turner's ways, where they had been cleaning. With the ebb tide the Fleur de Lis began to lose some of her lead, as the Aggie and Lurline could then get into the channel where there was more wind. The vessels had now formed the usual procession with the flyers in the lead, but contrary to rule the smallest vessel in the fleet, (the Spray) was not at the tag end, but held her end up with the yawls. Astern of her was the Nellie, who has now no centerboard and only an apology for a keel, and the Elia who split her jib coming up and had horrified an extra jib of a fishing boat to replace it. Off the Brothers the wind fell very light, the yachts frequently being almost without steering way. No official time was taken, but the Aggie passed the finishing line first followed by the "Lily of France," Lurline, Nellie and Chispa, while the others made the city any time between seven and eleven. While it is commendable in Commodore Harrison in getting up this cruise so soon after his election, we consider it a slight mistake to start for Vallejo, against an ebb tide and with only a very young moon, as the ebb tide being two hours later at Vallejo, prevents the small yachts especially from getting home at any reasonable hour.

We are happy to be able to announce the re-organization of the old Lotus Sailing Club, which was originally incorporated about thirteen years ago. They will sail this season on Stones' new forty-seven-foot schooner, which has been named the Eva. The roll includes some of the old timers: C. P. Farnfield is president; Will Brooks, secretary and treasurer, Oliver Eldridge is back in his old position as commissary, and Mr. Wheeler, of Hawley Bros., sailing master. The names of the members include several well-known citizens, and altogether there are about twenty members. They have a charter of the yacht for five months, and will make their first trip to-day.

The Pacific Yacht Club open the yachting season to-day, according to the sailing orders already published in this paper. As from the present writing the clerk of the weather, to all appearances, gives promise of good weather, and as more time has been given yacht owners to prepare, we expect the Junior Club will have a larger number of yachts to participate. The only yacht belonging to the club that we know will not sail in the squadron is the Ariel, which has not yet been cleaned. She will, however, do her usual duty of anchoring off the club-house, and look handsome.

We regret to hear that there is no prospect of the forty-foot schooner of Stones' yacht Rattler making her appearance afloat for some time at least, as the young men who purchased and finished her will not have time through family and business arrangements to take her out. They are now looking for a purchaser for her. If she is sold again it will be the second time before leaving the stocks, which is astonishing for such a nice little vessel.

The yawl modeled by Captain Hall and built by Stone is afloat. She looks very handsome as far as the hull is concerned, but seems too lightly sparred for beauty. She is a keel boat, very deep, with little beam, and is quite roomy. No doubt from her lines, draught and small sail area she will be very seaworthy.

Purvis' new schooner, about which so many remarks have been made in the dailies for the past two years, has at last made her appearance, and looks much better than her lines when seen on the stocks gave promise of.

The Magic is now resplendent with paint, and her cabin looks one blaze of light from gilded moldings and very red cretonne. Cretonne looks very well on a yacht, but the salt air soon fades and tarnishes it.

A Chat About British Jockeys.

[London Sportsman.]

"The jockey of the period" is, without doubt, a prominent figure amidst the living units that combine to form our social scale; his name is a household word, his movements, both in public and in private, are the theme of repeated conversations; it is the practice amongst turf habitués of all grades to speak of "Fred this or Tom that," with almost fraternal familiarity. A pigskin performer is looked upon *de facto* as public property, and when, having donned the silk or satin of some patrician pillar of the turf after a desperate finish, winning a classic race of renown, on returning to the paddock to weigh in, the victorious horseman is even a more popular but evanescent hero of the hour than an all-conquering general such as Lord Wolseley after his Egyptian campaign, or even the Premier himself when flushed with the excitement of a successful party division. The life of a jockey is very different to what it was wont to be when "the Chifneys" and "the Buckles" were lions in the land. In those pristine days traveling was slow and arduous; a journey from north to south was essentially an undertaking, and races numerically had not assumed anything like the Brohdigagian proportions that they have in the present year of grace, 1883. Facilities of locomotion have metamorphosed a jockey's career; now it is by no means an exceptional case for men like Archer or Wood to ride various trials on Newmarket Heath in the morning, proceed to Epsom or to Sandown, go through a heavy day's racing, and return at night to the metropolis of the turf to enjoy home comforts and the frugality of living their vocation necessarily entails. Leaving the light-weights out of the question, inasmuch as, as a rule, they are boys, and have to learn the experience of life, Osborne, Fordham, Goater, Archer, Cannon, Webb, Wood, and Snowden stand out conspicuously as names that for years had ever and anon figured before the public in connection with every species of legitimate racing contest, from the Derby itself down to the most insignificant selling plate. John Osborne stands out as the eldest of the eight enumerated, "Owd Johnny" having first seen daylight on 7th January, 1833. Consequently, fifty summers have passed over his head. Almost from his very infancy it may be said that he has been acclimatized to the stable and the saddle. "Old John," the father, was a well-known Yorkshire racing trainer and owner; his face, his gait, and even his gaiters were familiar objects of recognition at every racing rendezvous—"twixt Trent and Tyne," and I can recall to memory the time when the sombre chocolate jacket and black cap, with the flying Exact and others was well-nigh invincible. Young John, subsequently nicknamed "The Pusher," had, when almost a feather-weighted youngster, plenty of riding for his father and for his father's patrons. He had not long passed his majority when the late Lord Zetland, of Voltigeur fame, entrusted the spotted jacket of Aske to him on Vedette for the Two Thousand Guineas. Vedette was a curious horse to train; one day he was apparently sound, another decidedly lame. His infirmities were generally attributed to gout, but when in the humor I think it must be admitted he was the champion of his year, and possibly Blink Bonny, Adamas, and Black Tommy, who finished head and head for the Derby, were fortunate, inasmuch as, by an oversight, Vedette's nomination was omitted from the Epsom contest, otherwise, like his son Galopin, or his sire Voltigeur, I think blue-riband honors would have awaited him. John Osborne during his career has scored nearly every high race of importance, including no less than five two thousand guineas, viz., on Vedette, Pretender (hailing from Middleham), Bothwell (the coffin-headed, from the same renowned locality), Prince Charlie (who recently has been exported to America after failing at the stud in England), and Camballo, whom I once heard Matthew Dawson pronounce the best horse he ever trained—no mean compliment, considering Thormanby received tuition from Matt's experience. In the one thousand guineas, Apology, belonging to Parson King, as also in the Oaks and St. Leger, obtained a triple laurel crown under Osborne's manipulation, whilst, in addition, Pretender for the Derby and Lord Clifden for the Leger, help to swell the Ashgill triumphs. Cool, calm, and collected, a splendid judge of pace, with great power and unceasing determination, John Osborne is the beau ideal of the old school of riding, whilst his unswerving honesty of purpose and integrity of character justly entitled him, notwithstanding his unpretentiousness of manner, to be designated one of nature's unpolished gentlemen. Next in age, though not yet quite a patriarch, comes the "Grand Old Man" George Fordham, "The Kid" of our salad days, and the "Demon" of our mauhood. Fordham is now forty-five years of age, consequently five years the junior of John Osborne. Yet for nearly thirty-five out of the forty-five seasons Fordham's life in the saddle would present an epitome of the Victorian era of our national pastime. Originally a stable apprentice with Drewitt, of Lewis, George, by his artistic talents, speedily emerged from obscurity, and after he had ridden Little David for the Cambridgeshire, in the autumn of 1853, and Epaminondas, belonging to Capt. Lane, for the Chester Cup in the spring of 1854, he never once looked back, but throughout the length and breadth of the land was in earnest request by both patrician and plebeian owners whenever on equine contests bent. At one time it was in the black and yellow cap of Mr. Padwick (racing as Mr. Howard), of financial fame, on Virago, Scythian, and others that Fordham was in the van. Anon Mr. Ten Broeck, the American, for Prioresse, Starke, Paris, Umpire, etc., enlisted his assistance. With the well-known tricolour of Mr. Lefevre he was ever dangerous, whilst recently the blue and yellow of the house of Rothschild has attained a presumptive right to "George's" invaluable services. Strange to relate, though Fordham has ridden more winners than any other jockey of the present or any other previous era, he has been singularly unfortunate in the Derby, Sir Bevy's alone enabling his name to go down to posterity in connection with winning that event, whilst the St. Leger has never once fallen to his lot. As a horseman, when in his zenith, Fordham never had his superior; he rides with his hands as well as his head, he possesses almost a supernatural power of discriminating exactly what his horse can accomplish, and though frequently some distance from home apparently on a beaten animal, by careful nursing, with one final overpowering rush he has just got home, and literally, as it were, snatched, to all intents and purposes, a hopeless race out of the fire. Those who saw his finish this season on Ladislas for the Jockey Club Cup, qualified to pass a judicial opinion, pronounced it "the poetry of riding." Jem Goater is another of the "old hands" the same age as Fordham; Goater has done yeoman service in his day; years ago I recollect him steering methinks it was Joe Miller, round the Roo-dee soup plate in advance of forty-two opponents, the largest field ever stripped for the Cestrian Cup. Since those halcyon days Goater has had many masters and seen many vicissitudes; as a young man he had a very elegant seat, and, being gifted with a long reach and strong arms, was invariably found powerful enough to manage the most fiery thoroughbred. From Lord Portsmouth, the late Captain Savile,

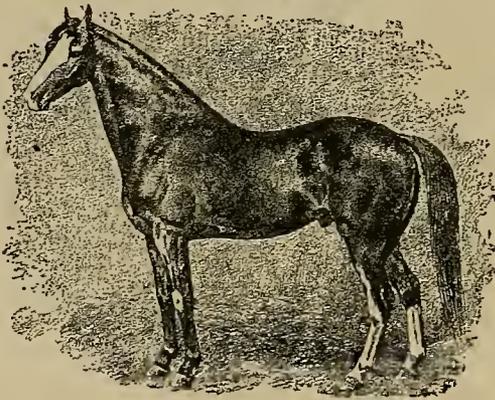

and the late Count Lagrange our "James" received plenty of employment, and amongst other triumphs two St. Legers, respectively on Petrarch and Rayon d'Or, have fallen to his share. How shall I sing the praises of Archer—Freddy Bowman—the so-called irrepressible "Tinman," for who does not know his fame, who has not witnessed scores and scores of his triumphs? Comparisons, I know, are odious, but surely one who has for several years headed the list of winning mounts, and who has attracted the attention of that important functionary "the man in the box" upwards of 1,200 times in six seasons, is deserving of the highest eulogies a sporting writer sees fit to bestow. Guineas, Derbies, Oaks, and Legers galore have been registered to his fame. Who that saw it can forget his finish on Bend Or at Epsom, in 1850. Who can obliterate from recollection his triumph with Galliard for the Two Thousand Guineas, or the sensational performance which brought Dutch Oven to the front for the St. Leger? *Facile princeps* is, indeed, a title that Frederick Archer has fairly earned. To use truthful English, he is a veritable "Prince of the pigskin;" at times by meteoric displays of artistic earnestness and never-say-die determination, he arouses even the enthusiasm of the lethargic and *blase* patrons of the ring, who vociferously render honor to whom honor is due, even if financially they have to pay the penalty of his powers. Archer is a Newmarket resident; there he has built for himself a substantial mansion, having married the daughter of John Dawson. In addition to the princely income that he earns by his profession, he also is in partnership with Matthew Dawson in the Heath House training establishment, and he may safely be summarized as a living embodiment of success. Tom Cannon, like Archer, is one with whom the world has prospered. The son of a livery-stable keeper at Windsor, he gradually advanced until he is now the recognized master of Danebury, the mentor of a mighty stable, the owner of a prominent favorite for next year's Derby, and one of the most finished jockeys of the day. Tom Cannon in the saddle is nattiness personified, whilst with a delicate two-year-old requiring careful handling, he is universally admitted as a graduated "master of arts." Probably no jockey has made lately greater strides in his calling than Charley Wood; when originally an apprentice with the late Joseph Dawson he seemed to lack power and judgment—practice possibly makes perfect, so that nowadays neither Archer, Cannon, nor others can afford to take the slightest liberty with "Master Charles," his finish on Hornpipe for the Steward's Cup at Woodward this year being a striking case in point. Wood, in 1853, had a wonderful season, riding St. Blaise for the Derby and the winners of a large proportion of the prominent handicaps. Last on the blazing scroll of fame I come to Fred the Second, viz., Fred Webb, increasing weight has somewhat militated against Webb's career as a rider. Yet he is all there when needed. Doncaster, a chestnut scion of Stockwell, at Epsom, brought Webb fame and fortune, and with many of Robert Peck's *coups*, directly or indirectly, "the man of Kent" has been mixed up. Reticent and reserved to a degree in manner, Webb very likely in the future will become more celebrated as a trainer than ever as a jockey. He has some capital stabling at Kennett, near Newmarket, where he is greatly esteemed and respected. The eight shining lights of the racing arena that I have indulged in a chit-chat about all stand out vividly as impersonifications of men without fear and without reproach, giving substantial evidence that on the turf, as in other mundane matters, honesty is the only royal road to substantial success.

Sam Gamble has been appointed Superintendent of the new track at Fresno. The genteel Sannel can be depended upon to know just what the horsemen and their animals need, and to treat all with whom he comes in contact with that unaffected urbanity which is one of his virtues.

The Ukiah Park Association of Ukiah, Mendocino county, will hold a spring racing meeting on June 4th, 6th and 7th.

STALLIONS THOROUGHbred.

The Thoroughbred Stallion

JOE HOOKER, BY MONDAY.

First dam Mayflower, by imp. Eclipse.  
 Second dam Henrie Farrow, by imp. Shamrock.  
 Third dam Ida, by imp. Belshazzar.  
 Fourth dam Gamma's dam, by Sir Richard.  
 Fifth dam, by imp. Eagle.  
 Sixth dam Bet Bosley, by Wilkes' Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by imp. Stirling.  
 Ninth dam, by Clodius.  
 Tenth dam, by imp. Silver Eye.  
 Eleventh dam, by imp. Jolly Roger.  
 Twelfth dam, by Partner.  
 Thirteenth dam, by imp. Monkey.  
 Fourteenth dam, imp. mare from the stud of Harrison of Brandon.  
**TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasture for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.**  
 My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freeport road.  
 This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN, January 20th, 1883.  
**THOMAS WINTERS, Sacramento, Cal.**

The Thoroughbred Stallion

WILDIDLE.

By imp. AUSTRALIAN. Dam Idlewild, by Lexington.  
 This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.  
 Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:22, at two years old), May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.  
**Terms of season, \$75, payable at time of service, and in all cases before removal.**  
 Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address  
**H. C. JUDSON, Owner, or W. L. APPELBY, Supt., Santa Clara, Cal.**  
 P. O. Box 223.

STALLIONS

—AT—

RANCHO DEL PASO.

For the Season of 1884.

Thoroughbreds.

LONGFIELD.

Chestnut horse, by MONARCHIST, he by Lexington.  
 First dam, Dame Goulay (Blue Gown), by Planet.  
 Second dam, Flora G., by Lexington.  
 Third dam, Fanny G., by imp. Margrave.  
 Fourth dam, Lances, by Lance.  
 Fifth dam, Aurora, by Aratus.  
 Sixth dam, Paragon, by imp. Buzzard.  
 Seventh dam, Indiana, by Columbus (son of imp. Pantaloon).  
 Eighth dam, Jane Hunt, by Hampton's Paragon.  
 Ninth dam, Moll, by imp. Figure.  
 Tenth dam, Slamerkin, by imp. Wildair.  
 Eleventh dam, imp. Cub Mare, by Cub.  
 Twelfth dam, Aramantus' dam, by Second.  
 Thirteenth dam, by Starling.  
 Fourteenth dam, by Croft's Partner.  
 Fifteenth dam, by Greyhound.  
 At \$50 the season, due at the time of service.

JIM BROWNE.

Chestnut horse, by FOSTER, he by Lexington.  
 First dam, Flush, by Hiawatha.  
 Second dam, Fanny Bugg, by imp. Ambassador.  
 Third dam, Ida, by imp. Belshazzar.  
 Fourth dam, Madame Bosley, by Sir Richard Tonson.  
 Fifth dam, Nancy Nichol, by imp. Eagle.  
 Sixth dam, Bet Bosley, by Wilkes' Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by imp. Stirling.  
 Ninth dam, by Clodius.  
 Tenth dam, by imp. Silver Eye.  
 Eleventh dam, by Jolly Roger.  
 Twelfth dam, by imp. Partner.  
 Thirteenth dam, imp. Monkey.  
 Fourteenth dam, an imp. mare from the stud of Harrison of Brandon.  
 At \$50 the season, due at time of service.

Trotting Stallions.

ECHO.

Bay horse, by RYSDYK'S HAMBLETONIAN.  
 First dam, Fanny Felter, by Magnolia, son of Seely's American Star.  
 Second dam, by Webber's Kentucky Whip.  
 Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of imp. Messenger.  
 At \$100 the season, due at time of service.

ALGONA.

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian.  
 First dam, Emma Kincaid, by Conscrip, son of Cassins M. Clay.  
 Second dam, Elsie Dean, by Mambrino Chief.  
 Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy.  
 At \$100 the season, due at time of service.

ALASKA.

Brown horse, by ELECTIONEER.  
 First dam, by Washington, he by Geo. M. Patchen.  
 Second dam, by Williamson's Belmont.  
 At \$50 the season, due at time of service.  
 The season for thoroughbreds will commence February 20th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escapes or accidents.  
**John Mackey, Superintendent, Sacramento, Cal.**

THOROUGHbred STALLION

X X.

Pedigree.

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.  
 First dam, Columbia, by imported Bonnie Scotland.  
 Second dam, Young Fashion, by imported Monarch.  
 Third dam, Fashion, by imported Trustee.  
 Fourth dam, Bonnets o' Blue, by Sir Charles.  
 Fifth dam, Reality, by Sir Archy.  
 Sixth dam, by imported Medley.  
 Seventh dam, by imported Centinel.  
 Eighth dam, by Mark Anthony.  
 Ninth dam, by imported Jants.  
 Tenth dam, by imported Monkey.  
 Eleventh dam, by imported Silvereye.  
 Twelfth dam, by Spanker.  
 See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.  
 X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the grandam of Antee. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauantia, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hook Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.  
 Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.  
**JOSEPH CAIRN SIMPSON, Oakland or 508 Montgomery Street, San Francisco.**

**HERD AND SWINE.**

**Care of Cows at Calving Time.**

In a state of nature cows give milk only for a limited time, and this time has been much extended by man's art. But by forcing nature we have produced an animal which is more liable to disease and accidents, and as a result the care and treatment must be improved in proportion. In nature, few if any accidents or diseases are attendant upon parturition. If we have improved upon nature in some respects, we must see to it that we make like improvement in all essential connecting points. Different animals of the same breed give milk for different lengths of time naturally, and just how near to parturition a cow should be milked before drying off is an unsettled question. We keep cows for profit, and the longer we can induce them, limitedly, to hold out in their milk the better we are satisfied. In order that the cow may give milk, and at the same time support an increasing fetus, the feed and care must be proportionately generous. My own practice and opinion is that a cow to be profitable should hold out her milk, and be milked to within six weeks, or two months at most, of calving. I have had them give milk to within four weeks without apparent detriment to dam or offspring, and with only ordinary treatment and care. A cow which is kept in good, but not high condition, will hold out in milk longer than one in poor condition, and will pass parturition with much less risk.

Commencing, say six weeks before time for calving, a change in feeding should generally be adopted, slight at first, and greater at the approach of parturition. It is natural for pregnant animals to become costive as the period of delivery approaches, and the feed should be given with reference to such tendency. The object is to keep the bowels open, and in a normal state; this result is attained by feeding a few roots—potatoes are the best, I think—commencing with about one quart per day, and gradually increasing to ten, twelve, or even more. Other roots may be substituted, or even a pail of slops—bran, middlings or the like, in water, say one to three quarts in a pail of scalding hot water—in the absence of roots. Most of the roots may be omitted if the cow runs in pasture with lush feed, or can have a good feed once or twice a day of green, succulent food, like ensilage, if sweet and good. All these are preventives of constipation.

About a week before calving the cow, if kept up, should have a box stall or pen sufficiently large for convenience, so that she may not be worried by other stock. She should not be disturbed any more than is necessary for feeding and watering; still, one should keep an eye over her as the time approaches for her calving. I have never yet seen the necessity for administering any medicine before calving; neither do I believe there is any where the cow is healthy and properly cared for. The cow should have moderate exercise daily, and should never be worried. If at pasture she will get natural exercise. Her stall should be always dry, and kept well cleaned. I do not recommend any interference, or the presence of any individual in her sight at calving, but the herdsmen may be in proximity, unseen by the cow, but where he can observe her movements. I consider even this as unnecessary, where previous conditions are normal. Where one foot or leg only appears, and the other is doubled back, often a little assistance by pushing the calf back just at the right time, and straightening out the other leg will result in good, and may be done by any one of good judgment. Anything farther than this belongs to the veterinary surgeon.

If the cow is in health, the placenta will come away naturally, in the course of a few hours at most. Let the cow get at and lick the calf all she wishes. If the placenta comes away immediately, put it out of sight. After the cow has licked the calf let it suck what it will, and when satisfied strip out any remaining milk and give it to the cow to drink, adding a little (say an equal quantity, if the whole does not make over a pailful) warm water, stirring in about one quart of rye meal or shorts. Such a mess will be all the medicine necessary in ordinary cases. Let the calf and cow remain together for 24 or 48 hours, giving the cow water slightly warmed. Then they may be separated—the cow put in her stall or to pasture, and the calf put into a small, clean, and dry pen. After the calf is 24 or 48 hours old, if the cow's bag is caked or hard, twice a day is sufficient for the calf to suck. When the cow feels inclined to eat, she should be given some sweet, fine rowen, or, if at grass, may graze as usual. She is better if fed as long as she and the calf are together. Her drink for a few days should be slightly warmed. What she needs is quiet and rest with nourishing food—not stimulating drugs and medicines.

Should the cow's bag be caked or hard, fomenting with warm water, and working thoroughly but carefully by hand, will very likely soon reduce it to normal conditions. Feed the cow generously with good hay or grass, giving nothing of a heating nature like corn or oil meal for two weeks after calving, after which she may be gradually returned to her usual feed with the herd. There is nothing gained by "coddling," natural food, treatment and conditions are better, while nature restores and asserts itself. If the cow receives the foregoing treatment and care, with no undue exposure to cold and storms, there is no apprehension from future trouble from any natural cause. When the calf is 48 to 72 hours old it may be taught to drink from a pail, instead of sucking. Give it, say 2 quarts of new, first drawn milk at a feed at first, increasing the quantity as the calf grows. Four quarts a day is sufficient for the first week, fed three times a day at equal intervals, in equal quantities. Let the calf take two of the fingers at first, as it would the natural teat. After feeding once or twice thus, the fingers may be gradually withdrawn while the calf is taking the milk, and the calf soon learns to drink without the fingers. A leather strap or artificial teat fastened to the pail so that the calf will suck in the milk slowly, will be most natural, allowing the saliva to flow and mix with the food to a greater degree.

Setting trouble aside, feeding instead of suckling is the better way, whether the calf is to be raised or fattened for the shambles. After the first week, a little oat or barley meal may be added to the milk, beginning with a tablespoonful at a feed and increasing to a pint a day at the end of six weeks. At the end of two weeks, two parts of skimmed to one of new milk may be fed with the meal, instead of all new milk—the quantity being increased as the calf grows older. Judgment must be used here. If too much is given, the calf will grow pot-bellied; if not sufficient, the calf will be poor. After the calf is two weeks old two feeds a day are sufficient, with a little clean water and a wisp of hay or grass within its reach. Hay tea may be substituted for milk, if the calf is raised, mixing a little larger portion of oat, barley or linseed meal than with the milk, gradually increasing its feed as the calf grows. Always give the calf a clean, dry bed and pen, with free air, without exposure to atoms or the hot sun. The longer you feed the calf milk the better the growth, up to six months or more; but usually the calf will gain its livelihood by grazing after reaching the age of twelve or fourteen weeks. Water

should be supplied, so that they may drink at pleasure; and also, after the calf is two to three weeks old, a lump of chalk and one of rock salt for it to lick. If scours occur, reduce the feed for a time; fasting is better than drugs or medicine.—*Country Gentleman.*

Col. F. D. Curtis writes to the *Tribune*: "Farmers would be surprised to see how much salt pigs will consume if allowed all they will eat. I have come to the conclusion that it is essential for their health as for that of any other domestic animal, if not more so. I have seen two of my pigs in a pen eat a small handful of salt. It should not be mixed in the food lest too much be given—but be put in the pen either in a clean dry spot or in a box where they can help themselves as instinct or appetite may direct. Two other things pigs crave, sulphur and charcoal. I buy dirty salt very cheap, which is just as good for pigs and also for cattle, and keep a barrelful in the pig house all the time. I buy crude sulphur by the barrel. Charcoal is easily made by burning green wood in the stove and raking out the coals. The cinders from coal are also good for pigs and they will pick out the smallest bits. They seem to have an instinct to know that the little potash (alkali) they contain is good to correct acidity of stomachs and to check fermentation. Charcoal does the same thing more effectually. The sulphur acts as a corrective in the stomach, purifies the blood, and heals and prevents skin disorders."

It is a general belief among farmers that milk for calves should be slightly warmed, at least to the temperature natural when taken from the cow. The calves will drink it more freely at this warmth. When, however, the heating is done on the stove it is apt to be warmer than new milk. This is injurious. Milk that has been scalded is constipating, even when given cold. If the calf takes food much above the temperature of the stomach the digestive organs will be weakened. Too warm food and drinks are fruitful causes of dyspepsia in men and women, and will be in farm animals if the latter are subjected to their influence.

At a Jersey cattle sale at New York, March 27th, \$6,200, the highest price ever received for a Jersey animal at auction, was paid by the Hon. Henry L. Pierce, of Boston, for a cow four years old, by Stokes Pogis III, out of Bessy of St. Lambert. Mr. Pierce also paid \$3,800 for a cow by Stoke Pogis III, out of Jassamine of St. Lambert. The total receipts from the sale were \$49,360, of an average price of \$601.97 for each animal.

Nebraska is coming into increased prominence every year as the leading sheep-feeding state of the west. The best fat sheep from the trans-Missouri region received at Chicago are from that state whose consignments are now figuring in the totals marketed at that place. It is a peculiarity of the business, however, that very few sheep are raised in Nebraska. Nearly all that are fed are driven in from Oregon and California.

The old rule was that a heifer with her first calf could be reckoned half a cow. They will generally be better than this if well cared for. If the family from which the heifer springs has been a good milking strain, they can usually be bought of native breeds for much less than they are worth. They will more than pay their way, and yearly increase in value until they are six years old, when they are at their prime.

At the Munster Agricultural School cows were fed on ensilage for a week and on mixed food for a week. The milk was analyzed and the butter weighed which had been produced in each instance, with results almost identical, the experiments proving that ensilage was not inferior to ordinary food.

It is claimed that while cows giving exceptionally large quantities of milk will sometimes make large butter tests, as a rule the two things do not go together, being inconsistent with each other.

Indications point to the removal of a good many herds of cattle from the Indian Territory to northern ranges the coming season. Grass in that country is still abundant, but legislation is adverse to the stock interest.

Shorthorns took most of the prizes at the recent live stock show in Paris.

One-sixth of the Montana cattle-raising business is in English hands.

Alfalfa is fast becoming the source of winter pasturage in Texas.

**BILLY HAYWARD, 489,**

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

Mambrino Trotting Stallion

**ABBOTSFORD.**

Record 2:19 1-2.

Will make the season of 1884, at the ranch of S. B. Whipple; San Mateo, Cal.

**PEDIGREE.**

By Woodford Mambrino; his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Faymaster; dam Woodbine, (dam of Wadegawood, 2:19), by Woodford, son of Kosciusko, by Sir Archy.  
Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine foals and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Convoy 2:22 1/2; Magenta 2:24 1/2; Manfred 2:25; Panceast 2:25 1/2; Rachel 2:26 1/2; Inca 2:27; Lady McPartridge 2:29; Dacia 2:29 1/2; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Princess, the sire of Trinket 2:14. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,300 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.  
Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:18 1/2; Commonwealth 2:22; Brian Woodruff 2:25; Valley Chief 2:25; Faustina 2:28 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

**TERMS.**

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

**WASH JAMES, Agent.**  
San Mateo, Cal.

The Trotting-Bred Stallion

**A. T. STEWART,**

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, sixteen and one-half hands high, and weighs over 1,200 pounds. Bred by D. L. Harris, of Fayette County, Kentucky. Foaled in 1872, and is an imported Mambrino. Sired by Mambrino Patchen (full brother of Lady Thorn, record 2:18), sire of Katie Middleton, 2:23, and nine in 2:30 list. Dam by Mambrino Chief, sire of Phyllis 2:17 1/2; Adelaide 2:18 1/2; Commonwealth 2:22; Brian Woodruff 2:25; Valley Chief 2:25; Faustina 2:28 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

Terms for the season, \$30.

Address **SOBERS & AYER,**

Daughters of Glenelg.

Glenelg mares have been such tough campaigners that few of them have been any length of time at the stud as yet. But the excellent race recently won in England by the Duks of Hamilton's three-year-old bay colt Loch Ranza, by Wild Tommy out of Loch Tanna, will create quite a demand for Glenelg fillies at the coming Elmendorf sale. Loch Tanna was bred by Mr. Sanford at what was then called North Elkhorn, but is now known as the Elmendorf Farm. She was foaled in 1876, and was got by Glenelg out of Stamps, by Lexington; grandam Mildred, by Glencoe; great-grandam Lavity, by Trustee. She was sent to England as a yearling, and was unplaced in the One Thousand Guineas, won by Whal of Fortune. She was covered by Duke of Hamilton's Wild Tommy in 1880, and her first produce was this colt, Loch Ranza. Wild Tommy was by King Tom out of Wild Agnes, by Wild Dayrell; grandam Lillie Agnes, by The Cure. Wild Tommy's first race at three years old, when he beat Great Tom (now in this country, and a promising sire himself), Colnase and Camembert. He was unplaced to Kisher in the Derby, and his next race was in the St. Leger. The betting was 2 to 1 against Kisher, 5 to 1 against Petrarch, and one hundred to one against Wild Tommy. Petrarch, ridden by J. Goater, won by a neck from Wild Tommy. But a great deal of Loch Ranza's excellence comes from his dam Loch Tanna, whose dam Stamps threw Katie Pearce to Leamington (she was a good broodmare); Start to Glenelg (she was a winner in England, and is also owned by the Duks of Hamilton); Bertha to Glensig, owned by Mr. P. Lorillard; Loch Tanna, as above; Valleris, by Glenelg or Virgil (probably the latter), owned by Mr. W. L. Scott; Hazard (P. H.) to Glenelg; Lonisette to Glenelg; a bay colt, full brother to Louisette, owned by J. E. Kelly; and a full sister to Louisette, which will be offered at the coming sale at Mr. Swiger's. In all probability, the Glenelg mares now in England will demonstrate their great value to English breeders much earlier than any one this side of the water thought. But American breeders should follow a good precedent, and put sons and grandsons of King Tom to daughters of Glenelg.—Sportsman.

An Interview with J. McLaughlin.

"Mr. McLaughlin," said the reporter, "you srs beyond a doubt the favorite jockey of this country, and your career last year was something wonderful. Your winning the two trophies offered by The Sportsman for the jockeys who won most money for his employers, and for the jockey who won most races, only emphasized the fact which every man interested in the turf had recognized—that you were the most successful rider of flat races on this continent. Now, to what do you ascribe your success?"

"Well, I'm learning all the time. I love horses, and study their dispositions. Horses vary very much. Now, there's a Kinney, one of the gamest horses I ever rode, but if I touch him with the whip he swerves right away. Whereas, if I spur him, his answers if he can. If he cannot, I don't go on punishing him, because that would do no good. I must learn the points of my horses, their little ways, and what they can do. Miss Woodford I never whip nor spur, because it isn't necessary. I know that she will do all she can without it. I gave her the whip once," and he said this with evident regret, "but I never have since. The fact is, I do not punish half as much as I used to. I talked it over with Mr. Roe, and he convinced me that the good horses were not improved by punishment, but quite the contrary. They sort of feel the injustice of it in their hearts, and it vexes them, and they run less freely. Now I just give a touch of the spur to call on them to do their best, and good ones answer all they can. Of course there are some horses so lazy that they have to be punished from start to finish, and I don't spare that kind. Were you at that extra day down at the beach when Eole beat Kinney?"

The reporter nodded assent. "Now that was a case in point. I gave Kinney the spur, and when he did not answer I knew it was because he couldn't, and I didn't continue to punish him."

"That was a tough finish, wasn't it?"

"Yes, that was the hardest finish I ever rode."

"But how was it that Kinney beat Eole on the Saturday previous?"

"Well, I might guess, you know, although I didn't see it. Eole got up to Kinney's hip at the head of the stretch, and that was the last I saw of him. But Eole is a hard horse to ride, and takes a deal of riding, and I might guess that Donohus, his jockey, was tired out."

"But you never get exhausted at the finish?"

"No. I am always strong at this finish. You see, I neither chew, smoke, nor drink, and I love my home and my business. In this winter when I don't ride I occupy myself with driving. I have two fast trotters, both to single harness, and I drive about for hours every fine day, and often when it is not particularly fine. And I walk a good deal. When the winter is over I am not in had condition, and I have no very hard work to do to get into racing trim. This winter my heaviest weight wasn't over 130 pounds. I am exercising the horses every day, and that will bring me down to 126 pounds by the first of May. I have to get down to 105 pounds, so I shall have to work off only 21 pounds. To do that I need not physic myself; in fact I never did, and

never will take physic. This is what I do. By that time the weather is quite warm, and we gallop the horses from 4 to 8 o'clock. By half-past eight I shall have finished my galloping, and have breakfasted. I shall put on four suits of sweaters over my ordinary clothes, and walk from the course to the bridge and back again. I always eat nourishing food that gives me strength—roast meat and sirloin steaks, without any vegetables—and no cake nor pie, nor ice creams, nor anything of that sort. I live pretty much then as I always do; but I eat more, and particularly more nourishing food. And as I don't drink at any time, nor smoke, nor chew, I don't give up anything when I'm training. The exercise makes me feel as bright as a dollar, and I am never better nor healthier than when I'm training. This makes me think that I shall always be able to ride down to my present weight."

"And you are fond of walking?"

"Very fond. I go at a brisk pace, and in fact I think my gait is better than four miles an hour from start to finish."

"Which of the jockeys do you think your most dangerous foe when you're mounted for a big race?"

"Well, Hayward. For an all-round rider, short distances and long, and any kind of a horse, there is no rider so good in America as Hayward. Barbee and Feakes come next."

"And which is your favorite course?"

"Saratoga, perhaps. But Monmouth Park and Sheepshead Bay are nice, safe courses. I haven't seen any of the maps of the improved course at Sheepshead, but people tell me it is going to be wonderfully fast, and perfectly safe."

Las Vegas Races.

The third annual meeting of the San Miguel Stock and Fair Association, held at Las Vegas, was the most successful meeting of turmen ever held in New Mexico. On the first day the attendance was light, but the second and third days brought up the average of the gate receipts to a wonderful extent. In addition to the horse-racing there were some interesting contests between the fire companies of Trinidad, Santa Fe and Las Vegas. The "free-for-all" horse-race was won by the Trinidad Team, with Santa Fe second, while the Las Vegas Tesms tied for first place in the territorial contest. All leading horsemen of the territory were in attendance upon the races, and are fully satisfied with the judicious management of the association.—Stock Grower.

A forty-six pound sulky of Philadelphia manufacture was lately shipped to Bithere's headquarters for the use of Jay-Eye-See during the coming campaign.

SPRING Racing Meeting OF THE FRESNO FAIR GROUND Association FRESNO, CAL.

May 20, 21, 22, 23, 24 and 25.

First Day. No. 1. Running—Ogle House Stake. For two-year-olds; \$15 each, \$150 added; dash of half a mile. No. 2. Trotting—Purse \$400; 2:40 class.

Second Day. No. 3. Running—Grand Central Stake. For all ages; \$15 each, \$150 added; dash of one and three-quarters miles. No. 4. Trotting—Purse \$200; free for all horses owned in Mariposa, Merced, Fresno, Tulare and Kern counties on the 1st of March, 1884.

No. 5. Running—Colours Stakes. For all ages; \$15 each, \$150 added; dash of one-quarter of a mile.

Third Day. No. 6. Running—Vineyard Stake. For all ages; \$15 each, \$150 added; mile heats. No. 7. Running—Fresno Saloon Stake. For two-year-olds; \$15 each, \$150 added; dash of three-quarters of a mile.

No. 8. Trotting—Purse \$150; 3:00 class; open for horses owned in Mariposa, Merced, Fresno, Tulare and Kern counties on March 1st, 1884.

Fourth Day. No. 9. Running—Grady Opera House Stake. For all ages; \$10 each, \$100 added; dash of half a mile. No. 10. Dexter Stable Stakes; for all ages; \$15 each; \$150 added; dash of three-quarters of a mile. No. 11. Trotting—Purse \$1,000; 2:27 class; five to enter and three to start.

Fifth Day. No. 12. Running—Farmers' Bank Stake. For all ages; \$15 each, \$150 added; half-mile heats. No. 13. Pacing—Purse \$150; free for all pacers that have never beaten 2:20. No. 14. Trotting—Purse \$100; gentleman drivers; mile heats.

All trotting races are three in five; three or more to enter and start, unless otherwise specified. National Association rules to govern. All purses to be divided at the rate of sixty, thirty and ten per cent. All running races, not less than three to enter, and three to start. Pacific Blood-Horse Association rules to govern. In all running races second horse to save entrance.

Entrance to all purses ten per cent., money to accompany the nominations; all entrances to be given in writing, giving name, color, and sex of horse; also, name and residence of owner. Entries in all races to close May 21st with W. W. PHILLIPS, secretary, Fresno, or KELLY & Co., 116 Montgomery St., San Francisco. Excursion tickets to Fresno \$7.

W. W. PHILLIPS, Secretary. LEWIS LEACH, President. FARMER'S BANK, A. B. BUTLER, Vice-President. Treasurer.

Bay District Association SPRING MEETING

Commencing Saturday, May 31.

And continuing Wednesday, June 4th, Saturday, June 7th, Wednesday, June 11th, and Saturday, June 14th.

Liberal purse for the 3 min., 2:40, 2:30, 2:27, 2:24, and free for all. See future advertisements.

T. W. HINCHMAN, Secretary.

DO YOU WANT A DOG? If so, send for DOG BUYERS' GUIDE, containing colored plates, 100 engravings of different breeds, prices they are worth, and where to buy them. Also, cuts of Dog-Furnishing Goods of all kinds. Directions for Training Dogs and Breeding Ferrets. Mailed for 20 cts. PHILADELPHIA EXHIBITS, 337 S. 8th St., Philada.

TIPS.

Tips of all sizes for Trotting, Running, and Road horses can be obtained by application to this office or to

PAUL FRIEDHOFER, 416 Washington St., San Francisco.

Speed Programme

—OF—

THIRD DISTRICT

AGRICULTURAL ASSOCIATION

—AT—

CHICO, CAL.

COMMENCING TUESDAY, SEPT. 2, 1884.

First Day, Tuesday, September 2d, 1884.

No. 1.—TROTting RACE—For two-year-old colts owned in the District. Mile heats, best 2 in 3, to harness and to rule, for a purse of \$200. First colt to receive \$120, second \$80, and third \$20.

No. 2.—TROTting RACE—2:30 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second \$120, and third \$40.

Second Day, Wednesday, September 3d.

DOOLEY STAKE. No. 3.—RUNNING RACE.—Three-quarter dash for two-year-olds. Entrance \$25, p. p., \$125 added. UNION HOTEL STAKE. No. 4.—RUNNING RACE.—One-and-a-half-mile dash for all three-year-olds. Entrance \$25, p. p., \$200 added.

No. 5.—RUNNING RACE.—Three-fourths of a mile and repeat, for all. Entrance \$25; \$175 added. No. 6.—TROTting RACE.—For yearling colts owned in the District. One mile, to harness and to rule, for a purse of \$150. First colt to receive \$90; second \$46, and third \$15.

Third Day, Thursday, September 4th.

No. 7.—TROTting RACE.—2:35 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$300. First horse to receive \$180; second \$90, and third \$30.

Fourth Day, Friday, September 5th.

No. 8.—TROTting RACE.—For single road horses to buggy, to be driven by the owners, best 3 in 5, for a purse of \$150. First horse to receive \$90; second \$45, and third \$15.

No. 9.—RUNNING RACE.—For all, one mile dash. Entrance \$25, p. p., \$150 added. No. 10.—RUNNING RACE.—Seven-eighths of a mile dash for two-year-olds. Entrance \$25, p. p., \$150 added.

SOCIETY STAKE.

No. 11.—RUNNING RACE.—For all, two mile dash. Entrance \$50, \$25 forfeit, \$500 added. No. 12.—TROTting RACE.—For two-year-old colts owned in the 3d and 13th Districts. Mile heats, best 2 in 5, to harness and to rule, for a purse of \$250. First colt to receive \$150; second \$75, and third \$25.

Fifth Day, Saturday, September 6th.

No. 13.—TROTting RACE.—For all, mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second \$120, and third \$40.

No. 14.—PACING RACE.—2:20 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second \$120, and third \$40.

REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day. In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations. Horses distancing the field will be entitled to the first and third money only. Horses entered for purses can only be withdrawn by consent of the Judges. The Pacific Coast Blood Horse Association Rules to govern all Running Races. Non-starters for Running Races will be held for entrance. Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock p. m. In all Running Races the second horse saves entrance. No money paid for a race without a contest. All entries for Races to close with the Secretary or President at Chico, July 1st, 1884, at ten o'clock p. m. The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition. The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand. C. C. MASON, PRESIDENT. ROLAND DILLER, SECRETARY.

Woodburn Farm.

ANNUAL SALE OF

Thoroughbred Yearlings

THURSDAY, MAY 15th, 1884.

Forty-one head the get of King Alfonso, Pat Malloy, imp. Glen Athol, Lisbon, &c. A. J. ALEXANDER.

For catalogues address L. Broadhead, Agent, Spring Station P. O., Woodford Co., Ky., or at this office.

The sales of Runnymede yearlings May 13th and Elmendorf May 14th.

Advertisement for Singer Sewing Machine. Includes image of the machine and text: 'Singer' Model Sewing Machine on 3 Corder, Ticker, Lock, Five Hemmers, Bind, etc. Thread Cutter, Need, etc. Oil and full outfit with each—Guaranteed to be perfect. Warranted 5 years. Don't pay for machines no better when you can try these before you pay a cent. All late improvements. Runs light with little noise. Handsome and durable. Circulars with hundreds of testimonials free. GEO. FAYNE & CO., 47 Third Ave., Chicago, Ill.

STOCK AGENCY.

S. D. Bruce of the TURF, FIELD AND FARM, and author of the American Stud Book, offers his services in the purchasing of thoroughbreds and stock of all kinds. He selected and purchased Harry Bassett, Monarchist, Preakness, Joe Daniels, Hubbard, Katie Pease, Foxhall and many other good ones as yearlings. He will attend the sales of Chas. Reed, Belle Meade, Woodburn, Elmendorf and Runnymede. Address at New York, Box 274, until April 20th, Maxwell House, Nashville, to May 3d, and Phoenix Hotel, Lexington, Ky., until sales end. S. D. BRUCE, Box 274, New York City.

SPRING MEETING

Advertisement for Running Races at Oakland Park. Includes image of a horse and jockey. Text: 'Running Races —AT THE— OAKLAND PARK COMMENCING Saturday, April 26th And Continuing Four Days.'

FIRST RACE. Russ House Handicap.—Purse \$400; \$50 to second horse; a dash of half a mile, for all ages, in which are Harry Rose, three years, 95 lbs; Jon Jon, three years, 98 lbs; Red Oak, aged, 117 lbs; Panama, aged, 100 lbs., and A. P., aged, 105 lbs. SECOND RACE. Purse \$200; \$50 to second; a dash of one and three-eighths miles; for all ages; which will be a hot contest. The fastest horses on the track are entered, viz.: Jocko, Patsy Duffy, Joe Howell, Trade Dollar and Bryant W. THIRD RACE is the Galindo Hotel Handicap.—Purse \$200; \$50 to second; heats of three-quarters of a mile, in which are Haddington, 110 lbs.; Joe Howell, 122 lbs.; Trade Dollar, 110 lbs.; Bryant W., 95 lbs.; Quebec, 90 lbs. and Panama, 95 lbs.

Tuesday, April 29th. FIRST RACE. - First Day--Friday, July 4th. No. 1. Purse \$2,500. 2:17 Class. No. 2. Purse \$2,500. Open to all pacers... Second Day--Saturday, July 5th. No. 3. Purse \$2,500. 2:40 Class. No. 4. Purse \$2,500. For five-year-olds and under... Third Day--Monday, July 7th. No. 5. Purse \$2,500. 2:30 Class. No. 6. Purse \$2,500. 2:27 Pacing Class. Fourth Day--Tuesday, July 8th. No. 7. Purse \$2,500. 2:18 Class. No. 8. Purse \$2,500. 2:17 Pacing Class. Fifth Day--Wednesday, July 9th. No. 9. Purse \$2,500. 2:24 Class. No. 10. Stake \$2,500. For three-year-olds. Closed March 1st, 1883. Sixth Day--Thursday, July 10th. No. 11. Purse \$2,500. 2:35 Class. No. 12. Stake \$2,500. For four-year-olds. Closed March 1st, 1883. No. 13. Purse \$2,500. 2:35 Pacing Class. Seventh Day--Friday, July 11th. No. 14. Purse \$2,500. Three-minute Class. No. 15. Purse \$2,500. 2:22 Pacing Class. Eighth Day--Saturday, July 12th. No. 16. Purse \$2,500. 2:27 Class. No. 17. Purse \$2,500. 2:21 Class.

In addition to the Regular classes, a large amount of money has been set aside for Special Races, and exhibitions of speed by Johnston, Jay-eye-see, St. Julien, Triplet, Claugstone, Phallos, and other horses whose record or performances bar them from the Class Purse, for Double Team Races, Trotting with Running Mate, or a Stallion Race, should one be deemed advisable.

Total Amount for the Meeting, \$60,000.

CONDITIONS. All the within purses (except Nos. 2, 6, 8, 13 and 15 pacing), are for trotting, and are divided, fifty per cent. to the first horse; twenty-five per cent. to the second horse; fifteen per cent. to the third horse, and ten per cent. to the fourth horse.

Entrances in all purses close on Thursday, May 1st, 1884. Entrance fee ten per cent. of purse, as follows: 2 1/2 per cent. cash, which must positively accompany the entry; 2 1/2 per cent. on Monday, June 2d, and the remaining 5 per cent. from those who start at 8 o'clock p. m. of the evening previous to the race, at the Secretary's office, 116 Monroe Street. No entry will be accepted or considered unless the 2 1/2 per cent. cash accompanies the same, nor will any entry be allowed to compete unless the second payment of 2 1/2 per cent. is made or mailed on or before 11 o'clock p. m. of Monday, June 2d, 1884; and any entry on which the last payment of 5 per cent. is not paid at 8 o'clock p. m. of the evening previous to the day set for the race, shall be considered drawn, and will not be permitted to start; but no entry shall be held, or liable for any amount beyond the first payment of 2 1/2 per cent., but failure to pay either of the payments when due shall be considered as a withdrawal, and shall disqualify the entry from competing in the race. It is the intention to place the whole matter of entrance on an absolutely cash basis, and no deviation from these rules will be allowed in any case or in any particular.

Address communications and entries to D. L. HALL, Secretary, 116 Monroe St., Chicago, Ill.

SPRING TROTTING MEETING CHICAGO DRIVING PARK.

June 3, 4, 5, 6 and 7.

- First Day--Tuesday, June 3d. No. 1. Purse \$1,000. Three-minute Class. No. 2. Purse \$1,000. 2:22 Class. Second Day--Wednesday, June 4th. No. 3. Purse \$1,000. 2:30 Class. No. 4. Purse \$1,000. 2:22 Pacing Class. Third Day--Thursday, June 5th. No. 5. Purse \$1,000. 2:45 class. No. 6. Purse \$1,000. Open to all pacers ("Johnston barred"). Special Race on this day, to be announced hereafter. Fourth Day--Friday, June 6th. No. 7. Purse \$1,000. 2:26 Class. No. 8. Purse \$1,000. 2:30 Pacing Class. Fifth Day--Saturday June 7th. No. 9. Purse \$1,000. 2:35 Class. No. 10. Purse \$1,000. 2:18 Class. Special Race on this day, to be announced hereafter. All the above purses (except 4, 6, and 8 pacing), are for trotting, mile heats, best three in five in harness, and to the rules of the National Trotting Association. All purses divided into four monies, fifty per cent. to the first horse; twenty-five per cent. to second; fifteen per cent. to third, ten per cent. to fourth. Entries to close on Monday, May 19th, at 11 o'clock, p. m. Entrance fee ten per cent. of purse, five per cent. of which is Cash, and must positively accompany the nomination, the other five per cent. from those who start only, is due and must be paid on or before 8 o'clock p. m. of the evening preceding the race, at the Secretary's office, 116 Monroe Street. No deviation from these conditions in any particular.

Total Amount for the Meeting, \$15,000. Address communications and entries to D. L. HALL, Secretary, 116 Monroe St., Chicago, Ill.

ROSS, 123 California Street, San Francisco.

TRY AN ADVERTISEMENT IN THE TURF AND SPORTING AUTHORITY, THE BREEDER AND SPORTSMAN

THE NEW ZEALAND

Stud and Pedigree Stock Co. LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Anstralian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Anstralian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Anstralian Colonies.

Fastest Time on Record.

Martini-Henry, by Musket-Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus overing the previous record of 2:41 1/2; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30, and beating a field of twenty-nine, thus lowering the previous best record of 3:30 3/4, by Darriwell (5 years), carrying 102 pounds, in 1879.

Musket-The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

P. H. BOURKE, Secretary, Auckland, New Zealand. The New Zealand Loan and Mercantile Agency Co., Limited. 412 California Street, San Francisco. HUGH CRAIG, Agent.

SACKRIDER & CHISHOLM.

Hambletonian Trotting Stallion

BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star), Belle Mason by Belmont (Williamson's).

Description.

Bob Mason is a mabogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879.

TERMS.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge.

CHARLES J. ELLIS, Owner. WM. DONATHAN, Agent.

Fast Trotting Stallion

HA HA.

Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 hands. Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' handling, showed 2:23, without a skip.

Breeding.

GILT-EDGE, combining, close at hand, Hambletonian, Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:19 1/2.

N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

FRED ARNOLD, Stockton, Cal.

The Trotting Stallions

Baywood and Fleetwood

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

BAYWOOD

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover.

FLEETWOOD

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model a perfect horse; high life, fine style and action, and looks like thoroughbred.

Sired by Nutwood. First dam Copper Bottom Mare, by Young America; second dam the Tillotson Mare, pedigree unknown but she was reported to have been bred in Kentucky.

E. S. SMITH, San Jose.

THE ELECTIONEER STALLION

STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

TERMS.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Twest, record 2:25 1/2), he by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont. Dam of Dave Hill, Jr., by old St. Lawrence, granddam thoroughbred. Dam of Dave Hill by Vermont Hambletonian.

J. J. FAIRBANKS, Agent.

The Trotting Stallions

DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallas, 2:15 1/2; first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:25), by Mambrino Chief; second dam by Potomac; third dam by Saxe Wiener.

Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

Monroe Chief, 2:18 1-4.

Two-mile record, 4:48.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. Foal a very lifelike portrait of Monroe Chief and a full account of his pedigree and performance, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

JOHN A. GOLDSMITH, OAKLAND TROTTING PARK,

The Trotting Stallion

BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Brigadier will make the season of 1884 from February 10th to July 1st.

TERMS.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

J. B. McDONALD.

2:20 1-4.

The Fast-Trotting Stallion

ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond. Second dam, Columbia, by imp. Bonnie Scotland. Third dam, Young Fashion, by imp. Monarch.

Fourth dam, Fashion, by imp. Trustee. Fifth dam, Bonnets of Blue, by Sir Charles. Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley. Eighth dam, by imp. Centinel. Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus. Eleventh dam, by imp. Monkey. Twelfth dam, by imp. Silvereye.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

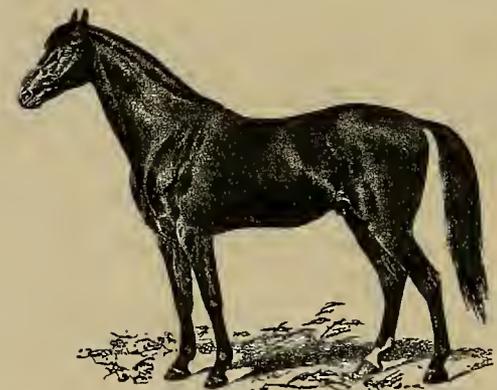

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

M. ROLLINS, Agent, Santa Rosa.

MAMBRINO WILKES.

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES, son of Rysdyk's Hambletonian, bred by B. J. Treney of Fayette County, Kentucky. Dam Lady Christiana by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Ripston's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,200 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prominent sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

TERMS.

\$40 for the season, or \$55 single service. This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

A. L. HINDS, Agent.

The Trotting Stallion

STEINWAY,

With two-year-old record, third heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

TERMS.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County,

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes; Mares sent in care of McClevery & Noble, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Strathmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emulation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginian, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31 1/2, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Clans, 2:17 1/2; and Tucker, 2:19 1/2; Chestnut Hill, 2:22 1/2; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talher, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:26 1/2; Henderson, 2:28; Strabian, three-year-old, 2:29 1/2; and Stuart, three-year-old, 2:28. Stuart is full brother to Belnor, who trotted a mile in 2:52 1/2 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23, and he in turn got Governor Sprague, record 2:20 1/2; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

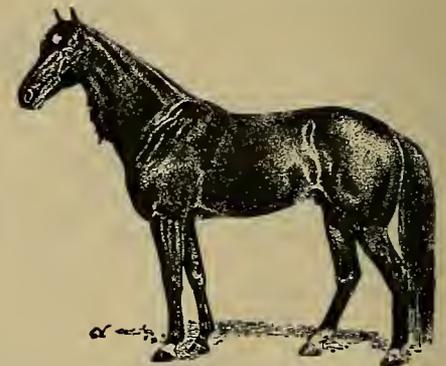

Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verena, Administration, Mystery, in 2:39, 2:32, 2:31 1/2. Memento won the first heat. As three-year-old, at Sharpshury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35, Bushwacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:36, 2:36, 2:25 1/2, 2:30, 2:30. Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchby and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:24, 2:26 1/2; but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

Address.

GEORGE WILEY, Cook Farm, Danville, Contra Costa Co., Cal.

THE TROTTING STALLIONS

SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO July 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark bay brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Ensign, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:43 1/2) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Lefler's Consul, by Schepper's Colman, by Irwin's Tuckahoe, by thoroughbred Tuckahoe, by Floriel, by Diomed.

LA HARPE

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weighing, 1,50 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Nutwood, he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star, (son of Platt's Western Star by Blacknose). 1st dam by Boanerges, 2nd dam by Gallatin (9811). La Harpe's dam Prairie Bird by Flaxtail (dam of Flight, 2:29, and Prompter, 2:33). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Lefler's Consul. Irwin's Tuckahoe by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Floriel, by Diomed.

TERMS.

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

J. T. MCINTOSH, Box 60, Chico, Cal.

LITTLE'S SHEEP DIP

CHEMICAL FLUID

Price Reduced to \$1.25 Per Gallon.

Twenty gallons of fluid mixed with cold water will make 1,230 gallons of Dip. It is superior to all Dips and Dressings for SCAB in Sheep; is certain in effect; is easily mixed, and is applied in a cold state. Unlike sulphur or tobacco, or other poisonous Dips, it increases the growth of the wool, stimulates the fleece, and greatly adds to the yield. It destroys all vermin. It is efficacious for almost every disease (internal and external) sheep are subject to.

Now ready for distribution. Contains descriptions and pedigrees of 252 head of High-Bred Trotting Stock now at Fairlawn. Will be sent free to all applicants who enclose 3 cents in stamps to prepay postage.

**25 HIGHLY-BRED BROOD-MARES,**

Bred to the Fairlawn Stallions, and

**130 HEAD OF VERY PROMISING YOUNG STOCK,**

Consisting of Young Stallions, Fillies and Roadsters, are offered at *Private Sale.*

**THE ONE PRICE PLAN** Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person. All stock sold on orders can be returned if they do not come fully up to the descriptions given.

The Stallions in use at Fairlawn are

**ALMONT 33.**

Represented in the 2:30 list by 24 performers, with records ranging from 2:15 1/2 to 2:30. Limited to 20 approved mares at \$300 the season.

**HAPPY MEDIUM 400.**

Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season.

**ABERDEEN 27.**

Having ten of his get with records ranging from 2:15 1/2 to 2:27 1/2. Limited to 40 mares at \$150 the season.

**ALECTO 2548.**

By Almont, out of Violet, by Rydyk's Hambletonian. Limited to 30 mares at \$50 the season.

**STARMONT 1526.**

By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season.

Ethan Allen, Jr., 473, used as a Private Stallion.

The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 2:30 list. The sons of each of these stallions are siring trotters. Almont has six different sons that have sired 2:30 trotters. Mares failing to get with foal can be returned in 1885 free of charge. For further information, and catalogues containing full particulars, address

Lock Box 392.

**WM. T. WITHERS, Lexington, Ky.**

**ASHLAND PARK TROTTING STUD**

NEAR LEXINGTON, KY.

**B. J. TREACY, PROPRIETOR.**

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

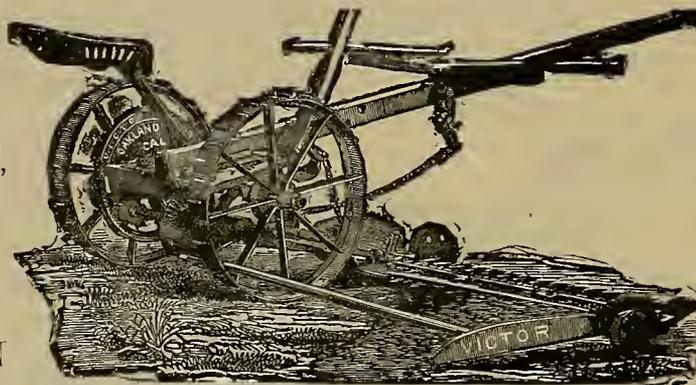

**KERR'S ASTHMA CURE**

Cures Asthma, Bronchitis, Throat and Lung affections, Coughs, Colds, Quinzy, Sore Throat, Soreness in the Chest or Lungs, Weakness in the Back, Pains in the Back, Bowels, Sides, Colic, Cramp, Pneumonia, Measels, Whooping Cough and Indigestion. It heals the entire system. Pleasant tasted as ice cream. For sale by all druggists. Price, 50 cents and \$1.00 per bottle. Post-office box 1870.

## YACHTING.

### The Pacific Yacht Club Opening—Triumph of the Hall Model over the Turner Model.

Last Saturday was all that could be wished from a yachtsman's point of view. The wind in the channel was strong enough to make kites uncomfortable, but not strong enough to prevent any one from carrying full working canvas. At Front street wharf were assembled the Aggie, Fleur de Lis, Nellie, Annie, (flag ship) Era and Dawn. After the ladies and guests had been gotten aboard Commodore Caduc fired the gun to "break" anchors, and got under way. At the signal the four first-mentioned vessels stood down towards the ferry slips, and on the second gun from the flag ship hauled the wind on the port tack, and stood over for Saucelito. The positions then were as follows: The Annie in the van with the Fleur de Lis next, while the Aggie and Nellie were well to the southward and eastward, the Aggie being to leeward. It was noticed on the Aggie that the jib and fore-sail were sheeted right home, while the main-sail was well off; her sailing master, thus to keep his mainsail drawing, got his other sails at such an angle to the wind that they served to hold the boat down without giving her much driving power. In this position she was struck by a squall off the city front, and knocked down; she was luffed immediately, and the fore-sail taken in with a speed that did credit to the crew, but did not greatly enhance the estimate of the sailing master's courage. The Fleur de Lis soon took her position as leader, which she maintained until Saucelito was reached. The Aggie in the channel managed to eat the wind out of the Nellie, and held well up to the windward, and she let go her anchor one minute later than the Fleur de Lis. On actual time the Aggie made the best trip, but as the first vessel there was the one to receive the honors, they were given to the Fleur de Lis. No official time was taken, but the Annie and Nellie made their moorings about nine minutes after the Aggie. The Lurline, Ariel, Ramble, and Hattie, of Stockton, were lying off the club house when the yachts arrived, and were gaily decorated with flags, in which respect they were followed by the other yachts as they arrived. Several of the deep water ships lying in Richardson's Bay had also "dressed ship" in honor of the occasion, and altogether it was a very pretty and bright scene. The 1:30 and 3:20 ferry boats brought over large crowds to join in the festivities, and these, with those that came over on the yachts, joined in the counter attraction of esting and dancing, not to say anything of the frequent visits made by the old salts and fresh young bloods to John's little "cuddy hole," where there was a man who inquired very politely, "What will it be, gentlemen?" There was a larger crowd there than usual, and amongst them were seen the old familiar faces, thus showing that the popularity of these entertainments keeps its hold on all who have ever attended. The ferry had been delayed half an hour for the occasion, and so it was just about nightfall when the guests finally left Saucelito. But a few of the yachtsmen remained over, but these few were a multitude in regard to noise. Sunday morning broke beautifully, and at eight o'clock Vice-Commodore Donahue, in the absence of his superior, fired the gun to hoist colors. The eight o'clock boat from the city brought over a large number of the yachtsmen, who breakfasted at the club house, but the start was delayed until nearly eleven, so as to give time for the others to arrive by the ten o'clock ferry. Before the start the Chispa and Dawu arrived from the Island, where they had lain all night, and stood off and on for the starting signal. On the firing of the first gun the yachts got under way, and waited till the flag-ship could get in the lead and fire the second gun. During this interval, about five or six minutes, the Chispa displayed very bad taste in continually firing her gun, but whether from ignorance, or from a desire to mislead the sailing masters, as yet remains unknown. The fleet was now as follows: The Lurline sailed by Capt. Turner; the Aggie by Fulton Berry; the Nellie by Frank Murphy; the Fleur de Lis by Henry White; the Annie by the Commodore; the Rambler by C. M. Cole, and the Spray by L. B. Chapman. The wind was very light and fitful off the club house, and it took some time for all the vessels to get fairly moving. The Lurline went off with jib and main-sail, while all the other yachts carried full working canvas. The fleet stood over to the south shore to get out of the strong ebb tide then running, and shortened sail as necessary, when overhauling the Commodore. The wind continued light until Mission Bay was reached, where it freshened up considerably. The boats rounded the Hunter's Point stake-boat in the following order: Annie, Lurline, Aggie, Nellie, Fleur de Lis, Eva (which joined the fleet off the front) and Rambler, there being about twenty minutes difference between the first and last boat. From here to the

club house the yachts were to "try rate of sailing," and all sheeted home on the port tack. The Lurline and Aggie soon went to the fore, and between these two boats the only exciting test of speed took place. The sailing directions were to leave the mid-channel buoy to starboard, and the yachts took different courses to get to windward. After standing out on the port tack from Black Point, the Lurline went in stays near Arch Rock, and was closely followed by the Aggie, which went about just under her stern. The Lurline, being a heavy keel boat, took some time to get way upon her after staying, while the Aggie worked quicker. The black boat had just good steering way on her when the Aggie came tearing down toward her. The Aggie, by all the rules of sailing, if unable to weather her, should have put her teller up, and gone under her stern. This, however, she failed to do, and a collision was imminent, and but for the gentlemanly and prompt action of Captain Turner, who luffed his vessel, both yachts would have been considerably damaged. The Aggie thus kept her headway, while the Lurline was almost thrown in irons, and, as a consequence, the Aggie rounded the buoy first, followed one minute and a half after by the Lurline. Then came the Fleur de Lis, Nellie, and Annie. The vessels now piled on the kites, which they had been unable to carry with advantage close on the wind. The Aggie reached home first, and after passing the stake-boat got down her jibtop-sail, eased the sheets, and came back under jib and main-sail. The Lurline got her salute from the club house, and from the Ariel just thirty-five seconds later. The Fleur de Lis came next, followed in one minute and twenty seconds by the Nellie. It seemed at one time as if the Nellie would have to make a tack to weather the buoy, but to the leeward of Point Cavalls, she got a lead well to the southward, and stood up so well that she was enabled to pass the winning line with sheets started. The Commodore followed her, and after her came the Eva, which came direct from the city front, and then the Rambler, which had followed instructions. The Spray did not go over the course.

The time as taken was as follows:

	Hunter's Pt.	Mid Channel.	Home.	Actual sailing time.
Aggie	1 05 10	1 59 00	2 22 30	1 17 20
Lurline	1 04 25	2 00 30	2 23 05	1 18 40
Fleur de Lis	1 10 20	2 05 00	2 30 44	1 20 24
Nellie	1 09 00	2 08 20	2 29 45	1 21 45
Annie	1 04 00	2 04 45	2 30 30	1 26 30
Eva	1 20 00			
Rambler	1 24 30			

The Rambler's time was not taken round the buoy or at the finishing point. The Lurline, for a keel boat, did wonders, and it is an open question whether or no she would have been the first one home if it had not been for her trouble with the Aggie in the channel.

The small sloop, built by Morphy on Long Bridge, met with an accident on her maiden trip last Sunday. She endeavored to cross the bows of a ship lying at anchor in the channel, but miscalculated the height of her mast, and, as a consequence, she fouled her masthead with the ship's bobstay, and broke it off below the hounds. She has had a new spar put in.

As models for small yachts the Rambler and the Spray take the lead. The former is most beautifully and tastily fixed up in the cabin, and many little "wrinkles" for more room have been discovered, while the Spray is one mass of "ssilor work" in regard to her rigging. She (the Spray) has had her cockpit raised and scuppers put in, which is a very great improvement, as formerly all the water that came into the cockpit ran into the cabin. She is ballasted with the lead cross that used to be in the Clara, and is much stiffer than formerly. As nearly all the work was done by the amateur owners during their leisure moments in winter, too much credit cannot be given them for their success.

It is amusing to see some of the aquatic items in the dailies. Some few weeks back, Bob Goble fixed up an old catamaran which has been going to pieces for some years, and on her appearance afloat some nautical scribe saw her and called her a "novel craft," and went on to describe her. This was copied with different wording in other papers, and it pretty nearly went the rounds of them all. We should think that after all the discussions on the subject of this class of vessels, some years back, that they would have ceased to bother the reporter's brain as something new and novel.

At last accounts Mr. Coleman has almost decided to have his yacht built in the east, and brought round the Horn. As there are just as good boat-builders on the Pacific as on the Atlantic Coast, we think this a pity, and moreover, it will be much longer before she can get here, not to say anything of the additional expense.

The new yawl is called the Ripple, a very pretty name, but hardly appropriate for a heavy weather vessel such as she is. She went to California city on Saturday.

The Lotus Club went out as far as the Fort on Saturday and returned early.

## THE KENNEL.

### Death of Trueman's Bob.

EDITOR BREWER AND SPORTSMAN:—In last Monday's *Examiner*, I noticed an item stating that A. B. Trueman's grand old dog Bob was dead, after having spent eight years or more of active service in the field, and proving himself to be a noble animal. His superior for active service could not be found, and his equals are rare. He was thoroughly broken to "point," "back," and "retrieve," and as for "quartering" I never saw his equal. No expense was spared by the gentleman from whom Mr. Trueman obtained him to have him thoroughly broken. From the great performances, so far as heard from, of the stock from which he came, one may judge something of what his capabilities and performances were. The sire of Bob was A. C. Titcomb's Sam, who received the first prize as an Irish setter in the bench show of 1877, his dam Nellie imported. Dr. C. G. Toland's bitch Whiskey, which received the first prize at the bench show of 1877, and also the first prize at the bench show of 1881, was Bob's full sister. Calvert Meade's Dick, which received the first prize as a dog in the bench show of 1881, was a half brother to Bob. W. T. Daniels' bitch Sancho, which received the second prize as an Irish setter in 1881, was a half sister to Bob. So much for the bench show qualities of this celebrated stock. H. H. Briggs' well-known Irish setter Belle, which received the second prize at the Gilroy field trials of 1882, and the third prize at the Pacific Coast field trials held at Folsom in 1883, was a half sister to Bob. This was the only one of Bob's stock that ever ran in any field trials held in this State, so far as I am aware of, but it is expected that several will be entered for the various field trials to be held this year. This is the dog which caused so much controversy between C. N. Post, H. H. Briggs and D. E. Goodman, subsequent to the late bench show. His death was caused by a disease contracted at the said show, under the effects of which he gradually wasted away. It is to be hoped that some of his offspring will prove themselves to be as worthy of the name of "Irish setter" as their sire, and win many honors both on the bench and in the field.

W. BRADFORD.

San Francisco May 8th, 1884.

### A Good Laverack.

Mr. H. Payne, of Los Angeles, in a few days will receive from a leading kennel in Delaware a young Laverack puppy bitch, which promises in future to be a great addition to our pure dog blood. The puppy in question is by Don Juan, from Petrel III; Don Juan is by Tam O'Shaurer, both distinguished in our national kennel history. On the sire's side the strain goes through Tam O'Shaurer to Champion Rock, Rum, and others equally distinguished. The dam Petrel III is registered in the English Kennel Club, 11,451, and comes in first degree from Carbonite, and through him in direct succession Dash and Countess. The latter was one of the grandest dogs ever littered, never being beaten on the field or bench but once. She afterwards beat the dog that beat her on the occasion referred to. The progeny of Countess leads the list all over England. If Mr. Payne breeds the new-comer to Captain Mayberry's Dan, Los Angeles county will soon have some of the best dogs in the State.

### Coursing at Sacramento.

Last Saturday the Sacramento Coursers had a second day out, this time at the Whitcomb ranch; ten dogs were entered. The runs were as follows: Thos. Waite's br b Juno beat R. Muland's bl d Phil. Sheridan; Joe Powers, br d Waterford beat P. Kelly's f b—; Joe Powers' bl b Mary Kelly beat Thos. Waite's Fly; P. Kelly's bl and w d Democrat beat J. Farrelly's f b Fanny; J. Farrelly's f b Wee Lass beat R. Muland's f d Prince.

Second course.—Juno beat Waterford; Mary Kelly beat Democrat; Wee Lass ran a bye.

Third course.—Wee Lass beat Mary Kelly; Juno ran a bye. At sunset no more hares being found Juno and Wee Lass divided the money.

Mr. Charles Lincoln has been selected to act as Superintendent at the Chicago Dog Show, which will be held July 10th, 11th 12th and 13th.

## TURF AND TRACK.

## Dates Claimed.

Oakland Park, M. M. Allen Lessee, April 26th to May 3d.  
Capital Turf Club, Sacramento, May 6th to 10th.  
Fresno Fair Association, Fresno, May 20th to 24th.  
Bay District Association, San Francisco, May 31st to June 14th.  
Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.  
Thirteenth District, Marysville, Aug. 26th to 30th.  
Chicago Fair Association, Chicago, Sept. 1st to 6th.  
State Fair, Sacramento, Sept. 11th to 20th.

## Commodore Kittson—Chat about his Equine Possessions.

(Chicago Tribune.)

The fastest trotter in the world, Maid S., is owned by Mr. William W. Vanderbilt, who, like most of the descendants of the Amsterdam Dutch, the first white settlers in New York, inherits a love for fast horses. The trotter with the second fastest record—Jay-Eye-See—is the property of Mr. J. I. Case. The two fastest pacers the turf has ever known are the property of Commodore N. W. Kittson of St. Paul, Minn., a man who will shortly have completed the allotted age of three score years and ten, and he takes to-day as great an interest in matters pertaining to turf sports as do the men who are more than a generation behind him in years as well as experience. The horses referred to, Johnston and Little Brown Jug, have records respectively of 2:10 and 2:11½, these figures representing the fastest miles ever paced.

Commodore Kittson is a man whose wealth runs well up into the millions, and he has accumulated it by more than half a century of earnest application to business. Over fifty years ago, when the west was practically an unknown wilderness, John Jacob Astor, the founder of the family which bears his name, sent Commodore Kittson, then a boy, into the Hudson Bay region as his agent in the purchase of furs, and since that time he has been prominently identified with the interests and development of the north-west. His fancy for fast horses, however, came only when his income mounted into the hundreds of thousands per year, and he has gratified it in the most complete and lavish manner. Four years ago his name was wholly unknown in turf circles—now he has more money invested in trotters, pacers and thoroughbreds than any other man in the world, his total expenditures in the purchase of horses and farms whereon to breed and raise them having been in the vicinity of \$2,000,000. At Midway, near St. Paul, he has one of the most complete and best arranged stock-farms in the world, and on it are to be found high-priced representatives of every prominent trotting family. At Erlenheim, near Philadelphia, as an immense farm which he purchased two years ago from Mr. Aristides Welch, whose name has been identified with the rearing of thoroughbreds for a quarter of a century. It was here that Parole, the horse that went to England four years ago and astounded the natives of that island by winning all the great spring handicaps in the easiest possible manner, was born, and the same paddock which was the scene of his frolics as a colt witnessed also the antics of his numerous brothers and sisters, none of whom, by the way, attained a title of the celebrity which fell to the lot of the brown gelding. On this farm, which was purchased two years by Mr. Kittson for the round sum of \$200,000, may be found a hundred or so of the best thoroughbreds in the land. There are stallions and mares representing the most fashionable strains of American blood, as well as animals imported from England at a great expense in order that the effects of their breeding may be tested in this country.

But with all these vast expenditures of money the horses by reason of whose performances Commodore Kittson is best known are the two pacers alluded to in the beginning of this article. It is only within a few years that pacers have received more than passing notice at the hands of the horse-men, and even now the prices offered for them by trotting associations are not large in amount. The first pacer that attracted notice was Pocahontas, a famous old chestnut mare who drew a wagon in 2:17, something like a quarter of a century ago. She was so fast and stout that the owners of other horses lacked courage to make a race against her, and in consequence her turf performances were somewhat limited. One of her descendants, also named Pocahontas, was purchased at a low price by Mr. Robert Bonner about fifteen years ago, and for many years was the pride of his stable. The original Pocahontas was handled during the early years of her life by a Mr. Woodmansee, who, at that time, was a resident of Ohio. He is still alive, and last summer, at the age of 74, drove one of Commodore Kittson's horses a mile in 2:24. His sons Dan and Ben are Mr. Kittson's trusted lieutenants in the management of his trotting stock, the former having charge of the farm at Midway, while the latter is the manager of the stable of trotters and pacers that travel through the country from spring until fall.

The histories of Johnston and Little Brown Jug are not generally known. The former was bred near Berlin, Wis., his sire being a horse of the Bashaw family, and his dam a mare whose blood lines have never been satisfactorily established. The man who raised him, like the breeders of a good many noted horses, was in moderate circumstances. From the day of his birth Johnston was a natural pacer, and when four years old could easily distance anything in the shape of horseflesh around Berlin. There lives at that place a man named Mather, who came to Wisconsin a quarter of a century ago, and has grown rich in the hauling business. Three years ago Mather owned a team of gray horses that could trot a mile close to three minutes. He was driving them along a country road one day when John Bassett, who raised Johnston, came up to him with a neatly turned gelding that was a pacer. The talk turned on horses, and Bassett said that his four-year-old pacer was a very fast one. He could beat anything round there, Bassett said. Wanting to test the truth of this assertion Mather told him to drive ahead, and he would follow him with the gray team. Bassett started up the pacer, and in a moment or so was lost in a cloud of dust, leaving Mather far behind, and wondering whether his team had suddenly lost all their speed. Although nothing of a horseman, Mather was an excellent financier, and argued that if his horse could go so fast at four years of age he would, with proper training, attain a rate of speed that would make him worth a great deal of money. Bassett was poor, and willing to sell one-half of the horse; Mather was rich, and bought a half interest for \$350. At that time the horse was known as Burney. The following year he was brought to Chicago by Bassett, and kept here about two months, doing a mile at the West Side track one day in 2:15½.

Before the performance he had been offered for sale at \$5,000, and it is probable that four-fifths of that sum would have purchased him, but after showing this speed Bassett took him home again, and subsequently disposed of his interest to Mather for a nominal sum, the banker thus becoming sole owner of the pacer. The following winter he arranged

with Peter V. Johnston, of this city, to drive the horse, and he was entered in several races under the name of Charley M., having been so called by the banker in honor of himself.

When the horse reached Johnston's stable in the early spring of 1883 he was in bad shape, but careful attention soon brought him round. About this time "Eb." Smith of Milwaukee, a rollicking sort of a man who had made considerable money in the liquor business, became interested in the pacer, and finally purchased a controlling half interest in him for \$7,500. The horse's name was then changed to Johnston, as a compliment to his new driver, and last May made his first appearance in a public race in Michigan. He passed through the circuit in that State, not losing a single heat, and came back to Chicago with a record of about 2:17. At the great meeting held here in July he was entered in a race that had for starters three or four other horses. One of these, Billy S., was owned in Buffalo, N. Y., and his backers were confident that he could beat Johnston, they claiming that he had shown them a half mile in 1:05, and a full mile in 2:15. The race was for a purse of \$2,500, with \$500 added if 2:17 was beaten, and the betting was fast and furious. In the first heat Johnston distanced every horse in the race except a mare named Gurgle, the time being 2:15, and in the second heat the mare was shut out, Johnston thus winning the entire purse and the \$500 added money, the total amount being \$3,000, which is the largest sum ever won by a horse in a pacing race.

This performance brought Johnston prominently before the public, and the association promptly offered a special prize for him to try to beat the best pacing record, 2:11½, made by Little Brown Jug two years before. On the appointed day the driver of Johnston had a man stationed at the half-mile pole, whose duty it was to tell him as he passed how fast the first half-mile had been paced. This individual, who seems to have been somewhat overpowered by the sense of the responsibility which rested upon him, made a mistake of three seconds in his calculation, and as Johnston went flying past him he shouted "1:02." Thinking that as he had gone the first part of the mile so fast it would be an easy matter to accomplish the remaining distance before the allotted time Johnston made no effort to urge his horse, and the animal came home at his ease in 2:11½, the first half mile having been done in 1:05 instead of 1:02. At Pittsburg the following week the horse was taken sick, and did not pace again until fall, when he was driven a mile over the Chicago track in 2:10, as officially announced, although a number of outside watches made the time 2:09½.

It was after this performance that Commodore Kittson purchased Johnston, paying for him \$20,000. He had bought Little Brown Jug two years before for a like sum, but trouble with that horse's feet had prevented his making any showing in races.

Like Johnston, Little Brown Jug was of humble origin. He was bred in Kentucky, his sire being the horse called Gibson's Tom Hal—an animal with not even local reputation as a sire. Little Brown Jug was used in his colthood as a saddle, and the fact that he possessed great speed at a pacing gait was discovered by accident. When four years old he was put in a race, and while pacing a heat at Jackson, Mich., attracted the attention of Mr. H. V. Bemis, of this city, who at once purchased him for \$2,500. This was in 1881, and that season Little Brown Jug paced the three fastest heats on record at Hartford, the time being 2:11½, 2:11½, and 2:12.

At the dispersal of Mr. Bemis's stable the following spring he was sold to Commodore Kittson, but foot-lameness prevented his showing anything like his real speed. Last fall Mr. Robert Bonner, who perhaps knows more about horses' feet and the ailments to which they are subject than any other man, took the pacer in charge, and a few weeks ago returned him to Mr. Kittson's trainer in Cincinnati in perfect health.

Besides these two pacers, Commodore Kittson has a large stable of trotters in training, among them being Fanny Witherspoon, 2:17; So So, 2:17½; Minnie R., 2:19; Von Arnim, 2:19; and Pilgrim. This last-named horse, now six years old, is a son of Smuggler, whose record of 2:15½ is the fastest ever made by a stallion. Pilgrim was driven last season in order to develop his speed, but not trotted in races. During the Cleveland meeting he showed a half mile in 1:07½, and it is believed that this year he will be able to equal or surpass the record of his sire.

Commodore Kittson's annual expenditures incurred in maintaining his vast establishments for the breeding of trotters and runners, and the training and travelling of his stables of horses that are actively engaged in turf contests are something enormous. Men who race or trot horses on a large scale do not expect to make money thereby. It is a pastime for which they are willing to pay a liberal sum. Thus far Mr. Kittson has not been very successful either with his runners or trotters. Several of the horses for which he paid large prices have failed to fulfill the expectations formed regarding them. He now has the two fastest pacers in the world, and that they will hold the place of honor during the coming season is scarcely to be doubted.

## Two-year-olds at Lexington.

The Lexington correspondent of the Louisville Courier-Journal recently wrote as follows of the two-year-olds now in training at Lexington:

There are a number of very fine two-year-olds here at the track, seven or eight that particularly attracted my attention—one a great rangy chestnut filly called The Slashes, the property of that fine old turfman John M. Clay. She is by Glenelg, out of the noted mare Skeddadle. This is without doubt one of the finest-looking two-year-olds upon the continent of America. An offer of \$5,000 has been refused for her, and I believe she is not for sale at any price, Mr. Clay regarding her as the finest filly he ever bred. Her name, The Slashes, is in honor of the hirthplace of his distinguished father. This filly has no engagements this spring, Mr. Clay being no advocate of racing two-year-olds, and it is his intention, I believe, to wait on her until she is a three-year-old. Another remarkably fine filly is a gray filly, the property of Mr. Grinstead, daughter of Thunderstorm from Fannie Moore, thus being a half-sister to the flying Jennie V. She is engaged in the Quickstep Stakes, to be run over the Washington Park course at Chicago, and will be especially prepared for that event. Tyrant, the sensational yearling last fall, has been complaining, but is coming around again and by the middle of the summer he may develop into form. His owner has \$5,000 in this fellow, and he will be lucky if he realizes a fair per cent. on his investment. Lepanto, a son of Lougfellow and Nora Creina, is a large, nice-looking colt, and being on both sides of the house from winning families, he will doubtless give a good account of himself.

Brown's Bronchial Troches for coughs and colds: "I think them the best and most convenient relief extant."—Rev. C. M. Humphreys, Graft, Ky.

## Lord Falmouth's Sale.

The sale of Lord Falmouth's horses in training took place at Newmarket, April 28th, with Mr. Edmund Tattersall as auctioneer. The weather was very fine and the attendance large. There was not near as much excitement as expected, although Mr. Tattersall's opening remarks, complimentary to Lord Falmouth, were loudly cheered. There was also some applause at the bidding for the choice lots. As expected, that charming filly, Busybody, the winner of the Middle Park and Great Challenge Stakes, carried off the honors of the sale—Tom Cannon paying \$8,500 guineas for her, presumably for Lord Alington; and as she is in the One Thousand Guineas next Friday, her chances of winning are certainly very good. The second honor was taken by Harvester, for which Sir John Willoughby paid \$8,600 guineas. Harvester has been the favorite for weeks for the Two Thousand and Guineas, and it was freely suggested that Sir John was going for both of the Guineas—Harvester to win the Two Thousand and Queen Adelaide, better known as the Adelaide filly, the One Thousand—but to do that Busybody, if a starter, will have to be beaten. None of the other three-year-olds sold for as much as was expected. But with Porter paying 4,000 guineas for Louisbourg, a grand-looking colt out of Chevasance by Stockwell, the dam of Jannette, the winner of the Oaks and St. Leger in 1878, the excitement was increased. It was intimated that Porter was buying for the Duke of Westminster. The next lot, Jael, a handsome filly out of Jannette, was knocked down to Alec Taylor's bid; that she will carry the Manton scarlet is nearly certain. The next high-priced lot was the filly Esther Faa, out of the famous Wheel of Fortune which Tom Cannon got for 2,200 guineas, while Lord Hastings paid 3,200 guineas for the filly Armida, a half sister to Galliard the winner of the 2,000 guineas, Prince of Wales Stakes and St. James Palace Stakes at Ascot last year, while Mr. Ryan paid 2,500 guineas for Cocoonut by Silvio, out of Palmflower by the Palmer, a most promising-looking youngster.

All the lots sold were shown in good condition, especially the two-year-olds, and as they are all heavily engaged and are sold under Lord Exeter's conditions as to engagements, which means that the purchasers need neither run them nor pay their forfeits, but should they run them, Lord Falmouth will pay half the entrance and receive one-third of the value of the stakes if the horse wins. So it is fair to say that Lord Falmouth has not yet fully retired from the turf. The breeding stud will, however, be sold during the July meeting. The full catalogue to-day was as follows.

## Four-year-olds.

Chestnut colt Grandnager, by Kingcraft, dam Queen Berth by Kingston; C. J. Lefevre, 550 guineas.

Chestnut colt Prince Maurice by Dutch Skater, dam Cantiniere by Stockwell; Lord Hastings, 500 guineas.

## Three-year-olds.

Bay colt Titlark by Skylark, dam Placencia by Parmesan; Mr. Lawrence, 130 guineas.

Brown colt Harvester by Sterling, dam Wheat-Ear by Young Melbourne; Sir J. Willoughby, 8,600 guineas.

Brown filly Lady Bountiful by Silvio, dam Lady Golightly by King Tom; Charles Archer, 105 guineas.

Bay filly Bueybody by Petrarch, dam Spinaway by Macaroni; Tom Cannon, 8,800 guineas.

Bay filly Balloon by Queen's Messenger, dam Whirlwind by Kingcraft; W. G. Jarvis, 125 guineas.

Chestnut colt Woodpecker by Petrarch, dam Gertrude by Saunterer; R. C. Vyner, 400 guineas.

Bay colt Songster by Skylark, dam Mavis by Macaroni; Charles Archer, 370 guineas.

Chestnut colt Gyrrh by Queen's Messenger, dam Lady of Mercia by Blair Athol; J. Adams, 200 guineas.

Chestnut colt Little John by Kingcraft, dam Jannette by Lord Clifden; Mrs. Sydney, 290 guineas.

Bay colt Lillibullero by Silvio, dam Lillian by Wingrave; W. M. Redfern, 200 guineas.

## Two-year-olds.

Bay colt Louisbourg by Hampton, dam Chevasance by Stockwell; W. J. Porter, 4,000 guineas.

Chestnut filly Jael by Silvio, dam Jannette by Lord Clifden; Alec Taylor, 1,150 guineas.

Bay filly Esther Faa by Skylark, dam Wheel-of-Fortune by Adventurer; Tom Cannon, 2,200 guineas.

Bay filly Lady Chataigne by Silvio, dam Lady Golightly by King Tom; Lord Calthorp, 500 guineas.

Chestnut filly Armida by Childeric, dam Mavis by Macaroni; Lord Hastings, 3,200 guineas.

Chestnut colt Palladio by Albert Victor, dam Placencia by Parmesan; Mr. Cardross, 410 guineas.

Bay colt Tiverton by Honiton, dam Anti Diem by Musket; Mr. W. Gerard, 200 guineas.

Bay colt Cocoonut by Silvio, dam Palmflower by the Palmer; Mr. C. Ryan, 2,500 guineas.

Chestnut colt Tresilian by Silvio, dam Lillian by Wingrave; Mr. E. Bird, 510 guineas.

Bay filly Themisto by Childeric, dam Hurricane by Wild Dayrell; Matthew Dawson, 280 guineas.

Chestnut filly Queen's Color by Queen's Messenger, dam Cecilia by Blair Athol; C. J. Lefevre, 420 guineas.

Bay filly Vivacity by Childeric, dam Agile by The Palmer; Duke of Portland, 800 guineas.

The total of the sale is 36,440 guineas, an average of 1,518 1-3 guineas, of which ten three-year-olds sold for 19,220 guineas, and twelve two-year-olds for 16,170 guineas.

## The Grand Eastern Circuit.

The representatives of the trotting associations forming the grand circuit met at Rochester, N. Y., April 29th, and agreed upon the following dates for their several meetings.

Pittsburg, Pa., July 15th to the 18th inclusive.

Cleveland, O., July 29th to Aug. 1st inclusive.

Buffalo, N. Y., Aug. 5th to Aug. 8th inclusive.

Rochester, N. Y., Aug. 12th to Aug. 15th inclusive.

Hartford, Conn., Aug. 26th to Aug. 29th inclusive.

Providence, R. I., Sept. 2d to Sept. 5th inclusive.

Albany, N. Y., Sept. 9th to Sept. 12th inclusive.

There was considerable talk on the subject of programmes and purses, but it was finally agreed that the programmes should be as follows: First day—Class 2:21 and 2:30 for trotters and 2:22 for pacers. Second day—Classes 2:25 and 2:23 for trotters and 2:17 for pacers. Third day—Class 2:15 for trotters and the "free for all" for pacers. Fourth day—Classes 2:19, 2:27 and the "free for all" for trotters.

The Poughkeepsie Association was not represented at the meeting, owing to some misunderstanding about the date of the meeting. But they have promptly claimed the week between the meetings at Rochester and Hartford, viz., Aug. 19th, 20th, 21st and 22d.

Dr. W. B. Clowe, of Portland, Or., has sold to William Croft, of Victoria, B. C., the chestnut horse Blonde, five years old, by imp. Marquis, dam by Grey Eagle. Price \$600.

Racing at Oakland Park.

April 29th.—Russ House Handicap; for all ages. Purse \$250, of which \$50 to second. Half a mile. Delaney & Ayres' ch g Harry Rose, 3 years, by Rutherford—Alleen Oge, by Norfolk, 95 pounds. (Flowers) 1 T. F. Lynch's b g Jou Jou, 3 years, by Monday—Plaything, by Alarm, 98 pounds. (Ross) 2 C. B. Hoffman's ch g Red Oak, pedigree unknown, 117 pounds (Appleby) 3 G. L. Richardson's ch g A. A. P. aged, by Jordam—unknown, 105 pounds. (Hazlett) 0

Time—2:42 sec. Same Day.—Purse \$200, of which \$50 to the second; for all ages. One mile and three-eighths. Delaney & Ayres ch m Trade Dollar, aged, by Norfolk—Eva Ashton by Asbland, 119 lbs. (Holloway) 1 M. M. Allen's b b Jocko, aged, by Cariboo—Reply by Enquirer, 124 lbs. (Pepper) 2 Time—2:28.

Same Day.—Galindo Hotel Handicap, for all ages. Purse \$200 of which \$50 to second. Heats of three-quarters of a mile. T. H. Williams, Jr.'s br h Bryant W. four years, by Monday—Babe, by imp. Nena Sahib, 95 lbs. (Williams) 1 0 1 L. Shaner's b h Haddington, aged, by imp. Haddington—Pattie Flame, by Norfolk, 110 lbs. (Ross) 4 0 2 A. Stover's ch g Quebec, aged, by Norfolk—Jennie Hull by Belmont, 90 lbs. (Hazlett) 2 4 4 Delaney & Ayres' b g Joe Howell, aged, by imp. Bonnie Scotland—Eva Shepherd, by imp. Sovereign, 122 lbs. (Holloway) 3 3 3 Time—1:15, 1:15, 1:15.

May 1st.—Palace Hotel stakes, for three-years-olds; \$50 each, half forfeit; \$200 added; \$100 to second; one and one-fourth miles. H. C. Judson's blb John A., by Monday—Lady Clare by Norfolk, 118 lbs. (Appleby) 1 Delaney & Ayres' ch g Harry Rose, by Rutherford—Alleen Oge by Norfolk, 115 lbs. (Newall) 2 T. F. Lynch's b g Jou Jou, by Monday—Plaything by Alarm, 115 lbs. (Ross) 3 Time—2:17.

Same Day.—Owners Handicap. Purse \$200; \$50 to second. Heats of a mile. M. M. Allen's b b Patsy Duffy, aged, by Leicester—Ada A. by Asteroid, 90 lbs. (Williams) 1 1 Delaney & Ayres' b g Joe Howell, aged, by Bonnie Scotland—Eva Shepherd by imp. Sovereign, 100 lbs. (Flowers) 2 2 Time—1:43, 1:46.

Same Day.—Selling Purse \$200; \$50 to second. Horses entered at \$1,500 to carry entitled weight; \$1,000 allowed five pounds; \$750 ten pounds; \$500 fifteen pounds. Heats of a mile. G. L. Richardson's b g Billy the Kid, aged, by Leicester—Lily Stimpson by Newry, 109 lbs. (Williams) 2 1 1 Delaney & Ayres' ch m Laura, four-years, by Shannon—Folly by Planet \$1,000, 108 lbs. (Appleby) 1 2 2 Time—1:43, 1:48, 1:54.

Saturday was the closing day. At noontime the wind was blowing strong, and the general impression was that the favorable adjuncts to a race meeting, so far as a still atmosphere went, was at an end. At that time, too, there was a haze over the Contra Costa Hills, and there were clouds in the west. Two hours wrought a wonderful change. The wind subsided, the sun shone brightly, the air was warm, and the haze was dispelled. The foothills seemed to have journeyed towards the bay, and the hand that was playing on the picnic grounds at Shell Mound Park appeared to have been transferred to the grand stand. The notes were clear and distinct, softened somewhat by the distance, but not a bar missing. There could not be a more favorable afternoon for racing. While the weather was just right, the course was in the best possible condition. Soft enough and yet firm and elastic. The attendance was larger than on any of the preceding days, and all of the visitors expecting to see something which would well repay the trouble of the trip. In this they were not disappointed. The first race was for the cup at the regulation cup distance, two and a quarter miles, the nominations being Patsy Duffy, John A. and Trade Dollar. Patsy was largely the favorite in the pools, the prevailing rate being \$190 on him, \$100 on John A., and Trade Dollar \$20. There was a great deal of speculation at these odds, poolseller and clerks being kept busy until the horses were ready to start. In a race at this distance the horses were started at the "head" of the homestretch, and when the flag fell all the horses were abreast. Trade Dollar took the lead, Patsy in close attendance. John A. pulled back to third position. They galloped past the stand with Patsy and Trade Dollar head-and-head, John A. a couple of lengths in the rear, in 27 seconds. From this point Trade Dollar took the lead, and the half mile was made in 54 seconds, all of them going along easily. At the three-quarters in 1:21 1/2 Duffy and Trade Dollar were in the lead, the black colt going along easily a few lengths behind. The mile was made in 1:43 1/2. The two leaders kept their position, John A. a little closer, and at the stand, one and one-fourth miles, in 2:16, there was not much change; a mile and a half, in 2:43. Trade Dollar dropped back beaten, and John A. moved up, and from there the contest between him and Patsy was very exciting. The two ran past the three-quarter pole on a deadlock, the colt on the outside, and when two miles had been accomplished in the fast time of 3:35 1/2 the black had a little advantage. From thence came the crucial test. Could the three-year-old stand the pressure? Would Patsy be able to carry the heavy weight at the pace they were going? The "middle mile" was 1:44 and a still faster rate was necessary to win. Yet faster ran the colt, gamely the old horse struggled. There was daylight between them at the seven furlong, the advantage in favor of John A. At the bridge Patsy had lessened the gap, and from there horses and riders were doing their utmost. The steel and catgut were called into requisition on Patsy, touches of the whip and "shifting of the hit" were the incentive to John A. The younger was victorious by three-quarters of a length in the best time ever made by a three-year-old at so early in the season; that was 4:01 1/2, the last two miles in 3:34 1/2. The race gave general satisfaction, and even those who had lost so much money on it cheerfully acknowledged that their champion had exceeded their expectations.

SUMMARY.

May 3d.—The Peruvian Bitters Stakes for all ages; \$50 each, half forfeit, \$500 added, by the Peruvian Bitters Company; \$100 to second, \$50 to third. Two miles and a quarter. H. C. Judson's blc John A., three years, by Monday—Lady Clare by Norfolk, 98 pounds. (Appleby) 1 M. M. Allen's b b Patsy Duffy, aged, by Leicester—Ada A. by Asteroid, 125 pounds. (Williams) 2 Delaney & Ayres' ch m Trade Dollar, aged, by Norfolk—Eva Ashton by Asbland, 120 pounds. (Holloway) 3 Time—4:01 1/2.

The second race was a dash of one and one-eighth miles, in which were Neilson, Billy the Kid and Haddington. Neilson was the favorite at \$40, Billy bringing \$15 and Haddington \$7. Those who had lost on the previous race "plunged" to get even, and the bidding was very brisk in the auction, while the mutuels did a big business. Whatever chance the favorite had were weakened by her actions at the post. She plunged, reared and cavorted, tried to go over, under or through the fences, apparently more imbued with the spirit of Sullivan and Muldoon than that of Kittenman and delayed the start for a long time. In drawing for places she got the inside which made the task of getting her off still more arduous, as that placed her in close proximity to the fence which she seemed anxious to demolish. When the flag fell she was a trifle in the rear, and at the first passing of the stand in 13 seconds she was third. At the quarter pole in 38 1/2 seconds, she had passed her competitor, and the five-

furlong mark, the half-mile pole, in 1:03 1/2, she still led, though the Kid had improved his position. When the homestretch was reached it was evident that there would be an exciting conclusion, as all three were close together, though Neilson still led. The mile was made in 1:44, and from the reporter's stand it was impossible to tell the exact positions, but as the goal was neared the horse with the horrible name came away, and Billy the Kid was hailed the winner by three-fourths of a length over Haddington, the whilom favorite, that much in the rear of the second; time, 1:57 1/2.

SUMMARY.

Same Day.—Purse \$150, \$50 to second; for all ages. One and one-eighth miles. G. L. Richardson's b g Billy the Kid, aged, by Leicester—Lily Stimpson by Newry, 110 pounds. (Hazlett) 1 H. C. Judson's ch m Neilson, three years, by Wildside—Susie Williams by imp. Hercules, 97 pounds. (Flowers) 2 L. Shaner's b h Haddington, aged, by imp. Haddington—Pattie Flame by Norfolk, 122 pounds. (Carter) 3 Time—1:57 1/2.

Trotting at Oakland.

The race on Friday was as arranged, purse of \$500 for Vanderlynn, Sister, B. B., and Tump Winston, but the latter was withdrawn. The betting was erratic, but at last settled down to \$25 for Sister, \$18 for B. B., and \$15 for Vanderlynn. Both in scoring and in trotting the heat it was apparent that Vanderlynn was as uncertain as ever in his gait, and even his most ardent and consistent backers feared that their investments were once again gone to the bad. B. B. started off with the lead which he increased to eight lengths at the half mile, but thence, Sister trotted very steadily and fast until she was almost even at the distance with B. B. when she was off her feet, and the latter jogged in, with Vanderlynn a poor second. B. B. now was taken first choice at \$30 against \$20 each of the others, but this time Sister got away with a fine lead which she held all the way, coming in three lengths ahead of B. B., with Vanderlynn fairly up to him. The backers of B. B. must have thought that he had not been sent for the heat, for they backed him at even against the other two combined. The mile was prettily contested until the half was reached, but shortly afterwards B. B., who was lapping Sister, made a disastrous break, and Vanderlynn being in an ugly fit, Sister won handily with Vanderlynn second. There was now a scramble to get even, and Donathus was tried behind Vanderlynn, while McCann gave B. B. a rattling gallop, but all in vain as Sister improved her gait, and although Goldsmith jogged her in, he could not avoid barring her from the 2:30 class, for which she would have been quite dangerous during the circuit.

SUMMARY.

OAKLAND PARK, May 2d.—Arranged purse of \$500, best three in five to harness. John A. Goldsmith's br m Sister, by Admiral. 3 1 1 1 George Leigh names b g B. B. 1 2 3 3 Pat Farrell names ch g Vanderlynn. 2 3 2 2 Time—2:20 1/2, 2:30, 2:31, 2:29.

Capital Turf Club—Running and Trotting at Sacramento.

The Capital Turf Club, recently re-organized, have been engaged with the first meeting under the new regime this week, at Agricultural Park. They have achieved an encouraging success, and the question of the permanency of the club as a local institution seems to be settled. The new track has been quite satisfactory though slow. The following is a resume of the racing up to the time of going to press:

First Day, May 6th.—Running; purse \$300, for all ages. Heats of three-quarters of a mile. Delaney & Ayres' m Trade Dollar, aged, by Norfolk—Eva Ashton, 115 pounds. (Appleby) 1 1 M. M. Allen's br c Bryant W., four years, by Monday—Babe, 118 pounds. (Williams) 2 2 Lee Shaner's b s Haddington, aged, by imp. Haddington—Pattie Flame, 120 pounds. (Carter) 3 3 Fred Bridge's s g St. Patrick, aged, 103 pounds. (Flowers) 4 4 Time—1:18 1/2, 1:17.

Won easily. Pools—First heat Bryant W. \$40, Haddington \$10, Field \$5. Second heat, Haddington \$20, Bryant W. \$12. Paris Mutuels paid \$20.55.

Same Day.—Running, for all ages; purse \$250. One mile and a quarter. M. M. Allen's b s Jocko, aged, by Cariboo—Reply, 122 lbs. (Williams) 1 W. M. Murray's br s Birdcatcher, aged, by Specter—Pet, 122 pounds. (Appleby) 2 L. J. Rose's g Harry Rose, three years, by Rutherford—Alleen Oge, 90 pounds. (Flowers) 3 W. B. Tothunter's b s John Funk, three years, by Monday—Susie B. Moore, 122 pounds. (Courtney) 4 Time—2:13 1/2.

Pools—Harry Rose \$25, Jocko \$10, Field \$4. Paris Mutuels paid \$8.60.

The Race—Birdcatcher was first away and led for three-quarters of a mile, with Harry Rose second, Jocko third and Funk last. Around the turn Rose and Jocko were both sent along sharply, and for a furlong the triangular fight was warm. At the seven-furlong pole Rose fell back beaten, and although Birdcatcher made a game struggle, Jocko was first to the winning post by a length.

Same Day.—Trotting, purse \$200, for named horses. P. J. Williams's b s Goldnut. 1 1 1 W. F. Smith's blg Alborak. 2 2 2 John Robinson's br g Colonel. 3 dist. Time—2:50, 2:51 1/2, 2:51 1/2.

Pools—First heat, Alborak \$40, Goldnut \$30, Colonel \$20. Second heat, Goldnut \$20, Alborak \$17.

The Cash System.

The plan recently discussed by some of the officers of the Kentucky Association to open stakes on the cash instalment basis, is thought well of by many leading turfmen. Owners of large successful stables like the Dwyers would be much better off to-day had there been no credit system. The orders for forfeits which they hold amount to thousands of dollars. It is just as easy for the nominator to pay a portion of the fee when he sends in the nomination as it is to raise the entire forfeit after the race has been run. If the declaration is ten dollars, let this sum be sent in with the entry, and if the second instalment is not paid on a fixed day, the horse will be considered out. The final payment should be collected the evening before the race, and then the treasurer of the club would be able to hand to the winner of the stake all that is due him in clean cash, instead of part money and part orders, some of which are not worth the paper on which they are written. If a horse is sold with his engagements the seller could collect from the purchaser the fees paid, and thus close up the account. And should a purchaser make a deal with an irresponsible party for a horse, he would have the satisfaction of knowing that no concealed claim for forfeits could be presented when he got ready to start in a race. The cash system will do away with deception, confusion, and debt, and the winner of an event will collect without any trouble every cent that is due him. Chicago has proved the value of the plan in her trotting stakes, and the jockey clubs can do just as well with their running stakes.—Turf, Field and Farm.

Owners and the Public.

[Melbourne Sportsman.]

Some weeks back, when penning an article on "Owners," under the head of Typical Turfites, our contributor "Free-lance" (writing generally) strongly condemned the selfish policy pursued by those owners of race-horses who wholly and entirely ignore the public interest, and, oblivious or careless of the fact that the public have heavily backed their horses, scratch them or leave them in a race as it suits their whims or betting books. A case has recently occurred which, although probably due to carelessness rather than design, is none the less questionable. A horse has been allowed to remain in the Australian Cup until the eleventh hour; nibbled at by the outside public from the date of his entry; then backed by commission for an unknown party, and, as a natural sequence, heavily supported, both straight-out and in doubles, by the general public; rushed into position of first favorite—at one time seeing 5 to 1; finally knocked out of the market by individuals who (it is only natural to conclude) knew he was not likely to be a starter, and at last—scratched.

Of course, we refer to Martini-Henry, the owner of which has been singularly successful on the turf, and has won large sums of money at various times by backing his horses. The Hon. James White is a gentleman who, it is only reasonable to infer, from his position and wealth is, or ought to be, above committing an action which would be condemned in a member of the ring. We have no alternative, therefore, but to attribute the non-withdrawal of Martini-Henry to forgetfulness on the part of his owner. This fact, unfortunately, is little consolation to those individuals (and they are many) who have lost their money. Mr. White, it is reported, won an immense stake in bets alone by the double-event victory of this same horse. Has it never occurred to him that that money originally came out of the public pocket? Has it never struck the wealthy owner of a wonderful horse that property has its duties as well as its rights, that it is the non-recognition of these rights in other directions which has brought many of our wealthy men, both in these colonies and at home, into well-marked odium, and that the public who really supply the sinews of racing look upon a good horse (the property of a sporting gentleman) in the betting quotations as public property for the time being, and back it? We scarcely think so, or the Hon. James White, as an honorable man, would surely not allow the betting public to back an animal which was not likely to see the post.

Early last spring the same horse was heavily backed (by the public) to win the A. J. C. Derby, for which event he was scratched on the day before the race. On this occasion we believe the horse was suffering from a cold. Despot, who was consistently supported to win a big race in Sydney, was scratched; the reason assigned being forestalled in the market by book-makers, for whose benefit (by the way) Mr. White asserted he did not maintain race-horses. Again the public was a loser. We are of opinion that, if a book-maker had owned these horses the public and press would have arrived at the conclusion that they had been kept in the races for market purposes, and would have unanimously condemned the motives and the movers. In the case of the Hon. James White, however, we know that, he being utterly independent of mercenary considerations, the probabilities are that to sheer carelessness or utter indifference to the sporting public the fact of their late withdrawal is attributable. If, however, we condemn a book-maker (who has to make his living by fitness) for doing that which causes the public to lose its money, surely we must blame an independent owner for doing exactly the same thing, repeatedly, and without any apparent motive. Indeed, it is our duty as journalists to go further and assert that it is infinitely more reprehensible on the part of an owner—who is looked up to and trusted by the public—to neglect withdrawing his horses until the last moment, than it is for the metallieian, who is also an owner, who leaves his nominations in a race as late as possible. In the instance of the book-maker's horses, backers, knowing the owner to be a betting man, would exercise a greater amount of caution than when backing animals the property of an independent and wealthy gentleman, more particularly one entitled to the prefix "honorable."

The code of morality which governs the actions of horse-owners has always been loose, and is difficult to define. It is guided in two many instances by pure selfishness; when, therefore, a leading turfite sets an example of carelessness or nonchalance how can we blame the book-maker who profits by it, or the poorer owner who follows suit on a future occasion? There appears, unfortunately, to be something in connection with the running of race-horses which blunts the fine sense of some otherwise estimable men—who would, in any other capacity, scorn to do a questionable action—so much that they are unable in turf matters to distinguish clearly the narrow limits which divide strict honor and manly fair dealing, from questionable practices. It is therefore necessary for a sporting journal, to from time to time, by a little kindly friction, restore the lustre of this tarnished sense of propriety, the dimness of which, we feel sure, no one regrets more than some of our wealthy horse-owners who pose as—and we feel sure would like to act as—gentlemen patrons of the turf, and not as higher class turf strategists, ready at all times to act entirely in their own interests and without consideration for others under the selfish plea of the divine right of an owner to do what he likes with his own—a plea which, as we have said, has brought wealthy men in other walks of life into well-merited contempt both in these colonies and at home and which in many instances an intelligent public opinion now resents and condemns.

What He Cost.

J. I. Case tells a reporter of the Chicago Tribune something about how he came to buy the little black pony. "There have been a good many stories told," he said, "about how I came to own Jay-Eye-See, but they are all wrong. The facts are that the fall I became his owner I stopped in Chicago on my way to Kentucky and met George Brastfield, who had been Superintendent of Col. West's farm near Lexington. I asked him to tell me about the best young stock, in his estimation, that Col. West had—to write down the names and breeding of each animal for me, placing them in what he considered the order of merit. He did so, and the very first entry was; 'Black colt, by Dictator, out of Midnight.' When I reached Kentucky the little black colt impressed me wonderfully. He was my choice from the first, and I bought him for \$500 and named him after myself. I paid the same amount for Phallas."

Alfred Loder, of Lewisville, Ind., advertises in the Indiana papers a stallion that he calls Thomas B. He says the horse was bred by T. W. Ewing, twenty-six miles south of Lexington, Ky., and sired by Whipple's Hambletonian, dam by Telegraph by Old Telegraph. If this pedigree is genuine, Thomas B. has wandered a good way from the home of the

Sam Gamble at Fresno—The Coming Meeting—Something about A. T. Stewart.

EDITOR BREEDER AND SPORTSMAN:—Thinking that the horsemen and turfmen would like to know something about the coming spring meeting of the Fresno Fair Ground Association, this meeting of this association will begin at Fresno, May 20th, and occupy five days. The programme contains fourteen numbers; eight running, five trotting, and one pacing, for all that never beat 2:20. The track at Fresno is entirely new, but by the 20th it will be near enough to regulation to please all. The association expect to see a large attendance, and no end of fun through the week. The Kelly and O'Brien Trompe will play at the Opera House. I have been very busy having the stands built for the judges, timers and pool box, also fences, stables, etc. In time the city of Fresno will have a fine fair ground. The track is two feet over a mile. The turns are thrown up most too high to suit my taste; it is one inch to the foot; the turns are fifty-five feet wide. I would like to see a large attendance throughout that week, for the Fresno Fair Ground Association are trying to get in the California circuit, and they will have everything in shape in time. Now, I invite one and all to be present at this meeting. I came here to help them out, and will return to San Francisco after the meeting. We have now about a dozen runners, that came in the last week, to take part in the coming races. I saw them in their work this morning, and noticed that the boys held their hands close to their breasts, so they must think that they have good ones. As I am a poor judge of runners it will be impossible for me to give the pool buyers points, but when it comes to the trotters I am in good shape for a short talk. There are some ten head of trotters in training here, but it takes up all my time in watching two of them. One is the high-bred stallion A. T. Stewart, making the season at Fresno Fair Grounds. He is owned by the young and straightforward gentlemen Somers & Ayres. A. T. Stewart is by Mambrino Patchen, full brother to Lady Thorne, record 2:18; first dam by Mambrino Chief, sire of Woodford Membriou, record 2:21; second dam by Young's Pilot, Jr. A. T. Stewart resembles his sire Mambrino Patchen very much. He is a dark brown, tan about the flanks, sixteen and a half hands high, and weighs about twelve hundred and fifty pounds. His hind pasterns white. He has the best of feet and legs, a long flowing mane and tail, and remarkable style and lofty carriage. A good head set on a long, rangy neck; great length and a capacious middle piece. His gait is big and square, his disposition is good, he is in all a great horse. He has always been kept under a cloud, and never was worked a day in his life, nor never served a good mare. I was surprised to find such a high-bred, fine-finished stallion as this owned in this part of the State, and to know that some of our would-be-horsemen that own dung-hill stallions, "back capping" such a stallion as A. T. Stewart. "Why, gentlemen," I said to them, "that horse is worth that fine brick block over there, that you think so much of, and all the rest of the stallions in your county combined, and is worth now to this State fifty thousand dollars to the breeders." A. T. Stewart is twelve years old this spring. I asked Mr. Somers if he had ever shown any speed; he said that he could trot in three minutes, that is, the man that they bought him of said so; but he said to me, "I will get Mr. Ayres to drive him some morning and let you see him move." I told him it would be pleasure to me to see his gait, so the next morning Ayres came on the track with him, hog fat, and striking the cross-bar of the sulky every stride over a very heavy track in 2:52, the first time he was on a track this year. He could speed a forty clip. It would not surprise me if they work him to see him go well. He is the apple of my eye as a stock-horse. Somers & Ayres have a chestnut filly in their stable that pleases me very well. She is two years old, by Algona, her dam by A. T. Stewart. She has had but little work, and is very busy right now. She goes something like Oakland Maid, to me. SAM'L GAMBLE. Fresno, May 5th, 1884.

Foals.

At Rancho del Peso. Property of J. B. Haggin. May 1st, hay colt by Algona, dam Dooley Filly, by Muldoon. May 2d, hay colt, star in forehead, by Algona, dam Fashion Filly by Correat. May 3d, chestnut filly, star in forehead, by Algona, dam Minnie Warren by Langford. May 3d, hay colt by Exile, dam De Kay Mare by John Nelson. May 4th, bay filly, few white hairs in forehead, by Echo, dam Lady Berkeley, by Muldoon, g. d. by St. Clair.

Thoroughbreds.

April 25th, hay filly, star and large strip on nose, hind feet white, by Jim Brown, dam Williamson's Mare, by Belmont, g. d. by American Boy. May 1st, chestnut colt, strip in face, hind feet white, by Jim Brown, dam Belle Dale. May 1st, chestnut colt, star and hind feet white, a little white on left fore foot, by Longfield, dam Medea by Norfolk. May 5th, bay colt, star, right fore foot and right hind foot white, by Jim Brown, dam Julia Morgan by Lodi.

Foals at Palo Alto.

Following are the trotting foals at Palo Alto since last report.

Table with columns: DATE, SEX, DAM, SIRE. Rows include entries for April 22, 27, 29, May 3, 4, 5, 6, 7, 8.

Thoroughbred Foals.

Names Claimed.

By E. S. Smith, San Jose. KATIE S., for sorrel filly foaled March 28th, 1884, by Baywood, son of Nutwood; dam by Young America. CLEAR GRIT, for sorrel colt, blaze in face; four white stockings, by Fleetwood, son of Nutwood; dam by Young Justin Morgan.

Chas D. Coward, well known hereabouts, has gathered together a stable of trotters at Helena, Montana.

Belle Meade Yearling Sales.

The annual sale of yearlings at Belle Meade occurred on the 30th ult. The weather was showery during the day, but that did not keep the racing men away from the sale. There was great demand for hacks during the morning to convey those who were desirous of purchasing some of the youngsters. Among those were the Dwyer Brothers, of Brooklyn; S. D. Bruce and Appleby & Johnson, of New York; Captain Cottrell, of Mobile; Wooding & Puryear, Ed. Corrigan, George Kernaghan, and many others from all parts of the country. The stock was acknowledged by all parties as being in fine condition and worthy of the reputation of Belle Meade. The following is a list of the sales, with the names of the purchasers, and the prices paid for the youngsters:

- No. 1—Equihalance, h c by Equirer, dam Bandanna, by Bonnie Scotland; S. D. Bruce. \$650
No. 2—Tariff, hr or h c by Great Tom, dam Silver Maid, by Bonnie Scotland; Ed. Corrigan. 375
No. 3—Elberou, blk c by Enquirer, dam Babe, by Bonnie Scotland; J. M. Aruold. 350
No. 4—Epicure, b c by Enquirer, dam Benicia, by Jack Malone; S. D. Bruce. 725
No. 5—Euvoleur, b c by Enquirer, dam Colosse, by Colossus; Dwyer Brothers. 1,000
No. 6—Beverley, ch c by Bramble, dam Sue Walton, by Jack Malone; Appleby & Johnson. 400
No. 7—Teetotaler, ch c by Great Tom, dam Lady Lindora, by Australian; G. H. Kernaghan. 675
No. 8—Epsom, ch c by Enquirer, dam Bella Donna, by Brown Dick; Fayette Smith. 275
No. 9—Egmont, h c by Enquirer, dam Melita, by Muggins; G. W. Curtis. 275
No. 10—Brambleton, h c by Bramble, dam Valerian, by Vandal; Dwyer Brothers. 2,000
No. 11—Typo, ch c by Great Tom, dam Martica, by Daniel Boone; S. S. Brown. 800
No. 12—Endurer, ch c by Enquirer, dam Analise, by Jack Malone; W. E. Applegate. 375
No. 13—Ecclesiast, b c by Enquirer, dam Bonnie Lawn by Bonnie Scotland; John Carter. 225
No. 14—Beaver, b c by Bramble, dam Glendora, by Glengarry; S. S. Brown. 325
No. 15—Teaddles, ch c by Great Tom, dam Edna E. by Breathitt; Ed. Corrigan. 350
No. 16—Erlanger, blk c by Enquirer, dam Nubia, by Albion; John Carter. 425
No. 17—Eltonhead, ch c by Enquirer, dam Daisy Hoey, by Tipperary (hland); W. B. Chestham. 130
No. 19—Tarter, ch c by Great Tom, dam Blondina, by Bonnie Scotland; Ed. Corrigan. 475
No. 20—Evander, blk c by Enquirer, dam Jacquet, by Jack Malone; Van Kirkman. 210
No. 21—Eulogist, ch c by Enquirer, dam Enchre, by Brown Dick; G. H. Kernaghan. 250
No. 22—Bertin, ch c by Bramble, dam Quartette, by Jack Malone; S. D. Bruce. 675
No. 23—Broadside, b c by Bramble, dam Varille, by Vandal; J. M. Laudy. 160
No. 24—Effe Alice, h f by Enquirer, dam Alice Murphy, by Bonnie Scotland; E. J. Eurlight. 475
No. 25—Euguerande, b f by Enquirer, dam Bribery, by Bonnie Scotland; Tyree Bate. 325
No. 26—Bastante, ch by Bramble, dam Melrose, by Child Harold; Wooding & Puryear. 425
No. 27—Toccata, h f by Great Tom, dam Duet, by Highlander; J. G. Nelson. 350
No. 28—Ensenada, ch f by Enquirer, dam Buttercup, by Glen Athol; W. B. Cheatham. 400
No. 29—East Lake, ch f by Enquirer, dam Bonnie Park, by Bonnie Scotland; Tyree Bate. 275
No. 30—Bordelaise, br f by Bramble, dam Anna Augusta, by Leamington; C. H. Gillock. 600
No. 31—Traviati, h f by Great Tom, dam Variety, by John Morgan; Tyree Bate. 325
No. 32—Edgefield, ch f by Enquirer, dam Orphan Girl, by Muggins; C. H. Gillock. 600
No. 33—Edelweiss, br f by Enquirer, dam Jessamine, by Brown Dick; E. H. Douglas. 235
No. 34—Bignonet, h f by Bramble, dam Bobinet, by Brown Dick; James Monroe. 500
No. 35—Loribera, ch f by Great Tom, dam Bonnie Belle, by Bonnie Scotland; W. G. Curtis. 350
No. 36—Eukonia, hr f by Enquirer, dam Bonnie Meade, by Bonnie Scotland; S. S. Brown. 650
No. 37—Egret, ch f by Enquirer, dam Clara L., by Bonnie Scotland, E. H. Douglas. 280
No. 38—Butterfly, ch f by Bramble, dam Mohur, by Gilroy; Samuel Bryant. 300
No. 39—Tuscumbia, b f by Great Tom, dam Ermenegarde, by Lightning; G. H. Kernaghan. 400
No. 40—Evanessa, h f by Enquirer, dam Mariposa, by Jack Malone; Wooding & Puryear. 1,000
No. 41—Tunika, ch f by Great Tom, dam Vanilla, by Jack Malone; Samuel Bryant. 425
No. 42—Bandoine, h f by Bramble, dam Bergamot, by Bonnie Scotland; C. J. Enright. 325
No. 43—Teolote, ch f by Great Tom, dam Blondin, by Commodore; Tyree Bate. 250
No. 44—Benzaline, hr f by Bramble, dam Arnica, by Asteroid; G. B. Bryson. 260
No. 45—Trellis, ch f by Great Tom, dam Maderia, by Jack Malone; S. D. Bruce. 775
No. 46—Elsineure, h f by Enquirer, dam Bonnetta, by Bonnie Scotland; Fayette Smith. 200
No. 47—Tremolate, h f by Great Tom, dam Soiree, by John Morgan; W. H. Washington. 300
No. 48—Bozenta, hr f by Bramble, dam Liza Davis, by Whirlwind; Edward Corrigan. 1,250
No. 49—Tyranny, ch f by Great Tom, dam Mozelle, by Jack Malone; S. D. Bruce. 1,000

Sale of Shenandoah and Freda.

Last Saturday was consummated a sale of two of the crack Palo Alto three-year-olds, the brown colt Shenandoah by Shaunon, dam Denirep by young Melbourne, from Methilde by imp. Scythian, and the black filly Freda by Wildside, dam Frolic by Thunder, from imp. Siskin by Muscovite. Both ran in 1:42 1/2 as two-year-olds. Freda won the Frigan Stake at the fall meeting of the Blood-Horse Association at Oakland, last August, with 107 pounds up, in 1:42 1/2, the best on record at the weight. She finished with Sheunadoah, School Girl, Callie Smart, Tibbie Dunbar and Rita behind her. Shenandoah won a sweepstake at San Jose a month later, with 110 pounds up, in exactly the same time, beating Bachelor and Mr. Baldwin's Sister to Clara D. filly. The pair is largely engaged in the east, and will add greatly to the strength of the Sauta Anita Stable.

English Racing—The Two Thousand.

LONDON, April 30th, 1884.—At the Newmarket first spring meeting to-day the race for the Two Thousand Guineas Stake was won by Mr. Foy's brown colt Scot Free (late Donald II). Mr. Gerard's chestnut colt St. Medard (late Crusader II) came in second, and Sir John Willoughby's (late Lord Falmouth's) brown colt Harvester, third. There were ten starters.

Harvester, Superba, St. Medard, Royal Fern, Hermitage and Scot Free made the running, Scot Free leading to Abingdon Dip. Superba then assumed the lead until Platt let out Scot Free, who came clear away and won in a canter by five lengths. There was only a head between St. Medard and Harvester. The others finished in the following order—Superba, Royal Fern, Beauchamp, Hermitage, the Sister to Adelaide colt, Prince Rudolph and Doncaster Cup. The winner's time was 1 min. 43 sec.

Scot Free was ridden by Platt, St. Medard by Archer, and Harvester by Webb.

The other starters and their jockeys were—Lord Ellesmere's bay or brown colt Prince Rndolph (Giles).

Sir G. Chetwynd's bay colt by Hermit, out of Sister to Adelaide (Wood).

Mr. E. Bird's bay or brown colt Doncaster Cup (Goater). Mr. J. H. Houldsworth's bay colt Royal Fern (Canon). Mr. R. Jerdine's bay colt Beauchamp (Osborne).

Mr. Lefevre's bay colt Hermitage (C. Loates). Mr. R. Peck's bay filly Superba (S. Loates).

The betting at the start was: 3 to 1 against Scot Free; 11 to 2 against St. Medard; 20 to 1 against Harvester; 100 to 1 against Prince Rudolph; 11 to 1 against the sister to Adelaide colt; 100 to 1 against Doncaster Cup; 7 to 2 against Royal Fern; 25 to 1 against Beauchamp; 100 to 1 against Hermitage; 4 to 1 against Superba.

The Two Thousand Guineas Stake—A subscription of 100 sovereign each, half forfeit, for three-year-olds, colts, 126 pounds; fillies, 121 pounds; the owner of the second horse to receive 200 sovereigns out of the stakes, and the third to save his stake. R. M., 81 subscribers.

Mr. Foy's br c Scot Free, by Macgregor, out of Celibacy. 1 Mr. Gerard's ch c St. Medard, by Hermit, dam by Musket, out of Adelaide's dam. 2 Sir John Willoughby's br c Harvester, by Sterling, out of Wheats. 3

Scot Free (late Donald II.) is a brown colt, three years old, by Macgregor, out of Celibacy, by Lord Clifden, second dam by The Cow. As a two-year-old he started three times. Was unplaced to Wild Thyme for the Woodcote Stakes at the Epom summer meeting; unplaced to Offspring in a plate race at Ascot in June, and won the Great Sapling Plate, five furlongs, at Sandown Park, October 18th, defeating the Hermit-Adelaide colt, Camlet, and five others. In this race 20 to 1 was offered against him at the start and he won by a neck.

St. Medard is a hay colt (three years) by Hermit, dam by Musket, out of Adelaide's dam. He started six times last year, winning twice, the first time at the Newmarket second October meeting, when he captured a plate race over the Bretby Stakes course, winning from a field of eight, and the second time pulling off the Mouday Nursery Handicap from ten others at the Newmarket Houghton meeting.

Harvester is a brown colt (three years) by Sterling, out of Wheats. Bought on Monday last at Lord Falmouth's sale, by Sir J. Willoughby, for \$43,000. Started six times last year, winning twice, capturing the Triennial Produce Stakes at the Newmarket first October meeting, ridden by Fred Archer, and defeating a field of eight, and the Clearwell Stakes at the Newmarket second October meeting, again ridden by Archer.

The Suburban Handicap, Coney Island June, 1884.

Seldom, in the annals of the American Turf, has there been a handicap that excited more attention than the Suburban, and as the handicap, taking it as a whole, is a very good one, the betting on it is sure to be of an extensive character. The Suburban is a handicap sweepstakes of \$100 each, half forfeit, and only \$25 if declared by February 20th, with \$2,500 added. The second to receive \$500 of the added money, and twenty per cent. of the stakes, and the third, ten per cent. of the stakes. Weights to be announced February 1st. Winners after publication of weights of two rees of any value, or one of \$1,000, 4 pounds extra; of two of \$1,000, or of one of \$2,000, 7 pounds extra; of three of \$1,000, or two of \$2,000, 10 pounds extra. One mile and a quarter. This handicap closed with the respectable entry of sixty horses, and the man who actually spots the winner is lucky. To commence with the top weights, George Kinney, 4 years old, is handicapped at 132 pounds (the top weight), and although it seems a crushing weight, he is such a good horse that, were I certain that he would represent the "Red and Blue" interest, I should hold his chance in great respect. The best race, in my opinion, that he ran last year, was in the Monmouth Stakes, when as a three-year-old, over a mile and a half, he carried 112 pounds, and beat Eole, 5 years old, with 127 pounds, and Iroquois, 5 years old, 127 pounds; Monitor, aged, carried 125 pounds, and his stable companion Miss Woodford, 3 years old, 105 pounds, and won cleverly by a length and a half in 2:36. This race proved to my mind that George Kinney was a horse far above an average, and providing he comes fit and well to the post, and is supported by the strong stable to which he belongs, will assuredly render a good account of himself, and beat far more than beat him. Next in order comes Barnes, 4 years old, with 131 pounds. This horse is as good a looking one as ever looked through a bridle, but I am afraid not too sound; he has a fine turn of speed which should enable him to win some good races. Miss Woodford, 4 years old, and Iroquois, 6 years old, are both weighted alike at 150 pounds. Miss Woodford is such a nailing good mare that it is difficult to say what she is actually capable of doing, but if I were sure that the Derby winner would come to the post as well as when he ran last year in the Monmouth Stakes, I should not look much further for the winner; but I understand that he will cover from twelve to fifteen mares ere the racing season commences, and that will, I am afraid, destroy any chance he might have had, as it is well known that when a horse has once tasted the joys of married life, as a rule, does not attend strictly to business. Drake Carter seems to be overweighted with 127 pounds, but old Monitor, with 125 pounds up, reads like business, and should this deservedly popular horse be all right on the day, let the best look to their laurels. It is no breach of confidence to say that Alcock tells me he never was better in his life, and win or lose he is bound to render a good account of himself. Pizarro has, I think, a steadier on with 124 pounds but the horse showed unmistakably last year that he had the gift of going, and will not disgrace "the Parsons's" breed. After him comes his stable companion old Parole; now, with 120 pounds up, over a mile and a quarter, providing he is fit and well, it will, I think, be a case of "catch me who can," but at the same time age will tell, and when a horse has reached his eleventh year, he, as a rule, loses his dash of speed. Check-

mate, if the horse he was two years since, with 113 pounds, looks to be fairly handicapped, but I have no great fancy for him, and, besides, it is said that he pulled up "anything but well" the other morning, and another thing, when a horse gets to be nine years old, and loses his speed, how often does he regain it? General Monroe's impost is 117 pounds, and he should not be overlooked as he is a good horse, and is looking and going first-class. Aranze showed a good turn of speed, but I think she likes a mile better than a mile and a quarter, and 119 pounds is weight enough for her. Jack of Hearts is, I think, leniently handicapped at 114 pounds, and if "The Pusher" rides him, will be the best of them. Kinglike and Herbert are handicapped at 113 pounds respectively, but I have no fancy for either. Rica at 112 pounds is not overweighted, and if it were a mile instead of a mile and a quarter, I should think she had a great chance. Free Gold is, I am told, all wrong, and I am very sorry for it, as no one deserves to win more than Chas. Littlefield, as he is a most careful, industrious trainer, and should be seen to the fore oftener than he is, but the old proverb may come true in his case "that everything comes to those that wait." I have no fancy for Mr. W. L. Scott's referee, 110 pounds, or Hilarity, 109 pounds, but when I get to the two handicapped at 107 pounds, I have to stop and ask myself a question, these two, Bondholder and Eolista, are, I am sure, good horses, and both fit and well on the day will take their own part. Bondholder is doing well now, although he had to be stopped in his work, as he had also Eolista. Trafalgar is also carrying the same weight, the good-looking son of King Alfonso and Acrolite (the dam of Fellowcraft, Rutherford, Lamplighter, Spendthrift, etc.) is doing remarkably well, and although heretofore he has not run up to the form that his good looks and high lineage would naturally make one look for, I have an idea that he will yet win an important race or two. Burch and Empress are both handicapped at 106 pounds each. The former ran very respectably several times last year, and I know that a lot of good money has gone on him, still I hardly think he is class enough to pull a race of this sort off. Empress was a fairly good mare last year, and her principal win was in the Pocahontas Stake at Saratoga, where she beat Miss Woodford a length, being, however in receipt of 8 pounds. After the aged division mentioned, come the three-year-olds, and in all probability it is from their ranks that the winner will spring. Burton, 104 pounds, is the top weight, but I do not think danger is to be apprehended from him, good horse as he is. Euclid, 4 years old, 103 pounds, is well handicapped, and if he runs should be respected, as should Mr. Jas. E. Kelly's Bella, 4 years old, with 103 pounds. This mare is very fast, but I think the distance a trifle too far for her. Thackeray has 104 pounds, and although it is a good weight for a three-year-old, he is such a game, good little horse that should be run in the interest of the "blue and orange" he will give a good account of himself. Pampero was a very useful colt last year, but I hardly think he is capable of actually winning. Of the 100-pounds division there are Blue-Grass Belle, 4 years old; Circassian, 4 years old; Decoy Duck, 3 years old; Frankie B., 5 years old; Nonage, 3 years old, and Heel-and-Toe, 4 years old. Of this lot I decidedly like Decoy Duck and Heel-and-Toe the best, but at the same time fancy that it is a little too far for the latter. Decoy Duck ran a really good race in a Handicap Sweepstakes at Sheephead Bay, carrying 107 pounds; Pampero, 100 pounds; Himalaya, 104 pounds; Sister, 107 pounds, and Ratanaplan, 90 pounds, winning by a couple of lengths; on this form she should hold all the high-weighted three-year-olds perfectly safe. For War Eagle, 95 pounds, I have no fancy. Wallflower, Vocalic and Mittie B., are all handicapped at 97 pounds. I will pass over the first two named and come to Vocalic, who has a great turn of speed, and should he run, and his temper he unruffled by a good many false starts, will assuredly run well. Mittie B. is another fast mare, and on some of her form is well in, and many shrewd judges hold her chance in great respect. Ecuador and Dutch Roller have 96 pounds respectively, and of the two I would sooner stand the son of Dutch Skater. The horses handicapped at 95 pounds consist of Hattie M., 4 years old, and Farewell, 5 years old, neither of whom I can stand for a handicap of this class. Marshall, 5 years old, and Caramel, 4 years old, are both weighted alike at 93 pounds, and at the same weight, is Water Lily, 3 years old. Now this mare, if kept for the handicap under question, will take a lot of beating, as she was hanging up with the best of them last year, and here, horses that were just about her own equal, are asked to concede something like ten or twelve pounds. She is a very game mare, and will be struggling on when many are beaten. Another useful three-year-old, handicapped at 92 pounds, is Economy, and should she be stripped for this race, no better-looking one will appear on the scene of action. Messrs. Appleby & Johnson's Turk is a three-year-old horse, that has been supported to win a good stake; he has done remarkably well this winter, and will run well. Blossom, three years old, is also handicapped at the same weight, but I do not think has much chance. The 90-pounds division is headed by Thurlis, 4 years old; now this son of Liabon showed very conclusively to me, last year, that he had a good turn of speed, and although his astute young trainer Barbee blistered him, he is sound and all right, and should be put down among the dangerous division. Altair, Old Liz, Delilah and Eldorado, are the others handicapped at 90 pounds, but I have no fancy for any of them, excepting the last named, who, it is said, has been very highly tried with George Kinney, and there is no doubt that the son of Bonnie Scotland is quite capable of trying one for this handicap, and with such tackle in the stable there should be no mistake, and, moreover, I know that a good deal of money has gone on him. Whether this emanated from the stable or not I cannot say, but if it did, then there is danger to be apprehended from this quarter. Mike's Pride and Fond du Lac, both 4 years old, are handicapped at 87 pounds each, and although the weight is little enough in all conscience, still their class is so poor, although I have heard well of the latter, that I think they may be passed over. Four are handicapped at 85 pounds, viz.: Sinaloa, 3 years old; Sandoval, 3 years old; Vibrator, 4 years old, and H. Murray, 4 years old. Of this lot I have no great opinion, although I hear a good account of H. Murray, and Sinaloa is quite likely to win a race or two for Mr. J. R. Keene. Sandoval, when in George Evans' care, was a big overgrown, good-looking colt, that looked as though he would improve with age. To essay the task of spotting the winner is a most difficult one, as before the day many changes will doubtless have occurred, and penalties been engendered; but this I can say, that if there is a really good three-year-old in the handicap, it will take the heavy-weighted division all their time to give the young 'one the weight. However, if I take half a dozen to beat the field, I do not think I shall be far off the mark. Amongst the six I will take are George Kinney, Monitor, Jack of Hearts, Thurlis, Water Lily and Eldorado, of course reserving to myself the right of changing such selection should anything unforeseen occur to place any of my champions hors de combat.—Chicago Horseman.

### The Strathmores.

It was not until Santa Claus came out in California as a five-year-old, and lowered all the records ever made by horses of that age by trotting a mile in 2:18, that Strathmore came prominently before the public. Although a remarkably well-bred horse, being by Rysdyk's Hambletonian and out of Lady Watermire by North American, he had never been given the chance as a breeder that his lineage entitled him to. Santa Claus, who, as stated, was the first of Strathmore's get to come prominently before the public, is a horse that has always been handicapped to a great extent by physical infirmities and misfortunes. As a yearling, he was of such poor shape and so stunted in growth that the man who bred him made several unsuccessful efforts to foist him upon his neighbors as a gift, and at one time had serious thoughts of ending the colt's existence, this being, in his opinion, the most profitable way of disposing of him. But after reaching the age of three years, Santa Claus, who was then called Count Kilrusb, began developing a remarkable degree of speed, and was purchased by Colonel John W. Conley, of this city, for shipment to California, in company with a number of animals which that gentleman was about forwarding to the Pacific slope. At this time Santa Claus could show a half mile at a 2:30 gait, and Colonel Conley was so impressed with his speed and way of going that he had fixed upon a long price for the bay colt. Arrived in San Francisco, there was no difficulty in finding a purchaser for Santa Claus. He was worked considerably as a four-year-old, and when five was taken in hand by Orrin Hickok, who drove him in 2:18 in a race over the Sacramento track, the horse starting on the outside of a field of ten, and doing the first quarter in 33 seconds. This performance not only brought Santa Claus into prominence, but had the same effect as to his sire; and since that time the Strathmores have been among the leading branches of the Hambletonian family, there being at the present time eleven of them in the 2:30 list, and of these two have beaten 2:20, the other one beside Santa Claus being Tucker, 2:19. This last-named horse, who is now but eight years old, acquired his record last season in a seven-heat race, which was finally won by Mr. McFerrer's four-year-old filly Day Dream, a daughter of Cuyler, so that the honors of the day at no time left the Hambletonian family.

Another good one of the Strathmore family is Chestnut Hill, a horse bred by Mr. J. P. Wiser, of Canada. Chestnut Hill's record of 2:22½ was obtained during his first season on the turf, and soon after that he was purchased by the late Mr. Chas. Griswold, of New York city, who drove him for several seasons on the road, and at the dispersal of that gentleman's stable, after his death, Chestnut Hill was purchased by a man who will hereafter use him for breeding purposes. The other Strathmores that have beaten 2:30 are Alice Stoner, Steinyway, Henderson, Solo, Nannie Talbot, Strathlan, Stuart and Monitor. Of these Steinyway, Stuart and Strathlan deserve special mention. The first-named was, in his three-year-old form, a horse of remarkable speed, and during that season obtained a record of 2:23½ over a very poor track, and when not in condition for a severe race. This was at that time the best record ever made by a three-year-old trotter, and although it was lowered to 2:23½ the same season by Jewett, there is no doubt in the minds of those who are acquainted with both horses that Steinyway was by far the best of the two. He was purchased the following winter for \$15,000 and taken to California, in which State his colts are now attracting more than ordinary attention by their fine size, finish and way of going. Stuart, whose dam is by Coaster—himself a trotter of merit—made a record last year as a three-year-old of 2:29½, in a hotly contested race with other horses, and whenever a colt of that age can trot in 2:30 or better and does it in a race, the justness of his claims to being considered first-class are universally admitted. Strathlan came out last year in public for the first time, and it was the universal testimony of horsemen who witnessed his performances in the early western circuit that his record of 2:29½ is not within eight or nine seconds of his capacity. He is a horse of pure trotting action, good disposition, fine size, and as his dam was a daughter of Peck's Idol, there is little doubt that he can fight out the battle with the best of them. As Strathmore is hardly past his prime it is reasonable to expect that his list of 2:30 horses will be largely augmented in the near future, and as he is now under the management of a thoroughly competent man, the capacity of his colts will in all instances receive a fair test.—Breeder's Gazette.

### CRICKET.

#### Olympic Grounds, Oakland.

##### Fixtures.

- May 10—Occident C. C. vs. British Sea Captains.  
 " 15—Union C. C. of Grass Valley, vs. Merion C. C.  
 " 17—Union C. C. vs. Occident C. C.  
 " 31—Occident C. C. vs. Merion C. C.

#### Valparaiso vs. H. M. Fleet.

Played at Valparaiso, Feb. 21st, 1884. The Valparaiso were disposed of the respectable score of 93. Lieut. Evan Thomas and H. Dawson divided the bowling honors. The Fleet, which included six of the Swiffture contingent, scored 100 runs, E. Neat 21, and Lieut. Evan Thomas 36 runs, being the highest contributors. The match resulted in a bare victory for the Fleet on the first innings by two runs.

In a return match a few days later, H. M. Fleet made 142 runs in the first innings, while the Valparaiso team were all out for 23 runs, owing to the fine bowling of Luard and Dawson. The Valparaiso eleven, however, put together 119 in their second attempt. But the match was decided on the first innings in favor of the Fleet by 119 runs.

#### The Cricketers Association of California.

A meeting of San Francisco cricketers, to organize an association, was held at the Occidental Hotel on Thursday night, and was attended by the leading cricketers of the city. The greatest enthusiasm prevailed, and the name adopted for the organization was "The Cricketers Association of California." The following provisional appointments were made: president, W. Greer Harrison; treasurer, A. Waterman; secretary, C. B. Hill; committee of by-laws, Ben Clark, W. J. Carr, A. E. Aitken, J. Sanderson and B. S. Benjamin, with Charles Creighton a legal adviser.

The opening match of the season will take place this afternoon at the Olympic grounds, Oakland, between the Occident Cricket Club and a team of British Sea Captains. The game will start at two o'clock sharp.

Our local cricketers will banquet the Union Cricket Club next Thursday evening.

Next Thursday the Merion Club will meet the Union Cricket Club, of Grass Valley, in a return match on the Olympic Grounds, Oakland. It will be remembered that the Merions gained a decisive victory over the Unions last September, at Grass Valley. The Union team have practiced a great deal since their defeat, and in the approaching match will be assisted by Wilson and Ellesworth, two very good men. The Merions have lost two of their best men in J. J. Theohald and Webster, but have gained a splendid cricketer in J. H. Roller. The match will start at eleven o'clock sharp. The Grass Valley contingent, consisting of Geo. Fletcher, Thos. Luke, O. H. Reynolds, Neale B. Penhall, R. Shugg, Oliver Trathen, Ellesworth, Wilson and Dunstau, will arrive in the city on Tuesday, and will make their headquarters during their stay at the Occidental Hotel. The Merion eleven will be selected from the following players: C. Banner, Ben end Barney Benjamin, L. Burnett, Hill, J. & F. Mathew, Jones, Roller, G. Theohald, Eyre and Spiro. The Unions will also try conclusions with the Occident Cricket Club on Saturday, May 17th.

W. G. Grace opened the season very auspiciously week before last, having made 111 runs against the Colts of Gloucester.

Mr. Geo. Fletcher, President of the Union Cricket Club of Grass Valley, was in the city the early part of this week.

The Portland and Victorian matches will be definitely settled next week.

### FISH.

Sunday being fine, and picnics to the neighborhood of good trout streams being numerous induced a great many anglers to visit their favorite streams, as they could do so at reduced fares. Still, but few good catches are reported, that is, in the right sense of the term. Among the best-filled creels were many fish, that, from common decency, and in accordance with the spirit, if not the letter, of the law, should have been returned to the water whenever it was possible to do so. However, the thoughtless, we had almost said the criminal, will persist in this wrong to the State and their fellow-citizens, and by and by, when there are no trout at all to catch, without visiting unfrequented streams in the mountains, at much expense and trouble, they may thank themselves for the misfortune. It is just as well to keep this unpleasant truth before the public. It will have effect with some.

A case in point comes to us from Bear Valley creek, Marin county. A gentleman of this city occasionally visits some friends in that neighborhood, and on Sunday went trout fishing. He soon struck a hole literally full of fingerlings, and was pulling them out at railroad speed, when approached by a prominent member of the State Sportsman's Association, who at once remonstrated against such work. The party thus offending, in good spirit immediately ceased, to his credit be it said, and thus probably one hundred useless trout for eating were spared to fatten and grow and give sport at a later day. For these reasons we withhold the name, but audacious and wilful offenders will receive no mercy at our hands, and they will have to play it very low down if they escape the espionage we have established. Of all offenders we most despise the fingerling sharp.

The extent and value of our fish interests are well set forth in the following paragraph taken from the Vallejo Chronicle: "Between San Pablo Point and Benicia there are about 400 boats and 800 men engaged in fishing. From Red Rock to Sacramento, including branches of the San Joaquin river, there are about 1,300 boats engaged, with two men to each boat, bring the number up to 2,700 who are engaged in the fishing industry. Over \$400,000 is invested in boats, netting, canneries, etc."

This is certainly not an exaggerated statement, and it proves a point worth attending to. We spoke last week of the wrong done the State by allowing the vagabond Chinese to catch our small fish by the ton. Those small fish are a provision of nature to feed the large fish necessary for our canneries and tables. Man has no artificial means at his command to supply them. How wise it is then, to let the Chinese use them by the ton for manuring their garden patches, when they ought to be contributing to a commercial interest in which our citizens have invested \$500,000, to say nothing of our domestic requirements. Ill-conditioned fish are no good in either case. Yet we allow the Chinese to steal the food by which our fish fatten and become valuable. This destruction of small fish is an open violation of section 636 of our game laws. The Governor of the State, it is evident, has something else to do than absorb himself in politics. If he will not make the Fish Commissioners, the county officers, and local policemen do their duty and enforce the laws, he himself should be impeached. There is no sense in being mealy-mouthed about this wrong any longer.

Bay fishing was not very favorable on Sunday; it was low water, with current strong, and the water not clear. Tiburon Point, on the new Douluac railroad, is becoming prominent as a resort for flounders, large smelts and rock-cod. Where the boat lands the natural qualifications of the water bottom are good, and the fish are fed by the offal from the dry fishing establishment. The best way is to get off at Tiburon Point, and walk down to a narrow strip of land below where the offal most abounds. It is also the best route to Kershaw's Point, where the fishing is generally good. There were not many out on Sunday.

Gus Meyers, who has suddenly become a capitalist in a small way, and is fond of fishing, caught an even one hundred trout on Sunday, in Sonoma Creek, most of which were of regulation size. This is one of the most abused streams in the State. On the tributaries from Glen Ellen down the crowd was large. Water still too high.

The annual election of officers of the California Sportsmen's Club was held recently, at 230 California street. John P. Loshe was elected president; John M. Adams, vice-president, and Ellis H. Holmes, J. C. Mitchell and E. G. Deuniston, directors.

Redwood creek and Bowlder, and others to the south, are yielding better returns than streams to the north. The reason is obvious. They are not so easily or extensively marauded by the city army of fingerling sharps.

The best catch at Lagunitas last Sunday was made by Mr. B. Burling. Out of a large lot more than half averaged seven inches.

Noble, the tailor, who is a good fly-fisher, also made a good catch on Sonoma Creek.

Trout fishing, we are told, will not be in its prime for weeks to come.

THE GUN.

The Game Law.

Blank indicates open season. Star (\*) indicates close season.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, Doves, etc.).

Pigeon Shooting at San Bruno.

The event of the week in our local gun circles was the annual tournament of the California Wing-Shooting Club of San Francisco, commencing on Saturday last, at San Bruno, their usual place of meeting.

The second was a 12-hr sweepstakes under similar conditions with the first, 21 yards rise, ground traps. The score:

Score list for the second sweepstakes, listing names and scores.

In this Messrs. Slade and Walsh took first rank, scoring 11 kills out of 12 birds. Both shot very steadily, and again gave much promise for the future.

When the events on the programme were decided, a triangular match was shot by Messrs. Robinson, Hopper and Lambert, \$10 entrance.

The Second Day.

This being on Sunday was the feature of the occasion, as that day was fixed for the club dinner, which naturally drew out more people to the grounds, still the attendance was not what it ought to have been.

Score list for the second day, listing names and scores.

Robinson and Slade divided first and second money; Walsh took third, after beating the ties on 7 birds each; Hopper fourth, Fay fifth.

The next match was at four doubles, 18 yards rise, entrance \$7.50, making a \$75 pool divided into five purses.

Score list for the first day, listing names and scores.

It was now one o'clock, and everybody was hungry, as to catch the first train required early rising and an early breakfast, so all repaired to Cunningham's on the first summons.

After dinner the trap was revisited to close the programme. The last shoot was a 21-yard sweepstakes, single barrel, and the good repast and generous wines seemed to give new vigor to the contestants.

Score list for the 21-yard sweepstakes, listing names and scores.

The champion again asserted his claims to the distinction, and took first money; Messrs. Hopper and Fuller sharing second and third.

At Bird's Point, Alameda.

The Alameda County Gun Club had their regular medal match on Saturday last, seventeen members being present. The usual conditions prevailed, 12 birds each, 30 yards rise, 80 yards boundary, Hurlingham rules.

Score list for the Alameda County Gun Club match, listing names and scores.

The Match To-day.

The concluding match between the Alameda County Club and the San Francisco Gun Club takes place to-day at Bird's Point, Alameda.

The Alameda team will be Adams, Mayhew, Norton, Goodall, Crellin, Haines, Haile, Bennett, Edson, Knowles.

The team of the Gun Club will be Thomas Ewing, W. J. Golcher, W. H. Hanson, R. E. Wilson, G. W. Randall, Howard Black, G. P. Gordon, H. Babcock, Jno. K. Orr, F. S. Butler.

A New Sportman's Headquarters.

An establishment of this kind, at which the better classes of our sportsmen can meet at all times on business or pleasure, with satisfaction to themselves, has long been felt in this city.

Brooks vs. Haile.

On May 4th, at Bird's Point, Messrs. R. N. Brooke and Frank Haile shot a match at fifty pigeons each, C. S. S. A. ground trap rules, for \$100 a side.

The judge and referee were Messrs. A. F. Adams, H. H. Briggs and F. H. Putzman. Score:

Score list for Brooks vs. Haile, listing names and scores.

At Gilroy.

The Gilroy Rod and Gun Club had their first trap shoot for the season near the race track on Friday afternoon, April 25th.

The Parker Gun Club hold their medal match, at Colma, to-morrow. This club is composed of young men employed in city stores.

American Ornithologists' Union.

We referred briefly last week to the circular we had received from this body of scientists, through Mr. Ramon E. Wilson of this city, and promised to notice the object of its publication more fully this week.

Bird Migration.

At the First Congress of the American Ornithologists' Union, held in New York City, September 26th-28th, 1883, a Committee on the Migration of Birds was appointed.

All we need added at present is that Mr. L. Belding is the representative of the Union on this coast. He has for many years been a resident of central California, making his headquarters at Marysville.

Snipe and Duck in the Marshes.

EDITOR BREEDER AND SPORTSMAN:—I give you a few lines which may be of interest to many readers of your valuable paper. Regarding snipe and duck, I have devoted the principal part of my time to English snipe shooting since March, though I have watched the progress of the duck very closely.

Bouldin Island, April 30th, 1884.

THE RIFLE.

Shell Mound.

On Sunday last the organized society matches were scarce, the riflemen being chiefly concentrated at practice for the great contest to-morrow, under the auspices of the State Rifle Association. On Sunday the best scores made were by Sergeant Hovey, Col. Kellogg, Lieutenant Brown, and T. E. Carson. The former, however, is the only one worth recording. The shooting at 200 yards, 60 shots, he scored as follows: Sergeant Hovey..... 44 45 45 45 44 46

Total.....269
The total 269 out of a possible 300 leaves the percentage SS 66.70. It is much to be regretted this brilliant young rifleman has such a constitutional objection to the long ranges. It is certainly much to his disadvantage. Carson's score of the Nationals is not often beaten. He used a Sharp's military rifle and made 46 out of a possible 50 at the 200 and 500-yard target. The score gives him a percentage of 92.

A Military Match.

During the day two companies, C of the Nationals and G of First Infantry had their monthly medal match. Springfield rifles were used. The score:

Table with columns for names (Cummings, Sumner, Ruddock, W. A. Simpson) and scores for different classes (First-class, Second-class, Third-class, Fourth-class) at 200 yards.

The Nationals have a company team known familiarly as the "Big Six" from their records at the target. Four of these during the day shot a practice at the two distances, the score of which is quite up to their standard, the percentage reaching 92. They used Sharp's rifles:

Table with columns for names (Cummings, Klein, Carson, Perkins) and scores for different classes at 200 yards.

At Harbor View.

The Eintracht Rifles held their regular prize shooting, on Sunday, in which Fred Kuhls, as usual, took the champion prize. The shooting was at 200 yards, 20 shots each, 25-ring target. The score:

Table with columns for names (F. Kuhls, Stamer, Ropke, Klare, Stenber, Len, Hartmannsen, Dafelecker) and scores for different classes (Champion, First-class, Second-class, Third-class).

The last best shot, which is also entitled to reward, was made by Steuher, who made a 20 rings.

We may remark, in connection with the Eintracht Rifle Club, that the entire Eintracht Society has its annual picnic to-morrow, 11th inst., at Belmont Park. This is one of the picnics where no improper characters can obtain admission to disturb the harmony of the day, and the arrangements this year, we understand, are as strict and perfect as on former occasions. Twenty-five cars have been engaged, and the first train will leave Townsend street depot at 9:10 sharp, the second at 9:30 sharp. This shows the number likely to be present. The music will be furnished by the Second Regiment Band, under the leadership of John Bree. We regret an engagement to be present at the shooting of the State Rifle Association prevents us accepting the kind invitation to attend the Eintracht happy, annual re-union.

At Schuetzen Park.

The attendance at this range on Sunday was not as large as usual, but the shooting for the prizes was good. The following were the winners: Champion prize, James Stanton, 413 rings; first-class, F. Freese, 406 rings; second-class, John Utshig, 400 rings; third-class, McLaughlin, 396 rings; fourth-class, F. E. G. Schneider, 334 rings.

STABLE AND PADDOCK.

Brood-Mares and their Foals.

Mares may be worked moderately while carrying their foals without detriment to the colt. They should be given an extra feed of oats as soon as the embryo foal is half-matured. The higher the condition of the mare, during pregnancy, the stronger and more vigorous will be the colt at parturition. Farm mares should be turned out to grass for three weeks after foaling, to strengthen and straighten the legs of the foal. If they can be spared a run on grass for six months will prove an excellent send-off to the colt. Hard work for the dam will dilute the rich quality of her milk, and diminish the supply, which might prove a serious drawback to the future prospects of the colt by depriving it of sufficient nutriment while following the dam.

Farm mares are generally worked moderately while suckling their foals. They are made to pay their way besides rearing their colts. They should be fed on nutritious food, of the best quality, containing the essential oils that produce a bountiful supply of rich milk, to give their colts a good start in the race for superior form and rare accomplishments. Should the colts from any cause, fail to thrive they may be fed with a little boiled oats and scalded wheat bran, to put them in thriving condition and press them forward to early maturity. The dam, when nourishing her young, should have some kind of green food, such as green clover, succulent roots, or rich cereals to increase the flow of milk to feed and stimulate the growth of the young scion. At the age of one month the colts will eat bruised oats, and other succulent food that will give them bone and muscle, and help to develop a rugged constitution. High-bred colts are generally allowed one quart of oats per day after they are one month old, and two quarts at two months, with an equal amount of wheat bran at three months old. There is no doubt that other breeds of lower grades would be better if fed upon these stimulants to early development; they would re-imburse the proprietor for the extra food by their future growth and powerful development. This mode of feeding and raising colts would not cost

more than thirty dollars over and above the old mode, of a scanty supply of hay and grass; it would increase their relative value at least four times as much as the extra cost of production. These cultivated qualities would prove a precious inheritance; it would double up in their descendants to fertilize the blood of their offspring, and establish a family whose branches would reappear in all the majesty of renowned stock. Small beginnings have terminated in great improvements in the formation of breeds of horses. Acquired qualities are transmitted the same as natural propensities.

Colts should be halter broken while following their dams. They never forget it. Once broken always broken. Youngsters may be weaned from their dams at six months old. They should be fed with oats, and wheat bran when taken from their mother's milk; it will keep them growing through the first winter, which is essential to early maturity. The good start lays the foundation in bone and substance for a good horse. Any check to the growth of the young scion the first winter will seldom be recovered in after years. "A colt neglected the first winter never recovers its proper shape, nor does it grow the size and strength of body and limbs which naturally appertain to its breed." The breeder cannot afford to starve his colts, it is a fatal delusion in stable economy. It takes money out of the breeder's own pocket by degenerating his stock. It will ultimately grade them down to worthless scrubs. Economy is on the side of good food, warmth, and cleanliness in raising stock.

Mares well-bred in the prime of life, and good milkers, will lay the foundation and start the framework of good colts. The breeder who supplies the natural waste of the body with good nutritious bone and muscle-making food will build up and complete the structure. The genius of man, aided by the natural law of perpetuating in kind, gradually increases the size and improves the form of domestic animals.

The mare with an inbred inheritance, whose blood lines in some branches have been inbred, will generally shape her colts after that kindred blood, in room of running after strange blood. Rysdyk's Hambletonian was a strongly inbred stallion. Mares coupled with that sire generally shaped their colts after the male line, on account of the prepotent influence of strong inbreeding. The harem has been crowded with sires and dams that were unworthy to perpetuate their species. Mares have been used for breeding that were constitutionally unsound—possessed with bony enlargements, or predisposed to hereditary infirmities that would be entailed to their offspring. Stallions with hereditary predisposition to disease are more objectionable than mares, because they would beget a multitude of diseased colts to overrun the land with cripples. When the breeder starts with sound progenitors he may expect to get their like. It cost no more to raise a sound colt than it does a cripple. The difference in their relative values more than 1,000 per cent. Stock of any kind predisposed to hereditary infirmities are worthless for breeding purposes.

There have been examples where colts well-bred have appeared inferior at an early age. It is not best to sacrifice on them till they have been tried. Performance is the best means of proving the merits of the equine race. The sire and dam of the mother of Hero proved total failures on the turf, though highly descended. Hero, with his dam, sold for twenty sovereigns. When his progeny had been proved, they rose in popular favor to the highest pinnacle of fame. A yearling filly the get of Hero sold for 500 guineas.

There are other examples on record where high-bred colts have been sold for a trifle on account of their diminutive size. When the day of trial came they proved superior to the largest of their breed. It is claimed that mares that have the most endurance have produced the most powerful roadsters, and the most successful racers. Endurance in the dam is an excellent quality; it implies a sound constitution, good wind and limbs, and an equal distribution of the nervous and muscular forces, to keep up the balance of power, and continue exertion without exhausting the physical forces.

The safest rule in choosing a brood-mare is, to choose one whose produce has been tried. Any material defects will be discovered, and may be cured by a change of partners.—Live Stock Journal.

The Yearling Lottery.

If we were to take up the animal sale lists of the past ten or fifteen years they will pretty effectually disenchant buyers of the impression that the highest-priced yearlings are invariably the best. Harking back to the early days of yearling sales we find that in 1863, at Woodburn, Preakness sold for \$2,000, and Chillicothe for \$1,725. At the same sale Kingfisher sold for \$490, and Foster for \$555. Preakness was a good horse, but Kingfisher was of a much higher class, and Foster was certainly a superior animal to Chillicothe. At this sale also Mr. Sanford paid \$2,000 for Grecian Bend, and Mr. Swigert \$600 for Annette, who was 30 pounds superior to Grecian Bend at any distance. In 1869, at Woodburn, Mr. Sanford paid \$4,100 for Bingham, who was hardly second-class. He paid \$1,900 for Monarchist, and got a good one; but, at the same sale, Harry Bassett, the most incomparable race-horse of the past decade, sold for \$315, Mary Clark for \$215, Salina for \$450, and Wanderer for \$325. 1872 was a great year at Woodburn. Among the high-priced lots were Acrobat, \$2,025; Bannerette, \$2,530; Brigaud, \$1,700; Bonnet colt, \$1,950; Steel Eyes, \$1,925; Ed. Breathitt, \$1,000; Milboy, \$2,025; Rutherford, \$1,300; King Pin, \$1,300; Lava, \$1,625; Baybush, \$2,025. Barring Acrobat not one of these were first-raters, Rutherford being next best, while Milboy, King Pin, Lava, Baybush, Bannerette, and Spinola were the worst sort of failures. Stampedee, who sold for only \$360, could beat any of them, harring Acrobat and Rutherford; Atilla, who sold for \$500, did conquer Acrobat in the Travers Stakes, and Ballankee, at \$750, was the most useful of all. In 1873, New York sold for \$3,000, King Bolt for \$5,540, and Australind for \$3,200. Neither New York nor King Bolt ever earned their oats, while Australind was only a selling plater. At the same sale, Tom Ochiltree, who could give any of them 40 pounds, sold for \$500, and the same year Katie Pearce brought only \$520, yet she was the best two-year-old in the West. Again, in 1874, Mr. P. Lorillard paid \$3,000 for Barriacade, and only \$780 for Parole. In 1876 Mr. P. Lorillard paid \$4,000 for Spartan, but his brother, Mr. G. L. Lorillard, got a superior horse in Duke of Magenta for \$1,750. In 1877 Mr. P. Lorillard paid \$3,500 and \$2,500 respectively for Pawnee and Sioux, neither of which, as far as we can remember, ever won a race in his colors. The same year he gave \$3,100 for Uncas, a good, but nothing like us great, n horse as Spendthrift, whom the ahrewd Mr. Swigert picked out at \$1,000; and while Monitor, at \$1,600, was worth every dollar of it, surely Ferida was a bargain at \$325. In 1879 Bacter sold for \$2,100, but was a flat failure, while Boot-jack, who sold for \$300, was one of the most useful horses of any age. The same year Mr. James R. Keene paid \$4,000 for Bushman, \$2,125 for Gemsbock, and \$2,050 for the brother to Madge—not one of them ever won oats—while Foxhall, who cost only \$650, was the terror of all Europe. We might go on giving instance after instance, but suffice it to say that

Luke Blackburn, as a yearling cost only \$510; Glenmore, \$175, and Ripple, \$60.

Judges of yearlings are, after all, but few, and even these are not by any means infallible, for each of them are guided by certain prejudices, which they choose to term principles. Some buy on the principle of pedigree, with a slavish devotion to one sire, and an unreasoning hatred to another. Others buy on relationship; another lot buy on good looks. We hope we do not offend those who buy on looks, when we affirm that their test is often not the least fallacious of all those mentioned. It too often happens that the finest-looking yearlings are the first to go to pieces. These "big" yearlings, standing 15 hands, as is sometimes the case, cause a decided flutter when they enter the sale ring, are not unfrequently the most difficult ones to handle young, and but seldom do they prevail at two years old. Undue growth, whether in man or beast, is not prolific of the constitutional qualities needed to stand the wear and tear of severe physical exertions. Pedigree, too, is an unfailing source of woe to some buyers. Time was when, "hy Lexington, out of a Glencoe mare," had a sound as potent in opening the purses of buyers as ever the Sesame of Hassarac had in opening the cave of the Forty Thieves. And yet, we have a vague remembrance of some very light timber coming from that same cross. Many an inferior colt is the product of an illustrious union, but "his blood will sell him," is the flattering unctious the breeder lays to his soul, and he is seldom mistaken. The rage for the Lexingtons, Leamingtons, and Bonnie Scouldans has, at different periods, covered a multitude of the sins of their progeny. Some miserable devil, with "all the blood of all the Howards" in his veins, has frequently realized in dollars what he could not realize in cents, but for the fact that buyers became "ravished by the whistling of a name," forgetting that all the Leamington, Lexington, or Bonnie Scotland geese were not swans. Those who go on the "winning family" principle have, as a rule, been most successful, but even this has a long list of exceptions. The real fact is, that no rule can be laid down for guidance in buying yearlings, which will yield successful results.

The fact that the elements of chance so largely prevail in the purchase of yearlings at public sale, and that the highest-priced ones are by no means the best horses, as shown above, should have its influence upon the owners of smaller stables. It demonstrates that they are not true to themselves if they remain absentees from the sale ring, when so many chances are offered. Nothing undergoes such radical changes as the thoroughbred in his transition from yearling to two-year-old or three-year-old form. So long as thoroughbreds are sold as yearlings, the elements of chance will continue to prevail, and happily so, for it puts the rich and poor, the learned and the crude, upon an almost equal footing in the "good things."—N. Y. Spirit.

Knee-Sprung Horses.

I notice in the last issue a question regarding "knee-sprung" horses. My experience may assist the writer a little. My theory was that "knee-sprung" was largely caused by horses having to work with high shoes on—or, in other words, shoes with long calks—thus making the lower half of the legs relatively longer than nature designed, thereby causing an improper strain on the tendons. In addition to this, the shoes entirely prevent the frog of the foot from bearing any portion of the horse's weight, and as nature designed at least one-third of the weight to be borne on the frog to act as an ensnail to break the force of the foot-fall on the hard earth or stones, my belief was, and is, that lack of proper use caused the back tendons of the leg to contract or shrink, and thus bend the leg. Acting on this theory, in February, 1852, I bought two car-loads of "knee-sprung" horses of J. S. Lake, superintendent of the Chicago West-Division Street Railway Company, and shipped them to Dow City, Ia., and put them to work on my farm, after taking off all their shoes and paring their hoofs all they could stand without cutting to the quick, so called. On all horses not having a positively flat foot I trim the sole concave. I use a farrier's knife to trim their feet every new moon—men will remember a new moon better than a day of the month—and oil the hoof on the outside up to the crown. These horses have been worked very hard for two years without any shoes either summer or winter, and the result is the "knee-sprung" is about all gone, only three or four showing it so as to be noticed. Our soil in Crawford county is a deep black loam, and on such soils it is sheer nonsense to shoe any horse; I shoe none of mine, and never expect to. I am counted a hard and reckless rider and driver, and notwithstanding I "ride like the devil" and "drive like n doctor after his first patient," often going from fifty to seventy-five miles a day, my buggy team have feet not excelled, if equaled, by any in the country, and they haven't had a shoe on since 1879. Ascertain what your blacksmith charges per year for shoeing your horses, then pay him a like amount for paring them every month with a farrier's knife—not a red-hot iron—and you will have no trouble with "knee-sprung" horses, or with "hoof-bound" feet. Of course, bare feet wouldn't work as well where the earth's surface is all rock or flint, but my advice is to flee from that kind of a country.—ABNER GRAVES, in Breeders' Gazette.

How to Break a Colt.

I noticed not long since, some one asking how to break a colt to the lead or single line. Before giving instructions how to break a colt to the lead line I will first give my plan of breaking a colt to work from the start, as I have not seen anything of the kind in your valuable paper. I like to begin to break a colt when it is about two weeks old. Put a halter on it and learn it to stand tied in the stable, or wherever you wish to tie it. By commencing when it is young you can easily put something on it that it won't break. By being careful at this time the colt rarely ever acquires the habit of breaking. Afterwards, then, if you wish the colt to go along when working the team, tie it to the side of its mother, being careful at first, and in less than half a day you have it taught to lead. Then when the colt is old enough to work, put the harness on carefully. Also harness a good quiet work horse. Get on the work horse and ride him around awhile, leading the colt alongside until its gets used to the other horse and the harness. Then hitch the work horse to the wagon or sled as the case may be, and hitch the colt in carefully. Get on the work horse, take the colt's hitching or coupling strap in your right hand, fasten a line or rope to the colt's bridle bit, let some one take hold of the line and walk alongside the colt, and then you are prepared for any emergency. After drilling the colt in this way for some time, put on the check-lines. After working this way for a while, unhitch and put the colt in the near side. If it has a good disposition you will soon have it ready to work in almost any place. Some think it not necessary to go to so much trouble, but I like to get a colt started right, if it does take a little more time and trouble. I helped a neighbor break a colt to spring on this plan, and he said it was the first colt he had broken to please him.—Pittsburg Stockman.

THE  
**Breeder and Sportsman.**

PUBLISHED WEEKLY BY THE  
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE  
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET  
P. O. BOX 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

JOSEPH CAIRN SIMPSON, - - - EDITOR

NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 29 and 31 Chatham street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1009 J street.

ADVERTISING RATES.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in brier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, - - Saturday, May 10, 1884.

Laid Up.

For three weeks we were unable to cross the bay, and most of the time confined to the room. A nervous trouble which laid an embargo on writing, and which was about equivalent to a breakdown. We are rapidly coming around. During the interval of illness, completely off our feed, but now, although still unable to "get away" with twelve and fifteen quarts, can take a fair allowance and feel that it will not be long until condition will be reached. The exercise will necessarily be slow for a short time, though we hope to acquire "foot" enough, and when that comes there is no fear of a lack of endurance. There is a long gap to close to "catch up" with the work which is so far in the lead, but a steady, rating pace will accomplish that, and with gameness enough to struggle undismayed by being a couple of distances in the rear the race will be won.

The Two Thousand.

In another part of the paper there is a telegraphic account of the "Two Thousand," copied from the N. Y. Herald. This is the first great three-year-old event of the year, and apart from the interest it awakens on account of that race, is anxiously watched as affording a line for the Derby. The high-priced Harvester, for which \$43,000 was paid at the sale of Lord Falmouth, could only get third place. It is unfortunate for Mr. Foy that Scot Free is not in the Derby, although the owners of those which are engaged in the great race of the year, are not likely to lament at the omission.

The Belle Meade Sale.

Elsewhere will be found a full account of the sale of Belle Meade Yearlings, and on the whole the result must be quite satisfactory. The largest price was for a Bramble colt purchased by the Dwyer brothers, and it is a grand send-off for this young stallion that one of the first of his get should bring \$2,000. We are in hopes that some of the colts bought by Col. S. D. Bruce are to fill California orders.

An Agricultural Department.

It is well known to our readers that the *Breeder and Sportsman* ignores political questions, that is, in the sense of partisanship. But there are issues that come within our sphere, and, regardless of the bearing they have on either or any of the parties political, we shall discuss them. The consideration of such is a legitimate portion of our duties, and all questions which have a bearing on agriculture, horticulture, breeding of domestic animals, preservation and propagation of game and feed fish, are eminently within our domain.

The two great conventions soon to assemble will have a great deal to do in marking out the governmental policy for the next four years. While the old saying that "platforms were traps to catch flies" is in a measure true, there are "planks" which are so just as to command attention after the campaign is brought to a close. The delegates are representatives direct from the people, and give expression to their wishes. Positively instructed to a certain line of conduct, and there are few men so arrogant as to disregard pledges given.

That there should be an agricultural department in the U. S. Government, with a cabinet minister at the head of it, is so obvious that it does not require long arguments to prove the necessity of the immense interests being thoroughly protected. To make these interests subordinate to all others, a commissioner, who, at the most is only a head clerk to look after them without a voice in the councils of the President, waiting in the ante-room while consultations in relation to matters of vital importance to agriculturists are held, is a poor acknowledgement of the value of land culture, and kindred employments to the country at large. Were the work equally as well done by a "bureau," with an array of clerks and copyists, it is due to the dignity of the great and intelligent body that constitute the farmers of the United States that there should be a department of agriculture. The farmers can take this matter in their hands and compel recognition.

Not long ago we saw a paragraph that a republican convention had taken action something similar to what we shall propose. It is simply this, that among the delegates at large to be chosen at the convention to assemble at Stockton, in June, two, at least, should be men who are closely and intimately identified with the agriculture and horticulture of California. Were the whole delegation of this character, so much the better, though, with two representative men in it, and instructions of the same import to the others to insist that the "platform" they will aid in laying down, should contain this essential feature, the object can certainly be accomplished. The most important questions in California are those connected with agriculture and horticulture. We, of course, mean that these shall be taken in a broad sense. Agriculture, as covering pastoral pursuits, etc.; horticulture, the growing of fruits of all description; wine-making, preparations for markets, etc. To be brief, everything pertaining to farm, garden and vineyard, everything pertaining to rural life, everything outside of the seething caldron of the turbulent pool of politics. This may be too broad. We mean men who will not mix political expediency with the duty they are called upon to perform; who will not be entrapped into supporting those who are not likely to further the end in view; who will take a firm stand, and who will come home without excuses for non-performance of the work entrusted to them.

Even in our limited acquaintance there are a number of men who are peculiarly fitted for the place. Those we might name may be averse to spending the time to attend the convention. The only person with whom we have conversed, and in fact, the person who suggested the idea, could not possibly accept the position, and in placing in nomination men without consultation with them might be thought obtrusive in us. For all that, there is a gentleman so eminently qualified to represent the fruit and vine interests that we cannot refrain from using his name, if without his sanction. That is L. J. Rose of Los Angeles, and should he signify his willingness to accept the position, there are thousands of his political faith who will agree in the propriety of the selection.

Purchase of the Oakland Trotting Park.

From present appearances there is scarcely a doubt that the purchase of the Oakland Trotting Park, by subscription, will be consummated. Mr. Wiard has executed a bond to Charles McLeverly, Sheriff of Alameda county, agreeing to take the price named in it, \$60,000, giving until July 1st to make the payment. The bond also covers the right of way, sixty feet wide, from the railway to the grounds, which is an important concession. As there will be a map of the land and a full description of the property published in the paper of next week, all that is necessary to say now is that the prospects for carrying the matter to a successful termination are very good.

Rancho del Paso Auction Sale.

The auction sale of stock of J. B. Haggin, Esq., will take place on Rancho del Paso, five miles from Sacramento on the Central Pacific Railway, commencing Friday next at 1 P. M. The train which leaves San Francisco at 8 A. M., Friday morning, will convey those who wish to attend, and all the arrangements in the way of conveyance, are as perfect as can be desired. This offering of fine trotting and carriage stock has attracted attention all over the country, and justly so, as the catalogue, which embraces one hundred and forty-two animals, proves. In many respects, it is a remarkable offering of horses at public sale. The get of such noted sires as Echo and Geo. M. Patchen, Jr., with that of the younger celebrities, Algonia and Alaska, and others, with such a large number listed, and with so many of them of the highest breeding, it is manifestly beyond the limits that can be given, and furthermore, to portray their claims properly would extend this article beyond the patience of our readers. Therefore, we will have to summarize as briefly as possible. Echo, we have always regarded as one of the great trotting sires, and that this ground is tenable has been shown again and again in the pages of this paper. The portraits of himself and four of his offspring have graced the *Breeder and Sportsman*, and there are other horses well worthy the distinction. Geo. M. Patchen, Jr., has five in the 2:30 list, and the size and substance of his progeny give them a value for other purposes beside fast trotting. Algonia is of the victorious blood of Almont, and is a remarkably highly formed horse which he imparts to his get. Alaska combines the Electioneer, Patchen and Belmont blood, and those who have seen his colts move are enthusiastic in their praise. But without further preamble we can assure our readers that the breeding of those which are listed as trotting and road stock is of the best kind, and in the department of "harness, carriage and work horses," which were reared on the Kern county ranch, Stockdale, are many large horses for which there is such a demand all over the country. Anyone who will go to 116 Montgomery street, Killip & Co.'s office, and get a catalogue, after perusal will be well satisfied that the important matter of pedigree is "all right." There is another very important consideration. When men spend money and time to attend an auction sale they expect that the outlay will not be rendered valueless by "buying in" or "by-bidding." At this every animal offered will be sold to the highest bidder. No matter if the sum is one-quarter of the value, there will be no illegitimate attempt to increase the bid. That this will be the case we are fully authorized to state, and without that authorization we would not have any hesitancy in making the assertion. Mr. Haggin intends holding yearly auction sales, in order to dispose of the surplus stock. To sell is imperative, as with the large number of brood-mares at Rancho del Paso and Stockdale both places would soon be overrun with the produce. Auction sales are the most direct way of disposing of a large number, and it must be evident to the dullest comprehension that as clear-headed a business man as Mr. Haggin would not jeopardize the future prospects by any other course than that which is straightforward.

It is optional with purchasers to pay all in cash, or twenty per cent. cash, and the balance in six months. This will be an inducement to many, enabling them to market their crops before the obligations mature.

Clumsy Tips.

Friedhoffer brought to the office a tip which he had pulled off a horse that is well calculated to bring them into disrepute. It was a section of a Goodenough shoe, over half an inch thick at the toe. To imbed this so as to give the foot a level bearing would require so much horn at the heel that the frog could not touch the ground, as it would not answer to cut away the toe, if the heel were properly dressed, to such a depth. To replace a shoe, when first removed, with that thickness of iron would be still worse, with the foot prepared for a shoe which necessitates the wall at the heel being pared low, an ugly piece of iron like the sample, nailed on the toe could not fail to be injurious. *The tip must be proportioned in thickness to the depth of horn.* If the foot is much worn or cut down so that there is little between the ground and the sensitive part of the foot, the tip should be as thin as is commensurate with strength. Not much thicker than a racing plate, the width can be as desired. The Goodenough system of shoeing is certainly an improvement on the ordinary method, the most vulnerable point being the thickness of the metal. The Charlier is an improvement, inasmuch as it only covers the wall, and in place of being a shoe is merely a thin band of steel replacing the wall that has been cut away.

We hear of another practice that is also reprehensible. A blacksmith, who is a believer in tips, is endeavoring to induce his customers to adopt them gradually. He leaves a small part of the beel bare at first, increasing the gap

with subsequent shoeings, and in time puts on a tip of proper length. Short shoe such as his first are worse than those that come flush with the heel. The natural guards against concussion are rendered useless, and there is greater danger of bruising at the point where corns usually come. If shoes are used, by far the safest, so far as the welfare of the foot is concerned, is the bar or round shoe, as that equalizes the force of the blow and brings a wider surface to sustain the shock. Hereafter we will discuss this phase of the question more fully.

Capital Turf Club.

We are much pleased to learn that the meeting of the Capital Turf Club has been successful, and the sport good, though much disappointed at not being able to attend. The spring meetings at Sacramento are more enjoyable than the big events in the fall, at least to us. The city is then at its best, and we say without hesitation that it is difficult to imagine anything finer than Sacramento and its environs in the month of May. Then the hotels are not so crowded as to preclude comfort, and there is pleasant companionship, whereas among the thousands at the fair there is too much bustle and confusion. It is a great thing for the sports of the turf in the vernal season of the year the organization of the Capital Turf Club, and we trust that every succeeding year will add to the strength of the popular institution.

Trotting Meeting Bay District.

In the appropriate place appears the advertisement of the Summer Meeting Bay District Association. The programme is well arranged and the purses liberal. So far as we are acquainted with the horses likely to enter, the classes will meet with approbation, and some of them are sure to bring out large fields. As the ad. gives full particulars it is not necessary to say more at present, though it must not be forgotten that the entries close two weeks from to-day.

By an accidental disarrangement in the make-up our report of the Sacramento races was divided. The first day's proceedings will be found on page 291, the second and third day on page 297.

Capital Turf Club—Second and Third Days.

May 7th—Trotting: purse \$200; for two-year-olds owned in Butte, Colusa, Sacramento, Tehama, Yuba and Yolo counties, on January 1st, 1884, mile heats. S. K. Treary's b c Apex, by Prompter, dam by Flaxtail..... 1 1 1 R. H. Newton's blk c Sur Del, by Del Sur, dam by Black Ralph.... 3 2 John Mackey's b f Visalia, by Echo, dam Dolly Varden..... 2 dr Time—2:56 3/4, 3:07 1/2.

Pool—First heat, Visalia, \$60; Apex, \$27; Sur Del, \$19. Second heat—Apex, \$60, Visalia, \$15; Sur Del, \$3. Won very easily. While scoring for this start in the second heat, Visalia showed such distress that the judges allowed her to be withdrawn. The cause of her sudden sickness is unknown.

Same day—Trotting: purse \$500; 2:35 class. W. F. Smith's blk g Thapsin, by Berlin—Lady Hubbard..... 1 1 1 S. K. McIntosh's Telegraph, by Titon Almont..... 2 3 2 L. U. Billings' blk g Slim Jim, by Tyler's Black Hawk..... 4 2 3 L. D. Tothunter's b g Mack, by General Reno, dam by Norfolk 3 4 4 Time—2:37, 2:36 1/2, 2:34 1/2.

Pool—First heat—Thapsin, \$60; Telegraph, \$52.50; Field, \$12. Second heat—Thapsin, \$20; Telegraph, 8; Field, \$2. Third heat—Thapsin, \$25; Field, \$4. Thapsin appeared to have the race in hand at all points.

May 8th. Running—Sacramento Derby: purse \$300; free for all three-year-olds; one and one-half miles. Delaney & Ayres' s g Harry Rose, by Rutherford—Alleen Oge, 115 pounds..... (A. Appleby) 1 Phil. Siebenthaler's b c Philip S., by Leinster—Lily Simpson, 118 pounds..... (Courtney) 2 Time—2:46.

Pool—Phil. S. \$35, Harry Rose \$30. Philip S. led away and was in front for a mile and a quarter. At the last quarter Harry Rose yoked him and Philip sulked, Rose winning in a gallop.

Same day—Running: mile and repeat, for all ages; purse \$400. M. M. Allen's b h Patsy Duffy, aged, by Leinster—Ada A., 122 pounds..... (Williams) 1 2 1 Delaney & Ayres' s m Trade Dollar, aged, by Norfolk—Eva Ashton, 117 pounds..... (A. Appleby) 3 1 2 Lee Shener's b h Haddington, aged, by Imp. Haddington—Prairie Flame, 122 pounds..... (Hennessy) 2 3 3 Time—1:46 1/2, 1:45, 1:43 1/2.

Pool—First heat, Duffy \$60; Trade Dollar \$18, Haddington \$17. Second heat; Duffy \$50, Field \$10.

Answers to Correspondents.

Question answered only through these columns. No replies by mail or telegraph.

E. S. S., San Jose.

In wearing tips one of my colts has a tendency to turn up at the toe or the front feet. It looks to dish between the coronet and toe and seems to make him stand calf-kneed. Answer.—If the tips are properly set, that is, sunk into the foot so that toe and heel have the proper hearing, no such effect can follow their use. Even wrong setting would not cause this "dish" unless worn a long time. There are probably other causes, and it may be that the malformation has existed for some time without being noticed. Tips should invariably be made as thin as the required weight will permit, and with trotting colts it is better to obtain weight by extra width than thickness.

Trotter, Bakersfield.

There is no such double team record as 2:03 1/2, although there is a recorded performance of a mile in 2:03 1/2 by a trotter with running mate. At Prospect Park, Long Island, N. Y., Nov. 15th, 1883, the bay gelding Frank, harnessed with a runner (J. O. Nay, by Fellowcroft), was driven by John Murphy in 2:03 1/2. The quarters were 33 1/2, 1:03 1/2, 1:35 1/2, 2:03 1/2.

Controversy, Menlo Park.

In the running stakes of Chicago Driving Park, the declaration clauses are worded different in different stakes; i. e. one says "\$10 if declared out, on, or before May 1st 1884" etc.; while another reads "\$15 if declared out by May 2d 1884," etc. There is a decided difference of opinion here as to the meaning of this last phrase. Will you please let me know what is understood among turf circles by the words "by May 1st?" Does it mean to include May 1st, or before May 1st?

Answer.—The meaning is the same in both instances, and declarations made on May 1st are sufficient. If made by mail, a plain postmark is necessary, the conditions being in all respects the same as in making nominations.

Drew McClellan, Stockton.

The stallion Gen. McClellan, by the Drsw Hores has a record of 2:26, made at Belfast, Maine, September 24th, 1864.

J. L. McKinney, of McMinnville, Or., has recently sold to L. P. Brown, Mt. Idaho, Idaho, this brown stallion Dixie by Hadley's Morgan, dam by Paul Jones, second dam by Emigrant. Hadley's Morgan by Paul Jones, son of McCracken's Black Hawk.

ATHLETICS.

Some Interesting Reminiscences.

[New York World.]

The near approach of the date for the departure of a team of American athletes to compete in England brings to mind the time—and it is not very long ago—when a similar expedition would be regarded as foolhardy, both in this country and in England. But the many changes that have taken place in the athletic world during the past ten years make the fitting out of an athletic team for Albion a thing of pleasure for American athletes and a source of apparent discomfort to the runners and walkers of the "mother country." The trip to England, which Messrs. Myers, Murray, Waldron, and Fredricks will make, as representative athletes, recalls to memory the doings of the champions of a few years back. There are not many young men who participate in the field sports of the present day who can remember the conquests of Stern, Burrie, Colgate, Morgans, Hitchcock, Connor, Frazier, Livingston and Duffy, while those who have heard of McIvor, Sportas, Armstrong and Holske associate them with professional sports, whereas their fame was made in the arena of amateur athletics.

Among the noted runners of a few years ago was Rene La Montagne, whose performance of 101 yards in 10 sec. is the best on record. La Montagne was a member of the New York Athletic Club and he was the fastest of three brothers. He was so situated that his time was pretty much his own, and he devoted it to healthy, out-door sport, and finally developed into a speedy but unfortunate runner. On two occasions he ran 101 yards in 10 sec., namely: September 28th, 1878, and September 20th, 1879. In both those years the championship contests followed the date of his performances by about one week, yet he never was able to affix the proud title of champion to his name. He retired from running in 1880 and became a member of the Rockaway Hunt Club, and is recognized as one of the most dashing riders that ever followed a haying pack of hounds.

The first man who could justly claim the title of amateur champion 100-yard runner was Fred C. Sportas, of the Harlem Athletic Club. In 1876, when the first real championship meeting was held, Sportas won the sprint in 10 1/2 sec., and at once became an idol of the people among whom the "purple all and sash" of the Harlem Club was most popular. Fred was to us his own expression, a fine specimen of "physical culture." He trained on and became known as a speedy runner for short distances, and was taken to Colorado by Homer Pennock, where he ran a race for an announced stake of \$10,000. He lost the race, but it is said that the money was won, and with it Fred began a most successful career. In the heart of the silver mining country he became possessed of a "claim." Other speculations "panned out" well for the Harlem boy, who is now a successful mining stock broker in this city.

In 1877 the title of 100-yard champion fell to Charles McIvor, a six-foot Canadian, who astonished the home-bred athletes by his speed. He also became acquainted with Pennock, who was then a patron of runners, and under the latter's care Charley developed into one of the fastest runners the country has ever seen. About three years ago Pennock fitted out an expedition to capture a Sheffield Handicap and English sovereigns. McIvor was the "star" of the troupe, which had as its other members Bob Floyd, otherwise known as Robert Mathieson, alias Matt Floyd, and Charlie Biggars, a Canadian runner and jumper. McIvor had "a good mark" in a handicap, and won easily, landing long odds and a goodly sum for his hucker. He was elated by his victory, and when he crossed the tape he remarked in high glee, "Oh! oh! I'm the finest man that ever pulled off a shirt in a Sheffield path." He also showed his knowledge of his own worth the following night at a concert garden, when he paid a vocalist to warble the Derby song, and to wind up the verses with "and McIvor is the boy." He then went down to Liverpool with Biggars, and returned in time to lose a handicap and a heavy wager laid by "the old man." It is said that he has retired, and is now the husband of the daughter of a Manitoba lumber king.

In 1877 the championship mile-run was won by Richard Morgan. "Dick," as he was called by his mates in the Harlem Club, was a pretty runner with speed and stamina. His brother "Gus," who was at that time the cleverest amateur club swinger, helped train him for the race. Dick won without any difficulty in 4 min. 49 1/2 sec., which was the fastest time a championship mile had been run in until 1879, when Pellat, the Canadian soldier, beat Duffy, of the Harlem Club, a foot, after a most desperate and exciting struggle. Morgan was forced to retire from the path by sickness, and then settled down to business in the Chatham Bank, which place he left to take the teller's desk in the United States Bank. Gus Morgan is still in the Chatham Bank, where he has risen to receiving teller.

The first champion walker was D. M. Stern, a member of the New York Athletic Club and now a wealthy wholesale liquor dealer. Dan, as he was known far and wide, first became famous by defeating Ed. Mullen in a trial of speed. His gait was always suspicious and a judge of walking was kept busy looking at Dan's heels and knees. He was the first amateur walker in this country to complete a mile in 7 m., a performance that caused Stern to be looked on as a wonder. At that time Dan knew little else than walk. Everywhere he went he talked "walk," and his after-dinner "strolls" were at a gait that astonished the people who then took but little interest in amateur athletics and pedestrianism. But Stern's star soon began to wane before the comet-like Holske.

The latter was, as indeed most all the champion walkers were, a native or resident of Harlem. He was tall and thin and had a decided fancy for milk and custard pies. Training did he cared little for, so long as he could get a supply of milk and pie. His parents were wealthy, and frowned down his attempts to become a champion. He did, however, and when he had achieved the coveted honor, his mother agreed to witness a race in which he was to take part. Armstrong had made his appearance then, and won the race to the amazement of Eddie and the disgust of his mother. From that time out there was a strong rivalry between Armstrong and Holske, and though the former when at his best was, without doubt, the greatest walker that ever lived, he was doomed to be beaten by his old-time adversary.

They met on May 8th, 1881, in a twenty-five-mile race. Both had previously become professionals and the match was for \$1,000. Homer Pennock backed Armstrong and Jim Lathrop and Boston parties backed Holske. The race took place on the old grounds of the Manhattan Athletic Club in this city, and Tom McEwen, himself a retired walker, a contemporary of both men, was the judge of walking and referee. The race was the grandest ever contested. Thousands of dollars were wagered on the result, and at the end the Bostonians went home with well-filled purses and the New Yorkers were broke. Armstrong led at various times by an eighth of a mile, and when they entered on the last mile of the journey he still held a lead of that distance. Both men were nearly blind and were so weak they staggered around the track like drunken men. Half a mile from home Holske caught Harry, and a quarter of a mile further on the latter dropped on the track inauspicious, as did Holske when he completed the distance.

Within the past five years the number of amateur athletes has increased tenfold, and people generally have become interested in field sports. The quality of athletes has also increased, and to-day the amateur walkers and runners of this country can cope successfully with those of any other nation.

Sprinting at Tombstone.

About three hundred ladies and gentlemen witnessed the athletic events held at Doling's Track, Tombstone, Arizona, on the afternoon of May 1st.

One-quarter-mile amateur championship of Tombstone. Gold medal—M. E. Clarke, first; E. C. Brown, second. Won easily. Time, 50 1/2 seconds.

Metch race, 100 yards—Will. Baron, first; Charles Read, second. Time 1 1/2 seconds.

Fifty-yards race—Engene Mungan, first; D. Toll, second. Won by a foot, after a splendid struggle. No time taken.

One hundred-yards match—D. O'Connor, first; R. Lewis, second. O'Connor's victory was quite a surprise, Lewis being a heavy favorite. Time, 1 1/2 seconds.

One hundred-yards amateur championship race—M. E. Clarke opposed ran over the course in the announced time of 10 1/2 seconds, and secured the championship medal. The officials were: starter, Geo. Rice; judge, F. E. Brooks; timers, Colonel A. Lewis and J. Behan.

The Cross-Country Run.

The first cross-country run ever held on the Pacific Coast will take place this afternoon at Berkeley, under the auspices of the Merion Club. Judging from the well-known ability of many of the participants, some very good performances may be confidently expected. Frank Day and A. B. Tennant will be the "hares," while the following athletes have consented to follow the trail: T. Jennings (whipper-in), W. R. Stewart, C. Creighton, R. B. Jones, B. A. Benjamin, L. C. Burnett, C. B. Hill, T. Davidson, Arthur Stuart, R. P. Chase, Palache F. Mathis, Falkenstein, Tenney, Bencroft and Wigmore. A few more are expected to join this large number before the start. As the country is rough and the grass very high, participants should wear football uniform or heavy costumes. The start will be made between 3:30 and 4:30 P. M., from the last station on the Berkeley line, and the public, who are cordially invited to be present, will just be in time if they take the 3 o'clock boat from this city to Berkeley.

We are pleased to note the advent of the *Amateur Athlete*, published at New York, and edited by G. D. Baird, formerly the champion amateur walker of America, and now the official handicapper of the N. A. A. This paper is the official organ of that association, and Mr. Baird, from his intimate connection with amateur athletics, is one of the most capable men we know of to carry it on successfully. It is truly refreshing to find a paper devoted entirely to this subject, as the public is as yet rather ignorant of the broad difference between professional and amateur sport, and information concerning the latter is usually found in the same column with prize fights and hippodroming wrestling matches. We have always felt that while proper professional performances deserve mention and record, still the distinction should be strictly maintained, and have always endeavored to do so. Success to the *Amateur Athlete*.

By this time it is generally well known that Fitzgerald won the great six-day go-as-you-please contest, covering the unprecedented distance of 610 miles. Rowell secured second place with 602 miles. At the very best a six-day affair is but a humiliating spectacle, and it is much to be regretted that Fitzgerald covered over 600 miles, as the public will have a surfeit of these affairs, particularly after the financial success of the last one.

The handicap foot-race of 150-yards heats will be run at Oakland Park to-morrow afternoon, and the outlook is that it will be a notable affair. Entries closed last evening, and the handicaps will be announced to-day. All the prominent sprinters of the coast will participate, and as the handicapping is in the hands of competent and impartial men, the name of the winner is an impenetrable conundrum at present.

Intending competitors are once again reminded that entries close for all events of the Olympic games on Decoration Day, at the club rooms, on the evening of May 16th.

Pratt, who won the mile race in 4 min. 26 1/2-5 secs., at the Oxford and Cambridge sports, never ran within 11 secs. of that time either in public or at private trials.

Brooks of Yale and Goodwin of Harvard will contest in a quarter-mile race this season. A great race and fast time will no doubt be the result.

A fence is now being constructed through the center of the Recreation Grounds to divide the city property from private property.

A two-mile handicap race has been substituted for the mile scratch race for the Olympic meeting on Decoration Day.

## HERD AND SWINE.

### Danger in Green Rye.

A correspondent of the *Country Gentleman*, whose attention has been attracted to the recent outbreak of ergotism in Kansas, contributes to that paper the following account of his experience with green rye:

It was in the spring of 1878. The rye had been sown the autumn before on river bottom land, second plateau, after the corn was cut up, and as the winter was mild it kept green all winter and made a very early and vigorous growth. March 26th it was nearly or quite six inches high, and I commenced cutting one patch of it with a scythe, and giving it to young hogs. They ate it readily, and thrived to my satisfaction. But after ten days or two weeks I noticed that they began to be singularly affected. The skin on the upper half of their sides, but particularly on their backs, turned dark purple. Soon it began to crack up, and it worked out through the hair in dry flaky patches, sometimes as large as the half of a man's hand. The cracks opened up half an inch or more in depth, and the surrounding tissues became intensely purple. The phenomenon was attended with violent itching. Frequently a hog would squeal out in his misery, and holding an ear of corn in his mouth, run to the fence post to scratch his back. I was slow in attributing the trouble to the rye, but after I ceased to feed it they soon recovered. None of them died, but it was a long time before the purple tint faded out of their backs.

A week or two before the date above mentioned I turned a flock of breeding ewes on another patch. They were to commence dropping lambs about April 1st, but they began before that date. In a flock of a hundred ewes or more I always expect a few to anticipate their time by two or three days. It soon became painfully apparent to me that something was wrong, but, as with the pigs, I hesitated a good deal before attributing it to the rye. The first day they were allowed to graze on it only twenty minutes, the next day thirty, and so on; after about a week they were allowed to remain on it until they filled themselves, which they would do in an hour or less. They had all the while a daily feed of hay, sprinkled with brina, and a ration of grain, so that they did not become colicky or scour. They continued to relish the rye, and I was at quite a loss to account for their ill behavior in other respects.

That ill behavior consisted in premature deliveries in a large number of cases, generally followed by a disowning of the lamb. I had looked forward to the rye to furnish an abundant supply of milk, and so it did, but this did not secure that immunity from this unnatural conduct on the part of the ewes which I always expect as a result of green feed. Not only did they disown the lambs at birth, but some ewes abandoned their offspring after they had run at their side two or three days—a circumstance unprecedented in my experience. There were cases of positive abortion, though these were not numerous. In my ignorance I confined the recalcitrant ewes with their lambs in small pens, and gave them the mown rye. This only continued the trouble. In disgust I removed the flock from the rye altogether, and put them on grass. This soon put matters to rights, and in a week or so all trouble disappeared.

I am satisfied now that the cause of this trouble and of the affliction of the pigs was ergot in the rye. Not that it was actually developed yet—as it is considered settled that ergot is the kernel itself, greatly distorted and enlarged by a parasitic fungus—but the *sporidia* or fungous dust must have been already present in the plants somewhere, and I see no reason why this dust should not be able to produce the well-known effects of ergot. Rye grown on lowlands is more subject to this parasitic attack than on the uplands.

### Permanent Pasture.

I think I am safe in laying it down as a rule that every farm should have one field in permanent grasses. In selecting the field it is wise to take the land least fitted for cultivation. If it is rolling it will dry out and settle sooner than flat land, and this will be an advantage. If a field can be selected adjoining a wood lot, it is well; but if not, by all means plant a shelter belt of timothy along the north and west of it. Three or four rows of locusts or soft maple, set four feet apart each way, will grow in three or four years so as to break the wind and afford great comfort to the cattle, and the trees will grow into valuable timber at the same time. This permanent pasture may be heavily stocked during May and early June, for this is the season of rapid growth; and the permanent grasses will bear close cropping without injury, if the cattle are removed from them before the heat of summer. And while you are keeping the stock here, the clover and timothy are making a growth which will furnish abundant pasture during the hot weather. I do not think it economy to ever turn on clover until it begins to bloom; but the farmer without other pasture is obliged to do it or keep his stock in the barn-yard late in the spring, when they are needing a change of food, and will lose flesh for the want of it.

There are three varieties of grass which I find exceedingly valuable in permanent pastures, and these are blue-grass, orchard-grass and red-top. The first flourishes on all limestone lands, and make the best sward of any grass with which I am acquainted. It starts very early in spring, is little injured by tramping or close grazing, and I believe it to be the most nutritious of all the grasses. It is surprising how soon well-wintered cattle will be fit for the butcher when pastured on blue-grass. One disadvantage of this grass is the long time it takes to form a sward; but to compensate for this, when once formed it will, with fair treatment, last a lifetime. For this reason it should always be sown with other grasses. My experience is that it takes four years to get the land well set with blue-grass, and it will improve for several years longer. I sowed just as much of other grass as though I did not use the blue-grass, and then add one bushel of seed of the latter. In the spring of 1879 I seeded ten acres, using one bushel of blue-grass seed to the acre, and a liberal quantity of clover timothy, with a sprinkling of clover and other grasses. Neither that nor the succeeding summer could I discover any blue-grass, but the year following it began to show, and now is crowding out all other grasses. Orchard-grass is best adapted to loamy or alluvial lands, and in seeding a permanent pasture, if there are any spots of black land or creek bottom, I there seed heavily with this grass. Red-top does best on the wet lands where other tame grasses would be drowned out; but a little of it mixed with the other grasses will be of advantage on all pastures. In fact the more varieties you can get to grow on the land the greater the yield will be, and the cattle will also thrive better for it. It would all largely increase the value of our grain farms, to the comfort of the stock, and the profits of the owner, if more attention was paid to this subject of permanent pasturage.—*Pittsburg Stockman*.

### Pasturing Milch Cows.

There is a steady abatement going on in the old-time practice of depending solely on grazing for the support of milch cows during the whole of the summer season. This is regarded as an important improvement in the care of dairy stock. When land acquires any considerable value, as it always does in all the thickly and older-settled parts of the country, it costs less to support not only cows, but other stock as well, by supplying them with, at least, a portion of their food during the driest and hottest part of the season, for something outside of the pasture. It is cheaper and better for the stock, and productive of more milk. Pasturing is a wasteful process of supporting stock always, and can only be tolerated with propriety where land is so cheap that grass costs next to nothing, or has so little value that half of a good crop would not pay for cutting and hauling the whole of one. Pasture only yields half a crop as a rule. The injury done to the roots of grass by the hoofs of stock, and the wounding of its stems and leaves by frequent cropping, and the parching of the soil by its comparative nakedness when closely fed, all contribute to reduce the growth so much that half of a crop is all that can be realized; and if the season is at all unfavorable, the product will fall short of half a crop. It is a safe estimate to reckon that one acre mowed and fed to stock will go as far as two acres of equal quality will if grazed. In employing land for pasture the farmer gives two acres for the use of one, or, in other words, he gives half of his pasture for making his stock harvest the other half. If he has land too rough to work, this may be his best policy, but if he has good, arable land, he may double his stock by doing his own harvesting, or he may keep the same amount of stock and save half his land for other purposes.

Our most profitable experience in keeping cows has resulted from giving them pasture enough to supply themselves in the growing seasons of spring and fall, and depending on soiling through all the time between; beginning gradually with the soiling as soon as the grass ceases to be so plenty that the cows cannot fill themselves readily, and have some time to rest. It is better to begin thus early than to wait till they begin to be pinched, for then they will begin to shrink in their milk, and will not be likely to recover from it afterwards; for it is a general rule with cows that when, from scanty feed, their milk begins to decrease near the middle of summer, the shrinkage remains during the rest of the season. After a shrinkage has been established, full feed will serve to prevent a further decline and to improve the quality of milk, but it will seldom restore the quantity given before the shrinkage occurred. No dairyman can afford to suffer the loss that is sure to come if soiling is omitted when pastures begin to fail. The statistics of cheese factories show a difference of fifty per cent. between soiling, as above described, and depending solely on pasture. The average milk per cow, for a season of 200 days, is 3,000 pounds, for cows on pasture only. For those soiled, in addition to pasture, so that there is no shrinking, except by increasing distance from the time of coming in, the average is 4,500 pounds—a difference wide enough to pay for all the labor of soiling, and a handsome profit besides. A prudent man will not suffer such a loss to occur in his products without an effort to stop it, if he is aware how great the loss is liable to be. It is because the loss is not appreciated, that it so often happens. Experimenters in soiling often fall short of its best effects and become discouraged with it and think it don't pay, because they have not begun in season. They wait till their cows have been pinched for feed three or four weeks, and their messes have dropped down to an irredeemable condition, before soiling begins. The golden opportunity has then passed, and the flow of milk must be moderate all the rest of the season. The best that soiling can then do, is to maintain the reduced flow as it is, and, if the stratum is richer than is required for the diminished production of milk, the excess will run to flesh and cause the cows to thrive, instead of increasing in milk. The time to begin soiling is, before the cows begin to shrink, instead of afterwards. The full flow can then be maintained, and the soiling will be seen to tell well on the milk, and shrinkage will only take place by reason of the advancing season.—*Live Stock Journal*.

### Soiling Pigs in Summer.

As the pig is a grass-eating animal, this taste for grass or roots should always be gratified. Many farmers have no pig pasture, and keep their pigs in a pen, or pen and small yard. They seem quite to forget the nature of the pig, and treat him as if he were only fitted to digest grain or other concentrated food. This may be responsible for many of his ailments.

It is easy for the farmer to furnish clover or other green food for his pigs in summer. This animal is not very particular; there are many weeds in the garden that he will take and return his thanks with a polite grunt. He appreciates all such attentions shown him, and will testify it by better health and growth. This is a matter of much importance, as a bushel of corn fed with clover will often produce as much growth as a bushel and a half fed alone. Animals grow best when they are in good health and have a vigorous appetite, and the clover or other green food keeps their digestion good. That great pest, the Canada thistle, when the stalk is green and succulent, is eaten with a genuine relish by pigs. In this condition this thistle is preferred to grass by many other animals on the farms.

When the clover is large, the pigs will eat it better if it is run through a cutter. This mixes stalks and leaves so as to render it more succulent. The pig will eat more clover or grass than is generally supposed. Shoats of 50 to 80 pounds will eat from 6 to 8 pounds of green clover per day. We have found the best way to feed it was to run the clover through a cutter and mix with meal. In this way, the clover and meal was eaten together, and this mixing of the bulky and concentrated foods results in a more perfect digestion of the corn or other ground food. We tried so accurate an experiment on this, that the result is not left to conjecture. We divided a liter of six pigs, and to three fed clover and corn meal, and to the other three fed corn meal alone, soaked in cold water. The latter, every two or three weeks, would be dainty in eating and appear to be feverish, but after fasting, and taking only water for a day or two, would eat again for some weeks, when the same fasting period would be repeated. But the other three, fed on meal and clover always had a good appetite and made a steady and rapid progress. Each lot ate the same amount of corn meal, but those fed clover dressed nearly 30 per cent. the most.

We have become thoroughly convinced of the importance of giving the pig green food in summer, and some coarse food, such as roots, pumpkins or short-cut clover hay, boiled or softened in warm water in winter. It does not require much time to bring to a lot of pigs clover or other green food, in yard or pen, during the summer. It only requires 100 pounds for a dozen pigs. We think farmers are generally well convinced of the benefit of a good pasture for pigs, and soiling

will take the place of the pasture when the farmer has none.—*Live Stock Journal*.

A Minnesota farmer raises peas for green food for his hogs. He considers the Canada Field Pea the best sort, and says it should be sowed alone rather than with oats as some recommend, three bushels per acre. They have short vines and will stand up well enough. They will yield on ordinary soil 25 or 30 bushels per acre. If sowed early they will be fit for feed much earlier than the oats, and will make a much better yield alone. The oats will shade them too much, especially if the land is rich. He raises them both for green and dry feed and considers them very profitable crops. He sows a patch close to his hog yard and commences feeding as soon as the peas begin to shape, which is early, and at a time when other green feed is scarce.

Two Chicago packers have sailed for Europa with the intention of opening a pork packing establishment at Bremen. Native hogs will be used, as the American article cannot be imported, and the packing house carried on on the same principle as those in Chicago. If successful it is believed that similar establishments will be started in various parts of Germany.

## SHEEP.

### Oily-Fleeced Merinos.

Last September, a gentleman reporting the Michigan State Fair for the *N. Y. Tribune*, in giving a notice of the heavy shearing rams there exhibited, made the very sagacious comment on their heavy fleeces, that a close inspection of these fleeces revealed the fact that only about four or five pounds of them was wool, the rest being oil and dirt. Then followed some very wise counsels to breeders of Merino sheep to breed more wool and not so much grease.

This was very extensively copied into papers throughout the country, and, no doubt, thousands of readers were impressed with the truth of the assertion, as well as with the wisdom of the advice. I commenced breeding sheep in 1840, and from that time to this, there has been a constant succession of such advisers, and as constant a succession of those who have endeavored to prove that the advice was sound, and a practical application of that theory would prove its correctness, and what has been the result? Those who have advocated that theory, as well as those who have endeavored to make a practical application of it in breeding, are not today, any more than they have been in the past, able to show where its application has been successful in increasing the amount of wool without carrying along the usual amount of oil in the flock that is natural to the average well-bred Merino sheep; and it is among the flocks of those who have recognized the fact that the natural amount of oil of the Merino fleece was absolutely necessary to the continued increase of wool, that the greatest improvement of Merinos has been effected; and whatever improvement has been effected in the flocks of those who advocate the theory of breeding for dry fleeces or, as they usually term it, more wool and less oil, has usually been made by selecting the driest-fleeced rams from the more oily fleeced flocks, the large amount of wool on such rams being due, as I believe, to the presence of a large amount of oil in the relatives or ancestors of the rams so selected.

I was present at the same fair, and examined the rams closely, and I do not believe there was a ram there exhibited that was two years old or over that would yield as small an amount of scoured wool as the maximum amount that was revealed to the astute understanding of the writer in question.

He who undertakes to estimate the amount of cleansed wool in any fleece should have had experience and possess very superior judgment, or he will be likely to estimate very wide of the mark. I have had charge of cleansing a great many heavy fleeces, and I have come to the conclusion that estimates of what a fleece will yield of cleansed or scoured wool are very liable to be erroneous; and I am positive that the writer in question made a very low estimate from his close inspection, from the fact that, among all the fleeces I have had cleansed, no ram's fleece has yielded so little cleansed wool as the maximum amount he had revealed to him among the fleeces of the rams he saw at the Michigan State Fair.

My last experience in cleansing fleeces, or having them cleansed (a manufacturer has always cleansed or scoured the wool), has something of a lesson for the writer in question, as well as for us all, and I give it to show that great progress has been made in increasing the amount of wool. Some five months before the fair was held, where the writer in question had such a revelation, there were left with six fleeces taken from stock rams at a public shearing, rams that had been exhibited at fairs and used as stock rams. They were all good rams, but none of them had attained to the greatest popularity, or to the greatest weight of fleece. I do not name the owners of these rams, as this article is to illustrate a principle, not to advertise anyone's sheep, but I have the certificates of the manufacturer that he realized 49 pounds 4 ounces of scoured wool from the six fleeces. This is an average of 8 pounds 3 ounces of scoured wool per fleece. The last was 7 pounds 3 ounces, the largest 9 pounds 2½ ounces.

Now, to show that our breeders are on the right line of breeding, and probably understand what they are about in breeding a large amount of oil, I will quote the result of a public shearing of Merino sheep about the time they were imported. This shearing was held at Chancellor Livingston's, about 1810. Four rams were shorn at that shearing, their live weight averaging 125 pounds each, their unwashed fleeces averaging 7 pounds 13 ounces, the best one giving 9 pounds 6 ounces; but this fleece was 14 months old. The percentage of unwashed fleece to live weight average 6.2 per cent. Carrying these amounts and percentages in mind, we will compare them with six we have just had cleansed. The average live weight of the six was 117½ pounds, and we find the percentage of scoured wool is 7.5, or a larger percentage of scoured wool than was shorn of unwashed wool from the Livingston rams. Then, as now, the estimated shrinkage of unwashed Merino wool was about two-thirds, and such trials as we had accounts of in those days, as well as at present, shows this estimate to be, on the average, correct; although stock rams will shrink more, the shrinkage on the six last cleansed being about 70 per cent., but we find that the oily stock rams to-day give more cleansed wool than those imported rams of oil, wool and all.

If the writer for the *Tribune*, and those who have the same views, will show us their ability to increase the percentage or aggregate amount of cleansed wool by using dry-fleeced rams, in any such proportion as has been accomplished by those who have oily ones, there will be good reason for us to take counsel of and follow their examples, but until they do this, they must excuse us for leaving the practices that have resulted in such wonderful improvements, as are proven by the examples and contrasts cited.

Vermont Merinos.

The New England Homestead of April 12th contains a detailed report of the late annual shearing festival of the Vermont Merino Sheep-Breeders' Association, from which we extract the following:

Did you ever attend a public shearing in Addison county, Vt., where are bred the finest Merino sheep in the world? Well, if you haven't, don't miss it next year. The shearing at Middlebury, April 1st, 2d and 3d, was a scene never to be forgotten. In the fine buildings of the Sheep-Shearing Association was collected the most superb collection of Merino sheep ever got together in this or any other country. The capital represented was almost fabulous compared with the number of animals. There was F. D. Barton's ram lamb, sired by old Standard—\$15,000 wouldn't buy him. You don't believe it? No, of course, you don't, unless you are a Merino breeder. There were lot of ewes that \$100 wouldn't buy, and some hens that the breeders wouldn't sell at any price.

There were some 200 sheep on exhibition. On Wednesday over 300 breeders were present, including several from New York and Texas. The sheep were in open pens on each side of the three ells. Covers were put over the pens and on these the shearers plied their task, or the sheep were carried up-stairs and sheared there. After shearing, the sheep and the fleeces were weighed separately. At intervals the record was given from the secretary's desk to the audience who gathered around in silence. The music of the shears was a pleasant accompaniment to the reader, while occasional outbursts greeted the announcement of the heavier fleeces.

Only in two-year-old sheep were the fleeces heavier than last year. In 1883, Rip Vau Winkle, four years old, sheared 38 lbs. 5 oz. and King All Right 38 lbs. 3 oz. The yearlings did not beat last year's record. In three-year-olds, twenty-one rams averaged 27 lbs. 14 oz. and thirteen averaged 30 lbs. 2 oz. Forty two-year-old ewes averaged 17 lbs. 2 oz., twenty went 18 lbs. 12 oz. and the heaviest was 21 lbs. 2 oz.; twenty-nine rams averaged 25 lbs. 6 oz., seventeen went 29 lbs. 3 oz., while six averaged 33 lbs. 9 oz.—an unprecedented record.

Comparison of this record with the shearings of four and five years ago shows that the improvement has consisted in producing a superior quality of wool and increased quantity. The length and thickness of the staple has increased. There is much less oil than formerly in the fleeces, yet they are so large as to weigh more. The constitution of the sheep has been more looked after by breeders, and it is a matter of fact that Merino stock of Vermont is harder and possesses a stronger constitution than it did at one time, when this essential was somewhat neglected in the race for other points.

The eastern wool market very seldom is, and indeed could not well be, more dull and uninteresting than it is at this time.

STALLIONS THOROUGHRED.

STALLIONS

—AT—

RANCHO DEL PASO.

For the Season of 1884.

Thoroughbreds.

LONGFIELD.

Chestnut horse, by MONARCHIST, he by Lexington.  
 First dam, Dame Gouliny (Blue Gown), by Planet.  
 Second dam, Flora G., by Lexington.  
 Third dam, Fanny G., by imp. Margrave.  
 Fourth dam, Lancesse, by Lance.  
 Fifth dam, Aurora, by Aratus.  
 Sixth dam, Paragon, by imp. Buzzard.  
 Seventh dam, Indiana, by Columbus (son of imp. Pantaloon).  
 Eighth dam, Jane Hunt, by Hampton's Paragon.  
 Ninth dam, Moll, by imp. Figure.  
 Tenth dam, Slamerkin, by imp. Wildair.  
 Eleventh dam, imp. Cub Mare, by Cub.  
 Twelfth dam, Aramantus' dam, by Second.  
 Thirteenth dam, by Starling.  
 Fourteenth dam, by Croff's Partner.  
 Fifteenth dam, by Greyhound.  
 At \$50 the season, due at the time of service.

JIM BROWNE.

Chestnut horse, by FOSTER, he by Lexington.  
 First dam, Flush, by Hiawatha.  
 Second dam, Fanny Bugg, by imp. Ambassador.  
 Third dam, Ida, by imp. Belsazzar.  
 Fourth dam, Madame Bosley, by Sir Richard Tonson.  
 Fifth dam, Nancy Nichol, by imp. Eagle.  
 Sixth dam, Bet Bosley, by Wilke's Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by imp. Sterling.  
 Ninth dam, by Clodius.  
 Tenth dam, by imp. Silver Eye.  
 Eleventh dam, by Jolly Roger.  
 Twelfth dam, by imp. Partner.  
 Thirteenth dam, imp. Monkey.  
 Fourteenth dam, an imp. mare from the stud of Harrison of Brandon.  
 At \$50 the season, due at time of service.

Trotting Stallions.

ECHO.

Bay horse, by RYSDYK'S HAMBLETIONIAN.  
 First dam, Fanny Felter, by Magnolia, son of Seely's American Star.  
 Second dam, by Webber's Kentucky Whip.  
 Third dam, by Shakespare, son of Duroc, and out of a mare by Plato, son of imp. Messenger.  
 At \$100 the season, due at time of service.

ALGONA.

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian.  
 First dam, Emma Kinhead, by Consort, son of Cassius M. Clay.  
 Second dam, Elie Dean, by Mambrino Chief.  
 Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy.  
 At \$100 the season, due at time of service.

ALASKA.

Brown horse, by ELECTIONEER.  
 First dam, by Washington, he by Geo. M. Patchen.  
 Second dam, by Williamson's Belmont.  
 At \$50 the season, due at time of service.

The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escapes or accidents.

John Mackey, Superintendent, Sacramento, Cal.

THOROUGHRED STALLION

X X.

Pedigree.

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.  
 First dam, Columbia, by imported Bonnie Scotland.  
 Second dam, Young Fashion, by imported Monarch.  
 Third dam, Fashion, by imported Trustee.  
 Fourth dam, Bonnets of Blue, by Sir Charles.  
 Fifth dam, Reality, by Sir Archy.  
 Sixth dam, by imported Mealey.  
 Seventh dam, by imported Centinel.  
 Eighth dam, by Mark Anthony.  
 Ninth dam, by imported Janus.  
 Tenth dam, by imported Monkey.  
 Eleventh dam, by imported Silvereye.  
 Twelfth dam, by Spanker.  
 See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

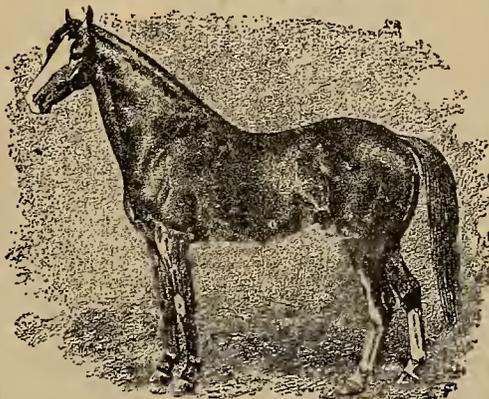

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauania, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hoeking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his breeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

JOSEPH CAIRN SIMPSON.

Oakland or 508 Montgomery Street, San Francisco.

The Thoroughbred Stallion

JOE HOOKER, BY MONDAY.

First dam Mayflower, by imp. Eclipse.  
 Second dam Hennie Farrow, by imp. Shamrock.  
 Third dam Ida, by imp. Belsazzar.  
 Fourth dam Garama's dam, by Sir Richard.  
 Fifth dam, by imp. Eagle.  
 Sixth dam Bet Bosley, by Wilkes' Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by imp. Stirling.  
 Ninth dam, by Clodius.  
 Tenth dam, by imp. Silver Eye.  
 Eleventh dam, by imp. Jolly Roger.  
 Twelfth dam, by Partner.  
 Thirteenth dam, by imp. Monkey.  
 Fourteenth dam, imp. mare from the stud of Harrison of Brandon.

TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freepport road.

This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1883.

THEO. WINTERS, Sacramento, Cal.

BELLE MEADE

1884 STALLIONS. 1884

BRAMBLE,

By imp. Bonnie Scotland, dam Ivy Leaf, by imp. Australian.

ENQUIRER,

The sire of McWhirter, Fortuna, Harkaway, Falsetto, Blue Eyes, Pinafore, Getaway, W. P. Burch, etc.

Imp. GREAT TOM,

The sire of Gen. Harding, Thackeray, Swift, Tennyson, Trombone, Tarquin, etc.

And the grand Race-horse,

LUKE BLACKBURN,

By imp. Bonnie Scotland, dam Nevada, by Lexington.

Each of these horses will be bred to a limited number of approved mares, at

\$100-The Season-\$100

\$5 to the Groom.

Mares will be kept at reasonable charges during the season. The annual Sale of Belle Meade Yearling, 49 in number will take place April 30th. Catalogues of the sale will be issued to the public in due time. Address,

W. G. HARDING, Nashville, Tenn.

The Thoroughbred Stallion

WILDIDLE.

By imp. AUSTRALIAN. Dam Idlewild, by Lexington.  
 This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.  
 Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:42, at two years old), May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

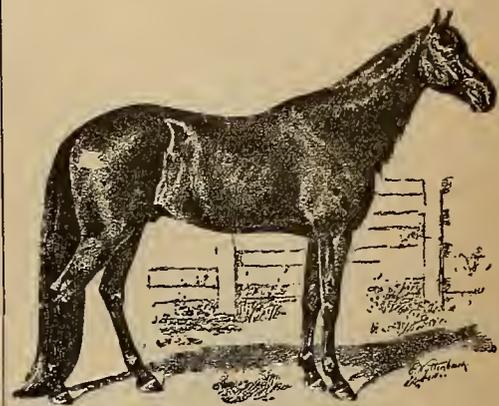

Terms of season, \$75, payable at time of service, and in all cases before removal. Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, Owner, or W. L. APPELBY, Supt., Santa Clara, Cal.

P. O. Box 223.

TROTTING STALLIONS.

Mambrino Trotting Stallion

ABBOTSFORD.

Record 2:19 1/2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE; San Mateo, Cal.

PEDIGREE.

By Woodford Mambrino; his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Paymaster; dam Woodbine, (dam of Wedgewood, 2:19), by Woodford, son of Kosciusko, by Sir Archy.  
 Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:23 3/4. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 3/4; Manetta 2:19 3/4; Mambrino Dudley 2:22; Convey 2:22 1/2; Magenta 2:24 1/2; Manfred 2:25; Panceost 2:25 1/2; Rachel 2:26 1/2; Inca 2:27; Lady McFaridge 2:29; Dacia 2:29 1/2; Geo. A. Aver 2:30; Woodford Mambrino was also the sire of Princeps, the sire of Trinket 2:34. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,350 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.  
 Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:18 1/2; Commonwealth 2:22; Hiram Woodruff 2:23; Valley Chief 2:23; Faustina 2:25 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

TERMS.

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

WASH JAMES, Agent, San Mateo, Cal.

The Trotting-Bred Stallion

A. T. STEWART,

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, sixteen and one-half hands high, and weighs over 1,300 pounds. Bred by D. L. Harris, of Fayette County, Kentucky. Foaled in 1872, and is an imported Mambrino. Sired by Mambrino Patchen (full brother of Jolly Thorn, record 2:18 3/4), sire of Katie Middleton, 2:23, and mine in 2:30 list. Dam by Mambrino Chief, sire of Lady Thorn; second dam, by Young's Pilot, Jr., brother in blood to the sire of the dam of Mand S., 2:30; Mambrino Patchen sired by Mambrino Chief, he by Mambrino Paymaster, and he by Mambrino, thoroughbredson of imported Messenger.

Terms for the season, \$30.

Address SOMERS & AYER

**BILLIARDS.**

Every little while for some reason or other, billiards seem at a standstill. We are now going through one of those periods, the past week having been one of the quietest in many months. However, the reaction will soon come, that is a certainty, and it will be so much the stronger that it has been so dull. In regard to the fifteen ball pool tournament which the Saylor Brothers had spoken of, they state that it is better to let the matter rest a while, as the entries were so few that no enthusiasm could possibly be worked up. Mr. Emanuel Brunswick informed a representative of the BREEDER & SPORTSMAN, that the "Parisian" pool tournament was going begging for the want of a suitable hall to hold it in. It is true that billiard parlors are by no means scarce in this city, but what tables are used in these establishments must be taken into consideration, and the Brunswick & Balke Co. will inaugurate their tournament, only where they have their tables in use. At the Exchange billiards parlors, the proprietors stated that they did not care to have the tournament held at their place, as they could not give their entire attention to it, on account of the immense "Stud" game they had to take care of. It is to be regretted that this establishment, which has so far been considered a first-class one, has fallen with the reigning gambling craze. When one thinks of it, there, without a doubt, is the secret of the dullness in billiard circles. Those respectable people who were in the habit of enjoying themselves each day with the ivories, have literally been driven away on account of the *cancille* they were thrown in contact with, and which are attracted to billiard resorts by the gaming passion. It may be possible that the binning out of players in balls, will encourage billiards at home. The manufacturers do not complain of business, and they say that the putting up of tables in private houses has increased most wonderfully in the last few months. One result has shown itself, it is a professional billiard exhibition which took place last Thursday evening in a mansion on the hill. This is an eastern custom which bids fair to establish itself on this coast. Professor McCleery has among his pupils, a well-known society gentleman who, desiring to entertain his friends in an unusual manner, invited his *maître* and one other professional to give a billiard exhibition at his residence, and when the two knights of the cue arrived on the appointed evening, they found a select though not a very large audience to appreciate their efforts. It is presumed that there was also, more substantial appreciation than applause; perhaps it was delivered as Prince Zouroff intended for Corzeze with a bouquet wherein each flower contained a note. Nevertheless the spectators as well as the actors, seemed quite pleased with her evening's amusement. The game was a very short one, 250 points only. McCleery won on the twentieth inning making an average of 12, his opponent having 19 points the worst of it at the finish. The averages were very good considering that, so much as possible rail runs were avoided, on account of their monotony, and good around-the-table play was indulged in. After the game McCleery gave a delightful exhibition of fancy shots, he was in a bappy vein and executed them with unusual brilliancy.

**Heredity in the Sulky.**

The apborism, "like begets like, or the likeness of some ancestor" is true when applied to the animal kingdom, but applied to men, with a few exceptions, is of no value. In the world of finance we have the great Rothschild family, and in the drama the Kembles, Booths and Jeffersons as among the exceptions. Taking the men or women who have figured in the world's history, like Shakespeare, Washington, Harriet Martineau, Voltaire, Dickens, Milton, Cbarlotte Cushman, Rachael and Napoleon, we find there was no ancestry responsible for their greatness; on the contrary, their genius was inherent, not inherited. The profession of training and driving trotting horses calls for mental and physical qualities of a high order, although the mass of the people do not seem to be aware of the fact. Like all pursuits, in it we find men of all grades of intellectual capacity, but the men who succeed are of the superior order. To this class Mace, Murphy, Hickok, Splan, Doble, Weeks, Bair, Green, Carl Burr, Bither, and many other noted drivers belong. To exceed with horses that differ in their characteristic and requirements is genius *par excellence*. It was genius and patience—that great virtue—that made a trotter of Goldsmith Maid, and it was genius that helped make the reputation of the gelding Edwin Forrest. It required thinking minds to develop what was within these two horses, and had the same amount of genius and patience been expended upon an enterprise not connected with sporting matters, it would have commended the world's admiration. Among the exceptions alluded to in the opening paragraph of this article is the transmission from father to son of capacities as trainers and handlers of horses. Why families should be distinguished as horsemen we know not, unless it is through man's natural love for the noblest animal the Almighty has given him. John Woodruff was a noted trainer in his day, and left his son Hiram to make the name famous. Hiram left no son, but a brother, Isaac, who is a trainer and driver of reputation. The most noted family among trotting horsemen are the Dobles. Many years ago "Uncle

Billy" made a reputation as a trainer and handler of trotting horses. The talent developed in the father become genius in the son, and to-day Budd Doble is regarded as the peer of any driver that lives. The aptitude for this pursuit in life does not rest with these two members of the family, as Wm. H., Jr., and Charles P., are both capable horsemen. The Woodruff and Doble families are not the only instances in this connection. The Wilsons of Rusville, Ind., have long been known as a family of horsemen. The senior Wilson early developed a fondness for the horse, and left his son, Richard, Bool and Samp, all prominently connected with trotting turf. The Woodmances are another noted family. The names Pocahontas and Woodmance were at one time inseparable, and it is probable if the great pacer had fallen into other hands she would never have become so famous. Both of the sons, Daniel W. and Ben, Jr., are noted horsemen.

The Maces, Dan and Ben, are another notable illustration, which we may supplement by instancing the Goldsmiths. Alden Goldsmith has been long and honorably known to the trotting turf, and although a good handler of horses, can drive a good race if occasion acquires. His sons, John A. and James H., made early debuts and are first-class horsemen. It is often claimed by the captious, and we may add evasions, that "the horse made the driver," but in ninety cases out of a hundred the claim is unfounded. The fact seems to be forgotten that a directing mind had much to do with the fame of great horses. In ordinary hands a horse, as a general thing, will be ordinary, but it requires genius to "get all out of him." This is why Mace and Murphy succeed when others fail; they study their subject and make possible what smaller minds would give up in despair. —Sportsman.

**Trotting in Scotland.**

Trotting seems to be looking up a bit in the Mother Country. On Thursday, April 3d, a trotting meeting was held at the Shawfield Recreation Grounds, Glasgow, which was largely attended, it being estimated that 7,000 people paid entrance money. The day, however, was a general holiday—Glasgow Fast day. The first event, according to reports in the Glasgow papers, was The Trotting Handicap of two miles, for a purse equivalent to \$150, \$35, and \$15. There were nine starters. Mr. J. McLeish's gray mare Highland Mary, with 375 yards start, won two straight heats; time not given. The second trot was for the Shawfield Stakes, distance 1 1/2 miles, weight for age; three-year-olds, 126 pounds; four-year-olds, 140 pounds; five, six, and aged, 147 pounds. Mr. J. Wood's bay gelding Little George, 6 years, won from five others by two lengths. The third event was the Spring Stakes, weight for age also, 1 1/2 miles, won by a neck by Mr. McCullum's bay gelding Strathdon, 6 years. Last of all was a Selling Stakes, won by Mr. T. Burn's Stranger, entered at £20, and carrying 147 pounds.—Toronto Mail.

A very simple method, and an improvement upon the Rarey system of training vicious horses was, says the *Rural Canadian*, exhibited at West Philadelphia recently, and the manner in which some of the wildest horses were subdued was astonishing. The first trial was made on a kicking or "balking" mare, which her owner said had allowed no rider on her back for at least five years. She became tame in about as many minutes, and allowed herself to be ridden about without a sign of her former wildness. The means by which the result was accomplished was a piece of light rope, which was passed around the front jaw of the mare just above the front teeth crossed in her mouth, thence secured back of her neck. It was claimed that no horse will kick or jump when thus secured, and that a horse after receiving that treatment a few times will abandon his vicious ways forever. A simple method was also shown by which a kicking horse could be shod. It consisted in connecting the animal's head and tail by means of a rope fastened to the tail and then to the bit, and then drawn tightly enough to incline the animal's head to one side. This, it is claimed, makes it absolutely impossible for a horse to kick on the side of the rope. At the same exhibition a horse, which for years had to be bound on the ground to be shod, suffered the blacksmith to operate on him without attempting to kick while secured in the manner described.

Hugh Gaffney, the noted steeplechase jockey, died some ten days since, in the city of Mexico, whether he had gone in February with some thoroughbreds. Gaffney was long one of the most successful cross-country riders. His first real success was with Lobelia, in 1870, and his set-to's with Harvey Welch never failed to arouse an outburst of enthusiasm, and "Go in Hughie, we bound boy!" "Arrab Gaff, an' ye have't black thief; now kick the dirty nuygur!" were certain to ring out as the pair swept past Deadhead Hill. Biddy Malone succeeded Lobelia in Gaffney's affections, but she died early, and then he formed the famous alliance with Joe Donohue, which arrived through the days of Tammany, Blind Tom, and George West. Then came Deadhead. "Bedad, an' you must look out for 'm," he observed, when he committed Deadhead to Tom Little's care. "He's a little green, an' maybe he'll go wrong wid ye at the lepa. Giv 'm a taste o' the gad—kind o' aisey loike." For several years Gaffney was com-

pelled to stand down. As a trainer, however, he continued to do well. But in 1881, at the termination of a race at Baltimore, he allowed his temper to overcome him, and struck Sait, for which he was ruled off the course. From that day Gaffney's star was destined to a perpetual eclipse, for all efforts to secure his reinstatement failed, and he accepted the engagement to go to Mexico from sheer necessity. —N. Y. Spirit.

The trotting stallion, Royalston, by Robert McGregor, died at Toledo, O., recently, the property of B. E. Bullock.

Geo. Polson, former driver of Frank Landers, Roscoe, and others, has located at Council Grove, Kan.

Chas. P. Doble, son of "Uncle Billy," has Troublesome and several others in training.

**THE DRAMA.**

**The California Theatre.**

It has been a dull time of late in connection with the legitimate. The California has been and is closed, without our being able to find out what its future, as regards the dramas, promise. On Monday the Grand Opera House was closed, while the Octoroon then on the boards, had a fair prospect of success. What all this portends we cannot tell, and surmise are useless and might be mischievous.

**The Oakland Theatre.**

The Sheridan Combination have succeeded here beyond calculation, the horses being crowded every night by the very best people of the city and suburbs. This speaks well for the people of Oakland, and is a fact we have much pleasure in recording. Sheridan is giving his best characters supported by a good company, including Misses Davenport and Phoebe Davies. On Monday King Lear will be the attraction.

**Vienna Garden.**

The performance here during the week has been varied but good, and repaid with fair though not crowded houses. Paul Stanley, the Walter brothers, (gymnasts), and the McCarty's in their comic specialties, have all been more or less successful, the gymnasts, in principle, being the best. Miss Inez Sexton has been the leading vocalist. She has a good voice, shows some cultivation, and dresses well, but she needs to moderate her ambition. It is a great mistake in our young vocalists to essay to imitate Patti and Nilsson, which by voice and culture they are incapable of rendering with, and thus lessen, if not destroy, their natural power of pleasing. Miss Vasconcellos, also here again, is always popular and pleasing, because she never attempts anything which by nature she cannot render acceptably. Some of the McCarty's are very good and enjoyable.

**The Standard.**

The performance of the Gypsy Band during its second week has not been very successful, the houses being only moderate though appreciative. We have had many revelations of late in San Francisco, Thomas' Chorus, Gilmore's Band, the Spanish Students, the Opere, and Excelsior, but of all the revelations showing the power of the violin separately, or in combination, nothing was ever heard in San Francisco equal to the music of the Gypsy Band. Apart from the exalted and perfect harmony they give, their great merit lies in their marvelous power of interpretation. In their bands the simplest, oldest, and most hackneyed tunes are infused with new life and new beauties never dreamt of before. Neither did we ever imagine that such tunes were capable of such interpretation. In proof of this we select The Old Folks at Home, and Yankee Doodle. In their operatic selections their performance is also superb. The band were rapturously encored, especially Imre Barath in his Cymbal solos. Those alone are worth the entrance money. As an attraction to the public in general the band lacks variety of instruments, and in our opinion, that is its only fault. The music itself is unexceptionable both in harmony and execution. In fact they are both marvelous.

#### REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.

Horses distancing the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the Judges.

The Pacific Coast Blood Horse Association Rules to govern all Running Races.

Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock P. M.

In all Running Races the second horse saves entrance.

No money paid for a race without a contest.

All entries for Races to close with the Secretary or President, at Chico, July 1st, 1884, at ten o'clock P. M.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

**C. C. MASON, PRESIDENT.**

**ROLAND DILLER, SECRETARY.**

### TRY AN ADVERTISEMENT IN THE TURF AND SPORTING AUTHORITY, THE BREEDER AND SPORTSMAN

### THE NEW ZEALAND

## Stud and Pedigree Stock Co.

LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Anstralian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Anstralian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Anstralian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Anstralian Colonies.

#### Fastest Time on Record.

Martini-Henry, by Musket—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and heating a field of nine in 2:30, thus lowering the previous record of 2:41; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30; and heating a field of twenty-nine, thus lowering the previous best record of 3:30; by Darriwell (5 years), carrying 102 pounds, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

THE TROTTING STALLION

**SILVERHEEL**

WILL MAKE THE SEASON OF 1884 AT THE DASHWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland.

Silverheel is a dark bay, foaled July 5th 1876; bred by R. B. Chisholm of Kane County, Illinois. Sired by Wilson's Blue Bull, his dam Magie Rice by Gage's Logan; grandam Fanny Stratford, a mare which had every mark of high breeding, and was the dam of John A. Rice that showed a 2:40 gait when two years old.

Logan by Rysdyk's Hambletonian; his dam Lady Wallace by Ohio Eclipse.

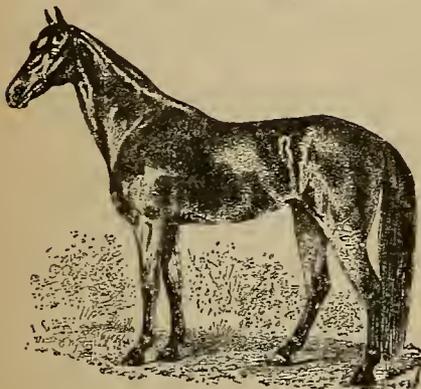

With little training when four years old, Silverheel showed three heats inside of 2:40.

TERMS.

Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

SACKRIDER & CHISHOLM.

Hambletonian Trotting Stallion

**BOB MASON**

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American star), Belle Mason by Belmont (Williamson's), first dam Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

CHARLES J. ELLIS, Owner.  
WM. DONATHAN, Agent.

The Trotting Stallions

**Baywood and Fleetwood**

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

**BAYWOOD**

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover.

Sired by Nutwood; first dam by Geo. M. Patchen; second dam by Champion; third dam by Belmont.

**FLEETWOOD**

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model a perfect horse; high life, fine style and action, and looks like thoroughbred.

Sired by Nutwood. First dam Copper Bottom Mare, by Young American; second dam the Tillotson Mare; pedigree unknown but she was reported to have been bred in Kentucky.

Terms. \$25 for the season, or \$40 to insure.

E. S. SMITH, San Jose.

THE ELECTIONER STALLION

**STANFORD**

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

Terms.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioner, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioner.

First dam, Annie Lanrie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), he by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont.

Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred, Dam of Dave Hill by Vermont Hambletonian.

Dam of Red Lion by Vermont Hambletonian.

J. J. FAIRBANKS, Agent.

Oakland, January 18, 1

The Trotting Stallions

Will make the season of 1884 at

**Oakland Trotting Park,**

Commencing February 1st and ending June 1st.

TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. One care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallas, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:22 1/2), by Manbrino Chief; second dam by Potomac; third dam by Saxe Wiemar.

Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

Monroe Chief, 2:18 1-4.

Two-mile record, 4:36.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Manbrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performances, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address  
JOHN A. GOLDSMITH,  
OAKLAND TROTTING PARK.

The Trotting Stallion

**BRIGADIER.**

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

February 23, 1884. J. R. McDONALD.

2:20 1-4.

The Fast-Trotting Stallion

**ANTEEO.**

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONER.

First dam, Columbine, by A. W. Richmond.

Second dam, Columbia, by imp. Bonnie Scotland.

Third dam, Young Fashion, by imp. Monarch.

Fourth dam, Fashion, by imp. Trustee.

Fifth dam, Bonnets of Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley.

Eighth dam, by imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus.

Eleventh dam, by imp. Monkey.

Twelfth dam, by imp. Silvereye.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteeco ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20 1/4, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,  
M. ROLLINS, Agent,  
Santa Rosa.

**MAMBRINO WILKES.**

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christiana by Todhunter's Manbrino, son of Manbrino Chief. Second dam by Pilot, Jr. Todhunter's Manbrino son of Manbrino Chief, his dam Ripston's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,200 pounds), combining the Hambletonian and Manbrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:20 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prepotent sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew stable, STOCKTON, and L. M. Morse's near LODI.

Terms.

\$40 for the season, or \$25 single service.

This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

A. L. WINDS, Agent.

The Trotting Stallion

**STEINWAY,**

With two-year-old record, third heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

Terms.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

**Cook Stock Farm, Danville, Contra Costa County,**

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of America's & Noble's, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Strathmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31 1/2, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Claus, 2:17 1/2; and Tucker, 2:19 1/2; Chestnut Hill, 2:22 1/2; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28 1/2; Henderson, 2:28; Strathlan, three-year-old, 2:29 1/2; and Stuart, three-year-old, 2:28. Stuart is full brother to Belnor, who trotted a mile in 2:52 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2, is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23 1/2, and he in turn got Governor Sprague, record 2:20 1/2; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harrie Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

Performances.

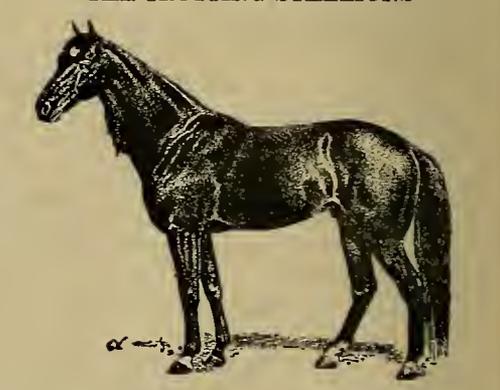

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbena, Admiration, Mystery, in 2:39, 2:32, 2:31 1/2. Memento won the first heat. As three-year-old, at Sharnsbury, Ky., August 6th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30 1/2, 2:30 1/2, Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchy and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:28 1/2, 2:23 1/2, 2:26 1/2, but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

Address

GEORGE WILEY,

Cook Farm, Danville, Contra Costa Co., Cal.

THE TROTTING STALLIONS

**SINGLETON AND LA HARPE.**

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO JULY 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Manbrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Busiris, thoroughbred (No. 573). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:45 1/2) by Flaxtail, son of Prudent's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Leffler's Consul, by Schepper's Consul.

La Harpe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

**LA HARPE**

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,184 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Manbrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star, son of Platt's Western Star by Blacknose. 1st dam by Bonaxers, 2nd dam by Gallatin (1881). La Harpe's dam Prairie Bird by Flaxtail (dam of Flight, 2:23, and Prompter, 2:33), 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Leffler's Consul. Irwin's Tuckahoe by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

TERMS.

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash.

Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

J. T. McINTOSH, Box 60, Chico, Cal.

FIRST

ANNUAL SALE

Fine Trotting Stock.

Harness, Carriage and Work Horses.

RANCHO DEL PASO (J. B. HAGGIN.)

COMMENCING FRIDAY, May, 16th, 1884.

At 1 o'clock P. M., and continuing until finished. Rancho del Paso is five miles from Sacramento, on the Central Pacific R. R. Catalogues and all necessary information may be obtained upon application at the Ranch, or to the undersigned.

KILLIP & CO., Auctioneers, 116 Montgomery Street, San Francisco.

FAIRLAWN, 1884.

TENTH ANNUAL CATALOGUE

Now ready for distribution. Contains descriptions and pedigrees of 252 head of High-Bred Trotting Stock now at Fairlawn. Will be sent free to all applicants who enclose 3 cents in stamps to prepay postage.

25 HIGHLY-BRED BROOD-MARES,

Bred to the Fairlawn Stallions, and

130 HEAD OF VERY PROMISING YOUNG STOCK,

Consisting of Young Stallions, Fillies and Roadsters, are offered at Private Sale.

THE ONE PRICE PLAN Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person. All stock sold on orders can be returned if they do not come fully up to the descriptions given.

The Stallions in use at Fairlawn are

ALMONT 33.

Represented in the 2:30 list by 24 performers, with records ranging from 2:15½ to 2:30. Limited to 20 approved mares at \$300 the season.

HAPPY MEDIUM 400.

Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season.

ABERDEEN 27.

Having ten of his get with records ranging from 2:15½ to 2:27½. Limited to 40 mares at \$150 the season.

ALECTO 2548.

By Almont, out of Violet, by Rysdyk's Hambletonian. Limited to 30 mares at \$50 the season.

STARMONT 1526.

By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season.

Ethan Allen, Jr., 473, used as a Private Stallion.

The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 2:30 list. The sons of each of these stallions are siring trotters. Almont has six different sons that have sired 2:30 trotters. Mares failing to get with foal can be returned in 1885 free of charge. For further information, and catalogue containing full particulars, address

Lock Box 392.

WM. T. WITHERS, Lexington, Ky.

ASHLAND PARK TROTTER STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address B. J. TREACY, Lexington, Ky. 2-1751

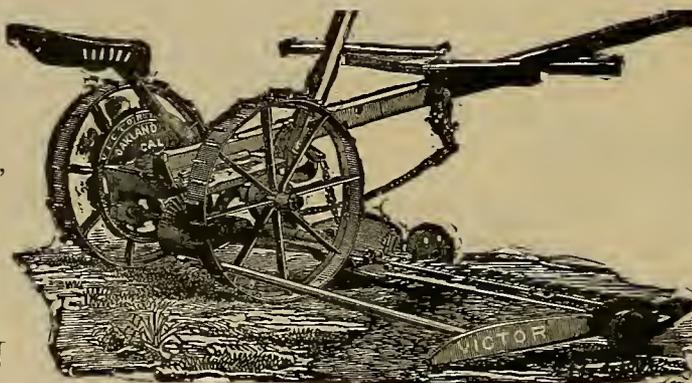

KERR'S ASTHMA CURE

Cures Asthma, Bronchitis, Throat and Lung affections, Coughs, Colds, Quinzy, Sore Throat, Soreness in the Chest or Lungs, Weakness in the Back, Pains in the Back, Bowels, Sides, Colic, Cramp, Pneumonia, Measels, Whooping Cough and Indigestion. It beats the entire system. Pleasant tasted as ice cream. For sale by all druggists. Price, 50 cents and \$1.00 per bottle. Post-office box 1870.

NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, MAY 17, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

## The Oakland Trotting Park.

The accompanying map shows the land that is offered by Mr. Wiard for sale, and for which Charles McLervy holds a bond which runs until the first of July next. The conditions are as follows:

WHEREAS, it is manifested that under individual ownership the property known as OAKLAND TROTTING PARK will be sold in lots, and fair-ground and track broken up. And realizing the importance to the farming and breeding interests of this coast that it be retained for those purposes; therefore, we, the undersigned subscribers, agree to pay the sums set opposite our names on the following conditions: The purchase of so much of the Wiard property in Oakland township, Alameda county, California, as lies between Horton street and the east line of said property, containing sixty acres, more or less, and on which are the race-course and all the buildings, stands, stabling, sheds, pens, etc., which is known as the OAKLAND TROTTING PARK. The amount to be paid for the land and appurtenances to be eighty thousand dollars (\$80,000.)

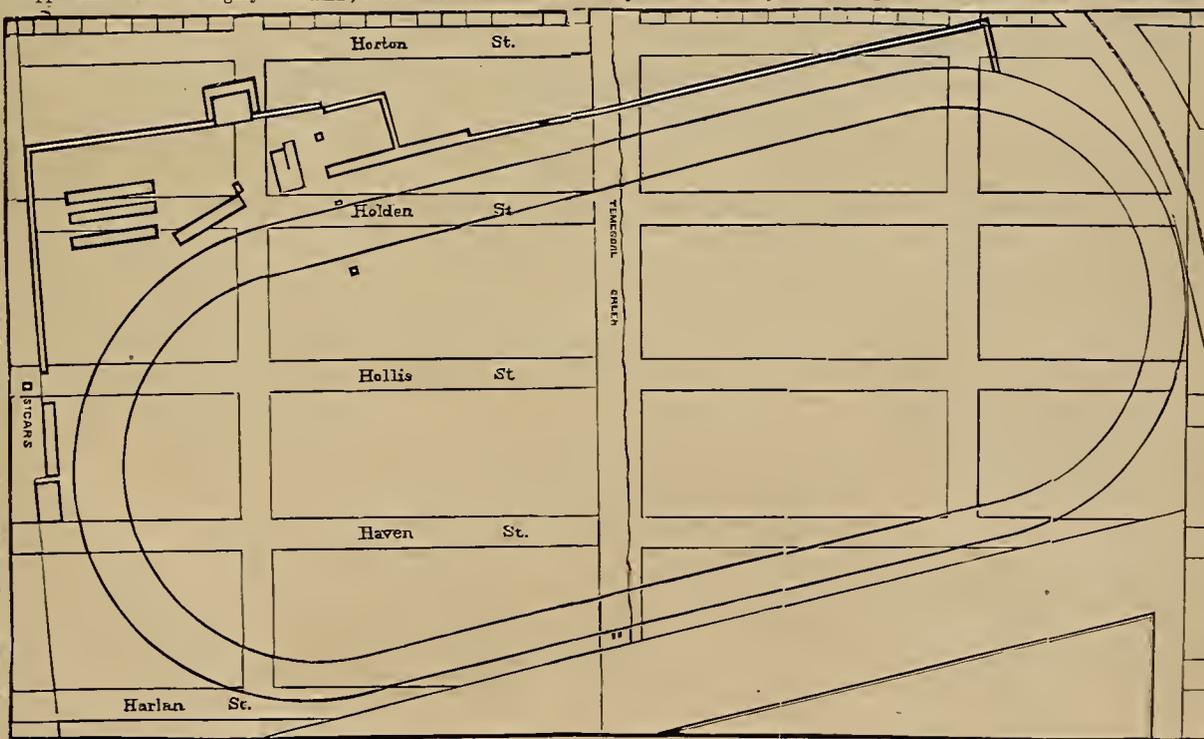

Twenty thousand dollars (\$20,000) to be invested in improvements as directed by the Board of Trustees. The property to be kept for a fair-ground and race-course for a period of at least ten years. That two thousand shares of stock be issued at the par value of fifty dollars (\$50) per share, and that the number of shares which any subscriber can hold to be limited to forty, unless it is found that it is necessary to increase the number in order to place the whole amount of the stock. Whenever one thousand or more shares are subscribed for, that a meeting be called to elect seven trustees who shall have the entire management of the affairs of the Association for their term of office, and until their successors are chosen. At this and subsequent elections each share shall be entitled to a vote, and at the first meeting held articles of incorporation shall be drawn, and the Association incorporated under the laws of California. The subscriptions to be paid as follows: Twenty-five per cent. within thirty days after organization, twenty-five per cent. more within sixty days after the first payment, and the remaining fifty per cent. whenever the trustees call for it.

The proprietor, E. Wiard, also grants the right of way from railway to Horton street, the bond covering that as well as the land described above.

It is almost a waste of space to amplify on the value of the sixty acres and improvements included in the bond. There is embraced in the area 186 lots, the least valuable of which is well worth \$750, the price based on the sale of adjoining lots. At this figure the lots will aggregate in value \$146,000, and the question is pertinent, why does Mr. Wiard offer it for a sum which is forty per cent. below its real value? This is easily answered. The improvements cost so much that to obtain the necessary funds the place had to be encumbered. Under the high rates of interest that prevailed in California the encumbrance kept increasing until at the present time there is a lien of \$68,000. Mr. Wiard has reached the "three-

score years and ten," at which age men are generally averse to active life, and in addition to the weight of years he is subject to attacks of sickness which incapacitate him for weeks at a time. Mr. Wiard owns the land lying between Horton street and the bay. On that is his residence and the picnic grounds at Shell Mound. With that clear he has no further trouble. The income will be ample for all his wants, and the property of value enough to leave a large fortune to his family. His great object is to bring his affairs into good shape as soon as possible, and he would rather sacrifice the amount he does in this transaction than endure the annoyances of delay. This, in brief, will be sufficient explanation of the causes which influence the proprietor to sell for \$80,000. In place of looking for a capitalist to engage in the venture, we have urged Mr. Wiard to grant time to make the endeavor to have it bought by an association that would ensure it being kept for a fair ground and race-course for at least ten years. We may as well

directly interested it has a bearing that is far-reaching, an influence which is felt from San Diego to Siskiyou. This is so apparent that there is little necessity for extended arguments, and in lieu of occupying space with what is self-evident, we will, in this article, devote the time to a consideration of the soundness of the investment. The map only shows the main features of the grounds, viz.: the Course, buildings, stabling, etc. Two blocks from Horton street is the railway, over which the overland trains run, and, what is of of greater importance to this project, the local trains from San Francisco to Berkeley. One of the stations, Shell Mound, is on Mr. Wiard's property a short distance to the west of Horton street and near the north line of the property. The right of way embodied in the bond is along a street that leads to a point near the hotel. This is only two blocks feet from the west line of Horton street, and when the improvements are completed this will be one of the main entrances to the

grounds. There are twenty-five trains each way per day from San Francisco to Berkeley, and whenever the races are of importance enough, and during the fairs, extra trains will be run. The time from San Francisco to Shell Mound is thirty-five minutes, fare twenty cents; monthly commutation tickets \$3.00. There can scarcely be a pleasanter short excursion than the trip affords, and the accommodations are so complete that no matter how large the crowd there is no inconvenience. On the south side is the Oakland gate, and to that the horse-cars run, the terminus being within a few

feet of the entrance. This line starts from Broadway and Seventh streets, where the Oakland local crosses, and connecting with that are four other lines of horse-cars. The streets which lead to the grounds from all parts of Oakland are fine drives, so that it is evident, from this short description, that the facilities for reaching the Course are as good as can be desired. Should fifty-thousand people desire to attend at a fair or race meeting from San Francisco and Oakland, in two hours they could be got there with little discomfort. Accessibility is of the utmost importance, in fact a necessity to a fair ground and race-course, and not only convenience of access, but it is absolutely essential that there be facilities for handling them expeditiously, and with as little annoyance as is possible. Within eight and a half miles of San Francisco, following the curves of the railway within two miles of the center of Oakland, by far the finest situation for building purposes contiguous to the bay there is on that side of the water, and as will be shown hereafter, with other great advantages which warrant the assertions that as a safe and profitable investment there is nothing in the real estate market in the vicinity to compare with this, or that gives the same opportunity for a certain return.

The importance of a track and fair ground at Oakland, to the whole of California, can scarcely be overestimated. Every breeder of fine stock in the State has an interest in sustaining it, and though the residents of San Francisco, Oakland, Alameda and Contra Costa counties are more

state that there are selfish motives in advocating the scheme. The ten years' residence in California has been in the neighborhood of the park. We have purchased a property that would not have been bought if the track were broken up. With the few colts we rear there would be little pleasure in comparison without a course to educate them upon. There is not a dollar of interest outside of this incentive, not a cent commission, as we make it a rigid rule not to accept anything that can be construed into a pecuniary recompense for which we write, that is outside the legitimate course of an independent journal. And in this connection it may be also proper to state that Mr. Wiard does not give a commission to anyone, and that that whatever is done in the way of soliciting subscriptions, etc., is voluntary, and without the bias of a money consideration from the proprietor. This statement is made to correct erroneous impressions that some have entertained.

All the improvements, which are worth at least thirty thousand dollars, are "thrown in." They are of that value at the closest calculation, and could not be replaced for a great deal more. The only thing necessary to make it complete as a first-class fair ground and race-course is an addition to the hotel, remodeling of the stands, gravelling the space in front of the buildings and in the yards, improvements on the roads in the vicinity, or rather the driveways on the premises, and a little adornment in the way of planting trees and shrubs. There are two hundred box-stalls with a large number of cattle stalls, pens, etc. The stabling is good enough, far better than on most of the eastern tracks. Temescal creek divides the land nearly equally, and runs parallel to the streets that are laid out about east and west. It is a deep channel and affords complete drainage on both sides. Every foot of land embraced in the bond is high and dry, a portion of it at least forty feet above the high-tide mark. The soil is rich, mostly a fine loam. The track is as good as the most exacting can desire, and is easily kept in order. Thousands of wagon-loads of manure, sand and sediment have been incorporated with the original soil, so that the harrow cuts it up without difficulty. There is a large well and tank near the hotel with horse-power attachment, and another large tank and well midway of the backstretch, a windmill being the agent to raise the water from well to tank. Plenty of water is indispensable in California to keep a track in proper condition, and there is no lack for that and other uses. Adjoining the railway and between that and the bay are the "Judson's Works," a description of which is appended, copied from the *Oakland Times*. This will be eventually the largest manufacturing establishment on the Pacific coast, and with other contemplated enterprises will give employment to thousands of men. This, of course, adds to the value of the property, and insures an increase of value which will be a steady appreciation, and without any reasonable doubt treble the value by the time that is fixed to place the lots in the market. Adjoining the eastern line of the property are the handsome residences of A. C. Dietz, Mr. Shepherd, Mr. Cogshall, Mr. Chamberlain, and others. There are no more attractive places in Oakland, and this also adds to the desirability of the property. In the paper of next week the scheme will be more fully elaborated.

The company consists of Egbert Judson, president; A. Chahot, vice-president; E. B. Morgan, secretary; Charles S. Chamberlain, manager; John Finn, assistant manager; George Wright, timekeeper; and F. C. McFeely, general and mechanical superintendent of the works. The board of directors are E. Judson, A. Chahot, Chas. Webb Howard, V. Moody, C. S. Chamberlain and J. H. Haste.

The works were erected in June 1882, and since that time the labor accomplished is wonderful. There are now between 380 and 400 men constantly employed in the various departments, and judging from the improvements being made and new enterprises under way, more men will be required. With the desire of going through the various departments for information the *Times* representative called at the works yesterday and was kindly received by Superintendent F. C. McFeely, who courteously showed him over the establishment, explaining the purposes and uses of all interesting features about the place.

The first department was the machine shop, where the foreman, R. B. Villego, presides over forty-three mechanics. All the tools and machinery used in this establishment are made in this room, besides this, large orders for work for outside parties are filled. The place presents a busy scene; mechanics working at lathes, planes, drills and numerous other machines, while overhead pulleys, belt and shafting for furnishing power, together with the hammering and filing, made a most deafening noise.

Proceeding next to the mowing machine room another busy scene is to be seen. The foreman, L. D. Royce, has twenty-five men under his charge in this department. The company are manufacturing the Victor Mower principally. As soon as the castings are ready they are taken from the foundry to this room, filed, dressed in proper shape, and the mowers then put together. There will be at least 1,500 mowers turned out this year. This pattern of mower has taken premiums at five different exhibitions. As soon as they are put together they are then taken to the paint shop where a force of paint and brush artists, under John A. Bartmann, put the finishing touches on before putting them on the market. There are now over 100 mowers on the two floors of the paint shop, almost ready for sale. The pattern of a Victor Reaper is now in progress, and the new machine will be tested this coming harvest.

The foundry, Henry Bayle, foreman, is as interesting in detail as any of the other departments. Four to seven tons of castings are turned out daily. All of the different parts of the mowing machines and machinery for the shops are cast here, besides large quantities of special work for outside parties. The casting of the rolls for the rolling mill is a specialty. Another special feature is the making of pulleys for the foundries over the bay. This foundry has the credit of casting the largest pair of shears in the United States. Their weight is upward of 19 tons and they are used for chopping iron into suitable sized bundles for the furnaces. The iron is melted in two cupolae that are kept at an intense heat all the time. Two elevators raise the iron to the cupolae. Behind the cupolae is a yard in which is stacked tons of pig iron. Handy to the cupolae is a large gang of men and boys at work making molds from patterns of different designs. When everything is ready the molten iron at a white heat is drawn from the cupolae and emptied into the moulds where it cools. The foundry has turned out several large semi-steel gear castings for the rolling mills; those that came with the engine were found to be too light, bursting after being used a short time. Close to the foundry is a separate engine attached to the blower that makes the blast or draft for the furnaces.

Superintendent McFeely next led the way to a dingy and dusty room in which appeared to be only a mess of old trash and rubbish. "In this room," said he, "are many thousand dollars worth of patterns. They are kept here to be out of the way but they are of great value."

The next place visited was the scrap-iron yard. Here a pile of scrap iron the size of a one-story cottage was piled, and at the base several men were sorting the metal. Scraps of old sewing machines, links of ship's cables, hinges, horse shoes and odds and ends of everything that iron is used for could be found, amounting in weight to many thousand tons. To the question as to where all this comes from, Mr. McFeely answered: "It comes from every place. Considerable is gathered in this State, sold to junk stores and old iron mon-

gers, but the most of it comes in ships es hallast from different parts of the world. Come this way and see the big shears before mentioned and watch them chew iron. They will cut iron from one to six inches in diameter."

Passing into the rolling mill, over which Mr. N. Boregard is superintendent, the shears can be seen at work. As fast as the scrap iron is brought in from the yard, a man takes it up and feeds it between the shear blades, that cut it like so much straw. These reduced scraps are then done up in bundles weighing from 300 to 900 pounds. These bundles are then put into furnaces, that for heat rival the old theory of a bad man's hereafter. As soon as they are brought to a white heat they are taken on "buggies" to the rollers. The molten bar is passed through a groove in the roller that compresses and makes it longer. On being caught on the opposite side by a pair of cranes, it is then pushed back through a smaller groove, and so on till it has been reduced and lengthened to the proper size.

It is then taken out to cool and be used later. These rollers turn out anything in size, from one-fourth to four inches in thickness. A large 125-horse power engine furnishes the power for driving the rolls. It is on this that the large semi-steel gears, before mentioned, are used. Two large feed pumps of Dow's make pump the water for the boilers.

The nail and tack factory was the next attraction. It is under the supervision of Mr. G. P. Clapp, who with all the tack makers came from Montreal, Canada, for this department. This is an industry of itself. Tecks of all sizes and nails of every kind are turned out by the kegful. The *modus operandi* of making tacks and nails is as follows: Plates of iron rolled in the rolling mill into the desired size are again cut into strips of a suitable dimension. These strips are fed by boys and girls into machies. Of the process it has been said "a strip of iron goes in one end and comes out of the other all cut up into tacks or nails." After being cut and sorted the nails and tacks are put in a vat and blead. After this they go to the weighing and packing room where the tacks are put in packages known to commerce, and the nails in kegs and boxes. There are at present over fifty teck and nail machines in active operation. The company have erected a large building, 90 feet front by 200 feet deep, that is to be used for the tack factory. It will be complete this month, and with the new machinery to be added seventy-five teck and nail machies will be in full operation. When the company started it was expected that eight machines would be sufficient. A 100-horse power Wheelock patent engine will furnish power for the machines in this building.

One of the most important features of this department is the making of horse-shoe nails. The roller plates from which this kind of nail is made are rolled with a raised or bulged edge which forms the head of the nail. After the neils have been cut they are again put through another machie, fed by girls, which finishes and points the nail. In the new building a room has been made which will be devoted to the manufactory of horse-shoe nails exclusively.

The manufactory of files is another industry of this enterprising company. This tool has to be forged, annealed, ground, cut and finally tempered before ready for the market. Mr. Edmund Atwell is the Superintendent of the forging room. Here a large Bradley hemmer worked by steam performs the work of a dozen men in hammering the embryo file. From the hemmer it passes to the stone. These stones are the size of ordinary cart wheels, and in their rapid revolutions a stream of sparks fly from the metal notwithstanding the stream of water flowing over the stone. Cutting the file is an interesting operation. The tool is placed in a movable vise. This vise slides under a chisel operated by steam also, and as the file advances under it the chisel strikes down rapidly leaving a deep impress at every stroke. The tool then receives its final tempering and is put up in pasteboard boxes bearing the name of "Judson File," under a picture of Mr Judson.

The department where patterns of the different castings are made is under the charge of Mr. J. D. Wheelock. These are all made of wood. Mr. Wheelock is now at work on the pattern of a monster hammer that will weigh, when cast, about forty tons. The anvil alone will weigh ten tons. The hammer will be sixteen inches in diameter with a forty-eight inch stroke. There are six pattern makers at work all the time.

The room where all the work is done is under the charge of Mr. John A. Foster. During the past months a force of twenty-five have been at work making the wooden parts of the mowers and boxes for shipping manufactured goods. Besides this all of the wooden work about the building is turned out of this department.

The shipping and ware rooms are under the charge of Mr. Eadon. The manufactured articles from the numerous departments are kept here either in storage or waiting to be shipped. Stacks of nails in kegs and mowing machines fill this large warehouse nearly to the roof.

In the same enclosure with the Judson Manufacturing Company is the California Iron and Steel Company. This company has three large puddling furnaces for converting pig-iron into wrought iron. They have also four large annealing furnaces, and a sixty horse-power engine for running the works. From the boiler of this engine there is a pipe 70 feet long, that conducts the steam to the nail and teck factory of the Judeon works. This pipe is covered with asbestos material. Besides the puddling furnaces there are hot air furnaces for making steel castings. The building that encloses these works is 200 feet long by 50 feet wide. John Taylor is the General Superintendent.

Mr. John R. Whaley, of Cincinnati, has also joined "the great majority." As a prominent turfman Mr. Whaley has been before the country for many years, and was one of the organizers of the new organization opposite the Queen city, the Latonia Jockey Club. He and Mr. John Smith were familiar figures in the timing stands at Saratoga and elsewhere, and Mr. Whaley will be greatly missed among his friends and acquaintances, who are unanimous in speaking well of him. In fact, he was one of the few men who had few or no enemies, and during his long connection with turf matters John R. Whaley was always above suspicion and foremost in the crusade against evil-doers—the harpiee of the turf.

The chestnut mare imp. *Enone*, foaled in 1878, by Hermit dam-La Belle Helene by St. Albans, the property of W. L. Scott, Algeria Stud, Pa., died on March 29th of chronic indigestion. *Enone* fell in a race at the Mounmouth Course last summer, and had never been right since. She was by the great English Hermit, and was one of the only two Hermit mares in America, the other being Fair Barbarian, owned by Hon. A. Belmont, Nursery Stud, L. I.

Jay-Eye-See, Trinket, St. Julien, Clingstone, Phallas, Johnoeon, and probably Maud S., will meet this season on the race-track at Chicago.

## TURF AND TRACK.

### Dates Claimed.

Fresno Fair Association, Fresno, May 20th to 24th.  
Bay District Association, San Francisco, May 31st to June 14th.  
Sonoma County Agricultural Association, Santa Rosa, August 18th to 23rd.  
Thirteenth District, Marysville, Aug. 26th to 30th.  
Chico Fair Association, Chico, Sept. 1st to 6th.  
State Fair, Sacramento, Sept. 11th to 20th.

### His Grace, the Duke of Grafton.

The *Licensed Victuallers Gazette*, of London, on April 5th, contained the following history of one of the most prominent figures in the annals of the English turf:

During the earlier decades of the present century there was not a better-known figure on the race-course or in the hunting field than that of his Grace the Duke of Grafton. As the owner of the famous horse Whisker, who won the Derby in 1815, he would claim the foremost rank in the annals of the turf, but when he added to this that his Grace won the Oaks six times, and the Two Thousand Guineas five, to say nothing of the successes year after year at Newmarket, it is not too much to say that as a racing man his career is one of the most remarkable and successful on record.

George Henry Fitzroy came of a racing family, his great-grand sire Charles the Second was the first royal patron of the turf. Peppy tells us, under the date of May 22d, 1688, how the King, the Duke of York, and the Court were on the day at Newmarket at a great horse-race, and proposed great pleasure for two or three days. And again, in the March of the following year, how these Royal personages "set out for Newmarket, by three in the morning to some foot and horse-races, to be abroad twelve days." John Evelyn also records how he went to Newmarket "in a coach and six horse boxes," where he found the King and all the English gallants at their autumnal sports, and how the next day after dinner he went to Heath and "saw the great match run between Woodcock and Flatfoot belonging to the King and to Mr. Eliot, of Badchamber, many thousands being spectators." Every reader of English history knows that it was on the King's return from his visit to the famous course, in 1683, that the conspirators lay in wait at the Rye House to assassinate him. We do not hear that the son of Barbara, Lady Castlemaine, afterwards Duchess of Cleveland, inherited his royal father's racing proclivities, though his heir did.

The racing fame of the Graftons, however, began with the third Duke, the owner of the famous horse Whalebone. As a political character he has left his name upon some few pages of English history, but not favorably. Those familiar with the letters of "Junius" will remember that in all those virulent but brilliant epistles there is no man of the time, with the single exception of the favorite Lord Bute, who is so severely castigated by the fierce and merciless pen of the mysterious unknown, as the Duke of Grafton. "Sullen and severe, without religion, profligate without gaiety, you live like Charles the Second, without being an amiable companion, and, for ought I know, may die as his father did, without the reputation of a martyr." The Duke was said to greatly resemble his grandsire in person, as he certainly did in profligacy. His connection with the notorious Nancy Parsons was one of the scandals of the day. He drove her in the full glare of publicity to Ascot Races, sat beside her, and made love to her at the Opera House in the presence of his wife and their majesties, and put her at the head of his table to entertain his guests. Nancy affected piety and propriety, and would roundly reprove his Grace for swearing in her presence, and he would humbly beg her pardon. By and-by, however, he grew tired of his devotion, and the lady had to seek another lover. Ultimately, she persuaded Lord Maynard to marry her, and died a peeress of Great Britain. But whatever might have been his moral or political failings, as a sporting character he was eminently successful.

Enston Hall, his residence, could boast one of the finest breeding studs in the Kingdom, and he himself was an excellent judge of horseflesh, with a practical knowledge of everything appertaining to its training. By his mare Promise—whose dam was Julia, with a clear descent from the Byerly Turk and the Lord Protectors White Turk—and her progeny the Duke, is said to have realized at least £100,000. Tyrant, the Derby winner of 1802, was foaled at Enston. Tyrant was a grandson of Eclipse, and his father was the famous Pot-8-os who belonged to Lord Abingdon. How the son of the wonderful Eclipse came by such a plebeian name doth not appear, but every one has heard the story of the stable-boy, who, when desired to chalk the name over the coru-bin executed that phouetic masterpiece, which so tickled my lord's fancy that he never would have it written any other way. Waxy, another son of Pot-8-os, had won the Derby of 1793 for Sir F. Poole, and was afterwards bought by the Duke. Pope and Whalebone, sons of Waxy, won for him the Derby of 1809 and 1810. It has been said that half the Derby winners of the present century are descended from Pot-8-os; out of the long list we may select Touchstone, Orlando, Blair Athol, Hermit, Gladiateur, Caracacus, etc.

But it is time to return to that representative of the Graftons with whose name we began this article, and from whom we have been wandering all this time while recounting the doings of his progenitors. To commence once more, then, George Henry Fitzroy was born at Euston Hall, near Thetford, in Suffolk, in the year 1760, and was fifty-one years of age when he succeeded to the dukedom upon his father's death, which happened in 1811. During the old duke's lifetime we hear but little of him in connection with racing matters. For twenty-seven years he sat for the University of Cambridge, having been first returned for that constituency during the stormy election of 1784, when he had for his colleague the great William Pitt. Lord Fitzroy retained his seat until he was called to the Upper House as Duke of Grafton. After that event he seems to have retired from political life, and to have devoted himself entirely to field sports and the turf.

How enthusiastic a huntsman he was is illustrated by the following stories: One day, though an admirable rider, his horse stumbled in taking a fence, and threw his Grace into a ditch; close behind him galloped a young curate, who, hot with the excitement of the chase, instead of pulling up and giving the prosopate gentleman a hand, cried out, "Don't move, your Grace; keep still, and I'll clear you safe enough!" The next instant the curate was flying over fence and ditch, without casting a look behind, or thinking of anything on earth save Master Reynard and the hounds. It was not long before some others of the party came up and found the Duke pitching himself out of the slush and ducked in a very sorry plight. Thinking more of their patron than their sport, one or two sprang off their horses, and, having witnessed the curate's indifference, began to console with him upon that young gentleman's lack of courtesy and feeling. "I admire him for it," replied the Duke, quietly. "How, your Grace?" exclaimed the astonished toadies. "Certainly

he's a man after my own heart," he answered; "I should have done precisely the same thing had I been in his place. Stop to pick up a man when the game's in sight! He doesn't deserve the name of a sportsman that would do that. If he'd stopped to look after me, I would never have given him my patronage; now he shall have the first living in my disposal, that falls vacant." The eycophants looked rather crestfallen, and probably resolved that his Grace might wallow like a rheumatic frog in duckweed till doomsday ere they would pull up to rescue him again. And the Duke was as good as his word, and the young clergyman did get the first living that fell vacant. Verily men do wriggle themselves into the good graces of fortune after many strange ways, but to procure promotion by allowing your patron to lie in a ditch, and risk knocking out his brains with your horse's hoofs, is certainly one of the strangest on record. Another young parson was not quite so fortunate. He had come down from London during the hunting season to stay at the Hall, with an eye to a living which was likely shortly to fall vacant. Although he had a very pretty seat for Rotten-row, he had very little experience in such reckless, rough riding as that practiced at Euston, and his first attempt settled his business. Master Reynard led his hunters a fine dance on that particular morning, taking them over hedges, gates, and ditches, and all manner of break-neck pieces. For a time the young man, though in great trepidation, kept up pretty well, but a five-barred gate, within an uneven swampy ground on the other side, was more than his courage was equal to. "Give her head; she'll do it!" shouted the Duke, who was beside him, as he took a flying leap over the obstacle. When the fox was run to earth, he inquired what had become of his clerical friend. "Parson showed the white feather; he wof afraid to mount the marsh gate," grinned one of the huntsmen. "Then, by G—he never mounts a pulpit of mine!" retorted his Grace. The Duchess and a favorite brood-mare were in an interesting condition at the same time, and the double event came off almost simultaneously. One day the Duke, who had been up to town, was returning across the Park, when a man ran up to him. "It's all over, your Grace," he said. "Thank heaven!" ejaculated my lord, his thoughts at once reverting to the thing uppermost in his mind. "Is she all right? What is it, a—?" "A boy, your Grace, and her ladyship is doing well." "Oh," said the Duke, with a disappointed look, "I thought you meant the mare."

In all matters connected with the stable the Duke had a most admirable adviser and colleague in his brother Lord Henry, and he gathered about him some of the best men of the time; for trainer he had Rohson, for riders John Day, William Clift, and Frank Buckle. He was the man who brought the first of these famous jockeys to the fore. It was in 1826, when John was a country lad that nobody made any account of, but the Duke's keen eye that was seldom mistaken in a horse or a mount saw there was good stuff in the young bumpkin, and to the astonishment of the knowing ones set him to ride Deviser for the Two Thousand and Problem for the One Thousand against Frank Buckle, who, at that time was in the Duke's service, and rode the favorite. Newmarket shook its head, thought his Grace had gone off his chump altogether, prophesied failure, and backed its opinion accordingly. It must have been a trying moment to the young lad when he saw Buckle preparing to go. "Something told me if I went first I should beat him," he used to say, "and I did. I got the first run, and I beat him. Then I won both races for his Grace. Then he sent for me, and I came to the door with my hat in my hand. 'Come in, John,' he said, and I went and stood on the mat. 'John Day,' says he, 'I'm going to make you a present for the manner you've ridden my horses this week. I'm going to give you £20 in bank notes.' Thank you, my lord, for your great kindness," I said, and he handed me the notes. It was a great present in those days, though afterwards I got as much as £500 for winning a single race."

The Duke's first success was with Music, whose sire was Waxy; he won the Oaks with her against nine starters. But this was entirely eclipsed by the event of 1815, when, as we have before stated, he won the Derby with Whisker, a foal of Waxy's, another of whose sons Blucher had come in first at Epsom in the previous year. On the dam's side Whisker was descended from Highflyer, and Prunella, the exploits of whose dam Promise have been previously referred to. For the great race of 1815 there were fifty-one subscribers, and thirteen starters. The *Druid* gives a most enthusiastic description of this famous horse. "He was as near perfection as could be, with the exception of being a little calf kneed." Referring to him as a breeder the same writer adds, "He seemed equally likely to get a racer, a hunter, machiner or hack. If a departed horse dealer, I wot of, had seen him, he would once more have dictated to his daughter as she sat pen in hand, 'The shadow of him on the wall is worth the money I axe for him. He can put up his feet and go and catch a bird.'" He was ultimately sold to a breeder in the north. Some famous sons came from his loins—Sir Hercules, Defence, Lapdog, Waverly, etc.

In that same year, 1815, Goodison, who had ridden Whisker, won the Oaks for the Duke on Mineral, a daughter of Waxy's, against a subscription of forty-eight, and a start of eleven. From 1819 to 1823 inclusive, the Duke carried off the One Thousand. Having lost in the following year he made up for the defeat by winning the same stakes the next three years in succession, with Fortune, Problem and Arah. He won the Two Thousand with Pindarie in 1820, with Reginald in 1821, with Pastille in 1822, and the latter in the same year, was the winner of the Oaks. In 1827, as we have seen, Deviser won the Two Thousand; in 1828 Turquois took the Oaks, and in 1831 Oxygen, splendidly ridden by John Day, won the same stakes. With this brilliant event the Duke's turf career ended.

Gov. Bowie's six-year-old gelding Crickmore by Catesby, dam Belle Meade, broke down while in work at the Ivy City Track, one day last week. He was bred by Gov. Bowie, of Maryland, and he was more or less a cripple since he won the Dixie, in 1851. As a two-year-old in 1850, Crickmore won three out of four races, the gross value of which was \$5,150. As a three-year-old he won seven out of thirteen races, worth \$16,925. As a four-year-old he only won three out of nine races worth \$1,350, his legs being in such a condition that it was impossible to give him sufficient work to keep him in a condition fit for such races he was most capable of winning, while last year, thanks to the skill of his old trainer Bill Bird, he was able to win each of the four races he started for, the value of which was \$3,485. He thus has a total of seventeen races won out of thirty starts, with gross earnings of \$26,910. Gov. Bowie owns a full yearling brother of Crickmore.

The London *Sportsman* says: "Donahue won his first race in this country on Mr. Pickwick, and is now entitled to a license from the Jockey Club, but we hear he was so disgraced with the hoodings of the crowd at his finish on Hopeful for the Riddlesdown Stakes that he has informed Mr. Walton of his intention to return to America on the 8th of May.

Racing in England—Busybody takes the One Thousand Guineas.

The racing featre at Newmarket, on the 2d, was the race for what is known as the One Thousand Guineas. Owing perhaps to the presence of such a "star" as Busybody, the field only numbered six in all, which included Sir John Willoughby's Queen Adelaide, Lord Bradford's Whitelock, the Duke of Westminster's Sandiaway, Mr. C.S. Lefevre's Wild Thyme and Tom Jennings' Legacy. Like the race the betting was confined to three, with Queen Adelaide much nearer the front than expected. The starting prices were 9 to 4 against Busybody, 5 to 2 against Sandiaway, 9 to 2 against Whitelock, 6 to 1 against Queen Adelaide, 14 to 1 against Wild Thyme and 50 to 1 against Legacy. Busybody won by a length and a half, with Whitelock a had third.

The seventy-first renewal of the One Thousand Guineas; a subscription of £100 each, half forfeit, for three-year-old fillies at 124 pounds each; the owner of the second to receive £200 out of the stakes; the third to save his stake. Rowley mile (1 mile and 17 yards)  
 Lord Arlington's b f Busybody, by Petrarcb—Spinaway, 124 pounds.....(T. Cannon) 1  
 Sir J. Willoughby's ch f Queen Adelaide, by Hermit—Adelaide, 124 pounds.....(Webb) 2  
 Lord Bradford's b f Whitelock, by Wenlock—White Heather, 124 pounds.....(Wood) 3  
 Time—1:47.

A two-year-old stakes was also run over the race-course at £10 each, half forfeit with \$100 added, colts to carry 122 pounds, fillies 119 pounds; winners 7 pounds extra. It had fourteen subscribers, of which five started. It was won by Mr. C. J. Lefevre's bay filly Radiense, by Hermit out of Romping Girl, with Mr. J. R. Keene's bay colt by Cremore out of Rustic Queen second, and Mr. W. M. Redfern's bay colt Tattoo, by Reverberation out of Doeskin, third. The betting was 11 to 10 against Mr. Keene's colt, 5 to 2 against Tattoo and 10 to 1 against the winner, who won by three lengths.

Busybody's success as above fully justifies the payment of \$800 guineas for her by Tom Cannon at Lord Falmouth's sale. For whether she carried the colors of Lord Alington or the Duke of Portland, or ran in the interest of Lady Stamford (several well-informed Englishmen, believing that the purchase was really made for the last named), she no doubt won herself nearly clear, notwithstanding the fact that she started so great a favorite. She was bred by Lord Falmouth, and cannot he well excelled from that standpoint. Her sire Petrarch is by Lord Cliften, and he won the Two Thousand Guineas, the Prince of Wales Stakes at Ascot, the Doncaster, St. Leger in 1876, and the Ascot Gold Cup in 1877. Her dam Spinaway is by Mascaroni, and she won the One Thousand Guineas, the Oaks, the Narsaw Stakes at Goodwood, the Yorkshire Oaks and Cup, the Doncaster Stakes and three other important fixtures at the Newmarket autumn meetings. As a two-year-old Busybody scored three wins out of four starts, viz., the Rous Memorial at the Newmarket first October, the Middle Park Plate at the second October meeting, when she beat Royal Fern and Queen Adelaide, and the Great Challenge Stakes at the same meeting, when she beat Despair, Tristan, Vibration and Hermitage. At the Houghton meeting, however, when carrying 128 pounds, she was beaten by a neck for the Dewhurst Plate by Queen Adelaide at 125 pounds, with eight others behind them—a performance which, in a measure, made Queen Adelaide the winter favorite for the Derby, so good was Busybody considered. Like all of Lord Falmouth's "cracks" Busybody is well engaged; the more important engagements are the Epsom, Grand Prize and Oaks; the Prince of Wales; Coronation and Hardwicke Stakes at Ascot; the Sussex and Nassau Stakes at Goodwood; Yorkshire Stakes and Oaks at York; the St. Leger, Park Hill and Doncaster Stakes at Doncaster, and several others at the Newmarket autumn meeting, a majority of which, barring accidents, she will no doubt win.

That Queen Adelaide should hold the position of favorite for the Derby nearly all winter is proof that she is a filly of more than common merit. Her breeding is equal to Busybody's, while as a winner of the July Stakes and Dewhurst Plate at Newmarket and the third for the Middle Park Plate were performances that were looked upon by her followers as second to no other two-year-old seen during the year.

As to Whitelock, she is also first-class in breeding and performances, she winning twice out of three starts in the Prince of Wales Stakes at Goodwood and a "walk-over" for a Post Stake worth £400 at the second October meeting.

The Marysville Fair.

The second annual meeting of the Thirteenth District Agricultural Society will open at Marysville on Tuesday, August 26th, and continue four days. The district comprises Sacramento, Sutter, Yolo and Yuba counties. The directors are J. W. Wilson, Sacramento; R. H. Walton and James Littlejohn, Sutter; Charles F. Reed, Yolo; D. E. Knight, A. D. Cutts, M. Marcuse and N. D. Coombs, Yuba; D. E. Knight president; T. J. Sherwood, secretary, Marysville.

Premiums amounting to \$2,000 will be offered for farming, mechanical and manufacturing exhibits; \$1,000 for live stock, and \$3,500 for speed and walking contests. There will be eight premiums for a ladies' equestrian tournament, and ten premiums for a pigeon-shooting contest. The speed programme is as follows:

- First day—No. 1. Trotting—Purse \$300; 3:00 class.
- No. 2. Trotting—Purse \$50; novelty contest, the horse trotting the nearest to four minutes to be declared the winner.
- Second day—No. 3. Trotting—Purse \$300; for three-year-olds.
- No. 4. Walking contest—Purse \$50; for double teams, and \$30 for single horses; to go in harness.
- No. 5. Trotting—Purse \$300; for four-year-olds owned in that and the third district.
- Third day—No. 6. Trotting—Purse \$300; for horses owned in the district that have not beaten 2:40.
- No. 7. Trotting—Consolation purse; \$250 for heaten horses.
- No. 8. Trotting—Purse \$200; for yearlings owned in the district; dash of one mile.
- Fourth day—No. 9. Trotting—Purse \$800; 2:22 class.
- No. 10. Trotting—Purse \$200; for two-year-olds owned in this and the third district.
- Fifth day—No. 11. Trotting—Purse \$400; 2:30 class.
- No. 12. Pacing—Purse \$250; free for all.

On the fourth day of the fair there will be a ladies' tournament, free for all in the district; entrance free. Entries to all the above races close with the Secretary August 9th, 1884.

Bootjack has fallen lame, and at the time when he was doing better than ever before. He had had a couple of very fast moves, and Rowe had begun to feel that if he could keep him up to the spring meeting he would be a better horse than last season.

Entries to the Chicago Summer Trotting Meeting.

**2:17 Class.**  
 Charlie Ford, gr g, by McKisson's Grey Eagle.  
 Clemmie G., ch m, by Magic, dam Ned.  
 Fannie Witherspoon, ch m, by Almont, dam Lizzie Witherspoon.  
 Modoc, ch g, by Aberdeen, dam by American Star.  
 Wilson, b g, by Geo. Wilkes, dam Miss Coons.  
 Edwin Thorne, ch g, by Thorndale, dam by Ashlaud Chief.  
 Phyllis, br m, by Phil Sheridan, by Tom Sayres.

**Open-to-all—Pacing.**  
 Richball, hr g, by King Pharoah, dam by Little Arthur.  
 Gem, h m, by Tom Rolf, dam Lady Gem.  
 Flora Belle, hr m, by Stucker Rainbow, dam by Tom Hal.  
 Buffalo Girl, b m, by Pocahontas Boy, dam by Tom Hal.  
 Fuller, b g, by Clear Grit, dam by Royal George.  
 Westmont, ch g, by Almont, dam Anna.

**2:40 Class.**  
 Dayton Belle, ch m, by Blue Bull, dam Lady Jackson.  
 Aladdin, h h, by Jay Gould, dam Lady Shipley.  
 Pullman, blk g, by Somonauk, dam by a son of Lexington.  
 Dainty, b m, by Dictator, dam Vic.  
 Singleton's Hambletonian, br h, by Willie Schepper, dam Annie Dean.  
 Nellie L., h m, by Geo. Wilkes, dam by Gill's Vermont.  
 George Sprague, gr h, by Gov. Sprague, dam Jennie.  
 Renegade, b g, by King Rene, dam by Belmont.  
 Garfield, h h, by Milwaukee, dam Minnie.  
 Judge Abbott, by Geo. M. Patchen, Jr., dam by Thomas Jefferson.

A. V. Pantlind, b g, by Hsmlet, dam Old Goodrich.  
 W. H. Sotham, br h, by Fisk's Hambletonian Chief, dam by Magna Cherta.  
 Revenue, h h, by Smuggler, dam May Morning.  
 Blanche Brown, b m, by Don Clay, dam by Campton's Denmark.

Martha Washington, br m, by Minelous, dam by Magnolia.  
 Lady Mont, b m, by Egmont, dam by Mambrino Chief.  
 Victoria, h m, by Dictator, ———.  
 Gladiator, Jr., blk, by Tom Patchen, dam by Kentucky Clay.

St. Denis, b g, by Blue Bull, dam by Shawhan's Tom Hal.  
 King Mitns, h g, by Woodford Pilot, dam Whirlwind.  
 Nettie Thorne, b m, by Thorndale, ———.  
 Windsor M., b g, by Windsor, ———.  
 Telephone, rn g, by Wood's Hambletonian.  
 Frank H., by Somonauk, dam by The Holmes Horse.  
 Eva, b m, by Geo. Wilkes, ———.  
 Stoughton J. Fletcher, b h, by Hambletonian Tranby, dam Pierce Mare.

**Five-year-old Class.**  
 Eva, b m, by Sultan, dam Minnehaha.  
 Lynwood, (formerly Billy Chinker), gr h, by Clinker, dam Belton Maid.  
 Alpha, blk m, by Alcantara, dam Jessie Pepper.  
 ———, b g, by Mambrino, Jr., dam unknown.  
 Alzath, b m, by Cuyler, dam Haroldine.  
 Endymion, blk h, by Dictator, dam Annie Eastin.  
 Code, b h, by Dictator, dam Crop.

**2:30 Class**  
 Billy R., b g, by Clay Pilot, dam by Seeley's American Star.  
 Belle F., b m, by Fisk's Hambletonian Star, dam by Magna Cherta.  
 Gus, b g, by Messenger Chief, dam a Canadian mare.  
 Mambrino Sperkle, b m, by Fisk's Mambrino Chief, dam by Sparkle.

Lady Wilkes, b m, by Geo. Wilkes, ———.  
 Will Collender, (formerly Jack Perego), br g, by Strader, dam Blossom.  
 Bertha Clay, blk m, by Harry Clay, ———.  
 Teemuseh, ch h, by Mambrino Gift, ———.  
 P. J. Purcell, b h, by Strader's Hambletonian, dam by Young Fox Hunter.

Urbana Belle, h m, by General Washington, dam Belle.  
 Farce, b m, by Princesps, dam Roma.  
 Wilkes Boy, br h, by Geo. Wilkes, dam by Membrino Patchen.

Jersey Lily, ch m, by Hambletonian Downing, dam by Rolla Seymour.  
 Toronto Maid, blk m, by Captain, dam Lady Mack.  
 Burns, br g, by Kirkwood, dam Eclipse Mare.  
 Lillie Dale, b m, by Alden Goldsmith, ———.  
 Mars, ch h, by General Sherman, dam by Superb.  
 Conpon, dn h, unknown.  
 Harry Pulling, hh, by Menelous, dam Bird.  
 Butterfly, b m, by Young Jim, dam Tanzy.

**2:27 Pacing.**  
 Grey Eagle Dau, gr h, by Bob Ray, dam by Kentucky Copperbottom.

American Boy, h h, by Pocahontas Boy, dam Dolly Yetter.  
 Lady Mack, b m, by Hambrino, dam by Tom Crowder.  
 Rover, rn g, by Son of Grey Eagle, dam a Cherokee mare.  
 Dennis, M., b g, ———.  
 Vasco, by Copperbottom, dam by Alexander's Abdallah.

Minnie R., h m, by J. C. Breckenridge, dam by Exchequer.  
 Frank W., dn g, by Bishop Berkeley, ———.  
 Juliet, h m, by Copperbottom, ———.  
 Gurgle, h m, by Pocahontas Boy, dam by Blue Bull.  
 John D., hr g, unknown.  
 Nellie Shaw, dn m, unknown.  
 Mattie Bond, h m, unknown.  
 Rostrever, gr g, by Davy Crockett, dam by Tom Crowder.  
 Backskin, dn h, by Red Buck.

**2:19 Class.**  
 Joe Bunker, gr g, by Geo. Wilkes, dam by American Star.  
 Ewing, h g, by Primus, dam Lady Washington.  
 George V., ch g, by Fisk's Hambletonian Star, dam by Magna Cherta.  
 Deck Wright, h g, by The Hinsdale Horse.  
 Tony Newell, b g, by Clark Chief, dam by Emery's Lexington.

Overman, ch g, by Elmo, dam by Billy McCracken.  
 Catchfly, b m, by Administrator, dam Cachuca.  
 Jewett, blk g, by Allie West, dam by Jno. Eunis.  
 Will Cody, b g, by Blue Bull, dam Celio.  
 Sleepy Joe, hr g, unknown.  
 Humboldt, h g, by Stocking Chief.

**2:17 Pacing.**  
 Fritz, gr g, unknown.  
 Limber Jack, h g, by Tom Hal, dam by Copperbottom.  
 Truro, b g, by Hamlet, dam thoroughbred mare.  
 Sailor Boy, rn g, by Smuggler, Jr.  
 Billy S., b g, by Corban, dam Nannie Abbott.  
 Eddie D., gr g, unknown.

**2:24 Class.**  
 Waiting, h g, by Lexington Chief, dam by Fisk's Mambrino Chief.

Brown Wilkes, br h, by Geo. Wilkes, dam Jennie Ervin.  
Alta, br m, by Almont, dam by Bourbon Chief.  
Milo, b b, by Milwaukee, dam Minnie.  
Longfellow Wbip, blk h, by Captain.  
Nobby, b g, by Knobby, dam by Sir Wallace.  
Prince, blk g, by Royal Revenge, dam Lady.  
Novelty, cb g, by Gooding's Champion, dam Minnie.  
Pancost, b b, by Woodford Mambrino, dam Bicara.  
Almonarch, bb, by Almont, dam High.  
Felix, b g, by Nntwood, dam by Abdallah Chief.  
Belle Ecbo, b m, by Ecbo, dam by Belmont.

**2:35 Class.**

M. Y. D. Colt, ch m, by Daniel Lambert, dam Fannie Jackson.  
Charlie West, cb g, by Allie West, dam Clayette.  
Lady Wilkes, b m, by Geo. Wilkes.  
Maud H., b m, by Richmond Boy, dam thoroughbred mare.  
Will Colclander, (formerly Jack Perego), br g, by Strader, dam Blossom.  
Singleton's Hambletonian, br b, by Willie Schepper, dam Annie Deau.  
Van, b g, by Aristos, dam by Commodore.  
Ed. Geers, b g, by Enfield.  
Renegade, b g, by King Rene, dam by Belmont.  
Belle S., b m, by Andy Johnson, dam Lady Jones.  
Princess, ch m, by Fisk's Hambletonian Star, dam Kate Hunter.  
Judge Abbott, h h, by Geo. M. Patchen, Jr., dam by Thos. Jefferson.  
Charlie G., ch g, by Almont, dam by Denmark.  
Misfortune, gr m, by Chancelor Morgan, dam Black Snake.  
Henry Clay, b g, by Patton's Henry Clay.  
Stongton J. Fletcher (formerly Coupon), b b, by Hambletonian Tranby, dam Pierce mare.  
Tom Rolf, b g, by Tom Rolf, dam Obarlette.

**2:35 Pacing.**

Planter, gr g, unknown.  
Gypsy Girl, b m, unknown.  
Frank S., gr g, by Tom Brown, dam by Davy Crockett.  
Addie M., rn m, by Tackahoe.  
Dennis M., b g, unknown.  
Detraitor, blk h, by Gossip.  
Lochinvar, br h, by the Brooks Horse.  
Minnie R., b m, by J. C. Brickeuridge, dam Exchequer.  
Gurgle, br m, by Pocahontas Boy, dam by Blue Bull.  
Patsy Clinker, gr g, by Clinker, dam Copperbottom mare.  
Scott Newman, gr g.  
Golden Prince, cb g, by Golden Bow.  
Lytleton, b g, by King Pharoah, dam a thoroughbred mare.  
Mattie Bond, b m, unknown.

**Three-Minute Class.**

Maggie Kuox, ch m, by Oceana Chief, dam Molly Bann.  
Aladdin, b b, by Jay Gould, dam Lady Shipley.  
W. H. Sontam, br b, by Fisk's Mambrino Chief, dam Backus mare.  
Martha Washington, br m, by Mendaus, dam by Magnolia.  
Reindeer, blk g, by Black Bassenger, dam Helen.  
Banner Chief, b g, by Legal Tender, dam Washella.  
Revenue, b h, by Smugler, dam May Morning.  
Blanche Brown, b m, by Don Clay, dam by Campton's Denmark.  
Victoria, b m, by Dictator.  
St. Denis, b g, by Blue Bull, dam by Shawhan's Tom Hal.  
King Mirus, b g, by Woodford Pilot, dam Whirlwind.  
Windsor M., b g, by Windsor.  
Telephone, rn g, by Wood's Hambletonian.  
Eva, b m, by Geo. Wilkes.

**2:22 Pacing.**

Chestnut Star, ch h, by Old Red Buck, dam by Tom Crowder.  
Fritz, gr g, unknown.  
Billy M., b g, by Clear Grit, dam by St. Lawrence.  
Tenro, b g, by Hamlet, thoroughbred mare.  
Bessie M., blk m, by Pocahontas Boy.  
Kimball, b m, unknown.  
Nellie Shaw, dm m, unknown.  
Daisy D., br m, by Black Steer.  
Rostover, gr g, by Davy Crockett, dam by Tom Crowder.

**2:22 Class.**

Lynwood (formerly Billy Clinker), gr h, by Clinker, dam Belton Maid.  
May H., ch m, by Chicago Volunteer, dam by Plow Boy.  
Robin, gr g, by Enfield, dam Mary Weaver.  
Mambrino Sparkle, b m, by Fisk's Mambrino Chief, dam by Sparkle.  
Mambrino Sotham, blk b, by Mambrino Gift.  
Brown Wilkes, br h, by Geo. Wilkes, dam Jennie Ervin.  
Maybird, b m, by Jimmy.  
Billy R., h g, by Clay Pilot, dam by Seeley's American Star.  
Frank Landers, br h, by Saddle Buck, dam Roanie.  
Tecumseh, ch h, by Mambrino Gift.  
Adelaide, b m, by Milwaukee, dam Minna.  
Baby Mine, rn m, by Stone wall Jackson, dam by John Edwards.  
Prince, blk g, by Royal Revenge, dam Lady.  
Corbin's Esbaw, cb h, by Amboy, dam Black Maria.  
Minnie Warren, ch m, by Night Hawk.  
Allegheny Boy, rn h, by Wood's Hambletonian.  
Nora Temple, b m, by Belmont, dam Bland Temple.  
Westmont, b h, by Col. West, dam by Mambrino Sherman.  
Elvira, blk m, by Cuyler, dam Mary Mambrino.  
Endymion, blk h, by Dictator.  
St. Gothard, b h, by Geo. Wilkes, dam by American Clay.  
Index, h g, by J. R. Reese, dam Rosabelle.  
Lizzie M., b m, by Thomas Jefferson.  
Code, b h, by Dictator, dam Crop.  
Lee W., b g, by Bonbon Blue.  
Russ Ellis, b g, by Bacon's Ethan Allen.  
Little Miss, b m, by Goldsmith's Abdallah.  
Billy Boy, b g, by Mambrino Temple.  
Doctor Frank, ru g, by Blue Bull.

**2:21 Class.**

Ewing, b g, by Primus, dam Lady Washington.  
St. Cloud, b g, by Conklin's American Star, dam by Bay Richmond.  
Longfellow Wbip, blk h, by Captain.  
Zoe B., b m, by Blue Bull, dam of Mila C.  
Phil. Thompson, gr g, by Red Wilkes, dam by John Dilard.  
Ino, b m.  
George Sprague, gr b, b Gov. Sprague, dam Jennie.  
Lillian, ch m, by Almont, dam Lily Shields.

Messrs. Loudon & Bell, from New Zealand, have purchased several thousand acres of land in the Yakima country, W. T., where they will engage in growing blooded stock, horses, cattle and sheep. It is said they represent a capital of \$1,500,000.

**Portland Driving Park Racing.**

The following are the entries in the Portland, Oregon, Driving Park Association's summer meeting, which commences July 9th, and continues three days.

Wednesday, July 9th.—Trotting; free for all three-year-olds or under, 3 in 5. Purse \$300.

J. L. Hallett, bf Almonette by Altamont, dam by Post's Hambletonian.

Jay Beach, h c Oneco by Altamont, dam Belle Price by Doble.

J. T. Apperson, blk f Black Bess by Rockwood, dam Kate by Paul Jones.

J. Sorenson, ch f Susie S. by Hambletonian Mambrino, dam Bellfounder Girl.

Same day.—Trotting, 2:40 class; purse \$300.

John Harkins, rn f Cora H. by Kisber, dam by Pathfinder.

L. B. Lindsey, b m Dora, breeding unknown.

O. Smiley, blk h Black Hawk by Rockwood, dam the Fisher mare by the Jackson horse.

A. C. Bray, b g Melrose by Sultan, dam Fanny by California Ten Broeck.

J. R. Sawyer, ch h Billy Reed by Antocrat, dam by Henderson's Emigrant.

Jay Beach, bf Venita by Almont, dam Tecora by Cassins M. Clay, Jr.

J. L. Hallett, Kitty Lynn, by son of Pathfinder, dam by Vermont.

Second day, Thursday, July 10th.—Trotting; free for all two-year-olds or under; purse \$200.

J. L. Hallett, b c Cadet by Graduate, dam by Altamont.

J. T. Apperson, br c Harold by Rockwood, dam Kate by Paul Jones.

L. B. Lindsey, ch c Style by Del Sur, dam by (California) Ten Broeck.

Jay Beach, blk f Coqueta by Altamont, dam Tecora by Cassins M. Clay, Jr.

J. Sorenson, bf Lady Mand by Rockwood, dam Lady Clark by Kisber.

Third day, Friday, July 11th.—Trotting, 2:50 class; purse \$250.

John Harkins, rn f Cora H.

L. B. Lindsey, b m Dora.

J. Sorenson, ch f Susie S.

A. C. Bray, s g Sunset by Geo. M. Patchen, Jr., dam by Belmont.

J. L. Hallett, b m Kitty Lynn.

O. Smiley, blk h Black Hawk.

L. B. Lindsey, bh Decoration by Kisber, dam by St. Louis.

L. P. W. Quimby, gr g Granite Grey.

Same day.—Trotting, 2:32 class; purse \$300.

M. A. Rniter, b g Jobny Blue by Alexander.

A. C. Bray, b g Melrose.

Jay Beach, b h Altamont by Almont, dam by Brown Chief.

Jos. Bnebtel, cb m Florence E. by Pathfinder, dam by Jack Miner.

L. B. Lindsey, b m Dora.

**Walton Wants the Derby.**

From recent mail advices it appears that "Plunger" Walton intends to fly at the highest game on the English turf. In other words, he is aiming for Derby hours with his new purchase, Richmond. Speaking of the price paid for the son of Bold Dayrell, the *Sporting Chronicle* says: "The price paid by Mr. Walton for Richmond was £2,000 with certain contingencies." What Walton lost on the City and Suburban is said to be £1,200 on Richmond, besides he "took 10,000 to 200 about Deceiver, and 1,000 to 8 twenty times about Griefe."

Richmond's running in the City and Suburban was the means of bringing him forward in the betting for the Derby. At Sandown on Friday (April 25th) 1,000 to 80 was hooked, while at the rooms in London on the evening of the same day 100 to 7 was offered and taken. Richmond is fairly well bred. He is by Bold Dayrell, late Wild Dayrell II, out of Miss Harriot, she by Kettle drum, out of The Doe by Trmns, her dam The Fawn by Venison. Bold Dayrell is by Wild Dayrell, out of Rosina, by The Emperor, which, if not exactly fashionable breeding, is good, and runs back in the famous winning families of half a century ago. What he looks like, and of his chances for the Derby, the *Sporting Life* says:

Richmond is a most conspicuously marked colt, and stylish all over. He will be easily recognized on Derby Day by the white star and patch just over his nose without notice of his white leg-markings. As to condition, he seemed fairly forward, leaving his judicious trainer something to work on with a view to essaying higher honors another day on Epsom Downs. Many rivals, however, bore signs of being more thoroughly wound up. In every race-horse some fault may be found, and Richmond's lies in a middle piece being too light to please the most fastidious, but otherwise whatever opportunity I had enabled me to take no further exception. One hook bears the traces of strong dressing, mayhap corrosive snblimate, which has thoroughly banished a curb, and surely a severe remedy, even if a slight blemish results, is better than a half cure. As to quality, Richmond shows as much almost as a fancy picture. His quarters are beautifully moulded, full of muscle, and well let down, his forehead stylish, length of rein being remarkable, and, what is of great importance, his limbs, which are well-formed, are strong enough, and to spare for carrying his weight. Altogether he may be snmmed up as a blood-like colt, lithe rather than thickset, but full of freedom, of the best manners too, and very sharp in getting away. Richmond certainly strikes me as worthy to rank among likely Derby colts, especially in this present generation, while further, he impressed good judges that he could stay when a free course to stride home was allowed him. The City and Suburban tells us nothing averse to Richmond's Derby claims.

The *Sporting Times* says:

Richmond is scarcely up to Derby form, but we believe that he is a good colt with which Walton some day will make the ring smart.

As to the City and Suburban, it says:

He had all the worst of the luck, and if he could have got through earlier he might possibly have won the race.

Billy Donohue won his first race in England on Walton's Mr. Pickwick, at Sandown Park on the 24th ult.

The late meeting of the Capital Turf Club demonstrated that the new track at Agricultural Park lacks firmness, and the loam of the surface will be braced up by an admixture of clay.

Dr. C. H. Mack, of Walla Walla, has sold to Dr. F. L. Town, Vancouver, the bay gelding Nelson, six years old, by Billy Nelson, son of Milliman's Bellfounder.

**Colt Exhibition at Dixon.**

EDITOR BREEDER AND SPORTSMAN:—Smuggler, Jr., (whose sire Smuggler has made the fastest record, 2:15 $\frac{1}{2}$ , of any trotting stallion in the world) was brought to the front with his family of colts on Saturday last, at Dixon, in competition for two prizes offered by W. G. Munion of Dixon (the owner of Smuggler, Jr.), for the two best colts. The judges were Messrs. Handley and Brinkerhoff, who awarded the first prize, a gentleman's saddle, to John Johnston for the best colt, and the second prize, a watch, to Mr. Maccreeary for the second best colt. There was a large gathering of stock-raisers, and horse-fanciers present, and they were unanimous in their expression that the exhibition was one of the finest ever shown in this State, showing clearly the ability of Smuggler, Jr., to stamp the character of his blood in his colts.

A LOOKER ON.

**An Echo up North.**

Charles Russell of Walla Walla has issued the following challenge:

"I will trot my colt Metropolitan, 3, against any colt, filly, or gelding of the same age now in Oregon or Washington, mile heats 3 in 5, to rule, over the Walla Walla Driving Park course, June 7th, 1884, for \$500 a side. Or, I will give a \$500 purse for three-year-olds to be trotted the same day over that track, if two or three others will enter."

Metropolitan is a son of Ecbo and was sold to Mr. Russell by Mr. Haggin. He has the best Oregon record as a two-year-old.

**ATHLETICS.****An Amended Definition.**

A meeting of the National Association of Amateur Athletes of America was held at Metropolitan Hotel, May 7th, and the following amendment to article 4 of the constitution, offered by Mr. Gilbert H. Badean of the Williamsburg Athletic Club, was unanimously adopted, so that article 4 shall henceforth read as follows:

"An amateur is a person who has never, directly or indirectly, competed for a staked bet, or for public money, or for gate money, or under a false name, or with a professional for a prize, or where gate money is charged, nor has ever at any period of his life directly or indirectly taught, pursued, or assisted at athletic exercise for money or for the purpose of obtaining the means of livelihood, nor has ever sold or pawned any prize received in any athletic event."

**Cross-country Run.**

Last Saturday, as announced, the Merion Cricket Club held the first cross-country run ever given on the Pacific coast, and, considering the inexperience of the participants and the poor character of the ground to pick a course from, the affair was a complete success. The run took place at Berryman station, Berkeley, from the Railroad Exchange kept by a gentleman who, having been a participant himself in former years "in the old country," took every pains to assist the club, and gave the boys the use of a large room to dress in, etc. There was not a large attendance of spectators, although with the representatives of the press and a few friends of the runners, including quite a number of ladies, there were enough present to put the boys on their mettle, and the result was a good exhibition, all of the contestants showing good form. Frances M. Day and A. B. Tenuant were the "hares," and at 4:08 p. m., they were started by Mr. W. G. Harrison, president of the club. Eight minutes later the "hounds," consisting of Messrs. B. A. and B. S. Benjamin, C. Creighton, L. Burnett, T. D. Davidson and C. B. Hill were called out, with Creighton acting as whipper-in. The scent once taken up was quickly followed, and led straight up the hill through bushes and swamps, and over rocks and creeks, around a rocky peak and back through fields abounding in gopher holes, to the starting point. Ben Benjamin, with the laudable idea of avoiding the swamps and brambles, made a short-cut to the peak and catching sight of the "hare" gave chase immediately, and reached home but a few moments later. The others stuck to the trail persistently after losing it several times, finally missing it hopelessly in the open (where as events proved the paper had given out), they made a straight run for home, arriving by different roads at almost the same instant of time, thirty-one minutes after the start. Much interest was manifested in the chase, and in response to many inquiries another will probably be held before long. It is to be hoped that this enlivening and healthy sport may be placed on a popular footing here.

**Professional Races.**

Last Sunday, at the Oakland Trotting Park, the long postponed 150-yards race, for a purse of \$500 offered by Mr. Allen the lessee of the grounds, took place before only a moderate attendance. Of the sixteen that had entered, eight only appeared to be satisfied with their handicaps. The race was run in three heats the winners each to run in the final.

First heat.—Kittleman (scratch) first in 14 $\frac{1}{2}$  seconds, Dnyrea second.

Second heat.—McIntyre (15 yards) first in 14 $\frac{1}{2}$  seconds; Thomson (15 yards) second; Woods (19 yards) third; the two latter were twice penalized for breaks. This race was very close; McIntyre's victory was unexpected and appeared to disgust the insiders.

Third heat.—Gibson (2 $\frac{1}{2}$  yards) first, Geary (9 yards) second, Ross (11 yards) third. Time, 14 seconds; but as this was from the pistol flash and Gibson was allowed 10 yards advantage thereof, the second does not stand for much.

Final heat.—Kittleman first in a beautifully contested race, time, 14 $\frac{1}{2}$  secs.; McIntyre a good second, Gibson three yards in the rear.

Previous to this race McIntyre and Ross had a match 100-yards heats, for \$250 a side. Ross took the first in 11 $\frac{1}{2}$  seconds, McIntyre the two following and the race in 11 $\frac{1}{2}$  and 10 $\frac{1}{2}$  respectively. No official timers were announced, and the above are as definite as can be obtained. The track may have been short. It is doubtful if McIntyre can run the full distance in the time credited to him.

The ten-mile foot race between Steele and Herbert, which was to have taken place at Blossburg for the professional championship of America, ended in a fizzle, owing to Herbert's refusal to run on account of the absence of the referee Steele ran over the distance in 54 min. 35 sec.

The Travis Diamond Medal Race, 100-yards Handicap, was won on the 7th of May, by M. W. Ford of the New York Athletic Club, from the scratch in 10 3-5 seconds, C. O. Tonsand, 7 yards, second. The race took place in the rain, but the track was in good condition.

The New York Lacrosse Club won the Aeltich's Cup, the emblem of the United States championship at Lacrosse.

**CRICKET.**

**Opening of the Cricket Season.**

The cricket season opened last Saturday with a match between the Occident C. C. and British Mercantile Marine. The Occidents were the first to handle the willow, but notwithstanding their strong array of batting talent were all out for the small score of 24, of which Carr is credited with 6. The bowling of the Marines was of only a moderate kind. Although it might be said that Felton, who is undoubtedly their best bowler, had a great amount of bad luck. The high grass all over the ground is in a great measure responsible for the small score.

The Marines were jubilant but for a very limited time, as Cookson and Waterman disposed of the whole team one after the other without a solitary run scored from the bat, and only two extras being obtained. The Occidents in their second essay compiled 78, and as time prevented more than five minutes batting for the Marines; the game resulted in a victory for the Occidents, by 23 runs. The catching of the Marines was unusually good.

A team of Philadelphia cricketers visited Pittsburg and defeated the local club by a score of 342 to 186. A. H. Stratford, of the Pittsburg team, compiled 109 runs in a faultless style, while J. A. Scott and Law (both of whom are members of the team shortly to visit England) scored 145 and 125 respectively, for the Philadelphians.

The principal feature of the athletic games of the Young America Cricket Club, held at Stenton, May 3d, was the defeat of Ford (N. Y. A. C.), in the running high jump by William B. Page of the University of Pennsylvania. Page cleared the beam at 5 ft. 9 in. which equals the best amateur record.

The Anstralian cricketers have arrived in England.

**FISH.**

**Walton Fishing Club.**

EDITOR BREEDER AND SPORTSMAN.—If, purchase, you have a vacant corner in your famous paper to cram this wee bit scribble in, I will promise not to trouble you again for some time, as I am about to take a trip inland, where, I am told, I shall be almost shent out from the world, so far as communication is concerned. The bright May morning, the 11th, was a glorious day with the W. F. C. Those that responded to the call were: Messrs. Klose, Muller, Bayle, Cummine, Horn, Barry, Dr. Hughes, Potter, Dixon, and McElhinny. Guests—Messrs. Raye, Harris, and Sberman. All on board the yacht Elia, we cast off at 8:30 a. m., bound for Alcatraz, and allowed to come in close quarters, as we were a bona fide club. Fishing there was only moderate. Again we set sail for Raccoon straits. During the passage it would have done your old heart good to have heard the yachting yarns from our friend Harris. Isle of Wight, Plymouth, Scarborough had their full measures, but devil a word about New York, or Sancelito. Friend Raye turned the conversation to the Sharon vs. Sharon case. Well, that was all right whilst it was permitted to last, but the weather was rather cold, and Major McElhinny invited all banda to the cabin to partake of a wee drap out of the little brown jug. It was really astonishing the effect that it had on the vocal talent, for no sooner had we reached the Cock Pit than McChristie struck up "My God we are nearer to Thee;" the Waltonian's joined in the chorus; the swell was fearful enough almost to make the rocks of Angel Island quake. So nice did their voices blend together, that Comrade Barry, (by the by it must be distinctly understood he has nothing to do with that famous bill now before the law-makers in Sacramento city, and will be known hereafter as babarie), proposed that we form a quartette from amongst the members of the W. F. C., and give a concert at the Grand Opera House for the benefit of the Y. M. C. A. We came to anchorage in a snug little bay off Potter's Point, were fish were in abundance, and the boys had a lively time. During all this time McElhinny was not idle. He was preparing to give us a grand enprairie on shore. The trumpet sounded up line; an account had to be taken. Major Klose received the gold medal, Mr. Horn the leather medal. The surprise we got on landing was, that instead of chowder we were led to a table bountifully supplied with everything in season, even to mince pies, which manager McElhinny must have used great judgement in giving his orders to the manufacturer. The inner man being well satisfied, an adjournment was made to roll amongst some new mown hay in the valley close to the beach. Songs, recitations, adventure, were fast and furious. John Bayle got

the cake for the biggest lie. Oh, it was a regular masher and worth a gold frame, but not for Joe. The boys all seemed to be so pleased with their new quarters that it was baptized in honor of their President, to be known hereafter as Dixon's Beach. On board, we set sail for Tibron, thence for Sancelito to Black Point, to South San Francisco. About ship for the S. S. Bell Rock, passed to leeward, the British flag was seen to be run up and down the flag pole, and was quickly answered by the dipping of the W. F. C. flag. Three hearty cheers was given for Capt. Dumbrick, responded to by his whole crew. Home again, all delighted with their day's pleasure. DINNER FORGET.

**How Salmon Spawn.**

On many occasions he has crawled to the river's edge and noticed their movements through a screen of grass, and has watched by the hour their rocket-like first rush at a shallow, and seen their headlong speed sober down until they have fallen over on their side thoroughly exhausted. A rest of a few minutes and the struggle would recommence; but the victory was always theirs, and no impediment which perseverance and patience for a fresbet could overcome would prevent their reaching the spawning beds which their instinct dictated necessary for their purpose, and to one of these spots we will follow them.

I have relatives whose farms are intersected by branches of a tributary of the Taw which are so narrow as to be only a boy's jump, and so shallow in places as would seem to make it impossible that salmon could pass; yet here in this season you can stalk up and watch a pair of fish in a little pool with barely sufficient water to hold them, and see them throw up the gravel, the male with his snout, and the female with her tail, until the depth of water is considerably increased, and quite a little mound of stones is forced up the side of the bank. The sex of the fish can readily be discovered by the difference in their movements, as the female always keeps her head up stream, and backs on to her work, while the male will frequently turn his head and go down stream, as if on the watch for a disturber of their peace, and then with one wag of his tail he is round and back at his work, or his pleasure, by the side of her he so jealously guards. That's how salmon spawn in Devon.—Fishing Gazette.

Another week passes without any particularly startling reports from our local anglers as to the catches of trout. The streams, however, are generally lowering and getting clear, though there are still some exceptions. In another week the bait can be discarded generally for the fly, and then the season may be said to have fairly set in. We hear of a number of gentlemen getting their traps ready for a week's excursion to their favorite localities. The report of the week comes from Sequel creek, Santa Cruz county, where a Mr. Grodhaus and friend caught 316 trout in one day, and not a good day for that fish either. Now, we know Sequel creek well, have fished on it from the paper mill upward; judging from our own experience, we are quite certain that out of this 316 there were not two dozen fish really fit for the table, or that could give any sport in catching. Peck's Sun says a rod has been invented, and is now ready for sale, that contains a clockwork register inside, something after the fashion of the street-car conductor's punch, that marks every fish caught and the weight of each fish. This is a grand invention, for every fingerling sharp and fish-story teller can be exposed at any given moment. It is heavy on our snide anglers and trout-stream marauders, but we hope the State Legislatures, as they have the power, will enforce the use of this rod all over the union. It would do more to save our trout and enable us to get true fish stories than anything we have yet heard of. We only fear the news is too good to be true.

Fish Commissioner Buckingham received a letter from Conatable Jones during the week, in which he stated that he had arrested ten more Greeks for violating the "Saturday-Sunday" fish laws. The officers came across twenty-three boats at day break Sunday morning, in Suisun bay, off Armory Point. Eight of the men pleaded guilty and were fined \$50 each. The other two are still in jail awaiting trial. The men are what are called pirates, and the fleet of boats contained 56 men, who belong to a desperate class, and who neither know nor care for the laws or those who administer them.

Four hundred dollars, half of which would go into the pockets of this splendid officer is a good day's work. It shows the harvest he would reap and the good he would do if he were sent on a cruise over the State, as we have often suggested. Sacramento river is a good place to protect from the robberies of these Greek pirates, but there are others quite as good, nevertheless.

Last week, Mr. John Millzner, of this city, a true disciple of the rod, met with an experience he is not anxious to repeat. A smart young friend told him he knew of some grand good trout streams, and if he liked, he would take Millzner, as a particular favor, to them last Sunday. These streams were said to be in the mountains east of Oakland, and easy of access. But, somehow, after wandering miles and miles until Livermore valley even could be seen in the distance, not one of the streams could be found. Late at night, after being lost in the hills and tramping some thirty-five or forty miles, Millzner by good luck reached Temescal, and his troubles were over. He never wet a line all day. During the week he has been dangerous to approach.

Few men among us get better catches every week than Ben Burline, but the inevitable pistol and bowie knife in view on his person keep interviewers off, and no one can learn his localities. We know he gets off the train at Fairfax and goes west into the mountains. On his last trip he was found alone, eating his lunch in a shady spot, by a fellow angler. After inquires, Burline told the stranger there was no fish right there, but if he would go above the falls he would make a good catch. The stranger went above the falls and caught nothing, not even a fingerling. Returning down the stream in disgust he found Burline had a good reel of nice fish. Moral, never ask a true trout-fisher for points on localities, but find them out by your own enterprise.

A halibut weighing 426 pounds, believed to be the biggest ever captured, was shown in New York last week. We have had, and doubtless still have, good halibut banks on this coast. The first was found off Crescent City, Del Norte county, some twenty years ago, but it was soon mercilessly fished out. Another was afterwards found off Victoria, British Columbia. This has been well preserved, and still gives the local market a good supply of this fine fish while ours has now none, or rarely any. Such is the difference between judicious preservation and piratical destruction. We have seen halibut in the Victoria market that weighed 147 pounds.

Barraonta fishing is now "all the go" at San Diego. A small party of fishermen in a boat caught ninety-three one day last week. Right good sport and good eating the barraonta make also.

**THE KENNEL.**

**False Pedigrees.**

EDITOR BREEDER AND SPORTSMAN.—In your last issue a correspondent who does not know the facts, undertakes to give the breeding of several dogs of local notoriety. He is all wrong. Singularly at variance with what he could easily have determined to be the truth about the dog he mentions. And his errors are dangerous, for the reason that the dogs he names have infused their blood into many descendants, whose owners, unless warned, might accept the statements of the correspondent as authoritative, and repeat them, to the obvious discredit of their own reputations among those who are well informed in our local dog lore. The correspondent makes the death of Willard's Bob his text, and credits the dog with an unusual degree of natural aptness, as well as the possession of some faculties hitherto unknown. He says Bob was "thoroughly broken to point". To point what? Birds, of course. How did he find the birds? or did he "point" only those birds which he could see? Probably Bob pointed his birds, because he recognized their presence through his power of scenting them, and the pointing was as instinctive as his early efforts to allay his hunger. Talking about "breaking a dog to point", is like talking about teaching the deaf to hear. If he has a good nose and is in health he will point his birds without breaking. If he has no nose, no breaking will enable him to point except at sight, and sight points are few in the field. The smattering knowledge of dogs and their workings which could prompt the correspondent to write so, makes it easy to understand his disregard of accuracy when he comes to write of the breeding of the dogs. The correspondent gives Bob's breeding, as by A. C. Titcomb's Sam out of Nellie, imp. There is no truth in this pedigree. Bob had no cross of Titcomb's Sem in him. About January of 1877, an old man of forgotten name brought into a gun store in San Francisco a red bitch and four puppies. The bitch was a pretty one, and the proprietor of the gun store bought her and the puppies for forty dollars. The old man knew nothing of her, except that she had just been taken from a Liverpool packet. He did not know her breeding, nor that of the puppies. One of the puppies was purchased by Dr. C. G. Toland, of this city, and raised by him. Another was bought by Mr. W. P. Willard, also of this city. Doctor Toland's bitch pup he named Whiskey, and she won first in the red pup class in the bench show of 1877, and first in the Irish setter bitch class at the show of 1881. Whiskey was never broken, but was reserved for breeding purposes. Mr. Willard raised Bob and placed him in the hands of a local hunter for breaking, and he proved himself a reasonably good dog. Let it be noted that Bob had absolutely no known pedigree. The correspondent states that Mr. Calvert Meade's Dick, a dog which took first in the Irish setter dog class at the show of 1881 was a half brother to Bob. There is not a grain of truth in this statement. Mr. Meade's Dick was out of a bitch presented to Mr. Tom Hart, of this city, by a well-known gun dealer, and was sired by Mr. John F. Lohse's Sport. Dick's dam was by a black and tan dog named Belt out of a black and tan bitch named Belle, both imported by the gun dealer mentioned. Dick's sire, Lohse's Sport, a well-known and very good dog was by Col. Stuart M. Taylor's thoroughbred Irish setter Dash, out of Mr. Robert Liddle's Beauty. Col. Taylor's Dash was imported from Ireland, and was bred by Mr. C. L. Braun, from his brace Ranger and Bess, both good dogs. Mr. Liddle's Beauty was by Mr. Bill Griseem's pure white English setter Bill, a very handsome dog, out of Mr. Charley Fairfax's noted bitch Beauty. About the breeding of Beauty there is some uncertainty. Colonel Taylor is of the opinion that she was sired by Cassidy's Grouse, but I cannot agree with him, for the reason that Beauty was here, and an aged bitch, and well-known long before Cassidy's Grouse was brought from Oregon. Grouse was purchased in Illinois, and taken direct to Oregon and kept there, while Beauty, I believe, was whelped in Stockton from a known brace. It thus appears that Mr. Meade's Dick, instead of being a half brother of Bob's, was in no way related to the latter. The correspondent writes that Mr. W. T. Daniels' Sancho, a placed bitch at the show of 1881, was a half sister of Bob's. This is not so. Sancho was a full sister to Mr. Meade's Dick above mentioned, and, of course, could not be in anywise related to Bob. The correspondent says that Mr. Briggs' red setter Belle, a bitch which has been placed in two field trials on this Coast is a half sister to Bob. This is perfectly untrue. Belle is not in any degree related to Bob, as will be seen from a glance at her pedigree, such as it is. Belle is by a dog aired by the English-Irish setter Sam formerly owned by A. C. Titcomb Esq., of this city, out of a bitch bred from Mr. Charley Fairfax's Beauty, and but one remove I believe from old Beauty. Belle's dam was a red bitch named Nina, imported by the late Mr. Henry Babcock, of this city. A nice quality bitch, but such a tricky creature so given to egg-sucking, that Mrs. Babcock could not keep her without annoyance, and so she was presented to Mr. John Dunn, now of San Jose, by whom she was highly valued. And Mr. Dunn's judgment on dog flesh is commonly regarded as good. Belle's owner has never, nor does he now, urge her pedigree as one of her claims to recognition, but it is clear what there is of it, and does not in any way strain to Bob. The correspondent thus appears rather uninformed, when he credits the blood of Bob, with the winnings of Belle. I believe all the statements of the letter under discussion have now been traversed and shown to be diametrically opposed to the truth. It is not a pleasant task, thus to hold up a writer as an ignoramus, but it is necessary that we should be truthful and careful in our statements about our dogs at this time, for the reason that interest in dog breeding is fast growing and the dogs of these years may properly be regarded as the foundation stock of California, as to the breeding of which time will soon raise many nglly questions unless we are precise. Please understand Mr. Editor, that it is not my desire to depreciate old Bob, or to discuss his field qualities, or his bench form at this time. The point at issue is purely one of accuracy as to the blood of the dog. It will have been noted that some persons are mentioned herein, otherwise than by name, and it will readily be understood why they are so mentioned. If any one desires all the names and references, and will indicate his desire to me through you, I shall be glad to furnish such data as I can.

**Correction.**

One of those unpleasant mistakes that will sometimes creep into a newspaper occurred with ourselves last week. In speaking of the Laverack puppy expected from the east in a few days, by Mr. H. Payue of Los Angeles, and in describing her pedigree it was said "Petrel III, dam of the puppy in question is registered in the English Kennel Club 11,451, and comes in first degree from Carbonite." Of course there is no such dog as Carbonite—it should have been Carlowitz.

OUR NEW YORK LETTER.

Rumors from the Race-Tracks—Yearly Sales—Racing in Tennessee—Kentucky News—General Notes, etc.

The weather now is fairly settled in this vicinity, and at all the congres are heard the news of the galloping racers as they take their daily work in good shape. Many fancied candidates, however, have come to grief when put through the crucial test of a stiff preparation, and I sent you a short time since a list of these unfortunates. Since then a number of other noted horses are under more or less suspicion, and some of the rumors have more or less foundation in fact. From Jerome comes the intelligence that two of the chief members of the powerful Brooklyn stable have failed to "continue in well doing," and grave apprehensions are felt as to their future welfare. Bernes, who up to ten days ago was doing as well as any horse could possibly do, got cast in his stall and injured his game leg that was cause for trouble last year. Since his accident he has been let up in his training, and will not be persevered with until the extent of the injury is known. Old Checkmate is another that is the worse for wear. He pulled up lame about the time Barnes met with his accident, and has been indulged ever since. As he had worked a mile in 1:47, and had fair to show his old form again, this is hard again on the Dwyer Brothers. The last few days, however, Checkmate has been given gentle work again, and his case is more hopeful. The others in this stable are doing fairly. The three-year-old Burls and El Dorado are in fine order, and will take a deal of heating for the Withers' Stake on Decoration day. Your Jim Reunwick is also doing good work. He is visited more than any horse now at Jerome, his great size and general good looks making him a horse to be long remembered. A number of other stables arrived at the course during the present week, and something of 175 horses are now stabled there with a constant increase almost every day. Brighton Beach and the old Prospect Park Track are also in prime order, and many horses are doing good work there. Brighton will begin racing on the 24th inst., and the same management will have the helm as before. The judges' stand will be filled by Messrs. Simmons, Wheeler and Burke men who possess the confidence of the frequenters of this most successful of race tracks. William Lakeland, who rode Foster in your \$30,000 purse, in 1876, has one of the longest strings at Brighton Beach, including some very promising performers. "Billy" is quite prosperous, and he deserves his success, for under Captain Cottrell and others his apprenticeship at this business has been very thorough. If any of your racing stables desire a first-class trainer William Kane, who has ridden and trained many celebrated horses, is open for an engagement. He is well and favorably known throughout the east, Kentucky and the south in racing circles. The yearling sales, beginning in Tennessee yesterday and continuing to-day at Belle Meade, have not hardly realized, so far this year, the prices expected. Perhaps, however, the lots offered were not quite up to former years in good looks. Racing in Tennessee has been going on for the past week, and the five days at Memphis were quite successful. The most noteworthy race during the week was the Fairview Stakes for the two-year-olds in which Green Morris started his sensational trio of two-year-olds, Ten Stone, Biersau and Freeman, who cost him about \$15,000. He was opposed by two Tennessee colts, Willie Clerk and Rico, and during the race a scrimmage took place in which Willie Clerk was crowded against the fence, and slightly cut. Morris' three finished first, second and third, but directly the five were pulled up, the rider of Willie Clerk claimed a foul on one of Morris' colts, and the judges sustaining his claim disqualified all three, placed the fourth horse first, and the fifth horse second. Of course, under the rule that expressly declares "any member of a stable fouling another horse in a race shall be disqualified with all the others in said stable in the race, etc." The judges could do nothing else, but it looks on the face of it as if some amendment to this rule should be made, declaring off all bets or declaring each a race void or to be run over. Green Morris left Memphis the same night with all his horses direct for Nashville. As regards the Derby horses the Cottrell pair, Buchanan and Ensign are not in as good favor as usual. It is feared that they are too finely drawn. Kosiusko, another Derby colt, is sick at Mobile, as is Harry Gilmore the favorite for the Louisville Cup and Gleaner the favorite for the Merchants Stakes. Both Miles, Powhatan, Loftin, Hannibal, Farandole, Exploit and Admiral at present seem to be the Derby cracks, as far as public favoritism is concerned, and the latter, an imported colt by Vedette, recently worked a mile and a quarter very fast with 117 pounds up. Both Miles, however, is the favorite, and if he is half right ought to win on the 16th. Lewis R. Martin has been on trial here this week, and the trial is not yet concluded. Poor Martin during the winter has lost completely the sight of one of his eyes from a cataract, and the other eye is also affected. He has much sympathy here from all sporting men. Yours, New York, April 30th, 1884. PACIFIC.

Horse-Raising in New Mexico.

Horse-raising in this country, has not received the attention which the importance of the business demands. The natural facilities are very great, and the demand for good horses is far in excess of the supply. We have here, in New Mexico, one of the best horse countries in the world. There is an abundance of summer range of the finest of gramma grass, and, as a general thing, horses will make their own living during the whole year, and even if they do require feeding hay is so cheap that the cost of feeding is very small. It costs no more, hardly as much, to raise a horse for market as it does a steer, and, at even the present high prices for cattle, one good four-year-old horse will sell for as much as two or three steers of the same age. As illustrating the profits of horse-raising we will mention the case of a California rancher, where the advantages are similar to those possessed by New Mexico. A breeder twelve years ago brought to Modoc county one mare and colt. From the increase of these he has sold fifteen hundred dollars worth of horses, and now has about twenty head of horses, mares and colts left. He considers that the use of the mare on the road and ranch have amply paid for the feed and care of them, and that the increase and profits are nearly all clear gain. There is no other stock business that can show a greater percentage of profit.—Los Vegas Stock Grower.

Monitor has apparently recovered from the troublesome ankle that threatened his near fore leg last season, and will probably come to the post this season to do battle for the "Blue and Orange" in the cup races.

THE RIFLE.

California Rifle Association.

This week there were two important events in our rifle world, the annual tournament of the State Rifle Association, at Shell Mound, Oakland, and the annual tournament of the Schuetzen Verein, at Schuetzen Park, Alameda. The day was favorable for good shooting, but the attendance was not what we thought it would be, though the representation of crack shots from all sections was conspicuous. The interest taken in the different matches, nine altogether, was very creditable to the contestants, and the harmony that prevailed throughout the day was even more so. This is just as it should be. While such feelings are fostered and exhibited on occasions like the present, rifleism will progress among us. Upon the whole the scores made were creditable to the State. One feature especially pleased us, the double victory of the Petaluma team of six men from Company C, under Captain Fairbanks, as that officer, in every possible way in his power, shows himself a "live man" in military matters, and in his efforts to make the Fifth Infantry a leading brigade at the target. On Sunday, in two matches, they handsomely defeated their opponents' teams from Second Artillery and First Regiment. It is true, the teams beaten are not ranked among our first-class rifle-shots, but the victory on the part of the Petaluma team is none the less honorable and gratifying as the reward of industry and enterprise, for they themselves are only new beginners at the target. Their percentages were 82.70 per cent. It is a pity the Vallejo militia men are not imbued with the spirit of rivalry of their neighbors. As usual, Vallejo had no representative. It was, we think, about the only place not represented where militia companies exist.

The first match was for a medal presented by ex-Governor George C. Perkins; open to all members of the association, the National Guard of California, and the army and navy; distance, 200 yards; ten rounds to be fired with any military rifle. The following is the score of the eleven contestants: P. D. Linville..... 555555545—49 Sergt. J. McDonald..... 4544544555—45 Lt. S. I. Kellogg, Jr..... 455555544—48 Lt. Brown..... 444545544—45 Priv. L. Barrere..... 544555555—47 Lt. J. C. Klein..... 554454445—45 Priv. T. E. Carson..... 544545555—47 Priv. C. F. Waltham..... 554455544—45 Sergt. E. Hovey..... 555445544—46 Priv. Cummings..... 455445445—46 Lt. F. Kuhnle..... 455445445—45

The second match was at short range, 200 yards, each man having seven shots at a ring target. The following is the score: Lieut. F. Kuhnle..... 10 10 11 10 11 10 12—74 J. C. Carson..... 9 10 12 10 8 8 9—65 Lieut. J. A. C. Macdonald..... 7 10 8 5 12 12 10—65 Lieut. J. C. Klein..... 10 10 4 10 12 11 7—64 Lieut. S. I. Kellogg, Jr..... 9 11 10 12 7 2 9—50 F. Cummings..... 7 7 8 5 9 8 10—55 Sergt. C. Nash..... 9 5 10 7 8 4 10—53 Officer D. Geary..... 10 6 1 10 10 7 9—53 C. F. Waltham..... 9 11 4 9 11 4 4—62 Lieut. Mangels..... 10 3 7 8 7 7 9—51

The third match was for a medal presented by the California Powder Works, each man having seven shots at 200 and seven shots at 500 yards. The directors of the California Powder Works are a liberal body of men, and it is gratifying to see them recognizing their responsibilities in this matter. In the same spirit we commend the action of the Dupont Powder Manufacturing Company for donating a keg of their best rifle powder; the Winchester Arms Company a complete set of their best loading implements; Mr. Laird the Jeweller, and Capt. Siehe of Shell Mound, for donating a handsome gold medal each. The score was: Officer Liuville..... 200 yards—32 500 yards—33—65 Private Ed. Pierce..... 200 yards—31 500 yards—33—64 Officer Peckinbah..... 200 yards—29 500 yards—34—63 A. T. Field..... 200 yards—32 500 yards—31—63 Lieut. S. I. Kellogg, Jr..... 200 yards—33 500 yards—30—63

The fourth was a team match, each composed of six men, each man to have seven shots at 200 yards and seven at 500 yards. The following is the score: Company A, San Francisco Police..... 361 Board of Officers, Second Artillery..... 351 Company A, Fifth Infantry..... 344 Field and Staff, Fifth Infantry..... 344 Presidio Rifle Team..... 321

The fifth match was open to teams of six men, Springfield rifles to be used, at 200 and 500 yards, each man to have seven rounds. The following is the score: Battery B, Second Artillery..... 295 Company C, Second Artillery..... 303

The sixth contest was the Collier team match, open to teams of six men of the National Guard who have never made more than 70 per cent. in any of the California Rifle Association matches. The following is the score: COMPANY C, FIFTH INFANTRY. Priv. Houx..... 32 Priv. Zartman..... 29 Priv. St. John..... 31 Capt. Fairbanks..... 25 Priv. Smith..... 29 Total..... 176

BATTERY B, SECOND ARTILLERY. Priv. Elliott..... 30 Priv. Johnston..... 23 Priv. Ewell..... 27 Priv. De Villiers..... 22 Priv. Cummings..... 27 Total..... 153

COMPANY C, SECOND ARTILLERY. Priv. Robertson..... 27 Priv. Thersert..... 25 Priv. Brooks..... 26 Priv. Siebe..... 18 Corp. Markus..... 25 Total..... 146

The sixth match was contested by men of the National Guard who had never made more than 60 per cent. in any of the California Rifle Association matches at 200 yards. The following is the score: BATTERY B, SECOND ARTILLERY. Priv. Johnson..... 25 Priv. Pringle..... 23 Priv. Elliott..... 25 Priv. De Villiers..... 22 Priv. Cummings..... 25 Total..... 151

COMPANY B, FIRST INFANTRY. Priv. Nixon..... 29 Priv. Casey..... 14 Sergt. Burdick..... 27 Priv. Bignold..... 11 Priv. Knowlton..... 25 Total..... 126

COMPANY C, FIFTH INFANTRY. Priv. St. John..... 33 Capt. Fairbanks..... 25 Priv. Houx..... 30 Priv. Zartman..... 25 Priv. Smith..... 30 Total..... 172

COMPANY C, SECOND ARTILLERY. Priv. Ralph..... 29 Priv. Robertson..... 23 Priv. Koch..... 28 Priv. Siebe..... 10 Priv. Wegman..... 24 Total..... 147

The eighth match was open to any regiment, battalion of the National Guard or United States army, or company of police, at 600 yards, seven shots to each man. The following is the score: POLICE TEAM NO. 1. Officer Gano..... 32 Officer N. T. Fields..... 26 Officer Peckinbah..... 32 Officer Fields..... 28 Total..... 146

OFFICER N. T. FIELDS. Officer Gano..... 32 Officer N. T. Fields..... 26 Officer Peckinbah..... 32 Officer Fields..... 28 Total..... 146

Table with columns for team names and scores. Includes Fifth Infantry Battalion Team, Police Team No. 2, United States Team, Presidio, and Second Artillery Regiment, N. O. C.

An interesting match was shot by the directors of the association at 200 yards, each one having seven shots. The following is the score: Lieutenant S. I. Kellogg, Jr..... 4 5 5 5 5 5 4—33 Lieutenant H. T. Sime..... 4 5 4 4 4 4 4—29 Sergeant Charles Nash..... 4 5 5 3 4 4 4—29 Corporal L. R. Townsend..... 3 4 4 4 4 4 4—29 Colonel H. D. Ranslett..... 4 3 3 3 4 4 4—27 Captain W. B. Collier..... 4 4 6 4 4 0 5—26

In noticing the general results, our readers will observe that among the best scores of the day our Police riflemen are especially prominent, in fact, it was a proud and happy day for Captain Douglas and Sergeant Nash. Next to the police Lieutenant Kellogg, as he always does, made a splendid record for the day, failing to win, when he did fail, only by one or two points. Altogether it was a very successful and enjoyable day. For the good feeling and harmony which prevailed, the men themselves are to be praised; for the excellence and completeness of the arrangements, which certainly added much to the success of the competitors, the public generally have to thank the Board of Directors, who worked indefatigably from the beginning to the end to secure success.

In our last issue we made an error in computing the percentage of Sergeant Hovey's fine practice-score at Shell Mound the week before. We made it 88.66 when it ought to have been 89.66. One per cent. is too much to take from him or any other man, so we gladly correct the error.

At Schuetzen Park.

On Saturday a large assemblage gathered together at this resort, principally German citizens, who, of all amongst us, take most pleasure whenever opportunity offers. The occasion was a camp-fire and picnics for the benefit of the Veterans' Home, under the auspices of the G. A. R. The shooting opened at 10:30, by members of the Schuetzen Verein. There were \$50 in cash divided into ten prizes, three shots for fifty cents, with any military rifle, at a twenty-five ring target, entrance fee fifty cents. Entries were unlimited, and there were a large number. Muzzle-loading rifles were used. The wind, in some measure, interfered with the score. Out of a possible 75, in three shots, the following scores were made: H. Placemann..... 18 25 21—64 J. C. Waller..... 21 20 11—55 F. Freese..... 20 19 24—63 F. Brandt..... 15 15 23—54 C. Rapp..... 23 15 22—61 J. H. J. Seyden..... 17 14 23—54 F. Boeckman..... 17 20 23—60 John Brotheman..... 17 21 15—54 William Epprenport..... 25 13 21—59 J. Mengel..... 23 11 19—53 H. Zecher..... 25 19 15—59 H. Tietjen..... 20 19 12—51 H. Thode..... 23 17 17—57 G. Seyden..... 16 12 22—50 F. Krahan..... 18 18 20—56 A. Browning..... 11 21 18—50 K. Wertheimer..... 20 17 19—56 F. Greimer..... 15 15 16—50 Henry Schroder..... 19 21 18—58 L. Haacke..... 19 17 15—50

This match ended at 2 P. M., when the people's match commenced. Any person present had the privilege of shooting four times, and of having his score recorded for a prize if he choose to do so. The scores and prizes in this match will be made known at the hall which takes place to-night. Sunday, the second day of the tournament did not attract as large a crowd as we anticipated, owing probably to the State Rifle Association holding their meeting on the same day at Shell Mound. On the second day the shooting was devoted entirely to the demolishing of a huge wooden bird, erected at a distance of about seventy-five yards. For this match there were ninety-five entries, a large percentage being from the Schuetzen Verein. Any kind of rifle was allowed, the Winchester seeming to be the favorite.

Twelve prizes were allowed for this match. The first, for the king shot, was won by H. Frank; the second, by Lieutenant H. Tenuis; third, Captain F. Greiner; fourth, Henry Evers; fifth, J. H. J. Seyden; sixth, F. Krahan; seventh, C. Hildebrandt; eighth, C. C. Butt; ninth, F. G. Witt; tenth, Henry Evers; eleventh, J. H. J. Seyden; the twelfth was not allowed.

At Petaluma.

A long-odds match took place at Petaluma on 7th instant, the result of which we did not receive in time to insert in last week's issue. The match was between Lieutenant Fred Kuhnle and W. F. Shattuck, Kuhnle giving his opponent 35 points. In this match, by his score, Kuhnle gains more glory, as the total 456 out of a possible 500 is again equal to any ever made in the State, and is, moreover, we believe, the third time Kuhnle has made that record. The range was 200 yards off-hand, with ten strings of five shots to the man. Kuhnle..... 43 45 46 46 45 46 45 46 48—456 Shattuck..... 43 41 43 39 41 43 37 40 40 39—441

Adding the points given to the score made leaves a majority for Kuhnle of fifty. The great feature of Kuhnle's shooting, like that of Kellogg's, is the excellent average always made.

More Glory for the Fifth Infantry.

The record given in this week's issue of the matches at the meeting of the State Rifle Association is not complete, nor will all be known until the next meeting of the Directors. In the meantime, we give three more, coming to our knowledge during the week. The gold medal of the Director's was won by Lieutenant Kellogg, with the fine record of 33 out of a possible 35, seven shots at 200 yards. The gold medal given by Captain Siehe of Shell Mound, was won by Sergeant Macdonald, Company A, Fifth Infantry, with 65 out of a possible 70, seven shots at 200, and seven at 500 yards. Lieutenant Fred Kuhnle won the prize at the 12-inch ring target, with a two-inch bull's-eye. Out of a possible 84, with seven shots, he scored 74, the whole seven being within a diameter of six inches. This honor to the Fifth comes from their fidelity at practice.

To-morrow the Eintracht Rifles hold their regular shoot at Harbor View Range. In reporting the last score of this club we mistook a figure five for three, and thus made an error in Mr. Ropke's score while shooting for the first-class prize.

He tied Mr. Stamer, and made 355 points instead of 335, as reported. The difference of twenty points is too large to be allowed to pass uncorrected.

We beg to inform Captain Fairbanks of Petaluma, that the whole National Guard, and a host of other guards, national, at least, in habit, are anxiously awaiting the arrival of that Military Trophy won by the Field and Staff Team in the final match for it. It is a matter of champagne, Captain, and hope deferred maketh the heart weary as well as sick. Send the trophy along, and end this local suspense.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, etc.). Blank indicates open season, Star (\*) indicates close season.

The Pierce Trophy.

On Saturday quite an assemblage of gentlemen fond of the gun, outside of those immediately connected with the match, gathered together at Bird's Point to witness the third and final contest for the Pierce Trophy between the Alameda County Sportsman's Club and the Gun Club of San Francisco. As each club in previous contests had won once without any very decided difference in the scores, much interest was excited by the final shoot, the Gun Club, however, owing to the ability of some of its members, having a slight call in the betting. On the ground betting was confined principally to individual shots, for up to the tenth round the scores were so even no one could predict the end with any degree of certainty. The weather was very suitable for good shooting, and yet, from reasons that cannot be explained, the scores were poor with one or two exceptions, such men as Messrs. Orr, Adams, Ewing, Gordon and Edson only equaling the performances of boys and neophytes. Mr. Orr, it is true, was all out of sorts, sick in system, with a lame hand, but for the others no explanation can be given, unless we fall back on the old saw that it will ever be so at times. It is no use seeking to disparage the victory on one side, or softening down the defeat on the other, by saying Mr. Orr's, Mr. Gordon's, or Mr. Ewing's usual score would have made all the difference, because the same argument could be used in reference to Messrs. Adams and Edson, and so we conclude the crack Gun Club lost the trophy by bad shooting. The birds in general were a good lot, with some frightful twisters. In character of flight they were more uniform than usual, most quartering off to the right with the wind. As usual there were one or two bad cases of falling out of bounds, but these were set off by Mr. Orr's first bird flying into the bar-room, and two of Mr. Crellin's dropping just inside the boundary. Both teams made some splendid long-distance shots with second barrel. To test the comparative shooting of the two clubs in their three matches we were curious enough to look up the former records, and find that while the Gun Club did not stand up to their best record, the Alameda Club did, their grand total for the three matches being six birds ahead of their opponent's score. This, perhaps, is the best solution to Saturday's result. The score on Saturday:

Score sheets for Gun Club Team and Alameda County Sportsman's Team, listing names and scores for three matches.

Totals of the three matches:

First match, Gun Club 82; Alameda Club, 88. Second match, Gun Club 85; Alameda Club 76. Third Match, Gun Club 81; Alameda Club 88. From these totals it will be seen the two clubs are about as even as they can be found.

In the pool shooting afterwards some fine runs of straight kills were made, especially one by Mr. Edson, in which eight birds fell in succession. The pool was a freeze-out with 12 entries, at \$2.50 each. The pot was divided by Messrs. Edson, Black, Mayhew and Wilson. The second was also a freeze-out with 9 entries at \$2.50 cash. This was divided by Edson, Coffin and Tuttle. The third was the same, with 5 entries, and was won by Haile. Thus ended a very pleasant day's sport.

At Petaluma.

We have had occasion of late to remark the forward march this inland and much-abused town has made in connection with rifle shooting. We have now to commend it's spirit and progress at the trap. Two matches have recently been had there which show good shooting. The first was at 10 double birds, 18 yards rise, 100 yards boundary. The score:

Score sheet for match at Petaluma: Frank Timms (16), Samuel Macdonough (15).

The second match was between Timms, and S. St. John of the militia, who is also quite a good rifle shot. The conditions were 15 birds each, 30 yards rise, Hurlingham rules. The score:

Score sheet for match between Timms and St. John: Frank Timms (11), S. St. John (11).

In the shoot-off at three pair each the score was:

Score sheet for shoot-off: F. Timms (11), S. St. John (10).

Messrs. Timms and Hopper of Petaluma may risk a match with almost any two men in the State, and we are glad to see so good a marksman as St. John practicing at the trap as well as at the target.

The annual election of the Parker Gun Club took place Monday evening May 5th. The following members were elected officers for the ensuing year: President, Arthur Piper; vice-president, Henry Casey; secretary, Wm. Foley; treasurer, Fred Seegers; sergeant-at-arms, Harry Piper.

At Colma.

The Parker Gun Club held its monthly medal shoot (clay pigeons) on Sunday last. The attendance was good, and the shooting, under the conditions and for young men, above the average. The conditions were 15 birds each, 18 yards rise, single barrel. The score:

Score sheet for Parker Gun Club medal shoot: P. McEnroe (13), T. Casey (11), T. McEnroe (11), J. Nohman (11), F. Bekart (10), H. Casey (10), H. Piper (10).

Casey thus takes the handsome trophy which Bekart won last month, and in the shoot-off the ties on ten for second medal Nohman won. There is no doubt about the records of this club, as in the case of the Lagunitas Club, spoken of in a recent issue.

At Benicia.

A match was recently shot at Benicia, between five men from that place and five men from Vallejo. The conditions of the match and the number of the birds to the man were not furnished us. The result was in favor of Benicia by three birds. A return match, right away, is spoken of. The score:

Score sheet for match at Benicia: BENICIA TEAM (C. Revord, L. Weinman, E. C. Graff) vs VALLEJO TEAM (T. L. Robinson, T. B. Cook, R. Doyle).

A Match To-Morrow.

A match will be shot at Oakland Park to-morrow between John Kerrigan and A. E. Burbank, for \$100 a side, the winner to take all the money, and the loser to pay all expenses; twenty-five birds each, Hurlingham rules. So far, although Kerrigan is a steady shot with a good average score to his credit, Burbank has the call in the betting. He shoots for blood all the time. We scarcely think eighteen kills will be beaten by either man.

It is said that the Pacific Gun Club of Sacramento will hold its next shoot on 25th inst., at Agricultural Park, if sufficient birds can be secured. So much for tournaments. What are we to do for birds later on in the season, if they run short already?

At Colusa.

At a live pigeon shoot held by the Colusa Gun Club on Sunday, May 11th, the following scores were made:

Score sheet for live pigeon shoot at Colusa: Robinson (0w), Parker (11101-5), Watson (11111-6), Burton (11101-5).

Ties at 26 yards, angle birds (freeze-out) was shot with the following result:

Score sheet for angle birds at Colusa: Magonigil (1), Miller (1), Watson (0).

Miller taking first money, \$20; Magonigil taking second money, \$10; Watson taking third money, \$5.

Next shooting being at single birds, 21 yards rise. "Miss and out." \$5 entrance. Five monies, with the following result:

Score sheet for single birds at Colusa: Magonigil (111110), Watson (10), Lopez (111111).

Lopez taking first money, \$20; Magonigil taking second money, \$5.

Colusa Gun Club not only boasts of having some good shots, but is well fixed financially; also takes much interest in enforcing the laws for the protection of game. The club have handsome medals, one for glass balls and one for clay pigeons, each medal being shot for once a month, and becomes the property of he who may be fortunate enough to win it three consecutive times.

We shall always be glad to receive the scores of clay pigeon matches from Colusa, or any matter interesting to the public. —[Ed.]

Worth Reading.

Speaking of the criminal destruction of deer in Plumas county, a Mr. Clark says: "Up in the Big Meadows, Plumas county, the deer pass through the head of the meadows in the early spring going to their summer range, and on the first fall of snow in the fall again return. The Indians, knowing their ways and trails, lie for them at the junctions of the canyons, and there slaughter them all—does, fawns and bucks—indiscriminately, leaving none. They are all armed with repeating rifles of the best pattern. Now, if we have one law for Indians and another for white men, I can't see why the white man's law is not abolished to give the white man the same privileges. If the Indians will not abide by the laws of the white man, then they should be sent to the reservation. In less than three years more there won't be a single deer left, where five years ago there were hundreds, and all by the laxity of the laws of the State or by the neglect of her officers." To all of which we piously say amen. In principle we are decidedly opposed to Indians, Greeks, Italians and Chinamen being granted privileges in killing game and fish not accorded to our native-born or white citizens. But the idea of the day in our officials seems to be different. With the slinking hypocrisy of the soapy Pecksniff they lift their hands and eyes heavenward and say, "Let these sweet-scented, thorough-going vagabonds come unto us, for of such is the Republic of America," and so infatuated are they with their love for this alien, non citizen element, that we fear nothing but revolution can awake them to a right sense of the outrage. However, a better feeling on the matter is daily growing up in the honest masses, from which we hope much. It is getting very loud-spoken from the banks of the St. Lawrence to the Gulf of California. In Canada, as well as in America, the destruction of deer has been so diabolical of late that the strongest demands for more stringent game laws are uttered from one end of the dominion to the other. This desire for reform across the border is reacting upon ourselves, and it is the duty of honest, independent journals to aid it all in their power. In this spirit we give the following clipping of Canadian reform for the study of our own people. "Among the alterations proposed to the game laws in Canada are sections to prohibit duck shooting before sunrise and after sunset; to prevent the use of decoys at a greater distance than fifty yards

from the shore; to compel non-residents to pay a license of \$25 for the privilege of shooting in the dominion, residents paying \$2, and farmers \$1 fees; to give the Commissioner of Crown Lands the authority to appoint game constables for the division under his superintendence. By the adoption of the latter clause the game laws of Canada would be assimilated to those of France and England, where a costly license is collected from all who shoot game, and where fine and imprisonment are adjudged all who shoot without a license. This would cause a sensible diminution in the number of pothunters in the dominion, but the law would be unpopular among those who hold that the liberty of the people is not to be encroached upon, even when it takes the form of killing off valuable game by the poacher." But we hold the liberty of the people is encroached upon, badly too, when privileges are granted the vicious and lazy element which are not accorded to the honest, industrious, tax-paying masses, from whose brains, enterprise and wealth the country has become what it is. It would not make our laws like those of England and France. The game laws of this country are not for the benefit of the few. If they were we would not advocate them. Before the next meeting of the legislature we shall have a good deal to say about them. This is our commencement.

Another Invention.

The invention of a new electric gun-punt is thus described by the London Times: "Following up the introduction of Clark's electric lauchets, which have now been some months in use, we now have gunning punts fitted up with electric motor and battery. The first boat of this description was built to the order of John J. Mackie of Auchencairn, Castle Douglas, principally for wild-duck shooting, and also to be carried for use in the Norwegian fjords and inlets. A trial of this boat at Auchencairn proved very satisfactory, a speed of four knots per hour being obtained, while the machinery was noiseless in its action. The punt is twenty-three feet long, by four feet six inches beam, draws nine inches of water aft, and carries a powerful gun weighing about three hundred pounds. The propeller, which is two-bladed, gives five-hundred revolutions per minute when both batteries are in use, and with only one battery a speed of three knots per hour can be obtained." We submit this to the consideration of our farmers. Could not a somewhat similar machine be made to go on land to hunt the geese and ducks off our young grain? Such a machine, with a three hundred pound double-barrel gun blazing away night and day, ought to hurt something.

POULTRY.

Poultry Breeding.

Fanny Field in the Poultry Magazine says:

While riding through a neighboring village the other day my attention was attracted by a flock of white fowls, and I stopped to obtain a closer view. They were of medium size, shaped very much like the Plymouth Rocks, pure white plumage, clean yellow legs, and small single comb. I am not at all bashful where chickens are concerned, so I hunted up the owner and began to ask questions.

"What breed are those chickens?" "No breed in particular." "But they are as much alike as two peas! Where did you get them?" "Raised 'em." "I mean where did you get the original stock?" "All the original stock I had was one white hen very much like these, only she was not quite so large. I found her in a coop of market poultry, took a fancy to her, and bought her. That year we had a white rooster something like the white Leghorns that you have nowadays, and a good many of the chickens hatched were pure white. Wife and I always liked white fowls, so we kept all the white pullets, and that winter, while we were visiting wife's folks out in New York State, I found a rooster that looked like the white hen I found the year before. The next year our chickens were pretty much all white, and the third year we did not hatch a single colored chicken. Some of them had white legs, and the combs were all shapes and sizes, but we kept at work killing off the white-legged ones and those whose combs did not suit, until they now breed pretty true—quite as true as any of your standard breeds."

"How long has it taken?" "About fifteen years." "And have you been breeding those fowls in-and-in all this time?" "Yes, I s'pose that's what you call it; at any rate, since I brought that white rooster from York State, we've always kept some of the best of the roosters that we raised, and have never bought either fowls or eggs." "Are your fowls and chickens always healthy, lay well, etc.?"

"We don't often lose a chicken except by hawks, and when I see a sick hen, I kill her and have done with it, but that don't happen more than once or twice a year. Lay well? Last year my hens averaged 157 eggs apiece, and most of the hens raised a brood of chickens apiece. Wife kept accounts, so there is no question about it. Look at these eggs"—and he exhibited a basket of large, fine, white eggs. A dozen taken just as they came weighed twenty-six ounces.

Don't this man's experience rub pretty hard against the theories of the fellows who tell us that the poultry raiser must change breeding cocks every year, in order to keep his fowls from deteriorating? It looks that way to us.

Mrs. F. M. Cooper, in the Indiana Farmer, says: "I have a word to say in favor of Plymouth Rocks. I have nothing to dictate to fanciers, but for the farmer, or anyone who wants chickens for general purposes, there is no better breed than the Plymouth Rocks. I have been breeding them for the last three years and want no better. Not one has ever been sick, and there was not a week I failed to get eggs during the coldest of the weather during the past winter, and what pretty chickens they are. Mine have been the admiration of all who have seen them. There may be strains that do not give such satisfactory results, but realizing that in most things the best is the cheapest, I procured my stock from the best. It was expensive, but it has paid."

Tobacco is recommended by an exchange as a good thing for sick chickens. A handful of Durham smoking tobacco is placed in enough bran mnsb for ten or twelve chickens about two-thirds grown. I have given, says a correspondent of the Farmer's World, a heaping teaspoonful to eight to ten chickens two or three weeks old, as an experiment, and it did not hurt them. I consider it a cure for chicken cholera.

An Agricultural Department.

There have been many comments on the article which appeared last week under the above caption, and we are pleased to learn that it meets the approbation of everyone. It could not well be otherwise. It is a fair proposition which is easily understood, and which the most hypercritical cannot find fault with. It is true that there may be politicians who would rather keep the farming interest in the background. There are no barrels of money to be gained in legislation for this great interest, and it might be the means of bringing agriculture as prominently forward as manufactures, commerce and banking schemes. Again it might consolidate the men who are the actual "producers" who sustain the whole population, who make it possible for others to flourish in the various ramifications of business, who enable thousands to live by their wits, who are the foundation on which the superstructure of National prosperity rests. United they will be irresistible. The chicanery of political hoppers in the large cities, the schemes of adroit wire-pullers, the combinations, the bargains, the manoeuvres of "leaders" overcome by the determination to compel proper acknowledgment of the greatest of all American industries. There must be representatives adequate to the magnitude of these industries. Not merely a clerkship, not merely a commissioner with limited powers. There must be a cabinet officer at the head of the department, one who has a voice in the councils of the President not inferior to the Prime Minister or Lord of the Treasury, the peer of any of them, and who can command the same attention as is vouchsafed to those at the heads of the departments that now exist.

This is not a political question in the light that people regard that phrase. Democrats, republicans, working-men can join in the demand, insist upon compliance with the wishes of so large a proportion of American citizens, and on this platform labor conjointly without surrendering a particle of their belief, without giving up one iota of their political creed.

We may be thought presumptuous in naming men for the position of delegates at large, and severely criticized for mentioning those who, we think, are so well fitted to carry out the object. We do not look at it in this light. We make suggestions thinking to present the idea rather than advocate the claims of men, an intimation of the class which should be appropriate to take the business in charge, and while personally gratified to see those whom we favor elected, any others that would carry out the programme will be acceptable. While our acquaintance is limited in California, there are a hundred men, at least, that we have met who are well fitted for the place. Republicans equally as good as democrats, but in this case one selection has to be made from the democratic side, consequent upon the State Convention of that body being yet in the future. It follows, as a matter of course, that whoever is selected to represent California in the National Convention should be in accordance with the party in this State on other questions, as that will be considered of major importance, and from this point of view we cannot have anything to say. But it is certain that should representatives men of the farming, horticultural and wine interests be selected, there are plenty of them who will be found able and heartily willing to carry out the wishes of their constituents. Presenting the name of L. J. Rose in the last issue we did so without consultation with any one. In fact, writing the article inspired the idea of his peculiar fitness for the position, and though we have not heard from Mr. Rose personally, and not aware whether he will accept the position or not, there has not been a dissenting voice, nor one person to take exceptions to his candidature.

For a representative of the agricultural interests there is a wide field to choose from, and so many gentlemen who are so eminently fitted for the place that it is a difficult task to pitch on one amongst them. In this dilemma there came a ray of light. The president of the State Agricultural Society is a democrat, so that he is eligible for the race, and who is there in a better position to represent the farming interests of the State? A farmer and extensive breeder himself, thrown by the virtue of his position into the company of farmers and breeders, enthusiastic in all that pertains to the office, active, enterprising and ready to spend time and money to forward the interests which the society he is at the head of was organized to foster. The choice of P. A. Finigan for the place seems eminently proper. Again we disclaim any intention to take part in "general politics," though reserving the right to discuss all questions that have a bearing on the interests this paper was founded to sustain. The question under discussion is manifestly within our scope, and though in presenting names it may be said that the controlling motive is a friendly partiality, the warmest, best and truest friend would not be recommended if the thought was harbored that he was not fit for the position. In this case an assurance that every effort will be made to further the object will be sufficient to engage whatever service we can perform.

The Handicap Foot-Race.

Talk about six-day-go-as-you-please humbugs with a lot of dazed, wornout men, shuffling, ambling, limping around a sawdust ring, if there was ever a parody on athletic sports, a caricature on action, speed and pace that can be awarded the first place. Brutal beyond dog-fighting, more senseless than any of the crazes of modern times, degenerating true sport, whereby many dollars are gained by those who earn and those who manage, it is one of the inexplicable affairs that are beyond comprehension. Incomprehensible that multitudes should crowd the largest hall in the country to witness cruelty, which, if attempted with animals, would bring the tender-hearted Bergh and his cohorts, and put a stop to proceedings that bring discredit. How different the lively rattle, the merry spin that only takes a few seconds to decide. There is life, animation, excitement. The open air redolent with the perfume of spring blossoms, green fields, sunshine, vigor.

The first regular handicap foot-race we ever witnessed was that which was decided at the Oakland Trotting Park a few days ago. It is seldom that time can be given to attend even the racing and trotting that takes place outside of San Francisco and Oakland, and not unfrequently home events are missed. Therefore, it is not surprising that the hipedal contests should be a novelty, and when such a flyer as Kittleman was running, there should be a strong inducement to see the performance. It is worth going a long way to see him run by himself; well worth spending a whole afternoon to see him close a gap of fifteen yards in one hundred and fifty on a man like McIntyre, and knock a hole handily in the fastest record for the distance. He is a phenomenal runner, wonderful in his flight of speed, and running so easily that it seems that any reasonable distance can be accomplished at the same rapid rate. There is a still higher quality

than speed and endurance, which we feel assured Kittleman possesses. That is honest endeavor. Determination to win, and an enthusiasm which will not be daunted. We are so favorably impressed with the man that we can not believe that even an extraordinary temptation would lead him astray, and if reports be true about a majority of pedestrians, the possession is still more meritorious from its rarity.

Pedigree of Arab.

From the appended affidavits it appears to be definitely settled that Arab is a son of Arthurton. When it is absolutely proven that Lady Hamilton is his dam, there can be no further controversy, as in all the the arguments it has never been claimed that she visited any other horse during that season. Although that promising horse has been unsexed, the true paternity is important, as it is evidence of the value of family and a guide to breeders in making selections. There is little necessity to do more than to refer to the sworn statements of reputable men. The affidavits are complete, so full as to cover every point, and, so far as we can judge, incontrovertible. In all probability the previous errors came from confounding the progeny of different mares, which is very easily done by those who only see them at intervals. But a man who has charge of an animal from the time it is foaled until five years old cannot be mistaken, and as there is neither qualification nor doubt expressed in his testimony, this evidence must be regarded as conclusive.

Stats of California,  
City and County of San Francisco } ss.

I, Dennis McVicker, being duly sworn, depose and say: That for the past six years I have been foreman on the farm of J. D. Fry, Esq., in Yonut Township, Napa County, State of California.

That the sorrel mare known as Lady Hamilton, formerly owned by Frank S. Malons, and lately owned by J. D. Fry and J. B. Haggin, all of the city of San Francisco, State of California, did, in the spring of eighteen hundred and seventy-eight, give birth to a bay horse colt, which I have seen by the side of its mother, when only a few minutes old, and before it was able to stand up, and the aforesaid bay horse colt was continually in my charge, and was broken and driven by me until he was coming five-years-old, and the aforesaid bay horse colt I know positively to be the bay gelding now known as Arab, which at present is owned by E. M. Fry, of said city of San Francisco, and is now in the hands of Henry McCon, trainer.

Said colt Arab being foaled on the 28th day of May, 1878, at 8 o'clock in the morning. DENNIS McVICKER.

Subscribed and sworn to before me this 13th day of May A. D., 1884.

JAMES L. KING, Notary Public,  
308 California Street, San Francisco.

State of California,  
City and County of San Francisco. } ss.

I, William Corbitt, being duly sworn, depose and say:

That on May 7th, eighteen hundred and seventy-seven, Frank S. Malone sent a sorrel mare known as Lady Hamilton and dam of Arab to my farm in San Mateo County, California, to be bred to my stallion Arthurton; that said mare remained on my farm until June 15th, 1877, and that during the time said mare was so on my farm she was bred to said stallion Arthurton. WM. CORBITT.

Subscribed and sworn to before me this 13th day of May, A. D., 1884.

JAMES L. KING, Notary Public,  
308 California Street, San Francisco.

Judson Manufacturing Co.

In another part of the paper is a description of the Judson Manufacturing Company's Works, which, though brief for the magnitude of the subject, will convey a very good idea of what has already been accomplished. It is appended to a sketch of the Oakland Trotting Park, the object being to show the value to that property of the proximity of so large an establishment. We have contemplated a visit for some time, in order to obtain personal knowledge, and being disappointed in that purpose avail ourselves of the work of the Oakland Times. There are portions of these works which are of greater interest to a majority of our readers than others, though the whole is well worthy of consideration.

The Victor Mowing Machine, which is manufactured by the Company, is acknowledged to be as good as there is, and by substituting steel gearing for cast-iron, gun-metal boxes in place of "Bahhitt," doing away with side-draft, and removing the weight from the horse's necks the result is almost perfection in this class of machinery. A very good horse-shoe nail is made, but what we consider as likely to be of more importance in the future than any other branch of the business is the casting of horse-shoes and tips of malleable iron. Only a few specimens have been cast, and these on individual orders, but after testing we are firm in the belief that eventually they will supersede those made of steel or iron. It may be that the material is better than that which is usually met, or the processes are superior, at all events those we have tried last longer than steel, and are just as easily modified to fit the foot. So soon as it is made apparent that this excellence exists, we are assured that due attention will be given to perfect the patterns and furnish them in any desired quantities.

### A Parallel to Old Thad.

The following paragraph is from the account of the Nashville races in the New York *Spirit of the Times*. Should Glendower still follow pattern after Thad Stevens, and show his capacity to go four miles at a clinking pace even if he does not score a second beat, "the fastest on record," it will be another instance that harness work was no injury:

Glendower, the sensational horse of the track at present, is a very fast animal, and it looks as if he has plenty of winning races ahead of him. He was considered promising as a three-year-old, but he went amiss, and was not heard of on the turf for three years or so. A couple of years ago he was used as a huggy horse at Gallatin, and even appeared quite at home between the shafts. Shortly after, his present owners purchased him for \$150, and last fall he was put in training. He won a few races on the Texas Circuit, and afterwards turned up at Memphis. At the spring meeting there he showed his wonderful speed, winning two races in good company. Here he has followed up his Memphis victories, accomplishing two signal victories on succeeding days, each time some of his company being fast. He is by Glengarry, out of a Bulletin mare. He is probably the fastest Glengarry ever seen on the turf.

### Fresno Meeting.

Tuesday next the race and trotting meeting at Fresno will commence. From what we learn there are good prospects for a very successful meeting. The track is pronounced one of the best in the State, and that means that it is as good as any in the whole country. This was to be expected from the enterprise of the citizens of Fresno, and that spirit is sure to carry it along. It is a great thing for the owners of horses to have a spring meeting at Fresno, as it adds another member to the circuit, and following the meeting of the Capital Turf Club comes just at the right time.

An arrangement has been made with the Railroad Co. to run a baggage car from Sixteenth street, Oakland, to Fresno and back for \$190. This car is to be attached to the passenger train, and as ten horses can be taken in it without trouble the expense is not so great as was anticipated. This arrangement will enable the horses which take part to return in good time for the opening day of the Bay District meeting, there being an interval of a week.

### Oakland Trotting Park.

On the first page of this paper is a small map of that much of Mr. Wiard's property which is known as the Oakland Trotting Park, or rather, that much of it which lies between Horton street and the north-east and south lines of the property. The western boundary on the line of Horton street, in place of following the line of the stables, adds greatly to the value, not only giving a good deal more room but with the advantage of a frontage on what will be a prominent street when the lots are thrown into market. There was a clerical error last week in stating that the price was \$60,000, when it should have been \$80,000. It is unquestionably the cheapest property in Oakland, and without any improvements is worth by the acre far more money. From present appearances the outlook is favorable for the scheme to be carried through.

### Bay District Trotting Meeting.

The time is approaching when the entries will close for the purse offered by the Bay District Association, and those who have trotters to engage must keep it in mind that the time will expire Saturday next, the 24th inst. It is so easy to refer to the advertisement that it is not necessary to repeat the classes or requirements. It is surely a grand opportunity to win some money and benefit the horses as well. The track will be in the best possible condition, and it is supererogatory to say anything about the management as that is always good on the Bay District. The main point now is for owners to enter their horses. With plenty to contend, the success of the meeting is assured.

### New Books.

During the indisposition that compelled a total cessation of work, quite a number of books were received, and which there has not been opportunity as yet to treat as their merits deserve. Among them are the fourth volume of the "American Stud Book," "Krik's Guide," "Kirby's Diseases and Injuries of the Horse," "Transactions of the State Agricultural Society," and several others. We hope to give them proper attention at an early date.

The hay mare Lady Fleet by Sacramento, owned by Francisco Estndillo, of San Jacinto ranch, San Diego county, died at the ranch on the 3d inst. of pinkeye. Lady Fleet was quite famous as a fast racer in the southern part of the State. She made one campaign in this "upper country" in 1879, in the stable of Charles Thomas, and ran creditably and successfully at Oakland, Sacramento, Stockton and Modesto. She started six times that season and was first four times, second once and third once. The best of these performances were a dead heat with Maggie S. in 1:45, one mile, and a three-quarter mile run in 1:16, beating Ironwood, Jack Downey, and Plaything. She was foaled in 1872.

### Tone on the Turf.

The grounds of the Washington Park Club of Chicago are approaching completion, and the following description from a Lake city paper will carry an idea of the ensemble of the establishment:

A drive over the boulevards to the new park will be found a very wholesome and pleasant exercise any of these bright summer mornings. And when one gets to the end of the grand boulevard, or the Drexel, or whichever route is chosen—the place can be reached easily by steam-cars, horse-cars or dummies on various roads—a genuine pleasure will surely be found in the contemplation of the very handsome improvements that have already progressed so far since last August. Here is a lovely summer palace, adorning a landscape which was once one of the dearest naturally, and over which some ten years ago the wanderer went plunging through a pathless swamp. It is now not merely a habitable nook but an exceedingly attractive spot of earth. Probably this will be made plainer to the comprehension of the average mind by mention of the fact that up to this date \$400,000 has been expended on the improvements. Quite characteristic of the purport and plan of the leading spirits of the association is the circumstance that the fencing in of the grounds has been accomplished in a way that has the charm of invitation in it. Unlike most inclosures it is not a blot upon the scene—there is, in fact, a good deal of taste displayed in it, which the public will by and appreciate. And a similar tone of unmistakable refinement seems to have inspired all the arrangements, from the construction of the club house and the grand stand to the elaborate landscape gardening of the park and the magnificent stabling accommodations. "Show me how you take care of your horse, and I will get some idea of what kind of a fellow you are." If there is any point to the observation, it will indicate that Washington Park is being managed by some very good fellows, indeed.

The club house naturally arrests attention as the first object of interest on coming to the grounds. It is a handsome structure—in many respects the very idea of a delightful summer chalet. We reach it over a short sweep of road coming from the South Park, and which the association has obtained the privilege of completing from the Hyde Park people, so that it may be in order right away, ready for the first summer meeting. Entering the house, one is impressed with a sense of airiness in its architectural design that cannot well be conveyed by any description in detail. Descriptions of this kind are, in fact, very unattractive and tedious things, and Mr. Architect Beman, who designed the structure, would hardly thank a prosaic scribe for spoiling in words what he has achieved in the way of a really picturesque and beautiful work. The house is laid out with all imaginable contrivances for comfort and luxury. There are spacious dining-halls, 127 feet long and 72 feet wide—one on the first floor for the gentlemen members of the club, and another of the same dimensions above for a lady's cafe. Then there are reception-rooms, smoking-rooms, all sorts of pleasant facilities for either social enjoyment or peaceful quietude, which are now being furnished in a style befitting the class of persons who are to enjoy the privileges of the club.

The ladies' apartments are very prettily designed. The ladies, of course, enter by a separate door of their own, and may, if they choose, have their own tea-parties all by themselves, or join the other members at their own sweet will. The kitchens and other kindred accommodations are all that could be desired. A charming feature of the house is the spacious balcony that surrounds all the floors. They are of an average width of from sixteen to twenty feet, and here one may conceive of a very pleasant assemblage when an interesting Derby is in progress. These balconies, from every point, command a perfect view of the race-track. Down from the front of the club house are lovely sloping lawns, leading to artificial lakes, around the margins of which are flower beds, croquet grounds, lawn tennis courts, bowling greens, play grounds for children. The lakes will be abundantly provided with boats, so that there is ample provision made for all sorts of out-door enjoyment.

From the club house to the grand stand is but a short step over a nicely-made path, which the members may use as a means of intercommunication with the outside world during the races. The stand is a substantial, well-built structure of immense size—504 feet long and 55 feet wide—with solid iron pillars and girders, and so arranged as to command a perfect view of every point on the track. In the front are rows of private boxes which can be reached from other parts of the stand by bridgways, and the whole structure is arranged in just as complete and satisfactory a shape for seeing as the auditorium of a theatre. On the top of the structure is a magnificent promenade. Mr. Beman really merits great praise for the fine study he has made in these arrangements.

Down stairs from the floor where the spectators will be is a place set apart for those who choose to indulge in betting on the races, the club having considerably provided for those who avail themselves of pool privileges.

The Directors are justly very proud of their grand stand, and claim for it, apparently with good reason, that it has not an equal in America in respect to solidity, strength and perfect fitness for affording a view of the most interesting points in a race.

The track will be in readiness now in the course of the present month. It is naturally a fine one, the subsoil being good, and every appliance has been brought to bear to make it as perfect as a race-track can be. It is 85 feet wide on the home-stretch, 67 feet round the turns, and seventy feet on the back-stretch. It is the widest race-track in the United States. Inside of the main track, and separated by a space of some eight feet, beautifully sodded, and supplied with an admirable system of drainage, is the practice track, forty feet wide. The artificial basins or lakes before spoken of as a pretty feature of the grounds will come into good use in the steeple-chases, which will be one of the features of the summer sports. These have been arranged so that the horses can take the natural water jumps over necks of lake, etc., instead of the artificial ones commonly adopted.

The home of the horse is a highly interesting point in the arrangements of the park. There are 360 stalls, or more if needed, and the accommodations appear to be very complete and satisfactory—dirt floors, perfect ventilation, and a fine sandy soil, where it might rain for nine days running and not produce mud, the water running right off. The stabling feature here is undoubtedly superior to that of any race-track in the country. It is completely fenced in, and so arranged that the horses can be fed and walked around in wet weather or dry.

The well-known stallion Duquesne, 2:17, by Tippeco Bahaw, was shipped from Pittsburg, Pa., for New York on May 4th. He will be trained this season by Johnny Murphy, who will endeavor to get him in condition and trot him to heat Smuggler's stallion record of 2:15. Murphy may possibly take the horse to Chicago to trot for the stallion stake offered by the Chicago Club.

### The Charlier System of Shoeing.

The following description of the Charlier System is from a series of papers by Dr. Fleming, V. S.

These are the general principles which ought to be observed in the management of the horse's foot by the farrier. It will be seen that they reduce the art of shoeing to an exceedingly simple matter, and abridge the farrier's labor very considerably. They are founded on the knowledge that the hoof-horn is the best protection of the complex and beautiful structure it covers, and that these structures best maintain their health and integrity, and perform their functions, when the hoof is strong and sound, as in the unshod state. The chief object in shoeing the hoof is to prevent it being injured by undue wear. As to the prevention of "concussion" and the promotion of elasticity, nothing can be devised which will answer the purpose so well as the unmodified hoof. When we have protected that part of the hoof which chiefly suffers from wear in the unshod state, nothing more is needed; and the less we interfere with it, the better for the health of the foot and the welfare of the horse.

The kind of shoeing which is theoretically best calculated to maintain the foot in its pristine health and strength, is a modification of that known as the "Charlier" method, so named after the French gentleman who introduced it. This modification, which, I believe, I was the first, several years ago, to attempt, consists in imbedding a very narrow rim of iron, about the thickness of the wall of the hoof, in a corresponding recess made in the margin of the latter. This rim does not extend so far as the heels, but stops a trifle beyond the quarters, taking the place of that part of the wall which would be broken or worn away if there was no shoe, and which is simply removed to make room for the more durable material.

The advantages of this system are various. In the first place, the under surface of the foot meets the ground, as in the unshod state, and the functions of the several parts of the organ are not interfered with. Secondly, the weight of the rim of iron is less than one-half that of the ordinary shoe, and yet it generally wears longer. Thirdly, it requires fewer nails, and these of the very smallest size. Fourthly, such a rim must be made to fit exactly the circumference of the hoof.

For many years I have resorted to this method of shoeing the fore feet of horses (the shoeing of the hind feet is comparatively unimportant so far as disease is concerned), and with the very best results in the majority of cases. I say the majority, because, whether from previous long-continued bad shoeing, or from disease, one occasionally meets with feet that will not tolerate the short imbedded shoe. Where, however, the wall is sufficiently sound, and the sole and frog healthy and unpared, there can be no doubt that this kind of shoeing is the simplest and best. And even for certain defective hoofs—as when the heels are contracted, or the frogs diseased or wasted—I have found it the only remedy; and there are horses now in my regiment which cannot travel sound in any other shoe.

At each shoeing nothing more is necessary than to cut the recess a little higher up when the old rim is taken off; this deepening of it being equivalent to shortening or redning the hoof in the usual process of shoeing. The sole should on no account be touched, even if it project beyond the level of the new rim; neither should any other part of the wall be interfered with, beyond that in which the recess is cut.

A few precautions must necessarily be observed by the farrier who will undertake to shoe horses in this fashion. The rim must be made of the very best iron, and it must be turned in such a way that its upper part is narrower than that which meets the ground, its outer edge following the slope of the hoof. The rim, towards the ends, must thin gradually away, *i. e.* diminish in thickness, to correspond to the recess, which is cut deep in front, and gradually becomes shallower toward the quarters of the hoof. The upper inner edge of the rim must be well rounded in the first shoeings, if not always to prevent accidents from the shoe driving back, and this edge, if it is left sharp, pressing too severely upon the inner angle of the recess. To further insure immunity from this accident, it is well to make a slight groove in this angle by means of a fine drawing-knife, so as to increase the interval between the edge of the shoe and the sole at this part. And to prevent the shoe breaking at the nail-holes—which from its narrowness, it is liable to do—the holes should be made by a very fine-pointed round punch. In the course of hammering down the bulgings made by the punch on the sides of the rim, the holes become oval. The heads of the nails must be altered to the same shape, by rounding their corners with the hammer. The fine-pointed round punch does not cut the fibre of the iron like a thicker square punch; and this accounts for the extreme rarity of shoes breaking at the nail-holes, so far as my own experience has extended.

The recess requires a little practice to make quickly and neatly, so that it shall be regular and exactly the width of the shoe. Several years ago I devised a drawing-knife with a movable guide, which enables the farrier to cut the recess easily and perfectly exact. It is made by Arnold & Sons, 36 West Smithfield, London.

Some horses when shod in this way, seem to experience some difficulty in understanding that they are shod at all; or the imbedded rims give them a peculiar sensation in their feet, as they do not move so freely, and although their hoofs may be strong and sound, they travel somewhat "feelingly." This, however, soon passes off, and their ordinary action returns, and is generally much improved.

But it must be confessed that there is a great difficulty in inducing farriers to take any interest in this method of shoeing, or indeed in any but the stereotyped one in which they have been "to the manor born." And when, by dint of argument or persuasion, they can be prevailed upon to try this or any other novelty in their art, they either do it so half-heartily, or exercise their abilities in such a perfunctory way, that failure and disappointment is certain to be the result. For this reason it is that the system of shoeing under consideration has made but little progress in public estimation; and until the owners of horses devote more attention to the welfare of their steeds, and emancipate themselves from the control and opinions of grooms and farriers, there is little hope that this, or any other rational system of foot-management, will become popular, or that the cruelty and loss inflicted by the ordinary irrational system of shoeing will be diminished to any appreciable extent.

Jim Reuwick is closely watched in his gallops at Jerome Park by touts and would-be critics. Some call his action good, others say he can't be fast, and he must have made his records over short tracks, etc., etc. Buchanan likes his general condition well and thinks the horse was never better. His first race will be the Fordham Handicap, run on the 30th.

Mr. Wm. Corbitt, of this city, has become the owner of the gray pacer mare Lucy, having purchased her from Hickok for \$1,500. She has been bred to Wilkes, about ten years old and has a record of 2:14.

## HERD AND SWINE.

### The Decline in Polled Cattle.

The Kansas City *Live Stock Indicator*, of April 17th, commenting upon the results of the public sales of cattle at that point, and contrasting them with sales elsewhere, and during the past year observes:

"That there is a marked decline in the prices of polled cattle, at least in the United States, there is now no reason to doubt. Taking all the sales of hlock polled cattle last year and this spring, and we find the following averages in round numbers:

Aberdeen-Angus, April, 1883.....	\$625
Aberdeen-Angus, November, 1883.....	500
Aberdeen-Angus, April, 1884.....	465
Galloway, April, 1883.....	365
Galloway, November, 1883.....	340
Galloway, February to April, 1884.....	370

"The sales a year ago, especially of the Aberdeen-Angus comprised a lot of extra choice animals offered by Hon. M. H. Cochrane, whose average on females was over \$950, which, of course, brought the general average pretty high. The sales from which the above figures are computed for this year include Mr. A. B. Matthews' at Kansas City, the Leonard's at Lincoln, Neb., Hon. M. H. Cochrane's at Chicago, and the combination sale last week, making an average of \$365 on Aberdeens, and \$340 on Galloways, while the average of this last sale was only \$301 on Angos, and \$285.50 on Galloways. Subtracting from the prices of last year, the figures show a decline of Aberdeens of 41 per cent. over last April, and 37 per cent. over last November, while on Galloways the decline is 35 and 23 per cent. respectively."

The result, while very unsatisfactory and discouraging to the enterprising gentlemen who have imported these cattle, cannot be regarded as an indication of any loss of confidence upon the part of the public in the merits of the cattle themselves, or of any flagging in the interest with which they have been regarded. On the contrary, there has not been sufficient time for stock-men to have acquired any extended experience with them, and such as has been had has not been of a character to awaken any apprehensions of disappointment.

The large number offered for sale, as the *Indicator* observes, may have had something to do with this decline in values, but after all the number was not large, in fact insignificant compared with the number of Shorthorns continually disposed of at public sale, and we must evidently look beyond this for the real cause. The polled cattle were chiefly recommended for ranch purposes on the western plains. Whatever merit they may possess as farm cattle, very little was said of them in this connection, and their owners seem to have taken it for granted that where corn and grass was plenty and cattle were kept on enclosed lands, the Shorthorn left the general farmer little to desire, and accordingly cut out a new field for the polls, urging that they possessed superior qualities of endurance and capacities for thriving under unfavorable treatment, and were especially valuable for use on the plains and grazing ground of the far west, where the prevailing system required that cattle should be able to substantially care for themselves. We ourselves believe this is where these cattle will find their most appropriate and valuable field, and that very much is to be hoped for from their use in such localities, and still more, perhaps, in the more elevated mountain regions beyond, large areas of which furnish most excellent grazing, but which, on account of the steep hillsides and deep gulches, only very active and hardy cattle can utilize. But, as has been heretofore observed, the general farmers of the country are the largest purchasers of improved stock, and the enclosed farms where they and grain are to be fed constitute the great field which absorbs, almost as fast as produced, the rapidly increasing supplies of improved cattle. Compared with the vast host of animals required for this purpose, the number of animals required by the ranchman and plainsmen of the west is quite an insignificant number. In this field the Shorthorn men have been practically left to themselves, not necessarily because other breeds of cattle are wanting in merit in this direction, but because the friends of other breeds, with some few exceptions, have not sought to dispute the ground. And whatever may be thought of the ability of other breeds to contest with Shorthorns for the palm as farm cattle, it must be conceded that it can only be done on the basis of about the same prices. Very little headway can be made when, for the very poorest specimens of another breed, a price is demanded more than equal to that which will command a superior Shorthorn.

The polls, therefore, have only been pushed for a limited market, and they could not command that at the prices at which they could be afforded. The more enterprising ranchmen were willing to take sparingly, just enough to test the merits of the new candidates, but likely with little idea of ever attempting their general use, no matter how meritorious, until such time as prices would drop to something like those of other improved stocks. The plains people think they cannot afford to use high-priced bulls to turn loose on the range, where everybody's cows have the same benefit of service, and a very small relative number of calves can be secured. And those who breed bulls to sell to them find their views so conservative in the way of prices that they do not feel they can afford to employ the highest-priced stock for this purpose.

The hlock polls have come to stay, and despite this little setback, will make their way in the course of time, but while other good cattle are selling at moderate prices, it cannot be expected that they will be able to command, for any length of time, the long figures which they have heretofore commanded. Any breeders on the other side of the water, if they wish to see importations continue, and to encourage the dissemination of the breed in this country, must modify their views of values to suit the conditions existing here, and must not crowd importers to such a high figure that there is no prospect of realizing profit from the business.—*Breeders' Gazette*.

An ingenious writer in the *Agricultural Gazette* (England), argues that the Pollard cattle are the original type. He cites the fact that all horned breeds produced at times polled cattle, thus showing a tendency to revert to the original type. He thinks the horns are the result of feeding on soils that have a super-abundance of bone-forming material, and puts the data of the appearance of horns far back in the mythical past. He cites the fact that the Zebu has both the polled and horned forms, and that both forms appear in the Egyptian sculptures. He thinks the polled form is most common on the eastern shores of England, because it comes from the Baltic, and the original type has been less disturbed than in England.

An old farmer has made his granary distasteful to rats by daubing all the angles on the outside of the building with hot pine tar for the width of three or four inches, and also any seam or crack where a rat or mouse can stand to gnaw.

### Rations for Young Pigs.

Preparatory to weaning, pigs should be encouraged to eat food with the dam. They will learn to drink milk quite early, but do not take to eating solid food until some three weeks old. The great majority of farmers have skim-milk to feed young pigs; but in the absence of this best substitute for the milk of the dam, the solid food should be prepared by cooking. There are many rations which will be appropriate to young pigs without milk, such as wheat middlings, oats, and corn meal, in equal portions, cooked together; or 4 parts oats, 4 parts corn and 1 part oil meal, cooked; or 5 parts peas, 5 parts corn and 1 part flaxseed, cooked; or oats and peas ground together and cooked; or potatoes, corn endoatmeal, cooked; or 4 parts corn, 2 parts oats, and 1 part decorticated cotton-seed, and many other similar combinations of food. But corn meal alone is a very unprofitable ration for young pigs. The food should contain all the elements necessary to growing the frame and muscular system. Corn or corn meal is very inadequate for this purpose, it being 66 per cent. starch, 7 per cent. fat, and only about 10 per cent. nitrogenous food, with too small a portion of phosphate of lime to build the bones. We have seen the worst results from attempts to grow good pigs upon corn meal alone. We saw one case of three pigs fed upon corn meal, prepared in the best way, to induce them to eat largely of it, with the expectation of producing a large growth at an early age. The result was, that, at 130 days old, these pigs were mere squabs of fat, almost spherical in form, and their bones and muscles so weak that two of them could stand but a moment, and had to sit upon their haunches; yet these pigs only weighed 90 pounds each—at least 40 pounds less than if they had been fed a proper ration. It is very unskillful feeding that will not produce an average growth of one pound live weight per day. Length and breadth of body are necessary to build rapid growth upon. This development cannot be attained without the proper food.—*Stewart's Feeding Animals*.

### Beef Cattle in Nevada.

[Reno Gazette.]

Stockmen say it is a pinching time for beef cattle. George Humphrey has been scouring the ranges of western Nevada to meet the special demand which is just now being made by the butchers in the mining sections over the hill. Mr. Humphrey succeeded in finding fifty head on the Wood Brothers' range in Honey Lake, which he purchased last week, and they are now on their way in, to arrive Saturday. He has succeeded in getting together about two hundred head, including the Wood Brothers' cattle. McClintock is on his way in from Surprise valley with his hand of fat cattle, comprising two hundred and forty head, and will arrive on the meadows with them in about eight days. J. C. Woods, of the firm of Wood Bros., of Honey Lake, arrived in town yesterday on his way to San Francisco. Mr. Wood says that there is not a single beef left in Honey Lake valley suitable for market, nor in that whole section of the State, although the stock-cattle are looking fine, and the grass well advanced; it will be well along in July before any will be fit for market. Mr. Wood informs a reporter that there are not nearly as many stock-cattle in his section as there were this time last season, but the stock-men are all giving attention to the matter of improving the grades.

A correspondent, writing to an exchange, says: "I have a wagon of which, six years ago, the feloes shrunk so that the tires became loose. I gave it a good coat of hot oil, and every year since it has had a coat of oil or paint, sometimes both. The tires are tight yet, and they have not been set for eight years. Many farmers think that as soon as wagon feloes begin to shrink they must go at once to a blacksmith shop and get the tire set. Instead of doing that, which is often a damage to the wheel, causing them to dish, if they will get some linseed oil and heat it boiling hot, and give the feloes all the oil they can take, it will fill them up to their usual size and tighten to keep them from shrinking, also to keep out the water. If you do not wish to go to the trouble of mixing paint you can heat the oil and tie a rag to a stick and swab them over as long as they will take oil. A brush is more convenient to use, but a swab will answer if you do not wish to buy a brush. It is quite a saving of money to look after the wood work of farm machinery. Alternate wetting and drying injures and causes the best wood soon to decay and lose its strength unless kept well painted. It pays to keep a little on hand to oil fork handles, rakes, neck-yokes, whiffletrees, and any of the small tools on the farm that are more or less exposed."

Three-and-a-half per cent. is the average proportion of butter or fat found in a cow's milk, and 5½ per cent. is the highest which analytical tests have shown. Yet Prof. Arnold says, in the *Rural New Yorker*, it is possible that 200 pounds of Jersey or Guernsey milk might make 18 pounds of butter; but it is not at all probable that the milk of any breed in a normal condition ever contained 9 per cent. of fat. It is not necessary that 100 pounds of milk should contain 9 pounds of fat to enable it to produce 9 pounds of butter, because butter is not all fat. First it contains from ½ to 1 per cent. of casein and extractive matter, sugar and acid. It may easily contain 75 per cent. of these, 5.25 per cent. of salt, and 15 per cent. of water. It often contains from 10 to 20 per cent. of the last. Supposing a sample of butter to contain the above possible constituents, it would contain only 75 per cent. of fat, and this would require milk to contain only 7.32 per cent. of fat to enable 100 pounds of milk to make nine pounds of butter and leave 3 per cent. (the amount usually left) of fat in the skim milk. This would only call for milk .82 per cent. richer in fat than a sample analyzed, which I cannot doubt might exist.

Ensilage has come to stay. The instances of poor success with the silo, the cesses of spoiled ensilage, are not half so numerous in proportion to the number of experimenters as the percentage of poor, tasteless, greasy, rancid butter in the dairy districts. Why should a shiftless and uninformed farmer make his boast that he cannot preserve palatable ensilage, any more than others of his class should admit their inability to raise fine fruit or vegetables? There will always be a large percentage of farmers who fail of making a decided success of anything they undertake. This should not discourage bright men from making experiments.

Every dairymen should be familiar with the searching qualities of hot steam. Only tin vessels should be used in the dairy, and if hot steam can be forced into them once a day, there will be but little taint left to injure the milk or cream. We have tried this and know whereof we speak. Even the cheapest little steamer plays an important part where hot water and steam are needed, and they are both of prima necessity about the dairy, and should always be handy and in abundance.

The production of that always eslehle and highly valuable article known as "gilt-edge butter," does not depend alone upon the manipulation of the cream and the milk after they are produced, but it includes the food of the cows as well. Cows fed on soured vegetables or highly-flavored feed of any sort will not, of course, produce "gilt-edge" milk, and as a consequence, their milk will not make "gilt-edge butter." The question of fodder is the secret of the art. During the pasture season this question may be perfectly solved by the feeding of red clover in bloom. Long experience has shown that no other feed gives in so marked a degree all the qualities of color, consistency, texture, aroma, flavor and "fainty taste" as red clover in bloom.

There is no point about which the farmer is so apt to be in error as he is in his calculations of the temperature of wells and springs on his farm. He always thinks they are colder in summer and warmer in winter than they really are. The only possible means of approximating to the correct temperature is to put a thermometer in the water, testing for the greatest heat along in September, and for the greatest cold any time after January first, and before warm weather sets in. Many a man does his milk and butter a great injustice by over-estimating the cooling power of his spring or well water.—*American Dairymen, N. Y.*

The Centre Costa Agricultural Society held a meeting at Pacheco last Saturday, and elected the following officers for the ensuing year: President, Wilhelm Coven; first vice-president, James Tennent; second vice-president, George Wiley; secretary, W. W. Beauchamp; treasurer, T. Z. Wittan; directors, Fred Moses and John E. Martin. The society resolved to hold a fair this year, and to renew its membership in the National Trotting Association.

The cattle associations of Nevada, Idaho, Utah and Oregon are considering the question of joining together and making one association for the whole of them.

## SHEEP

### Washing Sheep Before Shearing.

An excellent paper by R. F. Roberts, contains the following: The questions of whether to wash sheep before shearing or not is one of so much importance that the wool grower cannot ignore its discussion. Washing sheep costs time and labor, and involves risk of injury to the health of the sheep and men who wash them. The operation is wholly repugnant to the nature of the sheep, and causes fright and shock to its nervous system. It is the opinion of many of our most experienced flock-masters that the chill produced by washing and process of drying the wool on the sheep is in a greater or less degree destructive of its vitality, often causing colds from which the sheep never recovers, and making it an easy prey to attacks of fetal disease. Observing wool growers have found that their flocks which had been thriving well up to the time of washing, had soon after lost in condition, and losses by death occurred.

The remedial virtues of kerosene are wonderful in healing any wound upon a sheep when freely applied to the surface. Flies will not blow it, and it will heal generally, without suppuration. And if the wound is deep or maggots are deep in the flesh or wound, it should be worked to the bottom. Then it will heal from the bottom out, and a new skin is formed. At times, wool is matted from an accumulation of excrement or continued wet weather; then blue flies are attracted to deposit their eggs, then very soon a colony of maggots is established; clip off the wool, saturate the surface, and the trouble is at an end.

The spring clip of 130,000 sheep belonging to Miller & Lux has just been finished at Firebaugh's Ferry, Fresno county, and the wool is being brought to this city for shipment. Eight car-loads were shipped Saturday and twenty-four more will be brought down as fast as Captain Hemilton can handle it. The wool goes by the southern route to New Orleans, thence to Boston. Miller & Lux this year employed ninety men as shearers; they clipped 4,000 sheep per day. The fleeces were of a year's growth and averaged about eight pounds, or over one million pounds of wool for the company.

### Splan's First Attempt.

"I see rubbing horses for Dan Mace," said Splan, "and one day an old gentleman who had taken a great deal of interest in me came along. 'Why don't you get a horse, Johnny,' he said, 'and be a driver yourself?'"

"I explained to him that it was almost impossible for a boy who had no influential friends, to obtain possession of a trotter. 'I have got two,' he said, 'my favorite team, Twang and Sting, and if you like I will let you train them.' Of course, I accepted his proposition eagerly, and lay awake half that night thinking over my good luck. The next morning this horses were sent to the track, and, boy-like I wanted to begin operations on them at once. So I harnessed Sting up to a sulky that I borrowed for the occasion from one of the trainers, and while this was being done took Twang out in the field inside the track and turned him out to grass, tying him by a long rope to a strong stake, which I drove into the ground. Then I went back and began driving Sting. I warned the old horse up pretty well, and then started to drive him a full mile. We got along very nicely until we came to the place where Twang was nibbling grass. The old horse saw his meta coming to a very unusual rate of speed, and as we neared him he gave a loud whinny and started in hot pursuit. When he had galloped the length of the rope that held him, there was a sudden stop. The stake to which the rope was tied held its own, and the result was that Twang turned a double somerset and broke his neck. Unconscious of the destruction that was going on behind me I drove Sting down the homestretch at his best rate of speed. After completing the mile and stopping the horse I found that the unusual exercise had made him dead lame, and from the way in which he limped it seemed highly probable to me that he would never recover. While bemoaning this fact a small boy who had witnessed the catastrophe to Twang came up and informed me of it. The next morning the old gentleman who took so much interest in me and who regarded me as a bright and ed promising boy came out to the track. He hurried Twang, led Sting limping home behind his buggy and my career as driver began and ended in one day."

Valuable and convenient.—Brown's Bronchial Troches are a safe and sure remedy for bronchitis, coughs, and other troubles of the throat and lungs. Sold only in boxes. Price 25 cents.

**BICYCLING.**

Howell also won the one-mile-championship race with commensurate ease. Duncan defeated De Civey, the French champion, after a hard struggle for second place. Wood and John Keene were unable to compete in any of the Wolverhampton events owing to the Leicester accident.

The International fifty-mile race held on Aylestone Grounds, Leicester, was secured by Battenshy, who showed excellent form in 3 h. 3 min. 26 3-5 sec. Wood and De Civey, who were the favorites, collided and thus lost all chance in the race.

The one-mile-race handicap held April 16th, at the Molyneux Grounds, Wolverhampton, was also secured by Howell in 2 min. 47 4-5 sec. from a large field of competitors, who ever conceded handicap all the way up to 240 yards.

On Monday April 14th, at the Aylestone Grounds, Leicester, the ten-mile race fell to Howell, with James second, and Duncan third. Time, 35 min. 24 3-5 sec. Wood eased up when he found he could not catch Howell.

The twenty-mile race which took place on the Belgrave Grounds was won by Howell rather handily in 1 h. 5 min. 33 4-5 sec. Duncan, who is wonderfully improved, defeated Lee's for second position.

Robert James, the English professional rider, will make his future home in Boston.

A heavy purse of not less than \$6,000 will be offered by the Cleveland Driving Park Association, on July 4th, for a team race between Mr. Frank Work's Edward and Dick Swiveller 2:16 1/2, Mr. William Rockefeller's Cleora and Independence 2:16 1/2, and John Rockefeller's and W. J. Gordon's team Midnight and Clingstone 2:18 1/2. This would bring out a team record-breaking race. If circumstances not foreseen should prevent this race, another between Mr. J. I. Case's black gelding Jay-Eye-See 2:10 1/2, and W. J. Gordon's hay gelding Clingstone 2:14, for an equally large purse, will be substituted. Clingstone is in the best possible condition, and in training.

The National Trotting Association has accepted its new Charter from the Connecticut Legislature. The Charter empowers the association to hold property to the amount of \$100,000.

Thomas H. Tongue, of Hillshoro, Or., has sold to Thos. Harris, Victoria, B. C., the two-year-old chestnut colt Glen Ashton by Glen Dudley, dam Lucy Ashton by Waverly, for \$550.

**STALLIONS THOROUGHBRED.**

**STALLIONS**

—AT—

**RANCHO DEL PASO.**  
For the Season of 1884.  
Thoroughbreds.  
**LONGFIELD.**

Chestnut horse, by MONARCHIST, be by Lexington.  
First dam, Dame Goulay (Blue Gown), by Planet.  
Second dam, Flora G., by Lexington.  
Third dam, Fanny G., by imp. Margrave.  
Fourth dam, Lances, by Lance.  
Fifth dam, Aurora, by Aratus.  
Sixth dam, Paragon, by imp. Buzzard.  
Seventh dam, Indiana, by Columbus (son of imp. Pantaloon).  
Eighth dam, Jane Hunt, by Hampton's Paragon.  
Ninth dam, Moll, by imp. Figure.  
Tenth dam, Slamerkin, by imp. Wildair.  
Eleventh dam, imp. Cub Mare, by Cub.  
Twelfth dam, Aramantibus, by Second.  
Thirteenth dam, by Starling.  
Fourteenth dam, by Croft's Partner.  
Fifteenth dam, by Greyhound.  
At \$50 the season, due at the time of service.

**JIM BROWNE.**

Chestnut horse, by FOSTER, be by Lexington.  
First dam, Flush, by Hiawatha.  
Second dam, Fanny Bugg, by imp. Ambassador.  
Third dam, Ida, by imp. Belshazzar.  
Fourth dam, Madame Bosley, by Sir Richard Tonson.  
Fifth dam, Nancy Niccol, by imp. Eagle.  
Sixth dam, Bet Bosley, by Wilke's Wonder.  
Seventh dam, by Chanicleer.  
Eighth dam, by imp. Sterling.  
Ninth dam, by Clodius.  
Tenth dam, by imp. Silver Eye.  
Eleventh dam, by Jolly Roger.  
Twelfth dam, by imp. Partner.  
Thirteenth dam, imp. Monkey.  
Fourteenth dam, an imp. mare from the stud of Harrison of Brandon.  
At \$50 the season, due at time of service.

**Trotting Stallions.**

**ECHO.**

Bay horse, by RYSDYK'S HAMBLETONIAN.  
First dam, Fanny Felter, by Magnolia, son of Seely's American Star.  
Second dam, by Webber's Kentucky Whip.  
Third dam, by Shakespear, son of Duroc, and out of a mare by Plato, son of imp. Messenger.  
At \$100 the season, due at time of service.

**ALGONA.**

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian.  
First dam, Emma Kinkad, by Conscript, son of Cassin M. Clay.  
Second dam, Effie Dean, by Mambrino Chief.  
Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy.  
At \$100 the season, due at time of service.

**ALASKA.**

Brown horse, by ELECTIONEER.  
First dam, by Washington, be by Geo. M. Patchen.  
Second dam, by Williamson's Belmont.  
At \$50 the season, due at time of service.  
The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents.  
John Mackey, Superintendent,  
Sacramento, Cal.

**THOROUGHBRED STALLION**

**X X.**

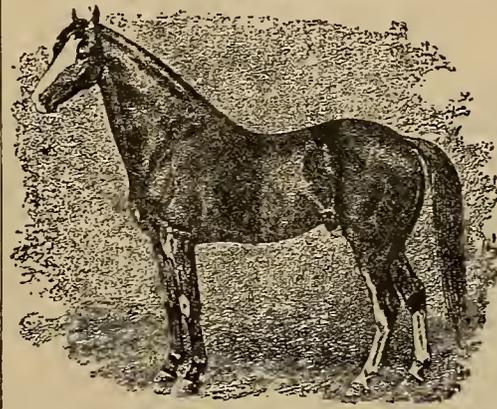

Pedigree.

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.  
First dam, Columbia, by imported Bonnie Scotland.  
Second dam, Young Fashion, by imported Monarch.  
Third dam, Fashion, by imported Trustee.  
Fourth dam, Bonnets of Blue, by Sir Charles.  
Fifth dam, Reality, by Sir Archy.  
Sixth dam, by imported Mealey.  
Seventh dam, by imported Centinel.  
Eighth dam, by Mark Anthony.  
Ninth dam, by imported Janns.  
Tenth dam, by imported Monkey.  
Eleventh dam, by imported Silvereye.  
Twelfth dam, by Spanker.  
See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the grandam of Anteo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauania, Bonnie Kate (the dam of Bonnie Lizzie), Aedes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding basins much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$30 the season.  
**JOSEPH CAIRN SIMPSON.**  
Oak Land or 508 Montgomery Street, San Francisco.

**The Thoroughbred Stallion**

**JOE HOOKER, BY MONDAY.**

First dam Mayflower, by imp. Eclipse.  
Second dam Hennie Farrow, by imp. Shamrock.  
Third dam Ida, by imp. Belshazzar.  
Fourth dam Gamma's dam, by Sir Richard.  
Fifth dam, by imp. Eagle.  
Sixth dam Bet Bosley, by Wilke's Wonder.  
Seventh dam, by Chanicleer.  
Eighth dam, by imp. Sterling.  
Ninth dam, by Clodius.  
Tenth dam, by imp. Silver Eye.  
Eleventh dam, by imp. Jolly Roger.  
Twelfth dam, by Partner.  
Thirteenth dam, by imp. Monkey.  
Fourteenth dam, imp. mare from the stud of Harrison of Brandon.  
**TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding.** Good pasture for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.  
My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freeport road.  
This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1883.  
**THEO. WINTERS,** Sacramento, Cal.

**BELLE MEADE**

**1884 STALLIONS. 1884**  
**BRAMBLE,**  
By imp. Bonnie Scotland, dam Ivy Leaf, by imp. Australian.  
**ENQUIRER,**

The sire of McWhirter, Fortuna, Harkaway, Falsetto, Blue Eyes, Pinafore, Getaway, W. P. Burch, etc.

**Imp. GREAT TOM,**

The sire of Gen. Harding, Thackeray, Swift, Tennyson, Trombone, Tarquin, etc.  
And the grand Race-horse,

**LUKE BLACKBURN,**

By imp. Bonnie Scotland, dam Nevada, by Lexington.  
Each of these horses will be bred to a limited number of approved mares, at

**\$100-The Season-\$100**

\$5 to the Groom.

Mares will be kept at reasonable charges during the season. The annual Sale of Belle Meade Yearling, 49 in number will take place April 30th. Catalogues of the sale will be issued to the public in due time. Address,

**W. G. HARDING,**  
Nashville, Tenn.

**The Thoroughbred Stallion**

**WILDIDLE.**

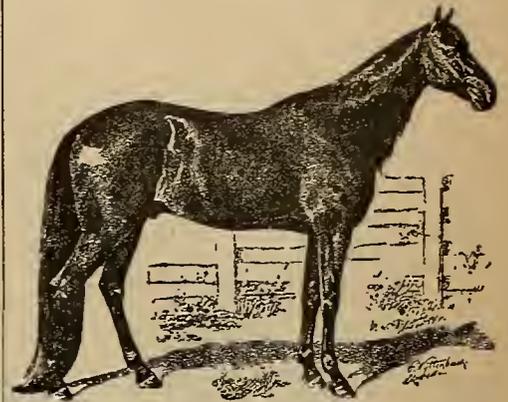

By imp. AUSTRALIAN. Dam Idlewild, by Lexington.  
This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.  
Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:42), at two years old, May D. (with a record of one and one-half miles in 2:30, the fastest on the Pacific Coast), Jim Douglas, Ella Deane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal.  
Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

**H. C. JUDSON, Owner, or**  
**W. L. APPELBY, Supl.,**  
P. O. Box 223. Santa Clara, Cal.

**TROTTING STALLIONS.**

**Mambrino Trotting Stallion**

**ABBOTSFORD.**

Record 2:19 1-2.

Will make the season of 1884, at the Ranch of S. B. Whipple; San Mateo, Cal.

**PEDIGREE.**

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Paymaster; dam Woodhine, (dam of Wedgewood, 2:19), by Woodford, son of Kocinsko, by Sir Archy.  
Mambrino Chief was mated with Woodhine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodhine, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Convoy 2:22 1/2; Magenta 2:24 1/2; Manired 2:25; Pancoast 2:25 1/2; Rachel 2:26 1/2; Inca 2:27; Lady McFairidge 2:29; Dacia 2:29 1/2; Geo. A. Aver 2:30. Woodford Mambrino was also the sire of Princeps, the sire of Trinket 2:31. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,330 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.  
Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:30 1/2; Commonwealth 2:32; Hiram Woodruff 2:35; Valley Chief 2:35; Faustina 2:28 1/2; Phil Sheridan, Jr., 2:30 1/2; Tom Malloy 2:30.

**TERMS.**

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

**WASH JAMES, Agent,**  
San Mateo, Cal.

**The Trotting-Bred Stallion**

**A. T. STEWART,**

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, sixteen and one-half hands high, and weighs over 1,300 pounds. Bred by D. L. Harris, of Fayette County, Kentucky. Foaled in 1872, and is an inbred Mambrino. Sired by Mambrino Patchen full brother of Lady Thorn, record 2:18 1/2, sire of Katie Middleton, 2:27, and nine in 2:30 list. Dam by Mambrino Chief, sire of Lady Thorn; second dam, by Young's Pilot, Jr., brother in blood to the sire of the dam of Maud S., 2:30 1/2. Mambrino Patchen sired by Mambrino Chief, he by Mambrino Paymaster, and he by Mambrino, thoroughbredson of imported Messenger.

Terms for the season, \$50.  
Address

**SOMERS & AN**

YACHTING.

The Cruise To-day.

There is to be a Martinez Cruise to-day under the auspices of the Pacific Yacht Club, as per the following sailing orders.

"The Yachts of the Pacific Yacht Club will assemble off Front street wharf on Saturday, May 17th, 1884, at 12 m.

At one o'clock a preparatory gun will be fired, and at 1:15 a second gun will be fired, at which signal the yachts will get under way and proceed direct to Martinez.

The time for hauling down and hoisting colors on the Yachts at sundown and at 8 A. M., will be taken from a signal-gun from the flag ship.

The Yachts will start from Martinez on their return on Sunday, May 18th, at 10:30 A. M. at 10:15 a preparatory gun will be fired, and at 10:30 the starting gun. Time will be taken on passing the Granger's wharf at Martinez.

The course will be direct to the club house, old Saucelito, passing home stake-boat, situated opposite Pacific Yacht Club house wharf, on starboard hand."

The yachts expected to start are the Annie, Aggie, Ariel, Nellie, Fleur de Lis, some few outsiders, and possibly the Lurlina and Halcyon. As the tide will be right both ways, a good time is looked for.

The Fleur de Lis and Ariel have been on the beach last week, near the Pacific Club house, cleaning and repairing generally. The Fleur de Lis on coming down from Vallejo on the last San Francisco Club cruise, struck on the upper end of South Hampton shoal and split her centerboard for about four feet. Her board is a wooden one with heavy sheet iron riveted to either side of it, and hitting the hard bottom turned this iron back. On the Pacific Opening Day her board was still in this condition, and from her good time under these circumstances all must acknowledge her fleetness. Last winter she was stripped and her timbers furred and she was then replanked. This gave her about six inches more beam, and although she seems to balk much more, she has been made much stiffer, a thing she badly needed. As the Ariel lays exposed at low water an opportunity is given to see her beautiful lines. She seems to run from the cutwater to the stern post without a lump or obstruction, and while looking at her thus it is a wonder that she does not go through the water faster than she does. The fault must lie in her sparring, but some time back Captain Turner took her in charge and after trying her for about a month put a new main-mast in her and changed her gaff main-sail to a Bermudian one, without seeming to accomplish much in the way of speed. Her copper is all rotting away, but as her owner never uses her and as copper is so very expensive, there seems no probability of new sheathing until she changes hands.

A great deal of trouble is experienced by yachtsmen in San Pablo and Suisun bays, and also in Carquinez straits, on account of the Italian fisherman's nets. These nets are frequently a quarter of a mile in length, and as they spread them in all directions without regard to channel or anything else except their own desires, and as, moreover, their name is Legion, it is almost impossible to avoid them without steering a very circuitous course; much delay is thus occasioned, making quite frequently, a test of speed almost impossible. If run over them with a cutwater boat is also awkward as they are liable to foul the board, and in that case one is not always free from personal injury, while failing this the chances are that your vessel may be burned or otherwise injured on her next visit to those waters as they are all very vindictive. The law allows them two-thirds of the channel, that is to say, a third measured from either shore, thus leaving the mid-channel third free of obstruction, but they pay not the slightest attention to this fact. If the Fish Commissioners would see to the enforcement of this law, they would confer a great boon on the yachtsmen.

The young men who have chartered the Thetis for this season seem to have little idea as regards yachting etiquette and usages. They were out last Wednesday flying a whip. As we before remarked in this column but one yacht in a locality should be allowed to fly a whip. This honor at present belongs to the Nellie, for although she has lately been frequently beaten in cruises and scrub races, she is still champion and will so remain until the hours are wrested from her in an arranged race, and over a set course. It may be that the young gentlemen have a similar idea as that entertained by some other amateurs who had the sloop Nellie some time ago, who when asked why they flew a whip, calmly replied: "Because we can beat every sloop in the bay except the Annie."

The Halcyon came down from her winter quarters last Tuesday, coming to Saucelito from Antioch in about eight hours. Mr. Tevis has changed his mind and intends putting her in commission this year. He will not put her in the dock just at present and the fresh water has not allowed anything but a little slime to collect on her bottom.

The Rambler, sloop Nellie and Spray went to Vallejo on Saturday last, the Nellie having ladies on board. Ladies' society on yacht board is very enjoyable, but we should think the Nellie would have too small and cramped for an over-night trip with them on board.

The Virginia since she changed her name from the one of brass and bluster, seems to have changed her habits and to prefer quiet cruising to hanging round the club houses. She spent last Wednesday off Point Cavallo, presumably fishing, as she was anchored there for some hours. It may be that her new owner is experimenting with her to ascertain whether or no any of her old time speed remains.

The Aggie and Lurline left Saucelito on Wednesday, and after cruising about started back again. To the windward of Angel Island the Lurline went to the head of the class, and the Aggie, as seen from shore, seemed to decline further contest, as she hauled down her jib and did not hoist it again until the Lurline was so far ahead as to make racing out of the question.

The Lotns Club went up to Vallejo on Tuesday night and came down on Wednesday. As they came down they passed the Ripple bound up, which latter boat put in to Vallejo and returned shortly. The weather experienced in San Pablo bay was very light, and as the flood tide was making the vessels failed to make the city until well into the night.

Capital Turf Club.

This club brought a successful meeting to a close last Saturday. The following are the events not published last week.

May 9th.—Pacing, for horses that have never beaten 2:20; purse, \$500. M. F. Odell's b g Shaker..... 1 1 1 M. M. Allen's dn g Johnny Weigle..... 2 2 2 S. G. Tryon's br g Prince..... 3 3 3 J. T. McIntosh's b g Fred Ackerman..... dist Henry McCann's br g Fairmount..... dist Time, 2:28, 2:29, 2:29.

The next race was the free-for-all trot, and it has provoked more comment than any or all the other events of the week. Accusations of irregularity have not been wanting, but from the evidence before us—and it is complete and satisfactory—it appears that Mr. Goldsmith simply erred in judgment. His horse had speed before the race, and seemed to have his foot at the beginning, but he was in no condition for a bruising fight and the heavy track and unreasonable scoring tired him out. Vanderlynn was the only horse in the race that was fit. Albert W., was in one of his rank moods and ran so much that he did not give up so perceptibly.

Trotting, free for all; purse, \$500. P. Farrell's b g Vanderlynn..... 3 2 1 2 2 1 1 J. A. Goldsmith's gr g Romero..... 1 1 3 3 2 2 A. Waldstein's b s Albert W..... 2 3 2 1 1 3 3 Time, 2:30, 2:28, 2:29, 2:32, 2:33, 2:30, 2:30.

Pools—First heat, Romero \$50, Field \$10. Second heat, (Romero barred) Albert W. \$40 Vanderlynn \$21.

Third heat, no betting. Fourth heat, Field \$130, Romero \$60.

Fifth heat, Field \$75, Romero \$50.

Sixth heat, Romero \$100, Field \$20.

The trot for the 2:27 class, which followed the vexatious free-for-all, was won handily by Sister.

Trotting, 2:27 class; purse, \$500. J. A. Goldsmith's b n Sister, by Admiral..... 3 1 1 1 W. E. Smith's b g Adair, by Electioneer..... 1 2 2 2 Addie Lee..... 1 2 2 2 George Leiby's bk g B. B., by Millman's Belfounder..... 2 3 3 3 Time, 2:33, 2:30, 2:28, 2:35.

Pools—First heat, Sister \$30, Adair \$24, B. B. \$23.

Second heat, Adair \$30, B. B. \$24, Sister \$21.

Third heat, Sister \$50, Field \$25.

The meeting closed with the pacing race for local horses.

Pacing, for horses owned in Sacramento county, that have never beaten 2:30; purse \$300. Worth Ober's b g Johnny Catchem, by Primus..... 4 1 2 1 1 A. Teiffen's bn Patti, by Crisman's Patchen 2 3 1 2 2 F. H. Slack's br g General Garfield, by Tecumseh..... 1 2 dist J. W. Wilson's b g Roden..... 3 dist P. Potter's cb s Ned Forrest..... dist Time, 2:43, 2:36, 2:35, 2:40, 2:38.

This closed the most successful meeting ever given by a local association in Sacramento. After paying all expenses and returning an assessment levied on the members as a guarantee fund before the meeting began, the club has a healthful cash balance in the treasury.

The Latonia Jockey Club Suspends Stoval.

In the fall of 1883 John Stoval, the jockey, stated in an investigation being had before the Executive Committee of the Louisville Jockey Club, and to different persons, that at the summer Saratoga races, and at the fall meeting of the Latonia Jockey Club, Mr. Ed. Corrigan, for whom he was riding, had requested him to pull horses. The statement went abroad, and was published in the leading newspapers.

Mr. Corrigan made complaint to the Latonia Jockey Club, and demanded an investigation. It appeared upon the hearing that Stoval had been discharged by Corrigan at Knoxville previous to making the statements.

The testimony of Stoval as to the alleged request made by Corrigan at Covington, Ky., was, in substance, that Corrigan, the evening previous to a purse race in which Corrigan's mare, Pearl Jennings, was entered, had asked him as to the probabilities of the race, and that he had responded that Pearl Jennings outclassed anything in the race, but that she was not in good form, and he thought Lizzie S. would outrun her; that Corrigan then stated that he usually hacked his own horses, but if that was Stoval's opinion he would hack Lizzie S.

Stoval further stated that this was the substance of the talk; that there was nothing said about pulling, and no express request for him to pull Pearl Jennings, but that he took it to mean that he must not let Pearl Jennings win, and he, next morning, told Corrigan he would not ride the race, and asked him to get another jockey, which he did.

Corrigan's testimony was to the effect that there was a talk between him and Stoval such as is usual about the race and the condition of the horses, but no intimation of a desire to have his mare pulled, or any thought of such a thing; that he did not back any horse in the race, and that he declined to back his own entry because of the opinion expressed by Stoval. Corrigan's testimony was corroborated by that of Mr. D. L. Hall, who stated that in the presence of Corrigan, R. C. Pate, and himself, in the Galt House, at Louisville, Stoval admitted his statements were false; that he had been led into making them by other parties, and that he would publicly retract them; but certain officers of the Louisville Jockey Club, he had reason to believe, were not friendly to him, and that if he did so they would rule him off for making a false statement before the committee of that club. The Executive Committee of the Latonia Club found that the statements of one who confessed that he had made no charges when twice asked to pull races by his employer, and who made them for the first time after he had been discharged, and who was proved to have extensively admitted their untruthfulness were maliciously false, and made with the view of injuring Mr. Corrigan, and suspended Stoval until the 1st day of August, 1884.—Cincinnati Enquirer, May 1st.

Among the special events set down for the July meeting at Chicago will be a match race between H. B. Winship and Frank, with running mates. The conditions are that the winner shall receive \$4,000, \$1,000 if 2:08; is beaten, and \$1,000 for every second better than 2:08. A fast and stout runner has been purchased to go with Winship.

The Sanita Anita Stable started eastward on the 9th inst. by the southern route. Mr. L. H. Titus accompanied them with Belle Echo, and has named her in the 2:24 class at the summer meeting of the Chicago Driving Park. The runners go direct to Covington where the meeting opens on the 23th.

Mr. J. I. Case has employed W. H. Crawford to look after the interests of Jay-Eya-See and the remainder of his stable this season. With Bither, to train and drive, and Crawford to attend to the financial matters, Mr. C. should be able to look on complacently.

Mr. H. B. Winship predicts that the trotter named after him will this season trot in 2:10 in harness, and confirms the reports as to Rosa Wilkes' excellent condition.

The thoroughbred chestnut horse Jim Brown, by Foster, dam Flash, by Hiawatha, is to be broken to harness and used as a buggy horse.

Delaney & Ayres have sent their thoroughbred mare Laura, by Shannon, dam Folly, to be bred to Wildidle.

BILLIARDS.

Now that the authorities have interfered in the gambling question, and consequently shut up the "Stud" games that have been, it would seem an unnecessary adjunct to a billiard hall, the ivorys are clicking livelier than they have in months. The professional players are not doing much of importance. A game took place last Tuesday evening, between William Roach and W. R. F. Lowry, for a purse of \$50. Roach has not done any match-playing for some time; however, he did very well on this occasion, showing his proficiency at the rail business. Lowry won the lead off with the black, and scored 17 points, which he followed three innings after with a run of 83, most of his caroms being made in open table play. Roach in the meantime made small runs, but in the fifth inning worked the balls down the left rail, making a run of 58 points. The game stood then, Lowry, 108, Roach, 84. From this point on Lowry kept the lead, defeating his opponent by 102 points in 400. Winner's average, 14 7-9; loser's average, 9 1-7.

On Thursday evening J. F. B. McCleery and W. R. F. Lowry crossed cues again in a 500-point game. Mac led off with the white, scored 3 points, Lowry following with 7. For the first few innings no remarkable playing was done, until the ninth inning, when McCleery worked the balls the whole length of the right rail, scoring 76 points, when he lost the rail, regaining it on the eighth carom, and completed a neat run of 128 points. Lowry followed this up by railing the balls, but he seems to disdain that rule of playing, and to use his expression, he "waded" in, and from that eighteenth point played the open table, scoring 103 points. The game was a very close one right through, each player answering a run with a run. The game was for a \$100 purse, and was won by Lowry in 35 innings, McCleery having 489 points to his credit. Winner's average, 14 2-7.

Emanuel Brunswick was called to Oregon last week on business, and the consequence is that the "Parisian" Pool Tournament bids fair to not take place, at least, for some time.

THE DRAMA.

The Oakland Theatre.

The manner in which the Sheridan Company has been patronized in Oakland speaks well for the taste of the citizens, and for the exertions of the performers. No doubt Sheridan is the greatest interpreter of Shakespeare we have on our stage, and it is fortunate he is strongly supported by his associates. In some cases Miss Davenport lacks the individual vitality that makes the great dramatist, but she is generally acceptable in her efforts. With Miss Phoebe Davies' talent in that direction all are familiar. Solongas Grismer is not the leading man, he also is generally acceptable. The only dummy in the company is Thayer, and the sooner he is removed the better. We hear loud and constant complaints of his insipidity. Next week Shylock will be given, which, in our opinion, is decidedly the best of Sheridan's great characters. Miss Charlotta Tittel takes Jessica, but there is not much in the character. No doubt this painstaking young actress will make the most of it.

Vienna Garden.

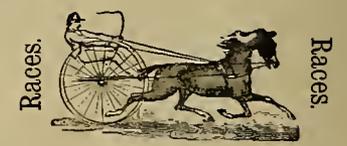

On Monday night the Archduke Joseph's Gypsy Band appeared at this popular resort, and the house has since been so crammed that on Wednesday night Mr. Fire Commissioner Siebe felt it was his duty to call upon Mr. Walters and urge extra caution against fire. We are not surprised that the furore to hear the Spanish Students at nominal prices is repeated to hear the Gypsy Band, for they are simply marvelous as interpreters of the violin. The profound silence and wrapt attention, even in the lower part of the hall where those generally congregated who go merely to chat and smoke, and while away an idle hour, is the best evidence that can be given of the power of the music, and its appreciation by the masses. We have never seen anything like it in the Vienna Garden before. As an evidence also that our people are always attracted by good music, the attendance is gratifying, made up as it is from the very best people in the city. The principle of family resort with refreshments in a free and easy, yet refined style, at nominal prices, is the best theatrical idea of the day, and will always be successful when the performance is worthy of patronage. Standing room, with very little of that, is now the order of things at the Vienna. The interludes are all good, in strict keeping with the principal performance, but we must leave them for special mention until next week, as well as the different pieces in which the band most distinguishes themselves.

Thoroughbred Berkshire Pigs.

I have now on hand, and offer for sale at reasonable prices, at my stock-farm, Oak Grove, San Mateo Co., a choice lot of pure Berkshire Pigs from two to twelve months old, bred from the best strains of Premium stock, which I import yearly from England direct. Apply to Wm. Corbitt, 218 California St., San Francisco.

Bay District Association

Summer Meeting

1884. 1884.

ENTRIES FOR TROTTING SEASON.

May 31st, 2:27 Class.

Purse \$750; divided \$450, \$225 and \$75, to first, second and third horse.

June 4th, 3:10 Class.

Purse \$500; divided \$350, \$100 and \$50, to first, second and third horse.

June 7th, 2:22 Class.

Purse \$500; divided \$350, \$100 and \$50, to first, second and third horse.

June 11th, 2:40 Class.

Purse \$500, divided \$350, \$100 and \$50, to first, second, and third horse.

June 14th, Free-for-all.

Purse \$1,000; divided \$650, to first, \$250 to second, and \$150 to third horse.

No. 13.—TROTTING RACE.—For all, mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second \$120, and third \$40.  
No. 14.—PACING RACE.—2:20 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second \$120, and third \$40.

**REMARKS AND CONDITIONS.**

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.

Horses distancing the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the Judges.

The Pacific Coast Blood Horse Association Rules to govern all Running Races.

Non-starters for Running Races will be held for entrance.

Non-starters must be declared on the day previous to the race they are engaged in, before eight o'clock P. M.

In all Running Races the second horse saves entrance.

No money paid for a race without a contest.

All entries for Races to close with the Secretary or President, at Chico, July 1st, 1884, at ten o'clock P. M.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

**C. C. MASON, PRESIDENT.**  
**ROLAND DILLER, SECRETARY.**

**SPRING Racing Meeting**  
OF THE  
**FRESNO FAIR GROUND Association**  
FRESNO, CAL.

May 20, 21, 22, 23, 24 and 25.

**First Day.**  
No. 1. Running—Ogle House Stake. For two-year-olds; \$15 each, \$150 added; dash of half a mile.  
No. 2. Trotting—Purse \$400; 2:40 class.

**Second Day.**  
No. 3. Running—Grand Central Stake. For all ages; \$15 each, \$150 added; dash of one and three-quarters miles.  
No. 4. Trotting—Purse \$200; free for all horses owned in Mariposa, Merced, Fresno, Tulare and Kern counties on the 1st of March, 1884.  
No. 5. Running—Colonies Stakes. For all ages; \$15 each, \$150 added; dash of one-quarter of a mile.

**Third Day.**  
No. 6. Running—Vineyard Stake. For all ages; \$15 each, \$150 added; mile heats.  
No. 7. Running—Fresno Saloon Stake. For two-year-olds; \$15 each, \$150 added; dash of three-quarters of a mile.  
No. 8. Trotting—Purse \$150; 3:00 class; open for horses owned in Mariposa, Merced, Fresno, Tulare and Kern counties on March 1st, 1884.

**Fourth Day.**  
No. 9. Running—Grady Opera House Stake. For all ages; \$10 each, \$100 added; dash of half a mile.  
No. 10. Dexter Stable Stakes; for all ages; \$15 each; \$150 added; dash of three-quarters of a mile.  
No. 11. Trotting—Purse \$1,000; 2:27 class; five to enter and three to start.

**Fifth Day.**  
No. 12. Running—Farmers' Bank Stake. For all ages; \$15 each, \$150 added; half-mile heats.  
No. 13. Pacing—Purse \$150; free for all pacers that have never beaten 2:20.  
No. 14. Trotting—Purse \$100; gentleman drivers; mile heats.

All trotting races are three in five; three or more to enter and start, unless otherwise specified. National Association rules to govern. All purses to be divided at the rate of sixty, thirty and ten per cent.  
All running races, not less than three to enter, and three to start. Pacific Blood-Horse Association rules to govern. In all running races second horse to save entrance.  
Entrance to all purses ten per cent., money to accompany the nominations; all entrants to be given in writing, giving name, color, and sex of horse; also name and residence of owner. **TRY AN ADVERTISEMENT**  
THE TURF AND SPORTING AUTHORITY,  
**THE BREEDER AND SPORTSMAN**

**THE NEW ZEALAND Stud and Pedigree Stock Co. LIMITED.**  
AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-born Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

**Fastest Time on Record.**

Martini-Henry, by Mnsket—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30, and beating a field of twenty-nine, thus lowering the previous best record of 3:30, by Darrivell (5 years), carrying 102 pounds, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to  
**P. H. BOURKE, Secretary,**  
Auckland, New Zealand.

**Harness, Saddles, Blankets, English Race Goods,**  
And everything necessary for horse or carriage use.  
**Horse Boots a Specialty.**  
Agent for Dr. Dixon's Condition Powders. Repairing promptly attended to.

**DIETZ'S PATENT**  
  
**CHECK HOOK.**  
Simple in its Structure and Practical in its Use.  
The horse never loosens the check-rein when this Check-Hook is used.  
Horsemen can appreciate the value of a Check-Hook of this kind.  
There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook.  
Orders sent to  
**A. C. DIETZ,**  
No. 9 Front St., San Francisco, Cal.  
Will receive prompt attention.  
When ordering state whether gold or silver plate required.

**STOCK AGENCY.**  
S. D. Bruce of the TURF, FIELD AND FARM, and author of the American Stud Book, offers his services in the purchasing of thoroughbreds and stock of all kinds. He selected and purchased Harry Bassett, Monarchist, Freakness, Joe Daniels, Hubbard, Katie Pease, Foxhall and many other good ones as yearlings. He will attend the sales of Chas. Reed, Belle Meade, Woodburn, Elmendorf and Runnymede. Address at New York, Box 274, until April 20th, Maxwell House, Nashville, to May 3d, and Phoenix Hotel, Lexington, Ky., until sales end.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

THE TROTTING STALLION

**SILVERHEEL**

Will make the season of 1884 at the DASHAWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland.

Silverheel is a dark bay, foaled July 5th 1876; bred by R. B. Chisholm of Kane County, Illinois. Sired by Wilson's Blue Bull, his dam Maggie Rice by Gage's Logan; grandam Fanny Stratford, a mare which had every mark of high breeding, and was the dam of John A. Rice that showed a 2:40 gait when two years old.

Logan by Rysdyk's Hambletonian; his dam Lady Wallace by Ohio Eclipse.

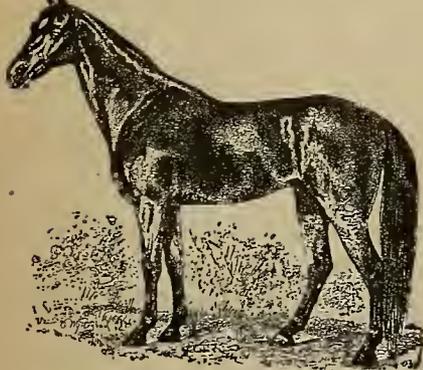

With little training when four years old, Silverheel showed three heats inside of 2:40.

TERMS.

Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

SACKRIDER & CHISHOLM.

Hambletonian Trotting Stallion

**BOB MASON**

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

TERMS.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

CHARLES J. ELLIS, Owner.  
WM. DONATHAN, Agent.

The Trotting Stallions

**Baywood and Fleetwood**

Will make the season of 1884, commencing February 1st, and ending July 1st, at the corner of Third and Empire streets, San Jose.

**BAYWOOD**

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover.

Sired by Nutwood; first dam by Geo. M. Patchen; second dam b Champion; third dam by Belmont.

**FLEETWOOD**

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model a perfect horse; high life, fine style and action, and looks like thoroughbred.

Sired by Nutwood. First dam Copper Bottom Mare, by Young America; second dam the Tillotson Mare, pedigree unknown but she was reported to have been bred in Kentucky.

Terms, \$25 for the season, or \$40 to insure.

E. S. SMITH, San Jose.

THE ELECTIONEER STALLION

**STANFORD**

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

TERMS.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), he by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont.  
Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred.  
Dam of Dave Hill by Vermont Hambletonian.  
Dam of Red Lion by Vermont Hambletonian.

J. J. FAIRBANKS, Agent.

Oakland, January 18, 1

The Trotting Stallions

**DIRECTOR AND MONROE CHIEF**

Will make the season of 1884 at

Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. The care will be taken to prevent accidents or escape, but no responsibility assumed should any occur.

Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallas, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:22 1/2), by Mambrino Chief; second dam by Potomac; third dam by Saxe Wiener.

Thorndale, 2:22 1/2, is the sire of Edwin Thorpe, 2:16, and Daisy Dale, 2:18 1/2.

Monroe Chief, 2:18 1-4.

Two-mile record, 4:45.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performances, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

JOHN A. GOLDSMITH,  
OAKLAND TROTTING PARK.

The Trotting Stallion

**BRIGADIER.**

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

TERMS.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

February 2d, 1884.

J. B. McDONALD.

2:20 1-4.

The Fast-Trotting Stallion

**ANTEEO.**

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairu Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond.

Second dam, Columbia, by imp. Bonnie Scotland.

Third dam, Young Fashion, by imp. Monarch.

Fourth dam, Fashion, by imp. Trustee.

Fifth dam, Bonnets o' Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley.

Eighth dam, by imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus.

Eleventh dam, by imp. Monkey.

Twelfth dam, by imp. Silvereye.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteoo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20 1/4, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

M. ROLLINS, Agent,  
Santa Rosa.

**MAMBRINO WILKES.**

DARK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE D. WILKES, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christiana, by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Ripton's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,200 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this present sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

TERMS.

\$40 for the season, or \$25 single service.

This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

A. I. HINDS, Agent.

The Trotting Stallion

**STEINWAY,**

With two-year-old record, third heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

TERMS.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County,

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McClevery & Noblett, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing mane and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Straffmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginian, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old, record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old, record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Straffmore is the sire of Santa Clara, 2:47 1/2; and Tucker, 2:39 1/2; Chestnut Hill, 2:24; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28; Henderson, 2:28; Straffmore, three-year-old, 2:29; and Stuart, three-year-old, 2:28. Stuart is full brother to Belnor, who trotted a mile in 2:52 1/2 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; is by Straffmore also. Straffmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23 1/2, and he in turn got Governor Sprague, record 2:20 1/2; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Straffmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

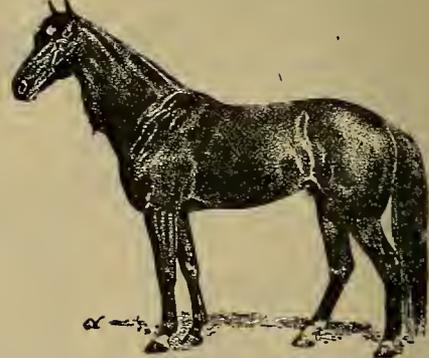

Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbena, Admiration, Mystery, in 2:39, 2:32, 2:31 1/2. Memento won the first heat. As three-year-old, at Sharsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30 1/2, 2:30 1/2. Steinway winning fourth, fifth and sixth heats, beating Jewett, Catby and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:29 1/2, 2:26 1/2; but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

Address

GEORGE WILEY,  
Cook Farm, Danville, Contra Costa Co., Cal.

THE TROTTING STALLIONS

**SINGLETON AND LA HARPE.**

Will make the coming season from February 1st to July 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Bisisiri, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Fride, yearling record 2:45 1/2) by Flaxtail, son of Frazier's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Leffler's Consul, by Shepperd's Consul.

Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

**LA HARPE**

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Famo, he by Alexander's Belmont (sire of Nutwood, he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Famo's dam Glory by Jackson's Western Star (son of Frazar's Western Star by Blackcock), first dam by Boanerges, 2nd dam by Gallatin (1811). La Harpe's dam Prairie Bird by Flaxtail (dam of Flight, 2:29, and Prompter, 2:33). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Leffler's Consul. Irwin's Tuckahoe by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

TERMS:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

J. T. MCINTOSH, Box 60, Chico, Cal.

**B. J. TREACY, PROPRIETOR.**

**THIS IS STRICTLY A BREEDING FARM, FOR** though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

## CRICKET.

### Union vs. Occident.

Last Saturday the Unions essayed with the Occident C. C. Waterman, the Occident captain, won the toss, and sent the Unions in to bat, and they only succeeded in scoring 28 runs, notwithstanding their long stay at the wickets, Veale securing 12 runs not out. The Occidents were more fortunate, and realized 58 runs, thanks to Sanderson, Purdy and Waterman. The bowling of the Unions was immeasurably superior to their previous performance on Thursday. The second innings of the Unions only produced 32 runs, notwithstanding the most sthhorn defense of a few of the batsmen. Luke played very nicely for his not out of 11, and Wilson, Veale and Fletcher each made 4. The latter generally scores when runs are at premium, as evidenced by his score of 3 out of a total of 11 runs in the second innings of the Union against the Grass Valley last September. The Occident C. C. only needed three runs to win, and which was secured without the loss of a wicket, the Occident C. C. winning by one run and 10 wickets. Owing to the sudden disappearance of the score sheets we are unable to give the complete bowling analysis. Carr's howling was most effective for the Occidents; Luke and Ellsworth shared the honors for the visitors. The following is the complete score:

OCCIDENT.		UNION.	
FIRST INNINGS.		SECOND INNINGS.

### The Unions Defeated.

The Union Club of Grass Valley arrived in the city May 13th, and were received by a few of the local cricketers. On Wednesday all the cricketers indulged in a little practice. Thursday the Unions and the Merions met for the second time. The day was beautifully fine. The Union captain having won the toss, decided upon sending the Merions to handle the willow. Hill and Spiro were the first to appear at the crease to the howling of Wilson and Luke. With the score of 17 Hill wandered out of his crease and was stumped by Veale. Burnett joined Spiro, and both completely collared by the howling, and the score had reached 56 before Burnett allowed an easy one to get by his defence. G. Theobald joined Spiro and at 70 the latter was stumped out after having made 40 runs by vigorous play. At the adjournment for lunch only five wickets were down for 96. Upon resuming the remaining Merione collapsed rather quickly, the telegraph showing 122 runs on the fall of the tenth wicket. G. Theobald, 25; Burnett, 17 and Barney Benjamin 11, played very carefully for their respective scores. Veale and Wilson were the first to uphold the batting interests of Grass Valley, and despite all the efforts of Hill and Benjamin with the leather

18 runs were compiled before a vacancy occurred. Reynolds, the new-comer, played very carefully, but soon lost his partner. Curnow now joined the left-hander, and the board showed 36 runs before the fall of the third wicket. The Merions began to get a little uneasy at the rapidly increasing score of the Unions. The fine stand made by the first men of the Union contingent was not backed up by the remaining batsmen, and at the fall of the last wicket only 50 runs were registered. Luke playing a very careful not out innings of 8. The Unions being the necessary number of runs behind their opponents were obliged to follow up, and were all disposed of in a remarkable short time for 14 runs only. G. Fletcher and Veale being the chief scorers, with four each. J. Mathieu, Barney and Ben Benjamin were the bowlers. The Merions then winning the game by one innings and 58 runs. Subjoined is the full score:

Umpire, B. Clarke. Scorers, Glasson and Holmes.  
We have received the following notice:  
Dear Sir:—A general meeting of cricketers will be held at the Occidental Hotel on Wednesday, May 28th, 1884, at 8 p. m., at which the report of the Provisional Committee on Constitution for a "California Cricketers' Association" will be submitted.  
WM. GREER HARRISON.  
President pro tem.

The Australian team are negotiating for a match with our local cricketers, on their arrival in this city, on their way back to Australia after their English campaign.  
The opening match of the season, between the Occidents and Merione, will probably take place next Saturday.

### The Grass Valley Cricketers.

The Grass Valley cricketers suffered defeat by both the local clubs, although they have considerably improved since their last match. The inclusion of Ellsworth and Wilson materially strengthens the howling and batting department of the team, while Luke has made good progress with the ball. The experience gained by them in a match with a local club is worth five matches played among themselves. The backing up of the team is very poor, and with a little more attention in that department they will be able to increase their score at least fifty per cent. The field was not placed to the best advantage, particularly the bowler, who, after delivering his over, was required to fill the position of long off and probably the last ball of the over would be hit so he would have to chase it. The foolishness of this is very apparent, and the captain should remedy this serious drawback to the howler next match. The Union team, although defeated, are not discouraged, but will practice indefatigably till they meet a local team in Grass Valley, when they will not be so seriously handicapped with our cobbles.

### H. M. S. Constance vs. Victoria.

The "Constance" were all disposed for 29 runs owing to the excellent howling of Campbell and Eherts. The Victorians compiled 220 runs, Bennett 64, Ebert 40 and Wootton not out 30, heading the list. The Constance had lost 6 wickets for 69 runs when the stumps were drawn. Scroggs scoring 37 not out out of that number. Scroggs, it will be remembered, played for the H. M. S. Swiftnre against San Francisco.

The cricket match played at Nicetown on May 9th, between the Philadelphia team, who sailed for their English campaign on May 17th, and a representative New York team captained by Cyril Wilson, resulted in a victory for the Philadelphia by one run and ten wickets. All New York—First innings, 49; second innings, 48. Philadelphia—First innings, 63; second innings, 2 wickets for 34. J. A. Scott 11 and 10; C. A. Newhall 11 and not out 19; J. B. Thayer 16 and 2, were the principal run getters for the Philadelphia team. Clarke and Lowry bowled for Philadelphia in the first innings with great success, and C. A. Newhall captured 7 wickets for 10 run in the second.

A return match was played next day, when the Philadelphia scored 136 runs in their first attempt; J. A. Scott 11, D. P. Stoever 15, C. A. Newhall 11, W. C. Morgan 37, H. MacNutt 37, were the chief scorers. All New York compiled 70, with Cyril Wilson 21 and Lambkin 16, before the last wicket fell. Stoever, Newhall, Clarke and Thayer bowled with the greatest success for the Philadelphians.

## BICYCLING.

There were 5,000 present at Washington May 20th, to witness the annual races of the L. A. W.  
Twenty-five-mile race, Championship Trophy.—Frazier of N. J., first. Time 1 hr. 38 min. 42 sec.  
Ten-mile race.—Brooks of Elmira, N. Y., first. Time 36 min. 3 sec.  
Three-mile race.—Hanna of Washington first. Time 10 min. 16 sec.  
One mile bicycle.—Hendee first. Time 3 min. 6 sec.  
One mile tricycle.—Hendee first. 3 min. 57 sec.  
Judging the time made in the races, the track must have been slow.

Owing to the non-appearance of Herbert at Blossburg, Pennsylvania, May 14th, Wm. Steele ran against the three-mile record of 15 min. 12 sec. made by George Hazael, and succeeded in lowering the record one second. Time, one mile in 4:50; two mile in 9:50; three mile in 15:11.

On May 14th, at the grounds of New York A. C., Taylor, with 19 yards start in 220 yards, succeeded in winning the ninth competition for Oelricks Diamond Medal. The medal has to be won three times before it becomes the property of the winner.

A great many complaints are being made and more particularly by the bicycle riders, of the poor condition of the Olympic Grounds, Oakland. If the track is to be in good condition for the games on the 30th, it will need constant preparation every day.

The very much advertised Woodside and Morgan professional bicyclists, who announced their intention of riding from N. Y. to San Francisco, terminated their trip abruptly at Washington, owing to want of financial patronage.

## TURF AND TRACK.

Bay colt, by Echo, dam Fashion filly, by Correct, E. Frisbie, Anderson; \$225.  
Brown filly, by Alaska, dam Drew Girl, by Wintthrop, J. T. Taylor, Contra Costa county; \$650.  
Bay filly, by Echo, dam sister to Ruth Ryan, by Lodi, W. A. Gamble, Sacramento; \$180.  
Bay colt, by Alaska, dam by Belmont, E. Frisbie, Anderson; \$160.  
Bay filly, by Echo, dam Half Moon, by General Dana, D. Brown, Petaluma; \$300.  
Bay filly, by Echo, dam Susie Allen, by Ethan Allen, Jr., G. Pacheco, Pacheco; \$175.  
Bay filly, by Echo, dam by Langford, Colonel H. I. Thornton, San Francisco; \$180.  
Bay filly, by Alaska, dam by St. Clair, Colonel H. I. Thornton, San Francisco; \$280.  
Brown filly, by Alaska, dam by Grinstead, J. Van Gordon, San Francisco; \$190.  
Bay colt, by Algona, dam Lola, by Geo. Patchen, Jr., James Duane, Sacramento; \$160.  
Bay filly, by Echo, dam Eila, by Speculation, E. M. Richmond, Sacramento; \$380.  
Brown colt, by Algona, dam Croole, by Tho Moor, J. Van Gordon, San Francisco; \$310.  
Bay colt, by Eebo, dam by St. Clair, John Mackey, Sacramento; \$225.  
Gray filly, by Echo, dam by Hubbard, D. Brown, Petaluma; \$350.

Chestnut colt, by Algona, dam Kittie Dixon, Captain Johnson, Stockton; \$110.  
Chestnut colt, by Algona, dam Bootb mare, John Mackey, Sacramento; \$125.

Bay filly, by Algona, dam Black Woodbine, by Reardon's Patchen, Col. H. I. Thornton, San Francisco; \$180.  
Bay filly, by Eebo, dam Nellie, by Muldoon, Geo. Poorman, Sacramento; \$175.  
Dun colt, by Alaska, dam Lady Gay, by David Hill, Jr., D. C. Voorhies, Sutter Creek; \$125.  
Bay filly, by Algona, dam Jeannette, by Kentucky Prince, G. Valensin, Arno; \$310.  
Bay filly, by Echo, dam Mary Ann, by Muldoon, E. M. Richmond, Sacramento; \$195.  
Chestnut filly, by Algona, dam Gertrude, by Volscian, J. Van Gordon, San Francisco; \$215.  
Bay colt, by Norwood, dam by Gen. McClellan, B. Horne, San Francisco; \$135.

## Spans.

Span of black geldings, five years old, John Boggs, Colusa; \$325.  
Span of gray geldings, five and six years old, Wm. Robinger, San Francisco; \$420.  
Span of dun geldings, five years old, Wm. Robinger, San Francisco; \$320.

## Work Horses.

Bay gelding, D. McCarty, San Francisco; \$100.  
Black gelding, F. H. Burke, San Francisco; \$140.  
Bay gelding, John Boggs, Colusa; \$145.  
Gray gelding, John Boggs, Colusa; \$190.  
Bay gelding, John Boggs, Colusa; \$185.  
Gray gelding, John Boggs, Colusa; \$150.  
Gray gelding, Con. Mooney, San Francisco; \$65.  
Brown gelding, D. McCarty, San Francisco; \$155.  
Bay gelding, D. McCarty, San Francisco; \$145.  
Black gelding, John Boggs, Colusa; \$200.  
Sorrel gelding, Capt. Johnson, Stockton; \$60.

## Scot Free.

From England comes some very pleasing reading anent the winner of the "Two Thousand," and the New York *Herald* correspondent discourses as follows. It is not the first time that the high-priced, bigly-vaunted youngster meets with defeat from one which did not cost one tenth as much, but in nearly every case when the breeding is closely scanned the discrepancy arose from circumstances favoring one and coming in the way of the other:

NEWMARKET, May 1st, 1884.—All the sporting prophets were dejected when Quicklime won the City and Suburban, for none of them had predicted the success of Lord Bradford's colt. All the sporting prophets were therefore elated when Scot Free won the Two Thousand, for half of them, at least, had foreseen his victory. The result of the first of the classical three-year-old races will do much to revive the drooping business of sporting prophecy.

As a two-year-old Scot Free did nothing worth mentioning. Twice defeated at Epsom and Ascot, his victory in the Great Sapling Plate at Sandown brought him little credit. It was not till he carried off the Crown Stakes at Newmarket a fortnight ago that his chance of winning the Two Thousand was canvassed at all. Yet he won that race more easily than it perhaps has ever been won before.

His sire Macgregor won the race in 1870. His grandsire Macaroni, won it in 1863. Chaloner, his trainer, was Macaroni's jockey, and afterward rode the winner on Moslem and Gang Forward. Scot Free was bought by Mr. Foy in 1882 for 250 guineas, and just before the race "Mr. Manton" offered 10,000 guineas to buy him and was refused.

These incidental matters added a certain interest to Scot Free's performance. But the race was chiefly memorable for Lord Falmouth's sale, which preceded it. When Cannon, the Danebury trainer, hid 8,500 guineas for Harvester, and Sir John Willoughby hid 8,600 guineas and at that price obtained the colt, there were many who thought that the Two Thousand was as good as run. It was the biggest sum ever given at public auction for a three-year-old, though not equaling the sums privately given by Mr. Chaplin for Breadalbane, and by the late Lord Hastings for that extraordinary animal Kangaroo, which ended its ignominious career between the shafts of a cab.

But on Tuesday morning sinister rumors went round the heath. Harvester had been tried and found wanting. He had been beaten in a gallop with two quite inferior animals from Choloner's stable. Some of the veterans opined that this was a ruse to influence the betting. But Sir John Willoughby's horses, though few, have been noted for "running straight," and those who had said that the Two Thousand was "all over but shouting" began to take heart again, and Harvester went down point after point in the betting.

As Harvester sank in public estimation St. Medard came into favor. A stoutly-bred son of Hermit, he had done little as a two-year-old. Nevertheless he was reported to have passed a good winter, and when it was known that Fred Archer would be "up," there was a rush for the Bedford Cottage colt. Archer's name is a talisman with many backers of horses. It matters very little what he may be riding. It is enough that he is riding at all. Archer is "up" and forthwith the money is "on."

Royal Fern owed his favor mainly to his victory in the Newmarket Biennial, two weeks ago. In that race he beat Wickham and Zedig, both very moderate animals. Last year he obtained some credit by his running in the Middle Park Plate, with Busybody, the crack three-year-old filly of Lord Falmouth's stable purchased by Mr. Baird for 8,800 guineas. Shortly afterward, however, he was easily beaten by Archiduc for the Criterion, and it was generally conceded that he lacked "staying" powers.

With the exception of Superba, Mr. Peck's filly, who had not been doing well during the winter, the only other entry which attracted notice in the Two Thousand was that of the Sister to Adelaide colt. This strapping son of Hermit ran second to Scot Free at Sandown Park last autumn. There was only a neck between them. Much money was in consequence invested in Sir George Chetwynd's colt when Scot Free won the Newmarket Craven Stakes.

Yet as the runners for the Two Thousand were brought into the paddock, no horse obtained anything like the admiration which was lavished on the son of Macgregor. He is a bay, without white, perfectly bloodlike, and exceptionally well-beloved. Harvester, the high-priced, sweated profusely after he was saddled; Superba was seen to have lost muscle during the winter, and some of the "knowing ones" shook their heads when they noticed that Scot Free had a habit of turning in his toes.

As for the race, it lay from the start at Scot Free's mercy. Ridden by Platt, a north country jockey, who supplied Fordham's place at the last moment, he won as he liked, leaving the second place to be hotly contested by St. Medard and

Harvester. It was one of the hollowest races ever seen, and though contested in the presence of a somewhat scanty assemblage, and on a day which, after many fair promises, ended in rain, it will be memorable for the speed with which it was run.

Scot Free's time was 1 min. 48 sec. Last year Galliard ran the race in 1 min. 50 2-5 sec. Shotover's time in 1882 was 1 min. 53 2-5 sec. Peregrine's time in 1881 was 1 min. 49 sec. This was regarded as remarkable time, and Scot Free has now lowered the record, which proves that a colt may be the best of his year and may at the same time turn in his toes.

Entries at Portland.

The purses to be contested for at City View Park, Portland, Oregon, on July 4th and 5th, closed with the following entries.

First Day.—Running Half-mile Dash—Prize \$300. Neyella, b f, 4, by California—Laura Barnes; R. E. Bybee. Blue Mountain Belle, br m, aged, by Napa—unknown; S. Jones. Jim Merritt, br g, aged, by Langford—Sweetwater; W. Johnson. Bogus, s g, aged, by Ophir—by Imbrie's Heenan; Murphy. Trotting—2:35 Class—Prize \$500. Johnny Blue, b g, aged, by Alexander, dam by Belmont; M. E. Raiter. Sunset, s g, aged, by Geo. M. Patchen, Jr., dam by Belmont; Dan McCarthy. Venita, h f, 4, by Almont, dam Tecora by Cassius M. Clay, Jr.; Jay Beach. Florence E., ch m, aged, by Pathfinder, dam by Jack Miner; J. Buchtel. Snowflake, ro m, aged, by Snowstorm; O. Smiley.

Second Day.—Running Three-quarter Mile Dash—Prize \$400. Neyella, b f, 4, by California—Laura Barnes; R. E. Bybee. Jim Merritt, br g, aged, by Langford—Sweetwater; Wm. Johnson. Forest King, br h, 5, by Monday—Abbie W., by Norfolk; S. Jones. Blue Mountain Belle, br m, aged, by Napa—unknown; S. Jones. Bogus, s g, aged, by Ophir—by Imbrie's Heenan; Murphy. Same Day—Trotting—2:30 Class—Prize \$500. Johnny Blue, b g, aged, by Alexander, dam by Belmont; M. E. Raiter. Florence E., ch m, aged, by Pathfinder, dam by Jack Miner; Jos. Buehnel. Altamont, b h, aged, by Almont, dam by Brown Chief; Jay Beach. Melrose, b g, 5, by Sultan, dam Fanny, by California Tenbroeck; Dan McCarthy.

Trotting at Portland, Oregon.

CITY VIEW PARK, May 11th.—Trotting, for named horses. Purses \$100. John Pender's b m May Wintler, by Rockwood, dam by St. Louis, 3 1 3 1 1. O. Stanley's h h Black Hawk, by Rockwood, dam the Fisher Mare, by the Jackson horse, 1 3 1 3 2. Geo. Misner's s m Lucy Weaver, 2 2 2 2 3. Time—2:49 1/2, 2:49 1/2, 2:52 1/2, 2:51, 2:49 1/2.

The Runnymede Yearling Sale.

LEXINGTON, Ky., May 13th, 1884.—The annual sale of the Runnymede yearlings took place to-day. The lot was an exceptionally good one, and in fine condition. The bidding was spirited and the prices high. The average was the best ever realized for the Billets in America:

- No. 1—Bay c by Billet, dam Lucille Western by Lexington; B. J. Treacy, \$1,650. No. 2—Bay c by Billet, dam Belle Palmer by Bonnie Scotland; Dwyer Brothers, 2,500. No. 3—Brown c by Billet, dam Broeck by Brown Dick; S. D. Bruce, 1,450. No. 4—Bay c by Billet, dam Mundane, by Lexington; W. S. Barnes, 1,200. No. 5—Bay colt by Billet, dam Mirah by imp. Phanton; W. S. Barnes, 600. No. 6—Brown c by Billet, dam Eppie L. by Surprise; Dwyer Brothers, 600. No. 7—Bay c by Billet, dam Lottie by King Tom; Preakness Stable, 1,150. No. 8—Brown f by Billet, dam Mercedes by Melbourne, Jr.; Dwyer Brothers, 3,500. No. 9—Bay f by Billet, dam Distraction by War Dance; Dwyer Brothers, 3,200. No. 10—Bay f, by Billet, dam Mary Clark by Lexington; W. S. Barnes, 2,500. No. 11—Bay f by Billet, dam Delight by Jack Malone; Edward Corrigan, 500. No. 12—Bay f by Billet, dam Emily Fuller by imp. Eclipse; Talbot Bros, 525. No. 13—Bay f by Billet, dam Jaconet by Leamington; Chinn & Morgan, 1,225. No. 14—Bay f by Billet or Bertram, dam Vassar by Virgil; Talbot Bros, 430. No. 15—Chestnut f by Billet or Bertram, dam Mattie Amelia by King Alfonso; John W. Turner, 275. No. 16—Chestnut f by Billet or Wanderer, dam Manhattan by Leamington; Talbot Bros, 425. No. 17—Bay f by Bertram, dam Good Bye by King Lear; S. D. Bruce, 260. No. 18—Buckler, b c, by Buckden, dam Waiting by Wanderer; not sold.

The guaranteed \$10,000 purse for the 2:20 class of the Charter Oak Park, closed with thirteen entries, viz: B. L. Sheldou, Rochester, N. Y.; Wm. S. Ridabock, R. A. Comp-ton, W. H. Snyder, W. B. Hanson and M. M. Hedges, all of New York city; J. H. Temple, Huntington, L. I.; E. Rood, Milwaukee, Wis.; W. Armstrong, Almont, Mich.; F. H. Kump, Kansas city; R. B. Conklin, Greenport, L. I.; J. J. Bowen, Boston, and Frank Duhme, Cincinnati, O. Among the horses now intended are Captain Lewis, Mand Messenger, Dan Smith, King Wilkes, Howard Jay, Ezra L., Captain Emmons, Adelaide, Lillian or Bronze, and Modoc or Tony Newell.

At a recent meeting of the stewards of the grand trotting circuit at Rochester, upon the motion of Mr. Fasig, of Cleveland, it was decided that the 2:19 class race should be changed from the regular programme; that the horse which won the first heat should be entitled to first money and go to the stable; that the horse which won the second heat should take second money, and likewise go to the stable, and so on, should there be more than three divisions of the purse.

Australian Notes.

Dates from Australia to April 23d arrived by the steamer last Sunday. The autumn meeting of the Australian Jockey Club occurred at Sydney, on April 14th, 16th, 18th and 19th, and was characterized by some fine sport, but no such startling performances as were frequent in the earlier meetings of the season at Melbourne. The following are the results of the principal events:

First Day.—The Autumn Stakes—Of 10 sovs. each, with 200 sovs. added. Second horse 50 sovs. from the prize. One mile and a half. Mr. J. Monaghan's br h Sardonyx, by Finborough—Onyx, 5 yrs., 129 lbs. 2 Mr. A. F. Smart's br c Archie, 3 yrs., 116 lbs. 1 Mr. W. Gannon's br h Sweet William, 5 yrs., 129 lbs. 3 Hon. James White's ch c Morpeth, 4 yrs., 126 lbs. 0 Mr. John Mondy's br c First Demon, 3 yrs., 116 lbs. 0 Mr. W. Branch's h f Little Sister, 3 yrs., 113 lbs. 0 Betting—5 to 4 on Morpeth, 4 to 1 against Sardonyx, 5 to 1 against Sweet William, 6 to 1 against Archie. Time—2:50 1/2.

The Champagne Stakes—Of 20 sovs. each, with 300 sovs. added. For two-year-olds. Six furlongs. Hon. J. White's ch f Emargo, by Maribynn—Guelder Rose, 122 lbs. 1 Hon. J. White's ch c Salvo, by Somms—Stella, 122 lbs. 1 Mr. W. R. Hall's h c Garfield, by Julian Avenel—Young Gossamer, 122 lbs. 3 Mr. J. Wilson's b c The Bey, by Goldsborough—Algeria, 122 lbs. 0 Mr. J. Crozier, Jr.'s ch c The Broker, by Goldsborough—Melody, 122 lbs. 0 Hon. J. Eale's br c Honeycomb, 6 yrs., 108 pounds (including 7 pounds penalty). 2 Mr. J. Monaghan's br h Sardonyx, 5 yrs., 122 pounds 3 Hon. J. White's ch c Morpeth, 4 yrs., 129 pounds 0 Mr. W. Gannon's br h Sweet William, 5 yrs., 124 pounds 0 Hon. J. White's b c Martini-Henry, 3 yrs., 122 pounds 0 Mr. W. R. Hall's h c King of the Vale, 4 yrs., 104 pounds 0 Mr. D. S. Wallace's b c Le Grand, 3 yrs., 117 pounds 0 Mr. W. C. Cooper's br b Stockdale, aged, 110 pounds 0 Mr. W. J. Forrester's b c Soldier Boy, 4 yrs., 111 pounds (including 3 pounds penalty). 3 Mr. J. Leek's h c Aide-de-Camp, 4 yrs., 107 pounds 0 Mr. J. Mondy's br c First Demon, 3 yrs., 105 pounds 0 Mr. J. Lang's h c King of the Vale, 4 yrs., 104 pounds 0 Mr. T. Shore's ch h Old Gold, 6 yrs., 103 pounds 0 Mr. T. Small's h b Polestar, aged, 101 pounds (carried 108 pounds) 0 Mr. W. Branch's h f Little Sister, 3 yrs., 101 pounds 0 Mr. Jas. Williams' b c Wheatmeat, 3 yrs., 98 pounds 0 Mr. J. W. Forrester's b g Here's Luck, 3 yrs., 96 pounds 0 Mr. W. Kite's b c Normanby, 4 yrs., 94 pounds 0 Mr. T. Sampson's br h Young Australian, 6 yrs., 86 pounds 0 Mr. Geo. Fagan's b or h r Phyllis, 4 yrs., 84 pounds 0 Betting—5 to 2 against Le Grand, 5 to 1 Empress, 6 to 1 Pell Mell, 20 to 1 Sardonyx, 12 to 1 Sweet William, Normanby and Morpeth, 14 to 1 Martini-Henry, First Demon and Here's Luck, 16 to 1 King of the Vale, 20 to 1 each Favo and Phyllis. Time—3:36.

The St. Leger Stakes—Of 30 sovs. each, for three-year-olds. Second to receive 60 sovs. One mile and three-quarters. Mr. D. S. Wallace's b c Le Grand, by Epigram—Legend, 122 lbs. 1 Hon. J. White's b c Martini-Henry, by Musket—Sylvia 122 lbs. 2 Betting—6 and 7 to 4 on Martini-Henry. Time—3:10 1/2.

Second day. Sydney Cup—Of 20 sovs. each, with 500 sovs. added; second horse to receive 50 sovs., and third horse 20 sovs. from the prize. Two miles. Mr. J. Monaghan's ch g Favo, by The Drummer—Romping Girl, 5 yrs., 128 pounds 1 Mr. J. Mayor's b m Empress, 6 yrs., 108 pounds (including 7 pounds penalty). 2 Mr. J. Monaghan's br h Sardonyx, 5 yrs., 122 pounds 3 Hon. J. White's ch c Morpeth, 4 yrs., 129 pounds 0 Mr. W. Gannon's br h Sweet William, 5 yrs., 124 pounds 0 Hon. J. White's b c Martini-Henry, 3 yrs., 122 pounds 0 Mr. W. R. Hall's h c King of the Vale, 4 yrs., 104 pounds 0 Mr. D. S. Wallace's b c Le Grand, 3 yrs., 117 pounds 0 Mr. W. C. Cooper's br b Stockdale, aged, 110 pounds 0 Mr. W. J. Forrester's b c Soldier Boy, 4 yrs., 111 pounds (including 3 pounds penalty). 3 Mr. J. Leek's h c Aide-de-Camp, 4 yrs., 107 pounds 0 Mr. J. Mondy's br c First Demon, 3 yrs., 105 pounds 0 Mr. J. Lang's h c King of the Vale, 4 yrs., 104 pounds 0 Mr. T. Shore's ch h Old Gold, 6 yrs., 103 pounds 0 Mr. T. Small's h b Polestar, aged, 101 pounds (carried 108 pounds) 0 Mr. W. Branch's h f Little Sister, 3 yrs., 101 pounds 0 Mr. Jas. Williams' b c Wheatmeat, 3 yrs., 98 pounds 0 Mr. J. W. Forrester's b g Here's Luck, 3 yrs., 96 pounds 0 Mr. W. Kite's b c Normanby, 4 yrs., 94 pounds 0 Mr. T. Sampson's br h Young Australian, 6 yrs., 86 pounds 0 Mr. Geo. Fagan's b or h r Phyllis, 4 yrs., 84 pounds 0 Betting—5 to 2 against Le Grand, 5 to 1 Empress, 6 to 1 Pell Mell, 20 to 1 Sardonyx, 12 to 1 Sweet William, Normanby and Morpeth, 14 to 1 Martini-Henry, First Demon and Here's Luck, 16 to 1 King of the Vale, 20 to 1 each Favo and Phyllis. Time—3:36.

Previous to the start light rain began to fall, and when Mr. Gannon took the twenty-one contestants in hand it had not moderated. In a few minutes he got them in a line and sent them off. Here's Luck, as is his custom, went off at score with Phyllis, Old Gold, First Demon and Favo following in that order. Up the hill and along the bend the pace was increased, but the positions were not materially altered, albeit there were eight or ten horses in close proximity, foremost amongst whom was Martini-Henry, who must have plaited his feet and fell, causing his stable companion to stumble over him and break his fore leg. Power, his rider, having his collar bone broken. The favorite at this stage was badly interfered with when running well, and dropped back last. Here's Luck and Old Gold, in the meantime, led into the straight. Past the stand the order was—Here's Luck, Old Gold, First Demon, Favo, Stockdale, and Normanby, with King of the Vale, Le Grand and Little Sister bringing up the rear. Rounding the turn and along the backstretch there was little alteration in the respective positions; but mounting the hill Le Grand began to improve his place along with Pell Mell. Here's Luck still maintained the pride of place over the hill, but Old Gold began to show symptoms of having had enough of it. Favo, at the home turn, ran up to Here's Luck and deprived him of his lead, and Le Grand showed prominently by running into second place, closely attended by the Hawkesbury winner. Ere they had gone far the mare supplanted the Epigram colt and set sail after the light weight, but could not get up, and Favo won somewhat easily by a couple of lengths. Sardonyx, who came with a great rush, was third, only a neck away, with Normanby, Here's Luck, Le Grand, King of the Vale, Sweet William, Phyllis, Pell Mell and Little Sister next. Polestar, Old Gold, Young Australian and Soldier Boy were the last to pass the post.

Third Day.—The Cumberland Stakes—Of 10 sovs. each, with 200 sovs. added. Second horse 50 sovs. from the prize. Two miles. Mr. D. S. Wallace's b c Le Grand, by Epigram—Legend, 3 yrs., 114 lbs. 1 Hon. James White's b c Martini-Henry, 3 yrs., 114 lbs. 2 Mr. J. Monaghan's br h Sardonyx, 5 yrs., 130 lbs. 3 Mr. W. R. Hall's h c King of the Vale, 4 yrs., 130 lbs. 0 Betting—5 to 4 on Le Grand, 2 to 1 against Martini-Henry. Time—3:40.

Fourth Day.—Australian Jockey Club Plate—Of 350 sovs. Second horse 100 sovs. from the prize. Weight for age. Three miles. Mr. D. S. Wallace's h c Le Grand, by Epigram—Legend, 3 yrs., 112 lbs. 1 Mr. J. Monaghan's br h Sardonyx, 5 yrs., 131 lbs. 2 Mr. W. Gannon's br h Sweet William, 5 yrs., 131 lbs. 3 Mr. W. R. Hall's b b Pell Mell, 5 yrs., 131 lbs. 0 Hon. Jas. White's b c Martini-Henry, 3 yrs., 112 lbs. 0 Betting—5 to 4 on Le Grand, 2 to 1 against Martini-Henry, 5 to 1 Sardonyx. Time—3:10 1/2, 3:05 1/2.

Trotting in Australia.

ELSTERNWICK PARK, April 5th.—Maiden trot, of 50 sovs. (in harness only), for colonial-bred horses that have never won an advertised prize. One mile heats, best two in three; sweep of two sovs. to go to second. Mr. T. Lancaster's bl g Black Tracker, aged, Lancaster 1 1 Mr. P. G. Roddy's bl m Lubra, aged, Roddy 2 2 Mr. Wilson's bl m Nellie, aged, Almont 3 0 Mr. F. Robbin's h g Sparrowhawk, 5 yrs, Robbins 0 0 Mr. F. J. Upjohn's ch g Serenader, aged, Upjohn 0 0 Mr. M. E. Albaugh's bl g Black Prince, 6 yrs., Albaugh 0 0 Mr. R. Bradfield's h m Sibyl, aged, Bradfield 0 0 Mr. P. G. Dixon's b m Maid of Mona, 6 yrs, Giles 0 0 Time—3:10 1/2, 3:05 1/2.

A match trot between double teams was set for May 3d, at Elsternwick. The stakes were \$250 a side, and the contestants Mr. F. Robbin's Brownawk and Sparrowhawk, and P. G. Dixon's Maid of Mona and mate. It is the first race of the kind ever made in the colonies.

Off Colmar split his hoof, and has been scratched for all engagements.

Sir John Astley's old horse the Scamp, who won several important races in the old country, notably the Goodwood Stakes, has been added to the list of imported stud-horses in New South Wales. Scamp is by The Rake from Lady Sophie, by King Tom from Bridle, by The Saddler.

Claims of the Morgans.

An Iowa man, who is wrapt in admiration for the Morgans, makes this presentation of the claims of that old family to distinction as turf horses:

Somewhere along about twenty-five years ago there was no family of horses in America so sought after as the Morgans. They proved themselves the most valuable horses in those times, for the purposes of the times. As roadsters and trotters they were unequalled, and for general use of the doctor, the farmer, the business man, or the sportsman, they were the horses they wanted.

They held their own for a long time, and even after the Hambletonian craze was about to drive all other horses into oblivion, the Morgans would not down; they were continually bobbing up serenely here and there as notable turf performers, and challenging their more favored rivals. It had gotten to be popular to call them horses of the past; that they were good-looking, trappy little fellows; good saddlers and good roadsters, but they had no speed. Even at this late date, in the light of experience, statistics and everything else, we hear the same stale and senseless statement reiterated, and that, too, by some of the gray heads in horse lore—men who, were it not for their prejudices, have the ability for doing great good.

It is believed by many that the Morgan horse is again returning to public favor, and the sooner he is reinstated as the best and most useful horse in the country the better, and the better it will be for the horse stock of the country.

The statement that he has not speed is utterly groundless, and it is only necessary to examine the records to disprove it. The following is a list of Morgan sires opposite their produce, and the number of heats they have trotted in 2:30 and better:

Table with columns 'Horses.' and 'Heats.' listing various sires and their number of heats, including Daniel Lambert (25 heats), Gen. Knox (11 heats), Winthrop Morrill (8 heats), Ethan Allen (6 heats), Son of Ethan Allen (6 heats), Goldust (5 heats), Magna Charta (5 heats), Ethan Allen, 473 (5 heats), Gen. McClellan (4 heats), Star of the West (4 heats), Gen. Morgan (3 heats), Revenge (3 heats), King Herod (3 heats), Abraham (3 heats), Clond Mambrino (3 heats), Black Hawk (3 heats), Vermont (3 heats), Fearnaught (3 heats), Ethan Allen, 35S (3 heats), Gray Messenger (3 heats), Gilbert Knox (3 heats), Sngrb (3 heats), Morrill (3 heats), American Ethra (3 heats), Brown Harry (3 heats), 2S sires, 2 each (56 heats), 12S sires, 1 each (12S heats).

The above horses are all direct descendants in the male line of Justin Morgan, and are to-day considered among the leading sires. Some of them have records themselves better than 2:30, and the great majority, if not all of them, were fast trotters. As an indication of their increasing speed and popularity is the fact that since 1882 forty-three new performers, with 552 heats, have been added to the list, and still they are coming.

The efficacy of the blood in brood-mares makes also a great showing. The records up to the close of 1883, show that out of the list of horses that have made a record of 2:30 or better, 127 of them are out of Morgan mares, whose sires trace directly back to old Justin, and 43 of the others carry the same blood in their veins through their second dams. There are also 42 sires out of Morgan mares that have sired 55 performers that have trotted 716 heats in 2:30 and better, besides a great number whose second dams were Morgan mares, notably among which is American Ethan with three, Bayard with three, and the Moor (bird dam) with four, besides hosts of other lesser lights, who owe, no doubt, a great deal to the Morgan blood they carry.

The only horses that were ever really sensational performers with running mates were Morgan's, viz: Ethan Allen, Frank and H. B. Winship. While this sort of a performance amounts to nothing as a test of speed, it does show that the horse who retains his balance and sticks to the trot while being dragged by a running horse from twelve to fifteen seconds faster than his speed, possesses the trotting instinct and natural trotting action to a remarkable degree. In this respect the Morgans have no rivals.

The Santa Anita String.

The following is the list of Santa Anita horses now in the east:

- Lucky B, 4, by Rutherford—Maggie Emerson. Gano, 4, by Grinstead—Santa Anita. Fallenleaf, 3, by Grinstead—Mollie McCarthy. Shenandoah, 3, by Shannon—Demirep. Freda, 3, by Wildidle—Frolic. Savana, 3, by Grinstead—Josie C. Maria Stuart, 3, by Grinstead—Sister to Clara D. Volante, 2, by Grinstead—Jennie D. Volante, 2, by Grinstead—Sister Anne. Rapido, 2, by Grinstead—Experiment. Mission Belle, 2, by Grinstead—Josie C. They will start at Covington, Chicago, Saratoga and Corey Island.

We printed an item last week to the effect that Jim Brown by Foster, dam Flush by Hiawatha was being broken to harness, and will be used as a utility buggy horse at Rancho del Paso. This is not the only representative of the son of Lexington and Verona has in the harness division. Mr. Ben Webb of Nashville, Tenn., owns a chestnut pacer, 15 1/2 hands, with a bald face, by Foster; his dam is a pacing mare of unknown breeding. He has paced a second mile in 2:30 1/2, and in 1:13.

Poscora Hayward is well patronized in Humboldt.

**National Association of Trotting-Horse Breeders.**

The stakes of this association closed on May 1st, and California is represented by the following nominations, all from Palo Alto.

Annual Nursery Stakes for 1885 (second payment), for three-year olds, foals of 1882.

Ch f Ahwaga by Gen. Benton, dam Irene by Mohawk Chief.

B f Alamira by Electioneer, dam Alameda Maid by Whipple's Hambletonian.

Br c Anteros by Electioneer, dam Columbine by A. W. Richmond.

Ch f Elsie by Gen. Benton, dam Elaine by Messenger Duroc.

Ch f Morgiana by Gen. Benton, dam Lady Morgan by Hambletonian.

Br f Manzanita by Electioneer, dam Mayflower by St. Clair.

Br c Antinous by Electioneer, dam American Girl by Toronto Sontag.

B f Ethel by Gen. Benton, dam Electra by Electioneer.

Br c St. Bell by Electioneer, dam Beautiful Bells by The Moor.

National Trotting Stallion Stakes for 1885 (second payment), for three-year olds, foals of 1882. Same entries as above.

The Stallion stakes for 1885 and 1886, for three and four-year-olds, of 1882 (second payment). All the above and also b c Norval by Electioneer, dam Norma by Alexander's Norman. All the Arno farm nominations were declared out, as also the following from Palo Alto: Woolsey, Glencair, Arbutus and Madrona.

The National Trotting Sires Stakes for 1886, for three-year olds, foals of 1883.

B c Sphinx by Electioneer, dam Sprite by Alexander's Alexander's Abdallah.

B c Kris Kringle by Electiancer, dam Lady Thorne, Jr., by Williams's Mambrino.

B c Clifton Bell by Electioneer, dam Clarabel by Alexander's Belmont.

B f Floweret by Electioneer, dam Mayflower by St. Clair.

B f Alma by Electioneer, dam Alvaretta by Geo. Lancaster.

B f Madeline by Electioneer, dam Mamie C. by imp. Hercules.

Br c Ivanhoe by Electioneer, dam Isma by Gen. Benton.

B f Rosemont by Piedmont, dam Beautiful Bells by The Moor.

B c Americus by Piedmont, dam American Girl by Toronto Sontag.

B f Belle Isle by Piedmont, dam Idabelle by Hambletonian.

Br f Glenda by Gen. Benton, dam Glencara by Mohawk Chief.

Ch f Maralia by Gen. Benton, dam Mayhelle by Electioneer.

B c May Dream by Gen. Benton, dam May Day by Wisabickon.

B f Lola by Gen. Benton, dam Lily by Electioneer.

The Annual Nursery Stakes for 1886; foals of 1883. Same nominations as in National Trotting Sires Stake.

The Juvenile Stakes, 1886, for foals of 1883 by stallions whose get have never beaten 2:30 at three years old or under.

B f Belle Isle by Piedmont, dam Idabelle by Hambletonian.

B f Rosemont by Piedmont, dam Beautiful Bells by The Moor.

Ch f Lora by Piedmont, dam Laura Keene by Hambletonian.

Ch f Lorita by Piedmont, dam Lady Lowell by the Capt. Schultz St. Clair colt.

B c Americus by Piedmont, dam American Girl by Toronto Sontag.

The Everett House Stakes, 1886, for foals of 1883, by stallions whose get have never beaten 2:45 at three years old or under.

Same nominations as in Juvenile Stakes.

The Matron Stakes, 1887, for foals of 1884, only the produce of mares subscribed for bred in 1883. Mares nominated:

Blk m Beautiful Bells by The Moor, dam Minnehaha by Bald Chief.

Br m Lola by Alexander's Norman, dam Kate Crockett by imp. Hooton.

Gr m Norma by Alexander's Norman, dam by Sir Wallace.

Gr m Midnight by Pilot, Jr., dam Twilight by Lexington.

B m May Queen by Alexander's Norman, dam Jennie by Crockett's Arabian.

Blk m Lady Thorne, Jr., by Williams's Mambrino, dam Kate by Highland Chief.

B m Addie by Hambletonian Chief, dam by Harry Clay.

Br m Brunette by Hambletonian, dam Kate by Bellair.

B m Glencora by Mohawk Chief, dam Lady Gilbert.

B m Idabelle by Hambletonian, dam Godfrey's Star by American Star.

Ch m Mc Ca by Almont, dam Dolly by Mambrino Chief.

B m Violet by Electioneer, dam Victress by Belmont.

The National Trotting Sires Stakes 1887, for foals of 1884, only by stallions enscribed for whose get have never beaten 2:30. Sires nominated:

Ch f Piedmont by Almont.

Br h Clay by Electioneer.

**A Lax and Injudicious System.**

How to bring about fair dealing, in the matter of book-betting, which has recently come into vogue at the east and bids fair to displace pool selling altogether in America—that is another question. To compel a man to start but one horse out of six entries in a dash race, as in one of heats, would be manifest injustice; and yet the public should be protected. The mon' or Burnbraes sounds the keynote when he says "it is not alone the book-makers and pool-rollers who invite the public to stake on the chances of the result, for owners encourage betting and participate largely themselves." Therefore the men who run horses must be reached by rules not now in vogue to compel them to deal fairly with the public. They must be compelled to declare to win and that within at least eighteen hours of the starting time. Then if they can not win with one horse let them win with the other; but first let them show some disposition to win, and there will be no danger of punishment. The race for the Withers Stakes at Jerome Park, five years ago, shows what a conscienceless man like James K. Keene can do with two horses. The race was a single dash for three-year-olds, and Keene had two entries—Spendthrift and Dan Sparling—the latter of which was hardly noticed in the betting. Spendthrift went away and made pace so strong that every other horse in the field was "pumped out," and then Sparling came in and won the race

while Spendthrift's neck was pulled double. Had I been a judge of that race I should have given Keene the stakes but declared off all pools and outside bets.

There has got to be something done about this matter and that before long, for there is too much capital invested in breeding farms to allow racing property to deteriorate, as it will, unless men are forced to be honest and keep faith with the public. Just now too much latitude is allowed on the ground that the public are not called on to pay the expenses of training horses, and therefore the temptation to perpetrate a swindle on the public is a strong one when this necromancy of horses is legalized by a lax and injudicious system that has gained ground by long practice. Men may argue precedents in its favor, but when the whole procedure is rotten to the core, those precedents should plead for its abolishment rather than its continuation. Should it go on in the next five years as it has in the past five (and evils of this class increase rather than abate of their own accord) there will be little or no sale for thoroughbred horses beyond use as gentlemen's hacks, for nobody will want to go to the races. The money invested in farms like Alexander's or the brothers Jackson, should take alarm at this growing evil and endeavor to see it righted.—T. B. Merry.

**Declarations at Chicago.**

Secretary Brewster of the Washington Park Club sends the following declarations to May 1st:

The Oakwood Handicap—L. W. Benson's Tris; P. A. Brady's Force; E. Corrigan's Freeland; E. Corrigan's Wedding Day; Chinn & Morgan's Markland; J. J. Carroll's Polonia; J. Carter's Beechenbrook; G. W. Darden & Co.'s Musk; G. W. Darden's Harry Gilmore; J. H. Green's Carley B.; J. B. Haggins's Hirondele; J. B. Haggins's Sweetbrier; J. B. Haggins's Duke of Monday; Chas. L. Hunt's April Fool; W. B. Jennings's Barney Aaron; W. B. Jennings's Ten Strike; R. A. Johnson & Co.'s Wapakonita; J. McMahon's Hilarity; J. McMahon's Joe Mitchell; Louis Martin's Aleck Ament; Morris & Patten's Mediator; Palo Alto Stock Farm's Phoebe Anderson; Perry & Walker's Long Knight; C. H. Pettengill's Fair Count; Rose Bud Stable's Japonica; J. B. Sherman's Brad; W. J. Welch's Jim Renwick.

The Great Western Handicap—P. A. Brady's Force; P. A. Brady's Matt McGinnis; Ira E. Brides' John Sullivan; Chinn & Morgan's Markland; J. J. Carroll's Annie G.; J. Carter's Monticello; Geo. W. Darden & Co.'s Harry Gilmore; J. B. Haggins's Duke of Monday; W. B. Jennings's Barney Aaron; T. J. McGibben's Ascalon; J. McMahon's Joe Mitchell; J. McMahon's Hilarity; Morris & Patten's Apollo; Louis Martin's Aleck Ament; Louis Martin's Exeter; Palo Alto's Glendair; Palo Alto's Rita; C. H. Pettengill's Duke of Montalhan; C. H. Pettengill's Fair Count; Rose Bud Stable's Japonica; J. B. Sherman's Brad; Whitten Bros.' Butter Bird; Wildwood Stable's Eros; Wildwood Stable's Pearl of Savoy; Milton Young's Maria D.

**Hambletonian's Credits.**

The statement is often made that Rysdyk's Hambletonian, which heads the list of successful trotting sires, only got thirty-six 2:30 performers from a total of 1,330 foals. A better idea of his speed-producing capacity may be obtained by adding to the above that he got sixty-eight sons which have each produced from one to twenty-six trotters, already found in the 2:30 list, besides twenty daughters that are represented by twenty-one animals with records of 2:30 or better. Four of his sons that have representatives in the charmed circle are found among the thirty-six 2:30 performers got by him. This leaves a total of 120 sons and daughters that are represented in the 2:30 list, either in person or by their offspring. By this it will be seen that about one out of every eleven of his get have either beaten 2:30 or produced offspring which have accomplished the feat, while four of his sons have done both.

Considering the excessive stud service to which he was subjected, it is surprising that he succeeded in producing anything of note after he was four years old. At two years of age he got three foals, among which was Alexander's Abdallah, sire of Goldsmith Maid and Almont. In his three-year-old form he produced thirteen foals. He made in all twenty-four seasons in the stud. Deducting the sixteen got his first two seasons, it leaves 1,314, which he produced in twenty-two years, an average of about sixty each year. The season he was four years old he was bred to 101 mares and produced seventy-eight foals. The season he was thirteen he was bred to 158; when fifteen to 150, and the following year to 217, the produce of the last year being 143 foals. Other stallions have produced more cheerful, spirited roadsters and animals more remarkable for style and beauty than he, but as a progenitor of trotters, considering the excesses to which he was subjected, no horse outside of the Hambletonian family can compare favorably with him.—Boston Cultivator.

Hugh Gaffney, the noted steeple-chase jockey, died lately in the city of Mexico, whither he had gone with some thoroughbreds. Gaffney was long one of the most successful cross-country riders. His first real success was with Lobelia, in 1870, and his set-tos with Harvey Welch never failed to arouse an outburst of enthusiasm, and "Go in Hughie, my hold boy!" "Arrah, Gaff, an' ye haven't black thief; now kill the dirty naggur!" were certain to ring out as the pair swept past Deadhead Hill. Biddy Malone succeeded Lobelia in Gaffney's affections, but she died early, and then he formed the famous alliance with Joe Donohue, which survived through the days of Tammany, Blind Tom and George West. Then came Deadhead. "Bedad, an' ye must look out fur 'm," he observed, when he committed Deadhead to Tom Little's care. "He's a little green, an' maybe he'll go wrong wid ye at the leps. Giv 'im a taste of the gad—kind o' aisey loike." For several years Gaffney was compelled to stand down. As a trainer, however, he continued to do well. But in 1881, at the termination of a race at Baltimore, he allowed his temper to overcome him, and struck Sait, for which he was ruled of the course. From that day Gaffney's star was destined to a perpetual eclipse, for all efforts to secure his reinstatement failed, and he accepted the engagement to go to Mexico from sheer necessity.—N. Y. Spirit.

Scot Free's win in the Two Thousand Guineas was history repeating itself. In 1863 Macaroni, the sire of Macgregor, won the Guineas ridden by Tom Chaloner. In 1870, Macgregor galloped off with the race, and in 1884, Scot Free, trained by Macaroni's rider, emulates his sire's example. Mr. Foy paid 250 guineas for Scot Free, and won one of the greatest prizes of the English Turf. Sir John Willoughby pays 5,000 guineas for Harvester and only gets third. It will be interesting to note how the speculative Sir John's great 3,600 guinea yearling, the filly by Hermit—Adelaide, now called Queen Adelaide, gets on in the Derby.

**Foals.**

**Trotters.**

At Rancho del Paso. Property of J. B. Haggin.

May 6th, bay colt, little white on inside of off hind foot, by Algona, dam Lady Glenn by Blackbird; grandam by Belmont.

May 8th, bay colt, by Algona, dam Cassidy mare by Young Nelson, he by John Nelson; grandam by St. Clair.

May 8th, chestnut filly, few white hairs in forehead, by Algona, dam Mollie by Speculation; grandam Asbeat by Rysdyk's Hambletonian.

May 9th, bay filly, dim star in forehead, by Exile, dam Young Nora by Inauguration; grandam Nora by imp. Glencoe.

May 9th, chestnut colt, by Algona, dam Lola by Geo. M. Patchen, Jr.; grandam by John Nelson.

May 9th, chestnut colt, both hind feet white, by Exile, dam Martha by Priam, he by Whipple's Hambletonian out of Rerevere by imp. Glencoe; grandam by Owendale.

May 10th, chestnut filly, star in forehead, by Algons, dam by John Nelson.

May 13th, bay filly, both hind feet white, by Algona, dam Jeannette by Kentucky Prince; grandam by Volunteer.

May 15th, chestnut filly, by Algona, dam by Nutwood; grandam by Volunteer.

May 15th, brown colt, star in forehead, right hind foot white, dam Miss Boyer by The Moor; grandam by Easton's David Hill.

May 15th, chestnut filly, star in forehead and snip on nose, by Exile, dam by Geo. M. Patchen, Jr.; grandam by Primme.

May 16th, bay filly, star in forehead and hind feet white, by Exile, dam Agusta by Gus; grandam Mollie by Speculation.

May 17th, chestnut filly, by Algona, dam Jennie G. by Echo.

May 19th, chestnut filly, left hind foot white, by Algona, dam Pete Nelson mare by John Nelson.

May 20th, chestnut filly, star in forehead, by Algona, dam Vixen by Geo. M. Patchen, Jr.; grandam Old Victress by Belmont.

May 21st, bay colt, star in forehead, by Echo, dam Marie Rose by Inca; grandam Cecelia Clark by Clark Chief.

May 21st, bay colt, dim star in forehead, Exile, dam Alice Brown by Whipple's Hambletonian, grandam Alice Daniels by Geo. M. Patchen, Jr.

**Thoroughbreds.**

February 10th, chestnut filly, star in forehead, hind feet white, by Jim Brown, dam by Monday; grandam Sister to Venture.

May 21st, chestnut colt, strip in face, hind feet white, by Jim Brown, dam Trampoline by Billy Cheatham; grandam Emma Taylor by imp. Glencoe.

**Names Claimed.**

By Thos. McCloskey, San Jose.

T. Mc. C. for bay colt no marks, foaled May 4th 1884, by Fallis, first dam by Wm. Kohl, second dam by imp. Hercules, third dam by Belmont. Wm. Kohl by Whipple's Hambletonian, dam by Gen. Taylor.

By Charles Frank, Oakland.

ABDALLAH FRANK for gray colt, foaled March 16th, 1884, by Engene Casserly. First dam by Gen. Dana, son of Whipple's Hambletonian, second dam by Williamson's Belmont.

Mr. Henry C. Jewett, well known as the owner of Jerome Eddy, 2:16, and proprietor of the Jewett Stock farm, at East Anrona, N. Y., recently purchased an extensive ranch in Kansas, upon which he will thereafter raise and develop the colts bred at his New York place. His idea is that horses are not, as a rule, salable until four or five years old, and that they can be brought to market from Kansas at that age much cheaper than they can be raised in New York state.

**ROWING.**

Speaking at a banquet given to Hanlan, Trickett declared he could honestly say that in no part of the world except England and Australia was there any law governing boat races. It is a poor man indeed that cannot make some excuse for being defeated. Trickett's excuse has the virtue of originality. Generally it is too much law that leads to people's downfall, but the long Australian implies that it was a lack of law that burst him up. When the man was in America he was not feted and wined by statesmen and the heads of the different communities, as Hanlan has been, but he was hospitality and fairly treated nevertheless. Whether the climate affected him, or what, is not known, but the fact remains that on this continent he proved himself not only a third or fourth class oarsman, but a first-class kicker.

Petersen seems to keep well in the shade as he is nowhere visible in the aquatic world just now. No movement has been as yet made toward arranging a match with Gandaur or any one else, a new and unexpected difficulty having presented itself in Petersen's inability to get a boat. When he first arrived in the east he sent an order to Ruddock for a shell, a duplicate of the one he was so unlucky to lose while training for his race with Lee, but it appears that the popular builder he has so many orders ahead that he cannot get the boat out for some time yet. Mr. Flynn will probably secure a shell, either by loan or purchase, from some other sculler.

The Australian championship having been settled on Beach, the race between him and Hanlan was expected to take place some time this month. The last steamer brought dates to April 19th, and the preliminaries had not all been arranged at that time. Hanlan's scheme to have all his races on the Nepean river, thirty miles from Sydney, devised for the more complete control of the steamers and other "gate money" appurtenance failed, Beach insisting that the race be rowed over the regular course on the Paramatta.

The South Enders are out with a challenge to row any crew on the coast a four-oared shell race for not less than \$250, the BREEDER AND SPORTSMAN Cnp, and the championship. They have posted \$50 as an earnest that they mean business. The report that the Alert Club of Vallejo would issue such a challenge has not been verified by events, and this action by the South End Club will establish the truth or untruth of the intimation.

Beach and Trickett rowed the final race to determine who should meet Hanlan, at Sydney on April 12th. Both men had been doing well in their preparations, and Trickett, a day or two previous to the race, had rowed the course under twenty minutes. Hanlan thought well of him and tipped him for a sure winner, but he failed utterly when the test came, Beach winning in the most hollow manner in 23:19.

T. E. Flynn leaves for the east by the southern route this afternoon. He will extend the trip to Europe, and does not expect to see San Francisco again before winter.

ATHLETICS.

Olympic Athletic Games.

The spring meeting of the Olympic Club will be held at their grounds, Oakland, next Friday, Decoration Day, when a long programme of sports will be contested.

One Hundred-Yards Maiden Race (open).—J. L. Allen, M. M. Martin, W. H. Newell, H. R. Hertel, A. C. Phillips.

One Mile Handicap Walk (open). P. N. Gaffney..... scratch C. B. Hill..... 125 yds. J. B. Benjamin..... scratch Wilton..... 125 yds.

Two Hundred and Twenty Yards Dash (special). In this dash M. K. Kittleman will endeavor to beat all existing records for this distance, both in England and America.

Half Mile Scratch Bicycle Race (open). W. R. Stewart..... scratch W. C. Lubbock..... 2 yards J. W. Flynn..... 4 yards A. L. Harris..... 5 yards

Two Miles Handicap Race (open). Ray Locke..... scratch R. Gibson..... 150 yds. T. Jennings..... 25 yds. E. Long..... 150 yds.

Five Mile Handicap Bicycle Race (open). H. C. Finkler..... scratch F. R. Cook..... 100 yds. Geo. Day..... scratch H. Tenny..... 250 yds.

Four Hundred and Forty Yards Scratch Race (open).—Ray Locke, W. R. Stewart, M. McLwaine, T. Jennings, B. A. Benjamin, T. McGovern.

All-Round Championship.

On Saturday afternoon, May 10th, a large and enthusiastic audience witnessed the all-round championship games of the Pastime Athletic Club.

One hundred-yards race—Thompson 6rst, Ford second, Jordan third. Time 10 4-5 sec.

Putting 16-pounds shot—Thompson, 37 ft. 7 3/4 in., first; Thornton, 31 ft. 8 in., second; Ford, 30 ft. 11 in., third.

Running wide jump—Ford, 22 ft. 2 1/2 in., first; Thompson, 21 ft. 2 1/2 in., second; Jordan, 20 ft. 11 in., third.

One hundred-yards hurdle race, eight hurdles—Thompson first, Jordan second. Time 13 4-5 sec. Ford was left at the starting post.

Throwing 16-pound hammer—Jordan, 77 ft. 0 1/2 in., first; Thompson, 68 ft. 9 in., second; Thornton, 67 ft. 8 in., third.

Running high jump—Ford, 5 ft. 6 in., first; Jordan, 5 ft. 4 in., second; Thornton, 5 ft. 3 in., third.

Throwing 56-pound weight—Thompson, 20 ft. 1 in., first; Ford, 19 ft., second; Thornton, 18 ft. 1 1/2 in., third.

Pole vaulting—Jordan and Thornton each cleared the bar at 7 ft.

Hop, skip and jump—Ford, 44 ft. 1 1/2 in., 6ret; Thornton, 42 ft. 9 in., second; Jordan, 40 ft. 8 3/4 in., third.

The points for the contest were arranged five for the first, three for the second, and one for the third. Consequently Thompson won the championship with 33 points, Ford with 22 points, secured second position, being closely pressed, however, by Jordan with 19 points.

Kittleman and Harmon Again.

Runmore have been afloat this week that Fred Harmon is training at San Jose with the intention of challenging Kittleman for another 100-yard race. It has not transpired, so far as we know, whether the statement has the authority of Harmon or his backers for a foundation or not.

The talk of return match between Kittleman and Johnson has ended in smoke. Johnson has made no answer to Kittleman's last proposition, which was to run the race in this city and allow Johnson \$500 for expenses.

Another Wonderful Performance.

At the second meeting of the London Athletic Club, held April 26th, W. G. George won the two-mile handicap race from the scratch in 9 min. 17 2-5 seconds, which beats his own best on record 8 1-5 sec.

The time for the last two distances only is the best on record.

We chanced in the Olympic Grounds last Wednesday afternoon, and saw a great many runners exercising for the approaching games. We were very much disgusted to notice the uniform worn by a very prominent athlete.

Professor Miller while engaged with Donald Dinnie in what the colonial press declare a square wrestling match, Græco Roman and Scotch styles, had his ankle badly broken on the fifth fall.

Maxwell, a member of the Royal Irish Constabulary, on April 19th, at the Queen's College sports, Cork, put the weight 43 ft. 5 in. Maxwell, who is a fine specimen of an athlete, will, according to Sport, leave shortly for America.

John Connors, who not long since defeated Bibby in a square wrestling match, has just skipped off to Europe with a considerable amount of his backer's money.

Steps are being taken in Australia for the purpose of sending Kenney, who recently won the swimming championship of Australia, to England to contest for the championship of the world.

At Ipswich, Australia, on the 17th of March, J. Wineke is credited with clearing 37 ft. 6 in. in three standing jumps. This jump lowers all previous Australian records.

In the all-round athletic championship contest Ford's 44 ft. 1 1/2 in. in a hop, skip and jump, breaks the amateur record of America.

At New Haven, May 10th, Yale whitewashed New York and thus won the first Inter-collegiate lacrosse championship game.

The Athletic and Olympic Clubs of Portland are preparing for a joint gymnastic exhibition for the night of May 29th.

The Lawn Tennis Club of San Rafael are erecting a new building on their grounds on Culloden Avenue.

YACHTING.

The Martinez Cruise of the Pacific Yacht Club, last Saturday, was a complete success. At one o'clock the following yachts were assembled at Front Street wharf: Lurline, Ariel, Nellie, Fleur de Lis, Annie, Eva, Elia and Emerald, the last three vessels, however, failing to start.

The Fleur de Lis was to windward made fast to a deep sea schooner alongside the Sea Wall, outside of her was the Ariel, and astern of her were the Lurline, Annie and Nellie. On the firing of the starting gun the Fleur de Lis, Lurline and Nellie, of course, made fine starts, followed shortly by the Annie.

The Ariel, however, fouled the fluke of her anchor under her fore foot and was compelled to heave to until it could be cleared, and to make matters worse was compelled to start back towards the city on the starboard track, so as to get way enough to go round; when she finally got started the other yachts were half way to the Island.

The Fleur de Lis stern is very abrupt, that is to say, she has but a very little overhang and as a consequence, there is very little deck room abaft the cockpit, and the main-sheet deck is close to the gun at the wheel; while jibing, the man in charge of the main-sheet neglected to pull it home taut, as is customary on large boats, and while Captain White was reaching with his right hand to get hold of a spoke to keep her off, the slack of the main-sheet took a turn around his wrist, dislocating it and breaking two or three of the atail bones.

Most men under these circumstances would have returned home for medical aid, but he courageously went on, never leaving the deck until Martinez was reached, where his arm was set. The only change in the relative positions of the yachts when Pinole was reached was that the Ariel and Casco had passed the Annie.

The fleet arrived as follows: Lurline 6rst with the Fleur de Lis about five minutes later, then the Nellie and the Ariel, the same distance roughly being between them all, and then the Casco and Annie close together. The Lurline, Nellie and Ariel all took up positions right in a line, the Lurline being the farthest upstream.

The Fleur de Lis anchored farther in shore with the Annie astern of her, while the Casco "dropped her hook" well out into the stream. Later on the Rambler, Whitewing, Ripple and Spray arrived, the former making the run from Saucelito in two hours and forty-five minutes, a remarkable run for a small vessel.

In spite of the fact that the inhabitants of Martinez had had a ball the preceding night, which kept them up till daybreak, Messrs. Bennett and Moore bestirred themselves, sent a salmon boat to Benicia for musicians, hired the Masonic Hall and scored the country for young ladies, who soon arrived in force.

This very pleasant dance broke up about twelve o'clock, when the yachtsmen returned on board. During the early part of the evening, say from seven to eleven, it blew half a gale, which was accompanied by thunder and lightning which seemed to come from every part of the heavens.

The start was delayed about twenty minutes to allow guests from the city to arrive. At about ten o'clock the Spray, Rambler, Whitewing and Ripple got under way and were followed soon afterward by the Casco. These vessels were met at Benicia by the Chispa which had been lying at Turner's

Waye. Owing to some misunderstanding the Lurline and Ariel broke bottom and got under eail before the firing of the Commodore's gun, and the latter, before she had catted her anchor, had shot with the strong ebb tide past the Granger's Wharf, the starting point, and fearing that their time had been taken, flattened right home and started on her way and was closely followed by the Lurline.

When these two vessels were about a quarter of a mile to windward of the starting point, the Commodore fired his gun, and the other vessels crossed the line as follows: Fleur de Lis, Annie and Nellie. The latter vessel, for some reason, after hoisting her anchor stood for quite a distance before the wind before sheeting home. Owing either to the dishonesty or the misconception of his orders, the man whom the Commodore paid to take time and telegraph the result to Saucelito, failed to do so, no really official time can be given.

Off Wheatport the Ariel was obliged to step down a peg and let the Lurline take first place, and off Vallejo straits the Fleur de Lis and Nellie cent her fourth in the procession. The relative positions then occupied by the yachts failed to change all the way to Raccoon straits. The Ariel and Nellie set stay-sails, but soon took them in as it was discovered that it set them too much to leeward, so all the schooners carried only the three lower sails, with the exception of the Lurline, which carries a flying-jib as a working eail.

Coming down San Pablo Bay was demonstrated what an error in judgment may do. Off Lone Tree Point the Annie, sailed by Fulton G. Berry, passed to leeward of the Ariel within hailing distance, and continued on a long leg on the starboard tack towards the Contra Costa shore, while the Ariel held her course until the channel from Petaluma creek was reached, and when going in stays the Annie was seen hull down.

After passing the Brothers, the Lurline, sailed by Captain Madtsen, an old river captain, made her only mistake, and stood in too close to the Marin shore, where she was compelled to slack her sheets and run to leeward, all the distance she had so laboriously gained in windward work. This elant of wind reached well across the bay, and White on the Fleur de Lis was prompt to take advantage of it, and stood on one tack from windward of Red Rock right into the straits. In this respect she was followed by the Ariel. The Lurline was the 6rst into the straits and ran into a calm streak, which is frequently a feature of the locality, and as the flood tide was making, she began to fall astern.

Here she was overhauled by the Fleur de Lis which kept in shore in the ebb eddy as long as possible, and on getting into the flood tide and calm, she hauled up her board thus giving the tide a little surface to act on as possible, so that when the wind struck her again she had a decided advantage over her larger rival, which she maintained to the finish. The wind, coming down Hurricane Gulch, caused the stake boat to go rapidly to leeward, so the last boats home had about one-quarter of a mile less windward work to do than the leaders.

The fleet arrived as follows: Fleur de Lis 3:10.45, Lurline 3:14.15, Nellie 3:36.00 and the Ariel and Annie "neck and neck," the latter being to leeward. For reasons heretofore stated no official actual sailing time can be given, but the Lurline undoubtedly, while in open water and with equal wind, proved herself to be the flyer of the lot, in spite of the fact that the Fleur de Lis gained 6rst honors. As regards the Nellie we think that Murphy is experimenting too much with her. She had reached her "top notch" about two years ago, and any change made after that, must necessarily, if she cannot be further improved, tend to hurt her.

A great many regrets were heard that the Aggie had remained at home, as this would have been a splendid chance to test her sailing qualities, but her owner has a "game" leg and was afraid to undertake such a cruise as this for fear of injuring it still more. We noticed in the dailies that time-allowance is given, under authority of the Secretary of the club, to the smaller yachts at the rate of three-quarters of a minute to the foot in length. This is most palpably a mistake; no time-allowance whatever should be given or asked for on cruises; moreover, in any case we fail to see by what manner of calculation they should allow the same amount exactly of time-allowance, ever a thirty-three (roughly speaking) dead to windward course, as they do over the club course which has only about eight or nine miles of windward work. We presume, however, it is a little sop to the Commodore, thereby making him come in second.

The Ripple in spite of her small sail area, does not seem ballasted sufficiently. On last Sunday while off the Brothers, she was knocked down very hard several times, but came up all right. She finally got down her main-sail and proceeded under gih and driver. There seemed to be more wind in her locality than in others, but this may have been an effort of Boreas to obliterate from the face of the waters those abominable men-of-war costumes adopted by her crew. They, however, are probably passing through all the changes that an amateur yachtsman does, and will make really 6ue sailors in the end. One of the prettiest sights of last Saturday's cruise was to see the Casco and Ariel both on the starboard tack coming from Pinole to Carqueinez straits. The Casco carried, in addition to her working canvas, flying-jib, gaff-top-sail, and stay-sail, while the Ariel carried jib, top-sail and stay-sail; the latter, an immense one, was set "Fisherman's style," and seemed to left her a couple of strikes out of the water.

The latter, roughly judging by the distance between the boats, when she fairly got started, and at the finish made about as good time going up free as any of the vessels except the Lurline, but she failed lamentably on the wind. The Thetis seemed again to get into trouble last Saturday. They started up the bay, presumably for Martinez, but were knocked down frequently, and every time this happened they shot her into the wind, so that instead of making the Brothers they came to about San Quentin Point, and there came about and stood tack to the city, with their main-boom in the water. The Lotus Club, who were out in the Eva, stood by expecting to have to pick them up, but all reached home without any accident. The San Francisco Club has at last awakened from its long lethargy, and is proceeding to repile the Club House. Some improvements are to be made, the principal of which is widening the passage from the shore to the point of the Club House.

A proposition has been made by Mr. Mervin Donahue that should meet with favor. He says that he will present to any bona fide yacht club, for small yachts, an acre of land at Tibron Point, if they will agree to build a bonse aud wharf. This is a very liberal offer, but as most of the owners of small yachts are clerks on a salary, it is quite an undertaking to promise to build the necessary structures for a yacht club. However, if the young men interested in yachting would meet together and regularly organize, no matter whether they own yachts or not, they would probably be enabled to get subscriptions from liberal-minded men who are interested in such matters. There is an old but very true saying "what is everybody's work is no body's work," and it may be difficult to get anyone to take the matter in hand. It is a pity that Donahue has gone so far in the matter, he might as well have offered the organization of the club.

THE GUN.

The Game Law.

Blank indicates open season. Star (\*) indicates close season.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, etc.).

The Match at Oakland Park.

The leading event of the week among our gun men was the match between Burbank and Kerrigan, both men of reputation at the trap in our local circles, last Sunday, at the Oakland race track. The match excited considerable interest.

Score table for Burbank vs Kerrigan match, showing kills in different barrels.

After the match there were two freeze-outs in which some fine shooting was done by Mr. Tom Pearson and Dr. Slade. There were six entries altogether in the first, Messrs. Ayer, Rix, Fay and Fuller, besides the two mentioned, at \$5 entrance, with two pools \$20 and \$10.

Another Match.

Since the match on Sunday another one has been made, with the same conditions, between Burbank and Fay, to come off at the Oakland race track, on the second Sunday in June.

At Bird's Point.

On Saturday last the Neophyte Club held their regular monthly medal shoot at Bird's Point. Because one or two inexperienced men shot in the match, and some scores were low, the "crack" daily, as it calls itself, says the club is rightly named.

On Saturday the birds were a good lot, and the strong wind so generally coming off the bay across the grounds made them still more lively. In the shooting Upham was a little out of his usual form, though he only used his second barrel once for the nine birds he killed.

shooting off Haskell killed his four birds and captured the first medal, Roche taking second. H. H. Briggs acted as referee, and Adams judge. Considering the picnic attractions all round the bay, the attendance was good.

Score table for Lincoln Gun Club shoot, listing names and scores.

Lincoln Gun Club.

The Lincoln Gun Club held its monthly shoot at Colma last Sunday, shooting at 15 clay pigeons, 15 yards rise. The shooting all through was very good, but owing to a strong wind that was blowing there were not as good scores made as was expected.

Score table for Lincoln Gun Club shoot, listing names and scores.

Score table for Lincoln Gun Club shoot, listing names and scores.

Does The Chance Suit?

Grizzly bears are killing cattle by the wholesale in Sprague river valley, Oregon, one stock-riser having lost four cows in this way in one week. The citizens of that section now offer a reward of \$20 for every grizzly killed in the stock range of that valley.

At Colusa.

The Gun Club of Colusa had a live pigeon match last Sunday. Although this is one of the most energetic clubs in the State in connection with enforcing the game laws, and has a sound financial standing, it is, somehow, less reported than almost any club we know.

The Louisville Tournament.

The annual shooting tournament of the Louisville Sportsman's Association will be inaugurated at the Jockey Club race-course, Louisville, Ky., June 2d, continuing to June 9th inclusive. The programme promises the most interesting shoot of the season, with the contest for "The American Championship," and "The American Field Cup" as the big features.

We should like California to have been well represented on this occasion. So far we have not heard of any of our cracks going, though many have received circulars inviting them.

A tale is going the rounds of our local press, about a large black bear having swam across the bay from Marin county, and taken to the hills west of the city. Philo Jacoby did go out after bruin with his rifle, and claims getting on the brute's tracks leading in the direction of Half Moon Bay.

We stated a fortnight ago that Mr. Kelly was about to establish rooms where the sportsmen of the interior and city can make their headquarters. Mr. Kelly's place of business is 871 Market, a few doors north of Fifth street.

Some evil disposed person or persons have been raiding certain wood-sheds near Alameda, of late. To get even and find out the offender, the owners loaded some sticks heavily with powder and waited results. The next thing, as if dynamite fiends were round, certain stoves were blown to pieces.

A sportsman of an investigating turn of mind says: "There are 85 charge of 3 drachms, 92 of 2 1/2 drachms, 102 of 2 1/2 drachms, 112 of 2 1/2 drachms and 126 of 2 drachme in a pound of powder. Sportsmen who are of an economical turn can, therefore, easily estimate the saving achieved by loading their own cartridges."

Snipe, on most of their favorite haunts in the State, have been extraordinarily scarce this spring. They are now, however, reported moderately plentiful near the Union House, on the Stockton, immediately outside Sacramento. We pity those snipe.

In some countie doves are getting nmerous, and the prospect of good shooting is better than last year. A friend who has just been to Modesta informs us they are still extremely scarce in that section of the State.

THE RIFLE.

The Schuetzen Prizes.

The excitement of the great meetings at Shell Monnd and Schnetzen Park of the previous week, and the exertions of our riflemen at them, left the ranges almost deserted last Sunday, and matters in our rifle world very dull. The only thing of note was the ball and distribution of prizes of the Schuetzen Verein closing their two days' festival. This took place at Turn Verein Hall, on Turk street, last Saturday.

The winners of the money purses at the bowling alley during the festival, were A. Grantz, J. A. Rober, F. Beckman, L. Haake, H. Kahn, J. Platt, Joseph Alldrich, Wm. Gaus, and J. G. Maass. Some of the leading prizes were costly, all were handsome, and took the usual wide range of character on such occasions.

At Schuetzen Park.

On Sunday the California Schuetzen Club held a prize-shooting match for the best centers, at Schueuzen Park, Alameda, with the following results: First prize, D. Schoenfeldt; second, Strecker; third, Ehrenpfort; fourth, H. Rapp; fifth, P. Golly; sixth, Lingensfeldt; seventh, Bertelso; eighth, Wertheimer; ninth, J. Utschig; tenth, Beckmann; eleventh, Barnett; twelfth, Knhls; thirteenth, Gumbel; fourteenth, Beckmann; fifteenth, Adams; sixteenth, Pollack; seventeenth, Bell; eighteenth, Stanton; nineteenth, Smith; twentieth, Klotz.

The California Rifle Association Board of Directors met at Col. Dickenson's office last Monday evening, at 8 P. M., to settle up the affairs of the late tournament. Those present were Ranlett, Dickenson, Kellogg, Fairbanks, Collier, Sprowl, Sinne, Nash. The meeting was adjourned until last night at the same place, when protests in the matches of the late tournament were to be received, and finally settled. Other business of importance relating to the tournament was also to be settled. The protest against Linville's grand score of 49 out of a possible 50 was withdrawn, and the score allowed. It is to be hoped, for the honor of all concerned, that at our public matches, and especially at our State tournaments, the targets will be so sacredly guarded against fraud in any shape that it will be impossible for any such ugly questions to rise in future.

The Swiss Rifle Club of this city celebrate their twenty-fourth anniversary to-morrow, by a picnic to Taylor's camp, on the North Pacific Coast Railroad. Next year this distinguished body of riflemen will be twenty-five years old as an organization, and they are already talking about the grand time they will have then. We hope to be alive to enjoy it with them.

Lientenant-Colonel Ranlett has been appointed the representative of the Pacific States on the Executive Committee of the National Guard Association of the United States. A compliment well earned by unwearrying activity and honesty of purpose.

The Eintracht Rifle Club this week remove their range from Harbor View to Schuetzen Park, Alameda. The club meets for practice to-morrow for the first time at their new range.

Woodard and Brasfield's three days' sale of trotters at Lexington, Ky., aggregated \$68,145, being an average of \$307 per head. Kenilworth, b g, 6 years, by Lothair, dam by Wilkes Booth, commanded the highest price, namely \$2,375.

Montauta made her first experiment of shipping horses this spring. These were sold in Dakota.

## STABLE AND PADDOCK.

## The Best Ages of Trotting Sires.

Now that everything of merit relating to trotting sires is minutely recorded, it behooves every breeder, professional as well as amateur, to inquire into those periods of every great sire's career when he produced the largest number of winners eligible to entry as standard horses, from their own performances. The record of a horse's stud career is too often taken without consideration of controlling circumstances. What he has done in the past is taken as an absolute guide of what he can do in the future, without reference to loss of vitality resulting from increasing years. But these conclusions are often expensively delusive. The horse, like every other animal through whose veins courses warm, red blood, has his period of growth, maturity, reproductive vitality, and gradual decay. We have shown in former articles that the best ages for brood-mares—in which they produce the greatest winners—range from three to fifteen years. In the great number of trotters that have beaten 2:20, this fact of their being the offspring of mares in their prime must not be ascribed to accident, but to the well-established laws of physiology. If, then, an old mare, ranging from eighteen to thirty, has never yet dropped a first-class trotter, the correlative question becomes very important, "How much does age lessen the reproductive capacity of the sire?" Probably his incompetency does not come upon him as early as barrenness rests upon the womb of the mare, but the deterioration is certainly very striking in the incapacity of the produce of his old age to make great performances. Other unfavorable conditions may impose themselves upon him. He may be trained and campaigned while he is used as a sire, and then, as a physical consequence, his efforts will be comparatively worthless; for nothing is more definitely established than that the vitality which is expended to repair the waste of his own muscles and nerves, and entire vital structure, cannot at the same time be imparted to his produce. He may, also, be used to excess in the harem, as was shown by the two barren years following the well-known abuse in the career of Rysdyk's Hambletonian; and this may permanently enfeeble his procreative powers. But where none of these excesses are permitted, where the horse is properly fed, groomed, and exercised, and his capacities are scientifically developed and husbanded, even then there is a marked loss of procreative capacity from the on-coming of old age, that is full of valuable interest to the breeder. For the purposes of our investigations we will cite the two notable instances of stallions that have been otherwise abused. Ethan Allen and Rysdyk's Hambletonian, the one on the turf, the other in the stud. Ethan Allen has eight performers in 2:30 or better to his credit—taking Honest Allen's 2:28 to the pole, and Washington Irving's 2:30 to saddle—but not one of them was the issue of his old age. Undoubtedly the best of his get is Pocahontas, although both Hotspur and Billy Barr have a better public record than Pocahontas. She was begotten when he was nine years of age, while Hotspur came from his loins when he was eleven years old. All the others of his winning sons and daughters were begotten in the earlier years of his life. It is worthy of note that he lived to be twenty-seven years old, and was used the last ten years of his life exclusively for breeding purposes. During that period he was carefully cared for at the "Kansas Stock Farm" of Sprague & Akers. They were practical breeders. Everything necessary to promote the health and strengthen the vitality of this great horse was diligently observed by Mr. Akers. The horse was gently exercised daily, cautiously yet nutritiously fed, and laboriously groomed. He was remarkably hale and hearty in his old age. Sickness, except in the two instances when he was poisoned, never enfeebled him, and within a few weeks of his death his action was perfect, and his speed marvelous, as when, with a running mate, he lowered the colors of the great Dexter, who was thought, up to that event of his signal defeat, to be absolutely invincible. The very choicest mares that could be selected, embracing the various combinations of Hambletonian, Mambrino and Thoroughbred mares from Kentucky, that had produced trotters to other horses, and saddle-mares from Kansas, and pacing and racking mares that had dropped such trotters as Kausas Chief and White Stockings, from Missouri, were brought to his harem. Moreover, he was very prolific in his old age. The large stock-farm of Sprague & Akers swarmed with young Ethan Allens. They were stout and healthy, and of admirable proportions. They were all tenderly cared for, as if they would each one become famous on the turf. Many of them had dams that had produced swift trotters. They had the advantage of probably the first miniature trotting track that had ever been constructed for baby trotters. Long before Governor Stanford had exercised Bonita and Wildflower as yearlings on his colt track at Palo Alto, the sons and daughters of royal old Ethan Allen had received the benefit of this early education at Lawrence, Kansas. Yet, strange to add, not one of them has ever trotted in 2:30 on a public course, in a public race. The cause cannot be attributed to his failure as a stallion, for in his prime he not only produced six that have become standard, but his sons, Daniel Lambert, De Long's Ethan Allen, Ethan Allen, Jr., Woodward's Ethan Allen, Bacon's Ethan Allen, and Frank Allen, foaled, also, in his prime, have taken rank in the list of stallions that have produced 2:30 trotters. His failure in the stud, after his turf career was ended, therefore, must be attributed to his extreme age. Sometimes he was walked for an hour, after he became twenty years of age, before he could be induced to do service as a sire; and this lethargy arose, not from a phlegmatic disposition, for at the same time he was all fire and ambition to trot if harnessed to the skeleton wagon, but simply from the deteriorating effects of old age. Sprague & Akers expected wonderful trotters from his loins. Probably no other stallion ever proved to be so great a disappointment to enthusiastic owners.

In a less degree, though equally well illustrated, the same conclusion is derived from the history of Rysdyk's Hambletonian as a stock-horse. Like Ethan Allen, he was foaled in 1849, and, like him, he died in 1876, twenty-seven years of age. He has thirty-six to his credit that have scored 2:30 or better in public races. But to accomplish this success he sired 1,330 foals out of choice mares. The first, and in all respects his most distinguished entire son, was George Wilkes, who was begotten when his sire was six years old. His next best son, Volunteer, was dropped when he was five years old, and his next best entire son, Edward Everett, was begotten when he was five years old. This fact is well worth a passing notice, for the prepotency of a sire, and his capacity to beget sons that are especially gifted with the power to reproduce speed seems to be confined to the years of his early prime. As Hambletonian advanced in years his entire sons were even more highly prized as stock-horses, but they failed to equal the record of his sons foaled during his earlier years. Thus, Volunteer, Edward Everett and George Wilkes, foaled when he was young, excel, as sires, Administrator and Aberdeen, foaled when he was fourteen and seventeen, respectively, and they, in turn, are superior to Norwood and En-

field, who were foaled when their sire was nineteen years of age. In his prime, thirteen years old, he sired Dictator, who has produced the three fastest trotters ever sired by the same horse. It is true that at twenty-one this remarkable horse produced Orange Girl, who has scored a record of 2:20, but where are the swift performers begotten after he was twenty-one years of age? If he begot any during the last year of his life, his youngest sons and daughters are now eight years of age; where are his performers that are now eight, or nine, or ten years of age?

We have thus taken two extreme cases, the one, Ethan Allen, who ceased to produce trotters at thirteen, and Rysdyk's Hambletonian, at twenty-one. Now, if the student of horse literature will examine the stud careers of the most noted trotting sires, he will ascertain that their usefulness ends long before that of Rysdyk's Hambletonian, with the single exception of George Wilkes, who, in all respects, is an exception to all rules and precedents and generalizations on the trotting horse. He produced Wilkes Boy when he was twenty-three years old, and Wilkes Boy made a three-year-old record of 2:30, last year. Blue Bull had produced all his swift sons and daughters before he was of that age, for he died when twenty-two, and he was incapacitated by disease two or three years before his death.

Clark Chief produced all of his swift sons and daughters before he was ten years old. Edward Everett lived to be twenty-three years old, but he produced no trotters after he was seventeen years of age. Gen. Knox is twenty-nine years of age, but where are his swift sons and daughters since he got Peaceful, in his fourteenth year? Volunteer is thirty years old, but no son or daughter of his, since Unalala, who was begotten when he was sixteen years of age, has trotted within the standard 2:30 circle. From these facts, therefore, to say the least, it is as precarious, with the chances of great success, as seriously reduced to the realms of chance, to breed to aged stallions as from old mares.—*Live Stock Journal.*

## Selecting Brood-Mares.

The importance of selecting good mares from which to breed, has been referred to often in these columns, but deeming it of much greater importance than many of our farmers imagine, we think the matter will bear constant agitation. A correspondent of a foreign exchange gives his views in regard to the selection of brood-mares, and for these and suggestions in regard to the same that we gladly make room, and would ask a careful perusal from all our patrons who are in any way engaged in horse breeding. He says: They should commence their inspection at the ground, and work upward. This is a good plan, as sometimes a buyer is attracted by a showy-topped animal, with a fine symmetrical outline, and is so fascinated that he neglects the more important points—the feet and legs. A brood-mare should be young and vigorous; her constitution not impaired by continuous years of excessive toil and hard feeding. Worn-out mares are not suitable to breed from; they should have good, tough, open feet, the pasterns strong, but not too perpendicular. The cannon bone should be short, flat, and broad from the side-view, with a flinty appearance. The hocks and knees broad, the latter from the front, and the former from a side-view; thighs and arms big and muscular. She should possess a good chest and crest, with a clean-cut head; the eyes lively, indicating docility and pluck; the neck fairly long, and set well into the shoulders, which should not be upright, but slanting. She should not be short-backed (a mare with length and room about her usually breeds the biggest and best foals). The ribs should be well sprung from the backbone, and deep both before and back, the quarters long and not drooping behind. They should be broad on top, tail well set on, and loins well arched; but above all it is essential she should be sound. No mare should be bred from that is a roarer or broken-winded, or has side or ring bones, bog or bone spavins, weak feet, badly-sprung hocks or calf-knees. Another matter which requires attention is the animal's temper, the offspring often taking the temper of the dam. The importance, therefore, of selecting a quiet-tempered mare of sound constitution for breeding purposes is apparent, and though last, not least, a mare should go straight and square in her action, as it is necessary in all cases, for whatever purpose they are used, that they should have good walking and trotting action. It is next to impossible to get a horse possessing as many good qualities and as few bad ones as one would wish, but it is well to remember that a mare should be free from all hereditary diseases to be suitable for breeding purposes. It would, therefore, be well to have the opinion of a veterinary surgeon as to the perfect soundness of a mare intended for the stud. Of course, it is not intended that breeders should only put to the stud mares up to the standard described—the object is to point out what is desirable in a mare, so that when opportunity to change offers suitable mares should be provided to replace objectionable ones. It often happens that when a farmer has a really good mare for breeding purposes he is too anxious to part with her if he can make a few pounds, retaining a comparatively worthless one in her stead, which reminds one of killing the goose that laid the golden egg. A great deal has been done towards improving the breeding of other kinds of stock, and with very praiseworthy and satisfactory results. Why not follow in the same track with the horse, which is so valuable to man?

## The Best Horses—A Prize Essay.

If I were called upon to name the two requisites most necessary for a farmer to possess, in addition to a good farm, I should say a good wife and a good team, and when a young farmer becomes possessed of these he has made a good start on the road to success. While no industry of the farm pays better than raising good horses, none is more unprofitable than that of raising inferior ones. It costs but little more to raise a horse which, when six years old, will command a ready sale at \$400 and \$500, than one which can with difficulty be disposed of for \$100, or than it does to raise a heifer or a steer which, at maturity, is worth \$50 or \$75. The best team for the farmer is one which will best answer all the purposes of the farm; plowing, hauling, taking the farmer and his family to town, or his boys and their sweethearts for a lively sleigh-ride, and, in addition to all this, will give him a pair of colts every year, which will earn their keep from the time they are two years old until they are sold for \$500 or \$1,000 at five or six. The team to do this is a pair of handsome bay mares, sixteen hands high, weighing 1,200 to 1,250 pounds each, with small, bony heads, large nostrils, broad foreheads, large, bright eyes, small, tapering ears, long necks, nicely arched, deep as they spring from the shoulders and small at the throat-latch; long, oblique shoulder-blades, moderately high withers; short backs, and deep but not overbroad chests, because a horse with a very wide breast, although usually of good constitution and great strength, is seldom a graceful or rapid trotter, is apt to have a "padding" gait, and if used for road work will generally give out in the fore-legs

from the extra strain put upon it by the weight of the broad chest. Our team must also have long muscular thighs; large knees and other joints, short cannon (shiu) bones; legs broad below the knees, and hocks with the sinews clearly defined, fetlocks free from long hair, long, moderately oblique pasterns, rather small, though not contracted feet, broad loins, wide, smooth hips, and long, full tails. They must have plenty of nervous energy, and good knee action; must be prompt, free drivers, capable of trotting a mile in four minutes; be fast walkers, and good, hearty eaters; must not "interfere," and must carry their heads well up without checks when on the road.

It will readily be seen that these mares are neither Clydesdales, Normans, Canadians, Arabians, thoroughbreds, nor trotters; but they are a team which will pull the plow through two acres of land in a day, will pull a ton, yes, two, if the roads are good, of produce to the village four miles off in less than an hour, and trot back with the empty wagon in half that time without distressing themselves or their driver. Should the farmer have a trip of twenty miles to make on business or pleasure, he can hitch them to his spring wagon, take his wife and children with him, and they need not be away from home more than three hours, or should he choose to go on horseback, he can mount one of the mares and enjoy a ride on a very fair saddle-horse. A team of Clydesdales may pull a heavier load at a dead drag; Canadians will stand more exposure and poorer fare; Arabians are better saddle-horses; thoroughbreds can outrun them; trotters, when hitched to a light buggy, can pass them on the road; but neither of these breeds combine anything like the desirable qualities for a farmer that the team which I described possesses; and when it becomes desirable to dispose of their produce, the colts of such mares will find a readier sale than those of any of the others, being exactly suited to the wants of the rich city gentlemen for his family carriage, for which he must have a strong, handsome, showy team; and, as such teams are always scarce, he must pay a good price for them.

Large dray-horses usually bring remunerative prices; but few men will pay as much for a team to haul their bales of cotton or barrels of flour as they will for a team to draw their families in Central or Lincoln Park in winter, and at Newport and Long Branch in the summer, where each millionaire strives to outdo the others in the beauty and style of his carriage horses.

It will be useless for the farmers to try to get such horses as these for a very low price; but when he has found them, never mind the price. An extra hundred dollars or so invested in such a span will pay better interest than in the savings bank. When the farmer has obtained his team of mares let him look for a stallion of as nearly the same type as he can find. He must be full sixteen hands high, of good disposition, and have the bold, high-knee action which characterizes a fine carriage horse, for which rich buyers are willing to pay liberally. If this horse can trot in three minutes instead of four so much the better.—*A. L. Sardy, in Rural New Yorker.*

A correspondent of the New York Spirit, who has lately visited Maj. McDowell's farm, gives this sketch of Dictator: I carefully took my first look at the greatest sire of the age. I must say he is a much handsomer horse in every way than I expected to see. He stands 15½ hands, and is a beautiful seal-brown. Although in his twenty-first year, he is remarkably well-preserved, in fact, does not show the least indication of old age. His head and neck are as finely finished as a gelding's; shoulders, middlepiece and quarters strong, muscular, and formed in proportion. He easily takes first place as a sire in the minds of a majority of Kentucky horsemen. Enemies be he; what man or horse of merit has not? But Dictator has so far ascended the ladder of fame that they cannot touch him.

A far more practical way of teaching kindness to dumb animals than the distribution of pamphlets has been inaugurated in England. It consists in giving prizes for the different classes of tradesmen's horses, and for the best-groomed animals and the best-harnessed. The prizes are awarded at what are called "processions," that is, horse parades, through the towns at which the show is given. These affairs have become wonderfully popular in the north country, where they originated. The first exhibition of the kind took place on Easter Monday, at New York. Upwards of 270 horses were entered and formed part of the procession.

The character of a man is pretty well indicated by the condition in which his horses are found. In no one place will the man of careless habits show them any quicker than in the appearance of his horses. There are generally exceptions to all rules, as there may be in this, but to a careful observer very few exceptions will appear. The man who is indolent enough to allow his horse to go in a rough, negligent way is generally indolent enough to neglect his business and his own personal appearance.

## Chicken Training.

"More care is taken in the training of fighting cocks than was ever spent in getting Slugger Sullivan ready for a match," said an old chicken fancier in answer to the query of a Philadelphia reporter. The speaker banded the "birds" in nearly every prominent main that has been fought in or near the City of Brotherly Love. Neatly arranged coops, containing fine specimens of the feathered pugilists, occupy the whole of the third floor of his residence. When a match is arranged the training begins, and until the battles are fought the chickens are constantly under the trainers' direction. The first object is to harden the flesh and by exercise to increase their staying powers. This is done by running them back and forward on a wooden table by the pressure of the hand. They are then placed in a coop of sufficient dimensions to allow plenty of space for walking. After a certain amount of this exercise the chicken is weighed, and if its flesh has not been reduced enough to satisfy the trainer it is put through another process. The chicken is tossed several feet into the air and alights on a mattress placed upon the table. A hundred times, possibly, the feathered fighter goes up and down, when he is put in a dark but ventilated barrel. A couple of hours are allowed to elapse when he is again brought out, and two little soft balls fastened to his spurs. Another chicken is equipped in a like manner, and the two indulge in a sparring match. This continues several minutes, and while they strike each other viciously no harm can result unless one of the "gloves" flies off. A feature of the training is the feed given. If the chicken needs a little more weight he is fed on raw beef. Roasted corn and the white of hard-boiled eggs are the principal articles of diet, with a loaf of spiced bread, containing eggs, sugar, rock candy and a variety of spices for dessert. The latter is eaten with relish. The maximum limit of weight for a chicken is six pounds, while the minimum weight is four pounds.

Rancho del Paso.

For the first time since the San Jose Fair we have made a trip into the country. Others firmly fixed upon had to be given up, and so there was a good deal of novelty in being whirled along at a faster rate than the "local" is allowed to go, or Antevolo trot. The morning was beautiful. Out of bed when the gray of the dawn was breaking over the Contra Costa hills, the bay curtained with a neutral-tinted veil, and by-and-by the summit of Tamalpais was burished with golden rays. A May morning in Oakland is the finest season of the whole year. That is an early morning, for generally the sun rises clear, and the air is as still as though there was shelter on every side. The ultra-early arising was occasioned by a desire to see how the Anteco-Lady Viva foal was getting along, as the Sacramento train does not leave Sixteenth street until half-past eight, but the youngster had not passed the first critical period in its life, and it might be that it would require assistance in the shape of an enema. Happily that was not necessary, so that anticipated trouble was not met, and the journey was commenced in high spirits. There is a potent attraction to us in a rapid rate. When twenty years younger a gallop on a horse that could run a bit and set the air whizzing in the ears was worth all the medicines, all the exhilarants in the drug-store, and the most enjoyable railway ride we ever experienced was in the cab of a locomotive, when miles were knocked off a good deal inside of a minute each, and, notwithstanding sharp curves, nineteen miles in twenty-two minutes. The Sacramento train does not run that fast, however, but the hills along side of the straits were bright in their emerald dress, and the little ravines and glens still more gayly bedecked with varied-hued blossoms and graceful shrubbery. The whole of the way crops looked splendidly, and in the vicinity of Davis the vines and fruit trees gave tokens of a bountiful yield. A capital lunch at the depot was a welcome adjunct to the pleasures of the day, for we are on full feed now, and the extra-early breakfast had been assimilated hours before. When we reached the "Arcade" the signal was sounded to prepare for the auction sale, and while the force was getting in readiness the stallions were shown, Echo, Algona, Alaska, and then came the

kiug of "The Grant," Kyrle Daly. We were prepared to see a fine horse. When Mr. Reber imported him he wrote us a long letter filled with praises, and we knew that he had the knowledge to understand what a fine horse should be and the candor to write what he thought. Since his arrival there have been nothing but encomiums from all who had seen him, and therefore expectation was on tip-toe. For all the eulogies written and recited that we have read and heard he surpassed our imaginings. It is seldom that a horse sixteen-and-a-quarter hauds in height, and with corresponding bulk, is found without coarseness in some portion. It may be the head, legs, or feet, and very frequently in large massive thoroughbreds there is a coaching look, something lacking, an absence of high "quality" that is such an essential in a really first-class thoroughbred. Kyrle Daly is full of quality. His head is admirable, intelligence demonstrated in the lustrous eye and wide forehead, beauty in the clearly cut muzzle, delicate nostrils, and strength in the massive jaw, with space enough between the jawbones to ensure the best opportunity for the air to pass unimpeded through the windpipe. The setting on of the head is perfect. The union between it and the neck is so delicately moulded that in any position there is grace and the whole neck from the poll to the shoulders is as perfect as we ever saw. The shoulders, too, are capital and the barrel faultless. The scapula is wide, the upper portion falling well back into the sway, the brisket prominent, and the "fork" is well filled with muscle. The muscles on each side of the backbone are tremendous rising like huge hempen cables, and we cannot recall any horse that equals him in this respect, excepting Joe Hooker. He has a rare "middle-piece" all through. The true ribs are deep, so as to afford ample play for the lungs, and the backribs are long, swelling into more of a circle, a sure indication of a strong constitution and a "good feeder." The quarters are immense, long and deep, the framework covered with a mass of muscles without a particle of cloddiness. Arms and gaskins are large, and the tendons which convey the immense power indicated to the motors are as clean as a steel rod. Hocks and knees are strong, without a particle of puffiness, the ligaments showing clearly. The cannon bones are of good size, the back tendons so large as to give good width, and the fetlocks with plenty of "spring," and of just the proper length to be in harmony with the other parts of the limbs. His color is as good as can be, a blood bay with black points. He can scarcely fail to get race-horses of the highest class, as his blood is just right to mingle with that which prevails here. He has a double cross of Waxy on either side, in fact his sire Artillery had two strains of Waxy through Whalebone, and his dam Colleen Rhue had one of Whalebone and two of Whisker brother to Whalebone, so that there are five crosses of Waxy, the best grandson of English Eclipse.

It may appear a singular claim to assert that no matter how successful Kyrle Daly may be as the getter of race-horses, that there will be a still greater value to the Pacific coast in his services outside of the legitimate sphere of a blood-horse. Though he is likely to be restricted to thoroughbred mares, there will be sons who will follow his form, and, without doubt, of equal size. These united with mares of the same stamp, as the three and four-year-old geldings brought from Stockdale, will produce the finest big horses for coach, carriage, and business purposes. Coaches and carriage horses will predominate, and of such a class as will command a price at home and abroad that will make the rearing of them the most certainly remunerative of any department of horse-breeding. With a portion of the quality of the paternal side, the style, size, and action of the maternal, hundreds of pairs can be marketed every year in the cities of the East, and prices obtained that it would appear extravagant to prophesy at the present time.

It was late when we returned to Sacramento. Early the next morning, however, when we accompanied Captain Harris in a drive back. We have oftentimes dilated on the beauty of the early mornings at Sacramento. Pages could be filled with description, and then the sketch form merely outlines. The city is a garden of rare flowers and still rarer shrubbery and vines. Villas and cottages adorned with grounds and plats of wonderful beauty, and when there is not space enough for that there are masses of climbers which cover trellises and hang in brilliant festoons from the eaves, transforming even plain little houses into bowers of loveliness.

Were it not for the slickens-tainted color of the water there would be a strong resemblance in the American river, viewed from the bridge, and portions of the upper Mississippi. Islands covered with a dense growth of willows and cottonwood, submerged bottoms and low banks. There is a change of scene in a short distance, and when on the territory of Rancho del Paso the transformation is complete. Undulating plains, anomalous as that may be, with groups of trees, chiefly live oaks, and white

oaks, many of them gracefully draped with mistletoe. The herbage is short, though dense, and the "goldenfoot" of twenty thousand sheep are enriching it every year. There is scarcely a waste acre on the whole forty thousand. Further up the stream, where the breeding stock is kept, the bottom along the river is set to alfalfa two thousand acres, green as an "emerant sea" the whole of the year. It will be difficult to find a better natural location for a breeding farm, and the improvements are substantial and well adapted for the purpose. The training track is very good, the intention being to use the outer a mile in circuit for training the trotters; an inner is being constructed for the race-horse. Trials and fast work will be given on the main track and the soil is such that it can easily be prepared for either gallopers or trotters. The stabling is admirably arranged, securing complete ventilation without incurring any danger from drafts when "cooling out."

We were very much pleased and somewhat surprised to meet Captain T. G. Moore of Kentucky, who will take charge of the thoroughbreds in training, and a general supervision of that branch of the horse department at Rancho del Paso. It is safe to say that Captain Moore has had more experience with race-horses than any man in the United States. Though still as vigorous as ever, for upwards of forty years he has been an active participant on the turf, owning and handling many of the very best with consummate ability. We doubt if there is a race-course of any prominence between San Francisco and New York, and Chicago and Galveston, that he has not visited, and not only visited but raced his horses upon. When the Rancho del Paso horses return from the Eastern tour there will be lively times on the course among the "grand old oaks," and with the captain to train and manage "the stable" will be formidable at any "gathering of the clans."

As we allude to the sale in another column it is enough to say that the return trip was equally pleasant as when outward bound, though we greatly regretted the inability to stay for a day or two longer, in order to see the mares and foals which are kept some five miles away from the training grounds.

Department of Agriculture.

We are highly gratified that the suggestions of the *Breeder and Sportsman*, in relation to the necessity of a department of agriculture with a member of the cabinet at the head of it, meets with unanimous approval. Not a dissenting voice that we have heard, and such a general concurrence that it is evident that it can be carried through. While the justice of the measure is conceded, there is danger that among "politicians" there will not be a hearty effort, and hence it is important that delegates be chosen who are identified with the interests depending. Every state and territory are interested, none more so than California. Not another has such a diversity of products, not a member of the Union that has the same promise of a glorious future, and yet all this promise may be so curbed by legislation as to retard development, and laws that are inimical throw encumbrances in the way which will cripple, and it may be destroy. There is little question that with proper encouragement the grape interest will dominate any other branch of rural economy, and with some assistance in the way of "protection," and a guarantee that protection will be the policy for a sufficient length of time, the planting of vineyards will increase in nearly arithmetical progression, and for every acre planted in 1884 there will be ten in 1890, and when the twentieth century is ushered in, the hill-slopes will be green with the thick foliage of the vine, and the plains adapted to the culture of the grape a mass of the richly-colored bunches. Twenty-five years hence California will be the great wine-producing country of the world, if laws are passed that will encourage development. No matter how extreme are the ideas of a man regarding "free-trade," it will be a bigoted believer in the doctrine who will deny the propriety of placing a modified embargo on the adulterations of European wine-makers. Probably nine-tenths of the voters of the United States who are engaged in agriculture, or dependent on what the land brings forth, are in favor of a modification of the revenue laws. So far, this class has been subjected to other interests of less importance, and forced to pay tribute to manufacturers and speculators. Though there are conflicting views among those who follow different branches of farming, there are no valid reasons why there should not be harmony. The large grain grower can look with equanimity on a tariff which will encourage the vineyardist and sheep-owner when he can purchase the machinery for his farm at a lower price. But in order to obtain laws that will harmonize the differences that exist, there must be a better knowledge of what is needed to reconcile the farmers of the whole country, and nothing will be so effective as a department of agriculture, the head of which will have a voice in the councils of the President. In presenting the tariff for an illustration, it is not the

intention to advocate either protection or free trade. That is used on account of the whole of the United States being interested, and is of general and great importance, though perhaps, not more so than state laws which levy direct taxation. Even then there will be a better foundation to build home laws upon. There will be a clearer understanding of the position agriculturists occupy, and a more thorough knowledge of the questions at issue. As the country is at present, the cities and large towns control the political field. The massing of voters in a dense body give "bosses" the opportunity. It is not beyond possibility that one man in the city of New York will have the power to dictate who shall be the next president, and that power will be exercised without a thought of the welfare of the country, the whole aim being the aggrandizement of the clique which he leads. It is of more importance to this class to secure the control of the city than bother about national affairs, and they are enabled to make bargains through the potency of the balance of power in their hands. When there is more independence among the rural population; when in place of being hand and foot with a name; when in lieu of a blind adherence to party there is a determination to throw off the shackles of servitude; when they become aware that the bondage in which they are held is through being led supinely by an abstract idea, the doom of the big and little bosses is sealed. It may be that we anticipate too much good from the organization of a department of the government commensurate with the interests to be guarded. Still, we have an implicit faith that it will accomplish a great deal in many ways. It must be beyond domination from any other department, and not made subservient to policies. When the products of this country are excluded by nations there must be firmness to sustain the producers, though the Secretary of State would rather bow and apologize, submit and cringe, snub the minister who sincerely labored for his country, and who would fain have ordered a recall had he the courage to do so. It must be placed beyond the guardianship of claw-hammer coats and white neck ties. It must represent the men of the country, and not only represent but aid in educating them to a proper understanding of their rights and how to maintain them.

With a delegation from California, pledged to do all in their power to effect the object, the first step is taken. A fair start, and the race will be won.

#### J. B. Haggin's Auction Sale.

Elsewhere will be found a list of the horses sold, and the prices they brought at the auction sale at Rancho del Paso, Friday and Saturday of last week. It was one of the most notable sales ever known in California, and in some respects is without precedent in any section of the country. The most striking feature was the Stockdale contingent of three and four-year-old geldings, which for size, style, form and action, we never saw equaled. A great majority of them from 16 to 16½ hands, with plenty of bone and muscle, and quite a number with finish enough for carriage horses. These are the get of Geo. M. Patchen, Jr.: Dana, Norwood, Western, Dickens, Kentucky and Bismarck. As Geo. M. Patchen is the sire of Sam Purdy, Starr King, San Bruno, Susie and Shoe Fly, with records in the twenties, and a whole lot of horses that could trot nearly as fast, it is not surprising that his sons foaled in Kern county showed a step that gave promise of speed. Norwood is a grandson of Rysdyk's Hambletonian, and Kentucky and Dana descend from Whipple's Hambletonian, so that two of the great families of trotters were represented by the stalwart youngsters from Stockdale. It is not fair, however, to give all the credit to the sires. The dams are also superior, and the blood of California Belmont, Lodi, Rifleman etc., give finish and wiriness of texture in the muscles and tendons, and lustre to the coat.

It would be superfluous to comment on the prices further than to refer to the list, excepting to note that the prices run nearly as uniform as the animals. The pleasant feature was the mutual satisfaction of seller and buyer. Mr. Haggin realized larger prices than he anticipated. Purchasers were well pleased at obtaining animals so superior to the usual run, and offers of a liberal advance refused.

Saturday's sale, trotting youngsters, opened rather dull, but after a few were disposed of hidders appeared to recognize that great bargains were secured, and taken altogether the average was very good. That many of them will prove fast trotters is as certain as the future of youngsters can be predicated. Some are fast already, and in our opinion those which brought the most money were the cheapest. We are not given to prophetic announcements, but if Dixie, Pasha, Miss Muffin and Elsa among the two-year-olds do not "conquer fame," we will be much surprised, while so many of the yearlings showed capacity that we will not risk vaticinations which are so likely to be overthrown by the revelations of the future.

The sale was admirably managed. Killip & Co., gave

it proper publicity, and Whitehead added to his reputation as an auctioneer. Mackey and Timmins carried out their part of the programme splendidly, and the only thing lacking was a few of Dr. Herrs pupils to handle the stock a couple of weeks and show them "to the hridle" when the hidding was progressing. Mr. Haggin has determined to hold annual auction sales, and he informs us that in the interim none will be disposed of. This will insure against calling, and the best guaranteed to purchasers that they will have the choice of the lot. There could not be a "squarer" sale. Not a suspicion of by-hidding, and when the manager of Rancho del Paso bought a filly which he knew was going far below her value, at Mr. Haggin's request, she was offered again so that there should not be any suspicion of going contrary to the averments. The characters of the stock and the fairness exhibited will induce a largely increased attendance at subsequent sales, attracting buyers from all parts of the country.

#### Oakland Trotting Park.

Since writing the article in relation to the Oakland Trotting Park, that appeared in the *Breeder and Sportsman* of last week, we have made a rough estimate of the lumber used in the fences, stables, sheds and pens, and there must be one quarter of a million feet, perhaps a good deal more. When it was resolved to hold the Golden Gate Fair there, Mr. Ward agreed to build some extra stalls and pens. The hill for the lumber at this one time was \$5,000, and the building was a trifle in comparison with the whole of the work done. For a fair-ground and race-course the improvements are well worth \$30,000, and paradoxical as it may appear, if the land were entirely bare it would sell more readily. Sixty acres so eligibly situated, and without any improvements, would be held so cheap at \$1,500 an acre, that purchasers would seize the opportunity to purchase it in subdivisions. Had we thought of it before buying the place where we live—though we got it far below its rated value—\$3,000 would have been cheerfully given for an acre anywhere within the bounds included in the bond. That would make asquare of over two hundred and eight feet, whereas we paid \$2,100 for a trifle more than one hundred and twenty-five feet square, and the same amount expended in buildings, \$3,000, would make the acre a cheap property at \$10,000. Adjoining the track is the "Cricket grounds," which Mr. Emery valued three years ago at \$20,000, and which, in all probability, he would not sell now for less than \$30,000. There is a little over six acres in the enclosure. There is not a real-estate "expert" in Oakland who would rate the property as low as \$1,500 per acre without improvements, and the value of these, apart from retaining the property for the uses implied, can readily be calculated. When the contemplated additions are made the property will rent for at least \$6,000 per annum. This will pay taxes, interest on \$50,000, and leave a balance to keep up repairs. With fifty per cent. of the capital stock paid in, the remainder can be borrowed at less than six per cent., including mortgage tax, and there is not the least doubt that when ten years elapse the shares will have trebled in value. As a speculation, without a possibility of risk, it is certainly attractive. To those who are engaged in breeding there are still stronger inducements, and to the residents of Oakland, Alameda and Contra Costa counties the success of the project is of still greater moment.

#### Anteo Foals.

The first test of a sire Anteo has successfully passed. The few foals we have seen by him are remarkably fine. Not one that will not command attention from the most critical, and those we have heard of, with one exception, their owners pronounced "the best in the world." So much are they thought of that though the intentions were to send the mares to Santa Rosa the risk was considered too great to send them away from home so far, and Director, Monroe Chief and others got the benefit. Had Anteo remained in Oakland there would have been applications for at least one hundred, and without detriment to his powers three-quarters of these could have been accommodated. As nearly as we can figure we have heard of forty foals with only six fillies. This preponderance of colts is something unusual, and another good feature all are bays, though some, when they shed, may be brown. The 15th instant Lady Viva had a filly foal, and though somewhat disappointed in the sex, it would take a heap of money to buy it. Had it been a colt the intention was, when old enough, to mate it with a high-class thoroughbred mare, and a few generations in this way would reduce the black blood and increase the blue until there would be an approach to the lapis lazuli tint. Lady Viva has a double strain of the most fashionable blood in England, that of Newminster, as both her sire and dam are by Hurrah, and the dam of Hurrah was by Bay Middleton. But in addition to this her trotting action is capital, and she can show a fair rate of speed at that gait. With high blood, proper action and some trotting speed in the dam, capacity to trot fast in the sire, we have no fears in the progeny failing to justify any reasonable expectations.

#### Malcolm.

A grand horse is this stalwart son of Bonnie Scotland. Grand in his own right, as he ran more fast heats of a mile than any horse of his day or to his time; grand in form, and now he is gaining distinction from the performances of his progeny in the second generation. The only thoroughbred daughters we are acquainted with are Marion and Roxaline, both of which we bred, their dam Maggie Mitchell by imp. Yorkshire, and their grandam Charmer by imp. Glencoe. Marion is the crack broodmare of the Rancho del Rio Stud, and every colt of hers that has been trained is a "sure enough race-horse." Duke, Duchess and Prince of Norfolk have demonstrated their capacity beyond question, and a yearling and suckling of the royal horse show a form that betokens equal excellence. Wednesday last Princess, the four-year-old daughter of Roxaline, ran at Louisville five furlongs in 1:01, Premium getting third position. Princess has run in the neighborhood of sixty races within the last ten months' with probably thirty "brackets" to her credit. Should she escape ailments she will accomplish at least one hundred starts before the first of January, 1885. So far her work is without precedent in the history of the turf, with a likelihood of being still more wonderful. Could Malcolm mares be obtained now, there would be plenty of demand for them, and it is a great misfortune that his services were limited to so few thoroughbreds. We sold Malcolm to P. Gansel, Hyde Park, and it may be that he is still alive, and if so is well worthy of further trial. He is twenty-one.

#### Bay District Entries.

The day the entries to the purses of the Bay District Trotting Meeting, commencing next Saturday, close. In order that the classes shall not be overlooked they are repeated on this page. The purses are liberal, and the classification such as to justify the expectation of a liberal response in the way of entries. The track will be kept in the best possible condition, and the officers of the association will do all in their power to give satisfaction to owners and drivers. This "goes without saying" to all who are acquainted with the gentlemen in charge, and no endorsement is required by those who have participated in the popular meetings which they have had in charge.

May 31st, 2:27 class—Purse \$750; divided \$450, \$225 and \$75 to first, second and third horse.

June 4th, 3-min. class—Purse \$500; divided \$350, \$100 and \$50 to first, second and third horse.

June 7th, 2:22 class—Purse \$500; divided \$350, \$100 and \$50, to first, second and third horse.

June 11th, 2:40 class—Purse \$500; divided \$350, \$100 and \$50 to first, second and third horse.

June 14th, Free-for-all—Purse \$1,000; divided \$650, to first, \$250 to second, and \$150 to third horse.

June 21st, 2:24 class—Purse \$500; divided \$350, \$100 and \$50 to first, second and third horse.

All of the above to be mile heats, 3 in 5 in harness. National rules to govern. Entrance 10 per cent. of purses. In every race five or more must enter, and three or more horses start.

#### Dr. E. H. Pardee on Rifle.

There have been many inquiries directed to this office, and still a greater number received by the author for the cause of the break in the articles. Every one included a petition that they be resumed, and we are happy to state that the wish will soon be gratified. Dr. Pardee has been indisposed for several weeks, a great part of the time seriously ill, but with the advent of warm weather his health is much improved, and now that he is able to send his high-headed chestnut at a thirty clip down the road, and heat with consummate ease the big hick of Mr. B—e, Captain W—n, and all of the road-drivers of Oakland, it will only be a short time to perfect his condition for the work. These articles have attracted a great deal of attention from the devotees of the rifle in all sections of the country, eliciting encomiums all around. Among others there have been inquiries from Australia and India, and many of our readers in these far-away lands have signified their approbation of the thorough handling of the subject.

#### P. C. B.-H. A.

There was a meeting of the Trustees of the Pacific Coast Blood-Horse Association on Monday last, and among other things considered was a petition in regard to the expulsion of the riders of Jou-Jou and Harry Rose at the late meeting on the Oakland Course. Inasmuch as that meeting was run under the management of a "lessee," it was unanimously held that any rulings off by the judges could not be recognized by the association, and no action was taken on the petition. We understand that the judges after reviewing the evidence, concluded that they were in error in some points connected with the case, and have reinstated the parties implicated.

The Bay District Association will give a fall meeting as an antiatory of the circuit. The dates claimed are Saturday, August 9th, Wednesday 13th, Saturday 16th, Wednesday 20th and Saturday 23d.

## HERD AND SWINE.

### Ergot.

The following notes regarding the origin and effect of ergot in grass and grain is from the English *Live Stock Journal*:

Ergot is a cause of sudden and premature birth and abortion in animals. Being more or less common on nearly all grasses in meadows and permanent pastures, and especially on rye-grass (*Lolium perenne*) and its numerous varieties, it is almost impossible to calculate the damage and loss it sometimes causes. Farmers and breeders are to often quite unaware of the presence of this pest, and if they see it they too frequently know nothing of its meaning. It should, however, be most carefully sought for in meadows and pastures, and wherever seen destroyed. It is not always easy to see it on the smaller grasses, for not only is it frequently very small in size, but it is often entirely enclosed in the cheffy scales of the grasses. Breeders have in some instances recorded an annual loss of £400 from ergoted grasses alone. Its other effects on animals are sloughing of the flesh, rotting of the extremities and gangrenous inflammations. In cases where man himself has continually eaten bread made of ergoted rye the result has been fetal gangrene, the rotting away of the limbs at the joints, beginning at the extremities, and death. It also causes the loss of hearing and speech, and in the case of birds fed with ergoted food the tongue has rotted away at the extremity. A case is reported in the Philosophical Transactions for 1762, probably caused by ergot of wheat, where the flesh from the leg of a young woman speedily putrefied and fell from the bones, leaving the leg bones bare, the foot falling off at the same time. The mother of this woman lost both her feet, the leg-bones became here, and both legs fell off; the second daughter lost one foot, the third daughter lost a foot, a son lost both legs at the knees, the next son lost both feet at the ankles. At one time it was supposed that wheat did not produce ergots, but such is by no means the case, as the ergots are often small and hidden in the cheffy husks of the ear; when, too, they agree in size with the grains of wheat, as they often do, they are commonly overlooked. To the farmer ergot signifies abortion and elipping of the young in his herds and flocks.

Our practical readers will no doubt wish specially to know how to prevent attacks of this dangerous nuisance on their cereal crops and meadow and pasture grasses. There are two ways, one is to avoid planting ergots with the seed, the other is to pass a sharp scythe over the heads of grasses at the time of flowering, for if there are no grass flowers there can be no positions on which the ergot spores can fix themselves. It is not always easy to remove ergots, as some are the same in size, if not in color, with the seeds themselves; some ergots, too, so closely resemble the dung of mice that they get overlooked. However, with care, judicious sifting and well-directed examination, nearly all ergots may be removed by careful and honorable seed merchants. When a crop is once ergoted, special care should be taken not to let the ergots fall to the ground and so reproduce ergot the following year. An ergoted crop should not, if possible, be followed by cereals or grasses the following season. Ergots, as a rule, live for one year only. There is in this case, of course, as in all others, danger of infection from neighboring crops or infected grasses of field sides; but if all farmers would be equally careful, and all seed merchants equally painstaking for the exclusion of ergot, a marked improvement would be the result. As we said before, one of the worst features connected with ergot is—the results only are felt, for, as a rule, agriculturists know far too little of the common and dangerous foe we have here described.

### Increasing Lean Meat in Pigs.

We may well suppose that the habit of the pig in laying on an excessive quantity of fat has been caused by long and excessive feeding of fat-producing food, and it is not likely that any sudden transformation could be brought about; but it is well-known that the pigs of different countries differ in respect to fat. We have only to contrast fattened pigs of this country with those in Canada. There pork is fattened partly upon barley, but largely upon peas, a highly nitrogenous food, yielding a large proportion of muscle, and our pigs are fattened almost wholly upon corn, an excessively starchy and fattening food. The Canadian pork has a much larger proportion of lean meat, and less lard. The difference is very marked, so much so that in a market supplied with both kinds, purchasers easily select the one or the other as desired. Wild hogs do not have such excess of fat, and the southern hog, which is grown much slower than those in the northern and western states, and fed much less corn, is comparatively lean.

There can, therefore, be little doubt that the habit of depositing this excess of fat is caused by long-continued feeding adapted to that end. The hog is naturally a grass and root-eating animal, and in its domestication is fed almost wholly, in this country, upon concentrated food. Hogs fed upon skimmed milk have a less proportion of fat than those fed upon corn. If young pigs are kept upon food that will grow the muscles and bouea, and develop a rangy frame, they will possess so much muscle when half grown that a moderate length of time in fattening, even on corn, will not pile on an excessive amount of fat.—*Live Stock Journal*.

### Frequent Milkings.

The influence of the frequency with which milking is practiced during a period of twenty-four hours, both upon the animal and upon the milk, has been extensively discussed, and still remains far from being settled. Whatever may throw light upon it, or furnish facts that may find practical application upon the farms, must be received with gratification on every hand. The results of experiments of Erlennmeyer will, therefore, be considered with no little interest by those engaged in the dairy industry.

This able investigator made a series of experiments and observations with milking and feeding, to determine first the influence of the feed, and second the influence of the frequency of milking, or the time intervening between the several milkings upon the quality of the product. Contrary to the opinion accepted to no small extent, he concludes, from the first part of his work, that the quantity of milk produced depends not only on the activity of the glands but upon the quality and quantity of the food administered as well. When the animals are subject to three daily milkings, that drawn in the morning is greater in volume, but poorer in the valuable constituents, especially fat, than that drawn at other times. This is accounted for by the longer time intervening between the milkings. The milk drawn at midday is fat, and is, therefore, preferable to that drawn at other times.

The whole subject is worthy of further and more thorough examination than it has already received, and there will doubtless be found in it much of interest and value for dairy-men of every class.

### To Keep Hogs Healthy.

Keep your hogs in good, clean fields; give them access to pure water, even though you should be compelled to dig a deep well for that purpose—a good pump and plenty of suitable troughs, cleaned every week, will cost but little, and will always prove a valuable outlay. Provide, also, in the driest part of the field, a good shelter both from sun and rain. A few rails properly arranged, two or three feet from the ground, covered with a stack of strew or coarse prairie grass, will be an attractive place for the entire drove. In troughs near by their resting places, two or three times each week, place a composition of salt, soda, red pepper and gin-ger. To four parts of the first two articles add one part of the latter. Our common red pepper will do very well. They should, however, be well pulverized, and all the ingredients thoroughly mixed. Most healthy animals will readily devour salt. To obtain it they will also take the alkali end stimulant. The compound will not injure hild, beast, fish or men. It is not offered as a patent remedy, but simply as a preventive of the injurious effects of foul gases and the pestiferous filth in which hogs have been allowed to wallow. Continue their usual summer feed, whether clover, bron, meal or corn.—*Drovers' Journal*.

A movement is on foot in the east to compel the manufacturers of bogus butter to color their product pink instead of yellow.

## SHEEP

### Shearing in Australia.

The following is from a series of articles on sheep husbandry in the colonies, contributed to the *Breeder's Gazette* by Hon. A. M. Gerland:

All shearing is done under contract—not alone as to the price to be paid, but as to the manner in which the work is to be performed. Each man before beginning work is required to sign an agreement, in which is stated the compensation expected, and by which he obligates himself to remain until all the sheep on the station are sheered. If he voluntarily leaves, or is discharged for incompetent work, or violation of any of the rules of the barn, he is to accept as payment about two-thirds the amount that would otherwise be his due. The pay for shearing is now generally 20 shillings per 100 sheep, say \$5. Out of this the workman is to board himself, the employer obligating himself to furnish provisions at stated prices. The cook is paid by an equal assessment on all the shearers. This arrangement does away with the annoyance often experienced on ranches in the United States by reason of workmen complaining of the fair provided for them. The squad of Australian shearers have everything on their table that they choose to pay for, and know in advance of ordering it just what it will cost, and, in consequence, no complaint is heard. All helpers about the barn, as well as the rollers and sorters, are paid by the week, and are boarded by the employer. These live with the shearers, and the proportion of expense falling to them is charged to and assumed by the employer. Beling is also done by contract, the owner supplying all necessary facilities. Three men work at this, and when once down to business will bale, weigh and properly mark the fleeces taken off by fifty shearers, say 3,000 to 3,500 sheep per day.

The tables on which the fleeces are rolled are made of slats about one inch square, placed with one corner upward—the openings at the narrowest part about half an inch wide. The boy who brings the fleece to the table, with a dexterous throw allows it to fall inside down, and stretched to its fullest extent possible without breaking. This frees the detached locks, considerable dust and the short particles made by second cuts of the shears, which fell into the bin beneath the table. At each table are three men—one to roll the fleece, when the other two, standing at either side of him, have skirted it. This is done by tearing off the neck, flanks and so much of the extremities as fail to carry wool not uniform with the body of the fleece. The belly wool is detached by the shearer, and goes to the bin of pieces.

As a rule, no string is used, the loose end of each fleece being tucked in to hold it in position. I found an exception to this in a few bars, where a single strand of white linen twine, not larger than druggist's twine, was tied once around the fleece.

From the rolling table the fleece passes to that of the sorter, who indicates the bin into which it is to be placed to await baling. Usually three, though sometimes four, lots are made—the differences hinging on fineness, length, and strength of fibre.

I have been thus explicit from the fact that, in my opinion, much of the popularity of Australian wools arises from the manner of their preparation. It will be noted from the foregoing that when the Australian fleece is put on the market it contains nothing but body wool, is freed from all skirtings and such short particles as the careless shearer is sure to make, and is exposed to no shrinkage on account of twine. Not this alone, but all the wool in any given lot, is uniform, having been assorted by an expert, and its grade marked on the bale. I have before noted that bellies, skirts and all loose wools are generally washed at establishments making that work a business; but whether washed or not, are baled and put on market as "pieces." The assorting is not only according to grade—the wool from each age and sex of sheep is also separated. Thus there goes out from the station the different grades from wethers, ewes, hoggets, etc. The lambs' wool, of course, is kept to itself.

There may be a difference of opinion as to whether all these precautions and manipulations, dictated by the buyer and in the line of suggestions, that yearly come to American wool-growers from the purchasers of their product, are really for the interest of the flock-owner. This is a question that I shall not here attempt to answer. Certainly a majority of Australian wool-growers believe they are well paid for the labor and care necessary to place their clips in the admirable condition in which they are marketed. If this was not so, they would pursue a different policy, for a more practical class of men I have never met. They have the courage to spend any amount of money, when beyond such expenditure they see an improvement in the standard of their flocks or the carrying capacity of their runs. One thing seems certain—the systematic care and honesty with which their wools are prepared insure for them a popularity in every market, and ready buyers at such prices as can be paid.

Brood-owes that will have early lambs are better in a yard and shed by themselves, as they need a more generous feeding than those coming in later.

It is reported that 8 per cent. of the sheep in Polk county, Oregon, were killed by coyotes last year.

### Bloat in Cattle.

For this difficulty so common in alfalfa pastures many remedies have been formulated of all degrees of efficacy. The veterinary asserts that the prompt administration of three drachms of chloride of lime will give the necessary relief. The favorite French remedy is ammonia. The volatile spirit of ammonia gives instantaneous relief, its action being chemical, in decomposing the gas in the animal's stomach by fermentation. The dose for a cow or ox is a tablespoonful, diluted in water or any convenient liquid. If not effectual, repeat the dose. In the early stages a stick put between the animals jaws and held there like the bit of a bridle will generally be sufficient, the stick to be large enough to keep the jaws well open.

In severe cases the paunch must be punctured. This may be done with a sharp-pointed knife, but veterinary surgeons use an instrument called a trochar. The incision must be made through the left flank, about three inches below the spinal column, and midway between the hips and the last rib. A small tube or quill must be inserted to permit the gas to escape. But this is such a difficult operation that when the paunch is to be punctured the farmer should undertake it himself only when it is impossible to procure a surgeon, and not till he is satisfied all other remedies will fail.

## FISH.

The first thing we have to notice this week, in the absence of any very startling news from the interior streams, is the late meeting of the Academy of Sciences, at which some good points on fish and fishermen were made. The paper of J. D. Redding, though containing nothing especially new, was full of sound sense. This young gentleman has a better chance of doing good, if doing good in his day and generation is really his desire, in the Academy of Sciences than among his colleagues of the Fish Commission. In the latter body of officials the people generally have lost all hope, which an active protection of Sacramento river to the exclusion of all other points will not revive, as the impression is wide spread that there are certain interests there which it pays somebody to protect. If, as Mr. Redding says, the waters of California may be made equal to any in the world for variety and excellence in their fish, that desirable result can only come from continued planting, cultivation and protection. Suppose the Fish Commission has planted 15,000,000 young salmon within the last ten years, the great benefit of such a gift has gone to alien pirates, thieving Chinese and voracious sea lions from the want of energetic and common-sense protection. Fish cultivation of necessity implies protection ere it becomes a blessing to the people. Otherwise it is a useless expenditure of public money. For the want of this protection we doubt if the product of these 15,000,000 young salmon has cheapened the fish food of the masses to any appreciable extent. But we never desire to be unjust to any body of officers. For an honest, vigorous, commercial protection of our fish, which shall inure to the benefit of our own citizens, the Fish Commissioners are responsible, for it is strictly their duty to enforce that protection. If the present appropriation is not sufficient, we conscientiously commend the step they propose to take immediately, of exacting a license from every market fisherman, which in gross will amount to \$20,000 a year. This is a step we advocated years ago. The alien pirates and Chinese thieves should be made to take out a license, on every principle of justice, the same as our peddlers on the streets, before they are allowed to fish in our public waters. This is a grand forward movement with the Commissioners, for its benefits will be endless, especially in reference to enforcing protection. In concluding his paper Mr. Redding said he thought the time had come when a greater protection should be extended to our fish, and that their wanton destruction by Chinamen should be deemed a felony instead of a misdemeanor. Let us be thankful for this progress of conviction. It is always pleasant to record it among officials. With more firmness of purpose, and a keener vision, however, the conviction might have been reached some years ago. Now, let the Commissioner alone, if not with his colleagues, go before the next Legislature, clothed with official influence, and ask what he thinks to be right in justice to our people. He will lose no honor by doing so.

### The Sea Lions.

Much complaint is being made on all sides about the ravages of these voracious and ferocious brutes. It is said, by those who claim to know, that at least two thousand sea lions are now marauding our public waters, especially gathering round the heads after food, when the tide flows and ebbs. This large number is kept up because it benefits the proprietor of the Cliff House by pleasing his visitors. Such reason does not justify an unlimited and criminal destruction of our fish. Apart from the actual injury inflicted upon our fishermen and canneries, which is immense, we have been taking points for two months back on the amount of fish consumed by these animals. Mr. Woodward, of the Gardens, estimates the food of one seal, in captivity even, at 25 pounds a day. In the water, at large, it is probably 60 or 70 pounds. Let us put it at 45 pounds a day. This makes 335 pounds a week; 1,440 pounds a month; 4,413,600 a year to the single fish. This again multiplied by 2,000, the alleged number of sea lions ravaging our fish stock, makes the destruction of our fish, big and little, for nothing comes wrong to their mouths any more than to the Chinamen's net, 882,720,000 pounds for the year lost to commerce and domestic use. It is the duty of the Legislature, not the Commissioners, to give us relief in this respect. Of course, we cannot get rid of all the sea lions any more than all the Chinamen, but by a united effort we can cut the number down, and the figures given show the benefit it will be to the people.

The Russian River *Flag* says, T. J. Riley, S. J. Hall, A. L. Wright and Dr. Bible were out fishing last Monday week, and caught 435 splendid trout. In the early season there are good trout to be caught in that section, especially if people go to the Pyramid district, but for 435 splendid trout to be taken at one time, we doubt altogether. It is a pity the patent fishing rod we spoke of last week is not in existence round Healdsburg, for then we would get the exact character of those 435 fish.

Messrs. Benn and Butler of this city caught 150 trout on Sonoma Creek last Sunday. A friend, more candid than most trout fishers, informed us he saw several parties on Lagunita with about seventy trout amongst them, and there was not one fish in the lot that would reach six inches in length. Whence this rage for fingerlings?

During the current week a number of Oakland gentlemen fixed up their fishing pack, and left for the different streams in Alameda county for a few day's sport.

A nomadic angler writes that he found excellent trout fishing in the vicinity of Allen Springs, Lake county, where he also found that the hotel, now under a new management, was quite to his liking. Allen Springs are reached by the Northern railway to Williams, and thence by stage.

Mr. W. J. Shreve had a fine day's trout fishing in the neighborhood of Spanishtown last week, catching 108 good fish, many of them being very large ones, and all of them pure trout without any mixture of salmon.

The largest brook trout known ever to be caught weighed eleven and a half pounds. Mr. Baird, U. S. Fish Commissioner, very properly had a model taken of this rare fish.

Bay fishing was again generally poor during the week. A fair catch of rock cod, however was made at Tiburon.

**The New Temple at Los Angeles.**

That Los Angeles never does anything until she gets a good ready, and then does it in the very best of style, was never more fully illustrated than in the erection of her new theatre on Main street, just below First. This magnificent palace of amusement is being built by our deservedly popular citizen, Mr. O. W. Childs, under the management and direction of Col. A. M. Gray, who, after bidding eight theatres in the State, all of which having given perfect satisfaction, pronounces this one of the finest and most perfectly constructed in all its appointments of any theatre in the State. The entrance from the street is a grand conservatory of itself 18x80 feet, beautifully ornamented and furnished, opening at the rear into a grand court 24x65 feet and surmounted by a skylight 14x56 feet, and 70 feet above the floor. This court is handsomely ornamented and frescoed, and otherwise embellished with two bronze fountains and numerous tropical plants and flowers culled from the extensive exotic gardens of the proprietor. From this court on either side leads the stairs to the gallery, and opposite the main entrance are three wide double doors leading into the auditorium. The entire seating capacity is 1,500 roomy chairs, being made to order, considerable wider than the regulation size, besides the elevations being six inches wider than in any other theatre in the State—you see Los Angeles is a big country and its citizens must have lots of room. The divisions of the auditorium are four private boxes, draped in silk plush crimson and gold, an orchestra, dress circle and gallery. The interior is exceedingly rich, finished in ebony, maroon and gold, with handsomely frescoed ceilings and dome with stained glass windows on either side. The stage opening is 30x40 feet, richly embellished and draped, and fitted with a handsome curtain painted by the renowned Voegtlin, and instead of rolling in the usual way it is raised bodily on weights. The subject is Midsummer Night's Dream. The stage is 40 feet in depth by 72 feet in width, 40 feet to rigging loft and 70 feet entire height. The floor besides being furnished with all the regulation traps, is so arranged in sections that any portion or portions can be removed at will, producing wells, bridges and caverns of any size desired. It is most admirably lighted with both gas and electricity, has both rear and side entrances, and supplied with 13 dressing rooms. It is at present furnished with 25 sets of flats and wings, as well as numerous set pieces of various kinds. The location of this theatre, together with the liberal plan of its construction, has given it the most perfect ventilation that we have ever witnessed, and its egress both for comfort and in case of necessity is liberal even to prodigality, being 42 feet in width from the auditorium and 24 feet from the gallery. This temple of amusement is to be opened to the public on the 26th inst., by the talented Mlle Rhea and Company, for a season of one week.

As to Mr. Childs, whose enterprise and liberality has given Los Angeles this beautiful structure, words of praise are unnecessary, his reputation is co-extensive with the boundaries of the Pacific slope, being one of its first American settlers, and always found in the front ranks of those working for its interest and advancement, and while he has, though his energy and remarkable foresight, accumulated a good share of this world's treasures, his purse has always been the first to be opened to every enterprise in furtherance of the public good.

Los Angeles, May 20, 1884.

**The Vanderbilts and Their Trotters.**

A reporter on the New York Morning Journal gossips as follows a collection of millionaires and high-priced trotters, seen recently on the road to Fleetwood Park:

At least \$300,000,000 in capital and \$200,000 in horseflesh could be seen at Fleetwood Park yesterday. But the most enjoyable sight was on the road thither, when all the Vanderbilts got abreast on the boulevard. There was Mr. William H. Vanderbilt, as fresh as a June daisy, trying to keep Early Rose from going like a cannon ball; young Mr. Fred Vanderbilt driving a bay, so long and lithe that it cut through the air and went faster than the wind; young Mr. Lionel Vanderbilt with a brown chestnut that went so fast as to keep the dust-cloud a quarter of a mile behind it, and four or five other Vanderbilts, each with a horse of longer pedigree than the family and swifter than an express train. Mr. William H. Vanderbilt loosened the ribbons on Early Rose as Captain Jacob Vanderhilt wheeled alongside of him.

"I'll made William H. look sick," said Captain Jacob, as he spun along like an Iowa cyclone, with Boston Boy neck and neck to Early Rose. Mr. William H. Vanderhilt snuck off his coat, let the lines drop, and tapped Early Rose right and left with the whip. Captain Jacob pretended to draw in the reins on Boston Boy, and to try to dissuade the animal from attempting anything like his full-speed. He drew away from William H. at a gentle jog. Boston Boy gambled on and threw dust in the eyes of Early Rose in apparent playfulness. Four lengths ahead of the procession of all the Vanderbilts was increased in forty or fifty seconds to a quarter of a mile. Captain Jacob Vanderhilt and his country horse were soon a little and rapidly fading cloud in the distance. When Captain Jacob entered Fleetwood Park at a slow walk Mr. William H. Vanderhilt put on his eye-glasses and saw a scarlet handkerchief waving like a dancing red dot in the far distance. The Vanderbilt family was strung out for two miles along the "road," William H. leading the wild chase along the road after "Uncle Jake." The railway magnate's eyes were as large as saucers.

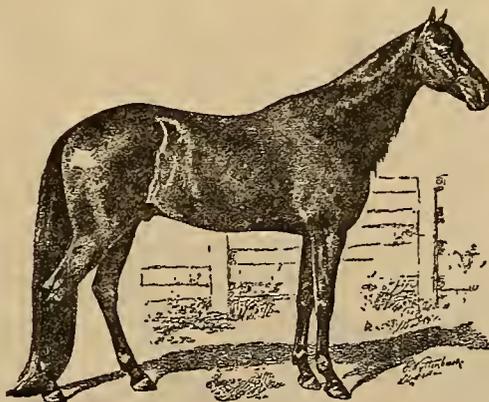

At Fleetwood Captain Jacob's best time was 2:22. Shepherd Knapp drove Charles Hogan and Sam Hill around in 2:21.

A correspondent in Paris writes that French horses are usually trotted over a course one mile and seven furlongs in length; that the Frenchman persists in overdriving young horses so that they rarely retain their trotting powers up to ten years of age. A speed of 2:42 or 2:45 to the mile is regarded as good.

Wm. Day, the veteran English trainer, has just been through the bankruptcy court. Although Plunger Walton is said to have paid the debts incurred last year, amounting to the enormous sum of £50,000, he has not paid Day his \$600 for training Girofle and other horses.

**TROTTING STALLIONS.**

**Mambrino Trotting Stallion**

**ABBOTSFORD.**

Record 2:19 1-2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE; San Mateo, Cal.

**PEDIGREE.**

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Paymaster; dam Woodbine, (dam of Wedgewood, 2:19), by Woodford, son of Kosciuszko, by Sir Archy.

Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:23 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:18 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Conroy 2:23 1/2; Magenta 2:24 1/2; Manfred 2:25; Pancoast 2:25 1/2; Rachel 2:25 1/2; Inca 2:27; Lady McFledge 2:28; Bagdad 2:28; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Princeps, the sire of Trinket 2:11. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,320 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:19 1/2; Commonweal 2:22; Hiram Woodruff 2:25; Valley Chief 2:25; Faustina 2:28 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

**TERMS.**

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

WASH. JAMES, Agent, San Mateo, Cal.

**STALLIONS THOROUGHBRED.**

**The Thoroughbred Stallion**

**WILDIDLE.**

By imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:42, at two years old), May D. (with a record of one and one-half miles in 2:7, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal. Mares taken, good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, Owner, or W. L. APPLEBY, Supt., Santa Clara, Cal.

P. O. Box 223.

**THOROUGHBRED STALLION**

**XX.**

**Pedigree.**

XX (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.

First dam, Columbia, by imported Bonnie Scotland. Second dam, Young Fashion, by imported Monarch. Third dam, Fashion, by imported Trustee. Fourth dam, Bonnets o' Blue, by Sir Charles. Fifth dam, Reality, by Sir Archy. Sixth dam, by imported Medley. Seventh dam, by imported Centinel. Eighth dam, by Mark Anthony. Ninth dam, by imported Janus. Tenth dam, by imported Monkey. Eleventh dam, by imported Silvereye. Twelfth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

XX (Doublecross) is of as big and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the grandam of Anteco. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauanita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Saganora, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding bas as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, big form, and of the best disposition.

Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

JOSEPH CAIRN SIMPSON,

Oakland or 508 Montgomery Street, San Francisco.

**STALLIONS**

—AT—

**RANCHO DEL PASO.**

For the Season of 1884.

**Thoroughbreds.**

**LONGFIELD.**

Chestnut horse, by MONARCHIST, be by Lexington. First dam, Dame Gourlay (Blue Gown), by Planet. Second dam, Flora G., by Lexington. Third dam, Fanny G., by imp. Margrave. Fourth dam, Lances, by Lance. Fifth dam, Aurora, by Aratus. Sixth dam, Paragon, by imp. Buzzard. Seventh dam, Indiana, by Columbus (son of imp. Pantaloon). Eighth dam, Jane Hunt, by Hampton's Paragon. Ninth dam, Moll, by imp. Figure. Tenth dam, Slamerkin, by imp. Wildair. Eleventh dam, imp. Cub Mare, by Cub. Twelfth dam, Aramantus's dam, by Eagle. Thirteenth dam, by Starling. Fourteenth dam, by Croff's Partner. Fifteenth dam, by Greyhound. At \$50 the season, due at the time of service.

**JIM BROWNE.**

Chestnut horse, by FOSTER, be by Lexington. First dam, Flush, by Hiawatha. Second dam, Fanny Bug, by imp. Ambassador. Third dam, Ida, by imp. Belsbazzar. Fourth dam, Madame Bosley, by Sir Richard Tenson. Fifth dam, Nancy Nicoli, by imp. Eagle. Sixth dam, Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Sterling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by Jolly Roger. Twelfth dam, by imp. Partner. Thirteenth dam, imp. Monkey. Fourteenth dam, an imp. mare from the stud of Harrison of Brandon. At \$50 the season, due at time of service.

**Trotting Stallions.**

**ECHO.**

Bay horse, by RYSDYK'S HAMBLETONIAN. First dam, Fanny Felter, by Magnolia, son of Seely's American Star. Second dam, by Webber's Kentucky Whip. Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of imp. Messenger. At \$100 the season, due at time of service.

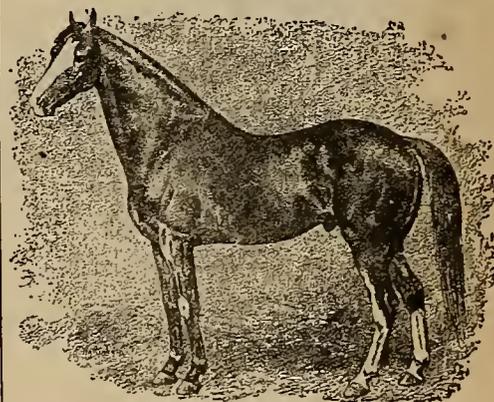

**ALGONA.**

Chestnut horse, by ALMOST, son of Alexander's Abdallah, son of Rysdyk's Hambletonian. First dam, Emma Kinkead, by Consort, son of Cassin M. Clay. Second dam, Effie Dean, by Mambrino Chief. Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy. At \$100 the season, due at time of service.

**ALASKA.**

Brown horse, by ELECTIONEER. First dam, by Washington, be by Geo. M. Patchen. Second dam, by Williamson's Belmont. At \$50 the season, due at time of service. The season for thoroughbreds will commence February 10th and terminate June 30th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$8 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents. John Mackey, Superintendent, Sacramento, Cal.

**The Thoroughbred Stallion**

**JOE HOOKER, BY MONDAY.**

First dam Mayflower, by imp. Eclipse. Second dam Hennie Farrow, by imp. Shamrock. Third dam Ida, by imp. Belsbazzar. Fourth dam Gamma's dam, by Sir Richard. Fifth dam, by imp. Eagle. Sixth dam, Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Sterling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by imp. Jolly Roger. Twelfth dam, by Partner. Thirteenth dam, by imp. Monkey. Fourteenth dam, imp. mare from the stud of Harrison of Brandon.

TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks. My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freepoint road. This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run. Among them are Fred Collier and Jim Renwick. For history of Hooker see BREEDER AND SPORTSMAN January 20th, 1883.

THEO. WINTERS, Sacramento, Cal.

## THE KENNEL.

## The New York Awards.

The following are the prize winners at the late bench show of the Westminster Kennel Club, New York, in the classes deemed of interest on this coast:

**Greyhounds.** Dogs—1st, H. W. Huntington, (Bouncing Boy, by Walton Lad—Cremore); 2d, Mrs. Henry Allen (Dell); V. H. C., J. Coleman Drayton (Slingsby, by Rapid—Sally); H. C., Edward Cullen (Moscow). Bitches—1st and V. H. C., H. W. Huntington (School Girl, by Schoolfellow—Sol-Fa, and Begonia, by Born-a-Demon—Bella); 2d, withheld.

**Greyhound Puppies.** Dogs or bitches—1st, withheld; 2d, H. Henderson (Flash); V. H. C., H. W. Huntington (La Belle, by Double Shot—Clio).

**Champion Deerhounds.** Dogs or bitches—Cloverwook Kennels (Roy, by Paddy—Lessie).

**Deerhounds.** Dogs—1st, A. Rogers (Bruce); 2d, W. D. Whipple (Bruce); V. H. C., A. Rogers (Boroa, by Wallace—Lorna). Bitches—No award.

**Champion Pointers, over fifty-five pounds.** Dogs—J. W. Munson (Meteor, by Garnet—Jilt).

**Champion Pointers, over fifty pounds.** Bitches—Christopher Moller (Weter Lily by Skidmore's Don—Dolly).

**Pointers, over fifty-five pounds.** Dogs—1st, C. W. Littlejohn (Fritz, by Beauport—Spot); 2d, Neversink Lodge Kennels (Drake, by Croxteth—Lass); 3d, L. and W. Rutherford (Danby, by Speck—Dineh); V. H. C., C. W. Littlejohn (Pilot, by Scout—Spot); J. W. Munson (Maxim, by Garnet—Jilt); and (Bang, champion Bang—Luna); H. C., C. M. Munhall (Donald II, by champion Donald—Devonshire Lass); J. H. Stromberg (Guy, by Beauport—Spot). Bitches—1st, Frank E. Rogers (Miss Merryman, by King Bow—Grace); 2d, J. O. Donner (Pan Fan, imported); 3d, G. W. Amory (Sal, by Dick—Ruby); H. C., Knickerbocker Kennel Club (Lady Mac, by champion Pete—Mab).

**Champion Pointers, under fifty-five pounds.** Dogs—Norbury Kennel (Bravo, by Brag—Kate). Bitches—J. W. Munson (Vanity, by Champion Bang—Pride).

**Pointers under fifty-five pounds.** Dogs—1st, W. Tallman (Pride, by Croxteth—Royal Fan); 2d, A. C. Collins (Fritz, by imported Bob—Gabb's Fly Shot); 3d, I. S. Crane (C. Don, by Robin—Sigler's Gypsy); V. H. C., G. F. Jordan (Booths, by St. George—Dineh); Knickerbocker Kennel Club (Craft, by Bang—Jean); R. C. Cornell (Match, by Sensation—Grace); Francis Lynch (Max); H. C., John A. Wells, M. D. (Pack, by Lewis Joe—Martin's Fau). Bitches—1st, Neversink Lodge Kennels (Jilt, by Croxteth—Lass); 2d, F. R. Hitchcock (Vision, by Croxteth—Vinnie); 3d, J. W. Munson (Flash III, by imported Bang—Pride); V. H. C., Charles R. Cristy (Nina, by Nat—Susy Royal); J. N. Lewis (Jill, by Joe—Fan Fan); and (Lady Dufferin II); H. C., D. S. Gregory, Jr., (Belle, by Sensation—Grace); R. T. Vandervort (Joy, by Boon—Rena); W. R. Williams (Rose, by champion Don—Lamb's champion Elf).

**Pointer puppies, over twelve and under eighteen months.** Dogs—1st, Charles F. Murphy (Rox, by Dick—Belle); 2d, James K. Heyde (Don, by Jim—Allerton's Dione). Bitches—1st, C. M. Munhall (Dora, by Sensation—Devonshire Lass); 2d, W. F. Sage (St. Kilda, by Dilley's Ranger—Dilley's White Lily); V. H. C., Neversink Lodge Kennels (Bocup, by Croxteth—Lass); H. C., Thomas F. Ryan (Nell III, by Czer—Nell II).

**Pointer puppies, under twelve months.** Dogs and bitches—1st, Norbury Kennel (Daisy Bravo, by Bravo—Lily II); 2d, F. R. Hitchcock (Prince Hamlet, by Sensation—Lass); V. H. C., G. De Forest Grant and Elliott Smith's (Fresco, by Bang—Daisy Dea); Dr. A. C. McCollum's (Faust II, by Faust—Gertrude); H. C., Julien Rosenblatt (Don, by Don Sr.—imported bitch); Garrett Roach (Lou, by Beauport—Duchess); Knickerbocker Kennel Club (Jule, by St. John—Folly); Francis Lynch (Windsor, by Bang—Daisy Dea).

**Champion English setters.** Dogs—C. F. Crawford, (Foreman, by Dashing Monarch—Fairy II). Bitches—T. G. Davey (Belle's Pride, by Paris—Harrison's Belle).

**English setters.** Dogs—1st, F. E. Lewis (Lock, by Waters' Grouse—French's Daisy); 2d, L. C. Clerk (Bob White, by Young Laverack—Lady May); 3d, Neversink Lodge Kennels (Laverack Chief, by Pontiac—Fairy II); V. H. C., Thomas F. Ryan (Count Den, by Carlowitz—Queen Bess); Dr. S. Fleet Speir (Marquis de Corzeze, by Emperor Fred—Lizzie Lee); Stewart McKay (Pride of Columbia, by Cossack—Ophelia); H. Pape (Prince Messenger, by Thunder—Loui); A. H. Moore (Prince Al, by Leicester—Dodge's Rose); C., G. F. Jordan (Telford, by Darkie—Rosy Morn); T. G. Davey (Prince Phobus, by Tam O'Shanter—Prue). Bitches—1st, E. W. Jester (Dashing Bell, by Dashing Monarch—Blue Belle); 2d, E. W. Jester (Dashing Jessie, by Dashing Monarch—Blue Belle); 3d, C. A. Stone (Forest Dora, by Dick Laverack—Forest Fly); V. H. C., John G. Hecksher (Modjeska, by Leicester—Peeres); J. O. Donner, (Princess Helen, by Thunder—Donour's Bessie); Thomas F. Ryan (Linda, by Emperor Fred—Ceilia D.); E. A. Herzberg (Lucid, by Sim's Dash—Maid of Honor); John J. Scanlan (Flake, by Druid—Swazee); Howard Hartley (Daisy Queen, by Rock—Meg); T. G. Davey (Genevieve, by Herrison's Loudon—Dawn); H. C., Dr. H. F. Aten's (Crook, by Carlowitz—Dell); Dr. F. B. Greenough (Brier, by Coit—Greenough's Spark); Dr. S. Fleet Speir (Lady Sanborn, by Count Noble—Spark); W. A. Buckingham (Alice Dale, by Waters' Grouse—Daisy Dale); Lawrence Sbuster, Jr., (Clementine D., by Dash III—Cornelia); C., Charles E. Husted, (Daisy, by Benedict's Dash—Galloway's Flirt); R. W. Dodd (Lily, by Matt); Locust Grove Kennels (Smut II, by Pratt's Trim—Earl Smut).

**English Setter Puppies, over twelve and under eighteen months.** Dogs—1st, W. R. Traver's (Rocket, by Wagner—Nell Kelly); 2d, J. J. Scanlan (Drake Carter, by Cashier—Flake); V. H. C., S. B. Foad (Brant F., by Dashing Monarch—Mollie Bawn); C. H. Stone (Royal); H. C., G. K. Haswell (Jock, by Promise—Ahhey), H. H. Odeman (Plunger, by Emperor Fred—Polka); C., Locust Grove Kennel (Paul, by Dash III—imported Blanche). Bitches—1st, J. J. Scanlan (Cliney Carter, by Cashier—Flake); 2d, Ed. Lohman (Mistletoe, by Emperor Fred—Countess Belle); V. H. C., Lawrence Sbuster, Jr. (Clarenda T., by Thuder—Cornelia); H. C. Bassford and Hall (Hilda Droid, by King Dan—May Queen).

**English Setter Puppies under twelve months.** Dogs or bitches—1st, C. H. Mason (Princess Phobus, imported by Prince Phobus—Pateb); 2d, S. B. Foad (Rosa F. by Dashing Monarch—Leah II); V. H. C., Dr. S. Fleet Speir (Widernere, by Druid—Countess Louise); T. S. Dumont (Pendragon, by Count Noble—Floy); R. de B. Smith (Peek-a-hoo, by Perfection—imported Beauty); H. D. Towuea (Count Ranger, by Count Noble—Gertrude); J. H. Lee (Cashboy, by Cashier—Flake); H. C., Pierre Noel (Verra, by Bruce—Abhey); Dr. R. F. Tull (Dashing Prim, by Dashing Monarch—Armida), Dr. R. F. Tull (Dashing Armida, by Dashing Monarch—Armida).

**Champion Black and Tan Setters.** Dogs—G. A. Reed

(Flash, by Brown—Cute). Bitches—Dr. H. Tillingherst (Perly, by Marble's Grouse—Queen Bess).

**Black and Tan Setters.** Dogs—1st, Edwin S. Dixon (Little Boy, by Dixon's Pilot—Fly); 2d, Miss Lillian Woodworth (Phil); 3d, Miss Meggie E. Mann (Punch, by Dr. Speir's Romeo—Colburn's Fannie); V. H. C., T. Puckeridge (Ocolia), Ed. Maher (Duke, by Bob—Nell); H. C., L. W. Fye (Puck, by Dexter—Belle); C., Stony Point Kennels (Black Shoon); Neversink Lodge Kennels (Bruce, by champion Bob—Beauty). Bitches—1st, Malcom Campbell (Daisy Blossom, by Blossom—Bessie B.); 2d, J. L. Campbell (Diana, by Jack Gup); 3d, W. H. Mason (Daisy, by Glen—Fannie).

**Black and Tan Setter Puppies, under twelve months.** Dogs—1st and 2d, James T. Walker (Grouse, Jr., by Jock—Black Bess and Jock, Jr., by champion Jock—Bleck Bess). Bitches—1st, James T. Walker (Dora, by champion Jock—Black Bess).

**Champion Irish Setters.** Dogs—Dr. W. Jarvis (Echo, Jr., formerly Elcho VII, by champion Elcho—champion Noreen). Bitches—W. Kemble Lente (Trix, by champion Elcho—Fire Fly).

**Irish Setters.** Dogs—Hiram and William Harris (Jack, imported, by Barney—Rhoda); 2d, J. Henry Roberts (Bruce, by champion Elcho—Noreen); 3d, Rory O'More Kennels (Rexford, by champion Berkeley—Sampson's Nora); V. H. C., Charles W. Roedenberg, (Chip, by Chief—Doe); H. B. Goetschens (Chief II, by champion Chief—imp. Doe); C. E. Bunnell (Berkshire, by Chief—Kate); H. C., Charles R. Thorburn (Rory O'More, Jr., by champion Rory O'More—Nora O'More); F. L. Van Benschoten (Red Dick, by Elcho—Jessie); L. H. Bullard (Phil, by Derg—Kathleen); C., Max L. Ransom (Larry II, by Larry—Red Lassie). Bitches—1st, John F. Dwight (Noreen II, by Elcho—Noreen); H. B. Thomas (Fama, by Glencho—Nora); 3d, Charles R. Thorburn (Phoney Jane, by Berkeley—Nora); V. H. C., C. R. Squire (Ruby S., by Rory O'More—Nora O'More); James T. Walker (Reeta, by Elcho—Fire Fly); A. S. Guild (Dorcas, by Glencho—Syren II); E. M. Carrington (Hazel, by Elcho—Rose); John J. Scanlan (Lulu II, by Berkeley—Lulu); Rory O'More's Kennels (Laudy Edith, by Rory O'More—Lady Berkeley); Charles J. Stewart (Meg, by Chief—Bessie); H. C., Frank Leonard, (Bess, by Glencho—Syren II); C., C. E. Bunnell (Lady Berkshire, by Chief—Kate); C. E. Bunnell (Kate, by Lincoln & Hillyar's Dash—Bray's Kate); Rory O'More's Kennels (Gay, by Elcho—Fire Fly).

**Irish Setter Puppies, under twelve months.** Dogs—1st, Rory O'More's Kennels (Rory O'More II, by Rory O'More—Nora O'More); 2d, John J. Scanlan (Pride of Glencho—Lulu); V. H. C., Stony Point Kennels (Claret, by Dan—May); W. G. Brokaw (Pilot, by Dan—May); D. B. Freedman (Prince, by Dan—Moyle); Bassford & Hall (Garfield, by imported Zig—Fashion); C., W. S. Maddock's (Ladd, by Denis—imported bitch). Bitches—1st, John J. Scanlan (Lady Glencho, by champion Glencho—Lulu III); E. M. Carrington (Pattie, by Biz—Hazel); V. H. C., Ashmont Kennels (Norena, by Elcho—Noreen); W. H. Mason (Nett, by Glencho—Fannie); W. H. Mason (Lilly, by Glencho—Fannie); W. H. Mason (Rose, by Glencho—Fannie).

**Chesapeake Bay Dogs.** Dogs or bitches—1st, J. H. Bradford (Rose, by Lena—Bell); Lonis C. Clark (Chess, by Sport—Rose).

**Champion Cocker Spaniels (any color) under twenty-eight pounds.** Dogs or bitches—J. P. Willey (Obo II, by Farrar's Obo—Chloe II).

**Cocker Spaniels (liver or black) under twenty-eight pounds.** Dogs or bitches—1st, B. F. Wilson (Peerless Glass, by Young Bewerly—Nellie); 2d, E. W. Durkee (Jumbo, by Hornell Dandy—Dinah); V. H. C., Andrew Laidlaw (Woodstock Flirt, by Tippe—Toronto Jet); H. C., Wm. Dunphy (Bessie, by Beau—Fancy); C., James Watson (Flora, by Beau—Rhea II); Hornell Spaniel Club (Sam, by Bonanza—Fancy).

**Cocker Spaniels (any color other than liver or black) under twenty-eight pounds.** Dogs or bitches—1st, Hornell Spaniel Club (Rattler, by Dandy—Dinah); 2d, Wm. Dunphy (Fancy II, by Beau—Fancy); V. H. C., Captain J. E. Jones (Blossom, by Charley—Powder); H. C., Captain J. E. Jones (Powder); C., George Miller (Clytie, by Shot—Lou).

**Field or Cocker Spaniel Puppies (any color) under twelve months.** Dogs or bitches—1st, W. Johnson (Black Tournie, by Obo II—Critic); 2d, W. O. Partridge (Helen, by Obo II—Critic); V. H. C., Dr. J. S. Niven (Niven's Durkey, by Frank—Nellie); H. C., Hornell Spaniel Club (Darling, by Dandy—Topsy).

**Champion Foxhounds.** Dogs or bitches—Essex County Hunt (Vinegar, imported).

**Foxhounds.** Dogs or bitches—1st, Essex County Hunt (Cardinal, imported); 2d, Essex County Hunt (Warrior, imported); 3d, Essex County Hunt (Manager, imported); H. C., W. Ball (Brownie, by Sam—Flora); C., Essex Kennel Club (Sport).

**Champion Fox Terriers.** Dogs—Prescott Lawrence (Brockenhurst Joe, by Belgrave Joe—Trickery). Bitches—John E. Thayer (Richmond Olive, by Olive Tart—Dickerson's Jess).

**Fox Terriers.** Dogs—1st, L. & W. Rutherford (Belgrave Primrose, by Belgrave Jerry—Wasp); 2d, Clovernook Kennel, (Scarsdale, by Joker—Ella); 3d, John E. Thayer (Raby Tyrant, by Bailiff II—Peach); V. H. C., John T. Cable (Vakeel, by champion Volo—Spiteful); New Brighton Fox Terrier Kennels (Marlboro Jockey, Jr., by Marlboro Jockey—Twinkle); J. B. McDewitt (Roderick, imported); Prescott Lawrence (Buff); H. C., New Brighton Fox Terrier Kennels (Grip, by Yorkshire Bill—Vanity); B. M. Cole (Terror, by Tyke—Fido); C., Hugh Hill (Boxer, by Corinthian—Cosey); New Brighton Kennels (Governour, by Grip—Nancy); H. L. Daggett (Nip, by Joe—Lady Teasel); George W. Haines (Tough, imported). Bitches—1st, L. & W. Rutherford (Dance, by Brockenhurst's Spice—Polonaise); 2d, John T. Cable (Village Belle, by champion Volo—Beauty); 3d, L. & W. Rutherford (Warren Testy, by Nailor—Diana); V. H. C., New Brighton Fox Terrier Kennel (Diamond, by Marlboro Jockey—Twinkle); Alex. Taylor, Jr. (Squeak, by Moslem II—Moolight); H. C., New Brighton Fox Terrier Kennel (Twinkle, by Jester II—Thyra); C., Neversink Lodge Kennel's (Lady Gay, by P. Lawrence's Panlo—Nettle).

**Fox Terrier Puppies under twelve months.** Dogs—1st, L. & W. Rutherford's (Warren Joe, by Brockenhurst Joe—Swansdown); V. H. C., Alex. Taylor, Jr. (Aetoon, by Rutherford's Jocker—Squeak). Bitches—1st, Clovernook Kennel's (Clover Belle, by Rutherford's Joker—Warren Bessie); V. H. C., Alex. Taylor, Jr. (Azola, by Rutherford's Joker—Squeak); H. C., E. A. Hawe's (Betsy, imported); Alex. Taylor, Jr. (Daphne, by Rutherford's Joker—Squeak); Alex. Taylor, Jr. (Juno, by Rutherford's Joker—Squeak); C., Mrs. Mary W. Herzberg (Rosa Bouheur, by Peregrine Pickle—Gypsum).

A Frenchman's remedy for the cure of the distemper is, "keep the dog warm, give him plenty of black coffee; if there should be much discharge from eyes and nose, pass a seton, if on the contrary, the illness falls on the lungs, clip the hair off on each side of the chest and rub gently with one drop of croton oil. Give strengthening food, but above all, keep him warm."

## "X" Corrected.

EDITOR BREEDER AND SPORTSMAN—In your issue of yesterday, under the head of False Pedigrees, "X" undertakes to correct W. Bradford who is correct in regard to Mead's Dick and Daniels' Sancho, so called. I raised both dogs and know their pedigree. Belle, the mother of them was presented to me by Mr. Chas. Kaeding when about eight weeks old. She belonged to the same litter that Dr. Toland's Whisker came from, and a more perfect specimen of an Irish setter was never whelped in California. She was shot at Alameda when about three years old. Dick and Sancho were from the same litter, by Lohse's Sport, he by Grissim's Bill (a pure white dog, and the handsomest dog I ever saw, and the best) out of Little's Beauty. "X" had the rest of the pedigree correct. Sport took first prize at bench show for Irish setters, though really only half bred, as old Belle was what I would call English. I presented Dick to Henry Lewis, and Mead got him from him. Sancho I gave to W. K. Sime, and after I lost Belle he returned her. Daniels had her for some time, but she never belonged to him, she is my property and has a fine litter of pups by Mr. Briggs' dog at Gilroy. San Jose, May 18th, 1884. T. R. H.

## THE DRAMA.

## Vienna Garden.

Another successful week has rewarded the efforts of the Gypsy Band, the audiences being larger, more intelligent and wealthy, than we ever saw in the hall at any previous time. On Sunday night some four hundred people could not get standing room. This proves the music is appreciated by our cultivated classes. We have already said all that can be said in principle about these wonderful musicians and their wonderful music that can well be said, but we wish to add a few words about their instrumentation. Like the Spanish Students they play all their pieces from memory, which makes the performance all the more agreeable and impressive. For perfect instrumentation we may mention, Franz Garay's solos on the violin, and I mra Barath's solos on the cimbal; then follow their waltzes, polkas, and aerenada; the Miserere; the Radezki March; Hungarian and American airs arranged by Garay, the leader; and the overture from Meyerbeer's operas, all of these being perfect in instrumentation, and the best things we have heard them play. Meyerbeer, like Mozart, is always more or less devotional in his compositions, and they seem to suit the Magyar spirit and genius better than most others. It is a great treat to have such music to listen to at nominal prices. The interludes have been very good during the week, especially the new clown-genius Shiliti just arrived from the east. We have some notes about Miss Gonzales the pianist, and Miss Vasconcelas the vocalist, who have deservedly become very popular; about Paul Stanley and Frillman, but our space will not allow us to write them up for this issue. The Vienna has evidently a good prospect ahead.

## The Grand Opera House.

During the week No Thoroughfare has been presented in a very creditable manner, and in the earlier part of the week to good houses. Wright and Wessels take the leading male characters supported by Miss Charlotte Tittel as leading lady, as Marguerite. Wright is far superior to Wessels in all that goes to make the actor for special or general work. The truth is, Wright has many attractive features, and much more than average abilities. Of Wessels we cannot speak so favorably, for on the stage he is not an exaggerated villain, he is nothing. Miss Tittel, on Wednesday evening, received an earnest welcome when she appeared on the stage, and afterwards, on the same night, two equally earnest calls before the curtain. No other member received any such acknowledgement. The *Call* and *Alta* both commended her Marguerite. Next week Bertha, the Sewing Machine Girl, with Miss Tittel as Berthe, will be the attraction. The piece is to be especially well mounted.

## Oakland Theatre.

This establishment during the week, with the Sheridan combination, has again done a splendid business. The plays and the performance have been unexceptionable, except that at times towards the close, the star seemed wearied out and lost some of his usual vigor. It is pleasant all round, to know Sheridan has been so well recognized at Oakland, for we again assert it would be difficult to find his superior in high drama on the stage to-day. Next week the Galley Slave will be given with a strong cast, in which Grismer and Phoebe Davies will take the leading characters. We think the houses will be equally good.

In England at the present time the blood of Hermit is the most fashionable strain that can be looked for in a pedigree, and the success upon the turf of the Hermits during the past few years fully warrants the esteem in which the horse is held. A son of Hermit is now on his way to this country—a horse that in 1879 was backed by his owner, Lord Aylesford, to win over \$300,000 in the race for the Stewards' Cup at Goodwood, which race, by the way, he failed to capture. The animal referred to is Styliotes, and Lord Aylesford, who is now devoting his energies to the management of a cattle ranch in Texas, has arranged to have him placed in the stud in Westchester county, N. Y., where his blood will certainly be appreciated. Two years ago Mr. James Keene purchased for importation to this country Blue Gown, a son of Hermit, but on the way across the Atlantic the horse died and at the present time there is none of the Hermit blood in the direct male line in this country.

An autopsy upon a horse owned by a Bridgeport, Conn., man revealed the fact that death was caused by pieces of zinc which he chewed from the lining of his manger and swallowed, producing inflammation.

King William IV when asked which horse he would start in a certain race replied "Oh! start the whole fleet and let the best heggar win." Three of the royal stud came in first, second and third.

For bronchial, asthmatic, and pulmonary complaints, "Brown's Bronchial Troches" manifest remarkable curative properties. Sold only in boxes.

## SUPERINTENDENT.

Situation wanted by an Englishman, thoroughly competent, as superintendent of a stock ranch or breeding establishment. Understand the business. Highest references given.

Address, J. M., this Office.

STOCK AGENCY.

S. D. Bruce of the TURF, FIELD AND FARM, and author of the American Stud Book, offers his services in the purchasing of thoroughbreds and stock of all kinds.

Stick-Fast Toe-Weight.

This Toe-Weight, wherever introduced, has effectively replaced every other kind. All prominent saddlers and horsemen in the U.S. recommend them in preference to any other.

Speed Programme

THIRD DISTRICT AGRICULTURAL ASSOCIATION

COMMENCING TUESDAY, SEPT. 2, 1884. First Day, Tuesday, September 2d, 1884.

No. 1.—TROTting RACE.—For two-year-old colts owned in the District. Mile heats, best 2 in 3, to harness and to rule, for a purse of \$200.

No. 2.—TROTting RACE.—2:30 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$400.

No. 3.—RUNNING RACE.—Three-quarter dash for two-year-olds. Entrance \$25, p. p., \$125 added.

No. 4.—RUNNING RACE.—One-and-a-half-mile dash for all three-year-olds. Entrance \$25, p. p., \$200 added.

No. 5.—RUNNING RACE.—Three-fourths of a mile and repeat for all. Entrance \$25, \$175 added.

No. 6.—TROTting RACE.—For yearling colts owned in the District. One mile, to harness and to rule, for a purse of \$150.

HORSE BOOTS AND TRACK WORK

A Specialty. 232 Ellis St., opp. Fashion Stable, San Francisco.

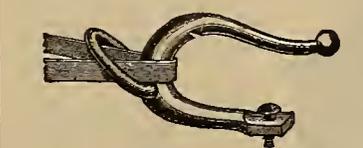

J. O'KANE,

367 Market Street, San Francisco.

WHOLESALE AND RETAIL dealer in Harness, Saddles, Blankets, English Race Goods, And everything necessary for horse or carriage use.

Horse Boots a Specialty. Agent for Dr. Dixon's Condition Powders. Repairing promptly attended to.

DIETZ'S PATENT

CHECK HOOK.

Simple in its Structure and Practical in its Use.

The horse never loosens the check-rein when this Check Hook is used.

Horsemen can appreciate the value of a Check Hook of this kind.

There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook.

Orders sent to A. C. DIETZ, No. 9 Front St., San Francisco, Cal.

Will receive prompt attention. When ordering state whether gold or silver plate required.

THE NEW ZEALAND

Stud and Pedigree Stock Co.

LIMITED. AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls.

This bull and many of his progeny are amongst the herd. The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

Fastest Time on Record.

Martini-Henry, by Musket-Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41 1/2; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30 1/2, and beating a field of twenty-nine, thus lowering the previous best record of 3:30 3/4, by Darrivell (5 years), carrying 102 pounds, in 1879.

Musket-The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

P. H. BOURKE, Secretary, Auckland, New Zealand.

THE TROTTING STALLION

SILVERHEEL

WILL MAKE THE SEASON OF 1884 AT THE DASHWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland.

Silverheel is a dark bay, foaled July 5th 1876; bred by R. B. Chisholm of Kane County, Illinois. Sired by Wilson's Blue Bull, his dam Maggie Rice by Gage's Logan; grandam Fanny Stratford, a mare which had every mark of high breeding, and was the dam of John A. Rice that showed a 2:40 gait when two years old.

Logan by Rysdyk's Hambletonian; his dam Lady Wallace by Ohio Eclipse.

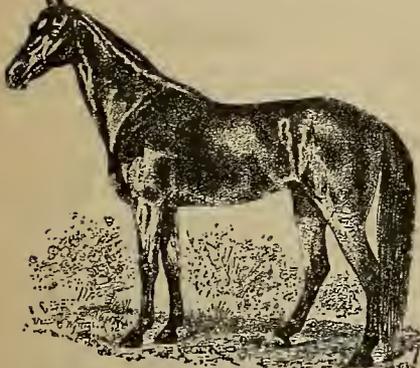

With little training when four years old, Silverheel showed three beats inside of 2:40.

TERMS.

Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

SACKRIDER & CHISHOLM.

Hambletonian Trotting Stallion

BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of imported Levathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTting PARK.

Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

TERMS.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

CHARLES J. ELLIS, Owner. WM. DONATHAN, Agent.

The Trotting Stallions

Baywood and Fleetwood

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

BAYWOOD

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover.

Sired by Nutwood; first dam by Geo. M. Patchen; second dam by Champion; third dam by Belmont.

FLEETWOOD

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model perfect horse; high life, fine style and action, and looks like thoroughbred.

Sired by Nutwood. First dam Copper Bottom Mare, by Young American; second dam the Tibbetson Mare, pedigree unknown but she was reported to have been bred in Kentucky.

Terms: \$25 for the season, or \$40 to insure.

E. S. SMITH, San Jose.

THE ELECTIONEER STALLION

STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

TERMS.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr. (sire of Geo. Treat, record 2:25 1/2), by McCracken's Dave Hill, by Red Lion, and he by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont.

Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred.

Dam of Dave Hill by Vermont Hambletonian.

Dam of Red Lion by Vermont Hambletonian.

Oakland, January 18, 1 J. J. FAIRBANKS, Agent.

The Trotting Stallions

DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phyllis, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Ontario, 2:25); by Mambrino Chief; second dam by Potomac; third dam by Saxe Wiemar.

Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

Monroe Chief, 2:18 1-4.

Two-mile record, 4:46.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whip stock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performance, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address JOHN A. GOLDSMITH, OAKLAND TROTting PARK.

The Trotting Stallion

BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus's Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

TERMS.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

February 2d, 1884. J. B. McDONALD.

2:20 1-4.

The Fast-Trotting Stallion

ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond.

Second dam, Columbia, by imp. Bonnie Scotland.

Third dam, Young Fashion, by imp. Monarch.

Fourth dam, Fashion, by imp. Trustee.

Fifth dam, Bonnets of Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley.

Eighth dam, by imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus.

Eleventh dam, by imp. Monkey.

Twelfth dam, by imp. Silvereye.

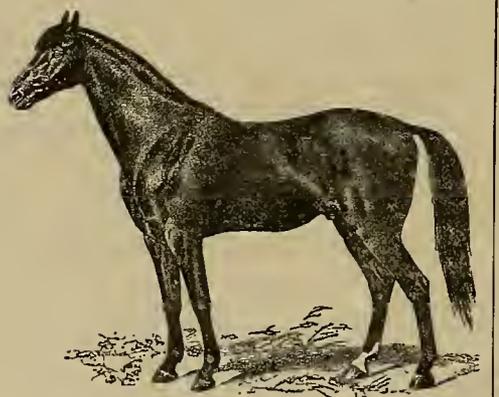

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents. Anteeo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address, M. ROLLINS, Agent, Santa Rosa.

MAMBRINO WILKES.

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christiana by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Rippon's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,200 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which he have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prepotent sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

\$40 for the season, or \$25 single service. This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

A. L. HINDS, Agent.

The Trotting Stallion

STEINWAY,

With two-year-old record, third heat, of 2:31, and three-year-old record, fourth heat, of 2:25 1/2.

TERMS.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County,

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McCleverty & Noblett, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Haywards, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Strathmore; first dam Abess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Claus, 2:17; and Tucker, 2:19; Chestnut Hill, 2:22; Alice Stoner, 2:24; Steinway, three-year-old, 2:25; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:23; Henderson, 2:28; Strathlin, three-year-old, 2:24; and Stuart, three-year-old, 2:28. Stuart is full brother to Belmont, who trotted a mile in 2:52 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23; and he in turn got Governor Sprague, record 2:20; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verena, Admiration, Mystery, in 2:39, 2:32, 2:31. Memento won the first heat. As three-year-old, at Sharsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:36, 2:25 1/2, 2:30 1/2, 2:26 1/2. Steinway winning fourth, fifth and sixth heats, the hearing Jewett, Catchfly and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:23 1/2, 2:26 1/2, but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

Address GEORGE WILEY, Cook Farm, Danville, Contra Costa Co., Cal.

THE TROTting STALLIONS

SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO July 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal. Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie is son of Vermont Black Hawk, grand dam by Elizabeth, thoroughbred (No. 37). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:45) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Leffer's Consul, by Shepper's Consul.

Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

LA HARPE

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe is sired by Fame, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star, (son of Platt's Western Star by Blacknose). 1st dam by Bonagers, 2nd dam by Galbath (sire). La Harpe's dam Prairie Bird by Flaxtail (dam of Flight, 2:29, and Promper, 2:30). 2nd dam Fashion, by John Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Leffer's Consul. Irwin's Tuckahoe by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

TERMS:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

J. T. MCINTOSH, Box 60, Chico, Cal.

TIME SCHEDULE. THURSDAY, APRIL 24th, 1884.

Trains leave, and are due to arrive at, San Francisco as follows:

Table with columns: LEAVE (FOR), DESTINATION, ARRIVE (FROM). Lists various routes to Benicia, Byron and Martinez, Callistoga and Napo, Colfax, Deming, El Paso, Galt and via Livermore, Stockton via Martinez, Knight's Landing, Los Angeles and South, Livermore and Pleasanton, Merced, Madera, Fresno and Tulare, Marysville and Chico, Mohave, Needles, Ogdan and via Livermore, Red Bluff, and Tehama, Redding, Sacramento, via Livermore, San Jose, Vallejo, Virginia City, Woodland.

Train leaving San Francisco at 7:00 A. M. can meet Pacific Express from Ogden at Oakland Pier; and that leaving at 8:30 A. M. can meet Pacific Express from The Needles and El Paso at Oakland Pier.

LOCAL FERRY TRAINS, VIA OAKLAND PIER. From San Francisco Daily.

Table listing ferry routes: TO EAST OAKLAND, TO FRUIT VALE, TO ALAMEDA, TO BERKELEY, TO WEST BERKELEY.

To San Francisco Daily. FROM FRUIT VALE, FROM FRUIT VALE (via Alameda), FROM EAST OAKLAND, FROM BROADWAY, OAKLAND, FROM ALAMEDA, FROM BERKELEY, FROM WEST BERKELEY.

CREEK ROUTE. FROM SAN FRANCISCO, FROM OAKLAND.

LINES OF TRAVEL. SOUTHERN PACIFIC RAILROAD.

SUMMER ARRANGEMENT. Commencing Sunday, May 4th, 1884.

Table with columns: LEAVE S. F., DESTINATION, ARRIVE O. F. Lists routes to San Mateo, Redwood and Menlo Park, Santa Clara, San Jose and Principal Way Stations, Gilroy, Pajaro, Castroville, Salinas and Monterey, Hollister and Tres Pinos, Watsonville, Camp Goodall, Aptos, New Brighton, Soquel (Camp Capitola) & Santa Cruz, Soledad and Way Stations, Monterey and Santa Cruz (Sunday Excursion).

STAGE CONNECTIONS are made with the 10:40 A. M. Train, except Pescadero Stages via San Mateo and Redwood, and Pacific Congress Springs Stage via Santa Clara, which connect with 8:30 A. M. Train.

EXCURSION TICKETS. For Sundays only, Sold SUNDAY MORNING, only For Saturday, Sold SATURDAY and SUNDAY only, Sunday and good for return until following Monday, day, inclusive, at the following rates:

Table listing excursion rates for Round Trip from San Francisco to various locations: San Bruno, Millbrae, Oak Grove, San Mateo, Belmont, Redwood, Fair Oaks, Menlo Park, Mayfield.

TICKET OFFICES - Passenger Dept. Townsend street, Valencia-street station, and No. 613 Market street, Grand Hotel.

TO Sportsmen & Pleasure-Seekers. THE SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES AFFORDED BY ITS LINE FOR REACHING A with speed and comfort the best places in the State for Sea Bathing, Shooting and Fishing.

MONTEREY. THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

THE BAY OF MONTEREY. Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish Mackerel, and Flounder.

THE BATHING FACILITIES AT THE "HOTEL DEL MONTE," ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing. THE BATH-HOUSE contains SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunge and swimming-baths, with ELEVANT ROOMS connecting with individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ, IS VIA THE

Southern Pacific Railroad, (Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety.

Quail, Pigeon, Sulphur, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of ranges at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE. Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars. In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Gunstaken apart and securely packed in wood or leather cases may be taken in Passenger Cars. TICKET OFFICES - Passenger Dept., Townsend street, Valencia Station, and No. 613 Market street, Grand Hotel. A. C. BASSETT, H. R. JUDAH, Asst. Superintendent, Asst. Pass. & Tkt. Agt.

**RAWSON'S** (Self-Adjusting) U. S. ARMY **Y**

**Suspensory Bandages.**

A perfect fit guaranteed. Support, Relief, Comfort. Automatically Adjustable.

**DISPLACEMENT IMPOSSIBLE.**

Treatise on Nervous Tension and Circular mailed free. Sold by Druggists. S. E. G. RAWSON. Sent by mail safely. Patented, Saratoga Springs, N. Y.

**RUPTURE**

Absolutely cured in 30 to 60 days, by Dr. Pierce's Patent Magnetic Elastic Truss. Warranted the only Electric Truss in the world. Entirely different from all others. Perfect Retainer, and is worn with ease and comfort night and day. Cured the renowned Dr. J. Simms of New York, and hundreds of others. New Illustrated pamphlet free, containing full information.

**MAGNETIC ELASTIC TRUSS COMPANY.** 704 Sacramento St. San Francisco, Cal.

SEND FOR CIRCULAR OF THE **LIGOWSKI FLYING CLAY PIGEON** PIERCE & CO. OAKLAND, CAL. AGENTS FOR THE PACIFIC COAST.

The Firm also carries a large stock of **HARDWARE, RIFLES, GUNS, PISTOLS,** Of every make **CARTRIDGES, FISHING TACKLE, RODS and FLIES,** in every variety, and all articles belonging to the Sportsman's outfit on REASONABLE TERMS.

Thoroughbred **SETTER PUPPIES.**

ENGLISH SETTERS, FINEST breed imported. Irish Setters, from Champion stock imported by R. W. Hill of Oregon. Pedigrees guaranteed. \$25.00 each at six weeks old. Apply to **E. LEAVESLEY, Gilroy.**

**TIPS.**

Tips of all sizes for Trotting, Running, and Road horses can be obtained by application to this office or to

**PAUL FRIEDHOFER,** 116 Washington St. San Francisco.

**Sprung Knees**

**Cockled-Ankles**

Permanently cured by using **SPARKHALL'S SPECIFIC.** Valuable and undisputable testimonials from all points mailed free on application. The Specific is sold in quart bottles, price \$2 New York City: John Carle & Sons, Wholesale Druggists, 153 Water Street, cor. Maiden Lane, Headquarters for New York City. Hartford, Conn.: A. Marwick, Jr., & Co., 376 Asylum St. Newark, N. J.: Tompkins & Mandeville, 14 Ward St. Philadelphia, Pa.: B. O'Brien, 1,600 South Tenth St. Savannah, Ga.: Solomons & Co. San Francisco, Cal.: Wakelee & Co., under Occidental Hotel. Cleveland, O.: F. S. Slosson, 223 Superior St. Baltimore, Md.: Louis Senft & Co., 22 N. Howard St. Chicago, Ill.: J. H. Fenton, 187 and 189 Washington St. Chicago, Ill.: Tompkins & Mandeville, 180 Wabash Av. Melbourne, Australia: James A. Roberts.

**R. H. SPARKHALL,** Proprietor and Manufacturer, 101 Trumbull Avenue, **DETROIT, MICH.**

**IN THE STUD.** Llewelin Setter Dog **CARL,**

BY LIECESTER OUT OF DART. Color, Black, White and Tan; aged five years. Bred by L. H. Smith, of Stratroy, Ontario, Canada; broken by R. B. Morgan, now of Akron, Ohio; also handled one season by N. B. Nesbitt, of the Harvard Kennel Club, at Storm Lake, Iowa. Will be bred to a few first-class bitches. Fee.....\$40.00 Address W. W. MOORE, Oakland, Cal., or J. Y. ROSS, 123 California Street, San Francisco.

**FAIRLAWN, 1884.**

TENTH ANNUAL CATALOGUE

Now ready for distribution. Contains descriptions and pedigrees of 252 head of High-Bred Trotting Stock now at Fairlawn. Will be sent free to all applicants who enclose 3 cents in stamps to prepay postage.

**25 HIGHLY-BRED BROOD-MARES,**

Bred to the Fairlawn Stallions, and

**130 HEAD OF VERY PROMISING YOUNG STOCK,**

Consisting of Young Stallions, Fillies and Roadsters, are offered at *Private Sale.*

**THE ONE PRICE PLAN** Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person. All stock sold on orders can be returned if they do not come fully up to the descriptions given.

The Stallions in use at Fairlawn are

**ALMONT 33.**

Represented in the 2:30 list by 24 performers, with records ranging from 2:15½ to 2:30. Limited to 20 approved mares at \$300 the season.

**HAPPY MEDIUM 400.**

Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season.

**ABERDEEN 27.**

Having ten of his get with records ranging from 2:15½ to 2:27½. Limited to 40 mares at \$150 the season.

**ALECTO 2548.**

By Almont, out of Violet, by Rysdyk's Hambletonian. Limited to 30 mares at \$50 the season.

**STARMONT 1526.**

By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season.

**Ethan Allen, Jr., 473, used as a Private Stallion.**

The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 2:30 list. The sons of each of these stallions are siring trotters. Almont has six different sons that have sired 2:30 trotters. Mares failing to get with foal can be returned in 1885 free of charge. For further information, and catalogues containing full particulars, address

**WM. T. WITHERS, Lexington, Ky.**

**ASHLAND PARK TROTTING STUD** NEAR LEXINGTON, KY.

**B. J. TREACY, PROPRIETOR.**

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Bak-sora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbreds. For catalogues or further particulars address **B. J. TREACY, Lexington, Ky.** 2-17y1

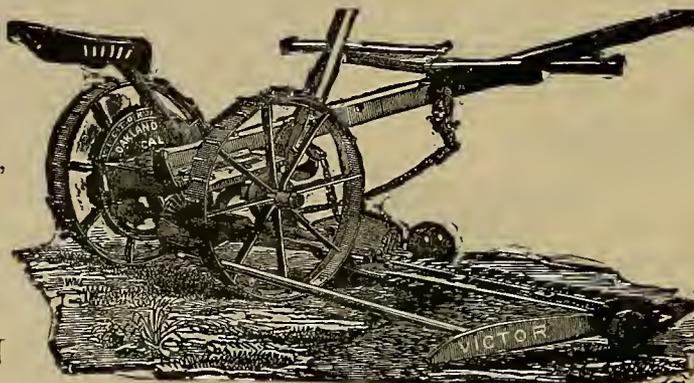

**KERR'S ASTHMA CURE**

Cures Asthma, Bronchitis, Throat and Lung affections, Coughs, Colds, Quinzy, Sore Throat, Soreness in the Chest or Lungs, Weakness in the Back, Pains in the Back, Bowels, Slides, Colic, Croup, Pneumonia, Measels, Whooping Cough and Indigestion. It beats the entire system. Pleasant tasted as ice cream. For sale by all druggists. Price, 50 cents and \$1.00 per bottle. Post-office box 1870.

**REDDINGTON & CO., Wholesale Agents, 529 and 531 Market Street, San Francisco.**

**CALIFORNIA VICTOR MOWER.**

**GUN METAL BOXES**  
**INSTEAD OF BABBITT,**  
**AND STEEL GEARS**  
**INSTEAD OF CAST-IRON**

**GUARANTEED TO**  
**HAVE NO SIDE DRAFT,**  
**AND NO WEIGHT**  
**ON THE HORSES NECKS**

Four Sizes, 4, 4½, 5 and 6 ft. cut.

We also manufacture Tacks, Files, Bar Iron and the **California Horse-shoe Nail.**

FIVE DOLLARS A YEAR.

## The Educational Project of Governor Stanford.

Among all the great projects with which ex Governor Stanford has been connected, none have awakened more favorable criticisms than that which has been lately made public. Apart from the greatest work of this generation, the connecting of the Pacific with the East, reducing the long journey from weeks to a few days, replacing the tedium and dangers of crossing the plains, rounding Cape Horn, or braving the dangers of the Isthmus with a pleasure trip, he has been engaged in other matters of exceeding benefit to the Pacific coast. These have not been so well understood or generally known, and the millions expended in works of great interest to the State were so quietly invested that only those intimate with his affairs have a knowledge of what has been done. His late sad bereavement has only hastened the consummation of an enterprise which unquestionably he has entertained for a long time. In conversations with the writer, Governor Stanford has oftentimes alluded to the inefficiency of the present system of education in preparing men and women for the common duties of life, that in place of being prepared to enter into active service when the certificates of graduation were awarded, the hold of the diploma was actually more helpless than a boy of sixteen reared on a New England, New York, Pennsylvania or Ohio farm, his only book knowledge that which was acquired in the winter months at a district school, with a few of the more fortunate polished by a short sojourn at the village academy. The history of the United States proves that a large proportion of the men who have been instrumental in placing the republic in the lead of all nations have been reared and educated in this simple manner. Outdoor life gave strong muscles and a sound brain, and the stock from which they sprung being of the right blood, with maturity came powers which have astonished the world. There were great obstacles, however, in these primitive days, and could these be overcome without surrendering the advantages attending practical life, the object of the projector will be gained. It would certainly be premature to speculate on the plans of Governor Stanford, although there is scarcely a doubt that they will result in the most comprehensive system of education ever inaugurated in the United States. But notwithstanding the wide-spread reputation that Palo Alto has gained through the horses bred there, apart from it being recognized as the model breeding and training farm of the country, little is known outside of those who make frequent visits, and those not restricted to the horse department of the place. The *Call* representative, though fairly well posted in regard to the estate, a few days ago accompanied Major Rathbone in a drive through that portion on which the school buildings will be erected. In the whole of Palo Alto are six thousand acres. The eastern boundary is the railway along which the line runs from San Francisco to the village of Mayfield. The southern boundary is an irregular line marking the limit of El Matadero, and the western, also irregular, includes the foothills, and in places, extends up the slope of the mountain which separates the valley from the ocean. This gives almost unlimited water facilities, part of the late purchases securing the site for an artificial lake of sufficient capacity to supply a volume of water five times in amount of what will be required for many years. Although San Francisco creek is the northern boundary from the railway crossing for quite a distance up the stream, the lands acquired a couple of years ago embrace several hundred acres north of the creek, gaining full control of the water privileges. From the eastern boundary to the foothills the ground rises with a uniform slope, the grade being such as to give perfect drainage and facilitate irrigation. "The Arboretum" includes five hundred acres, one front of it being the San Jose road, and extending up the slope between another "county road," and the ornamental grounds of the residence. It is more properly a park, divided by drives into plats in which are planted so many specimens of the trees and shrubbery of America, and other countries, that it would require a botanist of erudition to give the names. Included in this park is a grove of oaks, magnificent in grouping, nearly every tree a study for an artist, and adding so much to the beauty of the whole as to form one of the most striking features of the picture. Before Governor Stanford started on his European tour he left directions to prepare the ground for the building of a country house which should be as perfect as architect and builder could construct. Following the plan the natural elevation was increased by a huge embankment of earth surrounding a square so as to place the foundation on solid ground. In is the supposition now that this site may not be a better. In front there are three avenues radiating from a center within the square. The one to the right gives a view of the bay, the Warm Spring property belonging to

Governor Stanford on the other side, with the background of hills, which are now green to the summits. The central avenue affords a view of the Mission San Jose, and that to the left carries the eye directly to Mount Diablo, which, seen through a gap in the Contra Costa Range, appears more lofty than from any other point of view. Looking through the vista formed by the trees on each side of the avenue there is something indescribably grand in the whole picture, and pleasing too. The bright waters of the bay gleaming in the sunlight, the plains and slopes beyond dotted with cultivated fields, vineyards and orchards, the rounded hills clad in the bright colors of early summer, and the lights and shadows of the mountain, caused by the projections which are bare, and ravines with trees and chaparral throwing them into still deeper obscurity. When cloud-capped, as was the case at the late visit, the effect is increased, and there is a mystery in the pearl-tinted vale which the eye cannot penetrate, and leaves the imagination to portray what is beyond. While the intensely practical cannot see anything to be gained in beauty of locality, fortunately this is a small portion of the human family, and the advantages arising from pupils being domiciled where the outlook is so pleasing are too apparent to require even short arguments.

Near the park is a vineyard, and beyond that some two hundred acres planted to every variety of fruit grown in the United States—that is, specimens that have been proven to be of value. The object of this is to determine those that are the best adapted for California soil and climate, and the test will be so thorough that the information obtained will be full and reliable.

Fish culture is of absorbing interest at the present day, and it is scarcely possible that a better place could be found where experiments in this line could be more successfully pursued. A dam has been thrown across the creek which turns the water into a flume that carries it to the lake. There are at least sixty acres in the lake, with a depth of eighteen feet in places, this being an ample reservoir to provide for irrigation during the time when the natural supply fails. The dam is among the hills, the water clear, cold and pure, and with the present arrangement of flumes and ditches, the only thing required will be facilities for hatching and care of the young. The paramount interests of California are in the products of the soil, and nowhere in the world can there be superior opportunities for pupils to acquire all that can be taught in this department than at Palo Alto. From the waters of the bay to the mountain tops are nearly all the kinds of soil to be found on the Pacific coast. Salt marsh, hollyhanded partially covered by the tide; heavy adobe, which has produced eighty bushels of wheat to the acre; a lighter colored clay or mixture of clay and loam; gravelly soils; sediment, deposited by the overflow of the creek; the rolling foothills and rocky mountain sides. Beyond question, Governor Stanford will take especial pains for the thorough education of those who are destined to follow an agricultural or horticultural life, as no one has a fuller conception of the necessity of education to perfect them for the pursuit. To gain an insight into the mysteries of animal production there must be a close study of what others have learned, a still closer acquaintance with practical methods, and an intimate knowledge of results. Already has Palo Alto established a name in the scientific world as the first elucidator of animal motion, the first to show the manner of quadrupedal progression, the first to find out how limbs and feet were moved, especially at a high rate of speed, upsetting all previous ideas, proving, beyond the shadow of doubt, matters of the greatest importance to those who are interested in the breeding of horses, and of still greater moment to those who are engaged in developing the qualities of speed and endurance. Tangible as it has been to anyone who would think, palpably true as the illustrations are, the teachings have been of little avail, counteracted by ignorance and rendered nugatory by an obstinacy in following antiquated notions, a determination to stick to the ruts sunk centuries ago and adhere to the old, old superstitions rather than accept the truths which are so clear to anyone who has the capacity to think with any concentration or power to draw deductions from evident facts. Palo Alto, in the discoveries made through the aid of instantaneous photography, laid the foundation for a grand structure, and this will be completed by a course of studies which will make the knowledge available. Every graduate who has finished the course of tuition in this department will be a tutor to instruct others, and a class the members of which when distributed through the country, will have a potent effect in disseminating truths which at present are dormant. Governor Stanford not only planned and carried through the experiments that resulted in a correct knowledge of animal motion, but he also demonstrated that there could be improvements in breeding, a better system of education in the development of speed, by the best of all proofs, actual and acknowledged superiority, ex-

cellence beyond what was deemed possible before he exemplified that it could be reached. There is no branch of rural life that is more important than that which embraces the breeding and rearing of domestic animals. Up to the present time there is not an agricultural school or college that teaches more than the alphabet of the science. The great improvements which have been made in the art of properly mating the progenitors have resulted from individual effort, and have been disseminated by fairs and shows to a certain extent. Apart from brief essays, and now and then a volume, there is little to guide the seeker of knowledge, and though class journals afford valuable information, it is incomplete in comparison with a course of study, supplemented by actual experience, and made effective in the right direction by competent teachers. That Governor Stanford will incorporate something of the kind in the proposed school, is nearly an absolute certainty. The trouble to obtain men who are competent to take charge of a farm, or any of the departments of an estate where there are diversified pursuits, he has experienced, and the contemplated plan is to fit the pupils for stations that there are every day chances to fill, with a demand far beyond the supply. The residence of Governor Stanford at Palo Alto is not far from the location that was fixed upon for the erection of the house. That he has given up thoughts of building a private residence for himself there is evident from the building of the mausoleum which is to contain the remains of his son. That is near the old house, in fact, in the immediate vicinity. The house is in the midst of trees with a lawn in front. The grass extends all around the dwelling, the sod being particularly luxuriant under the shadow of the larger trees. There are carriage-ways and walks which divide the ornamental grounds into many plats, and in one of these the mausoleum stands. It was not the intention to build one of these stately extravagant tombs that are seen in cemeteries, but something that will be in keeping with the surroundings. It stands at present a plain brick structure, without any attempt at architectural adornment, but the brickwork is to be coated and made to resemble California granite, and the whole covered with a profusion of climbers. There will be none of the gloomy sepulchral effects in the exterior, and the interior will be decorated with allegorical paintings and frescoes. The first thought on seeing it is that it is too plain, and the smooth red surface appears an incongruity among the surrounding shrubbery and flowers, and in the shade of the trees. But when draped with appropriate climbers, with patches of gray in place of the red, it will be far more pleasing than if constructed of polished granite or marble, and the simplicity of design more in accordance with the situation—a pleasant resting place for the remains of the bright lad who spent so many blithe hours where he now sleeps, and with little of the gloom of the grave.

## Answers to Correspondents.

Question answered only through these columns. No replies by mail or telegraph.

Dubious, Red Bluff.

1.—Goldsmith Maid's record of 2:14 has never been beaten in actual race, but that record was not made in a race. Her best performance, aside from the exhibitions, was at Rochester, N. Y., August 12th, 1874, when she trotted the second heat in 2:14. This has been beaten by Clingstone, who trotted in 2:14 in a race. 2.—The best authentic 100-yard record is 10 seconds. Standing start. 3.—To make a record a horse must trot or pace a full mile to rule. It must be a public race where a purse, premium, stake or wager is contended for, or gate money charged. The rule weight of 150 pounds must be in the sulky, and one or more judges in the stand. Time must be taken by at least two timers, and the proceedings recorded by a clerk, and attested by the judges. Time otherwise taken is not a record, although under the rules it does constitute a bar.

George, Petaluma.

It seems to us to be a very simple proposition. The judges assign positions by lot for the first heat. Section 7 of Rule 29 reads: The horse winning a heat shall take the pole (or inside position) the succeeding heat, and all others shall take their positions in the order assigned them in judging the last heat. When two or more horses shall make a dead heat, the horses shall start for the succeeding heat in the same position, with reference to the pole, that they occupied at the finish of the dead heat.

B., Portland, Oregon.

Nous of the get of either Inauguration or Milton Medicine have records as good as 2:40 that we know of. Mr. T. Shipee of Stockton, has or had a colt by Inauguration that showed better than that in private, but he never made a public record better than 2:45.

OUR NEW YORK LETTER.

The Kentucky Derby—Starters and their Chances—Racing Notes from the West—Eastern Turf Gossip—Prospects of a Great Season, General Notes.

Next week, before these lines will be read by your readers, the backers of the various colts engaged in the Louisville will be out of their misery, and as only one can win, the chances are that the Malcontents will be in a large majority. A most uncertain race, more so than any year since its inception in 1875, when Aristides galloped over fourteen others, the present renewal has been a fruitful subject of gossip and speculation all the winter and spring. The first great "tip" on the race last January was Kosciusko, late Louisville, the half brother to Getaway. On the strength of a statement that James McLaughlin, the premiere jockey, had been engaged to ride him on the 16th of May, Kosciusko was heeded in less than a week from 25 down to 8 to 1. Last month the colt was taken sick at Mobile, and last week he was declared out of the race, so his overprudent backers are minus even a run for their money. About the same time letters reached here from Mobile that Ensign in Capt. Cottrill's stable was a better colt by far than Buchanan. Starting at 30 to 1, at which figures a New Yorker well known in sporting circles backed Ensign to win \$6,000, he was hacked down to 5 to 1. On the colt being declared out of the Derby this week it has leaked out that it was all a ruse to better market their bets on Buchanan, for Ensign has not had a saddle on him until very recently. Eva S., the crack Billet filly, also came with a boom in the betting marts last February. As the most consistent two-year-old winner in the race she has rightfully well supported from 15 down to 7 to 1. She did well until a little over a week ago when pneumonia nearly laid her under the sod, and the pen went through her name for the Derby. Conking also went wrong, Exploit and Farandole were disgracefully beaten at Nashville, and Richard L. ditto at Lexington last week. Also Bob Miles and Buchanan at Nashville, until, of the expected starters for the Derby, the only ones unbeaten this year are Admiral, Audrain, Powhatan, Loftin and Bob Cook, the latter five having not yet been out. The others expected to start next Friday are Bob Miles, Buchanan, Richard L., and perhaps Farandole or Exploit. Bob Miles is still the favorite in spite of his poor form at Nashville. Since he was brought back to Louisville he has worked well, a mile and a quarter in 2:18, doing it easily, and people are fast making up their mind to ignore his running in Tennessee and remember only what a nailing good two-year-old he was. Then the engagement of James McLaughlin to ride the colt, the noted jockey leaving here next Tuesday for Louisville direct, whether the Dwyers already are, has censured a steady run on Bob Miles, until it is hard to get 2 to 1 in this city to-night. It is said that the Dwyers have bought the colt conditional on his winning the Derby, and Jim Williams bets every one now that his money is all on it and 7 to 1 that Bob can't lose the race. He bet \$500 even in Louisville yesterday, that Bob would beat Admiral, the imported colt, after the latter had beaten Richard L. at Lexington. Buchanan is also well liked. His fiasco at Nashville was caused solely through bolting, but as Isaac Murphy will ride him in the Derby it is not likely that he will repeat the offense then. He has great speed, but there is a suspicion that the route is a little too far for him. The Admiral came with a bound yesterday into public favor by his win at length from Richard L. and others in the Phoenix Hotel Stakes. He fairly galloped the New Orleans winner to a stand-still, and the backers of the latter for the Derby now rate their bets at very little above zero. The Admiral is said to be a national pacer, so much so that a country horse dealer recently wrote Bowen & Co. asking the loan of him to breed to a few half-bred trotting mares. It is needless to say that the loan was declined with thanks. Admiral is the first imported colt that ever took part in the Derby, and if he wins, his reputation will be assured at the stand, Rummeye being his destination when through racing. He was sold two years ago at the American Horse Exchange in this city for \$800. To-day he cannot be bought for \$10,000. Loftin and Powhatan are expected to both do well in the Derby. Their backers are quiet, but confident, and say that Powhatan will very plainly win. From the best information at hand to-day it looks as if Bob Miles will win, and that his principal antagonists will be Powhatan and Buchanan or Audrain. The latter is doing finely, and is expected to beat Admiral next Wednesday in the Blue Ribbon of Lexington, which is by many regarded a race that forecasts the Derby. Last year Leonardus won both races. This week the Haggin stable from your state reached Louisville in good order, and Patsy Duffy has since ridden several times at Lexington. Baldwin's lot are expected at Covington next Friday, and the career of these horses will be noted with great interest. Jim Renwick is doing well at Jerome, and has been given 119 pounds in the Fordham Handicap. He has some good horses to meet, however, and it cannot be said that the handicapper has favored him any. All the horses at Jerome are doing well, and some fast trials have been run there. Many horses go from here to Washington on Monday, where the races begin next Tuesday. The Rockaway Hunt meeting to-day at the Rockaway was a grand success. Fully 6,000 persons were there and witnessed the most exciting steeple-chase ever run in America. No less than eighteen horses started, and the winner was a Baltimore horse, Tonkaway, carrying the bottom impost 140 pounds. He and his rider were greeted with a regular oration after the race. Next Saturday the Meadow Brook will have a similar meeting over Hempstead Heath. New York, May 10th, 1884. PACIFIC.

NEW YORK, May 20th, 1884.

With the great event of the Western Race Meeting, the Kentucky Derby a thing of the past, the racing season of 1884, may be said to be fully inaugurated, and the opening games fulfill its promise of being the most brilliant year in the history of the American turf. True, the yearling sales, if we except those of the young Billets at Rummeye, failed to bring as high prices as in former years, and many of the croakers are already saying, "that the bottom has dropped out of the breeding boom." But that this is a hasty conclusion, none will deny who remember that the sales of thoroughbreds this spring in the south-west were largely in excess of any previous year, causing for the moment, an overplus of stock. Those purchasers who have bought at the low prices reaped the benefit of this state of affairs, that is all; and before the season is over many will wish that they had been more enterprising in this direction. Buchanan's victory for the Derby at Louisville was a great triumph for Captain Cottrill and Bill Bird, the latter shrewd and careful trainer hav-

ing the colt in apple-pie order on Friday last. As I wrote you in my last letter Buchanan was expected by the Miles party to be their principal opponent, and their fears in this quarter were well founded. Bob Miles was well placed in the beginning of the last quarter of the race, but tired badly at the finish. He had either had too much work or not enough of it, most persons inclining to the latter reason. Even the prestige of McLaughlin's pilotage could not make the colt run, and his backers fell heavily, the Dwyer Brothers, losing, it is said, some \$12,000, and your Dave Johnson, of Appleby & Johnson, over half that amount. To-day the Cup was run in the presence of a large crowd. Seven horses ran and Barnum proved the victor in 4:07. This was the greatest blow the fancy have had this year, for no one, not even the party, believed Barnum could have expected that he would win. Only last week they declared him out of the Cup at Latonia Park, where he had a similar class of horses to meet as he defeated to-day. The Oaks yesterday was a victory for the Comyer filly Modesty, several of her principal opponents declining the contest in a heavy track. Last week the Washington Jockey Club held a very successful four days meeting. An average of 6,000 persons a day were present, and as six and seven races were run each day the sport could not be otherwise than good. Some good two-year-olds ran at the meeting, the best being Mr. W. L. Scott's filly Florio by Virgil, W. P. Burch's Telle, Doe by Great Tom and the Rancocas filly Petition by Falsetto. Strange to say, these three fillies, owned in different stables, as mentioned, ran first, second and third in the above order in each of the two stakes won at the meeting, the Youthful and Brentwood. As large fields contested both events this is an almost unprecedented event, and in the last race Florio carried five pounds penalty, in all 117 pounds. This is a superior two-year-old. To-day the Baltimore meeting began and will last four days. Knight of Ellerslie and War Eagle both followed up their Washington successes, and the former is probably the best three-year-old yet out in the east. He is by Eolus out of a mare whose grandam was Eole's dam, and is therefore nearly a full brother to that famous horse. The Knight of Ellerslie never ran as a two-year-old, and is now a thoroughly seasoned colt. He is expected to come very close to winning the Belmont Stakes at Jerome Park week after next. The second of the now celebrated Hunt Meetings of this vicinity was held on Saturday last, at Meadow Brook, near Garden City, L. I. Run on the turf over the Hempstead plain, the six races gave general pleasure and satisfaction to a large crowd of the elite of this city, Brooklyn and other cities. The principal event, the Hempstead Heeb Steeple-chase, was over a stiff course of four miles, with over twenty jumps to be encountered, and which test a horse in quite a conspicuous degree. The race had \$1,500 added money, and was a prize well worth winning, which the Canadian mare Rose accomplished in gallant style. These meetings have been so successful that the Rockaway Hunt and its associate confreres of Meadow Brook, the older club, by the way, are talking of holding a joint meeting of two days in September next. Such a meeting is bound to be successful, as the public interest and appreciation is very great. Baltimore and Louisville last this week and part of next, with next Saturday inaugurating the spring season at Brighton Beach, and the following Friday (Memorial Day) the June meeting. Over six hundred horses are now at the four tracks—Sheepshead, Brighton, Monmouth and Jerome, and the southern and western delegations this week and next will swell this total at least two hundred more. The Withers' Stakes and Fordham Handicap at Jerome are attracting much attention as the two first great races in this vicinity. For the Withers' Stake, ran May 30th, Panique by Alarm, and Benton by Billet are now equal favorites at 3 to 1 each. Both have improved greatly since last fall, and as they were close together as two-year-olds, the struggle between them will be a very close one. Himalaya and Thackeray are next in favor, while Reveler, Leo, Pampero, Rataplan and others are backed. The race promises to be a great one with Panique a likely winner. The Fordham Handicap has your horse Renwick an acceptor at 119 pounds. He has had nothing but praise from the critics regarding his work at Jerome, and if the distance is not too far for him, is likely to run a good race. He is likely, however, to find some hard nuts to crack in Monroe, 119; Greenland, 108; Bella, 103; Marshall, 100, and others in the race. The three-year-old fillies at Jerome this spring are a rare lot. Lonisette, Economy, Duchess and Issaqueua are going like the wind in their gallops, and the result of the Ladies' Stakes with the Brookdale filly Nonage also a contestant, is very uncertain. Altogether the June spring meeting has rarely promised better sport during the eighteen years' history of the track. At Louisville your Mr. Haggin's Mark Daly and Premium are both coming into places, and should win races soon. Patsy Duffy is doing some good riding. The Baldwin string arrived safely at Latonia Park last week, and at that meeting, which begins on the 28th, may be expected to acquit themselves with credit. Poor Louis Martin was found guilty here yesterday, and will be sentenced in a few days. He has lost completely the sight of one eye since he has been incarcerated in jail, and the good eye is also affected. His plight is so pitiful that there is an expectation that his sentence will be a light one, for it would seem that he has already suffered enough. PACIFIC.

A Photograph.

A wandering scribe gives the New York Spirit this dry plate impression of Dr. Herr of Forest Park, Kentucky, owner of Mambrino Patchen:

We found the Doctor and his three sons attending to his large breeding interest. He is one of the most practical horse-breeders in the State, a veterinary surgeon of considerable ability, a trainer of rare intelligence, and a plucky driver. To those who have never seen him, I may say he is a gentleman 68 years of age, a little undersize, but a man all over. He is full of young ideas, and acts on them. He drives a race with as much style and finish as either of his sons, which is saying a good deal. Go out any fine morning and you will see the old gentleman breezing himself out lively behind a trotter, and "sings the news to them very firmly," but never swears. Strange as it may appear for one of the driving profession, no one ever heard an oath pass the Doctor's lips. He is frank and upright in all his dealings, and his sons are walking in his footsteps. They have none of that bluster and swagger of many of the rising generation of horsemen; their quiet, unassuming manner won me. They showed us their stock with as much air and grace as a merchant exhibits his finest fabrics, accompanied by a few words fitly spoken.

Those complaining of sore throat or hoarseness should use Brown's Bronchial Trochoc. The effect is extraordinary, particularly when used by singers and speakers for clearing the voice.

Observations at the Islands.

HONOLULU, May 14th, 1884.

EDITOR BREEDER AND SPORTSMAN:

Dear Sir—Being somewhat fond of horse-flesh, I very naturally wander about, and for several weeks past have heard considerable horse-talk; and, knowing that the BREEDER AND SPORTSMAN is "open to all" on this subject, I will try and tell you what I have heard and seen since my arrival in Kala-kaua's Kingdom. The track is located about five miles from the city, and is surrounded by driveways, being almost in the center of what is known as "Kapiolani Park," the road to which is far better than to our Park in San Francisco. Examining the stables and grand stand takes but little time, the former going to pieces through neglect, and the latter should be taken down and rebuilt. Arriving at the gates I found them locked, and having a trotter from the Fashion Stables, which I hired for the occasion, you can imagine my disappointment. Making inquiry from a young man in the vicinity, he informed me "that at present I was in a one-horse country where they did queer things." Before leaving this young man I gained considerable information of which I have since had substantiated by reliable parties. The Directors called a meeting some time ago, and passed a rule that \$10 per head would be charged for every horse trained on the track. Inquiring what fund this money went to the credit of (thinking perhaps it was under some Jockey Club), a small boy pointed to a gang of Chinamen making mud islands and duck ponds, and with a knowing wink said, "don't ask too many questions, stranger, about this Park business, for it is run by the 'click.'" On further inquiry I found that on race days they also charged \$10 for each of the stalls. In the vicinity of the track are several stables built by private parties, and at present occupied. Leaving the track I started for the nearest stable, where I found an old acquaintance George Treat, one of the old timers of California, who was in charge of Billy the Sponge, and who informed me that George was matched to trot on May 31st, mile heats 3 in 5, against Capt. Clinney's bay gelding Joe Dake for \$500 a side. About a quarter of a mile further on I stopped at a very neat little stable belonging to Charley Lucas, who has five in hand; among them is a bay filly by Shannon out of Cnba. This stable was very successful last year, and his gray gelding Poni Moo looks as if he might be able to give the Stanford colt a good rub this year. The others will be entered in the races for native-bred horses. Driving down the avenue I noticed a dun horse going at a 40 clip which, proved to be Thomas H., the property of Jim Dodd. Following this horse to his stable I found a string of seven or eight colts, which, upon inquiry, I found were mostly Waterfords, the property of James Campbell. In the lot I found a chestnut colt by Hubbard out of Texana, and a bay colt by Boswell, the latter belonging to the King. The men in charge of this stock informed me that they had another horse, but they had orders to keep him dark, and being directed to another stable in the distance I hitched my horse to the fence and examined the stock. The first horse that caught my eyes was Garfield, who has the reputation of being the boss. His owners last year shipped him to San Francisco, where he ran in very good company, meeting such horses as Jim Renwick, Jim Douglass, Forest King, Jocko, Premium, and May D., but they had better staying qualities. Next came a tall brown horse which, upon inquiry, I found to be Gov. Stanford, the property of John Cummings, who has also several good ones in the same stables. The man in charge started off to the track with Joe Dake in hand, and following him we found quite a number of good-looking horses taking their exercise, i. e., Gen. Hancock by California—Puss; sor. filly by Hooker—Nevada; bay filly by Wildidle—Robin Girl; chestnut filly Fiamma by Monday—Abbie W.; bay gelding by Wildidle—Kate Gift; bay gelding by Wildidle—Montana. My information in regard to the pedigree of these colts I gathered from a man with a tall hat who seemed to know them all. I tried to make his acquaintance, but he did not have much to say. He seemed as if something had gone wrong. Having plenty of time on my hands I lounged about the stables and stands, and in a short time I learned from the conversation of those present that something had gone wrong with all of them, and from what I could gather there was good cause for a general kick among those who had the best right to kick concerning the shabby, mean way that the "click" formed their new Jockey Club, the full particulars of which I will find out and let you know next trip. HOORILIMEA! OLE.

Trotting at Vallejo.

AGRICULTURAL PARK, VALLEJO, May 18th, 1884.—Match for a set of harness, valued at \$50; owners to drive.
John Williams' b g Ben. 1 2 2 1 1
Quarney's blk s Mambrino 2 1 1 2 2
Time—3:14 1/2, 3:17 1/2, 3:18, 3:00 1/2, 3:07 1/2

Trotting at Portland, Oregon.

CITY VIEW PARK, May 18th.—Purse \$1007; \$25 to second; mile heats.
Kelly, r n g. (Geo. Misner) 2 1 1
Florence E., ch m. (Waterford) 1 3 2
Johnny Blue, b g. (Ruiter) 3 2 d
Time—2:35, 2:40, 2:37.

Robert McGregor, the stallion whose owner hopes will lower Smuggler's record this year, is a rich, golden chestnut, standing sixteen hands high, bred by Samuel Whitman, Chester, Orange county, N. Y., foaled in 1871, got by Major Edsall; dam Nancy Whitman by Seely's American Star. Major Edsall was by Alexander's Abdallah, his dam being a daughter of Harris' Hambletonian. Major Edsall has a record of 2:29. He was foaled in 1859, hence was eleven years old when he got Robert McGregor. Lady Whitman, McGregor's dam, was ten years old the season he was foaled.

Dr. Mack of Walla Walla, has sold two yearlings, Magenta and Harvester, by Alwood, out of mares by Millman's Bell-founder, to B. E. Snipes of the Dalles, for \$700.

Woodburn Yearlings.

The annual sale at Woodburn took place on the 15th. Of the forty-two catalogued four were withdrawn, one being dead, two crippled, and the other too small to be offered. The remaining thirty-eight sold for a total of \$14,435, an average of a trifle under \$380 each, compared with an average of \$519.24 obtained last year. The New York element did but little buying. Messrs. Appleby & Johnson paid \$1,050 for a half brother to Fellowcraft, Rutherford and Spendthrift, while the Dwyer Bros. paid \$425 for the Fanchon colt, and Col. Bruce paid \$800 for a full brother to Glenmore. The full sale is as follows:

- By King Alfonso, he by Imp. Phaeton.
  1. Bay colt, April 28th, dam imp. Invercauld, by St. Alban; J. H. Morris, \$375.
  3. Bay colt, May 24th, dam Desolation, by Devastation; F. Smith, \$175.
  4. Chestnut colt, May 30th, dam Jersey Belle, by imp. Australian; L. Curran, \$280.
  5. Bay colt, May 31st, dam Hester, by Lexington; L. H. Todhunter, \$575.
  6. Bay colt, April 9th, dam Simplicity, by imp. Eclipse; S. D. Bruce, \$375.
  7. Chestnut colt, May 27th, dam Fanchon, by imp. Australian; Dwyer Bros., \$425.
  8. Brown colt, May 6th, dam Virga, by Virgil; J. & J. Swigert, \$200.
  9. Chestnut colt, May 24th, dam Galanthus, by imp. Australian; L. H. Todhunter, \$325.
  27. Bay filly, April 15th, dam Aerolite, by Lexington; Appleby & Johnson, \$1,050.
  30. Bay filly, March 5th, dam Molly Wood, by Lexington; J. L. Harris, \$400.
  31. Chestnut filly, April 24th, dam Ultima, by Lexington; J. L. Harris, \$300.
  32. Bay filly, May 10th, dam Quickstep, by Lexington; J. L. Harris, \$410.
  33. Bay filly, April 8th, dam Idler, by imp. Leamington; T. H. Swope, \$460.
  34. Bay filly, May 13th, dam Favorite, by imp. King Ernest; T. H. Swope, \$775.
  35. Chestnut filly, May 25th, dam Ethel, by imp. Leamington; J. L. Harris, \$330.
  36. Bay filly, May 3d, dam imp. Inverness, by Macaroni; L. H. Todhunter, \$410.
  38. Bay filly, May 14th, dam Zephyr, by Lexington; J. L. Harris, \$700.
  39. Chestnut filly, May 15th, dam Miranda, by Lexington; G. H. Kernaghan, \$550.

Total for 18 head—8 colts and 10 fillies—\$8,115, of which the colts averaged \$333.33, and the fillies \$538.50 each.

- By Imp. Glen Athol, he by Blair Athole.
  2. Chestnut colt, May 2d, dam Lotta, by Hunter's Glencoe; S. D. Bruce, \$800.
  12. Bay colt, March 16th, dam Cachuca, by King Alfonso; J. & J. Swigert, \$275.
  13. Chestnut colt, April 11th, dam Orelia, by Waverley; J. L. Harris, \$225.
  22. Chestnut colt, April 7th, dam Little Miss, by imp. Sovereign; T. D. Stacy, \$125.
  23. Gray colt, April 29th, dam Geneva, by Lexington; E. Corrigan, \$500.
  24. Brown colt, May 24th, dam imp. Britannia IV, by The Flying Dutchman; J. H. Harris, \$200.
  25. Bay colt, April 11th, dam Night Rose; J. & J. Swigert, \$220.

Total for seven head, all colts, \$2,345; an average of \$335 each.

- By Lisbon, he by Imp. Phaeton.
  10. Bay colt, May 31st, dam Maggie Hunter, by imp. Australian; Appleby & Johnson, \$525.
  15. Bay colt, March 25th, dam Penelope, by Commodore; J. Colton, \$275.
  16. Bay colt, May 10th, dam Peaceful, by Planet; J. T. Williams, \$225.
  17. Bay colt, May 14th, dam Flenrilla, by Dick Cheatham; J. T. Williams, \$200.
  18. Bay colt, May 17th, dam Emma Hunter, by Lever; T. D. Stacy, \$100.
  19. Bay colt, April 19th, dam Glene, by imp. Glenelg; J. T. Williams, \$210.
  20. Bay colt, May 19th, dam Fairy, by imp. Knight of St. George; J. & J. Swigert, \$190.
  21. Bay colt, May 9th, dam Nora, by imp. Sovereign; J. & J. Swigert, \$300.
  29. Chestnut filly, April 13th, dam Flash, by Lightning; L. Frederick, \$400.
  40. Bay filly, March 26th, dam Anstria, by imp. Australian; J. E. Kelly, \$420.
  41. Bay filly, April 1st, dam Asterie, by Planet; J. W. McClelland, \$325.

Total for eleven head—eight colts and three fillies, \$3,170, of which the colts averaged \$253.12 and the fillies \$381.66.

- By Ten Broeck, he by Imp. Phaeton.
  14. Chestnut colt, May 16th, dam Rebecca, by Longfellow; T. H. Swope, \$425.
- By Pat Malloy, he by Lexington.
  42. Bay filly, June 2d, dam Jennie H., by imp. Knight of St. George; H. H. Ormsby, \$380.

Racing on Sundays.

To go or not to go to the races on a Sunday is now being discussed by the admirers of both running and trotting in Chicago. The Chicago Driving Park Club have arranged for a series of meetings which will extend from early in June to nearly September 1st. Its directors have also unanimously adopted a resolution introduced by the club's president, Mr. Washington Heaing, providing for both running and trotting on Sunday during the season. The resolution is somewhat lengthy and cites the success of all classes of Sunday amusements, and the inability of thousands to enjoy the sport on any other day of the week. It finishes as follows:

"What can the youth in a large city do Sunday afternoon—I mean such as are without family ties of any kind—better than to frequent some place of innocent amusement? You cannot expect them to stay at home and read; they must go somewhere, and it is not better that they frequent a race-track, enjoying God's free air, than to sit in a theatre on a sweltering day in July or August? Or, better still, than if they frequent the saloon, the gambling hell or some place of questionable resort? Let the Chicago Driving Park, therefore, inaugurate a people's day of racing; let us throw open our gates Sunday afternoon to the masses, charging but 50 cents admission for adults and 25 cents for children, so that the middle classes can take their families out, bring their lunch with them, and spend the better part of the day on our grounds. Always believing in a proper observance of the day, and certainly not wishing to offend the feelings of any-

one, I would not allow any pool-selling or game of chance of any kind on the grounds, nor would I allow any whisky to be sold, and in order to observe the strictest decorum I should recommend the employment of a large extra force of police, so that not even the slightest disturbance could take place."

It is understood that Mr. Hesing has talked with a number of owners on the subject, and they all favor the idea. It is doubtful, however, if the owners of large stables will come into the plan.

The Kentucky Derby.

The Derby was run at Louisville on the 16th, and the result has been telegraphed to all points. The details of the race are as follows:

The Kentucky Derby, a sweepstakes for three-year-olds, at \$100 each, half forfeit; \$20 if declared by May 1st, 1883, and \$40 if declared May 1st, 1884, with \$1,500 added, of which \$200 to the second; closed with 51 subscribers; mile and a half.

W. Cottrill's ch c Buchanan by Buckden, dam Mrs. Grisgby, 110 pounds.....(I. Murphy) 1  
 R. A. Johnson & Co.'s b c Loftin, 110 pounds.....(Sagres) 2  
 T. J. Meighen's ch c Andrain, 110 pounds.....(Fishburn) 3  
 J. T. Williams' ch c Bob Miles, 110 pounds.....(J. McLaughlin) 0  
 R. M. McClellan's b c Bob Miles, 110 pounds.....(Gorham) 0  
 R. M. McClellan's b c Boreas, 110 pounds.....(O'Brien) 0  
 Bowen & Co.'s The Admiral, 110 pounds.....(Taylor) 0  
 Wooding & Co.'s Exploit, 110 pounds.....(Conklin) 0  
 R. A. Johnson & Co.'s Powhatan, 110 pounds.....(Williams) 0  
 Time—2:40.

Pools.—Andrain, \$700; Bob Miles, \$600; Buchanan, \$530; Johnson's pair, \$270; Admiral, \$125; the field, \$90. Post odds 3 to 1 against Buchanan.

At the start Bob Miles, attended by Powhatan, Buchanan and Loftin, was the quickest away, with the remainder in a bunch and close up. Before they had run a quarter Admiral and Loftin took the track and at the end of the odd half-mile they were a length or more clear of all, with Powhatan leading the remainder, lapped by Bob Miles and Exploit, with Buchanan back in the ruck. There was no change in the next quarter and but little until just as they finished the mile, when, with Admiral leading by a length, Bob Miles showed second, a trifle in front of Loftin, with Bob Cook, Andrain and Powhatan close up. In the run to the three-quarters Admiral dropped back and Loftin took up the running, and with Bob Miles second and Buchanan third, the scene became one of the greatest excitement, which quickly turned into wild enthusiasm when Buchanan, under Murphy's call, passed in turn Bob Miles and Loftin, and, running out strongly and easily, won by a length, with Loftin second, a length in front of Andrain, he the same distance in front of Bob Miles.

The Oaks was run on the 19th on a track deep with mud.

The Kentucky Oaks, a sweepstakes for three-year-old fillies, at \$100 each, half forfeit, \$20 only if declared May 1st, 1883, and \$40 if declared May 1st, 1884, with \$1,000 added, of which \$200 to the second; 50 subscribers, of which—declared by May 1st, 1884 and—by May 1st, 1884; mile and a half.

E. Corrigan's ch f Modesty by War Dance, dam Ballet, 105 pounds.....(I. Murphy) 1  
 B. G. Thomas' ch f Hiflight by King Ban, dam Hira, 105 pounds.....(Withers) 2  
 G. W. Bowen's b f Binette by Billet, dam Mirab, 105 pounds.....(Conklin) 3  
 J. G. Greener's ch f Easter, 105 pounds.....(Yetman) 0  
 Time—2:48.

Pools.—Modesty, \$500; Hiflight, \$150; Binette, \$60, and Easter, \$40. Mutuels paid \$8.

Easter ran in the lead nearly to the stand, when she gave place to Modesty, who was quickly followed by Binette and Hiflight. In this order they ran the first mile, when Hiflight changed places with Binette, but had no chance to reach Modesty, she winning in a gallop by six lengths, with Hiflight second away in front of Binette.

The Turf at Stockton.

(Stockton Herald, May 24d.)

A few persons in on the secret enjoyed a horse race at the Agricultural Park track yesterday forenoon, more than a little. Three months ago Thos. H. Williams, Jr. and J. Naglee Burke made a race. Williams matched his chestnut gelding Byron against Burke's bay gelding Spiff. They put up \$175 each. The race was to be trotted mile heats, best two or three, Byron to sulky, Spiff to cart, owners to drive, and Williams given the privilege of jockeying as it was conceded that Byron was not so speedy as Spiff. Last Friday night Burke and W. B. Norman put up another hundred on Spiff and Williams promptly covered the coin with an equal amount. The race was appointed to occur yesterday afternoon, but to avoid the crowd that would have been in attendance, the principals and a few intimates repaired to the track early yesterday morning. Arrived there Burke and Norman offered to wager another hundred on Spiff which Williams accepted.

The preliminaries were soon settled by selecting R. W. Russell and Jack Douglass as judges, Frank Hatch and William Douglass as timers. At 11 o'clock the horses were called up and given the word for the first heat. They got an even start, but the speedy Spiff quickly drew ahead of Byron and was about to take the pole when Williams began his jockeying privilege. He let out a wild, Apache-like yell, that sounded as if all the tules on Union island had caught fire, or the spirit of some ark-dweller had returned to plague the living with shrieking demonology. Burke's Spiff quivered as the unearthly creak smote the affrighted air, his tail flew up and the cords in his neck bunched like as if he had an attack of apoplexy. His beautiful trot was instantly changed to a stagger that lost him much ground.

Steadily old Byron (fifteen years of age last Christmas), glided along past the frantic Spiff and the ruffled Burke. Before the latter got his horse to a trot again old Byron's tail was bobbing along twenty-five yards ahead. To overcome this distance the speedy Spiff settled down at a determined gait, and when the half-mile pole was reached he was trotting alongside of old Byron who was traveling as if he was leaving all the hay and oats in Christendom behind him with no prospect of either ahead. Around the far turn and into the homestretch the horses came at about even pace, but Spiff began to forge ahead as the strait was reached. Again Williams let loose the fearful artillery of his lungs and poor Spiff came as near fainting as a horse ever did. In vain Burke invoked blessings on various things. Spiff was unequal to withstanding the nerve-destroying creaks that old Byron's driver poured into his ear. The result was that while Spiff was being pulled to a trot old Byron came under the wire winner of the first heat in the remarkable time of 3:17.

Mr. Williams began congratulating himself on the ease with which he was to win the \$750 purse. Mr. Burke lighted a fresh cigar and thought seriously of introducing about a gallon of celery bitters into Spiff's jugular, as celery bitters has a reputation as a remedy for nervousness. Mr. Norman endeavored to bribe Mr. Williams to maintain silence by offering him \$25 to keep his mouth shut while driving the next heat, but he declined because he realized that the greater portion of old Byron's speed lay in the strength of his driver's

voice. However, Williams offered to compromise by which Burke and Norman would lose only about \$100, but they declared that nothing short of a clean-cut victory would satisfy them. No old rick-a-hones like Byron should get away with the speedy Spiff, although all the Apache-whoops in creation were whooped into his ears. So the second heat was trotted, and it was a repetition of the first, only more so, Spiff proving the speedier horse, but unequal to stand the attack upon his tympanums. Old Byron came in winner of the second heat in 3:15. The time of both heats was carefully noted, not only by several costly gold watches, but as the record was important in this respect Jack Douglass marked the quarters and half miles by the unerring gleam of his diamond pin.

After the race had been decided in favor of Byron, Mr. Burke proposed to make another match to be trotted by the same horses, for the same amount, under similar conditions, two months hence. This Mr. Williams declined to do. It was generally understood that should such a match have been agreed to Mr. Burke intended to hire a German picnic hand and several river calliope to be present when training Spiff. Doubtless Mr. Williams believed that Spiff could be educated up to withstand his superior skill as a driver, and, moreover, he doubtless took into consideration the fact that Byron is aged, and most anything might happen to him within two months.

Buchanan's Way.

Broadchurch, the western correspondent of the New York Spirit, tells the following story of how a race was turned inside out by the bad behavior of Buchanan. It occurred at Lexington, a few days before the Louisville Derby, and if it caused the colt to recede in the betting he did his backers a favor, for in the latter event he ran as true as the locomotive to the rail, and won in good style.

Talk about sensational racing, the sensational event of the whole meeting came off on the closing day. The Belle Meade Stakes furnished the surprise, and Tim Carlisle was the hero of the occasion. The result was a "fluke," pure and simple, such an occurrence as one would not be likely to see repeated in years. There were only three starters, Buchanan, Exploit and Tim Carlisle. It was considered as a possibility that Buchanan might bolt in the race, but their being only three starters, and he so far outclassed the other two, the possibility occasioned very little apprehension. Tim Carlisle ran in the Memphis Derby, and was beaten by very inferior animals in a very inferior race, and his Belle Meade chances were considered in the same light as being liable to be struck by lightning. There was one thing in his favor—he had that accomplished jockey, Blaylock, on his back. Buchanan and Exploit ran almost lapped for the first half mile, after which the former drew away, and rounding the last turn he had nearly two lengths the best of it, Carlisle at this time being fully five lengths in the rear, and driving. When straight work commenced in the run for home, Buchanan was in the van by at least three lengths, and running easily, Carlisle eight lengths away, apparently irrevocably out of the hunt. Between the quarter and eighth poles, when it was apparently a hundred dollars to a nickel that the Buckden would win, he suddenly bolted to the outside, abruptly coming to a stand-still. Exploit, running on the outside, on coming up, was knocked off his stride, losing four or five lengths, Buchanan losing ten or twelve. In the meantime, Blaylock, seeing what was going on ahead of him, sent Carlisle along for all he was worth, and at the eighth pole he was almost on even terms with Exploit, Buchanan eight lengths away, and once more getting under full headway. He made a wonderful burst of speed down the stretch, nipped Exploit near the string, but could not catch Carlisle, who beat him out by a scant neck. Conking on Exploit, made complaint of being fouled by Buchanan at the time of the bolt, and the claim was allowed, Exploit securing second money. Such a combination of mishaps, where the worst horse wins, is sometimes seen in a hurdle race, but it is very rare on the flat, especially in a valuable stake.

The Downey Signal says: "There is a move on foot to organize a company to purchase land and improve it for a race-track in the suburbs of Downey. We think that such an enterprise would be a success since a great deal of attention is being paid just now to the improving of the horse kind. If we had a good track in this vicinity it will stimulate stock-raisers to new efforts to improve their stock. The grounds back of the livery stable have been suggested as the most suitable for the enterprise, and can be bought at very reasonable figures now, but if it is not taken advantage of shortly in will take considerable money to buy it, as property is rapidly advancing in this locality. Let not the golden opportunity slip.

The Directors of the San Joaquin Valley Agricultural Society have had plans and specifications drawn for a pavilion. The proposed building is to be two stories high, with a ground floor 100x260 feet, with two wings, 100x40 feet. The plans provide for four entrances—one on each side of a block. The amount of money to be expended in erecting a suitable building and improving the grounds, if the work is carried on, is estimated at from \$20,000 to \$30,000.

The chestnut mare Columbia by Bonnie Scotland, dam Young Fashion by imp. Monarch from Fashion by imp. Trustee, died at Monmouth, Ill., on April 6th. She was foaled in 1865. Columbia was formerly owned by Jos. Cairn Simpson, and was the dam of Columbine, by A. W. Richmond and granddam of Anteo and Antevolo.

The Lexington correspondent of the New York Sportsman gives this opinion of one of Mr. Haggin's colts: The grandest two-year-old is Tyrant, all over a race-horse of high pretension as to form. I believe his late owner sold him for \$5,000, but if he owned him now he would not take \$10,000.

The Phoenix Jockey Club was instituted at Phoenix, Arizona, on May 10th, with 25 members. Ismel Miller was elected president and P. K. Hickey secretary. Various committees were appointed for furthering the organization and business of the club.

An association has been organized at Phoenix, Arizona, with the object of holding an annual territorial fair. Fifty-seven solid citizens signed the membership roll, and the society has been incorporated.

The trotting mare Lady Hoag, familiar to Californians as the Stark mare, has been bred to Jerome Eddy. She is owned by Milton Hoag, of Seneca Falls, N. Y.

Jay Beach, Dilley, Or., has sold to J. L. Hallet, same place, bay colt Cadet, foaled 1882, by Graduate, son of Cassius M. Clay, Jr., dam Altasia by Altamont; \$500.

Joseph Buchtel of East Portland, Oregon, has sold David Cole, Portland, the black filly Cescnola, four years old, Altamont, dam by Mikefson of Vermont. Price \$400.

THE KENNEL.

"X" Correct.

EDITOR BREEDER AND SPORTSMAN.—In your last issue "T. R. H." charges me with error in the pedigree, which I gave in the BREEDER AND SPORTSMAN of May 17th last, as that of Mr. Calvert Meade's Dick, and Mr. Daniel's Sancho. "T. R. H." says he raised both dogs and knows their pedigree, and that it is as given by a correspondent in your paper of May 10th, viz., by Lohse's Sport out of a sister of Doctor Toland's Whiskey. "T. R. H." further says he knows Lohse's Sport to have been by Grissim's Bill out of Liddle's Beauty. "T. R. H." says also that Sancho never belonged to Daniels, and inferentially charges Daniels with duplicity in entering Sancho at the show of 1881, in his own name and as his own property. It will occur to most readers that if "T. R. H." knows what he says he does, and is right, I sinned in my strictures upon the correspondent of May 10th, and owe him an apology for charging him with giving false pedigrees to both Dick and Sancho. Please let me present some evidence that I was right in every proposition which I made in my last communication, and that "T. R. H." is quite uninformed and in error. It is admitted that Dick and Sancho were litter brother and sister by Lohse's Sport out of Hart's Bell. Mr. John F. Lohse, of this city, has now a note from Colonel Stuart M. Taylor, written in October, 1877, in which Colonel Taylor says, unqualifiedly that Sport was by his own (Col. Taylor's) imported Irish red setter Dash, out of Mr. Robert Liddle's Beauty. This is good evidence, being from one of those most interested, viz., the owner of the sire of Sport. Subjoined is a note from Mr. Liddle.

"Dear X.—Mr. John F. Lohse's setter dog Sport was bred by me out of my red setter bitch Beauty, and was by Col. Stuart Taylor's red Irish setter Dash. Beauty was by Mr. Bill Grissim's Bill, out of Mr. Charley Fairfax's old Beauty, ROBERT LIDDLE."

This evidence, from two such gentlemen as Col. Taylor and Mr. Liddle, is conclusive to my mind, and shows that "T. R. H." does not know when he gives Grissim's Bill as the sire of Lohse's Sport. Now, about Hart's Bell? It is admitted that Bell was presented to Mr. Thos. R. Hart, then of this city, by Mr. Charles Kaeding, of the firm of Liddle & Kaeding, gunsmiths, then and now an enthusiastic sportsman and lover of dogs, and well-known to about all sportsmen of the State. "T. R. H." says that Bell was a sister of Willard's Boh, and Toland's Whiskey. Mr. Kaeding is sure that there were but four puppies in the "pick-up" litter of which Boh and Whiskey were two, and he has a further recollection of having boxed up and shipped out of this city, the two remaining puppies of the litter. Mr. Kaeding remembers distinctly that he gave Mr. Hart a bitch puppy from a litter whelped by a Gordon bitch, which, together with a Gordon dog, the sire of the litter, had been imported by himself and Commodore Dick Ogden, from the east in the fall of 1876. The dogs were Belt and Bell, and were black and tan in color. Mr. Kaeding does not remember having given Mr. Hart any other bitch, nor for that matter any dog. A year or more ago Mr. Kaeding wished to purchase a good working field dog, and through Mr. Thos. R. Hart he bought Dick from Mr. Calvert Meade. When Mr. Hart brought Dick to deliver him, Mr. Kaeding asked about the breeding of the dog, and received from Mr. Hart the information given in the appended note:

Dear X.—Mr. Thos. Hart informed me that a red dog which I purchased from him, formerly owned by Mr. Calvert Meade named Dick was by Lohse's Sport out of a bitch named Bell, which I bred from my brace Belt and Bell, and presented to Mr. Thos. Hart. CHAS. KAEDING.

This note is evidence that Mr. Thos. Hart about one year ago believed that his Bell was by Kaeding's Belt out of same owner's Bell. But Mr. Hart's belief as to the pedigree of his Bell is an uncertain quantity, as is evidenced by the note copied below.

"My Dear X.—The pedigree of my old dog Dick I have well authenticated, with the exception of the pedigree of his dam Bell, who was whelped by Dr. Toland's Nellie and Dan, so I am informed by Mr. Hart, the owner of Bell. And Dr. Toland has informed me that the pedigrees of Nellie and Dan were published in the *Forest and Stream* in 1877, but he has not sent them to me, nor given me the date to forward for information. CALVERT MEADE."

This information was given to Mr. Meade in 1881. Thus, it appears that about three years ago that Mr. Thomas R. Hart did not hesitate to give one pedigree to his Bell, while about one year ago he as unhesitatingly gave an entirely different pedigree to the same bitch, and now comes "T. R. H." and writes that he "knows" the breeding of Bell, and gives a pedigree different from both of those previously given.

The statements are irreconcilable and two must fall. Each is at liberty to receive as true that which suits himself, after thinking the matter over.

As for myself, I believe Bell, the dam of Dick and Sancho, to have been by Kaeding's Belt out of Kaeding's Bell.

Mr. Kaeding's recollection is clear, and the fact that for many years he has owned and handled dogs, and been in a position to hear all floating dog talk, inclines me to accept as true his statement, that he did not give Mr. Hart a whelp of the Boh--Whiskey litter, but that he did give him a bitch pup from Belt and Bell, which Hart named Bell, and which was the dam of Dick and Sancho, as was stated in your paper of the 17th. I accept Mr. Kaeding's statement alone as conclusive, and do not at all rely upon Mr. Hart's confirmation as given in Mr. Kaeding's note, printed herewith. So much for "T. R. H."s knowledge as to Sport and Bell. His statement that Sancho never belonged to Daniels has no interest, except that it raises the question whether or not Daniels did at the Bench Show of 1881 lie about his entry, and receive an award to which he was not entitled. It may be worth while, however, to offset the statement of "T. R. H." by one from Daniela, and let the two settle the matter as best they can. So I append the following note recently received.

"To whom it may concern:

This certifies that the red setter bitch Sancho, entered in the Bench Show of 1881, at San Francisco, was my property at that time, and that her pedigree as given by me then was correct, as vouched for by Mr. Thomas Hart to me. WM. T. DANIELS."

San Francisco, Cal., May 26th, 1884.

All this writing, Mr. Editor, is made necessary by the carelessness of our local dog lovers, and it shows well the wisdom of keeping accurately, clearly and honestly the records of our breeding, since if so few years can raise so many questions, what could not three or four times as many do in the way of clouding what should be as clear as the noontime. Probably, upon reflection "T. R. H." will gladly withdraw his intimation that I was incorrect in my statements, because the intimation is an injustice to me. X.

The Westminster Kennel Club's show seems to have put the Philadelphia dog men in the show mood, and a great deal of talk is being indulged in about the proposed show at the Agricultural Society's fair September next. A special building for the dog show is to be erected, and some very attractive features never before had in connection with a canine show will be added, which cannot fail to be interesting. The list will be large, and already very many valuable special prizes have been promised. A field trial for members' dogs will be had next November, and a number of farms well-supplied with quail have been leased.

We have received from the Philadelphia Kennels, 237 South Eighth street, a copy of their Dog Buyers' Guide. It contains a finely executed colored frontispiece; well-drawn engravings of nearly every breed of dog, and all kinds of dog furnishing goods. We should judge that the book cost to produce a great deal more than the price asked—10 cents—and would advise all our readers who are interested in dogs to send for the book.

The gentlemen interested in inaugurating a hench show of non-sporting dogs have conferred with the Westminster Kennel Club, which has consented to give such an exhibition. The show will be held in the Madison Square Garden, New York City, in the third week of next October.

ATHLETICS.

Cold Ham and Sausages as Diet for Athletes.

In Dr. Sargent's recent lecture on "What Shall We Eat to Get Strong?" he said in the course of his remarks that it had been customary to train athletes on lean beef and mutton, but he thought this a mistake, as tissue-making food should be used in combination with these, and the diet should be so changed as to meet the requirements of the organism of the persons using it, for to establish one diet for all persons was ridiculous. Beef alone is not superior to meal, beans, or other farinaceous food, and the size of the muscles of a man is not indicative of his strength. Farinaceous food tones a man down, and will tend to give him more endurance. A man who can strike a blow equal to 400 pounds would be called a strong man, but this strength cannot be kept up for any length of time on animal food, as it comes from the base of the brain, and endurance must be sought for in other kinds of food. To reduce the weight of a man in training, lean meats may do, but when he is down in weight he must go back to food containing more carbon, such as ham and sausages, which should always be eaten cold. Three years ago this would have been considered ridiculous by trainers, but for a diet for running, walking, and rowing, it has been found that saccharine food, with beef or mutton, is the best; tea, coffee and alcohol, as well as condiments, are objectionable; indeed, it is not the quantity of food a person eats that strengthens him, but the amount assimilated and worked into the organism.

A Promising Amateur.

The Yale College games were held on May 9th. The following paragraph, clipped from the *New York Spirit*, will be of interest:

The feature and the surprise of the games was the half-mile running of Mitchell, who proved himself a flyer, and who hie fair to become as prominent a runner at his distances as is Brooks, '85. He is of rather slight build, 19 years old, and his outdoor sport has been lacrosse, of which he is one of the best players. He had never trained for or participated in track sports, and that he should, on his first appearance, win the 100 yards, running in high-laced, rubber-soled shoes, and ten minutes later, in a pair of borrowed running shoes (his first attempt in spiked shoes), run a half mile only 8.17-20s. behind the best American amateur record, was, I think, an exceedingly creditable performance.

The story of his debut is interesting, and is as follows: The afternoon before the games Messrs. Bond, Dole, and myself were in the dressing quarters, when Mitchell presented himself, stating that he was sent out to be tried. He had no track shoes, and had never used them. Adjourning to the track the instructions were: "Run a half a mile to suit yourself to show me what you can do." He proved himself a natural runner, and covered the half under 2m. 10s., with only one second difference between the quarters. Putting on spiked shoes he was given some instructions and exercise, and it was noticed that he lengthened his stride fully 15 inches. This was the extent of his track experience when he won his race as above stated. He will, of course, go into training and he entered in the inter-collegiate games.

Trinity School Games.

Last Wednesday afternoon a large attendance of ladies and gentlemen were present to witness the annual games of the Trinity School. Some of the performances were unusually good. A result as follows:

One Hundred-Yards Race.—First class—Burt Davis, 1st; H. Seawell, 2d. Second class—P. Collier, 1st; W. Clark, 2d. Third class—R. King, 1st; S. Pond, 2d.

Potato Race.—R. Colman, 1st; D. Williams, 2d. Putting 16-pound Weight—Seniors, King, 22 ft. 6 in; J. Irvine, 21 ft. 7 in. Juniors, H. Wadsworth, 17 ft. 8 in; J. Burdelle, 16 ft. 11 in.

Running Long Jump—Seniors, B. Davis, 17 ft. 4 in; W. King, 16 ft. 11 in. Juniors, Page Collier, 13 ft. 8 in; J. Burdelle, 13 ft. 7 in. The take-off was a board 3 inches high.

Wrestling (Greco-Roman)—R. Hine defeated J. Irvine; R. King defeated W. Bagley; G. Hine defeated E. Kruger; J. Burdelle defeated H. Harrison. The winners in every case were the heavier men.

One-quarter Mile Race.—S. Reed, 1st; B. Davis, 2d. Reed won a splendid race, owing to superior judgment.

Pyramid Ladders—By W. King, W. Deas, E. Townsend, P. Collier, W. Clark, S. Eva, H. Harrison, J. Burdelle, E. Kruger, F. Follis, W. Miller, W. Collier, R. King and H. Seawell.

Boxing—H. Harrison defeated W. Collier. High Jump—S. Reed, 4 ft. 10 in; M. Green, 4 ft. 9 in. The take-off was a board 3 inches high.

After the conclusion of the football match last week a race of 100 yards was instituted between the players in the game. Haley and Widber of the High School and Burt-Davis of the Trinity School, were the contestants. Davis won after a well-contested race.

Thompson, the winner of the all-round competition at New York, 21 years of age, and about 5 feet 11 inches tall, and weighs about 170 pounds.

The Adelpia Athletic Club of Brooklyn, have changed their name to the Long Island Athletic Club.

CRICKET.

Match at Portland.

A very interesting game of cricket, which was witnessed by a large number of spectators, was played at the Oaks, East Portland, Saturday, May 17th, and resulted in a tie. The following is the score:

MARRIED.

Cricketers' Association of California.

On Wednesday night the Cricketers' Association adopted a constitution and by-laws. The election of officers for the ensuing year resulted as follows: President, W. Greer Harrison; vice-presidents, C. Willmot and George Theohald, Jr.; secretary, C. B. Hill; treasurer, A. Waterman; legal adviser, C. Creighton; committee, W. G. Carr, Ben Clark, J. Sandersen, J. T. Cross and Ben Benjamin.

Occidents vs. Merions.

The opening game between the above clubs will be held to-day at the Olympic grounds, Oakland. Both clubs are endeavoring to put their strongest team in the field, and the spectators will no doubt witness a close and well-contested game. Wickets pitched at 11 A. M. and drawn at 6:30 P. M.

ROWING.

We have received a letter from a gentleman who signs himself William Durrant, and who gives his address as 22 Beatrice Road, Bermondsey. He says he is very anxious to row Edward Hanlan on the Thames for stakes of £500 a side. Mr. Durrant adds that he was born in 1841, at Croydon, and the honor of occasionally walking out with Robert Coombs, to whom he remarked that he should like to be champion sculler of England. He has announced that he is willing to place some money in our hands to bind the match, and so we hope Hanlan will respond in the earliest available opportunity. If he neglects to do so, we presume Mr. Durrant will claim the title of champion of England.—*London Sportsman*.

Sculling has not quite died out in England. George Thomas and W. Pearce rowed over the championship course (Putney to Mortlake, over four miles) for \$400, on April 28th. The race is described as one of the grandest struggles—well maintained right up to the finish—ever witnessed on the Thames, and was won by Pearce by about three lengths, in 21 min. 43 secs. It was the winner's debut in a race for a money stake, and though he is said to be anything but an elegant sculler he is a very powerful one.

It is seldom that there are so many scullers of ability in and about the bay of San Francisco as at present, yet things aquatic are, to all intents and purposes, dead. The agitators, those who usually take the lead in bringing about matches and keeping the sport alive, are out of town, and everything languishes in consequence.

A dispatch from Boston, May 15th, says: "Arrangements were completed this afternoon for a three-mile single scull race, for a prize of \$1,000, between Hamm of New Bedford and Hosmer of Boston, at the Point of Pines, near Boston, Saturday, June 15th. Hosmer is training at Princeton and Hamm at Fish Island."

J. H. Riley, John Teemer, Albert Hamm, Fred Plaisted, Nick Layherger, Pat McInerney, James Ten Eyck, George Hosmer and others among the crack scullers have entered for the Lake Wachamac, Sterling, Mass., regatta, which takes place June 17th.

The eastern papers report that Petersen has gone to St. Louis to see about a match with Gaudaur. The latter is said to have rowed two miles lately on Creve Cour lake in 12:28.

John Teemer has become a Benedict.

FOOTBALL.

The end of last week was enlivened by two football matches between the High School and Trinity School. The first game played on Sutter and Pierce streets, ten men a side, resulted in favor of Trinity School by three tries to nil. After the match another one was arranged, fifteen men a side, and was played on the same grounds a few days later, when a splendid game was the result. The only advantage gained by the High School was a safety touch by the Trinity School. The following players represented their schools: Trinity School, B. Davis, S. Reed, Palache (captain), King, Pond, Stoney, Haight, Sisson, Greenwood, Beam, Gibbs, Vernehr, Irvine, Wadsworth and Hine. High School, Richardson, Davidson, Heyle (captain), Bancroft, Haley, Widber, Taylor, Kessing, Erlauger, Sutcliffe, Batten and Fonda.

There is to be a four day's race meeting at Ft. Bidwell, Cal., commencing July 4th. Eight running races and one trotting race. The premiums aggregate \$1,700.

We call attention to the advertisement, in its proper department, of an auction sale of Spanish Merino rams. One hundred and fifty head will be sold, one and two-year-olds, stock selected in Vermont for shipment to Australia. The sheep have been stopped here by an order of the Colonial Government prohibiting the importation of American sheep, and as the only alternative is to ship them back to the east or sell them here, the owners have decided on the latter course. The sheep are at 524 Third street, where people interested are invited to inspect them. Catalogues may be had of Killip & Co., auctioneers.

A second match has been made between the Benicia horses, Ben and Manbrino, this time for \$300 a side, \$100 of which is up. The time and place has not been named, but the horses will be seasoned for this race, and handled by professional drivers.

At the horse sales held at Treacy & Wilson's stables recently, at Lexington, Ky., 300 head brought \$74,000.

It is said that the stud-fee of Godfrey's Patchen, when he got Hopeful 2:14 $\frac{3}{4}$ , was a hushel of oats.

The State Agricultural Society has ordered a layer of clay to be put on the new track.

An English horse owner finds his animals thrive on buttermilk.

## BICYCLING.

The Hampden Park Association of Springfield, Mass., evidently do not wish to encourage cycling. They have charged the local cycle club \$1,000 for the use of the grounds during the tournament which they propose holding next September, and in addition the club will undergo an expense of \$1,250 in building and fitting up a half-mile cinder track. Such enterprise as this is seldom seen, and should receive its reward.—*Boston Globe*.

At Washington on the 26th a ten-mile race for professionals was run by Prince, Higham, Woodside, and Morgan. Prince won in 32:46, Woodside second. Morgan stopped in the second mile, and Higham broke a spoke in the tenth mile and withdrew.

J. B. Marsh, in his account of the first tricycle ride over the Alps, states that the entire expense incurred in riding from Lucerne to Locarno was but \$20.

The Montreal Club will give silver badges each month to members scoring the longest mileage, and also to the one attending the largest number of drilles.

Higham has brought over his personal effects in the shape of his wife and five little Highams, and has purchased a home in the suburbs of Washington.

The system of conducting races according to the class system, instead of handicapping, will be tried in this country during the present season.

S. W. Lane, a Brockville (Ontario) bicyclist, rode from there to Cardinal, recently, a distance of 21 miles in 2 hours and 10 minutes.

Prince is trying to get up another six-day horse vs. bicycle race, and hopes to have it come off at New York in a few months.

'Cycle races will be among the principle attractions of the New England agricultural fairs this season.

Over 100 daily papers in this country regularly devote a column of their space to 'cycle matters.

Armando and Eck were in Chicago at last accounts.

## POULTRY.

### Management of Young Chickens.

It is wonderful, the unerring instinct manifested by chicken in a day or two after coming out of the shell. They will quickly begin to scratch and dig and roll in the soft earth and grass—if you offer them the opportunity. Naturally they are exceedingly fond of earth worms, little grubs, epiders and many insects to be seen or dug up from the ground's surface. The mother encourages them to make this search from the hour that they are fairly launched upon their new state of existence; and they will follow this habit to the hour of their death, whenever and wherever they have a chance to enjoy this luxury. It affords them exercise. It furnishes them (in the grass or pasture run) with a thousand little particles or insect life that can in no other way be supplied, and which are not only grateful and conducive to their thrift, but which help to feed them with what no artificial hand or cunning can provide.

Varied food, in all cases, is most desirable, and this plan should neither be neglected nor slighted, if the best results are aimed at. Ample supplies should be furnished regularly, and the early feedings should be frequent. They should have milk, too, if possible. When the corn-meal mash is made up it should not be very wet, sloppy, scouring swash.

All the sunshine they can have, from early morn to sunset, warmth in the coops at night, and security from rats and cats should be afforded. These provisions are required, in order to rear good healthy chickens. In the northern states they may be allowed to run abroad and forage during the pleasant days of April and May. The grass will have fairly started, the ground is alive with insects, and the chick will grow rapidly, if we continue to feed them regularly, and afford them their liberty to range, also.

The hen-mother will "wean" them in the course of the second month after hatching, and she will go to laying again. The chicks will continue to thrive, and all will progress prosperously, barring the little accidents that may occur.

At from two to three months old, they will need more spacious quarters than they have heretofore enjoyed at night. The old coop will by this time be crowded, when the brood gather together at evening to roost. During the period previously mentioned, the coop should have been frequently moved about—from place to place—to give the growing chicks a fresh, clean bit of ground.

These suggestions are intended to apply to no particular kind or breed of chicks, although there are fanciers who have found certain varieties more delicate than those of other colored birds, and noticeably more difficult to raise.—*Poultry World*.

### Feed for Young Chicks.

Just before the chick emerges from its shell, the last of the yolk is taken into the stomach and is sufficient to supply its wants for some eighteen to twenty-four hours, and during the time nothing more than warmth and quietness is needed. For the first few days a diet of hard boiled eggs, or eggs and oat meal moistened with sweet milk is about as good and as strengthening a diet as can be given.

After several days old a more inexpensive diet may be given, and I have found nothing better than what is generally called egg-bread, made about as follows: one gallon corn meal, four eggs, one-half teacup lard, or any kind of meat grease, one tablespoonful salt, one-half tablespoonful soda, and enough sour milk to mix to a batter. I have found such a diet wholesome, and the chicks thrive and grow rapidly on it. I also frequently cut up fine and mix in the dough a quantity of onion tops.

It is very necessary that chicks should have some animal or insect food, and if they are confined to coops or yards, so that but little such food can be obtained, a handful of lean meat, finely minced, and added to the dough will be beneficial. Young chicks should not be fed much at a time, for if such a course is pursued a large per cent. of the food is wasted, but they should be fed often, say every two hours between daylight and dark, until they are a month old; from one to two months old feed every three hours, unless there are but few on the premises and they have a large range; in such cases three times per day will be often enough to feed after they are a month old.

After they are two months old the bread may be discontinued, and each fed as wheat screenings, oats, cracked corn, etc., may be used.

If properly fed until they are two and a half or three months old, those intended for the market should at that age be sold. Until they arrive at three months old they will not consume more than one-third to one-half as much food as they will during the period of from three to six months old, and frequently, especially early in the season, sell for as much at three months old as they would if kept until six months old; besides, when sold at three months old, all further risk of loss from disease, accidents, etc., is avoided, and the younger ones will have more room and be more thrifty than if all are kept until winter.

Some of the early hatched and most thrifty pullets that show signs of early maturity should be kept for fall and winter layers.

They should be kept in a healthy, thrifty condition, but should not be made overfat, especially if intended for next year's breeding purposes, but should be fed with a view of building up a strong, well-matured frame, and a hardy constitution. Feed principally oats, wheat and various kinds of feed that are not of a very fattening nature.

If they have a free range, encourage a shifty, foraging disposition as they will then find many worms, bugs and the like, which will assist in building up a good, healthy, thrifty constitution.

If confined in yards, scatter their whole grain food among straw, so as to make them scratch for it, as the employment is conducive to health and thrift.

If they get but a meagre supply of insect food, they should be supplied with bone meal, which will assist in building up a strong and healthy frame, and to some extent promote maturity and the production of eggs.

Noticing Roundaway's cure for chicken cholera, I give you mine, which is—extract of logwood dissolved in the chickens' drinking water. I know this to be not only a cure and a good one, but also a first-class preventative. It is a splendid thing to produce red combs, and is good for chickens at any time. Dissolve just enough in the water to color it red, when used as a preventative. When it is used as a cure, the water should be made quite black.

## FISH.

### Camp Tinware.

My entire outfit for cooking and eating dishes comprises five pieces of tinware. This is when stopping in a permanent camp. When cruising or tramping, I take just two pieces in the knapsack.

I get a skillful tinsmith to make one dish as follows: Six inches on bottom, 6 $\frac{1}{2}$  inches on top, side 2 inches high. The bottom is of the heaviest tin procurable, the sides of lighter tin, and seamed to be water-tight without solder. The top simply turned, without wire. The second dish to be made the same, but small enough to nest in the first, and also to fit into it when inverted as a cover. Two other dishes made from common, pressed tinware, with the tops cut off and turned, also without wire. They are fitted so that they all nest, taking no more room than the largest dish alone, and each of the three small dishes makes a perfect cover for the next larger. The other piece is a tin camp-kettle, also of the heaviest tin, and seamed water-tight. It holds two quarts, and the other dishes nest in it perfectly, so that when packed the whole take just as much room as the kettle alone. I should mention that the strong ears are set below the rim of the kettle, and the handle falls outside, so, as none of the dishes have any handle, there are no aggravating "stick-outs" to wear and abrade. The snug affair weighs, all told, two pounds. I have met parties in the North Woods whose one frying-pan weighed more—with its handle three feet long. How ever did they get through the brush with such a culinary terror?

It is only when I go into a very accessible camp that I take so much as five pieces of tinware along. I once made a ten days' tramp through an unbroken wilderness on foot, and all the dishes I took was a ten-cent tin; it was enough. I believe I will tell the story of that tramp before I get through. For I saw more game in the ten days than I ever saw before or since in a season; and I am told that the whole region is now a thrifty farming country, with the deer nearly all gone. They were plenty enough thirty-nine years ago this very month.—"*Nesmuk*" in "*Woodcraft*."

To every person in a community like ours the cultivation and propagation of fish is a subject of the greatest interest, because, more or less, at all seasons, it affects his mode of living. Having, under the old commissioners, made a good beginning in this direction, it is always in place to inquire to what extent it has been carried on by their successors. If we approach the subject of fish cultivation in this spirit, and compare the work done in California with the work done in other states, we shall certainly of late have no reason to be satisfied. In truth, public feeling is getting exceedingly strong on the subject of the inefficiency and inactivity of the present Commissioners, at least with those known "as the majority," and if the Governor does not interfere with them in the meantime, their conduct will certainly be brought be-

fore the next Legislature, and thoroughly investigated. This disregard to public opinion and public interests will ever be found when men are selected for office from political reasons, rather than personal fitness. We know no sadder case of this truth than in the present Fish Commission. It is not only that the Commissioners, through the action of the majority, have not planted a single foreign fish in our waters, or distributed but very few of those indigenous to our State, or neglected all districts marauded by violators of the law to concentrate their efforts at protection on a limited portion of the Sacramento river, which self-interest may suggest, but other and more serious complaints have recently reached us of one of the Commissioners, about which it is only right the public should be informed. It has come to our knowledge, indirectly but creditably, that this gentleman, in a spirit of nepotism, is filling all the places he can in the Commission with his relatives, and that he is in the habit of sending enormous bills to the Commission, as high, sometimes, as \$1,100, without a single voucher or item of explanation, and that in this way the funds of the Commission are consumed. If this be true, and we have every reliance in our authority, such bills should not be passed, or if passed, the matter should be brought before the Executive. In failure of both we bring it before the public. For incompetency, extravagance and selfishness the Commission has become the butt of the whole State.

The better class of citizens of Sonoma Creek have complained to Mr. Commissioner Redding of the injury done to the fish in the creek by the refuse from the wineries on the creek. The gentleman immediately addressed a circular to the offenders, calling their attention to Section 635 of the Code, which makes the depositing of lime, gas, tar, occlude indiene, or any substance deleterious to fish a misdemeanor, "provided sawdust was not deemed a deleterious substance. Why awdust, one of the most deleterious substances to." fish, was excepted, has been a wonder to the State ever since. There is no wonder about it. The man who did it was the purchased tool of the saw-mill-men. We know streams in this State where trout and other fish are unrecognizable in color from the effect of sawdust upon them. Of course, the flavor must be affected as well as the color. But, then, manhood does not go far with some legislators when money is flying loosely around. Thus, it comes that sawdust is not a deleterious substance.

The *Record-Union* says that never within the recollection of the oldest inhabitant has the run of salmon been so light in the Sacramento river as in the present season. Some fishermen are abandoning the business and seeking other occupations. And so it will remain, if even it does not get worse each year, while the present Fish Commission exists, and we cultivate (believing Chinese, alien pirates, and ferocious sea-lions to destroy our stock of salmon on their way to the spawning grounds. Even while our citizens invest half a million dollars in the fish business, we have no right to complain of the want of stock if we do not compel the officers of the law in all seasons to enforce the law. In this connection let us have less grumbling and more protection. It will be vastly more sensible.

We spoke last week of making the market fishermen pay a fine for the privilege of fishing in our public waters, the same as peddlers selling their wares on our public streets. The matter in the shape of Assembly Bill 61, was introduced into the last Legislature by Mr. Cutter, but defeated. The bill originated with the "majority" of the Fish Commissioners, and they inserted a provision that a portion of the money so raised should be applied as a "fair compensation" to the Commissioners themselves. Such, in fact, was the real object of the bill, and it was, therefore, very properly rejected. So an important reform was lost by the selfishness of its promoters. Is it not about time that the "majority" step down and out of their own accord?

Mr. Woodbury, of the Del Monte hatchery has placed 100,000 trout in the lake this season, and he has 60,000 in the hatchery. He is engaged at present in transplanting water-creeks and other water plants along the margin of the lake to furnish shade for the fish, and says they ought to do well in the lake. Trout fishing will soon form one of the many attractions at the Hotel Del Monte.—*Monterey Argus*.

It is this the Mr. Woodbury who had charge of the State Hatchery under the old Commissioners we are not surprised at the results given above. The first thing the present Commissioners did was to get rid of Mr. Woodbury, because they knew he would not stand any "funny business."

A Susanville press telegram of the 20th inst says: "Five men from Fall river valley recently captured eleven hundred trout in Pine creek, this county, in a few days' time. They run up the creek from Eagle lake to spawn, and will average three pounds each." Those five men should have their names published all over America as a disgrace to their country, and about the dirtiest, lowest down curs we have heard of for a long time. In their natures they are little better than such men as Majors, Jewell & Co. Trout are spoken of as plentiful in Pritchard as well as Eagle creek.

Charles Wormer, of the St. Charles Hotel, Monterey, is credited by the *Monterey Democrat* with taking a pure, brook-trout in Carapatos creek that measured twenty-eight inches, and weighed over five pounds. The paper says: "It is the largest brook-trout we ever heard of, and may be compared with a prize ox; a trout seldom exceeds 17 or 18 inches in length."

Judge Towle, of Napa, is reported of having caught a seven and a half pound trout while fishing in Milliken canyon. Four pounds, it is true, makes quite a difference in a fish, but this trout of Judge Towle's gets well up towards the one of Professor Baird's, said to be the largest ever caught. If this was a pure brook-trout the judge is much to be congratulated.

Several parties went out last week, and more are going this week, after the trout. But we have no reports yet. Most men, if at all observant, can collect much information during such trips to the interior. We shall always be glad to receive letters from any gentlemen who will write up their fishing trips. In fact, we desire them.

The *Gilroy Advocate* says: "Henry Holloway caught 53 trout last Sunday. They were all large, averaging eight or nine inches in length, and would weigh in the aggregate at least 200 pounds. This is the best catch we have heard of this season."

Boulder creek, in Santa Cruz county, is again spoken of as yielding well. Out of a party of city anglers visiting it, Mr. George F. Dornin is reported taking one fourteen inches in length.

Many persons started out last Sunday to their favorite places on the bay; most of them, we learn, caught a few wetting.

THE RIFLE.

ANCIENT AND MODERN ARMS.

A Short Reply to the Wilcox Critic, the Modern Tubal Cain, greater than the first Artificer in Metals. His Theory not Worthy of Refutation, a Contradiction of his Own Position, by His Own Hand, Becoming His Own Executioner.

BY DR. E. H. PARDEE—No. 22.

EDITOR BREEDER AND SPORTSMAN:—After an omission of three months, on account of sickness, to contribute to your valuable paper, I again resume the pleasant task of my semi-monthly correspondence. Since my last communication, I see that my friend Mr. Warner, of Wilcox, Penn., has honored me with a criticism on a portion of my last article, he being an advocate of the choke-bore. I am free to say that from quite a lengthy correspondence with him some ten years ago, I found him quite well up in some things pertaining to the manipulation of the rifle. And while giving him this credit, I must also say that his theories would not bear the test of natural philosophy, and consequently his practical workings were not steady, and therefore not satisfactory, even to himself. Ten years ago he wrote me that he had two or three rifle matches, and having heard of my skill as a marksman he wished me to coach him, and give him some points as I thought might be of use to him, as much depended on the winning of these matches to establish a first-class reputation at a rifle maker. I did all I could to make him successful in those matches, but I found him, like all unskilled men in this branch of science, too willing to trust to chances, and weighted down with self-reliance. He underrated the ability of his opponent, went into the contest half prepared, without method or system, and the result was a Waterloo, a Bull-Run defeat. I do not say this with any disparagement to Mr. Warner, for his competitor was an old telescopic rifle target veteran, a disciple of the late-world renowned Mr. Billingshurst of Rochester, N. Y., and had got the workings and fittings and construction so systematized that to a novice it was like the spider inviting the fly into his parlor. It was almost sure death. After this short introduction of Mr. Warner to the readers of the BREEDER AND SPORTSMAN, I will give a passing notice to a small portion of his article in the BREEDER AND SPORTSMAN of March 15th, under the heading of "A Long Range Shot at Dr. Pardee," to which I invite the curious to peruse. In the first place Mr. Warner thinks that I abused a confidence by making a short quotation from one of his letters written in reply to one of my articles in the BREEDER AND SPORTSMAN. I did not think that I was betraying a trust, as his letters were not marked confidential, while on the contrary, all of his late letters were in direct reference to my public contributions, and I merely referred to his, as I have often done to letters from other correspondents, with nothing but a universal feeling of goodwill and fellowship toward all. For I assure the gentleman that I have never in all my life betrayed a confidence, either in private or public capacity, and I trust that this explanation will be an apology, if an apology be necessary. As to Mr. Warner's criticism to that part of some former communication in reference to "Old Pioneer," I will only say that if the gentleman from the smoke infested cities of Pennsylvania had been a reader of all my former communications he would not have put himself in the roll of a critic. Pope says a critic is one keen with wit, etc.

"Some have at first for wits, then poets pass'd, Turn'd critics next, and proved plain fools at last; Some neither can for wits nor critics pass, As heavy mules, are neither horse nor ass. One science only will one genius fit; So vast is art, so narrow human wit. Much was believed, but little understood, And to be dull was construed to be good."

And when Mr. Warner gets down to his work he makes an attack on one of my positions, viz.: that the more highly polished a gun-barrel is inside, the less the friction, and so plain a proposition I did not think would be called into question by any school boy, much less by a man who writes over his own signature "that he has been a gun-maker for thirty-eight years, mainly of the choke-bore variety." I console rather than congratulate the gentleman, having spent more than a third of a century on the knotty little problem of choke-bore, and still adhere to it with that determined tenacity "like the dog to his bone." I will, for the benefit of the readers of the BREEDER AND SPORTSMAN make a short quotation from this distinguished worker of metals in the Orient. "In his article No. 20, wherein he discusses the relative merits of cylinder and choke-bored guns, and puts the makers and advocates of the choke-bores in the position of saying that the guns are so made in order to obtain the maximum of friction and thereby secure the proper upset of the bullet. As though the makers of that style of rifle considered friction and upset indispensable in the make-up of a good shooting rifle. I have been a maker of rifles for thirty-eight years," poor fellow, "mainly of the choke-bore variety. Have conversed with many other gun-makers upon this topic, and do not remember ever having heard one of them advocate friction as a desirable feature in any gun. The best that can be done is to reduce it to its minimum, and this I try to do by the very means which the doctor most condemns; namely by giving to the inside of the gun a moderately coarse finish, rather than the extremely high polish which he so strongly advocates."

Now, Mr. Editor, if the above quotation does not blow hot and cold in the same breath, if it is not "Philip drunk and Philip sober," if he does not say that the paper he wrote the article on is white and black in the same sentence, in other words if he has not been self-executioner in the assailable position he has taken, then there is no philosophy on earth or comfort in heaven. It would have been in good keeping for this modern artificer in metals if he had more fully illustrated his position by saying that the wood rasp that is so much used by the craft in his trade would create less friction to his hand by rasping it, than would the most polished piece of steel with similar strokes over the same surface. Is it possible that a man who has worked more than a third of a century in metals dare say in a public journal that to create a minimum friction you must roughen the surface of metals that come in juxtaposition? and to create the maximum friction the surfaces must be highly polished? I appeal to the disciples of the shot gun, and refer them to this labored article by this Oriental gentleman in the BREEDER AND SPORTSMAN of March 15th, and ask them to give it their serious thought and consideration, and after reading it, and they become convinced of this man's philosophy, run a rasp through your gun barrels and make their inside as rough as a brick wall, and test the theory of this learned gun-maker of Wilcox. I commend him to my very genial friend and author of The

Still Hunter, Mr. Van Dyke of San Diego, a gentleman who has written more good and common sense things about the rifle and how to use it, than any man of my acquaintance. I also commend "the still-hunter" to my very good friend Mr. Warner, by which introduction I know he will be much benefited. In concluding this part of my reply to unfinished and polished-finished inside rifles, I will refer the reader to my argument in my articles No. 20 and 21 in the BREEDER AND SPORTSMAN. In fact, no argument is necessary, the common sense view of all matter, germain to the philosophy of friction and its causes, must be enough to settle the matter beyond all cavil. What matters it to me how long this modern Tubal Cain has been a hewer of wood and a worker of metals? Suppose he had, for the argument of the thing, been a gun maker twice thirty-eight years, would that fact have disturbed any of the long-established laws of universal philosophy? Suppose he had worked at his trade one hundred years. Would that make you, Mr. Editor, believe him any quicker if he should tell you that rough things were smooth, and smooth things rough? As for me, I don't care how many gun makers he has conversed with, for, as a rule, they are not a class of men with a high order of intelligence, and a very large majority of them have learned their trades in about the same way that Poll Parrot learned to talk. Mr. James B. Chapman, in his work on the "Improved American Rifle," published nearly forty years ago, has many good things, and what was true then holds good now. Mr. Chapman said in his introductory, "I do not feel at liberty to swell my pages expressly for the benefit of bungling mechanics; for if nature has deeded him the gifts necessary to form a moderate workman, all the writing in the world will not avail him. If, on the other hand, he be gifted, I have written enough for him to get a general insight, and which in his case is all that is requisite." I have had quite an extensive correspondence with many of the best rifle makers in the world, and I am free to confess that I have never found but two who are read and learned in the theory and science of gunnery. The most of them are cranks. They claim to have discovered some new "kink" that they have not imparted to any one else, and he is very shy and cunning, and will only impart the great secret to his son when he is called from earth to heaven, and then with an expere understanding that he shall only give it to his eldest son, so that the secret may be kept in the family as an heir-loom for generations to come. I remember that a Mr. Billingshurst of Rochester, who had become somewhat celebrated as a rifle maker, and meritoriously so too, had announced that he had made an important discovery in the construction of a compound bullet, and that he would not give it away to any one unless with one of his make of guns, and then it must be under the most solemn pledge that the purchaser would keep the thing dead for all time, that neither love nor relationship could get the hidden secret. At last some recreant cuss gave it away, when, lo and behold! it was merely a revival of the hard point and soft butt which had been used and discarded time and again by most all the nations of Europe. And the same kind of a bullet had been used by George H. Ferris, of Utica, New York, but who had laid it aside and had taken in its place tempered lead, because he could obtain better performance with his guns with that kind of bullet. When a man of genius in his line be found, it matters not what his occupation may be, he is most sure to make a success of it. How many makers could, and can, be found with deductions of Dr. Hutton and Robbins in their work shops. They work by imitation not from construction, and the height of their ambition is to imitate "the boss," and, in fact, the role of imitation does not stop in the model and shape of the gun, but the apprentice tries to acquire the gait of "the boss's" gyrations in his walk, to talk like the old chap, and smell what he smells, see what he sees, and taste what he tastes. When all of these little demi-semi-quavers have been obtained, like the young bird fully fledged he is ready to leave his nest and become self-reliant, and start a shop in some neighboring town; and as the passer-by wends his way through some little street, he looks over the door of some former deserted tenement, and reads "John Smith, Gun Maker."

But Time, the great leveler of all things, has brought a flag of truce, and to-day the hum of machinery may be heard in several states of the Union, taking the place of the tradesman, and turning out better work at greatly reduced prices. And to so great an extent is this being done that very few, if any, new guns are ordered to be made at any of our gun shops. And now may be seen as a continuation of "John Smith, gunmaker, locksmith, bell-hanger and saw-filer. A few more years will close out the business entirely, and at the end of another quarter of a century, a hand-made rifle will be kept in the cabinet of the gentleman merely as a curiosity.

At Shell Mound.

The unusual rain of Sunday had the effect of keeping the attendance limited. Few, but veterans, whom nothing in the shape of weather can daunt, put in an appearance. Matters in our rifle world will be more interesting and lively from this time. Some good scores, however, were made on Sunday.

Company C. Fusiliers, Second Artillery, under command of Captain John Bruer, held its monthly medal shoot, and the number out was creditable to the company. With the exception of Thierbach's, the scores made by the winners were not particularly good. They were as follows:

Table with 2 columns: Name and Score. Includes Charles Thierbach (44454544-42), Sergeant Will (342445434-37), and H. Brooks (3434534543-38).

Sunday was also the regular day for competition for places in the Regimental Team of the Second Artillery, and those again in attendance for practice were also all members of Company C. The result gives the Fusiliers a preponderance of places in the team. This is only the just reward of punctuality. Mr. Kuhls, one of our two distinguished Frede, again made a fine record. The score:

Table with 3 columns: Name, 200 Yards, 500 Yards, Total. Includes Fred Kuhls (43, 44, 87), Sergeant Lenecke (41, 43, 84), Peter Robinson (46, 37, 83), Charles Thierbach (42, 40, 82), Capt. John Bruer (40, 37, 77), H. Brooks (38, 38, 76), Lieutenant Mangels (44, 31, 75), Lieutenant Huber (40, 31, 71).

There was also a small delegation from Fifth Infantry Battalion present for practice. Among these Mr. Hovey, the "little sergeant," as he is called, again made one of his grand records. The shooting was off-hand at the 200-yard target. In five strings, of ten shots each, he made 225 out of a possible 250, or 90 per cent. Unfortunately, as we have said before, he dislikes to practice at the 500-yard range. The score:

Table with 2 columns: Name and Score. Includes Sergeant Ed. Hovey (45, 46, 44, 45, 225).

These figures show Sergeant Hovey's usual score at the

200-yard range. To prove, therefore, the respectability of his average, we have been looking over the eastern records, and find that the "little sergeant," for the distance, has few superiors at the eastern target. Two scores are enough for our purpose, being especially the result of a match between the crack Massachusetts team, and the crack Springfield Army Team, about two weeks ago. The range and number of shots were the same as Hovey's.

Table with 2 columns: Name and Score. Includes T. B. Wilson (47), R. T. Hare (46), J. Kimball (45), S. S. Bunstead (45), L. H. Mayoit (44), M. W. Will (43), F. R. Bull (43-313), W. Charles (47), J. B. Fellows (46), D. Kirkwood (44), O. M. Jewell (44), J. A. Frye (44), J. N. Frye (42), H. G. Bisby (42-309).

These figures show the average eastern scores at this range. Taken as a standard, a team of seven military men could be picked out any day in California and Nevada who equal it every time they shoot.

At Schuetzen's Park, Alameda.

The attendance at this favorite resort of our riflemen was still less than at Shell Mound. On Sunday the Eintracht Rifle Club visited their new range for the first time, but even this body of sharpshooters, which generally musters from a dozen to eighteen members, had only seven out. This club always use the twenty-five ring target, with twenty shots to each man, which make a possible of 500. The score:

Table with 2 columns: Name and Score. Includes Klotz (336), Stamer (336), Hagerup (313), Schuert (231), Wolf (211), Schwartz (204), Dreyer (167).

Eastern Notes.

It may interest our local riflemen to know the Creedmoor arrangements for the current season. From the report of the directors we learn the range would be formally opened on 21st inst, with the following matches. On the opening day the off-hand match, 200 and 300 yards, small-bore and military rifles, special prizes for each weapon. June 7th, the first of the Qualification and Champion Marksman's Class Match, 100 and 300, 200 and 500 yards, with the State Model Remington, will be shot. June 14th, the long range, any rifle competition, 900 and 1,000 yards, will be held, and June 28th, the special military will be given a chance to shoot at 600, 800, 900 and 1,000 yards.

The second of the Marksman's Matches will be held June 18th, and the second of the off-hand contests June 23d. We shall endeavor to give our readers the scores in these matches. As a matter of record being the scores of the best eastern military rifleman, they will be worth preserving, to compare with our own.

The committee of management of the State Rifle Association met during the week and fixed the distribution of prizes won at the late tournament, to take place on next Monday evening, June 2d, at B'nai B'rith Hall. At a former meeting the Directors decided to give Mr. Linville of the police the champion medal. Whatever may be the real merits of the dispute arising as to the validity of the score, which gives Linville this honor, it could not, as we understand the case, be settled otherwise than it has been. Let us hope, however, for the honor of the State, that no such a question will ever arise again. The sanctity of the target must be placed above all technicalities in scoring.

It is not expected there will be any contest this year between the American and English national rifle teams.

THE GUN.

The Game Law.

Table with 12 columns (January to December) and rows for various game species. Includes Quail, Partridge, Rail, Grouse, Doves, Male Deer, Female Deer, Spotted Fawn, Antelope, Elk, Salmon, Trout.

At Sacramento.

The local papers report there was a goodly gathering of spectators at Agricultural Park, Sacramento, to witness the last regular monthly medal shoot of the Forester's Club, but the attendance of the members was poor, only nine facing the trap. The shooting was at 21 yards, except in the case of Mr. Todd, who was handicapped at 26 yards. The same scarcity of birds generally complained of appears to exist at Sacramento as well as elsewhere, yet there is no better place for raising pigeons than there and in its suburbs. In this case the birds were a mixed and poor lot, the proportion being too young to fly well or even fly at all. Only a few were tailers and difficult to stop. The score:

Table with 2 columns: Name and Score. Includes Stevens (110111111110-10), Zver (0111110111-10), Schabel (1110111110-10), Todd (01010111011-8), Watson (110111101001-8).

The tie on 10 were shot off at three pairs of double birds, the result being as follows:

Table with 2 columns: Name and Score. Includes Stevens (101000-2), Zver (11011-5), Schabel (101111-5).

Zuver and Schabel shot at three pairs more, Zuver winning: Zuver (111011-5), Schabel (111010-4).

Dr. Zuver thus gained the medal, and will try to hold it. The regular club shooting was followed by pool shooting.

On Sunday the Pacific Club of Sacramento held its monthly shoot at Agricultural Park, so we suppose the unusual rain visiting us did not prevail there to the same extent. In this case the birds as long as they lasted were a good lot. As will be seen, George Rontier, one of our champions at the trap captured the first medal. In the shoot-off for second medal, Pedler with eight kills to his credit won. The score:

Table with 2 columns: Name and Score. Includes Rontier (11111111-10), Pedler (11110110-7), Vaughn (11111110-8), King (01011111-8), Chapman (10101111-8).

After the match the live birds were exhausted, and the day was finished with clay pigeons. We fear before the season closes the imitation bird will have to be used generally.

With this anticipation, we visited the cellars of the Messrs. Pierce of Oakland, last week, (sole agents for this coast), and found their stock immense, in fact consisting of several tons.

However, therefore, it may prove with live birds, there will be no scarcity of clay pigeons. The more they are used, too, the better we think they will be liked.

At Beach's Grove, Sacramento County.

There was a glass-hall shooting at the Grangers' picnic, held recently at Beach's Grove. The prizes in each pool were \$3 for first and \$2 for second.

The first shoot resulted as follows: Geo. Neale, 7; I. J. Doty, 8; C. Sims, 7; Chas. Hack, 10; — Jobs, 4.

The score of the second shoot was: I. J. Doty, 10; Louis Nicolans, 10; George Neale, 8; Dr. Tebbets, 8; — Johnson, 6; — Vickers, 5.

Score of the third pool-shooting: I. J. Doty, 8; Louis Nicolans, 10; Chas. Hack, 9; — Vickers, 9; Geo. Neale, 10; — Shiner, 8.

A freeze-out between Vickers, Neale and Hack resulted as follows: Vickers, 6; Neale, 0; Hack, 7. Another freeze-out between the same three was shot, and was won by Hack with a score of four.

The best shooting of the day was done by Louis Nicolans. He broke thirty straight balls, all he shot at during the day.

At Colusa.

We spoke last week of the shoot of the Colusa County Gun Club on the 11th, ist., regretting we had not particulars, as it contains some very able men at the trap.

We have since obtained the particulars, which, though a little late, we have pleasure in publishing.

Watson..... 1 1 1 1 1 1-5 Burton..... 1 1 1 0 1 1-5 Magougil..... 1 1 1 1 1 1-6 Herd..... 0 1 0 1 1 0-3 Miller..... 1 1 1 1 1 1-6 McElroy..... 0 1 0 0 1 0-2 Parker..... 1 1 1 1 0 1-5 Robinson..... f w

Freeze-out ties were shot at 26 yards' rise, single birds, with the following result:

Magougil..... 1 0 Watson..... 0 Miller..... 1 1

Miller took first money, \$20; Magougil second money, \$10; Watson third money, \$5.

The next shooting was a "freeze-out," \$5 entrance, two prizes, with the following scores:

Lopez..... 1 1 1 1 1 1 Watson..... 1 0 Magougil..... 1 1 1 1 1 1 Spurgeon..... 0 Miller..... 1 1 1 1 0

Lopez took first money, and Magougil second money.

At Gilroy.

The Gilroy Rod and Gun Club have lately been contending for a handsome rifle as the prize. In two former matches it was won by Mr. Frutig, who stands high in the club.

Last week the club had another shoot when Mr. P. W. Robinson won with a clean score. Clay pigeons were used, 15 birds to the man, 15 yards rise, with the trap set in fourth notch.

Mr. Frutig shot at 24 yards, the penalty imposed for winning twice. The score:

P. W. Robinson..... 15 H. Frutig..... 9 J. E. Payne..... 13 E. S. Harrison..... 8 D. Dunham..... 13 S. Short..... 7 E. Leavesley..... 11 J. Paine..... 4

Notes.

Quail are said to be getting quite numerous in Sierra county, as the breeding period approaches. Many are said to act so strangely that it looks as if they were crazed. A local paper, the Sierra Valley Leader says: "The quail that have arrived are apparently tame and are flying around door yards and feeding with chickens. They act curiously, seeming bewildered, flying into windows, bumping up against buildings, and are easily captured. The other day one of these birds flying swiftly along, and not knowing where it was going, suddenly struck a telegraph wire with such force as to cut its head off. Local ornithologists state that the birds coming from the lower country, and while crossing over the wide snow expanse covering the Sierra Nevada become snow-blind and cannot see. This is probably true, and accounts for their apparent bewilderment and helplessness." If snow-blind is as bad on birds as men, we don't wonder they should act as if crazy. We know that snow-blind perfectly.

A Gilroy paper says: "Mr. E. H. Farmer informs us that during a recent fishing trip to the Uvas he discovered a flock of English pheasants, and heard a large flock rise in an adjacent canyon. Five years ago a pair of these birds were turned loose at Menlo Park and another at Tennant's, and the birds seen by Mr. Farmer are undoubtedly their offspring. If permitted to live and propagate it will not be many years before the mountains of this section will be well stocked with these choice birds." We hope this may be true, but we never heard of English pheasants being turned out, as stated. Japanese pheasants were turned out, and probably this is the result. The latter are splendid birds. We hope that if those turned out have increased as stated, the true sportsman of the district will see they are carefully preserved. No better locality could be found for their propagation than the Uvas River mountains.

The match between Burbank and Fay, which comes off a week from to-morrow, Sunday, 8th June, at Oakland Race Track, we find is exciting more than usual interest. Since our last issue, public opinion in some quarters has veered right round and made Burbank a decided favorite, though we, ourselves, have bet him a prime cigar that if Fay aboys in his best form he will win. The match is with fifty birds, not twenty-five as stated. Any one desirous of betting \$25 or \$200 on the issue can be accommodated at once, if they will give Burbank a call. He has several commissions to fill. It will, no doubt, be an interesting match.

Inquiries are freely circulated as to the fate of the Garden City Rod and Gun Club. The last we heard about it was that some of the members contemplated admitting ladies, to see if they could not infuse more life into its proceedings. If this step has been taken, perhaps, the members may be found driving out on the Alameda as more suitable to their tastes. That Alameda has many attractions in fine weather, especially if a spanking team and handsome buggy-robe, with something pretty carefully wrapt up in it, are in the question.

The great Louisville tournament for the Champion Cup of America, which was to have commenced next Monday, has been postponed for want of birds. It is with pigeons as with game and fish, man cannot kill them off indiscriminately and still have them. The great law of nature, preservation, will exert itself. A law so universal in its operations should be more observed in America.

The Gun Club, of San Francisco, held its customary annual picnic at Laurel Avenue, Ross' Station, Marin County, yesterday. This is always one of the most delightful re-unions of our true sportsmen, and, as usual, the occasion was quite equal to those of past years. We cannot give the particulars until next week.

Last Sunday was arranged for the opening-day of the season for clay pigeon shooting at Adam's Point, Oakland. It was, however, postponed on account of the rain. It will take place to-morrow at 1 o'clock. The Messrs. Pierce extend a cordial invitation to all who desire to be present.

Mr. J. K. Orr and two young gentlemen friends from New York tried the "whirrers" last week, at Adam's Point. While they proved a little too much for his friends, Mr. Orr broke some thirty-three out of forty.

Owing to the rain last Sunday, the regular monthly medal shoot of the Pacific Club was postponed. It will take place at Bird's Point, Alameda, to-morrow.

The California Wing Club will hold their next regular monthly shoot at San Bruno, to-morrow.

Fugitive Sketches.

My old friend Will Hoge, formerly of Tarrytown, N. Y., now of San Francisco, Cal., was one who had witnessed many turns of fortune's wheel, and he it said to his credit, that in whatever position the fickle goddess deemed best to place him he was pleased to make the most of his lot.

Whether watching the Derby on Epsom Downs, or swinging a stage driver's whip in Idaho or Montana; whether eagerly waiting the result of a race at Jerome Park (in which one of his father's horses was entered), or herding sheep in the Wind River country; whether acting as secretary to his father, while that gentleman was manager of the old North Missouri R. R., or riding in the ranks of the Canadian mounted police, he was always the same cheerful fellow, ever sanguine of success, and buoyant of spirit; like a cork, no sooner was his head turned under water by adverse circumstances than he was seen to bob up again, ready for the next turn of the wheel.

The writer knows of no one who has buffeted the storms of this life in a more cheerful spirit than Mr. Hoge; from a home on the Hudson, supplied with every needed want, and earnestly knowing the want of money, he journeyed to the Pacific coast, where nearly a year was spent in pleasant travel.

In the then far away territory of Montana there came to him the news that his father's fortune had been swallowed up in the panic which followed the failure of Jay Cooke & Co. Not in any way disheartened, he wrote his parents informing them that he should remain in the territory and endeavor to sustain himself by his own exertions.

Soliciting employment, Will accepted the offer of an up-country sheep man to take care of a flock of short wools for the season. According to his version the occupation of shepherd in Montana could not have been an enviable position. In his case a pack horse and two dogs were furnished as soon as grass came, and with these companions he wandered away in the foothills and mountain valleys, bidding good-bye to civilization and human associations for an entire season.

Following the slowly feeding flock by day, the hours at length got to uncertain length; while rounding up his flock at night he watched the stars in a neighborly manner, while the cry of a coyote among the distant hills, or the solemn voice of some disconsolate owl in a neighboring tree, were sources of comfort to his thoughts, while towards the faithful dogs who lay at his feet, and the patient horse which cropped the grass near by, there grew a different spirit than he had ever experienced, for they daily came a part of his life. He avers that his comrades understood the language employed when conversing with them, and he became so accustomed to telling every plan formed for the future, that he half imagined the horse and dogs were to be his partners through life. Once in six weeks provisions were brought him, that being the only occasion when he enjoyed the privilege of looking at a human form or listening to the words of a fellow being.

Upon one occasion he had wandered so far from his wonted beat that the empty wagon failed to reach him, and thus for twelve long weeks he was left to his own thoughts. It is hardly necessary to add that a single season sufficed in satisfying his taste for sheep culture, and once the herds were driven to winter quarters Will started for Helena.

Soon after arriving in the chief city of Montana he secured a position with the Wells & Fargo stage and express line, and occupied a seat on the driver's box until called to attend the funeral of his father. While driving in and out of Helena our friend was witness to a practical as well as fanciful bit of theatrical management.

Along in the early months of autumn an ox train arrived from Utah; among other freight brought up were two passengers, who being possessed of more time than money, endured the long trip with cattle. It was easily learned that the man and his wife were stage people, in fact they made haste in stating that they were ready to begin an engagement, and hinted that they were able to produce certain plays that had never been played upon the stage in Helena. An easily interested and progressive vendor of liquid lightning and vile cigars, offered them the use of his then useless burdy gurdy house (a dance house it would be called in the states) and as additional evidence of his good intentions arranged a small stage on the platform once occupied by the musicians; as their enlivening music quickened the steps of the dancers, while cow hide boots stamped the dust in clouds from the floor.

Not long after this kind but business-like offer, hurriedly arranged playcards informed the inhabitants and the wandering sons of Esau, that Madam Blank would begin on the following evening an engagement in Rourke's new Opera House, during which she would assume such characters as best suited a Shakespearian programme.

As the boys in a mining camp are n slow to appreciate

anything having on its face the imprint of genius or novelty, and being as they were heartily tired of variety shows, the fraternity at Helena expressed themselves as being highly in favor of a short season of tragedy, and promised the artistic Madam a big night when she opened the new opera house. Right well did they keep their promise, for the first evening found that rude ball packed full of critical humanity, rigged out in holiday attire; red shirts, corduroy pants, bright gum boots and newly oiled and brightly polished bull dogs, while the show of sombreros would have made green with envy those admirers of wide brimmed hats.

Two dollars per head, was the tax levied at the door by the Madam's worthy husband, assisted by the thoughtful Mr. Rourke, while a crazy violin and a consumptive bass viol served as a check to the ardor of the enthusiastic audience who frequently called for Romeo and Juliet.

In the words of a big-whiskered miner, the reader may learn of the devotion those noisy fellows bore toward the much-asked-for Rome and his female pard. When spoken to by Mr. Rourke and asked if he would say a word to the boys that would tend towards preserving better order, the rough-voiced fellow replied: "See here, Mr. Rourke, you know the boys have not seen Romeo for a long time, and they're all great friends of him, you know; while as to Juliet, they all know that she stands head and shoulders above any other woman in this camp, and they're just aching to set eyes onto her. 'Aint any use to stop them, they want to see if Romeo looks natural after traveling so far, and then they want to see whether or not he wears a new kind of weapon, and whether he has forgot how to use that long knife he used to carry at his side." At length the hour arrived when the performance was to commence and the Madam's husband acting as stage manager, supe, etc., lighted the short row of tallow dips which served as footlights, and amid the frantic efforts of the orchestra, rolled up the curtain on the balcony scene in Romeo and Juliet.

Cheer after cheer greeted the entrance of the star, who, reversing the order of affairs, suffered Romeo to recline in the balcony, while Juliet bewailed her misfortune and asserted her constancy in the garden beneath.

The heretofore unattempted feat of playing Juliet to a lay figure, carried the audience by storm, and many were the methods by which the ardent admirers expressed their satisfaction.

Several enthusiastic fellows shied their wide-rimmed hats over the footlights, and demolished more than half the struggling dips; others flung silver pieces on the stage, and in a few seconds the desire to offer tribute became a maddening spirit, and for a while the dollars and half dollars fairly rained on and about the astonished actress, who by this time was becoming thoroughly alarmed.

Being assured by Mr. Rourke that the money, hats and revolvers were simply meant as a tribute of esteem, the star thanked her admirers in a pleasant manner, while her husband thoughtfully gathered together the shower of silver. For two weeks this woman entertained those rough mountain men, proving herself capable of furnishing them a new form of enjoyment, besides showing that she was more than an average actress by the variety of characters assumed, and the excellent presence of mind possessed in critical moments.

When the engagement was completed, or rather when the community began to tire of lay figures and Shakespeare, the couple shook the dust of Helena from their feet and rode away in a Concord stage.

While writing of theatrical matters, allow me the privilege of adding a short but spicy incident which occurred in connection with the St. Joseph Exposition for the year 1881. It so happened that the editor of the Rockfort, Mo., Journal concluded to accept the benefits held forth by his complimentary ticket, and likewise make use of his railroad pass, and accordingly he found himself in the Queen City bent upon having a good time. And who else had a better right? for if editors of country newspapers do not deserve a holiday once in a while, I know of no class of men that do. This particular editor was by no means a tenderfoot; rather, I should say, that he was a hard-hearted, cruel, cold-blooded man of the world, very much after the order of the sporting editors of the large daily papers; he was a man who had seen not a little of life, observing as well the dark as the bright side of physical existence. I should say, and in truth know, that he has drank long and deep from that cup of experience, which is the result of straining one's eyes looking for two pair or an ace full; has often placed his dollar on the lucky "five," which the seductive wheel of fortune man induces his patrons to believe is a sure and short way to fame and fortune; hath been heard to cry, "two dollars for the field," second choice was sold, and to speak from the card, he has seen a great deal for his money. Of course, his morals, like hide, are tough and not easily shocked or torn, but the circus at the Opera House completely threw him out of form.

This is what he said to his readers when he returned to his post of duty:

"Through the courtesy of Cary Craiff, we found a pleasant seat in the grand Opera House and patiently awaited the performance of the Rice Evangeline Company. We cannot speak of the performance, even at this distance, without a blush of shame. The star of the evening (?) made her appearance dressed in a gorgeous pair of hose that reached to her neck, and with one foot pointing at six o'clock and the other at high noon, smiled and blinked at that large and intelligent audience with a frozen idea of appreciation."

I am inclined to believe that this editor left his dollar with the ticket seller the next time he ventured within those classic walls.—Columbus, in Chicago Horseman.

The Nashville correspondent of the New York Spirit writes: Breeders looking for a thoroughbred cross, with trotting instinct, should not overlook the get of the great three-miler, Brown Dick. There are a number of borses here by Enfield and others, out of thoroughbred daughters of his, that can trot fast and stay all day, and the rule works both ways, for he has gotten several good ones out of trotting mares that can go fast. Col. J. W. Lawless owns a bay mare, six years, by Enfield, out of a thoroughbred daughter of his, that can trot close to 2:30 with road work. Col. B. F. Cockrill has a bay gelding, five years, sixteen hands, by Enfield, out of another thoroughbred daughter, that showed so fast that he has waited for him to develop before putting him into active training. A retired merchant of this place owns his son Burlington, out of Eliza Jane, record 2:40. This is one of the speediest horses in the state, and can heat them all on the road, but owing to his fine style and good qualities, his owner will not give him a chance.

Capt. Geo. A. Johnson is organizing a racing and fair association at San Diego, and writes us that he anticipates no difficulty in raising the money necessary to build a track and the necessary buildings and fixtures. His plan includes a pavilion in the city, and ample grounds in the suburbs.

Dennis Gannon is now located at Pleasanton.

Palo Alto.

We have oftentimes resolved to write a description of Palo Alto and the stock which is kept there. But this resolve has not been carried out, owing to there being a lack of time to perform the work. To give a full description of this celebrated breeding farm, it would be necessary to occupy every column of the paper, and a page per week would entail a serial running through as many chapters as the novels in vogue over a century ago. Occasionally there have been sketches in the *Breeder and Sportsman*, something about a few of the horses and what they were doing, a few of the salient points, a trifle of gossip of what was going on the fair fields, paddocks and courses of Palo Alto. The last visit, prior to that of a few days ago, was July 20th of last year, not counting a short visit on the way from the San Jose fair, so that there was much to see that was new, and unfortunately only a few hours to make observations. The time was well put in. In the company of Mr. Ariel Lathrop, we left San Francisco on the 3:30 p. m. train, and whirling along at a rapid rate in less than an hour were landed at Menlo Park. On these "long days" when there is sunshine and twilight until after seven, there was plenty of opportunity to see the mares and colts. As we drove up the avenue which leads to the trotting stall, the boys were driving a hand of fifty from the field to the stables for their evening feed, and these were detained in the paddock to give a chance for closer examination. It is customary to write that the last seen are the best, and assuredly there will be no divergence in this case. Fifty foals by the side of their dams, and so uniformly good that with one exception it was difficult to select not only one, but a dozen that were entitled to preference. It is also safe to assert that there is not a breeding farm in the United States that can show such an array of foals, and just as certain that any five of them will fail to display such a collection of notables in the dams. Beautiful Bells, Lula, May Queen, Norua, Brunette, Columbine, so many celebrities that only a few of the fifty could be left out in a roll of honor. Foals by Electioneer, Piedmont, General Benton, Fallis, Clay and Bentonian, and again there was difficulty in awarding the premium when the merit, so far as could be predicated on form, was so nearly equal. The great-

est surprise was in the get of Clay. Rather on the chunky order himself, his progeny are not only of fine size, but rangy as well, and with so much similarity to those by Electioneer, that it was difficult to tell which were by the sire and which by the son. Our good friend Huntington will be positive that this double cross of Clay will bring the stars of Palo Alto, and we shall certainly not enter a protest at present. The old mare, Maid of Clay, has thrown a trotter every time, and in the first Clay, Captain Smith, Clay 2d, and Carrie C., can show a quartet that are hothersome to excel by any of the trotting matrons. We moved among the mares and foals too much interested to take notes if ever there had been time, so that beyond saying that we like the appearance of the Beautiful Bells better than any that has preceded it, that those of Lula and May Queen are very nearly at the top of the tree, and that the first filly that Columbine has had is fully as handsome as the hrothers were at the same age, will leave further description until there is time enough to mark peculiarities. In an adjoining paddock to where the mares were seen is the orphan foal of Midnight, under the care of a foster mother, and a stout shapely colt this more than half-brother to Jay-Eye-See is. As he is by Electioneer, and the sire of Jay-Eye-See having the same relationship to Rysdyk's Hambletonian, he is three-quarters the same blood as the crack five-year-old of the world. But in place of the short, compact horse the Eastern fellow is represented to be, this youngster gives indications of the reverse in shape, though with lots of muscle. We walk along the winter drive, on each side of which are paddocks, across the space which is surrounded by stables and the miniature tracks which are so important in the curriculum of Palo Alto. There is great extent of ground nicely coated with gravel, and it is kept as neatly as the walks of a city home. Not a straw, a piece of paper, a stone or clod to mar the surface. Not merely the gravelled space, every yard and paddock, though hidden from view, gives evidence of scrupulous neatness, and though this has always been a feature of the place, since Major Rathbone accepted the place of post commandant during the absence of Governor Stanford, it is still neater. There are spare minutes before dinner time, and these are employed in looking at a few of the celebrities. Hinda Rose is anxiously scanned, and there is not the least indication that the work which enabled her to trot in 2:36½ when a yearling, win her races as a two-year-old, and be the first discoverer of the teens when three has had any ill-effect. Her limbs are clean, the tendons standing out clearly out. There is not the least puffiness about the joints, no shrinking of muscles. More than that she has grown into a big mare, nearly sixteen hands and of great length of body. Altogether it would be difficult to find a handsomer or better-formed young mare, if the whole country were ransacked. Her brother, St. Bel is also very handsome, and then the sons of Lizzie Whippis and Annette, now four years old, show that the union of the thoroughbred blood has a potent effect in giving a heritage of good looks.

When Mr. Lathrop desires relaxation from the engrossing cares consequent upon the management of such an extensive and diversified business as that of Governor Stanford, or his presence is necessary at Palo Alto, he spends the time at a cottage on the other side of the creek from the trotting stables, one of the cosiest places imaginable. A "gem" of a place, with lawns, flowers, shrubbery, old oaks of huge proportion and the rapid brook singing a merry May song, and glistening through the interstices of the trees which nearly hide it from view. The cottage has been made still cosier by the addition of hay windows on every side, excepting the rear, and changes that add much to the comfort. There is a great temptation to lounge after the hearty dinner and enjoy the cigar, as the shadows are creeping up the hills on the far side of the hay. But every minute is precious, and in the field between the creek and the stables are fifty more mares with foals at their side ranging from a few hours to three weeks old. Excepting that the first which were seen are more rounded in form, some of them nearly ridden of their first woolly coat, which tells that their birth was early in the year, there is the same striking appearance, the same beauty, and the like general excellence. Celebrities everywhere, mares of high lineage and several of them with the additional recommendation of speed in their own right. There were the usual disquisitions in the office, when it became too dusky to distinguish the mares and foals, in which Mr. Lathrop, Major Rathbone, Marvin and McPherson took part, and after our return to the cottage the time was pleasantly passed in reminiscences of old times. Mr. Lathrop with his homo in Albany and frequent visits to New York has an intimate acquaintance with the men who drove, and the famous trotters from the days of Lady Suffolk and others of contemporary celebrity, to the cracks of the present. The following morning was as beautiful as can be imagined. Clear, sunshiny, the air bland and without a current to quiver the leaves on the trees. The flowers and

huds filled the atmosphere with fragrance, and the linnets and thrushes chirped and warbled among the dense foliage of the alders which fringe the stream. Early as it was Major Rathbone had driven from his place in Menlo Park, and the first business was to accompany him to the racing stables to see three of the two-year-olds have a spin of five furlongs. It must be nearly two miles from the trotting track to the race-course, and when the latter was reached the trio were all ready for the ploy. Mr. Walsh gave short instructions and they were off. We had selected a sister to Jou Jou to win, but a smoothly turned and rather undersized colt, by Flood, carried off the honors. The course was deep, and the instructions were to let them stride along without any hustling, and yet the run was made in 1:03. Back in a hurry to see the trotters. Fearful that Marvin would be done with Hinda Rose ere we got there, even the attractions of the equine aristocrats had to rank second, for the present at least; so we urged a speedy departure, and fortunately in time to see the queen of the three-year-olds come through the stretch. So easily she trotted, so swiftly she flew past, that we are constrained to prophesy that if the trial he made, that during the season of 1884 she will knock off a good handful of seconds from Bonita's mark. That may be the rashest of predictions, and still it is offered with as much confidence as though it were easy of accomplishment. Bonita, too, must not be forgotten. She trotted through the stretch so easily in thirty-three seconds, one furlong of it in sixteen seconds, and only then appearing to exert herself for a hundred yards, that there is no telling where she will end, or a flight of speed that is beyond her capacity. The two sons of Electioneer from Lizzie Whippis and Annette showed that good looks was not their only inheritance, and that the blood of Enquirer and Lexington was not detrimental to trotting speed. Either of them can trot a mile in from 2:30 to 2:32 whenever called upon, and this is what few of the trotting-hred, on both sides, can do when four years old. In further proof of the efficacy of thoroughbred in the trotters at Palo Alto, the fastest two-year-old there is a son of Electioneer and Dame Winnie by Planet, and only a short way behind is an Electioneer of the same age from Mamie C. by imported Hercules. Both have fine action, and there is little question that without mishaps they will be among the fastest. The Dame Winnie some time ago trotted quarters in :38, :37½ and :37; the Mamie C. a quarter in :38½. There are twenty two-year-olds in training at Palo Alto which can show quarters in forty seconds or better, and at this season of the year that is equivalent to very fast work in October, November and December. A telephonic message from Henry Walsh informs us that he is ready to move the Norfolk—Glendow filly, and again we accompany Major Rathbone to witness the run. Two gentlemen from Australia are of the party, and little time is wasted, as the horses are ready and the riders mounted when we get there. We are always somewhat chary in writing of what we see race-horses do. It is different with trotting colts, and the trainers are usually pleased to show their capacity knowing that it will be published. With the runners it is different, and indiscreet revelations oftentimes so interfere with the purposes of the stable as to be a serious drawback. The run was satisfactory, and there is no breach of confidence in predicting that this highly-bred filly is likely to make her mark in the future. There was more trotting when we returned. A two-year-old sister to Adair, "as handsome as a picture," went so well that the Dame Winnie will have to keep improving, and that speedily, too, or she will pass him in the race for the honors of being the fastest at Palo Alto. "Big-Ears" and Helen took a fraction out of the twenties, and that so easily that there is a good chance for either to press the teens closely before 1885 is ushered in. After lunch was eaten, with an appetite which only fresh air and plenty of exercise can give, once more we were under way for the race-horse region of Palo Alto, Major Rathbone as usual the guide. The horses in training were led out, and a finer lot of youngsters it would be difficult to find. A choice among them was troublesome to make, and the short time that could be given to the examination was far too brief to permit anything like critical comparison. From the stable to the field to see the mares and foals, and again there was a problem to solve that would necessitate hours of careful study. Few, indeed, that were not superior, and we were pleased to see that the get of Young Prince was up to the expectations we had formed some six years ago. The foals by him, from Glendow and Lady Ananda, have all the points of race-horses, and are of fine size. The Shamons and Floods are remarkably well shaped, and the few Moudays are likely to keep up the high reputation of their sire. The boys were bringing the yearlings in from the paddock, and we found them well worthy of encomiums. Uniformly good, some of them of high excellence, but as was written before, a cursory examination of a few hours is de-

cededly insufficient to give the slightest idea of the horses of Pala Alto. One hundred and thirty foals have been dropped there this spring, and on the place are over six hundred horses besides those which are used for work. It is manifest that with a full week allotted to the examination, there still will be a lack of time to obtain information sufficient to give a full description, and that even in these bright midsummer days every hour of daylight could be fully employed in taking notes. We were anxious to see the "arhoretum," and Major Rathbone kindly acted as chaperone, and drove through the carriage ways and all around explaining and describing *en passant*. In another part of this paper will be found a description of that part of the trip which was written for the *Daily Morning Call*, from which it is copied. To that we may add the hope that among other branches of study there will be a chair of veterinary science. For the present, if there were a preparatory school where pupils, who are designed for a life connected with breeding and rearing domestic animals, can obtain a knowledge of the best method of management in health and sickness, and those who intend to follow veterinary practice can lay the foundation to be perfected by a course of collegiate study.

### The Approaching Circuit.

In the ten years we have lived in California there has never been so good a prospect for the fall fairs as there is in this good year of A. D. 1884. Notwithstanding the turmoil and excitement of a presidential election there are sound reasons to warrant the prediction that everyone will be a success, and that from every point of view. Good crops of all kinds, with a prospect of fair prices, more good stock of all breeds, and a better appreciation of the advantages to be derived from active participation, warrant the rosier estimates of what is to come. But it is important that these bright prospects are not dimmed by adverse management, and one of the questions which bear is that of arranging the dates so that there will be as little clashing as possible. That some will conflict in spite of all that can be done to avoid collision is evident, though, by taking pains that when the dates are the same it shall be at distant points, there will be the minimum of injury. Thus, say the initial meeting of the circuit is held at Santa Cruz, then Bay District, Santa Rosa, Petaluma, Oakland, Sacramento, Stockton, San Jose, Los Angeles. Chico and Marysville will probably conflict with Petaluma and Oakland, as was the case last year, and Quincy, Salinas and others with later meetings. But there are so many horses now in training; and so much improved stock in all parts of the country, that there can be a division of forces without entailing any serious drawback. That is when so many miles intervene, but if the clashing should be between San Francisco or Oakland, and Santa Rosa or Petaluma, the effect will be disastrous. The fair at Santa Cruz should be held when there is the largest attendance of summer visitors. This is of more importance than the ripening of fruits and perfection of vegetable display. As the Bay District meeting will be confined to a speed programme, the major matters to take into consideration are how to secure the largest number of entries, and racing and trotting that will ensure the largest attendance. Santa Rosa has to anticipate the best time for holding the fair, and in order not to trench on dates that are allowed to others, give away the advantages that would follow a later period. There are other questions to be decided, such as classification, time of closing the entrance, etc., and it strikes us that a meeting of the presidents of the various associations for consultation would be a wise measure.

### Fresno Meeting.

All of those who attended the meeting at Fresno from this section have returned with high encomiums on their lips. The people, the course, and all pertaining to the new track are warmly eulogized, and the owners of horses unanimously declare that they will not miss future events. It is rare that an initial fair or race and trotting meeting goes off so smoothly as that at Fresno, and the success of the first endeavor is a bright token that those which follow will be still more satisfactory. The intention now is to hold the fall meeting after the close of the San Jose fair, and before that of the Southern District at Los Angeles. This will be a great benefit to the latter place, and if the citizens of San Diego complete their plans there will be still stronger inducements for the horses from this and the northern part of the State to make the southern trip. We learn from Captain George A. Johnston that a course will soon be built at San Diego, and the necessary buildings erected for a first-class exhibition, and that the preliminary steps have been taken to effect the purpose. Fresno, Los Angeles and San Diego can take up the ball and keep it rolling after the weather is unpropitious here, and then there is another attraction to many of those who own horses in having the choice of wintering in a more favorable climate than that of central and northern California.

The Santa Cruz County Agricultural Fair Association are preparing a programme for their annual meeting, and claim the dates from August 12th to 16th inclusive.

### The Agricultural Department.

Such has been the favor with which the idea of a department of agriculture has been received that it is almost a certainty that it will be ratified by the Convention at Stockton, and men chosen for delegates to Chicago who are identified with the interests at stake. While it is not a party issue in any respect, the party which adopts it as one of the "planks" in the "platform" adopted will certainly gain strength. It is a measure which every democrat, every republican farmer, can support, and is of more vital importance to the agriculturist, fruit-producer, vineyardist and wine-maker than any other issue at present debated. In all probability ninety-five per cent. of the classes mentioned are in favor of revision of the tariff, and so far as we can determine there is a unanimity of opinion among California producers which is not confined to either of the great parties. So far, whenever the question of a tariff is under discussion, those who form by far the largest class of American people are not taken into consideration at all. This will be changed when there is established a department of the government to look after the interests of the farmer, with a man at the head of it who will have broader views than to publish periodically a volume which is mainly a transcript of what appears in the agricultural journals, and who will have a higher ambition than the disseminating of seeds and the propagation of flowers to ornament the political highways at Washington.

There is a wide field for a man of ability in a position such as is contemplated, and his services sure to be of great value to the people he is chosen to represent. There is not a political question that farmers have not a large interest in, and in most of them an interest that overshadows that of all other classes. This is overlooked from the segregation which farm life entails. Scattered over the states and territories even in thickly settled countries, they are still separate, seldom congregated and then not in a position to council with each other about affairs other than something pertaining to their daily life. It was thought that the Grange would remedy this evil, but while it has wielded a potent influence it has been more of a sort of a co-operative union for immediate pecuniary benefit than a broad instructor. Manufacturers, merchants, financiers, railway managers, etc., are in compact hodies. Those who have the most influence are congregated in large cities, and there is concert of action whenever it is necessary to "protect" the business they are engaged in. Behind them is the immense power of consolidated money. Money gathered from the actual producers, those who create it from the soil, dig it from the mines, or who fashion the crude material into serviceable shape. When farmers—and by farmers we mean everyone who is engaged in obtaining a livelihood from the soil—become impressed with the greater importance of combined action, with the object of bettering their condition, than blindly sticking to party affiliation, when they resolve to assert their right to fitting representation in the councils of the nation in lieu of delegating the power to men who know little of what their wants are, and care less, after they have duped them into casting their votes; when, in fact, they are as independent as they should be, masters in place of servants, there will be no trouble in compelling favorable legislation. When this course is adopted it will be better for the whole people. An independent body, a phalanx of voters who are untrammelled in their actions, who are not to be coerced by party whips, who resolutely determine not to be controlled by party discipline, but at all times vote for measures, and men who will carry them out irrespective of the side which presents them. The recognition of the rights of the great hulk of the American people, so far as making more effective the department which will sustain them, is a moderate request which no party can safely refuse to grant.

### Bay District Meeting.

There is a general fear of a record among those who control the trotters of this coast. A least there is a dread of figures which are likely to make the fall tasks harder, and until the date of closing of entries to the fairs, there will be reluctance and a disposition to avoid the risks. This was the trouble which came in the way of the purses offered by the Bay District Association, and only two of them "filled." Those were the 2:24 and the 2:40. The 2:24 will be trotted June 7th, a week from to-day, and the 2:40, June 11th, the Wednesday following. For the following Saturday, June 14th, a purse of \$750 is offered for the 2:22 class, the entries to which will close on the 7th. There is little danger that any further disqualification will result from this, for, though Manon, Albert W., Allan Roy and others which are likely to take part, are of the improving kind, it is too early in the season yet for them to be in condition to show a reduction of previous records. The list of entries in the purses which filled has not come to hand, but we understand that in such are horses that are so closely matched that there is likely to be a sharp struggle of many heats before the winner is garlanded.

### The Oakland Trotting Park.

Our readers may think that we are somewhat too persistent in urging the purchase of the Oakland Trotting Park, but being so thoroughly impressed with its importance to the breeding interests of California, cannot do otherwise than urgently press the accomplishment of the project. As a safe and profitable investment there is no question. The land, without a board upon it, is at the present day worth more, by fifty per cent, than the amount asked, and in ten years from now will be worth treble the money. As was shown in a previous article the property can be rented so as to pay interest, taxes, and leave a margin for yearly improvements, and a payment of \$25 per share he all that will ever be required. No one disputes the soundness of the purchase financially, and if those who have money to invest will take the trouble to investigate they will find an opportunity which is rarely met. But there are other grounds to induce subscriptions to the capital stock. It is conceded to be one of the best points in California for training race-horses and trotters, and the advantages offered for fairs and race meetings cannot be surpassed. With the track broke up a great many horses will be thrown out of training, and without the incitement of meetings and fairs in a place so accessible, there will be fewer to compete at those which are held in other places.

Should the Bay District Course be thrown into the market, which is not at all unlikely, and without a track in Oakland, the entries at the State and District fairs will be reduced at least one-half. There will, in that case, be scarcely any demand for trotting-horses in San Francisco, for if there were roads even to drive them upon without tracks to test the speed, and measure it with accuracy, the greater incentive to ownership of harness-flyers would be wanting.

It is of nearly equal importance that the Oakland track be kept up if the Bay District, or some Course, be in active operation in San Francisco. "Two are better than one" in this case, there being greater interest in the meeting of horses which are trained on different tracks than when confined to one. When kept together their relative capacity is well known, when apart there is the element of uncertainty which is the potent attraction in racing and trotting.

The bond which is in the hands of Sheriff McLevery expires on the first of July. Should the conditions not be fulfilled by that time it is nearly certain that the property cannot be obtained without paying a much larger price, and should this scheme fail there will never be such a chance again. Ninety days will soon pass, and though the time is ample, if those who are the most interested will take hold of it energetically, dilatoriness will surely defeat the object. We hope in the paper of next week to report that stock enough has been taken to ensure success, and that by the 20th of June it has all been subscribed for.

### Mr. Winters' Coming Sale.

We publish with sorrowful feelings the advertisement which announces that Theodore Winters, on the 17th of July next, will offer at public sale a lot of yearlings, and two-years-old and over of his horses in training. There are regrets that the man who has been the most closely identified with the California turf for upward of twenty years should give up active participation, and who enjoyed the confidence of the public in the highest degree. Liberal in everything connected with it, straightforward and enterprising, he has been the life of the royal sport, keeping it up when it was languishing, and but for his endeavors there are strong probabilities that it would have come to an inglorious end. It is different now. He has labored effectively, and there are others who will carry on the work in the same spirit, and while his retirement a few years ago would have been a death-blow, it will not be so disastrous at present, when it is left in the hands of gentlemen who are all that can be desired to give the turf as high standing as it has in any country. Mr. Winters has contemplated giving up racing for some time, and confine his attentions in this line to breeding. The tendency is to separate the two branches of breeding and racing, and while men like Lord Falmouth and the proprietor of Rancho del Rio are missed, leaving a gap that is difficult to fill, there are counteracting advantages. As long as a large breeder races his colts there are doubts, when he offers a portion of them for sale, whether they are worth purchasing, especially if of an age that gives the opportunity for trials. When all the progeny are sold at public sale, especially when yearlings, there cannot be any misgivings, the buyers selecting what they want and fixing the price themselves. That the approaching sale will give buyers a chance to get as good as there is is certain, and hereafter we will give a full description of the animals embraced in the list.

The thoroughbred horse Stylites by Hermit, dam Corinba by Kingston, from Calceavella by Birdcatcher, arrived in New York from England on the 21st, and began his American career by winning the first prize in the National Horse Show just one week after he landed. Stylites is eight years old and is owned by the Earl of Aylesford.

## STABLE AND PADDOCK.

### Hay for Horses—Quality and Quantity.

By N. H. Paaren, M. D., Ill., State Veterinarian.

Hay, for horses especially, needs to be of the very best quality. Nineteen out of twenty cases of broken wind result from the effects of bad hay. But even if good hay, upon the proper or improper qualities almost depend the eventual life or death of the horse. While the effect of feeding oats—being light, thick—skins or tails, provided they are perfectly sweet—the result may be frustrated by increased quantity, but if hay is not nutritious, being of much greater bulk, increased quantity is merely filling the animal with what does him no good and may do a great deal of mischief by its bulk.

We have been frequently surprised at seeing many men, who were careful in other far less material points of their horses, careless, in an extraordinary degree, in this most essential one, namely, the quality of their hay. Nothing should induce me to permit a horse to eat a pound of bad hay; or, for a continued feed, any but hay that is not of the sweetest and primest quality. It is the first thing we look after in going into a stable, if we have a horse with us. We have visited friends who grew their own hay, and on remarking that it was not quite the thing, have been told, "No, it got a little wet in making; or, it hested and moulded a little in the rack;" and this by men who kept good horses. So, because they grew it, their horses must eat it. But even otherwise good managers of horses sometimes err as to what is the very best quality. The first indication of its goodness is, no doubt, its fragrant smell; but even this may be deceptive; for we have seen hay very fragrant to the smell that had been heated too much to be good for horses. They may like it, and some say it fattens them, but we suspect its fattening quality arises chiefly from their being allowed to eat a great deal of it. For fast horses (bad winded ones included) this great desideratum is to get into them the greatest possible quantity of nourishment in the least possible compass, and the most nutritious of its kind.

The age of hay is important. Some fancy hay cannot be too old. This is erroneous; for, however good the hay may be, age will lessen its nutritious qualities. Fresh, new hay is by no means proper for horses in work, but a little, even of this, as an alternative, is by no means a bad thing. Hay two years old is quite old enough for any horse. That cut in July is cured enough by September of the following year; in fact, we would prefer it to that any older. Two years after cutting, hay is old enough for any race-horse. Every day after this it deteriorates in its nourishing qualities.

Hay varies with the soils and seasons. In very dry summers the same weight of any green food will be much more nourishing than in a dripping season. So, likewise, any fodder raised on a rich, dry soil will be much more nourishing than that from a poor, wet one. The standard of comparison is the best upland meadow hay, cut as the flower expands, and properly made and stacked, without much heating. One hundred pounds of the best is equal to 120 pounds of a second quality to keep the same stock, or 140 pounds of a third quality, and so on, down to very coarse and hard hay, not well made, which will be scarcely half as valuable, and not fit for cows and stork cattle, even when given in double quantity. While good hay alone will fatten cattle, inferior hay requires other foods connected with it. The desire for quantity, or appetite, results from habit; for a keen relish for what is eaten is a sign of health; eating enormous quantities is sometimes the result of disease. A fair quantity of good hay is a much better thing in a horse's stomach than wind; and if we do not give enough of the former for the stomach to feed upon, it is certain to get filled with the latter, which often leads to direful inconveniences, and, indeed, danger. The daily quantity of hay allowed to each horse must vary with its quality, and the work. If grain be limited, the horse will eat a greater weight of poor hay than of that more nutritious. If it be damaged, he must consume more than if sound; for some is rejected, perhaps half, and eaten, furnishes less nutriment. For speed there should be little distension of belly. Eight pounds of good hay in the twenty-four hours is about the usual allowance for fast-working horses, with 12 to 18 pounds of oats. Large draft-horses will consume 20 to 30 pounds, but for them the quantity is seldom limited. Much, however, depends upon the allowance of grain. When given uncut, hay should be shaken before feeding.

As to giving cut hay without ground feed to mix with it, it is not absolutely necessary to grind feed. By mixing cut hay with whole grain, the mastication of the hay is better insured. Many horses swallow their food in great haste, and if large, this is dangerous. The stomach is filled, overloaded, before it acts upon its contents. The food ferments, and the horse takes colic, which is often fatal. By adding cut hay to grain, the horse must take more time to eat it. Satiety takes place before the stomach is overloaded, and time is given for digestion to begin before fermentation can occur. In this way chaff is very useful, especially where the horse receives large meals after long fasts.

For old horses, having bad teeth, and for those at work all day, food easily eaten gives more time, for with long hay the horse's teeth do work that is done by the chaffing machine. Horses having bad teeth, particularly heavy draft-horses, seldom eat a large allowance of fodder. Their jaws tire before appetite is satisfied. Such horses, except when out of work, should have ground feed and cut hay. At first they may not eat it less heartily, but in general this happens only for a short time.

### Care of a Stallion.

M. T. Gratian, in answer to a correspondent, contributes to the *Breeders' Gazette* the following hints on the care of stallions during the season:

From one to three mares per day has been my practice, depending upon age, condition and vigor of the stallion. Naturally there will be days of rest from stud service, which would render needless the alteration mentioned. As to feed, good oats, clean hay, plenty of green grass, and no drugs, eggs or condiments should be the rule. I used to be shy of grass because wise grooms said horses would be slow that had much of it. I have not found them so, but have found that it increases a stallion's percentage of colts. I have never had a stallion that I could not grass-out with a halter, attaching a long strap. After the grass is high enough to mow it can be cut and fed, but even then I prefer the other method, and grassing-out early to give their feet the benefit of the dew.

A stallion should have a good-sized paddock to run in, or else be driven every day the weather is good. During the season I prefer the paddock if a horse is not too sluggish to exercise himself. A state of nature as near as it can be attained agrees best with the highest results to be attained from the procreative powers. I would not confine even a draft stallion to the exercise of a box-stall. My limit with a stallion of the age named, if in good health, is seventy-five

mares, but many of them will have to be served more than once. With a limit of two services per day three months is ample time to get through with that number if in this main easy breeders.

Young mares often stick with a first service; indeed at my establishment that is the rule, and it is waste-work to open them until they have proven the need of it.

Where a stallion serves two mares a day most breeders prefer to give him out in the morning and one in the evening. My choice is to breed both mares in the morning. Sometimes a double service will be required for a shy breeder. In this case the second service should be given as quickly as the horse is ready.

### Volunteer and His 2:30 Representatives.

Among the many sons of Rysdyk's Hambletonian that have gained merited prominence as sires of trotters Volunteer stands pre-eminent, and for the last half-dozen years has been considered second only to his sire as the representative stallion of the family to which he belongs. With twenty-three of his get in the 2:30 list—fifteen of these with records better than 2:25, five with faster records than 2:20 and one with a record of 2:11—it is not strange that this position has been given Volunteer in the estimation both of horsemen and the general public. Of the sterling qualities of his sons and daughters as race-horses there can not be the slightest question, and for years it has been a universally admitted fact that the Volunteers are, as a rule, as game a family of trotters as any of which we have knowledge.

Of the early history of Volunteer it is not necessary to speak at length in this connection. That he was overshadowed during the first portion of his stud career by the fame and prestige of his sire is well known, and the prejudice which then existed against him on account of the thoroughbred inherited through his dam had much to do with the undoubted ostracism to which for a time he was subjected by breeders. But when his sons and daughters began showing on the race-tracks of the country the material of which they were made, this prejudice was quickly dissipated, and for the past fifteen years no horse has been held in higher esteem or received a more generous patronage from the general public than Volunteer.

The fastest of his get, as is well known, is St. Julien, 2:11, whose dam was Flora by Sayre's Harry Clay, and in this connection it should be noted that it is with mares of the Clay and American Star families that Volunteer has achieved his best results. From the dam of St. Julien alone there have come, besides that horse, Unalala, 2:22, and that was a first-class two-mile horse, and St. Remo, 2:28, a horse that should really have obtained a faster record than is now to his credit. St. Julien's performances would of themselves have been sufficient to have given Volunteer marked prominence among trotting sires, but while they have been exceptionally good it is not upon them alone that the fame of his sire is called upon to rest. Gloster, 2:17, was undoubtedly one of our very best trotters, and it was a pity indeed when he was shipped to California only to die there before being given a chance to show the world the full extent of the speed possessed by him, as well as that which would have been developed with increasing age and under the tutelage of so skillful a trainer as Budd Doble. Gloster was a horse of exceptional size and bone, and when he obtained his record of 2:17 at eight years old was not by any means filled out, and developed as he would have been two or three years later. Bodine, 2:19, that was out of a mare by Sayre's Harry Clay, was another good one, and in 1874, '75 and '76 ranked among the very best horses then on the turf. When Peter Johnston took him in hand in 1874 Bodine was anything but a promising specimen of horse-flesh. He had a record of about 2:30, which he was not at that time able to beat; was not a particularly good-gaited horse behind, and possessed a temper that did not in any manner enhance his prospects. By careful management and the exercise of that judgment which never leaves him, Johnston made Bodine a first-class horse in every respect, and in 1876, when he trotted in the free-for-all race through the Central Circuit against Goldsmith Maid, Smangler, Lucille Goldust, and Judge Fullerton, he was the only one of the entire party that took part in all of the seven races from Cleveland to Springfield, and in no one of them did he fail to get a portion of the purse. That year Bodine could trot his mile better than 2:18, but being outclassed by Smangler and the Maid it was not possible for him to win even a single heat in the long journey from the lakes to the sea. But he would have been a better horse the following year is not to be doubted had the best of judgment been used in his management by the gentleman who owned him, but after returning to Chicago from the arduous campaign referred to a foolish attempt to equal the 2:21 of Dexter, drawing a wagon and driver of the weight of 415 pounds was made, and directly after this, and before the horse had been given any chance to recover from the severe ordeal he had already undergone, Bodine was shipped to Cincinnati and started in a race against Rarus and other horses. Of course he was beaten, and from that time never seemed to be himself again, although in California the following winter he trotted a good wagon-race against Sam Purdy. Budd Doble, in whose hands he had been placed, brought him east during the spring of 1877, but in a race against Little Fred at Dexter Park in this city, he developed a lameness which necessitated his withdrawal from training, and prevented him from again appearing on the turf.

Alley and Driver, whose records are 2:19 and 2:19, respectively, were a pair of Volunteer's best. Bred by the owner of the sire and campaigned by him for many seasons, they never failed to make a respectable showing in the races in which they were engaged, and the number of victories placed to their credit is exceedingly large. Driver especially, was a horse of immense constitution—one of the steel-and-whalebone kind that seem to never go wrong and that trot on season after season until old age forces their retirement. Of Amy and Huntress, with records of 2:20 and 2:20, not much need be said, as their performances speak for themselves. In these days Amy would not be considered a first-class campaigner, as her uncertain temper manifested itself at such critical times that comparatively few races fell to her credit, and the immense turn of speed which she possessed could rarely be utilized. She was a strongly injured mare, being out of Belle Brandon (the dam of Governor Sprague) by Rysdyk's Hambletonian; and with these blood lines it is difficult to propound a theory which shall explain her erratic nature. Huntress will be remembered more for her three-mile record than that made by her at a mile, she trotting three miles at Prospect Park, Brooklyn, N. Y., in September, 1872, in 7:21, which still stands as the best performance on record at that distance; and it is doubtful if there are many horses possessing no more speed than she did that could equal her three miles.

Powers, 2:21, was another good one, and although a patched-up horse, was always dangerous in any race in which he engaged; and that it was within his power to beat 2:20 horsemen are well aware.

Of the other members of the Volunteer family that have been 2:30 it is not necessary to write in detail, as most of them are well-known and many are still before the public, but a word should be said as to the work accomplished by the sons of Volunteer as sires, and when viewed from this standpoint, it cannot be said that Volunteer is a success, as with very few exceptions his descendants in the stud have not exhibited a capacity for siring speed, even though they may have been fast at the trotting gait themselves. It did not take breeders long to discover this fact, and for years persons in search of a suitable horse to place at the head of a stock farm have not as a rule selected one with a strong infusion of Volunteer blood. Other sons of Hambletonian have transmitted speed at the trotting gait with great uniformity, and their sons have perpetuated this trait, but in the case of Volunteer this cannot truthfully be said.—*Breeders' Gazette*.

### Caring for Colts.

In order to have a colt come out really a strong, sturdy animal, particular attention must be paid to his growth during the first summer and autumn. If the mare's milk is insufficient to keep the colt in good flesh and thriving steadily, it is best to resort at once to cow's milk. Skimmed milk answers very well for this purpose, especially if a little flax seed jelly oil or cotton seed meal is mixed with it. A heaped tablespoonful night and morning is enough to begin with, when the colt is a month old—this can be gradually increased to a pint per day by the time the colt is six months old, or double this if the colt is of the large farm or cart horse breed. Oats may also be given as soon as they can be eaten. Begin with a half pint night and morning, and gradually increase according to the age and size of the animal to four quarts per day. These, together with the meal above, should be supplemented with a couple of quarts of wheat bran night and morning. The latter is excellent to prevent worms and help to keep the bowels in good condition.

Colts should not be permitted to stand on a plank, cement, paved or any hard floor the first year, as these are liable to injuriously affect the feet and legs. Unless the yard where the colts run in the winter has a sandy or fine, dry, gravelly soil, it should be well littered so as to keep their feet dry. Mud or soft, wetish ground is apt to make tender hoofs, no matter how well-bred the colt may be. The reason why the horses in one district grow up superior to those in another in hoof, bone, muscle, and action, is because it has a dry limestone or silicious soil. When the work season comes in the hot days of summer, do not let this colt run with its dam from morning until night, and when the mare comes home from her work heated, allow her to cool off before suckling the colt, or milk out a little with your hand, as her overheated milk is liable to give the colt diarrhoea.—*Farming World*.

## HERD AND SWINE.

### Dairy vs. Creamery Butter.

A Kansas farmer, writing to the *Cincinnati Farming World*, plants himself squarely in opposition to this creamery boom in this wise:

I have long been annoyed at the lethargy of the dairymen of the United States in allowing the creamery men to monopolize the butter interests of our markets. While the dairies have been plodding along in the old quiet way, the creamery has been exalted and advertised and pushed to the front. Now, every good dairyman knows that dairy butter, properly made, is much nicer and better than that made at the creameries. But like every new thing, the creamery butter had a boom which sent it away ahead in the markets. Oleomargarine, butterine and cheap roll stuff shipped from country stores have all been sold as dairy butter, and are always quoted in the papers as dairy butter, and hence purchasers have become prejudiced against the real dairy butter. Now, I know for a fact that a neat, clean dairy, with a competent home butter-maker, will produce a superior article to that of creameries. Two years ago the creamery boom struck our county seat and they said they would soon supersede the dairies here. I told the proprietor we could make a better article and would sell it for a higher price in the same town. I let my customers first try his butter, then I took mine to them, and continued to furnish them at two cents per pound more than he could get anywhere in the same time. Others seeing my success, did the same, and in three months the creamery was "bushed." We could put our butter in pails five to ten pounds each, and ship to Denver and get ten cents per pound more than he could. Now this is the way to do it: Get small pails, make a good, even grade of butter, put your name and the name of your dairy on each pail, and ship to some reliable commission merchant on trial. In a few weeks, if you produce a really meritorious article, there will be a demand for all you can produce, and it will pay, too. I admit there is less work in selling your cream, but claim that the farmer has to pay too much to have the butter made up in that way. While some of my neighbors were selling their cream at twelve to fifteen cents per inch (pound), I was getting twenty to twenty-five cents per pound for my butter in a home market. I made it pay for all the extra work. The value of the buttermilk alone will pay the expense of churning. If the farmers of the country would study the "art" of butter making and not be afraid to advertise their product, they will soon see that there will be a demand for all they can produce at good, remunerative prices.

Cream from unsound milk, cream that has been long in rising, cream that has been kept too long after skimming—none of these can be made into first-rate butter by any skill in churning or after treatment. But good cream will give pale and spongy butter if churned at too high a temperature. Butter will come all the way up to seventy degrees, and even a little higher in winter, but it will be poor; and, further than this, if cream is churned six or eight hours and the butter has not come because the cream is imperfect, or the temperature is wrong, though the temperature may then be rectified and the butter brought, the product will be inferior in color, texture, or flavor, and generally in all three. It has been so hurt by overchurning that it can never be restored to anything like excellence.—*Mirror and Farmer*.

When a cow learns the trick of sucking herself she is rarely cured. The habit may be prevented by putting a girdle around the cow and a halter on her head, and fitting a wooden rod from a ring in the girdle to another in the halter, making it pass between the forelegs. She cannot then get her head around to her side. But generally it is best to fatten such a troublesome cow for the butcher.

**Cause and Effect.**

No business man should make a change in his policy or management without good reasons therefor, and this certainly applies to the farmer as much as to any one else. The introduction of improved machinery, improved stock and improved methods, and the adoption of advanced ideas in agriculture, should be preceded by reflection and grounded on business principles. To make changes of this kind simply because it is fashionable to do so, and not on grounds which in themselves are clearly defensible and reasonable, to say the least of it, very foolish, and beneath the dignity of the first and most important pursuit in which men are engaged. The thinking man, however, needs to make but a short search indeed, in order to fortify with the best reasons a policy aimed at securing better farm animals, better farm tools, and better farm improvements of all kinds. The reasoning is as clear as logic can make it, and the conclusion is as direct as that two and two make four. One need not hunt long, for instance, for sufficient grounds for buying improved stock for the purpose of elevating the standard of quality in his farm animals. The more closely he investigates the subject the more the thoughtful man is convinced that this is the one advisable course before him. In the first place, the ownership is in itself a matter of satisfaction, and while more important interests must not be sacrificed in order to cater to one's preferences, it is, nevertheless, much better to be working with something which one can admire and appreciate for its own sake than to give his care to stock for the keeping of which the money return is the only incentive. A point hinging on this one is that one will naturally make more effort to be successful with good stock than with something in which he can feel no pride. Having more money invested, he feels the necessity of increased effort to get a money return from it, and will be the better herdsman or flockmaster for having his stock elevated in his own estimation by its enhanced cost. It is well understood that the risks of stock-raising are largely obviated by the infusion of improved blood. He who produces something good always has a market, and, under ordinary circumstances, does not have to hunt a customer. The extremes of depression always fall most lightly on the man who is conscious of placing a first-class article before the public. In short, it pays, on all accounts, to have the best. With a fair opportunity the owner of high-class stock, with a sufficient knowledge of his business to manage it judiciously, never finds himself in a succession of years working without a reasonable return for his investment and labor. This has been so constantly demonstrated in agricultural experience that the farmer of to-day may class it among the axioms of his calling.—*Stockman.*

**Milk Fever in Cows.**

[The following practical information is from Mr. O. M. Tinkham, Secretary of the Vermont State Dairymen's Association.]

The animal is usually attacked with milk fever within 36 hours after dropping her calf, and unless relieved will probably be dead in 48 hours more. The deepest milkers and cows in high condition are more subject to it than those in poor flesh. The cause is the pressure of blood on the brain consequent on the increased amount in the circulation, forced to seek new channels by the expulsion of the calf. The symptoms are a sudden and entire ceasing of the flow of milk, the eyes become bloodshot, she loses all interest in her calf and all care for it, lies down and can be aroused with difficulty, loses all power of motion, and death ensues. Sometimes these symptoms are varied by violent mania, the cow being crazy, running against walls or other obstacles with entire carelessness.

Prevention is the first thing to be looked after. This can usually be secured by keeping the animal in a low condition. The bowels should be kept open by the use of roots, bran, and, if necessary, mild cathartics. For several weeks before calving the meal should be taken away if the cow is in full flesh, and rich foods avoided. Where the danger is considered great, bleeding may be resorted to soon after the calf is dropped.

After the attack, the only remedy which has been found tolerably sure is bleeding. I have never lost a case where bleeding could be done, but in advanced stages the blood is thick and dark and will not flow. In bleeding, cord the neck of the animal tightly well down toward the shoulder, when the vein will fill above the cord and show distinctly. Over this the fleam should be held and given a sharp blow with a stick to make the opening into the vein. The bleeding should be copious, and the blood he caught in some vessel so to be sure how much is taken, as a little blood makes a great show if left to flow on the ground. Two-thirds of a common pailful, six or eight quarts, should be taken; if bled till they stagger, it will do no harm. The head should be showered with cold water or bags of ice applied to it. Move the bowels by physic—a drachm of calomel or a dose of epsom salts.

**Management of Hogs.**

The only safe way to manage a lot of hogs is to keep off disease. Don't wait for cholera and then trust to drugs. Keep your hogs away from muddy feed lots; keep them out of wet heds and don't let them neat or pile up in beds of dust. There is no bog that

"Does not know his own, his native bed," and one of the best things we farmers can do is to destroy the "Hog bed" very often. Change your hogs from one lot to another as often as possible. If there are symptoms of disease or loss of appetite, coughing, etc., be sure to change your hogs even though you put them in your yard or garden. Now, if there is no improvement, stop your hogs from the water thirty-six hours, and at once reduce your feed to one-fourth the usual allowance. Then, your hogs being both thirsty and hungry, give every one hundred hogs ten pounds of sulphur, three ponnada of coperas (pulverized), three pounds of Spaulsb brown, one-quart of salt, four ounces of black antimony, seventy-five pounds of ship stuff, one table-spoonful of concentrated lye thoroughly dissolved.

Make a barrel full of slop, stir it well, and let your hogs to it. It is well to divide the bogs into two or three gangs and give them 'this slop separately so that all get it. After this, put your hogs in a clean pasture with pure water. Change diet frequently and keep before them a trough of the above mixture, omitting lye, antimony and ship stuff. In the place of these put two or three bushels of asbes and one-half hushel of salt instead of a quart.

Take your hogs that cough out of the drove and keep them away. In a week kill all that have not improved. The rest will live and do well.

Carbolic soap liberally applied two or three times, at intervals of as many days, will, it is claimed, entirely destroy lice on hogs. It is also a good plan to mix a little sulphur with their feed at the same time.

**Packing Butter in Crocks.**

The partial loss of a crock of our own best butter the past season or, what was about the same, the loss of its flavor and the consequent old taste, has led to the looking into the matter, and the supposed perfect glazing of the crock was found to be pierced with a great number of most minute holes, the result in some way of the humming. This let the air into the mass of butter, or, what was worse, the inside material of the crock simply acted as a sponge, and the finer aromatic oils of the butter were absorbed through these minute holes into the clay, and the outside layer of butter was ruined, leaving but a core of butter in the center of the crock. No poorer article was ever invented in which to pack butter than a poor crock, one either imperfectly glazed or a "second" that contains cracks, "histers," or sealed off places. When the glazing is perfect, or glass-like, absorption can not take place, but unless it is perfect there is a great liability of a loss in aroma and texture, and what was put down as yellow butter will be taken up with edges bleached out and the flavor gone. If a broken crock is to be examined it will be found that the glazing at best is not thicker than a film, and might be easily destroyed by the action of the oil and the acids of which butter is composed. The genuine stone crock with its glazing of glass makes a perfect package of butter, but the common clay crock, with its salt wash, or vitreous glaze, is often a delusion in butter-keeping; but what consumer ever thought that it was the crock itself that worked the damage and charged it to the cause?—*Cleveland Herald.*

**STALLIONS THOROUGHbred.**

**The Thoroughbred Stallion**

**WILDIDLE.**

By imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:42), at two years old, May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal. Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, Owner, or  
W. L. APPLEBY, Supt.,  
Santa Clara, Cal.

P. O. Box 223.

**STALLIONS**

—AT—

**RANCHO DEL PASO.**

For the Season of 1884.

Thoroughbreds.

**LONGFIELD.**

Chestnut horse, by MONARCHIST, he by Lexington. First dam, Dame Gourlay (Blue Gown), by Planet. Second dam, Flora G., by Lexington. Third dam, Fanny G., by imp. Margrave. Fourth dam, Lances, by Lance. Fifth dam, Aurora, by Aratus. Sixth dam, Paragon, by imp. Buzzard. Seventh dam, Indiana, by Columbus (son of imp. Pantaloon). Eighth dam, Jane Hunt, by Hampton's Paragon. Ninth dam, Moll, by imp. Figure. Tenth dam, Slamerkin, by imp. Wildair. Eleventh dam, imp. Cub Mare, by Cub. Twelfth dam, Aramantus' dam, by Second. Thirteenth dam, by Starling. Fourteenth dam, by Croft's Partner. Fifteenth dam, by Greyhound. At \$50 the season, due at the time of service.

**JIM BROWNE.**

Chestnut horse, by FOSTER, he by Lexington. First dam, Flush, by Hiawatha. Second dam, Fanny Bugg, by imp. Ambassador. Third dam, Ida, by imp. Belschazzar. Fourth dam, Madame Bosley, by Sir Richard Tonson. Fifth dam, Nancy Nichol, by imp. Eagle. Sixth dam, Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Sterling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by Jolly Roger. Twelfth dam, by imp. Partner. Thirteenth dam, imp. Monkey. Fourteenth dam, an imp. mare from the stud of Harrison of Bracon. At \$50 the season, due at time of service.

**Trotting Stallions.**

**ECHO.**

Bay horse, by RYSDYK'S HAMBLETONIAN. First dam, Fanny Felter, by Magnolia, son of Seely's American Star. Second dam, by Webber's Kentucky Whip. Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of imp. Messenger. At \$100 the season, due at time of service.

**ALGONA.**

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian. First dam, Emma Kinkead, by Conscript, son of Cassius M. Clay. Second dam, Effie Dean, by Mambrino Chief. Third dam, by Powell's Bertrand, son of Bertrand, by Sir Araby. At \$100 the season, due at time of service.

**ALASKA.**

Brown horse, by ELECTIONEER. First dam, by Washington, he by Geo. M. Patchen. Second dam, by Williamson's Belmont. At \$50 the season, due at time of service.

The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents.

John Mackey, Superintendent,  
Sacramento, Cal.

**THOROUGHbred STALLION**

**X X.**

**Pedigree.**

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM. First dam, Columbia, by imported Bonnie Scotland. Second dam, Young Fashion, by imported Monarch. Third dam, Fashion, by imported Trustee. Fourth dam, Bonnets of Blue, by Sir Charles. Fifth dam, Reality, by Sir Arby. Sixth dam, by imported Meily. Seventh dam, by imported Centinel. Eighth dam, by Mark Anthony. Ninth dam, by imported Janus. Tenth dam, by imported Monkey. Eleventh dam, by imported Silvereye. Twelfth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

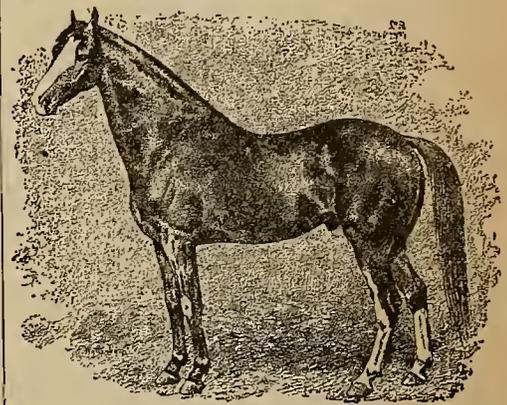

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the grandam of Anteo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauanita, Bonnie Kate (the dam of Bonnie Lazziel), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirler), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his breeding comes much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

**JOSEPH CAIRN SIMPSON.**

Oakland or 508 Montgomery Street, San Francisco.

**The Thoroughbred Stallion**

**JOE HOOKER.**

BY MONDAY.

First dam Mayflower, by imp. Eclipse. Second dam Hennie Farrow, by imp. Shamrock. Third dam Ida, by imp. Belschazzar. Fourth dam Gamma's dam, by Sir Richard. Fifth dam, by imp. Eagle. Sixth dam Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Stirling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by imp. Jolly Roger. Twelfth dam, by Partner.

Thirteenth dam, by imp. Monkey. Fourteenth dam, imp. mare from the stud of Harrison of Bracon. Terms, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freepoint road.

This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1883.

THEO. WINTERS, Sacramento, Cal.

**TROTting STALLIONS.**

**Standard Trotting Stallion**

**BILLY HAYWARD, 489,**

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

**THE ELECTIONEER STALLION**

**STANFORD**

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

Terms. \$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

**Pedigree and Description.**

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 163 hands, and weighs 1,650 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer. First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25), he by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk. Second dam, Kitty, by Owen Dale, son of Belmont. Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred. Dam of Dave Hill by Vermont Hambletonian. Dam of Red Lion by Vermont Hambletonian.

J. J. FAIRBANKS.

Oakland, January 18, 1

YACHTING. A Faithful Servant.

In the dailies have been brief notices of the death by suicide of John Halthusen, the steward of the Pacific Yacht Club. Poor John! a sincere desire to be appreciated was the cause of his death.

This species of insanity reached the climax on last Friday night, a week from last night. He expected the following day a large company of "Good Samaritans" a branch of the Masonic order, and he was unable to get a sufficient number of clams to make his chowder.

A Prospective Match Race.

The first race talk of the season has been heard this week. The yachts under discussion are the Aggie and Lurline. Outside parties, at least, the proposition comes from them, offer to back the Aggie against the Lurline for a stake of anywhere from \$2,000 to \$5,000, to race hest and hest boat, round the Faralones and return, or to the Santa Cruz Lighthouse and return.

Cruise of the S. F. Y. C.

Owing to an omission the programme of the San Francisco Yacht Club for yesterday, today and to-morrow was not published last week. It is as follows:

Yachts of the San Francisco Yacht Club and those of its guests will assemble off Front street wharf, San Francisco, on Friday morning, May 30th, ready for a cruise to Antioch. At 11 o'clock of that morning the preparatory gun will be fired from the flag ship, and five minutes later the starting gun will be fired, when the yachts will get under way, and make the best of their way to the southern end of Mare Island, where those first arriving will round to and await the arrival of the rest of the fleet.

"preparatory gun," and that they will not hoist the "head sails" until the firing of the "starting guns." Attention is also requested to "colors" at eight bells, and the sundown guns.

The cruise will be under the charge of Commodore Harrison, and from that gentleman's activity and energy should be a success. The only one of the big nns that is sure to go through the whole way is the Fleur de Lis. Captain White, in spite of his lame arm, having announced that as his intention. He is one of our most enthusiastic yachtsmen.

Out for an Airing.

The waters of the bay last Saturday presented an animated appearance, nearly all the yachts being out. The Dawn, Frolic, Lolita, Eva, sloop Nellie and Azalene all came out from the city front, but were set by the strong ebb tide far to leeward. They were joined by the Ariel and Rambler from Sausalito, and all together made quite a fleet. The vessels started out with kites flying, but as the breeze got increasing in force sail was reduced gradually on some, and by wholesale on others; the Ariel being the most noticeable in this latter respect, she soon reduced her canvas to full jib and reefed main-sail. This did not seem a sufficient reduction, as she pulled out a large brass pin to which the standing part of her jib sheet is made fast, but no real damage resulted therefrom.

A Chapter of Mishaps.

The Thetis, which has her moorings at North Beach, broke adrift some days back. The float to her mooring chain is properly shackled on, but where the line leads thence to the yacht it was only connected to the float by a common staple, so when the breeze freshened it pulled out. She went foul of Selby's wharf, and was taken back again by some soldiers who evidently had little conception of the usages aboard sailing vessels, as they made her fast by the end of the main-sheet. This, of course, gave her too much scope and she was within an ace of going ashore when she was picked up by some boatmen, who took her round to the southern end of the city and demanded \$20 salvage. Last Saturday whilst getting under way, she fouled a scow schooner lying at anchor; the latter's bowsprit going right through the mainsail of the yacht tearing it so as to render it almost useless for all time.

The Azalene made her how to the yachting public last Saturday, after hibernating in the Oakland creek for some months. She has been scraped and painted, and has a new snit of sails which seem to set admirably. The light green color she is painted is a welcome relief to the eye from the conventional white and black.

The Frolic, the flag ship of the S. F. Y. C., was out last Sunday in a most abominably dirty suit of sails; we were glad to see her heading a new suit last week.

Long Bridge seems deserted in favor of Sausalito for a place to "lie up," the majority of the yachts having moorings over there.

The English Derby.

LONDON, May 28th.—The race for the Derby was a dead heat between St. Gatien and Harvester. The race took place at Epsom Downs. Sir John Willoughby's filly, Queen Adelaide, came in second. The other starters were Girards's St. Medard, Hamilton's Loch Ranza, Osborne's Waterford, Price's Bedouin, Walton's Richmond, McIntyre's Beauchamp, Jardine's Borneo, Long's Connor, Haldaway's The Hopeful Dutchman, Rothschild's Talisman, Lefevre's Breast and Rothschild's Woodstock. The betting before the race was 2 to 1 against Queen Adelaide, 5 to 1 against St. Medard, 13 to 2 against Talisman, 10 to 1 against St. Gatien, 12 to 1 against Beauchamp, 12 to 1 against Waterford, 14 to one against Borneo, 18 to 1 against Richmond.

There was an excellent start. After three strides Richmond assumed a slight lead. After a quarter of a mile had been covered Woodstock took up the running, Richmond second. They went through the furze in front of Bedouin to the mile post, where Richmond again took command. They ran thus to the top of the hill. Going down hill Borneo resumed the lead, followed by St. Gatien and Richmond. Entering the straight, Loch Ranza joined Borneo, Queen Adelaide and Harvester close up. When a quarter of a mile from home Borneo was still leading, followed by St. Gatien. The leaders continued in these positions to the distance pole, where Borneo was beaten. St. Gatien was here joined by Harvester and a tremendous race

took place, the pair running locked together, Queen Adelaide third, Waterford fourth, Breast, Talisman, Borneo and St. Medard following in the order named. Richmond was the ninth to cross the line, Woodstock and the Hopeful Dutchman last.

The race was not run off. The stakes were divided between the owners of St. Gatien and Harvester. Time 2:46 1-5.

The celebrated English stallion Doncaster has been sold by the Duke of Westminster to the Hungarian Government for five thousand guineas. This famous horse was bred in 1870 by Sir Tatton Sykes, and was first called All Heart and No Peel. He was a son of Stockwell, from Marigold, by Teddington; second dam sister to Singapore, by Rattan. Owing to a kick Doncaster did not start as a two-year-old, but was sold to the late Mr. Merry, in whose colors he made his debut as a three-year-old in the two thousand guineas, and was unplaced, but he won the Derby of 1873. But he was defeated in the Grand Duke Michael Stakes and Newmarket Derby. As a four-year-old he ran a dead heat with Flageolet (Rayon d'Or's sire) for second place in the Ascot Gold Cup, won by Boiard. Doncaster, however, won the Goodwood Cup with 129 pounds. As a four-year-old he was a great racer, probably the best in the world, as he won the Ascot Cup and the Alexander Plate, three miles. He was then retired to the stud, where in his first season he got Bend Or, who won the Derby of 1880. Doncaster brought the highest price ever paid for a stallion—the Duke of Westminster paid 12,000 guineas for him. He was one of the last sons of Stockwell, and resembled him more than any of his sons, of whom he was probably the best, as he seemed to get better with age, and was supreme over a considerable distance of ground. Outside of Bend Or he has not been a success, but a change of mares works wonders, and maybe, as the successor of Buccaneer in Hungary, he will, like that sire, cause the English to bitterly repent the day they sold him by sending a Derby winner over the channel.

That undefinable characteristic called "quality" frequently manifests itself in unexpected places. The success of Buchanan, the Derby hero, taken in connection with that of his full brother, Harry Gilmore, is only another instance of what a great prize the lottery of breeding often has in store for owners of unappreciated mares. At the time Harry Gilmore won the Omnibus Stakes, Mr. James Guest, who bred him, gave a history of the dam of the two great colts. She was one of the last of the Wagner mares, possibly, the last. She was bred in 1861, and owned by a gentleman in Mr. Guest's neighborhood for many years, drawing a buggy. Mr. Guest had often proposed to him to breed the mare to Buckden and get a race-horse, but his invariable answer was "no, she's too good a huggy mare, and I couldn't spare her." But Mr. Guest always had a high opinion of the old mare, and by dint of persuading, at last succeeded in getting the gentleman to send her to Buckden, and the result was Harry Gilmore. The second time it was tried, and first came Buchanan, the Derby winner. Since then, the old mare has had Jim Guest, in 1882, and Lewis Clark, 1883, both by Buckden. These are not isolated by any means, the dams of both Teddington and Sir Tatton Sykes were reckoned worthless mares for breeding, and the lame mare, by Androssan, and dam of Beeswing, was sold for a mere song.

The four-year-old filly Aunt Betsy by Hardwood—Peggy Ringold, Cyclone, three years full brother to Aunt Betsy, and Common Sense by Hardwood—Consuie Peggy by Woodburn, all the property of J. W. Adams of Los Angeles, are now at Oakland Park in charge at Lee Shaner, to be trained for the fall races. Shaner has purchased a half interest in Cyclone.

E. H. Swift of Santa Cruz, has sold his old horse Sorrel Ben to a gentleman in Petaluma. Ben divided the honors with Father Serra's church, as an old-time institution of the south coast, but unlike the Mission buildings he couldn't be "restored!"

Patsy Duffy's riding attracted much attention at Louisville and his services were in demand. Few jockeys recognized as first-class attended the meeting.

Mr. Winters has retired Callie Smart, and she has been bred to Joe Hooker.

Bay District Association

ENTRIES. ENTRIES.

Saturday, June 4th, 1884.

2-22 Class. Purse \$750, divided \$450, \$200 and \$100. Mile heats, 3 in 5 in harness; 5 or more to enter; 3 or more to start. Entrance ten per cent. of purse. Entries close with the secretary Saturday, June 7th.

Important Sale of Thoroughbred Horses.

BY DIRECTION OF

THEODORE WINTERS, ESQ.

We will Offer for Sale

Thursday, July 17th, 1884.

At the Stables of C. H. SHEAR, opposite Agricultural Park, Sacramento, Seventeen Head of Thoroughbred Horses, COMPRISING

All his two-year olds and yearlings, together with the crack three-year-old Prince of Norfolk and the famous hurdle mare Hattie B. It is Mr. Winters positive intention to retire from the turf and confine himself strictly to breeding. Hence his entire string will be offered without reserve. The colts in training will be galloped until day of sale, that they may be kept in order for racing purposes. The horses may be seen previous to sale at the Winters' Ranch, Riverside Road, near Sacramento. A competent Veterinary will be in attendance, to make all examinations desired by purchasers. Killip & Co. will execute commissions for intending buyers who cannot be present.

Catalogues giving full pedigrees, etc., will shortly be issued. For information apply to KILLIP & CO., Live Stock Auctioneers, 116 Montgomery Street, S. F.

THE

Thirty-first Annual

STATE FAIR

— AT —

SACRAMENTO, CAL.

Commencing Monday, Sept. 8th,

— AND —

CLOSING SATURDAY, SEPT. 20th, 1884.

TWO WEEKS.

Speed Programme.

First Day, Thursday, Sept. 11th.

TROTTING.

No. 1.—THE OCHIDENT STAKE—Closed in 1882 with thirty nominations.

No. 2.—PACING PURSE, \$1,000. 2-25 Class.

No. 3.—TROTTING PURSE, \$4,200. 2-25 Class.

Second Day, Friday, Sept. 12th.

RUNNING.

No. 4.—THE INTRODUCTION STAKE—For two-year olds. \$25 entrance; \$10 forfeit; \$200 added; \$50 to second; third to save stake. Three-quarters of a mile.

No. 5.—THE CALIFORNIA DERBY STAKE—For three-year olds. Closed in 1882 with sixteen nominations. One mile and a half.

No. 6.—THE DEL PASO STAKE—For all ages. \$50 entrance; \$15 forfeit; \$250 added; \$75 to second; third saves stake. Three-quarter mile heats.

No. 7.—SELLING PURSE, \$200—Entrance free. Second horse, \$50. Fixed valuation, \$1,000; two pounds off for each \$100 below, and two pounds added for each \$100 above fixed value. One mile and an eighth.

Third Day, Saturday, Sept. 13th.

TROTTING.

No. 8.—TROTTING PURSE, \$1,000—For four-year olds. Closed March 10th, 1884, with ten entries.

No. 9.—THE ANNUAL TWO-YEAR OLD TROTTING STAKE—Closed January 1st, with twenty-one nominations.

No. 10.—TROTTING PURSE, \$1,200—2-27 Class.

Fourth Day, Monday, Sept. 15th.

RUNNING.

No. 11.—THE MATURITY STAKE—Closed in 1883, with nominations. Three miles.

No. 12.—THE PREMIUM STAKE—For all ages. \$25 entrance; \$10 forfeit; \$200 added; of which \$50 to second; third to save stake. Three-quarters of a mile.

No. 13.—THE CALIFORNIA ANNUAL STAKE—For two-year olds. Closed in 1883 with nineteen nominations. One mile.

No. 14.—FREE HANDICAP STAKE. \$50 entrance; \$25 forfeit; \$15 declaration; \$450 added. \$75 to second; third to save stake. Weights announced September 5th; declaration September 8th, by P. M. Two and one-quarter miles.

No. 15.—FREE PURSE, \$300—For all ages. \$50 to second; \$25 to third. One mile and repeat.

Fifth Day, Tuesday, Sept. 16th.

TROTTING.

No. 16.—TROTTING PURSE, \$1,000—For three-year olds. Closed March 10th, 1884, with thirteen entries.

No. 17.—TROTTING PURSE, \$1,200. Three-minute Class.

Sixth Day, Wednesday, Sept. 17th.

RUNNING.

No. 18.—THE ORANGE STAKE—For two-year-old fillies; \$25 entrance; \$10 forfeit; \$150 added; \$50 to second. Five-eighths of a mile.

No. 19.—THE BREEDER'S STAKE—For three-year olds. Closed in 1883 with seventeen nomination. One mile and a half.

No. 20.—SELLING PURSE, \$250—For all ages; entrance free. \$50 to second; fixed valuation \$1,000. Two pounds off for each \$100 below, and two pounds added for each \$100 above fixed value. One and three-eighths miles.

No. 21.—FREE PURSE, \$400—For all ages. \$100 to second; \$50 to third. One mile and a half, and repeat.

Seventh Day, Thursday, Sept. 18th.

TROTTING.

No. 22.—TROTTING PURSE, \$1,200—2-22 Class.

No. 23.—TROTTING PURSE, \$1,200—2-40 Class.

Eighth Day, Friday, Sept. 19th.

RUNNING.

No. 24.—THE SUNNY SLOK STAKE—For two-year olds. \$50 entrance; \$10 forfeit; \$200 added. \$75 to second; third to save stake. Winner of Introduction Stake penalized 5 pounds. Winner of California Annual Stake penalized 6 pounds. Winner of both penalized 10 pounds. One mile.

No. 25—THE SHENANDOAH STAKE—For three-year olds. \$50 entrance; \$15 forfeit; \$250 added; \$75 to second; third to save stake. Winner of Derby Stake penalized 5 pounds. Winner of Breeders' Stake penalized 5 pounds. Winner of both penalized 10 pounds. One mile and a quarter.

No. 26—THE NIGHTHAWK STAKE—For all ages. \$50 entrance; \$15 forfeit; \$200 added. Second, \$75; third, \$50; \$200 additional, if best time (1:41) in the State is beaten. Stake to be named after winner, if Night-hawk's time (1:42) is beaten. One mile.

No. 27—THE PACIFIC COAST HANDICAP—For all ages. \$100 entrance; \$50 forfeit; \$20 declaration; \$400 added. \$150 to second; \$100 to third. Weights announced September 16th; declaration September 17th, by 8 P. M. Three miles.

**Ninth Day, Saturday, Sept. 20th.**  
TROTTING.  
No. 28—TROTTING PURSE, \$1,000—For two-year olds. Closed March 10th, 1884, with five entries.  
No. 29—TROTTING PURSE, \$1,200—2:30 Class.  
No. 30—TROTTING PURSE, \$1,500—Free for all. "Director" to wagon.

Entries for the following running events for 1885-6, were ordered to be closed with the above races:  
No. 1—CALIFORNIA BREEDERS' STAKE—For foals of 1882, to be run at the State Fair of 1885. \$50 entrance p. p.; \$300 added, of which \$100 to second, and \$50 to third. One mile and a quarter.  
No. 2—MATURITY STAKE—For four-year olds in 1885, to be run at the State Fair of 1885. \$100 entrance; \$25 forfeit; \$300 added; second horse \$100; third \$50. Three miles.  
No. 3—CALIFORNIA ANNUAL STAKE—For foals of 1883, to be run at the State Fair of 1885. \$150 entrance; \$25 forfeit; \$250 added; second horse \$100; third, \$70. One mile.  
No. 4—CALIFORNIA DERBY STAKE—For foals of 1883, to be run at the State Fair of 1886. \$50 entrance, p. p.; \$100 added; second horse \$100; third, \$50. One mile and a half.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year old trot, unless otherwise specified, five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. Trotting and pacing purses divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and ten per cent. to fourth.

National Association Rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66-2-3 to the first, and 33-1-3 to second.

In all races, entries not declared out by six p. m. of the day preceding the race, shall be required to start.

Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 p. m. of the day preceding the race. No added money paid for a walk-over.

Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance, under Rule 3.

Racing colors to be named in entries.

In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entries to all of the above races (except fixed events) to close with the Secretary on Friday, August 1st, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

P. A. FINIGAN, President.  
EDWIN F. SMITH, Secretary.

LARGE PUBLIC SALE  
SPANISH MERINO RAMS!

WEDNESDAY, JUNE 18, '84,

COMSTOCK'S STABLES, --- 524 THIRD ST., SAN FRANCISCO, CAL.

WE WILL SELL AT PUBLIC AUCTION ONE HUNDRED AND FORTY HEAD OF SPANISH MERINO RAMS, one and two years old this spring, at the above time and place. These Rams were recently imported from Vermont, and were selected with great care from the Top of some of the Best Flocks in that State, and are all recorded in the Vermont Registers. They were started for Australia, but being prevented from going further by laws passed by that Government prohibiting further importation of American sheep, we take this method of closing them out, thus placing within the reach of Flock Masters on this Coast an Extraordinary Opportunity of obtaining some No. 1 Rams.

We are confident it will be for the interest of every Sheep Breeder to attend this sale. Remember, this is to be a Bona Fide Sale, as we intend to Close Out the Lot. The Sheep can be seen at above place, and all are invited to call and examine them. Sale to commence at 11 A. M., sharp. For Catalogue or particulars, address  
GEORGE HAMMOND, Grand Hotel.  
OR MESSRS. KILLIP & CO.,  
Auctioneers, 116 Montgomery Street.  
F. D. BARTON & CO.

THE NEW ZEALAND

Stud and Pedigree Stock Co.

LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

Fastest Time on Record.

Martini-Henry, by Musket—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30, and beating a field of twenty-nine, thus lowering the previous best record of 3:30, by Darriwell (5 years), carrying 102 pounds, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

P. H. BOURKE, Secretary,

Auckland, New Zealand.

No. 14.—PACING RACE—2:20 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second \$120, and third \$40.

REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.  
Horses distancing the field will be entitled to the first and third money only.  
Horses entered for purses can only be withdrawn by consent of the Judges.  
The Pacific Coast Blood Horse Association Rules to govern all Running Races.  
Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock P. M.  
In all Running Races the second horse saves entrance.

No money paid for a race without a contest.  
All entries for Races to close with the Secretary or President, at Chico, July 1st, 1884, at ten o'clock P. M.  
The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

C. C. MANON, President.  
ROLAND DILLER, Secretary.

THE TROTTING STALLION  
SILVERHEEL

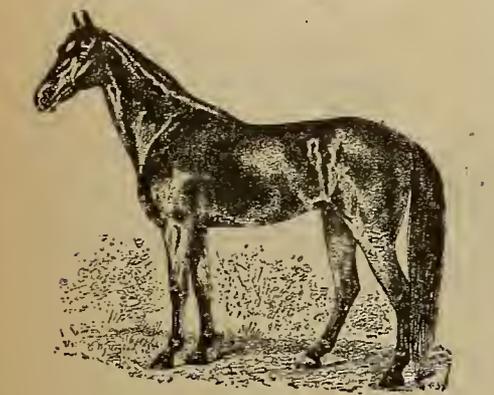

WILL MAKE THE SEASON OF 1881 AT THE DASHAWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland.

TERMS.

Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

SACKRIDER & CHISHOLM.

Hambletonian Trotting Stallion

BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of Imported Levithan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

Description.

Bob Mason is a mabogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a full portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

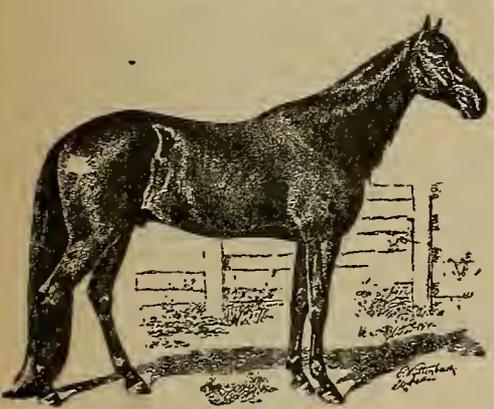

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

CHARLES J. ELLIS, Owner.  
WM. DONATHAN, Agent.

Mambrino Trotting Stallion

ABBOTSFORD.

Record 2:19 1-2.

WILL MAKE THE SEASON OF 1881, AT THE RANCH OF S. B. WHIPPLE, San Mateo, Cal.

PEDIGREE.

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Paymaster; dam Woodbine, (dam of Weigwood, 2:19), by Woodford, son of Koschinsky, by Sir Archy.

Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolls, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Convo 2:22 1/2; Mergenta 2:21 1/2; Manfred 2:25; Pancoast 2:25 1/2; Rachel 2:28 1/2; Inca 2:27; Lady McEstridge 2:29; Dacla 2:29 1/2; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Princess, the sire of Trinket 2:24. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,338 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:24. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adalide 2:20 1/2; Common-wealth 2:22; Hiram Woodruff 2:25; Valley Chief 2:25; Faustina 2:25 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

TERMS.

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasture at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

WASH JAMES, Agent.  
San Mateo, Cal.

The Trotting Stallions  
DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$20, Monroe Chief \$100, the season. Good pasture for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phyllis, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:25), by Mambrino Chief; second dam by Potomac; third dam by Saxe Wiemar.

Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

Monroe Chief, 2:18 1-4.

Two-mile record, 4:45.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whip Stock. For a very lifelike portrait of Monroe Chief and a full account of his pedigrees and performances, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

JOHN A. GOLDSMITH,  
OAKLAND TROTTING PARK.

The Trotting Stallion  
BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasture at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

February 2d, 1884.

J. B. McDONALD.

2:20 1-4.

The Fast-Trotting Stallion  
ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbia, by A. W. Richmond.

Second dam, Columbia, by imp. Bonnie Scotland.

Third dam, Young Fashion, by imp. Monarch.

Fourth dam, Fashion, by imp. Trustee.

Fifth dam, Bonnets of Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley.

Eighth dam, by imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus.

Eleventh dam, by imp. Monkey.

Twelfth dam, by imp. Silvereye.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteeco ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20 1/4, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

M. ROLLINS, Agent.  
Santa Rosa.

MAMBRINO WILKES.

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE B. Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christmas by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Rip-ton's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,250 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this preparent sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

TERMS:

\$40 for the season, or \$25 singles for each.

This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

A. L. HINDS, Agent.

The Trotting Stallion  
STEINWAY,

With two-year-old record, third heat, of 2:31, and three-year-old record, fourth heat, of 2:25 1/2.

Terms.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County,

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McCleverty & Noblett, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing man and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Strathmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Claus, 2:17 1/2; and Tucker, 2:19 1/2; Chestnut Hill, 2:17 1/2; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28 1/2; Henderson, 2:28; Strablan, three-year-old, 2:29 1/2; and Stuart, three-year-old, 2:28. Stuart is full brother to Belnor, who trotted a mile in 2:52; at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:33, and he in turn got Governor Sprague, record 2:20; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbera, Admiration, Mystery, in 2:39, 2:32, 2:31 1/2. Memento won the first heat. As three-year-old, at Sharpsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30 1/2, 2:30 1/2, Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchy and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett in 2:26 1/2, 2:23, 2:26 1/2, but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

THE TROTTING STALLIONS

SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO July 15th, 1884, at the farm of the owner, three miles north of Chico, Contra Costa Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1875.

PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Busiris, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:42) by Flaxtail, son of Fricdon's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grand dam by Leifer's Consul, by Schepper's Consul.

Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

LA HARPE

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star, (son of Platt's Western Star by Blacknose). 1st dam by Bonerages, 2nd dam by Gallatin (son of La Harpe's dam Prairie Bird by Flaxtail (dam of Flight, 2:29, and Prompter, 2:33). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Leifer's Consul. Irwin's Tuckahoe by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

TERMS:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on this farm, boxes, paddocks, and plenty of shade and water. Address

Sportsmen & Pleasure-Seekers.

THE SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES AFFORDED BY ITS LINE FOR REACHING

with speed and comfort the best places in the State for Sea Bathing, Shooting and Fishing.

MONTEREY,

THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish Mackerel, and Flounder.

The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES AT THE "HOTEL DEL MONTE,"

ARE UNSURPASSED, having a MAGNIFICENT BEACH of pure white sand for sun bathing. The BATH-HOUSE contains SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with ELEGANT ROOMS connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ.

Southern Pacific Railroad,

(Broad Gauge). The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety.

Notably Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, FURNISHING, SAN CREGO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

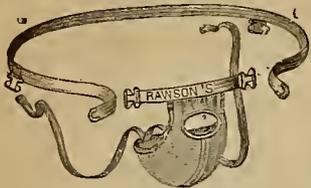

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this inland sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

† In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND TAGS. Guns and Fishing Tackle will be carried free of charge. Gunstaken apart and securely packed in wood or leather cases may be taken in Passenger Cars. TICKET OFFICE.—Passenger Depot, Townsend Street, Valencia Station, and No. 613 Market Street, Grand Hotel. SAN FRANCISCO, SATURDAY, JUNE 7, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

## A Divided Derby.

For the second time in a history extending over a century the English Derby, run on the 28th ult., resulted in a "dead heat"—a result scarcely satisfactory to anybody, as the money bets will have to be put together and divided, which for those who backed Sir John Willoughby's pair Harvester's partial success will scarcely pay their losses on Queen Adelaide, while for those who had the courage to back St. Gatien it will make a big hole in their earnings. Even professionals will scarcely be satisfied, for although they were heavy winners by the defeat of the favorite, Queen Adelaide, the fact that the place bets on her were won the additional trouble in settling upon two horses, especially on bets for which Harvester was backed at short odds, and St. Gatien at the long odds obtainable two weeks before, gave them no end of trouble.

The weather was cool and cloudy, but owing to an extended dry spell the course was very hard. The interest in the race this year seemed to be very much less than usual, partially owing to the disqualification of such colts as St. Simon and Archibald by the deaths of Prince Bathyan and Comt Lagrange, and a belief that Queen Adelaide would prove enormously better than all the other starters that it would be virtually no race. The race had fifteen starters, four more than last year, and the same as when Froquois won in 1881. As expected, Queen Adelaide was the favorite, she going to the post with odds at 5 to 2 against her. The other quotations were 6 to 1 against St. Medard, 7 to 1 each against Talisman and Bedouin, 9 to 1 against Richmond, 11 to 1 against Waterford, 12 to 1 against St. Gatien, 14 to 1 each against Beauchamp and Harvester, 17 to 1 against Borneo, 25 to 1 against Loch Ranza and 50 to 1 each against Candor, Brest, Woodstock and the Hopeful Dutchman.

To an excellent start Richmond took the lead, but after running a quarter mile in front he gave place to Woodstock, but held second place, with Bedouin third, to the mile post, where Richmond again took up the running. There was no further change until minding down from the hill, when Borneo assumed the lead, followed by St. Gatien and Richmond. As they entered the straight Loch Ranza closed up on them, followed by Queen Adelaide, with Harvester in attendance. At the beginning of the last quarter Borneo and St. Gatien were still leading and they continued to do so to the distance (240 yards), where Borneo fell back, beaten, and as Queen Adelaide proved unequal to the task of reaching St. Gatien, Loates dashed up with Harvester, and a tremendous race ensued right to the post, which they passed locked together two lengths in front of Queen Adelaide. Waterford was fourth, followed by Brest, Talisman, Borneo, St. Medard and Richmond in the order named. Of the others, Woodstock and the Hopeful Dutchman came in with the crowd. Time, 2:46 1-5.

The 106th renewal of the Derby Stakes, for three-year-olds, at £20 each, half forfeit; the owner of the second to receive £300, and the third £150 out of the stakes; colts to carry 126 pounds, fillies 121 pounds; 189 subscribers; about a mile and a half.

Mr. J. Hammond's b c St. Gatien by Rotherhill or The Rover, dam St. Editha, 125 pounds. (C. Wood) 4  
Sir John Willoughby's b c Harvester by Sterling, dam Wheat Ear, 126 pounds. (S. Loates) 5  
Sir John Willoughby's ch f Queen Adelaide by Hermit, dam Adelaide, 121 pounds. (Wehh) 3  
Mr. W. Stevenson's ch c Waterford, 126 pounds. (Osborne) 0

Mr. F. Carington's h c Bedouin, 126 pounds. (Gates) 0  
Mr. F. T. Walton's ch c Richmond, 126 pounds. (C. Loates) 0  
Mr. R. Jardine's h c Beauchamp, 126 pounds. (Bowman) 0  
Mr. R. Jardine's ch c Borneo, 126 pounds. (Platt) 0  
Mr. W. A. Long's h c Candor, 126 pounds. (Morgan) 0  
Mr. L. de Rothschild's h c Talisman, 126 pounds. (Cannon) 0  
Mr. C. J. Lefevre's h c Brest, 126 pounds. (Watts) 0  
Mr. L. de Rothschild's b or br c Woodstock, 126 pounds. (Gates) 0  
Mr. W. M. Holdaway's b c The Hopeful Dutchman, 126 lbs. (Rawlinson) 0

As usual with "dead heats" for so valuable a stake they were divided, as also were all the bets, under Rule 16, which provides that "when horses run a dead heat for a plate or sweepstake, and the owners agree to divide all bets between such horses, or between either of them and the field, must be settled by the money betted being put together and divided between the parties in the same proportion as the stakes."

The first "dead heat" for the Derby was in 1828, when the Duke of Rutland's Cadland, by Andrew, beat the Hon. E. Petre's The Colonel, in the "run off." There were twenty-three starters.

St. Gatien.—The London *Field*, in beginning its annual review of the three-year-olds of the season, said: "At no period in his career is a horse more likely to lose form, or, on the contrary, acquire unexpected merit, as during the months between his two and three-year-old career." In this respect so little were the chances of St. Gatien thought of, that he was

not mentioned in the *Field's* review, while in the reviews of several other papers, he was dismissed with only a mere mention. He was entered for the Lincolnshire and City and Suburban Handicaps by Mr. John Hammond, and was handicapped at eighty-seven pounds for the former and eighty-four pounds for the latter, while for the Manchester Cup, to be run on the 5th prox., he is in at 91 pounds, or 13 pounds less than the Duke of Richmond, who is said to be not within 10 pounds of St. Simon. That St. Gatien's trainer, Mr. R. Sherwood, of Newmarket, could thus keep the colt's true form so quiet speaks well for him. But Mr. Sherwood is not a professional trainer. According to "Ruff" he only trains for Mr. Hammond, Miss Graham and himself. Even the Pink 'n's "low tont" was deceived, and said as late as the 17th inst.: "We are not likely to hear any more of St. Gatien; indeed he never had any pretensions to win a Derby." This is no doubt true from a "tout's" standpoint, but unfashionably bred three-year-olds are in form this year. Scot Free, by Macgregor, won the 2,000 guineas. St. Gatien is even worse, for he has a double parentage in Rotherhill and the Rover, (both well-bred sires). His dam is St. Editha, by Kingsley Vate, out of Lady Alice, by Chanticleer. Of the sires named Rotherhill is of the most repute, he being by Lord Clifden, out of Laura, the dam of Fraulein and Petrarch. The Rover is by Blair Athol, out of Crinon, by Newminster.

Although St. Gatien was considered of so little account, he has an unbeaten record as a two-year-old, and as he did not run at any of the Newmarket Spring meetings this year, the Derby as above was no doubt his first effort as a three-year-old. As a two-year-old he ran three times under the colors of his breeder, Major F. E. Brace, he winning the Teddington Two-Year-Old Plate at Kempton Park early in May, when he beat two others, the race being worth £126. At Manchester, on May 16th, he won the John O'Gaunt Plate, worth £197, when, with John Osborne, he carried the top weight, 128 pounds, and beat a field of six, winning by a length, with the odds at 5 to 1 against him. At Nottingham on May 28th he won the Little John Plate of the value of £146.17 at five furlongs. He was again ridden by Osborne; he had but four opponents and started favorite with the odds at 6 to 4 against him. He did not run again during the year. There is no record of a public sale, but when nominated for the Spring handicaps in January he was the property of Mr. J. Hammond, who appeared in the list of winning owners last year, with nine races to his credit of the value of £1,502. How little St. Gatien was thought of when a yearling may be imagined by the fact that he was only entered for the Derby, and that outside of whatever handicaps he may have been entered in this Spring his only present engagement is for the Eclipse Stakes of £10,000, to be run at Sandown Park in 1886.

Harvester.—If St. Gatien was comparatively unknown, no such complaint can be made about Harvester, for since Sir John Willoughby paid 8,000 guineas for him at Lord Falmouth's sale on the 28th ult. no horse has been so publicly discussed. It will be remembered that on the Wednesday after the sale he was beaten by Scot Free and St. Medard for the 2,000 guineas, since which on the 4th inst., he handsomely turned the tables on Scot Free by beating him for the Payne Stakes run at the Newmarket Second Spring Meeting. That he would have started the favorite for the Derby there is not the slightest doubt had Sir John Willoughby "scratched" Queen Adelaide. That her presence in the race interfered with Harvester's chances, there is but little doubt, as well as that in his future engagements at Ascot and elsewhere he will show that he is nearly first-class. In breeding he is all that can be asked, being by Sterling out of Wheat Ear, she by Young Melbourne. Harvester made his debut in the Chesterfield Stakes at the Newmarket July meeting, and although only about half trained he managed to get second to Superba who only won by half a length with Talisman and Queen Adelaide behind. He ran twice at Goodwood, but was so lacking condition that he was unplaced for the Richmond Stakes and Rone Memorial. He was then given a rest until the Newmarket First October, when he won the Triennial Stakes in a canter from a field which included Knight Erout, Borneo, Clochette and Talieman. At the second meeting he won the Charterwell Stakes, when, with 128 pounds, he beat Condor, 122 pounds; Borneo, 125 pounds; Wild Thyme, 129 pounds, and Mr. Keene's Steerforth, 122 pounds. It was a great race and Harvester only won by a head. His last performance as a two-year-old was for the Dewhurst Plate, when he was unplaced, Lord Falmouth having declared to win, with his stable companion, Bushybody, who was beaten by a neck for it by Queen Adelaide. How well Harvester has done since his performances at Newmarket and Epsom show, and as he is in the Prince of Wales Stakes at Ascot, in the Sussex at Goodwood, St. Leger at Doncaster, and other rich stakes, he will no doubt be heard from again before the end of the season.

## Board of Review.

The Board of Review of the National Trotting Association, at their late meeting at Chicago, passed upon the following Pacific Coast cases;

1,248.—Pacific District Board vs. George Baylies, San Francisco, Cal. In the matter of complaint and application for an order by R. E. Burns, San Francisco, Cal.—This matter came from the Pacific District Board with a certified record showing it to have been dismissed for want of jurisdiction, which action was approved and concurred in by this Board.

1,259.—Capital Turf Club, Sacramento, Cal., *ex parte*. Application for an order.—Applicant, by its Secretary, W. P. Emery, informed the Secretary of the National Association that said club had expelled Chas. H. Shear for pulling his horse in a race, and had expelled Chas. Shear Jr., for fraudulent conduct; also, that the judges had expelled Patrick Coward for pulling his horse in a race. That, after ratifying the expulsion of said Coward by the judges, the club, at a subsequent meeting, reconsidered its action and reinstated all three, adding that a statement of the facts would be sent for consideration of the Board of Appeal. An ex-officer of the club, who was also one of the judges who had ordered the expulsion of said Coward, claimed that the club had no power to remove either of said expulsions. The arguments adduced are omitted as unnecessary. The questions raised being considered by the Board it was held to be a proper construction of Rules 51 and 52, that the judges, after their administration of a race has terminated, cannot remove or modify any fine or expulsion imposed by their order, and that the members of the Association cannot remove or modify any fine or expulsion imposed by the judges, and that when a member has imposed a fine or expulsion, the member cannot at a subsequent meeting either remove or modify the same. And it was ordered that the Secretary be and he is instructed to record and notify the expulsions recited in said communication of W. P. Emery.

At Covington, last Monday, Mr. Baldwin's three-year-old filly, Fallen Leaf, by Grinstead—Mollie McCarthy, finished second in the Hindoo Stakes, one mile and a half, with Buchanan, the winner of the Louisville Derby, behind her.

At San Jose last Sunday Deputy Sheriff Stone's Prince and Robert Edward's Tom Pepper, contested in a trotting race, at the Fair Grounds. Stone's horse being on easy winner, in 2:47. The race was for \$50 a side.

Among the Americans at Epsom Derby day was Billy Emerson, the minstrel, who was betting freely on Plunger Walton's candidate, Richmond, and losing his coin with his usual equanimity.

## Answers to Correspondents.

Question answered only through these columns. No replies by mail or telegraph.

J. B., San Buena Ventura.

Having read an article in your paper about the Charlier horse shoe, and having used it before in Scotland, I would like if you would tell me where I can get knives for it as I want to use it on some horses. If you could tell me where I could get a knife it will be a great favor. Answer.—We never saw a Charlier knife in this country and doubt very much if they can be found. However, if J. B. will send us a drawing and description of what he wants we will have it made for him.

W. D. H., Brentwood.

Whipple's Hambletonian, by Guy Miller, dam Martha Washington, by Burr's Washington, Guy Miller by Rysdyk's Hambletonian, dam by Nanny's Bolivar.

B. P. H., El Cajon.

Shilo gr. h. foaled 1862; bred by George Treat. By Cosmo, son of imp. Skylark. First dam Fauny Harper, by Grey Eagle; second dam Julia Ann, by Me lor; third dam by imp. Eagle; fourth dam by Gallatin; fifth dam by Albert; sixth dam by Union; seventh dam by Tippoo Saib.

E. M. H., San Buena Ventura.

There is no rule covering your case. The challenged club has no right to arbitrarily name the umpire. The proper procedure is for the clubs to mutually agree on an umpire, but if they cannot do that, the only way out of the dilemma is to adopt the plan in vogue with professionals a few years ago, which was for each club to choose an umpire and the umpires to name a referee.

## TURF AND TRACK.

## Dates Claimed.

Bay District Association, San Francisco, June 7th, 11th and 14th.  
 Bay District, San Francisco (Fall Meeting), August 2d, 5th, 7th, and 9th.  
 Santa Cruz Fair Association, Santa Cruz, August 12th to 16th.  
 Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.  
 Sonoma and Marin District Association, Petaluma, August 25th to 30th.  
 Thirteenth District, Marysville, Aug. 26th to 30th.  
 Golden Gate Fair, Oakland, September 1st to 6th.  
 Chico Fair Association, Chico, Sept. 1st to 6th.  
 State Fair, Sacramento, Sept. 11th to 20th.  
 San Joaquin District Fair, Stockton, September 23d to 27th.  
 Santa Clara District Fair, San Jose, September 29th to October 4th.  
 Fresno Fair Association, Fresno, October 7th to 11th.  
 Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## An American at Flemington.

Hon. A. M. Garland, who was at Melbourne when Martini-Henry scored his great victory for the Cup, contributes to the *Breeders' Gazette* this description of a Cup day at Flemington:

The Melbourne meeting for 1883 was held during the first eight days of November. Its principal events were the Victorian Derby, the Maribyrnong Plate and the Melbourne Cup. The interest that has steadily gained intensity during the earlier days culminates with "the Cup," which is witnessed by more people than the aggregate attendance at all other events of the meeting. The majority of those attending were, of course, Victorians, residing within a radius of 100 miles around Melbourne, though thousands gathered from New South Wales and other more remote colonies. From Sydney, nearly 500 miles distant, trains ran crowded for two or three days in advance; steamers brought other crowds across Bass Straits from Tasmania, and others came loaded from New Zealand, 1,300 miles away.

Realizing that an exceptional opportunity was thus afforded for studying an interesting phase of colonial life, and anxious to see a race that had never failed to call out good time from the best horses in the colonies, I moved with the tide of people, and Monday afternoon, November 5th, found myself at one of the overcrowded hotels of Melbourne. The sixth opened somewhat inauspiciously, but the prospect for a fair day improved with the advancing hours, and by the middle of the forenoon a bright sun looked down from a northern sky on thousands of the holiday-decked populace crowding the thoroughfares leading to the Flemington Course. A railway had been built from the city limits to the race-course, and its crowded trains attested the general appreciation of the Government's efforts to contribute to the public convenience and enjoyment. Official returns showed that by this means of transit something more than 47,000 people were moved from the city to the grounds. On the several streets verging toward the highway leading toward the race-course crowds were moving onwards, bringing into requisition vehicles of every size and description, from the commonest two-wheel cart of the baggage carry to the four-in-hand drag of the millionaire, and when these were all brought into line along the Flemington road a scene was presented well calculated to infuse the most indifferent observer with the prevailing enthusiasm of the occasion. The crowd was too dense to permit fast driving, while mounted policemen moved back and forth to enforce observance of the rules of the road, and clear away temporary blockades attending the occasional breakdown of some overloaded conveyance. Everything was orderly; everybody good humored and intent on the day's enjoyment, now fully assured. Nearing the grounds the roads diverged in the direction of the several entrances—the field, the grand stand, amphitheater, etc. This arrangement obviated all confusion and jam at the gates, as the crowd was well divided before reaching them, and, once inside, moved toward their several destinations without the least interference or confusion.

Paying my half sovereign (\$2.50) I entered the inclosure in front of the grand stand, and found myself face to face with as fine a crowd as I ever gazed over. Piled up the hillside to the rear, and swarming in the field inside the course; crowding every available space in the enormous stand, and moving in masses over the 200 feet wide promenade between the stand and the track—dressed in the bright colors and newest styles of an Antarctic Spring—were representatives of every class of every colony in Australia, and people from every country on the globe.

After two comparatively unimportant events—one of them the always popular hurdle race—an adjournment for an hour and a half was had for luncheon—an event in the day's enjoyment second in importance only to the Cup race itself. Everybody seemingly had come provided with refreshments for himself and friends. Families and acquaintances met around well-filled hamper, and together tipped glasses to the success of the winner of the day's honors—some glasses filled with champagne of the choicest brands, some with plain beer and others covering the entire list of beverages between these extremes.

The hour of 2:30 found everybody ready for the event of the day—the sporting event of the year—the event for which the thrifty squatter had brought his family from the far-off station; the event for which the frugal homestead and the hard-working mechanic had saved their few spare shillings; the event on the result of which the sporting man had staked his last pound and on which a majority of visitors had thrown in "just enough to give interest to the race," was called, and the twenty-nine starters for the Melbourne Cup, that coveted prize of which all sportsmen had dreamed and for which some had dared to hope, appeared in front of the judges' stand. As the respective favorites came forward their backers filled the welkin with salutations long and loud, and ready caps went high in air in token of the success of which each felt assured, though contending in the race with the best horses in the southern hemisphere.

The start was readily effected—no such jockeying for advantage as too often disgraces the American race-course and disgusts American audiences—and at the first attempt all got off together. The confusion of voices and cheers for favorites now lulled into a murmur, and every eye was strained to discern the position of the horses as they began to string out at the first quarter-pole. Ten thousand lincolns followed them around the course, and marked every change in position, until, in the home-stretch, the entire company seemed crowded into a mass as they came thundering toward the end of the first mile. A shout went up as they flew past and the crowd saw the splendid work that was being done.

During the second mile the speed of some of the weaker horses slackened. The terrific pace had begun to tell on some, and the lengthening line designated the few animals that had a possible chance for winning, as they were lined against the green hillside beyond. Nothing obscured the view, for the course was grass-covered, and so laid that not

for a moment were any of the runners out of sight of any one of the hundred thousand gazers. As they turned into the straight, and the distance between the foremost horses could no longer be seen by the crowd, the stillness became solemn—almost painful. Even the murmur that arose as the esger gazer chronicled to himself the changing position of the contestants, now ceased, as with bated breath the outcome was waited for. The muffled thump of the runners' feet on the grassy track grew plainer as the end was neared, and then could be heard the whick of the jockeys' whips as they essayed to bring a last grand effort from jaded and despairing steeds. The last turn was rounded; the race was ended, and the exciting throng of a hundred thousand men and women, on tip-toe, saluted with cheers and waving kerchiefs the winner of the best race ever run in Australia, if not in the world, as the now famous three-year-old Martini-Henry passed under the wire a length and a half ahead of his closest competitor. Distance, two miles. Time—3:30.

The same horse had won the Derby three days previously in a field of nine, running the mile and a half in 2:39. This makes a record, when considered in connection with the condition of the course—grass-covered, soft, with two short curves, the weights carried—103 lbs. in the Cup and 122 lbs. in the Derby—and the age of the horse—three years—that places Martini-Henry well to the front in the list of wonderful performers on the turf the world over. This pre-eminence is not accidental. His lineage is through some of the best runners of the old country, and reflects credit on the Auckland Stud Company, by which he was bred and sold as a yearling to Hon. James White, M. P. for New South Wales. His sire is Mnsket, whose reputation in England was an earnest of what could reasonably be expected from his get; dam Sylvia by Fisherman, a mare bred in Victoria. As Martini-Henry was not the favorite until he won the Derby, his owner and backers were enabled to lay quite favorable wagers on the result of his performances—an opportunity they were not slow to improve, as they are reputed to have taken in, besides the regular stakes of \$1,750 in the Derby and \$2,500 in the Cup, about \$120,000.

## San Jose Programme.

The San Jose Association have issued the following programme for their meeting this fall. The fair will open on Monday, September 29th, and continue to and include Saturday, October 4th.

FIRST DAY.—No. 1.—Running; three-quarter mile dash, free for all; \$25 entrance, \$10 forfeit, \$150 added; \$50 to second horse.

No. 2.—Running; one mile dash; for two-year-olds; \$25 entrance, \$10 forfeit, \$150 added; \$50 to second horse.

No. 3.—Running; two mile dash, handicap; \$50 entrance, \$25 forfeit, \$15 declaration, \$250 added; \$100 to second horse, third to save entrance; weights announced Monday, September 22d; declaration Wednesday, September 25th.

SECOND DAY.—No. 4.—Trotting; three-minute class; purse, \$500; \$300 to first horse, \$150 to second, \$50 to third.

No. 5.—Trotting; 2:22 class; purse, \$750; \$450 to first horse, \$225 to second, \$75 to third.

No. 6.—Trotting; 2:30 class; purse, \$500; \$300 to first horse, \$150 to second, \$50 to third.

THIRD DAY.—No. 7.—Running half mile and repeat; free for all; \$25 entrance, \$10 forfeit, \$200 added; \$75 to second.

No. 8.—Running; one and one-half mile dash; \$25 entrance, \$15 forfeit, \$200 added; \$75 to second horse.

No. 9.—Running; selling race; one mile and repeat, for all ages; purse \$200; entrance free; \$50 to second horse; fixed valuation \$1,000; two pounds off for each \$100 below, and two pounds added for each \$100 above fixed valuation.

FOURTH DAY.—Ladies' equestrianism; purse \$100; for the most graceful rider \$25, second \$15, third \$10; for the most skillful rider \$25, second \$15, third \$10.

No. 10.—Trotting; 2:40 class; purse \$500; \$300 to first horse, \$150 to second, \$50 to third.

No. 11.—Trotting; three-year-olds; purse \$300; \$180 to first horse, \$90 to second, \$30 to third.

FIFTH DAY.—No. 12.—Walking race; for stallions over 1,200 pounds weight; one mile and repeat, hauling 2,000 pounds; purse \$50; \$30 to first, \$15 to second, \$5 to third horse.

No. 13.—Running; one mile dash for two-year-olds; winner of No. 2 barred; purse \$200, \$50 to second horse.

No. 14.—Running; free for all; one mile and repeat; purse \$250, entrance free; \$50 to second horse, \$25 to third.

No. 15.—Running; novelty race; one mile; purse \$350; \$50 to first horse at first quarter pole, \$50 to first horse at half-mile pole, \$50 to first horse at three-quarter mile pole, and \$200 to the first horse at the finish.

SIXTH DAY.—No. 16.—Trotting; 2:26 class; purse \$500; \$300 to first horse, \$150 to second, \$50 to third.

No. 17.—Trotting; free for all; Director, to wagon; purse \$750; \$450 to first horse, \$225 to second, \$75 to third.

No. 18.—Buggy race; for district horses; purse \$200; mile heats, three in five to rule; \$120 to first horse, \$60 to second, \$20 to third.

Horses to be owned in District June 1st, 1884.

Conditions the same as the State Fair.

## Humboldt Races.

The Ninth District Fair Association will hold their annual meeting at Rhonerville, Sept. 23d to 26th. The following is the programme:

No. 1.—Running; purse, \$50; one mile dash, free for all saddle horses that have no record under 2 minutes.

No. 2.—Trotting; purse, \$50; huggy horses, one mile dash. Owners to drive.

No. 3.—Trotting; purse, \$150; mile heats, 2 in 3, 3-minute class.

No. 4.—Running; purse, \$40; for saddle horses with no record under 54 seconds, one-half mile and repeat.

No. 5.—Trotting; purse, \$100, entrance money added, for 3-year olds; mile heats, 2 in 3.

No. 6.—Trotting; purse \$100, stallion race, mile heats, 2 in 3. Poscora Hayward barred.

No. 7.—Running; purse \$100, free for all, one-half mile and repeat.

No. 8.—Trotting; purse \$200, free for all, mile heats, 3 in 5. Poscora Hayward barred.

No. 9.—Running; purse \$100, free for all, mile heats, 2 in 3.

No. 10.—Trotting against time, purse \$100, if 2:25 is beaten.

At the annual meeting the old officers were re-elected, viz., president, G. C. Barber; secretary, S. H. Crabtree; treasurer, M. Leoniger. The society carried over a surplus from the last fair, and all live stock premiums have been increased 20 per cent.

Poscora Hayward is barred from the race of the Humboldt County Fair. He is too fast for the district horses up there at present.

## Origin of the Kemble-Jackson Check.

Isaac Woodruff tells a representative of the New York *Spirit* the following as the true history of the overdrawn check:

In 1833 my father opened the old Harlem Park Trotting Course. He used to give a purse every week, sometimes twice a week, one for pacers, of which there were a great number in New York City at that time, and one for trotters—sometimes to harness, but most of them to saddle. Amount of purse, \$30, for which, I tell you, there would be quite a strife, and, as no specified weights were carried, my brother Hiram and myself rode a horse in nearly all of the trots.

I had a little gray horse at that time which I was too light to ride and keep his head up. A horseman, (as good a one as I have ever known, even up to this time), lived at Yorkville and kept a hotel for road riders on Third Avenue. His name was Geo. Hazzard. He picked up many nice pairs of carriage horses, also was handy at pricking and docking, etc., and bought horses for the Bradish family, also for Mr. Sheppard F. Knapp, who was Cashier of the Mechanics' Bank and father of our worthy friend, Shep. F. Knapp, of the present day.

Mr. Hazzard said to me one day, "Ike, bring your gray horse, saddle and bridle, down to my house, and I will fix it so you can ride him easy, and keep his head up, too." This horse belonged to Mr. Daniel Ainsly, a New York butcher. I took the gray to him as invited, and he did fix him, in the first place by passing a strap under the saddle, letting it come up through the crupper-iron at the back part of the saddle and over the top; buckled it together with a ring in it; then took a short standing martingale, had a piece of leather sewed on the brow band to keep it, and coupled it with the ring in front of saddle so I could take it up or let it out at my pleasure. When I tried it on the horse it worked like a charm, and I won a number of purses with him after that.

In 1853, just twenty years later, I had gone to Long Island to live. I left Harlem, where I kept a hotel for ten years, and moved to the Union Trotting Course. This was the year in which the great three miles and repeat trotting purse and stake came off to 250-lb. wagons. The horses entered were Kemble Jackson, Pet, Boston Girl, Iola, Honest John, and O'Blennis. I had at that time for Jas. Bevins and Mr. Joe Tucker a brown mare called Bet Bonnce. I was exercising her one day on the Union, and Hiram was driving Kemble Jackson. I then told him I thought from the way he was moving that he could beat O'Blennis and all the rest of them, as he could pull the wagon just a little faster than the mare could draw me to sulky, and I had driven her in 2:38. At this he made the remark: "If I felt sure of his not getting his head down with me when he made a break I think I could win it, too."

This horse, Kemble, had lost some races before by getting his head down when he broke, and was thereby distanced. I then said to him: "Why don't you rig such a check on him as I had for the Ainsly horse, which helped me to beat you three or four races on the old Harlem track?" "How was that rigged, Ike?" he asked, and I answered him in an off-hand manner, telling him how it was. He then said to me: "I wish you would come down to my house as soon as you put your mare up, Mr. Reynolds, the owner will be there, and you can give him the plan of it; you know it may help us." I told him I had not time to come down, but said: "I'll explain it to you now so you can make no mistake," and so I did. Mr. Reynolds got the check made, and Kemble was a different horse with it on when driven to a break, and caught his trot quick.

Here I interrupted him by saying: "It is strange such an interesting matter not given in Hiram's book." "I can't help that," resumed Mr. Woodruff, "but for what I say as to the check and its use on the Ainsly horse, I refer with pleasure to Mr. George Perrin, Sr., who is in New York to this day, and who owned a number of old-time trotters himself, such as Americus, Norwalk, Lady Temple and others.

It has been thought by many people that my brother Hiram invented the check, but neither in his book or in any other place does he claim anything of the kind. Mr. Charles Oakley knows who got it up, and all about it, too, but I have not seen him for years. He used to attend all the trots in those days; I think he is living yet.

## Perfect Sight a Necessity in the Race-Horse.

The importance of perfect sight is a matter of vital consequence to the race-horse, but few trainers seem to think so, judging from the careless manner they act in cases of weakness of the eyes, and the speculative manner in which they are treated, imagining, as they do, that it is, perhaps, only a little cold or a slight blow, forgetting that the first symptom of cataract is ophthalmia, and to the inexperienced this serine forerunner of blindness appears only to them as a slight cold, and is treated with indifference. Many a race-horse, from impaired vision, loses all his chances for a race by his uncertainty of the surroundings and a nervousness caused thereby—objects having made a wrong impression on his mind, causes the animal to be uncertain of everything, even of his own actions, and to become so nervous as to be unfit for racing purposes. If all defects of the eye, no matter how slight, be treated properly by an expert eye diseases, many an animal would to-day be in a different condition as to his sight, and be of a greater value to his owner. As the commencement of amaurosis (glass eye) could be detected and perhaps cured by an expert eye diseases, when many a valuable animal has been permanently destroyed from the want of knowledge of the disease on the part of the trainer.

There are many competent veterinarians that could be consulted on these cases, but Dr. Delisier makes a specialty of eye diseases, and the reputation that gentleman bears as a veterinarian, ought to render his opinion in these cases of great value to the owners of valuable running or trotting horses. There cannot be the slightest doubt that many a race has been lost from impaired vision, and the clearness of sight is as important as the soundness of legs; 'tis true, the latter does the carrying and makes the speed, but without the former being in perfect condition, the legs will fail to perform their duties from a want of confidence on the part of the animal, as everything he sees has a double or blurred appearance, which will act in such a manner on his entire nervous system as to virtually kill all the chances he would otherwise have had for the race. I hope owners and trainers will give this important matter proper consideration, and not continue to treat it as lightly as they have done in the past.—*New York Sportsman*.

J. Beach has sold to H. A. Wright, Astoria, Oregon, a bay colt, two years old, by Altamont, dam Jennie S., by Post's Hambletonian; second dam Princess, by Maubruno Patchen. Price \$400. This youngster is yet unbroken, but promises well. Mr. Wright has named him Altamont, Jr.

Harvester and Busybody.

The London correspondent of the New York Spirit, in his letter anent the Falmouth sales, makes this gossipy reference to some horses and people prominent there and since:

We have had a busy week at Newmarket, with the sale of Lord Falmouth's horses on Monday, and the racing of the week. I was surprised to find so few representatives of your side of the water. Mr. Bathgate was at the sale-ring and so was Mr. Ten Broeck, but the former gentleman told me he could not see a third American present. Sir John Willoughby was so bent on having Harvester that Tom Cannon, who was bidding on behalf of Mr. Beird, gave in, the colt having at that time passed what Cannon thought it was worth.

"Shall I have another shot, Captain?" Sir John Willoughby said to Captain Machell, when \$5,000 guineas was the bid against him.

"Just one more, I think, Sir John," Captain Machell answered, and this shot elicited opposition.

He was galloped and much disappointed his new friends next morning; but the test to which he was subjected is not by any means a final proof, as he can be made much fitter by the Derby day, at least so Captain Machell declares, though Matthew Dawson does not think so. The famous trainer and Archer had put down Harvester as likely to make about 5,000 guineas, so that the colt exceeded their hopes.

"In my opinion he is a very dear horse," Mr. Bathgate said to me. "I should put him down at about 2,000 guineas, if I had to price him."

Cannon would not be stalled off on Busybody, but, so far as I could make out without asking too many questions, the party do not like her now that they have got her quite as well as they thought they should; but this may be that she is not fit, at any rate I asked Baird's chief adviser whether I should plunge on the mare for the One Thousand, and he replied very doubtfully. She won her race, all the same, but if she had been really fancied in earnest she would have started at odds on, instead of 9 to 4 against, and the fact of the half-trained Queen Adelaide, who had disappointed her party, being second, half a length off, discounts the victory.

Baird himself is a very wealthy young Scotchman, who raced under the name of Abingdon and was "warned off" for two years for foul riding. The sentence has just expired. I know nothing of him personally, but am told that a few days before he came of age he said to his mother:

"I wish my birthday would come! I am looking forward to it anxiously, I can tell you!"

"Why, dear, what do you want it to come for?" his mother inquired.

"Because I want to turn you out of my house," this loving son replied, and I believe he acted up to his intention. He is, of course, certain to go straight so long as Cannon retains the charge of his horses. He also bought a colt out of Wheel of Fortune, which they tell me is very smart.

Death of Echo, Jr.

Mr. L. Hewlett's promising young stallion Echo, Jr., died at Stockton last Saturday, the trouble being reported as colic. Mr. Hewlett is to be commiserated in his ill fortune. Echo, Jr., was four years old this Spring, and was a richly bred young horse. He was the subject of all illustration and descriptive sketch in this paper, issue of March 1st of the current year. He was by Echo, his dam Ila by Priam, second dam by Kentucky Hunter, third dam a pacing mare raised in Oregon. He had a double cross of Hambletonian through Echo and Priam, both of established reputation as sires, a strain of American Star through the dam of Echo, one of Glencoe through Revere the dam of Priam, and one of Kentucky Hunter through the dam of Ila. Both Ila and her dam were speedy and stout though never trained, and Echo, Jr., was himself a trotter, and one that gave every evidence of a kindly union of the different strains that made up his pedigree. He was a horse of fine size and substance, and was probably the best entire son of Echo in the State. His untimely taking off was a loss to our breeding interests. Mr. Hewlett valued him at \$4,000.

Trotting at Portland.

PORTLAND DRIVING PARK, Saturday, May 24th, 1884.—Trotting for named horses; purse \$100, second to receive \$25.  
Black Hawk, blk b, 5, by Rockwood, dam the Fisher mare by the Jackson horse..... (O. Smalley) 1 2 1 1  
May Wintler, b m, 5, by Rockwood, dam by St. Louis..... (John Pender) 2 1 2 3  
Cora H., rn f, 4, by Kisher, dam by Pathfinder (L.B. Lindsey) 3 3 3 2  
Time—2:43, 2:44, 2:41, 2:41.

Pools—Black Hawk, \$30, Cora H., \$20, May Wintler, \$10.

CITY VIEW PARK, May 25th, 1884.—Trotting; purse \$100, second to get \$25.  
Kelly, ro g, aged, by Copperbottom, dam unknown (J. Misner) 1 1 1  
Florence E., cb m, aged, by Pathfinder, dam by Jack Misner..... (Waterford) 2 2 2  
Time—2:34, 2:37, 2:37.

Same Day—Trotting, 2 in 3. Purse \$50, \$12.50 to second.  
Kelly, ro g, aged, by Copperbottom, dam unknown (J. Misner)..... 1 1  
Jobany Blue, b g, aged, by Alexander, dam by Belmont (Ruiter).... 2 2  
Time—2:41, 2:37.

Gentleness and patience work wonders with many a horse thought to be incorrigible. The Portland Rural Spirit notes the following case in point: For several years Mr. Van B. De Lashmitt, of this city, has owned the little roan gelding Kelly, using him for a driving horse in his business; he was also used as a family roadster. A time or two Kelly has been on the track, but was so rattle-brained that he has been regarded as an unsafe horse in a race. This spring Mr. James Misner commenced to drive the old fellow, (he now being 16 or 17), and he has already such a gait as well as steadiness that those who control him now offer to match him against any horse, mare or gelding in the state, 2 in 3 or 3 in 5, to harness and to rattle. The boys attribute his present success to Mrs. De Lashmitt, who they say has taught Kelly some sense.

The Eastern papers get a little mixed in Premium's pedigree. They give it as by Castor, dam by Flying Cloud. Flying Cloud was a mare by St. Louis, and was the dam of Premium, not the sire of her dam. Flying Cloud was the filly that Cy Mulkey claimed and ran a quarter in 20, or somewhere about that figure.

D. W. Beach, of Helena, Montana, has lately arrived from the States with a select lot of horses. Among them is the stallion Sir Rocco, by Stephen A. Douglas; dam by Snaper, a son of Ethan Allen. Also Starlight Hambletonian, by Marlborough, son of Rysdyk's Hambletonian; dam by Fortuna, son of Ethan Allen.

With the consent of all the subscribers to the Champion Stallion Stakes of 1885, at Monmouth Park, the nomination of Mr. B. G. Thomas' stallion King Ban, by King Tom—Atlantis by Thormanby, has been admitted.

Louisville Excerpts.

(New York Sportsman.)

The Cup.—For months toots, correspondents and private communications had given tips, which resulted in causing first one and then the other of the long list of candidates to rise in favor among speculators, hence April Fool, Harry Gilmore, Blazes, Wallensee and others had their periods of prominence and, consequently, public favor. Towards the time for the race Wallensee had waded into the exalted position of favorite, and sold for \$800 as first choice, in which April Fool brought \$510, Harry Gilmore, \$310, Blazee, \$220, Barnum and Taggatherer each \$105. Wallensee was so much the favorite that, in the pools in the morning of the race, his name was barred. Not a word was heard from Barnum's friends, though unquestionably he had no few, as the vociferous cheering after the end of the race could have only emanated from the throats of those whose worldly gains had been augmented by the performance of the son of Bonnie Scotland.

As the race was a long one little impotence was attached to the relative positions of the horses during the run of the first mile and a quarter, except that I was satisfied that April Fool, who had set the pace at the start, (and kept the lead), could not hold out, and such proved the case. Murphy, who rode Wallensee, held him back, (as everyone supposed, in reserve), and Harry Gilmore remained near by him as though he alone was to be feared, notwithstanding the persistent leading of April Fool, and the rush to the second place by Rosaline; Barnum laid so far behind that his name was scarcely mentioned, (save by the crier of positions). As the turn around the lower side was reached, considerable hustling was observable among the bunch which the horses had gotten into, and it was amusing to hear the different cries of the interested crowd, "April Fool wins," "Gilmore will finish in a canter," "Oh! my Wallensee," and the like. Down the quarter they came pell mell, and it looked like anybody's race. All at once a shrieking voice down the stretch yelled out: "Oh! my Barnum; go on, and you'll take the money!" Sure enough, this horse had dashed through the bunch, and was fairly flying, Gilmore and Wallensee catching the whip and fighting for the lead. Theyer, on Barnum, was flourishing his whip as though punishing his horse, but, in reality, he never touched him until within a rod or two of the string, then he laid it on, and the gallant son of old Bonnie Scotland jumped like a bullet out of a gun and won by a short neck, about the same between Gilmore and April Fool for second and third. Wallensee was two or three lengths behind, and fourth in the race. Mutuels paid, \$107, and those who had chanced a little money in the pools or books 20 to 1 was their reward.

It has been many years since I saw as much excitement over the winnings of one horse. H. Eleworth, owner of Barnum, had his hands filled with currency, and no few outsiders had secured from one hundred to a thousand dollars. Wine, beer, and stronger stimulants were applied as nerve settlers, but joy at success rode supreme, and the lucky fellow had a good boisterous time over the result.

The Tobacco Stakes brought out eight starters out of forty-one entries. Gnitur was the favorite, Mark Daly second choice, Exploit and Shelby West selling close on to the two first named. Murphy was on Gnitur, Dnffy on Daly, and Wolfe on Exploit. As they took their preliminary canter I fancied Daly for the winner. He is a fine-looking colt, and was in excellent form. I had no idea that Exploit had a ghost of a show, though Madison looked so well, and being by Glengarry, I was rather inclined to think him good enough for a place. At the send-off Madison set the pace, and for nearly three-quarters of a mile led the gang. Here Mark Daly began running up, and when squarely in the home-stretch it was dollars to cents that he would win the heat, and so he did by a short length in front of Exploit, who was the same distance from Venture. Time, 1:46.

In the second heat Boreas took the lead, with Gnitur at his side, Exploit right at the two lengths in front of Daly, and Venture, Madison, and Shelby West being behind them. Down the backstretch these positions were maintained, but at the turn, Daly began going up, and passed Gnitur and Exploit; they both laid up to him, however, and gave him all the work he wanted to the finish. Time, 1:46. Mutuels paid on Daly, \$38.90, for a place, \$16.50.

Eighteen Starters in a race is rather a novel sight out West, but when the winner was regarded as an outsider and accomplished the remarkable feat of reducing the record on a run of five-eighths of a mile, the sight became all the more enjoyable. With such races as Princess, Premium, Force, Gilt, Sandie McNairy, and the Admiral among the entries, it was not astonishing that the one which won had to put its best foot foremost. Premium sold for \$100 in the pools, Gilt, \$75; Force, \$65; the Admiral, \$50; Princess, \$38; and the others from that amount down to nothing. At least a half hour was consumed in getting a start, but when the flag dropped the lot got away evenly. From the jump off the pace was tremendous. At the quarter pole the struggle was between Princess and Premium, and down the run they came under the whip, reaching the string in the order named, Princess a short neck in front, and Premium a half length ahead of Force. Time, 1:01. Mutuale paid, \$57; for a place, \$28.60.

There is quite likely to be a lawsuit over Barnum's Cup winnings, as there is a dispute between Woodford and Eleworth as to his actual ownership—or, rather, as to the ownership of his racing qualities. These peculiar arrangements always end in trouble.

The bookmakers at Louisville have in most instances lost money, and regret having paid the \$15,000 for the privilege of doing so.

Green Morris seems to have lost his grip, at least his colors are not as often in front as of yore.

Marc Daly wears a bar plate in front.

Three years ago John A. Cardinel, while in Portland on a visit, made Billy Ayres a present of a colt. Billy wrote to Ab. Stemler, then associated with him, to go and get the colt and care for it, but Ab. wrote back that he had seen the colt, and it wasn't worth the having. So he didn't take it. That colt was John A. by Monday—Lady Clara now three years old and owned by H. C. Jndson. The Rural Spirit calls it a "good joke," but will venture that when Billy saw John A. win everything he started for this Spring, and led the field for the Peruvian Bitter's Stakes over a cup distance in 4:01, he thought it was the most miserable kind of luck without a symptom of a joke about it.

A reportar of the New York Spirit, who has been looking at Jim Kenwick, calls Buchanan "a splendid specimen of western manhood."

Col. G. W. Dickey has a stable of trotters at Pittsburg Penn.

The French Derby.

The Prix dn Jockey Club or French Derby was run on Friday, May 25th.

The race had seven starters with Mr. C. J. Lefevre's Archiduc, a great favorite, he having won the Poule d'Essai (French 2,000 Guineas) when he beat the Duke de Castries' Little Duck with the greatest ease, and as he followed that success up by winning the Prix Daru and the Grand Poule des Produits, his success was deemed a certainty. But in the interval Little Duck improved immensely, and was able to beat Archiduc by two lengths quite easily. At the start Kiss, who is also owned by the Duke de Castries, with M. P. Ammont's Fra Diavolo, cut out the running. At the turn, little less than half a mile from the end, Archiduc joined Little Duck and Fra Diavolo and a good race followed, with Little Duck gradually drawing away and finally winning somewhat easily by two lengths, Archiduc second, a neck in front of Fra Diavolo. The conditions are as follows:

Prix du Jockey Club (French Derby), for three-year-olds, at £40 each, £24 forfeit, with £2,000 added, the second to receive £100; colts to carry 133 pounds, fillies 130 pounds; a mile and a half.  
Duke de Castries' br c Little Duck, by See Saw, dam Light Drum.... 1  
Mr. J. C. Lefevre & Co.'s br c Archiduc, by Consul, dam Abbees..... 2  
M. P. Ammont's ch c Fra Diavolo, by Trocadero, dam Orpbelin..... 3  
Four others ran, including the Duke de Castries' filly Kiss.

In winning the Prix du Jockey Club two years in succession the Duke de Castries is following in the footsteps of the Comte Lagrange, from the excoitors of whom Mr. Lefevre and Tom Jennings bought Archiduc for £4,000. The Duke winning the race last year with Frontin, the dam of which, as also was Light Drum, purchased in England by M. Malapert and transferred to the Duke of Castries, and were sent to the Duke's stud near Mouchins, where he was foaled in 1831. He is a bay colt with plenty of substance and on trial was found to be the best of the string this season. He did not run as a two-year-old, but made his debut at the Paris spring meeting, the Bois de Boulogne course, when on Sunday, March 30th, he won the Prix de Guiche, at a mile and a quarter, from a field of seven. On Monday, April 14th, he won the Biennial Stakes, at the same distance, from a field of five. On Sunday, the 27th, he met Archiduc for the Poule d'Essai, a mile, and was beaten by two lengths, on which occasion he was ridden by Tom Cannon, with Archer on Archiduc, since which he has probably not run in both the other races won by Archiduc. The bay filly Kiss, by Scottish Chief, was second. It is more than likely that Cannon was again on Little Duck, Archer having been engaged to ride Archiduc. Little Duck has no engagements in England, but he is in the Grand Prix on the 8th prox., when he will meet not only the best of the French horses, but some of the best of the English, including possibly Queen Adelaide, St. Medard, Loch Ranza and the Lambkin.

Montana Notes.

(Rocky Mountain Husbandman.)

Col. Hndndley's stable of thoroughbreds are now in fine form. They are being daily exercised by Arthur, a very efficient trainer and fitter, as well as a thorough gentleman. Each animal is a fine individual specimen and the breeding of the six is as follows:

Red Boy, b. h., 1875, by War Dance, dam Neilson, by imp. Sovereign.

Kelata, ch. f., 1882, by Scotland, dam Calamity, by King Lear. Yogo, ch. f., 1882, by Red Bluff, dam Lady Bassett, by Asteroid.

Glendella, ch. f., 1881, by imp. Glenelg, dam Cordelia, by Lexington.

Anstraid, ch. f., 1881, by Red Bluff, dam Peggy Morgan, by Asteroid.

Lady Prewitt, b. f., 1879, by King Alfonso, dam Veritas, by Lexington.

From reports received from different parts of the Territory we learn that the drivers, E. C. Nash, formerly of Iowa; Ed. Lafferty, of Bozeman; Jas. Stevens, formerly of Kentucky; Harry Smiley, from Oregon; Mr. Cochrome, from Kentucky; Wm. Bryan, of Kentucky; Mr. Pigeon, of California; Dave Johnson, Ed. Dnnpny, C. D. Coward, of San Francisco; Mr. Jeffree, of Kentucky, and Thos. Stuart are now going very fast.

Messrs. Hndndley & Clark, of Riverside Stock Farm, have sold to Wakefield & Hoffman, of Bozeman, their thoroughbred stallion Northland, 16½ hands high and weighs over 1,200 pounds. He is fashionably bred, being by Norton, (full brother to Norfolk) son of Lexington; 1st dam Katie, by imp. Glencoe; 2d dam by Medco; 3d dam by Koscinkso; 4th dam by Blackbarn's Whip; 5th dam by Diomed.

Noah Armstrong's stable, of Madison county, consists of ten head of trotters and runners, all now in good fix and being shaped for the fall meetings. We expect some lively races, that the Montana records will be beaten this fall, and in time most of the others.

Thos. Cruse has now in training at the fair grounds, Helena, bay stallion Leader, foaled 1879, sired by Headlight, (thoroughbred), dam Lucy, by Kentucky Chief; 2d dam Topsy. He is a fine specimen of a horse.

Geo. Wakefield, of Bozeman, one of the proprietors of the National Park Transportation Company, has purchased of Messrs. Hndndley & Clark, a chestnut two-year-old colt, sired by Ben Lomond, Jr., dam Chicago Maid.

S. E. Larabie, in addition to his trotters, has given Mr. Baker charge of his thoroughbred colt Vice Regent, by Regent, dam Christine, the dam of Bonnie Anstralian. He will be fitted for the fall races.

Archer was not only loudly hooted, but pelted with lumps of turf when he won the French Two Thousand in the Bois de Boulogne on Archiduc. He got it even hotter than poor Donohue caught it at Epsom over his "Hopeful" exhibition. The Tinman took it very philosophically. "I'd no idea what beastly black teeth Frenchmen had before," said Fred as he got into the scale. "How did you find that out?" said Bob Topping, as the clerk of the scales gave the welcome "all right." "Why, there wasn't a hegger of a Frenchman that wasn't howling and harping like an ass as I passed the post, so I amused myself by examining their grinders," replied the champion rider.

Col. William Doolan publishes in the Ukiah Dispatch the following challenge: "I will trot, at the fall meeting of the Ukiah Park Association, colts (by my stallion 'Young Elmo') one, two or three years old, against any colt or colts, foaled in the county—the get of any other stallion. Race—V heats, for \$50 a race. These colts are out of common—One hundred and fifty dollars each would buy them."

## ATHLETICS.

## The Olympic Games.

REFEREE—Col. G. C. Edwards. STARTER—W. C. Brown.  
JUDGES—E. S. Emmons, G. H. Strong and W. Leviston.  
TIMES—P. McIntyre, D. McMillan and D. Eisenman.  
ATHLETIC COMMITTEE—J. Hamer-Smith, W. C. Brown, R. P. Doolan.  
CLERK OF THE COURSE—R. T. Stombs.

The Olympic Athletic Club held their Annual Spring Meeting at their grounds, Oakland, Friday, May 30th. The day was all that could be desired and the grounds were just comfortably filled with interested spectators, many of whom were ladies. The day's sport was excellent and the many close contests, particularly the one half mile bicycle race, fairly roused the enthusiasm of the assembled multitude. The management as usual was excellent. The non-appearance of a considerable number of the competitors rendered a great many of the trial heats uninteresting. Nearly all games suffer through the non-appearance of competitors, and we think the time has now arrived for Clubs to take stringent measures to prevent a repetition of this character. The severe handicaps account in a great measure for the absentees in the handicaps, but there is little excuse for the competitors entered for the scratch events failing to appear. Undoubtedly the most meritorious performance of the meeting was the extraordinary running of Phillips who is just eighteen years old and making his first appearance captured the maiden race rather easily and secured the third heat in the 100 yds. handicap, from the 3 yard mark, defeating Lucas (2 yds.) in 10 $\frac{1}{2}$  sec. and in the final was best beaten by Walker in 10 sec.; the 220 yds. handicap was also secured by the speedy Phillips in splendid shape. Lucas showed up very prominently, securing three victories, defeating in each event representative performers, viz.: in the 100 yds. scratch race, running wide jump and putting 16 $\frac{1}{2}$  shot. The bicycling riding of Cook—who is a rider of a few short months—was a perfect treat and his victory in the half mile scratch race was very popular. Cook is well strung together and with judicious development is the man who will reduce our records till they will bear favorable comparison with eastern records. The riding of Finkler, Tenney, Mohrig and Gibson was excellent, and showed a very marked improvement over any of their previous attempts. Finkler, although defeated in the one-half mile race, conclusively demonstrated that for a long distance, at the present time, he is *facile princeps*. Haley's reappearance was very unsuccessful as in the first race he pulled up lame. Probably the only surprise of the meeting was the defeat of Rey Locke by T. Jennings, in the two mile race, and it seems strange that a man capable of beating 4:50 for a mile, could not do better than 10:46 for two miles. It is a great pity that any doubt should have arisen regarding the decision in the one-hundred-yard scratch race, but we think, after mature deliberation, that the best man secured the victory. Lubbock in good condition could certainly have secured first place, and Jones, if he would only train, can make the best of them run. Flynn trained conscientiously and ran throughout the day with indomitable pluck, and his defeat in the one-hundred-yards scratch race by the shortest of distances, after a most desperate struggle, should not detract from his really splendid effort. Flynn will yet see the day that he will be able to vanquish his opponents of Decoration Day. It is a very open question in the minds of a great many, whether if Phillips started in the scratch race, he could not have landed it, and judging by the events of the day it looks inclined that way. Coast records were lowered in the one-half mile scratch bicycle race, five miles bicycle race, and by the second man in the one mile walk. The first mile in the five mile bicycle race, is claimed to have been made in 3:14, but it is not official, however. The obstacle race sent the spectators home in a pleasant mood, and well thoroughly pleased by the afternoon's programme of athletic sports. A summary follows:

One Hundred-Yards Maiden Race, (open).—A. C. Phillips, 1st; W. H. Newell, 2d; H. R. Hertel, O. A. C., 0; J. L. Allen, 0; M. M. Martin, O. A. C., 0. Phillips ran in splendid style and won handily by a few yards. A hard race for second position. Time 10 $\frac{1}{2}$  seconds.

One-Mile Maiden Bicycle Race, (open).—First heat—W. H. Gibbons rode over the course alone in 3 minutes, 59 $\frac{1}{2}$  seconds. Second heat—F. R. Cook, 1st; J. A. Sheldon, 2d. Won with great ease in 3 minutes, 16 seconds. Third heat—None of the riders appeared. Final heat—F. R. Cook, 1st; W. H. Gibbons, 2d. Won easily. Time 3 minutes 19 $\frac{1}{2}$  sec.

One-Hundred Yards Scratch Race (open).—First heat—H. J. Lucas ran over the course, unopposed, in 12 $\frac{1}{2}$  seconds. Second heat—J. W. Flynn, N. A. C., 1st; W. C. Lubbock 2d; R. B. Jones, M. C. C., 0. Flynn and Lubbock beat the pistol at least 5 feet and raced down together to the 70-yard mark when J. Flynn forged ahead and won in 10 $\frac{1}{2}$  seconds. Final heat—Flynn and Lucas after a severe struggle breasted the tape so close together that the followers of each claimed a win for their man, but the referee decided a tie, a decision which met with the approbation of the disinterested spectators at the finish. Lucas got decidedly the worst of the start. In the run-off Flynn was penalized one yard and got a little the worse of the start, but it was evident that Lucas waited for him to close up, and then the pair raced home together with Lucas slightly in advance. Time 10 $\frac{1}{2}$  seconds.

One-Mile Handicap Walk, (open).—C. B. Hill, M. C. C., 125 yards, 1st; J. B. Benjamin, O. A. C., scratch, 2d; J. H. Spiro, M. C. C., 75 yards, 0; M. McIlwaine, 150 yards, 0; M. J. Lyons, 0. Hill walked in splendid style and finished first in 7 minutes, 30 $\frac{1}{2}$  seconds. Benjamin overhauled the other competitors and passed the winning post 14 $\frac{1}{2}$  seconds later. This would make the complete mile walked in 7 minutes 45 seconds, which is the best amateur time ever made on the coast.

Half-Mile Scratch Bicycle Race, (open).—First in each heat to start in the final.—First heat—H. Tenney, M. C. C., rode over the course alone in 1 minute, 33 $\frac{1}{2}$  seconds. Second heat—H. C. Finkler, O. A. C., 1st; E. Mohrig, 2d; F. W. Gibson, 0. Mohrig started off at a rattling pace and led till coming down the straight when Finkler challenged the leader, and after a hard struggle Finkler won by a few inches to spare. Gibson kept up close throughout and rode very pluckily. Time 12 minutes 31 $\frac{1}{2}$  seconds. Third heat—F. R. Cook, unopposed, won the heat in 1 minute 39 $\frac{1}{2}$  seconds.

Final Heat.—F. R. Cook, 1st; H. Tenney, M. C. C., 2d; H. C. Finkler, 0. Cook rushed off with the lead at a terrific pace with Tenney and Finkler in close attendance, the grand stand was passed in the same order and the excitement of the spectators was fully aroused and midst the cheers of the crowd the riders continued exerting every muscle for the lead. At the back stretch Finkler made a great effort for the lead but his opponents answered gallantly and the same order was maintained when they entered on the last lap. Tenney and Finkler gradually gained on the leader and dashing down the home-stretch there could not have been three yards be-

tween the riders and, despite all the efforts of Tenney and Finkler, Cook won the grandest race ever seen on the grounds by a few short inches. A very short distance separating the second and third man. Time 1:29 $\frac{1}{2}$ , which is the best ever made on the coast.

100 yds. Handicap Race, (open).—The first in each heat to start in the final.—First Heat, A. B. Tennent, M. C. C., 6 yds., 1st; J. W. Flynn, N. A. C., 4 yds., 2d; O. A. Tolle, O. A. C., 14 yds., 0; W. R. Stewart, scratch, 0; time 10 $\frac{1}{2}$ . Second Heat.—J. H. Walker, 8 yds., 1st; A. L. Harris, 5 yds., 2d; P. Jacoby, O. A. C., 14 yds., 0; time 10 $\frac{1}{2}$ . Third Heat.—A. C. Phillips, 3 yds., 1st; H. J. Lucas, 2 yds., 2d; R. Luttringer, C. A. and L. C., 9 yds., 0; time 10 $\frac{1}{2}$ . Fourth Heat: G. E. Petterson, 9 yds., 1st; B. A. Benjamin, M. C. C., 5 yds., 2d; R. S. Haley, O. A. C., scratch, 0; H. R. Hertel, O. A. C., 0. Haley got a very bad start and pulled up lame early in the race. A close finish—time 10 $\frac{1}{2}$ . Final Heat: J. H. Walker, 1st; A. C. Phillips, 2d; A. B. Tennent, 0; G. E. Petterson, 0. Walker got a splendid send off slightly ahead of the pistol and won, though Phillips ran him very close; time 10 seconds.

Two Mile Handicap Race, (open).—T. Jennings, 25 yds., 1st; Ray Locke, scratch, 2d; C. B. Hill, M. C. C., 200 yds., 0; F. M. Day, M. C. C., 100 yds., 0; A. W. Brown, 125 yds., 0; R. Gibson, 150 yds., 0; E. Long, 150 yds., 0.

After negotiating half a dozen laps the long handicap men gradually sought the shelter of the dressing room, Gibson being the last one to leave the track, clean run out, but with a long lead. Jennings and Ray Locke finished alone, the former winning by at least 60 yds. in 10:30 $\frac{1}{2}$ .

Putting 16lb. Shot (open).—H. J. Lucas, 32 ft. 4 in., 1st; J. B. Tennent, M. C. C., 29 ft. 10 in., 2d; R. M. Ross, 0; C. J. Shuster, O. A. C., 0; F. W. Randolph, 0.

220 yds. Handicap Race (open).—First Heat: A. C. Phillippe, 7 yds., 1st; A. B. Tennent, 12 yds., M. C. C., 2d; Time 27 $\frac{1}{2}$  sec. Second Heat: J. W. Flynn, 8 yds., N. A. C., 1st, V. C. Driffeld, O. A. C., 20 yds., 2d; W. R. Stewart, O. A. C., scratch, 0. Time 24 sec. Final Heat—A. C. Phillippe, 1st; J. W. Flynn, 2d; A. B. Tennent, 0; V. C. Driffeld, 0. Phillips ran round his men in fine style and won after a good race. Flynn secured second position. Time 23 sec.

Running Wide Jump.—H. J. Lucas, 19 ft. 7 in., 1st; R. B. Jones, M. C. C., 19 ft. 5 in., 2d; R. Gibson, 18 ft., 3d; W. R. Stewart, O. A. C., 0; C. J. Shuster, O. A. C., 0.

One quarter Mile Scratch Race (open).—Barney Benjamin, M. C. C., 1st; Ray Locke, 2d; T. McGovern, P. A. C., 0. Benjamin led throughout and won the race well in hand. Time 56 sec.

Five Mile Handicap Bicycle Race.—H. C. Finkler, O. A. C., scratch 1st; Geo. Day, scratch, 2d; Harry Tenney, M. C. C., 250 yds., 0. Finkler rapidly overhauled Tenney and after 2 miles had the race his own way. Tenney lost his saddle near the end or he probably would have occupied second position. Time 17 min., which is the best amateur time ever made on the Coast.

Obstacle Race (open).—Ben Benjamin, M. C. C., 1st; C. J. Shuster, O. A. C., 2d; V. C. Driffeld, O. A. C., 0; B. A. Benjamin, M. C. C., 0. This race caused great amusement for the spectators, particularly when any of the competitors came to grief. Benjamin was the first to breast the tape, although Driffeld could have done so if he had not stopped a few yards before the tape, but as Driffeld forgot to overcome a few of the obstacles he was disqualified. Shuster, the next man home, protested Benjamin because the latter jumped into instead of over the ditch. Of course the protest was not allowed, as a competitor is fully entitled to jump into the ditch. As the ditch was rather deep the wet clothes is a greater hindrance than most people imagine.

## Inter-Collegiate Championship Meeting.

The ninth annual competition was held at the Manhattan A. C. Grounds, New York, on May 24th. The meeting was remarkable for the general improvement in a great many of the events; three college records and three American records were beaten. The sensational event of the day was the victory of Baker over Brooks in the one furlong race. Harvard again won the Silver Cup, emblematic of the college championship. The result follows:

One hundred yards race.—Final heat; H. S. Brooks, Yale, first; W. Baker, Harvard, second. Won by a foot. Time, 10 1-5.

Two mile bicycle race.—L. P. Hamilton, Yale, first; C. A. Reed, Columbia, second. Time, 6:48 1-5.

One mile run.—R. Faries, U. of Pennsylvania, first. H. L. Mitchell, Yale, second. A desperate race. Time, 4:45 1-2.

Running wide jump.—O. Bodelson, Columbia, 21 feet, 3 1/2 inches, first; A. G. Fell, Princeton, 20 feet, 11 1/2 inches, second. This jump beats the college record 1/2 an inch.

One-quarter mile race.—W. H. Goodwin, Harvard, first; C. Smith, Columbia, second. Won with ease in 52 3-5 sec.

Putting the shot.—D. Reckhardt, Columbia, 36 feet, 3 1/2 inches, first; J. H. Briggs, Yale, 35 feet, 8 inches, second.

One mile walk.—E. A. Meredith, Yale, 7 min. 33 1-5 sec., first; R. V. A. Morris, Columbia, 7 min., 50 3-5 sec., second.

Pole Vaulting.—H. L. Hodge, Princeton, 9 feet, first; H. F. Wardel, 8 feet, 6 inches, second.

Running high jump.—C. H. Atkinson, Harvard, 5 feet 9 1/2 inches, first; H. L. Clarke, Harvard, 5 feet, 8 1/2 inches, second. This breaks the amateur record of America.

One hundred and twenty yards hurdle race.—R. H. Mulford, Columbia, first; J. D. Bradley, Harvard, second. Time, 17 1/2 sec.

Throwing the hammer.—A. B. Coxé, Yale, 83 feet, 2 1/2 inches, first; E. E. Allen, Harvard, 77 feet, 0 1/2 inch, second. Coxé is a regular giant.

One-half mile race.—W. H. Goodwin, Harvard, first; C. Smith, Columbia, second. Won easily. Time, 2:5 1/2.

Two hundred and twenty yards race.—W. Baker, Harvard, first; H. S. Brooks, Yale, second; C. F. Odell, Yale, 0; H. W. N. Phillips, 0. A good start was effected, Brooks assuming the lead and the 150 yard mark. Baker caught up, and the pair raced together at a great pace up to the 200 yard post when, to the surprise of every body, Brooks fell back beaten, and Baker reached the goal in 22 2-5 sec., which beats all previous records in America and equals the best English record. Brooks passed the 150 yard mark in 15 1/2 sec., which is also the best time made in America.

There is some talk that a match race between Harmon and Ryan, for one-hundred yards, will take place at Woodland. Harmon can defeat Ryan with the greatest of ease, and a square race between them would be entirely devoid of interest. *Nous verrons.*

Kenneth A. Skinner was defeated in a five mile roller skating match by Nate Clarke, of Pennsylvania, in the time 18 minutes, 13 seconds, which beats the best on record by 1 minute, 27 seconds.

A football match on roller skates was recently played at Denver, Col.

## Bombay Gymkhana Athletic Sports.

Judging that a short description of the last games of the above club, held early in April, would be interesting to the readers of this column, we have arranged the following account from our esteemed contemporary, the *Asian*:

A large and fashionable audience were present to encourage and applaud, including His Excellency and Miss Ferguson, to say nothing of the swarms of natives that thronged the ropes, and whose spontaneous patronage and ready applause added considerably to the liveliness of the scene.

Throwing cricket ball.—A. Newham, 109 yards 1 foot, first. A splendid throw, but favored by the high wind blowing at the time.

One-mile race—Grantham, first. Although suffering from a bruised leg, Grantham won easily in 5 min. 6 sec.

Running wide jump.—T. C. Crawford, first, 20 feet 6 inches. Crawford was unopposed in this event and cleared the above distance in his first attempt.

One hundred-yard race.—F. C. Crawford, first; F. H. Lyle, second. Crawford won by 2 yards in the very fast time of 10 sec., according to the time returned by the three time-keepers, who held chronographs from Lnd and Blockley. A strong wind was blowing down the course behind the runners, which is an argument in favor of the time returned being correct.

One hundred and fifty yards handicap.—Lyle, 8 yards, first; Blackwell, 11 yards, second; Crawford, scratch, third. A hotly contested race with a splendid finish, in which Crawford got very close to the leaders.

Half-mile steeple-chase.—Allan Arthur, first. High jump.—Crawford, unopposed, cleared the beam at 5 feet 5 inches.

Putting Shot.—W. Murray, 32 feet, 2 inches first; Crawford, 32 feet 1 1/2 inches, second.

One-quarter mile race.—Lyle first, Grantham second, Won easily in 55 sec.

## Wrestling in Private.

A match at Græco-Roman wrestling has been arranged between Tom Cannon and Thiebaud Bauer's Unknown, to be decided in private. It is a novelty in San Francisco, and the more extraordinary, as being in a line of performance which the public had almost come to believe was not susceptible of a tinge of genuineness. If real matches have not, in fact, become legendary and are to be revived, then public interest is likely to be renewed in this acme of athleticism. The affair between Whistler and Cannon, last week, had all the features of a real contest, but, from a lack of confidence born of some years' experience, few people attended it. A private match for a stake with no possibility of any gate money considerations certainly offers no observable reason for a homodrome, except it is intended to prepare the way for future exhibitions in public. For this private match a portion of the money has been put up, and the balance is to be posted this afternoon, the match to be wrestled on the 25th inst., in the presence of six friends of each of the contestants and the representatives of certain newspapers named in the articles. Bauer is to name his man to-day, and we understand he declares it is not himself or Hngues.

## Our Athletic Reporter.

It is perfectly right and proper that newspaper accounts of athletic meetings, etc., should not be filled with meaningless praise, and that deficiencies should not be overlooked; rather that such affairs should be strictly criticised for their own benefit; but when a leading daily of this city, (which generally gives a two column account of a hippodrome wrestling match), has a short notice of one of the most successful athletic meetings ever held in the State, and one which compares favorably with eastern meetings, in which the programme was characterized as "lacking in variety," and in which one-half of the events were incompletely reported, and the other half incorrectly, it is time a protest was entered. In the account to which we refer, the inexperienced and careless work of a decidedly verdant, and apparently youthful reporter, was evident. It was bad enough to see the glaring blunder of records, but when the young man attempted to criticise and discuss matters and performances of which he was most painfully ignorant, then was the climax of immaculate gall reached.

## Whistler Triumphant.

The Græco-Roman wrestling match between Clarence Whistler and Tom Cannon, for \$250 a side, resulted in the defeat of the latter, last Saturday night, in two straight falls, the first in 27 min. and the second in 31 min. From the start it was apparent that the superior strength of Whistler would win him the match. The quickness and agility of Cannon, however, saved him on a great many occasions from what appeared sure falls. Cannon throughout the contest continuously fouled Whistler with his feet. There is some talk of a match between the men at catch-as-catch-can wrestling.

Some Scotch Yankee has invented a compound, known as "skating surface," which can be speedily and cheaply spread over any floor, and is not injured by extremes of weather. Experiments made recently at Lillie Bridge Grounds, London, demonstrated that, with ordinary ice-skates, great speed can be attained, and the usual figures described.

In our account of the Olympic Sports, we forgot to mention that the ground at the take-off for the running long jump was a little too soft, which, together with the poor arrangements, would increase the already creditable character of the jump a considerable amount.

A large audience witnessed the joint athletic exhibition of the Olympic and athletics clubs of Portland, on the night of May 29th. The entertainment was the best ever given in the city.

George F. Davidson, who ran second in the mile race, at the late Harvard sports, in 5 min., 6 sec., is the son of Professor Davidson of the Coast Survey of this city.

G. D. Baird, editor of the *Amateur Athlete*, has been re-elected official handicapper to the National Association of Amateur Athletes.

Brooks, two days previous to the inter-collegiate games, is reported to have run a trial 220 yards in 22 1/2 seconds.

## YACHTING.

## The Antioch Cruise of the S. F. Y. C.

The three days cruise of the San Francisco Yacht Club to Antioch was a complete success in every way. At the appointed hour on Decoration Day, eleven o'clock, the following yachts were anchored off Front street: Schooners Aggie, Fleur de Lis, Chispa, Eva, Rambler, and yawls Frolic, Emerald and Ripple. All the above mentioned vessels started promptly at the second gun fire, with the exception of the Chispa, which seemed afraid to try conclusions with the rest of the fleet, for which, however, there was no occasion, as there was to be no race as far as Mare Island Light House. The only vessel that set light canvas was the Eva, and she only carried hers for a short distance, while the Fleur de Lis only carried jib and mainsail and also towed her boat, a very heavy one at that. When between Angel Island and Alcatraz the fleet was joined by the Whitewing and the Casco, the former coming out of Sausalito, and the latter from Oakland Creek. Some amateur photographers were out in the steamer Rockaway, and, as usual, in the Emerald, and took pictures of the various yachts as they passed. Off Red Rock the Casco passed the Fleur de Lis; while ahead of her was the Aggie which had been the first place from soon after the start, and all the others came along bunched astern. When the Aggie was at Point Pinole the yawls and small schooners were at the Brothers, and with them the Chispa, which left the city about half an hour after the balance of the fleet had gotten under way. Off South Hampton Shoal the Rambler hauled the wind and stood over to the Marin shore where she anchored. The leaders of the fleet came in the following order: Aggie right under Mare Island Light; Casco, well up the Carquinez Straits; Fleur de Lis, near Spanish Point, on the Contra Costa shore; the Whitewing right after her and then the Chispa. The Aggie and the Casco got down their foresails after flattening home and the vessels kept ratcheting slowly to windward, and after going to windward about two miles the Commodore's yacht was seen off Pinole coming slowly along under jib and jigger. A signal was flying which was interpreted to read: "Proceed to Antioch without delay."

The vessels thereupon started sheets and squared away. It was afterwards found out that the Frolic had carried away some of the fixtures to the jaw of her main gaff, thus preventing her from carrying her mainsail. The Aggie squared away under the Fleur de Lis' stern, and soon passed her, carrying the same canvas as the latter, but with her boat hoisted on board. After getting well ahead of her she again sheeted home and waited for White to pass when she again put her tiller up and soon ran by the Fleur de Lis again, but White claimed that his vessel was dirty and that he had not put the foresail up and towed to boat to show other yachts conclusively that he was not trying to race. When Benecia was reached the Chispa fired her gun off several times, probably to let others know that she was there, and stood in to Turner's yard, where she went on the ways. The Aggie and Casco came to an anchorage at Martinez and the balance of the fleet proceeded to Antioch.

The Fleur de Lis by the time the rest of the fleet started up the straits had a large lead and off Bull's Head Point hoisted her foresail. She of course reached her destination long ahead of all the others which arrived as follows: Eva, Whitewing, Emerald, Ripple and Frolic. The Fleur de Lis and Frolic went along the northern end of the steamer wharf, and the Eva "tied up" on the eastern end.

The Ripple and the Emerald anchored while the Whitewing went to the coal wharf, from where she was compelled to shift on account of the river steamers making landings there. The sloop Lively, formerly of this city, but now of Stockton, was down to meet the fleet, with a party of ten on board of her, and was anchored in the river. An entertainment was given, that night, to which the majority of the yachtsmen went. This broke up at about 1 A. M., and then several of the Antioch ladies paid visits to the yachts. All hands "turned out" early the following morning in order to breakfast before the start.

Promptly at nine o'clock the Commodore fired the first Chinese bomb at a distance of a pole and five minutes later the second one, when the yachts started down the river, with the Frolic and Eva leading.

When Pittsburg was reached the Fleur de Lis and Whitewing stood off on the port tack and went through the San Joaquin river and came out at its mouth, while the other vessels kept on through New York slough. When the mouth of the latter channel was reached by the two big schooners the Eva still led. The Whitewing here showed her ability in short work in "turning to windward" and made it very warm for the Fleur de Lis. These two vessels kept tack and tack until Point Edith was reached, on some tacks the Lily weathering the Whitewing and sometimes vice versa.

At this Point White kept on too long on the starboard tack and went aground very hard on the south shore. An attempt was made to get her off by lowering the mainsail and backing the foresail and jib, but this failed to accomplish the object.

A kedge was then carried astern and she was finally warped off, but not until the whole fleet, including the small fry, had got well to windward of her. She was lucky in not striking on the other side of the channel, the middle grounds, as there the bottom is very hard and "clayey," for the probabilities are that there she would have remained until the next high water. The Lively came down the north channel, but came to grief at the northwestern end of the middle grounds, where she stuck until about five o'clock. The yachts made Martinez as follows: Whitewing, Eva, Emerald, Frolic, Fleur de Lis, and Ripple with the Lively, of course, several hours late. The Whitewing made the trip in a few minutes over three hours, remarkably good time, taking into consideration the fact that the vessels had barely a chance to get moving before they had again to come about. The Aggie was still anchored off Martinez, but the Casco had departed early in the morning. The fleet was augmented during the afternoon and evening by the Nellie, Chispa, Rambler, Magic and Spray. The Chispa had been cleaned and "slicked up" during the intervention, and evidently thinking that she should never have such an opportunity of making a record, mustered up enough courage to start home with the others, a very unusual occurrence, indeed. The evening was spent in visiting, the most popular yachts seeming to be the Nellie and the Aggie, the latter having on board a new invention in the way of organs, which has this advantage over other instruments of its kind: that anyone able to turn a crank can extract music from it. The start from Martinez was also made at nine A. M., the difference in distance in high water between Antioch and Martinez about making up for the daily difference in time as regards the tide. In spite of the clause in the sailing orders that "yachts were earnestly requested not to hoist sail until the firing of the starting gun," some of the yachts had their after canvas hoisted at about 8:30. This

was particularly the case with the Aggie and Chispa. Some excuse may be made for the Aggie, as she has a very large and heavy gaff mainsail to get up, while the Chispa end Nellie were Bermudian rigged aft, the latter having discarded the gaff she carried on the last Pacific Yacht Club Cruise. We fail to see the use of a Commodore, if the yacht owners, after electing him, refuse to act under his orders and requests. When the fleet got under way, the Aggie and Chispa were in the van, followed by the Fleur de Lis, Frolic, Whitewing, Nellie, Eva, Ripple, Rambler and Emerald. The Magic had started some time before the appointed time and the Spray not until some twenty minutes later.

The Aggie kept her usual place as leader, and soon dropped the others "hand over fist." Off Eckley's the Chispa luffed and kept shaking until Capt. Eckley himself went on board and took command. While remaining in *statu quo* the Fleur de Lis, Nellie and Whitewing went to the windward of her. The only real racing was between the Fleur de Lis, Nellie and Chispa for second place, and between the Frolic, Rambler and Eva for sixth honors, the Aggie having the race in hand from the start, and the Whitewing acting as connecting link between the groups of yachts mentioned. Off Pinole the Fleur de Lis carried away the strap of her fore-sheet block, and the sail of course flew out to leeward and flapped vigorously. The sheets had to be started, and the yacht kept off until the sail could be secured and a new block substituted. Here the Nellie, Chispa and Whitewing caught up slightly, but failed to pass the Fleur de Lis. The wind continued steady to the Brothers, where it became very light and baffling. The Aggie went in stays near the Sisters, and held down on a long leg on the starboard tack. The Fleur de Lis, as soon as she was able to go to windward of the Brothers, went about, and barely weathered Red Rock, she evidently being on a hunt for "that slant out of San Quentin," which stood her in such good stead two weeks previously, but she failed to find it. The Chispa lugged the Merin shore, where she kept steady wind and had the last of the ebb tide, while the Nellie and Whitewing took a middle course between the Chispa and Fleur de Lis. The Aggie was first in the straits, followed by the Chispa, Nellie and Whitewing. The young flood tide was now making, and the Fleur de Lis having stood too far to the southward, got in close to the island at Fisherman's Cove, and found a calm with an ebb eddy that carried her along the eastern shore of the island, where she got a little breeze on the starboard tack, and stood out into the bay, and went to the south and west of the island. When the Aggie and Chispa got through, she, the Fleur de Lis, was seen pointing well up towards Sausalito with a good breeze. As there was no given point, either at the start or finish, for the yachts to cross no exact time can be given, but the leaders arrived, roughly, as follows: Aggie at 1:23.00, Chispa at 1:26.00 and Fleur de Lis at 1:31.00, followed by the Nellie, Whitewing, Eva, Rambler and Frolic; the Emerald proceeding direct to Oakland. Some time later the Spray and Ripple got through the straits, the former making Sausalito at about four o'clock, and the Ripple going home as soon as she was able to weather Angel Island. The Aggie of course made by far the best time during the time the wind was steady, and after her the Fleur de Lis should be credited with speed, in spite of the foul bottom she was said to have. She went on the beach near the Pacific Club House to clean, as soon as she got home, but this may be a little "bluff" of White's because he failed to get home first. The Chispa did not do as well as was to be expected from the condition of her bottom, and only for the superior judgment of Eckley would not have cut much of a figure in the race. The Nellie made such a poor showing, probably because Frank Murphy was not on board. The Whitewing and Eva showed remarkable speed during the whole cruise, and so too much credit cannot be given the Rambler on account of the tight race she made with the latter, a much larger vessel, more especially as she started some minutes later.

The Rambler and Eva, while off Spanish Point, came near having a collision. The vessels came very close together the Rambler being on the starboard tack, and in consequence thereof, having the right of way. The Eva, evidently believing that "might was right," endeavored to make the smaller yacht give way, and a collision was imminent, when both vessels put their tillers down and luffed up within eight or ten feet of each other, and in a very heavy tumble. Yachts, more especially when only cruising, should observe the rules regarding right of way, and not try to force smaller vessels out of their privileges.

To-morrow there will be a cruise of the Pacific Yacht Club. The yachts will assemble off the Club House to-night or early to-morrow morning, and on the firing of the starting gun, about 10:30 o'clock, they will get under way and proceed to Vallejo, rounding the U. S. Receiving Ship Independence and return home without stopping. This will form a nice finish to the San Francisco Club hop to-day. We hope to see a full fleet, more especially we hope to see the Lurline and Aggie again try conclusions, in spite of the fact that a test of speed in San Pablo bay is not always a sure indication of the capacity of a vessel. These two yachts seem to be fighting shy of each other, since the Pacific opening day.

Mr. C. M. Belshaw, a prominent capitalist here, who is fond of carrying out his own ideas as regards matters aquatic, more especially in the steam line, has built a steamer 92 feet long with only 17 feet beam, and has put in her an engine of his own invention. The engine is a triple one, and has a tubular boiler in which he expects to carry 200 pounds steam pressure, a very large amount. He hopes to get steam on her in about a week, when, if his expectations are realized, she will make from eighteen to twenty knots an hour. He does not seem to have made up his mind what to use her for, but we hope, for the sake of the sport, that he will use her as a pleasure vessel.

We regret having to announce the death by drowning of a young man off the Lolita, last Sunday. It is the first fatal accident that we had from a yacht for some years. Of course there have been accidents occur on small sailing vessels, but that is not so surprising. This, however, should not militate against the sport, as the Lolita on Sunday always has a large crowd on her, most of whom know almost nothing of the water.

To-day a social reunion will be held at the San Francisco Club House. The repairs are about completed, and the house is as staunch as ever. We are glad to see the older club shaking off its lethargy and again coming to the fore. Too much praise cannot be given to Commodore Harrison for his enterprise in waking up the members.

We fail to hear so much as was promised about the Bohemian Yacht Club. It seems to have been the case of "going up like a rocket and coming down like the stick." Five members are hardly sufficient to keep up a "boom" in a club.

The term "plank on edge," first applied derisively to anything whose moderate beam did not entitle her to the designation of "flatoon," seems likely to become almost literally true, if we may judge from the drawing of the new three-tonner Ne Plus Ultra, described by Mr. Dixon Kemp in a late number of the London *Field*. Length over all, 60ft.; length on L. W. L., 35.5ft.; beam extreme, 3ft.; draft of water, 11ft.; ballast on keel, 15 tons; displacement, 19.5 tons; center of buoyancy below W. L., 2.9ft.; ratio of sail area to wetted surface, 243; area of lower sail, 1,500 sq. ft.; mast, deck to hounds, 25ft.; tonnage, Y. R. A. rule, 3 tons; tonnage, sail area rule, 12 tons. Of course the advantages such a boat enjoys are only possible under the arbitrary rule at present in vogue in England, and they would at once disappear under any rule that gages even approximately the size of a boat; but it is to be hoped that the mechanical difficulties attendant on such an extreme form may be successfully overcome, and also that a crew long and lean enough to live abroad and work her may be found, as her success will hasten the abandonment of the present rule of measurement.

The Azalene, on her maiden trip this year, fended the wharf at Point Tiburon and carried away a good deal of rigging forward, but nothing to amount to anything serious. She seems to have adopted this locality, (Point Tiburon), as her lying-up place.

The Spray, last Sunday, beat the Ripple very handsomely from Martinez down, in spite of the fact that the yawl had a long lead at the start.

## THE KENNEL.

## Mr. Hart to "X."

EDITOR BREEDER AND SPORTSMAN.—If you will allow me I will try and convince you and "X" that he is "not correct," Mr. Kaeding and all his "Dear X's" notwithstanding. In the first place I will acknowledge that I was not correct in regard to the breeding of Sport, but that it was only carelessness on my part in doing so. I will refer him to Daniels and Mead as to whether I gave it to them correctly or not. My Belle seems to be the only one of contention, and before I get through I think I will convince "X" that he is way off, and that Mr. Kaeding's recollection is ditto. Now, if Mr. Kaeding will remember, he gave me an order on Dr. Chas. Toland for the pup, (Belle), which order I delivered to the Doctor in person on a Sunday. He took me in the barn, told me which one to take, as there were two or three there, and they were all red. And he also showed me their father and mother, and they were red.

Now, Mr. "X," or whatever your name is, how are you going to make her a Gordon setter? I think I am as capable of telling the difference as you are, who never saw my dog. And I think I have owned, broke and raised as many good dogs as ever you have. And another thing: I never sold a pup or dog in my life, but always gave them to my friends, and why should I also present them with a false pedigree at the same time? Now, Mr. "X," if you will only take the trouble, I will refer you to Dr. Chas. Toland, so far as to what I have said in regard to Belle. And as to what I have said before about the ownership of Sancho, I will refer you to W. K. Sims, and I think he will state that Mr. Daniels' only title to her was possession, and give you the particulars, as I don't wish to.

T. R. HART.

Centerville, June 3, 1884.

The number of entries received for the Chicago dog show, to be held June 10th-14th, have far exceeded expectations. There are seventy-eight classes, nearly all of which will be well filled. The competitive exhibits of racing and leaping by the greyhounds and deerhounds will take place in a special ring, which runs the entire length of the building, during the second day of the show. These classes have attracted much attention, and Captain Woodson, of Fort Niobrara, Neb., will send four greyhounds of the Gen. Custer stock; while entries are promised also from the Cloverhook Kennel, Mr. John E. Thayer, Geo. S. Pardin, L. W. Hamline and others. The entries in the St. Bernard and the toy dog are also numerous, while the sporting classes will be largely represented. The entries closed May 31st.

Following is a list of the winners of the English Field Trial Derby for the past ten years, as given by a foreign contemporary: 1875. Mr. Purcell Llewellyn's Conness Bean, by Den (setter). 1876. Lord Downe's Y. Dan, by Sam (setter). 1877. Major Platt's Di, by Dash (setter). 1878. Sir T. Lennard's Priam and Scamp, by Young Bang (pointers, equal first). 1879. Mr. Lloyd-Pric's Luck of Edenhall, by Drake (pointer). 1880. Mr. J. Bishop's Bean of the Ball, by Buxton (setter). 1881. Mr. Purcell Llewellyn's Dashing Ditto, by Dash II. (setter). 1882. Mr. Purcell Llewellyn's Sable Bondhu, by Dashing Bondhu (setter). 1883. Mr. Purcell Llewellyn's Dashing Clinker, by Dashing Duke (setter). 1884. Mr. E. Bishop's Ranging Aaron, by Blue Boy (setter).

Domestic animals are turn to curious account in some parts of the world. For instance, in Spain a small dog is often used by housekeepers for turning the spits before the fire; and it is not at all to be wondered at that he doesn't take kindly to such employment. To say nothing about the heat of the work, it must be a terrible temptation to the poor animal to keep from touching the meat and fowls, which he would much sooner eat up in a raw state than assist in roasting for the consumption of others.

The Westminster Kennel Club has sent a circular letter to the leading kennel associations of the country, inviting them to a conference, to be held in New York on the 21st inst., to discuss the propriety of uniting in a national association, with the object of securing uniform rules for the conduct of bench shows, adoption of standards, consideration of protests within certain limits, and such other kindred matters as may be submitted.

G. G. Hammond, of New London, Conn., has presented Chesapeake Bay pups, one to Capt. R. S. Floyd, one to Jaa. L. Flood, both of this city, and one to Lieutenant-Governor Laughton, of Carson city, Nev. These pups are from a Foam-Ruby II, litter whelped Jan. 13th, 1884.

The Crystal Palace Dog Show, which holds the place in the estimation of English dog fanciers and sportsmen, that the Westminster Kennel club show holds among the lovers of the dog in America, will take place July 1st to 5th, and active preparations are being made for the event.

It is estimated that the total value of the dogs exhibited at the Westminster Kennel Club show is \$114,860.25, an average of \$96 per dog. Here is enough capital invested in dog flesh to float a bank.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, Doves, etc.).

Pigeon Shooting.

The occasion of the week among our lovers of the gun was the annual picnic shoot of the Gun Club of San Francisco, at Laurel Grove, about five miles below San Rafael, Marin county.

New Gun Store.

Our old friend, E. T. Allen, has removed his gun store from the upper rooms to the ground floor of the same building, 416 Market St., as will be seen by his advertisement in another column.

Clay Pigeons.

We gave some particulars of the clay-pigeon shooting at the picnic of the Chosen Friends, last week. We now give the closing matches, in which, at 25 birds each, it will be seen some very good scores were made:

Table showing scores for various shooters in clay pigeon matches, including names like Orr, Black, Grant, Babcock, etc.

At San Bruno.

The California Wing Club, which has been somewhat dormant since its tournament, had a regular, monthly, medal shoot at San Bruno last Sunday, when the birds, supplied by Dick Cunningham, of the San Bruno hotel, were expected to be a most lively lot.

Crittenden Robinson again came out winner, with a clean score of as well-killed birds as ever fell to a gun, and yet we expect to hear he had easy birds. If, on drawing the trap, a pigeon holds his head about, wags his tail, or puts on any airs, indicating his vigor, depend upon it, with Robinson or Orr, that bird dies, if he dies at all, within three feet of the trap.

Table showing scores for various shooters in the San Bruno pigeon shoot, including Robinson, Fay, Walsh, etc.

In shooting off the ties on eleven each for second medal, Fay won.

Then followed a handicap \$5 entrance, for which six entered, eight birds each. The purse was divided into two prizes of \$20 and \$10.

Table showing scores for various shooters in the handicap match, including Slade, Thompson, Robinson, etc.

After this, five entered for a handicap under the same conditions as the one above. In this Slade again beat the champion by one bird, making a clean score of eight to Robinson's seven.

Table showing scores for various shooters in the five-bird handicap match, including Robinson, Fay, etc.

In a letter to the Sacramento Bee, our old friend, Judge Dunn, under his nom de plume, (Hoosier), says:

"This will be the season par excellence for water-fowl shooting. The water all along the Humboldt is unprecedentedly high, and so it is in all streams. This, of course, will assist the water-fowl in breeding and afford more feed for the young, as well as protect them from the Indians and beasts.

Upland game is liable to be scarce. The large quantities of snow and frequent rains will greatly interfere with their nesting. A poor season for grouse, sage-hens and chickens may be looked for. Doves are very scarce as yet. Taking all in all, little or no shooting may be expected until the duck season opens, September 1st.

The Grass Valley Tidings says complaint is made in the agricultural part of Nevada county that deer are so abundant as to be a nuisance. The deer show a special fondness for clover fields, and run over and trample down the crop so as to make the harvesting of it a matter of difficulty.

The Pacific Club, for some reason, did not meet last Sunday at Bird's Point. The arrangements for that place are now as follows: To-day, June 7th.—The Alameda County Club.

Saturday, June 14th.—The Gun Club of San Francisco. Saturday, June 21st.—The Neophyte Club. Saturday, 28th. The Pacific Club.

The match between Messrs. Burbank and Fay, to-morrow, at Oakland Trotting Park, is exciting much interest in gun circles, far more indeed than usual. Burbank still leads in the betting, but for all that, we think our cigar on his losing is safe. A large crowd will be present, and there will be plenty of birds for pool shooting after the match.

While on clay pigeons we may remark that Humboldt county, at its next fair, commencing September 23d, offers a purse of \$30 to be shot for with clay pigeons. We will add the Committee of Management will do well to apply to the Messrs. Pierce, of Oakland, who are sole agents for the coast.

On the first of June the season for dove shooting commenced. Several parties were out in adjacent localities, but all report birds scarce. The same news comes from more distant districts. This is as we predicted it would be found. Speaking of doves, we learn from a friend that he has seen more around Novato, Marin County, than anywhere else.

After the trophy was won all adjourned to lunch, which, taken altogether, was one of the most sumptuous we ever saw spread at a picnic. If it had not been for the infernal mosquitos the thing would have been absolutely perfect. To oblige our friends, more than from a desire to be tempted by wonderful delicacies manufactured by dainty fingers, the BREEDER AND SPORTSMAN, being in demand, had to circulate round, and so we began with Fred Butler, whose table was presided over by Mrs. Butler, Mrs. R. E. Wilson and Mrs. M. C. Pierce. Here, the chicken, veal loaf, hiscuits and deviled crab on shell were beyond praise, especially the last. Mrs. Pierce, who makes a most charming lady-waiter, in answer to our inquiries, confidently told us Mrs. Wilson was the architect in these cases, and if so, it at once explains Ramon E's tendency to expansion of late. Adjoining on either side of the central spread referred to, were Mr. Babcock's table, presided over by Mrs. Abbott and the Misses Kittle; Mr. McShane's presided over by Mrs. John Flood and daughter, and then in a shady nook a little beyond, the table of Mr. Orr presided over by Miss Sbafter and Miss Fanny Orr. Before we had well got under weigh in our investigations Mr. Orr took us over to his table, volens volens, and thereafter being tempted into all sorts of extravagances we gave up the ghost in sheer despair. In every respect it was a lunch worthy to day and the occasion. If we have since been living on blue bills and drinking magnesia, no one is to blame but the Gun Club, and before long we'll get even with it.

The amendments to the game law passed at the last session of the New York Legislature provide that non-residents of Richmond county, (Statens Island), must take out a ten-dollar license before shooting there. This is believed to be an unconstitutional law. Woodcock open season in Oueda and Delaware counties, September 1st-January 1st; elsewhere as before, August 1st-January 1st. Squirrels open season August 1st-February 1st. A good step in the right direction. There is nothing like the "license system," in the absence of activity and strong convictions among society at large, for cleaning out the marauding element which so infests our national game and fish supplies. If the honest citizen can afford to enjoy the pleasure of hunting or fishing, he can afford to pay a small tax for the privilege of that enjoyment. As a municipal regulation, we can not see how this license can be no more unconstitutional than any other license. Somehow, everything nowadays that is just and right between man and man is always claimed to be unconstitutional. We always find pleasure in recording cases of good shooting at the trap. A week ago last Saturday, Dr. Slade, Messrs. Brown and Stewart met at Bird's Point for a private practice at pigeons. Mr. Stewart is a member of the Pacific Club, and approaches 67 years of age. On the occasion referred to, he made a clean score of twelve birds in the very finest style, a great performance at his time of life. His score, however, is always good. He is a Dane by birth, and blessed with a constitution which seems to defy time. His body is as sprightly as his eye is clear, and his nerve as steady to-day as it was at twenty years of age. Mr. Stewart is also a thorough sportsman and still enjoys the pleasures and hears the toll of hunting as well as ever he did. Long may he live to do us honor.

THE RIFLE.

Distribution of Prizes at B'nai B'rith Hall.

This handsome hall was only proportionably filled on Monday night by the officers of our National Guard and their friends, to witness the distribution of prizes won at the late tournament of the State Rifle Association, and it was evident at a glance, as every officer in his gay uniform came along was accompanied by a lady, that the traditional dance was to close the ceremonies. In the absence of Col. Ranlett, President of the Association, Capt. Ed. G. Sprowl, Adjutant of 2d Artillery Reg't, occupied the chair for the night and filled the position well. He was generally happy and sensible in his address, especially when he showed the good the Association had done by the warm support of its friends, that its success was earned in the past and that there was no room for discouragement in the future. Col. Geo. W. Grannis was also very happy in presenting the Gov. Perkins medal to its winner, and Major H. G. Platt equally so in presenting the California Powder Works medal, and in complimenting the company for the good taste and liberality in their donations to the Association since it was formed. Col. Dickinson presented the trophy won by the police team, and called forth a characteristic reply from the veteran Captain Douglass. The champion medal and other prizes were presented by Capt. Sprowl.

We have been desired, as a matter of record for preservation and reference, to give a full list of the prizes. We do so with pleasure, though we have published some of them before. We can, however, find room in full only for the first match—the Gov. Perkins medal—and we gave this in full only from the excellent score made by all the competitors.

First Match.

For the medal presented by Gov. Geo. C. Perkins. Open to all the members of the Association, the National Guard of California, Army and Navy. Entries unlimited. Rounds ten, with any military rifle. Distance 200 yards. Ten cash prizes, namely: \$10, \$9, \$8, \$7, \$6, \$5, \$4, \$3, \$2, \$1, in addition to the medal, which is the first prize. Score:

Table with 2 columns: Name and Score. Includes P. D. Linville (medal) with score 5 5 5 5 5 5 5 4 5-49.

CASH PRIZES.

Table with 2 columns: Name and Score. Lists prizes for Lieut. S. I. Kellogg, Priv. Barrere, Priv. Carson, etc.

Second Match.

Short Range Match.—Open to all comers; distance 200 yards, seven shots with any military rifle at a ring target; entries unlimited. Entrance fee \$1. Ten cash prizes: \$10, \$9, \$8, \$7, \$6, \$5, \$4, \$3, \$2, \$1. First cash prize and keg Dupont powder.

Table with 2 columns: Name and Score. Includes Serg't Fred Kuhnle with score 10 10 10 10 11 10 12-74.

Third Match.

For the California Powder Works Medal.—Open to all members of the Association, the National Guard of California, Army and Navy; distance 200 and 500 yards, seven shots at each distance with any military Rifle. Entries limited to one each. To become the property of the marksman who shall first win it three times at regular meetings of the C. R. A. Competitors for this trophy to use powder manufactured by the California Powder Works. Four cash prizes namely: \$5, \$4, \$3, \$2. Entrance fee \$1. Medal won by officer P. D. Linville. Score:

Table with 2 columns: Name and Score. Includes 200 yds. with score 4 5 5 5 4 4-32 and 500 yds. with score 5 5 5 4 4 5 5-33-65.

Fourth Match.

Team Match.—Open to teams of six representatives from any military Company, Field and Staff, Board of Officers, Police Department or Rifle Club now in existence; with any military rifle at 200 and 500 yards. Rounds seven at each distance. First prize, a trophy. Individual prizes, \$5, \$4, \$3, \$2. Entrance fee, \$10.

Trophy won by Police Team. Score, 361. First cash prize, Siehe Medal, in this match won by Serg't. McDonald, Co. A, 5th Battalion. Score:

Table with 2 columns: Name and Score. Includes 200 yds. with score 4 4 4 4 4 5-30 and 500 yds. with score 5 5 5 5 5 5 5-35-65.

Fifth Match.

Team Match.—Open to teams of six men from any Company of the National Guard, or Army and Navy, with Springfield rifles, at 200 and 500 yards. Rounds seven at each distance. Individual prizes, \$5, \$3, \$2. Entrance fee, \$10. First prize, a trophy, and second prize, a trophy, to become the property of the winning teams.

First trophy won by Team Co. C, Second Artillery. Score, 303. Second trophy won by Team Co. B, Second Artillery. Score, 296.

First cash prize and the keg California powder won by Serg't. Mangel, Co. C, Second Artillery. Score:

Table with 2 columns: Name and Score. Includes 200 yds. with score 5 5 4 4 4 4 5-32 and 500 yds. with score 5 5 5 3 5 3 3-29-61.

Sixth Match.

Collier Team Match.—Open to teams of six men from any Company of the National Guard who have never made more than 70 per cent. in any of the California Rifle Association matches. Individual prizes, \$5, \$4, \$3, \$2. Rounds seven, with Springfield rifles, at 200 yards. Entrance fee \$6. First prize a trophy given by Capt. Wm. B. Collier, Co. B, Second Artillery Regiment, N. G. C.

Trophy won by Team Co. C, Fifth Battalion. Score, 176. First cash prize and set of loading tools won by Private Honx, Co. C, Fifth Battalion. Score:

Table with 2 columns: Name and Score. Includes 5 5 4 5 4 5 4 with score 32.

Seventh Match.

Team Match.—Open to teams of six men from any company of the National Guard who have never made more than 60 per cent. in any of the California Rifle Association matches. Individual prizes, \$5, \$4, \$3, \$2. Rounds seven, with Springfield rifles, at 200 yards. Entrance fee, \$6. First prize, a trophy. Trophy won by team Company C, Fifth Battalion. Score, 172. First cash prize and one-fourth keg California powder, won by Private St. John, Company C, Fifth Battalion. Score:

Table with 2 columns: Name and Score. Includes 5 5 4 5 4 5 4 with score 33.

Eighth Match.

Open to teams of five men from any regiment battalion, N. G. C., or N. N. G. U. S. Army, or Company of Police, any military rifle, at 600 yards. Rounds seven; 1st prize a trophy; individual prizes, \$5, \$4, \$3, \$2, \$1. Entrance fee, \$5. Trophy won by Police Team, No. 1. Score, 146. First cash prize and one-fourth keg California powder, won by officer Gano. Score:

Table with 2 columns: Name and Score. Includes 4 5 4 5 5 4 5 with score 32.

Champion Marksman of the Meeting.

The competitor making the highest percentage in any five of the foregoing matches, taking only one score from each match, shall be known as the 'champion marksmen of the meeting,' and a medal in recognition thereof shall be especially awarded. Medal won by officer P. D. Linville, who made an aggregate of \$6.73 per cent. in five matches under the rule. The next highest competitors in said match are as follows:

Sergeant Fred. Kuhnle, Fifth Battalion, \$5.43 per cent. Sergeant S. I. Kellogg, Fifth Battalion, \$5.11 per cent. Sergeant McDonald, Company A, Fifth Battalion, \$2.52 per cent.

The medals in Director's match were won by Lieut. S. I. Kellogg and Lieut. Hugh T. Sime, respectively.

The medals, trophies and cash prizes presented as above were valued at nearly \$600.

At Schuetzen Park.

On Sunday the California Schuetzen Rifle Club met at their Alameda range to compete for their regular club prizes. The score:

Table with 2 columns: Name and Rings. Includes Champion Class—A. Strecker with 427 rings.

Utschig, having won his prize three times in succession, pockets the cash for good.

At the same time and place the Francisco Schuetzen Verein also held their regular monthly prize shoot with the following result:

Table with 2 columns: Name and Score. Includes F. Freese with 26 and A. Browning with 19.

The Eintracht Rifles.

This body of marksmen also met at Schuetzen Park for one of their regular shoots. The score:

Table with 2 columns: Name and Score. Includes Slamer with 39 and Wollf with 269.

In connection with this organization, we may state, they will have a prize shooting at Schuetzen Park a week from tomorrow, 15th inst., open to anybody who may wish to enter. The conditions will be ten shots for a dollar. There will be a \$20 medal and \$50 in cash prizes shot for.

Last Sunday the Stockton Guard rifle team made the following score at the target at William Tell Gardens:

Table with 2 columns: Name and Score. Includes Corp. L. F. Salbach with 3 4 4 2 4 4 4 5 4-38.

At Shell Mound.

The attendance last Sunday was not as large as usual, still this favorite resort of our marksmen received a fair patronage. The principal shooting was by a large delegation from the Wolf Tone Guard, once celebrated at our rifle ranges. They are again paying more attention to practice and may, if they are steadfast, in a measure resume their old position. They will find the list of crack shots, however, much increased of late years. On Sunday Sergeant Watson won the first-class medal, and W. J. Burke the second-class.

In another column, will be found an advertisement from Messrs Winslow & Kelly, announcing the opening of the rooms of their Sportsmen's Headquarters at 871 Market street. As we have said before, the want of such a place, in thoroughly respectable hands, where sportsmen from all parts of the State can meet together at all times to exchange ideas, has long been felt in this city. Of course, at present, the accommodations are nothing to what they will be if the enterprise prove successful. They are simply a beginning, but they are quite comfortable and efficient for the present. The quarters will be thoroughly supplied with eastern, foreign and local sporting papers. There will also be a bulletin board, announcing the result of sporting events before they reach the press. Mr. Kelly comes before the sportsmen of this State in such form that there cannot be any doubt of his fitness to be at the head of such an establishment.

Sergeant Ed. Hovey and R. C. Moore, Company A, Fifth Infantry Battalion, will, on the 15th instant, shoot 100 shots each at the 200-yard target to beat the record. The top score for the string and distance is that of Lieutenant Fred. Kuhnle, of the same battalion, who made 457. Howard Carr is second best, with 456 points out of a possible 500. Both the Sergeant and Mr. Moore would like to have two other sharpshooters join with them. Yesterday Mr. Hovey made 225 in fifty shots at 200 yards, with a 44 in one of the strings. Mr. Moore made 46 out of 50, with a strange gun. Messrs. Hovey and Moore, at the distance, are as likely to beat the record of Kuhnle and Carr as any two men we know.

The project to send a California team to Nevada has assumed definite shape, and this week or next a preliminary meeting of those interested will take place to form a club to conduct the entire business. It would never do for our men to get down tamely under last year's defeat, and make us attempt to regain their laurels. We therefore fully indorse the plan proposed.

We understand it is not likely the American National Rifle team will repeat their contest with the British team at Wimbledon before the season of 1885. Some time, however, it must be done, and successfully too.

There will be some good shooting at the Shell Mound range to-morrow. Delegations from Co. C, 2d Artillery, and others will be out for team practice.

SHEEP

Sheep Husbandry.

During the last three or four years prices of wool have been so low that many farmers have become dissatisfied with sheep farming, and have determined to give up the branch of their business. Some have already done this, and others are trying to sell their sheep upon a depressed market; and it is probably true that the flocks of a majority of those who are not trying to sell receive far less careful attention than those flocks would receive were wool worth from 40 to 50 cents per pound. Thus flocks which might be made to yield a fair direct profit with careful keeping, become unprofitable through neglect. It is quite natural in almost any business to give the greater care and attention to that branch which brings in the greater immediate returns, but it may not be always wise to do so.

It will be found that taking any period of ten successive years' sheep keeping has averaged as well in appreciable returns as has almost any other branch of farming, and there seems to be no good reason for supposing that this will not be true of the next ten years. The wool market is depressed, but so is the wheat market. Potatoes form a large part of the farm products of this country, and farmers think the price of potatoes too low to pay. Oats and hay are selling for prices below those which farmers feel that they ought to get for these staples; and there are other farm products which are selling at figures which producers are ready to declare too low to yield a living profit. Yet it would be folly to refuse to plant potatoes, or corn, or sow oats or wheat this year because prices are low. In farming operations it is especially true that it is the general average results which must decide as to the profitableness of any given crop, and not the result of one or two years.

It may be well to look carefully into the sheep-growing branch of farming before deciding that it is unprofitable. Even when mention is supposed to have comparatively little value—and that place can scarcely be found where sheep keeping forms but one of several branches of work on the farm—fair consideration of all the advantages arising from sheep husbandry will doubtless convince the farmer that "the hoof of the sheep is golden still." Liberal estimates place the cost of keeping sheep at \$2 per head per year. At current rates fair fleeces will average about \$2 each; lambs may be estimated at \$2 each when weaned. If it be assumed that the number of lambs carried safely through weaning be equal to 50 per cent. of the number of sheep in the flock, the direct annual income will be \$3 each for the sheep kept, or \$1 per head profit. To this should be added the profit which comes from the conversion of the forage of the farm, the crush end weeds, the grain and roots, into rich manure and into marketable mutton and wool. The exact value of the work done by the sheep in keeping fence rows and other places free from weeds, hrambles and brush, cannot be easily calculated, nor can that of their services in spreading rich fertilizing material evenly over the land; but these all have a practical and by no means small value, which should be considered in counting the income from sheep husbandry.—Pittsburg Stockman.

STABLE AND PADDOCK.

In the catalogue of premiums offered by an agricultural society on Long Island is found the following sensible ideas: We recognize soundness, strength, style, speed and endurance as the valuable qualities of the horse. We believe it to be incumbent upon agricultural societies to encourage an improvement in each of these attributes. The horse best adapted to the general requirements of the Long Island farmer, and the horses which are developing the greatest fleetness, are the descendants of the same imported parentage. We therefore offer special premiums for sound horses that shall show the most perfect combination of rapid movement and staying power; believing that, however much these qualities may be perverted upon the track, they are not one whit the less essential to a complete attainment of the practical aims of agriculture.

Work-horse processions seems to be becoming more popular and are better patronized than ever in some parts of Great Britain. These processions, as they are called, are composed entirely of the work-horses of the country, which are decorated with wreaths of flowers and bouquets in an elegant manner. The day on which this takes place is set apart as a kind of a grand gala day, and especially enjoyed by the children and servants. One of its good effects is the awakening of the pride of the grooms and those who have the care of the horses.

Of the different methods of punishing a horse while working it, none is more detestable than jerking it with the lines, and it is practiced by many unthinking and unmerciful horsemen. At the least provocation the lines are brought into service in a manner calculated to tear the mouth of any horse, thus making it tender in the month. Horses seldom need half the punishment they receive, and when it becomes absolutely necessary there is a proper way and a more appropriate place to administer them than by injuring their mouths.

Men who would complain if they would be compelled to labor eight or ten hours per day think but little of compelling their horses to work from twelve to fifteen hours out of every twenty-four, and think nothing of it. Driving horses are generally the class of horses that suffer the most from long hours, on account, perhaps, of the light labor of those who handle them.

If you have nothing for your horses to do for a day or two, don't think you are treating them well and resting them by keeping them shut up in a dark stable without exercise. Nothing suits a horse more for hard work than to stand idle for a while.

Tired horses will enjoy and are much benefited by having their legs and feet bathed in cold water. A low tub, which could be kept in every stable, will be found convenient for this purpose.

As a shoemaker is better able to fit a boot to a man's foot by first measuring the foot, so a saddler is better able to fit a collar to the shoulders of a horse by first measuring them. Use a soft sponge in bathing your horses' sore shoulders.

Deserving of Confidence.—There is no article which so richly deserves the entire confidence of the community as Brown's Bronchial Trochee. Those suffering from asthmatic and bronchial diseases, coughs and colds, should try them. Price 25 cents.

# THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE  
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE  
PACIFIC COAST.

OFFICE, 508 MONTCOMERY STREET  
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

JOSEPH CAIRN SIMPSON, - - - EDITOR

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1009 J Street.

## ADVERTISING RATES.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notices taken for less than 60 cents each insertion.

San Francisco, - - Saturday, June 7, 1884.

## Santa Rosa.

Pursuant to a determination to make short trips into the country, last Sunday morning we crossed the bay on the boat which should have left the western end of the Oakland mole at 7:25 A. M., but was delayed a few minutes longer. Still there was time enough to reach the James M. Donahue, as ten minutes were to the good after landing, and the vessels lay in adjoining slips. But there was such a press, such a jam at the ticket office, and without order or regulation, that it appeared doubtful if those on the outside of the circle could get the opportunity of exchanging coin for the pasteboard slips that would enable them to pass the gates. All of this is easily obviated by pursuing the plan followed at the Southern Pacific: placing a rail so that a single file is all that can get to the ticket window. A policeman to keep the crowd in line, opening the window a few minutes sooner, and the trouble would be ended. As the Sunday excursions are deservedly popular, there was a large number of people on the boat, cabins, guards, and deck being crowded, and on every countenance anticipated pleasure was plainly marked. A few had guns, many with fishing-rods, and still a greater number with baskets from which peered slender-necked bottles, and, doubtless, all the other essentials for a day's outing in the groves and ravines. It is an attractive sail from the wharf to Point Tiburon. Through the gaps between the vessels lying in the stream, past Alcatraz and along the western shore of Angel Island, glimpses of the ocean through Golden Gate, the fortified points on either side, the neat quarters in the glen, the green hills, the mountains, all uniting in forming a scene, which must awaken admiration in every one who has the least appreciation of the beauties which nature has bestowed.

The cars are still more crowded than the boat, though there are many coaches in the train, and the weight causes the locomotive to snort and strain to put them in motion. Up grades and through tunnels, rounding curves, and then hastening along tangents under the shade of Tamalpais, and then traversing marshes where the ground vibrates and the tall tules nod good wishes to the happy children that are so eagerly watching the

panoramic views. There are a succession of pleasant nooks along the mountain side and rocky points adorned with the symmetrical buckeyes, now covered with white blossoms, and on the plain to the right there is one place where the rocks rise in a pyramid, every crevice throwing out a shrub, the gray and the green mingling in harmony. There is a strong temptation to lay over a train at Petaluma, when the track enclosure is seen, and then comes the thought that the promise is given to be back home ere the shadows fall thick, and that it will be necessary to take another day to visit the celebrities that are domiciled on the course which is so close at hand. It is a rich valley that extends from Petaluma northward, and though the grain fields show that there has been an exuberance of water, there is a fine prospect for a good crop, though somewhat later than usual. As we near Santa Rosa the fields are smaller and there vineyards and orchards, and the hillsides are green, and snug cottages on every side. A ride in the 'bus to the Occidental and on either side are many new buildings and evidences of prosperity.

A few minutes delay and we are off for the track in company with Mr. De Turk. There is not much time to spend, as the intention is to visit Mr. De Turk's ranch up the valley, and the return train is due at 4:25, and it is now nearly high twelve. There is a mare near the entrance gate, and there is no necessity in giving us the information that the filly by her side is an Anteoo. It is after the pattern of all the others, if anything more "rangy," and with a carriage that would please the most inveterate stickler for style. Even with all the anxiety to see the sire, there is the desire to look over it again and again and after careful scrutiny come to the conclusion that it is hard to "beat."

We never saw Anteoo when he was looking so well. At times when the conclusion was reached that there never was a finer model of the fast-trotter, there was the doubt that the favoritism which followed the rearing and ownership might influence our judgment, and that there must be defects which were hidden by a too favorable bias. At least the leaning from ownership does not exist now, and after making due allowance for the partiality of a breeder, we reiterate that he is the best formed trotting stallion in all of our acquaintance. There are those which are more showy, there are several that are so nearly perfect in form that it is troublesome to pick a weak point, and yet taken from "the ground up," Anteoo comes nearer our idea of the model shape than any stallion not thoroughbred. That is, the best formation for speed and endurance at either the gallop or trot. Muscular without coarseness, every angle right, plenty of bone and tendon and with indications of "nerve force" as palpably distinct as that power can be shown. Accompanying this superiority of form is beauty in a high degree. Color that cannot be improved, his coat as lustrous as the feathers on the neck of our favorite game cock, and eyes as brilliant as an houries. It is not surprising that Mart Rollins shows him with an air of so much satisfaction. He certainly has done him justice so far, and if no ill luck befalls him we have not the least hesitancy in predicting that he will come up to and probably exceed his most sanguine expectations. In a field on the other side of the street was Nelly H. and her Anteoo filly, as handsome as can be, and with much of the configuration of the sire. Inside of the track Lady Turnbull and Daisy had each an Anteoo, both of them colts. Lady Turnbull is by Whipple's Hambletonian, and a noted roadster in her day, and Daisy is a daughter of Shannon from Myrtle by Lodi, her grandam by Cheatham, and the next dam imported Jane Shore. It is somewhat puzzling to write encomiums of the Anteoo colts without using the same phrases so often as to become tiresome, and yet we have not seen a single one of his get that is not well worthy of so much praise as to appear fulsome adulation when written. A drive around the course, which is in such admirable condition that it is apparent the very best care is taken of it, and then we accompany Mr. De Turk to his ranch up the valley. Over a hill, and then the road skirts what is now called Bennett's Valley, though the original name was Ylupa—we are not sure about the orthography—one of the most beautiful of any that we have yet seen. Where the road first touches it there is considerable width with fields of grain and dotted with fine trees. Narrowing up the stream the grain fields give place to vineyards, with smaller patches of vegetables and corn peeping from the ground, showing as fine a "stand" as a farmer could desire. It is a grand situation where Mr. De Turk's place is located. To the northeast is a peak some twenty-five hundred feet above the level of the ocean, and on a slope at the foot of it are the buildings. The house is a snug cottage at the end of an avenue of walnuts and with ornamental trees and shrubs surrounding it. Midway of the avenue is the winery and following the slope is a vineyard of fifty acres. The youngest vines have

eight years growth, and there is not a vacant space or one vine lacking in the whole extent. At this season the vines are erect and with the mass of green leaves and the buds ready to burst into full bloom, it shows at the very best. The valley has taken the character of rolling plains, with quite a distance to the mountains on either side, between the hills and glens which narrow into gulches, skirted with timber and above all the bare mountain tops. The soil of the slope is a red loam which is evidently the best for grape growing, as when the vineyard takes in some of the black alluvial deposit in the depressions the vines are not nearly so vigorous. On the side of the mountain at an elevation far above the house there is a reservoir from which pipes are run to conduct the water all over the place, and the supply is derived from a spring which bursts from the mountain side several hundred feet higher, so that any desired pressure can readily be obtained. There is not much time, however, for extended observation, and what little there is passes rapidly where there is so much to interest, and in listening to explanations of the proprietor regarding grape culture and winemaking. There is so little to spare that we are forced to forego a passing visit to the track on the return and make directly for the depot. A large and handsome building has been erected for a pavilion since our former visit, and large as it is, is inadequate to show properly the display at the fair. There is some consolation in the thought that a month hence Anteoo will be in condition to show what he can do on the track, and if there is a corresponding increase in his speed to what is denoted in his appearance, he will trot so fast that we are reluctant to venture on a prophesy of what will be done. At all events we shall make another visit some time before the fair, taking advantage of the train which leaves the city in the evening, which will give the opportunity to see him and the other flyers on the Santa Rosa track at exercise.

## The Judges' Stand.

We were pleased to see that the judges' stand at Santa Rosa had been moved to the right side of the track. It is one of the things not easily understood, why it ever should be placed in the wrong location. On the outside of the course the race is before those who are delegated to scrutinize every yard of the contest closely. There is nothing to obstruct the vision. Each of the trio of officials has a clear view, whereas, when the stand is on the inside there is a continual shifting of position, turning around as the horses are making the circuit, with a probability that some very important phase will be overlooked. From the outside a far better view of the first turn is had, and also of the turn leading into the home-stretch. It is true that the judges are not placed in as conspicuous a situation as when perched in full sight of the assemblage, but even vanity should be rendered subservient to utility when there is such important business on hand as determining a race on which large sums of money are depending. Were we to build a stand for the judges of racing and trotting, it should be constructed as light as possible, with metal pipes for supports. The floor would be broken into four terraces, the one next the track elevated about six feet, and the others rising some ten inches to each terrace. The width should be restricted to room enough for three chairs set exactly in line, and a passage way on one side. Five feet would be ample width, the rear terrace having a desk for the clerk of the course. The chairs turning on pivots will give an opportunity for an easy shifting of position, though if the stand be a few feet from the track that would not be necessary. The chairs being in a line with the winning score, and elevated so that the occupants in the rear could look over the heads of those in front, each would be in a position to judge accurately of the finish. The low, narrow and light structure would not obstruct the sight of those behind in the grand stand, and limit the use of the judges' apartment to its legitimate object.

## Jerome Eddy and Almont Lightning.

From the Messrs. Jewett we have received capital pictures of Jerome Eddy and Almont Lightning, and which are pronounced by those who know the horses to be accurate representations. Both are exceedingly handsome horses, and the hero of 2:16½, Jerome Eddy, is of a speedy formation, from which it is not unreasonable to look for further reduction. As a second and a half will place him in the front rank of stallions, there is not a great deal of improvement necessary to give him the premium position.

The fall circuit has been completed by the additions of Fresno and Los Angeles, the former taking for dates October 7th to 11th, and the latter October 13th to 18th. This will give stables plenty of time to make the transfers and rest the horses, as in these later meetings the associations will probably devote the first day to local and district races.

### Agricultural Department.

This will be the last issue of this paper before the meeting of the Convention, and we urgently solicit those of our readers who will be in attendance to make every effort to secure the selection of delegates who are identified with the agricultural interests of the State. A few days ago we learned of several who are likely to be candidates, and are extremely gratified that the names proposed belong to men who are the ones to "fill the bill" all through. In addition to L. J. Rose and P. A. Finigan, H. M. La Rue and Jesse D. Carr are mentioned for the place, and, assuredly, no one can deny them being representative men of the main California interest. Mr. Rose has a national reputation as a breeder of fine horses, as an orange grower, vineyardist and winemaker. In each of these branches he has achieved success. And in all probability there is not a man in the State who has a more intimate knowledge of the business. Beyond this, he is intelligent, energetic and straightforward, his character beyond reproach, a gentleman in every sense of the word. As the President of the California State Agricultural Society, Mr. Finigan will be peculiarly well fitted to represent all of the interests which are fostered by that Association. Without being so closely identified with agriculture as the others, he is not merely a theoretical farmer. He has shown his capacity in the management of his farm in Alameda county, and in the branches of general farming and the breeding of horses and cattle is fully posted. Sent to Chicago to assist in obtaining recognition of momentous issues, he will be indefatigable in his endeavors to accomplish the object of his mission. It is unnecessary to dilate on the qualifications of H. M. La Rue as an exponent of the agricultural interests. A farmer of progressive ideas, no one can more readily see the necessities that demand that the class to which he belongs shall have proper consideration, and with the ability to logically insist that these rights shall be guaranteed by proper legislation. Jesse D. Carr is of the same stamp, and from his long experience in all pertaining to the agricultural interests of California is eminently qualified for the position.

Were the whole California delegation of the stamp of these gentlemen it would be all the better. When farmers recognize the importance of sending to the national councils men of their own class, in place of giving their support to third class lawyers, and politicians of a still lower grade, there will be no trouble in carrying any reasonable proposition. Then they will have representatives not to be controlled by political considerations as to who shall be collector here and postmaster somewhere else, but men who will act for the good of the whole country and who cannot be cajoled by promises of preferment or led astray by the jingle of coin. So far they have admitted inferiority in subscribing to a creed which acknowledges incapacity, by their willingness to be hoodwinked in favor of those who have kept them in subjection by abjectly submitting to arrogant assumptions of superiority and taking a back seat when they should be in the van.

There will be few farmers in the Convention to meet on the 10th inst. There were few indeed in that which sent a jubilant excursion party across the Continent. Since then there has been the customary wheedling of the agriculturist, and it is likely that, stimulated by the necessity of action, something may be done. We sincerely hope to see both parties pledged to reform. Not the reform which signifies cutting down the salary of the clerk on a limited income, but that which will place the great interest of the country where it rightly belongs. An agricultural department with a Cabinet Minister at the head of it is the first step. That gained and others will follow.

Since writing the above the welcome intelligence has come that a resolution has been offered in the Republican Convention embodying the views expressed in the *Breeder and Sportsman*.

There is a double gratification arising from this action. In the first place that at last there is a probable chance that the farming interests will now receive due protection, and a minor satisfaction that our course has met with such significant approval. That the articles in this paper have been instrumental in leading to the result is manifest. It is the only journal that has advocated bringing the question before the conventions, and that a "plank" of the sound timber of Mr. Johnson's resolution be embodied in the platform. There are good reasons to believe that the Democratic Convention, to meet at Stockton, will give emphatic endorsement, and, by the selection of delegates pledged to its support and representing the interests at stake, put the final victory beyond the shadow of doubt. Both of the great parties committed, it is no longer purely political, and farmers can follow the bent of their ideas on other questions, when the most monotonous issue, to them, is settled without battle. This being the case there is another reason for

gratification on our part: should one party fail in supporting that which is so eminently just and proper, this paper would be compelled to forsake the plan marked out from the start, and advocate the election of men who offer a guarantee that their course will be for the benefit of pursuits which this paper was established to support. Ignoring politics, we do not give up the right to aid in promoting the interests that come within our sphere, and when questions arise that are so eminently connected with the welfare of all those directly dependent on the cultivation of the soil, and kindred pursuits, in fact on any of the topics that come within our sphere, the right will be exercised independently and without the trammels of party bias.

The following is the resolution:

Mr. Johnson, of California—I have a resolution which I desire to read and have it referred.

The Chair—The gentleman will send it up to the Clerk. Mr. Johnston, of California, offered the following resolution. The Clerk will read it.

The Clerk read the resolution, as follows:

In behalf of those who represent the great and fundamental industry of our country, we demand that agriculture shall have a special representative in the President's Cabinet. Therefore, be it

*Resolved*, That a Commissioner of Agriculture be made a Cabinet officer.

The Chair—The resolution will go to the Committee on Resolutions as a matter of course.

### The Oakland Trotting Park.

We cannot permit a week to pass without urging the consummation of the purchase of the Oakland Trotting Park, in accordance with the terms published heretofore. The soundness of the investment is conceded by everyone who is conversant with the value of adjoining property, and the opinion of all the experts, with whom we have conversed, is, that in ten years, it will be at least trebled in value. But there are other reasons than those embodied in a safe investment to induce every one interested in breeding horses and cattle to aid in promoting the scheme. It is clearly certain that unless the contract is completed by the first of July, that the ground cannot be obtained, unless at a higher rate, with a strong probability that failure will result in the track being broken up in a short time.

There is certainly no location as near San Francisco that is so well adapted for a fair ground and race course, and this has been shown in the articles already published. That the whole of the State is interested in the project has also been demonstrated, and it certainly appears supererogatory to argue further. All that is necessary is to overcome the apathy, and that there should be active work, in which case ten days will be all that is necessary to secure the whole amount of the stock being subscribed.

### Bay District Races.

To-day there is likely to be a very good race on the Bay District course, and on next Wednesday another that will trouble the cute ones to know what to select for a winner.

The track is in a first-rate condition, and the sport-loving public can always rely on the Association to conduct the business so as to leave little room for complaint. Though there is a general disposition to hold back at this season of the year, on the part of trainers and owners, the horses engaged in the coming contests are sure to perform satisfactorily, and those who attend will be well repaid for the trouble. Now that two lines of cable cars run to the course, or so near that it is only a short walk from the termini to the entrance gate, it is practically as convenient as a trip from Montgomery street to the New City Hall. It is only a question of a few additional minutes and that amply recompensed by the pleasure of the journey. Golden Gate Park is in its gayest dress and a drive through it discloses beauties at every turn.

The entries for the 2:22, to be trotted next Saturday, close to-day and those who have horses that are eligible should not miss the opportunity of taking part for the liberal purse offered.

### The Fair Programmes.

All that we desire to do at present is to call attention to the programmes of the fairs which are published in the paper of this week, and delay remarks until there is more time to comment on them fully. That this is going to be a lively season in all pertaining to the autumnal exhibitions is already ensured, and we have not the least hesitancy in predicting greater successes than ever before.

Noted turf performers, as a rule, are not first-class roadsters. H. B. Winship, however, is said to be quite as much at home upon the road as on the track, and is in all respects one of the finest gentlemen's roadsters that can be found.

The veteran Captain T. G. Moore, is now in charge of the thoroughbreds at Rancho del Paso.

### Our Horses in the East.

There are good news from our horses in the East. Last Wednesday Jim Renwick won at Jerome Park, and that so easily as to augur that there are many victories in store for him. As the account states that he galloped in, hard held, in 1:47, beating Rica, Euclid and others there is little to fear when he meets with the eastern flyers of higher degree.

Fallen Leaf, the daughter of Grinstead, and Mollie McCarthy, ran second on the opening day of the Lantonia Jockey Club, beating the great Buchanan and others of celebrity, and since then a telegram announces a win, though we have not seen the particulars. From the rumors which found their way from Santa Anita, we have placed a high estimate on this handsome filly, and trust to record many victories for her before her return home. There are, in fact, the brightest anticipations for all of our horses, and in the meantime we heartily congratulate our old friend, Walter J. Welch, on Jim Renwick's victory.

### Spring Meeting at Ukiah.

EDITOR BREEDER AND SPORTSMAN:—According to promise, I give you the result of the first day of the Spring Meeting of the Ukiah Park Association.

The first race on the programme, an Indian foot race, did not fill, as poor Lo thought training hops better business than training for the white man's foot race.

The second race was a single dash of half mile for saddle horses, for a purse of \$25, \$5 entrance added. A. C. Perry named s. m. Velveteen, 1; W. Siddons named b. f. Fox, 2; W. R. Bronough named b. s. Bay Dick, 3. Fox drew the pole, with Velveteen outside. A very even start was had, Velveteen leading around the first turn into the back stretch, where a decided pull from her rider brought her back even with the stallion; down the home stretch they came, Velveteen crowding in and taking the pole, heat and race in 59½ seconds.

After an hour's delay for pool selling, in which Oriole was favorite, the horses were called on for the next race, half mile, 2 in 3, for \$100, entrance \$25 added, for three-year-olds. C. Underhill named b. m. Oriole, 1; W. A. Hagan named s. m. Goodie, 2; Aleck Perry named b. g. Aleck Perry, 3. They were tapped off at the first attempt, with Oriole two lengths to the fore, which advantage she could easily have kept but for a heavy pull. She maintained a good half length all the way round, winning the heat in 55 sec., with Goodie second, and Aleck Perry distanced, having left the track at the first turn.

Second heat.—Complaint having been made of the start in the first heat, the judges tried several times before a good send off was had, Oriole a half length in the advance. This she kept to the homestretch, under a steady pull, increasing her lead at the wire to about four lengths, winning heat, race and money. Time, :56. It is said she ran at Santa Rosa in :52, and she could certainly have made the half mile here in :53.

The attendance was small, owing to the haying season, hop training, Court, etc., keeping many away.

To-morrow the races are between the various Democratic candidates, in convention assembled. Friday there are to be two races for \$150 purses, 2 in 3, half-mile running, and mile heats, 2 in 3 trotting, and double team show for money. Saturday, running race, mile and repeat, for purse of \$150, and quarter dash for \$100, supplemented by ladies tournament.

Ukiah, June 4th, 1884.

### Names Claimed.

By Cas. Matlock, Pendleton, Oregon.  
BARR WIRE, for bay colt, left fore and hind foot white, star in forehead, foaled May 16th, 1884, by Osceola, dam Adie.

### Foals.

At Routier, Cal. Property of C. Halverson.  
Maggie S, by Bayonet, dam by Joe Stoner; second dam by imp. Sovereign, a bay filly, black points, a few white hairs in forehead, by Leinster. Mare bred to imp. Kyrle Daly.

Frequent inquiry has been made as to the fate of the bay horse Bayswater, by Lexington, out of Bay Leaf, by Yorkshire, brought to this State some years ago by C. A. Merrick. In a private letter received this week from a friend in Sacramento county, we find a note that the horse died at Lemoore, Tulare county, on the 13th of last September. He was owned by J. R. Heinen at the time of death. He was foaled in 1863.

The opening match between Lord Sheffield's eleven and the Australians resulted in a decisive victory for the latter team. The Englishmen scored 86 in their first and 120 runs in their second innings. Giffen and Palmer bowled throughout. The Australians in their first attempt scored 212, of which A. Bannerman made 94. W. G. Grace and Shaw were the most successful of the English bowlers.

A short resume of California cricket appears in the Loudon publication of *Lillywhite's Cricketers' Companion*, sent by a correspondent in this city. The bowling and batting average are entirely incorrect, as well as certain other statements regarding the membership of the local clubs. The whole account is concocted by a personage of great imagination.

The match against Oxford University resulted, strange to relate, in the defeat of the Australian Y. C. O'Brien played magnificently for 92 runs, and the bowling of H. O. Whitty and E. W. Bastard was excellent. E. B. Nicholls, a short slip, caught out no less than seven men.

The cricket match set for this afternoon is a representative eleven of San Francisco against the next eighteen. The eighteen will include a great many untried players and there is every prospect that a large number of them will show well to the front.

Jim Renwick won a mile handicap at Jerome Park on Wednesday in a big gallop. Time 1:47. He was ridden by Donahue.

By cablegram we learn that the Marylebone Club dressed the Australians down in fine style.

## HERD AND SWINE.

### External Signs of Butter Capacity.

From advance sheets of the new book on Jersey Cows and Butter Tests, by Major Campbell Brown, Thos. H. Malous, M. M. Gardner and W. J. Webster, we take the following, being an extract from a paper by Major Brown, which forms a part of the introductory matter:

Some of these appear purely fanciful and have never gained much currency. Such is this "upper fount," a curl of hair on the spine back of the withers, considered by the few believers in it to be the more valuable indication the further back it is found toward the hips. One gentleman relies on the "fatty protuberances under the end of the lower jaw," another attaches great importance to the dandruff in the end of the tail; another to the length of the tail, and so on.

But there are others of these external signs which are more or less generally relied upon, and which it is worth our while to consider more in detail. First of these is the escutcheon.

In the new and accurate translation by Mr. Hand, of Guenon, on milk cows, I find this broad statement:

"The form or pattern of the escutcheon indicates the class to which the animal belongs, while the extent of surface covered by it denotes the milk-giving capacity. This extent, varying in a decreasing proportion, gives rise to several orders, in which I range the members of each class. The fineness of the hair of the escutcheon, and the color of its skin, indicates the quality and quantity of the milk.

"In all the classes and orders the escutcheon is the sole indicator of the internal capacity of the udder, so that, if the escutcheon is large, we can pronounce without hesitation that the internal reservoir is large and the yield of milk will be abundant; while if the escutcheon be small, the reservoir is small and the yield of milk will be small. Hence those cows which have large escutcheons, composed of fine hair, are the best milkers, especially if the skin, from the inner joining of the thigh to the vulva, is of a yellowish color, and if on scratching it with the nail we can detach little scales of a fatty substance. Those animals in which this latter characteristic is found in the skin of the withers and of the inside of the ear, yield a milk very rich in butter, whatever be the quantity, and whatever be the class or order to which they belong."

For several years after I began breeding Jersey cattle, I was a firm adherent of this system, never dreaming that there could be any question of the correctness of the statements so positively and dogmatically set forth. I worked hard to familiarize myself with the system, read with avidity everything that was published concerning it, and was rather dismayed than pleased when I found that it could not be adjusted to the facts which forced themselves upon my notice. It is not, therefore, from inattention or prejudice that I am forced to express my disbelief in the Guenon theory, as at present expounded by its advocates. Like all other purely empirical systems, it probably rests upon some foundation of truth, but until considerable progress has been made in perfecting it, the breeder who trusts it as a guide is likely to do so to his own pecuniary loss. If the escutcheons of a hundred or two of the best tested butter cows in the country could be accurately photographed and measurements made of them, we should have a starting point from which to begin an intelligent investigation of the theory. In the absence of such data, I give from several sources descriptions of the escutcheons of a few noted cows, which fail to fit in with the Guenon theory.

First of these is Mercedes, the great Holstein cow that won the *Breeder's Gazette* champion cup for best thirty days' yield of butter, in 1882. Prof. J. W. Saboron, dean of the Missouri Agricultural College, saw her at the St. Louis fair last fall, and here is what he says:

"In the different breeds I attempted to study the marks of a good cow, and especially the escutcheon. Each breed seemed to have a type of escutcheon peculiar to itself. Mercedes surely might be expected to carry a good escutcheon and milk veins. She certainly was not very strong in either of these respects, not strong at all in the escutcheon. My day's work did not settle a conviction regarding the escutcheon."

Col. M. C. Weld has just been to see Mary Aune, of St. Lambert, and winds up an excellent account of her appearance with these words: "Escutcheon, selvage of medium breadth."

Last year, in company with several other breeders, I made a visit to Darlington, and carefully examined the great cows there. My notes were made on the spot and submitted to one of my companions as we returned to New York in the train for his corrections. I believe they are fairly accurate, and make these extracts:

"Eurotas—Escutcheon good on thighs, with very peculiar downward running streak, like an immense oval, except that it is connected at the top with the hair of body. This is plainer on the right side than on the left. Escutcheon does not go out like a spread eagle on thighs, as has been said, but is only a good thigh escutcheon by no means phenomenal."

"Bomba—Escutcheon a good curve line, no tufts, curls nor ovals."

"Neither of these escutcheons was at all unusually good, nor was Jersey Queen of Barnet's any better."

About a year ago I had a visit from a friend who was a firm believer in the escutcheon, and after discussing it for awhile I proposed that we go out and examine a few tested cows. Our examination was made in the following manner: One carried Guenon's book, the other Hazard's. Each looked at a cow separately, and put down what he considered her escutcheon to be, without knowing how the other rated it. We then compared notes, and found but one or two discrepancies, which we reconciled. We examined some twenty cows, but I mention only the two which had given over 20 pounds, viz., Croton Maid, then here to be bred, and Duchess of Bloomfield. Of these the first had a bicorn escutcheon of the second class, and the second a nondescript escutcheon, more like a bicorn of the third class than anything else, but not agreeing with any of Guenon's classes.

Here are six cows, of which four would fairly be ranked as phenomenal, and the other two strictly first-class, yet not a first-class escutcheon among them. If I be told that the examiners were incompetent judges, I reply that a system which a man of barely ordinary intelligence cannot master in seven years—for I was seven years trying to learn it—is not likely to prove valuable to the average farmer, and needs revision and simplifying.

Other marks relied on are: yellow hide and ear; yellow horn; oily yellow dandruff at end of tail; large milk veins.

I examined Eurotas at the end of April. It must be remembered that her year's test is one of the richest ever made. It has been stated that her butter was of inferior quality, but Mr. Carpenter assured me that this was an error, and it was fully up to the average of the herd. It was not so

yellow as Jersey Belle's, which was peculiarly golden, but it was good in color and texture.

Now, in April, 1882, Eurotas had a palish hide, a pals udder, a very pals ear, and the dandruff in her tail was dry and dark, not golden or waxy.

Bomba had a chalky born, heavier than that of Eurotas, (though the latter had lost both shells), black tipped, a pals hide, which seemed a little thicker than Eurotas', but equally mellow, a pale udder and a pale ear.

Jersey Queen of Barnet had rather better colored hide and ear, but her udder was of a chalky white.

Next day I saw Coomassie and her grand family, including Oua. Their hides and udders were also pale, and while the Island scale of points slows one for length of tail, which is supposed in some mysterious way to be connected with milking capacity, a short tail is characteristic of the Coomassie family.

The color of hide, ear and udder is so largely influenced by the season of the year, the food and other considerations, (I have heard that a sea-voyage always made the hide white), that it will not do to attribute too much importance to it; while a golden-yellow skin is undoubtedly very attractive, and, I believe, usually indicates yellow butter. It has not, with me, turned out to be always a sign of rich milk, and in one case a cow of very yellow skin gave me paler butter than the average of the herd.

As to milk veins, young cows are apt to have small ones, and old cows large ones. I have never got beyond this: a good cow is pretty certain to have good milk veins when she is matured.—*Breeders' Gazette*.

A few Vermont dairies have introduced a new method of treating milk which is claimed to give very superior results. The milk is put into several horizontal cylinders of iron, around which steam is turned until the milk is raised to a temperature of 105 degrees. The steam is then turned off, and cold water is introduced, which brings the milk down to a temperature of 40 degrees, which requires about four hours' time, at which point the milk will have decreased in volume eight and a half gallons to every thousand pounds of milk. At the same time the cooling process is begun, air pumps, connected with the milk cylinders, are set in motion, exhausting the air until the gauge shows a pressure of thirteen pounds, when the operation ceases, and the milk rests in the vacuum remaining part of the twenty-four hours. The benefit claimed to be derived from the vacuum is the freeing of the milk from offensive odors and destructive germs, and the securing of a more rapid and perfect separation of the cream by the removal of the pressure of the atmosphere. At the end of twenty-four hours the milk is drawn away from the cream into a vat for making cheese, and is treated as in the ordinary "acid process." Meantime the cream is churned sweet, and the buttermilk added to the skimmed milk for the cheese. The cream is churned at 53 degrees, salted an ounce to the pound, stands 24 hours, and is then re-worked and packed. The butter is colored, the buttermaker remarking that "the cream being raised in the dark made coloring necessary." By this method they secure from the same 100 pounds of milk four and one-half pounds of butter, and nine and one-half pounds of cheese.

The man who secures a thousand acres of alfalfa land in Los Angeles county, and who starts in on the proposition of raising graded cattle for beef, is bound to make a fortune. The profits of orange groves and vineyards have been so extravagant that one scarcely ventures the assertion that the man who devotes himself to the raising of graded cattle will exceed the profits of both; but, at the same time, we believe it. While the world may possibly become prohibitionist, it will never become vegetarian. Los Angeles county ought to become the mart where graded cattle and mutton for the shambles shall be a leading industry in the near future. That it is not so now is owing to the stupidity of people who are neglecting their opportunities.—*L. A. Herald*.

Speaking of the advantage of having good pasturage for hogs, a writer says: The longer hogs can be kept on green food the better condition they will be in to fatten and the less corn it will take to fatten them. I would recommend, therefore, on every farm, where hogs are the leading interest, that a field of rye be sown for early spring pasture. More than a month can be gained in this way, for the rye comes on very early, while clover is slow to start, and should not be turned on until in blossom. I have known hogs that were coughing and making no gain at all from the corn fed them, to become thrifty, and all signs of disease disappear in a few days when turned on rye pasture.

Of the use of oat meal for cows, says a dairy writer, mention is not often made in this country, but when spoken of it is always with praise. That it is better than corn meal there can be no doubt; it is richer in both albuminoids and fat, and the usefulness of these two nutrients, and especially the former, for making milk is shown, not only by the results of numerous careful experiments, but by the acknowledged usefulness of oil-cake meal. Were this meal used freely there would be less use for oatmeal, but under some circumstances it might be advantageously substituted for the bran in the favorite mixture for cows of Indian meal and bran.

In a well ordered dairy, says an exchange, where milk or butter is produced the year round, matters are so arranged that there is a constant succession of fresh cows, and thus the quality of the product is kept even without any difficulty. Other special arrangements in regard to feed and care must be made, or the quality of the milk will deteriorate as the cows approach the drying-up period. Very often the only provision made is to make this time coincident with the coming in of fresh grass, which provides the best coloring and flavoring matters. In such cases the cows are dried off in July and come in in September.

An exchange suggests that molasses may be fed to cattle for fattening purposes with advantage. If, however, it is fed to animals intended for breeding purposes, the effects are said to be the production of sterility just in proportion to the quantities fed. Stockmen over-anxious for the appearance of their cattle in the show-ring will do well to weigh this.

To cure scours in calves it is recommended to give two or three ounces of castor oil with flour gruel, or two ounces of salts at a dose, followed with small draughts of oak bark tea.

An advocate of ensilage claims that the area that formerly supported but two cows will now, by the use of this commodity, support fifteen.

Of the entire number of cattle in America, it is estimated that seventy-five per cent. are scrubs or natives.

### Exemption from Milk Fever.

Dr. Pratt, the well-known Holstein importer and breeder, of Elgin, Ill., when in the office of the *Farmer's Review*, Chicago, a few days since, said that since he commenced to feed ensilage, four years ago, he had not lost a single cow by milk fever, while before that time he thought himself fortunate if he got a herd of forty cows through the winter without the loss of one or more from this cause. His theory is that the feeding of ensilage keeps the bowels open and loose, and prevents the tendency to constipation which attends the feeding of dry food, especially if in large quantity, and of stimulating quality for milk production, and which causes a feverish condition of the system, and develops into milk fever at the period of parturition. During the coming season he will increase his silo capacity from 80 to 160 tons. His silos are simply pits dug in the ground, without masonry or planking. The weighting is a portion of the earth excavated. But the ensilage comes out as sound and fresh as from the most expensively constructed silo. There can be no question that all animals kept on highly-stimulating food, and especially milk cows, need a daily ration of succulent food to keep the bowels open and the system in good condition. This can be supplied by either roots or preserved green fodder. But for the successful growing of roots a cool, moist climate is required, entirely different from the hot, dry Summers which we usually experience in the prairie states of the west. To supply this want ensilaged corn fodder is the cheapest food of the kind that can be grown and prepared, and, since the keeping of it is so simple a matter, as shown by the experience of Dr. Pratt and others who have used the simple earth pits, we look to see a large increase in its use among the dairymen of the west, especially in the older settled portions where land has become high priced.

### Time to Cut Grass.

The report of the analytical chemist of the Department of Agriculture, summing up the results of analysis of nearly all the cultivated grasses, says: It is apparent, then, that in most cases the time of bloom or thereabouts is the fittest for cutting grasses in order to obtain the most nourishment and largest relatively profitable crops, and for the following reasons: The amount of water has diminished, and the shrinkage will therefore be less. The weight of the crop will be largest in proportion to the nutritive value of its constituents. The amount of nitrogen not present as albuminoids will be at its lowest point; fiber will not be so extensive as to prevent digestion, and the nutritive ratio will be more advantageous. If cut earlier the shrinkage is larger, although the fiber is less and albumen is a little larger. The palatability may be increased, but the total nutrients to the acre will not be so large, and the nutritive ratio will be more abnormal. The disadvantages of late cutting are evident in the increase of fibre, destroying the digestibility of the nutrients and the falling off of the albumen by conversion into amides. This is not made up by the larger crop out.

When a green crop is ploughed down, says an advocate of green manuring, on account of its watery nature and the amount of unstable nitrogen it contains, it decays rapidly. The benefits are given to the immediate ensuing crops so that a quick return is made for the period of rest. The decaying roots, leaves and stems leave the ground more porous than before. The air circulates through these pores, and by its action the soil becomes loose and mellow. In this state it is well fitted for the plough and harrow. By the chemical action of fermentation the soil is made several degrees warmer than that in which there is no fermentation going on. This heat will have its effect upon the ensuing crop. It will render productive many a cold, clayey piece of land that would otherwise be barren or unproductive.

An exchange notes that Canadian cheese factories refuse to receive the milk of cows which are allowed to feed on slough grass or drink stagnant water, claiming such milk will always prevent the manufacture of good cheese.

Those who have tested out middlings pronounce them among the best of feeds for promoting the yield of milk.

English pork producers claim to make their sweetest pork by feeding potatoes and barley meal.

Do not allow your cows to drink water which you consider unfit for your own use.

## POULTRY.

A correspondent of the *Prairie Farmer* recommends the following method of getting double work out of sitting hens where sitters are too few in numbers: "Set two or more at the same time, and when the chicks come out give two families to one hen, and set the other over again. To do this successfully, the chicks must be taken from the nest as soon as dry and given to the hen that is to raise them; for if a hen once leaves the nest with her chicks, no amount of moral suasion will induce her to go back. Before giving the hen fresh eggs, the nest should be renovated and the hen dusted with sulphur or something to prevent lice." It would seem probable that extra care and food, especially that of a heat-producing and strengthening nature, would be essential to prevent bad results from such overwork.

The *American Agriculturist* very sensibly urges the adoption of the plan of selling eggs by weight, since there is a difference of from 20 to 30 per cent. in the weight of eggs of different sizes. It is argued that selling by weight will work beneficially for all parties, especially for the producer. It operates as a premium upon the cultivation of the most productive varieties of fruits, vegetables, and farm stock. The farmer who is painstaking with his poultry and gets the largest weight of eggs has a fair reward for his skill and industry. The present custom is a premium to small size and good layers.

Weakness in legs of chickens often comes from feeding Indian meal only, which forms an undue proportion of fat to muscle and bones. If after the chickens are a few days old, says a poultry grower, Indian meal, mixed half and half with wheat bran, or three-fourths oat meal if fed, it would be much better for strengthening the bones and muscles. Mix them up with skim milk, if to be had. If not, be sure that the water is pure and scalding hot. Some feed pure oat or barley meal, but it is doubtful whether these are better than the above mixture, if as good.

Nothing will prove more fatal to young chicks than cold, damp coops. If kept warm and dry there is but little danger from disease.

FISH.

Offutt's Meadows.

The sun shone hot on the river as the Thompson swung out of her dock for Kelama, with nearly 200 passengers on board, of whom more than two-thirds were new arrivals by immigrant trains from the east.

Twilight shadows deepened over the valley as we crossed the bridge at Oleque, once known as "Pumphrey's Landing" in the days of dead-ax wagons and Indian canoes.

Half-past five o'clock of a cloudless morning, with evidences of a hot day ahead, saw us four seated in a little thorough-brace wagon, whirling out of town for the fishing grounds.

The deep haying of a dozen monstrous deerhounds woke the stillness of the early morn as the wagon rattled past the bachelors' cabin, where they had spent over a quarter of a century in their peaceful life.

The stream was high and swollen with the melting snows from Rainier's hoary crest, but I dashed into the rapids with bamboo in hand and a leader covered with hawthorne, brown heckle and jingle cock flies.

The running of the trains and boats on Saturdays so as to leave here at or about noon on that day, gives the clerks and operative of this city a chance to spend Sunday in the country, and they should not omit to take advantage of it while the fine weather lasts.

The Des Chutes and Tenalquot being particularly good just now. And by the eastward bound train for The Dalles, you can fish in any creek between here and the Gate City.

Alluding to the large number of heavy salmon caught in British streams this season, the Manchester (Eng.) Sporting Chronicle says: "This year's spring fishing will be remembered for the unusual number of heavy salmon which have been landed, and, strange to say, the biggest fish have been taken from English rivers."

They have lately been catching salmon with hook and line on the Columbia river. They use salmon roe bait on "spoons." A gentleman took a thirty-five pound fish the other day with a "spoon" hook. Why not, pray?

STALLIONS THOROUGH-BRED.

The Thoroughbred Stallion

WILDIDLE.

By Imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:32, at two years old), May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal. Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, owner, or W. L. APPELEY, Supt., Santa Clara, Cal. P. O. Box 223.

STALLIONS

—AT—

RANCHO DEL PASO.

For the Season of 1884.

Thoroughbreds.

LONGFIELD.

Chestnut horse, by MONARCHIST, he by Lexington. First dam, Dame Gourlay (Blue Gown), by Planet. Second dam, Flora G., by Lexington.

JIM BROWNE.

Chestnut horse, by FOSTER, he by Lexington. First dam, Flush, by Hawatha. Second dam, Fanny Bugg, by Imp. Ambassador.

Trotting Stallions.

ECHO.

Bay horse, by RYSDYK'S HAMBLETONIAN. First dam, Fanny Fetter, by Magnolia, son of Seely's American Star.

ALGONA.

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian. First dam, Emma Kinthead, by Conscript, son of Cassius M. Clay.

ALASKA.

Brown horse, by ELECTIONEER. First dam, by Washington, he by Geo. M. Patchen. Second dam, by Williamson's Belmont.

THOROUGH-BRED STALLION

X X.

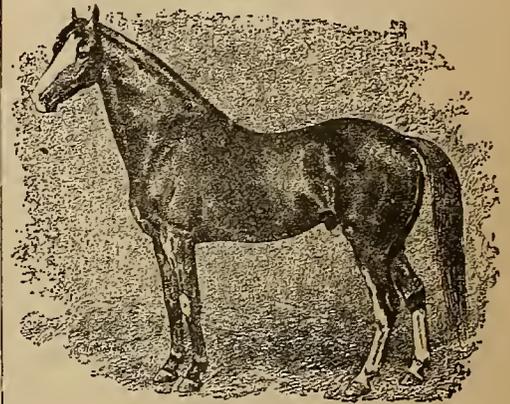

Pedigree.

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name.

JOSEPH CAIRN SIMPSON, Oakland or 508 Montgomery Street, San Francisco.

The Thoroughbred Stallion

JOE HOOKER. BY MONDAY.

First dam Maryland, by Imp. Eclipse. Second dam Henric Farrow, by Imp. Shamrock. Third dam Ida, by Imp. Belshazzar.

Terms, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

TROTTING STALLIONS.

Standard Trotting Stallion

BILLY HAYWARD, 489,

AT NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

THE ELECTIONEER STALLION

STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

Terms. \$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Taylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,650 pounds; was sired by Electioneer, and closely resembles him in form and color.

J. J. FAIRBANKS, Agent. Oakland, January 18, 1

CRICKET.

The Occidents Victorious.

The opening match between the old-time foemen, the Occidents and Merions, took place at the Olympic Grounds last Saturday afternoon. The game did not start at the announced time owing to the tardy appearance of a few of the Merions. The Occident captain winning the toss courteously, sent the Merions to bat, and they were all rapidly dismissed for twenty-eight runs. Barnett exhibited patience and good cricket for his thirteen runs; Banner played better than usual. Waterman bowled with great effect. The Occidents compiled fifty-nine runs before the fall of the last wicket. Sanderson, Bristowe and Wilkins played well for nine, ten, and ten respectively, while Purdy played a splendid not-out innings for eighteen including two drives over the fence. Banner bowled in his usual effective style, but he was not very well backed up from the other end. After an unusual delay the Occidents once again took the field, Hood and Hill batting, but the former was very soon caught out. Creswell, the next man, was bowled by Purdy with the score at one. Burnett with the score at nine saw Hill neatly stamped. Benjamin next made his appearance, and with Barnett hit the now very moderate bowling all over the field, until the time for drawing the stumps had arrived, the board showing three wickets down for fifty-nine runs. As the game was a one day's match, the Occident won on the first innings by thirty-one runs. Wilkins kept the wickets in excellent style, and is a great acquisition for the Occident Cricket Club. De Golia fielded in good form. The score follows:

Table with columns for Occidents and Merions, listing players and their runs. Occidents: J. Sanderson, b. Banner, 9; McDougall, b. Banner, 0; W. Carr, b. Banner, 0; Waterman, b. Barney Benjamin, 4; J. Knox, run out, 1; S. Purdy, not out, 18; H. O. Bristowe, run out, 10. Merions: L. Burnett, c. Wilkins, b. Waterman, 13; C. Goewey, b. Waterman, 1; Barney Benjamin, b. Waterman, 0; Creswell, b. Purdy, 0; G. Theobald, b. Waterman, 2; Ben. Benjamin, b. Waterman, 0; C. Banner, run out, 4; Hood, not out, 2; De Golia, b. Sanderson, 0; Wharton, l. b. W. Sanderson, 0; Hill, did not bat, 0; Byes 4; Leg Byes 1; Wides 1.

Table with columns for First Inning and Second Inning, listing players and their runs. First Inning: L. Burnett, c. Wilkins, b. Waterman, 13; C. Goewey, b. Waterman, 1; Barney Benjamin, b. Waterman, 0; Creswell, b. Purdy, 0; G. Theobald, b. Waterman, 2; Ben. Benjamin, b. Waterman, 0; C. Banner, run out, 4; Hood, not out, 2; De Golia, b. Sanderson, 0; Wharton, l. b. W. Sanderson, 0; Hill, did not bat, 0; Byes 4; Leg Byes 1; Wides 1. Second Inning: Purdy, 0; G. Theobald, b. Waterman, 2; Ben. Benjamin, b. Waterman, 0; C. Banner, run out, 4; Hood, not out, 2; De Golia, b. Sanderson, 0; Wharton, l. b. W. Sanderson, 0; Hill, did not bat, 0; Byes 6; Wides 1.

Table with columns for Occidents and Merions, listing runs at the fall of each wicket. Occidents: 1st innings, 0, 15, 18, 41, 41, 55, 56, 59-59. Merions: 1st innings, 1, 4, 5, 12, 14, 25, 25, 26, 28-28. 2d innings, 0, 1, 9.

Table with columns for Occidents and Merions, listing bowling analysis. Occidents: C. Banner, 57 balls, 21 runs, 6 wickets; Barney Benjamin, 30 balls, 22 runs, 1 wicket; Creswell, 10 balls, 3 runs, 1 wicket; Ben. Benjamin, 15 balls, 8 runs, 0 wickets. Merions: Waterman, 70 balls, 7 runs, 5 wickets; Sanderson, 22 balls, 6 runs, 2 wickets; Purdy, 35 balls, 5 runs, 1 wicket; Carr, 10 balls, 4 runs, 0 wickets.

The Gentlemen of Philadelphia.

The team of cricketers, who represent Philadelphia in the approaching English campaign, sailed May 17th, on the City of Rome. The many friends and cricketers present when the vessel sailed, wished the team God-speed and success. Below will be found a resume of each player:

Brewster, Francis E., Young America C. C., and University of Pennsylvania. A good all-round player, with splendid hitting power; batting average for 1883, 16:12. Bowls slow round arm with great accuracy and judgment. A reliable fielder.

Brockie, William, Jr., Germantown C. C., and University of Pennsylvania. One of the most promising young players in America. Bats in beautiful form, exhibiting patience combined with a free style and clean hitting. A quick and reliable fielder. Does not bowl.

Brown, Hazen, Young America C. C. A judicious and patient batsman. A five wicket keeper, taking slows very well. Will fill that position abroad. Does not bowl.

Clark, E. W., Jr., Young America C. C., and University of Pennsylvania. A plucky batsman with a splendid defence; a hard driver and leg biter. Bowls right-handed; a little faster than medium, with considerable curl from the leg. A good fielder.

Fox, J. M., Merion C. C., and Haverford College. Left-hand batsman, with a good defence; hits hard everywhere. Bowls medium pace, round hand, very straight with variation of pitch and pace, and considerable break. A splendid fielder, playing point irrepurchably.

Law, Sutherland, Merion C. C., and University of Pennsylvania. A capital bat, particularly against fast bowling, with safe defence and good hitting abilities. Probably the fastest bowler in Philadelphia at the present time, and when the wicket suits is very dangerous. A hard-working, reliable and untiring fielder anywhere.

Lowry, William C., Merion C. C., and Haverford College. The sensational slow bowler of America. Bowls left-hand, slow round arm, with great spin; his hang and work away from the leg make him at times very difficult to play. Won the howling Cup in Philadelphia, in 1880, and also last year. A weak bat, but brilliant fielder.

Morgan, William C., Jr., Germantown C. C. Plays the steady game to perfection. A most reliable man anywhere in the field; does very well at the wicket. The youngest member of the team.

MacNutt, Howard, Young America C. C. A very straight, round-arm bowler, with considerable spin. Won the howling Cup in Philadelphia in 1882. Bowled with great success in the International match against Canada last year, securing 6 wickets for 15 runs. A moderate bat; hits finely to leg. A splendid fielder anywhere, and one of the longest throwers and fastest runners in Philadelphia.

Newhall, Charles A., Young America C. C. Has been for over twenty years, and is still one of the finest bowlers in America. Won the howling Cup in 1881. Bowled with great success in all International Cricket matches from the time Willihur's Eleven visited America in 1868 up to the visit of the Australians, in 1882. A good and occasionally

brilliant bat; slow in the field, but has a sure pair of hands. Newhall, Robert S., Young America C. C. The captain of the team. The premier batsman of America, and a most invaluable scorer against any kind of bowling. A brilliant biter all round, his driving, being extremely hard and well-timed. In defence depends almost entirely on his back play, which his keen eye enables him to use to advantage. A good fielder. Does not bowl.

Scott, J. Allison, Belmont C. C., and University of Pennsylvania. A very fine hat, with a sound and correct style, and good judgment; is patient but hits very hard; can punish the best of bowling, and rarely fails to reach the coveted "double figures." Does not bowl, but is lively in the field, and filled the position of wicket keeper for All-Philadelphia last year very acceptably.

Sloevei, David P., Belmont C. C., and University of Pennsylvania. Bats in brilliant style, combining a sound defence with clear, hard hitting. Is without doubt the best leg hitter in Philadelphia. Bowls medium round arm, over-hand delivery, very straight, with considerable break back. A very reliable fielder.

Thayer, John B., Jr., Merion C. C., and University of Pennsylvania. With more practice would be at the head of American batsmen. Has an impregnable defense, a very prsty style, and great punishing powers, which, however, he is too fond of using at the earlier stage of his innings. Bowls medium round-arm with excellent judgment. One of the most brilliant fielders in the country.

BICYCLING.

T. W. Eck and Louise Armaindo have returned to Chicago from their Canadian trip. Eck won the Canadian championship for professionals. He speaks highly of the track of the Toronto Bicycle Club, a four-lap track recently built, and considers it one of the best arranged in America. The champion says that riders this side of the line will need to look out for the Canadian amateurs this year, and believes Ross to be the fastest bicyclist in Canada.

A Mr. Terry, of England, has invented a tricycle which is capable of being converted into a boat. When used on the road the machine is an ordinary rear steerer. The operation of converting it into a boat is very simple, and takes but half an hour. All mounted, the apparatus forms a decked canoe, combining all the conditions necessary for proper buoyancy, even at sea.

The Citizens' club of New York has withdrawn from the League of American Wheelmen, and with the other New York clubs, who are also expected to secede, proposes to form a state league.

C. H. R. Gosset and W. J. Nicholson, of the Temple Bicycle Club, rode 135 miles, over roads, on a Humber tandem tricycle, in 12 hours, on May 7th.

Canary and Wood have signed articles of agreement for a contest to decide the championship at trick and fancy riding.

The League of American Wheelmen numbers over 4,000 members.

THE DRAMA.

Vienna Garden.

The Gypsy Band have enjoyed another successful and complimentary week, showing very plainly that the hold they have taken on our people is certainly on the increase. We have spoken of these wonderful musicians and their performance in every complimentary way it was proper for us to do, so that musically we have nothing more to add. Their grand performance this week has been that gem of musical writing, the Miserere, from Trovatore, by Verdi, and if it was ever better played we should like to know by whom. Mr. Urban and Miss Lynton have given some excellent singing during the week, especially "The Swallows," a duet. We are pleased to see Madame Gonzales, the accompanist, become so popular, for, at the piano, in that capacity she has no superior in the city. This was shown by her accompanying Madame Antonetta of the Peralta Opera Troupe. To ourselves, the playing of Madame Gonzales was much more acceptable and faultless than the singing of the diva. With Paul Stanley, like others, we have become thoroughly disgusted. When a man essays to sing the very same songs night after night for six weeks in succession, and only two or three at that, he must have more ability and attractions than Paul Stanley possesses. This old, disgusting minstrel repetition of the same thing is unjust to the house, the audiences, and a sad exposure of the mental poverty of the artist. If Paul Stanley, or any other man, cannot do better than repeat himself every night he had better do nothing, for the stage evidently is not his forte.

Derby Day in Italy.

For this first Derby Reale, 31 brood mares were entered on the 31st of December, 1880, while the entries for next year's race were, respectively, 42 and 27; for 1886, 42 and 26, and for the Derby Reale of 1887 53 brood mares were entered last December. Most of the sires are well-known English horses. For instance, among the favorites for to-morrow's Derby Reale are Mr. Charles Plowden's Queen of Scots, daughter of Blair Athol, winner of the Epsom Derby, in 1864, by Priestess, born and bred in Rome. Signor Calderoni's Excelsior is a son of The Gannet, who won the Lincolnshire Handicap in 1875, by Piccina, an Italian mare, and Capt. Fagg's Fincino is a son of Ansterlitz, winner of the Liverpool Grand National Steeple-chase in 1877, by Rose. The first however of the four favorites for the race is Andreina, daughter of Andred, by Orphelia. She won the Neopolitana Derby, which I may call the Italian Two Thousand Guineas, on the 15th inst., and belongs to Mr. Tom Rook, an English trainer who was for a long time in Victor Emanell's racing stables when he used to run horses. "Captain Fagg," I may mention, is a racing name for a partnership between Don Alphonso Doria and three of Prince Borghese's sons, Felice, Guilio and Giovanni, "Fagg" being a compound of the initials of their four Christian names.

To insure the success of the Derby Reale, King Humbert has undertaken to give an annual prize of 24,000f. to the winner, the amount of the entrance money going, two-thirds to the winner and one-third to the second, the third saving his stake. The King has also given a prize of 6,000f. for the steeplechase, to be run for by Italian horses, and his example has been well followed, for 33,000f. have been subscribed toward the prizes for the other races to be run during the two days—two-morrow and Saturday—as follows: Twenty-two thousand francs for the members of the Roman Racing Club, 3,000 by the members of the Italian Jockey Club, 3,000 by the Government, and 5,000 by the Municipality of Rome.

The Medicine Chest for the Farm.

In the paper "On the Domestic Veterinary Treatment of the Animals of the Farm," in the Journal of the Royal Agricultural Society, England, Prof. Brown gives the following list of remedies for the domestic veterinary treatment of farm stock, arranged in alphabetical order, with the doses for different animals:

Aconite.—Tincture (Fleming's); action sedative; allays fever; and externally relieves irritation. Dose: Horse and ox, 10 to 30 drops; sheep, 5 drops; add water in proportion of a tablespoonful to each drop of tincture. For a lotion use one tablespoonful of the tincture to a pint of water.

Alcohol, in the form of whisky, or brandy, or at least, is useful for cases in which the system requires to be temporarily roused from a state of depression. Doses: Horse or ox, whisky or brandy, 4 to 8 tablespoonfuls; sheep, 1 to 3 tablespoonfuls. Strong ale, horse and ox, 1 pint; sheep, 1/2 pint; repeat two or three times a day.

Aloes.—A purgative for horse or ox. The ordinary aloetic mass and a solution should be kept at hand; both preparations must be obtained from a druggist. Doses: Horses, 4 to 6 drachms of the aloetic mass as an ordinary purgative. Ox, half a pint of the solution, usually given in combination with linseed oil, in cases of continued constipation.

Ammonia Linctum.—Made by adding a strong solution of ammonia and oil of turpentine, an eighth part, to soap linctum. A pint-bottle, carefully stoppered, should be kept at hand. The linctum is useful as an application for sore throat, and for all cases in which an external stimulant is necessary. Must be applied with the hand, and well rubbed into the skin.

Area Nut.—A useful worm medicine. The nuts should be kept in a stoppered bottle in a dry place. When required for use, the quantity should be grated by means of a nutmeg-grater. Doses: Horse or ox, half an ounce to an ounce of the grated nut, mixed with the food, corn or bran. Sheep, 2 drachms, dog, half to one drachm.

Calves' Cordial.—A form of chalk mixture for calves and sheep. To be prepared by a chemist, as follows: Prepared chalk, 2 ounces; powdered catechu, 1 ounce; ginger, 1/2 ounce; opium, 1 drachm; peppermint water, 1 pint. Dose: Calves, 2 to 4 tablespoonfuls; sheep, 1 to 2 tablespoonfuls.

Carbolic Acid.—A powerful caustic and antiseptic, ordinarily used in combination with 50 to 100 parts of water, as an antiseptic lotion to unhealthy wounds, and for disinfection purposes.

Carbolized Cotton and Gauze.—To be obtained of the druggist. Valuable antiseptic applications to wounds.

Castor oil, also Linseed oil—purgatives. Doses: Horse or ox, 1 to 2 pints, sheep, 4 tablespoonfuls.

Colic Mixture.—Equal parts of laudanum and sweet spirit of nitre, and an eighth part of chloric ether. A half-pint bottle to be kept at hand. Dose: Horse or ox, 2 to 4 tablespoonfuls in three parts of a pint of water.

Electuary.—A soft mass, compounded with honey or treacle; must be prepared by a druggist as follows: Camphor two ounces; powdered myrrh, licorice root and nitre, of each, eight ounces; extract of belladonna, two ounces; treacle enough to make a soft paste. Dose: Horse or ox, a portion of the size of half a walnut to be put at the back of the mouth two or three times a day with a piece of stick. Useful in colds, sore throat, and influenza.

Ginger.—Stimulant; forms an essential part of all cordial powders for exciting appetite; may be given with strong ale in cases of prostration from over-work or disease. Dose: Horse or ox, one to two teaspoonful of the powder in a pint of ale; sheep, one-fourth of the quantity.

Mercurial Ointment (blus), to be purchased ready for use, valuable to promote the growth of hair, and in some forms of skin disease; only small quantities may be applied.

Mercurial Ointment (red), binoide of mercury. A good form for blisters in cases of splint or after sprain of tendons.

Nitre (nitrate of potash), diuretic and fever medicine. Dose: Horse or ox, two tablespoonfuls daily in the drinking water, or half the quantity in the food. Sheep, one teaspoonful in the food.

Salts, (Epsom or Glauber), common purgatives for cattle and sheep. Dose: Ox, 12 to 16 ounces, dissolved in a wine bottle of hot water. A tablespoonful of ginger may be added. Sheep 4 to 6 ounces.

Salicilic Acid.—A valuable antiseptic, effective in the treatment of foot-and-mouth disease. Dose: Four tablespoonfuls of the acid are to be put in an earthen vessel and dissolved in a quart of boiling water; hot water is then to be added to make a gallon. This solution is to be used to syringe the feet and lave the mouth and nostrils, and also to wash the udder, and finally to sprinkle over the litter; half a pint of the solution may be added to the gallon of drinking water every day. The dry acid, (powder), may be sprinkled on the feet after they have been syringed with the solution.

Santonine, used to expel worms, one of the most effective agents for this purpose. Dose: Horse, 15 grains, with 3 drachms of aloes, to be given in the morning before feeding, and repeated after two days.

Sulphur, (Flower of Sulphur), a very valuable alterative. Dose: Horse or ox, a tablespoonful, with a teaspoonful of nitre, may be given in the food once a day; sheep, one quarter of the quantity. Sulphur mixed with any common oil forms an excellent dressing for mange or surfeit in animals.

Turpentine, Oil of.—Stimulant to the skin. Internally used to expel worms, useful in "hnsk in calves." Dose: A tablespoonful daily in half a pint of a mixture of milk and eggs. Lambs, one-quarter of the quantity.

Vaseline.—Emollient to the skin, effective in irritation of the surface, chapped heels, mud fever, especially if mixed with an eighth part of trinitrate of bismuth or carbonate of lead, (white lead), or oxide of zinc.

Zinc, Chloride of.—Mixed with 50 to 100 parts of water, may be used for the purpose for which carbolic acid is employed.

The training cart or modified road vehicle is now one of the regular features of training stables, and they are growing in favor wherever used. One of the best of these convenient arrangements is the single spring cart made by J. A. Bilz of Pleasanton. They are put up in weight varying from 85 to 100 pounds, and at prices from \$75 to \$85. They may be had of the builder, or of Frank Broe, of this city, his agents, Messrs. Hatman & Mornington, of San Jose, also carry Mr. Bilz's goods.

SPORTSMEN'S HEADQUARTERS.

Messrs. Winslow and Kelly beg to announce the opening of their Headquarters, in connection with their wholesale and retail liquor establishment, 871 Market St., San Francisco. All necessary materials for writing, and conveniences for keeping club books and records left in their charge, will be found. It will be the purpose of the proprietors to study the comfort of their patrons at all times.

### Important Sale of Thoroughbred Horses.

BY DIRECTION OF THEODORE WINTERS, ESQ.

We will Offer for Sale Thursday, July 17th, 1884.

At the Stables of C. H. SHEAR, opposite Agricultural Park, Sacramento, Seventeen Head of Thoroughbred Horses—

COMPRISING All his two-year olds and yearlings, together with the crack three-year-old Prince of Norfolk and the famous hurdle mare Hattie B.

It is Mr. Winters positive intention to retire from the turf and confine himself strictly to breeding. Hence his entire string will be offered without reserve. The colts in training will be galloped until day of sale, that they may be kept in order for racing purposes. The horses may be seen previous to sale at the Winters' Ranch, Riverside Road, near Sacramento. A competent Veterinary will be in attendance, to make all examinations desired by purchasers. Killip & Co. will execute commissions for intending buyers who cannot be present.

Catalogues giving full pedigrees, etc., will shortly be issued. For information apply to KILLIP & CO., Live Stock Auctioneers, 116 Montgomery Street, S. F.

## LARGE PUBLIC SALE SPANISH MERINO RAMS!

WEDNESDAY, JUNE 18, '84,

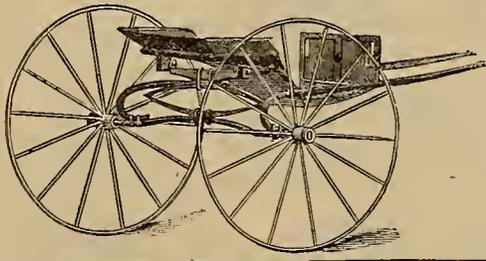

COMSTOCK'S STABLES, --- 524 THIRD ST., SAN FRANCISCO, CAL.

WE WILL SELL AT PUBLIC AUCTION ONE HUNDRED AND FORTY HEAD OF SPANISH MERINO RAMS, one and two years old this spring, at the above time and place. These Rams were recently imported from Vermont, and were selected with great care from the Top of some of the Best Flocks in that State, and are all recorded in the Vermont Registers. They were started for Australia, but being prevented from going further by laws passed by that Government prohibiting further importation of American sheep, we take this method of closing them out, thus placing within the reach of Flock Masters on this Coast an Extraordinary Opportunity of obtaining some No. 1 Rams.

We are confident it will be for the interest of every Sheep Breeder to attend this sale. Remember, this is to be a Bona Fide Sale, as we intend to Close Out the Lot. The Sheep can be seen at above place, and all are invited to call and examine them.

Sale to commence at 11 A. M., sharp. For Catalogue or particulars, address GEORGE HAMMOND, Grand Hotel, or MESSRS. KILLIP & CO., Auctioneers, 116 Montgomery Street, F. D. BARTON & CO.

## THE NEW ZEALAND Stud and Pedigree Stock Co. LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Anstralian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-born Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Anstralian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Anstralian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Anstralian Colonies.

### Fastest Time on Record.

Martini-Henry, by Musket—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30, and beating a field of twenty-nine, thus lowering the previous best record of 3:30, by Darriwell (5 years), carrying 102 pounds, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

P. H. BOURKE, Secretary,

Auckland, New Zealand.

The New Zealand Loan and Mercantile Agency Co., Limited.

112 California Street, San Francisco.

HUGH CRAIG, Agent.

### Speed Programme

— OF —

### THIRD DISTRICT AGRICULTURAL ASSOCIATION

### REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.

Horses distancing the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the Judges.

The Pacific Coast Blood Horse Association Rules to govern all Running Races.

Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock P. M.

In all Running Races the second horse saves entrance.

No money paid for a race without a contest.

All entries for Races to close with the Secretary or President at Chico, July 1st, 1884, at ten o'clock P. M.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Race will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

C. C. MASON, PRESIDENT.

ROLAND DILLER, SECRETARY.

THE TROTTING STALLION

SILVERHEEL

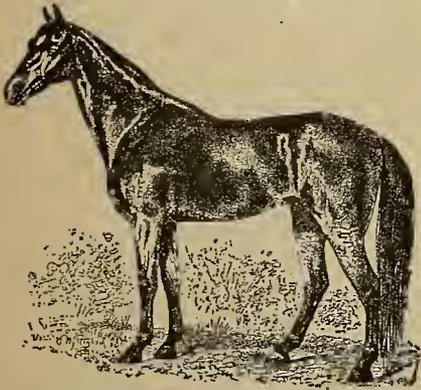

WILL MAKE THE SEASON OF 1884 AT THE DASHWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland.

TERMS.

Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

SACKBIDER & CUSHOLM.

Hambletonian Trotting Stallion

BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star), Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

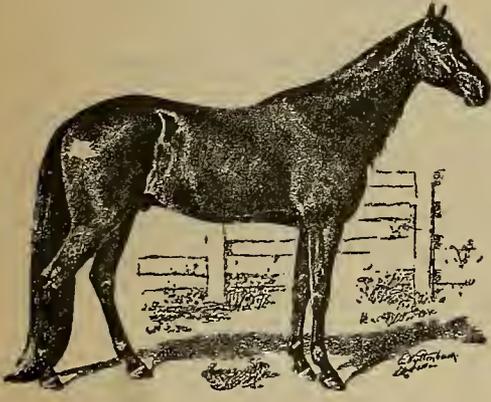

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

CHARLES J. ELLIS, Owner. WM. DONATHAN, Agent.

Mambrino Trotting Stallion

ABBOTSFORD.

Record 2:19 1-2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE, San Mateo, Cal.

PEDIGREE.

By Woodford Mambrino, his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Pymaster, dam Woodbine, (dam of Wedgewood, 2:19), by Woodford, son of Kosciusko, by Sir Archy.

Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodbury, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Conroy 2:22 1/2; Magenta 2:23 1/2; Manfred 2:25; Panscott 2:25 1/2; Rachel Woodford Mambrino was also the sire of Princeps, the sire of Tribulet 2:24. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,300 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adalide 2:19 1/2; Commonwealth 2:21; Hiram Woodruff 2:25; Valley Chief 2:25; Faustina 2:28 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

TERMS.

One hundred dollars the season, to be paid before removing the foal. Mares not proving in foal can be returned the following season, free of charge. Good pasture at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

WASH JAMES, Agent, San Mateo, Cal.

The Trotting Stallions

DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$30, Monroe Chief \$10, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phalaris, 2:18 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:25), by Mambrino Chief; second dam by Potomac; third dam by Saxe Vicmar Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

Monroe Chief, 2:18 1-4.

Two-mile record, 4:46.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performance, see the holiday number of the BREEDER AND SPORTSMAN, issued December 28, 1882.

For further information address

JOHN A. GOLDSMITH, OAKLAND TROTting PARK.

The Trotting Stallion

BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson. Frank Pierce, Jr., by Frank Pierce, son of Beppo. Brigadier will make the season of 1884 from February 10th to July 1st.

Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes. Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats. February 24, 1884.

J. B. McDONALD.

2:20 1-4.

The Fast-Trotting Stallion

ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond. Second dam, Columbia, by imp. Bonnie Scotland. Third dam, Young Fashion, by imp. Monarch. Fourth dam, Fashion, by imp. Trustee. Fifth dam, Bonnets o' Blue, by Sir Charles. Sixth dam, Reality, by Sir Archy. Seventh dam, by imp. Medley. Eighth dam, by imp. Centinel. Ninth dam, by Mark Anthony. Tenth dam, by imp. Janus. Eleventh dam, by imp. Monkey. Twelfth dam, by imp. Silvereye. Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents. Anteo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

M. ROLLINS, Agent, Santa Rosa.

MAMBRINO WILKES.

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE D WILKES, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christina, by Toddhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Toddhunter's Mambrino son of Mambrino Chief, his dam Ripton's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,200 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prepotent sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew stable, STOCKTON, and at M. M. Morse's near LODI.

Terms.

\$40 for the season, or \$25 single service. This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

A. L. HINDS, Agent.

The Trotting Stallion

STEINWAY,

With two-year-old record, third heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

Terms.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County,

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McClevery & Noble, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Haywards, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Strathmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Clara, 2:17 1/2, and Tucker, 2:19 1/2; Chestnut Hill, 2:24; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28; Henderson, 2:28; Strathlan, three-year-old, 2:29; and Stuart, three-year-old, 2:28. Start is full brother to Belnor, who trotted two miles in 2:52; at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall, was timed the second heat in 2:32; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23, and he in turn got Governor he the sire of Sprague, record 2:20; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbena, Admiration, Mystery, in 2:39, 2:32, 2:31. Memento won the first heat. As three-year-old, at Sharpshury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30, 2:30; Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchy and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:23 1/2, 2:25; but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27, 2:23 1/2, 2:27.

Address

GEORGE WILEY, Cook Farm, Danville, Contra Costa Co., Cal.

THE TROTTING STALLIONS

SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO JULY 15TH, 1884, AT THE FARM OF THE OWNER, THREE MILES NORTH OF CHICO, BUTTE CO., CAL. Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. 14 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1875.

PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk grand dam by Eustis, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:44) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grand dam by Lellor's Consul, by Shepperd's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

La Harpe is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk grand dam by Eustis, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:44) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grand dam by Lellor's Consul, by Shepperd's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

La Harpe is a bronzo bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks, and foaled in 1878. La Harpe was sired by Fane, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldenhill Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Fane's dam Glory by Jackson's Western Star (son of Platt's Western Star by Blackstone). 1st dam by Boanerges, 2nd dam by Gallatin (1811). La Harpe's dam Fratric Bird by Flaxtail (dam of Fugate, 2:28, and Prompter, 2:33). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Lellor's Consul. Irwin's Tuckahoe by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

TERMS.

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

BY LIECESTER OUT OF DART. Color, Black, White and Tan; aged five years. Bred by L. H. Smith, of Strathroy, Ontario, Canada; broken by R. B. Morgan, now of Akron, Ohio; also handled one season by N. B. Nesbitt, of the Harvard Keunel Club, at Storm Lake, Iowa. Will be bred to a few first-class bitches. Fee..... \$40.00 Address W. W. MOORE, Oakland, Cal., or J. Y. ROSS, 123 California Street, San Francisco.

**FAIRLAWN, 1884.**

TENTH ANNUAL CATALOGUE

Now ready for distribution. Contains descriptions and pedigrees of 252 head of High-Bred Trotting Stock now at Fairlawn. Will be sent free to all applicants who enclose 3 cents in stamps to prepay postage.

**25 HIGHLY-BRED BROOD-MARES,**

Bred to the Fairlawn Stallions, and

**130 HEAD OF VERY PROMISING YOUNG STOCK,**

Consisting of Young Stallions, Fillies and Roadsters, are offered at *Private Sale.*

**THE ONE PRICE PLAN** Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person. All stock sold on orders can be returned if they do not come fully up to the descriptions given.

The Stallions in use at Fairlawn are

**A L M O N T 3 3.**

Represented in the 2:30 list by 24 performers, with records ranging from 2:15½ to 2:30. Limited to 20 approved mares at \$300 the season.

**HAPPY MEDIUM 400.**

Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season.

**ABERDEEN 27.**

Having ten of his get with records ranging from 2:16¼ to 2:27¾. Limited to 40 mares at \$150 the season.

**ALECTO 2548.**

By Almont, out of Violet, by Rysdyk's Hambletonian. Limited to 30 mares at \$50 the season.

**STARMONT 1526.**

By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season.

Ethan Allen, Jr., 473, used as a Private Stallion.

The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 2:30 list. The sons of each of these stallions are siring trotters. Almont has six different sons that have sired 2:30 trotters. Mares failing to get with foal can be returned in 1885 free of charge. For further information, and catalogues containing full particulars, address

Lock Box 392.

**WM. T. WITHERS, Lexington, Ky.**

Thoroughbred Berkshire Pigs.

I have now on hand, and offer for sale at reasonable prices, at my stock-farm, Oak Grove, San Mateo Co., a choice lot of pure Berkshire Pigs from two to twelve months old, bred from the best strains of Premium stock, which I import yearly from England direct. Apply to

## The Earl of Glasgow.

The following interesting sketch of one of the greatest and noblest sportsmen that ever lived appeared in the English *Licensed Victualer's Gazette*:

The Earl of Glasgow, who is better known in sporting annals as Lord Kelburne, was born in Renfrewshire on April 10th, 1792. He entered the Royal Navy as a midshipman at the usual tender age when naval officers commence their arduous training, and ultimately rose to the rank of commander. The navy was a rough school in those days; the old sea dogs that gave Britannia the rule of the waves were a very different race to the smart, genteel young gentlemen who now walk the quarterdeck, as the readers of Smollet and even Captain Marryat can very well realise. It was under such commanders as Commodore Hurricane and Lieutenant Hatchaway that Lord Kelburne was initiated into his profession, and the flavor of such associations clung to him through life in his habits or rather overbearing command and his love for strong language.

From the first, however, he had a strong taste for the turf, and whenever he got on shore he never failed to indulge it. During the early years of his career, however, such opportunities were few and far between, for there was always plenty of fighting to keep His Majesty's ships and men fully employed. It was no wonder, then, that when the young bloods did obtain a short respite, and found themselves upon *terra firma*, that they played some wild pranks. There are stories told of my lord and some of his companions sitting at the window of the Black Swan, at York, with magnums of claret before them, at midnight, and handing it out in tumblers to every one who passed by, hurling it after those who refused to drink, smashing all the mirrors in the house, dancing hornpipes on the tables to the music of crashing glasses, until overpowered at last by "potations pottle deep," they sank under the table and were conveyed to bed, one after another, upon the shoulders of some stalwart ostler. At such times he would make the most reckless bets. John Gully, entering The Star, in Stonegate, one night, where he was staying, Lord Kelburne jumped upon the table, and offered 25 to 1, in hundreds, against Brutandorf for the St. Leger. "Or, d— it, let us make it thousands," he cried.

He got the character of a plunger, however, and later on—it was the eve of the Derby of 1843—when Lord George Bentinck offered, at Crookford's, to take 3 to 1 upon Gaper, Kelburne was ready to lay the odds. "Yes, but I want to lay it to money," answered Bentinck. "Then I'll lay you £90,000 to £30,000!" was the quick response.

It was in 1819 he ran his first horse, Chance, in a match at Newcastle. He soon after made additions to his stud and became a breeder in thoroughbred stock on an extensive scale, confining his entry for races, however, to the North—York and Doncaster—and a few Scotch courses. One of the first good animals he acquired was Jenny, the winner of the St. Leger Stakes. Actaeon was also a horse of considerable celebrity.

His fondness for the turf was doubtless the cause of his quitting the navy before he had attained that high rank to which his birth and qualities most assuredly entitled him. He settled down at his seat, Hawkhead, near Paisley, in Scotland, giving himself up entirely to hunting, racing, and shooting. Hither came such congenial boon companions as Old "Q," Sir John Heron Maxwell, and Sir James Boswell. What nights these choice spirits must have had together! What wine they must have drunk—enough to float a man-of-war! What wild pranks they must have carried out! Of course, every thing was decided by a bet, to win which there was nothing too rash, too dare-devil, or extravagant to perpetrate. One night, after the bottle had been passed frequently, a dispute arose between Lord Kelburne and Lord Kennedy—one of the wildest and most reckless whether of life, limb, or purse, of the set—as to which was the better coachman. A match for five hundred was proposed and accepted. It was to be decided then and there, as such hot-blooded and impatient spirits could not wait an hour, an instant. Up sprang my lord, rang the bell, and although it was midnight, ordered two coaches and two teams to be immediately ordered and got ready at a hotel close by. The landlord, probably used to such extraordinary freaks upon the part of his noble patron, lost no time in complying with the request. The vehicles and horses were brought out, and made ready as quickly as hands could accomplish the task. Up mounted the rival coachmen, seized the ribbons and off they started on their trial of skill. The night was dark as Erebus, but they dashed on as if it had been broad daylight; the road was so narrow that two wagons could scarcely start abreast; the coaches swayed, threatening to topple over every minute, and more than once coming into collision, narrowly escaped being upset. Lord Kelburne was winning easily, when he ar-

rived at the top of a hill where two roads met, one leading to the sea, the other to Ardrossan, where the match was to terminate. Never a lucky man, his usual ill-fortune attended him on the present occasion—he took the wrong road. On he went through the blinding darkness, and, not hearing any sound in the rear, chuckled to think he had left his rival so far behind. The noise of his wheels prevented him hearing the dash of the waves towards which he was so rapidly approaching, but presently his seasoned nostrils detected a scent of the briny in the atmosphere; he grew doubtful, pulled up—just in time! He was on the very verge of the sea; a few more paces and horse, coach and driver would have been among the breakers. As it was, he lost his bet, and very nearly his life.

He was just as reckless in his betting. A sporting writer has described him leaning his back against a wall in the rooms and rubbing his neck with his right hand (an habitual trick he had), ready to lay odds almost to the amount of millions when he was once in the vein. If any one upon whose judgment he placed reliance advised him to put a hundred on a horse, he was just as likely to make it a thousand, or even two.

In 1839 he was elected a member of the Jockey Club, and in 1843 he succeeded to the Earldom. In 1845 he had a dozen horses running in his name, but eleven out of these were nameless themselves. For many years afterwards when his colors—white body, crimson sleeves and cap—were seen borne on the back of some roan or skewbald to the starting posts, or hopelessly toiling thence in the rear and behind the ruck, people simply said, "Oh, something of Lord Glasgow's!" for it was taken as a matter of course that his colts and fillies should be nameless, and from unnamed sires and dams. He hated naming his horses. He used to say that a horse did not deserve a name until he had merited one by winning a race, and it was the infrequency of such an event happening to his stud that left it in that indistinctive condition. His friends endeavored to cure him of his crochet, but in vain, though once, in 1844, he gave way so far as to christen three of his horses by such extraordinary appellations as, "He-had-a-name," "Give-him-a-name," "He-isn't-worth-a-name."

As a breeder he supported his favorite pastime with a lavish expenditure, priding himself upon laying out £60,000 a year on the turf. Yet he never won any of the three great events. His most notable victory was at York, when Actaeon came in a head in advance of Memnon, ridden by Chifney. His General Peel won the two thousand guineas in 1864 and came in second to Blair Athol at the Derby and St. Leger. His nerve in sustaining defeat was marvellous; never but once was his spirit shaken, and that was at the Houghton meeting, in 1857, when he had lost £3,500 in one week over different engagements and declined further overtures. The next morning, however, he won four matches in succession. This sudden change of fortune set him up in the stirrups once more, and he went at the old game as eagerly and recklessly as ever.

He always gave his jockeys strict injunctions how to ride his races, and, with the instinct of his old profession still strong in him, always expected the most implicit obedience to be paid to his orders. This was not at all times easy. When Achievement started for the One Thousand Guineas, it was long odds on her winning if no accident happened to her in the race. Lord Glasgow swelled the field with one of his roan fillies unnamed and unknown to fame. His orders to his jockey were to make the running and out down the field. The wretched filly carrying the Glasgow colors was last, being outpaced from the start. After passing the post he was joined by Lord Glasgow on his cob, who, with a volley of oaths, saluted him with "Did I not tell you to make the running?" Achievement could probably have given the filly two stones and a handsome beating. He was perpetually changing trainers and jockeys, and his fickleness became so notorious that at last few would engage with him without a three years' guarantee. According to his account they all ruined his horses. But when he was pleased no man was more liberal.

But he was eccentric in all his ways. Until a little before his death he never wore an overcoat in the wettest or coldest weather. "The Druid" has sketched an admirable pen-and-ink portrait of him standing at the side of the cords with low shoes a world too wide for him, white trousers in which T. P. Cooke might have danced a hornpipe, and a blue coat and brass buttons. See him when you might there was the same nervous irritation which ruined all natural rest, and which banished all sleep not produced by chloroform or laudanum. He liked having his racing blood to himself, and put the fees of his sires at almost a prohibitive figure. He would sooner shoot than sell. He had been known to go down to Middleham out of the season, summon four or five resident jockeys one night to ride a score or more trials for him the next

morning, and finish up by shooting half-a-dozen of the worst twos and threes. Stern as he was of mood when crossed, his heart was warm and his hand was open. It is said that he once fed half Paisley in a time of distress, and not a man dared give him a word of thanks without being assailed. When the hat went round for some turkie who had fallen upon evil days, he never put in less than a ten or twenty pound-note. Forty years after their connection had ceased he has been known to send a jockey a fifty pound-note for "auld lang syne," if he had won a great event.

He was as keen a huntsman as he was a turfite, and Nimrod tells us that his zeal and love for everything belonging to fox-hunting knew no bounds. He was as regular in his kennel hours as an old maid at her tea table, and as fond of his hounds as they were of him. "In the paddock," says this writer, "I witnessed a sight such as I wish could oftener be witnessed than it is. I saw a lot of old hunters turned out for the rest of their lives, and enjoying themselves at their ease—one of them a fine grey gelding, which his lordship told me he had ridden fourteen seasons, 'never having turned him out in the summer,' he said, 'after reading Nimrod's letters on the condition of hunters.'"

This fine old sportsman died on the 11th of March, 1869, at Hawkhead, his favorite residence, in Renfrewshire, and it may truthfully be said that it will be long ere we shall look upon his like again.

## "G" Company's Trip.

On May 29th G Company, Second Regiment, N. G. C., Capt. W. C. Sharpstein commanding, left the city for a trip to the Yosemite Valley. The company took boat to Stockton, and from that city proceeded to the valley by wagon road, having its own transportation train, sutlers wagon, cooks, etc. Reaching Stockton on the morning of Decoration Day, Capt. U. G. Lebe of the Stockton Guard met the San Franciscans at the wharf, and escorted them to the Yosemite Hotel, where an appetizing breakfast had been prepared. After resting and introductions to the many polite Stocktonians who appeared, the company was invited to take part in the Decoration Day parade, and consented. It was given the head of the line, and Capt. Sharpstein made Colonel, commanding for the day. The parade was creditable in size and quality, opinions being equally divided as to which, Company G or the Stockton Guard, presented the most soldierly appearance. After the parade the company was entertained at luncheon, and at four o'clock in the afternoon was escorted to the confines of Stockton by the Stockton Guard in full uniform, and sent upon its way with most friendly wishes and hopes for future similar interchanges of courtesies.

This venture of "G" is a gratifying indication of manly force and determination in its members, and particularly in its energetic young captain, whose untiring efforts for weeks have been directed to this end. The company is choicely in its *personelle* and we are sure will reflect credit upon San Francisco in all its doings in camp and out of it. Many little obstacles will be met and overcome, and not a few hardships endured, and all will conduce to the strengthening of the young soldiers, both physically and otherwise. We hope to see them return safely and shall give an account of their wanderings.

Sam Gamble went up to Sacramento last Wednesday, to assist in preparing the track of the State Fair Association. The track is being overlaid with clay, and will be brought to condition as soon as possible.

## Answers to Correspondents.

Question answered only through these columns. No replies by mail or telegraph.

Geo. C., Pleasanton, Cal.

Please answer through your valuable paper the following questions and oblige a number of subscribers, viz: If I bought a colt that was entered in the Embryo trotting stakes, with engagements, and I did not pay the amounts due on him and did not trot him, whom would he be held responsible by the Embryo Association, the buyer with engagements, or the seller that sold with engagements? By answering the above you will confer a great favor on a number of subscribers.

Answer.—The original subscriber is held responsible, and should the purchaser fail to pay, the seller can post him as a defaulter until the amount is paid. The colt named is also under ban while the charge is against him. The trotting rules do not cover this point as fully as the racing, and when the former are not specific, the latter has force as precedents.

TURF AND TRACK.

Dates Claimed.

Bay District Association, San Francisco, June 7th, 11th and 14th. Bay District, San Francisco (Fall Meeting), August 2d, 5th, 7th, and 9th. Santa Cruz Fair Association, Santa Cruz, August 12th to 16th. Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d. Sonoma and Marin District Association, Petaluma, August 25th to 30th. Thirteenth District, Marysville, Aug. 26th to 30th. Golden Gate Fair, Oakland, September 1st to 6th. Chico Fair Association, Chico, Sept. 1st to 6th. State Fair, Sacramento, Sept. 11th to 20th. Ninth District Fair Association, Robnerville, Sept. 23d to 26th. San Joaquin District Fair, Stockton, September 22d to 27th. Santa Clara District Fair, San Jose, September 29th to October 4th. Fresno Fair Association, Fresno, October 7th to 11th. Los Angeles Fair Association, Los Angeles, October 13th to 18th.

Trotting at the Bay District.

The Summer meeting of the Bay District Association began last Saturday, with a fine track and favorable weather, but the other features were not encouraging to the promoters of Midsummer racing. The disposition of horsemen to stand aloof is due to the fear of making records before the entries close for the fairs. The attendance was not what it should have been, but was fair. The race was for the 2:24 class, and was a one-sided affair. Arab, Cairo, Magdallah and Sister started, with Arab leading in the betting at the rate of \$50 to \$30 for all the others together. The favorite won so easily that from the first it was evident that he led it all his own way, and though in the third heat he broke and lost at least seventy yards before he regained his trot, he closed the gap before the distance-pole was reached, and from there jugged in at his ease.

The first heat was won in 2:25 1/2; Sister second, Cairo third, and Magdallah fourth. The half-mile pole, which was reached in 1:11 1/2, Cairo led, but throwing a shoe on the turn he appeared completely demoralized, and could only hobble for the rest of the mile.

In the second heat Arab won with the same ease, Magdallah securing second position, with Cairo third and Sister, unable to show anything like the form her admirers anticipated, fourth. The time of the heat, 2:26 1/2.

The third heat was varied by the breaking of Arab, and this was occasioned by the inevitable dog getting in the way. In jumping over the obstruction the favorite left his feet and lost so much ground that it seemed out of the question that he could win the heat. He came from the half-mile pole in 1:11, and then finished in a jog, so that it was evident he could have come from that point at least a second, and perhaps two of them, faster. Time of the heat, 2:25 1/2.

SUMMARY.

Table with 2 columns: Race details and results. Includes entries for Arab, Cairo, Magdallah, and Sister in various heats.

After the purse race there came a match between Barney and Roanoke, the stakes being \$200 a side. It was the occasion of a good deal of betting, Barney being the favorite at \$20 to \$15. Barney won the first heat in 2:42, Roanoke the second in 2:41 1/2. Still Barney was the favorite, and to give his supporters warrant for the bias he trotted the next in 2:42. The third heat Roanoke came to the score first in 2:42, but inasmuch as he indulged in several runs during the heat, it was awarded to Barney, which gave him the race.

A New Club.

The Solano County Jockey Club was organized at Vallejo last week, with the avowed purpose of putting life into local racing sports. Edward McGettigan was chosen president, and Geo. Roe secretary. A committee was appointed to frame a code of by-laws, and when they are ready a permanent organization will be effected. This is a move in the right direction. Vallejo has a good track, and horses enough in the immediate vicinity to make good sport and plenty of it. The horsemen of Napa should follow the example, and organize a local association. The Vallejo course is good common ground for both counties, and with the facilities there afforded, there is no reason to go a hundred miles from home to have a few days' racing. It is these actual contests that show up the good ones, and training and racing will develop a strong array of performers in the counties named. The blood is there, opportunity is all that is lacking.

Trotting at Petaluma.

Table with 2 columns: Race details and results. Includes entries for John Fitch, Wm. Bibler, and McNamara.

Trotting at Portland.

Table with 2 columns: Race details and results. Includes entries for Pedro, Johnny Blue, and others.

That venerable but energetic Capt. Rynders tells a tale of a trio in trotting affairs that seem to have been worse broken down than any three pedestrians at the leg end of a six days' walking match. It is pretty well known that the Captain met with probably the greatest of his many losses when the young horse Killarney died, and he believes as firmly as he believes in the Democratic party, that he was the fastest trotter that ever lived. "Not," says the Captain, "that I claim that on a prepared track, with everything to favor, he could have beaten Maud S for a mile, but taking tracks as they go he could and would have beat her when it took three heats to win. And just that year when he was ready, did you ever know such blaukyt blank luck? I had arranged with John Morrissey for \$100,000 to back him on joint account, and not a living soul but Morrissey and me knew how fast he was. Then you know just how it turned out. Morrissey died and the horse died, and I was paralyzed! Weren't we three pretty looking cussee to make a campaign?"

The cheanut mare Mollie Mac, that trotted third in the roadster race at Petaluma last week, was sold the same day to Si White. She had only been worked two weeks and showed such a promising get, that Mr. White gave \$450 for her and sent her to his ranch at Lakeville. She is a McClellan.

Race-Horses Run in all Shapes.

The more that racing is looked into and thought about, the more does it become apparent that too much stress must not be laid on the make and shape of race-horses. They go in all forms, is an old saying, and it is not necessary to turn fer for an illustration of that rule, as our great national race, the Derby, which will engross a world-wide attention for the next three weeks, will boast of competitors of all sizes, and I may say, all shapes. There is the enormous filly Queen Adelaide and the narrow pony-shaped St. Mederd; the long, low, powerfully built Beauchamp, and the tall, lightish-bodied Richmond. There will be other big ones and other small ones as well, and several of just the medium size that as a rule win the majority of races.

I have personally no great liking for big horses. My favorite standard would be 15 hands 3 inches for horses and 15 hands 2 inches for mares, and I feel sure the greatest number of winners in the last half century have been near that average. At the same time I am quite open to conviction that the greatest horses of the time have been nearer 16 hands 2 inches than 15 hands 2 inches high, and if asked to give the height of the best horse to be seen in the next fifty years I should certainly say from 16 hands to 16 hands, 2 inches high, probably the latter. A great trainer suggested to me a few months back that the Jockey Club should give a time race or two of great value, so that we might be able to form some guide as to the respective merits of race horses at different periods, and considering the perfection to which chronography had been brought, he was quite prepared to believe in the American plan for the purpose of obtaining records. We may call this and that horse the best ever known, but we have no certain data to rely upon, and all that can be urged is the style in which certain horses have won their races.

Bay Middleton won the Derby so easily that there was a chance before he pulled up of his overpowering Robinson and running into Epsom, and his mighty stride was thought by Admiral Rous to be different to anything he had ever seen in a race-horse. The Flying Dutchman was so superior to the majority of other horses that it was found impossible to try him, and Robert explained to me himself that when he did try him he was on one side of a dip or hill on Middleham Moor while his opponents were coming down the other. Gladiator had very much the same sort of way of treating contemporaries, and it would not be difficult to name half a dozen more that were out of all comparison right away from horses of their respective years. Two of the above-named, Bay Middleton and Gladiator, were very big horses, the first being 16 hands 1 1/2 inches high, and the French horse was 16 hands 1 inch high. The Flying Dutchman, I think, was exactly 16 hands high, and among the notable giants of different times might be noticed Blacklock, a horse of great size, so Orton tells us, and excepting his head, which was coarse, possessing splendid symmetry. Tonchstone was 16 hands 1 inch high. Melbourn and the same, Ratanaplan and Fisherman the same, and Mortemer must have been, I should say, 16 hands 2 inches high. Among such grand big ones, however, breeders will say what a lot of great helpless ones there have been at the same time! I am quite ready to grant that in looking over, say a lot of yearlings, it is much safer to prognosticate that the big, overgrown looking ones will be worthless than they will make race-horses.

The great point of all is how they shape. A big one that seems in labor to get his shoulders into play, and what is often the case, when he is at hand action and threatens to tear his fore shoes off with his hind at every stroke, becomes a most helpless brute for every purpose. If he has no aptitude for manners he must be ungainly, but it may be extraordinary goodness that brings all his actions into play as soon as that goodness is roused. Such animals might probably be awkward-looking yearlings, and the first signs of their merit would be when they got into their stride and a spirit of emulation fired them to catch an opponent in a gallop. They may never, however, have what are called manners in their slow paces. Fisherman used to amble down a course like a coach horse, and Wells often pricked him with the spurs in the preliminary canter to keep him on his legs. When once extended, however, it was another affair altogether, as there was no grander race-horse, or one with a longer stride.

Such thoughts respecting the awkward-looking big ones I have seen, and how many I have thought too big for this and that course, came over me the other day in the Birdage, when reviewing Queen Adelaide. I did not like her in the least while she was being walked round the enclosure in front of the weighing stand, as, although not walking crampy or proppy, like Scot Free or Busybody, she moved in a most ungainly fashion. Very big in her body, coarse in her hocks and knees and with not very shapely feet, she rolled in her walk something like a cow. And yet there is a something in her demeanor to commend her, as she was so quiet and free from all excitement, and knowing what she did as a two-year-old, there was something about her enormous quarters and arms to indicate stride and power when put in motion. I remember how deceived people were over twenty years ago at Chantilly when the great, loose, awkward-looking La Touques sailed home for the French Oaks, and repeated the performance again for the French Derby, and when Doyle hustled her up in the preliminary it seemed by magic that she became converted all at once into a magnificent mover. Often enough also have I condemned others in a similar way, to be rudely awakened by actual results, and the contrast was quite as I have stated it when Queen Adelaide raced out of the Abingdon dip, and looked all over the winner until Busybody caught her. Her stride in full stroke is magnificent, and her style when straggling is indicative of very great excellence.

I am no believer at all in big race-horses being at a disadvantage over a course full of gradients, such as Epsom, for I have seen very big, and apparently ungainly ones, do extremely well over much worse courses in that respect. The biggest race-horse I ever saw stood 17 hands high, and being a well made one in proportion, he was a very fine animal. To look at, he appeared a tremendous handful for a jockey, but one who rode him told me that he was as handy as a pony, and I saw him win a handicap top weight in a field of twenty over a course with four sharp turns in it, and with a very steep dip and rise. It depends on whether they are handy, and such as a jockey can hold together.

Busybody is another sort altogether. She is a blood-like, beautiful filly, full of quality from end to end. Like all the Newminster family, she is one never likely to carry much flesh, and would not require anything like the amount of training that would be necessary for Queen Adelaide. As regards make and shape, Busybody, to my eye, is simply perfection—not the handsomest mare that I have ever seen, but her racing points are so marked. Nothing can be more perfect than the lay of her shoulders and her powerful arms, depth in front, width of loin, and length of haunches are all in harmony, and when Tom Cannon really called on her to beat Queen Adelaide, her movements were like machinery.

It is odd that both the famous fillies above named have an awkward way of deporting themselves in their slow paces, and in a different way Busybody is as deceptive as the chestnut, to judge her when walking, as she goes short and slipshod. I saw her walking through High street, at Newmarket, each morning and should have pronounced her either tender or stiff all round. It is, however, well known that many of the best race-horses are the poorest movers in their slow paces. They walk carelessly and have no action in trotting, though when once let out they are like greyhounds from a slip.—Bell's Life.

The Mouth and Bit.

As in either riding or driving the master is constantly in communication with the horse through the medium of his mouth, it becomes a matter of the highest importance that we understand more fully than most persons do the philosophy of the action of the bit and rein, and their relation to the position of the head and neck, in motion, as well as the mode of junction of head to neck and neck to shoulder. It is said of a horse that he has a good mouth or a bad mouth, the terms being understood differently by different persons. Thus, if a horse is what is usually termed very easy on the bit—that is, hears very lightly on the hand of the driver—he is by many considered to have a good mouth; while perhaps most persons, in speaking of a good mouth, mean a horse that pulls pretty strongly against the bit; in other words, that a good mouth is somewhat of a hard mouth. But, properly considered, a good mouth can only be one which bears moderately firm pressure from the bit, being at the same time sensitive to whatever directions the rider or driver aims to convey through handling the reins. Some horses early show a tractability, through responding promptly to directions conveyed through the lines to the bridle bit, such as others never acquire, no matter how much or how careful training they receive.

Yet the bars of the mouth on which the bit rests are as amenable to culture as are the fingers amenable to improvement in sensitiveness of touch. This is a matter of training which can only be carried on successfully by gentleness from a delicate hand, the lessons being repeatedly given, and all the time alike. The idea that the horse can be made to mind the bit and become tractable under it by jerking and roughly forcing him to whirl round, or go from side to side under strong pressure from the lines, is an error. Such treatment causes callousness, thickening of the delicate gums upon which the bit bears, and, in proportion as this rough treatment is persisted in, does the mouth part with its sensitiveness and the horse pass beyond a reasonably fair stage of susceptibility to training. The curb bit should be used with great care, as it is in every sense a lever, and a very free going horse may rush forward upon the bit with such determination as to bruise through the delicate tissues covering the bone, and it not infrequently happens that the bone becomes injured to the extent of splitting off pieces, which, adhering for a while to the soft parts, slough loose, causing great suffering, and eventually leaving a depression at the point from which they became detached. Few realize the hazard that is incurred by using a long curb lever to the bit, taking away all pliability of this by nuduly tightening the curb chain or strap.

The sensitiveness of the bars upon which the bit bears is very great. Covered with a delicate velvet-like mucous membrane, with a highly sensitive structure beneath this and over the bone, we are admonished that we have in this sensitive structure an efficient agency in bringing the horse under our rule. To get the full benefit of these sensitive bars, we must preserve their sensitiveness. This is done by using a bit that can be borne easily and without injury, and by using gentle force. When these precautions are neglected, thickened, indurated bars are the result, and as this condition increases the horse loses his tractability, and if he be naturally headstrong, then the calloused mouth will render him doubly so, because in proportion to the thickening and hardening of the parts upon which the bit bears, in that proportion is he able readily to resist the driver's will, asserting his own. This condition is sometimes produced upon one side of the mouth, the other side not being callous. Where this occurs the horse will be addicted to pulling upon the rein of that side, and his power to resist turning to the right, if the thickening be upon the right side, or to the left if it be on that side, will be great, and all this may be, and often is, attributed to having what men see fit to call a stiff neck. All efforts to change and improve the forward carriage of the horse by manipulation through the bit and lines, should be put into force very gradually, and in place of doing violence to the horse's natural formation, as is too commonly done, the utmost ingenuity and judgment should be exercised, looking to improvement rather than to violent change.—Live Stock Journal.

Light weights give inexperienced boys a chance in the saddle. And boys make free use of the whip and spur. Speaking of horses, Tom Cannon, the celebrated jockey, says: "As I sit in my light saddle I can feel their hearts beat against my legs and hump. Then, if a clumsy boy is on them, they get a bad start after all, and out comes that blessed whip. You may look at a hundred horses I have ridden in races and you won't find a mark of a spur on three of them." The jockey must know when a horse is doing his best. To inflict punishment upon him at such a time is to rouse his sense of wrong treatment and to rebel against it. We want ripe judgment in the saddle, and this we cannot obtain by keeping the weights down. The Eastern scale for this season is better than the Western.—Turf, Field and Farm.

During the races at Columbus, Ind., last week several incendiary fires occurred, and a number of suspicious characters were arrested. John Splann, seattering out alone for a little walk after night-fall was met by one of the city officers to whom he was a stranger, and the minion of the red-eyed law thinking he looked like he might set a house on fire placed him under arrest. I vain John pleaded and explained that he was the driver of Johnston, Minnie R., etc., and that he wouldn't burn anything but a horse's hack in a close race. The officer wasn't taking any taffy, and clung tightly to his prisoner until a number of friends identified him as the veritable John Splann.

These "second money" entries are becoming altogether too numerous. It is not at all unusual to see a horse beaten in a race in 2:30 or slower, that only a few days before has been sent a mile low down in the twenties. It is evident that the driver's intention is to hold back and take second money, thus saving his horse from getting a record until he gets a chance at a big purse. The only visible remedy to this evil is to give the second horse in each heat a record as well as the first. Then only such horses will be entered as are thought capable of winning, as it does not pay to trot for third money.—Philadelphia Record.

### Wagner and Grey Eagle—Four-Mile Heats— Louisville, 1839.

The four-mile heat race in the stakes for all ages, run over the course of the Louisville, Ky., Jockey Club, September 20th, 1839, was the means of bringing together in competition the famous racers Wagner and Grey Eagle, two of the best horses of that period. The stakes closed at the first of the year with ten subscribers at \$2,000 each, half forfeit, but only four came to the post: Wagner, Grey Eagle, Queen Mary and Hawkeye. Of the other six; Tarleton and Musidora gave way in training; Picton was in Tennessee and complaining; Occident's trials did not justify his starting, and Billy Townes and Mary Vaughn were on the ground, but not up to the mark in condition. From the day the stakes closed Wagner was decidedly the favorite in betting, and when it became reduced almost to a certainty that not above six would start, the betting was 50 to 70 on Wagner against the field, although Grey Eagle was backed at small odds for the first heat.

The Oakland course on the day of the race was in the finest possible condition, and the stands, the fences, the trees, the tops of carriages, and every eminence overlooking the course were crowded with spectators. The number of ladies in attendance was estimated at 800, while nearly 2,000 horsemen were assembled on the field. Probably not less than 10,000 persons composed the assemblage, comprising not only several distinguished Senators and nearly the entire Kentucky delegation in Congress, with their families, but all the elite and the beauty and fashion of the State.

Wagner was the first to appear on the course, and a finer exhibition of the perfection to which the trainer's art can be carried was seldom seen. He was a light gold chestnut, with a roan stripe on the side of his face, and white hind feet; stood about 15 hands 2 inches high; small head, clean and bony, and light but rather long neck; immensely strong shoulders running very well back into a good middle piece, well ribbed home. Few horses could measure with him from the point of the shoulders to the brisquet. He was sired by Sir Charles, he by Sir Archy, out of Maria West by Marion, and was five years old.

Grey Eagle next appeared. He was in his fourth year, nearly sixteen hands in height and of almost perfect symmetry, although scarcely equal in his quarters to his forehead. His color, as his name indicates, was a fine silvery grey. He was sired by Woodpecker, out of Ophelia, by Wild Medley. Two chestnuts next challenged public attention—Queen Mary, ch. f., with white hind feet, by Bertrand, and Hawkeye, ch. c., by Sir Lovell.

Cato—called Kate—a capital jockey, rode Wagner, and Stephen Welch, an 82-pound lad, with but three years experience in the saddle, and who had to carry much dead weight in his saddle-bags, was put upon Grey Eagle in place of the man engaged, because the backers of the horse lost confidence in their jockey's honesty at the very last moment.

The horses took their places in accordance with the precedence of their nomination for the stake, Grey Eagle having the inside track, Queen Mary second, Hawkeye third and Wagner the outside. Grey Eagle was the last off, while Wagner went away like a quarter horse, the Queen well up second. They were taken in hand at once, which allowed Hawkeye to take the place of the Queen on the backstretch, and at the three-quarter mile post Wagner allowed him to take the track. Hawkeye led home to the stand at moderate pace, Wagner second and Queen Mary third. All three were pulling to Grey Eagle, at whose head Stephen was tugging with might and main. Hawkeye carried on the running for about half a mile further when Gooding bid Cato "go along." The pace mended at once. Wagner went up to Hawkeye, passed him, and came first to the stand, and then broke loose and made a spread-eagle of the field in no time. The other jocks were not a little startled at this demonstration of Wagner's speed, and each called upon his horse, and near the three-quarter mile post the field closed. Stephen here let out Grey Eagle, and like twin bullets the gallant grey and Wagner came out of the melee. At the head of the quarter-stretch Stephen was told to "pull him steady," so that before Wagner had reached the stand Queen Mary had changed places with Grey Eagle, notwithstanding her saddle had slipped on her withers. Grey Eagle set to work in earnest on entering the backstretch, first outfooting the Queen and then challenging Wagner. The straight run to the stand, a distance of perhaps 600 yards, is ascending. At the half-mile post Cato called on Wagner, and Stephen collared him, with the grey on the outside. For 300 yards the pace was tremendous. Grey Eagle once got his head and neck in front, and a great shout was sent up; but Wagner threw him off so far in going round the last turn that half way up the stretch Grey Eagle was ordered "pulled up," and Wagner won cleverly. Queen Mary dropped just within her distance—150 yards—and Hawkeye was nowhere. Time—7:48.

The disappointment and mortification were so great that for the first twenty minutes after the heat Queen Mary was freely backed against Grey Eagle, while so far as Wagner was concerned it was considered a "dead open-and-shut." Before the forty-five minutes had elapsed, however, a reaction took place in favor of Grey Eagle, it being observed that he cooled off remarkably well. Wagner was nevertheless still the favorite for the race at great odds, but only small amounts were staked.

The tap of a drum sent them away with a beautiful start for the second heat, Wagner leading off with a steady, business-like stride, while Grey Eagle, as full of game as of heauty, waited upon him close up. Grey Eagle made play for the track on the backstretch, and after a terrific burst of speed for 150 yards he came in front. Keeping up his stroke he soon after made a gap of four lengths, and though Wagner drew upon him a little in coming up the rising ground toward the stand, yet he passed it far enough in advance to warrant the warm and hearty plaudits of his friends. Grey Eagle kept up his murderous pace through the entire second mile. Wagner lay up close, and there was no faltering, no finching, no giving back on the part of either. The stride was over twenty-two feet, perfectly steady, strong and regular, with no dwelling, no floundering, no laboring. Grey Eagle made his running to beyond the half-mile post on the third mile. From this point the two cracks made a match of it, in which Queen Mary had as little apparent concern as if out of the race. "Rowell him up!" shouted Wagner's owner to Cato, and the rally that ensued down the descent to the turn was desperate; but Wagner could not gain an inch. As they swung round the quarter-stretch they were lapped, but Grey Eagle was first to the stand by the head. The fourth and last mile of the heat was entered upon in this shape, and Cato immediately took a bracing pull upon Wagner, thinking to hottle him up for a few hundred yards. Stephen, long ere this, had become so exhausted as to be unable to give Grey Eagle the support he required. He rode wide, swerving considerably from a straight line, and was frequently all abroad in his seat. Wagner got up neck and neck with the "gallant grey" as they swung round the turn into the quarter-stretch. The feelings of the assembled thousands

were wrought up to a pitch absolutely painful. Silence the most profound reigned over the vast assembly as these noble animals sped on as if life and death called forth their utmost energies. Both jockeys had their whip-hands at work, and at every stroke each spun, with a desperate stab, was buried to the rowel head. Grey Eagle, for the first 100 yards, was clearly gaining, but in another instant Wagner was even with him. Both were out and doing their best. It was anybody's race yet. Now Wagner now Grey Eagle has the advantage. It will be a dead heat! "See Grey Eagle's got him!" Shouts, hearts throbbing, a thrill of emotion, and the race is over. Wagner wins by a neck in 7:44, the best race ever run south of the Potomac.

### In the Olden Times.

Merlin, bred by Sir Matthew Pierson, won a number of plates and important matches, and he was rated at the time as the best horse that ever ran in England. The old chronicles tell of an exciting victory. He was matched for quite a sum of money, to run at Newmarket, against a horse belonging to Mr. Treganwell Frampton. The betting between the north and south country gentlemen was heavy, and, after Merlin had been got in condition at Newmarket, his groom was approached by the groom of Mr. Frampton, with a proposition to run the two horses a private trial. The offer was declined, but in a coy sort of a manner. Heseltine, the groom of Merlin, communicated the fact to Sir Wm. Strickland, who had a large interest in the match, and the Baronet instructed the attendant to accept, but "to be sure and deceive his competitor by letting Merlin carry seven pounds more weight than that agreed upon." The trial was run over the stipulated course, but Mr. Frampton had also given his groom orders to carry seven pounds overweight, and to preserve secrecy. It was a hard run, and Merlin beat his antagonist by a length.

This being communicated to each party by their secret and faithful grooms, who both rode the trial, flattered each with certain success, Merlin's friends observing that as he had beat the other with seven pounds more weight, he would win his race easily. On the other side, says Mr. Frampton, as my horse ran Merlin so near with 7 pounds extra weight, he will win in a certainty. Immediately after, proposals were made on both sides to a very enormous amount, and accepted; and it has been asserted that there was more money betted on this event than was ever known; some gentlemen not only staked all the cash they were able to advance, but other property also. At length the important hour arrived for the determination of this great event, and each party flushed with success, the south country gentleman observed to those of the north that they would bet them with gold while gold they had, and then they might sell their land.

It was diamond cut diamond, and each section sought to profit by a secret and dishonest advantage. Merlin won the race, and Mr. Frampton and his followers were covered with mortification. As so many gentlemen were ruined in fortune by the race, Parliament roused to action. A law was passed against the "recovery of any sum of money exceeding ten pounds betted, laid, or agreed to between any party or parties." The gentlemen of the olden time, it would seem, liked a point about as well as some of the men of this degenerate day.

### Lord Falmouth's Withdrawal.

The lowest estimate of the profits of Lord Falmouth's breeding and racing venture is \$1,000,000, and the question which wondering people ask is why he should wish to retire. In writing of him in the London *Referee*, "Pendragon" says:

His position has been altogether different from that of any other noble owner, past or present. I much fear me that his position has been altogether different from that of any other noble owner who is yet to come. Although his Lordship was never known to bet more than sixpence in his life, he has been so fortunate that his profits as a racing owner must have been double those of any other racing owner. The story goes that he only betted sixpence once. Then it was against one of his own horses—Queen Bertha—for the Oaks. When she won he was so delighted with the result of his judicious hedging that he had the sixpence mounted in a diamond brooch and presented it to the lucky winner, Mrs. John Scott, the wife of his then trainer. As we find that Lord Falmouth lost the only bet he ever made, it may, with safety, be once again said that he was exactly the sort of owner that racing most requires. It was such men that used to give racing its admitted tone, and leaven the enormities and atrocities of so many of its rank and file. The more we look into Lord Falmouth's career, the more must we be surprised at his retirement. If, despite his heavy winnings in stakes, he had been a desperate gambler, like other owners who have won enormous sums one day and lost still more enormous sums another, we might understand his selling off; but here is a man who had no trouble of that sort, who year after year won heaps of money, who never kept up a large or an expensive stud, and who, just as it seemed as if he was the one fixed star of racing, suddenly expressed his determination of withdrawing from it. In common with many others, I should much like to know what is really at the bottom of this untoward determination, if only because, when such a lord as he of the magpie jacket goes so suddenly, other lords, who have not been nearly so lucky, may elect to go also.

They have a twenty-three year old stallion in Maine named Gideon, that is called a "Messenger," a title not often claimed nowadays. Gideon was sired by Rysdyk's Hambletonian, first dam, Dandy, by Young Engineer; second dam by Commander, son of Commander, he by imp. Messenger; third dam, the Hunter Mare, by imp. Messenger. He is certainly well inbred with Messenger strains. Gideon was once gray, but is now milk white.

Among the starters in the Payne Stakes at Newmarket, England, on May 14th was Foxhall's sister, American Girl. She was badly beaten, and had an allowance as well. Harvester, who had run third to Scot Free, won. But Scot Free had a penalty of 10 lbs., and was conceding 7 lbs. to Harvester. The distance was a mile and a quarter, and Harvester breasted the hill like a good one, as did Scot Free, who was only beaten three parts of a length.

At the late meeting of the Los Angeles Fair Association, Secretary, E. A. DeCamp resigned and R. A. Hewitt was elected to fill the vacancy. Mr. DeCamp is an energetic, clear-headed man and has the essential qualifications of an efficient Secretary. It is to be regretted that personal differences with a member of the Board have impelled him to this step.

### H. B. as a Trainer.

In answer to an inquirer Mr. Busby gives the following elementary treatise on developing pacers:

A correspondent asks for information with regard to the pacer and the way to handle him. The modern side-wheeler is a far different type of horse from the old pacer. He is higher bred, has a more symmetrical form, and is better able to sustain his action. Many of the best pacers have come from sections of the country where the saddle gait, owing to the lack of smooth driving roads, is cultivated, and they are a combination of racking and thoroughbred strains. The fastest three consecutive miles ever made in harness, 2:11 $\frac{1}{2}$ , 2:11 $\frac{1}{2}$ , 2:12 $\frac{1}{2}$ , are credited to Little Brown Jug, a horse that was bred in Tennessee. Although the Jug has tremendous propelling power, and he has shown repeating capacity, his muscles are thicker and shorter than we like to see them. Long, flexible and well distributed muscles are more frequently associated with performances which mark great endurance. Every horse, pacer or trotter, which is often called upon for an extreme flight of speed must be properly balanced, otherwise he will become a cripple. How to balance a flyer is a science but little understood, and so the turf career of a 2:11 horse is generally short. Little Brown Jug was out of balance, and the suspensory ligament of one of his fore legs was forced from the line it should have occupied. His lameness was so pronounced that his owner regarded him as permanently disabled. To make him go sound will be quite a triumph for the scientific school of shoeing. Johnson, who has the fastest harness record, 2:10, is a pacer of the trotting conformation, and the suspicion attaches to him that he is faint-hearted. It may be that his muscles were not keyed up the past Summer to the pitch demanded by a three-fast-consecutive-mile effort. We hope, for the sake of his new owner, that he will prove a campaign horse. His muscular power is more evenly distributed than that of Little Brown Jug. Johnson was bred in Wisconsin, but all of his blood lines have not yet been definitely traced.

To develop a pacer requires patience, knowledge of temperament and a careful study of motion. It is customary to make the weight of the hind shoe just one-half the weight of the forward shoe; and a light toe-weight works well on some pacers. We know of a natural pacer whose trainer first used a shoe of 22 ounces. He gradually cut this down to 14 ounces, and then put on a three-ounce toe-weight and drove him a mile in 2:17. The best way to reduce the weight is to allow the shoe to become pretty well worn, and then to nail on a new shoe of the exact weight of the old one. As the wear amounts to from one to three ounces, it is easy to see that the weight will be greatly reduced at the end of several shoeings. There is danger, however, in allowing a shoe to stay on much longer than a fortnight. The growth of horn is such as to unbalance the action. See to it, that the toes do not become unduly extended. Also watch the heels. Some horses wear a six-ounce shoe forward, others an eight, and others still a ten-ounce shoe. The only way to determine the weight for a horse is by experimental test. You cannot decide what boots are necessary until you study the action. Protect the places that the horse hits in passing. Much depends upon the bit. A high-spirited horse will usually fight against a snaffle, and a rubber bit will keep him in better humor and make him more subject to treatment. It is a good rule to put the mildest possible bit in the sensitive mouth of a horse. It is easy to lay down rules. To apply them is more difficult. We hope our correspondent has had some experience with horses, because a man devoid of experience has no conception of the difficulties to be surmounted by the art of the trainer.

### A Novel Toe-Weight.

As reminiscences of American drivers are always in order, we will present a new one relating to that veteran reinsman, Dan Mace.

In 1879, when Sterling, Ill., opened the gates of her driving park for the first time, the chief attraction proved to be Dan Mace and his stable of trotters, secured by special contract through the efforts of the enterprising managers.

Hopeful, and Lucy, the pacer, started in a special race for \$1,200, which the gallant gray won in three heats, best time 2:13 $\frac{1}{2}$ , which was excellent for a half-mile track.

On the following day, Oct. 19th, Jennie B., a gray mare owned by Mr. Adams, of Prophetstown, started in the 2:48 class and it soon became evident to the judges that her driver was not using diligence in getting his mare to the front, so they changed drivers, giving the care of the mare to Mace. The second heat Jennie B. acted like one possessed, bobbing about and losing her balance while going far within the limit of her speed, and it was with the greatest difficulty that her veteran driver landed the mare on the safe side of the distance flag. Something was wrong that was evident; whether Dan could not drive the mare or whether some one had fooled with her while cooling out, were questions which the judges and spectators were unable to decide and even the pilot of Hopeful could not furnish a reason satisfactory to his mind.

While all hands were awaiting the tardy decision of the judges, a spectator came to Mace and handing that worthy a toe-weight remarked that Jennie B. threw the same after passing the distance stand on the second lap of the track.

"A wooden toe-weight, by George!" exclaimed Dan, adding that he had heard of wooden nutmegs, but it had never fallen to his lot to behold a wooden toe-weight used in a horse race before that moment.

Sure enough, the mare had been carrying a heavy and a light weight which fact easily accounted for her unsteadiness. Suffice to say that during the next three heats Dan saw that the mare had her proper amount of weight on each foot, and thus equipped she won the race with comparative ease—*Chicago Horseman*.

A correspondent in Paris writes that French horses are usually trotted over a course one mile and seven furlongs in length, that the Frenchmen persist in overdriving young horses so that they rarely retain their trotting powers up to ten years of age. A speed of 2:42 or 2:45 to the mile is regarded as good.

At Watt Park, Grass Valley, last Tuesday, in a race between local horses, one of the contestants bolted and threw his rider. John Greer, against the fence inflicting injuries from which the unfortunate jockey died.

W. B. Toddhunter, of Sacramento, has become the owner of the two-year-old colt, Billy Foots, by Wildside—Kate Gift, by Lodi, having bought him of Miss Kate Gift, of Martinez, for \$750.

At the New York horse show Jonesboro, the animal awarded the first prize for high jumping, cleared a bar 5 feet 10 inches from the ground.

At the late meeting at Louisville four important races were won by the get of imp. Great Tom.

### The Knocker-Out of the Plunger.

It appears that Professor Loffler, who got the better of Plunger Walton, in a row about Girofle, it appears spent some time in California. That some of his maxims are well worthy of being reproduced is beyond question.

In a recent interview a representative of the Loudon *Sporting Times* speaks of the marvelous improvement in Girofle's temper, wrought by the professor. Some of Loffler's methods are herewith given. We can agree with what he says concerning the teeth of horses. We could name dozens who had inexplicably become bad tempered on that account. Mr. Keene's My Nannie O and the King Alfonso-Janet colt, (the more especially), were treated for the teeth. In fact, there is no large stable without a case. We give a few of the professor's ideas:

"I don't profess to do impossibilities. All horses are not alike. You see that window? Well, I can't turn the glass into wood, or the wood into glass, but I can polish both. In other words, what is medicine to one horse is the rankest of poison to another. You must study their dispositions. At the first start I confined my attention to horse dentistry, and that only for eleven years. I got the notion that the principal cause of vice in a horse lay in his teeth, and that's what made me study the subject so deeply. I was born in eastern Germany and emigrated to California at the age of sixteen. When there I helped to break in horses—muntstange, and I'll back myself now to ride any horse in the world, bare-backed. I then turned my attention to trotting horses—and, by the way, you may put down this maxim, that a trotter cannot be driven at top speed with a sleek rein. Some years afterward I came to England, and for a long time things went badly enough with me. I couldn't get employment of any kind. At length I received an introduction to Mr. Edmund Tattersall, and he, having seen something of my capabilities, very kindly furnished me with a public letter of introduction. I've never looked back since, and just at present I've rather more work on my hands than I can attend to."

"Who employed you first in this country?"  
 "Mr. John Nightingall of Epsom I attended to the teeth of several of his horses, and wanted to operate on Shinfal, the Liverpool Steeple-chase winner, but the owner wouldn't let me. You see my idea is—don't mind that mare hitting your waist-coat; she only wants to get your watch out to see what o'clock it is—my idea is that hard food, such as oats, which a horse eats, wears his back teeth into sharp points, and these wound the inside of his cheeks at intervals, and that's what causes vice—at least very often. I attribute the supposed bad temper of most horses to the teeth. Many a runaway horse becomes so from bad teeth. That horse, Dickens, was a confirmed holter until I filled his molars."  
 "And now I want to hear about your first introduction to Baraldine."

"Well, it was like this. Mr. Garry sent for me and told me the horse had gone mad, and that nobody had been able to get near him for two days, to give him food or water. Would I undertake the job of taming him? I demurred at first. The same day Colonel Barlow sent for me. 'Loffler,' said he, 'the horse has gone mad. There are several mares to be covered, and we can't get him out of the stable. Money is of no object to us. Get him round if you can.' Breaking the thread of my story for a moment, I may remark that Baraldine is the gamest and highest-couraged I ever handled. 'Afraid of him? tut, tut! I would drive him in a cab this minute.'"

"I don't want to know too much, Mr. Loffler, but how did you proceed with the horse?"

"When I entered the box he was chained up. They asked me to go in and offer him some food in my hand. I refused to do so, because it was impossible. I doubled a blanket up and put it over the horse's head and whilst he was thus blinded, a man behind me put the food in his mouth. They told me they had tried to subdue the horse by means of starvation for two days and nights. My first step was to get a sort of boxing-glove, only much larger, at Boyce, the saddler's—something for Baraldine to worry. With this on my hand I approached him, and he worried it at the first go off, and continued to worry it for six hours. I then managed to stroke him over the head and eyes, and let him smell my hand to show I didn't mean to hurt him. My idea is—and I have incontestable proof of this—that most horses, in their earlier days, went to bite something in a friendly manner, just as puppies do, without any intention to hurt. This disposition should most certainly be encouraged. If punished for so doing they misunderstand you, and in the course of time whenever they feel inclined to bite they will do so in a vicious manner. It is the stupidity, often brutality, of the stable attendant that ruins horses who are not naturally vicious. It was quite three hours before I could place my hand on Baraldine's chest, being in the box with him by myself with the door shut. In two days he was quite amenable to handling, and you yourself could have done with him what you have just done with that mare. I didn't handle his hind legs much, for he kicked them together so much as to hurt me. Well, I had to leave the horse to go down to Mr. Wadlow's, at Stanton, where I go every year to attend Lord Bradford's horses. When I came back to Baraldine I saw at once that the attendant had not carried out my instructions, and that the horse was retrogressing; so that I was obliged to give him a new handling to counteract the bad effects. In so doing, that day, he bruised one of his legs very badly, but without injuring himself permanently. Had they kept me on I would not have charged a farthing, but after being curtly told that my services were no longer required, I claimed 500 guineas from them. Do you think, considering the risk I ran, that such a sum is extravagant?"

"I should place my own life," replied the interviewer, "at more value than a 'monkey.'"

It was now becoming dark, so he closed the door of the box, and we strolled into the High street together.  
 "That mare," he continued, "possesses such a peculiar individuality that it is a great pleasure for me to study it. I have promised Mr. Walton to handle her to such an extent that she shall start kindly at the post. She followed me, loose, all over the Heath yesterday, as you saw. She and the pony are great friends, and I think it is always as well for a horse to have a stable-companion. No, I wouldn't put a goat in with her, nor should I approve of putting a donkey in to worry or kick her. I'm going to take the mare down to the seaside to-morrow or next day, to give her the benefit of the sea breezes and bathing."

The bay horse Frank Hastings, foaled 1875, by Monday, dam Sweetwater, by Volscian from Lady Letty, by Argyle, died recently in Washington Territory. He was at one time owned by Theo. Winters, but going lame at three years old he was sold to go north.

### California Horses in the East.

The Santa Anita Stable has been one of the prominent ones at the Latonia Meeting. Fallen Leaf won the Glidelia Stake on the 2d in good style. The details of the race are as follows:

Glidelia Stake, for three-year-old fillies, foals of 1891 \$100; b. f.; \$20 if declared on or before January 1st, 1894; \$30 if declared on or before May 1st, 1894; \$1,250 added; \$250 to second, third to save stake; 38 sub., of which 5 declared on January 1st; one mile and a quarter.  
 E. J. Baldwin's br f Fallen Leaf, by Grinstead—Mollie McCarthy, 105 lbs. (Holloway) 1  
 W. Cottrill's ch f Mona, by Buckden—Monomama, 105 lbs. (Stoval) 2  
 B. G. Thomas' ch f Hiflight, by King Ban—Hira, 105 lbs. (Tankersley) 3  
 J. W. Loud's ch f Lady Loud, 105 lbs. (Whitfers); D. T. Pulsifer's ch f Hanap, 105 lbs. (Harris); J. G. Greener's ch f Easter, 105 lbs. (Hovey) and Fleetwood Stable's br f Fac Simile, 105 lbs. (Ellis), ran unplaced.  
 Time—2:13.

Pools: Fallen Leaf, \$150; Mona, \$40; Hiflight, \$35; Fac Simile, \$15; field, \$25. French mntuels paid \$8.40. Fallen Leaf went off in the lead, with Fac Simile and Hanap close up. At the furlong post Fallen Leaf had a lead of a length, with Hanap second and Hiflight third. On rounding the upper turn Mona took second place, with Hiflight still in third. The position of the first three remained unchanged to the end. Fallen Leaf winning very easily by a length, with Mona second and Hiflight a had third. Valne to the winner, \$2,740.

## YACHTING.

### Capt. Floyd's Steel Steamer.

The long talked of steel steam yacht that ex-Commodore Floyd was to build at last seems to be coming to something definite. Capt. Floyd, who is an old steam boat man, has made the draughtings himself. She will be built entirely of steel, and as strong as possible. His present intention is to have her built in the East and brought out here round the Horn on the deck of a vessel.

She will be about 60 feet long, 12 feet in beam and will draw about 7 feet. As most of her will have to be given up to engine and cabin room the bunkers are to be made to carry only about three tons of coal, so on any extended trip coal will have to be carried on deck. She will have imitation guards, which will form an air tight compartment the full length of the vessel on either side, which will render her particularly unsinkable. She will have a compound engine and a Herschhoff boiler. She will be lug rigged, her forward sail being much larger than the after one, which we presume might be called the driver.

To make her dry and comfortable in any heavy weather, she will have a "turtle back" forward, which will shed the water as fast as it comes on board. We will watch her advent with interest.

According to precedent, last Saturday, the day appointed by the San Francisco Yacht Club for its festivities, turned out miserably. When the 1:30 boat reached Sausalito the following vessels were moored off the club house: Larline, Nellie, Whitewing, Rambler, Frolic, Emerald and Dawn, all decked with hunting, while off the Pacific Club House, lay the Fleur de Lis all by herself. The ships in Richardson's Bay with commendable spirit also "dressed ship" enhancing the brightness of the scene. Dancing commenced immediately on the arrival of the guests, and was kept up steadily, with the exception of the lunch hour, until the last boat. A drizzling rain began to fall in the afternoon, seeming to dampen both the clothes and the spirits of the participants. If Saturday night was disagreeable, Sunday was much more so. A dull leaden sky was seen without a break from horizon to horizon. Not a breath of wind was stirring, and a close, penetrating rain came dropping down without any sign or appearance of cessation.

In spite of the unpropitious look of Commodore Caduc fired the starting gun at 9:45 and the yachts proceeded to get up their after sail for a cruise to Vallejo and return. At ten o'clock the second gun was fired and the Aggie, Eva, Halcyon, Rambler, and Annie got up their forward sails and started to drift slowly and gracefully towards Point Cavallo. After about two hours time they managed to all close together, when the least semblance of a breeze sprang up, and the yachtsmen, taking advantage of this, got their vessels pointed shoreward and made their best possible time to Sausalito and the cruise was postponed indefinitely. The Nellie and Fleur de Lis showed their sense by remaining at anchor.

We have to report this week the sale of the Halcyon. This vessel has only been built a little over a year and has been used hardly at all, last Sunday being the first time she has been under way for pleasure since last season.

The purchaser is Mr. Joe Grant, and we expect that he will not spare any efforts or expense to get speed out of his yacht. He has already, acting under advice of Captain Hall, made arrangements for three more feet of mainsail, the full length of the leech. This will, of course, necessitate a new mainboom and gaff. He will also change her interior arrangements, which were very badly planned in the first place. We hope to see her develop all the speed she has in her, as the vessel has never yet had a fair test of speed with other yachts. The reported price was \$8,000; remarkably cheap for a vessel one year old, that cost to build and fit out almost \$20,000.

We are glad that she still remains in the yachting fleet instead of being made into a codfisher, pilot boat or trader.

### Regatta of the Atlantic Yacht Club.

The Associated Press advises inform us of the result of the New York Yacht Race, without giving us any further particulars, as follows:

New York, June 10th.—The nineteenth annual regatta of the Atlantic Yacht Club to-day was the most successful in some years. Twenty-seven yachts started. The winners were: Class A, Grayling; class B, Tritan and Agnes; class C, Mischief and Fanatic; class D, Fanita and Rann; class E, Crocodile; class F, Romeyn and Daisy; class G, Amazon. Fanita, George Gould's yacht, also won the Livingston memorial prize.

The yachtsmen are looking forward with interest to the coming Santa Cruz cruise, and already making some preparations for it. The vessels expected to start are the Larline, Halcyon, Aggie, Fleur de Lis, Nellie, Whitewing, possibly the Ariel, and Commodore Caduc; he is thinking of taking the Annie down. It is no trick taking her down, but when she hauls on the wind in a heavy sea, homeward bound, the sensation is somewhat different, especially on a light draft boat like the Annie.

The Ariel came off the beach last Saturday night, where she had been cleaned. We hardly see the use of patting her on the beach so often when she only lies at her moorings to get dirty again.

The Spray leaves to-day for a week's cruise to Stockton. If the weather remains as it was last week a pleasant time can scarcely be looked for.

## BICYCLING.

Mr. Scnri, the world-renowned single wheeled rider, is now making a tour of Italy on his machine, and when completed will visit the United States. The most curious thing about Scnri is that in his youth he lost the use of his legs. Even at the age of seven he was obliged to be carried by his nurse, and could only get along by crawling on his hands and knees. His father, however, happily thought of a plan which proved an effectual cure. A small tricycle was obtained, and, by dint of perseverance, the boy was brought around to be able to use it, and from that time his health steadily improved. It was not very long before the toy tricycle was exchanged for a bicycle. But few surgeons could boast of such a cure as this—a cripple into an athlete—in a comparatively short space of time.

Prince, Woodside and Morgan, the professionals, and several fast amateurs are in Philadelphia, preparing for the races of the Quaker City Bicycle Club on June 17th, 18th and 19th inst. Prince expects to have to ride against a trotter in a match on Monday next, at the Gentlemen's Driving Park. It is rumored in Philadelphia that Hendee wants to have a race with Prince if the league sanction can be obtained. Prince says he can defeat Hendee. It is reported in private circles that Brooks, the amateur who rode at Washington, is an old English professional, and has rode many professional races in England.—*Turf, Field and Farm.*

Two tricyclists have been making a run from Paris to Geneva, a distance of 325 miles, in six days, with delightful ease. They never tasted spirits, beer or wine, but drank coffee, chocolate and occasionally aerated water with fruit syrups. They had breakfast for which they paid fifteen cents each, and a charming country dinner for which they were charged thirty cents, syrup and aerated water included. They ran on the national roads, kept by the Government, with a surface like a billiard table and not a single rut.

The Woodland Democrat says that last Sunday four bicyclists of that town started on a ride to Davisville, and had a pleasant trip. They lingered a little too long in that town, and when they started for home rain was falling. The result was that the "noiseless steeds" balked in the mud and the party had to return to Davisville and take the cars for home.

Dudley A. Sargent, Professor of physical training in Harvard College, and director of the new gymnasium, says that the bicycle brings into special activity the muscles of the thighs, and otherwise affords good exercise, but unless care is taken its use will make one round-shouldered.—*Saturday Union.*

H. C. Finkler and a friend will shortly start on bicycles for a tour through the interior. The trip, it is expected, will cover over seven hundred miles and will occupy a little over two weeks.

At the Harvard Bicycle Club games held at Boston, May 31st, the mile race was won by Hendee in 2 minutes 54½ sec, which lowers the American record ½ sec.

The San Jose Fair Association will offer gold and silver medals as premiums for a mile and repeat bicycle race, on the 4th of July. The race is open to all bicyclists in the district.

H. L. Cortis, the ex-amateur champion bicycle rider of the world, is lying seriously ill at Sydney, Australia. He is suffering from heart disease.

May 5th, W. A. Illston rode a mile with ten yards start in 2m. 54 4-5 sec., at Crystal Palace, England.

A Chinaman is reported as having been seen astride of a bicycle in the streets of Boston.

## POULTRY.

### The Turkey as an Incubator.

A correspondent of the *Ohio Farmer* advocates the use of the turkey for hatching eggs in preference to either the hen or the artificial incubator. He thinks it is more "according to nature" than the latter. His experience in the matter is given as follows:

I took the turkey up and put her to work on artificial eggs for four days; then she became cross and broody. I then fixed her nest and set her with 25 hen's egg, giving her liberty to come and feed at her will. She struck to her work until she had the job accomplished, and out of 25 eggs she hatched 23 chicks. I took them from her and set her again with 31 eggs, and she hatched out 28 chickens. I then took her off and let her mother the chicks, and a more careful mother never lived. She would mother all the chickens that came to her. She stayed with them as long as they stayed with her. There is no trouble to get turkeys to take charge of strange chicks; they would take to young geese or ducks if these would take to the turkeys. Nothing can equal them as careful mothers; they will actually lift the chicks about as a cat does her kittens and all the time they are sitting they may be laying, thus pay for their keeping. I deem this the cheapest and most perfect way of hatching and rearing chickens ever found out, and think it will do away with all patent artificial incubators.

Unquestionably the quickest way to cure a dog of sucking eggs is to kill him. If, however, he is valuable, and the hens are allowed to lay where the dog can get access to the nests, a good dose of tartar emetic can be put into each egg of a dozen or two, through a small hole picked in the shell, and one or two of these put into the nest each day. The dog soon concludes that eggs are not good diet. He never forgets the habit, however, and continual watchfulness is required. A rather cruel remedy, which is sometimes successful, is to boil an egg three minutes, then open the dog's mouth, put the egg in and hold his jaws shut for a minute or two. Then in a day or two boil another, dip it into cold water to cool the shell, and put it in the nest, to which the dog must have access in a few minutes. He will soon learn to let warm eggs alone.

**BILLIARDS.**

**Play and Chatter in Petaluma.**

Billiardists, like others, take their Summer vacations, and at the same time, to judge by the following letter, they blend business with pleasure:

EDITOR BREEDER AND SPORTSMAN, San Francisco.—The advent of W. R. F. Lowry and J. F. B. McCleery, in this portion of the State has made things pretty lively, billiardistically speaking, during the past week. According to advertisement these two players met at Santa Rosa, and crossed ones in a 1,200 point match for a nominal purse. Friday and Saturday evenings were occupied, as well as a Saturday matinee, to finish the play, at 400 points each game. Lowry won the first and McCleery the two succeeding games, which were witnessed by a rather slim crowd on account of an admission being charged at the door. Nevertheless the players did well, making grand averages of over 11 and a splendid rail run of 206 points by McCleery. The latter, after each game gave a brilliant exhibition of fancy shots that were well appreciated by every one except Waite, the old Cosmopolitan ivory pusher, who has, until now, been looked upon by the boys as the crack player of the coast. Mac has found that the luxuriant pastimes of Santa Rosa agree with him and has made it his home, at least, for some days. Occasionally he takes a run into the neighboring towns. On one of these turns he came across Lowry in this little place, and a 400-point game sprung up in consequence. It was for a stake of \$200, and was played last evening in the American Hotel billiard parlors. Mr. Reickert acted as referee and by his decisions added greatly to the Professor's ire. Lowry won the bank and chose the black. The game, as far as good play goes, was not very remarkable. Mac succeeded but once in reaching a half hundred. His troubles were so numerous and at times comical that, by causing laughter on the part of Lowry, the latter was incapable of making over 60 points at an inning. Mac lost the game, having but 276 points to his credit when his opponent went out. Lowry's runs were 31, 51, 60. Average 7.9-13. McCleery's best runs were 31, 50. Average, 5.7-52. Mac was vexed at the close of the play that he omitted to give his fancy exhibition, and left the city for Santa Rosa on the next train. Following is the challenge he wrote before departing:

Mesrs. Lowry, Roberts, and gentlemen of Petaluma,  
GENTS:—Since affairs have taken the turn they have in regard to a billiard match here, between Mr. Lowry and myself, I make you the following proposition:  
I will play Mr. Lowry a game of straight billiards, 1,200 points up, for \$100, or \$250 a side. I will give Mr. Lowry 200 points in 1,200. The winner to take all receipts and pay all expenses. Game to be played on Tuesday evening, June 10th. Telegraph me, if accepted, at Santa Rosa, before 2 P. M.  
J. F. B. McCLEERY.

Petaluma, June 10th, 1884.  
McCleery no doubt means business," says Lowry, "but he forgets that it is usual for a man, when he issues a challenge, to put up a forfeit." It is needless to say that the match is still to come off.  
Yours truly, E. H.

**Pool Tournament Articles.**

A new departure in the billiard circles of this coast will be understood by the following:

SAN FRANCISCO, June 12th, 1884.  
We, the undersigned, do agree to enter in a fifteen ball pool tournament, under the Syracuse call shot rules, and herewith deposit our entrance fee of \$2.50 each. The understanding is, that the Saylor Bros., in whose parlors the tournament will take place, are to give prizes to the amount of \$75, open to all comers. The tournament is to begin on Monday evening, June 16th, 1884, and as many games played each evening and afternoon as the time will permit. In each game the player who pockets 100 balls first will be declared the winner of that issue, and the winner of the greater number of issues to be awarded the first prize, and so on. Referee and judges to be named before the first evening's play. The entries will close on Sunday evening at 10 o'clock.  
W. R. F. Lowry, G. F. Schmechel, G. Anderson, Ben. F. Saylor, A. Kleser, Charles O'Neil.  
It is probable that Lon Morris will also enter. Schmechel and Anderson are the two Eastern pool players who have been making it warm of late for the hotel boys.

The "Parisian" pool is again being talked of. It is probable that the tournament will be held at Loskey's parlors, the other houses being too much engrossed in the percentages of "stud" and "gelding" poker.

Frank Loskey's health has compelled him to visit the country for a few weeks. This is his first vacation in twelve years. His rooms are doing a very fair business.

Emanuel Brunswick has returned from Portland, Oregon, where he established the eighteenth branch of the Brunswick, Balke & Collender billiard house.

**CRICKET.**

**The Trophy Match.**

If the weather permits the Occidents and Merions will play a match this afternoon at the Olympic Grounds, Oakland. The match will be the first one for the silver trophy presented by W. Greer Harrison to the Club winning four games out of seven. Both clubs are expected to put in the field a very strong team. The match will start at 2 P. M. sharp.

On May 22d the Australians met the Marylebone Club, and the latter winning the choice defended the wickets. They were in all day and gave the Australians a day of leather hunting such as they never experienced before. Seven bowlers were tried but the M. C. C. were not disposed of till the large total of 481 was reached. W. G. Grace, A. G. Steele, T. C. O'Brien and Barnes scored 101, 134, 72 and 105 respectively, the latter was also out. The Australians were dismissed for 184 in their first and 182 in their second inning, so the M. C. C. won the match in one inning with 115 runs to spare.

It will be remembered that the M. C. C. were disposed of for 33 in the first and 19 in the second inning when they met the Australians for the first time in 1878.

**Eight to Fourteen.**

On last Saturday, owing to the non-appearance of a few of the enthusiastic cricketers, eight picked men were opposed by fourteen all-comers. The eight were the first to handle the willow, and were all disposed of for the meagre total of 61, Waterman playing a splendid innings for the 23 runs. The fourteen only managed 29, owing to the irresistible bowling of Banner. Mathia was top scorer with eight runs. The game clearly showed the inconsistency in the batting department of our best players, and also the poor attempts the bowlers made when not bowling from their accustomed end. DeGolia kept the wickets in first-class style, considering that it was his first attempt. Miller will prove a valuable acquisition to the Merions. The score follows:

THE EIGHT.		THE FOURTEEN.	
Burnett 1 b W. Benjamin.....	0	Burke run out.....	0
Hill (Capt.) run out.....	0	Cooper b Banner.....	0
Bristowe b Miller.....	7	Carr b Mathieu.....	3
Waterman b Campbell.....	23	Banner b Mathieu.....	0
Purdy (Capt.) C. Hill b Campbell.....	15	O'Connor b Benjamin.....	0
Sundries.....	4	Sundries.....	4
Total.....	61	Total.....	29

**University of Dublin vs. Philadelphians.**

We arrange the following account of the opening match from cable dispatches: The Dublin University won the toss, and were the first to defend the wicket. They were all out for 180 runs. At the end of the day's play the Philadelphians had lost only three wickets for 118 runs. On resuming next day wicket after wicket fell with the Philadelphians still behind, and the excitement became intense. Every fine play was applauded to the echo, both teams sharing the ovation equally. The innings closed for 181 runs, one run in advance of the University. J. A. Scott, 50; Thayer, 40, while Clarke, Brockie, Newhall and Stoever got well into double figures. In the second innings the University played with great spirit, and succeeded in putting together the fine total of 220. The Philadelphians scored 20 runs without losing a wicket in their second innings, when the game was declared drawn. This is considered to be an unsatisfactory end to an exciting contest.

**The Philadelphians Win.**

DUBLIN, June 4th.—A cricket match took place to-day between the American and Gentlemen of Ireland teams, on the vice-regal grounds in Dublin. The Americans won the first innings and made a good total of 220. Brown and Hazen showed up in excellent form. When the Irish team went in the light was had and suited Lowry's howling to a nicety. The Irishmen were unable to cope with his bowling, and were all out for the small total of 88. Lowry's analysis was: Twenty-three overs, fifty-five runs, four maidens and seven wickets. Fox took three wickets for four runs. The individual scores of the American team were: Scott 19, Brown 43, Thayer 42, Newhall 8, Clarke 16, Law 19, Fox 19, Stover 8, Morgan 12, McNutt 10, Lowry not out 4, Sundries 20. The Gentlemen of Ireland scored 180 in their second; this left the Philadelphians 49 runs to win, which they made, but not before losing 4 of their best wickets. The Philadelphians therefore won by one run, and 5 wickets to spare.

The Australians won their match against Surrey by eight wickets. The Australians scored 195 runs in their first innings, of which Scott made 71. The Surrey team made 97 and 144. The Australians made the necessary runs with the loss of two wickets.

For his score of 101 runs, in the match against the Australians, Grace is credited with playing a faultless inning. The hitting of Steele and O'Brien is described as brilliant, while Barnes never exhibited better cricket.

On May 31st the Staten Island Club, of New York, defeated the Longwood, of Boston, by an innings and 70 runs.

On May 31st ten cricket matches were played at Philadelphia.

**ATHLETICS.**

**Athletes for England.**

On Wednesday, June 4th, the team of American amateur athletes, who are expected to astonish the English runners and walkers, sailed on the steamer Aurania. The members of the team are L. E. Myers, H. Fredricks and Arthur Waldron, of the Manhattan A. C., and F. P. Murray, of the W. A. C. Myers is making his second trip, having been to England in 1881. He ran in all eleven races and lost one, that the 100-yard championship. He is without doubt the fastest amateur runner for one-fourth of a mile in the world. Waldron is the 100-yard champion of America and has a record of 10 1/2 s. for the distance. H. Fredricks is the champion mile runner and has a record of 4m. 32s., made in a dead heat with James Gifford. Frank P. Murray is champion mile walker and has the best on record in the world for an amateur at one and two miles, and the best in America at three miles. He is a remarkably fair walker. The team will make their first appearance on English soil on July 5th, on the Little Bridge Grounds, London, when the first joint meeting of the Manhattan Athletic Club and South London Harriers will be held. The team will be accompanied by G. L. M. Sachs, and probably H. P. Pike and G. A. Avery.

J. C. Ryan who was to have run a foot race against Bentley in this city a few weeks ago, for \$2,500 a side, the other side finally taking forfeit of the money up, because his backers declined to make the balance of their wager good, is engaged to run at Woodland next Sunday a race of 100 yards for \$500 a side, against a man named Barnes, who is also said to be a professional foot racer.—Record Union.

At the Lawn Tennis Club championship of Ireland match, held May 19, Messrs Dwight, Sears and Rivers, of the Longwood Club, Boston, were among the competitors.

**An Athlete's Departure.**

A great many readers of the BREEDER AND SPORTSMAN, particularly those who were present at the late Olympic meeting, will regret to learn that A. C. Phillips left for his home in Washington Territory in the early part of the week, after an absence of four years spent in a scholastic institution of Oakland. With a few seasons in this city we think that Phillips would be the equal of the best amateurs in America although we heard a leading professional runner, who should certainly be an authority, claim that he was not quite tall enough to ever be much speedier than he is at present, but we think this fallacious, for are not the leading amateurs of America of the present time of rather small stature? The vacancy caused by Phillips' departure will be hard to fill. Success to our speedy athlete.

**A New Departure.**

Arrangements are now being completed by the Merion Cricket Club for a regular athletic meeting, to be held on the afternoon of the fourth of July at Stockton. The programme is not yet definitely arranged, but will probably include a 100 yards, 440 yards, and a mile race, also a bicycle obstacle and school race, together with a running high jump (handicap), 5 in limit. The races will all be handicaps, and will be open to all amateurs on the coast. Already a great many of the leading performers have consented to participate. If no unforeseen difficulties prevent the arrangement, the Stocktonians will have an opportunity to witness for the first time a properly conducted amateur athletic meeting.

**Williamsburg Athletic Meeting.**

One of the largest crowds ever seen at an amateur athletic meeting in America, were present at the opening of the new grounds of the Williamsburg Athletic Club, on May 30th. L. E. Myers and Malcolm Ford, each, were timed 12 1/2 sec., for separate heats in the 125 yard race, but were, however, unplaced owing to the altogether too liberal handicapping. Frank P. Murray won the two mile walk in 13 min. 45 3-5 secs., which lowers his previous best on record over 10 aces. Thoa. F. Delaney ran against the five mile record, making 3 miles in 15 min. 3 4-5 secs., four in 21 min. 10 secs., and five in 26 min. 31 secs., all of which are now the best amateur time ever made in America.

We were very much disgusted to notice the attempt of the sporting editor of the News Letter to belittle the performances of some of the runners at the late meeting. Two miles in 10 min. 36 1/2 sec. for the 25-yard mark is rather good, and it is to be hoped that my esteemed friend on the N. L. has not forgotten the time not long since when he had to record the mile events at the meetings won in worse than six minutes. Fair play is bonnie play.

On Decoration Day a one mile run took place at Plainfield, the contestants being William A. Tompkins, of Newark, and N. L. Rodgers, of Wisconsin Athletic Club. Mr. Rogers is said to be the champion amateur mile runner of his State. After a close race Tompkins won by one foot. The time was 4.54 1/2, and Rodgers 4.54 1/4. The prize was a gold medal. A. F. Clark acted as referee.—Exchange.

At the Newport Baths last Sunday the swimming match between M. E. Harris, Gaa Parker and H. M. Castillar, was won by the former. The race was announced for the amateur championship, but we fail to know why any of the swimmers competing in the race are entitled to the honor.

The International Baseball match between the Puget Sound Baseball Club and the Amity Baseball Club of Victoria, resulted in victory for the Victorians after a stubbornly fought game.

At the Agricultural Park, Sacramento, Ed. Ingles, of Red Bluff, and J. B. Both, of Sacramento, walked ten miles in 1 hour 55 minutes, Saturday, June 7th.

The championship Lacrosse match played at Toronto, May 31st, between Toronto and Montreal, resulted in favor of the former by three goals to one.

"Physical training in its broad sense means correct habits. It means temperance. It means morality."—Col. Wm. A. Bancroft.

On May 31st Princeton beat Yale for the final game in the Lacrosse match for the intercollegiate championship.

The performances at the Manhattan games held at New York, May 31st, were all of a very ordinary character.

Ford is generally looked upon as the coming sprint runner of America.

**Foals.**

At Rancho del Paso, property of J. B. Haggin.

**TROTTERS.**

- May 22, chestnut filly, star in forehead, and left hind foot white; by Algona, dam Mills, black mare, by David Hill.
- May 23, bay colt, left hind foot white; by Algona, dam Black Woodbine, by Reardon's Patchen, he by Geo. M. Patchen, Jr.; g d Woodbine, by Woodburn.
- May 24, bay filly, small star in forehead; by Algona, dam Belle Ely, by Inauguration, g d Fannie, the dam of Alexander, by Ohio Bellfounder.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game animals (Quail, Partridge, Rail, Grouse, etc.).

The Match.

The event of the week was the match last Sunday, at Oakland race track, between Messrs. Fay and Burbank, fifty birds each, thirty yards rise, for \$100.

Mr. Burbank began the shooting, killing his first bird in fine style. Mr. Fay killed the second but missed the third, they were both strong, quick flyers, and Mr. Burbank followed suit with his fourth.

Score table for the match between Fay and Burbank, showing kills in various rounds.

Of course, in such weather the pool shooting provided for could not occur to the extent anticipated. One match was made up with three entries, at twelve birds each, \$5 entrance.

At the International Clay Pigeon Tournament in Chicago last week, the championship was won by the Exeter, N. H., team, with a total score of sixty-eight out of a possible one hundred in the two days' shooting.

At the clay pigeon tournament in Chicago it is proposed to form a new national association, which shall have for its purpose the encouragement and direction of trap shooting in this country.

At Bird's Point.

The Alameda County Sportsman's Club had their regular monthly medal shoot on Saturday, at Bird's Point, but the number present was not as large as usual, only twelve appearing in an appearance.

Some freeze-outs were had after the match. The first with nine entries at \$2.50 each, 30 yards, was divided between Haile, Coffin and Miller.

At Vallejo.

There was a match shot at Vallejo on Sunday, between A. L. Lancaster and C. L. Macrae for \$25 a side, 12 birds each, 21 yards rise.

The Vallejo Chronicle further adds: A freeze-out match was then arranged between Peabody, Lancaster and Macrae, at \$5 a corner, which was won by the latter party.

At Colma.

The Parker Gun Club, composed chiefly of young gentlemen in our city stores, held their regular monthly medal shoot at Colma last Sunday.

Score table for the match at Colma, listing names and scores.

At Gilroy.

On Friday, 6th inst., the Gilroy Rod and Gun Club continued their match for the handsome Remington rifle. In this contest the club use clay pigeons, 15 birds each, with the trap at fourth notch.

Score table for the match at Gilroy, listing names and scores.

The telegraph informs us that the bill for the suppression of pigeon shooting, passed by the British House of Commons last year by an overwhelming majority, has been defeated in the House of Lords.

The Gun Club of San Francisco meets at Bird's Point today.

The Sacramento Foresters.

The Forester Gun Club of Sacramento, at their last monthly meeting, resolved to have their next public match on 22d inst. While speaking of this club, we may commend their action very strongly in two other respects.

A couple of weeks since we reported the existence of pheasants in mountains at the head of the Uvas river. We have since learned that while we were in British Columbia some pure English pheasants were turned out in the district mentioned.

A Carson paper says: Mr. Hubbard came in Saturday from Independence. He states that the ice will all be off in a few days.

THE RIFLE.

At Shell Mound.

Although Sunday was an extraordinary day for the bagging of June, presenting us with a thick, heavy rain for nearly twenty hours, the rifle ranges were not deserted, and the practice of the day was kept up with its usual spirit.

Score table for the rifle match at Shell Mound, listing names and scores.

Of the four classes Klein, Wharff, Raddock, and Diers were the winners. Diers was allowed a handicap of three points, but with the exception of the first class, only the names of the winners were given.

This is good shooting, and gives promise of success. We like the ambition of the young aspirants, for ambition is of no account unless it inspires us to deeds worthy in themselves, or deeds that all other men cannot perform.

Schuetzen Park, Alameda.

Although there were a good many riflemen out practicing at this favorite range on Sunday the only medal shooting done was by the Eintracht Rifle Club, which, as usual, turned out in strength, sixteen members putting in an appearance. For a long time Lieut. Fred Kuhls, one of our leading riflemen, has been the champion of this club, but on Sunday he was beaten 11 points by Klotz, and had to surrender the coveted medal. The score:

CHAMPION MEDAL.		
Klotz.....	398	
SECOND CLASS MEDAL.		
Gumbel.....	345	
THIRD CLASS MEDAL.		
Schubert.....	311	
LAST BEST SHOT.		
RINGS.

Streiner.....	286	
Hagerup.....	274	
Welbe.....	263	
Wolf.....	247	
Tapken.....	243	
Wirtner.....	239	
Hartmensen.....	215	
Schartz.....	208	
Kruger.....	162	

Comparative Records.

We take pleasure in keeping our riflemen posted on Eastern and California records, because it is beneficial to our men to know they are equal to any in the Union. A few weeks ago we spoke of Hovey's shooting at the 200-yard range and showed it to be equal to that of the picked men of Boston and Springfield. In the same spirit this week, we contrast the general score of the Eintrachts, as given above, with the particular score in a match between Indianapolis and Hepburn teams, at the same range and same kind of shooting. So far this season, the scores of the teams selected are the representative average scores of Eastern riflemen.

INDIANAPOLIS TEAM.		HEPBURN TEAM.	
J. Cabalzer.....	380	E. Bretz.....	379
F. Maus.....	348	A. M. Alexander.....	355
G. P. Marrott.....	330	L. C. Walters.....	356
E. Mueller.....	317	M. D. Walters.....	331
J. H. Rhodawalde.....	298	E. F. Hodges.....	314
Dr. W. Walling.....	281	M. T. Robinson.....	308
L. Ott.....	271	Dr. H. Jameson.....	275
R. Miller.....	268	F. D. Lewis.....	275
P. Zepp.....	208	F. Heiner.....	269
		R. L. Scarlet.....	249
Total.....	3,104	Total.....	3,091

With the Eintrachts, who, however, do not embrace our best ring-target men, this comparison is quite satisfactory, even without speaking of the character of sights, which is generally in favor of Eastern men. Our celebrated California Schuetzen Club have much the best men in this State at this style of shooting, and we could reproduce records from our back numbers of scores made by Jacoby, Stanton, H. C. Smith, Boeckman, Utschig and others, ranging from 409 to 430. Fred Kuhls, of the Eintrachts, has a record of 403, and Lieutenant Kellogg made 401 at Schuetzen a few days ago, the first time he ever tried the ring target in his life. John Utschig, last Sunday in four shots, made 99 out of a possible 100. So, whenever we come to comparative records, and go down to the bedrock for data, we always find our State, young as she is, the peer of any State in the Union.

While on the subject of comparative records, we should like to know the best scores ever made in off hand matches, 200 yards military rifles, with 10, 25, 50, and 100 shots to the man. We have not the means at our disposal of finding out the Eastern or California records, and if any person can favor us with the information we should take it as a great favor.

We inadvertently omitted a little rifle incident last week, occurring at the Gun Club picnic, for which we beg to make amends this week. Some gentleman had the foresight to take out a parlor rifle for the amusement of the ladies, and after lunch brought it into active operation. A bottle (empty, the reader may be assured), was put on a bush about fifteen yards off as a mark. Several of the married ladies tried first, all making good line shots as they generally do, but none hit the bottle. Then Miss Reynolds, a tall, stately young lady, took the weapon and with a pose equal in ease and grace to Col. Kellogg's, made three remarkable shots—the first cut the cork off, the second broke the neck of the bottle, the third sent the body of the bottle into flinders. The remarkable part of this performance is, that the young lady had never touched a rifle before in her life. If any person of the masculine gender ever gets into a controversy with that young lady hereafter, we advise him to keep out of the range of parlor rifles.

The season at Creedmore for 1884, opening on the 21st of May has not been marked by any particularly great shooting. The first match was as good as any we find recorded. It was off-hand, at 200 and 300 yards, 7 shots to the man. At the finish, with a possible 70, the score stood as follows:

T. J. Dolan.....	57
John James.....	49
W. M. Vose.....	44
Capt. M. H. Murphy.....	41
C. Donohue.....	40

If they would inform us of the character of the weapons and sights used we could form a better estimate of Eastern shooting. Generally improved weapons and fancy sights are used by our Eastern riflemen, while ours almost invariably use the common military rifle and open sight. This makes a great difference in the result.

We spoke above of Lieutenant Kellogg's score at the ring target, a new style of shooting to him. As it is extraordinary we have obtained the details. He had four strings of five shots, with a possible 25 to the shot.

First string.....	24	19	19	16	—102
Second string.....	22	17	22	17	—19
Third string.....	18	24	24	23	—105
Fourth string.....	20	24	24	17	—12
Total.....					401

To-morrow at Schuetzen Park the liberal and enterprising Eintrachts will have their prize shooting open to all. The conditions will be ten shots for a dollar. There will also be a \$20 medal, and \$50 in cash prizes.

STABLE AND PADDOCK.

Green Food for Horses in Summer.

The almost universal custom of farmers in feeding their work horses with dry hay during the Summer and Fall, instead of supplying them with green food during the Summer, is not consistent with the principles of correct hygiene, or promotive of the greatest degree of health in horses. Indeed it is fair to infer that so long a continuation of dry food is injurious; that it tends to produce a constipated condition of the bowels, and to lay the foundation of inflammatory disorders, and of severe fevers in some instances. One reason of the constipating effects of dry hay is its hard character which makes it difficult to masticate, making the permeation of the salivary fluid into its most solid parts slow and difficult. Horses, when subsisting on hay and other dry food, have only opportunity to dilute and cool the circulation two or three times a day. In fact many horses in northwestern localities are watered only twice daily in Winter and early Spring. Yet a very little reflection will convince the owner that more water is necessary with dry than with green food. In fact, to maintain the degree of natural fluidity in the circulation, it is necessary that an extra quantity of water be given to horses subsisting on dry food. Farmers in the British Islands provide the work horses with an abundance of green fodder in their stables both night and day. Tares or vetches are very generally used for this purpose. The horses are fed small quantities at a time during the day, and full rations when bed time (at eight o'clock) comes around. In the morning before the teams go to work they are also fed in small quantities four or five times between four and seven o'clock. In addition to, or in place of vetches, clover, cow grass, trefoil, lucern, rye grass, and even rye, are used. The succulency of such food tends to cool the blood.

The English farm horses are fed all the bulky food they can consume, for the express purpose of making them as bulky and heavy as practicable—it being well understood that when the stomach is habitually filled, and so expanded till large and bulky, the blood vessels and frame-work also necessarily develop, to contain corresponding bulk of blood and support a corresponding weight of body. A large and strong body and frame cannot, in fact, be developed except by a bulky quantity of coarse food being consumed.

There is nothing inconsistent in the supposition that large draft horses, like the Shire and the Normau sorts, can be as easily raised in North America as in Europe, if bulky food in large quantity be given to them while growing. Besides clovers in variety, we have grasses in variety and abundance for feeding in the stable here in hot weather. Vetches, so widely grown in Great Britain, are not so well adapted as peas and rye mixed. Peas should be put in quite early for early soiling, with a peck of rye or wheat to three bushels of peas. The grain will hold the peas off the ground sufficiently to allow them to be mowed easily and clean. After the middle of April, when planted for a succession, flint corn, at the rate of a peck to three bushels of peas, can take the place of the rye. The pea produces a large amount of straggling vine, and this makes it a very suitable crop for soiling and cutting previous to and while in bloom.

The notion that green and succulent food weakens horses, is only partially correct. When horses are taken from dry, constipating food, and fed with succulent green fodder, the laxative effects are moderate, but necessary and healthy. Horses fed with dry and concentrated food only, are generally in a condition of incipient inflammation, liable to some form of life-shortening disease, and generally do not live out two-thirds their normal and possible life; while on the other hand, horses that are fully and carefully fed with green, bulky, and not concentrated food, grow into animals of great size, power and endurance. They serve their owners truly and well for a score of years, living to a good old age, and are thereafter long and frequently remembered for their faithful and profitable services.—Country Gentleman.

Blue Grass Pastures.

Mr. O. C. Hildreth, of Kansas, a gentleman with a decided predilection for the fine horse, was in this city a short time since on business, and called upon us. He had traveled over the State somewhat, and was so favorably impressed with this country that he purchased a tract of land in the Tulare Valley and will settle there. He was quick to recognize the natural advantages of this State for the lovers of the horse, and one of the inducements that decided him to change his residence was that he might better indulge his fancy for raising thoroughbreds, of which he is a breeder in a quiet way at his home place in Kansas. Among his other observations Mr. Hildreth saw enough to convince him that the plains of the San Joaquin are capable of producing the finest blue grass. He saw several small lots of this famous herbage that had been grown for ornamental purposes, and he says he never saw it in greater perfection, not even in Kentucky. He will thoroughly test the matter when he is settled on his Tulare ranch. No systematic experiments have ever been made in that section, to our knowledge, to ascertain whether or not permanent pastures of blue grass could be established and it may be a mine of wealth only wanting the attention of the prospector. We know of several farmers in that region that should act on this hint at once. As most of these we refer to are Kentuckians, perhaps they would smile at the idea of telling them how to grow blue grass, but for the benefit of all concerned we print the following simple formula given in the *Prairie Farmer* for the information of a correspondent in Illinois, but applicable with slight modification to California as well:

1. How can I secure a blue grass pasture? 2. How much seed to acre? 3. Can blue grass be grown successfully mixed with other grasses? 4. What season and what soil is best adapted to secure a good catch? 5. Can it be grown on low, wet land?

Answer.—1. There are almost as many ways to obtain a blue grass pasture as there are men who undertake the job, though essentially the practices are alike. The usual method is to sow the seed in the Spring or Fall, either alone or with clover or timothy. 2. The seed is very light and chaffy, and weighs only fourteen pounds to the bushel, and the amount sown varies from five to seven pounds to the acre. 3. Yes, though after a few years blue grass, on a true blue grass soil, roots every other grass out and reigns with a divided empire with white clover. 4. Any good corn or wheat soil will produce good blue grass—the usual method of obtaining a blue grass pasture is as follows: To one bushel of good timothy seed one quart of red clover is added, and this quantity is made to cover from five to six acres. The seeding may be done in the fall with fall grain, in the spring with oats, or on stubble or wheat land on the snow in February. After, in the month of August, from a peck to a half bushel of blue

grass is sown upon the young timothy and clover. But little or nothing can be seen of the blue grass for the first year and it does not show vigorously until the third year. Thereafter if the soil is a true blue grass one and the land is pastured, blue grass and white clover dominate to the exclusion of everything else. Perhaps the surest way to obtain a stand of timothy and thereafter a set of blue grass, is to prepare the land carefully and sow rye in October. On this sow timothy and red clover as above on the snow in February or March; pasture the rye, but not too closely, to 15th of May. Harvest the rye at the usual time, and the yield will be all the better for the pasturing, and sow the blue grass seed on the stubble in August. 5. No, but red top will in spite of your best efforts to the contrary unless you till and thoroughly break up the land.

Wolf-Teeth in Horses.

The general expression among prominent veterinary surgeons is that the supernumerary teeth know as "wolf-teeth" have no effect upon the eyes of the horse. I have noticed numerous answers to inquiries in the various turf and medical journals as above. Now if all the most distinguished veterinarians in the world were to reiterate their belief as above, I should continue to investigate the mouth of all my horses from yearlings up for these supernumerary teeth and remove them. In almost every instance where I have noticed indications of weak eyes, watery discharges, etc., I have upon examination found one or two wolf-teeth. These removed, the eyes have cleared with no subsequent treatment. Last Fall I purchased a number of young horses. Among them I noticed three with watery discharges from their eyes. Calling the man in charge I called his attention to the colts, had them caught and examined every one of them. The yearlings had two wolf-teeth, which were removed. The eyes all improved, and in a short time were as perfect as any. For years I have practiced the removal of teeth, and invariably with the best results; so I say without hesitation to all breeders; examine your stock, old and young, and when you find the useless teeth remove them. Certainly it can do no harm. To remove them is a simple operation by an experienced person. I have a horse-shoer who removes them, root and all, very readily. He has a tool not unlike a common gage, quickly pushes it between the wolf-tooth and first molar, and presto, out flies the tooth. The more prominent the tooth, the easier the operation. I have seen him remove dozens, never missing removing root and tooth. I have had so-called tooth dentists remove them with forceps, but not unfrequently have they broken the tooth from the root. I know that the educated and distinguished V. S. will ridicule my position, but I say, remove the teeth and save your eyes "just the same."

A few years ago a V. S. whom I know quite well, claimed to have examined mouths of horses by the hundred. He found a large number with wolf-teeth and yet perfect eyes. I know from my own investigations such to be the fact. I also know from years of close observation, that where I have discovered evidences of weak eyes I have also found the wolf-teeth; and when I have removed them almost immediate improvement followed.—Mambrino, in *Breeders' Gazette*.

Large numbers, if not the general average of trotting aires, are sixteen hands high, and weigh from ten to thirteen hundred pounds. Moreover, they have the requisite strength and bold action, accompanied with an elegance of contour, that the combated horse should possess. Many brood mares, probably the most popular to-day on trotting stock farms, have a commingling of pacing and thoroughbred lineage that will insure the various gaits desired. The offspring of such composite blood frequently pace at birth, and until they are broken to harness, and every other action but trotting is steadily discouraged, they will pace and rack and trot interchangeably at will. Such horses are natural general-purpose horses. All of these gaits can be reasonably developed in them, so that they will trot at fair speed in harness, and never once indulge in racking or pacing in the shafts, while they will readily shift from one gait to the other under saddle, as if they really enjoyed the change as a matter of recreation. Even when such offspring fail to show the various gaits in the field, the capacity is inborn by the mysterious force of inheritance, and it can be cultivated by judicious training. The trot is more likely to predominate, for the pace soon "breeds out," unless the colts are early handled to saddle, with reference to saddle qualities. But the saddle gaits can be perpetuated by the most simple methods of manipulation.

Vicious horses are not desirable anywhere, but if there is one place more than another where they are not wanted and should not be found, it is on the farm. In the different work that horses have to perform in farming it is often the case that they have to be handled by several different persons during the season, and often by boys or men who are incompetent. A horse with a bad disposition is not slow to understand whether he or the one who handles him to be the boss, and when the least opportunity is afforded they are not slow to take advantage of it. Reports of men or boys being killed by such horses are quite frequent, and other mischief that they do is as often heard of or experienced. It is generally taking great risks of personal injury or of injuring others by keeping such animals on the place, and unless they have some redeeming qualities it is far better to part with them even at a sacrifice. The best place for a horse that is not perfectly gentle and reliable is in teams, in cities where they have constant work, and where they have the same master day after day, and the sooner they find their way to such positions the better it is for them and for all concerned.

George Bird, of Bird's Point, Alameda, in a paddock adjoining his house shows the strange sight of a fox-hound and a young deer nesting together with the greatest affection. The buck is eight months old, but the hound treats him with perfect consideration. It is well to do so, for there is a little bird in the house in petticoats that would make short work of the bonud if he meddled with the deer. It is, however, a strange sight.

The deficiency in the number of cavalry, artillery and omnibus horses now existing in England is to be supplied by horses from the United States. They will be procured in the Western States and on the southwest ranges, and will be shipped from New Orleans.

To clean your horses' tails or manes from dirt and dust put a little kerosene on them, and then wash them with borax water, which will prevent the hair from coming out.

It is estimated that there are 17,266 wild horses in Australia.

## The Farmer in Politics.

In former articles we have alluded to the small influence the American farmer has in shaping the policy of the Government, and the more thought that is given to the question the more singular it appears that such should be the case. The only solution that can be reached is that a large majority of those engaged in cultivating the soil, or who breed domestic animals, are dominated by a sense of inferiority, and tacitly admit that the business they are engaged in is a drawback to mental force, and are ready to accept the theory that places them lower in the political scale than ward politicians or the keepers of corner groceries. Thus the whole body of agriculturists in the State of California have a smaller influence than the one man who is the recognized "hoss" of one city. He dictates what the "platforms" of political conventions shall contain, arbitrarily announces what course shall be pursued, threatens if his autocratic mandates are not slavishly obeyed, and by pointing to the clubs which are filled with his creatures and ready to do his bidding, overawes opposition and carries his point, no matter how much it may be in variance with sound principles. This is effected by his followers being massed. As a general he is incomparably the superior of anyone who is intrusted with the leadership of opposing forces. He has a solid body of trained adherents falling into line at his command and keeping step to the motions of his baton. His troops are compact, condensed into small space, their residences—those that are residents—within a few square miles, with daily meetings of squads, weekly gatherings of the main body. The farmer is isolated. In the most populous sections it is rare that there is much of a gathering, and when there is a congregation the purpose of assembling is still more rarely for political consultation. Unless in the very heat of an exciting campaign little attention is given to the questions which are of vital importance, and the hearing on farming interests is subordinated to party predilections. The remedies in independent action. So long as there is a blind adherence to party the agriculturist is merely a vassal of the boss. He is not counted in the canvass. The township in which he resides is estimated by the votes polled

at previous elections with no thought of change. The immense interests with which he is connected are not considered, and notwithstanding the money value of the products of the farm overwhelm all others, politicians rate them inferior to those of trivial importance. The farmer is a party to the depreciation. With few exceptions, he has little appreciation of the magnitude of the guild of which he is a member. In 1882 the value of five crops, corn, wheat, potatoes, hay and tobacco aggregated \$1,736,922,293. When to this immense sum are added fruits, vegetables, wool, cotton, not to speak of live stock, of land, buildings, fences, machinery, etc., all other pursuits sink into comparative insignificance. The value of the crops of corn, wheat, potatoes, hay and tobacco in one year exceed the whole amount of capital, and deposits in the national banks united by several hundreds of millions of dollars, and comparison with other great interests will disclose the immense superiority of land products. That these should receive proper recognition is evident, and when farmers insist that such shall be granted, and act together in the demand, the political party that refuses to accede to the request is doomed.

## Jim Renwick.

The big son of Big Gun is gaining laurels at Jerome Park and Coney Island, not only acquiring celebrity for himself and near kindred, but proving that California is truly the race-horse region when a half-bred reared here can overcome the high-lineaged coursers of the East. The telegraph brings the news that he won at Coney Island, running five furlongs in 1:02, as will be seen from the appended account of his race at Jerome Park, he won very easily and 1:47 is not slow for that course.

## SECOND RACE.

Free Handicap Sweepstake of \$25 each, if not declared out, with \$500 added; the second to receive \$100 out of the stakes. One mile.

## STARTERS.

W. J. Welch's ch g Jim Renwick, by Joe Hooker, dam Big Gun, aged, 119 pounds.....(W. Donohue) 1  
Mr. Klees's b m Rica, by Kingfisher, dam Lady Mentmore, 5 years old, 120 pounds.....(Feakes) 2  
Preakness Stable's ch g Euclid, by Glenelg, dam The Nun, 4 years old, 112 pounds.....(Riley) 3  
Dwyer Brothers' h c Greenbush, by Glenelg, dam Annie Bush, 3 years old, 99 pounds.....(Braig) 4  
Time—1:47.

The Betting.—Rica was the favorite, there being even money against her; 2 to 1 against Jim Renwick, 5 to 1 against Euclid and 8 to 1 against Greenbush.

The Race.—Jim Renwick was first away, Greenbush second, Euclid third and Rica fourth. Going around the upper turn Jim Renwick led by a head, Euclid second, half a length in front of Greenbush, third, Rica fourth. Greenbush was first at the quarter pole, as the rider of Jim Renwick took his horse in hand just before reaching that point, Euclid second, a length and a half in front of Jim Renwick, third, he two lengths ahead of Rica. Greenbush kept the lead around the bluff, and went out of sight at the half-mile pole around the hill, Euclid second, Jim Renwick third, Rica fourth. When the horses came in view on the lower turn Euclid was leading, Greenbush second, Jim Renwick third, Rica fourth. At the three-quarter pole Euclid led by a neck, Greenbush second, half a length ahead of Jim Renwick, Rica fourth. At the seven furlong pole Jim Renwick and Rica were head and head, Euclid third, Greenbush fourth. From there to the end it seemed but a hand gallop for Jim Renwick, as he romped home an easy winner by four lengths, Rica second, two lengths in front of Euclid, the latter six lengths ahead of Greenbush. Time, 1:47.

## Valuable Stock.

It was an extreme stroke of bad luck to those who engaged in the venture of sending a lot of high-class Spanish Merino rams to Australia when laws were passed forbidding the entrance of sheep to the colonies. This loss is sure to result in a great benefit to this coast, inasmuch that the embargo to land them in the antipodes has thrown them on the market here. There are one hundred and forty rams in the consignment, selected from the very best flocks in Vermont, and are all duly recorded in the Stock Registers of that State. That due care was taken in the selection and none but animals of merit chosen is evident, as only the best obtainable would repay the costs of the long journey. As they are to be offered at public sale by Killip & Co., on the 18th inst., next Wednesday, and with a guaranty of the sale being absolute, there should be a full attendance of those interested in the business. Catalogues can be obtained of George Hammond, Grand Hotel, or Killip & Co., 116 Montgomery street, S. F. The sale will be held at the Comstock Stables, 524 Third street, at 11 A. M., at which place the sheep can be seen.

## Grave Valley Races.

In the advertising columns will be found a notice of a two days' meeting on the Watt's Park Course, Grass Valley, Cal., July 4th and 5th. On the first day is a trot for a purse of \$600, 2:27 Class, and on the second an open racing event of heats of a mile for \$300. The first should secure entries of some of the famous harness horses of this section, and the runners can make a pleasant trip to contend for the other. As there is railway communications to Grass Valley the journey is easy, and as there is nothing at that time of the year to interfere, there are no reasons why support should be withheld. The entries close on the 26th of June.

## Racing Rules.

The question has been asked of the *Breeder and Sportsman*: "Which of the racing codes shall we adopt, that of the Pacific Coast Blood-Horse Association, or that lately adopted by the State Agricultural Society?" In place of a curt answer we shall give a few of the reasons which prompt us to state emphatically by all means adopt the former. In the first place, the rules of the P. C. B. H. A. are superior in all points, and though with a good deal of similarity, whenever there are divergencies, anyone at all conversant with turf affairs will concede that there has been retrogression in place of improvement. It is only necessary to call attention, at the present time, to one change that has been made, as it is our intention to publish a full review before the Fall racing season commences. In the State Fair code, on page seven, is the following sentence: "The starter's flag shall be lowered as nearly as possible when the horses are between his line and the starting post, and must not be lowered after any horse has passed the starting post." The starter's line is thirty feet from the starting post, and in a large field of horses it is readily seen that the flag may drop when one horse has a head in advance of an imaginary line drawn from the starting post across the track. Should that be the case, or the charge made that it was so, no matter how truly the race or heat has been run under the rule it must be declared void. It may be that the animal at fault has not the least show in the race, and even that after his advantage, if less than a length, he may be left a hundred lengths in the rear, when the one that has honestly won is defrauded out of his victory. In a majority of races now the starting points are not at the judges' stand, and as a general rule few who are present at these fractional distances. The spectators in the stand or in positions near the outcome can only see that a fair start was made. They cheer the winner, and when some breathless individual hurries to the scene, and claims that one horse had his head in front of the line when the flag fell, the claim is sustained, the race declared void, there will be few who will concede in the justness of the ruling, or who will look with favor on the absurd, ridiculous law which sanctions it. In the code of the P. C. B. H. A. the rule, which is exactly the same as those of the Eastern associations, is simply: "If the start takes place on the wrong side of the starting point, the heat is void." That is if the horses are marshaled on the wrong side, and from that wrong point the flag is dropped. There are so many vulnerable points in the rules of the Cal. State Agricultural Society that it will require more space than we can give at present to show how inferior they are, and there are also some that are laughable, which comes from copying those of other associations in different circumstances.

Thus we imagine it is the first instance when a "State institution" usurped the powers of a jockey club and promulgated rules for the government of betting.

The rules of the Pacific Coast Blood-Horse Association have been unanimously adopted on this coast for several years. Racing men are familiar with them, and in the main these rules have given universal satisfaction. From the organization of the society racing has been relieved of the many bad practices which prevailed prior to the organization, and the turf of California has obtained a standing which was denied it before. Certain punishment followed violating, and the pirates of the turf were banished, and those who would fain follow wrong practices restrained by the knowledge that detection was sure to follow the attempt, and that all of that class would meet with condign punishment. Upholding those who gave race meetings, by making their sentences effective, guarding them from the ill-disposed, and this without fee or reward, excepting the reward which came from the popularization of the royal sport. A large majority of the owners of race-horses in California are members of the P. C. B. H. A., and these, it is unnecessary to state, would prefer to run under their own rules.

## The Oakland Trotting Park.

Only sixteen days intervene from now until the expiration of the bond which gives the option of purchasing the Oakland Trotting Park at least fifty per cent. below its value. There is yet ample time to complete the arrangements, if those interested will act with promptness. Quite a large number of shares have been subscribed for in Oakland, and with the aid which it is reasonable to expect from San Francisco, the project will be consummated. The excitement attending the conventions was, in a measure, injurious, but as that has now subsided there is hope that there will be no further delay. As a "business proposition" it is well worthy of consideration, the bearing it has on the breeding interests of California is too apparent to require further argument.

Good News.

When the intelligence came that Mr. Johnson, of Sacramento, had presented the resolution, which we copied last week, for the consideration of the Republican Convention, we were highly gratified. When the "platform" was sent over the wires, without that resolution being embodied, there was corresponding despondency. Now by the action of the Stockton Convention there are still brighter hopes. In the former case it was the action of an individual and that unsupported by the rest of the delegation. In this it is strengthened by the whole weight of a State Convention and with the mandate that compels every member to an active support of the measure. More than that there are men in the delegation who will take part in the proceedings of the National Convention, who are intimately acquainted with all pertaining to agricultural interests, and who have the capacity to advocate the adoption of the resolution in a forcible manner.

Mr. Johnson is worthy of as much credit individually as though his proposition had carried. That he stood alone in his advocacy was, in a measure, due to the character of his associates. So far as we are acquainted there were few of them who could claim any identity with agriculturists.

It was more after the fashion of a junketing, an across the continent picnic, than a journey to end in solemn consultation for the welfare of the country, and though we have as much admiration for enthusiasm as anyone, are better pleased to witness an ardent support of measures than the glorification of an individual.

It may be that there will be the same amount of cheering, of speechifying, of the waving of banners, and the tossing of hats when the second delegation wends its way from the Pacific to the Lakes, and it may be that there will be a still greater disappointment at a second failure. We trust not. There will be, at least, the satisfaction that one body of men has recognized the importance of the issue, and subscribed to the tenability of the position. Should the resolution be defeated in Chicago, the defeat will be temporary. The seed has been planted and the harvest cannot be long delayed. Still there is the utmost confidence that the "plank" will be incorporated in the national platform, and the recognition of the principle, based, as it is, on justice, on right, in no manner working injury, be as hearty and unanimous as it was in the California Convention. When Mr. Johnson presented his resolution the hope was strong that the question would be sundered from party. With both of the dominant parties committed to its support the result was assured; and though the defeat of the party supporting the measure may entail temporary delay, it is sure to prevail in time. We consider the placing of the agricultural interest on the basis embodied in the resolution of more importance than the success of party. For the first time in the history of the country that which is of paramount importance is granted consideration to the extent of an indorsement by a State Convention, and every farmer in the State must feel gratified that the business he is engaged in has at last been considered worthy of a place in the councils of the nation. There are those who will argue that it is a small matter, and that the head of an agricultural department will have little influence in shaping the policy of the nation. History does not sustain such a position. Without the power which patronage gives, without offices to dispose of, the minister of agriculture will wield a potent influence more powerful from the fact that there are no mercenary considerations, and that honest principle is the guide to direct his course.

The following are the resolutions as adopted by the convention.

Resolved, That recognizing the transcendent importance of agriculture and the fact that its success is indispensable to the prosperity of our country, we believe should have a voice in Cabinet councils of the nation.

Resolved, That our delegates to the Chicago Convention be, and they are hereby instructed to use their best efforts to procure the insertion of a clause in the platform pledging the party to create the office of Secretary of Agriculture, the incumbent of which shall be a practical agriculturist and a member of the President's Cabinet.

The Fourth at San Jose.

There are to be several races on the Fourth of July, at San Jose. Among them a trotting race with twelve entries, a bicycle race, heats of a mile, and either a trotting purse for stallions or a running race, at heats of half a mile. This will fill up the afternoon admirably, and, without doubt, attract a large attendance.

Commodore Kitting's colt Paniqua, by Alarm, that won the Withers' Stake, at Jerome Park, on Decoration Day, was purchased by the Dwyers a few days afterward, for \$14,000. The colt started in the Balmont Stakes, on the 5th, under his new colors, and won after a pinching finish with Knight of Ellershe.

Time.

People are prone in this country to measure the capacity of horses by the time made. Thus when the news came that Jim Renwick had won his race in 1:47, there was a general outcry that the company must be inferior. The Withers' Stake which Panique won, and which was the base for the sale at \$14,000, was won in 1:48, and though Panique carried within one pound as much as Jim Renwick, it must be in mind that the three-year-old had a hard task while the big 'un galloped in. So far as we have seen 1:47 was the fastest mile run at Jerome Park during the meeting, and in "Krik's Running Record," in a table of the fastest time for one mile, in which are twenty-five illustrations, there is only one from Jerome Park, that of Spindrift, when with 124 pounds he ran in 1:46½. The cause of the slowness of Jerome Park is mainly owing to the shape, something like a saddlebag, which makes a reverse curve, giving the inside horse the worst of it, if the others are too close to allow him to change his position. In the Fordham Handicap Jim Renwick had a good lead at that point, but his rider, in place of availing himself of the benefit of the short cut, held him in the inside, and from this loss of ground he had to take the fifth place when the further turn was reached.

Auction Sale of Jerseys.

Immediately after the sale of the thoroughbred horses of Theodore Winters, on the 17th of July, will be offered the entire herd of Jerseys, the property of Major Robt. Beck. This is one of the famous herds of this popular cattle in California. Started on the right foundation, "the Major" has taken especial pains to increase their good qualities, and the result is a high degree of excellence. He has had the best opportunities for selection and the breeding has been carried out with skill, so that there has been an improvement in every generation. The "grand climate" of California has been found equally favorable for the improvement of milking qualities as well as other branches of stock breeding, and it is safe to say that those which have been bred and reared here are superior to many of those which are commanding such high figures in the East.

The New York Sportsman, in its report of the fourth day at Jerome Park, treats Jim Renwick thus: The best race of the day was the mila handicap, in which the California horse, Jim Renwick, made his second appearance East. Although Donohua was secured to ride him it was not thought that the white-legged chestnut could beat Rica, although the mare was giving him six pounds. Both of the pair looked in superb order, as did Euclid and the colt Greenbush, and even money was offered before the start that the best mile of the meeting would be scored. And so it proved. The two lightweights set the pace fast, the two heavyweights trailing, Rica last. At the three-quarter pole Renwick's blaze face and white feet were seen third in position, but he came into the straight with the greatest turn of speed seen at the finish of any race of the meeting thus far. In a few jumps he was leading, and though Rica, under the whip, made a good effort, Renwick fairly romped home in 1:47, the fastest mile yet run at the meeting. His manager, W. J. Welch, was absent from sickness, but Buchanan, the trainer, and the grand horse received much attention after the race. He will run at Sheepshead Bay, but his next stake engagement is at Month Park. Renwick may be only three-quarter bred, as alleged, but his easy win to-day will go far to prove the axiom that horses run in all breeds as well as in all shapes.

Maud S. recently showed a mile and repeat at Chester Park; The News Journal says of the trials: "The great mare appeared during the afternoon, looking as trim and sleek as in her younger days, when she swept everything before her, not to say that she is so very old, (nine years), even now. Her elegant chestnut coat shone like polished brass, and with her proud head elevated, and her bright eyes of full sizes changing from one side to another, she seemed as fully to realize, as does the opera queen when she sweeps down the platform in a whirl of song, that she was the attraction. She came up easily, with her old-time driver, Billy Bair, looking as happy behind her as a boy with new copper-toed shoes, and as she rounded into sight she was heartily applauded. As Billy nodded for the turn, and she went away at an apparently effortless pace a hundred watches were out. It was the same old, easy, swinging trot, and when she finished the mile in 2:27 she again caught a good round of applause. In her second attempt she extended her beautiful limbs quite a little more in the first half, but let up some to the end, completing her mile in 2:24. Her work shows that she is in prime condition. Bair feels perfectly confident that she can yet easily lower the record."

The colts by Eolus out of War Song, are still the admired of all admirers, and on Decoration Day the mare dropped her sixth foal by Eolus, besides one slipped in 1879. This last one is a filly, and has been named Eoline. Mr. Theo. Winters' Neopolitan is a full sister to War Song.

The grey colt Centre, by Sultan, arrived in this city from Sunny Slope last Saturday, having been sold by Mr. Rose to Jas. McCord. Whether Mr. McCord acted for himself or not and what the price was has not transpired.

The rain has put a complete stopper on the Bay District Summer meeting, and at this writing a good day and track seems afar off. The storm is unprecedented as it is unpleasant.

The chestnut stallion Billy Reed, by Autocrat, ran away at the Washington county, Oregon, fair grounds one day last week. The owner, J. R. Sawyer, and the horse were badly crippled.

Mr. L. J. Rose has a sale of trotting colts from Sunny Slope, advertised in the Chicago papers, to take place at the Chicago Driving Park on July 10th.

Ukiah Park Meeting—Second and Third Days.

EDITOR BREEDER AND SPORTSMAN:—Herewith please find notes of the second and third days of Ukiah Park.

Second day, June 6th. Running; purse, \$150; entrance \$25 added; half-mile dash.

Low Raney's ch. g. Billy Johnson.....	1	1
Alex. Perry's r. g. Roan Frank.....	2	2
J. Marquette's ch. g. Humboldt.....	3	3
Time—54, 53½.		

At the send-off Humboldt had about two lengths the worst of it, and came near being distanced. He seemed to be too much "drawn," and weakened on the third quarter. Billy Johnson took the heat in 54½ secs., with Frank only a couple of lengths behind, though he had been but three weeks off of grass.

Second heat.—This was a repetition of the first heat, though the time was 53½, and Billy Johnson was awarded the heat, race and money.

Same day.—Trotting; purse \$150; mile heats.		
Low Raney's b. g. Warwick.....	0	1
Doc Curtis' br m.....	0	2
Time—0:00, 3:00½, 3:03½.		

First heat declared void. The horses were scored several times before they got off, and when they did Warwick broke at the word as he went under the wire. He kept up at a gallop to the first turn, and then settled to work as the mare's feet flew up, and the whole heat was a repetition of such trotting. Time, 3:03½. The heat declared off for running, the horse coming in first. A new driver was put up behind the mare, C. Underhill, Low Raney declaring his inability to hold her down.

Second heat.—A good start was had after much scoring, and the heat trotted fairly, the horse winning in 3:00½. The mare seemed to be suffering from distemper, coughing repeatedly.

Third heat.—This was closely contested until at the three-quarter pole, where the mare invariably broke, this time losing so much ground that it looked like a distance. On the home stretch she came down in fine style, and only lost the heat by a length in 3:03½. Warwick winning heat, race and money.

Third Day, June 7th. Running; purse \$100; entrance \$25 added; mile heats.		
S. W. McMullin's b. g. Billy Winfree.....	3	1
A. C. Perry's r. g. Roan Frank.....	1	2
J. Marquette's ch. g. Humboldt.....	2	3
Time—1:55, 1:58, 2:01.		

First heat.—Billy Winfree was the favorite in the pools at \$5 to \$2.50 for the field. He is by Wheat Jay, and a fine looking colt, with an angry Roman nose and a decided predisposition to run to the left. Considerable money was bet on the side between the friends of Roan Frank and Humboldt, Frank having the cell. Several ineffectual starts were made, mainly owing to Humboldt persisting in standing crosswise of the track until the others passed him. He finally got off a length or two behind, but took the track at the first turn. Winfree attempted to follow him in, and pocketed Frank, crowding him on Humboldt's heels. The latter kept his lead the backstretch on the second half when he weakened and Winfree lead to the wire in 1:55, with Frank second. Foal was claimed and allowed, the heat given to Frank, and Winfree placed third.

Second heat.—Again Humboldt crowded the running on the first half, falling back to almost a distance, Winfree taking the heat under a pull in 1:58. Foal was again claimed but disallowed, and the heat given to Winfree, Frank second.

Third heat.—Winfree got off ahead a little, but soon gave the pole to Frank, who kept it to the homestretch on the second half, when Winfree moved up and won the heat easy in 2:01. He ran with his head pulled around to the right a foot or more, and seemed determined to lean up against Frank. Winfree was given the heat, race and money, Frank second money, Humboldt distance.

The ladies' tournament next held the attention of the spectators for a weary hour or more. The participants were Miss Della McAbee, Miss Belle Briggs, and Mrs. J. S. Reed. The former had a well-trained horse of her own and showed some graceful pirouetting on horseback, Miss Briggs took a lively horse out of a buggy on the ground, and rode without a saddle. Mrs. Reed rode Velveteen, with which she could outrun the other ladies, but found her impracticable on a pigeon-wing. The prizes were awarded first to Miss McAbee, and the second divided between the other two ladies. So ended the second meeting of the Ukiah Park Association. The following are the summaries of the first day.

June 4th, Running; purse \$25; entrance \$5 added; for saddle horses. One mile.		
A. C. Perry's ch m Velveteen.....	1	
W. Siddon's b f Fox.....	2	
W. R. Bronough's h b Bay Dick.....	3	
Time—39½.		

Same Day.—Running for three-year-olds; purse \$100; entrance \$25 added. Half-mile heats.		
C. Underhill's b m Oriole.....	1	1
W. A. Haggins' ch m Goodie.....	2	2
Alex. Perry's b g Alex. Perry.....	3	3
Time—55, 56.		

Ukiah, June 7th, 1884.

MENDOCINO.

The following is the full text of "Lord Exeter's conditions," a phrase frequently occurring in English sale reports: The horses are sold without their engagements, but the purchaser has the right of running for any of them by paying half the stake, and in the event of the horse winning, or being entitled to second or third money, one-third should be paid to the vendor, but the vendor reserves to himself the right of striking the horse out of any race in time to save a minor forfeit or discount, unless the purchaser shall give notice that he wishes to run for any particular race, when he will become liable for half the stake or forfeit. Horses purchased under Lord Exeter's conditions cannot be resold under the same conditions without the written consent of the original vendor.

The prizes which will be decided this season on the grounds of the Chicago Driving Park will amount to \$230,000. The card calls for five trotting and running meetings, and the Illinois State Fair.

The Chicago Driving Park has had very vexatious weather during their special meeting. Continued showers have kept the track bad, and interfered generally with the success of the racing.

Force, the horse that ran three-quarters of a mile out of the chute at Louisville, in 1:13 last year, died at the Latonia Track, Covington, May 31st, of pneumonia.

Lag, by Loadstone, the dam of Maggie Emerson, and grandam of Lucky B., died at Elmendorf, Kentucky, May 25th.

## HERD AND SWINE.

## Cattle Ranchos Thirty Years Ago.

[Trebtor Noyle, in Ventura Democrat.]

A great many foolish, untruthful accounts of California ranchos and California cowboys have been published by journals both in the East and in California. Most of those articles were penned by persons who derived their knowledge of ranch and cowboy life in the her-rooms of San Francisco.

For the first ten years after the discovery of gold in California the southern part of the State made but little progress in the way of improvements. And although the ranch owners of Southern California derived princely revenues from sales of cattle, they expended none of their income in improving the fair land which paid them so beautifully. At that time there was no grain or orchard farming in Southern California. Every land owner was a stock raiser, and owned cattle in accordance with the size of his rancho. A rancho was a tract of land containing from one to eleven square leagues, (or from nine to ninety-nine square miles of land).

The improvements generally consisted of a small patch of poorly tilled land, which was planted yearly to watermelons, red peppers, and perhaps a few hills of corn were raised by the herders for their own use. The buildings consisted of a comfortable adobe building dwelling, which was occupied by the owner whenever he chose to spend a few weeks or months on his rancho. But the wealthy ranchers likewise own a house in town, and most of the time spent there. Besides this, there were usually a half a dozen or more thatched-covered huts, occupied by the families of vaqueros and herders. And last, but not least, a stout large branding corral and rodeo ground. The rodeo ground is merely a smooth level tract of land where all the cattle on the rancho can be gathered for review, or for parting out to brand or drive away to market. All the cattle on the rancho soon learned that the whoop-la, whoop-la of the yelling vaquero, as he galloped over the cattle range, meant muster on the rodeo ground. And if any laggarde lingered over their clover patch, the vaqueros chased them so furiously that the next time there would be no waiting or loitering on their part.

A grand rodeo on one of the great cattle ranches of Southern California, was one of the most magnificent sights ever witnessed on an open plain. Sometimes there were as many as 20,000 head of cattle gathered on one rodeo ground, and three or four hundred well-mounted vaqueros guarding and parting out from the vast herd, without creating the least confusion, or mishap. A general rodeo was always a grand affair, and was attended by cattle owners and vaqueros from near and far. The cattle from distant parts of the range were gathered nearer on the day before the rodeo. And on the morning of the rodeo, from dawn of day until nine in the morning, from every direction long lines of cattle would be seen traveling, in their long swinging trot, straight to the rodeo ground, while the loud ringing whoop, whoop, whoop-la of the pursuing vaqueros echoed and re-echoed in their rear. As soon as the cattle and the outriders were all in, they were ready to begin the work of parting out.

On every rancho there were a number of well-trained cattle kept for leaders or pilots. These were called cabresteros, and the finest and largest steers were selected and trained for cabresteros. Sometimes there were as many as one hundred of these well-trained cattle pilots on a rancho. When all was ready, the vaqueros would form a circle around all the cattle, and then the owner of his majordomo would ride to the center of the herd and shout: "Parata cabrestero, parata cabrestero." Then from every part of the vast herd, the well-trained cabresteros could be seen wending their way through a sea of cattle to one side of the herd, and then with lofty head and stately step, like war-trained grenadiers, march straight to the parada post, halt there without a guard, and quietly wait for further orders. The parada post is placed about two hundred yards from the rodeo ground, and as soon as the cabresteros are at their post, the majordomo details a certain number of vaqueros to part out the desired cattle from the main herd to the parada. The vaqueros work in couples in parting out, and two well-trained vaqueros would take the wildest steer straight to the parada without permitting him to turn or halt by the way. Sometimes there were three or four paradas, or one on each side of the rodeo, and ten or twelve vaqueros parting cattle from the main herd to each parada.

Outside of a cavalry charge in actual deadly war, I have never witnessed anything so exciting to the beholder as four hundred well mounted vaqueros systematically handling twenty thousand cattle at a grand rodeo in Southern California. A dispute was not allowed on the rodeo ground, and quarrels and disputes rarely occurred at the rodeo. After the desired number of cattle had been parted out, the main herd were permitted to disperse and return to their range. Then at the command "All corral cabresteros," the cabresteros would march straight from the parada to the corral. By this means, the wild cattle which had been parted from the herd, could be corralled without difficulty, for the pilots would lead them straight into the corral to be held there until branded.

The vaqueros of Southern California displayed wonderful dexterity in riding wild horses and throwing the lasso. A single horseman would lasso, throw and tie a wild steer in ten or twelve minutes without assistance. But in branding cattle, as in parting out, two vaqueros always work together, one to lasso the steer by the horns, and the other to lasso one or both of his hind feet. Then the horses pull contrarily, the steer is easily thrown and held helpless until branded. We have read many foolish articles about dashing cowboys dexteriously lassoing wild cattle by one fore foot to hold or throw them. That is all silly fiction. In the first place it is almost impossible to lasso a running steer by the fore foot; second, a wild steer so caught would be sure to break his fore leg at the knee, and thereby be crippled for life. Horses are sometimes lassoed by the fore feet, cattle never. But great herds of untamed cattle and horses, and grand rodeos, are, for Southern California, a thing of the past. Now orange groves, loaded with ripe fruit, grow in the valleys where wild cattle grazed in peace thirty years ago, and most of the best pasture land of that long ago, has long since been turned into vineyards for wine and raisins. The old cattle ranges now dotted with beautiful homes and villages, are built on rodeoing grounds. Such are the changes of time.

More than 375,000 head of young cattle will be driven out of Texas this season, and although this is the largest out-put in her history, stockmen claim that there will be left in the State more young stock than was ever before held over.

The Humane Society of St. Louis is trying to reform the manner in which butchers are killing their stock. It is also trying to make a change in the manner of shipping cattle from the ranches in the Far West to Eastern markets.

## Points to be Considered in Hog Breeding.

In concluding his address before the Ohio Swine Breeders' Association, S. H. Todd says:

There can be much gained by in-and-in breeding, if rightly managed, but it is accompanied by many mishaps and disappointments to those most skilled in it, I would not recommend it, as a rule. Another important consideration is locality. Swine may do well in one section and not in another. We should study this matter more than we do. I have had my attention drawn to this by stock that I have shipped to northern latitudes; they have invariably done better than those shipped south. If this be true in Chesters why not in all breeds? I think the Chestere will do as well as other breeds, if not better, north of the latitude of central Ohio. They have a coat of hair which protects them from sudden changes so frequently. Here let me suggest that we duly consider the propriety of breeding off this covering, and thus open the door for disease.

After a sow is bred she should be liberally fed, provided with a roomy sty filled with pure air and sunlight. She should have plenty of exercise, even if you have to compel her to take it. Kept in this way, a sow will have a litter of pigs that will give satisfactory results. The barbarous treatment sove generally get after being bred is the cause of the complaint so often heard, that "hogs do not pay." Forced into a yard, fed on corn, compelled to seek their own bed in an old rotten straw stack, to freeze, thaw and sweat until time of farrowing, their pigs will pass away like the morning dew; if any live through, they will be a source of disappointment for several months, perhaps, and then "wink out." I believe that nine-tenths of all the swine disease in this country could be traced directly to the seeds sown in the state of embryo.

As feed has more to do with making a hog than all other things combined, the trough should go along with the breed. When it is known that a colony of hogs can, by the influence of food, convert a worker egg or larva into a fully developed queen, we should learn something from it, and use what nature has placed in our reach to accomplish what we desire. If you want a hog with a short nose, feed it there; if a long nose, starve it there; if you want a fine coat of hair feed it; if you want bristles, bring them out by exposure and starvation. You can accomplish anything with care and feed; without these, you soon fail.

In breeding great care should be taken to secure animals from prolific strains. Great dissatisfaction exists throughout the country on account of the shyness of sows to breed and the small litters produced. It costs \$10 to \$12 to keep a sow a year. If she had but four pigs worth at weaning \$3 a piece you are out of pocket but it has cost to raise the pigs, or about \$4. If she has nine pigs and they sell for \$27, you have a profit of \$6 over and above cost.

Another point to be carefully guarded in breeding is size. S. M. Milliken said in his prize essay on the agriculture of Butler county, that the positive proof of the superiority of the Poland-China over other breeds was its large size. Joseph Harris says that this does not prove its value as a breed. But it did open the door of the great West and scattered this valuable breed all over its vast extent of territory. While the mania for size has done and will do much harm, it is a fact that cannot be ignored that if the breeder would succeed he must not be so selfish that he cannot see any merit in other breeds than his own. We should meet at fairs and meetings and visit each other and honestly compare our swine, and if we can see any that are better than ours it will give us the confidence necessary to the greatest success. We must be earnest and ambitious.

The physical organization of the hog closely resembles that of man. They are subject to similar diseases and should be treated similarly. The common idea that you cannot doctor a hog is all moonshine. I believe they can be treated with more certainty than any other animal. If we lose one occasionally it is no reason we should abandon the business. We lost our corn last Fall, weevil and fly have destroyed our wheat, but shall we fold our hands and refuse to plant or sow? The command is to sow in the morning and withhold not in the evening. Let us follow this command and, God helping us, we are bound to win.

There is one thing encouraging to swine breeders to-day—we are all united—and this cannot be said of breeders of other animals. At Chicago the breeders of different breeds of swine all met together and everything was harmonious. We each have our favorites and defend them earnestly, but our controversy so far, and I trust ever will, has had a tendency to unite us more closely and make the one object for which we are aiming more definite—the production of the best hog. In closing I can do no better than quote Dr. Franklin's old adage:

"He that by the plow would thrive,  
Himself must either hold or drive."

The *Southern World* thinks it unwise and unprofitable to allow the calves to remain with the cows, remarking that if you have 10 to 20 cows to milk, and as many calves to let in and tie off, it takes too much time. Calves are a nuisance in a dairyman's stable; they should be in a separate apartment. And further, I care not how much your cow may give—say five gallons—the calf will suck it all. If you take the first, and leave the last of the milk for the calf, you make no hnter, and the calf does not do well because the milk is entirely too rich to properly nourish it. The best milkers, Jerseys and natives, should never have the rearing of their calves, but it should be done by hand. The Texas cow, the wire-grass cow and the poor milker for dairying all over the world, are those that rear their own calves with any credit to themselves. These facts go to show conclusively that dairy-men should improve on nature, and feed their calves rationally upon skimmed milk and the grasses.

It may be interesting to note some of the articles of known use in the manufacture of butter. The use of neutral lard, which has already been mentioned in these columns, is probably the largest of all adulterants. It is tasteless, is easily colored and gives a good body to the butter, and is inexpensive compared with cream. Cotton seed oil is also very largely used. It has natural advantages of flavor and color and gives the butter a good grain. Oleo oil is a third substance, with which pure (?) creamy butter-makers of to-day are familiar. It is the oil obtained from tallow, and is the same substance which is used in the making of oleomargarine.

A breeder of considerable experience thus expresses himself in an exchange: I do not consider that the true value of a pure breed, as regards the regular farmer, is at all embodied in the preservation of its purity among his general stock. It lies in the preservation of its purity in the breeding males of his stock. It is generally conceded that it is possible to rear a herd of grades, which for every purpose other than breeding is equal to, if not superior, the pure breed.

## Small Farms and Small Herds.

Men owning small farms erroneously think themselves debarred from keeping the better classes of farm stock. No mistake could be greater than this, because symmetrical, high-bred farm animals can be maintained in presentable shape with less feed than will be required to keep a scrub of the same class in good flesh. From swine stock, we have but one source of income, namely from the flesh growth and fat deposit; hence, as symmetry and clever growth belong of right to our improved breeds, it requires no argument, aside from this mere fact, to establish that the more restricted the area from which to gather our feed, the more exacting we should be as to proclivities in the direction of profit. Those who have not handled improved swine, will, if they try the experiment, be surprised at the limited surface required on which to maintain a given number, a portion of this being in grass, and a portion devoted to raising grain and roots. The familiar saying, "A little farm, well filled," should have a very forcible application to all small farms. The owner is presumed to possess brain force and familiarity with details equal to a large undertaking, and when these qualifications are concentrated upon a restricted surface, the result should be a large proportionate return in feed.

The question can hardly be a debatable one as to whether a county or state will be more prosperous when divided up into small farms than when owned and managed in large tracts. In some respects, large farms, and correspondingly large herds and flocks, have advantages over smaller ones, but as human nature goes, the talent and force of character required in the management of a large estate may be likened to that required in the management of a large army, this talent is restricted to a very few. Decided success has attended the operations of many men possessing very moderate ability, where they have confined their movements within restricted space. Thus, Horace Greeley once said, that the most successful potato grower he had ever met was a little foreigner, having a diminutive, round bullet head. A brain of moderate capacity may take in the daily routine, and estimate correctly the needs upon a moderate farm, and the requirements of a moderate-sized herd or flock, that would fail utterly in a large undertaking. No large herd has an animal within it so good that a small collection may not contain one equally meritorious; and a material source of saving may be realized through not keeping a male, provided the location affords access to one or more of high merit. When it is taken into account that the services of the male are required but once a year, and that a successful coupling occupies but a short time, it is not difficult to see how the care and risk upon a male animal during three hundred and sixty-four days of the year is saved by using him a portion of the year in a small herd or flock upon some other farm. Then again, one great advantage of hiring the male service arises from the fact that the peculiarities of some females call for a male especially selected, on account of formation, color, breeding, etc., considerations that no one male animal so fully possesses as to make him a suitable mate to all females. Some men, in the face of these considerations, will keep a cheap male, at an advance in cost over hiring the service of a better, merely from a feeling of pride in owning their own male animals, and perhaps under the idea that their herd or flock will gain more credit by having a sire at the head, even though he be a moderately good one, than by sending to other herds for merit of the highest order, and according to the various needs among their females.

Small farms that are fairly well stocked are quite likely to be well manured, while large fields and large farms are, as a rule, neglected in this regard. The keeping of improved animals is quite likely to stimulate the owner to use better feed, and more of it, than he has been accustomed to using upon low-bred stock; hence the manure supply will be rich—rich in proportion to the quality of food used. It has been held that it is better where extreme richness of soil is desired, to stock small farms with swine, in the belief that hog manure is materially richer in the better elements than manure from other farm animals. With certain qualifications, this is in a measure true, merely from the fact that the food given to swine is more highly concentrated in form than that given to other animals. It is also less mixed with straw and other litter, hence more concentrated. Aside from these influences it has no advantages over the manure from cattle that are fed on fattening foods, and especially the manure from oil-cake feeding combined with grain, rich in all the qualities needed in this kind of a fertilizer. Therefore, as to sustaining a small farm in the highest state of fertility, men need not fear going amiss if they breed other sorts of stock than swine, provided they feed with rich foods, and give these liberally.—*Live Stock Journal*.

## A Forward Movement.

Breeders of fine stock speak of a clearly defined advance in public sentiment relative to stock-raising, in these days, which is apt to escape the notice of the casual observer. They find improvement in everything which tends to a more general introduction of heter types of farm animals. In the first place, the average farmer apparently appreciates more thoroughly than ever before the desirableness of breeding up. It is, indeed, coming to be the exception among thinking, reading, observing people to find a stock-raiser fixed in the determination to pay no attention to the claims of blood and quality. It is safe to say that in many neighborhooda hardly one man can now be found to scoff at the importance of breeding from the best where there were ten as many years ago. A leaven has been working in public opinion which bids fair to eventually permeate the whole lump. But not only is this the case, but farmers are showing an increased discrimination among the breeds. They not only want something better, but generally know just what they want and why they want it. Certain kinds of stock will suit the needs and circumstances of one man better than those of another, and this fact is frequently the cause of bringing together in a single locality nearly all the well known and generally recognized breeds of farm stock. Intelligent selection is thus giving great additional force to the inclination to replace natives with improved strains. And by no means the least of the noteworthy features of the change now going on is the broadening of views as to the range of prices which improved stock should command. Really this is perhaps the most striking of all the points alluded to. The day when a few paltry dollars were allowed to shut the farm gate against the influences of advanced breeding is forever past. American farmers are not only showing a determination to have good stock, but are ready to pay for it. Both in the direct purchase of stock and in paying for the use of good sires this crops out with equal distinctness. In short, a quiet revolution is going on among the stock-raisers of this country—a revolution which is investing their business with new dignity, which is increasing their profits, and which is placing them on a much more substantial and satisfactory financial footing.—*Pittsburg Stockman*.

The Prepotency of the Male Parents.

(Read before the Biological Society of Washington.-By M. O. Ellzy. M. D.)

Much study of breeding problems, an exceptionally wide and favorable field of observation, and much practical experience as a breeder and handler of domestic animals, serve to confirm me in the opinion that the general prepotency of the male parent is the physiological law. Various disturbing factors may serve to suspend the operation of the law. My attention was directed first to this subject by noticing the prepotency of the stallion over the mare in the transmission of saddle gaits, when, as a youth, I gave much time and attention to the training and breeding of saddle horses. I observed that saddle mares quite generally failed to transmit their gait to their colts by Black Hawk, or to the trotting stallions or by thoroughbred stallions, whereas saddle stallions very rarely, if ever, failed to transmit their gait to their colts, no matter from what sort of mares. I made the same observation subsequently with regard to setters, pointers and foxhounds, of which I bred many litters. The peculiar attitudes, motions and methods of hunting their game, characteristic of the male parent, reappeared very persistently in their offspring from various females, differing widely from each other, and from the male. My observations upon the human family, for which a long experience as a medical practitioner have afforded good opportunities, also confirm what I observed in the case of various domestic animals.

In reciprocal crosses between species and between widely divergent breeds, the prepotency of the male is set in a strong light, when reciprocal crosses occur between light and dark colored races of man. If the father be of the light race, the children are much lighter than a medium between the father and mother; but if the father be of the dark race, then the children are much the medium. This shows the prepotency of the father in both cases of the reciprocal cross. I am able to state, as the result of my own observations, that I have never seen an exception to this rule. The ancient Romans bred the he-goat to the ewe and produced hybrids much like the goat, which they called titties. They bred also the she-goat to the ram and produced hybrids less like the goat and more like the sheep than the titties, which they called musmou. However, musmou and titties were both more like the goat than the sheep. This reciprocal cross, therefore, exhibits the prepotency of the goat in crosses with the sheep, and also the prepotency of the male in both cases of the cross. Moux, or tailless cats, reciprocally crossed with common domestic cats, do not exhibit prepotency attaching to either breed, but the prepotency of the male is apparent; that is to say, if the male be tailless and the female have a tail, the kits will have no tail; but if the male have a tail and the female none, then the kits will all, or nearly all of them, be furnished with a tail.

Silky feathered fowls reciprocally crossed with common fowls show the same facts in a strong light, viz.: If the cock have silky feathers and the hen none, many of the chicks have silky feathers; but if the hen have silky feathers and the cock none, few, if any, of the chicks will have silky feathers.

Again, the horse and ass reciprocally crossed, show both the prepotency of the ass over the horse and the prepotency of the male parent in both cases of the reciprocal cross. Both hinnies and mules have more asinine than equine characters, nevertheless the mule is more like the ass, his father, and the hinny more like the stallion, his father.

It has been remarked that the proportion of three-eighths of the blood of one species to five-eighths of the blood of the other species is most favorable to the stability of hybrids. The famous leporides are three-eighths rabbit and five-eighths hare. It was at one time believed that these leporides were a permanent hybrid race fertile interse, and capable of self perpetuation. It is now conceded that they have reverted to the rabbit type very completely. In this case three-eighths of the blood of the paternal species balanced physiologically five-eighths of the blood of the maternal during a number of generations, and finally proved sufficiently prepotent to produce reversion to its own type. We have, therefore, the formula as three-eighths to five-eighths for the numerical expression or the prepotency of the male parent, plus the prepotency of the species. Again in the case of the sheep-goat hybrids of South America, which are bred three-eighths he-goat to five-eighths sheep, we have the same result precisely, viz., these so-called chahins can be interbred for several generations successfully, when reversion takes place.

Certainly neither one swallow nor even many swallows suffice to make a Summer. It is, however, lawful for me to put it forward as a tentative hypothesis until further facts are at hand. That in the proportion three-eighths paternal to five-eighths maternal blood, we have the general numerical expression of the prepotency of the male parent plus the prepotency of the prepotent species, from which, when known the male is to be taken, and this should be the formula for the crossings when we attempt to produce the most stable hybrid between two crossable species.

In the case of mongrels bred between domestic breeds, the formula would certainly be different, but whether we should need a greater or less proportion of paternal blood to produce the most stable mongrels I have no facts tending to show. However, in breeding for the establishment of a new breed by crossings, it seems to be quite certain that equal proportions of the blood of the two crossed breeds will be very unfavorable to the physiological equilibrium, and that it is necessary to give a degree of preponderance generally to the maternal type. What the amount of such preponderance should be remains to be determined by physiological experiment. I fancy that I have some reasons for believing that the proportion of three-fourths maternal to one-fourth paternal blood is very conducive to the stability of mongrels; I know that the proportion of one-half maternal to one-half paternal is extremely unfavorable to their stability.

Finally, I suspect, that even in the highest scientific quarters very curious and widely erroneous opinions prevail with regard to important questions of heredity. Since reading the book of the talented young associate in biology of John Hopkins University, entitled "Heredity," I have not had my suspicions upon that point cleared up. I fear that the brilliant advances in comparative anatomy have served to render studies in comparative physiology slightly unfashionable. The remark has been attributed to a great morphologist that "physiology, in so far as it is a science, is merely tributary to the practice of medicine." If I had the privilege of interrogating that distinguished gentleman, the question I would ask of him would be this: In so far as morphology is a science, to what is its tributary?

To insure good butter, says an experienced housewife, gather the cream in an earthen jar, and don't leave it in the churn longer than it takes you to convert it into butter. Don't allow the buttermilk to stand in it either. If you desire to save any for culinary purposes, put what you need in a small earthen jar or crock and the rest in the slop barrel. As soon as the butter and buttermilk are out of the churn wash and rinse it, and place it out-doors to air and dry. Every housewife should have a jar exclusively set apart in which to keep cream. It should not be allowed to remain any length of time in a jar which has previously contained vinegar, apple butter, pickles, etc., unless it has undergone a thorough washing and airing.

Cloth to be used for wrapping around print butter should first be thoroughly washed with soap and well rinsed in clean water to remove any traces which may remain of the chemicals used in bleaching, otherwise the butter may be injured, at least in appearance.

The American Devon Cattle Club, organized at Pittsburg, Pennsylvania, last March, has a membership of twenty-three.

Iowa is accredited with furnishing the bulk of the cattle that were taken into Colorado this season.

The goat business in Texas seems to be enjoying a boom just now.

Damp, unventilated cellars will spoil butter or milk. Chicago makes 150,000 pounds of butter every day.

STALLIONS THOROUGHbred.

The Thoroughbred Stallion  
**WILDIDLE.**

By imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic gilly record of one mile, 1:42, at two years old, May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal. Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, Owner, or W. L. APPLEBY, Supt.

P. O. Box 223. Santa Clara, Cal.

STALLIONS

-AT-

**RANCHO DEL PASO.**

For the Season of 1884.

Thoroughbreds.

**LONGFIELD.**

Chestnut horse, by MONARCHIST, he by Lexington. First dam, Dame Gourlay (Blue Gown), by Planet. Second dam, Flora G., by Lexington. Third dam, Fanny G., by imp. Margrave. Fourth dam, Lances, by Lance. Fifth dam, Aurora, by Aratus. Sixth dam, Paragon, by imp. Buzzard. Seventh dam, Indiana, by Columbus (son of imp. Pantaloon). Eighth dam, Jane Hunt, by Hampton's Paragon. Ninth dam, Moll, by imp. Figure. Tenth dam, Slamerkin, by imp. Wildair. Eleventh dam, imp. Cnb Mare, by Cub. Twelfth dam, Aramantus' dam, by Second. Thirteenth dam, by Starling. Fourteenth dam, by Croft's Partner. Fifteenth dam, by Greyhound. At \$50 the season, due at the time of service.

**JIM BROWNE.**

Chestnut horse, by FOSTER, he by Lexington. First dam, Flush, by Hiawatha. Second dam, Fanny Bugg, by imp. Ambassador. Third dam, Ida, by imp. Belshazzar. Fourth dam, Madame Bosley, by Sir Richard Tonson. Fifth dam, Nancy Nichol, by imp. Eagle. Sixth dam, Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Sterling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by Jolly Roger. Twelfth dam, by imp. Partner. Thirteenth dam, imp. Monkey. Fourteenth dam, an imp. mare from the stud of Harrison of Bra do. At \$50 the season, due at time of service.

Trotting Stallions.

**ECHO.**

Bay horse, by RYSDYK'S HAMBLETONIAN. First dam, Fanny Felter, by Magnolia, son of Seely's American Star. Second dam, by Webber's Kentucky Whip. Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of imp. Messenger. At \$100 the season, due at time of service.

**ALGONA.**

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian. First dam, Emma Kinkaid, by Conscript, son of Cassius M. Clay. Second dam, Edie Dean, by Mambrino Chief. Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy. At \$100 the season, due at time of service.

**ALASKA.**

Brown horse, by ELECTIONEER. First dam, by Washington, he by Geo. M. Patchen. Second dam, by Williamson's Belmont. At \$50 the season, due at time of service. The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$8 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents. John Mackey, Superintendent, Sacramento, Cal.

THOROUGHbred STALLION

**X X.**

Pedigree.

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM. First dam, Columbia, by imported Bonnie Scotland. Second dam, Young Fashion, by imported Monarch. Third dam, Fashion, by imported Trustee. Fourth dam, Bonnets of Blue, by Sir Charles. Fifth dam, Really, by Sir Archy. Sixth dam, by imported Medley. Seventh dam, by imported Centinel. Eighth dam, by Mark Anthony. Ninth dam, by imported Janus. Tenth dam, by imported Monkey. Eleventh dam, by imported Silvereye. Twelfth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

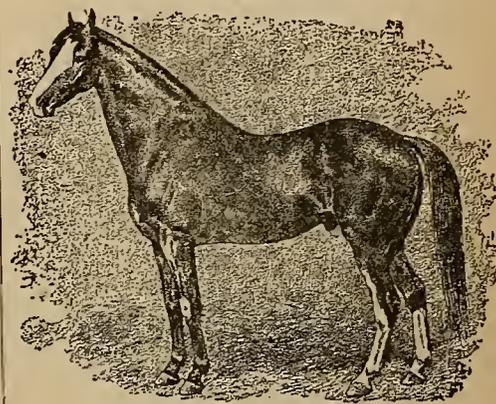

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the grandam of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauwata, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Saganore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

JOSEPH CAIRN SIMPSON.

Oakland or 509 Montgomery Street, San Francisco.

The Thoroughbred Stallion

**JOE HOOKER.**  
BY MONDAY.

First dam Mayflower, by imp. Eclipse. Second dam Hennie Farrow, by imp. Shamrock. Third dam Ida, by imp. Belshazzar. Fourth dam Gamma's dam, by Sir Richard. Fifth dam, by imp. Eagle. Sixth dam Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Starling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by imp. Jolly Roger. Twelfth dam, by Partner. Thirteenth dam, by imp. Monkey. Fourteenth dam, imp. mare from the stud of Harrison of Brandon.

TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risk.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freeport road. This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run a fast. Among them are Fred Collier and Jim Benwick. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1883.

T. W. WINTERS, Sacramento, Cal.

TROTting STALLIONS.

Standard Trotting Stallion

**BILLY HAYWARD, 489,**

AT NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

THE ELECTIONEER STALLION

**STANFORD**

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

Terms. \$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 hands, and weighs 1,650 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25), he by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk. Second dam, Kitty, by Owen Dale, son of Belmont. Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred. Dam of Dave Hill by Vermont Hambletonian. Dam of Red Lion by Vermont Hambletonian.

J. J. FAIRBANKS, Agent.

Oakland, January 18, 1884.

As a cure for sore throat and coughs, "Brown's Bronchitis-Trochea" have been thoroughly tested, and maintain their good reputation.

## THE KENNEL.

### X. to Mr. Hart.

EDITOR BREEDER AND SPORTSMAN:—I have read Mr. Hart's communication printed in your last issue, and while I respect his sincerity and feel indebted for his kindness in trying to help clear up the uncertainties in the pedigree of his Belle, I yet cannot, as at present informed, accept his statement as conclusive.

Mr. Hart manifests a little petulance, which is to be regretted, because it is uncalled for, and if met with a like spirit can only tend to divert us from the point at issue, which is the breeding of Belle. You will remember that "T. R. H." in your paper of May 24th, stated that Belle was a litter sister of Doctor Toland's Whiskey.

In your last issue Mr. T. R. Hart states that his Belle was from a litter of which he saw the sire and dam.

It is admitted that Whiskey was of unknown breeding. Her sire was unknown. It is unknown when or where she was whelped. For a full statement as to Whiskey, Mr. Hart may consult the BREEDER AND SPORTSMAN, of May 17th last.

With these facts in mind, Mr. Hart will admit that I have good reason to believe his memory at fault, when he writes that he saw the sire of Whiskey. And if he is no more accurate in his other recollections of Belle, I really do not see that he can be useful in establishing her pedigree.

Mr. Kaeding has stated his belief in the matter, and Mr. Hart has shown his uncertainty, so that, as the matter now stands, I feel at liberty to believe Belle to have been bred from Belt and Bell. Mr. Kaeding has no recollection of having given Mr. Hart an order for a puppy at any time. He simply gave him a bitch pup from Belt and Bell.

Mr. Hart intimates that Doctor Toland may confirm his statements if I interview him. It seems to me fitting that Mr. Hart should furnish you with such confirmation, if any, as Doctor Toland can give.

Mr. Hart insists on knowing how I am going to "make" Belle a Gordon setter, when he saw her sire and dam, and they were "red." It is clear that if Belle was Whiskey's sister, Mr. Hart could neither have seen her sire or known his color. If Belle was not Whiskey's sister, after Mr. Hart's positive statements, I feel at liberty to believe that he does not know anything about her breeding, and as red pups occasionally come in Gordon litters, I see no inconsistency in believing that Belle might have come from Gordons.

Mr. Hart asks why in giving pups to friends he should also have given them false pedigrees. I do not think the gentleman did give false pedigrees with *malice prepense*. My opinion is, that Mr. Hart took Belle from Mr. Kaeding without particularly noting her breeding, and as months slipped by, his remembrance of the statements made to him when he got Belle became clouded. So when he gave a pup away, he stated what he then believed to be his pedigree without any anxiety as to its absolute correctness, because he probably thought it a matter of no importance. As to the ownership of Sancho, I have no care. I am sorry I raised the point since to clear it up involves the necessity of asking Mr. Sime to give particulars as to what must have been delicate personal relations, or Mr. Hart would state the facts himself. I am well satisfied to know that she is now in good hands, and has been bred to a well-bred dog, and I hope to meet Mr. Hart at the field trials next year with some good descendants of poor Belle. I trust that if Mr. Hart has any collateral evidence as to Belle, he will not withhold it, since our only interest is to reach the ultimate facts, and if her breeding as now established, viz.: from Belt and Bell, is not true, it will be easier to straighten the pedigree now than in the future; as for myself, I accept Belt and Bell as her sire and dam.

X.

### In the Ring.

Well, here are the dogs walking round. "Hullo, out you go there with the broken off foreleg." "What did you say, Mr. Exhibitor, only noticed him walking stiff this morning; ah, really, what a very unobservant man you must be; take him out." "Gad, how badly that one moves, bring him bere, please; let me see his teeth (always let the owner open the month), yes, very old, and must have been a grand dog six years ago, but every dog has his day you know, sir; I will give you the highest honor short of the coin, and of that he has won plenty at other shows—vnc." So you have got some room, only eight, and you think you can see the winner already, but don't be in a hurry, lead up to him.

Now for the individual inspection. "Fair head and coat, short in the couplings rather. Don't hit your dog, sir, I don't mind his jumping up, give me your stick. Here dog, ps! fetch it! Good ears; bullo, look at his tail right over his back; that's what you wanted the stick for; eh? to keep his tail down, sly dog, but he's worth a c. card." Seven left. "Decent all-round dog, this one a bit slack behind—trot him up there in front of me; hem! I thought so, inclined to be cow-hocked, he." Six. Sit tight and play up; how anxious that tall man looks; and that keeper ought to have his neck screwed for the little interest he shows in the job. The very confident cocksure-looking gentleman thinks, "—, can't lose to-day." Well, we'll see, but you are looking at the wrong end of the chain.

"Whoa, there. Savage, is he? Then why didn't you say so? Coarse throughout—another he.

Five. Yes, there's no doubt about him. "Put him up in the corner." Confident man much surprised he is not sent to follow, but affects to look unconcerned, which doesn't go far to reassure his wife, who now glares at the judge, while the keeper, with the swell of the party in the corner, listlessly converses with a pal over the barrier. Now these four. "Very characteristic dog." You like him? "What a coat; but that head. Well, you are not far out of it, sir. What is your number? Thanks—vnc."

Three and one in the corner. "Yes, he's a devilish handsome pup. Entered in the puppy class, too, is he? Ah, well, well! Well, he's hardly made up enough yet—vnc. You'll never do worse. In a few months he'll carry you into the money."

Two and one in the corner. "Here, you fellow, bring that dog out of the corner." Where's your ring, steward? All the people have got under the barrier, and are crowding round you and the three dogs in their anxiety. "Stand back, please."

"Gallop them round." What action that dog has. But the swell still leads. "Stop! Bring him on the board. Good head; something wrong about the shoulders—heavy rather; chest could be narrower, too." "Bring the other two on the board." "Feet not so good as theirs, either." What did you say? Took first prize at Carrabas? What's that to do with me, sir? A very improper remark to make to the judge. I have half a mind to turn you out of the ring. What have I given you? Good advice, sir, hit your dog I award third prize to."

And out he goes with the proverbial lively insect in his ear, which will tingle for the next half hour. Come, now, here's the tug of war. You still like the look of the swell, but take it quickly. You know the other is a famous dog, been doing a lot of winning, and you have never seen the youngster before. Well, give him extra attention, then. Head perfect, legs straight as pillars, coat flat and straight, splendid quarters. "Yes, he's a nailer." Put them alongside of one another. Not much to choose; more quality in the young one perhaps—yes, by Jove, and more character; color not so pleasant as the other, but the texture of coat—let me feel the other's—rather much better.

"Only second, sir; well, you ought not feel ashamed of being beaten by this lovely animal." But the confident man is very much annoyed if he isn't ashamed, and sneeringly repeats your observation to his indignant spouse, who buttonholes him at the exit, and they walk away together consoling themselves by remarking that "they suppose you bred the winner or sold him; that's it, of course, what can you expect, and after all what does he know about—s?"

### Natural and Acquired Qualities.

EDITOR BREEDER AND SPORTSMAN:—"X" says: "Talking about breaking a dog to point is like talking about teaching the deaf to hear. If he has a good nose, and is in good health he will point his birds without breaking." Such assertions prove that "X" is a mere pretender, one who is just beginning to acquire the rudiments of dog knowledge, and who speaks with all the dogmatic assurance of a neophyte. Every sportsman knows that the pointing faculty is an acquired and not a natural one. It is true that many breeds of dogs, when they strike the scent of game, will stop, uncertain whence it comes, preparatory to the spring, but tuition and hereditary transmission have developed that faculty so strongly in pointers and setters, that they will remain longer on the point than other dogs, but even with them it requires much teaching and practice to compel them to remain staunch, and not break point until ordered, or the game is flushed. Has not the spaniel a good nose, and does he point? Does the fox-hound or blood-hound? Does "X" contend that the scenting power of pointers and setters is superior to that of hounds? How rarely do we find that the best pointer of setter can track a winged quail, when a hound will follow a foot scent hours after an animal has passed.

W. BRADFORD.

Mr. James Taylor, the celebrated English judge, writing on black and tan terriers, says: "As to the question of cropping I wish the Black and Tan Club all prosperity in their endeavors to put it down. Four years ago I induced the Birmingham committee to entertain the idea, and one of their number kindly gave two prizes for black-and-tans with uncut ears. The prizes were continued for three years but were ill-rewarded by the paucity of entries, and the quality of the exhibits, and at the end of that time they were given up in disgust. I believe now to be the time to strike the death blow to cropping all kinds of dog's ears, and substitute the small, thin button ear. Strange it is, but years past the exhibits in classes for dogs where cropping had been tolerated, have been steadily decreasing. Black-and-tans, white, Yorkshires, toys and hull terriers, have become fewer and fewer at every big show, Irish and Great Danes alone being on the increase. Now, therefore, is the time for the Kennel Club, the National Club, and all others to at once pass rules disqualifying all dogs cropped after a certain date, and in two years from now those who still cling to the barbarous custom will be thankful for the change."

## FISH.

### The Commissioners' Report.

The Fish Commissioners had a meeting at Sacramento, on Monday last, at which Mr. Redding was unable to attend. Although there were several good features about the report, it is not necessary to reproduce it in full, as is our custom. In reference to the paper from the superintendent of the McCloud Fishery we regret the details of the season's work at that establishment were not given to the public in the report. They would have been very acceptable. Mr. Rymer, of Shasta county, informed the Commissioners by letter that "R. A. Campbell, whose postoffice address is Shasta, Shasta county, California, is the owner of a certain dam, situate within said county, and at a point on Clear creek, about one and one-half miles below Horsetown; that said dam is constructed across said creek at said point, and that the fish are thereby prevented from coming up said stream above said point; that said Campbell has failed to provide fishways or ladders on such dams as provided by law."

In reference to Mr. Taylor's similar offense on Paper Mill Creek, one of the most disgraceful ever committed on a free people, a petition from the local residents has been received by the Commissioners condemning Mr. Taylor, as he merits. The case has lain some two years before the Supreme Court under appeal or application for new hearing, and is likely to remain there if the local citizens do not bestir themselves in the matter. We hear rumors of a new trial being commenced by parties in this city from disgust at the Supreme Court's delay, and it would, perhaps, be a good idea for the two parties to join together in their efforts to bring this insolent offender against the laws to justice. We doubt the utility of trusting the Commissioners. Relating to the production of fish in our State Hatchery and their distribution to State waters, the report says:

"Commissioner Dibble reported that of the 30,000 land-locked salmon eggs received, 25,000 had been hatched and 14,000 of them distributed. Of the 40,000 eggs received at the United States Fishery, at Baird's station, nearly all had been hatched, were in fine condition and would be ready for distribution in a few days.

"The superintendent of the hatchery, Mr. Frazier, in his report, says that he will have no trouble in hatching and distributing from the Shelley Hatchery over 500,000 fish during the present season. Mr. Frazier is now gathering eggs in various portions of the State, but mainly sly trout from Lake Tahoe. He has deposited in Donner Lake 12,000 land-locked salmon. The report of Superintendent Frazier is said by the Commissioners to be highly satisfactory."

There is one feature of the report which requires an explanation, if not more. At the last meeting of the Commissioners a Mr. Carberry was allowed to say:

"That the \$3,000 appropriated by the Legislature for work which would make the Pitt River Falls passable to salmon had not been expended, and the falls were still a barrier to the fish. The Commission in office at the time of the ap-

propriation must have divided \$2,400, he thought, as \$600 only was spent, and that to no good purpose, and the remainder had mysteriously disappeared."

This is altogether a misrepresentation of the facts, and it is somewhat strange the Commissioners allowed the statement to go to print without endeavoring to correct it. The act referred to by Mr. Carberry and approved April 16th, 1880, appropriated \$3,000 out of the general fund for the erection of a fish ladder on Pitt river, but the money could not be touched until the work was completed and approved. With the provisions of this act, as a lawyer and a Commissioner, Mr. Dibble should certainly be familiar, and an application to the Controller would have shown him the precise expenditures in the case, and how they were made had he made such application. The actual truth, we fear, was not wanted. We have not space to publish the act entire, but we find room for a letter from the late Mr. Redding, which entirely exonerates him and his colleagues from the silly and cruel charge made against them when dead in their graves. The letter is to the contractors for the work which was completed afterwards out of the solid rock, though we cannot tell what its condition is to-day. Mr. Redding's letter:

E. E. Van Sickle and F. H. Kenyon, Bieher, Lassen Co., Cal.

DEAR SIRS:—Your letter of the 7th duly received. Inclosed with this you will find two copies of a contract in your names for the construction of a fishway on Pitt River, for the amount of your bid, \$2,300, the work to be completed during the months of August, September and October, 1881. Please fill in the dates and sign, and return one copy to me. Please attend to this promptly, as I wish to make a report to the Legislature that the contract has been let, and cannot do so until you return one copy, duly signed. Should it be necessary to put in the name of the other Kenyon you can interline it and have him also sign it. Yours, etc.,

B. B. REDDING, Secy. Cal. Fish Com.

San Francisco, December 20th, 1880.

If this \$2,300 was paid in full the Controller's books will show the fact, and further, that the balance \$700, less some little expenses, remains to-day undrawn from the general fund, and therefore unappropriated by the old Commissioners, as charged by Mr. Carberry. Had there been a desire to be just in this matter, the conduct of the Commissioners would have been different. So far as we have heard the subject canvassed in this city, the verdict is against the present Commissioners.

### Big Trout.

Reports from Prattville state that the fishing is very fine there. An Indian caught a trout weighing 11½ pounds, and Mr. E. L. Drake one of six pounds, and many smaller, but still large ones. Prattville is sixty-five miles, one day's stage from Colusa. Ain't these a little too large? The one caught by the Indian is as large as that of which Commissioner Baird thought it proper to have a model taken.

We have received information of a catfish being caught in a stream near Santa Rosa, weighing 26 pounds. This shows we have large catfish in our waters, as well as small, the croakers to the contrary notwithstanding. We have received an invitation to visit the stream in question, which we shall accept, as we anticipate much fun in a controversy with a catfish of that size, or half the size. There are also found fish called "hard-mouths" in the same stream in abundance, weighing ten and twelve pounds.

Mr. Buckingham, we are glad to find, is at last bestirring himself to bring the brigand and Chiuese brigade to justice beyond the precincts of Carquinez straits. He last week successfully prosecuted three offenders for catching shad and salmon in ecines at Colusa. They were fined \$50 each.

Professor Swan, United States Fish Commissioner, having exhibited to experts of Smithsonian Institute, Washington, samples of canned salmon caught in fresh and salt water, has received a report stating that the salt-water fish are most esteemed.

Mr. J. K. Orr and a party of friends had a pleasant and successful trip last week to Bear Valley Creek. The party brought home about eighty good fish, all under five inches being returned to the water if possible.

Had it not been for the extraordinary rain of the last week the streams in this State would have been in fine fishing condition. It will, however, benefit us later in the season by allowing the trout to grow.

## THE DRAMA.

### Vienna Garden.

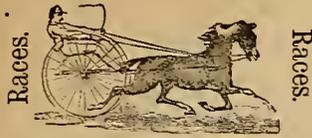

The present week is announced the last of the Gypsy Band, as on Monday they take a trip to leading towns in the interior, opening at San Jose. The performance, whether the last or not, has been as brilliant as ever, and, perhaps, more enthusiastically received than ever. We hope they will return to us, for the public is not tired of them yet by any means. Mr. Urban and Miss Lynton have been very warmly received during the week, and they well deserved the plaudits given them. The new debutante, Miss Nellie Spencer, recently from the East, is a young lady of fine personal appearances, with manners likely to make her a favorite. She sang her ballad, Sweet Violets, with much grace and sweetness, and made a decided hit. Her voice is very pleasant in the lower notes, but limited in the upper. Like all newcomers she is suffering from a severe cold. She sings with feeling, taste and accuracy. As a ballad singer she ought to be welcome here. Next week the performance will be very attractive, as several new people are expected direct from New York under contract to the house. In spite of the rain the hustlers has been good, the audiences, as usual, being composed chiefly of educated and well-to-do people.

### Pigeon Shooting To-Morrow.

After our gun column had gone to press we learned there was to be quite a gathering of our crack shots at Bird's Point, on Sunday, for pool shooting. Over \$100 will be given in prizes. It will be a handicap shoot, Messrs. Robison, Lambert, Fay and others in their class being placed at 30 yards to others at lesser distances.

The two-mile wherry race between Oscar Tolle and A. L. Langford resulted in a victory for the former. The time announced was 13 min. 58 sec. If the time returned is correct the course must have been short.

Watt Park, Grass Valley

Races. JULY 4th and 5th.

First Day, July 4th.

No. 1—Trotting, mile heats, 3-in-5, 2:27 Class Purse \$600. No. 2—Running, half mile and repeat. Free for all horses in the District. Purse \$200.

LARGE PUBLIC SALE

SPANISH MERINO RAMS!

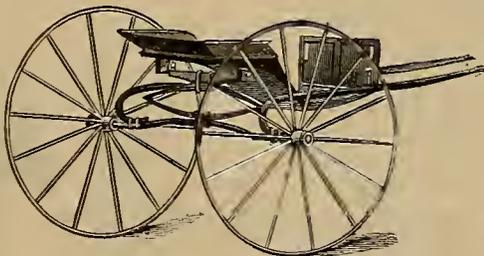

WEDNESDAY, JUNE 18, '84,

COMSTOCK'S STABLES, --- 524 THIRD ST., SAN FRANCISCO, CAL.

WE WILL SELL AT PUBLIC AUCTION ONE HUNDRED AND FORTY HEAD OF SPANISH MERINO RAMS, one and two years old this spring, at the above time and place. These Rams were recently imported from Vermont, and were selected with great care from the Top of some of the Best Flocks in that State, and are all recorded in the Vermont Registers. They were started for Australia, but being prevented from going further by laws passed by that Government prohibiting further importation of American sheep, we take this method of closing them out, thus placing within the reach of Flock Masters on this Coast an Extraordinary Opportunity of obtaining some No. 1 Rams.

We are confident it will be for the interest of every Sheep Breeder to attend this sale. Remember, this is to be a Bona Fide Sale, as we intend to Close out the Lot. The Sheep can be seen at above place, and all are invited to call and examine them. Sale to commence at 11 A.M., sharp. For Catalogue or particulars, address GEORGE HAMMOND, Grand Hotel, Or MESSRS. KILLIP & CO., Auctioneers, 116 Montgomery Street, F. D. BARTON & CO.

REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.

Horses distancing the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the Judges.

The Pacific Coast Blood Horse Association Rules to govern all Running Races.

Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock P.M.

In all Running Races the second horse saves entrance.

No money paid for a race without a contest.

All entries for Races to close with the Secretary or President, at Chico, July 1st, 1884, at ten o'clock P.M.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

C. C. MASON, PRESIDENT. ROLAND DILLER, SECRETARY.

Important Sale of Thoroughbred Horses.

BY DIRECTION OF

THEODORE WINTERS, ESQ.

We will Offer for Sale

Thursday, July 17th, 1884.

At the Stables of C. H. SHEAR, opposite Agricultural Park, Sacramento,

Seventeen Head of Thoroughbred Horses

COMPRISING

All his two-year olds and yearlings, together with the crack three-year-old Prince of Norfolk and the famous hurdle mare Hattie B.

It is Mr. Winters positive intention to retire from the turf and confine himself strictly to breeding. Hence his entire string will be offered without reserve. The colts in training will be galloped until day of sale, that they may be kept in order for racing purposes. The horses may be seen previous to sale at the Winters' Ranch, Riverside Road, near Sacramento. A competent Veterinary will be in attendance, to make all examinations desired by purchasers. Killip & Co. will execute commissions for intending buyers who cannot be present.

Catalogues giving full pedigrees, etc., will shortly be issued. For information apply to

KILLIP & CO., Live Stock Auctioneers, 116 Montgomery Street, S. F.

AUCTION SALE

—OF—

Pure Bred Jersey Cattle,

THE PROPERTY OF

ROBERT BECK, ESQ.,

—TO TAKE PLACE—

Thursday, July 17, 1884.

IMMEDIATELY UPON THE CONCLUSION OF THE sale of Mr. Winters' horses, we will offer twenty head of THOROUGHBRED JERSEY BULLS, COWS and HEIFERS, all registered in the American Jersey Cattle Club, and in Pacific Coast Jersey Cattle Club Registers. These cattle are of the choicest milk strains, being chiefly descended from Tomchstone, the most famous Jersey bull imported into California. Several high grade cows and heifers will also be offered.

The sale will take place at stables of C. H. Shear, opposite Agricultural Park, Sacramento.

Catalogues giving pedigree and full information will be issued in a few days.

THE TROTTING STALLION  
SILVERHEEL

WILL MAKE THE SEASON OF 1884 AT THE DASHAWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland.

TERMS. Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

Hambletonian Trotting Stallion

BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. ECHO by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star).

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

Description.

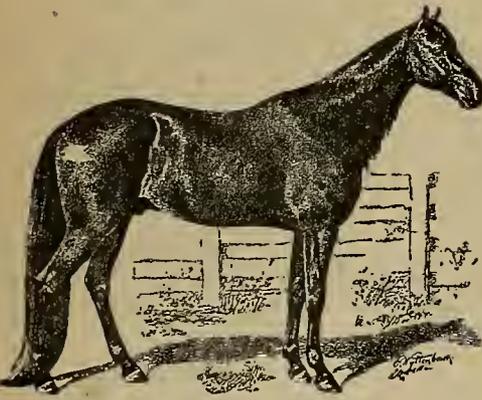

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen bands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record.

TERMS.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

CHARLES J. ELLIS, Owner. WM. DONATHAN, Agent.

Mambrino Trotting Stallion

ABBOTSFORD.

Record 2:19 1-2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE, San Mateo, Cal.

PEDIGREE.

By Woodford Mambrino; his dam, Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Young Columbus, dam Woodline, (dam of Wedgewood, 2:19), by Woodford, son of Koselsko, by Sir Archy.

Mambrino Chief was mated with Woodline, daughter of thoroughbred Woodford, and the practice was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outbranks any that he has accomplished, all other stallions. Of the eighty-nine (89) mares sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by illness, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapoli, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Chevy 2:22 1/2; Magenta 2:21 1/2; Maufred 2:23; Pancoast 2:25 1/2; Rachel 2:26 1/2; Tina 2:27; Lady McFarlane 2:29; Dacia 2:29 1/2; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Prince, the sire of Triquet 2:21. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,383 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:18 1/2; Commodore 2:22; Hiram Woodruff 2:25; Valley Chief 2:25; Faustina 2:25 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malley 3:00.

TERMS.

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra paise taken, but no liability for accidents or escapes.

WASH JAMES, Agent, San Mateo, Cal

The Trotting Stallions

DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$20, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phalaris, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:25 1/2); by Mambrino Chief; second dam by Potomac; third dam by Saxe Wieuaur.

Monroe Chief, 2:18 1-4.

Two-mile record, 4:36.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whip stock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performance, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

JOHN A. GOLDSMITH, OAKLAND TROTTING PARK,

The Trotting Stallion

BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Frances, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson. Frank Pierce, Jr., by Frank Pierce, son of Beppo. Brigadier will make the season of 1884 from February 10th to July 1st.

TERMS.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes. Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats. February 2d, 1884.

J. B. McDONALD.

2:20 1-4.

The Fast-Trotting Stallion

ANTEEO.

Dark bay colt, near hind foot white; foaled May 6th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER. First dam, Columbine, by A. W. Richmond. Second dam, Columbia, by imp. Bonnie Scotland. Third dam, Young Fashion, by imp. Monarch. Fourth dam, Fashion, by imp. Trustee. Fifth dam, Bonnet of Blue, by Sir Charles. Sixth dam, Reality, by Sir Archy. Seventh dam, by imp. Medley. Eighth dam, by imp. Centinel. Ninth dam, by Mark Anthony. Tenth dam, by imp. Janne. Eleventh dam, by imp. Monkey. Twelfth dam, by imp. Silvereye. Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents. Anteo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20 1/2, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

M. ROLLINS, Agent, Santa Rosa.

MAMBRINO WILKES.

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE D. Wilkes, son of Rysdyk's Hambletonian, bred by H. J. Treacy of Fayette County, Kentucky. Dam Lady Christiana by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Rippon's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,200 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. He quite demonstrates that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prominent sire.

Will make the coming season, commencing February 1st, 1884, at the Drew stable, STOCKTON, and L. M. Morse's near LODI.

TERMS:

\$40 for the season, or \$25 single service. This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horse whose services are held at One or Two Hundred Dollars. For further particulars address

A. L. HINDS, Agent.

The Trotting Stallion

STEINWAY,

With two-year-old record, third heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

TERMS.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County,

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McCleverty & Noblett, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Haywards, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing mane and tail, two white bind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Stratmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginian, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Claus, 2:17 1/2; and Tucker, 2:19 1/2; Chestnut Hill, 2:22 1/2; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbot, five-year-old, 2:27; Solo, five-year-old, 2:33; Monitor, 2:32 1/2; Henderson, 2:28; Strathlan, three-year-old, 2:30 1/2; and Stuart, three-year-old, 2:28. Stuart is full brother to Belnor, who trotted a mile in 2:52 1/2 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; sire by Stratmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whiteball, he the sire of Rhode Island, record 2:33, and he in turn got Governor Sprague, record 2:30; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbera, Admiration, Mystery, in 2:39, 2:32, 2:31 1/2. Memento won the first heat. As three-year-old, at Sharpsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25, 2:30 1/2, 2:30 1/2. Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchfly and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:23 1/2, 2:26 1/2, but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23, 2:27 1/2.

Address

GEORGE WILEY,

Cook Farm, Danville, Contra Costa Co., Cal.

THE TROTTING STALLIONS

SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO July 15th, 1884, at the farm of the owner, three miles north of Colton, Butte Co., Cal. Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Ia 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

PEDIGREE.

Singleton he by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Busrie, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:44) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Rysdyk's Hambletonian, grandam by Lefler's Consul, by Shepperd's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

LA HARPE

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,150 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Van Woodley), he by Alexander's Abdallah (sire of Goldsmith Malby), he by Rysdyk's Hambletonian, he by Abdallah, by Mambrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star (son of Platt's Western Star by Blackwood). 1st dam by Bonagers, 2nd dam by Gallatin (sire). La Harpe's dam Prairie Bird by Flaxtail (dam of Flight, 2:23, and Prompter, 2:33). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Lefler's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

TERMS:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, each. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

Sportsmen & Pleasure-Seekers.

THE SOUTHERN PACIFIC R. R. O.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES AFFORDED BY ITS LINE FOR REACHING A with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives, Trout in abundances can be obtained from its several streams in the vicinity of Monterey, and this best of shooting may be had in season.

THE BAY OF MONTEREY

is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish Mackerel, and Flounder.

The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

"HOTEL DEL MONTE," ARE UNSURPASSED,

having a MAONIFICENT BEACH of pure white sand for surf bathing. THE BATH-HOUSE contains

SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunges and swimming baths, with ELEGANT ROOMS connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ,

IS VIA THE

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Bruno, Santa Cruz and Monterey, in each of which game abounds in great variety.

Notably Quail, Pigeon, Sulp, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISIMA, SAN GREGORIO and PE-SCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for HILF PRACTICE.

The resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried in charge. Guns taken up and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, Valencia-station, and No. 613 Market street, Grand Hotel.

# BREEDER AND SPORTSMAN

Vol. IV, No. 2.  
NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, JUNE 21, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

## OUR NEW YORK LETTER.

Opening Days at Jerome Park—Great Assemblage on Decoration Day—Renwick's Great Speed—The Withers' Stakes—General Gossip—News, etc.

Our metropolitan racing season was fairly set in motion yesterday, at Fordham, where the American Jockey Club formally opened its season of 1884, with a great crowd, variously estimated at from 20,000 to 25,000 persons. The holiday was, of course, largely responsible for a great part of this vast attendance, but the card of the day's sport was an unusually fine one, including as it did, the Forbham Handicap and the famous Withers' Stakes for all ages. The former brought out a good field of ten horses, including your big white faced, white legged chestnut, Jim Renwick, who attracted more attention than any horse on the grounds. Buchanan had him in fine order, but Welch apparently did not back him for a dollar as with an unfamiliar rider up, Dana, he started at a long price. He ran very fast for the first half mile, which was nearly all straight work, accomplishing that in 51 seconds, but as soon as he got among the figure eight turns, his rider was at once all abroad, and half the field passed him at the club house bluff. He was badly beaten at the end, but will do better with a practiced jockey on this track, or with any jockey on the circular-mile courses at Sheepshead Bay and Monmouth Park. Heel and Toe, who won the Fordham Handicap yesterday, is a small, compact, little bay filly, a full sister to the Oregon stallion Glen Dudley, with a great turn of speed at the distance.

The Withers' Stakes was a great race. Burton, the crack colt of the Dwyers' Stable, started an even money favorite, against the field of six others who opposed him, but he found the mile too long for him, seven furlongs being the length of his tether on this occasion. Panique and Himalaya ran a great race and had not the latter stumbled at the start he would have forced Panique to run faster to beat him. Panique, since his victory, is in great demand, and several owners, including the Dwyers, are making efforts to buy him from Commodore Kittson. All the horses in the Erdenheim Stable are for sale, and if Major Hubbard gets his price he will sell Panique, Issaquena, Rataplan, or any of them. The price of the Withers' victor is said to be \$15,000, and as he is a hardy, robust looking colt, heavily engaged, this is not too much money for a colt with his great turn of speed. The feature of to-day, the second of the meeting, was the Juvenile Stake, the first two-year-old race in this vicinity. Several of the youngsters had great private reputations, but Triton, a big brown, by Sensation, out of an imported mare, by Prince Charlie, and Detective, by Virgil, carried the most metal. The race was a match between those two, but the last furlong the Islip brown carried too many guns for the Brooklyn black, beating him two lengths in the fast time for the half-mile of 49 3/4 seconds, first quarter 24 1/4 seconds. Both these colts are very promising, and have great fighting before them. Anyone who would have predicted, last week, that the first two days of the meeting at Jerome would come and go, and find the powerful Brooklyn Stable credited with not a solitary race, would have been considered a fit candidate for Bloomingdale asylum, and yet the fact stands so recorded. James McLaughlin has been in the dusty rear so often during these days, and Roe has unsaddled so many losers, that people are beginning to ask themselves what does it all mean? Has the prestige of other days departed, or is the cloud but a temporary one, obscuring only for the time being the dazzling rays of success? These are questions on every lip just now, and the immediate future will give some insight into their truth or falsity. The etable, though numerically strong, seems intrinsically very weak at present, for outside the two-year-olds, who are evidently a good lot, old Checkmate has thus far been the only one to acquit himself with any credit whatever, and he did not win. The show made by Joe Blackburn has been simply ridiculous. He should not be allowed to be quoted hereafter in pools, or bets, or any race in which he takes part, for backers of this brute have not even had a win for their money. Burton, Greenbush, Jennings, and the other runners, except old "Check" and Detective, have been dead failures so far, with George Kinney, Miss Woodford, and the other youngsters yet to be heard from. This season, however, is young yet, and the stable has still time to head the list of winners again, though that they will reach any such total as the amount credited to them in 1883 is very doubtful, under the circumstances of the unusual weakness in the three-year-old division.

In the West, Louisville has closed, and Latonia began yesterday simultaneously with Jerome. To-day the Baldwin Stable started the Grinstead-Molly McCarty filly, Fallen

Leaf, in the Hindoo Stakes for three-year-olds, and the filly ran a great race for one so soon, comparatively speaking, off the overland cars, after her long trip from the Pacific. She made all the running, and was only beaten a neck by Audrein, having behind her Buchanan, the Derby and Clark victor, the great colt Gen. Harding, and others. Fallen Leaf is engaged in other great stakes at Latonia, Chicago and elsewhere, and with health she is very likely to make a great record with her evident fine turn of speed. Two others of the stable, Savanna, three years, and Rapido, two years, ran yesterday, and to-day also, the latter getting third place in a large field. The stable evidently has good material in it and will do better later on, beyond a doubt, when the horses have had more work. Cooper and Holloway are likely to win many races yet. From this on our racing season will be in full swing until the snow flies. Brighton Beach began last Saturday, and after Jerome Park is ended Sheepshead Bay, Monmouth Park, Saratoga, etc., will follow in rapid order. That some of the Western associations will need more horses is certain. Week after next Pittsburg and St. Louis will clash, and one or the other is bound to suffer by it. The horse show this week was largely attended by the elite of the city. Among the exhibitions of harness, saddles, etc., the Whitman Saddle Co., of this city, bore off the palm with their numerous specimens of all kinds of saddles, suitable for fashionable riders, army purposes, ranchmen, or equestrians anywhere. Their side saddles are a specialty.

New York, May 31st, 1884.

## THE KENNEL.

What is a "Point?"

EDITOR BREEDER AND SPORTSMAN:—In the last BREEDER AND SPORTSMAN a correspondent who long since forfeited all right to recognition by his *nom de plume*, by vulgarity, takes me to task for saying that it is folly to talk of "breaking" a dog to point. The essence of the communication lies in the sentence, "Every sportsman knows that the pointing faculty is an acquired, and not a natural one." I consider this notion an erroneous one, but am not surprised that the correspondent should have fallen into the error. He has several times ventured into print with matter relative to dogs, their breeding and habits, and as often has been shown to be one whose experience is very limited, whose perceptive powers are nil, and whose reflective habit is so marked as to justify the belief that he is always absent-minded, or at least that his mind is always absent. You will admit, Mr. Editor, that to discuss any matter with such an one is not an attractive labor, and will not think me lacking in respect to yourself if I hereafter ignore anything which the correspondent may write.

Now, what is a "point?" A distinguished authority says, "A point is a natural stop (being the pause to determine exactly where the game is lying preparatory to rushing in to seize it.)" Again the same authority remarks, "Pointing is only a natural pause." Of course the authority is speaking of a "point" pure and simple, not of any particular sort of "point," neither the "point" which a bird setter may have found necessary to his best success, nor such a "point" as the field shot finds essential to his pleasure. The "point" then is the stop upon the recognition of the presence of game through the olfactory nerves. It may be momentary, as it often is with inferior pups, or it may resemble a clonic spasm in its immobility, as it often does in highly bred animals. I presume no trainer of dogs would consider a healthy pup, of proper age, which did not "point" at its first fair opportunity, worth handling.

The correspondent confounds the simple "points," with the "stanch point," or some other of the qualified "points" of which the sportsman's press of the day is so full. The authority quoted says, in another portion of his invaluable monograph, "Though you can not improve a dog's nose, you can do what is really tantamount to it—you can increase his caution." In this sentence lies the gist of the whole matter of training in so far as it relates to the development of a "point" suited to any particular demand. The dog "points" naturally, therefore to talk of "breaking him to point" is foolishness. You wish him to remain on point until ordered to flush, or until you flush and shoot and order him on, and you train him so to do. Let me illustrate in A, B, C style so that the correspondent will understand it. The correspondent began to behave when he first drew breath. To talk of "breaking him to behave" would therefore be folly. But certain sorts of behavior are customary among gentlemen, and if the correspondent is to behave like a gentleman, some one will have to teach him how to do so.

## Fairfax' Beauty.

EDITOR BREEDER AND SPORTSMAN:—In recent issues of your paper mention has been made of a bitch more widely known, perhaps, and more highly valued than any other yet owned in California. Fairfax' Beauty is a model held up to young sportsmen by the choicest of the old-time quail shots, who never tire in telling of her extraordinary nose, her indomitable pluck, her great judgment, and her unwearied staying power. One gentleman has often told me of her retrieving from water two hundred and fifty-six ducks up Tomales way. Another tells of her heading a running pack of quails and breaking it into close lying singles. Another of her long points. Perhaps a little allowance should be made for the talkativeness of elderly sportsmen and the tendency among all sportsmen to apotheosize a departed favorite. But, with much salt, it seems true that Beauty was an unusually good bitch. Of her breeding as many stories are told as there are relatives. This injustice to the old girl, together with the fact that she left her impress on many dogs now living of good field qualities, prompted me to clear her pedigree in so far as it could be done, and I now give it as a contribution to California dog literature worth keeping for reference.

From Doctor A. W. Taliaferro, of San Rafael, I have received the following note:

"Beauty was out of a slint belonging to Dr. Proctor, of Sacramento. Proctor's bitch was a large white and yellow setter, and was from Kentucky, I think. She was very good in the field. The sire of Beauty was a black and tan setter, and thoroughly well bred. This is all that I now remember about them, but Major George Gillis can likely give you something more definite about their pedigrees, as he owned a brother of Beauty's and was the most intimate friend Proctor had.

"Beauty belonged to me and not to Fairfax, as a great many think. He, however, killed many a bird behind her. I raised and trained her in '59 or '60, and at five months old she was better in the field than most of the dogs I now see. Her color was of the deepest red I ever saw in a dog, and she was not only the most beautiful but the finest looking setter I ever saw. In the field she was perfection itself, and there is no dog that I now know that can be at all compared to her.

I will be very pleased to tell you anything further that you may like to inquire about.

Yours very truly,  
ALFRED W. TALIAFERRO."

It is hard to read the Doctor's letter, without sharing his enthusiastic admiration for his pet. In accordance with the suggestion made in the letter, I ventured to ask Major Gillis for what information he could give about Beauty, and learned that she was bred out of an orange and white bitch named Jule, owned by Major Gillis, but in the hands of Dr. W. G. Proctor, of Sacramento, by a Gordon setter owned by Mr. Sam Brooks, also of Sacramento. Jule was a large bitch, and was by Capt. A. Gray Morgan's orange and white setter Cap, out of an orange and white setter bitch owned by Mr. Jim Quinn, then proprietor of "The Willows," of blessed memory to many an old San Franciscan. Mr. Brooks' Gordon was a dog of much quality and a good field animal, as were also those of Mr. Quinn and Capt. Morgan. Beauty was bred, Major Gillis believes, in the Spring of '60. A black litter brother of hers was reserved by Major Gillis, and was stolen from the Major at about two and one-half years old, in Stockton. Another of the litter, a bitch, was given to Mr. Alex. Coffin, then of Sacramento, while Beauty was presented to Doctor Taliaferro.

If Mr. Sam Brooks happens to see this I hope he will write what he remembers of his old Gordon, the sire of Beauty, and Mr. Jim Quinn would oblige many by doing a similar thing about his bitch, the dam of Jule. Major Gillis mentioned a striking fact in connection with Jule. When quite old her tail was amputated by Dr. Proctor, and in each of her litters thereafter there were two or more stumped tail puppies. What a deal of suffering and unsightliness would be saved if, by careful selection, we could breed setters and pointers with just tail enough for symmetry and not so long as to be whipped raw in cover! Time would educate our taste until what would now seem a deformity would recommend itself to us by its beauty as well as its usefulness.

I am sure those who own dogs in which there is a trace of Beauty will feel thankful to Doctor Taliaferro and to Major Gillis for their kind willingness to give information about her.

At the monthly meeting of the Gilroy Rod and Gun Club held on the 13th, E. Leavesley, D. M. Pyle and Geo. H. ... were appointed a committee on field trials, to report at next meeting.

## TURF AND TRACK.

## Dates Claimed.

Bay District, San Francisco (Fall Meeting), August 24, 5th, 7th, and 9th.  
 Santa Cruz Fair Association, Santa Cruz, August 12th to 16th.  
 Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.  
 Sonoma and Marin District Association, Petaluma, August 25th to 30th.  
 Thirteenth District, Marysville, Aug. 26th to 30th.  
 Golden Gate Fair, Oakland, September 1st to 6th.  
 Chico Fair Association, Chico, Sept. 1st to 6th.  
 State Fair, Sacramento, Sept. 7th to 20th.  
 Ninth District Fair Association, Rohnerville, Sept. 23d to 26th.  
 San Joaquin District Fair, Stockton, September 22d to 27th.  
 Santa Clara District Fair, San Jose, September 29th to October 4th.  
 Monterey Agricultural Association, Salinas, Oct. 7th to 11th.  
 Fresno Fair Association, Fresno, October 7th to 11th.  
 Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## Abe Buford Dead.—Decline of a Celebrated Kentucky Family.

[Indianapolis dispatch to the N. Y. Herald, June 9th.]

The famous turfman, General Abe Buford, of Louisville, Ky., committed suicide at the residence of his brother, Benjamin Buford, at Danville, Ind., this morning, just after the breakfast hour. He had gone to Danville to visit relatives and attend the races. On his person were found two documents, one of them evidently just written, stating that the troubles of his brother, Tom Buford, who will be remembered as the slayer of Judge Elliott, at Lexington, two years ago, and the death of almost every member of his family, were the causes of the deed. Tom Buford was tried for the killing of Elliott, but was acquitted on the ground of insanity and sent to the Anchorage Asylum at Louisville. After spending a year in the hospital he deliberately walked over to the Indiana shore and for the past two years has lived at Jeffersonville, the officers being powerless to return him to Kentucky in the absence of a criminal charge against him. For several months he has been failing mentally and physically and eventually became insane, in fact, and about two weeks ago wandered back to Kentucky soil and was returned to the Anchorage. This had a very depressing effect upon General Abe Buford and he has since been very despondent. Several members of his family have died within the past few months, and he had met with financial reverses. But the condition of his brother proved the climax of all his sorrows. Yesterday morning at breakfast he picked up a Louisville paper and his eye fell upon an article headed, "The Decadence of the Buford Family," in which their misfortunes and reverses were all set forth.

He immediately left the table and retired to his room, where he wrote a letter indicative of his purpose to commit suicide and stating the reasons, after which he blew out his brains.

General Abraham Buford belonged to a Kentucky family, several generations of which have been prominent in one way or another. He was born in Woodford county, Ky., in 1815. He was educated at the West Point Military Academy, where he graduated in the class of 1841, which had in it such famous men as Don Carlos Buell, John F. Reynolds, Thomas I. Rodman and Schneyler Hamilton. For twelve years he served in the old First dragoons, and at the battle of Buena Vista in the war with Mexico he was brevetted captain on the field for gallant and meritorious conduct. After the Mexican war he was on duty for a time at the Cavalry School at Carlisle, Pa., but resigned from the army in 1854, when he held the rank of captain of dragoons. He then settled down in Woodford county, Ky., as a farmer and breeder of thoroughbred horses. General Buford was a classmate and homely friend of General Hancock and was under the tutelage of General Sherman. During the war he served as a brigadier general with Bragg in the Confederate army. After the war he spent most of his time on the turf and was a somewhat noted sporting editor and correspondent.

While General Buford was stationed at El Paso he saw an opening by which to make a large amount of money, with a good race horse. He slipped off to Kentucky, and before they knew he was away he was back with a couple of good race nags, which he had procured from his father. General Buford was soon able to obtain matches for both his horses, and a large amount of money was staked upon the races which he won easily, for there were no horses in that country that could compete with them. General Buford remained in the army until he married. He then returned to Kentucky, where he purchased a beautiful farm, which he afterward named "Bosque-Bonita." He then commenced gathering around him some good brood-mares. The first stallion he added to his stud was Sovereign and then Revenue, Marion and Versailles. His favorite stallion, however, was Equiper, whom he bred and ran successfully upon the turf until he broke down. The horse afterward became quite a success in the stud. The principal horses General Buford owned or bred were Crossland, Marion, Versailles, Equiper, Lynchburg, Nellie Grey, Matilda, Salina, Hollywood, Bombshell, and Outario, by Bonnie Scotland, out of Lady Lancaster. After Equiper went in the stud he bred McWhorter, who was a first class three-year old, who ran at Louisville, Ky., in the Spring of 1877, two miles in the fast time of 3:30, carrying 100 lbs. It was the best time ever made by any three-year-old in America at that time.

About two years ago he professed to be converted by Rev. George O. Barnes, the mountain evangelist, and attracted widespread attention by delivering a number of sermons, noted for their originality, rivaling as they did the story of Joseph and his brethren, as told by Mark Twain's hero Sooty Briggs.

Following are the principal passages in the newspaper article referred to, which affected the General so much that he shot himself:—"Colonel Tom Buford was returned to the Anchorage Asylum yesterday. It has been about nineteen months since his escape, when he left a hale and hearty man. He returned broken down in body and mind, his giant frame wasted by disease to a skeleton, and his haughty spirit utterly cowed by his misfortune and suffering.

"Tom Buford was known all over Kentucky. He belonged to the proudest of the proudest aristocracy in the blue grass region, and he inherited a fortune. The Bufords were a historic family, scarcely less famous than the Breckinridges, the Clays, or the Marshalls. Judge Elliott's slayer was a typical Kentuckian in his powerful physique, his handsome face, his intellect, and the prodigality of his life. Few men were better read than he; his manners were the perfection of grace and courtesy, and he was a brilliant conversationalist. He was an old hachelor, devoted to the ladies and to wine. He played cards and bet on horse races with the boldness and dash so characteristic of Kentuckians, and whether at poker or on horses he won and lost with a touch and go freedom.

"Reverses came after awhile, and first one and then another of the Buford possessions slipped away from the family. The dashing Colonel lost, too, and then one disappointment after another changed him from a *bon vivant* to a moody, reckless man. He took to drinking and brooded till he became a monomaniac. Finally a long lawsuit gave his last farm, nominally owned by his sister Mary, to a man named Guthrie, and Tom Buford was a beggar. One day he took a shot gun, and, throwing it over his shoulder, started out to kill the man who, he believed, was leagued with his enemies. He met Judge Elliott and slew him at sight. His arrest and the trial which followed made an epoch in the criminal jurisprudence of Kentucky. The ablest legal talent in the land was engaged for both the defence and the prosecution, and money was spent like water to secure his acquittal. The defence raised the plea of insanity, and the most noted experts obtainable gave their testimony for or against the theory. When the voluminous testimony was closed the counsel exhausted themselves in brilliant arguments, whose eloquence has not been forgotten, nor will it be for years. The first trial resulted in a verdict of guilty, and Tom Buford was condemned to hang. A new trial was procured, and after months had been consumed in going over the case he was acquitted on the ground of insanity, and removed to the asylum at Anchorage. Both trials occurred at Owenton.

"Buford took his acquittal as haughtily as he did his arrest. He had never denied his guilt and he gloried in the deed which, he said, had rid the State of a corrupt judge. He was sent to Anchorage, where Dr. Gale allowed him many privileges, and nearly two years ago he took advantage of this laxity to make his escape. Even this action was characteristic. He came boldly to this city and then proceeded over to Jeffersonville. Once off Kentucky soil he could snap his fingers at the asylum authorities, and they could not eject him into returning. He took up his quarters at the National Hotel in Jeffersonville, where he has lived ever since. Three weeks ago Captain J. Crit. Ireland, of this city, went over to see his old friend. Arriving at the hotel he asked an emaciated old man if he could see Colonel Buford. The man broke down and cried like a child when he found that one of his best friends had failed to recognize him in the wreck to which suffering and disease had brought him. From being a giant of 225 pounds he had dwindled down to 118, and it seemed as if he was almost ready to sink into the grave. He was without money, hope or friends, almost without clothes and utterly broken hearted. Captain Ireland was greatly affected and induced the old man to come over and visit him one night shortly afterward. He went back to see him, and at last succeeded in persuading him to return to Anchorage, where he took him yesterday morning. He carried with him his fishing tackle, and when they neared the asylum he could not restrain his delight. The place which was once his prison he gladly welcomed, and he was most kindly received. Captain Ireland has always been a devoted friend to Colonel Buford, and no other man could have induced him to take this step. His career has been a remarkable one, but the asylum will doubtless witness its close, as he does not appear to be able to live much longer.

The remains of General Buford have been taken to Lexington for burial.

## The Withers of 1884.

There was quite a delay at the post. McLaughlin, on Burton, was eager to get away, and the colt seemed rather fretful. Barrett, on Vocalic, was in no hurry; nor was Feakes, on Himalaya. Pincus also began to get excited, and the crowd, which had been hushed into a breathless silence, began to murmur at the delay. Several times they got off, but Feakes, who had the worst position, away on the outside with Himalaya, waited. "Feakes don't seem to be anxious," whispered Donahue to Hayward, and the silent little man in black smiled grimly in reply, as he reined Pampero back. Then they got even, and down went the flag, with Dutch Roller in front, Pampero and Panique next, and then Thackeray and Burton. Himalaya was slightly behind but when Feakes sent him out the colt stumbled and almost fell upon his knees. Feakes pulled him up and started in pursuit, but when the lot reached the quarter-pole Himalaya was last of all, and fully twelve lengths behind Pampero, who led, with Burton at his shoulder, Dutch Roller and Thackeray next. At the bluff Burton forged past Pampero, amid wild yells from his backers. But all were pulling and hauling, and Thackeray was falling back, Panique was fourth, and Himalaya still last of all, and to all appearances out of the race. As the lot passed behind the hill, the red jacket of Burton was in front. "It's all over," yelled the crowd, but when the horses again came in sight on the far turn, the glasses showed Pampero's black jacket in front, Burton second, with Panique coming to the front rapidly. As the horses wheeled into the straight, McLaughlin's arm was seen to go up on Burton, and a great roar from the stand broke into a terrific yell as Fitzpatrick, on Panique, was seen to whip his horse, and, leaving Burton in the rear, challenge Pampero. Hayward's whip was out, and the Brookdale and Eerdenheim cracks were having it atride for stride, amidst the wildest enthusiasm. At the furlong pole Panique drew away, and at the same time a hoarse cry of "Himalaya" drew attention to the Preakness colt as he shot out, and, disposing of Pampero, challenged Panique for the lead. Whips were flying, and the stand fairly shook with excitement. Himalaya was catching Panique at every stride, but the post was at hand, and Fitzpatrick, riding like a great captain, brought Panique over the score a short length ahead of Himalaya, who beat Pampero a half length. Dutch Roller was a good fourth, then came Vocalic, Thackeray, and Burton.

The applause that greeted Panique was loud and hearty. It was a popular victory, for Commodore Kitten, the owner, Major Hubbard, the former "Albion" of *The Spirit*, James Lee, the trainer, and "Dare Devil" Fitzpatrick, the jockey, all stand very highly in public estimation. It was Commodore Kitten's first great victory, and as he is an owner whom the public wish to "stay" upon the turf, his success was of so encouraging a nature as to justify the hope that his handsome colors will long be seen. "I've nothing against the Dwyers, but I'm glad to see a break in the order of the past few years," was the remark of more than one bystander. Panique was scarcely distressed beyond a slight heaving at the flanks, nor was Pampero, who was as fit as a race-horse could well be. Fitzpatrick was almost crazy with delight as we approached him.

"Didn't you have to ride pretty hard coming round the last turn?" we asked of him.

"You can bet I did, sir," he replied, all out of breath.

"You appeared to have whipped him pretty hard to get away."

"I did, yes, and he answered it, too," exclaimed Fitz, ablaze with enthusiasm. "They couldn't beat him if he was to run the race over again, now."

"But didn't Himalaya give you a pretty hard fight?"

"Only a little while; he couldn't keep up the lick."

There was no information to be extracted from "the dare devil." He was too jubilant, so we followed Hyland and Himalaya over to the old Lorillard stable among the trees.

"Well, sir, they beat us," was Hyland's salutation as we entered, finding them with the colt in the rear of the stable, surrounded by Smith, Charley Riley, and a score of boys.

"Yes," we answered; "but you are not ready to cry 'enough' on the result."

"No, sir; I think we ought to have won it. You saw for yourself. The colt fell on his knees at the start, and was nearly fifty yards behind as they went around the turn, I said to myself, 'Our chance is gone,' but when I seen him coming in the stretch I thought even then he might win it."

"After getting away so badly?"

"Yes, sir; I know this colt's speed, and you'll see it, too, before the season's done. I'm glad it was so for one reason; it will satisfy Mr. Galway that what I've been telling him all along is correct."

Himalaya was somewhat distressed, as well he might be for never since Harold's great run in 1879 have we seen a colt make up his ground in so short a space. It was a mighty effort, and one which would have neutralized the chance of almost any horse. The colt coughed, as well he might, as in racing in the heels of the others he had to swallow a constant cloud of dust.

Feakes now joined us, whip in hand, and was eloquently silent as he gazed at his late mount, who was being led around the circle by his boy.

"Well, we're beaten," said Hyland, breaking the silence.

"Yes; there was no help for it," replied Feakes, abstractedly.

"Couldn't you keep him on his feet at the start?"

"He stumbled as I sent him away, and when I got him going he couldn't seem to get in motion until we had passed the half-mile pole."

"Well, is he a game colt, Feakes?"

"Yes," responded the jockey, slowly, scratching the ground with his whip end, "but I'm afraid Panique's the best after all. I tell you, old Fitz was giving the whip at a lively rate at the head of the stretch, and he came under it."

"Didn't Himalaya?"

"Yes, but he tired a little bit at the end, I was lucky to get seconds, as Panique swerved a bit at the finish, and I was obliged to pull my colt out for fear of cutting Panique down, and Pampero almost caught me."—*N. Y. Spirit*.

## The Trotting Horse.

The American trotting horse is a marked example, says the *Ohio Farmer*, of what man can do in developing a trait or peculiarity in a species of animals. It is not claimed by scientific breeders that the trotters are yet a definite, well-fixed breed. It is rather an illustrious example, a "new breed" just being moulded into shape by a curious combination of influence. "The breed is in a process of evolution in obedience to definite laws, to meet wants imposed by the new phases of our modern civilization." So says Prof. Brewer. The trotting instinct seems to be a matter of breeding. It was not natural for horses to trot. It once was exceptional to find a horse that would trot faster than a jog. As soon as urged he would go into a canter or run. That seems to be the nature of horses. As early as 1825 the New York Trotting Club was organized, with a view of improving the speed of road horses. The old jockey clubs had in view the improvement of riding horses. In 1828 the Huntington Park Association was formed at Philadelphia, and the next year a trotting club was formed at Baltimore. After these, such organizations sprang up rapidly. Prior to these organizations it was rare to find a horse that could trot a mile in three or four minutes. In 1818 Boston Blue did it in 3:00. In 1824 Top Gallant in 2:40, but ten years later we find Edwin Forrest trotting a mile in 2:31. In 1844 Lady Suffolk did it in 2:26.

In another decade the time was reduced by Flora Temple to 2:19. In the next decade Dexter marked 2:17. In 1874 Goldsmith Maid reduced that time to 2:14. In 1881 Maud S reduced it to 2:10. By 1885 it may go down another point or two. But these figures show how by training and breeding for speed, we must surely get speed. The main for speed has been so intensive that other qualities of the horse have been lost sight of, in a large measure. It is a notorious fact that we have not as many ten-mile horses as we formerly had. Nor have we many that can stay a five mile race. Endurance and stamina have not been made specialties in the selection. Nor has it mattered much what the color, style or size of the fast trotter should be. He must get there in the shortest time, and if he could do it but once, no matter. Get there he must.

It is encouraging, however, to know that the breeders see that the thing of breeding for speed is not enough. The size, stamina and style of the trotting stallion of to-day are important considerations to him who is selecting a cross for his trotting-bred mare. We are glad to note this, for the value of the American trotting horse is not to be estimated from the sole fact that he can trot faster than any other animal or breed, but from his power of endurance and his adaptability to other than track work. The roadster's value is not dependent on his ability to trot, but to keep it up, and to be reliable and safe in harness. The number of uses to which the trotting horse is put, and the fact that the trotter and his vehicle have superseded the riding horse, and that he is so much in demand for purposes of business and pleasure—all make it especially important that he shall not only trot freely, endure it long, but be kind and tractable in harness.

Dr. C. H. Mack, of Walla Walla, has sold off at private sale nearly a dozen head of his Alwood colts and fillies within the past sixty days, for some of which he has got fair prices, while others were sacrificed. He sold several fillies with which he should never have parted, and he should get rid of his geldings whenever he can obtain fair figures. Alwood is a remarkable breeding horse, and for uniformity, I doubt if his superior ever was brought to the coast. He breeds size, bone, and ability to pull weight, and these are three cardinal requisites, coupled with fine color and good style. Add to this a good temper, and you have a pretty good horse. Whether Alwood will get early trotters is a matter of doubt, but certainly when those big fellows get their full growth they will be heard from. No tourists visiting Walla Walla should fail to visit the Fleetmont farm and see the trotters at work, all the way from yearlings up to five-year-olds. It will give him a correct idea of the capacity of the inland empire for producing horses that are saleable at all times, and available for all classes of work. The farm is but half a mile from Bolles Junction, and there is no trouble in reaching it by the foot-bridge across the Touchet. And the visitor should also "take in" the farms of Charles Russell and James W. Foster before leaving that section. The horses are superb, and the cherries are ripe.—*Oregonian*.

The Story of Volunteer.

One of the principle attractions at the Horse Show was this renowned trotting stallion. He comes of a race proverbial for stoutness and preservation of procreative powers until late in life. Abdallah, the grandsire, and Hambletonian, the sire of Volunteer, both died at a ripe age, and following the line back we find Membrino and Messenger were also long-lived, and retained their vigor to a period when ordinary horses would be useless. It was not as a remarkably well-preserved horse that Volunteer received such distinguished consideration at Madison Square Garden last week, but as a famous sire of trotters. Although Daniel Lambert, George Wilkes, and Blue Bull surpass him in representation in the 2:30 list, no other horse has the honor of having five of his get hold a place on the 2:20 roll of fame. In these progressive days 2:30 is no longer regarded as a symbol of great speed in a trotter, when ten seconds better is repeatedly reeled off season by season.

Since the days of Flora Temple, the Hambletonian family have been the pioneers in the upward march in trotting speed. Dexter, by the sire of Volunteer, was the first to break the little mare's mark. Then followed peerless Goldsmith Meid, sired by Volunteer's half brother. Following the Meid came Rarus, supposed on good grounds to be by a son of Old Abdallah. First to beat Rarus' record was the great St. Julien, the speediest son Volunteer, who reigned king of the geldings until the little dark son of Dictator placed himself first. Maud S., the queenly daughter Herold, still remains best of all, to give way probably to another member of her tribe.

Volunteer was foaled 1854, bred by Joseph Hetzel, Florida, N. Y. He was sired by Rysdyk's Hambletonian, dam Lady Patriot, by Young Patriot; granddam the Lewis Hulse Merc, that was good at both the running and trotting gets. In August, 1862, he became the property of Mr. Alden Goldsmith, Washingtonville, Orange county, N. Y., and has ever since remained at the head of Walnut Grove Stud. Lady Patriot also produced another son who has made his mark as a sire as well as a performer. Unfortunately Sentinel has passed the way of all good horses, but has left able sons to carry on the line. It seems to have been the fate of many trotting stallions destined to eminence to pass the earlier years of their life under a cloud. Hambletonian's public life was precarious until Dexter made him famous. Blue Bull held one of the most despicable positions a horse can hold until he asserted his right to recognition, and Volunteer himself was disregarded until he forced the breeding public to acknowledge his worth. To-day no brood-mare is more highly prized than a daughter of Volunteer, and for the track, road or stud his sons are eagerly sought for by buyers at high prices. He get in the 2:30 list are twenty-three in number, viz: St. Julien, 2:11½; Gloster, 2:17; Alley, 2:19; Bodine, 2:19½; Driver, 2:19½; Amy, 2:20; Huntress, 2:20½; Powers, 2:21; Sweetness, 2:21½; Unolala, 2:22½; Volney, 2:23; W. H. Allen, 2:23½; Trio, 2:23½; Frank Wood, 2:24; Carrie, 2:24½; Volunteer Maid, 2:27; Lady Morrison, 2:27½; Dexter, 2:27; Mary A. Whitney, 2:28; St. Remo, 2:28½; Prince Arthur, 2:29; Louise, 2:29½, and Goldsmith's Abdallah, 2:30. Fifteen with records better than 2:25, and five with records better than 2:20.

In looking over Volunteer's list many memorable performances will be recalled to the readers' mind. When Driver was in active service no gamer nor truer horse ever went through the Grand Circuit. Bodine was a great horse in process of formation, and Gloster had a brilliant career cut short by the Great Reaper. Huntress, in addition to her fast harness record, has an unbeaten mark of 7:21 for three miles. Goldsmith's Abdallah has taken a place in the list of sires, and Sweetness is still on the turf in California.

As a transmitter of the trotting gait, Volunteer holds a high rank. His son, Louis Napoleon got Jerome Eddy, 2:16½, and Spinella, 2:30. Young Volunteer got Jersey Boy, 2:21½. Hamlet sired Leotie, 2:25, and Brookside Flora, 2:29. Highland Beauty got Rockton, 2:25½. Goldsmith's Abdallah has Little Miss, 2:26½; Dictator, 2:27; Hickory, 2:27½; Dutch Girl, 2:27½; and Alexander, 2:28½, to his credit. Admiral has two daughters, Huntress, 2:28, and Sister, 2:29½, as a four-year-old, in the list. Another son, Chicago Volunteer, got May H., 2:29½. Of the grandsons, Highland Boy got Gloster, 2:23, and Alexander got Silas Wright, 2:23½.

Volunteer's daughters make a good showing as brood-mares of the Hambletonian line. Amelia C., 2:21½; Blackwood Prince, 2:23; Stephen G., 2:23½; Goldenbow, 2:27½; Valiant, 2:28½, and Eusign, 2:28½, are all out of daughters of this eminent sire.

The demand for Volunteer mares exceeds the supply. One of Kentucky's most estate breeders a year or so ago came North, and returned with a number of Volunteer fillies, which he will breed to approved sires. The product will prove trotters or wise selection has nothing to do with the science of breeding.

Volunteer is no stronger to show rings, having been repeatedly exhibited at county fairs, and at the New York State Fair received the highest award, the Society's gold medal. As a turf performer he has had no experience, but trotted a trial to wagon in 2:31½. He stands nearly sixteen hands, and is a perfectly sound horse without vice orblemish.—N. Y. Sportsman.

Trotting in Australia.

At Elsternwick Park, May 3d, two trotting races were on the card which are summarized as follows:

Match for 100 sovs. Pair horse teams. Two mile heats. Best two in three.
P. G. Dixon's Maid of Mona and Sylph.....(Brooks) 1
F. Robbin's Brown Hawk and Sparrow Hawk.....(owner) dist.
Betting: 5 to 4 on Dixon's team. At the start the favorites got well away, and excelling their opponents at all stages of the race, won with ridiculous ease, the Hawk being distanced. Time—6 min. 17 sec.
Free-for-all-trotters or pacers, a purse of 50 sovs. added to a sweepstake of 2 sovs. each. Two miles. One event.
T. N. Curnow's ch h Honesty.....(H. Barr) 1
P. Brady's g g Leithamstead.....(J. Brady) 2
J. A. Robert's g h Len Rose.....(M. Brooks) 0
J. Mulline's h g Oliver.....(Mullins) 0
Betting: 5 to 4 against Honesty, 2 to 1 Leithamstead, 4 to 1 the other.

The lot were dispatched to an excellent start, but almost immediately Oliver broke, and Honesty assumed the lead, Oliver being second and Len Rose third. As they rounded the turn Honesty increased his lead of Oliver, whilst Len Rose and Leithamstead dropped further to the rear. At the last corner Oliver began to move up to Honesty and overtaking the latter the pair gave the spectators a real treat by racing neck and neck to the judge's box, where, however, Oliver again broke. Leithamstead soon afterwards passed Len Rose, and plodding on steadily also gave Oliver the go by, but Honesty, who was pacing beautifully, was not to be caught, and although Leithamstead drew nearer towards the finish, the chestnut trotted splendidly to the end, and won hard held without having broken pace during the journey. Oliver was third and Len Rose last. Time—5 min. 13½ sec.

The Turf in Australia.

The Autumn meeting of the South Australian Jockey Club began at Morphettville Course, Adelaide, on May 10th, with bad weather and heavy track. The following are the principal events run:

South Australian Stakes—Of 20 sovs. each, with 100 sovs. added. For two-year-olds. The second to save his stake, and the breeder of the winner to receive 30 sovs. Seven furlongs.
Mr. H. Tothill's br f Gratitude, by Countryman—Serenity, 110 lbs. 1
Mr. H. Tothill's h f Ravine, by Talk o' the Hill—Wonglare, 109 lbs. 2
Mr. C. W. Bowman's br c Lavington, by Countryman—Nancy, 112 lbs. 3
Time—1:32½.

Betting 6 to 4 on Gratitude. Lavington led on sufferance to the straight, where Hales brought the favorite up, and won in a canter by two lengths.

St. Leon Stakes of 20 sovs. each, with 150 sovs. added. For three-year-olds; second to receive 50 sovs., and third 25 sovs. One mile and three-quarters and 132 yards.
Mr. Fleming's ch c Hurricane, by Countryman—Serenity, 122 lbs. .... 1
Mr. Thomas Cowan's h c Killarney, by Emulation—Miami, 122 lbs. .... 2
Time—3:24½.

Betting.—3 to 1 on Hurricane. After allowing Killarney to lead for e mile and a half, Hurricane passed him with ridiculous ease, and romped home hard held.

Goodwood Handicap of 10 sovs. each, with 250 sovs. added; second to receive 50 sovs., and third to save his stake. One mile.
Mr. J. Whittingham's ch c Ironmaster, by Tuhai Cain—Coquette, 4 years, 96 lbs (carried 98 lbs)..... 1
Sir Thos. Elder's h c Bassanio, 4 years, 108 lbs..... 2
Mr. G. H. Read's c c Country Boy, 3 years, 89 lbs..... 3
Time—1:43.

Fourteen started.—Betting.—4 to 1 each against Lord Wilton, Ironmaster and Royal Irishman, 100 to 14 against Creswick, 100 to 12 each against Madge, Ironhand and Countryman, 10 to 1 against Country Boy.

To a wretched start the flag fell after several attempts, and Royal Irishman, Dutchman and Ruby jumped away with the lead, Ironhand and King of the Vale being almost left at the post. At the back of the course the order was Dutchman, Royal Irishman, Bassanio and Shylcock. At the far turn Ironmaster came through his horses and led into the straight, Bassanio and Creswick being his immediate attendants, with Royal Irishman close up. Entering the straight the big chestnut increased his lead to three lengths, and Royal Irishman and Dutchman dropped back beaten. Bassanio finished gamely under the whip, but could never again get on terms with Mr. Whittingham's colt, who won hard held by three lengths, Bassanio second, Country Boy third, Creswick fourth, King of the Vale fifth, Countryman sixth, Dutchman and Shylcock a long way off.

Adelaide Cup—A handicap of 2,500 sovs. First horse, 2,000 sovs. and a gold cup, value 100 sovs. (the gift of Sir Thomas Elder); second horse, 300 sovs.; third horse, 200 sovs. One mile and five furlongs.

Mr. J. O. Inglie's h h Malva, by St. Albane—Edella, 4 years, 126 lbs. .... 1
Sir Thomas Elder's ch m Conjecture, 4 years, 87 lbs. .... 2
Mr. J. A. Lang's ch h King of the Vale, 4 years, 107 lbs. .... 3
Time—2:53½.

Fifteen started. Betting—3 to 1 against Conjecture, 4 to 1 each King of the Vale and Colston, 10 to 1 Claptrap, 100 to 8 each Sting, Country Boy, Little Sister, and Nicholas, 100 to 7 each Melua and Creswick, 100 to 5 each Lancaster and Fryngpan, 100 to 4 Royal Irishman and Ned o' the Hills, 100 to 3 Lord Wilton.

After some delay, caused by the fractiousness of Ned o' the Hills, the fifteen horses were dispatched to a fair start, Conjecture, Sting, and Royal Irishman getting away first. The filly was at once kept in front, and raced past the stand with a clear lead of Lancaster, Ned o' the Hills, and Creswick, whilst Melua, Claptrap and Little Sister were running last; these positions were maintained with but slight alteration all round the course. Neering the straight, Cletrap, Little Sister, and Melua commenced to thread their way through, while Sting, Colstoun, and Royal Irishman had dropped back last. Conjecture raced into the straight in advance of everything, and looked all over a winner, till Melua, who appeared to drop from the clouds, came with a wonderful rush, and, catching Sir Thomas Elder's filly a couple of hundred yards from home, beat her, after a sharp set, by half a length, King of the Vale, two lengths off, third, Little Sister fourth, Nicholas fifth, Ned o' the Hills sixth, then came Fryngpan and Claptrap, while Sting, Colstoun, and Royal Irishman finished absolutely last.

Sire's Produce Stakes.—Of 10 sovs. each, h. ft., added to an inscription of 20 sovs. each from the owners of the following sires—Gang Forward, Countryman, Winterlake, and Pride of the Hills, and 100 sovs. from the South Australian Jockey Club. For two-year-olds. Colts, 122 lbs.; fillies, 119 lbs.; no allowance to geldings. Three-quarters of a mile.
Sir Thos. Elder's h c King of the Gipsies, by Gang Forward—Black Grey.....(Rawlings) 1
Mr. W. Blacker's ch f Sandal, by Winterlake—Instep.....(Bales) 2
Mr. C. W. Bowman's br c Lavington, by Countryman—Nancy.....(O'Brien) 3
Betting—2 to 1 on Sandal.

King of the Gipsies led from the start and won rather cleverly by three-quarters of a length. Time, 1:39½.

Pure Blooded Morgans.

An English Cleveland Bay Society proposes to admit to registry all horses with three Cleveland Bay crosses. By so doing, they may help to restore that blood to its original peculiarities and excellencies. Horses often transmit excellencies in far greater proportion than the blood they possess. A small bit of the old dough may raise the new baking, which would be "sed"ly dead without it. But three recent crosses may give but three thirty-seconds of the blood. People often talk about "pure blooded" animals with very little idea of what they are saying. A very noted writer speaks of Young Morrill as "nearly a full blooded Morgan," and gives his pedigree as follows:

Sire, Morrill, by Jennison, by One Eye, by Bullrush, by Justin Morgan.
Dam, by Locke Goss, by Sherman Morgan, by Sherman, by Justin Orandam, by Gifford, by Woodbury, by Justin.

Three of the chief lines of his blood come directly from old Justin. If only the four did, how pure he would be. Let us see! Bullrush was a half bred; his son One Eye, one-fourth; his son Jennison, one-eighth; his son Morrill, one-sixteenth; and Young Morrill gets from him one thirty-second of Justin's blood.

From the sire of his dam, Young Morrill gets (Sherman, ½; Sherman-Morgan, ¼; Locke Goss, ¼; Dam, 1-16); another thirty-second of the blood. From his Grand Dam he gets (Woodbury, ½; Gifford, ¼; Grand Dam, ¼; Dam, 1-16); another thirty-second, making in all three thirty-seconds of Justin's blood.

There was but one full-blooded Morgan—Justin Morgan himself. His colts were half-bloods. When two of these were mated their colts were half-bloods. If the half-bloods were bred out of the Morgan line their progeny were ¼; the next cross ½; the next 1-16; and the next 1-32 of the original blood; and this is as large a proportion as can be traced in most of the so-called "full-blooded Morgans." When they were bred in and in, often these proportions were increased one-half, or that horses of ¾, ¾-16, and 3-64 were produced. In some cases, 21-64 of Justin's blood are still preserved.

But this is not the proportion of the characteristic of the stock that is transmitted. A colt of the second, third, or fourth generation—¼, ¼ or ¼ Morgan—seemed to be nine-tenths Morgan. When two of these were coupled together the progeny seemed to be all Morgan. Moreover, the two principal elements in the production of Justin Morgan—the best of blood and the herdest of work—were producing similar stock in all New England. Twenty-eight Arab sires were imported during the first fourth of this century, and probably not one of them but paid for all he ate by hard work. Wherever a working Arabian is crossed with a Morgan there is no deterioration of blood.

So of certain other crosses. Gifford's dam was of the same blood as Justin. Black Hawk's dam, by a son of imported Shark, dropped as fine a colt to Sherman as any of her Morgan rivals. The daughters of Hill's Sir Charles, by Duroc, (sire of Eclipse), by imported Diomed; dam of Sir Charles, by Plato, son of imported Messenger, dropped as fine colts to Black Hawk as did the Morgans.

Gifford and Billy Root, Black Hawk and Granite State were perhaps not surpassed by their renowned ancestor. And in the multiplied crossings of Morgans with each other, and with Arabs and other congenial blood, there has risen a race of horses remarkably uniform and fixed in intelligence, docility, form, style, capacity, endurance, health, longevity, end mental and moral character, which are as well worthy of the name of a distinct breed as are the Devone or the Merinos. They are now more numerous than ever before, and are known and prized in every part of the land. Many of them are larger, fleet, and more saleable than the first of the etc. etc. They will probably travel, before their own weight, more miles in an hour, a day, a month, or a year, than the same number of horses of any one stock on the globe.

Many of them are taking on size as readily as Arabs; and are already over 16 hands in height and 1,300 lbs. in weight, and promise soon to add two inches and another hundred pounds, and so become the favorites of all lands—as they now are of all the regions so fortunate as to possess them. Even in trotting a mile or two, they hold their own well. Every trotting register has added to their repute, and the recent "List of the Sires of the 2:30 trotter," has shown such a proportion of Morgans, as has astonished those who were not informed. Of the blood classed as "Unknown" which it has been the fashion to assign to the Messengers, much is traced to the Morgans, and perhaps more will be found to lead to that direction.—Prairie Farmer.

Latonia Notes.

The following notes are extracted from the Covington letter of "Broadchurch," the commissioner of the New York Spirit:

When it is stated that only one favorite was successful on the second day, and that the result in the great Hindoo Stakes was actually sensational, it can readily be inferred that the afternoon's sport was of the exciting kind. Extraordinary interest attached to the stake in question. The upshot was naturally involved in considerable doubt, as it afforded the first appearance this season of the big son of Great Tom, General Harding. Besides, there were a couple of dark ones, one of them the daughter of the famous Mollie McCarthy, and the other with a high private reputation. In addition, there was Buchanan, ornamented with blinkers, suggestive of at least a possible bolt. With so many peculiar contingencies attaching to the contest—Harding's first race, Buchanan's uncertainty, and the natural haze surrounding a couple of green ones—is it not strange that an animal with the merits and achievements of Andrain should have been so signally overlooked? He had won the Blue Ribbon at Lexington, and was placed in the Derby and Clark Stakes at Louisville, yet in the auction pools the odds were over 10 to 1 against him, while the untried Templehof often sold over him.

In looks there was no discount on General Harding. He did not appear too high, nor yet overtrained, and the fact that Murphy was to ride him made him a favorite, but not over the field. Stoval, reinstated in the forenoon, had the mount on Buchanan. Andrain never looked better, maybe not as well, and he had as pilot the same colored boy, Fishburn, who rode him at Lexington and Louisville.

Evidently, Murphy's orders were to make a waiting race, as Harding was taken in hand after the flag fell, and trailed the lot for the first half mile, Buchanan just ahead of him, Fallen Leaf being in the van leading the pack, Templehof second. There was very little change in these positions for nearly a mile, the California filly still gallantly showing the way. Near the half-mile, where the start was made, Murphy moved up in the ruck with Harding, but in doing so he was seen to be driving, and, as he galloped very little, a shout went up that Harding was beaten. Sure enough, in going round the last turn, although urged to the utmost, he failed to improve his position, and was already vanquished and out of the race. At this time Fellen Leaf was leading by an open length, Templehof second, Buchanan slowly and surely meandering his pace, followed by Andrain. When the straight was once entered Buchanan set sail for the lead, and at the furlong pole he had his head in front, Fallen Leaf second, Andrain steadily moving up on the inside next the rails. Midway between the furlong pole and the string Buchanan had the best of it by fully half a length, and a yell went up, "Buchanan wins." In a few strides more he apparently altered and swerved a trifle to the outside, and just then Andrain, running strong and game, nipped both the filly and Buckden colt a few lengths from the wire, winning just a passable race by a head, Fallen Leaf a neck before Buchanan. Harding was fourth three lengths back, Joqnita fifth.

Very nearly three-quarters of an hour was spent at the post in the five furlong dash for two-year-olds, some of the youngsters being fretful and unruly. The California colt, Rapido, jumped off with a good lead, but he gave it up on the stretch, and Lady of the Lake and Princess Bau had it all to themselves in the struggle to the string, the former getting there first by a neck.

Blood will tell, as was seen in the case of Fallen Leaf, the daughter of Grinstead and Mollie McCarthy. She illustrated her royal breeding by vanquishing the assumed best three-year-olds in the West in her first essay on the turf.

The finish was quite close between John Ferg, Kyle, and Swiney in the mile and a furlong, the first named winning by a head. Nellie Peyton was made a slight favorite, but she hardly ran up to her Lonsville form.

E. J. Baldwin's California stable is quite strong, both in numbers and material. Fallen Leaf, Gano, and Lucky B furnish a pretty formidable trio. There are other good ones in the string.

The citizens of Downey, Los Angeles county, have determined to purchase twelve acres for a race track, mainly for training purposes. The enterprise will be in the hands of a company.

Sacramento Race Course.

The few minutes on the track at Sacramento, during our late flying visit, were altogether too brief to obtain anything like a knowledge of the improvements made this season. It was long enough, however, to prove that a vast deal had been done, and, from the cursory examination, well done with a few exceptions. Courtney drove us from Rancho del Rio and around the new course. When there has been such a manifest bettering it may appear invidious to find any fault, and yet we think that the engineer in charge has given too much slope to the turns, and the stretches would be better if, in place of so much declination from the outside to the inner, there should be only grade enough to carry off the water. The throwing up of the turns, beyond what is necessary to keep a sulky from swinging at the fastest pace of a horse, brings an undue strain on the limbs, and when the slope is continued all the way around there is no chance for relief. Racohorsos are more prone to "change legs" when rounding a turn than when running on a straight line, and this comes from a desire to relieve the limb that has suffered from the strain. But this defect will remedy itself. As the track wears the loose soil will be carried towards the lower side, and the action of the scraper will also aid in reducing the grade. It was probably owing to the heavy rains of the week; before that the natural soil appeared so firm, and that driving on it when moist had given consistency. It seemed firm enough without the coating of clay, but as the universal voice of those who attended the late meeting was in favor of the application it was an urgent necessity. Still we imagine that it would be a good idea to leave a portion on the outside in its natural state so as to give soft footing for those who are inclined to tender feet, and that is a large portion of the iron-tortured of the trotting tracks. We shall make a visit to Sacramento, especially to note what has been accomplished, as it is evident that the improvements are of great benefit and in the main judiciously planned.

The programme of the Santa Rosa Fair Association will be found on our advertising columns this week. It reached us too late for extended notice in this issue.

CRICKET.

The Americans in England.

The following is Howard McNatt's letter to the *Sporting Life*, written under date of May 26th:

We have at last arrived upon the battle ground. The American cricketer has proved himself a first-class sailor. As a nautical adventurer he is a success. Leaving New York, May 17th, on board the great steamer City of Rome, we steamed away slowly, accompanied by a host of friends on board the tug Delaware. The good-bye was a most enthusiastic one. There is a peculiar magnetic force in such a send-off. As we looked over the side and for the first time really comprehended the warmth of feeling entertained toward us by those on board the tug, personality was forgotten and the pure cricket spirit within each of the team warmed him with a giant's purpose and strength. They left us far down the bay, but we watched them out of sight, sat down upon the deck to quietly think and talk together, and then unanimously agreed that Philadelphia girls were gems of the purest crystal. By lunch time a transformation had taken place. The decks were lined with steamer chairs and promenaders made the scene a most interesting one. The boys had donned their fatigues uniforms, and had the fair ones who an hour before waved their hands to stylish evening suits and Derby hats come again to say how voyage, their bright eyes must have looked sharply to discover and recognize us. Such an array of caps and suits, yet the consciousness that a sea voyage, with its delicious indolence was before us, made the nondescript apparel a most pleasant and picturesque sight. The general make-up of the team we have been repeatedly told was English, extremely so. One lady from London mistook us for a company of Oxford Scientific Collegians. Certainly a glance at the tanned faces would warrant the belief that outdoor air and sunshine had been at work there, while clothes could not conceal that peculiar tension of muscle and sinew characteristic of men in athletic vigor.

We have been from the very first objects of interest to our fellow passengers. Pardon the self-consciousness, but when one is called upon to answer questions *ad infinitum* regarding himself and friends, when he is arrested at every turn and compelled to deliver an eloquent harangue on every conceivable point connected with cricket, after such an experience, self-consciousness seems pardonable. The extreme youth of a team expected to cope successfully with English cricketers, many of whom, as we know, are of almost Herculean build, was commented upon with all sorts of opinions. One man thought we should excel in the very essence of good cricket—quickness at the bat and in the field. Another disdainfully surveyed the group and said, "Want more beef." On board were a number of Scots, bound for Edinburgh, who proved very friendly and reliable. Captain Newhall suggested a tug of war to take the kinks out of our muscles. Having pulled several times among ourselves we were about stopping, when Pipton, the tallest Caledonian specimen, said he would like us to select six from our number to tug against a like number of his friends. Though tired, we agreed. Ropes were stretched across the deck as braces for the first man on each side, and the war commenced. Our fellows wore Brown, Law, Thayer, Newhall, Stover, and MacNutt. The Scots were really a powerful set, judging from appearances. By weight they must have been our superiors fifteen pounds in the man. Word was given and the old rope straightened out like a bar of steel. If you ever saw genuine Yankee muscle that was the time. In less time than it takes to tell we had them pulled completely across the

line and wondering how it was done. Again they tried, but this time our fellows took it quietly, as if it was a sort of off day, yet over they came as before, in a heap. We changed sides. They pulled that rope till their eyeballs stuck out and you could hear their teeth grit. In vain! Philadelphia boys were superior to Scottish gristle. They wilted. All sorts of fun kept the waking hours delightfully lively. Foot races, acrobatic feats with all sorts of extempore horizontal bars and pedestrian feats sent the blood circulating through the system. Considering that seven laps of the saloon deck made a mile it will be seen that there was plenty of room upon the mammoth ship. The chief exercise, however, was down in the saloon itself. "The Assyrian came down like a wolf on the fold" expresses it mildly. Duffy, the steward, grinned at the first day's attack. His smile three days later, when no symptoms of sea sickness had appeared, had changed to a cadaverous, tired look, which spoke of his mad chase to and from the pantry. We yelled at him, "Good-bye, Duffy," as we left the ship's side yesterday, but he could not answer, he was completely knocked out. If the Anchor line made money on our passage the steamship business must be a bonanza. We usually ate the bill of fare straight through and then wandered upward to see what the deck steward had extra for the sick. The passage was a mild one, but one day proving trying to land educated diaphragms.

One word for our old Philadelphia friend Billy Sweatnam. Haverly's Minstrels were on board going to London. Billy is the shining light of this troupe. His voice has lost none of that inimitable darkey pathos, and when he sang "Little Ah Sid, the Chinese Kid," for our benefit one night, I feared the boys would not live to see Liverpool. He is a most thorough and refined gentleman at all times, and many an interesting hour have we spent listening to his humorous descriptions of events in his career. There were two entertainments given on board. One of these, by Haverly's, netted thirty-six pounds sterling. Another, by amateur singers, brought fourteen pounds; both sums being booked for the Orphan Asylum of Sailors' Children at Liverpool. With such a variety of good-natured dispositions and considerable musical talent of our own we never needed any stimulant for our spirits. I have often looked at the boys sitting in a group and failed to discover the trace of a trouble upon a single face. If there was not a funny story being told, we were laughing at the one told yesterday, and so forever merry. As to form, though a week on board many have added flesh to the hardened sinews, it has produced no unfortunate results. The men are in the finest conceivable condition. When E. W. Clark and Chas. Newhall met us last night at the Customs, they instantly remarked our good condition. Having secured beautiful rooms at the Grand, we got out to-day for the first time to practice at the Liverpool Club grounds. A week's hard work with Flowers and Peale will take away all traces of surplus flesh. On Saturday we leave for Dublin, and then the war has commenced in earnest. This morning the boys are trying to buy the town, and a deluge of small parcels in the office shows they have made a good start.

There is much talk among cricketers here regarding the set-back Marylebone gave the Australians last week. We heard it first at Queenstown, at midnight, and enjoyed it hugely. Yet we remembered a June 16th that is still ahead, when some Philadelphia boys must march up to Lords and put on their flannels. If they make 481 against our trundlers, write me down a poor one.

The Trophy Match.

The first match for the trophy presented by W. Greer Harrison took place at the Olympic Grounds, Oakland, last Saturday between the Occidents and Merions. The Occidents won the toss, and wisely determined to defend the wickets. Hill and J. Mathieu started the bowling, Carr and Waterman handling the willow. The former was soon caught, however, and Purdy, the new comer, just broke his egg when he skied one which was gladly accepted. Bristow, after making two runs, sent one back in the willing hands of the bowler, and Sanderson, the next man, was just getting well set when he was stumped, merely through his own carelessness. Campbell joined Waterman, and both men hit the bowling in every direction, and increased the score very rapidly. The Merions tried every manœuvre to dispose of the batsmen, but without avail. Campbell at length was run out, having played a dashing inning for 25 runs. The next men were soon dismissed, leaving Waterman to carry out his bat for the splendid compilation of 51 runs, made by steady and skillful play. The long grass was instrumental in losing a great many runs for the veteran Philadelphia, particularly as he played unusually vigorous at times. This is the longest score yet made on these grounds. Upon retiring Waterman received quite an ovation. The Merions started in with the long score of 97 to get to win, but as the team was a very weak one, they did very well in pulling together 39 runs. Creighton hit freely for his contribution of 14. The Occidents thus winning the first match in the trophy series by 57 runs. The Merion fielding, with one or two exceptions, was up to its usual standard, but as all the leading bowlers of the Merion Club were absent the exceedingly easy victory of the Occidents is accounted for. The Occident bowling was excellent, particularly that of Cookson, but their fielding was probably worse than usual. Barney Benjamin, although taking part in the game, was unable to bowl, owing to sprained shoulder. The result follows:

OCCIDENTS.	
Waterman, not out.....	51
Carr, c Barney Benjamin, b Mathieu.....	2
Purdy, c Ben Benjamin, b Mathieu.....	1

YACHTING.

Last week a lot of young men started in the *Thetis* for Saucelito to dine at the club house. This much they accomplished without any damage to life or limb, or injury to the vessel. Dinner over, after congratulating each other on their seamanship, and highly elated at their success, they started for home at about 11 p. m., in high spirits, doubtless thinking of challenging the *Aggie* ere long. But alas for their recently acquired confidence! By some unaccountable mistake of the powers that be, a strong ebb tide was running and there was not a breath of wind, and the vessel in consequence went rapidly past point after point, and as they seemed to forget that the boat was fitted out with an anchor, they found themselves at sea (in more respects than one, we opine). According to their version they reached eighteen miles off shore, quite a long stretch for the ebb tide to make, and after suffering all the torments of *mal de mer* finally got back to town the following evening, sadder, but oh, how much wiser. The Custom House rejoices that two of its leading lights have been returned.

The Fourth of July will be an active day in sailing circles. There will be the Santa Cruz trip, of which a brief outline has appeared in this paper, then the Napa cruise of the San Francisco Club, which is arranged for as follows: The yachts will start on Thursday, the 3d proximo, after business hours, and will rendezvous at Vallejo and remain there till next day, when they will proceed to Napa. On the night of the 5th they will tow to Vallejo, and sail from there home on Sunday, the 6th. As all the large vessels intend to go to Santa Cruz, the fleet will hardly have so many club vessels as usual, but as a number of outside yachts with parties on board have made arrangements to go, the fleet may be of sufficient size to make a success. Lastly, but by no means least, in a point of interest to the participants, will be the regatta of the Master Mariners' Association. As nearly every captain of bay and coasting craft are members, a full list of entries is assured, and as this is to be the first regatta for many years, we expect a good deal of enthusiasm will be manifested.

Last Sunday, as if to compensate for the disagreeable weather of the week previous, was all that could be desired from a yachtman's point of view, that is for cruising. Most of the yachts taking advantage of the smooth sea and ebb tide in the morning, went outside and came back with the flood. Among these were the *Fleur de Lis*, *Nellie*, *Azalene*, *White-wing*, *Eva*, *Lolita* and *Mollie*. As they all started out at different times, and got pretty well scattered on the ocean, there was very little chance for any scrub racing, and the vessels returned in the same desultory manner in which they had gone out.

An article appeared recently in one of the dailies, speaking of a prospective race between the *Halcyon* and *Lurline*. We are creditably informed that the owners have taken no steps in the matter nor have even as yet contemplated it. When Mr. Tevis had the *Halcyon* built she was made as nearly as possible the same length of the *Lurline*, his idea being that there should be no question of time allowance to come between them in the event of a race to the Islands, but that was the amount of the racing idea and as far as it ever got.

The Ship Owners and Merchants' Towboat Co. gave an entertainment at the S. F. Y. C. House, last Saturday, which was thoroughly enjoyed by the participants. The daily press informs us that the *Chispa* saluted with her gun. As "Gutte and his gun" has become a catch phrase among the yatching fraternity, *Cela va sans dire*.

The *Magie*, with a small party on board, has been "up river." She left here Monday week at about 11 o'clock, and went to Napa. She beat out of Napa creek the next day and proceeded to Antioch, where she remained over night, and the next evening made Stockton. She reached home again on Sunday afternoon. The *Spray* is expected home from the same place to-morrow.

The prospects are that the *Ariel* will not much longer lend beauty to the landscape off the Pacific Yacht Club grounds, as parties from Mexico are negotiating for her purchase, to be used by them along the Mexican coast, with the probabilities of a consummation of the same.

The *Rambler* went to Vallejo last Saturday and returned Sunday. The wind was fair enough to enable them to lay from the Mare Island light past Pinole without tacking.

The *Lurline* remains passive at her moorings off the San Francisco Club House. We hope when the Messrs. Spreckels return she will be seen oftener under sail.

POULTRY.

Feeding Chickens.

One of our correspondents wants to know why chicks should not be fed soon after hatching. Simply because they don't need food. The yolk-sac which is absorbed just before leaving the shell affords sufficient nourishment for the first twenty or twenty four hours. After beginning, feed often, say five or six times a day for the first month or six weeks; then the number of meals per day may be gradually diminished, until at ten or twelve weeks they will thrive on three meals per day. Feed early and late. The first feeding should be as soon as possible after daylight, the last as late as they can see to eat. When old enough to swallow the kernels, let the last feed at night be wheat or cracked corn.

Feed regularly—not their breakfast at five o'clock one morning, seven the next, and the other meals whenever you happen to think of it. Chicks standing around two or three hours at a time chirping for food are not remarkable for rapid growth.

Don't feed uncooked meal, sour food of any kind, or sloppy food. Chicks may live—some of them—on such stuff, but they will not thrive. It is some trouble to cook and prepare the right kind of food for a large number of little chicks, but "whatever is worth doing at all is worth doing well." Chicks that are fed generously and regularly on fresh, wholesome, cooked food, for the first three or four months, will make better breeding stock, better layers and better market fowls than those that worry along through chickenhood on scanty rations of raw meal and water.

Don't waste food by throwing it on the ground in the dirt, or by feeding so much at a time that the greater portion will be left. I know poultry raisers who in that way waste more food than the chickens eat, and then grumble because it "costs so much to raise chickens." Feed each time what they will eat up clean and no more. A few spoonfuls of chicken food may seem like a small matter, but it is the close looking after these small matters, the stopping of a little waste here and a little waste there, that increases the credit side of the account.—*Prairie Farmer*.

## AQUATIC.

## LAPSTREAK IN NEW YORK.

The Oak Point Fiasco.—The Measure of the First-Class Scullers.—Peter-  
sen's Movements.—Personal  
References.

[Special Correspondence of the BREEDER AND SPORTSMAN.]

NEW YORK, June 9th.

The telegraph has already apprised you of course of the latest, but not the last, fiasco in which the irrepressible Courtney has figured. There was a good deal of feeling against Courtney last week when he refused to row on account of the rough water, but at that time there was really some excuse for his action. The course at Oak Point, about a mile and a half beyond Harlem Bridge, is very much exposed and between the fitful winds from the ocean and the ceaseless movements of large vessels, becomes at times quite turbulent. The tide runs out between the islands on one side of the course at such a rate that no sculler could cross the stream on a straight course. One never can tell when an eccentric current is likely to strike his boat and when this rapidly moving volume of water is swept by a breeze it looks very forbidding to the most enthusiastic sculler. On the 30th of May, when Courtney and Ross were to have rowed their match, the Oak Point course resembled the Long Bridge course, at San Francisco, on a blistering July afternoon. The course was full of "white caps" from start to finish; any sculler would have forgiven an oarsman for refusing to row in such water when his money was up and the contest was to be a fair test of merit. The public might have been equally considerate if any other sculler than Courtney had declined to risk his reputation on the waves. The sawyer from Cayuga had disappointed people so often however that the public had no mercy on him. When Ross appeared in his boat and professed his willingness to row, the rage against his opponent threatened to surpass the limits of peaceful indignation. The affair ended without bloodshed, however, and a postponement of the race was announced. On the next day the water was equally rough and the result was still another postponement.

Yesterday, (Saturday), afternoon an immense throng of people proceeded on foot, by steamers and in carriages to Oak Point, in faint hopes of seeing the whimsical oarsman from Cayuga actually engaged in a race. Very few people believed that Courtney would row, but such is the ridiculous and extraordinary faith in this oft beaten man's power that thousands were ready to risk another serious disappointment rather than let slip a single chance to see him row. The course at four o'clock, the hour advertised for the race, was very rough. It was heaving like the bar at the Golden Gate, but by one of those changes peculiar to Eastern weather and water, the wind subsided and in less than an hour the broad sheet was as level and sparkling as a sheet of glass. The grassy slopes that rise above Oak Point were covered with people and gay with flags. A large band played on the dancing platform, and hundreds sought admission to the grand stand. Everything was excitement in the expectation of a grand race at last between two crack oarsmen. The mental strain was only increased by a scrub race between George Gaisel, a sculler of the build of Austin Stevenson, and Fred Plaisted of San Francisco notoriety. Neither was in condition, and both steered all over the bay in a way that brought to the recollection of your correspondent the great wherry race at Long Bridge, between Tom Murphy and R. C. Lyne. Plaisted rowed very much with his head, which he kept jerking over his shoulder as if he wished to get rid of it. It certainly looked much larger than the head of an athlete in training should, though before he finished his third mile in the broiling sun it was considerably smaller. He came in half a dozen lengths behind Gaisel in about 26 min. 30 sec. The easily deluded public, strangely enough, did not cheer, being doubtless too much engrossed with speculations on the possibility of Courtney's being struck with a sand club, or saved in two before he could reach his boat. Their anxiety on the score of personal danger to the unlucky sculler from Cayuga was soon relieved by the announcement that he had skipped. The public received the news apathetically. They had prepared themselves to hear anything, and though the latest eccentricity was a new development of Courtney's resources it did not excite them. The newspapers state that there was a great display of feeling. There was nothing of the kind. The people listened in silence to the intelligence that the irrepressible heat was not to be found; then they laughed sardonically, and without more ado took their positions to see Ross row over the course, which he did in exactly 24 min. 30 sec. He ought to have done it at least a minute better, if he rowed as those who followed in the referee's boat say he did. So much for what the public saw.

There is no doubt there was a good deal about the match of which the public did not get a glimpse. The race was to be for an alleged purse of \$2,500, offered by Pilkington & Nagle, the proprietors of the Oak Point Grounds. It looks to a disinterested spectator as if there never was a cent on Courtney's side. He says he got nothing out of the affair, and was not going to row for nothing. From what I have seen I follow from the conclusion that the affair was arranged as follows: The Oak Point people calculating on large gate money said to Courtney and Ross, "You get in and row, and we will go share alike share in the receipts." There was a very large attendance, but a great many people did not pay. The grounds are poorly fenced, so that thousands must have got in free of charge. That there was dissatisfaction about the divisions of the receipts there can be no doubt. It is not impossible that Rose assured Courtney that he would let him win, and in that way induced the timid carpenter to emerge from his seclusion. That Ross meant to win, however, is certain, for his cronies were betting on him, and he trained as faithfully as if the \$2,500 were really up. Courtney, on the other hand, did all his training under the big oak in the middle of the lawn above the boat house. When he found that he would have to row on his merits he concluded not to row at all, and spent his days and nights praying to heaven it might everlastingly continue to blow a hurricane off Oak Point. On Friday he said to several persons that it was a hundred dollars to a cent that the race would not come off. When your correspondent saw him under the big oak on Friday he was engaged in the pleasant occupation of counting a large roll of greenbacks. "I want to see," said he, with one of his peculiar smiles, "whether I've got enough to take me home to-morrow, for home I'm going race or no race." He seemed not over well pleased at being found with so much loose money, and the suspicion was unavoidable that the bills had been just handed to him as a part of the programme. All the circumstances of the match, when regarded critically, exhibit a most fishy appearance.

In the history of rowing in Eastern waters, however, a crooked event is not particularly noticeable, as the large majority of oarsmen here seem to want a dead sure thing. They are anything but anxious for genuine matches, and have a fondness for gate money which is sure, in time, to injure the sport. Very few of them have any money behind them. Teemer appears to be the most confident, and is said to be always ready to put up his money on a match. Of this, however, I can only speak from hearsay. So far the only oarsman I have seen, who is really looking for a race for blood, is Gaudaur, of St. Louis, a man with very little reputation. Gaudaur's backer is Mr. J. A. St. John, gentleman of means, who takes a lively interest in boating, and is a thoroughly honorable sportsman. Believing that Gaudaur is a good man and only needs a fair show to get to the front, Mr. St. John has taken the French Canadian up and giving him a splendid opportunity to develop his abilities. During the Spring Gaudaur has been training on Creve-Coeur Lake, about twenty miles from St. Louis, and one of the most beautiful spots in the world for rowing. The cars take one to the lake in an hour, and smooth water can always be found there, the shores being high and well wooded and affording good shelter. The Metropolitan Boat Club of St. Louis has several boat sheds on the west shore of the beautiful lake, and from one of these Gaudaur trains. He is splendidly boated, and as he rows regularly three times a day is in fine trim. He is about Petersen's size, though not quite as powerful in the legs and arms as the California boy against whom he is likely to be matched. A match would be made immediately, but Petersen has neglected his training since he came East and cannot get into condition in less than five weeks, by which time Gaudaur will have come East to take part in the Boston regatta, and another big event at Calais, Maine. Petersen has also been unable to get a boat. Some time ago he ordered one from Ruddick, but that eccentric builder who greatly resembles Al. Rodgers, of San Francisco, in his habits, works on a system of his own. It is utterly useless to hurry him up, and except he is in the right mood he cannot be induced to do a tap of work. Out in California there is a belief that Ruddick would gladly give a boat for nothing to Hanlan or Ross, but the opinion is altogether erroneous. You can never tell to whom Ruddick will give the preference in work paid for, much less in presents. Last year he was building boats for amateurs and neglecting orders from the best professionals. All that is necessary at any time to prevent him from hurrying up an order is to send some oarsmen to his shop to talk to him. As long as any visiting sculler will talk to him the job on hand has to suffer. The other day Gaisel went down to see him, and it is reported here that during the two days of the New York scullers' visit there was not a single nail driven in Ruddick's shop. Petersen is at present in Boston trying what he can do to hasten the fulfillment of his order. The moment he can get a good boat he will talk business to the leading scullers here. He has been doing some training during the past week at Oak Point. His performances have been closely watched, and though he has not been properly boated, the critics have been much impressed by his tremendous physique and his free, fine style. There is no Eastern oarsman who shows the same action and power. Courtney declined to make a match with the Californian and none of the others in a hurry to meet him. They are equally scared of Gaudaur, whom they regard as far too good a man to fool with. Gaudaur has already challenged Teemer and Conley, and is willing to row Ross, but none of these famous scullers desire to accommodate him. The trouble about rowing Gaudaur, according to the idea of Eastern oarsmen, is that while Gaudaur's reputation is limited, his ability as an oarsman is first-class. He is determined to row to win, and the leading scullers, as before stated, like a sure thing on a division of gate money without taking any risk on stakes. As long as no body beats them, or only some man like Ross or Hanlan heats them, they are all right, but the moment a dangerous outsider like Gaudaur lowers their colors they can raise them no more. Petersen is on much the same category, only that his stock is higher than Gaudaur's on account of the way in which he beat Leo. Gaudaur fit, and well, can beat Leo, but it is very doubtful if he can lead him in the style of the Californian. Since his return to the East Leo has done no rowing, and is not looking well. The weather here is very trying on oarsmen, and so, in fact, of the fraternity look as a man should who is on the eve of a hard contest. I saw Hosmer the other day, and he looked more like a man on his way to the hospital than a rowing match. He is a little bit of a shrimp, with a mild blue eye distended to a great size, and a prominent nose turned to a fiery red by the combined effect of vichy water and a blazing sun. Talk about his ever winning the championship is sheer nonsense. He has neither the style nor the power of a champion, though he does wonderfully well with his limited capacity. Plaisted would give President Growney, of the Ariel Club, a hard race, though with his patent shirt and racing shoes on the president would, I think, be landed a winner after the first half mile. Ross looks the most formidable of the Eastern men I have seen. He is a powerful man, and has the appearance of being game, though Hanlan used him up pretty easily. He is about six feet in height, and rows at 150 pounds. He has a very firm jaw, a good neck and fair development of the back and legs. He rows very much like Leo, except that he straightens his arms when going for the stroke, something which Leo could never be induced to do. There is a good deal of lost motion at the end of Ross' stroke. He slides up very well and takes a good sweep as he goes back, but his recovery is not good. It is easy in looking at him to see how the trim built Canadian could row him down after a mile had been traversed. At no time is the Canadian outside himself, so to speak. He has always full control of himself, and has scarcely finished one stroke before he is forward for the next, though he does his work so neatly that the casual observer is likely to think him somewhat slow in his recovery. After seeing Ross row at his best I think Dan Leahy made a great mistake in not rowing him, as the Californian would have given him a splendid race. If Petersen should meet him this season the Eastern people will have a higher opinion of Californian athletes than they now possess. I think one fatal mistake made by all Eastern oarsmen is in copying Hanlan. A man rows as he is built, just as a man walks, or a horse, according to his proportions. Hanlan uses a very narrow spread of out-rigger and short sculls, and uses them to the best advantage because he is extremely powerful for his size and wonderfully compact. He is somewhat long in the legs but his back is short and very muscular. With the narrow spread of out-rigger he can take a tremendous slide and with his strength of back, legs and arms exerted together whip his sculls smartly through the water. It is no difficult feat for him to row thirty-eight strokes to the minute. Every other Eastern oarsman thinks he can do similarly, forgetting the fact that no man who rows is of the same build as Hanlan. Nearly all with the exception of Petersen and Teemer are of the long and loose constructed model. Ross is the most compact of these tall men and he is angular and rawnboned in comparison with Hanlan. Big as Ross is, he can-

not get his sculls through the water like Hanlan, and when going at his best cannot do much above thirty strokes to the minute with comfort. Courtney is the only man here who seems to have ideas of his own about what should entice him best. He is quite original, a fact which needs no further demonstration than his expediency for avoiding a race. He was to have rowed a new paper boat against Ross, who has a very fine Ruddick boat. He uses a roller slide and one peculiarity of his boat is that her forward two braces run from the wash-boards on the sides to the gunwales. The braces are about twelve inches long and are really part of the wash-board. The other ends are screwed to the gunwales so as to keep the boats from bending up the forward of the cockpit. Courtney is not as robust in appearance as Ross, and has neither the strength of legs nor arms that Petersen possesses. The eccentric sculler from Cayuga is really a thing of the past. The fact is he has seen his best day. He shows his age very plainly and what is more feels it. Talking to your correspondent the other day, he said, "I am getting on in years and new men are coming up all the time."

"Well you can row pretty fast yet can't you?" I asked.  
"Oh, yes! I can reel off three miles in about as good time as I ever could, but I can't row the first mile and a half as I used to when I was young."

In other words the Cayuga man thought his youthful vim was gone, and nothing is so essential to a rower as vim—except it be heart. Courtney does not look as if he had much vim, and there can be no question about the size of his heart. His rowing days are over, for he feels that he is himself no more. He told me that in his day, that is ten years ago, he was head and shoulders above any man that rowed. "Why," said he, "Hanlan could no more hold me than he could fly, but he's improved since and I've fallen off." This explains a good deal of Courtney's later exploits. He is naturally a nervous, timid man, but a good sculler. While he felt himself "head and shoulders" above any other oarsman, he was a hard man to beat, but as soon as he knew that a dangerous rival had entered the list, his spirit evaporated and his stamina was destroyed. From what I have lately seen I am convinced that he will not to-day row a square race with any first-class professional oarsman, and I am equally confident that all the noted scullers can beat him easily. There is talk of a race between Courtney and Ross, at Saratoga. One would think that the public had had enough of the Cayuga carpenter for the remainder of his days, but such is the inexplicable interest in all his crudeness that it is not improbable that thousands would journey a considerable distance to be again victimized by him. The end of his career, however, is at hand, for the belief is growing stronger that he is no longer a sculler of phenomenal speed, and when that becomes general he will have to make his living honestly by driving a plane.

LAPSTREAK.

## STABLE AND PADDOCK.

## Blue Grass Culture.

Cassius M. Clay, of White Hall, Kentucky, contributes to the *Germantown Telegraph* this dissertation on blue grass:

Blue grass, (*Poa Trivialis*), is English "green-sward," and nearly allied, if not the same, with the northern "June grass." The climate and soil of Kentucky has proved so favorable to this grass that it has assumed almost a new variety, being quite luxuriant and having at times a bluish green color. I have seen it on the northern lakes, at St. Paul, Minn., and as far north as 60 degrees at St. Petersburg, Russia. It does not flourish well, however, south of middle Tennessee, and does not succeed in a sandy soil because the stock pull it up in grazing, and it does not delight in much heat, doing best in cool, dry soils over limestone rock, in early damp Springs and Falls.

Seed.—The seed ripens here early in June, and is covered with a secure husk. It is gathered now with patent strippers running on two wheels with a large box and an iron comb attached. This box is emptied into some out-house, where it is stirred once or twice a day till it dries, avoiding too much heat, which destroys the vitality of the seed. In some of the Northern and Southern agricultural stations it was found that the per cent. of seed was very small that proved vital. There are several causes for this. Much of the seed is gathered by persons who are little conscientious about its value; who throw it at times into piles in the open grounds, when it gets wet and heats and spoils. Then those seed gathered in the husk are generally sold to seed-merchants, who clean them and then sell. As before said, this seed being easily spoiled is no doubt often injured by being packed in bulk in damp cellars. The safest way, therefore, is to take the seed in the husk from reliable growers and dealers.

Culture.—In earlier times when we had forests and equable seasons, blue grass could be sown in early Spring with oats or on winter wheat or rye; but our change of climate with early droughts makes it hazardous to sow in the Spring, when the seed may sprout but be killed in Summer. It is best to prepare the ground well and sow in the early Fall broadcast and simply roll the surface or use a drag, as the seed must by no means be covered too deeply. No grain should nowadays be sown with blue-grass, as the grass requires all the moisture the soil affords, and stranger grasses over-topping the young plants destroy them. Or the ground may be prepared in the Fall, in parks, the leaves raked off and the seeds sown in mid-winter, leaving them to take their own time for sprouting, as slight frozings will bury them sufficiently. If pasturage is desired a small quantity of clover and timothy may be sown with the principal crop, which first covering the ground and giving a bite to stock, will disappear in a few years, by the time the blue grass gets well set. But in all cases there should be but little grazing the first year, as the stock pull up the young plants with the tongue or teeth. When blue grass is the main crop, as it is with me and many others, it should be allowed to see before it is grazed much, and then always kept heavy on the ground to absorb the light rains and shade the roots. This I find from saving the seed, the crop being more valuable after the seed is gathered than ever before.

Weeds are rarely eaten by any stock, though sheep will use many of them. The pastures then should be cut over with the weed scythe before the weeds seed, leaving the grass below unharmed; after the weeds are thus somewhat subdued then steel hoes made for the purpose are best used, being about four inches wide and long in the blade; this will destroy sooner all the weeds than the scythe, as the hoes will cut up by the roots dock, mullein, plantain and many perennial weeds which it would be impossible to exterminate with the scythe. The iron weed, Canada thistle, blue nettle, and other weeds of long and vital roots, should be cut over as closely as possible several times a year, for no plant can long when its leaves (the lungs) are frequently or too often killed.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, etc.).

At Bird's Point.

The Gun Club of San Francisco held their medal shoot, at Bird's Point, on Saturday, although up to Wednesday evening it was undecided whether they would do so or not.

Table showing scores for various participants in the Bird's Point shoot, including names like Gordon, Ewing, Wilson, etc., and their scores in yards.

The first freeze-out match, \$2.50 entrance, Hurlingham Rules, followed. Nine tried their luck. On the eighth round the stakes were divided by the three with eight each, on account of the high price of birds.

Table showing scores for the freeze-out match, listing names like Havens, Babcock, Golcher, etc., and their scores.

Succeeding this was a second freeze-out contest, same conditions as those governing the prize medal match, with the following result.

Table showing scores for the second freeze-out match, listing names like Babcock, Havens, Ewing, etc., and their scores.

In this shoot Mr. Babcock showed up in his usual fine form, and made a very interesting contest with Mr. Gordon.

At the Same Place.

On Sunday a number of gentlemen fond of trap shooting met at Bird's Point for a match, and the occasion brought together a very choice lot of spirits, as will be seen by the scores.

Table showing scores for the Sunday trap shooting match, listing names like Brown, Jackson, Lambert, etc., and their scores.

The four with twenty birds to their credit shot-off for the fourth prize, (freeze out), and it fell to Mr. Tom. Pearson, with nine straight kills, by which time his competitors all dropped out.

At Colma.

The Lincoln Gun Club held its monthly medal shoot, at Colma, on Sunday, the attendance being very creditable to the Club.

Table showing scores for the Lincoln Gun Club shoot, listing names like Bruns, Heine, Edlar, etc., and their scores.

Table showing scores for the Lincoln Gun Club shoot, listing names like Cohen, Schendel, W. Norton, etc., and their scores.

Table showing scores for the Lincoln Gun Club shoot, listing names like Bruns, Heine, Edlar, etc., and their scores.

Messrs. Bruns, Heine, Edlar, Richter and Parke tied on eleven birds each, and shot off at three pair double birds.

International Clay Pigeon Tournament.

At the three-days' International Clay Pigeon Tournament cently held at Chicago, the following results were obtained, the match being open to all clubs of five members each, ten clay pigeons per man, single birds, eighteen yards rise:

Table showing results of the International Clay Pigeon Tournament, listing clubs and their scores in singles, doubles, and totals.

The Exeter Sportsman's Club, of New Hampshire, having made the highest score—68, out of a possible 100—took the cash prize, \$750.

The Turf, Field and Farm says: "The sportsmen in attendance at the International Clay Pigeon Tournament held a meeting at the Palmer House, Chicago, Thursday evening, May 29th, to draw up a constitution and by-laws for the organization of a National Sportsmen's Association."

Such movements as these which bring together the best men in the country, and make them acquainted with each other's opinions and convictions, cannot but do immense good at present in formulating public opinion, and giving us the legislation required in future for the preservation of our public game birds and animals.

A New Zealand paper says the annual report of the committee of the New Zealand Acclimatization Society contains the following paragraph: "California Quail and Pintail Grouse.—There has not been anything heard of the birds turned out in 1882, on Rockland's and Gladbrook's stations, Strath-Taleri, or at the Mataura; but as those in Lake Vincent, Waikonaia and Clutha counties have succeeded fairly, and which were turned out a number of years ago, it is probable the others will acclimatize themselves also."

If the birds mentioned have not survived and acclimatized we may be assured it is from natural causes, not the vandalism of amateur and professional poachers or lazy Indians.

The following from the Forest and Stream will hear remembering next Fall:

"A suit of the proper color (for ducks) can be made of cheap material from coffee sacks, which are just the color. I think the poor success of some duck hunters is undue movement on the approach of the flock, and too small time allowance ahead, for cross shots and over, for ducks rising from the water."

No Marauding Next Season.

Driven to extreme measures in maintaining the rights of property by the vandalism of the army of marauders, we hear of many large land-owners who have determined to stop general hunting over their grounds during next season.

By continuing our inquiries about the pheasants lately seen in the Uvas river hills we find they probably went from Mr. Hayward's place at San Mateo. It will be recollected that nine pheasants, five males and four females, out of a lot of sixty-five shipped from Japan, reached this city about two years ago, and were handed over to the State Sportsman's Association, who finally deposited them at Mr. Hayward's place.

Some of our readers thought we over-estimated the laughter of pigeons at our traps during the season, and the profit in raising them. The following paragraph of the experience in England will show our estimate if anything to be under the mark.

"During the discussion over the bill to prevent the shooting of pigeons from traps, which was defeated in the British House of Lords last month, it was stated that in the county of Lincoln alone pigeons to the value of over £30,000 are reared and sold annually for trap-shooting purposes, which after being shot, are sold to the poorer classes at from three to four shillings a dozen.

At this season of the year, hare are heavily in young, and it is deeply to be regretted that some gentlemen of this city have been fit to lower themselves by coursing the poor little animals while in this condition.

At Bear Valley last week, when on a fishing trip, Mr. Orr and a party saw any quantity of both that appeared to have no fear as the party came near them.

According to a Carson paper "Gov. Crosby recently caused a telegram to be sent to Hon. A. F. Burchell, District Attorney of Miles City, to use every effort to arrest the Indians who were slaughtering game near Virginia City.

Although the open season for hunting deer does not commence until the first of July next, the hide hunting vagrants, of Woodland, according to The Mail, are already out in the mountains to steal a march upon the honest portion of the community who obey the laws.

Dr. Tebtheta and A. Ackerman, both of Sacramento, have made a match at pigeon shooting. The match is to be at twelve birds and for \$20 a side. It will take place some time within a few weeks at Agricultural Park, and will not be in connection with any club shooting.

We understand Mr. Cunningham, of the San Bruno Hotel, will give a \$200 trophy to be shot for at his place. The time and conditions of the match have not been determined upon at present, but they soon will be.

The next Foresters' Club shoot will take place on the 22d inst., at Sacramento Agricultural Park.

## HERD AND SWINE.

## The Farm vs. Wall Street.

The recent financial disasters which have overtaken strong establishments and individuals, particularly in the east, but involving to some degree western interests also, must make the reflective farmer more than ever satisfied with the modest but safe character of his business. These banks and brokers and "speculators" were all reputed to be making large profits, compared with which the moderate returns yielded by capital invested in the farm seems insignificant. But they had to take large chances also, and now where are they? Money gone, credit gone, in many instances their good names gone, and involved in debts and losses from which nothing but commercial miracles can ever enable any one of them to emerge! There comes to the farmer no grand and sudden fortune but neither does there come to him those swift and sure financial wrecks which seem sooner or later to overtake nearly every individual who embarks his fortunes and energies in these deceptive and uncertain kinds of business. From the legitimate products of his labor, and from the gradual increase of his capital, employed mainly in his own business, the farmer's fortune is built up little by little, with a knowledge of the value of every dollar and a conscious conviction that it has been honestly earned. It is employed as it is earned in such a manner and invested in such a way that no panics can sweep it away. No exposure of "stupendous dishonesty," in any quarter, involves the safety of his capital, and he loses no sleep from fear of broken banks, misplaced confidences, bankrupt corporations, or worthless or shrinking stocks or bonds.

It seems sometimes, perhaps, as if the moderate returns from agricultural operations were too small, but after all, considering their security, there are no investments that in the end yield so well. Merchants and manufacturers may make money for a time, faster than the farmer, but sooner or later they are caught too widely extended in some part of stagnation in trade or over-production, and old houses—the pillars of the trade—sink into oblivion; their quickly-acquired fortunes disappear even more rapidly than they were accumulated, and leaving behind nothing beyond a harvest of bitter memories and blasted hopes. The capitalists seem to do better than the farmer lending his money at good rates of interest and taking his ease; but sooner or later there comes to him a time when he finds his securities have lost much of their value, or that he has over-stepped the bounds of safety and embarked in something which turns his dollars into ashes. On every side men are engaged in ventures and enterprises which bring them a world of care and anxiety, which excite high hopes, and are for a time seemingly prosperous; but in turn they all go to the wall. It seems only a question of time.

The farmer alone seems to have security. His gains are small, but they are sure. The vicissitudes of the seasons and the fluctuations of the markets, prosperous times and poor times, speculative periods and periods of depression, may come and go, they can only exert a temporary influence in increasing or diminishing immediate profits; but with prudence and economy these things never attack or destroy the capital which he has invested in his land and its equipment. Times like these should serve to cure the discontent with which farmers sometimes regard their occupation, and admonish them of the advantage of investing and using the accumulating capital on their own farms and in their own business, instead of interesting themselves in outside operations, as many are tempted to do, lending money, getting an interest in trade of one sort or another, or yielding to the delusive promises of speculation.

Be content with the farm and its legitimate business, for there is no other industry which will bring, and deserve, so much contentment and happiness, and no other avenue in which the farmer or his sons can hope, in the long run, to do so well. Broad acres and good live stock are banks whose shares never depreciate or fail to pay a dividend. Nobody's account is overdrawn, and nobody's confidence is misplaced or abused. The shareholder in such a bank can pass through life as free from care as falls to the lot of any human being; and, no matter whom he meets, need never have occasion to pull down the rim of his hat to conceal the record on his forehead.—*Breeders' Gazette.*

## Wooden Silos.

Dr. Manly Mills, in the *Popular Science Monthly*, makes the following suggestions on the subject of building silos: The first silos, as we have seen, were simple pits dug in the ground, and the soil thrown out was used to cover and protect the ensilage. In many soils these pits served but a temporary purpose; and the next step in their development was a lining of masonry to give the pits a permanent character. From the difficulty of keeping the water out of these pits, in many localities, silos of masonry were made above ground, and these at first were massive and expensive. The next step in advance, which quite naturally followed, was to substitute a movable cover of boards, with weights to give the required pressure, for the cover of earth which had been used in the less perfect form of the silo. As an air-tight inclosure was found to be the essential condition in the construction of a silo, lighter walls were made as a matter of economy, with good results; and even frames of timber, lined with boards or planks, were substituted for the expensive structures, with complete success. A halloon-frame of scantling, of suitable size, covered on the outside with matched boards, and lined on the inside with two thicknesses of one-inch matched boards, with a layer of tarred paper between them, thus securing a practically air-tight inclosure surrounded by a dead-air space as a protection against frost is, in the opinion of the writer, the best and cheapest form of construction. If the boards and timbers are saturated with hot coal tar, which can readily be done at trifling expense, the durability of the silo will be very much increased. From the fact that wood is not so good a conductor of heat as walls of masonry, it will be seen, from what follows, that wooden silos may have an important advantage over any others in preserving the ensilage, which in connection with the saving of expense in their construction, must have an influence in bringing them into general use.

Quality is the arbiter of price in all products which come from the farm, but it perhaps affects the price of butter to a greater extent than almost anything else which the farmer has to sell. There is no such thing as getting a first-class price steadily for butter of second or third grade. There must be no falling below the standard in color, texture, flavor, or the neatness with which it is put up, if the top of the market would be reached. Butter-makers should bear this in mind, and not be satisfied with producing anything but the best. The profit of the business lies almost wholly in this point, and for its neglect nothing else will atone.

## Salting Butter.

[John Gould in Canadian paper.]

It has been accepted without question for years that salt is the preservative agent in keeping butter; but when one considers for a moment that all poor butter is profusely salted, then there is another side to the question, and one perhaps worth considering for a moment. Butter is an animal fat, the same as tallow or lard, and why should we not salt them to give them keeping qualities? Oxygen, the "sharp tooth of time," it is true will after a while destroy lard and tallow, but why butter should deteriorate so quick even when preserved with salt is not so easy to understand.

If anyone has direct evidence that salt does keep butter they would confer a great favor upon the dairy public by publishing the methods of procedure, so that the dairymen of this country could avail themselves of its benefits, and so prepare their offerings that there would be about a half a billion pounds less of badly preserved butter for the consumers to reject, or eat with distorted faces.

It may be said that lard and tallow keep because they have been rendered, or extracted by great heat, and possibly if butter could be cooked, it too, would keep, but at the same time that we are arguing this we drop the salt theory and admit that salt does not keep the butter.

That salt has no power to keep or hasten the decay of butter is seen from the fact that salt and fats have no affinity for each other; mix them as we may they are yet salt and fats, the union being the same in principle as to mix salt and lard shot. Then what action does salt have upon butter?

Churn and work our butter as best we may, there are yet traceable findings of casein, buttermilk, and milk sugar. If these are left in the butter, the casein soon begins to ferment, the buttermilk changes to lactic acid, and the sugar also starts upon its natural changes. The result is that the ferment of the curd or cheesy matter gives off gases, just as it does in the unsalted cheese, and then we get off flavor, and lastly rancidity, not from the butter fats, but from this uncooked curd. In the process of cheese making, we cook the curd to render latent this very activity in developing gases, and the action of the rennet, with its digestive principle, also aids in holding this ferment—if it may be so called—in check, and the cheese cures, a principle which is not sought in the unsalted cheeses that have the active principle of the seven smells of cologne about them.

Now in butter we have no control of this caseinous matter, and the nearest we can come to it is to salt it and try to hold this action in suspension. Even if we do exert some control over the casein in the butter, we cannot prevent the traces of buttermilk from turning to lactic acid, and hence, salt, or no salt, we have been defeated. Then what shall we do? If it is simply a matter of keeping the butter, all we need to do is to wash out the granulated butter with pure water until no traces of buttermilk can be discovered. Then drain the water off, and seal up this yet ungathered butter in brine and away from the air. If the moisture is forced out of this butter it will keep for a long time with or without salt brine, sealed or not, the salt neither adding to nor detracting from its keeping qualities.

The Danish butter exhibit at the Centennial in 1876 is a case in point of long-keeping unsalted butter, an article which had been made in 1873, which was quite as well as lard or tallow could have exhibited. This butter was made from sweet cream, and the buttermilk washed out thoroughly with water, which had been first boiled and then cooled down to the proper temperature for washing butter. Possibly in this we see that a long-keeping butter, if unsalted, needs to be made somewhat differently from sour cream butter, and that the keeping qualities of each are not equal, even though the same skill be exhibited in their manufacture; and I am quite inclined to think that success in the future in butter making will come quite as much from studying the conditions of age, temperature and like matters of the cream before churning, and thus estimating its probable keeping and other qualities, as from better and more complicated mechanism, peculiar packages, and skilfully devised ways of salting.

Then we premise that the real object after all in salting butter is to gratify an acquired taste in this matter, and the yet other object of disguising the real flavor that the butter may have by unskilful management. Between the taste of salt and the true butter flavor there is a very wide gulf, and some day the butter consumer will prefer to do his own salting. Would the Esquimaux think the flavor of his seal oil improved by adding a proportion of salt? Does the wild red man season his buffalo steak with salt? Does the Oriental, who dresses his food with olive oil, season it with salt? And yet all these people eat oils and fats exactly as we do butter, and for the same purpose, that of supplying the body with carbon to produce heat.

So we are back to the original point of habit, and habit alone is the authority that has decreed that butter must be salted. The demands of the consumers indicate that there is no standard of salting. The wants of the consumer vary from no salt at all up to 1½ ounces to the pound of butter.

One of the important things for our butter-makers to find out is that salt does not give keeping qualities to butter, but rather that such qualities are the result of careful study, and inquiry into the process and working of cream and butter, and discernment of their actual needs.

In reply to the query "What quantity of milk should a cow give to be considered profitable?" a well-known dairyman answers: 4,500 pounds; 2,800 pounds for the first 100 days, 1,000 pounds in the 100 days following, and 700 pounds between the completion at that time and drying off. Professor Brown, of Canada, in reply to a similar question, puts the figures at 4,000 pounds for 200 days, and as much as possible in the subsequent 165 days, and that every 100 pounds of milk should make three and one-half pounds of butter. Leaving out of consideration the performances of phenomenal cows, accurate records are at hand of native cows with records of from 6,500 to 8,000 pounds in the season, which show that a steady advance is being made in the yields of our cows. The improvement is very slow, and will continue to be until farmers raise their best heifer calves from their best cows, and have the sire with a mother of milking strains to more perfectly establish the milking habit.

The *American Cultivator* tells how a kicking cow can be well utilized: A farmer who bought a cow which neither he nor his men could milk, found that he could make her profitable to suckle calves, which were very high priced that season. Her own calf sold for \$15. Then another was left for her to rear, and brought \$12. During the season the farmer sold \$65 worth of calves reared on this kicking cow, fed her a few dollars' worth of meal and turned her off for beef the following winter. This plan is well adapted for a large dairy where a number of cows calve in succession.

## Look in the Mouth.

Among the local ailments which interrupt the thriving of cattle, few are more apt to escape discovery than those of the mouth. There is no apparent reason why the animal should not thrive, yet it assuredly does not thrive, and notwithstanding its evident keen desire for food, it eats very little and wastes much. In young stock at the age of about two years, and from that to four years old (earlier or later according to breed and food), the milk teeth often require attention. A loose tooth, just ready to come away, or one which should have come away long since, but has got pushed out of its place, and not out of the mouth, by the growth of a permanent incisor, may be the cause of all the mischief, and, if neglected, may occasion prolonged suffering to the animal, and considerable loss to the animal's owner. If we divide the life of the ox according to its various occupations, we shall see that a large proportion of each day is spent in either eating or chewing the cud. Any source of discomfort, therefore, in the mouth, whether among the incisors or the grinders, should be at once noticed, and the animal relieved of it, if possible; and if stock owners would use their eyes with more readiness and intelligence than is sometimes considered necessary to successful practice, they would save many a needlessly wasted dollar, and spare their cattle the infliction of much needless suffering. Pain or discomfort, everything which disturbs the quiet happiness of its life, tends to injure the animal in its physical system, and its owner, consequently, in his pocket. But apart from this view of the case (although it is a true one, and of greater importance than is generally understood), we have here to deal with mechanical hindrances to the support of the animal. In all probability, the animal that cannot eat comfortably does not eat sufficient food; and if the mischief should happen to be in the grinding and not in the cutting apparatus of the mouth, the consequences may be quite as bad or worse. The molar teeth, or grinders, certainly are not quite so likely to cause trouble at casting time, as the incisors, although they, too, do sometimes want attention; but over a longer period of life the animal is in danger of trouble in the grinding than in the cutting parts of the mouth. An elongation of one of the back teeth is by no means uncommon. This is known as "wolf's teeth," a spike of tooth like that of a carnivorous animal starting up out of the flat line of grinders. This should be cut off, as its presence, preventing the proper mastication of the cud, is a serious drawback to progress, and even to general health. We are not recommending quackery, nor suggesting that amateur veterinary practice should supersede the employment of professional skill; but knowledge of the drawbacks to which cattle are liable is easily carried, and there are cases in which every manager of a herd ought to be able to detect the causes of mischief and to remove them. This case in question is one of them. Every owner of a considerable herd should be in possession of a few simple instruments with which he himself, or his servant, could act in cases within the range of ordinary management. The loose or misplaced milk-teeth may be extracted in a rough and ready way, but for examination of the back part of the mouth, and the removal of the tops of "wolf's teeth" from cattle, two simple instruments are useful. The first is the iron hoop, or ring, with a handle, for the purpose of propping the mouth open, (the animal's head being secured, of course, with the muzzle toward the light), the hoop large enough to admit the hand, and the second instrument, which is a chisel in a grooved frame, and acts as a guillotine upon the spike of tooth, over which the end of the frame is fitted. The frame being held firmly upon the tooth with the operator's left hand, a smart blow on the knob of the chisel handle drives home the cutting end, and takes off the piece of tooth clean and straight to a level with the other teeth. With these simple instruments, even cows heavy in calf may be operated upon without injury from startling or agitation; but it is best to examine the mouth of each cow and heifer before she becomes pregnant. *Live Stock Journal.*

## How Neufchatel Cheese is Made.

The late X. A. Willard gave in the *Country Gentleman* the following directions: "The Bonden, or Neufchatel cheese, of which considerable quantities are sent to England and to this country, is made as follows: The rennet is added to the milk, in pots holding about three gallons, at its natural temperature, as it comes from the cow. Various devices are resorted to for preserving this temperature in winter without warming the milk. The rennet being added to the milk, it is left for many hours—even as many as forty-eight—for the curd to be deposited; the curd is afterward placed in a linen cloth, which is suspended from the four corners of a skeleton box, and is then left for several hours to enable the whey to drain off. It is then transferred to a clean cloth, in which it is carefully folded up and is submitted to pressure for about twelve hours, or at least until the whey ceases to run out; but the pressure is neither very great or very even. The curd is next passed through cylindrical moulds, and the small cylindrical cheeses thus formed are at once salted; the cheeses being made, are put into a cellar on boards, each one being quite separate from its neighbors. In a few days, more or less, according to the temperature, the first mould, thick and white, makes its appearance, and soon afterwards, especially in summer, the cheese are sold fresh. \* \* \* When it is desired to increase the richness of these soft, small cheeses, the curds, (after being pressed to expel the whey), are broken up with the hand and worked into a smooth paste. To this is added as much cream as the paste or curd will absorb. In this way the delicious cream cheeses sold in Paris as 'Fromage Gervais,' are made."

In answer to numerous questions about the means adopted for raising pigs weighing 200 to 300 pounds at six to ten months old, the *Iowa Homestead* says that it is done by keeping none but thoroughbred stock, and none but the best attainable. By maintaining a seeming but not forced growth from the first day to the last. This growth is made on waste milk, with sometimes a swirl of corn, oats and rye chopped and mixed with milk or water. Plenty of good timothy and blue grass pasture, pumpkin in the fall, and six weeks or two months of shoving at the last on corn, by providing clean, comfortable places for sleep and shade in hot weather. These conditions are within the reach of any farmer who can afford to raise hogs. The *Homestead* says: "We have sold hundreds of thoroughbred hogs for pork that ought to have been used for breeding purposes. Present indications are that farmers are beginning to see the point, and are ready to pay a fair price for thoroughbred stock. No man can afford to raise grades when he can get thoroughbreds for from \$10

# THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE BREEDER AND SPORTSMAN PUBLISHING CO. THE TURF AND SPORTING AUTHORITY OF THE PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

## RANCHO DEL RIO.

### Coming Sale of Racing Colts.

Hearing such fervid accounts of the colts which Mr. Winters intends selling at auction on the 17th of July, we determined to make the trip to Rancho del Rio notwithstanding there is so much to keep us at home. At the most twenty-four hours were all that could be spared, and in order to make the most of the time the morning train was chosen. The country has been so oftentimes described that all that is necessary to say in regard to that, is that it never looked better, never so well at this season of the year in the ten years we have lived in California. The damage to the grain fields from the rain is much less than we expected, and it is evident that to the late sown grain the unusual down-pouring in June has been an advantage. From Oakland to the near vicinity of Dixon there was not any "lodging" visible from the cars, and beyond that point only a small proportion. Every other crop has been greatly benefited, and the yield of corn and beans, and other hoed crops augmented. The greatest damage is to the hay which was cut, and a good deal of this was in barn and stacked before the rains came. There was a team and wagon in waiting from Rancho del Rio when the cars rolled into the depot, and a hearty appetite appeased with the good things which are so bountifully supplied at that point, and the journey began. Down the Riverside drive the road showing that the wet weather had interfered with the smooth surface, though on each side there is more than the usual beauty. Hop fields with the poles clothed from top to bottom in rich festoons, and the trees with never so rich a foliage. Major Beck was in the party, and though there was only a short pause to look at the herd of Jerseys which he will offer for sale on the same day as the racing colts of Mr. Winters, the limited time was enough to learn that the animals are of raro excellence.

From the calves up to the oldest there is not an inferior animal, and the bull, Hamlet, according to our notion, is a beau ideal of what a Jersey should be. Rich in color, clear lustrous eyes without a token of treachery in the glance, and as "level made" as can be, we have

not the least hesitation in declaring him a model. The youngsters of the same sex are all of the same type, and the cows and heifers indicate the best markings of this favorite breed. We are not surprised that Major Beck regards them with so much affection, and it is certain that were he so situated as to care for so many not one would fall under the auctioneer's hammer. The first to examine when we reached the training stable were those animals that are embodied in the sale catalogue, and will describe them in the order they appear on the list.

No. 1—Hattie B., chestnut, hind pasterns and ankles white, stripe in face running from large star; foaled 1879:

BY NORFOLK.

- |  |   |
|--|---|
| 1st dam Maggie Dale, by Owen Dale.         | 7th dam by Hall's Union, the dam of Edehn's Floretta. |
| 2d dam Margaretta, by Lexington.           | 8th dam by Leonidas.                                  |
| 3d dam Eleanor Margrave, by imp. Margrave. | 9th dam by imp. Othello.                              |
| 4th dam Fannie Wright, by Silver Heels.    | 10th dam by imp. Juniper.                             |

| 6th dam Pandora, by Grey Diomed.           | 12th dam imp. Selima, by the Godolphin Arabian.       |

Hattie B., 15 hands 2½ inches high, long body, very deep through the heart, and with such a bulk of muscle as to denote immense propelling power. She has grown, filled out and thickened so much since she ran at Stockton last Fall, that we would not have recognized her if away from home. She has a broad loin, though not what would be called closely coupled, her quarters and gaskins are fully developed, shoulders well clothed with muscle and with a good arm, the muscles running well down. Her limbs from hocks and knees to the feet are as clean as the day she was foaled, plenty of bone, and with tendons that will please the most fastidious. It is almost superogatory to add to the story the pedigree tells A double cross of Lexington, the intermediate link being Belmont through his best son, Owen Dale, and then some of the best of the old-fashioned strains. She is a fast mare "on the flat," and over hurdles we do not think she has a superior among the cracks of the East. She ran a mile in 1:44 when not in very good condition, at the time three years old. She won seven hurdle races in eight starts, and the last is the only one that need be given to show that the claim made of wonderful excellence is based on good ground. It was run September 18th, 1883, at Stockton. Her competitors were Grismer and Haddington, and the weight she carried was 146 pounds. The first heat was won at her ease in 1:52½. In the second she went off at a pace that would have been fast for a flat run of a mile, clearing the two hurdles in her stride, as though she had wings, and reaching the half-mile pole in 51½ seconds. She kept up the rate until well down the stretch, when her rider seeing he had the race safe came in with comparative leisure in 1:49½. This is the fastest mile ever made in a hurdle race, the next being that of Swannanoe who ran at Brighton Beach in 1:50, but he had only 120 pounds up. Monroe Johnson who rode her has always regretted that he did not "keep her going," as he feels confident that he could have reduced the time so much that it would stand at the head for many years, if ever beaten.

No. 2. Prince of Norfolk, chestnut, hind legs white half way to the hock, off fore foot white, stripe in face running diagonally to the left; foaled 1881:

BY NORFOLK.

- |  |                         |
|--|-------------------------|
| 1st dam Marion, by Malcolm.                | 5th dam by Potomac.     |
| 2d dam Maggie Mitchell, by imp. Yorkshire. | 6th dam by imp. Diomed. |
| 3d dam Charmer, by imp. Glencoe.           | 7th dam by Pegasus.     |
| 4th dam Betsy Malons, by Stockholder.      |                         |

The characteristics of the Prince are immense power combined with high finish. He is a study for those who have a proper knowledge of equine form, and the more that he is scanned the more striking his configuration will appear. He is after the long and low type with large harrel, tremendous quarters, gaskins bulging with muscle so that the hamstring is covered for a portion of its length, the swell on the outer side being very prominent. With all the size the muscles are long and the ligaments and tendons are clean and hard. The shoulders have just the right set, and the covering of muscles is in proportion to the quarters. His loin is particularly good the hip somewhat sloping bringing the stifle low, the angles from the stifle to the hock, and from the hock to the foot, are such as Doctor Weldon claimed was the *ne plus ultra* in a racehorse and with the power above for propulsion, ensure reach and freedom of stride. His head is rather plain, neck short and muscular, though nicely cut at the junction of the head, with plenty of room for the throttle between the expanded jowls. His form gives every indication of speed, and that first quality of a racehorse he possesses beyond even the high promise of his form. Mr. Winters regards him as the fastest colt he ever bred, and this opinion is shared by those who have had the best opportunities to obtain a correct knowledge. He has never lost a race, though never in a position to show his great capacity in public. The California Stake of 1883, and the Winters and Spirit of the Times Stakes are

all that he has taken part in. The Winters was run in the mud, so that he proved that he could negotiate deep ground as well as that which was more favorable. Those who have seen him in his exercise think that twenty-three seconds to the quarter is within his rate, and the only criticisms we have heard were that such an astonishing flight of speed was inimical to going a distance. This idea is one of the obsolete fancies of the past, and when there is breeding to hack it speed is essential to "going the route" in the best manner. His sister, Duchess of Norfolk, showed that, and when she ran two and a quarter miles in the fastest time ever made by a three-year-old, 3:58½, capacity to stay could not be denied. On both sides the Prince is bred to stay. When his dam went wrong the second time she was in training for a three-mile race, and in her work had given evidence that she was well able to accomplish the distance. In the first "move" in California she broke off a wing of the coffin hone, and she never fully recovered from the injury. It was the same trouble which caused her retirement from the turf, but before it incapacitated her she showed that she was a worthy granddaughter of Charmer, who never lost a race at three miles, and heats at that distance, winning sixteen, and the dam of Charmer was Betsy Maloue, who only lost one race in twenty-two starts, most of them at long distances, and the single defeat was owing to her falling down. It is certainly a point in favor of this colt that he is a great member of a great family, and as brother to the Duke and Duchess of Norfolk, is entitled to still higher rank than individual capacity. The first two-year-old in the catalogue is:

No. 3. Alta bay, star and stripe, white hind feet half way to the hock; foaled 1882;

BY NORFOLK.

- |   |  |
|---|--|
| 1st dam Ballinette, by Monday or Young Eclipse. | 8th dam by Chanticleer.                                  |
| 2d dam Ballerina, by imp. Balrownie.            | 9th dam by imp. Sterling.                                |
| 3d dam Hennie Farrow, by imp. Shamrock.         | 10th dam by Clodius.                                     |
| 4th dam Ida, by imp. Belshazzar.                | 11th dam by imp. Silveryeye.                             |
| 5th dam Gamma's dam, by Sir Richard.            | 12th dam by imp. Jolly Roger.                            |
| 6th dam by imp. Eagle.                          | 13th dam by Farter.                                      |
| 7th dam Bet. Bosley, by Wilkes Wonder.          | 14th dam by imp. Monker.                                 |
|   | 15th dam imp. mare from the stud of Harrison of Brandon. |

This is also a very highly formed colt, following the shape of his illustrious sire very closely, and running with the same ease and grace of motion. His forehead is especially good, in fact, as nicely "topped" as any one can desire. His limbs are first rate, with the single exception that the off hock is a trifle round. Not exactly a curby hock, but in place of a straight line from the point down there is a slight bend. He is a muscular colt and his configuration denotes both speed and endurance. His pedigree warrants the expectation. Between Norfolk and Hennie Farrow are Monday or Young Eclipse, and Balrownie, the latter a son of rare old Queen Mary and Annandale. Whether his dam was by Monday or Young Eclipse it matters little, as either is good enough. When Alta romped home in the Gano Stake in 1:16½, the first half inside of fifty seconds, it is not surprising that many rate him as the best that is in the catalogue, and if we do not agree in this estimate, rank him as likely to make a good showing in any company at home or abroad.

No. 4. Estill, bright chestnut gelding, hind feet white, white stripe from between his eyes to nose, foaled 1882.

BY NORFOLK.

- |                                 |                                 |
|---------------------------------|---------------------------------|
| 1st dam Lady Jane, by Marauder. | 4th dam Elizabeth, by Sklp.     |
| 2d dam Jane Shore, by Paumon.   | 5th dam Dispute, by Partington. |
| 3d dam Effie Dean, by Woful.    | 6th dam Gift, by Young Waxy.    |

A very highly formed colt is Estill, the smoothness of outline rather narrowed, by the "Bedford hump," though that elevation just back of the coupling has been carried by so many of the celebrities that it is a mark we are partial to. That he is a racehorse in motion as well as form was shown by him winning the California Stakes in 53 seconds, on a track that was so deep in mud that the time was equivalent to at least three seconds faster on a fair track, and more than that difference when the course is fast.

No. 5. Bonanza, light chestnut, blaze in face, all four legs white nearly to knees and hocks, foaled 1882.

BY JOE HOOKER.

- |   |                          |
|---|--------------------------|
| 1st dam Mattie Glenn, by imp. Glen Athl.                    | 4th dam by imp. Orphan.  |
| 2d dam Mattie Gross (Mate and Grenada's dam), by Lexington. | 5th dam by imp. Buzzard. |
| 3d dam Dick Doty's dam, by Amer.                            | 6th dam by Silvertail.   |
|   | 7th dam by imp. Dove.    |

Here is a pure Joe Hooker, the tremendous muscular development of his sire, and with a big harrel and legs that are good as can be. With both in order we are not sure that Alta can beat him when the distance is not over two miles, and now-a-days a horse that can go at a high rate of speed for a mile and keep it up a little further will win more money than those which have a greater share of endurance but with less foot. That this will make a successful race-horse is beyond question. His only race, five furlong in 1:05, was only a canter for him, and then his breeding is of the right sort.

No. 6 is a chestnut gelding with blaze in face and all of his feet white excepting the right fore foot; foaled, 1882.

BY JOE HOOKER.

1st dam Bay Kate, by Norfolk.

2d dam Big Gun (the dam of Jim Renwick).

This three-quarter brother to Jim Renwick is a more racing looking colt than Jim was at the same age, and the Norfolk cross should certainly give him more capacity to accomplish a distance. He is very fast, having run a quarter, when a yearling, in 24½ seconds, and with the improvement in form over his big brother, he can scarcely fail to race. Last Wednesday we had a conversation with Mr. Bybee, who knew Big Gun in her best days. He considers her one of the very fastest horses he ever saw run up to half a mile, and she ran a mile in 1:50 when that was considered as good as 1:45 is at present.

No. 7. Grey gelding, blaze in face; foaled 1882.

BY JOE HOOKER.

1st dam Queen (dam of Neva Winters), by Norfolk.

2d dam Deeces, by Bulwer.

A rangy fellow, too, and with a world of speed. This is a characteristic of the produce of Queen, as Garfield was so fast that he was brought from the Hawaiian Islands to run here and showed as fast as any. As he was by California, a brother to Joe Hooker, No. 7 and he are exactly of the same blood.

No. 8. Bay filly, blaze in face, near hind leg white; foaled, 1882.

BY JOE HOOKER.

1st dam Abbie W., by Norfolk.

7th dam Zelipha, by imp. Messenger.

2d dam Ada C., by Revenue (dam of Connor).

8th dam Dido, by imp. Bay Richmond.

3d dam Sallie Morgan, by imp. Emancipation.

9th dam Slamerkin, by imp. Wildair.

4th dam Lady Morgan, by John Richards.

10th dam imp. Cub mare by Cub.

5th dam by Sir Solomon.

11th dam Amaranthus, dam by Second.

6th dam Aurora, by imp. Honest John.

12th dam by Sterling, etc.

A very handsome filly with extra depth of chest, good barrel and with all her evident strength of high finish. She is of great promise and the Hooker on the Norfolk, Revenue, etc., he can scarcely fail to carry the promise to full fruition. This is a racing family, as Ballot-box, Connor, and others have shown.

The seven yearlings in the catalogue are so uniformly good that it is difficult to find terms to described them without tiresome repetition. Were a tour made of the breeding farms of Kentucky it would be difficult to find the same number to equal them in good looks. Of fine size, without being overloaded with flesh, free from blemishes, and of standard racing form, there can scarcely be a doubt that they will make a high mark in the turf calendars. They are still running out so that there has been no pampering or fattening for the sale, and though their coats are somewhat sunburnt this is more than made good by robust health and fitness for breaking and training.

No. 9. King of Norfolk, chestnut, white stripe in face three white feet; foaled, 1883.

BY NORFOLK.

1st dam Marion, by Malcolm. (See No. 2.)

There is no question that each succeeding foal that is dropped by Marion is an improvement, so far as appearance goes, on its predecessors. There have been six in all—three colts and three fillies. The colts are all chestnuts and the fillies bays. The colts have been the stoutest and more compactly built, the fillies with higher finish. When Duke of Norfolk was a suckling he was pronounced the best on the place. When the Prince came those who thought that the Duke could not be excelled gave their preferences for the younger. The King is still an improvement according to our notions. From his present appearance he will be a couple of inches taller than either of his brothers and with more range. Should he inherit the family traits of marvelous speed, there is not a question that he will go into the records as one of these extraordinary animals that are rarely seen, and mark an epoch in turf history.

No. 10. Chestnut colt, diamond-shape star, foaled 1883:

BY NORFOLK.

1st dam Illusion, by Alarin.

7th dam Camilla, by Melzar.

2d dam Mary Hadley, by O'Meara.

8th dam Jet, by Eames' Flinnap.

3d dam Parasina, by imp. Levisthan.

9th dam Diana, by Glodins.

4th dam Maria Sbelby, by Stockholder.

10th dam Sally Painter, by imp. Sterling.

5th dam Patty Puff, by Paeolet.

11th dam imp. mare Silver, by Belsize's Arabian.

6th dam Rosy Clack, by imp. Saltram.

12th dam by Groff's Partner.

This is a very strong and sharp looking colt and can not fail to possess a fine turn of speed. His dam was very fast, and the family to which she belongs is of high celebrity. From Rosy Clark have descended many of the best ever reared in Tennessee, and all of the strains between that and this colt are as fashionable as need be.

No. 11. Chestnut colt, blaze in face, all four feet white; foaled 1883:

BY NORFOLK.

1st dam Mattie Glenn, by imp. Glen Athol. (See No. 5.)

When Mr. Winters bought Mattie Glenn we predicted that she would prove one of his most valuable broodmares, and this prophesy is likely to be fully substantiated by Bonanza and this son of Norfolk. He is remarkably good from every point of view and is sure to race.

No. 12. Chestnut colt, blaze in face, legs white to knees and hocks; foaled 1883:

BY JOE HOOKER.

1st dam Abbie W., by Norfolk. (See No. 8.)

This is the only Hooker among the yearlings, and is no discredit to his famous sire.

No. 13. Bay filly, foaled 1883.

BY NORFOLK.

1st dam Kitten, by imp. Eclipse.

5th dam Canary, by Coriander.

2d dam imp. Pussy, by Diophauntus.

9th dam Miss Green, by Highdyer.

3d dam Agapemone, by Bay Middleton.

10th dam Harriet, by Matchem.

4th dam Venus, by Sir Hercules.

11th dam Flora, by Regulus.

5th dam Echo, by Emilius.

12th dam by Bartlett's Childers.

6th dam by Scud or Pioneer.

13th dam by Bay Bolton.

7th dam Canary Bird, by Whiskey or Sorcerer.

14th dam by Belgrade Turk.

A very neat filly is this daughter of Kitten, and a rarely bred one, as all those who are conversant with English pedigrees will acknowledge; she is not only neat but of racing shape and good size.

No. 14. Bay filly, off hind foot white, star and stripe, foaled 1883.

BY NORFOLK.

1st dam Ballinette, by Monday or Young Eclipse. (See No. 3.)

The sister to Alta is a big racing-like filly, fully as well shaped as her brother, and there will be brisk competition for the produce of Ballinette. Alta stands so high in the estimation of those who have seen him run that a "full sister" is sure to attract attention.

No. 15. Chestnut filly, roan hairs blaze and nose white, white on all of her feet, foaled 1883.

BY NORFOLK.

1st dam Neapolitan, by War Dance.

9th dam by Prince T. Qnassaw.

2d dam Eliza Davis, by imp. Knight of St. George.

10th dam Sultana, by Regulus.

3d dam imp. Melrose, by Melhomme.

11th dam by Partner.

4th dam Clarkia, by Muley Moloch.

12th dam by Gallant's Smiling Tom.

5th dam Sister to Righton, by Palmerin.

13th dam by Almanzor.

6th dam Oceana, by Cerebus.

14th dam by Grey Hantboy.

6th dam by Benninghrough.

15th dam by Makeless.

8th dam Jenny Mole, by Carbnelle.

16th dam by Brimmer.

17th dam by Diamond.

While this filly is a little smaller than the others, were she away from them she would be considered of good size. None of them excel her in racing points, and it is certain that in point of blood she is the peer of the best. Her dam is a sister to War-Song, the dam of Eole, and the War Dance mares are standing as high now in the estimation of Eastern breeders as any others ranking in the same category as the Lexingtons.

After a careful survey of the colts embraced in the catalogue we have still further incentives for regretting the step Mr. Winters has concluded upon, and had we been at Rancho del Rio, would have endeavored to have influenced him to recall the determination to sell. We earnestly hope that he may still change his mind, and in the next issue of the *Breeder and Sportsman* have authority to announce that the auction sale has been given up. He never had, in our opinion, the same show for a lot of five racehorses, capable of successfully coping with the best there is in any country. As will be seen from the above pedigrees there is the progeny of several mares which have made their first appearance, and, judging from the performances of Alta, Estill, and Bonanza, and the looks of the youngsters, Marion will have close competition in the race for the honor of the foremost matron in the Rancho del Rio stud.

Without other aid than Rancho del Rio, Palo Alto, Santa Anita, and Rancho del Paso, turf sports in California will be on a basis that will ensure future success. These will be the main parties in the battle, and though the smaller breeding establishments like those of Mr. Judson, Mr. Boots, and others, will perform a prominent part, the great interest will centre in the meeting of the big clans. It is a loss to the State, and to each and all of the breeding farms for one to surrender active participation.

Governor Stanford is well aware of the drawback to the turf interests of this coast, of Mr. Winters' withdrawal, and when at one time he urgently desired to purchase Norfolk he informed us that the purchase entailed the breaking up of Mr. Winters' stud, he would not think of becoming a party to the retirement under any consideration. Mr. Winters is, doubtless, influenced by the jangling and bickering which has given him a great deal of annoyance, and he magnified the opposition of those who have made a set at him and the Pacific Coast Blood-Horse Association. Of this he can feel assured, that no one ever connected with racing in California has had more of the confidence of the race-going public, and to a man these, the main support of racing, regret his resolution to sell. The antagonism to forward personal feelings of revenge is sure to fail in its purpose and the troubles arising be transient. From a pecuniary point of view there are good reasons for regretting the sale at auction. Hattie B., Prince of Norfolk, Alta, Estill and Bonanza taken East, and their quality exhibited, will sell for more than double as much as the whole hand, and that after paying the expenses of the trip.

The regrets were still more poignant when we saw the

arrangements Mr. Winters had made for training, and the pains he has taken to fix things so that he could enjoy the pleasure of seeing the colts at work. But the space is wanting this week, and the description of the course and its adjuncts, the broodmares and colts will be postponed until a further time.

### Newland & Pumyea Sale.

On July 19th, Killip & Co. will offer at public sale, at the Oakland Trotting Park, the stock of Newland & Pumyea. Having dissolved partnership, the late firm has decided upon disposing of the stock as the most satisfactory method of closing, and this will afford purchasers an opportunity to get hold of some very desirable animals. The catalogue has not been issued yet, though in a few days it will be ready. In the mean time we can state, from personal knowledge, that there are a number of very promising animals included in the offering. We regard Grand Moor as one of the best procreative animals ever bred at Sunny Slope, and this is assuredly a high estimate when Sultan and Del Sur are taken into consideration. He is not only finely bred by The Moor, from Vashti by Mambrino Patchen, but he is a grand looking horse, and of a size that will insure his progeny being serviceable for nearly every purpose, and that he should get trotting speed is more than likely. Those of his colts which have come under our observation are very fine, and a two-year-old from Corisande, is one of the best looking colts that can be found in any country. The two-year-old, by Newland's Hambletonian—a son of Speculation—and from Phaceola, can scarcely fail. The Hambletonian blood and that of the three-quarter sister to Pachecola, Beautiful Bells, resulted in the greatest young trotter ever seen, Hinda Rose, and this is a token that should not be overlooked in this case. When the catalogue is published we will give a further account of the stock that are embraced in this sale.

### Golden Gate Programme.

In the advertising column will be found the programme of the Golden Gate Fair. The time fixed upon is the first week in September, that being the week previous to the opening of the State Fair.

The racing is \$500 purse for two-year-olds, ¾ of a mile; \$500 purse, heats of a mile; \$500, two miles; \$500, heats of three-quarters of a mile, and a purse of \$1,000, dash of four miles.

The trotting, 2:22 class, purse of \$800; four-year-olds and under, \$600; three-minute class, \$600; 2:30 class, \$800; three-year-olds and under, \$600; yearlings, \$250; free-for-all pacers, with Corette to wagon, \$500; 2:35 class, \$800; two-year-olds, \$400; 2:26 class, \$800, and free-for-all trotters, Director to wagon, \$1,000.

A ladies' tournament and bicycle race complete the bill, and the classification appears to be comprehensive enough to give all a chance.

### Our Horses in the East.

There are discouraging reports from many of the California horses in the East. It is said that Mark Daly and Lucky B. have split their feet and that Fallen Leaf has been in charge of the veterinarian. We trust that the ailments have been magnified and that at the Chicago meeting there will be many victories to record.

Jim Renwick is doing well, his victories and defeats being equal. At Coney Island he was beaten by Little Minch and Aranza in a three-quarter of a mile run, and at Brighton Beach last Wednesday he beat the fleet Hilarity and others nine furlongs in 1:56½. This was doubtless the greatest surprise to Eastern turfmen. When he lost at three-quarters the general verdict was that it was a furlong too far, and now that he has accomplished the longer distance in such good time they will have to concede that he is fully entitled to be called "King of the Cocktails."

### The Pinole Auction Sale.

In the proper column will be found an advertisement of a sale to come off at Pinole, on the ranch of S. J. Tennent, on Thursday, July 24th, by Killip & Co. This sale is for the purpose of settling an estate, and among the animals offered are many of the most fashionable bred trotting stock in the State, colts and fillies by Echo, Steinway, Whipple's Hambletonian, Arthurton, Pinole Patchen, Alexander, Gus, Reliance, etc. Thus there is Hambletonian Patchen and Morse Horse blood, and the mares from which the youngsters come are of good strains. Catalogues will be ready in a short time, when we will have a better understanding of what is to be offered.

THE RIFLE.

ANCIENT AND MODERN ARMS.

A Description of the Choke-Bore Rifle.—Like any Dog, it has had its Day, and its Advocates are Few, and Becoming Yearly Beautifully Less.

BY DR. E. H. PARDEE—NO. 23.

EDITOR BREEDER AND SPORTSMAN:—In one of my last communications I gave an unprejudicial statement of a contest between one hundred successive shots between the choke-bore and the cylinder-bore rifle. I gave this historical contest of the two kinds of rifled guns with all the care and system that I could bring to bear upon the two guns, and that too after years of repeated trials with both guns, with different kinds of tempered lead and kinds of granulated powder, and fitting of ammunition to the condition of the guns, and time and again changing the inside of the rifle, and making it subservient to certain kinds of powder, with tempered lead moulded into that shape and contour that would cause the least possible friction in its passage through the spiral grooved barrel, consequently less upsetting of the bullet, and with the center of gravity in front of the center of figure. In fact so little were my bullets affected by the process of upsetting that the original shape was but little affected, and always in the same part of the bullet. A vast number of projectiles have been produced and advocated by their special makers; but from the total want of scientific arrangements in their composition and construction, have grown up like "the gourd in the night," and have withered and blasted the following day. The essence of the whole thing is to have the front end of the bullet the heaviest. Without that an unnecessary amount of spiral motion must be resorted to at the cost of immense friction, for with a bullet with the center of gravity much behind the center of figure, the continued tendency to work up an unsteady motion, and change ends, can admit of no doubt, and when the forward part of the bullet is heaviest, straight forward is its natural inclination, and to this inclination in obedience to the laws of nature it adheres. The test of the pudding is in eating it, and the test of the ingenuity of man's brain is in the construction of a bullet, as above described. It has been worked at for years, and many a wise-acre has flattered himself that he has "belled the cat." Since giving my series of diagrams in wood cuts several months ago, showing the bullet that I use in different parts of its trajectory, also with others when the butt of the bullet was the heaviest, I have received several letters from amateur marksmen and gun-makers, telling me how they obviate the difficulty of a light point, and they all, without a solitary exception, claim to have invented a bullet that does away with this "bug bear" of a light point of mine, and some of them wish me to notice their mechanical ingenuity in some future paper to the BREEDER AND SPORTSMAN.

One gun-maker from Detroit, Michigan, writes: "I have struck the key-stone, and will help you out of the dilemma you have written so much about in the BREEDER AND SPORTSMAN, that is, of the light point and heavy butt of the bullet. I have been in the habit of making for my guns long cylinder bullets. After reading your article I fully agree with you, and thought I could devise a better way of throwing the weight forward, than that devised by you. I took the regular bullet, and burred out the butt, making a conical hole in the butt of the bullet, for a little over one-half the length, which threw the weight in front of the center of figure as you call it. But I can't do as good work with them as I can with the same bullet before the change made. Try it and let me know what you think of it, etc."

An amateur marksman writes me from Toronto, Canada, and says: "I have read two of your articles, copied in the Rod and Gun, which appeared to hit the nail on the head. Allow me to suggest to you an idea of my own, and as an amateur marksman I have tried it and find it works well, in fact, I do much better shooting than with the long bullet made by Sharp & Co. I will tell you, but ask you if you find anything in it write me, and we will get letters of patent on it both in the Canadas and America. I throw the weight forward by drilling out a deep hole in the butt of the bullet, until I remove enough metal to get the greater weight in the point of the bullet. I shall hope to hear that you are pleased with my invention, and shall anxiously await your reply, etc."

A gentleman who is a gunmaker writes me, after discussing upon my diagram, showing bullets on line of trajectory.

"This is my way of making butt end lightest, cavity filled with lighter substance," and this gentleman has been a gunmaker for thirty-eight years. I refer the reader to "Hans Bnek on the rifle and bow to use it" for full particulars. It is the Minnie bullet, with the cup and conical, which had a long run in all Europe, and was introduced in this country somewhat modified some forty years ago. The same bullet was also experimented with by Mr. Greener, a scientific English gun maker, as early as 1843, and after much time and labor, he condemned the whole system with his sound and satisfactory reasons. Some twenty years ago, when I was an enthusiast on rifle shooting, I too tried all these different kinds of Minnie bullets, and after repeated trials swept them out of both my mind and work shop. Of course it is a coincidence that these gentlemen above referred to arrived at the same conclusion. In fact, it is a very natural thing for a man to jump at just such conclusions, but when the test of both theory and practice is applied, and theory tells us it is not in keeping with good sense, and practice tells us that the performance of such constructed bullets are not steady, I can see no other way than to condemn, and look for something else that will bear the test of philosophy, and be more successful in practice.

The gun maker of thirty-eight years of both study and labor says the hollow in the butt of his diagram must be filled up with a lighter material. Why does he not tell us what that material shall be? It may be that he thinks a common cork would answer. Surely I am at a loss to comprehend what he does mean, and much less do I care, for I assure the gentleman, fix it up as he will, he never has, nor never will obtain any steady and satisfactory performance with such a constructed bullet as he has given in his diagram, a copy of which I have given in this paper.

The adoption of the plug and disc by Captain Minnie was in the year 1847, and from this circumstance all lovers of the rifle of as late as twenty years ago were familiar with what was called the "Minnie rifle." It has been condemned by both science and practice years ago, and I will venture to say that our present marksmen have never seen one, and for

anyone to say that "this is the way that I do it" is like the ostrich in his vain attempt to hide himself by covering up his head in the sand, and exposing his posterior to the curious gaze of some interloping hiped. The closing up of the orifice at the bottom of the bullet is merely the production of an elongated plug with weak sides, which must necessarily be drawn in upon themselves and thus shortened, and while undergoing this upsetting process one side of the bullet is most sure to prove the weakest, and the result must be a deformity of the shot that will be sure to cause a circle of error to take place. The disc prevents the possibility of the powder gas acting upon the center of gravity or the head of the bullet, and thus the advantage of that being the primary motion is lost, and which ensure the absence of wobbling, a principle that I have endeavored to establish in all elongated bullets after leaving the muzzle of the gun, and a defect in which I have tried, and have succeeded beyond my most sanguine expectation, by constructing a bullet with the center of gravity in front of the center of figure, as shown in my diagram of bullets. It may be well for me to say that no elongated bullet that is cylindro-conical can be made to keep its good behavior when fired from a choke-bore rifle. Why, asks the present gun-maker, is it possible that the choke-bore is constructed differently on the inside from that of the cylinder-bore? and if so, pray, how do they differ? The wisdom displayed in the rifling of a scientifically constructed choke-bore is a subject over which I have for years doubted, while it has been advocated by some of our best gun-makers, I believe all or nearly all have given up the delusive reasoning and adopted the cylinder-bore.

One can look in vain for a rifle barrel, unless it was made years ago, with the gathering or deepening groove. In my mind there is no doubt but that it increases the friction of the bullet in its passage through the barrel. There can be no doubt about a greatly increased friction if the bullet undergoes the process of upsetting all at once, that is the instant of starting from its state of inertia, but as this is well known not to be the case the question arises, what is the advantage gained by a gathering of grooves? I can see no advantage arising from a mere deepening of the grooves at the breech end of the barrel, and if such a gun gives better performance than the cylinder-bore I ask its advocates what is the cause of it? is it because the nearer the bullet gets to the muzzle of the gun the closer the fitting, and when it arrives at the identical nip or choke is it there drawn out again, or does it undergo a further process of upsetting or shortening of the bullet? I have asked these questions for the benefit of the choke-bore men, and will look for an answer in due time. The method of rifling this kind of a gun is by constructing a very ingenious kind of a tool with proper screws, which is so adjusted that it cuts deeper as it travels by the force of the band from the muzzle to the breech, so that when finished the minimum depth of the rifling at the muzzle is .005 of an inch, half way down the barrel .010, and at the breech end of the barrel the maximum depth is .015 of an inch, this gradually deepening 10-1000 of an inch; whereas the uniform methods of rifling is for soft lead about .012 of an inch, and with tempered lead .006 of an inch.

I take it that the only office of the rifling is to hold the bullet and impart to it the rotary motion, which keeps the shot in its true line of flight, and grooves that are cut deeper than necessity demands there must be an increased friction, and a certain amount of horse-power lost, creating unnecessary strain, wear and tear on both the projectile and rifle barrel. I take it the nearer to a polished surface you can approximate the inside of a gun barrel, the less must be the friction, and, as a natural result, the greater will be the power on the projectile, therefore I cannot see the point, and think that it must be metaphysical, and none but those minds trained by early education can penetrate this choke-bore system. For, as I have stated before, that a rifle with a uniform cut .011 is sufficient to hold the shot if the lead be soft, and less depth in proportion to the temper of the lead, therefore I ask why increase the depth of the grooves to .015 of an inch? I would tell the choke-bore men, what all this labor of the mountain is about, it does not produce the mouse, but it is a demand for greater friction in conjunction with the unfinished condition or rough state of the inside of the barrel, that the bullet may be held in order to procure a uniformity of upsetting, as I have argued in former communications. That a wagon can be drawn more easily when loaded with a ton of hay over a smooth than over a rough road, and he who says it can't let him try it. Another proof of my position is, that the cylinder-bore possess the greater power of penetration; that is, take two guns of the same calibre and length and weight of barrel, with the same charge of powder, bullets cut from the same mould, and the cylinder-bore gets more penetration, all the time, then the choke-bore, a test of which had ought to settle the question in the minds of all honest searches of truth. But the hobbyist of the choke-bore will say that he does not make his guns with a gathering of the grooves; if he does not, then I can tell him, that he does not understand how to construct a choke-bore rifle; he cannot tell the principal difference between the choke and the cylinder-bore. He is like a boy at the blackboard, trying to work out a mathematical proposition in trigonometry, when he does not comprehend the primary teachings of addition, subtraction and division.

Again I claim that a bullet discharged from a cylinder-bore holds fast to its original shape and contour longer than one from a choke-bore; in fact sometimes the bullet, (I now mean the pointed bullet), is so much distorted from its former shape that it is hardly recognizable, while that from the cylinder-bore is held with the same grip all the time, from its start until it takes its departure in the opened and unconfined air, and is not allowed to be remoulded, as it were, by counter pressures and the laxity of support on its sides.

Therefore the bullet out of the cylinder-bore is in better shape, it is smoother, and better fitted to pass through the particles of atmosphere with less friction, for I cannot too often repeat that perfect smoothness, even to a polished surface, is very essential to the easy passage of a projectile through the air. But it may be necessary for my friend from Penn. to say, that it is not only necessary to roughen the inside of a rifle to lessen friction, but also with equal propriety he may say that the rougher the bullet the less the friction it will create, and the fewer atmospheric particles will be distributed in its passage. He must hold to this position, from the time the bullet starts to its terminal velocity. If this man's theory holds good in a rifle barrel, it holds good in air, and if it holds good in air it must in water, and the ship-builder must roughen the bottom of his ship in order that it may pass, and separate the globules of water more easily, and less steam and sail will be necessary to force these monster ship over the bosom of the briny deep. I hold my friend to his position, however untenable it may be; the result of surface thought, without cause and effect, is not the thing to build a reputation on, even in the shady retreat of a country gunshop for the space of thirty-eight long, toilsome years.

In looking over this article I find that I omitted to state

in its proper place, that in the scientifically constructed choke-bore, that with the gathering or deepening of the grooves, also simultaneously commences the expansion of the whole bore, so perceptible is this increase of the size of the hole, that after the bullet is started through the patent muzzle, duly patched, and descends the barrel for about two inches, that perceptible ray of light passes the bullet from the lower part of the grooves, and as it advances towards the breech the weight of the loading rod will carry it down; and then in addition to this expansion toward the breech the grooves also deepen, making almost a double choke-bore. With these additional remarks I have given the choke-bore rifle that forty years ago was considered the neplus-ultra of a rifle. But who dare say that there has not been change for the better during that long period of time, not only in the construction of the rifle, but in all other mechanical departments, and the man who sat astride of a choke-bore rifle forty years ago, and has not changed his mind, is as far behind the mechanical touch of the day as he who shoulders the old turkey-wing cradle and goes to the field of grain at six o'clock in the morning, says that he can reap as much wheat in a day as one of McCormack's improved reapers and threshers, that will cut, reap, thresh and bag forty acres per day. But I suppose it is all owing to one's trust, and if the poor fellow is contented and happy with his cradle of forty years ago, why all means let him bask in his enjoyments and cry at the follies of others.

The Rifle Association.

As a State Institution supported by the public spirit and enterprise of our military organizations principally, without a dollar's aid from the Government, we sincerely regret anything should creep into its management to create disturbance. Soldiers, without a knowledge of the use of the rifle, are of no benefit to any State, for it is the rifle, not the uniform that makes the soldier. In assisting our citizen soldiers to use their rifles, there is no doubt the Association has been of great use, and, just in proportion, we regret anything should occur to lessen its influence and threaten its existence. As a principle, however, the target-record must be preserved above suspicion, or nothing in the world can keep the Association alive. For the trouble which recently led to the resignation of several of the directors, and which, we fear, will lead to the resignation of many others below that rank, we blame Officer Linville, of the Police, and those who sustained him in his claims to the champion medal. There is not in this city, in the Rifle Association or out of it, a single man who will put his hand on his heart, not Linville himself, and say the score that gave him that honor, and robbed Fred. Knuble of it, was ever made by Linville. The moment the target record is uncertain fraud creeps in, and the Association must die.

Everybody knows Linville's score was disputed at the time of the shooting, and that when the scorer gave in the card, he put a note of interrogation to Linville's score, intimating the claim in question was disputed. Linville, on his claim being disputed, like Fred. Knuble, some years ago, should have declined the honor, and if he persisted in his obstinacy, Captain Douglass and Sergeant Nash should have interfered for the honor of the police, and compelled him to relinquish his claim to the disputed score. The mere fact of possessing the card of the scorer or certificate of the Directors, giving him the first record is of no earthly use or honor to him, because no one in this city believes the honor fairly won. Even now, at this late hour, to prevent a publication of all particulars of the challenge to his score, if from no higher motive, Linville should relinquish the honor and stand upon his actual merits which, as a rifeman, are good enough. False plumes give no beauty or distinction. The fable has it, and truly, that the ass once put on the lion's skin to deceive his kindred, but they all saw he was still only an ass. So this honor claimed against a protest, even though conscientiously by Linville, can add nothing to his reputation because no rifeman believes he can be conscientious in claiming the score giving him the champion's medal. That is the point where the trouble lies. When the target record becomes uncertain, scrupulous men will retire from any association, and those retiring in this case were right in doing so. It is alleged the claim was given under authority of Creedmoor rules. Who in this city in their last form has got those rules? We have looked everywhere for them for a fortnight and failed to find them in this city, and in order to be certain on this head have sent to New York for a copy of Creedmoor rules in their last revised form. The whole business, in fact, is an unfortunate one, the end of which has not come, and for the sake of the future its occurrence is to be deplored. Linville, if he chooses, can end the trouble at once. He has now the chance.

At Stockton.

The Stockton Guard rifle team was out at their 200-yard target on Sunday. The lowness of the general scores springs from the fact that the team is composed chiefly of young men unexperienced with the rifle:

Table with 11 columns of names and scores. Sergeant C. A. Merrill... 5 4 5 4 4 4 4 4 4 3-41. Corporal L. F. Saibach... 3 4 5 2 3 4 4 4 4 3-35. Corporal F. H. Cass... 0 4 5 3 3 4 4 4 4 3-34. Private J. Maguire... 3 4 3 3 3 4 3 4 3 4-34. Private F. C. Eisen... 4 4 4 3 4 4 3 2 3-34. Private F. Hill... 2 2 2 4 4 3 4 0 2-28. Private J. H. Rhoden... 4 4 4 3 4 0 4 0 0-27. Private W. M. Smith... 3 3 4 3 0 2 3 4 0-25. Private H. Ut... 3 3 3 0 2 0 4 2 3 3-23. Private F. M. Baker... 3 0 3 0 3 0 3 2 0 3 4-21. Corporal J. H. Baker... 2 2 2 0 2 3 2 3 4 2-22. Corporal W. H. A rifle competition between the picked military marksmen of the several departments of the division of the Pacific will occur at the Presidio, on September 11th, 12th and 13th, for places in the division team of twelve and for the twelve prizes awarded by the War Department. The four best marksmen in the division team will represent the Division of the Pacific in the army team, and will proceed to Fort Leavenworth, Kansas, September 18th, to prepare for the competition to take place at that post, October 1st, 1884. We hope to see the proportion of these twelve prizes brought to California. We have rifemen in our State capable of winning that honor, if they prepare themselves properly beforehand.

The beautiful weather on Sunday drew together a large number of riflemen to both Shell Mound and Schmetz Park, at which ranges interesting events were to come off. The general shooting of the day was above the average, and the scores made equally by the military and citizens organizations were creditable to the State.

At Shell Mound.

The event of the day here was the effort of Lieut. Kellogg, Sergt. Hovey and Privates C. F. Waltham and R. C. Moore, to reduce the record of Knhule and Carr, at 200 yards, 100 shots each, the records to be beaten being 437 and 456. This, as we stated last week, was a pretty big job to undertake, and though not successful the effort reflected credit on all the participants. Kellogg made 454, which, though three points short of success, raised his own record one point. An analysis of the shooting for 400 shots shows a total of 1,758 out of a possible 2,000. This leaves an average of 43.19 for every string of ten shots, and a percentage of 87.9-10 for the total 400 shots. Viewed in this light the effort, though not successful, was very creditable. The score:

Table with 2 columns: Name and Score. Rows include B. I. Kellogg, Ed. Hovey, C. F. Waltham, and R. C. Moore.

Table with 2 columns: Name and Score. Rows include Ed. Hovey, C. F. Waltham, and R. C. Moore.

Table with 2 columns: Name and Score. Rows include C. F. Waltham, R. C. Moore, and B. I. Kellogg.

Table with 2 columns: Name and Score. Rows include R. C. Moore, C. F. Waltham, and B. I. Kellogg.

At the same time and place Company C, 2d Artillery, held their regular monthly medal shoot, with the following result.

Table with 3 columns: Name, 200 yds, 500 yds, Total. Rows include Lieut. H. Mangels, Sergt. O. Lemcke, H. Brooks, Cor. Geo. Marcks, H. W. Franks, and Lieut. A. Hnber.

This match will be completed to-morrow.

At Schuetzen Park.

This popular resort of our riflemen was unusually crowded on Sunday. No people are more convivial by nature, or more earnest in their amusements than the Germans, and this national spirit, so commendable at all times, showed itself especially on Sunday. We believe if electric lights could be used successfully at the hnts the shooting would have gone on all night. The shooting for the day was very good, all the cracks of their respective organizations distinguishing themselves. The 38 bull's-eyes of Fred Knhls stand prominent in the day's work. We tried to find the congenial Lieutenant during the week, that we might get the number of shots he fired to make those 38 bull's-eyes, but failed to do so. Next to Philo Jacoby, when wanted for information, Fred Knhls, though obliging and gentlemanly at all times, is the hardest man to handle we know in this city. Thus many interesting items that might have enriched our columns this week must remain untold. The following is the general record:

California Schnetzen Club.—Best center shot: First prize F. G. Schueider; second, J. Stanton; third, D. Schoenfeld; fourth, O. Bremer, fifth, Buerman; sixth, Klare; seventh, O. Burmeister; eighth, H. C. Smith; ninth, Klotz; tenth, Freeze, eleventh, Krahman; twelfth, McCloughlan; thirteenth, C. Rapp; fourteenth, Eckman; fifteenth, Hatze; sixteenth, Pollack; seventeenth, V. S. Heyde; eighteenth, A. Utschig; nineteenth, Zecher; twentieth, Sagehorn.

Eintracht Rifles, Schuetzen section, most bull's-eyes: First prize, F. Knhls 33, \$5; second, H. Schubert 15, \$4; third, L. Klotz 15, \$3; fourth, P. Klare 13, \$2; fifth, H. Gmbel 9, \$1.

Best center shots: First prize, A. Stamer, gold medal; second, H. Hagerup, \$20; third, B. Wehle, \$15; fourth, H. Leer, \$10; fifth, F. Knhls, \$8; sixth, P. Klare, \$6.

Although the prizes for the day, given by the Eintracht Rifles as advertised, were open to all choosing to contend, no outsiders entered. The shooting, therefore, was confined exclusively to the organization.

The San Francisco Turner Schuetzen.—Most rings: First prize, J. Utschig; second, Sagehorn; third, Brnmeister; fourth, Jecklenhurg; fifth, Finking; sixth, Schoenfeld; seventh, Pracht; eighth, A. Utschig; ninth, R. Lorick; tenth, D. Worth; eleventh, G. Acker.

A match has been made between eight members of the Fifth Infantry—four on a side, 100 shots each at the 200 yard target—to come off within the next four weeks. Lieut. Kellogg, Lieut. Fred. Knhule, Sergeant N. Williams, and Sergeant Ed. Hovey, constitute one team, and Sergeant Macdonald and Messrs. Waltham, Pierce and Burrel make up the other. Col. Ranlett offers a handsome champion medal for the one beating 437 in the match, the holder at all times to be ready defend it against all comers.

The Fifth Infantry Battalion have an arrangement amongst themselves, that when one man challenges another for his team position, the challenge must be accepted. The first match of this series took place at Shell Mound, on Sunday. Col. Ranlett challenged Sergeant Nick Williams, and the Colonel got beaten for his trouble.

There will be a number of interesting contests at this range to-morrow.

The San Francisco Fnseliers, Capt. Bruer, were out in considerable numbers, doing good shooting, as usual. This company has improved greatly in its averages lately, and a number of first-class sharpshooters are included on the rolls. We should be glad to have their authentic records in future.

Maximum production often fails to give the largest profits. The largest yields, whether of vegetable or animal products, may have cost more than they are worth, but almost invariably light yields are produced at a loss, or, at best, with very small profit. To find the safe middle ground is an important study for the farmer. There are many processes "which cost more than they come to" in regions of low-priced lands and low-priced farm products. Grinding or cooking food, cutting green crops and feeding in yards or stables, ensilage of corn-fodder or grass, all fail to be generally adopted by the farmers of most of the Western States, because their experience has shown that the systems of feeding which require the least labor have given the largest profits. Even on the high-priced lands near London Sir John Lawes has found the greatest profit where his cattle get most of their food for themselves; hence he grazes much and makes as little hay as may be.

The Messrs. Ames, father and son, of Massachusetts, and Thompson, of Olean, New York, have purchased of the Northern Pacific all of the odd sections in a whole township on what is known as the Mendendale range in Montana, embracing 23,040 acres, which they propose to use as a sheep ranch.

STALLIONS THOROUGHBRED.

The Thoroughbred Stallion

WILDIDLE.

By imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Jndson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:42), at two years old, May D. (with a record of one and one-half miles in 2:35, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal.

Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, Owner, or W. L. APPELEY, Supt.

P. O. Box 223. Santa Clara, Cal.

STALLIONS

—AT—

RANCHO DEL PASO.

For the Season of 1884.

Thoroughbreds.

LONGFIELD.

Chestnut horse, by MONARCHIST, by Lexington. First dam, Dame Gourlay (Blue Gown), by Planet. Second dam, Flora G., by Lexington. Third dam, Fanny G., by imp. Margrave. Fourth dam, Lances, by Lance. Fifth dam, Aurora, by Aratus. Sixth dam, Paragon, by imp. Buzzard. Seventh dam, Indiana, by Columbus (son of imp. Pantaloon). Eighth dam, Jane Hunt, by Hampton's Paragon. Ninth dam, Moll, by imp. Figure. Tenth dam, Slamerkin, by imp. Wildair. Eleventh dam, imp. Cub Mare, by Cub. Twelfth dam, Aramantins' dam, by Second. Thirteenth dam, by Starling. Fourteenth dam, by Croft's Partner. Fifteenth dam, by Greyhound. At \$50 the season, due at the time of service.

JIM BROWNE.

Chestnut horse, by FOSTER, by Lexington. First dam, Flush, by Hiawatha. Second dam, Fanny Bngg, by imp. Ambassador. Third dam, Ida, by imp. p. Belshazzar. Fourth dam, Madame Bosley, by Sir Richard Tonson. Fifth dam, Nancy Nichol, by imp. Eagle. Sixth dam, Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Sterling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by Jolly Roger. Twelfth dam, by imp. Partner. Thirteenth dam, imp. Monkey. Fourteenth dam, an imp. mare from the stud of Harrison of Brandon. At \$50 the season, due at time of service.

Trotting Stallions.

ECHO.

Bay horse, by RYSDYK'S HAMBLETONIAN. First dam, Fanny Felter, by Magnolia, son of Seely's American Star. Second dam, by Webber's Kentucky Whip. Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato son of imp. Messenger. At \$100 the season, due at time of service.

ALGONA.

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian. First dam, Emma Kinkead, by Consort, son of Cassius M. Clay. Second dam, Edie Dean, by Mambrino Chief. Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy. At \$100 the season, due at time of service.

ALASKA.

Brown horse, by ELECTIONEER. First dam, by Washington, he by Geo. M. Patchen. Second dam, by Williamson's Belmont. At \$50 the season, due at time of service. The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents.

John Mackey, Superintendent, Sacramento, Cal.

THOROUGHBRED STALLION

X X.

Pedigree.

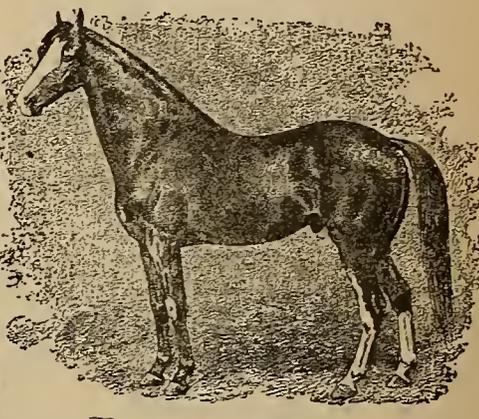

X X (Donblecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM. First dam, Columbia, by imported Bonnie Scotland. Second dam, Young Fashion, by imported Monarch. Third dam, Fashion, by imported Trustee. Fourth dam, Bonnets of Blue, by Sir Charles. Fifth dam, Reality, by Sir Archy. Sixth dam, by imported Mealey. Seventh dam, by imported Centinel. Eighth dam, by Mark Anthony. Ninth dam, by imported Janus. Tenth dam, by imported Monkey. Eleventh dam, by imported Silvereye. Twelfth dam, by Spanker.

See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79. X X (Donblecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the grandam of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Vauania, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhorter, Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc.), and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding bas as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition. Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

JOSEPH CAIRN SIMPSON,

Oakland or 508 Montgomery Street, San Francisco.

The Thoroughbred Stallion

JOE HOOKER.

BY MONDAY.

First dam Mayflower, by imp. Eclipse. Second dam Bennie Farrow, by imp. Shamrock. Third dam Ida, by imp. Belshazzar. Fourth dam Gamma's dam, by Sir Richard. Fifth dam, by imp. Eagle. Sixth dam Bet Bosley, by Wilkes' Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Stirling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by imp. Jolly Roger. Twelfth dam, by Partner. Thirteenth dam, by imp. Monkey. Fourteenth dam, imp. mare from the stud of Harrison of Brandon.

TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freeport road.

This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1883.

THEO. WINTERS, Sacramento, Cal.

TROTTING STALLIONS.

Standard Trotting Stallion

BILLY HAYWARD, 489,

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

THE ELECTIONEER STALLION

STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,650 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been baddled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:23), he by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont. Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred. Dam of Dave Hill by Vermont Hambletonian. Dam of Red Lion by Vermont Hambletonian.

J. J. FAIRBANKS

Oakland, January 18, 1884.

ATHLETIC.

A Pacific Coast Athletic Association.

We have hinted before in these columns our belief that the time had arrived for the formation of an association as described in this head line, and now openly suggest that some steps should be taken to secure that end.

Then again the amateurs here are as competent to make rules for their own guidance as are men 3,000 miles away, and all questions of doubt, reinstatement, etc., would be much more fitly submitted to a home organization.

An Alleged Champion.

This paper was the only one that in noticing the swimming match of a few weeks back explained that the race was not for the amateur championships as announced.

The Stockton Meeting.

Everything is satisfactorily arranged for a meeting of the Merion Club to be held at the race track at Stockton on the 4th of July.

- 100 yards race, handicap, open.
440 yards race, handicap, open.
1 mile race, handicap, open.

All entries to be made at the office of the BREEDER AND SPORTSMAN before 4 p. m. Saturday, June 28th.

Last November 30th, J. J. Theobald won the mile walk in 7 min. 24 1-5 sec. from the 150 yard mark, while at the last meeting of the Olympic Club C. B. Hill was the winner of the mile walk in 7 min. 30 1/2 sec. from the 125 yard mark.

They have never gambled on wrestling matches in Japan, and people with a speculative turn of mind in that line are punished by imprisonment.

Pedestrianism is on a boom in France. The Countess Potoka set the ball rolling by walking from Paris to Verailles, and now another Countess has laid a wager that she can walk from Paris to Monte Carlo in a given time.

Now that the training and racing season has opened, a word of caution to competitors will not be amiss. Be careful not to over step the bounds of judgment; exercise common sense; and remember that it is almost impossible for a well trained man to hurt himself in a race, and the cause of some being injured may be attributed to the simple fact that they were either too young or improperly trained for the contest.

We want the athletic statistics of this year to be devoid of any cases of over exertion or injury. Help us to prove that there is more health and less injury, both physically and morally, in honest competition and careful training than some people are at present willing to believe.

For more than twenty years "physical culture" has held a prominent place in the curriculum of Amherst College. No department has proved so universally popular, and it is perfectly safe to say that no department has produced more beneficial and lasting effects upon the students.

W. Snook, the well known English amateur, is gradually recovering his old form, judging from recent performances.

BICYCLE.

The scratch half-mile Bicycle race, to take place at Stockton on the 4th of July, will no doubt bring together the very best performers on the Pacific Coast, and should the track be in good condition—and there is every reason to believe that it will—the record will surely be cut down.

A 53-inch Rudge racer has just arrived in this city for John S. Prince. It weighs 27 pounds, and will be the finest and highest cost machine ever ridden by the champion.

Hendee says that no man in the country ever pushed him so hard as Frazier, and that the latter is one of the best in the country.

Charlie Palmer, one of the fastest amateur riders in England, has written to his brother in this country, that he will be here in time for the Springfield races.

THE DRAMA.

Vienna Gardens.

Although the absence of the Gypsy Band shows what attraction they were to cultivated and musical people, the houses have not been really poor, though the performance has assumed more of a variety character than we like.

A Son of Rifleman in Montana.

Mr. Wm. Flannery, of Gallatin county, Montana, is the owner of the bay horse Turf Gallery, by Rifleman, dam Emma Barnes, by Norfolk, from Evadne, by Winnebago.

Your horses will enjoy a good bath as much as you will yourself if it is given in the proper way. The water should not be cold enough to chill them, and a good large sponge is the best thing to use in bathing them.

Sam Gamble has resumed business as trainer and driver, and is at present at Sacramento. He is a competent and reliable horseman.

Sybil II.

Mr. Thomas Benuett's English setter bitch Sybil II, ex Dan-Sybil, whelped eleven puppies on Wednesday last, to same owner's Regent ex Royal Duke-Gift.

In another column will be found the advertisement of the California Powder Works, the oldest and most prominent in the State. Going, as our paper does, to almost every man in the State who uses a rifle or a gun, as well as to all the sportsmen's clubs and military organizations in the State, we desire to call their attention to the duty of using home-made powder.

Dissolution Sale of Trotting Stallions, BROOD MARES, Roadsters, Colts, Etc.

In Consequence of the Dissolution of Co-partnership of Messers NEWLAND & PUNYEA, we will offer for sale on SATURDAY, July 19, 1884,

OAKLAND TROTTING PARK,

FIFTY HEAD OF WELL-BRED HORSES. AMONG the yearlings and two-year-olds are the get of Steiway, Grand Moor and Posora Hayward. The brood mares are principally Hambletonian. The stallions are the well known Grand Moor, by the Moor, dam Vashiti, by Mambrino Patchen; and the two-year-old colt by Newland's Hambletonian (he by Speculation) out of Phaeola by Silverthreads, her dam Minnehaha, dam of Beautiful Belle, Eva, Sweetheart and others.

KILLIP & CO., Auctioneers, 116 Montgomery St., SAN FRANCISCO.

IMPORTANT BREEDERS' SALE OF Trotting Stallions, COLTS AND FILLIES, Brood Mares, Roadsters, WORK HORSES, Etc.

The Property of S. J. TENNENT, at his Ranch, PINOLE STATION, Near Martinez, upon the line of the C. P. R. R., at 10:30 A. M. on THURSDAY, July 24th, 1884.

THIS SALE WILL BE ONE OF THE MOST important that has yet taken place in California, and will include Colts and Fillies by Echo, Steiway, Whipple's Hambletonian, Arthurton, Pinole Patchen, Alexander, Gus, Reliance, and other noted Stallions.

ASHLAND PARK TROTTING STUD NEAR LEXINGTON, KY. B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Buck Hawks, At Ashland Park you may see splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star, Manbrino, Bourbon Chief, Regular, Balsera, Howard's Mambrino and Homer.

- No. 18 RUNNING—Four mile dash—Purse \$1,000; four monies.

### Remarks and Conditions.

All trotting and pacing races are the best three in five, except the two-year-old trot, unless otherwise specified. Five to enter and three to start in all the above races. But the Board reserves the right in all the races in the above programme to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. Purse of four monies divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and ten per cent. to fourth.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over, shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66-2-3 to the first, and 33-1-3 to the second.

In all races, entries not declared by 6 P. M. of the day preceding the race, shall be required to start. Where there is no more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance, under Rule 3.

Racing colors to be named in entries.

In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entries to all of the above races to close with the Secretary on Friday, August 1st, 1884.

L. WALKER, Secretary,  
Office, 26 Montgomery St. S. F.  
P. O. Box 2360.

## Important Sale of Thoroughbred Horses.

BY DIRECTION OF

THEODORE WINTERS, ESQ.

We will Offer for Sale

Thursday, July 17th, 1884.

At the Stables of C. H. SHEAR, opposite Agricultural Park, Sacramento,

Seventeen Head of Thoroughbred Horses' COMPRISING

All his two-year olds and yearlings, together with the crack three-year-old Prince of Norfolk and the famous hurdle mare Hatie E.

It is Mr. Winters positive intention to retire from the turf and confine himself strictly to breeding. Hence his entire string will be offered without reserve. The colts in training will be galloped until day of sale, that they may be kept in order for racing purposes. The horses may be seen previous to sale at the Winters' Ranch, Riverside Road, near Sacramento. A competent Veterinary will be in attendance, to make all examinations desired by purchasers. Killip & Co. will execute commissions for intending buyers who cannot be present.

Catalogues giving full pedigrees, etc., will shortly be issued. For information apply to

KILLIP & CO., Live Stock Auctioneers, 116 Montgomery Street, S. F.

## AUCTION SALE

—OF—

Pure Bred Jersey Cattle,

THE PROPERTY OF

ROBERT BECK, ESQ.,

—TO TAKE PLACE—

Thursday, July 17, 1884.

IMMEDIATELY UPON THE CONCLUSION OF THE sale of Mr. Winters' horses, we will offer twenty head of THOROUGHBRED JERSEY BULLS, COWS and HEIFERS, all registered in the American Jersey Cattle Club, and in Pacific Coast Jersey Cattle Club Registers. These cattle are of the choicest milk strains, being chiefly descended from Touchstone, the most famous Jersey bull imported into California. Several high grade cows and heifers will also be offered.

The sale will take place at stables of C. H. Shear, opposite Agricultural Park, Sacramento. Catalogues giving pedigree and full information will be issued in a few days.

KILLIP & CO.,

Live Stock Auctioneers, 116 Montgomery St., SAN FRANCISCO.

Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge.

CHARLES J. ELLIS, Owner. WM. DONATHAN, Agent.

Mambrino Trotting Stallion

ABBOTSFORD.

Record 2:19 1-2.

WILL MAKE THE SEASON OF 1884, AT THE BANCH OF S. B. WHIPPLE; San Mateo, Cal.

PEDIGREE.

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Paymaster...

TERMS.

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge.

WASH JAMES, Agent, San Mateo, Cal.

The Trotting Stallions

DIRECTOR AND MONROE CHIEF

Will make the season of 1884 st

Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates.

Director, 2:17.

Blsek horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallas, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:22 1/2); by Mambrino Chief; second dam by Potomac; third dam by Saxe Wienia.

Monroe Chief, 2:18 1-4.

Two-mile record, 4:46.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whip stock.

For further information address

JOHN A. GOLDSMITH, OAKLAND TROTTING PARK.

The Trotting Stallion

BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Pennington, Philadelphia, Penn. By HAPPY MEDIUM, dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian.

Lady Turner, by Frank Pierce, Jr., dam by his grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

J. B. McDONALD.

2:20 1-4.

The Fast-Trotting Stallion

ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTORER. First dam, Columbia, by A. W. Richmond. Second dam, Columbia, by imp. Bonnie Scotland. Third dam, Young Fashion, by imp. Monarch. Fourth dam, Fashion, by imp. Trustee. Fifth dam, Bonnets of Blue, by Sir Charles. Sixth dam, Reality, by Sir Archy. Seventh dam, by imp. Medley. Eighth dam, by imp. Centinel. Ninth dam, by Mark Anthony. Tenth dam, by imp. Janus. Eleventh dam, by imp. Monkey. Twelfth dam, by imp. Silverve.

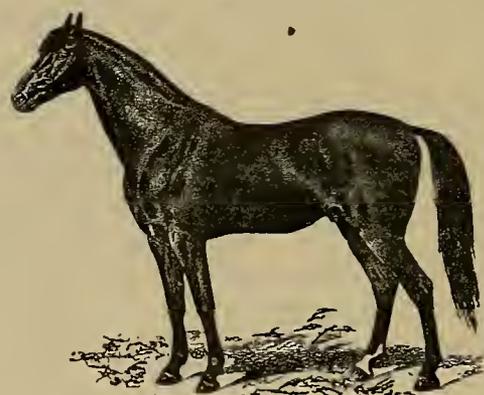

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents. Anteeo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs.

For further particulars address,

M. ROLLINS, Agent, Santa Rosa.

MAMBRINO WILKES.

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE FAYETTE COUNTY, KENTUCKY. Mambrino, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christmas by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Rip-ton's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,250 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this present sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

TERMS.

\$40 for the season, or \$25 single service. This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

A. L. HINDS, Agent.

The Trotting Stallion

STEINWAY,

With two-year-old record, fourth heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

Terms.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County,

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes.

Description.

He is a bay, 15 1/2 bands high, weighing 1,175 pounds, long flowing mane and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Strathmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31 1/2, winning the two-year-old stake at Lexington last fall, heating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Claus, 2:17 1/2; and Tucker, 2:19 1/2; Chestnut Hill, 2:22 1/2; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28 1/2; Henderson, 2:28; Strathlin, three-year-old, 2:29 1/2; and Stuart, three-year-old 2:28. Stuart is full brother to Belnor, who trotted a mile in 2:52 at fifteen months old. Benford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23, and he in turn got Governor Sprague, record 2:20 1/2; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbera, Admission, Mystery, in 2:39, 2:32, 2:31. Memento won the first heat. As three-year-old, at Sharpsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35, Bushwacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30, 2:30, Steinway winning fourth, fifth and sixth heats, heading Jewett, Catby and two others. At the fall meeting of the Horse Breeder's Association for the Kentucky Slakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:24, 2:24 1/2, by Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23, 2:27 1/2.

GEORGE WILEY,

Cook Farm, Danville, Contra Costa Co., Cal.

THE TROTTING STALLIONS

SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO JULY 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

PEDIGREE.

Singleton is by Willie Seppner, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Euris, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Frise, yearling record 2:41 1/2) by Flaxtal, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Lefler's Consul, by Shepper's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

LA HARPE

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star (son of Pruden's Star by Blacklegs). Ist dam by Bonapartes, 2nd dam by Gallatin (8811). La Harpe's dam Prairie Bird by Flaxtal (dam of Flight, 2:23, and Prompter, 2:33). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Lefler's Consul. Irwin's Tuckahoe by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

TERMS:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge. La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

J. T. McINTOSH, Box 60, Chico, Cal.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year old trot, unless otherwise specified: five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. Trotting and pacing purses divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and ten per cent. to fourth.

National Association Rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66 2-3 to the first, and 33 1-3 to second.

In all races, entries not declared on by six p. m. of the day preceding the race, shall be required to start. Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over. Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance, under Rule 3. Racing colors to be named in entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entries to all of the above races (except fixed events) to close with the Secretary on Friday, August 1st, 1884. Entry blanks and racing rules will be furnished upon application to the Secretary.

P. A. FINIGAN, President. E. W. F. SMITH, Secretary.

REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations. Horses distancing the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the Judges. The Pacific Coast Blood Horse Association Rules to govern all Running Races. Non-starters for Running Races will be held for entrance.

Non-starters must be declared on the day previous to the race they are engaged in, before eight o'clock p. m. In all Running Races the second horse saves entrance. No money paid for a race without a contest. All entries for Races to close with the Secretary or President, at Chico, July 1st, 1884, at ten o'clock p. m.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition. The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

C. C. MASON, PRESIDENT. ROLAND DILLER, SECRETARY.

Los Angeles Fair Association, Los Angeles, October 13th to 18th.

### Pendragon on the Derby.

Pendragon always writes pleasantly. In the following disquisition on the Derby, the merits do not rest entirely on pleasing diction as there are many suggestions that are well worthy of consideration. He has evidently stronger objections to "letting up" than we have expressed, deprecates the practice almost as vigorously as Governor Stanford, who characterizes two long let ups as the equivalent of one breakdown. Shorts breaks in the work, such as Harvester was subjected to, frequently are beneficial, best if the training has not been carried too far, or the races of unusual severity, idleness surely entails a loss of condition.

A Frenchman it was who told us that there is nothing certain but the unexpected. Had he been an Englishman, and a racing man at that, and had he remained equally witty, he might have managed to strengthen up his epigram. Truly, nothing is so ready to hand as racing for the purpose of proving there is nothing certain but the unexpected. Racing is essentially an English pastime. Though it flourishes in an intermittent manner abroad, to see it at its best, as well as at its worst, one must see it in England. Also it now appears as though, if one wishes for a real, right-down, unmitigated racing surprise, an eye-opener which puts all previous eye-openers into the shade, he must go to England and to English racing for it. In the way of a mild sort of reversal of public form, the French Derby, which resulted in the victory of Little Dnck, with Archiduc second, was noteworthy. At one time such a reversal as that in the French Derby would have made people wag their tongues for a week, but we have changed all that, and the victory of a horse who on public form had not a million to one chance—beforehand—is now merely one of the events of any racing season. Up to Wednesday last it might have been supposed that every possible way of upsetting public form—of showing how races are lost when it seems as though they must be won, and won when it seems as though they have been already lost—had been used up; but on Wednesday we may be said to have taken an entirely new departure. Just as in literature and the drama, art, politics, and science, at the moment when it appears as though things were set and fixed forever, when it appears as though we had exhausted every known form of talent, when it appears as though a novelty were absolutely impossible, something that could not by any possibility have been foreseen comes to pass, some new star shoots suddenly to the front—so on Wednesday we were introduced to an entirely new way of being successful in the Epsom Derby.

Let us premise that the Epsom Derby is admitted on all hands to be the greatest race of the season. There may be people prepared to dissent from this view. Probably there may be people audacious enough to say that the best race is that which is contested by the best horses. Others may say that the best race is that which produces the best (and the most) betting. Views are permissible various in this regard, and yet sometimes it appears singular to find that the only reason that can be given for the Epsom Derby being the great race over all of the year is because it attracts the greatest number of people. Even this is a moot point. I have before now met men who would bet that the Doncaster St. Leger brings a bigger crowd to the Town Moor than the Epsom Derby brings to the downs which it has made immortal—not only immortal, but remunerative to those who ought never to retire to rest without blessing their stars to think that the Derby has, without anything in the way of added money, achieved its present position. Every now and again

the Derby can put forward a claim on its own account. Every now and again it is known to have, or it appears to have, the admittedly best horse, perhaps two or three of the admittedly best horses of the year among its runners. Every now and again it brings about a struggle between two "equine giants" such as forms the subject of legendary lore for years, perhaps for generations, afterwards. Every now and again it introduces us to an international struggle of itself sufficient to mark an epoch in turf history. Every now and again it is lifted by some extraneous means or other out of what would otherwise be its slough of despond by the good fortune which has attended it so far as the memory of man goes not back to the contrary.

As I take it, the fact that the Derby attracts the greatest number of sightseers, even if the statement be true, should hardly make it the greatest race of the year. Especially in this case when the sightseers are sightseers only, when ninety-nine out of every hundred of them know nothing whatever of racing in general, care nothing whatever about this race in particular, and only go to the downs because it is the fashion to do so, and because it gives them the opportunity for a day's outing or a day's dissipation. The crowd which looks on at the Doncaster St. Leger is of a totally different description. In horse-worshipping Yorkshire and all the adjacent counties which send their thousands to swell the crowd upon the Town Moor everybody knows something more or less, about horse-racing. It is hardly possible to imagine two crowds more distinct in their constitution, their tastes, habits, and ideas of things in general, than the two crowds, one of which looks on—if it may really be said to look on—at the Epsom Derby, and the other of which looks on with an intense and soul-absorbing interest at the Doncaster St. Leger.

It is not my purpose to discuss here at length whether or not the Epsom Derby is or is not the greatest race of the season, or to analyze the characters and conditions of races which may be said to stand as rivals round the throne. But it is only fair, after what I have already said, to add that the Epsom Derby, whenever it appears to be losing its first and greatest, or what should be its first and greatest, claim upon public consideration, has a way of reasserting itself which is nothing less than phenomenal. We get a case in point, and a very strong case, too, by means of the Derby just over. The horses engaged in it were known to be of a comparatively inferior order. Owing to short-sightedness or mischance, the undoubtedly best horses of the year were not engaged in it. St. Simon, Busybody, Duke of Richmond, Archiduc—these and others known or suspected to be the equals, if not the superiors, of the best in the Derby field, were outside the battle. A few years ago and such a position of affairs would have been impossible. Every owner of anything like a promising yearling felt it his hounden duty to give such yearling a chance of gaining what has been times without number described as the blue riband of the turf. Then for any man to say that the Derby winner was not absolutely the best horse of the year would have been for such man to cover himself with well-merited ridicule. But as years roll on it appears as though owners of horses are gradually becoming dubious about casting their subscriptions into a common fund which has nothing added to it for the purpose of making it look tempting to any but those who have immense faith in the capacity of their youngsters.

When such a change once sets in, believe me, its course is rapid. These are undeniably the days of added money; days such as would not have been considered possible even so recently as a dozen years ago. It is not only possible but probable that what we have discovered this year will show itself more strongly still in the immediate future. Owners will reserve their horses for stakes which are rich not because the entry fees are abnormally heavy, but because of the generosity of the proprietors of the course upon which they are run. With every recurring year we may more and more reasonably expect to find that there are at least three or four horses unentered for the Derby who are undoubtedly superior to any of those who will run in the race which once gave its winner an undoubted and undisputed premier-ship. Still, notwithstanding that this is at least as true as anything else that can be found in the way of turf prophecy, it has to be conceded that up till now the Derby has a way of vindicating itself and of offering us something that we do not as a rule get elsewhere. Some years it is one thing, some years it is another. Some years it is undoubted excellence, some years it is an extraordinary result. Some years it is the softest and smoothest course known, some years it is the driest and hardest. Some years people are carried off the stands knocked over by sunstroke, some years they are carried off only to be revived by hot flannels and bot, (and strong), brandy and water. Some years the race is run in a snowstorm, some years in a drenching downpour. These

are not themselves remarkable features; they must be taken in regard to the fact that the Epsom Derby is supposed to introduce us to mid-season and the hottest portion of the Summer solstice. Anyway, the Derby has a very extraordinary style of asserting itself, rehabilitating itself, and laying claim on special mention; and this brings me back to one of the statements with which I set forth—that the Derby of 1884 has asserted itself in a way which is entirely unprecedented.

At the present moment I am—and I am very anxious to admit it—not at all sure but that everything that has been said in the foregoing paragraphs about late years' lack of quality in the Epsom Derby is altogether incorrect, inasmuch as by means of Harvester's dead heat with St. Gatien, we must have been introduced to a horse of phenomenal calibre. If there is anything in the way quality is measured, if there is anything in the way horses are trained, if there is anything in experience, practical or theoretical, if there is anything in anything past, present, or to come—why, then, Harvester must be not 14lb. the inferior of St. Simon, but a good 14lbs. his superior. This looks like heresy. Perhaps it is, using the word heresy according to its etymology and its original meaning. Of this I am certain, that St. Simon, great and good a horse as he is, could not be stopped in his work four or five days before a race, no matter how well he was previously, be restricted to walking and trotting exercise, and a very small amount of that, and then run a dead heat with a perfectly trained horse against a perfectly trained field over a course so renowned for its difficulties and dangers as the course upon which Harvester ran so well on Wednesday. But this is not all. I submit that St. Simon could not do as Harvester did, even though he was simply stopped in his work for the sake of experiment. What then can be said to appropriately chronicle that which has happened, when a horse is stopped in his work because of decided injury to one of his fore feet and suspicion of unsoundness about the other one, and yet four or five days afterwards he does as was done by Harvester? Truly, we have, just when we appeared to be in the deepest depths of our degradation, come upon a performer of efficient ability to make the best and brightest of our previous performers seem mean and paltry by comparison.

In looking at what was done in the Derby it must not be forgotten that the course was in a condition such as would offer apparently insuperable difficulties to a horse whose legs were in any way unsound. I have seen it stated several times in print that the course was as hard as an ordinary turnpike road. This is no figure of speech—as a statement of fact it is under rather than over the mark. The herbage upon the course was of the scantiest, and the ground from its chalky nature had become more like asphalt than anything else that can be easily mentioned. An ordinary turnpike road, such roads as run in the neighborhood of Epsom, which are of gravel and chalk loosely mixed and favoured with a good soft coating of dust, would be much more fit for a hard gallop than the course itself, as the course was on Derby Day. There was none of the usual "thunder" which generally accompanies a close finish on turf. The horses' hoofs rattled just as they do upon the Queen's highway. And after a mile and a half of this to see a notoriously unsound horse like Harvester wear a well-trained and highly tried horse down inch by inch, and then pull up and return to the weighing enclosure full of life and jollity, just as though he had only been out for an exercise canter, is something to remember. Assuming that all we have been told about Harvester's stoppage in his work was true—and I must say that since the race I have seen nobody who has, in print, cared to cast the slightest doubt upon these stories—then we must reckon that Harvester is not only the speediest horse, all difficulties of preparation remembered, that we have ever seen, but that he is also the stoutest and the staunchest.

With regard to the stopping of animals in their work, perhaps my opinion may be worth taking. I can well understand a horse being stopped altogether for one day—can understand his being eased slightly for two or three days—without his suffering. Indeed, where he has been overdone, he may be highly benefited by rest and change; but to be stopped four complete days would by the fifth put a good 14 lb. impost upon his previous prospects. Anybody who knows anything about getting horses or men into condition knows that directly they are down to their weight, anything like idleness causes the tissues to become coated with fat again with alarming rapidity. Notoriously one day's idleness will put on as much as a week's good wholesome work will take off. Thus it is that though one day's rest may benefit an overdone horse, such a thing as four day's rest—not because he was overdone, but because he was unsound—with a retention of the ability to do

mile and a half at the pace necessary to win a Derby, is simply impossible; or rather it was until Harvester's show in this year's Derby.

Perhaps the most extraordinary part of this business is that Harvester, either in the paddock or on the course showed no signs whatever of his previous inactivity. He was to all outward appearances in magnificent condition, full of life, and yet not the least bit above himself. He moved so freely and looked so well that even those who had doubted his ability, when at his best, to win so great a race, especially with two stable companions in the ring and had a little quiet investment in his interest. Another equally phenomenal part of the business is that those who did not see Harvester—those who eschewed the paddock or, for the matter of that, stayed here in London—were determined not to let Sir John Willoughby's colt run without having at least sufficient on him to save their other money. The wisdom of the professional punter may not be in any way as great as that of the proverbial serpent, but it is a wisdom which comes of practical experience; and so the way in which they clung to Harvester, despite the evil reports circulated with regard to him, strikes me as being nothing less than extraordinary. Feverish men were to be seen on the course waiting anxiously for the numbers to go up. They had instructions directly they saw the number of Harvester hoisted to be sure and get their money on him. Really, judging by this, and judging by the way in which his victory or his half-victory was received afterwards, I appear to be the only person about who has any cause for astonishment. Well, I will plead guilty to being astonished, and very much astonished. There is nobody more ready than myself to admit that of all the horses who started there was none whose victory was less expected by me than the victory of Harvester. Which brings me back to another of the statements with which I began—that in this world, or at all events in that portion of it which has to do with racing, there is nothing so certain as the unexpected.

More than once I have heard it stated on authority that racing is very much like life, and that life is very much like racing. Without staying to analyze the assertion, which is said to be capable of every proof, I may suggest that the racing on my page will be more than usually like life this week. "Life is as tedious as a twice-told tale, vexing the dull ear of a drowsy man." It is not only a twice, it is a two hundred times told tale, the tale of what happened on Epsom Downs last Wednesday; but although I have spent so much time over the moral of what happened, it would ill become me as a sporting critic and historian were I—especially after having taken the trouble to go down and get almost frozen to death—to conclude without relating what I saw while the races were being run and immediately before it. So, even at the risk of appearing unduly tedious, let me obey the call of duty. Although after the first race the crowd swarmed upon the course and looked as though they never could be got off it again within the given time limits, Superintendent Gernon and his merry men got to work directly the numbers went up and the bell began ringing, and got the track clear with marvelous celerity. The hoisting of the numbers and the names of the jockeys was watched with intense interest, as everybody appeared crazy to know whether Harvester would run or not. As he was absolutely last on the card, and had no jockey attached to him, grave doubts were entertained as to his going to the post. As a rule there are several horses on the card who do not put in an appearance. Following the example set last year, every one of the fifteen named on the official list was placed in charge of the starter. The parade and the canter were quickly got through, the only absentee being Richmond, who, in conformity with the mystery which has been maintained in regard to him throughout, went quietly to the post, and remained there until he was joined by the rest of the horses.

One of the features of the preliminary was the difficulty the majority had in discovering which was Harvester. Though given on the card as running in Sir John Willoughby's colors, white and yellow cap, his rider, S. Loates, appeared curiously decked out in a jacket the most noticeable portion of which was yellow. Why? When he was at last recognised everybody was astounded at the manner in which he carried himself in the parade, also at his graceful and easy action during the canter. At the post Mr. George, after one trifling break away, in which Hopeful Dutchman was prominent, sent the lot off to one of his best starts. A noticeable feature of the beginning was that Archer, contrary to usual custom, did not take up his place near the rails, but contented himself with the centre. To me it looked as though the race was run at a most rapid pace from start to finish. Several outsiders seemed determined to make up in strength what they wanted in speed, and try and settle their more highly fancied opponents by rattling them over the hard ground as fast as they could gallop. This it was that the field ran better and closer together than is usually the case, none of them, not even the best, being of class enough, so far as previous exhibitions went, to lie off, and depend upon their opponents coming back by the time the straight for home was reached. For a long way going up the hill and on the high level Hopeful Dutchman was prominent, but directly the turn for the lower ground was made he disappeared. All those who were supposed to have any chance at the start were pretty well together when the turn into the straight was made, the disappointment being with St. Medard, who was expected, first owing to his handy and "cricket-ball" like conformation, and second owing to the services of Archer, to come down the hill with great ease and secure a good lead by the time the straight run-in was made. Really St. Medard was never in the hunt "when the row began." Another noticeable feature of the turn for home was the strange way in which Webb on Queen Adelaide managed to get himself blocked. He seemed to have lost his head and forgotten the clear road on the upper ground he has used with such advantage in years gone by.

The first to go of those prominent when the lot were well in the straight was Richmond, and soon open order was taken by all still in the running. Noarer and nearer the leaders came on; and people who were watching him gradually began to realize that one horse who, according to all previous considerations, should have shot his bolt even before the sharp turn and dangerous descent had to be made—Harvester—was coming along for home, and going, to use a popular expression, like a steam engine. Presently Loch Kanza, whose name had been in many men's mouths, tumbled off. Then Borneo stopped to nothing, and loud shouts were raised for Talisman, who looked dangerous, but who began to make his effort a trifle too early. Soon he too was done with. Queen Adelaide ran through as the others fell away, and looked as though she would, despite her disappointments, come easily to the front; when all of a sudden, just as the stands were being approached, out came St. Gatien going as well and apparently as fresh as when he started. It was evident that Queen Adelaide could not live

by the side of him, and for full fifty yards it appeared as though the as yet unbeaten colt of dubious paternity would be returned a somewhat easy winner. But, to the astonishment of everybody—to the astonishment and consternation of those who had taken undue liberties with him—and received by a roar such as has rarely been heard even on Epsom Downs, Harvester shot forth and commenced gradually to overhaul the leader. The struggle for the last two hundred yards was as exciting as has ever been seen on any race-course. Wood was riding St. Gatien all he knew, and doing all that the most cunning of his craft could do to extract the additional six inches which makes all the difference between winning and losing; but Loates, who rode patiently and well, gradually gained—so gradually, however, that those who were in a position to watch the finish held their breaths suspended, and wondered whether the cripple could last long enough to make up the short but all sufficient distance which still separated them when only a dozen yards was left to reach the winning post. Two strides from home St. Gatien was in front, but just as they passed the chair Loates, by one superhuman effort, got his horse up level, and the first dead-heat that the Derby has known for fifty-six years had to be recorded.

I have since heard and read that Queen Adelaide was third. Of this I know nothing myself, as so wound up was I, so spellbound watching the other two finish, so knocked into a cocked hat by the spectacle of a horse rising as it were from the dead and finishing with a stouthead the superior of which after so fast run a race on such terribly hard ground has never been seen, that if the remaining thirteen had finished all abreast two lengths behind the dead-heaters I should never have noticed them. Had the race been ten yards further Harvester must have won, as he was going great guns at the finish. He looked as if he would have liked to go round and begin again. This has led some folks to suggest, Loates not being yet so fashionable as to be beyond all criticism, that had Harvester come just a wee bit sooner he would have won handsomely. This is an ex-*post-facto* kind of argument which does not commend itself to my way of thinking. Loates rode wonderfully well, and it was very wise of him, seeing that he had what everybody, including owner, trainer, rider, and the whole confederacy, believed to be an extremely unsound horse under him, not to come until he was actually obliged to do so. It is a very good thing for Loates that he did not come before, as if he had done so and then been ridden down by Wood, in the way Wood was ridden down by Loates, what oburgations would have been heaped upon this rapidly rising jockey! Wood, of course, stands too high in his profession to be roughly handled; but of the two pieces of riding Loates' was decidedly the superior.

Naturally everybody was anxious to know whether a decider would have to be run or whether the owners would agree to divide the stake. Discretion proved the better part of valor with both of them, and without a moment's consideration Sir John Willoughby and Mr. Hammond decided to rest satisfied with what had already happened. There was no walk-over, the new rules having done away with that absurd bit of routine. Division was by far the wiser course, as no one could say what might have happened after such a desperate gallop. It would have been a most ungracious thing to put another jockey on Harvester, and I am not sure that even if the great Archer himself had heeup put up the result would have been any better, notwithstanding the fresh and almost saucy appearance of Harvester after he was unsaddled. It must be borne in mind that although St. Gatien has never done anything wonderful before this, he has done all that has been asked of him. No horse can do more than win. He is not responsible for the class of those who go down before him. St. Gatien, before the Derby, won whenever he had an opportunity, and there is really no knowing how good he is. There is really no knowing how good his performance with Harvester makes him. Harvester must, at present at all events, rank as one of the most exceptional performers of the century.

So as not to give readers an unduly large share of any one subject, I have been through the preceding two or three times with a view to cutting it down. Whether it is egotism, or whether it is horror at the idea of having to sacrifice anything I have once committed to paper, I know not, but I certainly do not see my way to telling the story—such a story—and fixing the moral of it, in less space than has been used by me for the purpose. As it happens, there is little enough else that requires handling at anything like length. It is a peculiarity of Epsom that if one race is at all remarkable it appears to take to itself the remarkability of all the other races. On Thursday the Grand Prix—which, as it has £1,200 added, and as it is run over the much-fancied City and Suburban course, was expected to be a very great feature of the Summer meeting—drew nobody to Epsom. The weather was wretchedly cold and dull, and the attendance was of a decidedly off-day as well as off-color description. Cherry, who, notwithstanding the fact of her being a June foal, seems to be one of the flying division, won well by half a length from Kinsky. The rest were beaten off or pulled up, Magdalen being a very bad third, after others had declined the position. St. Medard was either upset by his efforts of the day before, or he was awfully fortunate to get where he did in the Two Thousand; anyway, here he ran very badly. Class of an undeniable kind was exhibited by Thebais in the Royal Stakes. This magnificent mare got home in front with 9st 12lb, not without a desperate struggle, the runner-up, (beaten only a head), being Coroua, 4 yrs., who was in receipt of 47 lb. This is, to my thinking, a very great performance, the wonder being, when we remember how often a couple of pounds has changed the fortune of a race, not how it was Thebais won so little, but how she managed to win at all. The rest of the racing was poor, even to those who rarely or never criticise a programme until afterwards, and then only on the score of whether it has been good for them or otherwise.

With Friday came a return of the great heat-wave, and the glass went up with a bound. Naturally the attendance went up with it. As everybody expected Busybody to win, nobody can well be surprised at her winning. The only noticeable feature to me about Busybody's victory is that prophets are not often at once so unanimous and so successful. She is a fine filly, and it is well to know that so far as her sex is concerned the so-called classic races—why classic I never cease to wonder—stand well to the front on the score of quality. Superba's second surprises nobody, though it makes her name appear singular; and Queen Adelaide holds the exceptionally new position of third in both the Derby and the Oaks. Perhaps 'tis better to have run and lost than never to have run at all; but really, after her severe race on Wednesday, it was scarcely worth while starting her over the same ground two days afterwards, except on the very decided off-chance. The merciful man is merciful to his beast; but then the merciful man is rarely a red-hot plunger. It is bound to be some time before Queen Adelaide recovers from the shaking such a big-framed mare must have

received this week at Epsom. Nobody dared dispute St. Simon's claim on the Gold Cup, so he was indulged with a walk-over. Let us hope this sort of thing will not occur at other meetings; however good St. Simon may be, it strikes me that at weight for age there are at least three horses—strangely enough all ladies—who could over various distances make a very respectable fight with him.

An objection lodged against St. Gatien for the Derby on account of insufficient or improper description created as much excitement among backers all day Friday as the dastardly dynamite outrage did later on among the general public. That the objection is frivolous I have no hesitation whatever in stating. At the same time it is nonsense for anybody to say that it will not interfere with settling. The objection lodged against Inveresk for the Chester Cup in 1872, which up till now has stood as perhaps the least warranted on record, will have to give way to that laid against St. Gatien. Because there happened to be two or more Rovers, the paternity of St. Gatien if said to be doubtful although everybody is agreed that there is not the shadow of a shade of doubt that no Rover but the Rover by Blair Athol—Crinon could by any possibility have been concerned in St. Gatien's paternity. If Rover, by The Flying Dutchman—Ghuznee, were really alive at the time, which is very doubtful, he was not within many a mile of the place while St. Gatien was being begotten. As one horse was called The Rover, and the other Rover only, this alone should make the objection void. It has hitherto been held by the Jockey Club, by Messrs. Weatherby, and by all other racing authorities and officials, that the word "the" prefixed to a horse's name was as much part and parcel of his name as any other word, and that it was quite sufficient to distinguish him from any other horse of the same name but without the qualifying article. The only ground for objections of this sort—among sportsmen—is that some wrong has intentionally or unintentionally been done; some fraud perpetrated.

Although the fact has not yet been stated, the objection must have been laid by Sir John Willoughby, or under his direction. I commend the news to those who have been so ready since his success on Wednesday to sound the old, old trumpet of lavish and unstinted praise, and to bend the neck in all too willing and unfortunately all too congenial adulation. So far as can be discovered, the objection is to be carried forward to Ascot, leaving everything and everybody in a state of confusion. As nobody can say with certainty—let the merits of the case be as they may—what would be the result of St. Gatien's disqualification, it is only natural that settling will be considerably interfered with. The law appears plain enough, but it is capable of various interpretations, and according to the reasons given by the stewards in the event of their disqualifying St. Gatien, so would an opportunity arise of claiming wagers which according to the judge's decision were lost. In the face of all this it is nothing short of extraordinary that the stewards of the Epsom Meeting should have postponed consideration of what could hardly have taken five minutes to decide, but, which, hanging over, will be made a source of widespread vexation. It is rumored that a meeting of the stewards was to be held to-day, Saturday, with a view to settling the matter out of hand. I should think, however, this is only rumor.

#### Scenes of a French Race-Course.

Horse is the order of the day, and the Parisians are now enjoying the excitement and surprises of the great racing fortnight which began yesterday with the Chantilly Derby, and which will continue next Sunday with the Grand Auteuil Steeplechase, and end on the following Sunday with the Grand Prix. During this fortnight the materialism of French life manifests itself in the highest degree, and the pursuit of pleasure seems to be more than ever the unique preoccupation of the whole population. It is always a marvel to the stranger in Paris to see so many people of leisure sitting at the cafes, lounging along the boulevards, sunning themselves in the public promenade and gardens, riding and driving in the Bois de Boulogne, dining sumptuously in gilded restaurants, and apparently leading a life of pure leisure, exempt from all duties and all cares.

In all public resorts the stranger will be struck by the same affluence of apparently well-to-do people of leisure. At the Meissonnier exhibition, at the Salon, at the flower show, the visitors daily number many thousands; at the open air restaurants in the Champs Elysee such is the affluence that tables are retained a week in advance; at the summer circus on the two fashionable nights almost all the seats are held by subscribers for the season; on Tuesday and Fridays the immense Hippodrome often holds its maximum of 6,000 persons. But this is nothing compared with the multitude that can always find time to go to the races, both on week days and on Sundays. Horse racing and its accessories may truly be said to be the most popular amusement of the modern Parisians, and to be at present the most democratic, after having begun as the most aristocratic of pleasures.

During the Spring and Autumn hardly a day passes when there are not races somewhere in the environs of Paris, at Acheres, Saint-Ouen, Vincennes, Vesinet, Maisons-Lafitte, etc.; almost every Sunday there are races on the great Parisian hippodromes of Longchamps or Auteuil; the Chantilly week is one of the great events of the Parisian season; and as if this were not enough, the recently established Riding and Coaching Club has organized so-called private meetings for gentlemen riders at La Marche, a beautiful village between Saint-Cloud and Versailles. To describe one of these race meetings is to describe them all; the main features are the same; the elements of the crowd are the same; the only difference is in the vastness of the multitude which reaches the scene on the Sunday of the Grand Prix, when the usual Parisian public is re-enforced by thousands of provincials and foreigners, who find in the Grand Prix a pretext for a holiday.

But let us take an ordinary Sunday meeting at Longchamps or Auteuil. Soon after 12 the boulevards are invaded by immense breaks, huge vans covered with tents and drawn by five stalwart horses with jingling bells on their collars. The driver is dressed like a theatrical postillion, and wields an immense whip as he cries out in a hoarse voice, "Voilà pour les courses!" ("Here you are for the races!") In these and in other less well appointed vehicles the populace is conveyed up the avenue of the Champ Elysee, and through the Bois de Boulogne to the course, unless they choose the still cheaper route by river steamer or railway. People higher up in the social scale go in those agreeable little victorias that serve as cabs in Paris, in hired vehicles of all kinds, or in their private carriages. Arrived at Longchamps the public separates. The plebeians pay their twenty cents and go on to the course; some few score carriages drive up alongside the cord; the swells pay their four dollars and have the run of the weighing paddock. On the day of the Grand Prix, if the weather is fine, it may be reckoned that some 15,000 vehicles roll through the Bois toward Long-

cbamps, and that some three to four hundred thousand people gather on the race course and in the neighborhood.

Anything more picturesque than the race course at Long-camps could not be imagined. It is surrounded by wood; to the left is an ivy-covered windmill, to the right the ground descends and discovers a horizon of wooded hillsides, with, in the distance, the delicate spire of Saint Cloud, and, commanding all, the hill, and fortress of Mont Valerien. The trees and grass are deliciously green and fresh, and the vast expanse of the course is gay with flowers. Entering the main gate, we arrive in the weighing paddock, at the back of the grand stand. The paddock or *enciente de pesage*, is like a corner of a park, a big lawn intersected by broad gravel paths, and overshadowed by immense trees, with here and there a thatched round house for refuge in case of rain. To the left is a vast semicircle of little black square boards mounted on posts. At a distance you might think they were music stands, but as you approach, a formidable howling and roaring and yelping convinces you that these blackboards have nothing to do with music. "Oyez la cote, la cote, la belle cote! que cheval? Five louis to one, Little Duck, number 703." And in a marvellous mixture of French and English the bookmakers pursue their trade, each one mounted on a pedestal beside his list, and handing out his tickets to the bettors, while the clerk, standing behind the blackboard, registers the bet and the number. At the other end of the paddock are the stables and a tan walk, where the steeds are saddled and led up and down by microscopic lads under the eyes of the amateurs and fair ladies. Under the trees a few ladies and gentlemen sit talking, while others walk to and fro and crowd round the bookmakers, struggling to lose their money.

Not only are the bookmakers allowed to set up their lists in the weighing paddock, where the minimum bet is generally \$4, but on the course itself two or three hundred bookmakers hold themselves at the disposal of the plebeian twenty cent public and offer "la cote! la cote!" with a minimum of one dollar, of forty, and even of twenty cents. The camp of cheap bookmakers, each sheltered by an enormous blue or red umbrella, and often accompanied by a wife or mistress, who serve as clerks, form a curious and agitated corner, more noisy and bewildering even than the howling bookmakers of the more aristocratic *pesage*. At all the race meetings the bookmakers are present, and their numbers and importance have gone on increasing so much of late that they are now talking of forming a syndicate and converting themselves into a formidable corporation. One thing is certain, that betting on the races has become almost a recognized means of existence, and the bookmaker is really an institution whose suppression is now out of the question.

There are, of course, people who go to the races merely for the amusement, and for the sake of the animated and brilliant spectacle. The tribunes of the President of the Republic, of the Jockey Club, and the ladies' tribune are often brilliantly occupied, and the lawn in front of the grand stand is still frequented by ladies in spite of the presence of the *cocottes*. But really in modern Paris the bonest woman finds herself inevitably elbowed by the less bonest woman in every public resort; it is impossible to avoid the promiscuity. Indeed, it seems as if the honest woman accepted the rivalry, and certainly, from the point of view of the impartial spectator, it is not easy to say whether it is they or the *cocottes* who by their toilets contribute most to the brilliancy and animation of the scene. Then, again, among the democratic twenty-cent crowd many come purely for distraction, and for the sake of passing an afternoon on the grass in society; the men talk about their affairs or about those of other people, and the women and children gather buttercups and daisies. On the whole, in spite of the betting and gambling, and in spite of the promiscuous company, you perhaps could not in any other country but France find a more innocent and genial crowd than the public of the Sunday races; it is a crowd of active materialists, eager for pleasure, and finding much pleasure in its common pursuit.

Between two and five, half a dozen events will have come off, the bookmakers will have filled their money bags, and the programme of the afternoon will have been exhausted. There remains only the return to Paris, *le retour des courses*, which has been so often portrayed in words and by the limner's art. In this operation again there are grades and degrees; there are those who return immediately by the shortest route, and there are those who enter the procession that moves at a foot pace up and down the Avenue des Acacias, which, as the whole world knows, is the fashionable promenade for Parisian carriage folk. But, in any case, the spectator who takes his seat at the head of the Avenue des Champs Elysee on a Sunday afternoon between five and seven will never fail to see a unique display of rank, beauty, fashion, and elegance. The return from the races is as brilliant as ever, only it is on a larger scale and more democratic, and for one fine equipage you will see half a dozen cabs, drawn by lean horses, trotting with their noses in the dust. But what a wonderful spectacle to see that endless stream of carriages rolling down the Champs Elysee with the noise of rushing water, exiled royalty, drawn by four horses, side by side with the holiday-making shopkeeper, drawn by a fat pony! And all along the avenue, under the shady chestnut trees, the economic dudes sit on the iron chairs in serried ranks, gracefully sucking canes and raising bats to carriage people, who do not return their salutes, while the women reclining in their victorias, the hust thrown forward by back cushions, display their gay toilets and exuberant beauty. And the economic dudes raise their hats with unwearied patience until the *Baronne d'Age*, with all the insolence of her loud toilets and meretricious luxury, descends the avenue for the last time in her cabriolet with its clanking silver chains, and "the return" is over. The dinner hour has struck.—Sun.

The excellence of trotters descended from Messenger, the sire to whom almost all the American trotters trace their pedigree, is sometimes attributed to the fact that this famous sire had in him a strong cross of Barb, as distinguished from Arab blood. The Darley Arabian and the Godolphin Arabian—whose blood appears in all the best English race-horses of the last century—were in reality Barbs, and not Arabians; they came from Barbary and Africa, and not from Arabia and Aethiopia. Barbary is rough, stony, hilly, intersected with ravines, and covered in many places with prickly bush. The districts of Asia in which the purest Arab horses are bred, present, on the other hand, flat or slightly undulating surfaces, with scanty vegetation, while for the most part they are carpeted with thick layers of sand. In Africa the horse, being unable to gallop with safety, accustomed himself to the trot, as being the safest and easiest gait, under the circumstances, and the adoption of this action forces him to bend the knee and to develop the muscles which are thus brought into play. In other words, Barb horses trot, while Arabian horses gallop, because nature imposes upon each the necessity of adapting their action to the ground in the midst of which they are severally born.—London Field.

Washington Park Club Declarations.

The following are the declarations in the stakes of the Washington Park Club, Chicago, corrected by Secretary Brewster, to June 10th, at 12 o'clock noon:

The American Derby. Royal Arch Equipoise, Savanna, Ten Full, Queer T, Embargo, Sbenudoah, Rita, Freda, Glendair, The Ute, Ten Strike, Ensign, Decoy Duck, Hirondelle, Sweethair, Valley Forge, Springdale, Blast, Melikoff, Ascalon, Fanny Brown colt, Prince of Norfolk, Banquet, Buchanan, Matinee, The Admiral, Bettina, Bennita, Jase Phillips, Tom Martin, Truehorn, Mark Daly, Wunnencca, Water Lily, Glenhar, Lady Loud, King Rohin, Voyager, Exploit, Faradole, Wilson.

The Washington Park Cnp.—Tahota, McGinty, The Ute, Matt McGinnis, Leonatus, Markland, Owen Bowling, Annie G, Carley B. Chatter, Ida B, Barney Aaron, Water Lily, Northland, Springdale, Blast, Hilarity, Joe Mitchell, Apollo, Rita, Glendair, Ascender, Monogram and Fair Count.

Oakwood Handicap.—Savanna, Trix, Force, Freeland, Wedding Day, Markland, Polonie, Beechenhook, Harry Gilmore, Mnsk, Carley B, Sweethair, Hirondelle, Duke of Monday, April Fool, Barney Aaron, Ten Strike, Wapakonita, Hilarity, Joe Mitchell, Aleck Ament, Mediator, Phebe Anderson, Long Knight, Fair Count, Japonica, Brad, and Jim Reuwick.

Great Western Handicap.—Grismer, Matt McGinnis, Force, John Sullivan, Markland, Annie G, Monticello, Harry Gilmore, Duke of Monday, Barney Aaron, Plauet, Jr., Ascalon, Joe Mitchell, Hilarity, Apollo, Aleck Ament, Exeter, Glendair, Rita, Duke of Montalban, Fair Count, Japonica, Brad, Butter Bird, Eros, Pearl of Savoy and Maria D.

Boulevard Stakes.—McGinty, John Sullivan, Marland, Royal Arch, Manzanita, Nellie Peyton, Hirondelle, Ten Strike, Wapakonita, Mediator, Melikoff, Ascender, Phebe Anderson, Glendair, Brad.

The Commercial Stakes.—Dave Vandell, McGinty, The Ute, Grismer, Matt McGinnis, John Sullivan, Owen Bowling, Leonatus, Markland, Harry Mann, Duke of Monday, Planet, Jr., Ascalon, Springdale, Apollo, Monogram, Brad.

The Columbia Stakes.—Dave Vandell, Matt McGinnis, Leonatus, Markland, Annie G., Carley B., Nellie Peyton, Northland, Planet, Jr., Springdale, Apollo, Fair Count.

The Woodlawn Stakes.—The Ute, Royal Arch, Cora Baker, Manzanita, Ten Strike, Ascalon, Blast, Melikoff, Brazil, Rita, Glendair, Fanny Brown colt, Archer, Boh Cook, Boreas, Eros, Pearl of Savoy.

The Quickstep Stakes.—Brandywine, Lizzie Dwyer, Le Logos, Mavornreen, Athena, Bogardus, Martha Washington, Powasheek, Crafty, Miller, Ernest, Daisy filly, Sparland, Stonington, Kitty Monroe, Testator, Regal, Valiant, Peyton, Playmate, Louise Layton, Gridge.

The Lakeside Stake.—Queen Malloy, Tan Farris' filly, Radha, Florio, Sulita, Carrie Anderson filly, Sallie Glenn, Goodness, Topsy, Martina, Minniechee, Marba Washington, Glenita filly, Blossom filly, Esmeralda, Nellie C., Mollie McGurn. (Cbeppu and Armstrong's entry void in this stake.)

The Kenwood Stakes.—Celsus, Gridge, Doubt, King Dan, Le Logos, Brandywine, Dick Watts, Sparland, Lady Lindora colt, Flanchette colt, John Himyar, Sly Fellow, Alta, Bonauze, Alf, Estill.

The Hyde Park Stakes.—Bill Adle, Krisbaa, Florio, Gridge, Doubt, King Dan, Carrie Anderson filly, Le Logos, Blossom filly, Rock, Dick Watts, Hot Box, Court Ban, Lizzie Dwyer, Rhadamanta, Powasheek, Rhadama, Martha Washington, Stonington, Bonnie Park gelding, John Himyar, Alf Estill, Alta, Mollie McGurn, Sly Fellow. (Cbeppu and Armstrong's entry void.)

The Englewood Stakes.—Bedell filly, Nirvana, Viola, Lison, Reverta, Mattie Howell, Bridget, Glenita filly, Cora Baker, Decoy Duck, Endeavor filly, Callie Smart.

The Drexel Stakes.—Envoy, Greystone, Wellington, Royal Arch, Ten Full, Ascalon, Sir Thad, Maggie Emerson colt, Ensign, Voltaire, Fanny Brown colt, Archer, Prince of Norfolk, Monocrat.

The Sheridan Stakes.—Euvoy, Simoon, Tunis, Reverta, Royal Arch, Ten Full, Ascalon, Sir Thad, Cora Baker, Ensign, Wa-mo-ha-ta, Decoy Duck, Voltaire, Endeavor filly, Fannie Brown colt, Prince of Norfolk, Callie Smart, Monocrat.

Contra Costa Fair.

The Contra Costa County Agriculturists will hold their annual fair, at Pacheco, Sept. 7th to 13th, inclusive. For racing purposes the district includes Contra Costa county and Murray township of Alameda county. The following is the speed programme:

First Day.—No. 1. Trotting; three minute class; purse, \$100; 1st horse, \$65; 2d, \$25; 3d, \$10; free for all in the county.

No. 2. Running; purse, \$50; 1st, \$35; 2d, \$15; free for all two-year-olds; half-mile dash.

Second Day.—No. 1. Seeley Bennet purse; trotting; purse, \$100; 1st, \$65; 2d, \$25; 3d, \$10; free for all stallions owned or having made the present season in the county, that have never beaten three minutes.

No. 2. Fernando Pacheco purse; running; purse, \$100; 1st \$65; 2d, \$25; 3d, \$10; free for all in the county; one mile and repeat.

Third Day.—No. 1. Capt. Durham stake; trotting; free for all two-year-olds in the county; mile heat, best 2 in 3; \$10 to nominate and \$25 before the race; the Society to add \$75 to divide, 1st, 6-9; 2d, 2-9; 3d, 1-9.

No. 2. Trotting; purse, \$150; 1st, \$100; 2d, \$35; 3d, \$15; Wm. Meese purse; free for all in the county; best 3 in 5.

No. 3. The Grangers purse; purse, \$25; trotting; free for all horses in the county that can trot nearest to four minutes; to close up to 1 p. m., day of race, best 2 in 3; entries, \$9; after six entries balance to be added to purse.

Fourth day.—No. 1. R. O. Baldwin Stake; trotting; free for all one-year-olds, one mile to barness; \$5 to nominate and \$20 day before the race; second colt to save entrance money; society to add \$30.

No. 2. running; purse \$75; first, \$60; second, \$15; free for all in the county; aingle dash, one mile.

No. 3, trotting; purse \$300; first, \$200; second, \$70; third \$30; free for all horses that have never beaten 2:25.

Fifth day.—No. 1. Stallion Race; purse \$200; first, \$120; second, \$60; third, \$20; free for all stallions owned and assessed, or having made the present season in the county; five per cent. to nominate, and five per cent. day before the race.

No. 2. trotting; J. H. Tennent Stake; free for all three-year-olds in the county; mile heats best 3 in 5; \$5 to nominate and \$20 before the race; first, 6-9; second, 2-9; third, 1-9; society to add \$50.

Sixth day.—No. 1. running; Wm. Caven purse; purse \$50; first, \$35; second, \$15; free for all in the county; half mile and repeat.

No. 2. Ladies' Riding; purse \$15; free to all, entrance free; first, \$10; second, \$5.

The officers are: Wm. Caven, president; Geo. Wiley and J. H. Tennent, vice-presidents; directors, Fred Moses and Juo. E. Martin; secretary, W. W. Beauchamp; treasurer, T. Z. Witten; visiting committee, Munson Gregory, Geo. P. Loucks, J. E. Durham.

Trotting at the Bay District.

The Summer meeting of the Bay District Association closed with the 2:40 class last Friday, and the 2:22 Class on Saturday. On Friday the track was in good condition, though the high wind, which increased as the race progressed, not only militated against fast time, but made what would have been otherwise a fine afternoon disagreeable for spectators. The entries were Slim Jim, Marin, Regina, Gersta and James H. Marin was the favorite in the pools before the start, bringing \$25 to \$17 on James H., \$11 on Regina and \$5 on Slim Jim and Gersta coupled. At the fourth score they were sent off level for the first heat, with the exception of James H., who was several lengths behind, his driver "nodding for the word," and this disadvantage was heightened by him breaking as soon as the bell gave the signal to start. Marin and Slim Jim kept close company to the quarter, when the favorite drew away, and though Regina made a good effort, she could not overtake him, he winning the heat in 2:33, Slim Jim getting third position, Gersta fourth and James H. fifth. After the beat the pool sales were \$25 on Marin, \$16 on Regina and \$6 on the field. The second heat Regina again made a good show, but unfortunately making a bad break on the homestretch her chances were out, and Marin won quite handsily in 2:34; Gersta third, Slim Jim fourth and James H. fifth. Marin was now a big favorite, the rates being \$50 on him to \$10 on all the others. Notwithstanding the apparent ease with which he won two beats, the third was scored against him. There was an animated struggle all the way, with Marin in the lead, until within 150 yards of home. At that point Regina got her nose in front. At the fifty-yard mark she had a neck the best of it, and though the favorite made another effort she beat him across the score by a lead in 2:34. This brought the field stock up so that Marin was selling for only \$25, while there were purchasers for the others at \$20. When the signal was given for the start in the fourth beat all were nearly parallel, but one of the judges having struck the recall bell through mistake there was a general about, some calling to come back, others to go on. All of the drivers, with the exception of the pilot of James H., kept on, and again there was a struggle between Marin and Regina. She never succeeded in getting in front of him, however, and he won the heat, which gave him the race. There was no report from the official timers, though outsiders made the heat 2:33. This gave Marin first money, Regina second and Gersta third.

SUMMARY.

Table with columns for race name, driver, and time. Races include Bay District Course, Regina b m, Slim Jim blk g, Gersta b m, and James H b g.

Although the sky was obscured by clouds, the afternoon on Saturday was an improvement on that of the day before, so far as regards trotting—somewhat chilly, it is true, but nothing like so detrimental to speed as the high wind that prevailed on Friday. The track, too, was in good order; and the attendance, while not as large as the merits of the horses warranted, was fair for the season. The purse was \$750, heats of a mile, best 3 in 5, in barness, and of the four entries three appeared. These were Manon, Albert W. and Vanderlynn. Manon was largely the favorite in the pools, and before the horses were called she would sell for \$30, Albert W. \$11 and Vanderlynn \$7. There was a good deal of speculation at these rates, Manon becoming more of a favorite as the time drew near for a start.

The placing gave Vanderlynn the pole, Albert W. second, Manon on the outside. Owing to the propensity of Albert W. to come up on a run, the scoring was tedious, and fourteen times they came to the judge's stand in futile attempts to get off. When the word was given for the first heat Manon went so much faster than the others that she had got the pride of place on the inside before a furlong was traversed. When the quarter pole was passed in 37 1/2 seconds she led Vanderlynn three lengths, with a still longer gap between him and Albert W. The pace was much faster along the backstretch, and when at the half-mile pole in 1:13 1/2, Vanderlynn had closed the gap somewhat, Albert W. being also a little closer. It was a very pretty struggle home between Vanderlynn and Manon, but, as the former led his feet when within fifty yards of the score, Manon beat him out in 2:24, Albert W. some distance in the rear.

After the heat Manon sold at \$50 to \$9 on each of the others. On the second score the word was given to a very good start, Albert breaking soon after. At the quarter pole in 38 seconds, Manon led Vanderlynn two lengths, and at the half, in 1:13, there was a length in favor of the mare. Rounding the further turn, Albert W. came very fast, passing Vanderlynn, and when fairly straightened into the homestretch he was close to her. He essayed to pass on the inside, but Goldsmith was not inclined to concede him that advantage, and in pulling to the outside he broke. Vanderlynn also broke when about midway of the stretch, and the mare reached the score first in 2:24, with Albert W. second, but, owing to the runs of Albert, Vanderlynn was given second place. The pool-selling was now at an end, as it was generally conceded that, barring an accident, Manon must win. Again there was a good deal of scoring, Albert W. being almost beyond the control of his driver, who was forced to knot the reins across his back to assist in the "pull." The eight score they were sent off very even, when again Manon established a good lead at the quarter in thirty-seven seconds, with Vanderlynn second. The same rate was kept up for the next quarter, and 1:12 was the mark when the half mile was reached, being one second faster than in either of the other heats. Again Albert W. came with a rusb, passing Vanderlynn at the same point as in the preceding heat, and for a time he appeared dangerous. He broke, however, at a critical period, ran alongside of the mare without disturbing her equanimity, broke again when at the seven furlong mark, once more at the distance, and Manon came in handily in the same time as before, 2:24. The second place in the heat was given to Vanderlynn for the same reasons as before. Thus the race ended, Manon winning first money, Vanderlynn second and Albert W. third. One of the surprises of the race was to see Vanderlynn behaving so well. In the first heat and the fifteen scores he only broke once in scoring and once at the finish of the heat. Albert W. showed plenty of speed, and when he becomes less erratic will to learn his character. To be won in straight heats it was a capital race.

Time sheet.

Racing at the Islands.

On the 11th inst., Kamehameha Day, the recently organized Hawaiian Jockey Club, gave a meeting at Kapiolani Park. From the Honolulu papers the following notes are made up: The officers of the Hawaiian Jockey Club—President, James Campbell; Vice-President, Frank Pratt; Secretary, C. O. Berger, and Treasurer, Cecil Brown were on hand betimes. In the judges' stand Messrs. Widemann, Spreckels and Pratt were judges, Messrs. Cecil Brown and C. O. Berger time-keepers. Mr. C. B. Wilson was clerk of the course. Mr. James Dodd had charge of the saddling peddock and Captain Heyley, (late 11th Prince Albert Hussars, b' Gowge!) was starter.

Everything passed off quietly. No disturbance worthy of notice occurred, owing to the orderly disposition of the people and the efficiency of the police force. No serious accidents occurred, but the action of the bay gelding Snap, owned by the Miles Brothers, which was entered for the Kamehameha plate, promised one of a very serious character on the start for the first heat. The horse, unmanageable without blinds, was blinded for the occasion. When the first turn was reached, instead of following, it made a turn the other way into the fence, scattering the natives in a cyclonic style. His boy rider sprang from the animal in time to avoid its collision with the fence, and escaped with a slight bruise on one of his legs. The horse was captured, and was found to have been little injured.

The best race of the day was admitted to have been the two mile dash run for the King's Plate, \$150, as it was the most closely contested. The three contestants were Cornwall's Waterford, Agnew's three-year-old Idle Girl and Col. Judd's Telephone. Idle Girl although left by the two horses during the first mile, made the race warm on the second mile, having closed the gap on the last half of the second mile. All three were neck and neck for a long distance, but at the last turn on the home stretch, Waterford and Idle Girl drew ahead, Telephone following. Waterford and Idle Girl passed under the wire so evenly, that many in the vicinity claimed a dead heat. The judges awarded the race to Waterford. There was considerable dissatisfaction expressed at the decision, the impression prevailing that the race should justly have been given to Idle Girl, or else declared a dead heat. Even some of the Waterford winners said they believed the mare had won. The time was 3:58 1/2.

Kahului Cup—\$75; mile dash; open to all horses bred in the kingdom that have never run at Kapiolani Park. J. A. Cummin's Daisy, Chas. Lucas' Meior, Jas. Campbell's O. H.; won by Daisy in 1:57 1/2.

Kohala Club Cup—A sweepstake of \$50 added. One mile and a quarter dash; free for all; weights for age. Chas. A. Bailey's Gen. Hancock, J. A. Cummin's Stanford Colt, H. J. Agnew's Idle Girl, Miles Bro's. Snep; won by Hancock in 2:18 1/2.

Reciprocity Plate—\$150; mile heats; best 2 in 3; free for imported horses only; weight for age. H. J. Agnew's Idle Boy, Jas. Campbell's Godfrey B., J. R. S. Kynnersley's Kohala Girl. Idle Boy won the two heats consecutively in 1:53 1/2 and 1:58 1/2.

Queen Emma's Plate and \$75 added—Half mile dash for Hawaiian bred 2-year-olds, won by W. H. Cornwall's Mignonne (Thomas Murphy's Lottie withdrawn, sick) in one minute.

Lunamakaauiana Plate—\$100. Mile dash; free for all horses bred in the kingdom; weights for age. Chas. Lucas' Poni Moi, C. H. Judd's Flora, Jas. Campbell's Lnrline; won by Poni Moi in 1:53 1/2.

Kahuku Cup—and \$50 added. Three-quarter mile dash; free for all 4-year-olds born in the kingdom. Jas. Campbell's O. H., C. H. Judd's Flora, Chas. Lucas' Iago; won by O. H., in 1:23.

Grazier's Plate—\$100. Half mile dash; free for all 2-year-olds; catch weights. Thos. Murphy's Columbine, H. J. Agnew's Eva, Mokuia Stock Farm's Col. Gift; won by Columbine in 52 1/2 seconds.

King's Plate—\$150. Two mile dash; open for all; weight for age. W. H. Cornwall's Waterford, H. J. Agnew's Idle Girl, C. H. Judd's Telephone; won by Waterford, in 3:58 1/2.

Casino Cup and \$25. Pony race; mile dash; open to all ponies bred in the kingdom, not over 14 hands high; catch weights. Miles Bros.' Mohawk, T. K. Nathaniel's Ehukai, D. Lovell's Jennie Peki, Star Kapu's Tyrant; won by Mohawk in 2:02 1/2.

Kamehameha Plate—\$200. Mile heats; best 2 in 3; free for all; weight for age. J. A. Cummin's Stanford Colt, H. J. Agnew's Idle Boy, Miles Bros' Snap; won by Stanford Colt in two heats in 1:54 1/2 and 1:51.

On the 11th, Kamehameha Day, some trotting events were on the programme.

Queen's purse \$25; mile heats.  
 Capt. J. C. Clunie's Joe Duke..... 0 1 1  
 G. S. Houghtaling's Toby..... 3 2 2  
 Jas. Dodd's Thomas H..... 0 dr.  
 Time, 2:46 1/2—2:46 1/2—2:49 1/2

The race was (officially) won by Joe Duke. A false start was made and Thomas H. came in a neck ahead of Joe Duke, in 2:46 1/2. The driver of Duke declared that the driver of Thomas H. had crowded him and had shouted so as to break up his horse. The judges declared the heat "dead" and fined the negro who drove Thomas H. and ordered the owner to put on another driver. Mr. Dodd thereupon withdrew his horse—which, jointly with its driver—had the sympathy of the audience.

Amateur Plate—\$50. One mile dash; owners to drive; free for all pacers and trotters, to wagon, that have never beaten 2:55.  
 H. J. Agnew's Maid..... 1  
 C. Brown's Buzz..... 2  
 Fred. Boomer's Stranger..... 3  
 Time—2:58

Express Plate—\$150. Mile dash; free for all express horses. Entries—D. Holloway's Dickson, Ben Tenora's Dick. Dick driven by Mr. Douglas, although coming in second, was awarded the race, the other horse having run.

Australian Notes.

The Victorian Trotting Club advertises a new Stake for the Spring Meeting of 1884. The race is to be called the Australian Trotting Sires' Produce Stakes (open to all stallions), and is open to a sweepstake of £25 each from sires, with a sweep of £5 each from all foals, the produce of the said sires, got in the season of 1884, to be trotted for at the Spring Meeting of the Victorian Trotting Club, 1888. Mile heats, best two in three. Sires to be named on June 1st, 1884, to the secretary of the Victorian Trotting Club, enclosing promissory note for £25, due 1st of August, 1888. Foals to be named and described to the secretary on 1st of August, 1886, enclosing £1. Balance of sweepstakes to be paid on the day of general entry of Spring Meeting, 1888.

Frying Pan broke down in the run for the Adelaide Cup and pulled up lame.

Commo ion has been retired to the stud.

The Hawaiian Jockey Club.

EDITOR BREEDER AND SPORTSMAN: In my last letter to you I promised to let you know something of the new Jockey Club. For some years past the horsemen have been talking of forming a club, but for one reason and then another it has been put off, till about a month ago the daily newspapers announced that at least the prospect was favorable for the formation of a club before our great racing day (which takes place June 11th). For several weeks nothing but Jockey Club was talked among the horsemen, and finally one day a list went the rounds for signatures. Several signed this list, when all of a sudden it disappeared and no one but the "chick" knew of its early death. Some one had signed it that was not in the "ring," and those in charge of this paper must have destroyed it, and for several weeks people who were anxious to join were making inquiries, and the newspapers took the matter up for a few days concerning this missing document. Finally everything was quiet.

One night shortly after the King and a favored few met at the palace, and fixed things up to suit themselves (as they generally do), and next morning it became known that a Jockey Club had been formed, and those mostly interested in horses and horse racing were left out in the cold. Only a favored few, and you should have seen the programme they got up. They made the same to suit "their" horses, and then had the gall to send subscription lists around town. They collected in this way about \$1,700, to which you may safely add, say \$1,000 more, for gate and grand stand receipts, stall rent, booth privileges, etc. The programme amounts to \$1,500, from which deduct 10 per cent. entrance fees, leaves a balance of \$1,350 for 17 races (the Koholu cup and Kahuku cup being from outsiders). They give what they like and take all they can get. The horseman called a meeting, and more than 90 per cent. of the horses in training were represented. They appealed to this Kingly Jockey Club to alter their programme somewhat, but were only treated with bitter scorn. Out of the 16 or 17 members forming this very high-toned Jockey Club are a few good straight men, who no doubt would do right if they had a say in the matter, but it seems if the King and his crowd want it a certain way they get it.

To-day the first race took place, under the auspices of the new Jockey Club, and a more disgraceful affair was never witnessed on this track or any other.

It was a match race between Geo. Treat and Joe Duke, to harness, mile heats, 2 in 3, for a purse of \$1,000. The driver of Treat pulled his horse till he nearly choked the poor brute, and kept calling for the driver of Joe Duke to "come on." The first heat was won by Treat in 2:52, when at the same time he could have trotted in 2:40 with ease. The judges allowed the race to go on, and Joe Duke won the second and third heats in 2:46, 2:45 1/2. Everyone left the track disgusted, as the roh was so plain.

Two members of this Kingly Jockey Club did some heavy betting just previous to the race, one of them being the reputed owner or part owner of Geo. Treat, the other his particular friend. This was a disgraceful sham to rope in suckers. That is a well known fact, but the Jockey Club shut their eyes. More anon from HOPEFULMEAT OLE. Honolulu, May 31st.

Trotting at Honolulu.

The match race between the old time Californians, George Treat and Joe Duke, came off at Kapiolani Park, Honolulu, May 31st, and resulted in a victory for Duke.

SUMMARY.

KAPIOLANI PARK, May 31st.—Match for \$1,000, mile heats.  
 Joe Duke b g by Gen. McClellan—Capt. J. G. Clunie..... 2 1 1  
 Geo. Treat b g by Cass's David Hill—W. H. Cornwall..... 1 2 2  
 Time—2:52, 2:46, 2:45 1/2.

This race is referred to in a letter from the Islands, printed in another column. The Daily Hawaiian reports it as follows:

"The much talked of trotting match between the celebrated horses, George Treat, owned by Mr. Cornwall, and Joe Duke, owned by Captain Clunie, came off at the Kapiolani Park race track Saturday afternoon. There has been for the past week or so more or less horse talk about this race, and now that it is settled there is a "horse laugh" at the result. The impression prevailed that Duke would get shut out on the first heat, and Treat was the favorite, five to one. Such a result did not happen, however, although Duke made a bad break at start, but came up on the home stretch, crowding closely upon Treat who won the heat—Time, 2:52.

"The second heat was won by Joe Duke—Time, 2:46.  
 "On the third heat, Treat led until the half mile was reached, when Duke shot ahead of him, winning the heat and the race—Time, 2:45 1/2. A general expression of disgust from the backers of Treat prevailed at the result, and many intimated that he had seen fairer races, and that they would see Kapiolani Park in San Francisco before they would attend another race there. The officiating judges were Dr. McGrew, Col. C. H. Judd, and John D. Spreckels. Mr. Cecil Brown acted as timekeeper."

The New York Athletic Club—Its Remarkable Growth and Ambitious Plans.

It seems hardly credible in this day of athletic associations and clubs of all sorts and descriptions, that seventeen years ago there was not an amateur athletic club to be found on this continent. There were Caledonian clubs, as they were called, it is true. Small bands of worthy Scotchmen were accustomed to devote themselves to putting the stone, dancing the festive sword-dance, scaring the neighborhood with the ekil of the bagpipe, and practicing various other games and ceremonies in concert, which were dignified with the name of Caledonian games. But these bore about the same resemblance to the athletic club of to-day, with its long roll of members and gorgeous club house and grounds, as the primal man to one in the nineteenth century. In the Fall of 1868 half a dozen individuals met together, and after deploring the sad state of affairs, resolved to better it as far as in them lay. They had not much means, but they had plenty of enthusiasm, and on September 8th, 1868, they formed themselves into the New York Athletic Club, and started out to fight the huge giant of public indifference. The fight was long and laborious, but in the end successful. Among the founders of this struggling little company were W. B. Curtis, H. E. Buermeyer, W. E. Van Wyck, Charles H. Roosevelt, Richard Meas, and F. S. Kinney. None of these names now appear on the muster roll. Curtis and Buermeyer seceded a few years ago, though the former was for long the president of the club. Charles H. Roosevelt died recently while abroad,

and the others have for one reason or another left the ranks.

It was with some difficulty that the pioneers found suitable quarters, but after much eeringing a loft was discovered at the top of a building situated where Macy's store now stands. Here they erected a horizontal bar, parallel bars, and a few other primary necessities of a gymnasium as the word was then understood. In their loft they worked and toiled, sowing the seed for others to reap. Little by little the club grew larger, and finally began to be talked about. The loft in Fourteenth street was deserted and more convenient quarters found at Maire's Gymnasium, in St. Mark's place, where greater conveniences and better apparatus were to be had. This change was made in 1870. The next year the first move toward the goal of lasting success was made. The club decided to add rowing to their gymnastic exercises. A vigorous push was made, and enough money collected to build a little boat house on the Harlem near the Third Avenue Bridge. One boat was bought, and, during that Summer, the single boat was not allowed to remain idle long. The next year, 1871, a double move was made. Grounds were leased near the boat house at 130th street and Third avenue, and the down town meeting place of the club was shifted to Wood's Gymnasium, at 28th street and Fifth avenue. More boats were purchased, and rowing became one of the chief features of the club. So matters went on for four years till the club had become lusty and rejoiced in its strength. A change had come over the spirit of the public as regards athletics, and clubs were springing up on all sides. Still the New Yorkers held their own, and in 1875 leased new grounds at Mott Haven near 150th street on the river, and from that day the New York Athletic Club has held the leading position in the country, though its ship has been steered through perilous waters.

The new grounds at Mott Haven are perhaps as well arranged and commodious as any in the world; the one small boathouse of 1871 has increased to half a dozen large and fully fitted ones, while the solitary boat has been multiplied more than a hundredfold. In the grounds is a cinder track, which the club proudly asserts has no equal. It was on this track that Myers' made his wonderful quarter of a mile in 49 1-5 seconds, while the hundred yards has here been repeatedly run in ten seconds by R. L. La Montagne, W. C. Wilmer, Myers and others. Here it was that H. S. Brooks, Jr., of Yale, beat Myers last year, and caused a commotion in the ranks of the Manhattan Athletic Club by so doing. Until the formation of the Amateur Athletic Association it was at Mott Haven that the annual championship games were held. It is to the New York Club almost entirely that the formation of the Association with its present constitution is due. It was to the efforts of some of the New York members that the clubs belonging to the Association were restricted to athletic clubs pure and simple, and the rowing clubs, canoe clubs, and bicycle clubs led to form distinct associations of their own—an operation resulting favorably to all.

The course of the club has not been all smooth sailing, even in later years. About three years ago there were long faces among those who had the club's welfare most at heart. The membership roll had shrunk in an alarming fashion; there were debts to be paid, and a bare score of dollars in the treasury with which to pay them. Something must clearly be done, and to A. H. Curtis the credit is given of seeing what that something was, and doing it. The annual election of officers was at hand, and to the surprise of many both in and out of the club, but to the gratification of all, W. R. Travers was elected president, and consented to serve. From that day the fortunes of the club were secure. The members came pouring in, the treasury overflowed, all the debts were paid, and a more than handsome surplus was left. To-day there are 1,500 members, forming the full complement, and more than 400 men are patiently waiting their turn for admission to the charmed circle at Mott Haven. But the ambitious aspirations of the New York Club cannot be content even with Mott Haven. Small children, accompanied by white aproned and snowy capped nurses on their way up Sixth avenue to trundle the infantile hoop in the park, look with awe at a sort of skeleton factory chimney between 55th and 56th streets. The more mature mind knows that this means that an artesian well is being sunk. If one seeks further information as to the massive and solid building which is fast springing from the ground, and of which the well scaffolding is an adjunct, he will be told by the Hibernian hod carrier that it is the "New Yorruck athletickers" who are responsible for the structure.

The club is about to spend a quarter of a million dollars and get in exchange therefor a handsome, spacious, and luxurious gymnasium and club house. A glance over the architect's drawings shows that the building will be four stories high and constructed of Colabaugh brick, with terra cotta trimmings, the entrance porch being of red granite. The exterior style is a free treatment of Italian Renaissance, and will be massive and simple in character. There will be six bowling alleys in the basement as well as a shooting gallery. The principal feature of the first story will be a large swimming bath 66 by 20 feet, which will be supplied with a constant stream of water from the artesian well. The rest of this floor will be occupied by a Turco-Russian bath, offices, and committee rooms. The second story will contain the reception room, billiard rooms, and restaurant, besides parlors and reading rooms. The next floor will consist of the dressing rooms and large reception and sparring rooms. But it is on the fourth floor that the real work of the club will be done. There will be the magnificent gymnasium, twenty-two feet high, with a six-foot balcony running clear around it about midway between the floor and ceiling, which will be used exclusively as a racing track. The gymnasium proper will be fitted up with all the improved modern appliances, the cost of this item alone amounting to many thousands of dollars. Surmounting the whole will be the kitchen. The rooms will all be finished in ash, cherry, and other hard woods, while the huge swimming bath will be lined throughout with pure white glazed tiling. Charles W. Clinton is the architect.

It will be seen by the plan of the new club house that the life of the modern athlete is by no means Spartan in its severity. The young athlete can go up town by the elevated road from his office in the evening, take his spin or his exercise in the gymnasium, put on the gloves with one of his fellow members, take his dip or his Turkish bath, and find withal a well-supplied restaurant where he can recruit exhausted nature. All this, however, is in the future. At present the club has a private gymnasium in the Crescent Club rooms, at No. 117 West Twenty-third street, where plenty of work is being done, and where eight rowing machines are in constant use. It is sometimes hinted by good humored but aggressive members of other clubs that the New York Club is principally composed of "old fogies" and others who rest on the laurels of a past, glorious it may be, but somewhat distant. It is dangerous, however, to breathe this to an active New York Athletic Club member. He will ask you if Hugh H. Baxter, the champion pole leaper, is superannuated; if N. W. Ford, the champion high and long jumper, has no more laurels to win; if C. J. Queckberner, the champion shot and

hammer putter, has no longer the strength of last year; if W. H. Goodwin, of Harvard, is an "old fogey," he will remind you that the majority of the new members are young men who have not yet had a chance to show what they can do.

At the last election W. R. Travers was elected president; A. H. Curtis, vice-president; William Wood, secretary and treasurer; and W. Craig Wilner, captain; the committee consists of A. V. de Goicouria, Herman Oelrichs, E. S. Innet, A. de Bernales, E. A. Drake, Rutgers Van Brunt, H. B. Phinny, Otto Serony, F. J. Kilpatrick, A. H. Wheeler, and H. S. Wilson.—New York Tribune.

YACHTING.

The Claims of Utility.

For some time there has been a bitter controversy between Eastern sporting papers on the subject of light draft, beamy vessels versus narrow, deep ones; or as they put it when speaking of the opposition type, "skimming dishes" and "planks on edge." The "cuttab fellahs," as the centre-board advocates are pleased to call them, seem to have the best of the fight, not only in the arguments adduced, but also in a more important fact, to wit, that Eastern yacht builders have of late years developed a strong tendency to reduce beam and increase depth, and, in fact, some of them have gone as far as to follow the ultra-angle idea outright.

Most of our yachts are a sort of cross between the two, having sufficient draft to keep them upright in moderately heavy weather, and not sufficient to enable them to beat to windward without the centreboard. Even our keel yachts are far removed from the cutter model, some of which are seven times longer than they are wide, while none of our yachts' length is equal to more than five their beam at the outside.

All yacht builders have their own ideas as to what constitutes a perfect yacht. As perfection can never be reached in vessels, we will give what we should consider a model yacht.

A yacht should be built in the most durable and thorough manner, capable of standing any buffeting of the wind and sea; should be able to get the utmost speed she has in her (for there is of course a limit to speed) under all conditions; should have sufficient canvas to make her move quickly, and yet should not be over-sparred; should be able to point up well into the wind and still move rapidly through the water, without sliding off to leeward; should go into stays quickly and move off on the other tack without losing her way; should present as little resistance as possible to the water when going down with the wind; should be perfectly dry and comfortable on deck in the heaviest weather; should be rigged so that sail may be reduced when necessary, speedily and with little manual labor, and with all these requirements should be as roomy as compatible with the tonnage of the vessel.

Of course one can scarcely expect that all these requirements can be successfully produced in one hull, but the question is, which type comes nearest to it, and we contend that a medium boat of the Halcyon-Lurline type, of course subject to improvements in regard to speed, etc., is the best adapted for a gentleman who desires to use his vessel not only as a racer, but also as a cruiser. The trouble has been on this Coast, that from the lack of enthusiasm of gentlemen of capital, the yacht builders have not had sufficient opportunity to demonstrate their ideas, and improve on each vessel as they turn out her successor. Wonderful strides have, however, been made, in spite of the fact of the comparatively few yachts built here. We can remember, for instance, when the Consuelo and Con O'Connor were built, the yachting fraternity thought them the par excellence of nautical architecture. The Consuelo was beaten by the Con O'Connor; she, in turn, was beaten by the Chispa, (that is while the wind held), and the Chispa now cannot compare in speed to the Nellie, which is about the same size, and constructed by the same builder, only a few years after the Consuelo was lunched, so as more yachts are constructed we hope to see, even here, something approaching our model yacht.

Notes of a Cruise.

The Spray left here on Saturday week for a cruise "up river" at about half-past five in the afternoon. On account of light wind they did not get into Suisun Bay until after midnight, and shortly afterwards ran on the middle grounds opposite to Seal Islands. There they were compelled to remain until after daybreak, when the flood tide made, and the vessel floated off. Antioch was reached at 9 A. M., Sunday, where the crew had breakfast, and then proceeded on her way. The wind held all through the day, and about 6:30 P. M. they ran into an incomplected "cut off" which is being made to connect the river from either end of the "Devil's Elbow," a very narrow and tortuous passage through which the current runs very swiftly. When they were at last able to get out of this cul de sac the wind died out and they had to tie up for the night. They were then only about twenty miles from Stockton, but from the lack of breeze and the strong current they did not reach the "City of the windmills" until 3:30 on Monday. Here they were very hospitably received and left again on Friday in the afternoon. At Mandeville, about half way down the river, the wind increased in violence, creating a heavy sea in the light, fresh water with the ebb tide and river running against the wind. They made Antioch the next morning, where they had to take in a single reef and beat through Suisun Bay with the same kind of weather they had experienced the night before. On Saturday night they laid at Vallejo, and coming down the next day had to tow with the small boat for some miles and finally reached the sea wall at 7 A. M., Monday. "All hands," barring the effects of anburn and the ravages of moaquitos, look very well.

The Sail To Santa Cruz.

All the vessels which are going to Santa Cruz for the Fourth are getting ready for the event by fitting up inside, cleaning bottoms and overhauling rigging, and to see the spirit manifested it seems as though the season was only now opening.

Con O'Connor, in addition to the regular prizes subscribed by the Club and citizens of Santa Cruz, has presented a flag, to be awarded to the first vessel down. From appearances, if all the yachts that have entered will start, this will be one of the most successful cruises ever held on this coast.

Commodore Caduc has issued the following sailing orders:

The yachts of the Pacific Yacht Club will rendezvous at Meiggs' Wharf, on the morning of Wednesday, July 24, 1884. At 7:45 A. M., a gun will be fired by the Commodore, at which signal the yachts will prepare to get under way.

A handsome prize flag will be presented to the yacht making the best time—Pacific Yacht Club time allowance—from San Francisco to Santa Cruz. Time will be taken on departure and arrival. Yachts will observe gun fire from flag-ship for hauling down and hoisting colors, at sundown and 8 A. M.

Other vessels accompanying the fleet are requested and expected to comply with these orders.

The appended chart of time allowances has been prepared by Secretary Melville. The distance from Meiggs' Wharf to the Santa Cruz anchorage is 74 miles, and the course over which the race on Monterey Bay will be sailed, is 44 miles.

TABLE OF TIME ALLOWANCES. Table with columns for yacht names (Casco, Halcyon, Lurline, Aggie, Ariel, Fleur de Lis, Virginia, Nellie, Whitewing, Annie) and time allowances in minutes and seconds.

The Commodore's orders anent the race on Monterey Bay on the Fourth are as follows:

The Course is from an imaginary line between Rail Road Co's wharf and stake-boat, thence to and around stake-boat at Monterey Bay, passing same on starboard hand, thence back over same course passing home stake-boat on starboard hand.

First gun will be fired at 10 o'clock A. M., preparatory. Second gun will be fired at 10:45 A. M., at which time all yachts will start.

No yacht will be allowed more than fifteen minutes to cross the starting line after the firing of second gun.

Four handsome silver prizes will be awarded by the citizens of Santa Cruz to the four yachts making the best time, with time allowance over the course. Prizes will be awarded on the evening of the Fourth at such place as may be designated by the citizens of Santa Cruz.

Yachts will observe gun fire from flag-ship for hauling down and hoisting colors at sundown and at 8 A. M. Other vessels accompanying the fleet are requested and expected to comply with these orders.

At a Disadvantage.

The climate here appears to have undergone a remarkable change; it seems as if the Portland weather has removed a few degrees further south and come down on us. In reference to what we mean last Sunday's weather will form a fair example. It is usual at this time of the year for yachtsmen to start out for a trip with a positive expectation of wind enough in the afternoons to bring them back at whatever time they desire, but several of them were grievously disappointed last week. The Cbiopa went to Turner's on Saturday night, while the Rambler and Ripple went to Martinez. They all started for home at high water, about noon, and with the ebb tide managed to drift about as far as Pedro Point, where they were compelled to anchor until the flood tide ran itself out. The Rambler made Sancelito about 4:30 A. M., Monday, while the chispa was about three hours longer on the trip, and the Ripple did not get to the city until 9 A. M. The weather was very calm over the whole bay. It took the Virginia from early morning till three o'clock to get from the eastern entrance of Racoon Straits, to her moorings off the Pacific Club House. The Dawn started out for a short sail and was unable to get back to Sancelito at all, and was compelled to tie up behind one of the vessels lying in Richardson's Bay. The Fleur de Lis and Whitewing went outside on the ebb and failed to make the city front until long after nightfall, and taking it altogether the yachtsmen had good cause for complaint.

A serious drawback to yachting on the Coast is the lack of neighboring seaports. If any of our large yachts go to sea, about the only place they can go to, unless they are off for an extended cruise, is to Monterey and Santa Cruz, and even at these places the yachts are compelled to lie in an almost open roadstead, exposed to all the swells of the vast Pacific Ocean. When a yacht makes a port after being to sea comfort and rest are desirable, and when at anchor, one wishes to turn in and rest without being subject to a continual rolling motion. If, instead of the rock bonnd coast in these latitudes, one could go to sea, and after a run of from eight to twenty-four come to at a city or town, as is possible on the Eastern seaboard, this noble sport would doubtless find many more advocates, but as it is, yachtsmen must be contented with inside cruising, or be some days at sea before finding an agreeable haven.

The Aggie has been cleaned at Turner's, and the Nellie went up there for the same purpose last Saturday. The Fleur de Lis went on the ways at South San Francisco on Monday, and the Halcyon will go on the dry dock a day or so before the start. This hoat, we are glad to say, will now have a chance to show what speed she has in her.

The Master Mariner's Regatta.

The Master Mariner's have issued their sailing directions, which are briefly as follows: Only vessels whose owners or captains are members of the association will be allowed to compete for the champion flags, but suitable prizes will be offered for outside vessels; no vessel not engaged in freighting will be allowed to compete at all. Vessels will be divided into four classes by a committee appointed for that purpose, time allowance not appearing in the issue at all. Vessels must carry their name on the starboard quarter, and a number provided for them on the port quarter. Vessels belonging to the association must carry the association flag on the end of the bowsprit, and if possible, an ensign at the gaff. The course will be from a stake boat anchored off Howard-street wharf to Hunters' Point, to Oakland to Fort Point, and back to section A of the sea wall. All vessels must leave all stake boats to port, and at a distance of fifty feet, and any vessel fouling any stake boat shall be ruled out of the race, and pay for any damage done. As this is a Benevolent Association no money can be taken from the treasury for prizes, so donations of either prizes or money will be acceptable.

Point Tiburon, from the accounts of yachtsmen who have been in that vicinity, will not make a good site for a yacht club, as innumerable tide rips and counter eddies run in there, rendering a vessel which gets in them almost entirely unmanageable. The Azalene, a few weeks ago, was turned every which way and ran into the dock, breaking her up somewhat forward; the Lolita had the same experience, and last Monday morning the Rambler ran foul of the dock and afterwards on the old U. S. war hulks anchored over there. This may be the result of the new dock which has been built there.

The little yawl Euid, the first vessel of that rig that ever appeared in these waters, has been sold to a Mr. Venn who is stationed at the Presedo, off which place she will have her moorings. She will be used for the balance of this year as she is, but will be changed next year to a sloop. She has been lying for some months in one of the sloughs near Martinez.

FISH.

In public efforts for public good it is always pleasant to record success. We lately mentioned a striped bass being caught near Vallejo, weighing twenty pounds. Mr. Woodbury, who had charge of the Stete Fish Hatchery under the old Commissioners, tells us of two more cases that he can vouch for. The first was twenty pounds in weight, which found its way into the kitchen of the Pacific Club; the other was seventeen pounds, and probably graced the tables of the hotel Del Monte at Monterey. The fish was caught at Monterey and was personally inspected by Mr. Woodbury. Taking the distance between Vallejo and Monterey in connection with the propagation of this splendid fish, it is safe to say that they, like the shad, may be found now all over our coast. They are a fish of very rapid growth, and in a short time, will no doubt be a daily delicacy. Shad and striped bass in abundance! What a glorious honor for the old dead Commissioners! Yet some in our midst would blacken their memories by charging them with theft. The recoil of that charge, like the recoil of the boomerang, will be the greatest at the point where it first received life. We find that the case already.

The Walton Fishing Club have their regular monthly trip to-morrow, starting from the usual place and at the usual hour. The trip will be the last for some time that the President, Clem. Dixon, will make, as next month he leaves for a visit to Scotland. A very agreeable incident occurred at the meeting of the club on Wednesday night. After the business was dispatched James Irving was called in and presented with a magnificent \$200 watch and chain. Irving has managed Dixon's business for nineteen years, and the watch was a token of Dixon's gratitude for his long and faithful services. Maj. Klose made the presentation with a speech that did credit to himself and the occasion. A most social and pleasant evening was afterwards spent by those present in the enjoyment of President Dixon's hospitality.

The reports from the interior on the condition of the streams and the character of the catches are all favorable. It seems especially to be a year of big trout, whether caught in lake or stream. Besides those mentioned in our last week's paper, we hear since of fine catches being made in Tahoe, and other summit lakes. One trout, a ten pounder, from Tahoe, was presented to the editor of the Willow's Journal. A very lucky fellow that editor. The trout are very abundant in the lakes this year.

In the Canadian dominion there has been for twenty years and more a bureau of fisheries, under a general head, with subordinate branches to every department, and embracing all that relates to the subject in its scientific, economical and practical aspects. Under this system the stock in Canadian waters has not only been preserved but has been made productive of net revenue. If we had something of the sort in this State, we should also soon have a net revenue.

Mr. J. M. Adams, a prominent member of the California Sportsman's Club, has recently visited Crystal Springs Reservoir for black bass fishing, and met with fair success, though the fish are not through spawning yet. The largest caught was two and a half pounds, which shows the fish are growing. Mrs. Adams always accompanies her husband on these trips, and being expert with the rod generally catches the largest fish.

We have been lately informed of a catfish being caught near Santa Rosa weighing twenty-six pounds. So then, in spite of the croakers, we have large as well as small catfish in the State. We have received an invitation to visit Santa Rosa to have a fish after these big fellows, and intend to go.

A million young shad were placed in the Colorado river a week or so ago by the United States Fish Commission. As a psychological fact we should like to know how our own docting Commissioners feel on reading such items.

The bay fishing during the week was also good at all points. Off the depot of the Southern Pacific Const Railroad, Alameda, we learn is the best place in the bay for smelt.

F. F. Jones, of Kearny street, reports very good sport at Pescadero. The streams are in good condition, and the fish of good size.

A gentleman from this city, last Sunday, caught forty splendid trout in Sonoma creek. He fished below Glenview.

We were informed in Oakland that trout fishing in Alameda streams has been quite satisfactory of late.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, Doves, etc.).

At Bird's Point, Alameda.

The Neophytes had a very pleasant club-medal shoot on Saturday at Bird's Point, twelve members putting in an appearance.

Score table for the shoot at Bird's Point, listing names like Bennett, Upham, Goodall, Rambo, etc., and their scores.

In the shoot-off, miss and out, Mr. Bennett again distinguished himself making five straight kills in good style.

Score table for the shoot-off, listing names like Bennett, Goodall, Upham, Rambo, etc., and their scores.

The birds were a fair lot with some twisters and some swift tailers, the larger proportion being either right or left quarterers.

The sweepstake match advertised for Sunday, at Bird's Point, drew together a fine lot of crack shots, and a goodly number of spectators in spite of the rain.

Score table for the sweepstake match, listing names like Jackson, Graff, Kerrigan, Fay, Slade, Hopper, Precht, Pearson, McElroy, etc., and their scores.

Then followed a better contest on the ties, which was kept up to the end, though Kerrigan after some perfect shooting got left on the second tie, by missing his last bird.

Then followed a \$5 entrance match at 12 birds with same traps, in which seven took a chance. In this match, Hopper, the little giant of Petaluma, and Tom Pearson each made a clean score.

Score table for the \$5 entrance match, listing names like Hopper, Pearson, Walsh, Jackson, Brown, Graff, McElroy, etc., and their scores.

In this match Mr. Graff, running out of cartridges, borrowed some of five drame F. F. G. He got one, a regular dynamite thing, which blew his barrel all to pieces and came near hurting several people.

To-morrow, at Bird's Point, there will be the best meeting yet held under the new order of things. We met George Bird on Tuesday, flying round like a whirlwind after pigeons.

The Boundary Line.

Among our trap shooters there is a rapidly growing desire to extend the boundary line from 80 to 100 yards in all cases. We confess we see no objection to the plan, but, on the contrary, many advantages to be derived from its general adoption.

Adam Aulhack, well known in this city from his connection with the Olympic Club, and as a journalist, has started a paper at Belknap, Montana Territory.

'Parties who have been across the river during the past few weeks, and over much of the rising ground leading to the mountains east of Belknap, allege that the pineries and meadows over there are virtually alive with big and small game.

As it is neither a very tedious nor expensive trip to Belknap, it would be good place for those of our sportsmen who have the leisure and means of visiting the region.

Three weeks ago we spoke of the vigorous old age and manly devotion to legitimate sport of Mr. Stewart, of Oakland, a member of the Pacific Gun Club. At one of the late meetings of the club, Mr. Stewart, who had just attained his sixty-seventh year, made a clean score of twelve, and headed the list of the day.

Mr. Allen, of the Sportsmen's Store, Market street, has recently sold a beautiful 16 gauge, double barrel English gun, to a young lady at Mountain View, who is fond of shooting and said to be a crack shot.

The bad bear, of Bodie, has been annoying the good people of that burgh lately by extensive depredations on stock. A fortnight ago, a 400 pound steer belonging to Mr. Hone-well was found partly devoured, so the brute was trapped.

In reference to the prospect of wild ducks next season, the Merced Star says:

Young wild ducks, redhead, mallard and wood ducks are plentiful this season along the sloughs and in the marshes of the San Joaquin. The continuous high water has been an important protection to breeding game whose nests are often ravaged by the wild hogs that inhabit the tules and river margins at low stages of the water.

The Foresters of Sacramento hold their next monthly meeting at Agricultural Park to-morrow.

We still daily hear of the abundance of quail and deer, even in thickly populated places, and that both show a most unusual tameness. This tameness is natural to all living things when man is not cruel to them.

The Virginia Enterprise of 17th inst., says news has been received that a large herd of buffalo, covering thousands of acres, is heading up the Owyhee, attracted into Northern Nevada by the unusual growth of grass.

Mr. Robinson has challenged Mr. Lambert for another pigeon match, \$250 a side, 100 birds each, with an offer of ten birds in the hundred, but Lambert wants greater odds.

Mr. E. C. Graff, of Benicia, has challenged any member of the Vallejo Gun Club, to shoot a pigeon match for \$50 a side. If this be the same Mr. Graff who visited Bird's Point, and got away with our boys so neatly, we advise the Vallejo boys to leave him alone.

H. A. Stewart, of Milmine, Ill., recently, at glass balls on a wager of \$10 that he could break 100 out of 120, broke 104 out of 120. Mr. Stewart has made a match to break 200 out of 225. If he does what he expects he will do well.

The Exeter, N. H., Sportsmen's Team, that got away with the championship at the late international clay pigeon tournament, were welcomed home by a torchlight procession with military band. They well earned the honor.

Capt. J. Perry, secretary of the Kansas Sportsmen's Association, announces that the proposed shooting tournament is indefinitely postponed. He has made every effort to procure wild birds for the shoot, but has failed.

Doves still continue scarce, but with a little patience they will be abundant enough everywhere.

THE RIFLE.

At Shell Mound.

Sunday, to the astonishment if not the disgust of everybody, was again wet, cloudy and gloomy, and until noon showed little prospect of clearing up. The attendance of riflemen at Shell Mound, however, was quite up to the average, if not a little over, at least of those who allow nothing to interfere with their practice at the butts.

Score table for the rifle match at Shell Mound, listing names like C. Thierbach, Corporal D'Arcy, Frederick Kuhls, etc., and their scores.

For the company medals the same score was taken with the winners of the first, second and third class divided as follows:

Score table for company medals, listing names like C. Thierbach, Fred. Kuhls, Lieutenant Mangels, etc., and their scores.

Captain John Bruer commands the Fusilier company.

After the medals were disposed of Harry Brooks and L. Haake, of the Fusiliers, had a forty shot match, with a possible 200. The score:

Score table for Harry Brooks and L. Haake, listing names and scores.

This match was close and interesting all through.

The election of Brigadier-General Dimond to the Presidency of the State Rifle Association has given satisfaction to all classes. From his first connection with the Second Brigade he has been an active and staunch supporter of military shooting, and he will now have additional opportunities of doing good in that direction.

Col. Sam Beaver has recently had a new Sharp's rifle direct from the factory, and was out at Shell Mound Sunday, trying it for the first time. The results were very satisfactory. Out of a possible 50 he scored 47 at 200 yards, five of the bull's-eyes being made in succession.

Sergeant Nash, it is said, will put his team to work at the 500-yard target sometime next month. The regulars have been using the Springfield of late with such effect that the Sergeant is getting alarmed that his old competitors may perchance get the best of him at their next contest.

At the same time and place the Gatling Battery had a medal shoot, with the following result: Sergeant Seeman won the first-class medal, J. H. West the second-class, and Byrne the third-class.

The project of forming a regimental shooting club in the First Regiment will not be reported upon by the Board of Officers, to whom the matter has been left, before the 10th proximo.

On Sunday, also at Shell Mound, the members of the Fifth Battalion, who take such an active interest in rifle practice, were out in numbers, and inaugurated the matches under the system recently established by Col. Ranlett, of dividing his best marksmen into sections, with the right to each man of challenging a comrade whose position as a rifleman he may desire. The idea is working well. On Sunday the first of these contests was held, and three marksmen had to change medals with others lower on the list. Williams, No. 11, won No. 10 from Carroll—Williams making 120 at the two ranges out of a possible 150, Carroll getting but 108. Waltham, No. 7, won No. 4 from Moore, with 124 points to Moore's 117. Pierce, No. 5, won the first place in the leading section from Kellogg, and will, until he loses it, wear No. 1 medal. He made 129 points to Kellogg's 125. This is no slight honor for Pierce, as Kellogg has always stood in the very front rank of our riflemen, and is to-day second, perhaps, to no man in the State as an all-round shooter. The grand 100-shot match of the battalion, which is looked forward to with great interest, will take place July 13th, next. There will be teams of four men from the field and staff and Company A, each man being allowed 100 shots at 200 yards. This will be the first match of the kind on the coast. The highest score at this kind of shooting is 457, and a champion medal will be given to any one of the contestants making 458. We understand Mr. Lancaster, of Vallejo, is likely to be elected Captain of Company D, of Vallejo, in the place of Captain O'Grady, resigned. Mr. Lancaster is a live man, and just the man required to restore the company to its proper place in the battalion. Under his tutelage it is likely the Solano Girl rifle team will not heat the Vallejo boys.

The *Free Press* says Bodie can best of as fine rifle shots as can be found "on the side of the famous Schutzen Club or the military cracks of San Francisco." A rifle club is being formed in Bodie. It is pleasant to find there is something else in Bodie than the traditional had man. If a club is formed and the members come down here they may rest assured of a general welcome from their brother riflemen.

## HERD AND SWINE.

### Salting Butter.

No questions relating to agricultural matters are worse founded by mistaken statements, tending to overthrow practices founded upon long experience and observation, as well as upon scientific principles, than in regard to the business of dairying. Just now the most conspicuous of these questions relates to the salting of butter. In regard to this ancient, commendable and indispensable practice, a writer, (who, it is to be feared, is drawing too largely upon his imagination for his facts), makes the following statements, viz: "Butter is an animal fat, the same as tallow and lard, and why should we not salt them to give them keeping qualities?" \* \* \* It may be said that lard and tallow keep because they have been cooked in their preparation and possibly if butter could be cooked, it too would keep; but if we admit this we admit that salt does not preserve the butter. \* \* \* Salt has no power to keep or hasten the decay of butter, because salt and fats have no affinity for one another"—and more of the same kind, of which any half-fledged housekeeper could see very clearly the error. Butter has been salted from time immemorial. Its preserving power is due to its affinity for water; and its absorption of the moisture from organic substances exerts an anti-septic influence by protecting these substances from the action of oxygen, which does not act upon organic matter that is free from water. But it would be well first to point out the mistakes made by the writer of the above quotation. Butter cannot be called "an animal fat;" it is a compound of several fats and acids, wanting either of which, its character is changed. It therefore differs very much indeed from tallow and lard, both because these are simple fats; and because the combined acids of the butter are exceedingly unstable and very quickly oxidize and decompose. Again, butter, as it is made and used, contains some proportion of the milk elements, notably sugar and lactic acid; these confer upon fresh butter much of its desirable flavor, and without these butter would be as insipid as tallow or lard. It is scarcely necessary to point out that in the manufacture of butterine and other butter imitations, the fat used is worked up with the milk for the purpose of giving it the flavor of butter.

When the butter is heated it becomes an oil; the volatile acids are driven off and the butter loses flavor, but it is preserved from change in this way, and may be kept in jars unchanged for months or years. It is prepared in this way for culinary purposes, and poor, stale butter, otherwise useless, is thus made fit for use. To be ignorant of this common fact shows incapacity for treating such a subject as this. But although butter is preserved by heating, that does not prove that salt does not preserve it equally well. For it is well known that cooking any vegetable or animal substance is also a method of preserving these, by driving out the air and water, coagulating or evaporating the most changeable and most easily decomposed portions of them, and so exerting an anti-septic action.

Now, while salt may have no affinity for oils or fats, it does help to preserve them by its affinity for the water they contain, and moreover, because it becomes very perfectly diffused throughout the body of the fats, by its solution in the water and the tendency of dissolved substances to a very perfect diffusion through the water, and consequently, through the substance in which the water is contained. This intimate diffusion of the salt solution, of course, protects the butter from contact with the air.

I am tempted to give a little recent personal experience on the subject. Two samples of butter were sent me; one, kindly, at my request, by Mr. L. W. Ledyard, of Fernwood, whose choice herd of Guernseys has been at times referred to in your paper, for the purpose of making microscopical examinations of Guernsey butter in comparison with other kinds; the other was sent by a friend for my criticism on its quality. Mr. Ledyard's butter was irreproachable in every respect, but under the microscope, its fine quality was seen to be quite as much due to its careful manipulation as to natural qualities inherent in the Guernsey cream. I must except coloring in this manipulation; because the Fernwood butter is free from artificial coloring. This sample of butter was of exceedingly fine and even grain, and the salt was so extremely well diffused through the butter that very few crystals could be perceived, and those that could be seen were evenly separated, and none larger than one five thousandth part of an inch in diameter. This butter, therefore, had a very even texture; was entirely free from streaks due to uneven action of the salting, and its flavor was perfectly free from deterioration by excess of salt in one part and deficiency of it in another. From numerous examinations of my own butter in this way, I have

been convinced that the salting and the perfect incorporation of the salt has very much to do with the fineness of quality.

The other sample under the microscope presented an extraordinary difference. The grain was open, loose and coarsely fibrous, appearing in places like strings of rope yarns, with globules of water interspersed, and large single salt crystals in places, and elsewhere adherent strings of them, which completely crossed the field of sight. Several crystals were as large as one-fourth of an inch in diameter, and in places, two or more of these would be seen in contact with each other. To the eye this butter appeared streaky, and to the taste the salt was in excess. These faults were clearly due to the imperfect mixing of the salt. Salt, it is well known, changes the color of the butter; this may be seen when butter is brought out for the final working after having been salted the day previous. The texture of the butter also depends upon the perfect admixture of the salt, because this mixture and solution of the salt in the water tends to diffuse the particles very thoroughly through the mass of butter, and when this is cut or broken, the surface of the fracture shows every minute space where the exceedingly small particles of brine have diffused themselves. The flavor, of course, depends upon this thorough intermingling of the salt.

My practice of salting butter is as follows: The butter, (first perfectly freed from buttermilk in the churn), is thinly spread upon the working table, and gashed into a great number of furrows crossing each other. The salt is rolled, crushed, sifted through a fine sieve, and scattered evenly over the butter. The sheet of butter is then rolled up, worked out flat again, and rolled again and flattened three or four times, each time reversing the direction. It is then put away for twenty-four hours, covered with a clean cloth as a protection against any possible dust. The next day the butter requires only sufficient working to press out the excess of brine, (the salt being all dissolved), and to avoid streakiness, after which it is ready to pack. I have kept a small pail, (five pounds), of butter so prepared, and also a fifty-pound pail for a year, and both were quite good; the fifty-pound pail actually brought in the New York market, from an ordinary commission merchant, three cents a pound above the price of the fresh pails sent with it. Indeed, I am quite sure that well-made, well-salted, (this is not in reference to quantity but to manner), and well-packed butter will not only keep for a year, but will actually improve in flavor and quality, which is clearly impossible with unsalted butter. Does not then salt preserve the butter?—*Henry Stewart, in Country Gentleman.*

### Better Try a Dash of Good Blood.

Every little while some one suggests whether the best way to improve the common stock of the country would not be, after all that has been said about the various improved breeds, to enter upon a systematic course of selection, breeding the best to the best, and so on. It is urged that for this improvement the materials exist upon every farm, and that as all could engage in the work and no stragglers be left in rear, the improvement would be rapid and of a very marked character. Undoubtedly very much might be accomplished in this way, as the common stock, so-called, already has very much of good blood, the benefit and effect of which would be more apparent if a wise and careful mating of animals were always secured with a view of bringing out these latent good qualities. In fact, it is no exaggeration to say that the chief merit of the so-called common stock of to-day is due to remote crosses of good blood, and if these crosses were nearer by and more numerous their merits would be greater. It is the frequency, generally, and the nearness of these crosses which make certain individuals of the common stock better than others. But when it comes to breeding the best among the common stock to the best, it is a mistake to suppose that the materials for the great improvement desired can be found upon every farm and that every farmer can join in the work. The best are not to be found on every farm, or in every neighborhood. Some of the so-called common stock is very inferior, indeed, while some of it is of passable merit, and there are no two words in the English language which express more of the idea of inequality, in every sense of the term, than the two words "common stock." Grant that the common stock might be bred up, is it worth any man's while who has a desire for improvements to seek it in this tedious, uncertain way? After generations of men had lived and pursued the work some effects of a durable quality would perhaps be secured; but is it supposed that when the common stock is brought to its best development and its type and character fixed, the world will have animals better in any sense than the improved breeds existing to-day? There is certainly no evidence to justify any such opinion. The common stock owes its best qualities to these improved breeds, and if it should itself ever become established as a breed, its chief excellence will consist of the merits and character it has inherited from existing races; and as it will have, along with these, other characteristics less meritorious, it is fair to presume it would, at its best, fall somewhat below existing standards. Then why undertake the task of improving its character in this way? Why not take the more expeditious and satisfactory course of crossing it up by the use of thoroughbred sires? They are not on every farm, but they should be, and in the competition between large numbers of breeders the price of acceptable sires of all the breeds is reduced to such a point that every farmer can secure whatever he needs in his business, and if he has any particular preference as to breeds can gratify that and still make but a moderate outlay. Every cross will make an improvement, and if all would but engage in the good work and leave no stragglers in the rear, the whole body of common stock would, in a very few years, be brought very close to the thoroughbred standard and merit.—*Breeders' Gazette.*

### Marbled Butter.

A correspondent of the *Dairyman* writes: "If the butter is drained dry before the salt is added, the marbled appearance will be noticed to some extent, but if the granulated butter when put upon the worker is full of the brine need in washing it out to free from buttermilk, it will so dissolve the salt during the workings that when ready to pack the objection raised will not exist. The packing will have something to do with it, I suppose, if put in 50-pound tubs. My butter is put in well-glazed one gallon crocks. About a pound of butter is put in each time, and most thoroughly crowded in with a wooden potato-masher, and it comes out of the crock of as solid color as one could wish. The whole trouble of marbled butter is, I opine, one of eating it too 'dry' and putting too much in the package at a time when packing."

### The Best Bacon.

A farmer of long experience gives the following plain directions how to make the best bacon:

The best bacon is made from pigs which will not weigh more than 125 pounds when dressed. The rashers or strips for the bacon are cut lengthwise of the pig and about half of the side are used. The portion next to the backbone is fatter and lacks in muscle, and is not so good on this account. When bacon is made from small pigs—those weighing less than 100 pounds—the whole of the sides are used. Red and black Berkshire pigs make the best bacon, because they have the largest proportion of lean meat. Six pounds of salt and four ounces of saltpetre should be used for 100 pounds of meat. Five pounds of brown sugar may also be used, or two quarts of molasses. If the bacon is cured in a barrel, the salt, saltpetre, and sweetening should be mixed and a portion sprinkled on the bottom of the barrel, and some also between the layers of meat and on the top, and water enough, after the meat is packed closely, put on to cover it. In a month the meat will be ready to smoke. Too much smoke will color the meat and give it a rank taste. Another way to cure bacon is to rub the above mixture on the flesh side of the strips of bacon and then pile it up one piece above another, and let it strike in. After three days rub again and pile up as before. A week after rub again and pile it up, putting the flesh side up every time. The mixture should be divided into three equal parts, to provide for the several rubbings. At the end of a month the meat will be ready for smoking, or before, if the salt has all struck in and the surface has become comparatively dry, which is an indication. After smoking, the rashers should be sewed up in bags made of cotton cloth, and hung up in a dry, dark place. If the bags are whitewashed on the outside all the better, and this will keep the worms out.

As an evidence of how much may be accomplished in the improvement of animals by constant effort in any one direction, it is worthy of remark that the great flow of milk of cows is truly artificial. In a state of nature the cow gives only the necessary quantity, and gives it only the necessary time to sustain the calf. The greater and longer yield of milk is the result of better feeding, better treatment and longer manipulation of the teats. Hence to increase the yield of milk, feed, tend and milk well.

A correspondent of the *Michigan Farmer* makes this very suggestive statement in support of the non-beef quality of a good cow: "When," he says, "a Jersey cow gives me three hundred and fifty pounds of butter and a hundred dollar calf a year, and does this until she is fifteen years old, I have not the heart to send her to the butcher."

## STABLE AND PADDOCK.

### Glanders.

The following is a minute description of the glanders: If this disease always assumed the same character, and every glandered horse presented the three special symptoms—greenish, sticky, and, at times, bloody discharges at the nose, the hard, painless, and adherent swollen glands at the jaws, and, above all, the peculiar and characteristic ulcerations of the mucous membrane upon the cartilage of the cavities of the nose—there would be no difficulty in recognizing it. Unfortunately it assumes many forms. Sometimes there are only slight glandular enlargements, at others, discharge from the nose, while in a third animal neither of these will exist, and only small ulcers will be detected in the upper angle of the nostrils. The horse may appear in a healthy condition, with nothing apparently wrong to a casual observer, able to do its work without signs of fatigue, and yet communicate the loathsome disease to all, even mankind, who may come in contact with it.

If the disease has assumed an acute form the appetite will be impaired, the pulse accelerated, general prostration, staring coat, watery eyes, yellowish or purple streaks on the membrane of the nose, a discharge from the nasal chambers, varying from a watery to a sticky mucous character. Little red elevations will frequently be observed on the mucous membrane of the nose, which develop into ulcers of irregular form and color. The glands on the inside of the jaw are enlarged, hard and lumpy. Sometimes a cough is present. In the latter stages the nasal discharge becomes bloody, fetid, and so profuse as to cause suffocation.

If the disease is chronic there is invariably ulceration of the mucous membrane of the nasal chamber, but the ulcers are sometimes so high up as to be seen with difficulty. There will also be discharges from both nostrils, which vary from a thin watery to a thick and bloody nature, frequently very offensive. In the chronic state there is no fever, and the animal appears to be in excellent health and spirits.—*Ex.*

If you wish to keep your horses in readiness for all the contagious diseases afloat and have them suffer to the greatest extent when they do get them, keep them in a jaded and run down condition. Disease breeds among horses that are in such a state, and the man who affords it a harboring place often pays well for his guest. It is not the man who has the least amount of provender for his horse that has them in the worst shape, but the one who is too thoughtless, indolent or careless to pay the attention to them that he ought.

A shying horse cannot be considered a safe horse, yet the habit is generally considered of so small a consequence that it does not materially affect the value of a horse. There are but few faults that a driving horse can have that are more liable to do mischief than those of scaring and shying. Although it may take some time and trouble, such habits should be broken up as soon as possible.

The young horses should be so tame that you can, without difficulty, approach them in the pasture field. By being able to do this you will have a better opportunity to detect anything which may be wrong with them. Kindness and a little patience will soon enable you to approach the wildest colt. No other animal likea to be caressed, any more than the horse.

When you have a long drive in contemplation, it will pay you well to take your horse off grass for at least twenty-four hours before the task is begun. Horses on grass are soft, their wind is not so good, and they are not able to stand long jaunts as well as if they were kept on dry feed.

With the disadvantages staring them plainly in the face it is wonderful how many of our farmers in all parts of the country are still raising scrub horses.

# THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE  
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE  
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET  
P. O. Box 2669

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

## Rancho Resaca.

There are many beautiful drives in the vicinity of Oakland. Roads smoothly graded, graveled and nearly level, undulating among the foothills, climbing mountains and following gulches and canyons. There are magnificent views from points only a few miles from the City Hall, and often without the trouble of climbing very high there are prospects of exceeding loveliness. A few days ago we determined to pay a visit to Rancho Resaca, the stockfarm of Colonel H. I. Thornton. The first essay was a failure. Knowing that it laid adjoining to the Briscoe Ranch there must be a nearer way for them to follow the ravine which opens into the slope near Berkeley, the route chosen was down San Pablo avenue to the seven-mile house. Climbing the hill, opening gates, we began to realize that the most direct cut might be the slowest method of getting to the desired point, and when a man gave the information that there was no way of getting through, there was a forcible illustration of the futility of trying to overcome distance when mountains were the barrier. We frequently drive to the mouth of the canyon through which the road runs that passes the Fish ranch, but this was the first time to go beyond the slope where Judge Garber's residence is built. Half a mile further and there is a feeling of isolation, a singular sensation as if there were some necromancy that had been instrumental in getting one far away from cities and even cultivated fields. The mountains rise abruptly on either hand, the sides clothed with chapparal and the smaller ravines, at various angles with that which the road follows, a mass of shrubbery and flowers. Before reaching the summit there is an absence of trees and underwood, and on the other side it is some distance before the wooded characteristics are resumed, if anything still more pleasing than on the western slope. The stream is large and it dashes over a rocky bed, and there are huge alders growing from the brink, and vines draping the gray boulders. Sharp curves the roadway makes in following the sinuosities of the creek, though the surface is smooth and the liquid notes of the brook rise musical above the sound of the wheels. It

cannot be termed a valley until the farm of ex-Mayor Bryant is passed, and then there are only small patches of level ground, though the mountains throw off rounded projections with an easy enough grade to permit cultivation. There are grand trees on "Orinda Park" and some level land, and cornfields with the young plants showing that the late rain has, at least, been of benefit to them.

The road, too, is a trifle rough, the traffic not being enough to obliterate the ruts made in the wet soil; but it is an interesting drive albeit there is some bumping. There must be definite instructions to enable the visitor to discover the carriage way which leads to the house on Rancho Resaca, especially when coming from the direction we took. It almost doubles back like the trail of a hunted fox, and there is a ford to cross San Pablo creek, a narrow "bottom," and then a gentle rise to the residence. At the first sight the visitor is struck with the beauty of the location.

There is another creek which empties into San Pablo a short distance from the house, and on the peninsula between the two streams the buildings stand. The lower part is covered with an orchard, the trees planted so close to each other that the branches interlace, and though an Eastern horticulturist would condemn such close crowding, the trees are so heavily laden with fruit that it is evidently all right in that locality. The soil is a rich loam, and the brown soil, without a weed to mar, contrasts finely with the deep green of the leaves above.

There is utilitarian beauty in the apple, pear, peach, and plum trees with the wealth of pendant fruit, but the trees which form the background to the dwelling are more in accordance with aesthetic taste. Both banks of the stream are heavily wooded, near the residence are some grand specimens. A giant white oak throwing its gnarled branches far from the hole, near that a California maple, the boughs completely hidden by the mass of leaves, then a live oak, and a little further along a big manzanita with bright red bark, and alders and wild shrubbery in profusion. As Mr. Thornton has only been the owner for a short time, the ornamental grounds are consequently of too recent date to show yet. The grass plats, however, are coming along finely and the parterres are already blooming with a variety of annuals, and there are roses and rhododendrons, and a hundred others that will only require a season or two of California weather to rival those of ten years' growth in the East. There are patches of alfalfa growing on the bank of the little creek and near the stable, and a circular hedge that will soon be high enough to form a screen to hide the cattle yards and at the same time protect the plants inside. There is a good deal of time these long Summer days from four o'clock in the afternoon until the sun sets, and this was given to a ride over the estate. One thousand acres are not easily traversed when the land is level; when it rises to a couple of thousand feet above tide-mark, and not much less from the starting point, the task is trying. But there are plenty of saddle horses on Rancho Resaca and the one destined for our use was a daughter of Leinster. When in 1868 we saw Leinster run on the Dexter Park, Chicago, it would have seemed a rash prophecy that foretold climbing California mountains on one of his get. She carried us right bravely, however, and though the gray native which Colonel Thornton rode had rather more strength and a greater familiarity with the business on hand, the filly was not to be daunted and climbed with an energy, and picked her way down declivities carefully that once established confidence. San Pablo creek is the eastern boundary of the estate. There must be rather more than a mile frontage on the stream, extending far enough to the west to embrace one thousand acres. With the exception of the comparatively level portion in the orchard, and where the former proprietor had a half-mile training track, there is a gradual rise to the summit, and this broken into "swales" and depressions. The soil of the whole body from the creek to the top of the mountain is rich. In nearly all of the depressions are springs, and some of these at so high an elevation that if divided into lots of fifty acres each could be supplied with water.

There was a short stop soon after leaving the barn to look at the cattle in the corral, and the mares and foals that were near the foot of the hill. The cattle are grades of shorthorns with a few Jerseys. All were in fine order, non-milkers prime beef, and not a poor one among them. The most notable of the mares are Carrie C., Lillie R., and Viola R., the former, from breeding, size, and the great speed she showed in training, well worthy of being classed with the best of the country. Lillie R. has a filly by Monday which was so unfortunate as to have a hip knocked down, though her yearling by Wheatly is likely to make amends, as she is of high racing form and of fine size. These mares have been bred to Kyrle Daly, and Mr. Thornton is justified in expecting something very good from the produce.

The trotting mares are of approved blood, and the foals by the best horses in the country. As the journey is continued there are frequent delays to admire the prospect. Half way to the summit and the valley from San Pablo to where the creek breaks through, the mountain is in full view. A glorious prospect it is, and there are grain fields still green, farm houses nestling in groves, and diverging valleys, which give evidence of prosperity of those who dwell in them. The horses travel over a mass of herbage. It will surely become thin is the thought as the elevation increases, though in lieu of that the higher we go the thicker the growth. Fully two tons to the acre had it been cut and made into hay, and when on the highest peak there was six or more inches in thickness of grass, which before it fell must have been nearly waist high to a man of tall stature.

From this pinnacle there is the grandest view of all. Though there were murky clouds hanging over the ocean and partially enveloping the distant points, the bays were visible from Alviso to the Straits of Carquinez. Notwithstanding the hazy atmosphere the Oakland moles were as distinct as though scarcely a mile away, though looking down from the high elevation the huge ferry boats and the shipping in the harbor appeared to be dwarfed into toy vessels, and the black pennant of smoke from the chimneys of the steamers a narrow ribbon. The jutting southern projection of Angel Island rested on the water like a floating bridge, and Alcatraz a mere speck on the smooth expanse. For all this diminution everything was distinct. The furrowed sides of Tamalpais were as clearly cut as would be shown in a photographic view, and the cloud-veil on the summit so diaphanous as not to obscure the waving outline. To the eastward Mount Diablo loomed up high above the intervening hills, and in that direction the valleys are hid. It is the intention of Colonel Thornton to build an observatory on this elevation, with a bridle path, and it may be a carriage road, from the house in the valley. It will be well worthy of a journey from San Francisco, and a daybreak ascent to see the glorious prospect as the sun gilds the top of the mountains, and throws golden streamers across the Pacific, and then a sunset on these long June days when the glowing orb drops into the ocean in a halo of glory, while the shadows are heavy on the dark side of Tamalpais will be still more entrancing, if not so brilliant as the morning awakening. Not so poetical, perhaps, as the sheen of water, the lights and shadows of the mountains, plains and valleys were the cattle grazing contentedly on the sheltered side of the peak. This was the division that roam at will with their calves at foot, and the youngsters which have the channel island blood have the finish of deer and lend a charm to the scene by their life and vivacity. There is a "hit" of coloring, too, in the fawn and the red and the white, and conspicuous amongst these was a part-hred Holstein with the striking contrast of intense black and purest of white. There is time before the evening falls to take a look at the ground for the training track, and though it will be difficult to find room for more than a half-mile course that will be good enough for the education of the trotters and slow gallops, and there is a chance to extend the run at the finish of the work by curving around the hill from the turn and following the grade up past the barns. We have a good deal of faith in the correctness of the idea of English trainers that it is better to have an opportunity to run up the grade than to train on a level course. The claim that the wind is cleared without so much strain on the forelegs is surely based on good ground, and though some argue that the speed is diminished, there is no evidence of that being well-founded from the results which follow the English system. Although the sun rose bright the next morning, it was not long before the welcome prospects were overcome by gloomy clouds, and again there was the repetition of the somewhat anomalous thing in California of rain when June was well advanced. Not much water falling, but a drizzle that might end in another severe damage to hay that was cut since the former storm. There were fifty acres down on Rancho Resaca, and that which was still awaiting the mower was shooting up and up until it looked as though it would grow out of all proportion under the pluvial ministrations, and be too coarse for first rate forage. Oats on the hillside were more than six feet from the root to the end of tassel, and the wheat, also designed for hay, was growing apace. The morning was pleasant withal, and with visits to the stable and confabs on the veranda, and discussions on horse topics interspersed with talks on breeding and farming generally, the time passed pleasantly. The Lillie R. filly was critically examined, and the conclusion reached that she must race. Of course the young Anteo from a mare by Geo. M. Patchen, Jr., came in for a full share of attention, and after making due allowance for favoritism, we have no hesitation in pronouncing him an extra good one. The foal being so promising and the mare

having been bought from James McCord, the colt will be named "McCord," and there is little question that he will be worthy of the appellation. Shortly after noon there was a clearing up, and the journey homeward was by the route we should have taken at first. Down the valley of San Pablo the drive is very pleasant, the road smooth and without steep grades. Doublecross jogged along with a satisfied air, very different from what he showed when climbing the mountain through the gorge of Temescal.

#### Close of the Volume.

With this number Volume IV. of the *Breeder and Sportsman* comes to a close. One hundred and three numbers are the count since on the first day of July, 1882, the first was issued from the press. Two years is quite a space in the history of a paper, and to have safely passed this period is something to be gratified with. Like many other ventures newspapers, and especially those which can be termed class papers, have to struggle for a place in the busy world. The struggle is intensified when the field is comparatively small, and with a home population that does not equal that of one of the large Eastern cities, it is not expected that there can be a front place gained at a bound. Notwithstanding the drawback of a limited population, we felt assured that the interests which this paper was intended to subserve were an important feature in Pacific Coast affairs, and that this importance warranted the establishment of a journal which would aid in the development of natural resources superior to those of any country in the world. It is still more gratifying to write that our efforts have elicited encomiums, and that we have been cheered with kind words and good wishes.

The retrospect is satisfactory, so far as keeping the promise that the *Breeder and Sportsman* should not contain anything which would be improper to be read in the family circle, and that everything has been excluded which has a tendency to bring legitimate sports into disrepute. A perusal of the copious index that is given this week, will prove that the field occupied has been extensive, and that all of the topics which come within the scope of the paper have been duly considered. It has been, and is the intention to enlarge the paper when circumstances would warrant the outlay, and we were greatly in hopes that the fifth volume would inaugurate the change. It may be that this can be accomplished within a short time, and that by the first of September we can add four, and perhaps, eight pages. This will depend on the consummation of a scheme which we have in view, and which is fairly under way. There is a steady augmentation to the list of subscribers, and in this respect the result has been fully up to expectations. In others we have been disappointed, and support which we had right to calculate upon has been withheld. Not a dollar outside of legitimate business has been received. Assistance has been proffered, and though the offer did not imply any obligation which would interfere with the independent course determined upon, and though the kindness was cordially appreciated, it was declined with heartfelt thanks.

The enlargement of the paper is for the purpose of securing more space for the various departments, especially to those which are of the greatest interest to farmers and stockowners. Field sports will also be given more room, and while the extension will be liberal in the direction implied, there will be no necessity for curtailing in any of the departments. We feel the utmost confidence in predicting that the plan will be carried out at the time mentioned, and with sincere thanks for the support already given, and with grateful feelings for the kind words spoken, the fourth volume is closed with bright anticipations for those that are to follow.

#### Arrivals at Rancho del Paso.

Last Sunday a carload of thoroughbred horses arrived at Rancho del Paso from the East, and among the lot were the following high bred yearlings:

Tyranny (sister to Tyrant) chestnut filly, by imp. Great Tom, dam Mozelle by Jack Malone from Gazelle by imp. Albion.

Trellis, chesnut filly, by imp. Great Tom, dam Madeira by Jack Malone from Woodbine by Lexington.

Epicure, bay colt, by Enquirer, dam Benicia by Jack Malone from Albion by imp. Albion.

Brown colt by Virgil, dam Ulrica by Lexington from imp. Emilia by Young Emilius.

Bay filly by Glenelg, dam Stamps by Lexington from Mildred by imp. Glencoe.

Chestnut colt by imp. Kyrle Daly, dam Columbia by imp. Bonnie Scotland from Young Fashion by imp. Monarch.

Six brood-mares and the three-year-old Marc Daly completed the company. Marc Daly having injured one of his feet had to be stopped in his work and has been brought home to recuperate.

#### Our Horses in the East.

The telegraphic accounts are rather meagre in relation to our horses in the East, though there is enough to show that altogether they are doing very well. Fallen Leaf won the Illinois Oaks, at Chicago, very handily in 2:11½, and the same day Gano won the "Inaugural Rush" in 1:43. On the second day of the meeting Verano won the Nursery Stakes in 1:44¾, and though Gano and Shenandoah have been beaten, there is a good chance for them to redeem their laurels before the Chicago racing is finished. Verano is a sister to Grismer, being by Grinstead from Jennie D. The Santa Anita filly Savanna has been second twice so that she is likely to get a better position before long. Lucky B. ran second in the cup, last Thursday, and as he had to be thrown out of work on account of a split hoof, he could not have been in any order. The same trouble may have been the case with Shenandoah as he certainly can go 1½ miles when in proper condition. In the Board of Trade Handicap he gave up after a mile and a quarter was run.

The report of to-day's races of the Washington Park Club will be anxiously looked for, as the American Derby is to be decided, and there are strong hopes that it will be placed to the credit of California. Fallen Leaf has incurred a penalty of seven pounds, and so has Loftin, one of her most dangerous competitors. Mr. Baldwin has five to choose from, and it may be that Freda, Shenandoah or Savanna will carry his colors. Should Freda be in order, and in as good form as last year, she will stand a first-rate chance, fully as good as Fallen Leaf without any penalty. In all probability Mr. Baldwin will start two, and it may be three will be selected to do battle for the Pacific slope. Rancho del Paso would have had a good chance if Mare Daly had not met with the accident that caused him to be sent home, and it may be that Sweetbrier may don the red jacket and white polka dots, and carry them to victory.

#### Periods of Gestation.

Leo Lynch, of San Ramon, Contra Costa County, California, has had an unusual experience with two of his mares this season. In a note mailed May 22d, he says: "My black mare Bessie, by Captain Webster, dropped this morning 'by Anteeo' as fine a filly as I ever saw. I think it will be a brown or black with tan flanks, one white hind foot, a small white spot on nose and forehead. Although coming thirteen days before time, it is as bright and lively a colt as one would want to see, and measures about forty inches in height. I claim the name of Ramona for her."

The second note is dated June 18th, and the following is a copy: "My brown mare Vic, by Hendrickson's Washington, foaled a filly this morning by Kansas Central. She was bred May 20th, 1883, making thirteen months, less two days. There was but one service, consequently no mistake. The colt is a fine one in size and as lively as a cricket."

Here then was a divergence of seventy-two days in two animals, owned by one man, in one season. Mr. Tessier kept a record of 582 mares, the shortest period was 287 days, the longest 419, and the average 330 days.

In twenty-five mares which Mr. Gazot recorded, the shortest period was 324 days, the longest 367, an average of 343 days. The average of Mr. Gazot is nearer what we have found in our breeding operations, and the only foal that came before the eleven months was a horse, though there is a general opinion that the male is carried longer than a female. This idea is a not sustained by the record so far as we can learn.

#### Meeting of Board of Trustees P. C. B.-H. A.

There will be a meeting of the Trustees of the Pacific Coast Blood-Horse Association at the editorial rooms of the *Breeder and Sportsman*, on Monday, July 7th, at 2 P. M. Besides other business to be transacted a programme will be fixed upon for the Fall Meeting. In order that the California horses now in the East can have a chance to participate, the date will probably be fixed after all of the fairs have been held, and this will also secure better weather than when the trade winds prevail.

On the first of August the "fixed events" close, and this is likely to be the date fixed for the closing of additional stakes and purses to make up the complement for the Fall Meeting. The fixed events are the Winters, *Spirit of the Times*, Vestal and Fame stakes for 1886, and the California, Gano, Ladies and Finigan stakes for 1885. All of these stakes are for foals of 1883.

There is another of the regular events, viz.: The Baldwin Stake, a dash of four miles, and this is likely to have a greater number of nominations than in previous years.

#### The Fairs.

All that is necessary at present is to call attention to the advertisements of the fairs which appear in this paper, as the entries do not close until August 1st. In the main speed programmes are very good, and sure to bring out a large number of entries, especially in the trotting classes.

#### Answers to Correspondents.

Question answered only through these columns. No replies by mail or telegraph.

Honolulu, Honolulu, H. I.

Will you kindly answer the following questions through the columns of your valuable paper: 1st, How many months does a mare carry foal? 2d, What is the best food for a mare after foaling, also food for foal and what quantity? 3d, Is there any way of testing if a mare is in foal? 4th, How long is it safe to use a carriage mare that is in foal? 5th, I have a valuable dog that has broken out all over with small sores, that are bleeding most of the time and the hair drops off all round them; what disease is it, and what remedy should I use?

Answer. 1st, Eleven months is the nearest that can be expressed in months. There is great disparity in the length of time, however, but as a general rule the time exceeds eleven months. This season Leo Lynch, of San Ramon, had one mare that foaled eleven days before the expiration of "the time," another which went within two days of thirteen months. There could be no mistake in either case. 2d, Good pasture and sound oats is the best food for a mare. Bran is apt to give the foal trouble from "conning." Crashed oats at first, but when a few weeks old foals will masticate the oats whole, and we prefer to feed them without preparation. Give as much as will be eaten heartily. 3d, There are no positive tests that are safe. After six or seven months the indications are usually plain, and between five and six months there is a slight enlargement of the mammary glands. 4th, Carefully feed, a carriage mare can be driven within two months of foaling. 5th, Probably surfeit. Give laxative medicines, cleanse thoroughly, and if near salt water baths will be beneficial. Fowler's Solution in small doses may be given, and the food restricted.

H. W. P., Healdsburg:

There is a distemper in this neighborhood that seems to be very malignant in its form. A yearling or two-year-old colt will be looking splendidly when suddenly they will appear to have lost all appetite, and in two or three days will look like skeletons of their former selves. The discharge at the nose is very thick, and comes out of the nostrils in large chunks. Does not appear to smell disagreeable. The animal seems to be choked up and sometimes breathes with difficulty. Do you know any remedy? Also, do you know any preventive for animals running in same pasture, but which have been removed, and up to present date show no signs of the disease.

Answer. The disease is what is called in the Eastern States "distemper," and in England "strangles." It is very prevalent in California this season, and scarcely a stock farm but what is troubled with it. There are numerous remedies given in the books, but no preventive when the animals run together. Good care and liberal feeding of the dam has been the most efficient in our practice. Enmigrating with the smoke from a mixture of turpentine and tar has oftentimes given immediate relief. Should abscesses form, they must be lanced as soon as there is a secretion of pus.

I. H. L., San Luis Obispo.

I have profited by your advice in your book "Tip and Toe Weights" and am now using on a two-year-old colt of mine tips both in front and behind. The first time I had him shod I had steel tips in front and light shoes behind. He is a pacer and he improved very fast, although I had to use quarter-boots to keep him off his quarters. The tips worked so well in front that I determined to put them on behind. I had a pair of steel tips put on behind, and now he travels away over with his hind feet and seems to be afraid to "square away" but goes shuffling along. The tips keep his feet in so good a condition that I do not want to leave them off, but I must have more weight in front. Please let me know what kind of weights you think are the best and where I can procure them. I think I want about six ounces.

Answer. Our preference is for the weights described in the book referred to. They entail the use of quarter boots, however, in order to secure them properly. For colts the "Stick-fast" is good. The advertising column will direct you where to find them.

W. T. T., Point Arena, Cal.

The trouble you mention is not so prevalent as many imagine, and it may be that to other causes is due the lack of vigor. Of the many entire horses we have owned not a single one has been addicted to the practice, therefore we are skeptical in relation to the prevalence which many claim. The wearing of uets has become so general that people are prone to think there is a necessity when uets exist, and, unquestionably, in many instances bad results follow the application. Our advice is to feed liberally and give plenty of exercise. Should you have a paddock, (corrud), to turn him in, let him run there in preference to keeping in a stall or box. Should his exercise cause profuse perspiration, let it be slower, and his feed good old hay and sound oats. Should you deem the nights too cold to run in the paddock, take him up when the sun sets. If clothing is worn in the stable gradually accustom him to go without it. Place a box of table salt where he can get it at pleasure, and occasionally give green food—corn blades are the best.

F. W. L., St. Helena.

There is no Hambletonian cross in Sample's pedigree. He was sired by Weyland Forrest, dam Tinsley Maid, by Flax-tail; second dam Fanuy Fern, by Irwin's Tuckahoe, son of Herod's Tuckahoe, by Tuckahoe, by Florizel, by Diomed; third dam by Leffler's Consul, son of Shepard's Consul, by Bond's First Consul. Weyland Forrest, by Alexander's Edwin Forrest, dam by Sir Charles; second dam claimed to be thoroughbred.

Flaxtail by Pruden's Blue Bull, dam's breeding unknown. Alexander's Edwin Forrest, by Bay Kentucky Hunter, dam by Young Highlander (Watkin's); second dam by Duroc; third dam by imp. Meessenger.

W., Santa Rosa.

Abbie Williamson's next foal after Tillie C. was Forest King, foaled April 22d, 1879. He is a bay horse with star in forehead and near fore foot white.

Fred B., Windsor.

We have no proofs at hand, but believe the pedigree to be close to be correct.

**POULTRY.**

**Pedigreeing Improved Poultry.**

It is not so easy a matter to keep exact pedigrees of poultry as it is of the larger and less prolific farm animals; yet in the case of improved poultry some record of their breeding is necessary.

Uniformity or improvement in any particular can be attained only by successive, judicious matings. Without a record or remembrance of the individual animals used as breeders from year to year, there is no certainty of any advancement nor even of the best bred stock continuing to reproduce animals as good as the parent stock.

In the breeding of improved poultry, however, it is not always indispensable that the individual sire and dam of any given animal be known in order to determine with what other of the same breed it should be mated. The blood or breeding may be sufficiently known and recorded without this exact knowledge, as may be seen from what follows.

It is not a difficult matter to have half a dozen or more hens or pullets of exactly the same breeding, that is, the produce of one particular hen known to have been mated with a particular cock. These may be had occasionally, or as often as needed, to keep up particular lines of breeding; but he who undertakes to save the eggs from each of these separately, and to hatch and rear the chicks so as to know the exact dam of each chick, will find himself with no small task on his hands. The time necessarily spent in keeping such exact pedigrees of all the increase, even to the second generation, would, in the case of poultry, make the chicks cost more than they were worth.

Instead of this the eggs from such a group of hens or pullets may as well, for all practical purposes, be kept together, and the chicks reared from them counted as if the produce of one hen. So, also, two or more cockerels that are full brothers to each other may be kept with a sufficient number of hens or pullets, and the chicks reckoned as if all sired by one bird.

In selecting pullets from the produce of a yard of full sisters, for breeding purposes the following year, care should be taken to choose those having the closest family likeness, and the nearest after the ideal or type of breeding it is desired to establish or to perpetuate. In this way a vast amount of time and trouble is saved, since the blood and breeding are sufficiently known to insure results scarcely less satisfactory than when an exact record of each individual sire and dam has been kept.

Much of the breeding of the "Haw Hill" Light Brahmas during the past twenty years has been done in this way. By no other method would it have been possible to furnish, at such reasonable rates, the great numbers of superior birds that have been sent to different States from the "Haw Hill" yards.

To show more fully this plan of breeding, the following illustrations in actual management are given: In 1883, seven choice hens all of the same breeding were mated with the cockerel Johnny Bonquet, and booked as the "Sevens." In the same yard with these were two other hens of different breeding from the Sevens, but full sisters to each other. One of these was named Hope and the other Glenn. Every morning they were separated from the Sevens until after laying time, and as the eggs laid by the one were easily distinguished from those laid by the other, they were both allowed the same nest. From this yard therefore there were raised three lots of chicks in 1883, viz.: those from the Sevens, those from Hope, and those from Glenn; all sired by the same cockerel, Johnny Bonquet.

In the Spring of 1884 twelve of the of the largest and best of the 1883 pullets from the Sevens were bred back to their sire, and the chicks from these booked as from the Twelves, and conated as the produce of one hen. At the same time another yard was made up by mating an 1883 cockerel from the Glenn hen, and named Johnny Glenn, with the Hope hen and her 1883 pullets. The eggs laid by the Hope hen were saved and set by themselves, and the eggs from her pullets kept by themselves and reckoned as from one hen. A third yard was made up of the best pullets of 1883 from the Glenn hen, and the eggs from these kept together and treated as if from only one hen. A fourth yard of hens of still different breeding was mated with an 1883 cockerel named Johnny Hope, from the Hope hen. Thus in 1884 there are chicks from the Twelves, from Hope, from Hope pullets, from Glenn pullets, and from the Johnny Hope yard, all more or less related to the cock Johnny Bonquet; and their relationship among each other as fully known as can be desired when selections for mating another year are to be made. Besides these, there are chicks of 1884 from the original Sevens, bred this year to a Glenn cockerel.

This gives only in part the yards or matings during the years 1883 and 1884, but they are enough to show how improved poultry may be bred and pedigreeed with about as little trouble as most of the farm stock.

Managing in this way it is an easy matter to have hens or pullets of the same breeding in sufficient number for each yard, and yet have the yards not too nearly related to each other. In breeding for cockerels it is often well that special care be taken to save eggs from an unusually fine hen, or one of a particular line of breeding. This can be done without much trouble, by placing such a hen in a coop or pen by herself each day until after her laying time.—*Phil. Thrifton, in Rural World.*

A broody hen should not be allowed to indulge her propensities unless both she and her owner mean business. Sitting is exhaustive of vitality, partly because the hen at this time is so absorbed by her duties that she will not take time from the nest to eat or drink. If allowed to sit even three or four days they lose enough flesh so that they are not got quickly into condition for egg production again. As soon as the first broodiness is noticed, shut the hen up in a room where she has no chance to make a nest; feed liberally with wheat screenings and thickened milk. After two or three days she will begin to lay eggs on the floor, which is a sign that the time has come for setting her at liberty.

The common practice of breeding only from second brood turkeys, and those that are not fit to kill at New Year's is a very short-sighted policy. In nothing will a good selection pay better than in breeding this noble bird. In the wild state, where "the survival of the fittest" is the rule, gobblers weighing forty pounds are not infrequent, and some are on record weighing even fifty pounds. The prevailing custom of breeding from the smallest and cheapest, keeps our markets full of birds that do not weigh more than eight or ten pounds, dressed.

"Suppose," says an exchange, "you pay \$1.00 per day for help, and a good shovel costs an equal amount; but you retain the old one because you think it too good to throw away, although the man is only capable of doing three-fourths of a day's work with it. How much have you made in ten days by the saving? Suppose a new hoe costs sixty cents, yet you put the same man to work with the old one with which he can do three-fourths of a day's work. How much have you saved in ten days? And old rusty hoe will quite frequently cause a difference of a fourth of our labor. There is no rule of labor or economy about a farm that pays so large a percent. on the investment as that of taking care of, and keeping in order the tools we work with. A few minutes will suffice to clean off a hoe when we put it aside, and instead of getting heavy with rust and accumulated earth, it will get brighter and brighter with constant use and be a pleasure to handle instead of an extra burden and hindrance." This is a strong argument in favor of good implements.

Some years ago the territory of Arizona offered a reward to be paid the first person who would raise merchantable cotton to the amount of not less than 300 pounds to the acre, and there to be not less than five acres of the same. This reward has just been paid to Mr. Felix G. Hardwicke, who raised 3,390 pounds on seven acres of land in the Salt river valley, near Phoenix, southern Arizona.

**STALLIONS THOROUGHbred.**

The Thoroughbred Stallion

**WILDIDLE.**

By imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic (record of one mile, 1:24; at two years old), May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Deane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal. Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, Owner, or W. L. APPLEBY, Supl., P. O. Box 223. Santa Clara, Cal.

**STALLIONS**

—AT—

**RANCHO DEL PASO.**

For the Season of 1884.

Thoroughbreds.

**LONGFIELD.**

Chestnut horse, by MONARCHIST, be by Lexington. First dam, Dame Gourlay (Blue Gown), by Planet. Second dam, Flora G., by Lexington. Third dam, Esmy G., by imp. Margrave. Fourth dam, Lancer, by Lance. Fifth dam, Aurora, by Aratus. Sixth dam, Paragon, by imp. Buzzard. Seventh dam, Indiana, by Columbus (son of imp. Pantaloon). Eighth dam, Jane Hunt, by Hampton's Paragon. Ninth dam, Nell, by imp. Figure. Tenth dam, Slamerkin, by imp. Wildair. Eleventh dam, imp. Cub Mare, by Cub. Twelfth dam, Aramantibus, dam, by Second. Thirteenth dam, by Starling. Fourteenth dam, by Croft's Partner. Fifteenth dam, by Greyhound. At \$50 the season, due at time of service.

**JIM BROWNE.**

Chestnut horse, by FOSTER, be by Lexington. First dam, Flinch, by Hiawatha. Second dam, Fanny Bug, by imp. Ambassador. Third dam, Ida, by imp. Belsbazar. Fourth dam, Madame Bosley, by Sir Richard Tonson. Fifth dam, Nancy Nicol, by imp. Eagle. Sixth dam, Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Starling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by Jolly Roger. Twelfth dam, by imp. Partner. Thirteenth dam, imp. Monkey. Fourteenth dam, an imp. mare from the stud of Harrison of Brandon. At \$50 the season, due at time of service.

Trotting Stallions.

**ECHO.**

Bay horse, by RYSDYK'S HAMBLETONIAN. First dam, Fanny Felter, by Magnolia, son of Seely's American Star. Second dam, by Webber's Kentucky Whip. Third dam, by Shakespeare, son of Ducoc, and out of a mare by Plato son of imp. Messenger. At \$100 the season, due at time of service.

**ALGONA.**

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian. First dam, Emma Kinkead, by Consort, son of Cassius M. Clay. Second dam, Edie Dean, by Mambrino Chief. Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy. At \$100 the season, due at time of service.

**ALASKA.**

Brown horse, by ELECTIONEER. First dam, by Washington, he by Geo. M. Patcben. Second dam, by Williamson's Belmont. At \$50 the season, due at time of service. The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents. John Mackey, Superintendent, Sacramento, Cal.

**THOROUGHbred STALLION**

**X X.**

Pedigree.

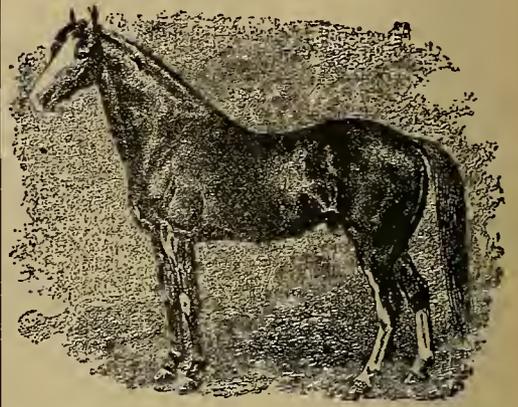

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM. First dam, Columbia, by imported Bonnie Scotland. Second dam, Young Fashion, by imported Monarch. Third dam, Fashion, by imported Trustee. Fourth dam, Bonnets o' Blue, by Sir Charles. Fifth dam, Reality, by Sir Archy. Sixth dam, by imported Medley. Seventh dam, by imported Centinel. Eighth dam, by Mark Anthony. Ninth dam, by imported Jann. Tenth dam, by imported Monkey. Eleventh dam, by imported Silvereye. Twelfth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Anteo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauanita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding basas much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, big form, and of the best disposition. Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

**JOSEPH CAIRN SIMPSON,**

Oakland or 508 Montgomery Street, San Francisco.

The Thoroughbred Stallion

**JOE HOOKER.**

BY MONDAY.

First dam Mayflower, by imp. Eclipse. Second dam Hennie Farrow, by imp. Shamrock. Third dam Ida, by imp. Belsbazar. Fourth dam Gamma's dam, by Sir Richard. Fifth dam, by imp. Eagle. Sixth dam, by Partner, by Wilkes' Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Starling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by imp. Jolly Roger. Twelfth dam, by Partner. Thirteenth dam, by imp. Monkey. Fourteenth dam, imp. mare from the stud of Harrison of Brandon.

TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freeport road. This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1883.

**THEO. WINTERS,** Sacramento, Cal.

**TROTTING STALLIONS.**

Standard Trotting Stallion

**BILLY HAYWARD, 489,**

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

**JAS. J. MARTIN,** Agent.

**THE ELECTIONEER STALLION**

**STANFORD**

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

Terms. \$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 151 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25), he by McCracken's Dave Hill, be by Red Lion, and be by Vermont Black Hawk. Second dam, Kitty, by Owen Dale, son of Belmont. Dam of Dave Hill, Jr., by old St. Lawrence, granddam thoroughbred. Dam of Dave Hill by Vermont Hambletonian. Dam of Red Lion by Vermont Hambletonian.

**J. J. FAIRBANKS,** Agent.

Oakland, January 18, 1884.

CRICKET.

The Scratch Match.

A scratch match was played last Saturday, in which a great many new players participated. Sides were chosen by Waterman and Benjamin. Waterman's side were the first to handle the willow, and notwithstanding the loss of some of their best players early in the game, managed the respectable score of 69 runs. Waterman once again was top score, with 22 runs. Benjamin's side, which had dwindled down in number, owing to the lateness of the hour, scored 39. Carr made 5 in excellent style and clearly demonstrated that he is a long way the most scientific batsman on the coast. Sanderson's many admirers were very pained to see the veteran bowled out so early in the innings, but it is evident, judging by his performances the past few seasons, that the former leviathan of California cricket must soon give way to the rising colts of the present season. A veteran team is now in order. Captain Smith, Richardson and Samuel batted well. Francis and Ross are new howlers of great promise.

The Cricket Trophy.

The Cricket Trophy presented by the popular and enthusiastic President of the Merion Cricket Club for competition between that club and their old opponents the Occidents, will be on exhibition at the grounds to-day. It is a handsome water set consisting of pitcher, goblet and bowl of beaten silver, on which is raised in gold the symbols of cricket, namely: bat, wickets and ball. It is probably as fine an incentive for good play as has been offered in this country, and reflects great credit on the designer and manufacturer, Mr. A. W. Stot, No. 3 Montgomery Street. "Palmam qui meruit ferat."

The Trophy Match.

The second contest for the Harrison Trophy will take place this afternoon at the Olympic Grounds, Oakland. We understand that both clubs are endeavoring to put their best team in the field, and as the ground is in better condition than heretofore, a very satisfactory game should be the result. Game called at two P. M. sharp.

By arrangement with Geo. B. Sperry, Esq., of Stockton, the members of the Merion Cricket Club who are going up to attend their club sports at that city on the Fourth of July, will play a cricket match with a team of Stockton gentlemen. It is hoped that this will revive interest among the Stockton cricketers, who were erstwhile most enthusiastic.

ATHLETIC.

The Private Wrestle.

The match between Tom Cannon and John O'Hanlan came off at the Tivoli Opera House last Wednesday afternoon, in the presence of one hundred people, representative of the press and friends of the contestants. O'Hanlan, whose patronymic is so decidedly Hibernian, is a native of Alsace, and with his physical advantages may, under Bauer's coaching, in time, be a hard man to handle, but in this match he was obviously in an enervated state both as to condition and knowledge of the art. Cannon was in good form, and made short work of the business. He secured the first fall in six minutes, and the second in less than three minutes. Billy Jordan officiated as master of ceremonies, and D. L. Levy as referee. At the close Cannon expressed his willingness to make a match with Bauer, but Bauer replied that he was not in wrestling condition at present; he might later on. Cannon will wrestle a second match with Whittier at the Grand Opera House next Wednesday evening. He is a good man and a game one, and if he vanquishes Whittier in this second match he will have fairly earned a place in the first rank.

The Stockton Meeting.

The athletic meeting to be held at Stockton, on the Fourth of July, by the Merion Club, is already an assured success. The entry lists are rapidly filling up, and a great many men will make their appearance on the track for the first time. The Stocktonians will be strongly represented in the bicycle events. Intending competitors are once again reminded that entries close this afternoon at 4 P. M., at the office of this paper.

The chestnut mare, Laura, by Shannon, dam Folly, by Plauet, died at Wildside Farm, Santa Clara county, on the 20th inst., of lung fever. She was owned by Delaney & Ayree, and was sent to the farm to be bred to Wildside. She was four years old and bred by James B. Chase, of this city. The spirit of ill luck still clings to Billy, who is at present in Oregon.

St. Gatten, the dead heater for the Derby, won the gold vase, at Ascot, on the 10th, beating the favorite Carrie Roy by a length, Tristan third. The objection made by Sir John Willoughby against St. Gatten on account of insufficient description in the Derby nomination was withdrawn before any investigation began.

The Stockton Programme.

Although we have received no official copy of the Stockton programme for this season, the following resume clipped from the Stockton Independent is probably correct:

District Trotting.—For the 2:36 class, \$600; two-year-old class, \$600; three-year-old class, \$600; four-year-old class, \$600.

District Running.—Two-year-old, mile dash, \$600; free for all, mile and repeat, \$700.

A stallion trotting purse of \$2,000 will be offered, free for all in the United States, and \$500 will be added for the winner, if the best stallion time is beaten.

Pacific Coast Trotting.—Free for all, \$1,400; 2:22 class, \$1,400; 2:24 class, \$1,200; 2:27 class, \$1,200; 2:36 class, \$1,200; two-year-olds, \$1,200 three-year-olds, \$1,200; four-year-olds, \$1,200. Pacing—2:25 class, \$700.

Pacific Coast Running.—Free for all, mile and repeat, \$1,000, with \$200 added if 1:14 1/2 is beaten; selling race, mile and repeat, \$800; novelty, 1 1/2 miles, \$700; hurdle race, mile and repeat, \$800.

Foals.

At Lanrel Dale Farm, Sonoma Co. Property of H. W. Peck.

June 11th, 1884, light brown filly, white spot in forehead, by Belnor, dam Danville Maid, by Don Juan, he by Speculation; grandam by Niagara.

At Rancho del Paso. Property of J. B. Haggin.

Trotters.

June 14th, bay filly, by Echo, dam Lady Gray, by Algona.

June 14th, brown colt, few white hairs in forehead, right hind foot white, by Alaska, dam Grayling, by The Moor; grandam by American Boy, Jr.; great-grandam by Winfield Scott.

June 20th, bay colt, by Algona, dam, dam of Cairo, by Odd Fellow.

Thoroughbred.

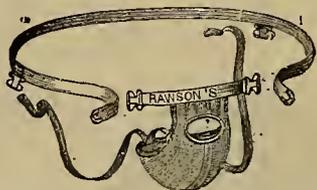

May 21st, chestnut filly, by Longfield, dam Mooney mare, by Langford.

DRAMA.

The Vienna Garden.

The attractions at the other theatres, especially at the Baldwin and California, have reduced the attendance at the other establishments very sensibly during the week. The vocal performances at the Vienna, however, have been very good, especially on the part of Miss Cella Davenport and Mr. Morant. Miss Davenport has a good voice, well cultivated, and while always singing with effect and sweetness, shows unusual good taste in her selections. The best thing by the quartette were Morant's solo and the duet, "See the Pale Moon," by Wyatt and Morant. Mr. Wetter's solo, "Thy Sentinel Am I," was good. We are glad to hear, the Gypsy Band returns to the Vienna after a successful trip to the interior. The interludes will be given by the Tyroleans whose singing was so popular while acting in the same capacity with the Spanish Students. We think, next week, will show our theory is right, that the audiences at the Vienna, from their social standing will always patronize good music, and that they do not care for hackneyed, worn-out minstrel performance.

ASHLAND PARK TROTTING STUD

NEAR LEXINGTON, KY. B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM FOR thorough training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambriño Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Blackwood, Sentinel, American Clay, Edwin Forrest, North Star Mambriño, Bourbon Chief, Regular, Earl, aim is to possess nothing that does not trace through, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address B. J. TREACY, Lexington, Ky.

Speed Programme

REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.

Horses distancing the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the Judges.

The Pacific Coast Blood Horse Association Rules to govern all Running Races.

Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock P. M.

In all Running Races the second horse saves entrance.

No money paid for a race without a contest.

All entries for Races to close with the Secretary or President, at Chico, July 1st, 1884, at ten o'clock P. M.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantees that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

C. C. HANSON, PRESIDENT. ROLAND DILLER, SECRETARY.

Notice.

STOCKHOLDERS' RACE.

No. 14.—Trotting, stockholders' purse \$250, entrance fee \$25. This race to be trotted during the Fair with at least one day's notice before race. Free for all horses owned by stockholders of this association on the first day of June, 1884. The horse winning the first heat take \$125 and go to the stable, the horse winning second heat to take \$100 and go to stable, the horse winning third heat to take \$25 and close the race.

Remarks and Conditions.

All trotting and pacing races are the best three in five; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse to accompany nomination. Trotting and pacing purses divided at the rate of sixty per cent. to first horse thirty per cent. to second, and ten per cent. to third.

National Association rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over, shall be entitled only to the purse. In one instance, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

In all races, entries not declared out by six P. M. of the day preceding the race, shall be required to start. When there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Except as otherwise specified, running races will be conducted under the rules of the Pacific Coast Blood Horse Association.

Non-starters in running races will be held for entrance under rule 3.

Racing colors to be named in entries.

In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries, to close with the Secretary on Saturday, August 2, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

C. H. BANE, Secretary. I. DETURK, President.

WILL ACTON, Asst. Sect'y.

**Important Sale of**  
**Thoroughbred Horses.**

BY DIRECTION OF  
**THEODORE WINTERS, ESQ.**  
We will Offer for Sale  
Thursday, July 17th, 1884.  
At the Stables of C. H. SHEAR, opposite Agricultural Park, Sacramento,  
Seventeen Head of Thoroughbred Horses  
COMPRISING  
All his two-year olds and yearlings, together with the crack three-year-old Prince of Norfolk and the famous hurdle mare Hattie B.  
It is Mr. Winters positive intention to retire from the turf and confine himself strictly to breeding. Hence his entire string will be offered without reserve. The colts in training will be galloped until day of sale, that they may be kept in order for racing purposes. The horses may be seen previous to sale at the Winters' Ranch, Riverside Road, near Sacramento. A competent Veterinary will be in attendance, to make all examinations desired by purchasers. Killip & Co. will execute commissions for intending buyers who cannot be present.  
Catalogues giving full pedigrees, etc., will shortly be issued. For information apply  
**KILLIP & CO.,**  
Live Stock Auctioneers,  
116 Montgomery Street, S. F.

**AUCTION SALE**

—OF—  
Pure Bred Jersey Cattle,  
THE PROPERTY OF  
**ROBERT BECK, ESQ.,**  
—TO TAKE PLACE—  
Thursday, July 17, 1884.

IMMEDIATELY UPON THE CONCLUSION OF THE sale of Mr. Winters' horses, we will offer twenty head of THOROUGHBRED JERSEY BULLS, COWS and HEIFERS, all registered in the American Jersey Cattle Club, and in Pacific Coast Jersey Cattle Club Registers. These cattle are of the choicest milk strains, being chiefly descended from Touchstone, the most famous Jersey bull imported into California. Several high grade cows and heifers will also be offered.  
The sale will take place at stables of C. H. Shear, opposite Agricultural Park, Sacramento.  
Catalogues giving pedigree and full information will be issued in a few days.
